**If a student passes more than one AP exam in Physics, only 6 units of credit will be granted, and only 4 of those units will be applied to GE.
**College Level Exam Program - CLEP**

Requires score of at least 50 for subject exams. Students may not receive more than 30 units of CLEP credit.

### The International Baccalaureate (IB)

Students who present the following official higher level IB Exam scores of four or better, taken before college matriculation, will be granted up to six semester units of lower division baccalaureate credit. The course equivalence and satisfaction of requirements vary.

**Requires score of 4-7 on higher level exams for any credit to be granted.** Course equivalence dependent on major advisor for major, minor, or support credit.

Writing Skills Test (WST)

All students, regardless of where they began their college studies, are required by the California State University to satisfy an upper division written communication requirement. At SJSU the writing requirement has two parts: passing the WST and passing a 100W course.

- A satisfactory score on the Writing Skills Test (WST) is required prior to enrollment in Written Communication II (100W courses) and all SJSU Studies (advanced general education, Areas R, S, and V) courses. To make timely progress to their degree, students should register for, and take, the first available WST they can after passing English 1A and 1B (or equivalents).
- The WST requirement cannot be waived.
- Be sure you have finished English 001A and English 001B, or equivalent courses.
- High WST scores may also be used to waive the required Written Communication II course (100W). Some majors do not permit waiving of 100W no matter what score the student receives on the WST. Individual score reports explain each student’s status.

Consult testing.sjsu.edu for the most current information about the WST. The following students do not need to take the WST to enroll in any classes:

1. Students who have completed the Graduate Writing Assessment Requirement (GWAR) at SJSU or at another CSU campus as a matriculated student at the time of completion. Note: If you have satisfied the GWAR at another CSU campus, your department may still require that you take 100W to satisfy the requirements of the major, even though the university GWAR requirement has been met;
2. Students who have earned a baccalaureate degree from a regionally accredited U.S. college or university;
3. Students who have received an approved Undergraduate Requirement Request to grant equivalency to an upper division composition course completed at another university.

For students who have failed the WST at least once, SJSU offers courses, ENGL 100A and LLD 100A that satisfy the WST requirement if passed with a “C” or better.

If you have questions about your status, contact the Testing Office at testing-office@sjsu.edu

WST Scores

Scores will be reported on your MySJSU account. See testing.sjsu.edu for detailed WST score information.

How to prepare for this exam

- WST information, test dates, passing scores, sample test questions, and registration materials may be obtained from testing.sjsu.edu/wst/wstreg/index.html
- Peer Connections offers WST preparation: see http://peerconnections.sjsu.edu
- The Writing Center offers tutorial help and workshops on various writing topics: see www.sjsu.edu/writingcenter/
- Purchase and review The California State University Writing Proficiency Exams, published by Barron’s and available at the Spartan Bookstore.
To register

1. Register at least 3-1/2 weeks in advance at https://testing.sjsu.edu

<table>

</tbody>
</table>

Students who require disability-related accommodations must register four weeks prior to the posted test date.

2. The non-refundable test fee is $38.00, payable at the Bursar’s Office, Student Services Center or online via credit card.

Test Accommodations

Students requiring test accommodations must submit the appropriate documentation to the Accessible Education Center (AEC). To ensure accommodations can be made, an appointment must be scheduled with an AEC counselor at least one month prior to a standardized or placement exam to determine eligibility and prescribe test accommodations. Students unable to meet this deadline should contact the AEC as soon as possible. See http://www.sjsu.edu/aec/for details.

Transfer Credit

SJSU has extensive articulation with many colleges and universities in California. Course-to-course articulation agreements identify courses of comparable content for major and minor requirements for undergraduate degree programs at SJSU. The articulation agreement assures students that the approved transfer courses on the transfer campus will be accepted “in lieu of” the comparable SJSU courses. Information about the courses for each campus that SJSU has agreements with can be found at our comprehensive on-line transfer planning site: http://transfer.sjsu.edu.

Credit from Other Colleges and Universities

California Community Colleges will certify to The California State University those courses that are of baccalaureate level and therefore transferable for at least elective credit. Credits earned in accredited community colleges will be evaluated by the Office of Admissions in accordance with Title 5 of the California Code of Regulations, Section 40409: A maximum of 70 semester units earned in a community college may be applied toward the degree, with the following limitations:

(a) No upper division credit may be allowed for courses taken at a community college.

(b) No credit may be allowed for professional courses in education taken at a community college, other than an introduction to education course.

Credits earned at a regionally accredited colleges will be evaluated by the Office of Admissions and advanced standing allowed on the basis of the evidence submitted. Credit toward the fulfillment of graduation requirements will be allowed only insofar as the courses satisfactorily completed meet the standards and the requirements of the basic course pattern of the college.

Credits earned at a non-accredited colleges may be accepted as a basis for advanced standing only to the extent that the applicant can demonstrate to the satisfaction of the university that a satisfactory degree of proficiency has been attained in the course in question.

For details on transferring graduate credits from other institutions, see section on Graduate Admission Procedures and Policies.
Credit for Military Training

Credit granted for military training is based on recommendations of A Guide to the Evaluation of Educational Experiences in the Armed Services, Commission on Accreditation of Service Experiences, American Council on Education, Washington, D.C. The Commission evaluates only formal service school courses at the collegiate level.

Students who desire credit must submit an 8-1/2” x 11” facsimile of the separation papers (usually DD214). Facsimiles of course-completion certificates may also be filed with information from the student giving the beginning and ending dates of the courses, numbers of weeks and location of the installation where taken.

Credit for Extended Studies

Special Session

Courses numbered 100-399 earn degree and residence credit. While the university may accept this work toward baccalaureate and graduate degrees, it is a matter of individual department evaluation as to whether such work is accepted as applying toward the major or minor. A record of this work is maintained by the Registrar’s Office. Transcripts are available once credit is posted.

Continuing Education Units (CEUs)

Courses numbered 400-499 offer Continuing Education Units (CEUs), a nationally-recognized unit of measurement for a variety of noncredit programs applying toward licensure, promotion or career advancement. CEUs are not applicable to a degree nor to residence unit requirements. A record of this work is maintained by the College of International and Extended Studies. Transcripts are available once credit is posted. Contact College of International and Extended Studies.

Non-Credit Classes

Courses numbered 800-899 offer no credit and are not applicable toward degrees, credentials or residence unit requirements. A record is not maintained by the Registrar’s Office and transcripts are not available.

Credit for Noncollegiate Instruction

San José State University grants undergraduate degree credit for successful completion of noncollegiate instruction, either military or civilian, appropriate to the baccalaureate degree, that has been recommended by the Commission on Educational Credit and Credentials of the American Council on Education. The numbers of units allowed are those recommended in the

- Guide to the Evaluation of Educational Experience in the Armed Services
- National Guide to Educational Credit for Training Programs.

Credit for Home Study

The university does not offer and rarely accepts credit for correspondence (home study) courses.

Credit for Work Experience

No unit credit is allowed toward bachelors’ degrees or master’s degrees for teaching or other practical experience. Specific requirements in certain departments may be waived, however, on the basis of previous experience.
Undergraduate Information and Requirements

Change of Major/Degree Objective

Undergraduate students who wish to change their degree major objectives should obtain a change of major form at www.sjsu.edu/registrar/forms/index.htm. The form requires the approval and signatures of the appropriate university official(s). The completed form must be returned to the Registrar’s Office. Students changing to undeclared major must submit the completed form to Academic Advising and Retention Services (AARS). Upon further review and approval by AARS, the forms are processed and filed with the Registrar’s Office.

The change of major is not official until the approved form is on file with the Registrar’s Office. This form may also be used to move from undeclared to a major, declare a second major, or change a minor. Change of undergraduate major and minor forms are downloadable from www.sjsu.edu/registrar/forms/index.htm. For graduate change of major, see www.sjsu.edu/gape/forms.

Students who have earned more than 90 units (counting up to 70 transfer units) are not likely to be approved and will need to appeal.

Change of major is not guaranteed.

Classification of Students

San José State University students are classified in the lower or upper division or in graduate standing based on the units completed. The basis of classification is as follows:

Lower Division

Freshmen are those who have earned a total of fewer than 30 semester units. Sophomores are those who have earned a total of 30 through 59 semester units.

Upper Division

Juniors are those who have earned from 60 through 89 semester units. Seniors are those who have earned 90 semester units or more. Second or Postbaccalaureate students are those possessing a recognized baccalaureate degree and enrolled in an undergraduate degree program. Unless otherwise noted, postbaccalaureate students follow the same policies and procedures as upper division undergraduates.

Graduate Standing

Graduate standing is the classification for those who possess a recognized baccalaureate degree and are enrolled in graduate studies or in school credential programs.

Undeclared Majors

The university accepts freshmen who are not ready to declare a major academic objective into the undeclared category.

Students selecting the undeclared category for admission must declare a degree major objective prior to attaining junior standing. Students must obtain prior approval from the department in which they ultimately choose to major in accordance with university regulations.

Students who are in doubt about their degree program are encouraged to seek assistance from Academic Advising and Retention Services in the Student Services Center.

Trained counselors are also available in Counseling Services and in the Career Center. Students will be assisted on an individual basis with the appropriate use of vocational assessment when necessary.

Undeclared students should report to Academic Advising & Retention Services in the Student Services Center for General Education and other academic advisement.
Disqualification and Probation - Undergraduate & Postbaccalaureate

Disqualification - Academic

Undergraduate students on academic probation are subject to academic disqualification if their subsequent Fall or Spring SJSU term GPA falls below 2.0. Freshmen on Academic Probation are allowed a second consecutive semester of probation if their term GPA is in the range 1.50 to 1.99.

An undergraduate student reinstated on probation must achieve a grade-point average of 2.0 or better each semester following reinstatement until such time as he/she has achieved a cumulative SJSU GPA of 2.0. A student who fails to do so will be disqualified again (even if this occurs prior to readmission).

Undergraduate students are eligible to repeat a limited number of courses with grades of “C-“,” D+”, “D”, “D-“, “F”, “NC”, “WU”, or “IC” through SJSU’s Open University. All work taken through Open University is included in the cumulative record and is considered in the determination of probation and disqualification. Graduate students should see the section on University Disqualification in the graduate portion of this catalog.

Disqualified students should also refer to the section on reinstatement.

Unless otherwise noted, postbaccalaureate (second baccalaureate) students follow the same policies and procedures as upper division undergraduates. Academic disqualification policies were revised in University Policy S10-6 and are effective with the determination of Academic Standing at the end of the Fall 2011 semester.

Disqualification - Administrative-Academic

A student who has been placed on administrative-academic probation may be disqualified from further attendance if:

1. The conditions for removal of administrative-academic probation are not met within the period specified;
2. The student becomes subject to academic probation while on administrative-academic probation;
3. The student becomes subject to administrative-academic probation for the same or similar reason for which he or she has been placed on administrative-academic probation previously, although not currently in such status.

When such action is taken, the student will receive written notification, including an explanation of the basis for the action.

In addition, an appropriate campus administrator may disqualify a student who at any time during enrollment has demonstrated behavior so contrary to the standards of the profession for which the student is preparing as to render him/her unfit for the profession. In such cases, disqualification will occur immediately upon notice to the student, which shall include an explanation of the basis for the action, and the campus may require the student to discontinue enrollment as of the date of the notification.
Disqualification - Major

Each college, school, program and/or department has the option of employing a policy for disqualification from the major. Those which opt to disqualify from the major must have published criteria for determining probation in the major, disqualification from the major, and reinstatement into the major. Such criteria may include individual course grades below “C” (2.0) or “CR”, a major GPA below 2.0, or a university GPA below 2.0. Students disqualified under this policy must be notified by the department, school or college when placed on probation in the major or disqualified by the major. Students disqualified from their majors may do academic work to be reinstated to the major (if permitted by policy), or change to another major for which they are qualified. Appeals may be submitted to the Academic Disqualification and Reinstatement Review Committee via the Office of Undergraduate Studies.

Impacted degree programs are those most likely to have policies for disqualification in the major, but even non-impacted programs may have such policies. The Office of Undergraduate Studies will maintain current information about disqualification in the major.

Disqualification - Graduate

See Graduate Information and Requirements

Probation - Academic

An undergraduate student is placed on academic probation if the SJSU cumulative grade point average falls below a “C” average (2.0). Students will remain on academic probation until they return to good academic standing (SJSU cumulative GPA greater than or equal to 2.0) or are disqualified. All work taken through Open University is included in the cumulative record and is considered in the determination of probation and disqualification.

Unless otherwise noted, postbaccalaureate (second baccalaureate) students follow the same policies and procedures as upper division undergraduates.

Probation - Administrative-Academic

A student may be placed on administrative-academic probation by action of the Provost for any of the following reasons:

1. Withdrawal from all or a substantial portion of a program of studies in two successive terms or in any three terms. A student whose withdrawal is directly associated with a chronic or recurring disability or its treatment is not subject to administrative-academic probation for such withdrawal.

2. Repeated failure to progress toward the stated degree or other program objective, including that resulting from assignment of 15 units of “NC”, when such failure appears to be due to circumstances within the student’s control.

3. Failure to comply, after due notice, with an academic requirement or regulation which is routine for all students or a defined group of students (examples: failure to complete a required CSU or campus examination, failure to complete a required practicum, failure to complete remediation, failure to comply with professional standards appropriate to the field of study, failure to complete a specified number of units as a condition for receiving student financial aid or making satisfactory progress in the academic program).

When such action is taken, the student will be notified in writing and provided with the conditions for removal from probation and the circumstances which would lead to disqualification, should probation not be removed.

Reinstatement and Readmission - Undergraduate

Reinstatement and Readmission of Undergraduate Students After Academic Disqualification

Reinstatement is a different process from readmission. Readmission of a disqualified student is not possible unless reinstatement has been approved, but students must note that reinstatement is not a guarantee of readmission. There may even be some situations in which reinstatement is sought with no intention of reapplying to SJSU, such as for admission to another institution or program.

In most situations, students will need to apply for readmission prior to being reinstated. All returning students must submit an application for admission to SJSU. Reapply for the next available term at www.csumentor.edu by the published deadline. If you miss the deadline for your desired term, you will need to submit an application for the next available term. The major listed on your application must match the major on the Petition for Reinstatement. If the majors differ, the major listed on your application will be changed to reflect the major listed on the Petition for Reinstatement.
Categories for Reinstatement

1. **SJSU cumulative GPA 2.0 or better.** This category is for disqualified students who have attended SJSU through Open University and brought their SJSU cumulative GPA up to 2.0 or better. Raising the GPA to 2.0 or better does not guarantee that a department will approve the petition. Many departments place restrictions on reinstatement to their major degree programs. Please consult with your major advisor(s) as early as possible.

2. **Extemuating Circumstances.** Reinstatements in this category will only be granted for serious and compelling reasons that were clearly beyond a student’s control. Generally, all acceptable extenuating circumstances fall into one of the following eight categories: administrative error, employment, military, natural disaster, death of immediate family member, personal health or serious family illness, divorce, or personal/other (rarely approved). The following are not valid reasons for reinstatement under this category: Poor academic performance, non-attendance, change of major, or lack of prerequisite(s). In addition to the required documentation of extenuation, approvals will require demonstration that poor performance in a particular semester was atypical.

3. **Special Consideration.** This category is reserved for students whose petitions cannot be accommodated within the other categories. Typically, such students have spent substantial time away from SJSU since their disqualification (five years or more) and feel that their life experiences have prepared them for a successful return to school.

4. **Petitioned Grade Change.** This category is reserved for changes of grade approved under Section III (Grade Appeal) and Section IV (Change of Grade) of University Policy S09-7 (http://www.sjsu.edu/senate/docs/S09-7.pdf). If you are petitioning under this category, you must clearly explain which course grade was changed, when it was changed, and the reason for the change.

Reinstatement Petition Deadlines and Processing

1. Petitions for Reinstatement are accepted and evaluated on an ongoing basis. Allow at least fifteen business days for processing after submitting the completed petition form to the Registrar’s Office. You may petition under more than one category, but if you do so, your personal statement and documentation must support each category you have selected. Your petition will not be processed if you are not using the current form. See http://www.sjsu.edu/registrar/forms/index.html to be certain that you are using the most recent version of this petition.

Academic Progress in Developmental Courses

Effective Fall 1998, the California State University Executive Order 665 requires that first-year and lower division transfer students who are placed into remedial courses as a result of their ELM/EPT scores enroll in and attend the prescribed course(s) as a condition of their enrollment in other courses. In addition to the mandatory placement, these students must satisfactorily complete their remedial course work within a prescribed amount of time. Students who fail to do so are placed on a leave of absence and are subject to administrative disqualification from the university.

San José State University is not able to support a second semester of remediation for students who do not pass their fall remedial course. In these cases, students are expected to complete their requirement through a community college or other recommended institution. See www.math.sjsu.edu/~Mcclory/ for complete information on the EO 665 policies and practices.

Extended Studies Scholastic Regulations

Disqualified students may enroll in Extended Studies programs; however, the university, in considering applications for readmission and reinstatement, does not accept 400-series course credit as evidence of qualification for reinstatement.

Students desiring to apply extension credit toward the requirements for any degree or teachers’ credentials must secure approval from the department that is authorizing the reinstatement.

All students enrolling through Extended Studies must meet course prerequisites and are bound by all applicable university regulations given in this catalog, or in the most recent Winter Session or Open University schedule of classes. Information concerning tuition fees, admission and registration policies and procedures, withdrawal and refund policies, grading systems, academic standards and student advisement may be found in one or more of these publications. Regulations concerning the application of Extended Studies credit toward bachelor’s degrees and toward residence credit in the university are given elsewhere in this catalog under “Credit Transferred from Extended Studies”.
Readmission - Former Students Returning (FSR)

For the most to date readmission information for former students returning, please visit Admissions website.

Former Students Returning - Disqualified

Students disqualified at the close of their last enrollment must petition for reinstatement. See the section titled Disqualified Students for detailed information. Students seeking reinstatement to the university are also advised to make early application for readmission and meet all application and admission deadlines posted at www.csumentor.edu. Contact the Student Services Center for details, or read the Petition for Reinstatement information on www.sjsu.edu/registrar/forms/index.htm.

A. Students disqualified from San Jose State University who wish to be considered for readmission should:

1. Read the section of this catalog titled Disqualification and Probation.
2. Complete a Petition for Reinstatement (http://www.sjsu.edu/registrar/forms/index.html). Petition guidelines can be found on page 1 of the petition form.

Approval for reinstatement to the University after disqualification does not assure readmission to any particular semester or specific degree objective.

1. Register and attend Transfer Orientation.

B. Students who have been disqualified from the college or university of last attendance (other than SJSU) will not be considered for admission to a regular session until:

1. They have reapplied for admission, as upper division transfers, during the next available admission application cycle and meet all posted deadlines.
2. The official transcript of record indicates eligibility to re-enroll
3. Former Students Returning (FSR) should complete an “FSR petition” from SJSU in addition to applying for admission. Details may be found at http://vpsaweb7.sjsu.edu/Petition_FSR_SP14.pdf

Former Students Returning - Probation

Students on probation at the close of their last enrollment may be readmitted, as upper divisions transfers, on probation provided they are otherwise eligible. They must meet all application and admission deadlines. Students must furnish transcripts of any college work taken during their absence.

Former Students Returning (FSR) should complete an “FSR petition” from SJSU in addition to applying for admission. Details may be found at http://vpsaweb7.sjsu.edu/Petition_FSR_SP14.pdf

Former Students Returning - Good Standing

Undergraduates in good standing at the close of their last enrollment may be readmitted, as upper divisions transfer, provided they are otherwise eligible. They must meet all application and admission deadlines. All students must furnish transcripts of any college work taken during their absence.

Former Students Returning (FSR) should complete an “FSR petition” from SJSU in addition to applying for admission. Details may be found at http://vpsaweb7.sjsu.edu/Petition_FSR_SP14.pdf
Leave of Absence and Withdrawal

One Semester Leave

Students who have attended at least one semester as a matriculated student and who are in good or probation standing may choose to leave SJSU for one semester (Fall or Spring) without submission of a Leave of Absence form. Students choosing this option must return the following semester and continue their enrollment as a matriculated student. If a student does not return in the semester following the one semester leave, the student will be required to reapply for admission to the next available admission term. Please review the Returning Student section for additional information or review the Leave of Absence Form http://www.sjsu.edu/registrar/docs/leave_request.pdf for more details.

The exception to this rule is that graduate students who have completed all degree requirements except their project or thesis and who have an RP grade in a previous project or thesis course may not stop out but must maintain continuous enrollment. They can do so by taking a 1-unit special session course designed for this purpose. Consult your department website or this catalog under the appropriate academic program to determine the course to take for your program. Also consult the section in this catalog entitled Thesis and Project Work - RP Status - Graduate.

Health Leave

Matriculated undergraduate or graduate students unable to continue their enrollment by reason of health are eligible for health leave as long as the student has attended for a minimum of one semester as a matriculated student prior to the leave. A student granted health leave retains continuing student status and may return as a continuing student without a new application or application fee and without being subject to changes in requirements made during the period of leave.

A Leave Request form must be completed with appropriate signatures and submitted to the chair of the student’s major department. The department should then file the form with the Registrar’s Office. Undeclared undergraduates, must submit the form to Academic Advising and Retention Services (AARS). A certificate from a licensed State of California health professional will normally be required.

A health leave shall not be granted initially for more than two consecutive semesters, but may subsequently be extended if the department chair is satisfied that circumstances so warrant. A request for extension shall be made in the same manner as the initial application.

It is the responsibility of students intending to return after health leave to notify the Registrar’s Office as far as possible in advance of the semester of return. If timely notice is given, the student shall be allowed to register through the regular procedure.

Leave Request forms and information are available on www.sjsu.edu/registrar/forms/index.html

Military Leave

Students who are called to active duty may request a Military Leave. A Leave Request form with a copy of military orders must be submitted to the Registrar’s Office. The form is available on the Registrar’s website at www.sjsu.edu/registrar/forms/index.htm.

Planned Student Educational Leave

A Planned Student Educational Leave permits a student to be absent from regular attendance for one or more terms while maintaining continuing enrollment status. Applicants must have an intention to return to formal study within a specified period and a plan for how the time is to be spent in relation to an educational objective.

The opportunity to apply for such leave is available to all students except those attending their first semester and those students in disqualified status. International students are not eligible to remain in the United States while on a leave of absence unless such a leave is documented by an attending physician, and authorized by the International Programs and Services Office at SJSU.

Leave arrangements must be made in advance with the chair of the department in which the student is majoring. Undergraduate students in undeclared status will make leave arrangements with Academic Advising and Retention Services (AARS) in the Student Services Center. Graduate students will make leave arrangements with the graduate program coordinator in their department. International students must also go to the IPS office to secure the necessary immigration authorizations.

Students who meet the terms of the leave are guaranteed a return to their department even though it is or becomes a program restricting the number of applicants. Leave forms and additional information may be downloaded at www.sjsu.edu/registrar/forms.
International Student Leave

International students may not take leave and remain in the United States except for documented medical reasons. International students must be enrolled in a full course of study (12 credit units for undergraduate students; 9 credit units for graduate students) for two semesters annually (summer and winter breaks not included). An international student who needs to take a leave of absence must first speak with an international student advisor. Walk-in advising is available at the International Programs and Services Office in Clark Hall 543.

Withdrawal from the University

Students may withdraw officially from all courses during the first fourteen days of instruction without academic penalty (no “W” grade on academic record).

Students who have serious or compelling reasons to cancel their registration, or who wish to withdraw from all classes after the last day to drop without a “W” grade, should consult their instructors, department chair, academic advisor, and Academic Advising and Retention Services in the Student Services Center. An additional source of assistance is available from the Counseling Services Department.

A completed “Petition for Withdrawal” form must be submitted to Academic Advising and Retention Services in the Student Services Center. The form is available at www.sjsu.edu/aars/forms/. Failure to follow formal university procedures may result in an obligation to pay fees as well as the assignment of failing grades in all courses. Students who leave the university but who do not officially withdraw will receive a grade of “WU” (denotes failure for unauthorized drop or withdrawal) in all of their classes. No personnel actions, grades, or transcript services will be permitted until all financial obligations, such as unpaid fines have been settled. If a student fails to return the semester immediately following withdrawal, the student will need to reapply for admission at www.csumentor.edu.

Students who receive financial aid funds must consult with the Financial Aid and Scholarship office prior to withdrawing from the university regarding any required return or repayment of grant or loan assistance received for that academic term or payment period. If a recipient of student financial aid funds withdraws from the institution during an academic term or a payment period, the amount of grant or loan assistance received may be subject to return and/or repayment provisions.

Refer to the policy on “Continuous Attendance” for information about the possible effect a break in attendance may have on requirements for graduation.

Grade Appeals and Grade Assignments

Academic Senate Policy S09-7

Assignment of Grades and Provisions for Appeals

The following principles support the minimum standards governing the assignment of grades and provisions for appeals (per CSU Executive Order 1037):

A. Faculty have the sole right and responsibility to provide careful evaluation and timely assignment of appropriate grades.

B. There is a presumption that grades assigned are correct. It is the responsibility of anyone appealing an assigned grade to demonstrate otherwise.

C. In the absence of compelling reasons, such as instructor or clerical error, prejudice or capriciousness, the grade assigned by the instructor of record is to be considered final.

D. 1. Students who believe that an appropriate grade has not been assigned should first seek to resolve the matter informally with the instructor of record (per Change of Grade section).

2. If the matter cannot be resolved informally, the student may pursue a grade appeal and present his or her case to the Student Fairness Committee (according to University Policy S09-7, Student Fairness Dispute Resolution), have it reviewed and, where justified, receive a grade correction.

E. If the instructor of record does not assign a grade, or if he or she does not change an assigned grade when the necessity to do so has been established by appropriate campus procedures, it is the responsibility of other qualified faculty as determined by the appropriate campus entity. “Qualified faculty” means one or more persons with academic training comparable to the instructor of record who are presently on the faculty at that campus.
F. SJ State University shall maintain and implement existing policy and procedures covering the assignment of grades and grade appeals that include the following provisions:

1. The time and manner of reporting course grades including provisions for assuring that such grades have been assigned by the instructor of record.
2. Circumstances under which the instructor of record may change a grade once assigned, and procedures for making such changes.
3. A means for preliminary review of potential appeals that may resolve differences before initiation of formal proceedings.
4. Grounds for which a grade appeal is permitted.
5. One or more committees for hearing grade appeals that shall provide safeguards to assure due process for both student and instructor. Such committees shall include student membership. Student members shall not participate in assignment of grades.
6. Procedures whereby grades are assigned by other qualified faculty in circumstances where the instructor of record does not do so, including those instances where a grade change is recommended by a grade appeals committee and the instructor of record does not carry out that recommendation.
7. Specification of time limits for completion of various steps in the appeal process and of the time period during which an appeal may be brought.
8. Description of the extent of the authority of appeal committee(s), including provisions that clearly limit grade changes to instances where there is a finding that the grade was improperly assigned.
9. Limitation of committee authority to actions that are consistent with other campus and system policy.
10. A statement that there is a presumption that grades assigned are correct. Thus, the burden of proof rests with the individual who is appealing.
11. Procedures for dealing with allegations of improper procedure.
12. Assignment of authority to revise policies and procedures for grade appeals to the campus faculty senate. The campus president is responsible for ensuring that such revisions conform to the principles and provisions of this executive order.
13. Provision for annual reporting to the President and Academic Senate on the number and disposition of cases heard.

Change of Grade (Not Resulting from a Grade Appeal)

A. The basic principle underlying changes of grade is that all students be treated fairly and be given equal opportunities to demonstrate their academic learning and earn course grades representing that learning. Application of this criterion precludes the assignment of extra credit unless such assignments were made known and available to all students in the class. It further precludes rejudgment, afterthought, or reconsideration of an individual’s graded work unless such opportunity for change of grade is made equally available to all students in the class.

B. Unless a rejudgment, afterthought, or reconsideration is applied fairly and equally for all students in a class, a change of grade request may be submitted only when there is an error in grading an assignment or course component, or in the case of a clerical, computational, transcriptional, or other administrative error. The specific nature of the error shall be recorded on the form requesting the change of grade. Once approved, the original grade will be removed from the transcript and the new (changed) grade will replace it.

C. A change of grade request must be submitted by the department office directly to the Office of the Registrar in a timely fashion. Normally, such requests must be received by the drop deadline of the following Spring or Fall semester and will require the signatures of the instructor and the department chair. Further extension of this deadline will be considered only when there is documentation of the student’s attempt(s) to contact both the instructor and the department chair, and the late submission of the change of grade form is clearly beyond the student’s control.

D. A change of grade request received after the drop deadline of the following Spring or Fall semester and within one calendar year after the posting of the grade requires the signature of the appropriate college Associate Dean in addition to those of the instructor and the department chair.

E. A change of grade request received more than one year after the posting of the grade will require, additionally, the approval of the Associate Dean for Undergraduate Studies or Graduate Studies and Research, as appropriate.

F. If a request for a change of grade is approved by the instructor but denied at a subsequent level of review, a written explanation for the denial shall be provided to the student, the faculty member, and the department chair.

Integrity of the Academic Record

A. All grades reported at the end of each semester are final, unless changes have been made according to the provisions given above, or those of University Policy F08-2. Students are responsible for reviewing their grades for accuracy before the beginning of the subsequent term. They are also responsible for verifying their transcripts for changes, e.g., from grade forgiveness, withdrawals, clearance of Incomplete grades, or clearance of Report Delayed (RD) grades.

B. A student who believes he or she has received a grade in error should contact the instructor to verify and, if appropriate, correct the grade. If an instructor is unavailable or absent during the subsequent semester, the student should promptly consult with the department chair about the grade in question. If the department chair is unable to contact the instructor, he or she shall notify the Associate Dean of the College in writing, requesting that an extension of the grade correction deadline be granted. The Associate Dean will then contact the Office of the Registrar if the request for an extension is deemed valid.

C. After a degree has been posted, no further adjustments can be made on the record except under extraordinary circumstances as determined by Undergraduate Studies or Graduate Studies & Research.
Grading System for Undergraduate

SJSU does not mail grades. Grades from Spring 1991 to the present are available at MySJSU http://my.sjsu.edu. SJSU ID and Password required.

Fall 2014 Grades

Grades for Fall 2014 term will initially be posted on Wednesday, December 24, 2014. Academic standing will be posted on Thursday, January 8, 2015. See Transcripts in the Directory for information on official transcript requests.

Grades - Letter Grading

The grading policy of SJSU provides that A, B, C, D, F, shall be the basic grading system and shall apply to all course work acceptable toward a degree program except for those courses in which it is mandatory or permissible that Credit/No Credit grades be used.

</table>

The scholarship average is based on courses in which letter grades are earned (the total number of grade points divided by the number of units in letter-graded courses). Grade points are assigned as follows.

The grades of “CR,” “NC,” “AU” (audit), “I,” “W,” “WB,” and “RP” (report in progress) receive no grade points and the units are not considered in computing grade point average. A plus or minus sign following a grade of “A,” “B,” “C,” or “D” will affect the grade points allowed as indicated in the table. A grade of “A+” cannot exceed 4.0 grade points per California Code of Regulations, Title 5, Division 5, Chapter 1, SubChapter 2, Article 2, 40104.

Undergraduate and postbaccalaureate students must maintain an SJSU Cumulative GPA of 2.0 or better (calculated by dividing grade points (GP) by units graded (UG)).
**Grades - Auditing a Class - “AU”**

An auditor must be officially enrolled in the course. Enrollment as an auditor is subject to permission of the instructor provided there is space available in the course. **Auditors are subject to the same fee structure as credit students and regular class attendance is expected.** Once enrolled as an auditor, a student may not change to credit status unless such a change is requested no later than the last day to add classes in that term. A student who is enrolled for credit may not change to audit after the last day to add classes in that term.

**Grades - Credit/No Credit (CR/NC) - Elective**

An upper-division (Junior or Senior) student shall have the option of taking a maximum of 12 semester units as long as the units are not in the major or minor, or in support of, preparation for or prerequisite to the major or minor, or for General Education on the basis of Credit/No Credit for courses under the basic letter grade system. Eligible students may choose this option by turning in the CR/NC option form, available at www.sjsu.edu/registrar/forms, by the add deadline. Students may accumulate a maximum of 60 semester units of Credit/No Credit grades toward a baccalaureate degree.

In addition to turning in the CR/NC Option form, you must have officially added the class.

**CAUTION:** Credit = A, A-, B+, B, B-, C+, C; No Credit = C-, D+, D, D-, F, IC, WU.

**Grades - Credit/No Credit (CR/NC) - Mandatory**

“CR/NC” grades are mandatory for thesis and remedial course work. It is also normally used in projects, field work, internships, individual studies, or directed reading. As recommended by departments and approved by the college dean, credit/no credit grades may be used in activity and laboratory courses, workshops, and selected seminars (colloquia). Students may accumulate a maximum of 60 semester units of Credit/No Credit grades toward a baccalaureate degree (excluding any remedial course work). A maximum of 40 percent of the units required in a graduate degree can be credit/no credit (e.g., 12 units in a 30 unit program).

**CAUTION:** Credit = A, A-, B+, B, B-, C+, C; No Credit = C-, D+, D, D-, F, IC, WU.

**Grades - Incomplete - “I / IC”**

The symbol “I” (Incomplete Authorized) indicates that a portion of required course work has not been completed and evaluated in the prescribed time period due to unforeseen, but fully justified, reasons and that there is still a possibility of earning credit. The student cannot reenroll in the course. It is the responsibility of the student to bring pertinent information to the attention of the instructor (regarding the unforeseen reason(s) for requesting an Incomplete) and to determine from the instructor the remaining course requirements that must be satisfied to remove the Incomplete. A final grade is assigned when the work agreed upon has been completed and evaluated. Clearing an incomplete grade does not permit retaking previously completed portions of the course, nor does it permit assignment of additional graded work (e.g., extra credit) that was not available to other students in the class.

An “I” must normally be made up within one calendar year immediately following the end of the term during which it was assigned.

This limitation prevails whether or not the student maintains continuous enrollment. Failure to complete the assigned work will result in an “I” being converted to an “IC” symbol, or an “NC” for non-traditionally graded courses, unless the faculty member assigns a specific letter grade at the time the Incomplete is assigned, which would replace the “I” in the student’s record after the calendar year deadline.

Failure to complete the assigned work within the established calendar year period for an “I” grade will result in an automatic grade change to an “IC” grade which calculates as a failing grade for grade point average and progress point computation.

**Grades - Report Delayed - “RD”**

The “RD” symbol may be used where a delay in the reporting of a grade is due to circumstances beyond the control of the student. The symbol may be assigned by the registrar only and, if assigned, shall be replaced by a substantive grading symbol as soon as possible.
Grades - Report in Progress - “RP”

The "RP" symbol is used in connection with courses that typically extend beyond one academic term. It indicates that work is in progress but that assignment of a final grade must await completion of additional work. Work is to be completed within one year except for graduate degree projects and theses (supervised courses, e.g., 298 & 299 courses), which have a two-year time limit. Failure to complete the assigned work for an “RP” grade will result in an automatic grade change to an “NC” grade unless a request for an extension has been made and approved.

A final grade will be assigned to all segments of the course on the basis of overall quality. Any extension of this time period must receive prior authorization by the instructor and department chair or school director.

Grades - Withdrawal - “W”

The symbol “W” on the official transcript (or “W” or “WB” on the unofficial transcript) indicates that the student was permitted to withdraw from the course after the drop deadline for the term with the approval of the appropriate campus administrator. It carries no connotation of quality of student performance and is not used in calculating grade point average or progress points. However, there are limits on the number of allowable units of “W” on the unofficial transcript. Undergraduate students may withdraw from no more than 18 units. Postbaccalaureate students may withdraw from no more than 12 units. Graduate students may withdraw from no more than 9 units. Exceptions to these unit limits are granted when the cause of withdrawal is due to circumstances clearly beyond the student’s control and the assignment of an Incomplete is not practicable. Such exceptions are designated “WB” on the unofficial transcript and will revert to “W” on the official transcript (University Policy S09-7).

Undergraduates may download the appropriate petition (course drop or withdrawal from all courses) at www.sjsu.edu/aars/forms. When the policy goes into effect for graduate students, the petition for will be available at www.sjsu.edu/gape/forms.

Grades - Withdrawal Unauthorized - “WU”

The symbol “WU” indicates that an enrolled student did not officially withdraw from the course and also failed to complete course requirements. It is used when, in the opinion of the instructor, completed assignments or course activities or both were insufficient to make normal evaluation of academic performance possible. For purposes of grade point average and progress point computation this symbol is equivalent to an “F.”

Unit of Credit

The unit of credit is the semester unit which is equal to one and one-half quarter units.

Change of Grade

The basic principle underlying changes of grade is that all students be treated fairly and be given equal opportunities to demonstrate their academic learning and earn course grades representing that learning. Application of this criterion precludes the assignment of extra credit unless such assignments were made known and available to all students in the class. It further precludes rejudgment, afterthought, or reconsideration of an individual’s graded work unless such opportunity for change of grade is made equally available to all students in the class.

Unless a rejudgment, afterthought, or reconsideration is applied fairly and equally for all students in a class, a change of grade request may be submitted only when there is an error in grading an assignment or course component, or in the case of a clerical, computational, transcriptional, or other administrative error. The specific nature of the error shall be recorded on the form requesting the change of grade. Once approved, the original grade will be removed from the transcript and the new (changed) grade will replace it.

A change of grade request must be submitted by the department office directly to the Office of the Registrar in a timely fashion. Normally, such requests must be received by the drop deadline of the following Spring or Fall semester and will require the signatures of the instructor and the department chair. Further extension of this deadline will be considered only when there is documentation of the student’s attempt(s) to contact both the instructor and the department chair, and the late submission of the change of grade form is clearly beyond the student’s control.

A change of grade request received after the drop deadline of the following Spring or Fall semester and within one calendar year after the posting of the grade requires the signature of the appropriate college Associate Dean in addition to those of the instructor and the department chair.

A change of grade request received more than one year after the posting of the grade will require, additionally, the approval of the Associate Dean for Undergraduate Studies or Graduate Studies and Research, as appropriate.
Maximum Unit Loads

An undergraduate student who takes 12 or more units is classified as full-time. Students with work responsibilities outside of school should reduce their study loads appropriately. Students enrolled in remedial math and/or English may not enroll in more than 14 units.

The maximum load for graduate students is normally 15 semester units. Reasonable exceptions beyond this number up to 18 units may be approved, for sufficient cause, by the graduate advisor and department chair, but permission must also be garnered from the Associate Dean of Graduate Studies & Research by means of the Graduate Petition for Excess Units. Loads beyond 18 units are prohibited by the CSU. The Graduate Studies & Research Committee strongly recommends that graduate students carry no more than 12 units of 200-level work in any one semester. There is no official minimum load for graduate students other than for those who wish to receive financial assistance or other benefits.

Immigration and Customs Enforcement (ICE) regulations on international students require that undergraduates maintain full-time status of 12 semester units and graduate students 9 semester units, excluding summer in both cases. To appeal this regulation, go to International Programs and Services.

Excess Units

Enrollment limits for undergraduate students will be set on a semester by semester basis. Petitions and information are available at www.sjsu.edu/registrar/forms.

Verification of Unit Load

In verifying enrollments to the Veterans’ Administration, scholarship boards and loan agencies, the university reports the total number of units enrolled as the official unit load for an undergraduate.

The definition of “full-time student” made by the United States Citizenship and Immigration Service (USCIS), Veteran’s Administration and other agencies may vary. Students who are concerned with their status are urged to contact the specific agency involved to determine its policies. Full veterans’ subsistence payments require a course load of 12 weighted semester units for both graduate and undergraduate students. Graduate students from foreign countries who are in the U.S. on student visas must normally carry nine semester units to maintain full-time student status, while undergraduate international students must carry 12 semester units to maintain the required full-time status.

Students may request verification of unit load from the Registrar’s office located in the Student Services Center.

Course Numbering System

Course Numbers

Lower division (freshman and sophomore) courses are numbered 001-099 and cannot be used for credit in graduate or credential programs; upper division (junior and senior) courses are numbered 100-199; graduate courses are numbered 200-299.

Methods or professional courses given by or for other departments are allowed upper division credit are numbered 300-399 and doctoral courses are numbered 500-599. Courses in the NURS 574-597 series is a part of the joint Doctor of Nursing Practice (DNP) with CSU Fresno.

180, 184, 096, 196 and 296 Courses

Individual Studies (180) and Directed Reading (184) are used for independent study and are generally reserved for majors within a department. Normally, no more than four units of 180 and/or 184 may be taken for baccalaureate credit (see Unit Requirements). Courses numbered 96, 196 and 296 are offered to meet special demands for experimental courses on a temporary basis and are listed in the SJSU Schedule of Classes, but not in this catalog.

400-499 Continuing Education Units

Courses in the 400-series are especially designed for professional in-service and relicensure purposes. Continuing Education Units (CEU) are given for these courses. Courses are not applicable to degree programs and units earned do not affect grade point totals or average.
Transcript of Record

Transcript Requests

The Office of the Registrar is very pleased to announce that on June 1, 2011, we implemented TranscriptsPlus, an online request service for official transcripts provided by Credentials, Inc. http://www.sjsu.edu/registrar/links/Credentials_Inc

TranscriptsPlus is a student friendly application that allows you to submit your request online and track the progress of your request. You get immediate notification when your request is received, approved and mailed to you or to your designated address(es).

You can also make your request by mail or in person. Please note that mailed requests will take longer to process.

Order Official Transcripts Online (Preferred Method)

SJSU has partnered with Credentials, Inc. http://www.sjsu.edu/registrar/links/Credentials_Inc, to provide a secure and easy to use online transcript ordering solution. This online request service will allow students and alumni:

- Access to request official transcripts 24 hours a day, 7 days a week
- Automatic e-mail and text messaging communication
- Online order status checking
- Automatic email or text message when order is completed
- Faster processing time of 3-5 business days

Order Official Transcripts by Mail

To request transcripts by mail, write a letter requesting your transcripts and note the following:

1. Type or print legibly the address(es) where you would like transcript(s) mailed.
2. Requests submitted by mail may take up to 3-4 weeks to process.
3. Transcript requests will be returned if you owe any financial or administrative obligation to the university.
4. Your letter should include the following information:
   - Full name
   - Any and all previous names
   - SJSU ID number or Social Security Number
   - Date of birth
   - Current address and phone number
   - Email address
   - Dates of attendance
   - Indicate if you are waiting for information to post (final grades or degree posting) before mailing transcript
   - Date degree received
   - Type of degree received
   - Complete address of where to mail transcript(s)
   - Full signature and date

Mail your written request to:
San José State University,
Office of the Registrar,
One Washington Square,
San José, CA 95192-0009
Order Official Transcripts in Person

Students and alumni are welcome to visit the Registrar’s Office and use the lobby computers to submit online transcripts request through Credentials, Inc. http://www.sjsu.edu/registrar/links/Credentials_Inc The Registrar’s Office is located in the Student Services Center and is open Monday-Thursday, 8:15am-4:45pm, and Friday, 9:00am-4:30pm. The office is closed on weekends and holidays.

If you opt not to submit your request online, you must submit a letter of request with the same information required for mailed in requests.

Transcript Fees, Processing Time, and Delivery

- At this time, San Jose State University does not charge a fee for transcripts. However, a service charge of $1.75 per transcript will be assessed by Credentials, Inc. http://www.sjsu.edu/registrar/links/Credentials_Inc, for online orders.
- Rush service is NOT available. Please allow 3-5 business days to process online transcript orders. Requests submitted by mail or in person may take up to 3-4 weeks to process. Additional processing time may be required based on the work load, the operational needs of the office, and/or the time during the semester the request is made (e.g. start or end of term, send after grade or degree posting). Additional processing time may also be necessary for records with attendance prior to January 1991.
- Processing time is the amount of time to process the request and does not include the mailing time. Processing time is business days only and excludes holidays and campus closures.
- Transcripts are delivered by U.S. Postal Service, first class mail.
- If you have questions regarding the status of an online transcript request, please contact Credential’s Inc., at 847-716-3005.

Holds

If there is any financial hold or administrative obligation on your student records, it must be cleared with the department that placed the hold before transcripts can be processed. Holds may be placed on your student records by other campus departments for various reasons (e.g. fees, books, equipment or documents).

General Transcript Regulations:

1. Transcripts are a complete record of all courses and/or degrees completed at San Jose State University. Transcripts do not include course work completed at other institutions. Only the transferable units are reflected on transcripts under “Transfer Credit”. Transcripts from high schools or other colleges cannot be duplicated. You must apply directly to each school for copies of their transcripts.
2. For students who have undergraduate and post-baccalaureate or graduate course work, please be aware that it is not possible to separate undergraduate course work from the post-baccalaureate or graduate course work. All careers will appear on the transcript as it is considered one official record.
3. Transcript requests will not be accepted by fax or e-mail.
4. We do not accept requests for unofficial transcripts. Unofficial transcripts can be obtained through your Student Center page on the mySJSU portal (current and newly graduated students only). If you need assistance with your mySJSU account, please contact the IT Help Desk via e-mail: ithelpdesk@sjsu.edu

Repetition of Courses

Undergraduate and postbaccalaureate students (regular enrollment and Open University) may repeat courses only if they earned grades lower than a “C” (including “WU”, “IC”, and “NC”).

Graduate students may repeat courses only if they earned grades lower than a “B” (including “WU”, “IC”, and “NC”).

Repeating a course with an Incomplete (“I”) grade is not allowed; a grade must be assigned or the “I” must revert to an “IC” prior to repeating the course. Repeating a course with an “RP” is allowed, although the course instructor and individual departments should be consulted for their requirements in this regard.

The limits on course repetition apply only to units completed at SJSU.

1. Any student who is repeating a course (except if the grade for that course was “W”) is not permitted to register during Advance Registration and must register on a space available basis no earlier than the first day of classes.
2. Courses designated “Repeatable for Credit” may be repeated even though the original grade was “C” or better.
3. The policies regarding repetition of courses with Grade Forgiveness or Grade Averaging (as described below) apply only to courses taken and repeated at SJSU.
Grade Forgiveness (Formerly known as “Academic Renewal”)

Course Repeats with “Grade Forgiveness.”

Formerly known as “Academic Renewal” at SJSU, Grade Forgiveness is the circumstance in which the new grade replaces the former grade in the calculation of GPA. The original grade remains on the transcript. Effective Fall 2009, there is no need to petition for grade forgiveness.

1. Undergraduate and postbaccalaureate students may repeat a maximum of 16 units of total Grade Forgiveness, consisting of a combination of up to 9 units (maximum) of lower division (numbered 0-99) course work, and up to 9 units (maximum) of upper division (numbered 100-199) course work.
2. Graduate (numbered 200-299) course work is not eligible for Grade Forgiveness. Graduate students are not eligible for Grade Forgiveness, but may repeat up to 9 units of upper division or graduate course work through Grade Averaging.
3. Grade Forgiveness will be assigned automatically for all eligible courses as soon as a student registers. Eligible courses include those courses with earned grades lower than a “C” (including “WU”, “IC”; but excluding “NC”). Once the pool of available units is insufficient for the next repeated course, unused units may be applied to a future course of lower unit value or simply left unused in the pool. If a repeated course is dropped prior to the Drop Deadline or a “W” is recorded for a repeated course, then the Grade Forgiveness units return to the pool of available lower division or upper division units, as appropriate.
4. To opt out of grade forgiveness: A student may petition to have a repeated course NOT be granted Grade Forgiveness. Such petitions must be submitted prior to the Census Date for the term in which the course is repeated. See www.sjsu.edu/ugs for instructions and forms.
5. Students may repeat an individual course for Grade Forgiveness only once.
6. Grade Forgiveness shall not be applicable to courses for which the original grade was the result of a finding of academic dishonesty.

Grade Forgiveness that results in a higher GPA will not remove a prior academic standing.

Course Repeats with Grades Averaged

1. Undergraduate and postbaccalaureate students may repeat a maximum of 28 units for graduation credit (including units repeated for Grade Forgiveness; excluding grades of “W”). After the pools of Grade Forgiveness units have been depleted or used to the fullest extent allowable, the repeat grade shall not replace the original grade. Instead grade points and units from all attempts shall be calculated in the student’s SJSU cumulative GPA and overall GPA.
2. Graduate students may repeat a maximum of 9 units of upper division or graduate course work for graduation credit.
3. Course repeats with Grades Averaged will be assigned automatically for all eligible courses as soon as a student registers. Once the pool of available units is insufficient for the next repeated course, unused units may be applied to a future course of lower unit value or simply left unused in the pool. If a repeated course is dropped prior to the Drop Deadline or a “W” is recorded for a repeated course, then the Grade Averaged units return to the pool of available units.

Students who (1) have repeated the maximum allowable units, (2) are otherwise making appropriate progress to degree, and (3) still need to repeat courses to fulfill specific major or minor requirements necessary for graduation may petition for an exception to the 28-unit limit. Undergraduate Studies and the Registrar’s Office will administer the petition process. Any course(s) approved for repeating by this petition process will be Grade Averaged.

Transcript Calculation

Repeating a course in which a “C” or better was received on the first attempt or for which previous credit was granted at another institution. While the units and grade points will appear on the transcript and the grade will be calculated into the grade point average, students should be aware that the units and grade points for the repeated courses cannot be counted for graduation credit. Such units and grade points for repeated courses will be subtracted when the student applies for graduation. Students should also keep track of these units and not count them twice for graduation purposes.
Residency

Residency - Determination

University requirements for establishing residency are independent from those of other types of residency, such as for tax purposes, or other state or institutional residency. These regulations were promulgated not to determine whether a student is a resident or nonresident of California, but rather to determine whether a student should pay tuition on an in-state or out-of-state basis. A resident for tuition purposes is someone who meets the requirements set forth in the Uniform Student Residence Requirements. These laws governing residence for tuition purposes at the California State University (CSU) are California Education Code sections 68000-68085, 68120-68134, and 89705-89707.5, and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41900-41916. This material can be viewed on the Internet by accessing the CSU’s website at www.calstate.edu/GC/resources.shtml.

Each campus’s Registrar’s Office is responsible for determining the residence status of all new and returning students based on the Application for Admission, Residency Questionnaire, Reclassification Request Form, and, as necessary, other evidence furnished by the student. A student who fails to submit adequate information to establish eligibility for resident classification will be classified as a nonresident.

Generally, establishing California residence for tuition purposes requires a combination of physical presence and intent to remain indefinitely. An adult who, at least one full year prior to the residence determination date for the term in which enrollment is contemplated, can demonstrate both physical presence in the state combined with evidence of intent to remain in California indefinitely may establish California residence for tuition purposes. A minor normally derives residence from the parent(s) with whom they reside or with whom they most recently resided.

Evidence demonstrating intent may vary from case to case but will include, and is not limited to, the absence of residential ties to any other state, California voter registration and voting in California elections, maintaining California vehicle registration and driver’s license (or California identification card), maintaining active California bank accounts, filing California income tax returns and listing a California address on federal tax returns, owning residential property or leasing an apartment where permanent belongings are kept, maintaining active memberships in California professional or social organizations, and maintaining a permanent military address and home of record in California.

Nonresident students seeking reclassification are required to complete a supplemental questionnaire that includes questions concerning their financial dependence on parents or others who do not meet University requirements for classification as residents for tuition purposes. Financial independence is required, along with physical presence and intent, to be eligible for reclassification.

Non-citizens establish residence in the same manner as citizens, unless precluded by the Immigration and Nationality Act from establishing domicile in the United States.

Exceptions to the general residence requirements are contained in California Education Code sections 68070-68085 and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41906-41906.6, and include, but are not limited to, members of the military and their dependents, certain credentialed employees of school districts and most students who have attended three years of high school in California and graduated or attained the equivalent. Whether an exception applies to a particular student cannot be determined before the submission of an application for admission and, as necessary, additional supporting documentation. Because neither campus nor Chancellor’s Office staff may give advice on the application of these laws, applicants are strongly urged to review the material for themselves and consult with a legal advisor.
Residency - Appeals

Students classified as non-residents may appeal a final campus decision within 120 days of notification by the campus. A campus residence classification appeal must be in writing and submitted to:

The California State University
Office of General Counsel
401 Golden Shore, 4th Floor
Long Beach, CA 90802-4210

Residency Determination Dates

At San José State University, the residence determination dates are:

Fall - September 20
Spring - January 25
Summer - June 1

The Office of General Counsel can either decide the appeal or send the matter back to the campus for further review.

Students incorrectly classified as residents or incorrectly granted an exception from nonresident tuition are subject to reclassification as nonresidents and payment of nonresident tuition in arrears. If incorrect classification results from false or concealed facts, the student is subject to discipline pursuant to Section 41301 of Title 5 of the California Code of Regulations.

Resident students who become nonresidents, or who no longer meet the criteria for an exception, must immediately notify the Registrar’s Office.

Changes may have been made in the rate of nonresident tuition and in the statutes and regulations governing residence for tuition purposes in California between the time this information is published and the relevant residence determination date. Students are urged to review the statutes and regulations stated above.

Open University - Courses

San José State University’s Open University program permits enrollment by non-matriculated students in specified regular curriculum classes on a space-available basis. Formal admission to the university is not required. Registration is not possible prior to the first class meeting. A maximum of 24 semester units may be applied toward bachelor degree and not more than six units for a 30-unit master degree. Units earned in Open University may not be used to meet residence unit requirements for a degree. For undergraduate students, exceptions to these restrictions may be granted by petition (www.sjsu.edu/ugs/students/petitions/list/index.html)

Regular (matriculated) students in good standing may not enroll as Open University students. Matriculated students are those who have been admitted to San José State University as a regular student for the current semester or were registered as a matriculated student in the previous semester and who have not graduated.

Disqualified students who seek reinstatement following disqualification must see their advisor to develop a plan to meet the required GPA standard for readmission to the university. In addition to reinstatement, disqualified students must reapply and be readmitted in order to become regular (matriculated) students once again.

All prerequisites, including ELM, EPT, and WST are enforced when enrolling through Open University.
International Students

International students must be regular full-time matriculated students admitted to a degree program. Enrollment in Open University does not qualify international students for the immigration document necessary to enter the United States, to transfer to SJSU from another U.S. university, or to maintain their legal F-1 status. Academically disqualified international students are eligible to enroll through Open University but must transfer to another I-20 issuing institution to maintain their F-1 student status, or apply for reinstatement to F-1 student status from the U.S. Citizenship and Immigration Services after being re-admitted to SJSU.

Summer Session

Summer Session allows both matriculated and non-matriculated (i.e. Open University) students to enroll in summer classes at San José State University.

Winter Session

Both matriculated and non-matriculated students may enroll in this session. Credit earned may be applied to residence unit requirements for previously matriculated students, and is not subject to the 24-unit limitation in applying toward bachelor’s degree requirements at San José State University.

Honors

The university recognizes outstanding academic achievement of its students through a variety of different honors.

Honors - Departmental

Students who have completed an approved departmental honors program receive “honors at graduation” as distinct from “university honors at graduation.” The following departments offer departmental honors programs (for details see under each department in the university course catalog).

- Aviation
- Biological Sciences
- Business
- Chemistry
- Child Development
- Computer Science
- Economics
- English
- Environmental Studies
- Geography
- Geology/Earth Science
- History
- Journalism and Mass Communications
- Kinesiology
- Mathematics
- Music
- Occupational Therapy
- Political Science
- Psychology
- Sociology
- Theatre Arts
Honors - President and Dean Scholars

Each spring the Honors Convocation recognizes and encourages superior academic achievement of President’s and Deans’ Scholars. There are two levels of Honors Scholars:

President’s Scholars: Any undergraduate student who has earned a 4.0 grade point average at San José State University in two consecutive semesters (and summer or winter, if applicable).

Deans’ Scholars: Any undergraduate student who has earned a 3.65 or higher grade point average at San José State University in two consecutive semesters (and summer or winter, if applicable).

The minimal load allowed for the award of academic honors is the student’s full program of graded courses or 12 units, whichever is the larger. Only SJSU courses for which grades are posted during the consecutive semesters, including the clearance of incompletes made during that time period, shall be used.

Recognition of these Honors Scholars through the Honors Convocation was inaugurated at the university in 1962 by the three honor societies - Phi Kappa Phi, Sigma Xi and the Phi Beta Kappa Faculty Club. It is currently under the sponsorship of the University Honors and Honors Programs Committee.

Note. Certain grades are not counted for honors: credit by examination, "overseas" grades, extension courses, "credit" grades and incompletes. Designation as a President’s or Dean’s Scholar does not apply to second baccalaureate, credential or graduate students.

Honors - Outstanding Graduating Senior Awards

Announced each year at Commencement by the University President, the Outstanding Graduating Senior Awards recognize exceptional scholarship and service to the university and community based on the following criteria:

1. An overall cumulative GPA of at least 3.75.
2. Significant SJSU leadership (in contrast to titular) in some area(s) of University life, and/or;
3. Significant contributions to the welfare of the University and/or the community, and/or;
4. Other evidence which indicates a high level of intellectual accomplishment and/or personal contribution as an undergraduate.

To be considered for this honor, visit the Student Affairs website at www.sjsu.edu/studentaffairs and follow the link for Outstanding Graduating Senior Awards or contact the Office of the Vice President for Student Affairs at 408-924-5900.

Honors - University Honors at Graduation

Criteria used to determine honors at graduation are those in effect as of the date of graduation.

Summa Cum Laude is awarded to those students achieving a cumulative grade point average in all university and college work and a cumulative grade point average in all work undertaken at SJSU of not less than 3.85.

Magna Cum Laude is awarded to those students achieving a cumulative grade point average in all university and college work and a cumulative grade point average in all work undertaken at SJSU of not less than 3.70.

Cum Laude is awarded to those students achieving a cumulative grade point average in all university and college work and a cumulative grade point average in all work undertaken at SJSU of not less than 3.50.
Graduation Requirements - Undergraduate

Candidates for graduation with a baccalaureate degree must satisfy the regulations described in this section, and those outlined by the major department. The Bachelor of Arts and the Bachelor of Science degrees are offered with majors in the several fields listed under Curricula Offered. In addition to the BA and the BS, the Bachelor of Music (BM), the Bachelor of Fine Arts (BFA), the Bachelor of Nursing (BN) and the Bachelor of Social Work (BSW) degrees are also offered. Specific requirements for degrees in each field are outlined in the departmental sections of this catalog. All candidates for graduation must satisfy the general regulations described on the following pages in this section, as well as those outlined by the major department.

Graduation Requirement - Academic

An overall average of "C" (2.0) or better, a "C" average or better earned in all units taken at the university, a "C" average or better in both the major and the minor (if applicable), and a "C" average or better in the twelve units of upper division GE (Areas R, S, V, and Z), are required for graduation with a baccalaureate degree. Candidates for teaching credentials must have a total average of better than "C" (see Approval of Candidacy for Teacher Education).

A minimum of 120 semester units of credit must be earned for graduation with the baccalaureate degree. Up to 140 units for engineering curricula and up to 132 units for all other Bachelor of Science, Bachelor of Fine Arts and Bachelor of Music degree programs may be required. Normally, no more than four units of Individual Studies (180) and/or Directed Reading (184) may count for the baccalaureate degree. Exceptions must have approval from the major department.

All requirements listed here may be met either by passing waiver examinations, where available, or by individual course challenge exams, or by course work. Students should note that success in a waiver examination satisfies a requirement but does not yield unit credit. For information about the examinations, see the Testing Office or call 408-924-5980. Courses which satisfy the requirements are listed in the General Education Requirements and Courses section, with the exception of Physical Education activity courses. Note: Effective Fall 2013, many programs that previously required more than 120 units to graduate will be reduced to 120 units. Please check catalog or Academic.

Graduation Requirement - American Institutions (AI)

U.S. History, U.S. Constitution, California State and Local Government. State law requires all students graduating from a CSU campus to demonstrate knowledge of these three areas, also referred to as the American Institutions and Ideals, the Title 5, or the "state code" requirement. Students may complete waiver exams or course work to satisfy the requirements. Consult the General Education Requirements and Courses section for approved courses or the Testing Office for information about the waiver examinations. Students should consult an advisor to determine which of the various course combinations are best for their degree objectives.

Graduation Requirement - Writing Proficiency (GWAR)

All students must demonstrate competency in writing skills as a requirement for graduation. Information on currently available ways to meet this graduation requirement is listed in the Testing section.

SJSU students satisfy this requirement by completing the Writing Skills Test followed by a 100W Writing Workshop course. A satisfactory score on the Writing Skills Test (WST) is required either to waive or to enroll in the 100W course designated by the major. Majors which require the 100W as part of the major, however, do not accept the waiver. 100W Writing Workshop must be passed with a C or better (C- not accepted) when satisfying the CSU Graduation Writing Assessment Requirement. Information on currently available ways to meet this graduation requirement may be obtained from the Testing Office and the Student Services Center.

Graduate students should refer to the section on Competency in Written English/Graduation Writing Assessment Requirement - Graduate.
Graduation Requirement - Physical Education (PE)

It is important that all students admitted to SJSU with fewer than 60 units, regardless of major, have an opportunity to expand their knowledge and skills in physical activities. To accommodate the needs and interests of SJSU students, the Department of Kinesiology offers a diverse selection of activity courses which have the following goals:

- To provide a fundamental understanding of the influence physical activity has on physical and mental well-being;
- To promote development of a repertoire of skills for constructive leisure activity and a physically active lifestyle important to maintaining health;
- To provide an understanding of the guidelines for developing and maintaining physical fitness throughout the lifespan;
- To provide exposure to a variety of lifetime fitness activities and sports; and
- To enhance the student’s liberal arts education and develop a well-rounded individual.

All students who matriculate at this university in the lower division (fewer than 60 units completed) must complete two units of physical education from two different Kinesiology/Dance activity courses (AS F73-5). To challenge the requirement, students must consult the Department of Kinesiology at least one semester prior to graduation (AS 96-12).

Kinesiology and Dance activity courses are not repeatable for credit. In addition, only one Intercollegiate Athletics course may be used to fulfill one unit of the physical education graduation requirement.

Graduation Requirement - Residency

For all bachelor’s degrees, including second baccalaureates, a minimum of 30 units shall be earned in residence after matriculation at the campus granting the degree. Twenty-four of these units shall be earned in upper division courses, 12 of the units shall be in the major and 9 units shall be in General Education. Extension credit or credit by evaluation shall not be used to fulfill any of the 30 units. Winter Session for previously matriculated students earns residence credit; Open University units are not applicable toward the residence requirement.

Graduation Requirement - Upper Division

At least 40 of the total units required for graduation with the bachelor’s degree must be upper division. For the BA, a minimum of 12 units of upper division credit in the major is required and for the BS, a minimum of 18 units of upper division credit in the major is required. Upper division credit will be allowed by the university and applied toward the baccalaureate degree only for SJSU courses numbered 100 or above and for courses from other universities clearly designated as junior or senior level courses.

Graduation Requirement - Election

Undergraduate students remaining in attendance in regular sessions at any California State University campus, at any California community college, or any combination of California community colleges and campuses of The California State University may, for purposes of meeting graduation requirements, elect to meet the requirements in effect at the campus from which they will graduate either:

1. at the time the student began such attendance, or
2. at the time of entrance to the campus, or
3. at the time of graduation.

Continuous attendance is defined as enrollment in at least one semester or two quarters in each calendar year. Absence related to an approved educational leave or for attendance at another accredited institution of higher learning is not considered an interruption, providing the absence does not exceed two years. Campus authorities may authorize or require substitutions for discontinued courses and may also require students changing their major or any minor field of study to complete the major or minor requirements in effect at the time of the change. Students who do not maintain continuous enrollment will be held to any new requirements approved by the university at the time of their readmission.
Graduation Requirement - Time Limits

Time Limit

Courses taken to meet degree requirements at San José State University are subject to a time limitation of 10 years. Students are required to meet those requirements in the major in effect no earlier than 10 years prior to receiving the degree. Students with an unusual problem may petition the major department chair for a waiver of the 10-year requirement.

Graduate students should refer to the section on Seven-Year Time Limit on Courses for Graduate Degree Program.

Facilitating Graduation

Effective Spring 2010, any undergraduate or graduate student will be precluded from enrolling in any additional state-supported courses when that student has already met all necessary requirements for the degree for which that student is matriculated. Moreover, students who have met all requirements for graduation prior to any semester in which they are enrolled will be permitted to drop all courses for which they are registered, with little or no penalty, and to graduate at the next available date. Students who have earned more than enough units to graduate but have some remaining requirements to complete, will be advised and precluded from registering in any courses other than those required for a timely graduation.

Graduation Requirement - Units

A minimum of 120 semester units of credit must be earned for graduation with the baccalaureate degree. Up to 140 units for engineering curricula and up to 132 units for all other Bachelor of Science, Bachelor of Fine Arts and Bachelor of Music degree programs may be required. Normally, no more than four units of Individual Studies (180) and/or Directed Reading (184) may count for the baccalaureate degree. Exceptions must have approval from the major department.

Note: Effective Fall 2013, many programs that previously required more than 120 units to graduate will be reduced to 120 units. Please check catalog degree plans or Academic Advisor for more details.

Units from 4-Year Colleges/Universities

At least 50 of the total units required for graduation with a bachelor’s degree must be earned from 4-Year Colleges/Universities. This is commonly referred to as a maximum of 70 units of Community College academic work that may count toward the minimum 120 units needed for all baccalaureate degrees.

Graduation Application

Candidates for the baccalaureate degree must file an application for graduation at least two semesters prior to the expected graduation date in order to allow time to make up any deficiencies or correct any discrepancies that may delay graduation. At least 90 semester units must be completed before an application for graduation may be submitted. In addition to fulfilling curricular graduation requirements, a student, to be eligible for a bachelor’s degree, must have a grade point average of at least 2.0 (C) in each one of the following categories: all college work (the overall average), all units attempted at SJSU, all units in the major, all units in the minor (if any), and all nine units of upper division GE (Areas R, S, and V).

Graduation applications for undergraduates are available in the Academic Forms section of www.sjsu.edu/registrar/forms. Students return their completed graduation application forms to Registrar’s Office in the Student Services Center. Major and minor forms are obtained from the departments and forwarded by departments to Registrar’s Office.

Graduation forms for master’s degree candidates are available in Graduate Admissions and Program Evaluation (GAPE), Student Services Center.

Those planning to attend a college or university other than SJSU during the final semester must notify the Office of the Registrar. Courses must be completed by the date of graduation and transcripts received within one month after graduation.

If a candidate is unable to complete the course work as expected, or if the date of graduation is to be delayed for any reason, a Change of Graduation Date form must be submitted, accompanied with the fee, prior to the new expected graduation date.

College of Business Graduation Applicants

The College of Business requires that students apply to the Jack Holland Student Success Center. Graduation deadlines and procedures differ from those established by the university. For further information, check with the Jack Holland Student Success Center, BBC 008, 408-924-3435.
Bachelor’s Degree Candidates

- You should apply for graduation at least two semesters in advance, after completing at least 90 semester units.
- See major department for specific graduation course and unit requirements.
- File your application no later than the Processing Deadline dates shown below. Submitting your application by the priority processing deadline allows us to review your graduation requirements before Advance Registration ends for your last term of attendance.
- Graduation applications are available at: www.sjsu.edu/registrar/forms/index.html.
- Major/Minor Forms are available from your department office.
- Submit a completed graduation application, Major form (and Minor form as applicable), in a sealed department envelope to the Registrar’s Office, located in the Student Services Center. Incomplete applications will be returned and may cause a delay in graduation.
- Only original signed documents are acceptable.
- All courses and requirements must be completed by the date of graduation and transcripts received within one month after graduation. Any Incomplete (I) or Record Delayed (RD) grade must be cleared before your degree can be awarded. Once your degree has been posted, no grade changes will be made to your record.
- If you are unable to complete the course work, or if the date of graduation is delayed, a “Graduation Date Change Form” must be submitted to the Registrar’s Office. A $10.00 administrative fee must be paid at the Bursar’s Office.

**Graduation Term** | **Priority Deadline Date**
---|---
Spring 2014 | Friday, November 1, 2013
Summer 2014 | Thursday, May 1, 2014
Fall 2014 | Thursday, May 1, 2014

Don’t delay! Apply by the priority processing deadline dates. Applications will continue to be accepted up to the last day to add classes for the term of graduation; however, delays may occur in the initial and final evaluation of your application and names may not appear in the commencement book. If we receive your application after the final deadline date for the term you are applying, your application will automatically be set up for the next available graduation date.

Degrees - Conferring

Degrees are conferred three times a year - in August, December and May - at the close of summer, fall and spring terms. The date of the diploma reflects the term during which the degree requirements were completed. There is one graduation or commencement ceremony each academic year, held at the close of the spring semester. Students who have completed all requirements in the previous summer and fall semester, or expect to complete their degree requirements in the spring semester, are eligible to participate.

Double Major

If a student has completed the requirements for two or more majors leading to the same baccalaureate degree (e.g., two B.A. degrees or two B.S. degrees) for the same graduation application period, those majors shall be acknowledged on a single diploma and on the student’s transcripts. If a student has completed the requirements for two or more majors leading to different baccalaureate degrees (e.g., a B.A. degree and a B.S. degree) for the same graduation application period, both degrees and majors shall be acknowledged on a single diploma and on the student’s transcripts. Each major, not including courses in preparation for the major, must consist of at least 36 units for Bachelor of Science degree majors, or at least 24 units for Bachelor of Arts degree majors, units that are completely separate and distinct from the other degree. The University has the right to restrict students from pursuing double majors, particularly when resources must be equitably distributed among all students.
Double Concentration

If a student has completed the requirements for two or more concentrations within the same baccalaureate degree (e.g., two concentrations for the same B.S. degree) for the same graduation application period, those concentrations shall be acknowledged on a single diploma and on the student’s transcripts. Each concentration, not including courses in preparation for or in support of the major, generally must consist of at least 12 units that are completely separate and distinct from the other concentration. Individual degree programs may set higher limits for the number of units that are completely separate and distinct from concentration to the other. Exceptions to allow two concentrations with fewer than 12 units unique to each concentration will require the approval of both the appropriate College Associate Dean and the Associate Dean for Undergraduate Studies. The University has the right to restrict students from pursuing double concentrations, particularly when resources must be equitably distributed among all students.

Minors

A minor may be required or recommended at the option of the major department. A student may also elect to complete a minor. The minimum criterion for any minor must be 12 units of course work completely distinct and separate from the course work in one’s major. However, courses in preparation for the major may be included in the minor. Of the courses taken for a baccalaureate minor, 6 units must be upper division; for a teaching credential minor, 12 units must be upper division or graduate. If a minor is completed after a degree has been granted, the minor is not recorded on the student’s permanent record.

Double Minors

If a student has completed the requirements for two or more minors, each minor must independently satisfy the criteria for a single minor. Additionally, each minor must include a minimum of 12 units of course work completely distinct and separate from the course work in the other minor(s).

Special Major

The Special Major is an individually designed, interdisciplinary course of study leading to a BA or BS degree when academic or professional aims are not adequately met by existing degree programs. It is not to be used to bypass normal graduation requirements nor to substitute for a major in which a student is having academic difficulty.

The proposed course of study must be a coherent program organized around a sound academic theme. Students who complete a Special Major shall be able to demonstrate: “the ability to analyze an issue or problem, integrating at least two disciplinary perspectives.” In addition, students identify two or more student learning outcomes related to their specific areas of study in consultation with a major faculty advisor. They demonstrate their attainment of the learning outcomes through a portfolio completed in a capstone course.

Applicants must have both a cumulative and SJSU GPA of at least 2.75 and have at least one full year of academic work still to be completed to meet minimum degree requirements. Special Majors are considered on a case-by-case basis. Approval is based on the academic merit of the proposed course of study, the applicant’s proposed rationale and potential for successful completion of the program, and the ability of the university to support the proposed program. Students apply for consideration for the Special Major through the Office of Undergraduate Studies, ADM 159.
Second or Additional Baccalaureate Degree

Effective Fall 2011: Postbaccalaureate students who have earned a first baccalaureate from a regionally accredited U.S. college or university, the second or additional baccalaureate degree will be awarded when the student has filed for graduation with Office of the Registrar and a graduation check determines that all major requirements have been satisfied. For such students, residence, university, GE, American Institutions, and PE requirements normally associated with first baccalaureate degrees are not applicable to second or additional baccalaureate degrees.

For postbaccalaureate students who have earned a first baccalaureate from a regionally accredited U.S. college or university, the second or additional baccalaureate degree will be awarded when the student has filed for graduation with Office of the Registrar and a graduation check determines that all major requirements have been satisfied. For such students, residence, university, GE, American Institutions, and PE requirements normally associated with first baccalaureate degrees are not applicable to second or additional baccalaureate degrees.

For postbaccalaureate students who have earned a first baccalaureate from an institution that is not a regionally accredited U.S. college or university, the second or additional baccalaureate degree will be awarded when the student has filed for graduation with Office of the Registrar and a graduation check determines that all university requirements have been satisfied. To be eligible for the degree, students must complete all course work which constitutes the second or additional degree in at least two additional semesters with a minimum of 30 units of work beyond the first degree in accordance with the minimum residence requirement. Second or additional baccalaureate degree candidates must meet the academic regulations required of all undergraduate students, including the residency requirement (30 units in residence, 24 of which must be upper division, 12 in the major and 9-12 in SJSU Studies). Effective Fall 2011: Second baccalaureate students who earned their first bachelor degree from a regionally accredited institution in the U.S. are not required to take SJSU Studies unless specific courses are required by the major.

Course work completed in the second or additional baccalaureate degree status will be classified as undergraduate work. Students cannot pursue a graduate degree objective and a second or additional baccalaureate degree at the same time at the university.

Continuous Attendance and Catalog Rights

Undergraduate students acquire “catalog rights” with respect to the requirements for a degree program by maintaining continuous attendance. A student who has been enrolled either at a California Community College or in regular sessions at a CSU campus for at least one semester or two quarters of consecutive calendar years is considered to be in “continuous attendance.” Once a student has established their “catalog rights” their absence related to an approved medical, military, or educational leave or for attendance at another accredited institution of higher learning shall not be considered an interruption, providing the absence does not exceed two years.

This concept is important because continuous attendance affects the requirements a student must meet to graduate from a CSU campus. San Jose State University issues a new on-line catalog every year which is the official record of all the degrees and degree requirements for the programs at SJSU. These degree requirements may change from one catalog to the next.

A student, who has been in continuous attendance, may normally choose to meet the SJSU campus graduation requirements in force:

- at the time they began continuous enrollment at a California community college or other CSU campus; or
- at the time they entered SJSU; or
- at the time they graduate from SJSU.

By maintaining continuous attendance and selecting option (1) or (2), students can be assured that their SJSU campus graduation requirements will not change. Their right to choose one of these options is called “catalog rights.” SJSU will use the matriculation term (i.e. option 2) as the initial option (default) for all students; however, students transferring from a CCC or CSU, who would benefit from an earlier term based on continuous enrollment, may request option (1) or (3) from the Office of the Registrar.

If a student is following an earlier version of a program in which their department has discontinued or modified required courses, the department may authorize appropriate substitutions. If while enrolled a student changes their major, concentration, or minor they may be required to complete the major or minor requirements in effect at the time of the change. However, they may continue to follow the University, General Education and Mathematics and Writing requirements listed in the University Catalog for which you claim “Catalog rights,” as defined above.

Note: Effective Fall 2013, many programs that previously required more than 120 units to graduate will be reduced to 120 units. Please check catalog or Academic Advisor for new requirements.
Graduate Credit for Units Completed as a Graduating Senior

Seniors at San José State University may petition through their major departments to receive graduate credit for units completed in their final undergraduate semester, provided the following conditions are met:

1. No more than 14 semester units are needed to complete a baccalaureate degree at San José State University.
2. None of the courses to be taken for graduate credit is required for the bachelor’s degree.
3. The student has at least a 2.5 grade point average in all course work in upper division standing completed at San José State University.
4. The student agrees to enroll for no more than the maximum load of 15 units for the term in which this work is taken.
5. The student has completed the graduation application check in Evaluations, Student Services Center.
6. The student agrees not to take letter-graded courses for “CR/NC” when graduate credit is requested.
7. If admitted to a graduate degree program, the student agrees that a maximum of six units of graduate credit earned through this process may be applied toward the master’s degree when approved by the appropriate program authority.
8. This policy applies solely to graduate classes taken at SJSU; courses taken at other universities during the undergraduate career do not qualify for transfer into a SJSU graduate program.

These units and grade points will not be included in the student’s cumulative grade point average after admission to the Graduate Division.

These policies also apply to students in second baccalaureate status. No courses taken while a student is in second baccalaureate status shall be awarded graduate credit unless the student is within fourteen semester units of qualifying for award of the second baccalaureate degree and meets the criteria specified above (including enrollment in all units required for completion of the second baccalaureate degree).

Petitions regarding this matter must be in writing (Request for Validation of Transfer Credit form available at www.sjsu.edu/gape/forms) and bear endorsement by the department graduate advisor.

Graduate Information and Requirements

We appreciate your interest in pursuing a graduate career at San José State University. In this section you will find out more about SJSU, the programs we offer, our application process and requirements, and important deadlines and forms related to applying for graduate admission. Some additional external links that might be of interest to prospective students are also listed, including information about housing and other available services.
Admission - Graduate Procedures and Policies

Admission - Graduate and Postbaccalaureate

All graduate applicants (e.g. DNP, master’s degree applicants, those seeking educational credentials or certificates, and where permitted, holders of baccalaureate degrees interested in taking courses for personal or professional growth through regular or special session but not through Open University, students who have stopped out for more than one semester, students who have been disqualified) must file a complete graduate application as described in the graduate admission materials at www.csumentor.edu.

Applicants who completed undergraduate degree requirements and graduated the preceding term are also required to complete and submit an application and the $55 nonrefundable application fee. Since applicants for graduate programs are limited to the choice of a single campus on each application, re-routing to alternate campuses or later changes of campus choice are not guaranteed. To be assured of initial consideration by more than one campus or more than one program on a single campus, it is necessary to submit separate applications (including fees) to each. Applications submitted by way of www.csumentor.edu are expected unless submission of an electronic application is impossible. An electronic version of the CSU graduate application is available at www.csumentor.edu.

Anyone who has never attended San José State University must apply for admission to the university and to the department housing the program in which he or she is interested. After formal admission, the applicant must enroll in classes in the term of admission to preserve the matriculation status.

Former students who have previously attended SJSU as undergraduate or postbaccalaureate students and have had a break of two or more semesters in their enrollment (not counting summer session) must file for readmission to preserve the matriculation status. A graduate of SJSU, whether returning after an absence or continuing immediately after receiving a baccalaureate or master’s degree, must also apply for admission. Reapplication by a previously matriculated student also results in loss of catalog rights. Therefore, reentering students are subject, at departmental discretion, to current department policies and requirements.

Graduate Admission - Prospective Students

Students intending to pursue graduate work at San José State University may obtain pertinent information from a variety of sources. Careful reading of several publications will save time and prevent many difficulties that often arise due to lack of information. Publications recommended are:

- **SJSU Policies** - The all-inclusive catalog of SJSU regulations and policies,
- **SJSU Catalog** - The listing of regular session courses offered at SJSU,
- **SJSU Schedule Course Listings** - lists the times of all courses and gives specific information concerning registration
- Various departmental publications available from department offices and advisors, and
- Websites at www.sjsu.edu/gape and www.sjsu.edu/gradstudies.

The prospective student may also wish to consult an academic advisor. Persons assigned responsibility for advising students in specific graduate programs are listed in various sections of the SJSU catalog.
Graduate Admission - Requirements

Graduate and post-baccalaureate applicants may apply for a degree objective, a credential, or certificate objective. Depending on the objective, the CSU will consider an application for admission as follows:

- General Requirements - The minimum requirements for admission to graduate and post baccalaureate studies at a California State University campus are in accordance with university regulations as well as Title 5, Chapter 1, Subchapter 3 of the California Code of Regulations.
- Specifically, a student shall at the time of enrollment (1) have completed a four-year college course of study and hold an acceptable baccalaureate degree from an institution accredited by a regional accrediting association or shall have completed equivalent academic preparation as determined by appropriate campus authorities; (2) be in good academic standing at the last college or university attended; (3) have earned a grade point average of at least 2.5 on the last degree completed by the candidate and (4) satisfactorily meet the professional, personal, scholastic, and other standards for graduate study, including qualifying examinations, as appropriate campus authorities may prescribe. In unusual circumstances, a campus may make exceptions to these criteria.
- Students who meet the minimum requirements for graduate and post-baccalaureate studies may be considered for admission in one of the three following categories:
  - Graduate Classified - To pursue a graduate degree, applicants are required to fulfill all of the professional, personal, scholastic, and other standards, including qualifying examinations, prescribed by the campus; or
  - Graduate Conditionally Classified - Applicants may be admitted to a graduate degree program in this category if, in the opinion of appropriate campus authority, deficiencies may be remedied by additional preparation; or
  - Post-Baccalaureate Classified, e.g., admission to an education credential program - Persons wishing to enroll in a credential or certificate program will be required to satisfy additional professional, personal, scholastic, and other standards, including qualifying examinations, prescribed by the campus.

Graduate Admission - Requirements for International Students

The CSU must assess the academic preparation of foreign students. For this purpose, “foreign students” include those who hold U.S. visas as students, exchange visitors, or in other nonimmigrant classifications.

The CSU uses separate requirements and application filing dates in the admission of foreign students. Verification of English proficiency (see the section English-Language Proficiency Exam Requirement), financial resources, and academic performance are all important considerations for admission. Academic records from foreign institutions must be on file by the stated deadlines for the first term and, if not in English, must be accompanied by certified English translations. See www.sjsu.edu/gape/prospective_students/index.htm and click on admission deadlines.

Graduate Admission - Test Requirements

New graduate students enrolling at SJSU who matriculate with graduate degree objectives may be required to take one or more parts of the Graduate Record Examination (GRE). Students with graduate objectives in Business (MBA, MSTax, MSacct, MSTmMgt) are required to take the Graduate Management Admission Test (GMAT). Some departments may require a locally developed qualification examination in their subject matter areas. Test requirements can be viewed at www.sjsu.edu/gape/prospective_students/test_requirements/index.htm and on graduate program web pages.

Applications and information about dates of administration for the GRE and GMAT are available in the Testing Office.
Graduate Admissions - English Language Proficiency Requirement

All graduate students, regardless of citizenship, whose undergraduate institution is located in a country in which English is not the official language (the daily medium of communication of the majority of residents must demonstrate competence in English by meeting the minimum score of one of the following exams. Some programs require a higher score. Letters attesting to English as the principal medium of instruction will not be accepted.

<table>

Graduate Admission - Transcript Submission

Transcripts submitted for admission purposes must be official and sent directly from the originating school or college to Graduate Admissions & Program Evaluations (GAPE), San Jose State University, One Washington Square, San Jose, CA 95192-0017. Unofficial transcripts submitted via the student are not acceptable for this purpose. Records submitted become the property of the university and will not be released to the student. If a student does not fully complete an application and enroll, the records will be kept on file for about one year and then destroyed.

Graduate applicants must file with GAPE one official transcript from each accredited institution attended. Failure to report to the university on the admissions’ application all previous college-level enrollment and to provide transcripts certifying that enrollment are regarded as serious infractions of university policy and may be punishable by permanent separation from the university. Some departments may also require applicants to file additional transcripts with their graduate advisor. Program requirements are located on departmental websites, which can be accessed by clicking on the program name at www.sjsu.edu/gape/graduate_programs/index.htm.

Individuals currently enrolled in courses at the time of their application for admission are required to complete the “Report of Work in Progress” section of the application by recording the department course number, course title, and units attempted and to file an official transcript of the work when it is completed.

Graduate Admission - Transfer Credits from Other Institutions

Students who have completed course work at other accredited colleges or universities may be eligible to apply credit toward master’s degree requirements at SJSU. To be transferable, the course work must have been taken at an accredited university. It must not have been in professional development courses but must have been at the upper-division or graduate level, must not have been used for credit toward an earned degree of any kind, taken within seven years of the award of the degree from SJSU, and, if taken prior to applying for admission into the graduate school at SJSU, listed on the SJSU application.

As stipulated in university policy S13-8, not less than 70% of course work required for the master’s degree must be completed in residence. Therefore, for example, a maximum of 9 units can be transferred into a 30-unit graduate program. This total includes all transferred classes, including those from Open University and the SJSU undergraduate career. Transfer work from another university may be applied toward the degree program only if it is approved by the graduate advisor and was in courses that were accepted by that university’s degree programs. The courses can include extension courses and correspondence courses provided the conditions above prevail. Courses transferred from other universities may not be re-validated if they go beyond the seven-year deadline. Those taken at SJSU, whether through Open University or as a matriculated undergraduate may be re-validated in accordance with the rules on re-validation.

For university approval of transfer units up to the 20% limit for non residency units, the courses are entered on the Petition for Advancement to Graduate Candidacy in the Transfer Course section (Section D). The signature of the graduate advisor on this candidacy form is sufficient to indicate departmental approval of the courses without additional forms. If the courses meet all of the requirements stipulated above, the university will accept the courses for advancement to candidacy and for graduation requirements. Credit is awarded for transferred courses of all category, but grade points are not included in the cumulative GPA for transferred courses other than those from the SJSU Open University program; therefore, the cumulative grade-point-average (GPA) calculation will not include those units nor will the GPA calculation for advancement to candidacy or graduation.
Graduate Admissions and Program Evaluations (GAPE)

GAPE processes the admission and graduation materials for all graduate and teaching credential programs. The admissions process is a dual admission process, including application submission to and admission decisions by both the university and the academic program.

For new students, the CAPE office
- Receives all university applications, including supplemental materials such as transcripts and declaration of finances
- Reviews documents for completeness
- Refers applications that meet minimum university requirements to departmental graduate advisors

For those applicants accepted by both the university and the academic program, GAPE sends out letters of admission.

For continuing students, evaluators assigned to each degree program review Candidacy and Application for Award of Master’s Degree requests for accuracy and alignment with policies and procedures of the university and the academic programs.

Grading System for Graduate Work

Traditional letter grades are used for all courses taken by graduate students except for field work, thesis, project, individual study, and internship courses, which are usually graded credit/no credit. Graduate students do not have the option of choice between the traditional or non-traditional grading system. A grade of Credit in a graduate-level course indicates performance by the student equal to a letter grade of “C” or above.

The cumulative GPA for advancement to candidacy for the master’s degree (3.0 minimum) includes all letter-graded work in 100-level or 200-level courses completed within the preceding seven years and for which the student received graduate credit, excluding transfer courses taken at another institution and those taken as an undergraduate at SJSU. Both the cumulative GPA and GPA of all of the course grades on the student’s candidacy form, with the exception of non-Open University transfer courses, must be at least at the 3.0 level to graduate.

The cumulative GPA of the graduate student is computed by dividing the total number of grade points earned by the total number of graded units attempted at SJSU, excluding Open University courses, subsequent to enrollment in the graduate school.
Academic Standards - Graduate Students

To determine a student’s standing, whether “good,” probationary, or disqualified, quality of performance and progress toward degree completion are considered based on units attempted, grade points earned, and grade point average (GPA).

Grade points are assigned as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A, A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>D-</td>
<td>0.7</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
</tr>
<tr>
<td>WU</td>
<td>0.0</td>
</tr>
<tr>
<td>I</td>
<td>0.0</td>
</tr>
<tr>
<td>IC</td>
<td>0.0</td>
</tr>
<tr>
<td>RD</td>
<td>0.0</td>
</tr>
<tr>
<td>RP</td>
<td>0.0</td>
</tr>
</tbody>
</table>

The cumulative GPA is obtained by dividing the total number of grade points earned by the total number of graded units attempted. Courses for which the symbols “CR,” “NC,” “RP,” “I,” “WU,” and “RD” have been assigned do not enter into the GPA computation. Also excluded are lower-division courses and most transfer courses.

Failure to Achieve a 3.0 Grade Point Average on Completed Graduate Degree Program

If a graduate student does not complete the graduate degree program with a minimum 3.0 GPA in both the overall coursework and the candidacy coursework, the student’s major department may terminate the candidacy or permit completing additional courses in an attempt to raise the GPA in the program to the minimum 3.0 threshold. When the student’s major department recommends the latter, the additional courses must be (1) courses already taken, usually ones in which low grades were earned (note that the original grade cannot be eliminated but instead is counted in GPA calculations along with the new grade; any course with a grade beneath a “B” may be repeated, but no more than 6 units can be repeated), or (2) there must be at least two new courses at the 200 level that total not less than 6 semester units and are letter graded. In the case of the second option, they must apply directly to the student’s master’s degree objectives, although they need not be drawn from offerings in the student’s major department. Two new courses must be taken even if it is possible to raise the GPA to 3.0 with a single class. Completed courses cannot be removed from the “candidacy form” or from the degree program even if all degree courses have been taken and the overall or candidacy GPA is lower than 3.0. Only one of these options may be used by a student. Failure to raise the candidacy and overall GPA to 3.0 after adding 6 units, and thus after completing one of the two options above, will result in a termination of the student’s candidacy and an inability to earn the master’s degree.

Credential candidates who fail to achieve a 3.0 GPA upon completion of the credential program can be precluded by the department from attempting additional coursework and therefore not be recommended for an award of a credential by the State of California.
Disqualification and Probation - Graduate Students

Probation - Academic - Graduate

Graduate students enrolled in a degree program and credential candidates are subject to academic probation if the SJSU cumulative GPA falls below 3.0 (grade of “B” on a 4.0-point scale) in all units attempted subsequent to matriculation into the degree program in either conditionally classified or classified status. Courses taken at the lower-division level will be listed on the transcript but cannot be used for graduate degree credit and are not included in the GPA computation. Courses taken through SJSU Open University before matriculation will also be listed on the transcript and may be, with advisor consent on the candidacy form, used toward the graduate degree if adhering to the transfer course limitation and residency requirement. They will be figured into the GPA for advancement to candidacy and graduation. However, courses transferred into the graduate program from other institutions or from the SJSU undergraduate career will not count in the GPA computation.

Each Fall and Spring semester while on probation, the student must achieve a 3.0 GPA in the semester’s work to avoid academic disqualification. The student remains on continued probation as long as each individual semester’s work is equal to or above the 3.0 threshold but the overall GPA is still below 3.0. Probation is cleared if the SJSU cumulative GPA rises to 3.0 or better in any subsequent semester. Graduate students are eligible to repeat courses with letter grades lower than “B” or with grades of “NC,” “WU,” or “IC.” They may not be taken through Open University. Academic disqualification policies were revised in University Policy S10-6 and are effective with the determination of Academic Standing at the end of the Fall 2011 semester.

Probation - Administrative-Academic - Graduate

Regardless of the cumulative GPA, administrative-academic probation or disqualification can be imposed by the Associate Dean or AVP of Graduate Studies & Research for the following reasons:

1. Withdrawal from all or a substantial portion of an academic program in two successive terms or in any three terms, whether by formal withdrawal processes or from failure to attend but not including authorized leaves of absence. A student whose withdrawal is directly associated with a chronic or recurring disability or its treatment is not subject to administrative-academic probation for such withdrawal.

2. Failure to progress satisfactorily toward the degree or other program objective, including that resulting from assignment of 9 units of “NC,” when such failure appears to be due to circumstances within the student’s control, failure to pass writing requirements, failure to take a reasonable number of courses in the student’s own degree program, or failure to progress due to excessive course withdrawals. While administrative action under this category is subject to the discretion of the individual programs which set the standards for their own students, the action must be justified to and agreed upon by the Academic Disqualification and Reinstatement Review Committee, which would hear appeals of decisions within this realm.

3. Failure to comply, after due notice, with an academic requirement or regulation which is routine for all students or a defined group of students (examples: failure to complete a required CSU or campus examination, failure to complete a required practicum, failure to comply with professional standards appropriate to the field of study, failure to complete a specified number of units as a condition for receiving student financial aid or making satisfactory progress in the academic program, failure to put together a graduate committee of qualified individuals). Students in conditionally classified status are effectively on probation until the conditions are met. Failure to clear them within a period stipulated in the description of the conditions results in immediate administrative-academic disqualification.

When such action is taken, the student will be notified in writing and provided with the conditions for probation and the circumstances that would lead to disqualification should probation not be removed. The program also must notify the Registrar’s Office for inclusion in the permanent record.

Discontinuation from the University - Graduate

Students who fail to register for classes in two successive semesters are placed in a discontinued status that requires readmission to the university and program before being permitted to enroll again. This policy also applies to students who leave the university after having registered for classes but who do not officially withdraw or withdraw from all courses after the semester drop deadline. The courses will be assigned a grade of “WU” (denotes unauthorized drop or withdrawal). No personnel actions, grades, or transcript services will be permitted until all financial obligations, such as unpaid fines, have been settled. If the student fails to return the semester immediately following withdrawal, reapplication for admission will be necessary at www.csumentor.edu.

The exception to this policy is for students who file for a formal leave of absence for medical reasons, military leave, or for department-sanctioned educational opportunities. See the description of the options and regulations governing leaves in this catalog.
Disqualification - Academic - Graduate

A graduate student who is on academic probation is disqualified if he or she fails to earn a 3.0 or better grade point average each term until the required 3.0 grade point average is again established. This requires enrollment in at least one letter-graded course in each term that the student is on probation. Credential candidates are subject to the GPA requirements dictated by the State Department of Education. Candidates will be notified of those requirements by the department in the College of Education in which they are seeking their credential preparation. At this time, the minimum GPA requirement matches that of the graduate division as a whole, that is, the 3.0 level. Credential candidates who fail to meet this standard are academically disqualified and, depending on the department, may or may not be eligible for reinstatement. Similarly, if at the time of completion of all credential course requirements, a student’s candidacy GPA or cumulative GPA is below the 3.0 threshold, the student is academically disqualified and may not be afforded the option of repeating credential courses to raise the GPA.

Disqualification - Administrative-Academic - Graduate

Section 41300 in Title 5 of the California Code of Regulations permits administrative-academic probation or disqualification from academic programs in the CSU for unsatisfactory scholastic progress regardless of cumulative GPA. See University Policy S10-6 for details.

Upon notice by the coordinator of the graduate program in which a student has been placed on administrative-academic probation, the student may be disqualified from further attendance by the Associate Dean or AVP of Graduate Studies & Research if any of the conditions below occur:

a. the conditions for removal of administrative-academic probation have not been met within the period specified,

b. the student becomes subject to academic probation while on administrative-academic probation,

c. the student becomes subject to administrative-academic probation for reasons similar to those for which he or she was originally placed on probation, whether or not currently in that status.

Whether being previously put on probation or not, a student may be administratively academically disqualified for behavior contrary to the standards of the profession for which the student is preparing if it is renders him or her unfit for the profession. Disqualification is immediate upon notice to the student, which will include an explanation for the action, and enrollment is discontinued.

As indicated in the section on Administrative-Academic Probation, a student who has failed to fulfill the requirements stipulated in the assignment to conditionally classified status can be immediately disqualified from the program without a formal probationary period.

Each college, school, program, and department has the option of employing a policy for disqualification from the major. Those that opt to disqualify from the major must have published criteria for determining administrative-academic probation in the major and administrative-academic disqualification from the major. Such criteria may include individual course grades below “B” (3.0) or “CR,” a degree program GPA below 3.0, or passage of a comprehensive exam (culminating experience) within a prescribed and published number of attempts. A probationary period of at least one semester must precede disqualification in the major, except for the two instances cited in the previous two paragraphs. Students disqualified under this policy must be notified by the department, school, or college a semester before disqualification that they have been placed on probation in the major; the reasons for the probationary state must be stated along with the means to return to good standing. Failure by the student to meet these steps results in disqualification, for which notification must occur once again. In most cases (unless stipulated by the program in writing), graduate students administratively academically disqualified from their majors have no means for reinstatement. However, unlike academic disqualification, reinstatement and readmission are not absolutely necessary for continuation at the university after administrative-academic disqualification. If a student after administrative-academic disqualification finds another program willing to accept him or her within one semester, an Application for a Change of Graduate Major form can be filed and enrollment can resume following formal acceptance into the new program. SJSU does not allow an “unclassified status” at the graduate level, and thus a student must be accepted into some program to register for courses at the university other than through Open University. If two semesters elapse from the point of disqualification, the student will be considered to have stopped out of enrollment and will be required to apply for readmission if a second department indicates willingness to allow a transfer.
Disqualification - International Students - Graduate

To maintain their legal status in the U.S., international students must be matriculated within a degree program. After disqualification from SJSU, international students must transfer to another institution to maintain their legal status. Enrollment in Open University alone does not qualify them for the immigration document needed to remain in the U.S. Disqualified international students who have transferred out to another university may enroll in Open University for a program of study in order to be academically reinstated but must seek immigration reinstatement from SJSU. Disqualified international students must speak with an international student advisor as soon as possible.

Disqualification and Probation - Appeal - Graduate

Students may appeal their probation or disqualification by petitioning the Academic Disqualification and Reinstatement Review Committee after the programmatic appeal process has been exhausted. The student should begin the appeal process by consulting with the graduate advisor. The appeal, in writing to the Associate Dean of Graduate Studies & Research, should contain a description of actions by the department contrary to departmental or university policy or an explanation of extenuating circumstances that led to the action.

The student must present documentation, for example, physician’s letters, police reports, and/or transcripts, that the circumstances were beyond his or her control, that they disrupted previously satisfactory scholastic performance, and that they no longer affect the student’s academic work. The Associate Dean of Graduate Studies & Research has the authority to deny further appeal on the basis of reasonable grounds for appeal. If grounds exist, a subcommittee of the Academic Disqualification and Reinstatement Review Committee will in turn hold a formal hearing to confirm or rescind the probation or disqualification.

Reinstatement - Disqualification - Graduate

Following notice of disqualification, the graduate student should obtain a Graduate Petition for Reinstatement. The form indicates that there are four categories by which a student can be reinstated: extenuating circumstances, special consideration, grade change, and program of study.

Students may appeal their probation or disqualification by petitioning the Academic Disqualification and Reinstatement Review Committee after the programmatic appeal process has been exhausted. The student should begin the appeal process by consulting with the graduate advisor. The appeal, in writing to the Associate Dean of Graduate Studies & Research, should contain a description of actions by the department contrary to departmental or university policy or an explanation of extenuating circumstances that led to the action. The student must present documentation, for example, physician’s letters, police reports, and/or transcripts, that the circumstances were beyond his or her control, that they disrupted previously satisfactory scholastic performance, and that they no longer affect the student’s academic work. The Associate Dean of Graduate Studies & Research has the authority to deny further appeal on the basis of reasonable grounds for appeal. If grounds exist, a subcommittee of the Academic Disqualification and Reinstatement Review Committee will in turn hold a formal hearing to confirm or rescind the probation or disqualification.

Extenuating Circumstances

Similar to the appeal process for probation or disqualification, a request for reinstatement due to extenuating circumstances must meet the conditions indicated above for that process. The petition is submitted along with evidence of the circumstances and their role in the decline in scholastic performance.

After securing the requisite signatures, the form is submitted to the Associate Dean of Graduate Studies & Research for a final decision.

Special Consideration

This category is reserved for individuals who have been absent from the university for five or more years and who have in that time achieved a renewed sense of purpose through job activities or through increased maturity that would prompt a greater chance of academic success. Often this request is accompanied by a switch in major from that in which the disqualification occurred.
Change of Grade

If a grade that was changed results in an increase in the semester GPA or in the cumulative GPA to 3.0 or above, the student may qualify for reinstatement in this category. The Change-of-Grade Form must be submitted by the department office directly to the Office of the Registrar by the drop deadline of the following spring or fall semester. Extension of this deadline will be considered only when there is documentation of the student’s attempt(s) to contact both the instructor and the department chair and only when the late submission of the Change-of-Grade Form is clearly shown to be beyond the student’s control. If these conditions are met, the disqualification (or probation) will be rescinded. If the conditions are not met, even if the grade is subsequently changed and the GPA elevated, the probationary or disqualified status will remain unchanged. Note that a course or semester withdrawal is not considered to be a grade change, and reinstatement in this category would not be appropriate.

Program of Study

The most common grounds for reinstatement is the completion of a program of study. A student must confer with the graduate advisor to develop a schedule of classes appropriate to the student’s major. The courses must amount to a minimum of 6 and maximum of 9 units per semester, and all must be taken in a single semester. They must be letter graded, upper division (100-level), and taken through the SJSU (only) Open University or SJSU’s Extended Studies winter or summer session. The 100-level courses may or may not be part of the graduation requirements for the student’s degree program. The advisor may require more than 6 units of course work. Graduate (200-level) courses are not permitted on the program of study, and disqualified students cannot enroll in 200-level courses. Under no circumstances will courses be accepted that were taken prior to approval of the program of study via submission of the Graduate Petition for Reinstatement. Also precluded from the program of study are courses, including extension courses, taken at another university, 300-level extension courses taken at another university, 300-level or 400-level courses taken through SJSU Extended Studies, and lower-division courses. The program of study must include work applicable to the major. If the student plans to pursue a different degree program upon readmission to the university, the program of study must be applicable to the new major, be developed in conjunction with the graduate advisor of the new major, and demonstrate the student’s capacity to complete the new graduate degree requirements. If a course on an approved program of study becomes unavailable, another reinstatement petition must be submitted and approved immediately after enrollment in a substitute course. Once the program of study has been completed such that the student earns a minimum grade point average of 3.3 (“B+”), he or she will be reinstated and, after reaplication to the university, readmitted to the university and department. Reinstated students cannot be denied admission on the basis of their lack of good standing.

Reinstatement is not allowed for a second disqualification. Unless extenuating circumstances can be cited that result in rescinding the second disqualification, a Graduate Petition for Reinstatement will not be accepted from students who have been disqualified more than once.

Unless the disqualification is rescinded as above, reinstated students must apply to the university and department for readmission. Reapplication via www.csmentor.edu can be done during the semester in which the program of study is underway or in which the reinstatement petition is being considered. The application will be placed on hold at Graduate Admissions and Program Evaluations until a decision on the petition is made or until the program-of-study grades are posted. Under most circumstances, a department is expected to readmit students who have successfully completed programs of study signed off by that department. Disqualified, reinstated students seeking readmission are, nevertheless, subject to the same enrollment limitations and admission application requirements as all other applicants.

Readmission - Graduate

A graduate student readmitted after academic disqualification most often retains a sub-3.0 GPA and, therefore, remains on continued probation until the cumulative graduate GPA is raised to at minimum of 3.0. While disqualified, the graduate student has no capacity, outside of degree-satisfying courses taken as part of a program of study, to raise the GPA. Unlike an undergraduate in a disqualified status, courses taken by a graduate student through Open University or at other institutions during this period are not counted in university GPA calculations, except in the case of the program of study courses that are applicable to the degree program. At that point, the probationary status is removed, and a subsequent decline in cumulative GPA below 3.0 results again in probation. If while on probation, including following reinstatement, a student fails to achieve a semester GPA equal to or above 3.0, he or she is disqualified a second and final time.
Graduate Work in Open University and Special Session

Special session classes are offered on a selective basis off campus, via different delivery modes or by schedules different from the regular session term. Matriculation is required for special sessions courses. Credit earned in 100-level, 200-level, or 300-level special session courses at SJSU is entered on the matriculated graduate student’s record as graduate credit, provided the student holds an acceptable baccalaureate degree from an accredited institution at the time of enrollment in the courses. Courses taken through special session receive residence credit. Simultaneous enrollment in special and regular sessions requires a special exemption from the Associate Vice President of Graduate Studies & Research and is highly discouraged, as fees must paid for both sessions simultaneously.

Open University, often known elsewhere as extension, is set up primarily as a device for members of the surrounding community to take college courses. It is attended by non-matriculated postbaccalaureate students who hope to gain future admission to one of the SJSU graduate programs or who wish to take classes to prepare for a professional degree program, such as medicine. It can also be part of the program-of-study mechanism by which scholastically disqualified SJSU graduate students can gain reinstatement to the graduate school (see section on Program of Study). Non-matriculated students who enroll only for Open University courses are reminded that they must apply for admission to the university and graduate program and complete other details of matriculation if they wish to obtain a degree or credential from SJSU. Enrollment in Open University courses is governed by specific policies, as follows:

- Fees differ from those in regular and special sessions.
- Open University enrollment in a given class is permitted only with instructor’s approval and only after reasonable efforts are made to provide full enrollment opportunities to regularly matriculated students.
- Matriculated students may not take Open University courses. This restriction also applies, without special permission of the Associate Dean of Graduate Studies & Research, to formerly matriculated students who have gone out of matriculation by stopping out or being disqualified.
- Open University course enrollment in 200-level courses is ordinarily open to holders of baccalaureate degrees who meet course prerequisite requirements, although exceptions can be made with instructor’s consent. Neither disqualified students nor those denied admission into a graduate program for reasons other than limitations imposed by enrollment caps are permitted to enroll in 200-level courses.
- Open University courses do not qualify for residence credit toward a master’s degree, as specified by Title 5.
- Upper-division (100-level) and graduate (200-level) Open University units up to 30% of the degree program total and taken prior to matriculation may be applied to a master’s degree program with the consent of the program’s graduate advisor. Note that these units are considered to be transfer units into the master’s program, and the allowable total of all transfer units is 30%, with the exception of transfers from credential programs into master’s programs (12 units allowed). Upper-division courses taken as part of a program of study for reinstatement after disqualification may be applied to the graduate program if they were already present on the student’s candidacy form or were otherwise approved by the graduate advisor.

Open University courses taken in the Graduate Open University career are immediately counted toward the cumulative GPA. Those taken in the postbaccalaureate career (before matriculation and enrollment in the semester admitted) are counted in the cumulative GPA if transferred into the graduate program. Because the university cannot determine whether the courses are part of the degree program until they appear on the candidacy form, it is not until advancement to candidacy that the grade points are transferred. Thus a student may conceivably be disqualified before advancing to candidacy even if courses to be transferred would have raised the GPA to a passing level.

For further information concerning special session or Open University offerings and policies, inquire at College of International and Extended Studies, 210 North Fourth Street, Suite 301, call 408-924-2670, or www.sjsu.edu/cies.

Interdisciplinary Studies Program - Graduate

The MA or MS Interdisciplinary Studies program provides an alternative for graduate students whose desired plan of study does not fit any of the existing graduate degree programs available on this campus. For details, see the Interdisciplinary Studies section in this catalog.
**Repeat Policy - Graduate**

University policy, F08-2, on course repetition has not yet been implemented for graduate students. Until the point that it is implemented, the current grading policies remain in effect.

A graduate student may repeat a 100-level or 200-level course in which a grade below a “B,” including an “NC,” was received in the first attempt. The student should register through normal procedures. The student's academic record will indicate the course repeated and the grade earned. Units attempted and grade points will be included in the student's cumulative GPA; therefore, the course grades will effectively be averaged. For grades of “B,” “B-,” “C-,” “D+,” “D,” or “D-,” the student will not earn additional units by repeating the course; the units will be counted when repeating courses after earning an “F.” Graduate students and 200-level courses are not eligible for "grade forgiveness."

Courses can be repeated when they have gone beyond the seven-year time period for completion of master's degree requirements. See the section, Seven-Year Time Limit on Courses in Graduate Degree Programs.

Some courses, although carrying the same number from term to term, are designed to have significantly unique content and may be repeated for credit if the individual course description in the catalog allows it.

**Change of Major or Degree Objectives for Graduate Students**

Official changes in graduate objectives are to be initiated at GAPE. If the change in objective is from one graduate program to another or from a credential program to a master's program, the Application for a Change of Graduate Major form, available at www.sjsu.edu/gape/form, should be completed. Submission of this form by the student is not, however, synonymous with approval of the change. The new department must agree to the change by virtue of a communication with GAPE. There is no fee for this change so long as the student was enrolled the semester prior to the application term. The student should become knowledgeable of any additional admission requirements of the department being entered. Student transfer to the new major is not automatic but instead requires approval from the incoming department. The department must follow up the student request by signing the Change of Major Decision Form and mailing it to GAPE. GAPE will then inform the Registrar of the change so that the student's official record can be updated. Changes from postbaccalaureate to graduate standing require completion of the CSU graduate admission application on CSUMentor followed by processing through both university and department admission criteria. A $55 application fee is charged for processing.

**Graduate Degree - Change of Status**

Notification of a change from conditionally classified to classified status within the same graduate program before advancement to candidacy is made to GAPE by the graduate advisor by means of the Change in Classification in Master's Program Form, available at www.sjsu.edu/gape/forms. However, an advisor signature on the "candidacy form" indicates that the advisor has checked that all conditions have been fulfilled, allowing the conditional status to be lifted and establishing the classified status without the need for the Change in Classification Form. Graduate students must be in classified status in the graduate program to advance to candidacy. Once a student has advanced to candidacy and thus the student status progressed to classified, any conditions discovered still unfulfilled are sacrificed and can no longer be required.
Advancement to Candidacy - Graduate

Matriculated graduate students must advance to candidacy a minimum of one semester prior to graduating. Advancement to candidacy requires that the student be in good standing. That is, a minimum of a 3.0 GPA is required in upper-division and graduate courses taken while in graduate status, and in the degree program as indicated by all courses on the “candidacy form.” The student must be classified with all admissions’ provisions and program conditions cleared. Also required is a minimum of 9 units of graded course work as a graduate student in 100- or 200-level courses that are acceptable to the department in which the degree is sought. Exceptions to this policy can be made for two-semester master’s programs. University policy also stipulates the Graduation Writing Assessment Requirement for English-language competency be fulfilled before advancement to candidacy. However, the candidacy form, formally entitled the Petition for Advancement to Graduate Candidacy (available at www.sjsu.edu/gape/forms), may be filed during the semester in which a GWAR-satisfying course is taken. Advancement to candidacy will be formally denied during the semester, but the form will be kept on file by the office of Graduate Admissions and Program Evaluations (GAPE) and approved when a passing grade is posted at the end of the semester.

Graduate Degree Program

As indicated above, the Petition for Advancement to Graduate Candidacy ("candidacy form") is submitted to GAPE when the student is qualified to advance to candidacy. This form lists all courses and culminating experiences that must be fulfilled for degree award. The proposed program must meet the following requirements:

- demonstration of competency in written English. See section on Competency in Written English/Graduation Writing Assessment Requirement for further explanation.
- statement of the total number of units in the degree program.
- at least half of the units included on the form must be in 200-level courses.
- at least 60% of all units included must be in letter-graded course work.
- at least 70% of the units included must be in residence at SJSU. Therefore, a maximum of 9 units may be transferred into a 30-unit program from all sources.

The course work included may be entirely within the major department, or it may include a combination of courses drawn from other fields acceptable to the major advisor, so long as it is within the parameters set by the department in the program descriptions on department websites. If deficiencies in the student’s record are identified, including in prerequisites for required courses, additional course work can be assigned by the major advisor. This course work would not appear on the candidacy form and would not be counted in the total number of units required for the degree. Letter-graded courses from previous graduate degree programs taken at SJSU (only) may be included up to a total of one third of the current degree total (i.e., 10 units in a 30-unit program) if approved by the graduate advisor, but the residence requirement above must still be met.

Course work that may not be applied to the graduate degree includes basic skills’ courses such as lower-division work, courses used to earn any prior degree (except other master’s degrees at SJSU), courses taken at unaccredited institutions, directed (student) teaching, or 300-level residence or 400-level Extended Studies courses taken at SJSU, or courses taken over 7 years previous to current degree conferral. Graduate credit by examination is not permitted.

There is no restriction in the number of units of project or thesis research (usually 298 courses) attempted but not included on the candidacy form. However, students completing a thesis must include at least one 299 unit on the form, and the total number must be commensurate with program requirements.

Students may not receive credit for project units unless the project course is successfully completed; instead either an RP or NC grade should be assigned. Students may not receive credit for 299 units unless a thesis is submitted and accepted by the Office of Graduate Studies & Research. If thesis units are credited on the student record without thesis approval, the units must be retroactively withdrawn. The process of withdrawal is initiated by the student by submitting the Graduate Petition for Course/Semester Withdrawal, available at www.sjsu.edu/gape/docs/withdrawal.pdf.

The original copy of the completed, signed Petition for Advancement to Graduate Candidacy should be submitted to GAPE in the Student Services Center by the deadlines posted at www.sjsu.edu/gape/current_students/deadlines/. The student will be informed by letter of approval or denial of the petition.

Graduate Degree - Program Course Work

The “candidacy form,” once approved, is an official contract between the student and university. It can be changed only with the permission of the graduate advisor via written petition to CAPE. Course substitutions can be made by submission to CAPE of the Request for Course Substitution in Master’s Degree Program, available at www.sjsu.edu/gape/forms. A course may not be dropped from the graduate degree program, as indicated by its appearance on an approved candidacy form, once it has been completed.
Transfer Credit in the Graduate Program

Transfer of units from courses approved by the graduate advisor, as indicated by the signature of the advisor on the candidacy form, is limited by university policy to 30% of the total units in the degree program, i.e., 9 units in a 30-unit program. The courses may be graduate courses taken as a senior undergraduate at SJSU (but not any other university) that are requirements of the graduate program and were not used to satisfy requirements for the bachelor’s degree (and therefore were not on the student’s undergraduate major form; see the subsection on Graduate Credit for Units Completed as a Graduating Senior under Graduation Credit for Units Completed as a Graduating Senior).

Except for the courses taken as seniors in the SJSU bachelor’s program, they may be SJSU Open University upper-division or graduate courses or they may be courses taken at other accredited institutions (including foreign institutions), whether through a regular session, extension, or correspondence; in the case of extension or correspondence courses, the graduate advisor must petition the AVP or Associate Dean of Graduate Studies & Research on behalf of the student and provide documentation that the courses are approved for degree credit at that institution. No courses may be transferred if taken during a graduate (master’s, PhD, or other) degree program in which the degree was awarded, whether used to satisfy requirements for those degrees or not. However, if a course was taken as part of a prior graduate degree program that was not finished (thus there was no award of degree), then the courses qualify for transfer credit. An exception exists in university policy that provides for up to a 33% transfer of units earned in another master’s program taken at SJSU and approved by the current graduate advisor.

Official transcripts for all courses transferred from another university, if taken prior to application to the SJSU graduate school, must have been submitted via CSU Mentor during the application process. Failure to have provided those transcripts precludes the later transfer of the courses. If the courses were taken or grades for them were posted after the application process, then the transferred courses must subsequently be verified by official transcripts sent to GAPE from that university at the time of transfer; failure to provide transcripts will result in a denial of advancement to candidacy and/or award of degree. Note also that, to be transferred, courses from any source must have been taken (at time of grade posting) fewer than 7 years prior to the student’s graduation from the graduate program at SJSU. Courses from another university cannot be revalidated if they exceed this 7-year limit; those taken through SJSU Open University or during the senior year at SJSU can be revalidated within the limits of the revalidation policy. For courses transferred from other institutions or from the senior undergraduate career, the units earned count toward the master’s degree but grade points do not.
Graduation - Applying for the Master’s Degree

- The Petition for Advancement to Graduate Candidacy Form must be approved by GAPE before applying for graduation. Students should apply for graduation at least one full semester before the date of anticipated graduation by filing the Application for Award of Master’s Degree. See www.sjsu.edu/gape for official deadline dates and downloadable graduate forms.

- Advancement to candidacy is permitted only when nine letter-graded units, all with grades of C or better, and the graduate Competency in Written English requirement have been completed (see www.sjsu.edu/gape/current_students/completing_masters/ for information on the Graduate Writing Assessment Requirement).

- Only original signed documents are acceptable.

- All courses and requirements must be completed by the date of graduation.

- Any Incomplete (I), Report Delayed (RD), or Report Pending (RP) grades must be cleared before the degree can be awarded. Once the degree has been posted, no grade changes can be made to the record.

- If a student is unable to complete the course work stipulated on the “candidacy form” or if the date of graduation is delayed, a Graduation Date Change Request for Award of Master’s Degree must be submitted to the GAPE (Window G) at the Student Services Center. A $10.00 administrative fee must be paid at the Bursar’s Office.

- All required forms must be submitted by the deadlines shown below. University deadlines are also posted on the GAPE website at www.sjsu.edu/gape/current_students/deadlines/. Note that the deadlines provided are university deadlines; students should contact their departmental graduate advisor for departmental deadlines covering thesis, project, and comprehensive exams.

- Students are urged not to delay; failure to submit forms by the deadlines posted could delay graduation.

Graduation Requirements - Master’s Degree

After being admitted to candidacy for the master’s degree, the student is then required to:

- Maintain a minimum grade point average of 3.0 ("B") in completing requirements in the graduate degree program. This program is defined as completed courses included in the original graduate degree program plus all additions or substitutions.
- Complete all courses in the graduate degree program with grades between "A" and "C," or "CR." Grades of "C-" or lower, including "NC," "U," and "WU," are considered to be unsatisfactory. Should courses in the graduate degree program be completed with unsatisfactory grades, these grades must remain in the program and will continue to be computed in the grade-point average of the program whether they are repeated or not.
- Complete an acceptable thesis, project, or comprehensive examination. The thesis (Plan A) or creative project (Plan C) requires that one copy be submitted to the Associate Vice President for Graduate Studies and Research. In Plan B, completed projects are submitted to the student’s major department and a final comprehensive oral and/or written examination over the field of concentration for the degree must usually be successfully completed. Failure on initial attempts at these exams results in administrative-academic probation. Failure of the final attempt results in administrative-academic disqualification from the degree program. The program evaluator at Graduate Admissions and Program Evaluations is notified of passage of the exam by means of graduate advisor completion of the Verification of Culminating Experience memo.
- Complete all work on the graduate degree program within seven years preceding award of the degree. If courses become outdated, the candidate should consult the section titled Graduate Degree - Time Limits on Courses in Graduate Degree Programs in this catalog concerning steps to be followed.
- Apply for award of the master’s degree by posted deadline dates indicated at www.sjsu.edu/gape/current_students/deadlines/ by submission of the Application for Award of Master’s Degree available at www.sjsu.edu/gape/forms.
- Note that failure to clear incomplete ("I"), report-in-progress ("RP"), or report-delayed ("RD") grades will prevent graduation. An "I" obtained in a graded class results in an automatic grade change to an "IC" grade, which calculates to an "F" grade on the transcript, even after separation or graduation. In an ungraded ("CR/NC") course, the "I" reverts to no credit ("NC") grade and is, therefore, also unsatisfactory for graduation if in a course on the candidacy form.
- Be in good academic standing (cumulative 3.0 minimum GPA in Graduate Division) at San José State University to receive a degree from this university.

Competency in Written English/Graduation Writing Assessment Requirement - Graduate

All graduate students are required to demonstrate their competency in written English as a requirement for graduation. SJSU policy requires that English competency be a requirement for advancement to candidacy within a master’s program. Students may satisfy this requirement in one of five ways:

- Satisfactory completion of the CSU baccalaureate graduation requirement of competency in written English;
- Satisfactory completion of a departmentally approved, university-certified, GWAR-satisfying course, which has been approved by the Office of Graduate Studies & Research, of at least three units in which a major report is required and that report is at least 30 percent of the course grade. Approved courses are listed at http://www.sjsu.edu/gradstudies/docs/03-11-13%20GWAR%20Approval%20Status.pdf. Note that passage of the writing workshop waiver examination (WST), unless with a “waiver score,” is insufficient for waiving the competency requirement at the graduate level;
- Approval by the Associate Dean of Graduate Studies & Research of a professional (peer-reviewed) publication for which the candidate was the sole author;
- Satisfactory completion of a discipline-specific upper-division writing course at another university judged by the Associate Dean of Graduate Studies & Research to be equivalent in content and writing requirements to the SJSU 100W. To satisfy the requirement under this category, students will usually be required to submit to their graduate advisor a transcript (unofficial acceptable) showing completion of the substituting course and the grade received (a “B" or better is required) and a syllabus of the course. Original, single-authored writing samples from the course, including especially a large term paper from the course with instructor feedback visible, are also useful for borderline decisions. If the graduate advisor approves of the substitution for an SJSU GWAR course, he or she would then petition the Associate Dean of Graduate Studies & Research on behalf of the student. Students may not petition CS66R directly. Substituting courses will be assessed on the basis of GWAR course-certification criteria (3 units minimum, 3000 word requirement, term paper comprising 30% of course grade, and teaching of professional standards). Professional standards include the teaching of referencing and literature citation, professional style guidelines, ethics and plagiarism, copyright laws and use of published illustrations and data, IRB and animal-use permission in research, report writing and formatting, proposal writing and formatting, oral communication and presentation, and English writing proficiency.

Candidates should be aware that each department may establish its own criteria within these policy guidelines, and candidates must abide by the department decision. Thus even if a student has satisfied one of the criteria above, the department must approve the waiver by petitioning the Associate Dean of Graduate Studies & Research and can require that its GWAR-satisfying course still be taken. Graduate courses can also not be taken for credit by examination.
Master's Examinations - Finals - Graduate

It is university policy to require final examinations in master's degree programs in all departments. Departmental requirements for these examinations vary; they may be oral, written or a combination of both. Students following Plans A and C are usually examined primarily over areas of their theses or projects. Plan B students are generally required to demonstrate their competence by writing in a broad field of concentration, by taking comprehensive examinations, or by completing a broad course project.

In all cases, it is the candidate's responsibility to register through the departmental coordinator of graduate studies to take all required final examinations. The candidate's advisor and/or the departmental graduate coordinator will be able to supply general information concerning the nature of the examinations and recommended preparation for them.

The master's diploma cannot be transmitted to the candidate until the major department certifies to the program evaluator at Graduate Admissions and Program Evaluations via the Verification of Culminating Experience memo that final examinations have been completed satisfactorily.

Thesis and Project Work - RP Status - Graduate

As of Fall 2012, under University Policy F11-2, Required Enrollment for Report-in-Progress (RP) Units, all graduate students who have an outstanding RP grade in a thesis or project course from the Spring 2012 semester onward and who are taking no additional courses in a particular Fall or Spring semester must register for 1 unit of University Studies (UNVS) 290 or a Departmental 290R (Thesis/Project Supervision) through special sessions except in cases in which the department requires repeated enrollment in these classes each semester until completion. Eligibility for the course is limited to those students with RP grades only (not I or NC grades) in a graduate-level project or thesis course taken during or after the Spring 2012 semester. There are no formal class meetings for this course. Failure to register for this unit will result in a hold on graduation until the unit is retroactively added. At that time, late fees will apply. Registration is entirely online after the add deadline and, for domestic students, extending to the end of instruction for each semester.

The course must be taken only if no other courses are being taken in the same Fall or Spring semester. "Stopping out" or voluntary absence from attending will not be recognized as long as the RP remains on the record. An exception to this rule is for students with formal leaves of absence during which enrollment in UNVS 290 is not required. All degree requirements must have been completed to enroll in this course, as once students are converted to "special session eligibility" status, they will not be able to return to regular session status. Should any requirements other than the thesis or project remain, special permission will have to be obtained from the Associate Vice President or Associate Dean of Graduate Studies & Research (GS&Research) to return to "non-RP status." The basis for this stipulation is that, whereas it is conceivable that students are working on theses or projects before completing the remainder of their degree requirements, they should continue to take units in those subjects each semester. Once a student enrolls in UNVS 290 or Departmental 290R, he or she will not be able to take any additional courses. Students who have RPs on their records only prior to Spring 2012 are not subject to this policy unless they earn another RP in subsequent semesters. Appeals of the enrollment requirement on the basis that the delay in completing the culminating report was substantially beyond the student's control can be made to the Associate Dean of GS&Research. Appeals must be made during the first two weeks of the semester following the posting of the RP.

The RP grade in the project or thesis course remains on the official record until a culminating memo has been submitted by the graduate advisor to GAPE and the course instructor of the class in which the RP was received has petitioned for a grade change. Units earned in this course may not be used to satisfy degree requirements in a graduate program and may not appear on the candidacy form. Students should meet with their advisors if in need of clarification.
Graduation - Facilitation

Undergraduate or graduate students are precluded from enrolling in any additional state-supported courses when that student has already met all necessary requirements for the degree for which that student is matriculated. Moreover, students who have met all requirements for graduation prior to any semester in which they are enrolled will be permitted to drop all courses for which they are registered, with little or no penalty, and to graduate at the next available date. Students who have earned more than enough units to graduate but have some remaining requirements to complete will be advised and precluded from registering in any courses other than those required for a timely graduation.

Institutional Review Board - Human Subjects Research

The IRB reviews all research protocols involving human subjects. Students are required to submit a research protocol for IRB review before beginning any data collection from participants. Instructions, forms, and templates can be found at www.sjsu.edu/gradstudies/irb.

Master's Degree - Second

Graduate students who have completed one master’s degree program at San José State University may, with the approval of the new department, complete requirements for a second master’s degree at this institution.

A student interested in undertaking a second graduate degree after finishing another master’s degree must apply for admission to the second graduate degree program after the first degree is completed and recorded on the permanent record. All policies and procedures listed in this catalog applicable to satisfactory completion of a master’s degree apply to completion of requirements for a second master’s degree, including that requirements must be completed within a seven-year period. The Graduate Division at SJSU will not admit an applicant in pursuit of a master’s degree if it is determined that the applicant has a similar degree already.

Pursuit of two simultaneous master’s degrees is permitted only under the following circumstance. A student in good standing enrolled in one master’s program may pursue a second master’s degree without completing the university admissions’ process through CSUMentor. The stipulation, however, is that the student may not apply for and be awarded either degree until the second degree program is complete. Therefore, both degrees must effectively be completed at the same time, and diplomas are issued for both degrees. If a student changes majors into a second degree program while still pursuing the first degree and applies for graduation before finishing the second program, he or she will be awarded the first master’s degree and then lose matriculated status. Student status will thus be revoked and pursuit of a second degree prohibited. To satisfy this procedural requirement, a student should simply delay the request for award of the first degree until the second degree program requirements have been fulfilled.

Alternatively, if a second master’s degree is desired but will not be completed at the same time as the first, the student must file for graduation from the first degree program and formally apply for admission into the second program. That would require a full application, submission of all documentation required by the university and the department of the second master’s program, and acceptance by both entities. Pursuit of a second master’s degree will receive a lower priority for admission.

An approved program for a second degree should be prepared by the student and graduate advisor in the new field. If the new program happens to include course work taken in the first degree, a maximum of 33% of the total units required for the new degree may be courses completed in the previous degree at this institution. Thus, for example, a student might be permitted to apply up to 10 units toward a 30-unit program. Such courses must have been completed by the student with a grade of “A,” “B,” or in special cases, “CR.” The courses must be approved by the graduate advisor, who may limit the number of transferred units. The 33% level is allowed only for transfer of units from master’s degree programs taken at SJSU. Transfer from completed degree programs at other institutions is not allowed at all.
Graduate Degree - Time Limits

Section 40510(b)(2), California Code of Regulations, Title 5, Education, requires that courses in completed master’s degree programs be no older than seven years at the time of the degree award. The seven-year period is counted from the end of the semester in which the course was completed. Thus no more than seven years may elapse between the time the first course in a graduate program is completed and the time the last item in the program is completed, the latter indicating fulfillment of all degree requirements. With an outdated course, the candidate has the following options:

- repeat the outdated course with a passing grade but without credit. The new grades will be factored into the GPA for graduation, and all grade requirements, such as the 3.0 minimum GPA, will still be in effect.
- under some circumstances, another course (one already completed or to be taken) may be used to substitute for an outdated course. Permission for the substitution must be obtained of both the program’s graduate advisor and the Associate Dean of Graduate Studies & Research. This practice is highly discouraged, as it violates the rule that completed courses may not be removed from the candidacy form. If the original course is available for enrollment, it is unlikely that permission will be granted.
- revalidate the outdated SJSU course by examination. No more than 30% of a master’s degree program may be considered for revalidation. Permission to revalidate from Graduate Studies & Research or from Graduate Admissions & Program Evaluations is not required; examination can proceed and the results communicated to the program evaluator at CAPE by the form entitled Request for Revalidation of Course that Has Exceeded the Seven-Year Time Limit available at www.sjsu.edu/gape/forms. Course work completed at other institutions is not eligible for revalidation, but transfer courses taken at SJSU may be revalidated. However, some kinds of courses cannot be revalidated, including supervisory courses such as project and thesis courses, seminar courses, independent study courses, and internship courses.
- departmental 100W and 200W courses, which satisfy the Graduation Writing Assessment Requirement (GWAR), do not expire and, therefore, cannot be revalidated. Other courses that satisfy GWAR are more content-based and do expire; those can be revalidated.

Veterans who are candidates for graduate degrees and who have had their graduate programs interrupted by military service may petition through the Associate Vice President of Graduate Studies & Research to extend the time limit imposed by the above regulations by the amount of time spent in military service. University-authorized leaves of absence interrupt the seven-year period and therefore extend the period beyond seven years.

Latin Honors for Graduate Students

Latin honors are reserved at SJSU, as at most universities, for those earning baccalaureate degrees. Because graduate students are required to maintain a minimum cumulative GPA of 3.0, all finishing graduate students would receive honors. Thus they are not considered for receipt of Latin honors. Individual programs are free to award other forms of recognition to outstanding graduate students.

Thesis Requirements

Time is critical during “thesis season.” Students must allow enough time for preparation of the draft, consideration by thesis committee members by the deadline dates set in departments, word processing, acquisition of permissions to publish, and the inevitable corrections. Students must leave time for the final reading and signing by the committee members. In most departments, a minimum of 2 months is needed for the entire process, and some departments require a longer period. Students should confer with each committee member in advance regarding the time each requires for review and whether each will be in town and available when the review and signatures are due.

Instructions for master’s degree candidates are located at www.sjsu.edu/gape/current_students/completing_masters/. While these instructions refer to “thesis” throughout, they pertain to creative project reports conducted under Plan C as well.

These instructions provide general guidance for authors of master’s theses at SJSU. Examples of a thesis front page are provided in the guidelines. Students should read the guidelines carefully and consult their advisors concerning the format of the thesis, the professional style guide to use, and journal articles to emulate, if applicable. The major department usually provides students with more complete formatting instructions, the interpretation of which rests primarily with the advisor. In rare cases, Graduate Studies & Research will provide assistance.

SJSU participates in the University Microfilm International (UMI) Dissertation Information Service. Students completing theses are required to email their committee-approved thesis and accompanying documents to the Office of Graduate Studies & Research (GS&R) according to the instructions provided in the thesis guidelines at www.sjsu.edu/gape/current_students/completing_masters/.
Graduate Degree - Checking the Manuscript

The office of Graduate Studies & Research does not serve as an editor. The author and thesis committee members should carefully proofread the thesis before it is submitted. A careful review should be used by the student as a guide to correcting similar errors in the entire thesis. The review conducted by Graduate Studies & Research should also be regarded as an indicator of problems to be addressed globally throughout the thesis. Making only the changes specifically indicated, rather than applying the criticisms to the remainder of the thesis, would not only result in a flawed document but would also be beneath graduate school standards. Graduate Studies & Research may reject a thesis with excessive errors.

Students can prevent rejection of the thesis by ensuring that the final manuscript is free of the following frequent errors: pages for which no numbers are assigned, misspelled words, inconsistencies in writing style, failure to apply reference style consistently or to cite references when needed, careless spacing or centering, inappropriate margins, incorrect footnotes or bibliography entries, grammatical errors, punctuation errors, word-usage errors, and inconsistencies in or lack of adherence to style-manual formatting rules. Neither SJSU nor any of its separate offices or departments is responsible for matters concerning a student’s relationships or agreements with any outside agency or individual.

Neither the university nor any of its offices will take part in disagreements between students and typists, editors, or copy shops with regard to thesis-preparation services, expected costs, or billed costs. A student conducting thesis research off site, for example at a local company, must be free to include all of it in the thesis. SJSU’s legal relationship is only with the student and his or her compliance with the rules set forth in this and related documents and does not include any obligations to the company in question unless expressly agreed upon in a separate legal document.

Graduate Degree - Plans A, B and C

SJSU offers three plans for candidates for master’s degrees.

Plan A - Thesis Plan
This plan requires approval by the candidate’s advisor and other members of the thesis committee of a thesis topic and its satisfactory production in written form. Plan A requires registration in departmental 299, Master’s Thesis, for at least one unit. Departmental 298 units or other department-specific thesis research or methodology courses are often also taken during the data-gathering stages of the thesis research. While the total of 298 and 299 units can be a maximum of six on the candidacy form, the number taken is not restricted.

Plan B - Degree-Without-Thesis Plan
Plan B is characterized by substitution of the thesis and departmental 299 units with another set of courses and either a project or comprehensive exam. The plan is expected to provide substantial writing and problem-solving experiences by means of the tools and techniques of advanced study in the field. The purpose of Plan B is most often to provide breadth, rather than specialization, and so is tailored by the selection of courses and the nature of the final, comprehensive exam. The exam may be oral, written, or both and constitutes the culminating experience in the plan. Many departments historically have assigned students to Plan B for projects, whether they are also accompanied by a comprehensive exam or not. The projects are usually conducted as part of a departmental 298 or otherwise numbered 200-level project course for a maximum of six units, as stipulated by the department, and the writeup for the project is required as part of the culminating experience. Departmental 299 units are not permitted for graduate credit under this plan.

Plan C - Special Plans Including Creative Projects
This plan is reserved for exceptional cases for which needs will be served best through a special arrangement of courses and/or special creative assignments. The assignments might include original paintings, dramatic presentations, motion picture productions, works of sculpture, electronic media, or videotapes. In these cases, the candidate is required to submit a written report on the creative project in the form of a supplementary guide or handbook that puts the work into historical, cultural, and/or professional context. This written report is to be catalogued in the university’s institutional repository in the University Library in the same manner as regular theses discussed under Plan A. Departmental advisors will provide further information on special requirements of the plan. Plan C requires registration in a minimum of one unit of departmental 299. Note that creative projects can also be conducted under the Plan B umbrella without the submission of a thesis or taking departmental 299 units.
Thesis/Creative Project Unit Conditions

Registration for departmental 299 thesis courses occurs only after advancement to candidacy for the master’s degree. By that point, the thesis committee should be fully established in accordance with the SJSU Academic Senate policy. Before collection of data from human subjects, prior approval must be granted by the Institutional Review Board; see the section on Human Subjects Data Collection in this catalog. Similarly, prior approval for research on or employing animals must be granted by the Institutional Animal Care and Use Committee; see the section on Animal Research Guidelines in this catalog.

A student is allowed a maximum of six semester units of thesis courses (departmental 299 and usually 298 but other thesis courses apply) for graduate credit in Plan A and Plan C, although more of these units can be attempted. Some departments use fewer than six in their requirements. The student may register for any or all of the required thesis units in one semester, but the sequence should follow departmental guidelines and regulations. All 299 units will receive a grade of “RP” until a final grade (“CR” or “NC”) is awarded when the thesis is approved by the Office of Graduate Studies & Research. “RP” units cannot be changed to “CR” until that time. Extensions of the 2-year period for completing thesis work under the “RP” designation should be made before the period expires by means of the form available at www.sjsu.edu/gape/forms. Upon satisfactory completion of the thesis, a “CR” is submitted by the thesis chair via the Change-of-Grade Form to the Registrar to clear the “RP.” A separate form must be submitted for each occurrence of “RP” (each semester the grade is displayed) on the record.

Graduate Degree - Thesis - Copyright Permission

If a student copies a figure, table, or a significant section of someone else’s work and it is believed that the use of these copyrighted materials is beyond that permitted by “fair use,” the student will be required to obtain separate written permission letters from the publishers or authors of the works cited. It must be indicated in the text or figure caption within the thesis that the material is “copied with permission.” The student should plan well so that permission letters will be received in time. If letters of permission are not submitted with the final copies of the thesis, the Office of Graduate Studies & Research will not approve the thesis, and UMI will not microfilm the work.

The permission letters should be included with the initial submission of the thesis as well as when the thesis is submitted for publication. For questions about the process, including whether permission is required for a particular insertion, contact the thesis coordinator at Graduate Studies & Research.

Graduate Degree - Thesis - Human Subjects Data Collection

If a thesis includes data gathered from human subjects, whether experiments, surveys, or interviews, the students must obtain approval from the SJSU Human Subjects Institutional Review Board (IRB). Information concerning the use of human participants is available online at or from the www.sjsu.edu/gradstudies/irb or from the IRB coordinator at 408-924-2479. Approval must be obtained from SJSU prior to data collection regardless of whether the research is done in conjunction with another institution that has given its approval. Approval must also be obtained even if the work is ultimately determined to be “exempt.” Federal law prohibits retroactive approval of human subjects research. The thesis will not be approved if it fails to comply with IRB policy.

Once the research is approved, thesis submission must include a copy of the permission letter, whether as a document separate from the thesis or as an appendix to the thesis. Failure to submit the appropriate documentation can result in a delay or denial of thesis approval by Graduate Studies & Research.

Graduate Degree - Thesis - Animal Research Guidelines

If the thesis includes use of animals, the use must be approved by the SJSU Institutional Animal Care and Use Committee (IACUC). Information concerning animal care and use is available from the IACUC Coordinator and online at www.sjsu.edu/gradstudies/iacuc/index.htm. Animal research approval from SJSU must be obtained prior to data collection even if the work is done in conjunction with another institution from which approval has been granted. Federal law prohibits retroactive approval of animal research. The permission letter, obtained with IACUC approval, must be submitted along with the thesis whether as an appendix or as a separate document. Failure to submit the necessary documentation can result in a delay or denial of the thesis by Graduate Studies & Research.
Graduate Degree - Thesis - Approval

The last three steps in the thesis-approval process are outlined below.

1. After the thesis has received final departmental (thesis committee) approval, as indicated by committee signatures, the complete thesis should be emailed along with the completed Thesis Information Packet, available at www.sjsu.edu/gradstudies/thesis/thesis_forms/. Deadline dates for submission may be found at www.sjsu.edu/gradstudies/thesis/deadlines. The deadlines are firm, and exceptions are extremely rare.

2. The thesis will be read and returned to the student with an assessment by the staff of the office of Graduate Studies & Research as accepted without corrections, accepted with corrections, or not accepted.

If the thesis is not accepted or it is accepted with corrections, the student will be instructed to resubmit it within a two-week period from the point of notification. If it has an abundance of errors in formatting, grammar, punctuation, or other writing parameters, corrections will have to be made. The thesis advisors on the student thesis committee should be consulted about these corrections. It bears repeating that the Graduate Studies & Research staff reads and edits only portions of the thesis, but it is expected that errors of the kinds indicated be corrected globally throughout the thesis.
Graduate Research Units and Facilities

Research units involve industry/university partnerships to enhance technology transfer, encourage development of new products and improve education.

Bay Area Retail Center consists of a multilateral partnership between SJSU students, retail industry partners, and SJSU faculty, administration, and staff. A program of Center-sponsored events brings constituents together in an effort to provide co-curricular, experiential learning opportunities designed to build students’ leadership skills as well as their awareness and knowledge about retailing as a career destination.

Bay Area Science Institute offers a comprehensive, year-round program for training elementary, middle and high school teachers in earth science concepts and teaching strategies.

Biodiversity Center attracts funding for research, educational innovation and K-12 teacher training to further the conservation of biodiversity and promotes stewardship of natural resources through education, outreach and research.

Biotechnology Education and Research Institute directs the development of biotechnology through inter-departmental cooperation, serves as a clearinghouse and promotes cooperation between industry, government and the university in biotechnology research and development.

Center for Applied Mathematics, Computation and Statistics provides an innovative educational program to develop training through practical experience.

Center for Applied Research on Human Services housed in CASA, provides supports and services to SJSU faculty interested in applied human services research, including a Grants Academy, writing groups, statistical consultation, and methodological workshops.

Center for Asian Studies provides information and counsel about studies in Asia.

Center for Banking and Financial Services links SJSU students with the banking and financial services sector to provide students opportunities to interact with professionals. It enhances student knowledge of financial topics through sponsorship of presentations focusing on financial intermediation. It rewards excellence among students and faculty members by providing financial support through scholarships and research grants.

Center for Comparative Philosophy aims at promoting and enhancing the research and scholarship of comparative philosophy. Comparative philosophy considers philosophy in a global context: it emphasizes the constructive engagement between distinct methodological approaches, substantial views, or explanatory resources from different philosophical traditions and/or from the complex array of distinct approaches of the same tradition with a global vantagepoint.

Center for Development of Recycling is a national clearinghouse for recycling information and for applied waste management research in order to increase the scope and availability of recycling information and to increase the effectiveness of recycling as a solid waste management strategy.

Center on Ethics facilitates the planning and coordination of research-related activities concerned with issues of professional and business ethics.

Center for Human Language Technology supports the study of computational linguistics, acts as a resource for Silicon Valley technology industries and explores applications of HLT in industry, education and society at large.

Center for International Sport and Human Performance promotes and facilitates cross-national and cross-cultural interaction of individuals and their ideas in the context of sport and human performance.

Center for Literary Arts provides programs featuring major contemporary writers, poets and scholars.

Center on Ethics facilitates the planning and coordination of research-related activities concerned with issues of professional and business ethics.

Collaborative for Disaster Mitigation is a proactive partnership of the public, private, and academic sectors to encourage and facilitate implementation of mitigation measures to minimize the consequences of natural and other disasters.

Computers in Art, Design, Research and Education (CADRE) Institute develops experimental applications of computer technology in fine art and design, provides state-of-the-art computer facilities for art/design instruction, explores applications of interactive media to education and stimulates industry sponsorship of visualization and interactive systems research.

Global Leadership Advancement Center advances, fosters, and disseminates cutting-edge knowledge on global leadership and its development via diverse programs for scholars, students, and the community. GLAC has two innovative student programs unique to San Jose State: the GLLab, which is an assessment center for global competencies, and the Global Leadership Passport Program, a co-curricular program in which students earn stamps for activities that prepare them for global work. GLAC’s Social Innovation Initiative leverages the symbiotic relationship among SJSU, social entrepreneurs, the City of San José, foundations, and other innovation organizations to encourage and train people to apply technology and innovation for the good of the local community.

Institute for Metropolitan Studies facilitates the exchange of knowledge and expertise regarding urban problems and critical matters related to metropolitan development.
Institute for Modern Optics facilitates communication, collaboration, and coordination in the area of lasers and optics and promotes research projects in nonlinear effects at surfaces, laser beam characteristics, two-wave laser mixing, holography, light emission from thin film tunnels, and laser spectroscopy.

Institute of Nursing Research and Practice promotes the climate of inquiry within the School of Nursing by coordinating and promoting research projects and interests of nursing faculty in order to develop innovative models for nursing research, practice, and education.

Ira F. Brilliant Center for Beethoven Studies is the only research facility and document repository in North America dedicated solely to the study of the life and performance of the works of Ludwig van Beethoven.

Martha Heasley Cox Steinbeck Research Center houses one of the most extensive collections of the Nobel Prize-winning author’s manuscripts, letters, photographs and artifacts, fostering research concerning the life and work of the author.

Materials Characterization and Meteorology Center provides materials imaging and chemical analysis capabilities for applications in various fields of science and engineering. Instruments are located in various buildings across campus.

Mineta Transportation Institute focuses on international surface transportation policy issues as related to three primary responsibilities: research, education, and technology transfer. MTI receives policy oversight from an internationally respected board of trustees who represent all of the major transportation modes.

Research Institute for Foster Youth Initiatives explores ways to eliminate barriers that current and former foster youth have at obtaining a suitable education.

Silicon Valley Center for Business Success provides a proactive consulting service to Silicon Valley businesses by conducting research and providing business solutions to “tomorrow’s list” of projects and educational needs.

Silicon Valley Center for Entrepreneurship aims to promote interdisciplinary research that is valuable to entrepreneurs and aspiring entrepreneurs, support academic departments in developing an entrepreneurship curriculum informed by research, foster an entrepreneurial mind-set among students, and strengthen the connective fabric of innovation and entrepreneurship within the university and in Silicon Valley.

Silicon Valley Center for Global Studies conducts research on immigration matters in northern California, recruits and supports interdisciplinary teams of researchers, hosts international visiting scholars and provides training in cross-cultural competencies for corporate and nonprofit clients.

Silicon Valley Center for Operations and Technology Management is a knowledge portal for sharing academic and industrial information related to operations, supply chain, and technology management among students, faculty members, and industry partners. It is also the point of training for supplying and supporting the professional needs of the industry. The Center will serve as a future knowledge hub through research on state-of-the-art topics relevant to the Center’s themes.

Sourisseau Academy promotes better understanding of California’s state and local history with emphasis on the history of Santa Clara Valley through graduate scholarships and collections of historical source materials.

Spartan Film Studios are a unique creative/artistic instructional program and innovative production facility operating in Silicon Valley. Since its inception in 2005, Spartan Film Studios has provided university students, under the direction of expert instructors and industry professionals, a full range of film production experience that has resulted in multiple feature length and short subject films.

The W.M. Keck Facility for Chemical Research is located in Duncan Hall and provides laboratory space and instrumentation for advanced scientific research in chemically related disciplines.
General Education (GE)

General Education (GE) - Program Objectives

A university brings together many separate areas of learning, yet it is more than just a collection of specialized disciplines. The SJSU General Education Program incorporates the development of skills, the acquisition of knowledge, and the integration of knowledge through the study of facts, issues, and ideas. Regardless of major, all who earn undergraduate degrees should share common educational experiences, as they become university scholars. In combination with major, minor, and elective courses, the General Education curriculum should help students attain those attributes found in an educated person.

Students who complete the General Education curriculum should be able to demonstrate:

- a broad understanding of the sciences, social sciences, humanities, and the arts;
- an ability to communicate ideas effectively both in speaking and in writing;
- the capacity for critical and creative thinking;
- an understanding of ethical choices inherent in human development;
- an ability to assess information (information literacy);
- an ability to address complex issues and problems using disciplined analytic skills and creative techniques;
- multi-cultural and global perspectives gained through intellectual and social exchange with people of diverse backgrounds and experiences;
- the characteristics of “intentional learners” who can adapt to new environments, integrate knowledge from different sources, and continue learning throughout their lifetimes; and
- the capacity to participate as a socially responsible member of civic, professional, cultural, and other communities.

The advancement of academic discourse requires civility and a respectful attitude toward all in the expression and consideration of a variety of viewpoints. All courses shall reinforce the ethical responsibility of students and instructors to acknowledge respectfully the learning styles and forms of expression of individuals and members of all groups.
General Education (GE) - Policies

1. All students must complete 51 units of approved GE courses with letter grades. If a requirement is waived without unit credit, additional approved GE courses must be taken to complete a minimum of 48 GE units.

2. All three areas described below must be completed by all students: Core GE (39 units), SJSU Studies (12 units) and American Institutions (0-6 units).

3. Transfer students may satisfy all Core GE by completing an Intersegmental GE Transfer Curriculum (IGETC) or a CSU 39-unit breadth certification prior to transfer. Second baccalaureate students satisfy Core GE with their first baccalaureate.

4. All students must satisfy SJSU Studies at SJSU regardless of GE completed at other institutions. Exceptions:
   - Written Communication II (100W) may be satisfied prior to transfer, unless also specified as a course requirement in the major.
   - A complete 48 unit GE Certification from another CSU is submitted, showing lower and upper division completed.
   - Second baccalaureate students who earned their first bachelor degree from a regionally accredited institution in the U.S. (effective Fall 2011)
   - Student’s complete an approved upper division GE course at another CSU through the online “Course Match” enrollment. (See Registrar’s Office website for more information about “Course Match”)

5. If a course is listed as a sequence (A-B), the entire sequence must be completed to satisfy the requirement.

6. Written Communication (IA), Mathematical Concepts, Critical Thinking and Oral Communication courses require a minimum grade of “C.”

7. A “C” or better in an Area A3 or equivalent 2nd English composition course is prerequisite to registering for the WST and for the 100W courses. A “C-” is not acceptable.

8. To find approved courses, check the GE designator listed for the requirement. This designator is printed by each GE class section in the SJSU Schedule of Classes.

9. All GE courses must be on the approved list of the California Community College (CCC), California State University (CSU) or University of California (UC) for CSU Breadth Requirements or the Intersegmental General Education Transfer Curriculum (IGETC) where and when the course is taken.

10. The following GE courses require prerequisites to enroll:
   - Written Communication IA: Satisfaction of the English Placement Test (EPT) requirement
   - Mathematical Concepts: Satisfaction of the Entry Level Math Test (ELM) requirement
   - SJSU Studies: Writing Skills Test (WST) and upper division standing

See the Testing section for additional information about these exams.

11. Subsequent to initial completion of all CSU general education requirements (at the lower and upper divisions), a student may not be required to satisfy further exclusively general education requirements associated with an additional major program or baccalaureate degree.

12. Complete information on specific requirements and approved courses is found each semester in the SJSU Policies document.
General Education (GE) - Previous Requirements

Students approved for earlier GE patterns have four options:
1. Follow the pattern described here;
2. Continue to follow their previous pattern using courses that now appear in categories that are the same as the previous pattern;
3. Use courses previously taken when approved for the required categories;
4. Use courses in new categories to substitute for previous requirements.

General Education (GE) - Academic Advisement

Academic Advising and Retention Services provides general education academic advising to ensure your academic success and help you achieve your educational goals. To make the most of your advising sessions, please observe the following:

- You must be admitted to SJSU at the time you make an appointment.
- Bring a complete set of all college transcripts—unofficial copies are acceptable.
- Bring a copy of your General Education certification if you attended a California Community College. A partial certification is acceptable.
- Bring a copy of your Academic Requirements Report.
- Learn the requirements for your major—see the SJSU Catalog for details.
- See your major advisor.

Note: Admitted students should wait until after attending an orientation program before requesting an appointment. Students who have not yet been admitted to SJSU should make an appointment for advising with Student Outreach and Recruitment at 408-924-2564.

Academic Advising and Retention Services
Student Services Center

General Education (GE) - Requirements Overview

Core General Education

**BASIC SKILLS OF AN EDUCATED PERSON**

These courses build key skills for learning - communication and critical thinking. An educated person communicates ideas effectively both verbally and in writing. Being able to organize and express ideas is a key part of learning. An educated person must also have strong reasoning powers in order to analyze critically all types of information. The skills courses within General Education provide an opportunity for students to gain and enhance critical communication and analytical skills.

- Oral Communication (A1) ................................................................. 3
- Written Communication 1A (A2) .................................................. 3
- Critical Thinking and Writing (A3) ............................................... 3
- Mathematical Concepts (B4) ........................................................... 3

Subtotal .................................................. 12 units

**BASIC KNOWLEDGE OF AN EDUCATED PERSON**

In these courses, students gain the fundamental knowledge of an educated person. Students have opportunities to demonstrate an appreciation of the fundamentals of science, arts and letters, and the forces that shape the individual and modern society throughout the lifespan. This fundamental knowledge is crucial to understanding more advanced topics, including a major field of study.

- Physical Science (B1) .................................. 3
- Life Science (B2)* ........................................... 3

One lab course in a science is required

- Arts (C1) ................................................. 3
- Letters (C2) .............................................. 3
- A third course from either Arts of Letters (C1 or C2) .................. 3
- Human Behavior (D1) ............................................. 3
- Comparative Systems, Cultures & Environments (D2) ........... 3
- Social Issues (D3) ......................................... 3
- Human Understanding & Development (E) ............................. 3

Subtotal .................................................. 27 units

**SJSU Studies (formerly Advanced GE)**

**INTEGRATED KNOWLEDGE OF AN EDUCATED PERSON**

In these courses, students become integrated thinkers who see connections between and among a variety of concepts and ideas. An educated person applies concepts and foundations learned in one area to other areas as part of a lifelong learning process. These courses help students to live and work intelligently, responsibly, and cooperatively in a multicultural society and to develop abilities to address complex issues and problems using disciplined analytical skills and creative techniques.

- Earth and Environment (R) ............................................................... 3
- Self, Society & Equality in the U.S. (S) ........................................ 3
- Culture, Civilization & Global Understanding (V) .................... 3
- Written Communication II (Z) ....................................................... 0-3

Subtotal .................................................. 9-12 units

**Graduation Requirements**

- American Institutions (may be satisfied in Core) .................... 0-6
- Physical Education (two different courses must be used to meet the PE Requirement) ........ 0-2

**TOTAL GENERAL EDUCATION UNITS**

- CORE .................................................. 39 Units
- SJSU Studies ........................................ 9-12 Units
### General Education (GE) - CORE (Basic Skills and Basic Knowledge of an Educated Person)

**Core GE Courses (Basic Skills and Basic Knowledge of an Educated Person)**

Students must complete 39 units of Core GE courses.

#### Basic Skills

9 units

Complete one course each in Oral Communication, Written Communication IA, and Critical Thinking and Writing.

**ORAL COMMUNICATION (A1)**

Oral Communication courses should cultivate an understanding of the social, psychological, political and practical significance of communication, with special emphasis on the roles of public communication in a free society.

- COMM 020 - Public Speaking
- COMM 020N - Public Speaking for Nonnative Speakers
- COMM 040 - Argumentation & Advocacy
- COMM 096PS - Public Speaking
- HUM 001A-B - Background of Western Culture & Society
- HUM 002A-B - Modern Culture & Social Institutions
- MAS 074 - Public Address

**WRITTEN COMMUNICATION IA (A2)**

Written communication 1A courses should cultivate an understanding of the writing process and the goals, dynamics, and genres of written communication, with special attention to the nature of writing at the university.

- ENGL 001A - Composition I
- HA 096S - First Year Composition, Stretch II
- HUM 001A-B - Background of Western Culture & Society
- HUM 002A-B - Modern Culture & Social Institutions

**CRITICAL THINKING AND WRITING (A3)**

Critical thinking courses should help students learn to recognize, analyze, evaluate, and produce reasoning.

- COMM 041 - Critical Decision Making
- ENGL 001B - Composition 2
- ENGL 007 - Critical Thinking
- HIST 050 - Historical Process: Understanding Historical Reasoning
- HUM 001A-B - Background of Western Culture & Society
- HUM 002A-B - Modern Culture & Social Institutions
- LING 021 - Language & Thinking
- PHIL 057 - Logic & Critical Reasoning
- POLS 020 - Controversial Legal Issues

^ = Course may satisfy either area A3 or C2 (not both).
Science and Mathematical Concepts
9 units
Complete at least one 3-unit course in Physical Science, Life Science, and Mathematical Concepts.

At least one lab course (L) must be included.

Intensive Science

Students who have completed the Intensive science courses listed, with a “C” or better, will be allowed to use these courses to fulfill the requirement in B2, B3 (BIOL 001A, BIOL 001B, BIOL 065, BIOL 065O, BIOL 066, MICR 020) or B1, B3 (CHEM 001A, CHEM 001B, PHYS 002A, PHYS 002B, PHYS 050, PHYS 051, PHYS 052). Students may petition to have (1) grades below C (very rarely approved), or (2) other Intensive Science courses not on the list approved as intensive science courses. See details on the petition at: http://www.sjsu.edu/ugs/students/petitions/list/index.html.

MATHEMATICAL CONCEPTS (B4)

Mathematical concepts courses enable students to use numerical and graphical data in personal and professional judgments and in coping with public issues. You must satisfy the Entry Level Mathematics requirement prior to enrollment in one course from the following:

<table>
<thead>
<tr>
<th>Course</th>

Intensive Math

Students who have not completed a course satisfying Area B4, and who have completed MATH 030, MATH 030P, MATH 031, MATH 032, MATH 060, MATH 070, or MATH 071, with a grade of “C” or better (“C-” not included) will be allowed to use one of these courses to fulfill the Area B4 requirement.

Humanities & Arts

9 units

Effective Fall 2014, Area C3 has been discontinued. Completion of 9 units in Area C is still required.

Complete one course each in Arts and in Letters, and a third course from either Arts or Letters

Arts and Letters courses should give students knowledge and understanding of significant works of the human intellect and imagination. Courses should enable students to participate in social and cultural communities associated with artistic and literary endeavors, enriching their personal and professional lives.

^ = Course may satisfy either area A3 or C2 (not both).

**Social Science**

9 units
Complete one course each in Human Behavior, Comparative Systems, and Social Issues.

Social Science courses should increase the student’s understanding of human behavior and social interaction in the context of value systems, economic structures, political institutions, social groups, and natural environments.

### HUMAN BEHAVIOR (D1)

Human Behavior courses will enable students to be able to recognize the interaction of social institutions, culture, and environment with the behavior of individuals.

- ANTH 011: Cultural Anthropology
- CHAD 075: Imagination, Play & Adult Creativity
- CMPE 025: The Digital World & Society
- COMM 010: Communication & Human Relationships
- COMM 021: Performing Culture & Society
- ECON 001B: Principles of Economics: Microeconomics
- ECON 001BQ: Principles of Economics: Microeconomics
- ENCR/TECH 098: Technology & Women
- GEOG 010: Cultural Geography
- HS/GERO/HRTM 015: Human Life Span
- LING 020: Nature of Language
- MAS 030: Race & Ethnicity in Public Space
- OCTH 010: Homeless Americans: Loss of the American Dream
- POLS 014Q: Awake in Utopia
- PSYC 001: General Psychology
- PSYC 082: Child & Adolescent Psychology
- SOCI 001: Introduction to Sociology
- UNVS 096GD: Global Citizenship: A Social Sciences Perspective
- WOMS 005Q: Gender, Race & Sexuality in Media
- WOMS 010: Perspectives on Sex & Gender Roles

### COMPARATIVE SYSTEMS (D2)

Courses in this area will enable students to compare and contrast two or more ethnic groups, cultures, regions, nations, or social systems.

- AAS 033A-B: Asian Americans in the United States Historical & Political Process
- AAS/AFAM/MAS 025: The Changing Majority: Power & Ethnicity in America
- AMS 001A-B: American Civilization
- GEOG 101: Global Geography
- HIST 010A: Western Civilization
- HIST 010B: Western Civilization
- HIST/POLS 015A-B: U.S. History & Government
- HUM 001A-B: Background of Western Culture & Society
- HUM 002A-B: Modern Culture and Social Institutions
- MAS 10A-10B: Mexican Americans & the Development of U.S. History and Government
- POLS 002: Introduction to Comparative Politics
- WOMS/AAS 020: Women of Color in the US

### SOCIAL ISSUES (D3)

Social Issues courses will enable students to apply multidisciplinary material to a topic relevant to policy and social action at the local, national, and/or international levels.

- AAS 033A-B: Asian Americans in the United States Historical & Political Process
- AAS/AFAM/MAS 025: The Changing Majority: Power & Ethnicity in America
- AMS 001A-B: American Civilization
- GEOG 101: Global Geography
- HIST 010A: Western Civilization
- HIST 010B: Western Civilization
- HIST/POLS 015A-B: U.S. History & Government
- HUM 001A-B: Background of Western Culture & Society
- HUM 002A-B: Modern Culture and Social Institutions
- MAS 10A-10B: Mexican Americans & the Development of U.S. History and Government
- POLS 002: Introduction to Comparative Politics
- WOMS/AAS 020: Women of Color in the US
Human Understanding & Development

3 units

Human Understanding and Development courses will enable students to understand themselves as integrated physiological, social, and psychological entities who are able to formulate strategies for lifelong personal development. Students will also learn skills to employ available university resources to support academic and personal development.

**HUMAN UNDERSTANDING & DEVELOPMENT (C)**

- ANTH 025: Human Lifecourse in Context
- BIOC 054: Human Understanding
- BUS 012: Money Matters
- CHAD 060: Child Development
- CHAD/KIN 067: Development of Human Potential
- CHAD 070: Lifespan Development in the 21st Century
- COMM 074: Fundamentals of Intercultural Communication
- COMM 074Q: Fundamentals of Intercultural Communication
- EDCO 004: Personal, Academic & Career Exploration
- ENGR 010*: Introduction to Engineering
- GEOL 005: Human Development & the Natural World
- RECL 010: Creating a Meaningful Life
- HS 001: Understanding Your Health
- KIN 069: Stress Management: A Multidisciplinary Perspective
- LING 022: Language Across the Lifespan
- NDFS 009: Introduction to Human Nutrition
- PHIL 012: Philosophy of the Person
- PSYC 002Q: Identity Development & Prejudice
- RELS 099: Death, Dying & Religions
- SCI 002Q: Success in Science
- SOCI/UNVS 057: Community Involvement & Personal Growth
- TA 048: Voice & Movement for the Actor
- UNVS 096GE: Global Citizenship: A Human Development Perspective

*For specific department/program majors only

**American Institutions Courses**

6 Units

- All three requirements (US History, US Constitution, and California Government) must be completed from the following course work.
- Courses do not satisfy Core GE unless there is a GE area designator in parentheses.
• The WST is a prerequisite for HIST 170S and POLS 170V only.

Courses in American Institutions should expose students to alternative interpretations of the historical events and political processes that have shaped the social, economic, and political systems in which we live.

**US HISTORY, US CONSTITUTION & CALIFORNIA GOVERNMENT (US 1-2-3)**

All of these sequences satisfy Core GE requirements listed in parentheses. Both courses of the sequence must be completed to satisfy the requirement.

- AAS 033A-B: Asian Americans in the US Historical & Political Process (D2/3)
- AFAM 002A-B: African-Americans & the Development of America's History and Government
- AMS 001A-B: American Civilization (C1/2, D2/3)
- HIST/POLS 015A-B: US History & Government (D2/3)
- HUM 001A-B: Background of Western Culture & Society (A2, C1/2, D2)
- HUM 002A-B: Modern Culture & Social Institutions (A1/3, C/3, D/3)
- MAS 010A-B: Mexican Americans & the Development of US History and Government (D2/3)

**AMERICAN HISTORY ONLY (US 1)**

HIST 020A-B: History of the American People
Both courses must be completed to satisfy the requirement
HIST 170: Topics American History
HIST 170S: Topics Am History: Am Identities (S)

**US CONSTITUTION & CALIFORNIA GOVERNMENT ONLY (US 2-3)**

- POLS 001: American Government
- POLS 170V: Am Politics-Global Perspective (V)

**CALIFORNIA GOVERNMENT ONLY (US 3)**

- HIST 189A: California to 1900
- HIST 189B: California from 1900
- POLS 102: State Government & Politics

---

**SJSU Studies**

**Formerly Advanced GE**

Students must complete 12 units of SJSU Studies courses.

• All SJSU Studies courses must be completed at SJSU, unless a complete 48 unit GE Certification from another CSU is submitted, showing lower and upper division completed.
• Complete one SJSU Studies course in each category.
• Prior to enrollment, all courses require completion of core CE, satisfaction of Writing Skills Test and upper division standing. Pre/Co-requisite of a 100W course is strongly recommended.
• Students who fail the WST must consult their major advisors for appropriate preparation for SJSU Studies courses.
• Students can satisfy Areas R, S, & V by taking COMM/ENVS/GEOL/HUM/METR 168A/168B: Global Climate Change or HUM 177A/177B: Advance Honors in Integrated Science, Social Science and Humanities. This is a year-long course: students enroll in 6 units in the Fall and 3 units in the Spring. By successfully completing this course sequence with a “C or Better” in both semesters, students will fulfill all 9 required units of SJSU Studies: Areas R, S, & V.

Second baccalaureate students who earned their first bachelor degree from a regionally accredited institution in the U.S. are not required to take SJSU Studies unless specific courses are required by the major. (Effective Fall 2011)

All first baccalaureate students are required to have a minimum aggregate GPA of 2.0 in their SJSU Studies courses (Areas R, S, & V). If more than one course is taken in any of the individual R, S, or V areas, then the highest grade in that individual area will be used to calculate the aggregate SJSU Studies GPA. This policy is effective Fall 2011 for all SJSU students who do not have catalog rights prior to Fall 2011.

Areas R, S, and V.

9 units

Complete one 3-unit course from each category.

EARTH & ENVIRONMENT (R)

Courses in Earth and Environment will cultivate a student’s knowledge of the scientific study of the physical universe and its life forms. Students will understand and appreciate the interrelationship of science and human beings to each other.

ANTH 160........................................................................................................Reconstructing Lost Civilizations

*For specific department/program majors only

**Successful completion of this year-long course (with a “C or Better”) satisfies Areas R,S,& V.

### CULTURE, CIVILIZATION & GLOBAL UNDERSTANDING (V)

In these courses, students should receive an appreciation for human expression in cultures outside the U.S. and an understanding of how that expression has developed over time. Additionally, students should understand how traditions of cultures outside the U.S. have influenced American culture and society.

- AMS/ENVS/HUM 159......................................................................Nature & World Cultures
- ANTH/ASIA 115.............................................................................The Emerging Global Culture
All students must satisfy Area Z by earning a "C" or better in English 1B (or equivalent), which is prerequisite to registering for the WST and for 100W courses. A "C-" is not acceptable.

Written Communication II
3 units

All students must satisfy Area Z by

- earning a "C" or better in English 1B (or equivalent), which is prerequisite to registering for the WST and for 100W courses. A "C-" is not acceptable.
- taking one of the courses listed below that is approved by their major; or

*For specific department/program majors only

**Successful completion of this year-long course (with a "C or Better") satisfies Areas R,S,& V.

Written Communication II
3 units

All students must satisfy Area Z by

- earning a "C" or better in English 1B (or equivalent), which is prerequisite to registering for the WST and for 100W courses. A "C-" is not acceptable.
- taking one of the courses listed below that is approved by their major; or
• completing the Graduation Writing Assessment Requirement (GWAR) during enrollment at another CSU or equivalent course work at another university prior to SJSU enrollment; or
• Obtaining a waiver score on the WST. If you waive 100W, you only need to complete 9 units of SJSU Studies in Earth & Environment; Self, Society & Equality in the U.S.; and Culture, Civilization & Global Understanding.
• **Effective Fall 2011:** Second baccalaureate students who earned their first bachelor degree from a regionally accredited institution in the U.S. are not required to take this course unless required by their major department.

In written communication II courses, students will develop advanced proficiency in college-level writing and appropriate contemporary research strategies and methodologies to communicate effectively to both specialized and general audiences.

The following majors require that students complete the Written Communication II (Area Z) course regardless of their score on the Writing Skills Test (i.e., no waiver allowed).

- Chemistry
- Engineering (all majors)
- English
- Geology
- History
- Meteorology
- Nursing
- Psychology
- Social Science
- World Languages and Literature (all majors)

### Major Exceptions

Students with the following majors must consult with their major advisors regarding approved modifications of GE. Most exceptions are valid only if the student graduates with the listed degree major (noted by major).

### Major GE and SJSU Studies Modifications

The courses listed below are approved for specific majors to satisfy certain CORE General Education and SJSU Studies areas. Please see major advisor for more information.

#### College of Engineering Majors

- Complete Area A3 and B2 upon completion of major. Students may receive Area D1 with completion of AMS sequence.
- Only upon successful completion of ENGR 195A/195B and department senior project courses with a “C” or better in each course, will satisfy Areas S & V...
Make sure you have working access to http://my.sjsu.edu

Make sure your browser (Explorer, Firefox, Safari) will work at MySJSU. Current browser standards are posted.

For your convenience, computer access locations are available at these campus locations:

- Aerospace
- Biological Sciences
- Computer Engineering
- Electrical Engineering
- Industrial Systems Engineering
- Mechanical Engineering
- Materials Engineering
- Materials Science & Engineering
- Computer Systems Engineering
- Aerospace Engineering

*Only upon successful completion of ENGR 195A/195B and all three (3) CHE courses listed will Area S & V be satisfied.*

Biochemistry Majors

- Complete areas A3 and B2 upon completion of major.

Chemical Engineering

- Only upon successful completion of BIOL 115 and department senior project course (with a "C" or better in each), will Area R be satisfied.

Biology Majors

- Only upon successful completion of BIOL 115 and department senior project course (with a "C" or better in each), will Area R be satisfied.

Registration

Make sure you have working access to http://my.sjsu.edu

Make sure your browser (Explorer, Firefox, Safari) will work at MySJSU. Current browser standards are posted.

For your convenience, computer access locations are available at these campus locations:

- Aerospace
- Biological Sciences
- Computer Engineering
- Electrical Engineering
- Industrial Systems Engineering
- Mechanical Engineering
- Materials Engineering
- Materials Science & Engineering
- Computer Systems Engineering
- Aerospace Engineering

*Only upon successful completion of ENGR 195A/195B and all three (3) CHE courses listed will Area S & V be satisfied.*

Biochemistry Majors

- Complete areas A3 and B2 upon completion of major.

Chemical Engineering

- Only upon successful completion of BIOL 115 and department senior project course (with a "C" or better in each), will Area R be satisfied.

Biology Majors

- Only upon successful completion of BIOL 115 and department senior project course (with a "C" or better in each), will Area R be satisfied.
• Clark Hall
• King Library
• Associated Students Computer Lab, Student Union
• Lobby, Student Services Center
• Peer Connections, Student Services Center
• Campus wireless hotspots

SJSU ID
• Use your SJSUOne login information to sign into MySJSU. Your SJSU ID, also known as your Tower ID, is the number found on the front of your Tower Card. Students who were previously issued a User ID beginning with a capital W may continue to log in with that; however, the SJSU ID will also work.
• Your ID can not be changed.
• New students receive this information from admission office communications.

Password
• You can activate your SJSUOne account by navigating to http://uts.sjsu.edu/sjsuone/ and clicking Activate Account under First Time Users.
• When setting or changing your password, pay close attention to the case in which you enter the letters.
• Remember, your password is case Sensitive!
• To change your SJSUOne password after you have activated your account, please navigate to http://uts.sjsu.edu/sjsuone/ and click Account Management Login. Enter your login information and click Change My Password.

Lost, forgot or never received your ID or Password?
• If you have already set up your challenge questions for SJSUOne, please navigate to http://uts.sjsu.edu/sjsuone/ and click Account Management Login. On the SJSUOne login page that comes up, click Lost Password! and answer your challenge questions. If you do not remember your answers, please contact ithelpdesk@sjsu.edu for assistance. Include your full name, SJSU ID if known (also known as your Tower ID), date of birth, and mailing address

What to do if you can’t log in?
• Contact ithelpdesk@sjsu.edu for assistance.

Registration - Appointments and Class Schedule

Do your research and plan your schedule
Check your enrollment appointment at http://my.sjsu.edu.
You will not be able to register before your appointment time, but you can enter the system and research course offerings, degree requirements, course prerequisites, etc.
It is your responsibility to monitor your account to see when the appointment time is posted. Note that enrollment appointments are not mailed to students.

Create a registration worksheet before logging on
Build a sample schedule and have alternate schedules or classes prepared in the event courses are either closed or cancelled. SJSU offers course listings to you in 3 ways:
1. http://my.sjsu.edu class schedule search function: Real-time updates of available courses (open and closed sections, seats remaining).
2. info.sjsu.edu: Instructions, policies, procedures and course listings at one URL. Searchable, linked to SJSU Catalog degree templates.
3. info.sjsu.edu links to PDFs (Portable Document Format): Best current format if you want or need to print schedule pages.

Registration - Course Offerings and Cancelled Classes
The courses listed in the online SJSU Schedule of Classes reflect the scheduled offerings by the departments available at the publication deadline. The online schedule of classes posted at MySJSU provides real time status of classes. Departments have the option, based on enrollment, to cancel and/or add sections or courses.

Registration - Priority Groups
Current work-in-progress is used to determine class level for registration purposes. All priority groups are approved by the Student Success Committee of the Academic Senate.

Group One
• New entering educational equity students
• Appropriately certified students with disabilities
• Veterans and active service members
• Certain students who represent or serve San José State University
• Students in certain programs with rigid registration requirements
• Foster youths

Group Two
• First-Time Freshmen (registration is completed through Frosh Orientation)

Group Three
• All students who have applied for graduation

Group Four
• Non-graduating Graduate students based on rotating alphabetical groupings

Group Five
• Non-graduating Seniors based on alphabetical groupings

Group Six
• Second Baccalaureate students based on alphabetical groupings

Group Seven
• All other Juniors based on rotating alphabetical groupings

Group Eight
• All other Sophomores and Freshmen based on rotating alphabetical groupings

Registration - Adding a Class
Go to http://my.sjsu.edu
Enter your SJU ID and Password
Navigate to Academics > Add a Class
• Select the correct term. If you do not see the desired term, you are not eligible to enroll. New students should contact admissions. Continuing students should contact the Registrar’s Office.

Choose the class you wish to add.

To search the schedule, click the green “Search Button.” Make sure the Course Career is set to Graduate or Undergraduate depending on the class you are searching for. If you find a class you wish to add, click the “Select Class” button to place it in your shopping cart.

Alternatively, if you know the class number for the class you wish to add, you can simply type the 5 digit Class Nbr and click the Enter button.

Either way, once you have chosen a class, a new page called “Class Enrollment Options” will appear. Verify that the course is the one you selected. If required, enter any permission numbers and select any related components if applicable, and click Okay. The Add Classes page will appear, and you will see your classes in your shopping cart.

Warning: you have not yet added your classes.

Component Classes

If the course has related components attached to it (e.g., lab, seminar), the system will prompt you to select the one you wish to add.

Department or Instructor Consent

If you received a Class Permission Number, enter it in the available field. Please note that most classes will require a Class Permission Number if you are adding during Late Registration.

Switching Class Sections?

You must drop the section (lecture and labs/seminar, as well, if they have related components or corequisites) before adding the new class section(s).

Add Additional Classes

If you want to add another class to your add classes list, simply repeat the previous steps.

Warning: Finish Enrolling

Make sure you complete the process! Once you have added all your classes to your shopping cart, click the green button that says “Proceed to Step 2 of 3.” On the next page you will be given the chance to review your enrollment and make sure that it is accurate. Once you have verified your classes, click the green “Finish Enrolling” button to submit your registration.

Verify Add

Check to make sure you did not receive any errors for the classes you added. If you did, you can see a message explaining why you could not add the class, for example, prerequisites not met, or the class is full. Finally, check your class schedule to make sure all the classes you added appear.

Registration - “Instructor Consent” or “Department Consent”

Should you receive a registration error indicating that “Instructor Consent” is required, you must go to the instructor to obtain the Permission number. To add the course, use the Permission Number with the Class Number for that specific course section, as listed in the course schedule.

“Department Consent” requires students to go to the department that offers the course to obtain the Permission Number. To add the course, use the Permission Number with the Class Number for that specific course section, as listed in the course schedule.
Permission numbers become 'used' only after an enrollment request is successful. To assure a successful enrollment request if you are adding using a permission number, remember the following before clicking the submit button:

Remember the following before clicking the submit button:

- Check that you have no holds.
- Check that you have met all prerequisites.
- Only enter the enrollment section in the class number section.
- Enter any and all Component Courses (e.g., corequisite labs or seminars) and determine what required course is approved even before trying to “Enroll in the Class.”

To enroll if you submitted a number but received an error, re-enter the same permission number after resolving the error.

**Registration - Adding Classes on the First Day of Instruction**

On the first class meeting, Group 3: Graduating Students (bachelors and graduate level students who have a graduation application on file with an anticipated graduation date for the current or next semester) shall have top priority for any available spaces. Students seeking to add the course should provide documentation showing that they are graduating seniors as defined above.

An impartial procedure (such as a lottery or any other method of random selection) shall be used to choose, from among the graduating seniors, those who will fill the available spaces.

- Academic Senate Policy F09-1

**Registration - Adding Classes after the Last Day to Add**

Per Academic Senate policy F09-2, students can submit the Pre-census Late Enrollment petition form to the Registrar’s office. This petition is valid through census date.

Likewise, after census date, students can petition for late add using the Post-Census Late Enrollment form. This form replaces the Retroactive add petition form. Petition forms can be found on the Registrar’s website at www.sjsu.edu/registrar/forms/.

**Registration - Late Fee Assessed**

Students registering for classes after the term begins are assessed a late registration fee. Students in the Step to College programs are not required to pay the late registration fee.

<table>

<tr>
<td>$45.00</td>
<td>Begins after late registration deadline and before census for any classes added.</td>
</tr>
<tr>
<td>$200.00</td>
<td>Begins after census for any classes added (includes Retroactive Adds - which begins the first day after instructions ends).</td>
</tr>
</tbody>
</table>
Waitlisting - Registration

SJSU has “waitlisting” for all classes. Waitlisting puts you in line to get a space in a closed class, should a space become available.

Where do I sign up?

Waitlisting is only available at MySJSU (http://my.sjsu.edu). If a class is full, you may place yourself on a waitlist for any seats that might become available.

Waitlist When You Add Classes

- Navigate to ‘add classes.’
- At “Step 1, Select classes to add,” search for your preferred course.
- If the class is full and the waitlist option is available, you will see the yellow waitlist icon.
- To place yourself on the waitlist, you must click the checkbox next to “Wait list if class is full.”
- You will be returned to Step 1. You must complete the remaining steps of the process to add classes.
- When you finish enrolling in the class, you will see a message indicating that you are on the waitlist and your current position number on the list.
- Monitor your waitlist position by navigating to “My Class Schedule” at MySJSU.

Feedback

Problems? Questions? Comments? Contact Registrar@sjsu.edu

Waitlist - Validity

You can add yourself to the waitlist for a class from the time the class is full until the end of the Advance Registration.

- Waitlists become null and void after this date.
- There is no guarantee you will be moved off the waitlist and enrolled in the class.
- When classes begin, instructors are not required to add students who were waitlisted for the class.
- Check your schedule regularly at MySJSU to monitor your position on a waitlist.

If you decide you no longer wish to wait for space to become available, as a courtesy to other students, drop yourself from the waitlist.

Waitlist - Registration Procedures

- All scheduled class sections have waitlists.
- You may place yourself on the waitlist provided the list is not already full.
- If you are already enrolled in another section of the same course, you will not be moved from the waitlist if space becomes available unless you drop the section you are enrolled in.
- You must meet any requisites for the class before you can be placed on the waitlist, e.g., course pre-requisites, section co-requisites, major and class level restrictions. See related catalog/course descriptions at http://my.sjsu.edu.
- When you place yourself on a waitlist, you hold a position that changes as students ahead of you get added to the class or drop off the waitlist.
- You may waitlist for up to 12 units in addition to your enrollment limit.
- You may not go over your enrollment limit. For example, if moving into a course from a waitlist exceeds your enrollment limit, you will not be enrolled in the class.
- Waitlists have priority over all general add requests. If students drop from a full class, students from the waitlist will be placed in the class before any student who logs in and requests the class, but is not on the class waitlist.
- If you are moved from the waitlist into the class, you will receive a confirmation message in your MySJSU account.
- As with any class, when you move from the waitlist into a class, it is your responsibility to drop the class if you decide not to attend. Failure to properly drop the class will result in a “WU” grade on your record which will lower your grade point average.
- It is your responsibility to monitor your movement up the waitlist, your enrollment limit, potential time conflicts and any additional fees due.

How do I move from the waitlist into the class?

Students are moved from the waitlist into the class if space becomes available, in the order they have been placed on the waitlist and subject to the restrictions described.

Students will be moved from the waitlist and placed into the class if other students drop or are dropped due to non-payment of fees.
Waitlist - Registration Issues

- There is a time conflict with another registered class. Compare the exact time of the classes for which you have registered—even a 15 minute overlap will prevent you from moving from the waitlist into the class. Since potential time conflicts are not checked when you place yourself on a waitlist, it is your responsibility to make sure that waitlisted classes do not conflict with your enrolled schedule.
- You are already enrolled in another section of the same course. You will not be moved from the waitlist if space becomes available unless you drop the section you are enrolled in.
- If you are repeating the course, you will not be moved into the class. Instructors will have the discretion to allow you to register for the class with a permission number during Late Registration—the first day of instruction through the last day to add.
- For a course with components, you can waitlist in any section, but you must select all desired sections (lecture, lab and seminar). Space must open in all sections for you to be added to the class.
- You will not be enrolled from the waitlist if a hold is placed on your record after you sign on to the waitlist. If—for any of the reasons given above—you cannot be moved from the waitlist, you will be skipped over and the next student considered. You will not be reconsidered until the next time space becomes available in the class.

Waitlist - Registration Billing

- You may be added into waitlisted classes at any time which might incur additional charges. It is important to check your class schedule and amount due daily to avoid possible cancellation of all your classes for failure to pay your fees in full by your payment due date.

Registration - Dropping a Class

Go to http://my.sjsu.edu

- Enter your SJSU ID and Password
- If you drop a class, you must do so prior to the time you submit payment to ensure that your registration fees are properly assessed.

Navigate to “Self Service” > Student center > Drop a class”

- Click on “Drop Classes”
- Click the checkbox next to each class you wish to drop and click “Drop Selected Classes.”
- Review your selection and click “Finish Dropping.”
- It is the student’s responsibility to make sure classes are dropped.

Registration - Dropping Without Penalty

Courses may be added or dropped without penalty during the first fourteen days of classes. See the Calendar section or www.sjsu.edu/registrar for exact dates and deadlines. Courses dropped during this initial period will not appear on the student’s transcript. With instructor consent, students may late add a class up to one week later.

Registration - Dropping Classes After Drop Deadline

Dropping Classes After the Fourteenth Day of Instruction

Students may petition to late or retroactively drop a course or withdraw from an entire semester of courses for serious and compelling reasons after the drop deadline. Check the official academic calendar to verify the date.

Conditions and circumstances are defined as “serious and compelling” only if beyond the student’s control. Those acceptable as justifications for a late drop must have occurred after the drop deadline. A personal statement with supporting documentation must be submitted with the late and retroactive drop and withdrawal forms.

Undergraduates may download the appropriate petition (course drop or withdrawal from all courses) at www.sjsu.edu/aars/forms. Graduate students may download the appropriate petition at www.sjsu.edu/gape/forms.

Submission of these forms, even with an instructor’s signature, does not constitute approval. Continue attending class and complete all assignments until the petition is approved or denied.

Registration - Instructor Drops

Instructors are permitted to drop students who fail to attend the first scheduled class meeting and who fail to inform the instructor prior to the second class meeting of the reason for any absence and their intention to continue in the class. Some instructors will drop students who do not meet the stated course prerequisites. However, they are not required to do so. It is the student’s responsibility to make sure classes are dropped.

Detailed information for instructors is available for download at www.sjsu.edu/registrar/docs/Instructor_DropsProcedure.pdf.
Registration - Late Drop Petitions

Students may petition to Late Drop for serious and compelling reasons after the drop deadline. To verify the official dates, see www.sjsu.edu for links to the official academic calendar. Petitions are available at www.sjsu.edu/aars/forms for undergraduates and www.sjsu.edu/gape/forms for graduate students.

Conditions and circumstances are defined as ‘serious and compelling’ and are considered beyond the student’s control, and which occurred after the drop deadline.

A personal statement submitted without supporting documentation is not acceptable. Acceptable documentation includes:

Personal health or serious family illness
Serious health reasons out of your control (e.g. personal health, serious family illness or assigned caretaker). Attach a doctor’s note or other appropriate verifiable documentation.

Military (orders from CO)
Submit military assignment papers.

Divorce
Divorce papers or certification of pending divorce.

Natural Disaster: (e.g. fire, earthquake)
Submit verifiable documentation.

Employment
Letter from employer, on letterhead indicating reason(s) for work schedule circumstances conflicting with the class requested to drop and date of change in schedule.

Personal/Other (rarely approved)
Submit verifiable and appropriate documentation other than student’s statement.

Administrative Error
University documentation from appropriate departments. Students must understand that their personal letter alone will not suffice as verifiable documentation.

Late drops are to be submitted to the counter of Academic Advising and Retention Services in the Student Services Center.

Neither an instructor’s signature nor submission of a Late Drop petition constitutes approval. Continue attending class and complete all assignments until you are notified via MySJSU message that the petition has been approved or denied.

Academic Renewal

Under certain circumstances, the university may disregard up to two semesters of previous undergraduate course work taken at any institution from all considerations associated with the requirements for a baccalaureate degree. These circumstances are:

1. The student has formally requested such action and presented evidence that substantiates that the work in question is substandard and not representative of her/his current scholastic ability and/or performance level, and
2. The previous level of performance was due to extenuating circumstances, and
3. All degree requirements except the earning of at least a “C” (2.0) grade point average have or will soon have been met. (University policy regarding academic renewal is not intended to permit the improvement of a student’s grade point average beyond what is required for graduation.)

Final determination, that one or more terms shall be disregarded, shall be based on careful review of evidence by a committee appointed by the president. Such final determination shall be made only when:

Five years have elapsed since the most recent work to be disregarded was completed, and

1. The student has earned in residence at SJSU since the most recent work being considered was completed:
   • 15 semester units with at least a 3.0 GPA or
   • 30 semester units with at least a 2.5 GPA or
   • 45 semester units with at least a 2.0 GPA.
2. When such action is taken, the student’s record shall be annotated so that it is readily evident to users of the record, that NO work taken during the disregarded term(s), even if satisfactory, has been applied towards the meeting of degree requirements. However, all work must remain legible on the record.
3. If another institution has acted to remove course work from consideration, such action shall be honored in terms of that institution’s policy. But, elimination of any course work’s consideration shall reduce by one semester the two semester maximum on the application of academic renewal to an individual SJSU student’s record.

Apply for Academic Renewal (formerly known as ‘disregard of previous semesters’ work’) at www.sjsu.edu/ugs.
Cancellation of Registration or Withdrawal From the Institution

Students who find it necessary to cancel their registration or to withdraw from all classes after enrolling for any academic term are required to follow the university’s official withdrawal procedures. Failure to follow formal university procedures may result in an obligation to pay fees as well as the assignment of failing grades in all courses and the need to apply for readmission before being permitted to enroll in another academic term. Information on canceling registration and withdrawal procedures is available from [name of officer, campus address, and phone number].

Students who receive financial aid funds must consult with [name of office] prior to withdrawing from the university regarding any required return or repayment of grant or loan assistance received for that academic term or payment period. Students who have received financial aid and withdraw from the institution during the academic term or payment period may need to return or repay some or all of the funds received, which may result in a debt owed to the institution.

Please contact the Office of the Registrar at 408-924-5680 for more information.

Registration - Restrictions

Graduate students

Cannot enroll in lower division classes during Advance Registration. Lower division classes will need to be added Monday, August 25 through Friday, September 12.

Matriculated SJSU students cannot concurrently enroll in Open University.

Matriculated students are those who have been admitted to SJSU as regular students for the current semester or were registered as matriculated students in at least one of the two previous semesters and did not graduate. This policy does not apply to disqualified students.

Students returning after an absence:

After an absence of more than one semester (without a formal leave of absence), students must reapply for admission before access to registration is granted.

Maximum Unit Load:

Each student is provided a specific priority registration begin date and time (based on Academic Senate policy). You will be limited to registering for 16 units for Fall 2014. Fall 2014 and Spring 2015 undergraduate graduation candidates who have graduation applications on file with the Registrar’s Office on or before July 18, 2014, will be eligible to register up to 18 units beginning August 1, 2014. Excess unit petition will be available on Monday, August 11, 2014 only for students with Fall 2014 and Spring 2015 graduation application on file. No exceptions. Maximum units allowed, with petition, is 21 units.

Repeating a Class - Registration Restriction

During Advance Registration you may not register for a class in which you have previously been enrolled unless that class may be taken multiple times for credit (that is, be designated “repeatable for credit”). If you wish to repeat a class for the purpose of improving your grade, you must wait until the start of classes. To repeat any “non-repeatable for credit” course, you must have earned below a “C” for undergraduates or a “B” for graduate students.
Returning After an Absence - Registration Restriction

If you are in good standing and you were not disenrolled for non-payment of fees and you choose not to enroll or “stop out” for one semester, there is no need to reapply for admission. However, in order to maintain your matriculation at SJSU, you must enroll in classes the semester immediately following the one semester you stopped out. Some examples:

- You attended a spring term, earned grades and you are still in good standing. You do not enroll in the fall term, but return to take classes in the following spring. You do not need to reapply for admission.

When you must reapply for admission

- You attended a fall term, earned grades and are in good standing. You do not enroll in the next spring or fall terms. You must reapply for admission.
- If you take a full year off from school—you must reapply for admission. Consider alternatives: read the “leave of absence” section of the catalog.
- You do not enroll in classes in your initial admission term and wish to attend a subsequent term. You must reapply for admission.

How to reapply for admission

Complete the online application at www.csumentor.edu.

If you intend to stop out for one semester but decide to extend your absence, you may not request a leave of absence.

If you return to SJSU after an absence of more than one semester you must reapply for admission before access to registration is granted. Note that a summer term is not included in this policy.

Remediation - Students in Math and English - Registration Restriction

- Students in Math or English remedial status are restricted from enrolling in certain classes. Go to www.math.sjsu.edu/~McClory/ and click on the List of Approved Courses for more information.
- Students in Math or English remedial status based on ELM/EPT scores will be required to remain enrolled in their assigned developmental Math and/or LLD class except during summer term.
- Students who do not enroll or who drop out of an assigned developmental class(es) during any registration period for fall or spring terms will be subject to having all courses dropped. If this occurs, students must re-register for courses and there is no guarantee that classes in which they were previously enrolled will be available.

Writing Skills Test (WST) - Registration Restriction

- Are you planning on taking an SJSU Studies General Education course?
- Are you planning on taking a 100W course outside of your major?

You must satisfy the WST requirement in order to register for any SJSU Studies (Area R, S, V, and Z) General Education class. This is true even if you want to take the class for a major requirement, instead of GE. If you have not yet taken the WST, plan to take it as soon as possible. Check the General Education Section in this schedule for an explanation.

SJSU offers courses (LLD 100A and ENGL 100A) that satisfy the WST requirement, if completed with a grade of “C” or better.

There are designated 100W classes for most major. Clear any substitutions with your major advisor before attempting to register for a 100W class that is not assigned to your major. You will need to wait until the first day of instruction to sign up for a 100W class that is not designated for your major.
Registration Holds

Students should periodically check for holds at http://my.sjsu.edu. Follow the instructions on how to clear them. Monetary holds of $50.00 or more will block you from registration, obtaining official transcripts, diplomas and other miscellaneous services.

College of Engineering Advising

Are you an undergraduate majoring in any field of study in the College of Engineering? All College of Engineering undergraduates must see an advisor every semester, prior to registration. Graduate Engineering students (except Civil and Industrial & Systems, Computer Engineering, and General Engineering) must also see a major advisor prior to enrolling every semester.

Are you an Occupational Therapy major?

All Occupational Therapy majors must see an advisor prior to registration.

College of Science Advising

Are you an undergraduate majoring in any field of study in the College of Science? Are you a graduate student in Chemistry, Computer Science or Physics?

All undergraduate College of Science majors and graduate students in Chemistry, Computer Science and Physics must see a major advisor prior to registering every semester.

AARS Advising Hold

Are you an undergraduate listed as Undeclared?

You may be required to see an advisor in Academic Advising and Retention Services prior to registering for the next semester.

ELM/EPT

Students might also see ELM and EPT “service indicators” that indicate the need to enroll in remedial math or English. These do not prevent registration.

Have you taken the required placement tests? EBL indicators mean a student did not take the placement test. RNM indicators mean a student did not complete the required remediation within the time limite.

Students who are not exempt from the ELM and/or EPT must take the tests and have their scores on record before registering for any courses.

Financial Holds

- Do you owe the University $50.00 or more?

If so, you will not be able to register until the debt has been paid. Be aware - these debts could accrue at any time. Clear up any debts as soon as possible by paying your outstanding debts using the Pay Now option at http://my.sjsu.edu after the log-in under Self Service. Remember, payments are applied to the oldest debt first. Keep your account current by paying all charges by the assigned due date.

Hepatitis B Immunization Series

- Are you a first time SJSU student?

- Will you be 18 years or younger on the first day of instruction?

If the answer to both of these questions is yes, you are required to submit proof of full immunization or immunity against Hepatitis B. Notes: It takes 4-6 months to complete the 3-dose Hepatitis B vaccine series. This requirement may be waived for students who attended a California middle or high school. Bring or fax (408-924-2077) proof of your immunization or immunity to the Student Services Center. Remember to include your phone number and SJSU ID.

International student Health Insurance

Proof of health insurance is required prior to registration each semester. For questions about this hold, please call International Programs and Services (408) 924-5920.
Measles and Rubella

- Are you a new or readmitted SJSU student?
- Were you born on or after January 1, 1957?

If the answer to both of these questions is yes, you are required to submit proof of full immunization or immunity against Measles and Rubella. Note: This requirement may be waived for students who attended a California middle or high school. Bring or fax (408-924-2077) proof of your immunization or immunity to the Student Services Center. Remember to include your phone number and SJSU ID.

Missing Document Holds

- Were you admitted for Fall 2014?
- Did you submit unofficial transcripts?
- Were you admitted before you completed your last term at your last college?

If you were admitted for either term and if the answer to either of the other questions is yes, you must submit final, official transcripts from those institutions before you can register.

Probation Holds

- Is your SJSU cumulative grade point average below 2.00 for undergraduates (3.00 for graduate students)?
- Are you on a reinstated status on probation?

For undergraduates, if the answer is yes, you must see your major advisor or an Academic Advising and Retention Services advisor before you can register. This will happen each term until you are no longer on probation.

Graduation Registration Restriction

Students with 120 or more units who have not applied for graduation will not be allowed to register until they have submitted that application. Students with 150 or more units will be required to meet with an advisor in Academic Advising and Retention Services before registration and may have their registration for remaining requirements managed. Students who have changed their graduation date multiple times or who are otherwise in potential violation of Presidential Directive 2009-05 may be required to meet with an AARS advisor.
Records Holds

SJSU has the authority to withhold permission to register, receive services, materials, food or merchandise, or any combination of these, from any person owing a debt to the university. A debt is defined as an unpaid obligation of a student or former student, however incurred, arising while the debtor was a student. For students who have been recipients of Federal Perkins Student Loan funds, SJSU has the authority to withhold certain services for failure to complete a Perkins Exit Interview upon departure from SJSU.

A Record Hold is a method of implementing these restrictions.

An automatic financial hold will be placed against the student’s records whenever a debt is not cleared by the payment due date.

Services that may be held include, but are not limited to:
- Registration
- Grades
- Diploma
- Transcripts

When all due debts are cleared, the financial hold is automatically removed.
Alternative Enrollment Programs

**e-Learning**
San José State University delivers distance education courses via Web-based learning management systems and resources. These courses are offered by individual departments in regular and special sessions.

**Intrasystem and Intersystem Enrollment Programs**
Students enrolled at any CSU campus will have access to courses at other CSU campuses on a space available basis unless those campuses or programs are impacted or admission to the desired program or admission categories are closed. This access is offered without students being required to be admitted formally to the host campus and sometimes without paying additional fees. Although courses taken on any CSU campus will transfer to the student’s home CSU campus as elective credit, students should consult their home campus academic advisors to determine how such courses may apply to their specific degree programs before enrolling at the host campus.

There are a few programs for enrollment within the CSU and one for enrollment between CSU and the University of California or California Community Colleges. Additional information about these programs is available from the Registrar’s Office. Forms are available online at www.sjsu.edu/registrar/forms.

**CSU Concurrent Enrollment**
Matriculated students in good standing may enroll on a space available basis at both their home CSU campus and a host CSU campus during the same term. Credit earned at the host campus is reported at the student’s request to the home campus to be included on the student’s transcript at the home campus. Many online courses at CSU campus are available for concurrent enrollment.

**CSU CourseMatch**
Eligible full-time CSU students enrolled at any CSU campus have access to fully online courses at other CSU campuses through the CourseMatch. Credit earned at the CSU campus offering the online course is automatically reported to your home campus and included in your academic record.

**CSU Visitor Enrollment**
Matriculated students in good standing enrolled at one CSU campus may enroll on a space available basis at another CSU campus for one term. Credit earned at the host campus is reported at the student’s request to the home campus to be included on the student’s transcript at the home campus.

**Intersystem Cross Enrollment**
Matriculated CSU, UC, or community college undergraduate students may enroll on a space available basis for one course per term at another CSU, UC, or community college and request that a transcript of record be sent to the home campus. This program is not available to graduate students.
Over 60 Program

Notice to Students who wish to apply to the San Jose State Over Sixty Fee Waiver Program:

San Jose State is facing another year of deep reductions in state funding. Four consecutive years of cuts have forced the campus to make very difficult decisions at all levels of the university.

One result of the continued reductions in state funding is that San Jose State has more demand from students to enroll than it is able to accommodate with classes and services. As a consequence, San Jose State reluctantly must discontinue the Over Sixty Fee Waiver Program as one of the cost-saving measures needed to address higher student demand and lack of funding.

General Questions:
Office of the Registrar

Email: registrar@sjsu.edu

Step-to-College

SJSU sponsors a low-cost concurrent enrollment program for area high school students through the Step-to-College program. Offered during state supported terms, students must have permission from the school principal and meet all SJSU course prerequisites, including placement exams. Applications are available at the Registrar’s Office.

Office of the Registrar
Student Services Center
408-924-2062

registrar@sjsu.edu

Open University

Open University is not available to matriculated students.

Open University allows students to earn degree units from SJSU or to take noncredit or Continuing Education Unit programs. Information booklets, including registration information, are available on campus at the Spartan Bookstore, Student Services Center, Counseling Services and off campus at International and Extended Studies.

- Fall schedule available online in July.
- Spring schedule available online in December.

cies@sjsu.edu

Summer Session

Summer Session is a self-support program that allows both matriculated and non-matriculated students to enroll in summer classes at San José State University. The program offers hundreds of courses to choose from across three sessions. Schedule policy, procedures and course information are available in April.

College of International and Extended Studies

Registration Fees, Payments and Refunds

CAUTION!

- Fees are subject to change without notice.
- You are responsible for keeping your http://my.sjsu.edu account current.
- If a check or e-check is dishonored by the bank for any reason, including keying errors for e-checks, the registration is subject to cancellation.
- Any delinquent outstanding charges owed to the university will be submitted to the Franchise Tax Board for tax refund offset.

All payments apply to the oldest debt on your account. For example, if you are making a registration payment and you have a housing debt with an earlier due date, the payment will apply to the housing charges first. Keep your account current to avoid the possibility of enrollment cancellation.

At the time you register, the system will provide you with the balance of fees owed. Fees are payable by cash, check, money order or credit card (online only) and must be posted to your account by the due date.

- Failure to pay fees by the due date will result in classes being dropped.

### Schedule of Tuition Fees

Mandatory tuition fee pays the cost of student services such as counseling, testing, student activities, health services and student financial aid administration. In addition, these fees cover some supplies and service costs of instruction and instructional resources.

The CSU makes every effort to keep student costs to a minimum. Fees listed in published schedules or student accounts may need to be increased when public funding is inadequate. Therefore, CSU must reserve the right, even after initial fee payments are made, to increase or modify any listed fee, without notice, until the date when instruction for a particular semester has begun. All CSU listed fees should be regarded as estimates that are subject to change upon approval by The Board of Trustees. The following reflects applicable systemwide fees for semester campuses.

Mandatory systemwide fees are waived for those individuals who qualify for such exemption under the provisions of the California Education Code (see section on fee waivers).

Fees and dates subject to change without notice
Billing

SJSU does not issue bills. To see the amount of fees owed in MySJSU, after you register for classes, go to: Student Center > Scroll down to Finances > Account Inquiry (link) > Charges Due (tab). Due dates are posted within 24 hours after class registration. **It is the student’s responsibility to make payments by the stated deadline - failure to pay fees by the due date will result in all classes being dropped.** If you are on a waitlist, please check your account daily since enrollment in waitlisted classes may result in additional fees owed.

If you add classes during Late Registration that change your unit load from fewer than 6.0 units to 6.1 or more units, additional fees will be due. Check your MySJSU account for your payment due date.

**Fees for Non-Residents**

Non-Residents of California must pay all fees listed above, plus mandatory non-resident fee of $372.00 per unit multiplied by the number of units with no cap.

**Graduate Business Professional Tuition Fee**

For students pursuing the MBA or MS Accountancy degrees, the Graduate Business Professional Fee is paid on a $254.00 per unit basis in addition to basic tuition fees and campus fees.

---

### SPECIAL OR OPTIONAL FEES - ALL STUDENTS

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>

<td>Semester Commuter Parking Permit</td>
<td>$192.00</td>
</tr>
</tbody>
</table>

---

**Registration Fees - International Student**

International students must pay the basic registration fee plus $372 per unit, with no cap, in addition to the mandatory tuition fees, campus fees and course fees.

### Nonresident Tuition Exemptions (AB 540)

If you attended high school in California for at least three full years and graduated or earned an equivalent, you may be eligible for resident tuition. Students must file an affidavit with SJSU stating that they have filed an application with INS to legalize their immigration status or will do so as soon as they are eligible. You will need to show proof of attendance and graduation.

On October 11, 2001, Governor Gray Davis signed Assembly Bill 540 (now Education Code Section 68130.5) creating a new exemption from nonresident tuition for any student who meets ALL of the following criteria:

a) attended high school in California for 3 or more years;

b) graduated from a California high school or attained the equivalent;

c) is registered at, or attending an accredited institution of higher education in California not earlier than Fall 2001, and

d) if a student without lawful immigration status files an affidavit with the campus stating that he or she has applied to legalize immigration status (using INS form I-130, Petition for Alien Relative) or will do so as soon as he or she is eligible.

See [www.sjsu.edu/bursar/students_parents/faqs/exemption_faqs/index.html](http://www.sjsu.edu/bursar/students_parents/faqs/exemption_faqs/index.html) for additional information.

### Registration Late Fees

- Students eligible for participation in advance registration who do not register...........................................$25
- Returned check/ACH payments - 1st time...........................................................................................................$25
- Returned check/ACH payments - after 1st time....................................................................................................$35
- Registration after add deadline through census, September 13 - 22, 2014....................................................$45
- Post Census Late Enrollment Fee beginning September 23, 2014.................................................................$200

**Those exempt from the late fee(s) prior to enrollment census date are:**

- Students enrolled in the Step to College program
- Graduate students who cannot enroll in lower division classes during Advance Registration.
Registration Fees - Late Registration Participants

If you add classes during the Late Registration period which change your unit load from fewer than 6.0 units to 6.1 or more units, additional tuition fees will be due. Review your account via http://my.sjsu.edu to find the amount due and the payment deadline. Billing statements will not be issued.

Registration - Deferrals and Waivers

In order to receive a tuition fee deferral, your financial aid file must be complete and all requested documents submitted. Check your “To Do” list at MySJSU for requested documents. Once you have submitted all requested documents, a fee deferral will be assigned to your record to hold your classes and delay the payment of registration tuition fees while your financial aid process is completed. To prevent enrollment cancellation, it is your responsibility to submit all requested documents prior to the scheduled tuition fee payment deadline. Be sure to monitor your account at MySJSU for file status changes and “To Do” items.

Important! Financial Aid fee deferrals are temporary and are issued once all requested financial aid documents are submitted. A financial aid fee deferral holds classes and delays the payment of enrollment fees while the financial aid process is completed. To prevent enrollment cancellation, it is the student’s responsibility to submit all requested financial aid documents prior to the scheduled fee payment deadline. The financial aid fee deferral does not cover housing charges.

If your tuition fees are to be paid by a third party (i.e. employer, government agency, or foreign embassy), documents must be on file before your payment deadline authorizing the university to bill the agency for your fees. Authorization may be mailed or faxed to the Bursar’s Office at 408-924-1654. If documentation is not received by your payment due date, classes may be dropped.

When financial aid or the amount to be paid by the agency is less than the amount due, you must pay the difference owed. If the agency fails to formally authorize the university to pay tuition fees, you are responsible to pay by the due date.

Federal regulations prevent the university from deducting parking permit charges from financial aid. Financial aid recipients must pay for parking permits separately.
Payment Deadlines - Registration

The following dates are tentative. Check the Bursar’s Office website at http://www.sjsu.edu/bursar/fees_due_dates/due_dates/index.html for up to date information.

**Advance Registration: Tuesday, June 3, 2014 - Wednesday, August 20, 2014**

<table>
<thead>

</tr>
<tr>
<td>July 12, 2014 - August 10, 2014</td>
<td>August 16, 2014</td>
</tr>
<tr>
<td>August 11, 2013 - September 10, 2013</td>
<td>September 16, 2014</td>
</tr>
</tbody>
</table>

Enrollment will be cancelled for non-payment.

For more information
408-924-1601
www.sjsu.edu/bursar/

**Registration - Installment Payment Plans (IPPs)**

If you register for classes June 3, 2014 through September 16, 2014 you may sign up for an installment payment plan. See www.sjsu.edu/bursar/payment_refunds/installments/index.html for more detailed information on payment plans.

To enroll in the installment plan, log on to MySJSU, navigate to Self service > Student Center > scroll to Finance section > Payment Plans and Account Services. See www.sjsu.edu/bursar for more detailed information on payment plans.

**INSTALLMENT TYPE** | **NON-REFUNDABLE PROCESSING FEE**
---|---
Installment Payment Plan (IPP) | $33

See www.sjsu.edu/bursar/fees/installments/spring/ for installment payment due dates.

**Payment Plan Features**

- An installment fee will be assessed
- Housing charges included in the payment plan
- Payments divided equally
- Three to five installments for Advance Registration (June 3 - August 10, 2014), depending on the date you register
- Two installments for Late Registration (August 25 - September 12, 2014)

**Loan, Short Term**

Short Term loans are available through the Bursar’s Office.

To be eligible, you must:

- Be current on any outstanding debts to the university
- Must have sufficient financial aid or be gainfully employed
- Must be enrolled in at least six undergraduate or four graduate units
Selective Service-Eligibility for Aid

The federal Military Selective Service Act (the "Act") requires most males residing in the United States to present themselves for registration with the Selective Service System within thirty days of their eighteenth birthday. Most males between the ages of 18 and 25 must be registered. Males born after December 31, 1959 may be required to submit a statement of compliance with the Act and regulations in order to receive any grant, loan or work assistance under specified provisions of existing federal law. In California, students subject to the Act who fail to register are also ineligible to receive any need-based student grants funded by the state or a public postsecondary institution.

Selective Service registration forms are available at any U.S. Post Office, and many high schools have a staff member or teacher appointed as a Selective Service registrar. Applicants for financial aid can also request that information provided on the Free Application for Federal Student Aid (FAFSA) be used to register them with the Selective Service. Information on the Selective Service System is available and the registration process may be initiated online at http://www.sss.gov.
Refunds - Registration

A 100% refund of basic and/or non-resident fees will be given to students who drop all classes or withdraw from the university no later than Wednesday, August 20, 2014. Refundable fees include basic registration fees, non-resident fees, course fees and the miscellaneous SJSU fees.

A prorated refund will be given to students who withdraw from SJSU from the first day of instruction, August 25 through November 2, 2014.

Students who drop units resulting in a lower fee structure and/or mandatory fee obligation will be entitled to a refund of applicable tuition and mandatory fees up to the end of the designated SJSU Late Registration drop period on Friday, September 5, 2014. There are no refunds for individual course drops after this date.

See www.sjsu.edu/bursar/payment_refunds/prorata_refund/index.html for detailed information on refund percentages.

Financial Aid Students

When students who are receiving financial aid withdraw, the unearned portion of federal and state funds must be returned to the appropriate fund. The Financial Aid and Scholarship Office provides this information.

For All Students

Wednesday, August 20, 2014

Last day for full refund of both basic registration tuition fees and non-resident tuition, less a processing fee for students who do not select electronic refunds.

Monday, August 25, 2014

Pro rata refund schedule begins for both basic registration tuition fees and non-resident tuition for students who withdraw from the university.

Monday, August 25, 2014 - Friday, September 12, 2014

Late Registration: If you remain enrolled on Friday, September 5, 2014 and add or drop classes you will not be charged a late registration fee. Fees owed will be calculated based on units enrolled on last day to add, September 12, 2014.

Friday, September 5, 2014

After this date, students who remain enrolled but drop classes resulting in a lower fee category will not be eligible for a refund.

Sunday, November 2, 2014

The last day to receive a pro-rated refund based on withdrawal or dropping courses.

See www.sjsu.edu/bursar/fees/refunds/ for specific refund details.

Special Session and Open University students

Consult www.sjsu.edu/cies for specific refund policies.

Refund - Registration - Non-Resident

Upon complete withdrawal from SJSU, or a reduction in units, the non-resident tuition may be adjusted based on the transaction date according to the schedule. The amount to be refunded or credited to your account is determined by the transaction date of dropping classes or withdrawal from the university.

Refunds - Parking Permits

A $10 administrative fee is charged for parking permits cancelled or returned within 15 days of permit valid date. After 15 days, all permit refunds are prorated on a weekly basis and will include an administrative fee. No refunds are given during the last month of each semester.

For questions or additional information please contact Parking Services at parking@sjsu.edu.

All refunds are processed at Parking Services located in the University Police Department.
California State University Tuition Fee Policies

Cancellation of Registration or Withdrawal from the University

Students who find it necessary to cancel their registration or to withdraw from all classes after enrolling for any academic term are required to follow the university’s official withdrawal procedures. Failure to follow formal university procedures may result in an obligation to pay fees as well as the assignment of failing grades in all courses and the need to apply for reenrollment before being permitted to enroll in another academic term. Information on canceling registration and withdrawal procedures is available from the Office of the Registrar.

Students who receive financial aid funds must consult with Financial Aid and Scholarships prior to withdrawing from the university regarding any required return or repayment of grant or loan assistance received for that academic term or payment period. If a recipient of student financial aid funds withdraws from the institution during an academic term or a payment period, the amount of grant or loan assistance received may be subject to return and/or repayment provisions.

For further information, consult www.sjsu.edu/bursar and www.sjsu.edu/faso.

Fee Waivers - CSU Systemwide

The California Education Code includes provisions for the waiver of mandatory systemwide fees as follows:

Section 66025.3 - Qualifying children, spouses/registered domestic partners, or unmarried surviving spouses/registered domestic partners of a war period veteran of the U.S. military who is totally service-connected disabled or who died as a result of service-related causes; children of any veteran of the U.S. military who has a service-connected disability, was killed in action, or died of a service-connected disability and meets specified income provisions; any dependents or surviving spouse/registered domestic partner who has not remarried of a member of the California National Guard who in the line of duty and in active service of the state was killed or became permanently disabled or died of a disability as a result of an event while in active service of the state; and undergraduate students who are the recipient of or the child of a recipient of a Congressional Medal of Honor and meet certain age and income restrictions; Section 68120 - Qualifying children and surviving spouses/registered domestic partners of deceased public law enforcement or fire suppression employees who were California residents and who were killed in the course of active law enforcement or fire suppression duties (referred to as Alan Pattee Scholarships); and

Section 68121 - Qualifying students enrolled in an undergraduate program who are the surviving dependent of any individual killed in the September 11, 2001 terrorist attacks on the World Trade Center in New York City, the Pentagon building in Washington, D.C., or the crash of United Airlines Flight 93 in southwestern Pennsylvania, if the student meets the financial need requirements set forth in Section 69432.7 for the Cal Grant A Program and either the surviving dependent or the individual killed in the attacks was a resident of California on September 11, 2001. Students who may qualify for these benefits should contact the Registrar’s Office for further information and/or an eligibility determination.
Fees and Debts Owed to the University

Should a student or former student fail to pay a fee or a debt owed to the institution, the institution may “withhold permission to register, to use facilities for which a fee is authorized to be charged, to receive services, materials, food or merchandise or any combination of the above from any person owing a debt” until the debt is paid (see Title 5, California Code of Regulations, Sections 42380 and 42381).

Prospective students who register for courses offered by the university are obligated for the payment of fees associated with registration for those courses. Failure to cancel registration in any course for an academic term prior to the first day of the academic term gives rise to an obligation to pay student fees including any tuition for the reservation of space in the course.

The institution may withhold permission to register or to receive official transcripts of grades or other services offered by the institution from anyone owing fees or another debt to the institution. The institution may also report the debt to a credit bureau, offset the amount due against any future state tax refunds due the student, refer the debt to an outside collection agency and/or charge the student actual and reasonable collection costs, including reasonable attorney fees if litigation is necessary, in collecting any amount not paid when due.

If a person believes he or she does not owe all or part of an asserted unpaid obligation, that person may contact the campus Bursar’s Office. The Bursar’s Office, or another office on campus to which may refer the person, will review all pertinent information provided by the person and available to the campus and will advise the person of its conclusions.

Failure to pay full registration fees when due or to clear any debt by the given deadline will result in an additional Administrative Fee or cancellation of classes. Also, for failure to respond to university collection efforts, delinquent accounts will be referred to outside collection agencies. Students may be responsible for any collection costs that accrue.

Nonresident Alien Tax Assessment

International students and scholars receiving payments from San José State University must comply with all federal and state tax reporting responsibilities. The Internal Revenue Service requires that SJSU comply with specific federal tax withholding and reporting regulations when making payments to nonresident aliens. Non-U.S. citizens will be required to complete a Foreign National Information Form to assist in the determination of tax residency and applicable tax withholding liability. Payments affected by these IRS rules include, but are not limited to: compensation, wages, honoraria, consulting fees, scholarships, fellowships, stipends, and some reimbursements for travel and other expenses. Questions regarding nonresident alien tax assessment can be addressed by contacting the Human Resources Service Group at 408-924-2250.

Nonresident Students (U.S. and Foreign) Tuition

Nonresident Tuition (in addition to basic tuition fees and other systemwide fees charged all students): $372 per unit each semester. The total nonresident tuition paid per term will be determined by the number of units taken.

Exemption from Non-Resident Tuition for Certain Students

If you attended high school in California for at least three full years and graduated or earned an equivalent, you may be eligible for resident tuition. Students must file an affidavit with the CSU campus stating that they have filed an application with USCIS to legalize their immigration status or will do so as soon as they are eligible. You will need to show proof of attendance and graduation.

Fees - Dishonored Checks

An individual is not officially enrolled until the university has received full payment of fees. The university has not received payment if personal checks or E-checks are subsequently dishonored by the bank.

Individuals paying registration fees by personal check or E-check are hereby given notice that if their check is dishonored from the bank for any reason, the registration is subject to cancellation. Classes will be purged immediately without prior notification. A $25.00 fee is charged for the first returned check and $35.00 thereafter. An additional administrative fee may be charged. All dishonored checks must be redeemed with cash, money order or cashier’s check.
Refunds - Mandatory Fees Including Non-resident Tuition

Regulations governing the refund of mandatory fees, including nonresident tuition, for students enrolling at the California State University are included in Section 41802 of Title 5, California Code of Regulations. For purposes of the refund policy, mandatory fees are defined as those systemwide and campus fees that are required to be paid in order to enroll in state-supported academic programs at the California State University. Refunds of fees and tuition charges for self-support, special session, and extended education programs or courses at the California State University are governed by a separate policy established by the University, available at the Bursar’s Office.

In order to receive a full refund of mandatory fees, including nonresident tuition, a student must cancel registration or drop all courses prior to the first day of instruction for the term. Information on procedures and deadlines for canceling registration and dropping classes is available in the Tuition Fees section and at www.sjsu.edu/bursar.

For state-supported semesters, quarters, and non-standard terms or courses of four (4) weeks or more, a student who withdraws during the term in accordance with the university’s established procedures will receive a refund of mandatory fees, including nonresident tuition, based on the portion of the term during which the student was enrolled. No student withdrawing after the 60 percent point in the term will be entitled to a refund of any mandatory fees or nonresident tuition.

For state-supported non-standard terms or courses of less than four (4) weeks, no refunds of mandatory fees and nonresident tuition will be made unless a student cancels registration or drops all classes prior to the first day in accordance with the university’s established procedures and deadlines.

Students will also receive a refund of mandatory fees, including nonresident tuition, under the following circumstances:

- The fees were assessed or collected in error;
- The course for which the fees were assessed or collected was cancelled by the university;
- The university makes a delayed decision that the student was not eligible to enroll in the term for which mandatory fees were assessed and collected and the delayed decision was not due to incomplete or inaccurate information provided by the student; or
- The student was activated for compulsory military service.

Students who are not entitled to a refund as described above may petition the university for a refund demonstrating exceptional circumstances and the chief financial officer of the university or designee may authorize a refund if he or she determines that the fees and tuition were not earned by the university.

Information concerning any aspect of the refund of fees may be obtained from the Bursar’s Office, Student Services Center, 408-924-1601 or via e-mail at bursar@sjsu.edu.
Student Responsibilities and Rights

Academic Senate Policies
To see official SJSU Academic Senate policies, see www.sjsu.edu/senate/policies.html.

Academic Standards
Students studying for a baccalaureate degree are expected to maintain a grade point average of 2.0 “C” or better in their academic work at SJSU and in their overall collegiate record in order to continue in good standing. In determining a student’s eligibility to remain enrolled in the university, both quality of performance and progress toward the student’s objective are weighed. Use of grade points and grade point average for all letter-graded courses determines quality of performance. The length of time in meeting requirements is a factor in determining progress toward objectives. While the Registrar’s Office makes every effort to notify students of their academic status, it is the student’s responsibility to continuously monitor his or her own academic standing at http://my.sjsu.edu.

Attendance Policy
Students should attend all meetings of their classes, not only because they are responsible for material discussed therein but also because active participation is frequently essential to insure maximum benefit for all members of the classes. Attendance per se, however, shall not be used as a criterion for grading.

The “Policy on Class Attendance” at San José State University requires that students attend all class sessions to ensure continued enrollment in their courses. Failure to attend classes does not guarantee that a student will be dropped from the class roster. However, the instructor is permitted to drop students who fail to attend the first class meeting and who fail to inform the instructor prior to the second class meeting of the reason for any absence and the intention to continue in the class. Instructors have the right to drop students up through the Add Deadline date. Students who wish to DROP a course must drop the course through MySJSU on or prior to the deadline to drop a course without a “W” grade. If a student is dropped by the instructor for nonattendance through the Instructor Drop Method, it will be necessary for that student to “Add” the class if he/she still desires that course. To avoid the risk of being dropped from the class roster (through the Instructor Drop Method), students who find it necessary to miss one or more classes during the first five days of the semester should inform their instructors prior to the start of classes.

If students have been out of school for one or more days, they should report to their instructors upon their return to inquire about making up the work. Students who know in advance that they will miss one or more classes should inform their instructors.
**Academic Integrity Policy**

The University emphasizes responsible citizenship and an awareness of ethical choices inherent in human development. Academic honesty and fairness foster ethical standards for all those who depend upon the integrity of the university, its courses, and its degrees. University degrees are compromised and the public is defrauded if faculty members or students knowingly or unwittingly allow dishonest acts to be rewarded academically. This policy sets the standards for such integrity and shall be used to inform students, faculty and staff of the university’s Academic Integrity Policy.

**Student Role**

The San José State University Academic Integrity Policy requires that each student:

1. Know the rules that preserve academic integrity and abide by them at all times. This includes learning and abiding by rules associated with specific classes, exams and course assignments.
2. Know the consequences of violating the Academic Integrity Policy.
3. Know the appeal rights, and the procedures to be followed in the event of an appeal.
4. Foster academic integrity among peers.

**Faculty Member Role**

The San José State University Academic Integrity Policy requires that each faculty member:

1. Provide a clear and concise course syllabus that apprises students of the Academic Integrity Policy and the ethical standards and supporting procedures required in a course.
2. Make every reasonable effort to foster honest academic conduct. Specifically, examinations should be appropriately proctored or monitored to prevent students from copying, using non-cited resources, or exchanging information. Examinations and answers to examination questions should be kept private. Efforts should be made to give unique and varied assignments.
3. Take action against a student in accordance with this policy when supporting evidence indicates that the student has violated the Academic Integrity Policy.
4. Comply with the rules and standards of the Academic Integrity Policy.

**Office of Student Conduct and Ethical Development Role**

The San José State University Academic Integrity Policy requires that the Student Conduct Administrator:

1. Comply with and enforce the Student Conduct Code (http://www.sjsu.edu/studentconduct) which includes the Academic Integrity Policy.
2. Adjudicate student conduct cases and assign administrative sanctions to students who have violated the Student Conduct Code.
3. Serve as a resource for faculty, staff and students on matters of academic integrity and this policy.
4. Ensure dissemination of the policy to the campus community when changes are made to the policy or procedures.

**1.0 Definitions Of Academic Dishonesty**

**1.1 Cheating**

At SJSU, cheating is the act of obtaining or attempting to obtain credit for academic work through the use of any dishonest, deceptive, or fraudulent means. Cheating at SJSU includes but is not limited to:

1.1.1. Copying, in part or in whole, from another’s test or other evaluation instrument including homework assignments, worksheets, lab reports, essays, summaries, quizzes, etc.;
1.1.2. Submitting work previously graded in another course unless this has been approved by the course instructor or by departmental policy;
1.1.3. Submitting work simultaneously presented in two courses, unless this has been approved by both course instructors or by the departmental policies of both departments;
1.1.4. Using or consulting, prior to, or during an examination, sources or materials not authorized by the instructor;
1.1.5. Altering or interfering with the grading process;
1.1.6. Sitting for an examination by a surrogate, or as a surrogate;
1.1.7. Any other act committed by a student in the course of their academic work which defrauds or misrepresents, including aiding or abetting in any of the actions defined above.
1.2 Plagiarism
At SJSU plagiarism is the act of representing the work of another as one’s own without giving appropriate credit, regardless of how that work was obtained, and/or submitting it to fulfill academic requirements. Plagiarism at SJSU includes but is not limited to:

1.2.1 The act of incorporating the ideas, words, sentences, paragraphs, or parts of, and/or the specific substance of another’s work, without giving appropriate credit, and/or representing the product as one’s own work;

1.2.2 Representing another’s artistic/scholarly works such as musical compositions, computer programs, photographs, paintings, drawings, sculptures, or similar works as one’s own.

2.0 Notification of Standards of Detecting Plagiarism

2.1 SJSU or its faculty may subscribe to and/or use plagiarism detection services.

2.2 Any plagiarism detection service with which SJSU contracts must ensure the anonymity of all submitted work to third parties.

2.3 Except for the stated purpose of storing submitted work in databases and/or using the database solely for the intended purpose of detecting plagiarism, any plagiarism detection service with which SJSU contracts shall agree that to the fullest extent possible, ownership rights of all submitted work shall remain with the work’s author and not with the plagiarism detection service.

3.0 Evaluation and Reporting

When a faculty member suspects and has supporting evidence to substantiate that the behavior of a student or students fall(s) within one or both of the above sets of definitions, it is the faculty member’s responsibility to take the following steps:

3.1 Any classroom confrontation should be discreet. Faculty members should not discuss specific charges of cheating, plagiarism, or any other violations involving specific individuals in the classroom before other members of the class.

3.2 Communicate with the student concerning the alleged infraction; arrange for a conference to present documentation. Advise the student of the allegations and make them aware of the supporting evidence and the probable consequences. As a result of this conference, if the faculty member believes that the student’s response is insufficient to offset the charge of violating the Academic Integrity Policy, the instructor will inform the student of the sanctions to be assessed or recommended in accordance with section 3.0.

All notes and/or discussions between the student and the faculty member will be kept confidential except as may be relevant in subsequent disciplinary proceedings or any subsequent legal actions.

3.3 Report the alleged infraction and the academic action taken to the Office of Student Conduct & Ethical Development on the reporting form for violations to the Academic Integrity Policy. A copy of the supporting documentation must be attached to the reporting form.

3.4 The instructor may impose the recommended penalty and make the report called for in section 3.3 without a conference when a student fails to attend a scheduled conference to discuss the alleged dishonesty, or when the apparent dishonesty is detected only near the end of the semester and the faculty makes a good-faith effort to contact the student but is unable to do so. In either case, the student’s right to appeal is preserved.

4.0 Sanctions

There shall be two major classifications of sanctions that may be imposed for violations of this policy: Academic and Administrative. Academic sanctions are those actions related to the course work and/or grades which are the province of the faculty. Administrative sanctions are concerned with a student’s status on campus and are acted on by the Office of Judicial Affairs. The imposition of either an academic or administrative sanction will not preclude the additional imposition of the other.

4.1 Academic Sanctions

Faculty members are responsible for determining the type of academic sanction to be applied to students involved in incidents of cheating or plagiarism. Faculty may find it helpful to consult with their department chair, senior faculty, and/or the Conduct Officer in consideration of appropriate academic sanctions. Such sanctions shall be proportional to the offense against the Academic Integrity Policy that has occurred. Usually a form of “grade modification” will be employed. Before sanctions can be employed, the faculty member must have verified the instances of academic dishonesty by personal observation and/or documentation. In all cases, the violation must be reported to the Office of Student Conduct & Ethical Development on the reporting form for violations to the Academic Integrity Policy. A student may be:

4.1.1 Reprimanded orally.

4.1.2 Failed in the evaluation instrument (paper or exam).

4.1.3 Reduced in course grade.
4.1.4 Failed in the course.
4.1.5 Referred for administrative sanctions. A faculty member may choose to refer a student to the Office of Student Conduct & Ethical Development for disciplinary action in addition to the academic sanction the faculty member has taken.

4.1.6 Faculty Discretion:
Cases involving the careless or inept handling of quoted material but which fall short of the definitions of the acts of cheating and/or plagiarism as defined in Items 1.1 and 1.2 of this policy may be dealt with at the discretion of the faculty member concerned. The faculty has the discretion to deal with any other act committed by a student in the course of their academic work which defrauds or misrepresents, including aiding or abetting other students who violate this policy.

4.1.7 Academic Sanctions:
For violations of sections 1.1.5 and 1.1.6, the student must be referred to the Office of Student Conduct & Ethical Development for administrative sanctions as outlined in 4.1.5.

For violations of other sections of this policy, the instructor should choose between sanctions 4.1.1 through 4.1.4 based on the severity of the infraction.

4.2 Administrative Sanctions
As stipulated in the California Administrative Code, Section 41301, cheating or plagiarism in connection with an academic program may warrant expulsion, suspension, probation or a lesser sanction. Administrative action involving academic dishonesty at SJSU is the responsibility of the Office of Student Conduct & Ethical Development.

The Office of Student Conduct & Ethical Development will respond to:
1. referrals from the faculty;
2. violations of the Academic Integrity Policy;
3. repeat violations as brought to attention by the faculty or through the centralized reports filed in the Office of Student Conduct & Ethical Development.

Faculty members will be notified by the Office of Student Conduct & Ethical Development when action has been taken. The Office of Student Conduct & Ethical Development shall maintain a record of students who have been reported for violating the Academic Integrity Policy. The information in this record will be used to identify and discipline students who have been reported.

5.0 Protection Of Rights
Nothing in this policy is intended to deny students who come within its scope appropriate “due process,” including the right to be informed of the charges, the nature of the evidence supporting the charges, and to have a meeting with the faculty member, the Office of Student Conduct & Ethical Development or other decision-makers, at which time statements and evidence on behalf of the student may be submitted. Nor is it intended to deny the right to appeal, through appropriate university channels, any decision resulting from such a meeting.

5.1 The handling of student conduct code violations should be separated from the processes handling student disputes with other members of the university community. Specifically, grades resulting from cheating are not a matter of student fairness. Therefore the Office of the Ombudsperson and the Student Fairness Committee should be removed from the student conduct processes regarding academic misconduct (S07-2). Students may, however, consult with the Ombudsperson confidentially and informally regarding the Academic Integrity policy and/or process.

5.2 When an administrative sanction is being considered, Executive Order 970, Student Disciplinary Procedures for the California State University, stipulates that a student is entitled to a hearing to determine whether violations of conduct and/or conduct-related regulations have occurred. Students may, however, consult with the Ombudsperson confidentially and informally regarding the Academic Integrity policy and/or process.

6.0 Threats
Any threats against any member of the faculty as a consequence of implementing this policy on academic integrity will be cause for disciplinary action under Section 41301, Title 5, California Code of Regulations, in addition to civil and criminal liabilities.

7.0 Dissemination Of Information
7.1 This policy shall be published in the Schedule of Classes each semester and in the University Catalog. There shall also be copies of this policy in every department office and copies will be available to all interested parties in the Office of Student Conduct & Ethical Development.
7.2 Dissemination of this information shall be the responsibility of the Office of Student Conduct & Ethical Development. Information is available at http://www.sjsu.edu/studentconduct

7.3 The Office of Student Conduct & Ethical Development shall submit a statistical report on the number and type of infractions and their eventual disposition to the Academic Senate annually.

7.4 Colleges and departments are encouraged to periodically include at faculty meetings, discussion of this policy and strategies for ensuring academic integrity among students.

7.5 Department chairs and school directors should ensure that new faculty members receive a copy of this policy and a verbal explanation at the time they are given their first class assignment.

Complaints

A student involved in a dispute must first attempt to resolve the matter with the other party. If an agreement is not reached, the student should seek the aid of the University Ombudsperson or the immediate supervisor of the other party. Students may seek the counsel of the Ombudsperson before speaking with parties directly involved in the conflict. If this informal process fails to resolve the matter, the student should contact the University Ombusperson regarding the formal complaint process.

Complaint Procedures - Alleged Violations of State Law

Student/Applicant Complaint Procedure for Alleged Violations of State Law Not Covered by Another CSU Complaint Procedure

This executive order fulfills the requirements of the Higher Education Act Title IV, 34 Code of Federal Regulations sections 600.9(a)(1)(i)(A) and 668.43(b), by establishing a complaint procedure for CSU students and student applicants alleging that the CSU has violated one or more state laws, where there is no other applicable CSU complaint procedure.

I. Scope of Procedure

This complaint procedure is for CSU students and student applicants who believe the CSU has violated one or more state laws. It does not encompass complaints already covered by another CSU complaint procedure (e.g., student complaints alleging discrimination, harassment and retaliation, covered by Executive Order No. 1045). It also does not encompass complaints regarding CSU’s compliance with academic program quality and accrediting standards; such complaints may be filed with the Western Association of Schools and Colleges (WASC), the agency that accredits the CSU’s academic program, at http://www.wascsenior.org/comments.

II. The Complaint

A. The complaint must be filed within 30 work days of the CSU’s alleged violation of one or more state laws, or the complainant’s discovery thereof.

B. The complaint must be made in writing and clearly indicate the intent to file a complaint alleging that the CSU violated one or more state laws or specifically reference this executive order.

C. The complaint must contain the following:

The complainant’s name, student I.D. number, mailing address and telephone number.

The term and year of the complainant’s last active academic status or the term and year the complainant sought admission to the university.

A detailed description of the specific actions that constituted the alleged violation of one or more state laws, including the specific law or laws alleged to have been violated and, if known, the name(s) and title(s) of the responsible CSU employee(s).

The date(s) the alleged improper activities occurred or the condition developed.
A list of witnesses, if any, including their contact information and the facts known by each.
Copies of any documentary evidence that supports the complaint.
Descriptions of documents that support the complaint and, if known, where the documents are maintained and by whom if the actual documents are not in the possession of the complainant.
A dated and signed statement by the complainant under penalty of perjury that the complaint is true, or is believed by the complainant to be true.
D. The complaint may be filed with the campus president or designee ("campus administrator").
E. The complaint must be personally delivered, or sent by electronic or certified mail. The complaint filing date is the date of personal service, the date on the electronic transmission or the postmark date of the mailing.

III. The Level I Campus Investigation
A. The campus administrator shall review the complaint to determine whether it is timely filed, contains all the required information and falls within the scope of this executive order. If it does, the campus administrator shall notify the complainant in writing within 10 work days of receipt of the complaint that the complaint has been accepted. If it is untimely or does not contain all of the required information, the campus administrator shall notify the complainant in writing within 10 work days of receipt of the complaint that the complaint has not been accepted and state the reasons.
If it is determined that the complaint falls within the scope of another CSU complaint procedure, the campus administrator shall forward the complaint to the appropriate campus official and shall notify the complainant in writing within 10 work days of receipt of the complaint that the complaint has been deemed to fall within the scope of another CSU complaint procedure, why, and to whom the complaint has been forwarded. The administrator shall not forward the complaint or disclose the complainant’s identity to anyone who has or appears to have a conflict of interest in regard to the allegation(s).
B. If the complainant raises any new allegations after the complaint has been accepted, the campus administrator shall decide whether to include those allegations as part of the complaint. If they are not included as part of the initial complaint, the complainant shall be advised of the need to file a new complaint to address those allegations.
C. The campus administrator shall investigate the claim, or may appoint a third party to conduct an investigation. The investigator shall be a management personnel plan employee or an external consultant experienced in conducting investigations. If the complaint is against the CSU, the chancellor or any Chancellor’s Office employee, campus president or vice president, the campus administrator shall consult with the Associate Vice Chancellor, Academic Affairs at the Chancellor’s Office, who shall determine the appropriate handling of the complaint. The timelines and procedures for the process remain the same.
D. The complainant is required to fully cooperate in the investigation, and must participate in a timely intake interview. If the complainant does not cooperate, the campus administrator may end the investigation.
E. CSU employees are required to cooperate with the investigation, be truthful, maintain confidentiality, and provide all relevant and/or requested information to the investigator.
F. Complaints and other information gathered during the course of the investigation by the university shall be shared only with individuals who have a legitimate business reason to know.

IV. The Level I Campus Decision
The campus administrator shall make the final decision and issue a letter of determination to the complainant no later than 60 work days from the date the complaint was filed, unless s/he determines that extenuating circumstances warrant an extension of time. In no case shall the decision letter be issued later than 90 work days from the date the complaint was filed.
Within the investigation period, the investigator must make findings of fact and conclusions regarding the allegations, which s/he shall reduce to an investigative report. Preponderance of the evidence is the applicable standard: in order to establish a fact, the investigator must find that the evidence on one side outweighs the evidence on the other side.
The report should include the following information:
A summary of the allegations.
A description of the investigative process.
The preponderance of the evidence standard used to determine whether a violation occurred.
The evidence considered.
A determination of whether the allegations were found to be substantiated.

Within the time frame specified above, the campus administrator shall notify the complainant in writing of the outcome. The notification should include a summary of the allegations, a description of the investigative process, the preponderance of the evidence standard used, the evidence considered and a determination of whether the allegations were found to be substantiated. The notification shall also inform the complainant what, if any, actions were or will be taken (specific employee discipline is confidential), and of his/her option to file an appeal under Article V of this executive order. The campus administrator shall maintain a copy of the notification as required by the applicable document retention policy(es).

V. The Level II Chancellor’s Office Review and Decision
A. If the complainant is not satisfied with the campus decision, s/he may file a Level II appeal with the Office of the Chancellor no later than 10 work days after receipt of the Level I decision. Level II appeals shall be addressed to: Associate Vice Chancellor, Academic Affairs, CSU Office of the Chancellor, 401 Golden Shore 6th Floor, Long Beach, California 90802.
B. The appeal shall be in writing and must detail the specific disagreements with the campus decision. The issues raised on appeal shall be limited to those raised during the Level I process.
C. The Associate Vice Chancellor, Academic Affairs or designee shall review the issues raised on appeal to determine whether the campus has adequately processed and addressed the complaint and/or whether the preponderance of the evidence indicates that there has been a violation of state law.
D. The Associate Vice Chancellor, Academic Affairs or designee shall issue a decision no later than 60 work days after receipt of the appeal unless s/he determines that extenuating circumstances warrant an extension of time. In no case shall the final decision letter be issued later than 90 work days from the date the appeal was filed. The decision shall include a summary of the issues raised on appeal, a description of the review process, the preponderance of the evidence standard used, the evidence considered and a final decision. The notification shall also inform the complainant what, if any, actions were or will be taken (specific employee discipline is confidential), and note that the CSU’s review of the complaint is now considered final and complete. A copy of the final decision letter shall be provided to the campus administrator.

VI. General Provisions
A. Work days are defined as Monday through Friday, excluding all official holidays or campus closures at the campus where the complaint originated.
B. A student/applicant must proceed with a complaint in good faith. A student who knowingly and intentionally files a false complaint, abuses this policy, or files a malicious or frivolous complaint may be subject to discipline. Discipline shall be taken in accordance with Section 41301, Title 5, California Code of Regulations.
C. When issuing a Level I or II response, personal delivery or certified mail shall be used. If personal delivery is used, a signature acknowledging the calendar date of delivery shall be obtained which will establish the date of response. If certified mail delivery is used, the postmark shall establish the date of response.
D. The CSU is not obligated under this executive order to investigate a complaint not timely filed under its provisions. Regardless, the CSU may investigate the underlying allegations if it determines the circumstances warrant investigation. Also, if the circumstances warrant investigation, the CSU may waive the time limits and choose to process the complaint under the complaint process set forth herein.
E. CSU will notify the California Department of Finance, Office of State Audits and Evaluation, and the Bureau of State Audits, of all cases of actual or suspected fraud, theft or other irregularities it learns of as the result of any complaint made under this executive order.
F. Time periods set forth in this executive order may be extended by the campus administrator and, at Level II, by the Associate Vice Chancellor, Academic Affairs up to the specified maximums, if any, provided s/he informs the complainant of the new time period in writing.
G. Care shall be taken to keep confidential the identity of the complainant in so far as feasible and consistent with the law.
H. CSU employees are prohibited from retaliating against complainants or others who cooperate with the investigation.

Effective: September 1, 2011
Model Complaint Procedure

Model complaint procedure for CSU students/applicants in compliance with HEA Title IV, 34 CFR, Sections 600.9 (a)(1)(i)(A) and 668.43(b)

Student/Applicant Complaint Procedure Notice

The California State University takes very seriously complaints and concerns regarding the institution. If you have a complaint regarding the CSU, you may present your complaint as follows:

(1) If your complaint concerns CSU’s compliance with academic program quality and accrediting standards, you may present your complaint to the Western Association of Schools and Colleges (WASC) at http://www.wascsenior.org/comments. WASC is the agency that accredits the CSU’s academic program.

(2) If your complaint concerns an alleged violation by CSU of a state law, including laws prohibiting fraud and false advertising, you may present your claim to the campus president or designee at [e-mail address]. The president or designee will provide guidance on the appropriate campus process for addressing your particular issue.

If you believe that your complaint warrants further attention after you have exhausted all the steps outlined by the president or designee, or by WASC, you may file an appeal with the Associate Vice Chancellor, Academic Affairs at the CSU Office of the Chancellor.

Note: Most complaints made to media outlets or public figures, including members of the California legislature, Congress, the Governor, or individual CSU trustees, are referred to the chancellor of the CSU.

Nothing in this disclosure should be construed to limit any right that you may have to take civil or criminal legal action to resolve your complaint.

The CSU has provided this disclosure to you in compliance with the requirements of the Higher Education Act of 1965, as amended, as regulated in 34 Code of Federal Regulations sections 600.9(a)(1)(i)(A) and 668.43(b).

Credit Hour

As of July 1, 2011 federal law (Title 34, Code of Federal Regulations, sections 600.2 and 600.4) requires all accredited institutions to comply with the federal definition of the credit hour. For all CSU degree programs and courses bearing academic credit, the “credit hour” is defined as “the amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time; or

2. At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution, including laboratory work, internships, practical, studio work, and other academic work leading to the award of credit hours.”

A credit hour is assumed to be a 50-minute period. In courses in which “seat time” does not apply, a credit hour may be measured by an equivalent amount of work, as demonstrated by student achievement.

Educational Equity

The California State University defines “educational equity” to be “...justice, equal opportunity, fairness and impartiality in the educational processes affecting under represented minorities. It involves the implementation of programs designed to attract, admit and support students heretofore excluded from full participation in the university by conditions of educational and economic disadvantages” (Educational Equity: A Continuing Commitment, published by the California State University, 1989).

Equal Opportunity

San Jose State University does not discriminate on the basis of accent, age, ancestry, citizenship status, color, creed, disability, ethnicity, gender, genetic information, marital status, medical condition, national origin, race, religion or lack thereof, sex, sexual orientation, transgender, or veteran’s status. This policy applies to all SJSU students, faculty and staff programs and activities. Title IX of the Education Amendments of 1972, and certain other federal and state laws, prohibit discrimination on the basis of sex in all education programs and activities operated by the university (both on and off campus). Questions regarding this policy should be directed to the Office for Equal Opportunity, 408-924-1115

The California State University is committed to providing equal opportunities to men and women CSU students in all campus programs, including intercollegiate athletics.

For more information, please visit: http://www.sjsu.edu/hr/about_us/hr_directory/eo_unit/title_ix/index.html
Disciplinary Action Statement

Students who have failed to comply with Federal, State and local laws governing the use of alcohol and illicit drugs will be subject to sanctions ranging from probation up to and including expulsion from the University. Incidents involving students against whom charges have been filed will be processed in accordance with the Chancellor’s Executive Order 970 (Student Disciplinary Procedures of The California State University), a copy of which may be obtained in the Office of Judicial Affairs.

Any permanent or probationary employee of the California State University may be dismissed, demoted or suspended for any one of several causes, including addiction to the use of controlled substances, conviction of a felony or conviction of any misdemeanor involving moral turpitude or drunkenness on duty (Educ. Code 89535). Employees challenging the imposition of such sanctions may appeal to the State Personnel Board and receive a hearing before an impartial body. Faculty employees have alternative appeal processes outlined in their collective bargaining agreement.

Student Fairness Committee

The Student Fairness Committee is under the jurisdiction of the university’s Academic Senate and is guided by Senate Policy S07-6. This committee hears complaints of violations of student rights in instructional and curricular matters, including grade appeals, and, when appropriate, makes recommendations for redress. The committee also hears and seeks redress of non-instructional student grievances concerning individual members of the faculty, administration or staff and, when appropriate, makes recommendations for redress.

A grievance can be brought as a result of an unauthorized or unjustified act or decision by a member of the faculty or staff or an administrative officer which in any way adversely affects the status, rights, or privileges of a student. The SFC does not have the authority to receive complaints on matters of sexual harassment, civil rights, disability rights, or equity and diversity. Nor does the SFC deal with allegations of violations of the student code of conduct.

Disputes arising out of assignment of grades or grade appeals shall be considered and decided in accordance with Executive Order 792. There is a presumption that grades assigned are correct. It is the responsibility of anyone appealing an assigned grade to demonstrate otherwise (EO 792).

The SFC will hear grade dispute petitions when petitions are deemed to be appropriate and include evidence related to the following conditions:

1. When there is evaluation of students that differs from announced requirements.
2. When there are belated impositions of requirements.
3. When grades are based on criteria other than academic performance in the course.
4. When grading criteria do not provide a clear and consistent method of evaluating students’ work or performance.
5. When students’ requests for information during the semester regarding their academic progress in the course are not responded to in a reasonable time (e.g., two weeks after the request is made).
6. When students’ requests for an explanation of how the posted course grades for a term were determined are not responded to in a reasonable time (e.g., the later of two weeks after the request is made or one week before the add deadline for the fall or spring semester following the term in question).
7. When students are penalized for expressing opinions.
8. When students are given to understand that they are removed from a course without due process of a hearing

Petitions must be filed no later than the end of the subsequent fall or spring semester following that in which the alleged cause of the dispute occurred. Prior to lodging a formal complaint, the student must secure informal, confidential advisement from the University Ombudsperson. Before the committee will accept a petition, the student must exhaust all available avenues for informal resolution (i.e., prior to filing a petition, consult with instructor, Department Chair, and the College Dean - if applicable - about the specific complaint).

Any student may contact the University Ombudsperson ADM 218, 408-924-5995.

Ombudsperson

The University Ombudsperson is an impartial party appointed to receive complaints, provide information, facilitate communication, and offer conflict resolution between students and members of the university community (faculty, staff, and administrators).

While an employee of the university, the Ombudsperson is an independent agent available to any student connected with the campus who has a complaint about university policy and procedures. Violations of student rights and policies that are perceived as being unfair or outdated are two of the problem areas with which the Ombudsperson deals. The Ombudsperson also screens cases for the Student Fairness Committee.
Student Conduct & Ethical Development

This office enforces the SJSU Student Conduct Code and Student Organization Code of conduct. Student development is paired with the appropriate disciplinary sanctions to help students facilitate their educational and ethical growth.

Student Conduct & Ethical Development
ADM 218
408-924-5985

Student Conduct Standards
California Education Code 41301

(a) Campus Community Values
The University is committed to maintaining a safe and healthy living and learning environment for students, faculty, and staff. Each member of the campus community should choose behaviors that contribute toward this end. Students are expected to be good citizens and to engage in responsible behaviors that reflect well upon their university, to be civil to one another and to others in the campus community, and contribute positively to student and university life.

(b) Grounds for Student Discipline
Student behavior that is not consistent with the Student Conduct Code is addressed through an educational process that is designed to promote safety and good citizenship and, when necessary, impose appropriate consequences.

The following behavior is subject to disciplinary sanctions and are the grounds upon which student discipline can be based:

(1) Dishonesty, including:
   • (A) Cheating, plagiarism, or other forms of academic dishonesty that are intended to gain unfair academic advantage.
   • (B) Furnishing false information to a university official, faculty member, or campus office.
   • (C) Forgery, alteration, or misuse of a university document, key, or identification instrument.
   • (D) Misrepresenting oneself to be an authorized agent of the university or one of its auxiliaries.

(2) Unauthorized entry into, presence in, use of, or misuse of university property.

(3) Willful, material and substantial disruption or obstruction of a university-related activity, or any on-campus activity.

(4) Participating in an activity that substantially and materially disrupts the normal operations of the university, or infringes on the rights of members of the university community.

(5) Willful, material and substantial obstruction of the free flow of pedestrian or other traffic, on or leading to campus property or an off-campus university-related activity.

(6) Disorderly, lewd, indecent, or obscene behavior at a university-related activity, or directed toward a member of the university community.

(7) Conduct that threatens or endangers the health or safety of any person within or related to the university community, including physical abuse, threats, intimidation, harassment, or sexual misconduct.

(8) Hazing, or conspiracy to haze. Hazing is defined as any method of initiation or pre-initiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university or other educational institution in this state (Penal Code 245.6), and in addition, any act likely to cause physical harm, personal degradation or disgrace resulting in physical or mental harm, to any former, current, or prospective student of any school, community college, college, university or other educational institution. The term “hazing” does not include customary athletic events or school sanctioned events. Neither the express or implied consent of a victim of hazing, nor the lack of active participation in a particular hazing incident is a defense. Apathy or acquiescence in the presence of hazing is not a neutral act, and is also a violation of this section.

(9) Use, possession, manufacture, or distribution of illegal drugs or drug-related paraphernalia, (except as expressly permitted by law and university regulations) or the misuse of legal pharmaceutical drugs.

(10) Use, possession, manufacture, or distribution of alcoholic beverages (except as expressly permitted by law and university regulations), or public intoxication while on campus or at a university-related activity.
(11) Theft of property or services from the university community, or misappropriation of university resources.
(12) Unauthorized destruction, or damage to university property or other property in the university community.
(13) Possession or misuse of firearms or guns, replicas, ammunition, explosives, fireworks, knives, other weapons, or dangerous chemicals (without the prior authorization of the campus president) on campus or at a university-related activity.
(14) Unauthorized recording, dissemination, or publication of academic presentations (including handwritten notes) for a commercial purpose.
(15) Misuse of computer facilities or resources, including:
   • (A) Unauthorized entry into a file, for any purpose.
   • (B) Unauthorized transfer of a file.
   • (C) Use of another’s identification or password.
   • (D) Use of computing facilities, campus network, or other resources to interfere with the work of another member of the university community.
   • (E) Use of computing facilities and resources to send obscene or intimidating and abusive messages.
   • (F) Use of computing facilities and resources to interfere with normal university operations.
   • (G) Use of computing facilities and resources in violation of copyright laws.
   • (H) Violation of a campus computer use policy.
(16) Violation of any published university policy, rule, regulation or presidential order.
(17) Failure to comply with directions of, or interference with, any University official or any public safety officer while acting in the performance of his/her duties.
(18) Any act chargeable as a violation of a federal, state, or local law that poses a substantial threat to the safety or well-being of members of the university community, to property within the university community or poses a significant threat of disruption or interference with university operations.
(19) Violation of the Student Conduct Procedures, including:
   • (A) Falsification, distortion, or misrepresentation of information related to a student discipline matter.
   • (B) Disruption or interference with the orderly progress of a student discipline proceeding.
   • (C) Initiation of a student discipline proceeding in bad faith.
   • (D) Attempting to discourage another from participating in the student discipline matter.
   • (E) Attempting to influence the impartiality of any participant in a student discipline matter.
   • (F) Verbal or physical harassment or intimidation of any participant in a student discipline matter.
   • (G) Failure to comply with the sanction(s) imposed under a student discipline proceeding.
(20) Encouraging, permitting, or assisting another to do any act that could subject him or her to discipline.

(c) Application of this Code
Sanctions for the conduct listed above can be imposed on applicants, enrolled students, students between academic terms, graduates awaiting degrees, and students who withdraw from school while a disciplinary matter is pending. Conduct that threatens the safety or security of the campus community, or substantially disrupts the functions or operation of the University is within the jurisdiction of this Article regardless of whether it occurs on or off campus.
Nothing in this Code may conflict with Education Code section 66301 that prohibits disciplinary action against students based on behavior protected by the First Amendment.

(d) Procedures for Enforcing this Code
The Chancellor shall adopt procedures to ensure students are afforded appropriate notice and an opportunity to be heard before the university imposes any sanction for a violation of the Student Conduct Code.

(e) Summary of Civil and Criminal Penalties for Violation of Federal Copyright Laws
As referenced earlier in Section XXI, Student Conduct (15) (G) the penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or “statutory” damages affixed at not less than $750 and not more than $30,000 per work infringed. For “willful” infringement, a court may award up to $150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys’ fees. For details, see Title 17, United States Code, Sections 504, 505. Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense.
Student Conduct Procedures

SJSU is committed to ensuring a safe learning and living environment for students, faculty, and staff. The privilege of attending San José State University is accompanied by certain responsibilities to ensure this environment. The California Code of Regulations, Title 5, Section 41301 establishes behavioral expectations of our students to promote safety and good citizenship. The California State University issued Executive Order No. 1073, named Student Conduct Procedures, on April 6, 2012 to outline procedures for administering the Student Conduct Code as well as ensuring students’ rights to due process. Executive Order No. 1073 supersedes Executive Order No. 1043. The process is intended to be educational in nature, and appropriate sanctions may be administered.

Policy and Implementation

At San José State University the responsibility for administering the Student Conduct Code resides with the Director of Student Conduct and Ethical Development in the Division of Student Affairs. This position is responsible for carrying out the duties in Executive Order No. 1073 assigned to the Student Conduct Administrator, including the determination of whether to initiate disciplinary action.

Use of attorneys is not permitted in student conduct proceedings at San José State University. This includes the informal conferences as well as formal disciplinary hearings. (See EO 1073, Article III, Section 3 for additional details about attorneys.)

The duties of the president in Executive Order No. 1073 are delegated to the Vice President for Student Affairs, including the appointment of hearing officers (Article III), review of final reports of hearing officers and issuing notice of the final decision (Article IV, Sections 5 and 6), and the imposition of interim suspension (Article VI).

Student Discipline and Conduct

Questions regarding student disciplinary matters should be directed to Student Conduct & Ethical Development, Administration 218, 408-924-5985 or www.sjsu.edu/studentconduct/.

Student Disciplinary Process

The judicial process is governed by E.O. 1073. Copies of this document are available in Student Conduct & Ethical Development, Administration 218, 408-924-5985 or www.sjsu.edu/studentconduct/.

California Code of Regulations

Inappropriate conduct by students or by applicants for admission is subject to discipline as provided in Sections 41301 through 41304 of Title 5, California Code of Regulations.

Regulation - Disposition of Fees

Disposition of Fees - Campus Emergency - 41302 - Interim Suspension

The president of the campus may place on probation, suspend, or expel a student for one or more of the causes enumerated in Section 41301. No fees or tuition paid by or for such student for the semester, quarter, or summer session in which he or she is suspended or expelled shall be refunded. If the student is readmitted before the close of the semester, quarter, or summer session in which he or she is suspended, no additional tuition or fees shall be required of the student on account of the suspension.

During periods of campus emergency, as determined by the president of the individual campus, the President may, after consultation with the chancellor, place into immediate effect any emergency regulations, procedures, and other measures deemed necessary or appropriate to meet the emergency, safeguard persons and property, and maintain educational activities.

The president may immediately impose an interim suspension in all cases in which there is reasonable cause to believe that such an immediate suspension is required in order to protect lives or property and to insure the maintenance of order. A student so placed on interim suspension shall be given prompt notice of charges and the opportunity for a hearing within 10 days of the imposition of interim suspension. During the period of interim suspension, the student shall not, without prior written permission of the President or designated representative, enter any campus of the California State University other than to attend the hearing. Violation of any condition of interim suspension shall be grounds for expulsion.
Regulation - Conduct by Applicants for Admission - 41303

Notwithstanding any provision in this Chapter 1 to the contrary, admission or readmission may be qualified or denied to any person who, while not enrolled as a student, commits acts which, were he enrolled as a student, would be the basis for disciplinary proceedings pursuant to Sections 41301 or 41302. Admission or readmission may be qualified or denied to any person who, while a student, commits acts which are subject to disciplinary action pursuant to Section 41301 or Section 41302. Qualified admission or denial of admission in such cases shall be determined under procedures adopted pursuant to Section 41304.

Regulation - Student Disciplinary Procedures for the California State University - 41304

The chancellor shall prescribe, and may from time to time revise, a code of student disciplinary procedures for the California State University. Subject to other applicable law, this code shall provide for determinations of fact and sanctions to be applied for conduct which is a ground of discipline under Sections 41301 or 41302, and for qualified admission or denial of admission under Section 41303; the authority of the campus president in such matters; conduct-related determinations on financial aid eligibility and termination; alternative kinds of proceedings, including proceedings conducted by a hearing officer; time limitations; notice; conduct of hearings, including provisions governing evidence, a record and review; and such other related matters as may be appropriate. The chancellor shall report to the board actions taken under this section.

Drug-Free Schools Statement

In accordance with the Drug-Free Workplace and the Drug-Free Schools and Communities Act (P.L. 102-226) and the Presidential Directive (90-92), SJSU recognizes that the abuse of alcohol and other drugs is a threat to the health and welfare of the campus community and is not compatible with an environment where education takes place. Therefore, the following principles will serve as standards of conduct.

The unlawful manufacture, possession, distribution or use of a controlled substance is prohibited on campus. Violation of this standard may result in dismissal under the applicable regulations of the Title V and will be subject to civil and criminal penalties.

No individual below the age of 21 and no intoxicated individual may use, purchase or possess alcoholic beverages or they may be subject to the penalties imposed by local, state and federal laws.

SJSU recognizes that its policy on illicit drugs and alcohol meets the legal requirements of public laws 101-226, 100-440, 100-690 and the California Penal Code. For more explicit information on the policy and sanctions, contact the Office of the Vice President for Student Affairs or the Student Health Center.

SJSU’s Commitment to Student Health and Safety

SJSU is sincerely concerned for the welfare of all members of its community. The university recognizes that college and university campuses may be particularly vulnerable to the abuse of alcohol and other drugs. Concern for the potential impairment of education and learning and the safety and good health of all members of the campus community, as well as the effective conduct of campus affairs, has led SJSU to issue this information.

This information was prepared to inform members of the campus community of the problems associated with alcohol and illicit drug abuse; to indicate sources of assistance for such problems; to emphasize standards of conduct desired of students, faculty and employees; and to note sanctions associated with infractions of these standards and other illegal acts related to abuse.

All colleges and universities that receive federal funds in any form are required to comply with Public Law 101-226. Partial compliance with this new law requires annual distribution of information to students and employees. This law, in addition to the Drug Free Workplace Act (Public Law 100-690) which requires applicants for federally funded grants and contracts (including certain forms of student financial aid) to certify that they will take affirmative steps to prohibit the unlawful manufacture, distribution, possession and use of controlled substances in the workplace, establishes the legal requirements for SJSU.

A more complete compendium on Federal, State and Local laws is available at the following locations:

- Vice President for Student Affairs, ADM 242
- Human Resources, UPD
- Wellness and Health Promotion Office, HB 209
Safety Report

To meet federal requirements, SJSU posts campus safety reports.

University Police
www.sjsu.edu/police
408-924-2172

Sexual Harassment

San José State University is committed to maintaining a learning and working environment free from sexual harassment of its students, employees, and those who apply for employee or student status. Sexual harassment is conduct subject to disciplinary action.

SJSU policy defines sexual harassment to include “behaviors as sexual advances, request for sexual favors, and other verbal or physical conduct of a sexual nature directed towards an employee, student, or applicant when one or more of the following circumstances are present:

• Submission to or toleration of the conduct is an explicit or implicit term or condition of appointment, employment, admission or academic evaluation;
• Submission to or rejection of such conduct is used as a basis for a personnel decision or an academic evaluation affecting an individual;
• The conduct has the purpose or effect of interfering with an employee’s work performance, or creating an intimidating, hostile, offensive or otherwise adverse working environment;
• The conduct has the purpose or effect of interfering with a student’s academic performance, creating an intimidating, hostile, offensive or otherwise adverse learning environment or adversely affecting any student.”

All complaints dealing with sexual harassment should be directed to the Office for Equal Opportunity, which is located in UPD 303, 408-924-1115.
Regulation - Nondiscrimination Policies

California State University (CSU) Student/Applicant for Admission Discrimination/Harassment/Retaliation Complaint Process Timeline

- Pursuant to Executive Order 1045 a student/applicant for admission (applicant) on any one of the 23 campuses of the California State University may file a complaint related to discrimination, harassment, or retaliation.
- Immediately following a discriminatory, harassing, or retaliatory act/action, or as soon as possible thereafter, students/applicants who believe they are or may have been victims of discrimination, harassment or retaliation, may initiate the Informal Resolution process to receive information and advice about the procedures that exist for resolving such matters.
- For the purpose of this executive order, day is defined as work day which means Monday through Friday, excluding all official holidays or campus closures at the campus where the complaint originated.
- Within twenty (20) work days after the end of the academic term (semester/quarter), in which the most recent alleged discriminatory/harassing/retaliatory act occurred, a student/applicant may file a formal discrimination/harassment/retaliation complaint.
- Within ten (10) work days of receipt of a formal complaint, an intake interview shall be conducted with the student/applicant.
- Within sixty (60) work days of the initial intake interview of a formal complaint, the investigator shall complete his/her investigation, write and submit the investigative report to the campus designated Management Personnel Plan (MPP) employee responsible for the implementation of, and compliance with, Executive Order 1045. The timeline for the investigation shall not be extended pursuant to Article VIII, Sections E or F of Executive Order 1045 for a period longer than an additional thirty (30) work days.
- Within ten (10) work days of receipt of the investigative report, the campus designated Management Personnel Plan employee shall review the investigative report and notify the student/applicant in writing of the outcome of the campus investigation. If the same Management Personnel Plan employee is the person who investigated the complaint, he/she shall provide the student/applicant with notification of the outcome of the campus investigation within ten (10) work days of completing the report. A separate notification shall be provided to the accused(s), indicating whether or not the allegations at Formal Level I were substantiated.
- Within ten (10) work days of receipt of the Formal Level I decision, the student/applicant may file a written appeal with the Office of the Chancellor.
- Within sixty (60) work days of receipt of a written appeal to the Office of the Chancellor (CO), the CO designee shall respond to the complainant. A separate notification shall be provided to the accused(s), indicating whether or not the allegations at Formal Level II were substantiated.
- The CSU review of a written complaint filed by a student/applicant under this executive order shall end following a final decision by the CO designee.

The timelines noted above may be extended for the following reasons:

- If the student/applicant, the accused, a witness, the campus investigator/CO designee, or other necessary person involved in the complaint process is unavailable because of any reason deemed to be legitimate by the campus investigator/CO designee, the timelines in this executive order will be automatically adjusted according to the period of absence. The student/applicant will receive written notification of the period of extension.
- Timelines set forth herein may also be extended by mutual agreement. If the student/applicant does not agree or does not respond to the CSU’s request for a timeline extension, the CSU will respond to the complaint/appeal within the timelines set forth in this executive order. In that event, the response will be interim in nature as it will be based upon the information available at the time. The interim response will note that the investigation/review is continuing until the CSU is satisfied its duty to respond appropriately to the allegation(s) has been discharged. The interim response should include a summary of the allegations, a description of the investigative/review process, and should also provide the student/applicant with an anticipated date of completion of the investigation/review, whereupon the final response will be issued.
Regulation - Campus Climate

Tolerance, Respect and Understanding

As members of a university community it is our responsibility to advocate tolerance, respect and understanding at a level above that which is minimally required of us by law. While SJSU has largely succeeded in creating a diverse campus community, it must also actively promote a civil campus climate. This may require changes in attitudes and behaviors as we develop our common bonds.

Several of the convictions that might help us as members of an educational institution create these bonds are:

- Respect for the individual: In recognition of individual uniqueness and value, whether as students, faculty, staff or administrators, it is our commitment to discourage appropriately any actions, behaviors, communication or programs that erode this fundamental concern for the individual.
- Commitment to issue and problem resolution: It is the intent of the university to recognize the process of problem and issue resolution as integral to the successful achievement of its mission. SJSU is committed to addressing problems and issues in a responsive, equitable and timely manner.
- Open communication and feedback: The university endorses and supports an environment of open communication and feedback. In support of this principle, the university will develop internal programs to educate, evaluate and provide feedback to support the growth process, including the growth of community and civility.

Regulation - Disability

The California State University does not discriminate on the basis of disability in admission or access to, or treatment or employment in, its programs and activities. Federal laws, including sections 504 and 508 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, as amended, and various state laws prohibit such discrimination. The Office for Equal Opportunity has been designated to coordinate the efforts of SJSU to comply with all relevant disability laws. Inquiries concerning compliance may be addressed to this office at 408-924-1115.

Regulation - Racial Incidents at Educational Institutions

Federal Statute and Guidelines on Handling Racial Incidents at Educational Institutions

Title VII of the Civil Rights Act of 1964 is enforced by the U.S. Department of Education’s Office for Civil Rights issued guidelines for educational institutions receiving federal assistance to follow in handling “Racial Incidents and Harassment Against Students at Educational Institutions.” These guidelines clarify conduct that violates Title VI:

- “Under Title VI of Civil Rights Act of 1964 (Title VI) and its implementing regulations, no individual may be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination on the ground of race, color or national origin under any program or activity that receives federal funds. Racially based conduct that has such an effect and that consists of different treatment of students on the basis of race by agents or employees, acting within the scope of their official duties, violates Title VI. In addition, the existence of a racially hostile environment that is created, encouraged, accepted, tolerated or left uncorrected … also constitutes different treatment on the basis of race in violation of Title VI.”

These same Title VI guidelines further define a “racially hostile environment” as harassing conduct (e.g., physical, verbal, graphic or written) that is sufficiently severe, pervasive or persistent so as to interfere with or limit the ability of an individual to participate in or benefit from the services, activities or privileges provided.

Regulation - Race, Color, Ethnicity, National Origin, Age, Genetic Information, Religion and Veteran Status

The California State University does not discriminate on the basis of race, color, ethnicity, national origin, age, genetic information, religion or veteran status in its programs and activities, including admission and access. Federal and state laws, including Title VI of the Civil Rights Act of 1964 and the California Equity in Higher Education Act, prohibit such discrimination. The Director of Compliance has been designated to coordinate the efforts of San José State University to comply with all applicable federal and state laws prohibiting discrimination on these bases. Inquiries concerning compliance may be presented to this person at 408-924-1200 or the Office for Equal Opportunity, UPD 303, 408-924-1115.
Regulation - Retaliation Protection

SJSU policies prohibit retaliation against persons who file a complaint of discrimination, or assist with or participate in an SJSU or government agency investigation, proceeding or hearing concerning discrimination complaint. Retaliation complaints can be separately filed in the Office for Equal Opportunity, 408-924-1115. Or go to www.sjsu.edu/hr for more information.

Regulation - ROTC Recruiting

This notice is to inform you that San José State University hosts the Air Force Reserve Officers Training Corps program on campus solely in compliance with the federal requirements contained in The Solomon Amendment. This law, passed as an attachment to the FY97 Federal Appropriations Bill, allows the government to deny federal funding, including federal student aid, to any school that does not provide access to ROTC programs and military recruiters on its campus.

San José State University is guided by the principle of equal opportunity, including the conviction that there will be no differential treatment or harassment of persons because of race, color, religion, national origin, age, sex, marital status, pregnancy, disability, veteran’s status, or sexual orientation. The university has a firm and unambiguous commitment to the active elimination of discrimination, and the affirmative recruitment of a diverse, multi-racial community of students, faculty and staff.

Regulation - Sex/Gender/Gender Identity/Gender Expression/Sexual Orientation

The California State University does not discriminate on the basis of sex, gender, gender identity, gender expression or sexual orientation in its programs and activities, including admission and access. Federal and state laws, including Title IX of the Education Amendments of 1972, prohibit such discrimination. Director of Compliance has been designated to coordinate the efforts of San José State University to comply with all applicable federal and state laws prohibiting discrimination on these bases. Inquiries concerning compliance may be presented to this person at 408-924-1200 or the Office for Equal Opportunity, UPD 303, 408-924-1115. The California State University is committed to providing equal opportunities to male and female CSU students in all campus programs, including intercollegiate athletics.

Title IX of the Education Amendments of 1972 protects all people regardless of their gender or gender identity from sex discrimination, which includes sexual harassment and violence:

• Sexual discrimination means an adverse act of sexual discrimination (including sexual harassment and sexual violence) that is perpetrated against an individual on a basis prohibited by Title IX of the Education Amendments of 1972, 20 U.S.C. §A71681 et seq., and its implementing regulations, 34 C.F.R. Part 106 (Title IX); California Education Code §A766250 et seq., and/or California Government Code §A711135.

• Sexual harassment is unwelcome conduct of a sexual nature that includes, but is not limited to, sexual violence, sexual advances, requests for sexual favors, indecent exposure and other verbal, nonverbal or physical unwelcome conduct of a sexual nature, where such conduct is sufficiently severe, persistent or pervasive that its effect, whether or not intended, could be considered by a reasonable person in the shoes of the individual, and is in fact considered by the individual, as limiting the individual’s ability to participate in or benefit from the services, activities or opportunities offered by the university. Sexual harassment also includes gender-based harassment, which may include acts of verbal, non-verbal or physical aggression, intimidation or hostility based on sex or sex-stereotyping, even if those acts do not involve conduct of a sexual nature.

• Sexual violence means physical sexual acts (such as unwelcome sexual touching, sexual assault, sexual battery and rape) perpetrated against an individual without consent or against an individual who is incapable of giving consent due to that individual’s use of drugs or alcohol, or disability.

Regulation - Sexual Orientation

By CSU Board of Trustee policy, the California State University does not discriminate on the basis of sexual orientation.
Regulation - Sexual Harassment Policy and Complaints

SJSU is committed to maintaining a working and learning environment free from sexual harassment for its students, employees and those who apply for employee or student status. Sexual harassment is conduct subject to disciplinary action.

CSU policy defines sexual harassment to include "such behavior as sexual advances, requests for sexual favors and other verbal or physical conduct of a sexual nature directed towards an employee, student or applicant when one or more of the following circumstances are present:

- Submission to or toleration of the conduct is an explicit or implicit term or condition of appointment, employment, admission or academic evaluation
- Submission to or rejection of such conduct is used as a basis for a personnel decision or an academic evaluation affecting an individual
- The conduct has the purpose of interfering with an employee's work performance or creating an intimidating, hostile, offensive or otherwise adverse working environment
- The conduct had the purpose or effect of interfering with a student's academic performance, creating an intimidating, hostile, offensive or otherwise adverse learning environment, or adversely affecting any student.

All complaints dealing with sexual harassment should be directed to the Director, Office for Equal Opportunity, who has been designated to investigate such allegations.

SJSU Policies

San José State University does not discriminate on the basis of accent, age, ancestry, citizenship status, color, creed, disability, ethnicity, gender, genetic information, marital status, medical condition, national origin, race, religion or lack thereof, sex, sexual orientation, transgender, or veteran’s status. This policy applies to all SJSU students, faculty and staff programs and activities. Title IX of the Education Amendments of 1972, and certain other federal and state laws, prohibit discrimination on the basis of sex in all education programs and activities operated by the university (both on and off campus). Questions regarding this policy should be directed to the Office for Equal Opportunity, 408-924-1115
Title IX Coordinator

SJSU does not discriminate on the basis of sex in the educational programs and activities it conducts. Such programs and activities include admission of students and employment.

Inquiries and complaints concerning the application of Title IX to programs and activities of SJSU may be referred to the Director of Compliance, SAB 106, 408-924-1200 or the Office for Equal Opportunity, UPD 303, 408-924-1115.
Health Policies

Regulation - Health Risks

Federal Law requires the university to provide a description of health risks associated with alcohol and drug abuse.

Regulation - Alcohol

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low to moderate doses of alcohol also increase the incidence of a variety of aggressive acts. Moderate to high doses of alcohol caused marked impairments in higher mental functions, severely altering a person’s ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described. Repeated use of alcohol can lead to dependence and addiction. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations and convulsions. Addictions often require medical support. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and liver.

Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics.

California Alcohol and Drug Abuse Law

The Alcoholic Beverage Control Act was enacted in 1953. This Act is intended to protect the safety, welfare, health, peace and morals of Californians, eliminate the unlicensed and unlawful manufacture, sale and disposal of alcoholic beverages and promote temperance in the consumption and use of alcoholic beverages. (Bus and Prof. Code 23001)

A person convicted of a violation of the Alcohol and Beverage Control Act is guilty of a misdemeanor or felony depending on the violation.

The Uniform Controlled Substances Act may be found in the Health and Safety Code, Section 11000-11651. This Act is the result of a growing concern over substances. Controlled Substances are divided into five Schedules and the substances under each Schedule may be found in Sections 11053-11058.

Local Laws

Local laws generally are consistent with Federal and State laws.

University Regulations

University regulations controlling student behavior may be found in the California Code of Regulations, Title V, Education, Section 41301. The Campus Alcohol Policy includes procedures for serving alcoholic beverages on campus.

The University is required to post in designated areas information concerning the use of anabolic steroids.

Conduct Regarding Drugs and Alcohol

SJSU students, faculty and staff are expected to comply with Federal, State and Local laws governing the use of alcohol and illicit drugs on the University campus and as part of university activities both on and off the campus. These laws control the possession, use and distribution of alcohol and unlawful drugs.

The sale, possession, distribution or use of illicit drugs will not be tolerated. Students, faculty and staff are expected to comply with laws governing the possession, distribution and consumption of alcohol as promulgated by the State of California and the university.

It is the responsibility of every student, faculty member and employee to report incidents involving infractions of federal, state and local drug and alcohol laws on campus or at officially sponsored Off-Campus Activities to the Executive Vice President for Faculty Affairs, the Human Resources Officer or the Vice President for Student Affairs.

As is the case in courts, lack of awareness and/or failure to comprehend the regulations are not acceptable defense of one’s actions.
Available Drug or Alcohol Counseling and Treatment Programs

SJSU students are encouraged to seek assistance for drug and alcohol problems at the Counseling Services Department or at the Student Health Center. The State also maintains an Employee Assistance Program to help employees and their dependents with problems of alcohol and drugs.

Regulation - Federal Trafficking Penalties

Federal penalties for trafficking are dependent upon several conditions including the substance, amounts involved and whether the matter is a first or second offense.

Penalties involve monetary sanctions and/or prison terms up to and including life in prison.

Federal Penalties and Sanctions For Illegal Possession Of A Controlled Substance 21 U.S.C. 844(a) - 1st conviction: Up to 1 year imprisonment and fined at least $1,000 but not more than $100,000 or both.

After 1 prior drug conviction: At least 15 days in prison, not to exceed 2 years and fined at least $2,500 but not more than $250,000 or both.

After 2 or more prior drug convictions: At least 90 days in prison, not to exceed 3 years and fined at least $5,000 but not more than $250,000 or both.

Special sentencing provisions for possession of crack cocaine: Mandatory at least 5 years in prison, not to exceed 20 years and fined up to $250,000 or both if:
- 1st crack conviction and the amount of crack possessed exceeds 5 grams.
- 2nd crack conviction and the amount of crack possessed exceeds 3 grams.
- 3rd or subsequent crack conviction and the amount of crack possessed exceeds 1 gram.

21 U.S.C. 853(a)(2) and 881(a)(7) - Forfeiture of personal and real property used to possess or to facilitate possession of a controlled substance if that offense is punishable by more than 1 year imprisonment.

21 U.S.C. 881(a)(4) - Forfeiture of vehicles, boats, aircraft or any other conveyance used to transport or conceal a controlled substance.

21 U.S.C. 844a - Civil fine of up to $10,000 (pending adoption of final regulations).

21 U.S.C. 853a - Denial of Federal benefits, such as student loans, grants, contracts and professional and commercial licenses, up to 1 year for first offense, up to 5 years for second and subsequent offenses.

18 U.S.C. 922(g) - Ineligible to receive or purchase a firearm.
**Regulation - Tobacco**

The dangers of smoking are well documented:

- Tobacco, both smoked and smokeless, is the leading cause of cancers of the cheeks, gums, palate, tongue and lips.
- A one-pack-a-day smoker increases his/her chances of cancer of the esophagus by as much as 500%.
- Cigarette smokers are ten times more likely to die of lung cancer than non-smokers.
- Cancer is not the only disease associated with smoking.
- Cigarette smokers are twice as likely to get peptic ulcers as are non-smokers.
- Nicotine is a powerful constrictor of blood vessels and small arteries and results in the restriction of oxygen flow to the heart and elsewhere.
- Heart attacks and strokes are results of oxygen restriction.
- Smoking more than 1/2 pack daily is also associated with higher incidence of infertility in women.
- Babies born to women who smoke are lighter and smaller than those born to non-smokers. This is important because birth weight is a predictor of infant health.

For tobacco cessation services, contact:

**Student Health Center**

408-924-6122 (appointment line)

www.sjsu.edu/wellness/

**Regulation - Human Immunodeficiency Virus (HIV)/Acquired Immune Deficiency Syndrome (AIDS)**

HIV/AIDS is a viral disease which destroys the body’s ability to fight specific illnesses.

The risks of HIV/AIDS can be reduced by:

- Avoiding the exchange of body fluids. HIV can be passed through the exchange of blood, semen, vaginal secretions and breast milk.
- Using condoms correctly and consistently to greatly reduce the exchange of body fluids.
- Reducing the number of sexual partners.
- Avoiding the use of intravenous drugs or sharing needles.
- Abstinence.
- Communicating with sexual partners before having sex about being tested for sexually transmitted infections and protection.

Privacy Rights Of Students In Education Records

The federal Family Educational Rights and Privacy Act of 1974 (20 U.S.C. 1232g) and regulations adopted thereunder (34 C.F.R. 99) set out requirements designed to protect students' privacy in their records maintained by the campus. The statute and regulations govern access to certain student records maintained by the campus and the release of such records. The law provides that the campus must give students access to most records directly related to the student, and must also provide opportunity for a hearing to challenge the records if the student claims they are inaccurate, misleading, or otherwise inappropriate. The right to a hearing under this law does not include any right to challenge the appropriateness of a grade determined by the instructor. The law generally requires the institution to receive a student's written consent before releasing personally identifiable data about the student. The institution has adopted a set of policies and procedures governing implementation of the statute and the regulations. Copies of these policies and procedures may be obtained at (designate location on campus). Among the types of information included in the campus statement of policies and procedures are: (1) the types of student records maintained and the information they contain, (2) the official responsible for maintaining each type of record, (3) the location of access lists indicating persons requesting or receiving information from the record, (4) policies for reviewing and expunging records, (5) student access rights to their records, (6) the procedures for challenging the content of student records, (7) the cost to be charged for reproducing copies of records, and (8) the right of the student to file a complaint with the Department of Education. The Department of Education has established an office and review board to investigate complaints and adjudicate violations. The designated office is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, D.C. 20202-5920.

The campus is authorized under the Act to release “directory information” concerning students. “Directory information” may include the student’s name, address, telephone listing, electronic mail address, photograph, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, grade level, enrollment status, degrees, honors, and awards received, and the most recent previous educational agency or institution attended by the student. The above-designated information is subject to release by the campus at any time unless the campus has received prior written objection from the student specifying what information the student requests not be released. Written objections should be sent to the Registrar's Office. It should be noted, however, that university policy S66-20 is more restrictive than the law. SJSU policy guidelines indicate that the only directory information routinely released to outside parties without student consent is enrollment status and degree completion (if applicable). Requests for addresses and telephone numbers are not honoured, especially if requested for commercial purposes.

The campus is authorized to provide access to student records to campus officials and employees who have legitimate educational interests in such access. These persons have responsibilities in the campus’s academic, administrative or service functions and have reason for accessing student records associated with their campus or other related academic responsibilities. Student records may also be disclosed to other persons or organizations under certain conditions (e.g., as part of the accreditation or program evaluation; in response to a court order or subpoena; in connection with financial aid; or to other institutions to which the student is transferring).

University Development (Advancement) Programs

Directory information (see definition earlier) may be used by the university for the development of campus affiliated programs.

Regulation - Career Placement Information

The Career Center may furnish, upon request, information about the employment of students who graduate from programs or courses of study preparing students for a particular career field. Any such data provided must be in a form that does not allow for the identification of any individual student. This information includes data concerning the average starting salary and the percentage of previously enrolled students who obtained employment. The information may include data collected from either graduates of the campus or graduates of all campuses in the California State University system.
Regulation - Student Identification Information

SJSU ID Number

San José State University is concerned about keeping your personal data private. We are required to use Social Security numbers to process payroll; award financial aid and document fees paid for tax relief purposes. However, for all other purposes, we will use your SJSU ID number for identification, rather than your Social Security Number.

Use of Social Security Number

Applicants are required to include their correct social security numbers in designated places on applications for admission pursuant to the authority contained in Section 41201, Title 5, California Code of Regulations, and Section 6109 of the Internal Revenue Code (26 U.S.C. 6109). The university uses the social security number to identify students and their records including identification for purposes of financial aid eligibility and disbursement and the repayment of financial aid and other debts payable to the institution. Also, the Internal Revenue Service requires the university to file information returns that include the student’s social security number and other information such as the amount paid for qualified tuition, related expenses, and interest on educational loans. This information is used by the IRS to help determine whether a student, or a person claiming a student as a dependent, may take a credit or deduction to reduce federal income taxes.
Campus and Information Resources

Accessible Education Center (AEC)

formerly the Disability Resource Center

The AEC facilitates the delivery and referral of academically related services for students with disabilities. Students who register and create a confidential file with the AEC can receive a wide spectrum of services based on individualized needs. It is recommended that students make an appointment to register with the AEC prior to registering for classes; however, students can register any time during the semester with the AEC. Services include, but are not limited to the following:

Academic Advising
Advising is available for the selection of courses and educational planning. Please note that all major advising is provided by advisors in the major departments.

Center for Accessible Technology (CAT)
Students registered with the AEC receive one-on-one and small group training in the use of adaptive software and hardware.

Curriculum Accommodations
An array of academically related services is provided on a case-by-case basis for students with verified disabilities to support curriculum requirements. Accommodations include but are not limited to: adaptive technology, alternative media, notetaking, sign language interpreters and test accommodations.

Deaf and Hard of Hearing (DHOH)
The DHOH Program provides Educational Sign Language Interpreters or Real-Time Educational Captioners for students who are Deaf or Hard of Hearing. Eligibility for this service is determined by the Deaf Services Coordinator and is based in part on the professional documentation provided by the student.

Disabled Parking Permits
The AEC does not issue temporary disabled parking permits. For more information see www.sjsu.edu/aec/services-at-a-glance/disabled-parking

Registration Priority
All students registering with the AEC will be considered for priority registration based on disability-related criteria and is determined on a case-by-case basis. It is recommended that students register with the AEC as soon as possible after applying to SJSU.

Counseling Services

A professionally trained, multi-culturally sensitive staff provides confidential counseling services to enrolled SJSU students. Responding to the many pressures and demands facing students at different times, Counseling Services offers psychological and educational counseling, groups and workshops, crisis counseling, referral and consultation services, training of practicum and intern students, and outreach presentations. The private offices in Counseling Services support an atmosphere of safety and confidentiality between a counselor and a student. Enrolled SJSU students pay a mental health fee each semester, thus no additional fees are charged for services.

Personal/Psychological Counseling

Counselors can work with you to improve your mood, decrease your anxiety, increase your skills in handling stress, improve your skills in relationships, and help you make better decisions. Our professional staff includes licensed psychologists, social workers, and marriage family therapists. We also have a psychiatrist available for medication consultations.

Educational Counseling

Would you like help with: Adjusting to the university environment and academic expectations? Improve your study skills? Choosing a major? Increase your academic performance? There are many reasons why students come in for educational counseling. Educational counselors can problem-solve complex, sensitive issues that may be interfering with your ability to achieve academic success.

Each semester Spartan Success workshops and numerous groups are offered to help students become more successful at SJSU. For a complete listing of these with times and dates, please see: www.sjsu.edu/counseling/

Outreach Service

Our professional counselors offer a variety of presentations on topics of interest to campus organizations and student groups free of charge.

Financial Aid and Scholarships

The Financial Aid and Scholarships Office awards federal, state and local grants, loans and scholarships. Start by filing the federal Free Application for Federal Student Aid (FAFSA) at www.fafsa.gov. Eligible AB540 students (undocumented immigrant status) may qualify for state grant programs by completing the CA Dream Application at www.caldreamact.org. The priority deadline is March 2 of every year. You must apply every year to be considered for financial aid for the following academic year. By completing the process, we establish your financial need. Need is the difference between a typical student budget and what you and your family are expected to pay. Aid is awarded via:

Grants: Since grants generally do not have to be repaid, grants typically are awarded to undergraduate students with the greatest need. SJSU distributes the Federal Pell Grants, Federal Supplemental Educational Opportunity Grants (SEOG), Teacher Education Assistance for College and Higher Education (TEACH) Grant; California Grants A, B; the State Graduate Fellowship, Educational Opportunity Program (EOP), Graduate Professional Business Grant and the State University Grants.

Loans: Loans can be helpful, but they must be repaid. If you must borrow, limit the amount to what you really need. It may seem nice now, but you will be repaying the funds, with interest, after you leave school. SJSU awards the following loan types: Federal Perkins Loan and the Kuhlman Loan, a loan program funded from the estate of a generous alumna. Also, loans are awarded through the federal government for the Federal Direct Stafford Subsidized and Unsubsidized Loans and Federal Plus Loans (for parents of college students). In addition, graduate students are eligible to borrow through the Federal Graduate Plus Loan Program.

Scholarships: Apply online at http://scholarships.sjsu.edu/. The Scholarship Office has information to assist you with your scholarship search.

Work Study: Rather than take loans, the Federal Work-Study program allows students to work part-time while learning job skills. There are both on-campus and off-campus job listings for qualified students.

Fee Deferrals: Once you have submitted all requested documents, a fee deferral will be assigned to your record to hold your classes and delay the payment of registration fees while your financial aid process is completed. To prevent enrollment cancellation, it is your responsibility to submit all requested documents prior to the scheduled fee payment deadline. Be sure to monitor your account at MySJSU for file status changes and “To Do” items. Financial Aid fee deferrals are temporary and are issued once all requested financial aid documents are submitted.

Financial Assistance

The following information concerning student financial assistance may be obtained from the Director of Financial Aid and Scholarships, Student Services Center, 408-283-7500:

A description of the federal, state, institutional, local, and private student financial assistance programs available to students who enroll at San José State University;

For each aid program, a description of procedures and forms by which students apply for assistance, student eligibility requirements, criteria for selecting recipients from the group of eligible applicants, and criteria for determining the amount of a student’s award;

A description of the rights and responsibilities of students receiving financial assistance, including federal Title IV student assistance programs, and criteria for continued student eligibility under each program;

The satisfactory academic progress standards that students must maintain for the purpose of receiving financial assistance and criteria by which a student who has failed to maintain satisfactory progress may reestablish eligibility for financial assistance;

The method by which financial assistance disbursements will be made to students and the frequency of those disbursements;

The terms of any loan received as part of the student’s financial aid package, a sample loan repayment schedule, and the necessity for repaying loans;

The general conditions and terms applicable to any employment provided as part of the student’s financial aid package;

The responsibility of San José State University for providing and collecting exit counseling information for all student borrowers under the federal student loan programs; and

The terms and conditions for deferral of loan payments for qualifying service under the Peace Corps Act, the Domestic Volunteer Service Act of 1973, or comparable volunteer community service.

Health Services

The Student Health Center provides quality, convenient, affordable medical care and health promotion to any registered SJSU student. Most costs are already covered by your registration fees. When in doubt ask any SHC staff member if your visit/service will have any associated charges.

Information concerning the prevention of drug and alcohol abuse and rehabilitation programs may be obtained from the Director of Student Health Center, 408-924-6122.

Information regarding facilities and services available to students with disabilities may be obtained from the Director of the Disability Resource Center, 408-924-6000.

The federal Military Selective Service Act (the “Act”) requires most males residing in the United States to present themselves for registration with the Selective Service System within thirty days of their eighteenth birthday. Most males between the ages of 18 and 25 must be registered. Males born after December 31, 1959, may be required to submit a statement of compliance with the Act and regulations in order to receive any grant, loan, or work assistance under specified provisions of existing federal law. In California, students subject to the Act who fail to register are also ineligible to receive any need-based student grants funded by the state or a public postsecondary institution. Selective Service registration forms are available at any U.S. Post Office, and many high schools have a staff member or teacher appointed as a Selective Service Registrar. Applicants for financial aid can also request that information provided on the Free Application for Federal Student Aid (FAFSA) be used to register them with the Selective Service. Information on the Selective Service System is available and the registration process may be initiated online at www.sss.gov.
Library

The Dr. Martin Luther King, Jr. Library, an innovative collaboration that integrates the collections, services and staffs of two major institutions: The SJSU University Library and the San José Public Library is a unique learning and community center where the entire Silicon Valley Community—students, faculty, and residents—can learn for life. The combined collections include more than 1.5 million items and the building houses 33 delightful public art installations.

Pre-Professional Study

Several sources of information and assistance are available for students who plan to enter the professions of art administration, dentistry, medicine, law, pharmacy, optometry, veterinary medicine, physical therapy, social work and theology. General information, including names and locations of faculty members who have been designated as “pre-professional” advisors, may be obtained from the appropriate academic department office. Interested students should also contact the university of their choice for information regarding the professional prerequisites for that institution. Consultants are available at the Career Center to discuss possible career paths. Application forms for admissions tests to law school, medical school and dental school are available in the Testing Office.

Student associations in pre-law, pre-medicine and pre-dentistry conduct active programs which include information about admission to professional schools, test preparation and seminars/workshops in the profession.

Pre-Law Programs

Students planning to attend law school and pursue careers in law should be aware that no major has a special advantage in preparing them to compete on the Law School Admission Test or for admission into even the most prestigious law schools. The American Bar Association emphasizes this point in its publication Law as a Career: “An undergraduate should be aware that there is no particular course of study that is required or preferred by law schools. Accordingly, students from a wide variety of majors (e.g., philosophy, physics, political science, engineering, and business) are admitted to law schools each year. There is no true prelaw curriculum. Generally, a broad-based education that is rigorous and that stresses analytical and verbal communication skills will be useful.”

Students with undergraduate degrees in the humanities and the arts as well as the social, health, and natural sciences are consistently successful in achieving competitive scores on the LSAT and in obtaining admission to law schools of distinction.

However, students should keep in mind that successful pursuit of a career in law depends on skills acquired only through particular kinds of courses. The Law School Admission Council’s Official Guide to U.S. Law Schools explains: “While no single curricular path is the ideal preparation for law school, you should choose courses that sharpen analytical reasoning and writing skills. Law schools prefer students who can think, read, and write well, and who have some understanding of what shapes human experience.”

Students considering careers in law should consult regularly with a pre-law faculty advisor. The number and kind of courses that prepare students for law can be offered by a variety of departments. It is therefore important that students consult with a faculty member familiar with the curricular choices that best align student aspirations with law school expectations. A faculty advisor can also provide valuable information concerning law school and law careers that will not be acquired through any set of courses. The following departments offer pre-law advising: Justice Studies, Philosophy, Political Science. A further resource for students considering a career in law is the Law School Advisor provided by Student Services.
Pre-Medical Programs

Medical schools do not require any specific major. While many applicants major in biology or biochemistry, the admission rate is quite good for non-science majors because these graduates will have shown strength in two academic areas. At a minimum, applicants must complete during their college years two years of major chemistry with lab, physics with lab, math through calculus, one year of English composition, and one year, preferably two, of biology with lab. Students interested in any medical field should get as much hands-on experience as possible volunteering or working in medical settings so that they fully understand how physicians and other health professionals spend their time. There are pre-medical advisors in Biological Sciences and in Chemistry; consult them early and often.

Service Learning

In March 2000, the California State University Board of Trustees passed a landmark resolution in response to a request from the governor for a community service requirement for all students in California’s public institutions of higher education. The CSU Board of Trustees’ resolution called for the chancellor and each CSU president to “ensure that all students have opportunities to participate in community service, service learning (deemed academically appropriate by faculty), or both.”

To learn more about general education service learning classes, courses in your major, or other service-based leadership opportunities for students, contact the Center for Community Learning and Leadership.

Facilities Unique to SJSU

Africana Center functions both as a library resource center and a community center, with the goals of scholarship, leadership, and community responsibility about and for Africana people, a term that refers to all people of African descent. The Africana Center supports and sponsors programs and scholarship specific to Africana life, history and culture.

Art Foundry, located one mile south of campus, provides facilities for casting and fabricating large-scale sculptures in bronze, aluminum, iron and steel as well as work in stone and other materials.

Asian American Resource Center is a place to study, research, gather and connect to SJSU. Community members bridge the gap between SJSU and the rich history and contributions of Asian-Americans to this region.

Aviation Facility provides hands-on aviation operation and maintenance experience from its classroom, laboratory and hanger facility at San José.

Biological Sciences Research Collections include entomology, herpetology, vertebrate and invertebrate museums and the Carl Sharsmith Herbarium.

Chicano Resource Center provides a single locus for books, periodicals, reference tools, pamphlets and clippings relating to Mexican-American history, culture and community.

Electro-Acoustical Studios offer undergraduate music students access to digital synthesizers.

Engineering Laboratories are state-of-the-art, the result of a $41 million project supported by many of the nation’s leading high technology corporations.

Phyllis Forward Simpkins International House is a large residence hall, located one block from campus, that is home to overseas and U.S. students interested in widening their international experience.

College of International and Extended Studies Building houses International Gateways in a classroom and computer lab complex two blocks southwest of campus.

Journalism Laboratories include the newsroom and advertising offices of the Spartan Daily, the studios of television’s Update News, and the production room of the student magazine, Access, that provide applied experience in specific media

Moss Landing Marine Laboratories provides access to the geologically and biologically important Monterey Bay Canyon and to some of the world’s richest ocean and salt marsh research areas. The laboratories are served by the deep-sea research ship Point Sur.

Nuclear Science Laboratory is the only radiochemistry lab in the Western World available for both graduate and undergraduate classes.

Science Education Resource Materials Center makes available to student teachers educational aids for science classes, including live fauna and geological models.

Speech and Hearing Center is an on-campus multilingual audiology and speech pathology community clinic.

Timpany Center is owned by Santa Clara County and operated by the Department of Kinesiology in collaboration with other schools/departments within the College of Applied Sciences and Arts to provide internships/research opportunities in health and physical activity for those with disability, older populations, and the obese.
Colleges

Applied Sciences and Arts, College of

The College of Applied Sciences and Arts provides both liberal and well-defined professional education at the undergraduate and graduate levels. Course work prepares students to be competent and transformative professionals in a technologically complex and culturally diverse society. The college’s courses and programs provide students with a theoretical base that is developed and tested through: (1) research; (2) knowledge that can be applied in diverse systems; (3) processes that incorporate human understanding, social justice and cooperation, and (4) supervised practice through internships, field work and/or preceptorships in a variety of career-related settings. Graduates become leaders and establish professional careers as administrators, educators, practitioners, information specialists and applied researchers in a variety of settings. These settings include both private and public agencies, government institutions at all levels, community and health care organizations and educational institutions. The College of Applied Sciences and Arts values and respects diversity, inclusion, civility and individual uniqueness; we recognize the strength these factors bring to our community and learning environment. All of our interactions should reflect trust, caring and mutual respect. We value education and intellectual curiosity above all. The academic freedom of faculty and students is vital to our role of promoting life-long learning through intellectual inquiry, scholarship and the pursuit of knowledge. An overarching goal for 2013 is that faculty and our academic programs will be recognized for outstanding research, teaching and service across disciplinary and geographic boundaries.

Internships

The departments/schools within the College offer internships that involve advanced practical experience, fieldwork or clinical experience in a professional work setting under direct supervision of qualified professionals. Interns would be assigned various duties and experiences related to their particular areas of specialization. Internships may include seminars, practica or preceptorships to further develop beginning and advanced level practice skills.

Teaching Credential Programs

The Department of Kinesiology, in collaboration with the College of Education, provides two single subject professional programs designed for individuals who are interested in teaching physical education or adapted physical education in grades K-12. The California School Nurse Credential prepares Registered Nurses at the Master’s and Post Master’s level to provide and manage health services and programs in the school setting. The School of Library and Information Science offers a Teacher Librarian Credential. The teacher librarian impacts K-12 student outcomes by collaborating with teachers, working directly with students, championing reading and providing information-rich learning environments.

Organized Research Units and Unique Programs

The programs of the College of Applied Sciences and Arts are further enriched by educational, research, global partnerships, as well as cultural and training opportunities provided by the following specialized research units and unique programs: Institute of Nursing Research and Practice, Center for International Sport and Human Performance, Research Institute for Foster Youth Initiatives (RIFYI), Timpany Center, The Center for Research on Effective Services (CRES), and the Center for Healthy Aging in Multicultural Populations (CHAMP).

Business, College of

The College of Business is the institution of opportunity, providing innovative business education and applied research for the San José region since 1928. The College offers an accessible, high value education that empowers people of all ages and backgrounds to transform their lives. Faculty and staff are strongly committed to the College’s mission; maintain a collegial, inclusive teaching and learning environment; and are dedicated to continuous improvement in all areas of academic achievement, scholarship, teaching and service.

The college is an active member of the San José and Silicon Valley community and provides a talent pool, thought leadership and service that supports the region’s growth in the global marketplace. The college is one of the 500 institutions worldwide that are accredited by the prestigious AACSB International, the Association to Advance Collegiate Schools of Business. In addition, the college is accredited by the Western Association of Schools and Colleges and the California State Board of Education.

The college is dedicated to equipping graduates with the tools, work ethic and skills to succeed in the ever-changing global economy. This is accomplished through a challenging undergraduate curriculum and an innovative, high quality graduate education in the Donald and Sally Lucas Graduate School of Business.
Undergraduate Business Education

The college provides a rich undergraduate education through four departments - Accounting and Finance, Management Information Systems, Organization and Management, and Marketing and Decision Sciences. Infused throughout the undergraduate program are opportunities to develop competencies in a number of key areas -- communication, teamwork, global perspectives, critical thinking, ethics, entrepreneurship, community service, and innovation. The rigorous and challenging curriculum prepares graduates to be future leaders that succeed in the global economy.

The college is building upon its existing expertise in entrepreneurship, management, global finance, accounting, and leadership and organizational change. In addition, the college showcases the best and brightest students through the Gary J. Sbona Honors Program.

Donald and Sally Lucas Graduate School of Business

The Donald and Sally Lucas Graduate School of Business offers a high-value education with a global focus, innovative programs, and deep ties to Silicon Valley corporations and leaders. Our distinguished faculty provide a relevant business education focusing on excellence in teaching and applied research and serving the needs of diverse students from the Silicon Valley and beyond.

Our programs are designed to be flexible to meet the demands of a full-time student or a working professional. We offer four MBA and three Master of Science degrees. The full-time program includes an accelerated one-year MBA, a more traditional two-year MBA, and a Master of Science in Accountancy. Our part-time programs for working professionals includes an Executive-Style MBA, a dual-degree MBA and Master’s of Science in Engineering, a Master’s of Science in Taxation, and a Master’s of Science in Transportation Management.

Education, College of

The Connie L. Lurie College of Education is a learning community dedicated to equity and excellence. Equity initially addresses access and outcomes, and the college works to incorporate equity in action through policy and process. Excellence in a democratic society actualizes each student’s unique potential as an individual and as a member of a diverse community. Excellence involves knowledge and skills with a commitment to lifelong curiosity, imagination and learning. The result is the college’s commitment to the preparation of educators, including teachers, administrators, counselors and service providers who have the knowledge, skills, dispositions and ethics that ensure equity and excellence for all students in a culturally diverse, technologically complex global community.

The college offers bachelor’s and master’s degrees and a number of professional credentials. Programs are offered through seven academic departments which are supplemented by a variety of resources including the Armstead Center for Communication Disorders and the Child Development Laboratory Preschool. The college, housed in William Sweeney Hall, offers two computer laboratories that are open to both undergraduate and graduate students. Students also have access to other high tech education applications.

Student Service Centers

The Kay A. Armstead Center for Communication Disorders provides observation, diagnostic evaluation and clinical practicum opportunities to undergraduate students and advanced clinical practicum to graduate students.

The Richard Brandt Technology Reading Collection was dedicated to the college in 2001 and includes more than 100 titles chronicling the emergence of the technology boom.

The Child Development Laboratory Preschool is housed in two locations on the SJSU campus, including toddler and pre-school labs. These programs provide undergraduates with both observation and hands-on clinical/practicum opportunities.

The Center for Careers in Education in Sweeney Hall 107 provides prospective students information about the various professional preparation programs in education offered by the college.

The Office of Credentials and Student Services in Sweeney Hall 108 provides students with information about the California Basic Education Skills Test (CBEST), PRAXIS MSAT (Multiple Subject Assessments for Teachers), MSAT and Subject Assessments section of PRAXIS. General information on elementary (Multiple Subject), secondary (Single Subject) and specialist teaching credentials, as well as other credential and certificate programs, are available through the office.

Advisement

Advising and information related to applications are handled through the seven academic departments. These departments include Child and Adolescent Development, Communicative Disorders and Sciences, Counselor Education, Educational Leadership, Elementary Education, Secondary Education and Special Education.
Engineering, Charles W. Davidson College of

The College of Engineering offers ten engineering curricula leading to BS and MS degrees in aerospace, biomedical, chemical, civil, computer, electrical, general, industrial and systems, materials, mechanical and software engineering. The college also has BS degree programs in aviation and industrial technology and a MS degree program in quality assurance. California provides, through community colleges, the California State University and the University of California, coordinated educational programs designed to meet local and statewide needs in engineering and technology.

Engineering Student Success Center

The goal of the Engineering Student Success Center is to mentor students from admission through graduation. The Center provides academic advising, support services, and opportunities for professional development and practice.

The MESA Engineering Program and the Women in Engineering Program work to increase the number of graduates entering the engineering profession from traditionally under-represented and economically disadvantaged groups. MEP actively recruits students, provides support services until graduation and acts as liaison with companies offering employment experiences. MEP assists students with admissions, academic and personal counseling, financial aid and scholarships, housing and registration. MEP maintains a study center for tutoring, workshops, individual and group study and social functions. A summer job placement program assists students in obtaining jobs in industry.

The Community for Engineering Learning and Living (CELL) is a themed living community offered by the University Housing Services for first year engineering students. CELL’s objectives are to provide a cooperative learning environment, to encourage and build the engineering community and to foster a sense of belonging and responsibility to the community. Through facilitated study groups, CELL students will experience the academic support and cooperation of a community committed to academic success. CELL students will have regular access to faculty, advisors and industry professionals through workshops and programs. CELL is about shared experiences and creating a vibrant and caring engineering community.

Humanities and the Arts, College of

The College of Humanities and the Arts seeks to instill in students an understanding of human existence that is tolerant, moral and appreciative of human creativity as manifested in works of language and literature, the visual and performing arts, philosophy and theology, and by engagement in the creation of art and criticism.

Through its programs, the College aims to develop engaged participants in the local communities as well as in the global dimension of cultural, intellectual, and economic life. College faculty educate students for lifelong learning as well as for their first job after graduation. Building upon a foundation of excellent oral and written communication, the College helps students pursue a wide variety of paths to knowledge and careers, through specialized study in many fields, including history, philosophy, and theological studies. Courses in the College attempt to reveal the evolving aspiration toward aesthetic and intellectual power in human cultures by exposing the student to important ideas, achievements, and experiences in the humanities and the creative arts. In its many professional arts programs, the College develops the talent of those who have the skill to perform or create works of art, fixing in vivid form the values of diverse heritages. In its programs in language, literature, philosophy, and theology, the College engages students in the discovery and exploration of works from around the world that deepen understanding of how human imagination and intellect function within different historical and cultural contexts. A primary purpose of a humanities education is to develop the skills and confidence that support a creative, analytical mind capable of lifelong learning and adaptation to different contexts and opportunities.

Internships

Internships provide students with the opportunity to incorporate work experience in a professional setting as part of their academic programs. Internship representatives are available within each department.

Teaching Credential Preparation Programs

Teaching credential preparation programs are offered by the Schools of Art and Design and Music and Dance, the departments of English and Comparative Literature, Foreign Languages, Humanities (Liberal Studies and Creative Arts Programs) and Television, Radio, Film and Theatre.
International and Extended Studies, College of

The College of International and Extended Studies offers several programs that allow students to earn degree units from SJSU or to take noncredit or Continuing Education Unit programs. Take classes on campus or online - without formal admission - to take a class or two, for reinstatement to SJSU or another university, or to enroll after the regular application deadline has passed.

Science, College of

San José is at the center of Silicon Valley, known worldwide for its research institutes and industries that set the standard for scientific and technological innovation. San José State is the metropolitan university of the region, and the academic programs of the College of Science prepare students for rewarding careers through our bachelor’s and master’s level degree programs in the biological sciences, physical sciences, mathematics and computer science fields. Our departments have established partnerships with local employers where students find training and employment opportunities.

The College of Science provides the lower division core biology, chemistry, mathematics and physics courses supporting majors in other technical disciplines (such as engineering). As part of the university general education requirements, we offer courses in quantitative reasoning, the physical universe and its life forms, and earth and the environment. Furthermore, we teach the discipline-specific courses for the science and mathematics teacher credential programs.

Successful science students come from many backgrounds. Some enter the university immediately upon graduation from high school. Others, who have worked or have various life experiences, enroll as either full or part-time students in order to continue their education and better their career opportunities. The maturity, laboratory skills and experience of these students enrich our programs. We have several programs to increase the participation of women and underrepresented students in professional level science. Our College of Science Advising Center (COSAC) is available to assist students with their academic advising questions as well as to provide tutoring key science and math courses.

There are active student clubs associated with each major, several of which have won national recognition for their professional and community service activities. Club members provide mutual support and are able to network with professionals in their field.

Special Centers

The College of Science has several unique interdisciplinary instructional research centers and programs: the Biotechnology Education and Research Institute (BERI), the Masters in BioTechnology (MBT), the Master’s in Medical Product Development Management, the Clinical Lab Science program, the Center for Applied Mathematics, Computation and Statistics, the Institute for Modern Optics, the Flow Cytometry Core Facility, the W.M. Keck Facility for Chemical Research, the laboratory for Conservation Genetics, the Moss Landing Marine Laboratories, and the Nuclear Science Facility. Partially funded by external grants and contracts, these centers provide our students opportunities to participate in sponsored research projects. Cooperative programs with local industries and government laboratories are additional sources of professional experience and financial support for our science majors.

Teaching Credential Programs

Two single subject credential programs are coordinated by the College of Science, in collaboration with the College of Education. The single subject professional programs are designed for individuals who are interested in teaching science or mathematics in middle schools or high schools. The Science Education Program offers single subject credential programs in biology, chemistry, earth science and physics. The Department of Mathematics and Statistics offers a mathematics single subject credential program. The Department of Biological Sciences offers a BA, Natural Science degree designed for those who are interested in teaching in elementary schools. For detailed information, contact the appropriate program coordinator.

Through the Science Education Program, the College of Science supports the Science Education Resource Center, which provides hands-on science materials, textbooks, reference materials and technical assistance to pre-service and in-service teachers.
Social Sciences, College of

Programs in the College of Social Sciences prepare students for work and life in Silicon Valley and a rapidly changing world. Our thirteen departments provide training for careers in counseling, criminology, environmental restoration, computerized mapping, public administration, economic analysis, organizational communication, international relations, ergonomics, urban and regional planning, and countless other fields in business, government, teaching and human services. Major courses of study emphasize the contributions of the many cultures that form our community. Internships are encouraged to help students relate academic work to the opportunities and needs of this diverse region. Completion of one of our undergraduate majors also provides an excellent foundation for advanced graduate work in one of the disciplines or at a professional school such as law or business.

New technologies increasingly improve our instruction and link us to the innovative industry of our region and to the educational resources of the world, but personal interaction between students and faculty is still prized within the College of Social Sciences. Capable and interesting teachers, active student clubs and small classes provide ideal environments for learning. If you are interested in majoring in one of the social sciences, contact an advisor in one of our departments or the dean’s office.

Special Centers

The programs of the College of Social Sciences are further enriched by educational, research and training opportunities provided by the following specialized units:

Burdick Military History Project supports the study and teaching of military history through public lectures, the Veterans Oral History Project, and its specialized collection of materials relating to military history. Contact the History Department.

Center for Development of Recycling advances education, research and dissemination of information in various areas of recycling. Contact the Environmental Studies Department.

Center for Economic Education supports improvement in the teaching of economics through a multi-method approach and the dissemination of economics education materials. Contact the Economics Department.

East Asian Regional Materials and Resources Center provides information and counsel about studies in Asia, including library and audio-visual material available to teachers. Contact the History Department.

Silicon Valley Center for Global Studies (SVCGS) is a joint initiative with the College of International and Extended Studies. It develops and disseminates knowledge from research on globalization, especially related to population migration.

Survey and Policy Research Institute (SPRI) is a research organization that carries out survey and policy research for the SJSU campus, government, non-profit agencies, and business clients.

Sourisseau Academy promotes better understanding and appreciation of California’s state and local history, with emphasis on the history of Santa Clara Valley, through graduate scholarships and collections of historical source materials. Contact the History Department.

Teaching Credential Programs

Teacher preparation programs are administered by the Director of Social Science Education within the College of Social Sciences. Both multiple subject and single subject programs are offered. The Environmental Studies Department also offers a multiple subject program, and the Communication Studies Department cooperates with the English Department to prepare students for the single subject credential in English. Contact these departments for details.
Graduate Studies and Research

Special Graduate Programs

The Associate Vice President for Graduate Studies and Research administers the Interdisciplinary Studies program.

Interdisciplinary Studies Major

The Interdisciplinary Studies Major for either a Master of Arts or a Master of Science degree provides an alternative for individuals whose desired study plans do not fit the degree offerings of any single existing degree program on campus. In most cases, a thesis is required for this degree. Applicants or graduate students in other majors who wish to undertake the Interdisciplinary Studies major should consult the Graduate Studies & Research website at www.sjsu.edu/gradstudies/docs/interdisciplinary_studies_guide.pdf to obtain the Guide for Interdisciplinary Studies Majors. The guide contains the Proposal for Interdisciplinary Studies Major, which must be completed to obtain initial approval by the Associate Dean of Graduate Studies & Research to be able to enter the program.

### Academic Requirements Report

The Academic Requirements Report (Formerly: Degree Progress Report), linked at your MySJSU account, allows matriculated students, advisors, and evaluators to determine what requirements a student has satisfied and what requirements are still needed. The progress report matches academic requirements (university and major) against a student’s individual academic record.

The report is a valuable tool in tracking your degree requirements, as well as an advising tool to assist you and your advisor in monitoring your academic progress. You should consult with your major advisor on a regular basis.

Official verification of completion of your degree requirements will be processed by the Graduation Evaluators.

### Admission Counseling

- No appointments are needed. Students are seen on a first-come, first-serve basis
- All applicants: use access information sent to you by the Admissions office.
- Apply online at www.csumentor.edu for undergraduate and graduate admission.
- Receive information on admission requirements and information on majors offered at SJSU.
- Get help with questions about the undergraduate admission process or about your admission status.
- For campus tours, by appointment only, please go to www.sjsu.edu/visit or call the Welcome Center at 408-924-2786.
- Pick up campus directions and self-guided tour map.
- Pick up forms for Step-to-College, SJSU’s concurrent enrollment program for high school students.

Peer Connections
Peer Connections offers a range of services to assist students in developing their full academic potential. Peer Connections’ tutorials and workshops are designed to guide students in developing critical thinking skills, independent learning strategies and effective study habits. All services at the Center are available free of charge to matriculated students enrolled in SJSU courses. Peer Connections’ offerings include:

- Individual and group tutoring in many General Education (GE) courses taught at the university
- Writing tutorials and workshops in such areas as sentence structure, organization, grammar usage, and self-editing skills
- Skills development workshops
- Writing Skills Test (WST) preparation
- Computer Lab
- Appointments and drop-in services

Exploratory Course
Students who have not decided upon a major, are encouraged to avail themselves of the following course designed to aid them in assessing their abilities and goals and in formulating a decision in their ultimate choice of a major.

EDCO 004. Personal, Academic and Career Exploration
Concepts and applications of personal decision-making. Introduction to life-span human development concepts through the use of self-assessment instruments and procedures. Orientation to San José State University.

GE: E
3 units.
**Academic Success Center (ASC)**

The Academic Success Center (ASC) in Clark Hall is a 10,000 square-foot facility dedicated to enhancing student learning and academic quality. As a key part of the university’s Vision 2010 strategic initiative, the ASC is a nexus of student services and support designed to promote academic innovation and success. The ASC includes a 3,000 square-foot computer learning stage. For more information on ASC, visit: [http://www.sjsu.edu/asc/](http://www.sjsu.edu/asc/).

**Academic Counseling Center for Excellence in the Social Sciences (ACCESS)**

Academic Counseling Center for Excellence in the Social Science (ACCESS) is the new student success center for the College of Social Sciences, located in Clark Hall 240. All COSS students and interested students are invited to stop by the Center for general education advising, help with changing majors, academic policy related questions, meeting with peer advisors, and/or attending various regularly scheduled presentations and workshops. Looking for academic advice or maybe just some tips about how to navigate your way around SJSU? Check out the COSS Student Success Center! It’s also a great place to study.

**Jack Holland Student Success Center (formerly BSAC)**

The Jack Holland Student Success Center, located on the garden level of the Boccardo Business Center, provides advice to students about undergraduate business courses and programs. Prospective students are encouraged to talk with advisors about requirements for business major and general education courses. Prospective graduate students are encouraged to meet a graduate advisor in the Graduate Program Office in the Business Tower.

**Business Tutoring Center**

The Tutoring Center gives individual and group assistance to business students seeking subject matter tutoring. It is located on the ground level of the Boccardo Business Center.

**Engineering Student Success Center (ESSC)**

**Student Success Center (CASA)**

Located in MacQuarrie Hall (MH) 533, the Student Success Center in the College of Applied Sciences and Arts (CASA) provides advising for undergraduate students majoring or wanting to major in programs offered in CASA Departments and Schools.

All CASA students and students who would like to be in CASA are invited to stop by the Center for general education advising, help with changing majors, academic policy related questions, meeting with peer advisors, and/or attending various regularly scheduled presentations and workshops. Looking for academic advice or maybe just some tips about how to navigate your way around SJSU? Check out the CASA Student Success Center! It’s also a great place to study, and you can check out laptops.
Study Abroad International Programs

Developing intercultural communication skills and international understanding among its students is a vital mission of The California State University (CSU). Since its inception in 1963, the CSU International Programs has contributed to this effort by providing qualified students an affordable opportunity to continue their studies abroad for a full academic year. More than 15,000 CSU students have taken advantage of this unique study option.

International Programs participants earn resident academic credit at their CSU campuses while they pursue full-time study at a host university or special study center abroad. The International Programs serves the needs of students in over 100 designated academic majors. Affiliated with more than 240 recognized universities and institutions of higher education in 41 countries, the International Programs also offers a wide selection of study locales and learning environments.

International Programs pays all tuition and administrative costs for participating California resident students to a similar extent that such funds would be expended to support similar costs in California. Participants are responsible for all tuition and program fees, personal costs, such as transportation, room and board, and living expenses. Financial aid, with the exception of Federal Work-Study, is available to qualified students.

To qualify for admission to the International Programs, in most programs students must have upper division or graduate standing at a CSU campus by the time of departure. Students at the sophomore level may, however, participate in the intensive language acquisition programs in Canada, China, France, Germany, Korea, Mexico, Sweden and Taiwan. California Community Colleges transfer students are eligible to apply directly from their community colleges. Students must also possess a current cumulative grade point average of 2.75 or 3.0, depending on the program for which they apply. Some programs also have language study and/or other coursework prerequisites.

California State University (CSU)

Welcome to the California State University (CSU) - the largest comprehensive higher education system in the nation with 23 unique campuses serving more than 437,000 students with 44,000 employees statewide. Each year, the university awards nearly 100,000 bachelor’s, master’s and doctoral degrees. CSU graduates now total nearly 3 million strong, and are serving as leaders in the industries that drive California’s economy, including business, agriculture, entertainment, engineering, teaching, hospitality and healthcare. Learn more at www.calstate.edu.

More than 50-year tradition of excellence

Academic excellence has been achieved by the CSU through a distinguished faculty whose primary responsibility is superior teaching. While each campus is unique based on its curricular specialties, location and campus culture, every CSU is distinguished for the quality of its educational programs. All campuses are fully accredited, provide a high-quality broad liberal educational program and offer opportunities for students to engage in campus life through the Associated Students, Inc., clubs and service learning. Through extensive industry partnerships and robust campus auxiliaries, the CSU is expanding programs, internships and workforce training opportunities to ensure CSU students are ready with the critical thinking skills, industry knowledge and hands-on experience for employment and career advancement.

Facts

- CSU faculty attract more than $500 million annually in research and education grants, and contracts by federal, state and regional agencies.
- 1 in every 10 employees in California is a CSU alumnus.
- The CSU awards 45 percent of the bachelor’s degrees earned in California.
- More than half of all the nurses in the state earn their degrees from the CSU.
- The CSU awards 95 percent of the hospitality/tourism degrees in the state.
- Nearly half of all of the state’s engineers earn their degrees from the CSU.
- The CSU is the leading provider of teacher preparation programs in the state.
- The CSU offers 105 fully online degree programs through www.calstateonline.net.
- The CSU offers 3,250 online courses to provide more educational options to students who may prefer an online format to a traditional classroom setting.
- The CSU’s growing online concurrent enrollment program gives students the ability to enroll in courses offered by other campuses in the CSU system.
- The CSU serves more than 5,000 individuals annually through professional development certificate programs in educational health services, business and technology, leisure and hospitality, manufacturing, international trade, and many other industries.
- For every $1 that the state invests in the CSU, the university generates $5.43 for California’s economy.

Governance

The system is governed by the Board of Trustees, most of whom are appointed by the governor and serve with faculty and student representatives. The CSU Chancellor is the chief executive officer, reporting to the Board. The campus presidents serve as the campus-level chief executive officers. The Trustees, Chancellor and presidents develop systemwide educational policy. The presidents, in consultation with the Academic Senate and other campus stakeholder groups, render and implement local policy decisions.
CSU Historical Milestones

The individual California State Colleges was established as a system with a Board of Trustees and a Chancellor in 1960 by the Donahoe Higher Education Act. In 1972, the system was designated as the California State University and Colleges, and in 1982 the system became the California State University (CSU). Today, the CSU is comprised of 23 campuses, including comprehensive and polytechnic universities and, since July 1995, the California Maritime Academy, a specialized campus.

The oldest campus-San José State University-was founded in 1857 and became the first institution of public higher education in California. The newest-CSU Channel Islands-opened in fall 2002, with freshmen arriving in fall 2003.

In 1963, the State Academic Senate was established to act as the official voice of CSU faculty in systemwide matters. Also, the California State College Student Presidents Association—which was later renamed the California State Students Association—was founded to represent each campus student association on issues affecting students.

Through its many decades of existence, the CSU has continued to adapt to address societal changes, student needs and workforce trends. While the CSU’s core mission has always focused on providing high-quality, affordable bachelor’s and master’s degree programs, over time the university has added a wide range of services and programs to support student success—ranging from adding health centers and special programs for veterans to building student residential facilities to provide a comprehensive educational experience.

To improve degree completion and accommodate students working full- or part-time, the educational paradigm expanded to give students the ability to complete upper-division and graduate requirements through part-time, late afternoon, and evening study. The university also expanded its programs to include a variety of teaching and school service credential programs, specially designed for working professionals.

The CSU marked another significant educational milestone when it broadened its degree offerings to include doctoral degrees. The CSU independently offers educational doctorate (Ed.D.), Doctor of Physical Therapy (DPT), and Doctor of Nursing Practice (DNP) degree programs. A limited number of other doctoral degrees are offered jointly with the University of California and private institutions in California.

In 2010, in an effort to accommodate community college transfer students, the university, in concert with the California Community Colleges, launched the Associate Degree for Transfer, which guarantees transfer students admission to the CSU with junior status.

Always adapting to changes in technology and societal trends to support student learning and degree completion, the CSU initiated another milestone in 2013, when it launched Cal State Online, a systemwide collection of services that support the delivery of fully online programs from campuses. Now, full-time students also have access to fully online courses offered at other CSU campuses.

The CSU is dynamic and ever changing to ensure a quality higher education to the students of California. With 23 campuses, 437,000 students and 44,000 faculty and staff, the CSU plays a critical role in preparing outstanding candidates for the job market. The CSU is committed to continually developing innovative programs, services and opportunities that will give students the tools they need to meet their full potential.
REGULATION - AVERAGE SUPPORT COST PER FULL-TIME EQUIVALENT STUDENT AND SOURCES OF FUNDS

The total support cost per full-time equivalent student (FTES) includes the expenditures for current operations, including payments made to students in the form of financial aid, and all fully reimbursed programs contained in state appropriations. The average support cost is determined by dividing the total cost by the number of FTES. The total CSU 2013/14 budget amounts were $2,330,500,000 from state General Fund (GF) appropriations (not including capital outlay funding) and before adding $16.3 million CalPERS retirement adjustment, $1,539,029,000 from tuition fee revenue and after tuition fee discounts (forgone revenue), and $408,305,000 from other fee revenues for a total of $4,277,834,000. The number of 2013/14 FTES is 336,510 resident target and 14,328 nonresident students for a total of 350,838 FTES. The GF appropriation is applicable to resident students only whereas fee revenues are collected from resident and nonresident students. FTES is determined by dividing the total academic student load by 15 units per term (the figure used here to define a full-time student’s academic load).

The 2013/14 average support cost per FTES based on GF appropriation and net tuition fee revenue only is $11,312 and when including all sources as indicated below is $12,476, which includes all fee revenue in the CSU Operating Fund (e.g. tuition fees, application fees, and other campus mandatory fees). Of this amount, the average net tuition and other fee revenue per FTES is $5,551.

*Represents state GF appropriation in the Budget Act of 2013/14; GF is divisible by resident students only (336,510 FTES).
**Represents CSU Operating Fund, Tuition Fee and other fees revenue amounts (net of tuition fee discounts) submitted in campus August 2013/14 final budgets. Revenues are divisible by resident and nonresident students (350,838 FTES).

The average CSU 2013/14 academic year, resident, undergraduate student basic tuition fee and other mandatory fees required to apply to, enroll in, or attend the university is $6,695 ($5,472 tuition fee plus $1,223 average campus-based fees). However, the costs paid by individual students will vary depending on campus, program, and whether a student is part-time, full-time, resident, or nonresident.

CIVIL AND CRIMINAL PENALTIES FOR VIOLATION OF FEDERAL COPYRIGHT LAWS

Anyone who is found to be liable for copyright infringement may be ordered to pay either actual damages or “statutory” damages between $750 and $30,000 per work infringed. In the case of a “willful” infringement, a court may award up to $150,000 per work infringed. Courts also have discretion to award costs and attorneys’ fees to the prevailing party. (See 17 U.S.C. A7 504 and 505.) Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense. (See 17 U.S.C. A7506 and 18 U.S.C. A72319.)

Credit Hour

As of July 1, 2011 federal law (Title 34, Code of Federal Regulations, sections 600.2 and 600.4) requires all accredited institutions to comply with the federal definition of the credit hour. For all CSU degree programs and courses bearing academic credit, the “credit hour” is defined as “the amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time; or
2. At least an equivalent amount of work as required in paragraph (I) of this definition for other academic activities as established by the institution, including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.”

A credit hour is assumed to be a 50-minute period. In courses in which “seat time” does not apply, a credit hour may be measured by an equivalent amount of work, as demonstrated by student achievement.
Legalese

Although every effort has been made to assure the accuracy of the information in this catalog, students and others who use this catalog should note that laws, rules, and policies change from time to time and that these changes may alter the information contained in this publication. Changes may come in the form of statutes enacted by the Legislature, rules and policies adopted by the Board of Trustees of the California State University, by the Chancellor or designee of the California State University, or by the President or designee of the campus. It is not possible in a publication of this size to include all of the rules, policies and other information that pertain to students, the institution, and the California State University. More current or complete information may be obtained from the appropriate department, school, or administrative office.

Nothing in this catalog shall be construed as, operate as, or have the effect of an abridgment or a limitation of any rights, powers, or privileges of the Board of Trustees of the California State University, the Chancellor of the California State University, or the President of the campus. The Trustees, the Chancellor, and the President are authorized by law to adopt, amend, or repeal rules and policies that apply to students. This catalog does not constitute a contract or the terms and conditions of a contract between the student and the institution or the California State University. The relationship of the student to the institution is one governed by statute, rules, and policy adopted by the Legislature, the Trustees, the Chancellor, the President and their duly authorized designees.

The annual update of SJSU policies is recommended as an up-to-date source of information on course offerings, general education, registration procedures, schedule of fees and other pertinent information on policies and procedures.

Information is subject to change.

The San José State University Policies and Procedures information is coordinated by Undergraduate Studies, Graduate Studies and Research, and Enrollment Services.

Non-Discrimination Policies

San José State University does not discriminate on the basis of accent, age, ancestry, citizenship status, color, creed, disability, ethnicity, gender, genetic information, marital status, medical condition, national origin, race, religion or lack thereof, sex, sexual orientation, transgender, or veteran's status. This policy applies to all SJSU students, faculty and staff programs and activities. Title IX of the Education Amendments of 1972, and certain other federal and state laws, prohibit discrimination on the basis of sex in all education programs and activities operated by the university (both on and off campus). For more information, please visit: http://www.sjsu.edu/hr/about_us/hr_directory/eo_unit/title_ix/index.html

Questions regarding this policy should be directed to the Office of Equity and Diversity, 408-924-1115.

Disabled Access

All San José State University classes are wheelchair accessible. If you have other needs regarding accommodations, please contact the Accessible Education Resource Center. Telephone: 408-924-6000; TTY 408-924-5990; Fax: 408-924-5999.

Campus Safety Statistics

A campus safety report is available at www.sjsu.edu/police/crime_reporting/safety_report/ or by calling 408-924-2172.

Aerospace Engineering Department Courses

AEROSPACE ENGINEERING

LOWER DIVISION

AE 020. Computer-Aided Design for Aerospace Engineers
The course provides an introduction to the fundamentals of drafting and computer-aided design with applications in aircraft and spacecraft design.
- Normal Grade Rules
- 2 units

AE 030. Computer Programming for Aerospace Engineers
C language: Variables, data types, operators, functions, modular programming, input/output sequence, pointers and memory addressing, external libraries, dynamic memory allocation. MATLAB: Variables, scripts, operations, visualization, plotting and programming. Equation solving and curve fitting. Symbolics, Simulink and I/O building block.
- Normal Grade Rules
- 2 units

UPPER DIVISION

AE 110. Space Systems Engineering
Introduction to design, analysis and operation of spacecraft power, communications, attitude determination/control, structures, propulsion, thermal management systems. Typical payload systems design and operation, including remote Earth sensors: System integration issues. Lab experiments and field trips.
- Prerequisite: AE 165 with a grade of 'C-' or better.
- Normal Grade Rules
- 3 units

AE 112. Aerospace Structural Analysis I
- Prerequisites: MATH 133A and PHYS 50 with a C- or better
- Normal Grade Rules
- 4 units

AE 114. Aerospace Structural Analysis II
- Prerequisite: CE 112 with a grade of ‘C-’ or better.
- Corequisite: ENGR 100W
- Normal Grade Rules
- 3 units

AE 135. Introduction to Composite Materials
See MATE 135.
- Normal Grade Rules
- 2 units

AE 140. Rigid Body Dynamics
Coordinate frames and descriptions of absolute and relative motion. General equations of rotational motion for single and multibody systems in Euler and Lagrangian formulations. Elasticity and dissipation effects. Spinning body motions. Impulsive motions. Applications to aerospace vehicles.
- Prerequisite: ME 101.
- Normal Grade Rules
- 3 units

AE 157. Aerospace Automatic Control Systems Design
- Prerequisite: Math 129A, Math 133A, ME101 w. a grade of ‘C-’ or better in each.
- Normal Grade Rules
- 3 units

AE 160. Aerodynamics I
- Prerequisites: MATH 032, PHYS 050 (with a grade of ‘C-’ or better in each) or graduate standing.
- Corequisite: ENGR 100W
- Normal Grade Rules
- 3 units

AE 162. Aerodynamics II
Two-dimensional and three-dimensional, incompressible and compressible potential flow theory. Airfoil and wing theory for subsonic, supersonic, and hypersonic flows. Flow visualization in a water tunnel. Lift and drag measurements in a subsonic wind tunnel.
- Prerequisite: ENGR 100W, MATH 133A, AE 160 or ME 111 (with a grade of ‘C-’ or better in each).
- Misc/Lab: Lecture 2 hours/lab 3 hours.
- Normal Grade Rules
- 3 units

AE 164. Aerothermodynamics
- Prerequisite: AE 160 with a grade of ‘C-’ or better in each.
- Misc/Lab: Lecture 2 hours/lab 3 hours.
- Normal Grade Rules
- 5 units

AE 165. Aerospace Flight Mechanics
Trajectory dynamics of atmospheric flight (aircraft and missiles) and spaceflight (orbital mechanics). Influence of vehicle design on trajectory. Aircraft static performance, stability and control. Rocket launch and re-entry dynamics. Computer simulations.
- Prerequisite: ME 101 with a grade of ‘C-’ or better.
- Corequisite: AE 162.
- Normal Grade Rules
- 3 units

AE 167. Aerospace Propulsion
Basic one-dimensional flows: isentropic, area change, heat addition. Overall performance characteristics of propellers, ramjets, turbojets, turbofans, rockets. Performance analysis of inlet, exhaust nozzles, compressors, burners, and turbines. Rocket flight performance, single-/multi-stage chemical rockets, liquid/solid propellants and design problems.
- Prerequisite: AE 160 and AE 164 with a grade of ‘C-’ or better in each
- Normal Grade Rules
- 3 units

AE 168. Aerospace Vehicle Dynamics and Control
- Prerequisite: AE 140, AE 157, AE 165 and Math 129A with a grade of ‘C-’ or better in each
- Normal Grade Rules
- 3 units
AE 169. Computational Fluid Dynamics
Prerequisite: MATH 129A, AE 160, AE 164 with a grade of C- or better in each. Or Graduate Standing.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

AE 171A. Aircraft Design I
Conceptual and preliminary design of airplanes: mission, sizing, configuration, fuselage, wing, empennage, landing gear, weight and balance, stability and control, drag polar. Ethics, safety and liability, issues of identity, equality, social actions and culture in relationship to aerospace engineering practice.
Prerequisites: AE 114, AE 162, AE 165, ENGR 100W (with a grade of C- or better in each). Senior-level with good standing in the major. Or Graduate Standing
Pre/Corequisite: AE 166, AE 168 and ENGR 195A
Misc/Lab: Lab 9 hours.
Normal Grade Rules
3 units

AE 171B. Aircraft Design II
Conceptual, preliminary, and detail design of airplanes. Students are encouraged to participate in Design / Build / Fly competitions and the AIAA Student Conference. Ethics, safety and liability, issues of culture, civilization and global understanding in relationship to aerospace engineering practice.
Prerequisite: AE 164 and AE 168 with a grade of C- or better in each, senior standing or graduate level standing.
Co-requisite: AE 167, AE 169, and ENGR 195B
Misc/Lab: Lab 9 hours.
Normal Grade Rules
3 units

AE 172A. Spacecraft Design I
Conceptual and preliminary design of spacecraft. Complete product development cycle: basic idea / societal need / market study / economic and budget analysis. Ethics, safety and liability, issues of identity, equality, social actions and culture in relationship to aerospace engineering practice.
Prerequisites: AE 114, AE 162, AE 165, ENGR 100W (with a grade of C- or better in each). Good standing in the major.
Pre/corequisite: AE 164, AE 168, ENGR 195A
Misc/Lab: Lab 9 hours.
Normal Grade Rules
3 units

AE 172B. Spacecraft Design II
Conceptual, preliminary, and detailed design of spacecraft. Students are encouraged to participate in the International Planetary Probe Workshop and / or the AIAA Student Conference. Ethics, safety and liability, issues of culture, civilization and global understanding in relationship to aerospace engineering practice.
Prerequisites: AE 164, AE 168 with a grade of C- or better. Senior in Good Standing or Graduate standing.
Corequisite: AE 167, AE 169 and ENGR 195B
Misc/Lab: 9 hour Lab.
Normal Grade Rules
3 units

AE 180. Individual Studies
Individual work on special topics. By arrangement.
Prerequisite: Upper division standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

AE 198. Technology and Civilization
See TECH 198.
Normal Grade Rules
CE: V
3 units

GRADUATE

AE 200. Engineering Analysis and Control of Aerospace Systems
Engineering analysis and control; linear algebra; ordinary differential equations; Laplace transformation; complex analysis; singular values; matrix perturbations; state-space models, input/output and robust stability; reachability and observability; feedback stabilization; H2 and H-infinity optimization.
Prerequisite: Graduate Standing or Instructor Consent.
Normal Grade Rules
3 units

AE 210. Advanced Space Systems Engineering
Overview of the engineering process used in aerospace mission and system design spanning the entire system life cycle for the near-Earth and outer space environment. Effects of gravity field, temperature and radiation on physical systems and the human organism. Mission program inception, proposal development, cost analysis and risk management.
Prerequisites: BSAE or Instructor Consent.
Normal Grade Rules
3 units

AE 222. Spacecraft Payload Sensors
Analysis/design of common spacecraft instrumentation and payload sensors. Mission-based characterization of payload sensors including electro-optical, visible, infrared, active/passive RF sensor types. Performance criteria and influence of orbit, computer simulations.
Prerequisite: BSAE or Instructor Consent.
Normal Grade Rules
3 units

AE 242. Orbital Mechanics and Mission Design
Prerequisite: BSAE or Instructor Consent.
Normal Grade Rules
3 units

AE 243. Advanced Astrodynamics
Analysis of spacecraft motion using different dynamic models and perturbations. Use of the state transition matrix and differential corrections technique for trajectory computation. Orbit determination and station-keeping methods. Introduction to the three-body problem. Application of computational and analytic methods to solve astrodynamics problems.
Prerequisite: AE 242.
Normal Grade Rules
3 units

AE 245. Spacecraft Dynamics and Control
Prerequisite: BSAE or Instructor Consent.
Normal Grade Rules
3 units

AE 246. Advanced Aircraft Stability and Control
Natural longitudinal and lateral/directional motion of aircraft, mode shapes, eigenvalues, eigenvectors. Analysis and synthesis of various aircraft autopilots using classical and state space formulations.
Prerequisite: BSAE or Instructor Consent.
Normal Grade Rules
3 units

AE 247. Trajectory Optimization in Aerospace Systems
Introduction to trajectory optimization; parameter optimization; calculus of variations; optimal control and optimization techniques; dynamic programming; numerical methods in optimization; trajectory optimization in aerospace systems; perturbation analysis.
Prerequisite: Graduate Standing or instructor consent, AE 200 or equivalent.
Normal Grade Rules
3 units
AE 250. Advanced Structures and Materials  
Design and analysis of modern flight structures including static and dynamic structural response; materials design including metals, alloys, composites. Introduction to modern computational methods including finite elements.  
Prerequisite: BSAE or Instructor Consent.  
Normal Grade Rules  
3 units

AE 262. Advanced Aerodynamics  
Thin airfoil theory; Prandtl’s lifting-line theory. Subsonic and supersonic airfoil and wing theory. High-angle of attack aerodynamics. Boundary layer theory; Blasius and Falkner-Skan solutions, compressible boundary layers, turbulent flows, separation criteria.  
Prerequisite: BSAE or Instructor Consent.  
Normal Grade Rules  
3 units

AE 264. Advanced Compressible Flow  
Prerequisite: BSAE or Instructor Consent.  
Normal Grade Rules  
3 units

AE 267. Space Propulsion Systems  
Rocket propulsion fundamentals: propulsion requirements for: multi-stage launch; orbit establishment, maneuvers and maintenance, spacecraft attitude control. Nozzle flow, thermochemical calculation of performance. Design and performance calculations for systems and components of chemical rockets (liquid, solid, hybrid), electric rockets and advanced concepts.  
Prerequisite: BSAE or Instructor Consent.  
Normal Grade Rules  
3 units

AE 269. Advanced Computational Fluid Dynamics  
Advanced topics in computational fluid dynamics and numerical techniques to solve the Euler and Navier-Stokes equations. The student will use MatLAB, grid generation, CFD and visualization software for homework, and projects.  
Prerequisite: BSAE or Instructor Consent.  
Misc/Lab Seminar 2 hours/lab 3 hours.  
Normal Grade Rules  
3 units

AE 270. Spacecraft Thermal Systems  
Review of heat transfer fundamentals: Steady-state and transient modeling and computational solution techniques: Spacecraft thermal requirements; applicable standards. Applications to electronic packages, solar arrays, SDI designs, cryogenic and optical systems.  
Prerequisite: BSAE or Instructor Consent.  
Normal Grade Rules  
3 units

AE 271. Advanced Aircraft Design  
Aircraft design project using Class II methods. Unconventional configurations. Trade studies, drag polars, airplane performance, FARs, structural arrangement, V-n diagram.  
Prerequisite: Graduate Standing in AE/ME or instructor consent.  
Normal Grade Rules  
3 units

AE 273. Aircraft Subsystems  
Aircraft subsystem analysis and design: flight controls; avionics and electrical systems; cabin systems; landing gear and other mechanical systems; systems safety analysis.  
Prerequisite: Graduate Standing or instructor consent.  
Normal Grade Rules  
3 units

AE 275. Spacecraft Power Systems  
Design/implementation of space power systems including source, conversion, distribution protection, control and regulation elements. Integration into the spacecraft system. Generation elements include solar cells/arrays, fuel cells, batteries, nuclear. Test and verification.  
Prerequisite: BSAE or Instructor Consent.  
Normal Grade Rules  
3 units

AE 280. Hypersonics and Reentry Systems  
Fundamental principles of hypersonic aerodynamics. Development of important theory and techniques, discussion of salient results with emphasis on physical aspects, and presentation of modern thinking on the subject.  
Prerequisite: Graduate Standing or instructor consent.  
Normal Grade Rules  
3 units

AE 290R. MSAE Thesis/Project Continuing Supervision  
Continued work on thesis or project beyond minimum required units, for cases in which final deliverables are still in progress.  
Prerequisite: RP grade in a preceding thesis or project semester.  
Mandatory CR/NC/RP  
1 unit

AE 295A. Aerospace Engineering Project I  
Research, design and development projects involving aerospace systems/components. Most projects will involve local aerospace industry applications, support and participation. Projects may involve individuals or student teams.  
Prerequisite: Admission to candidacy for the master’s degree and a written proposal approved by instructor and graduate advisor.  
Mandatory CR/NC/RP  
3 units

AE 295B. Aerospace Engineering Project II  
Continuation of AE 295A. Students complete the in-depth project, write a detailed engineering report and make a comprehensive presentation. Students must also attend an Aerospace Engineering seminar and participate in a teaching project.  
Prerequisite: AE 295A.  
Mandatory CR/NC/RP  
3 units

AE 297. Special Topics in Aerospace Engineering  
Special topics that are currently of interest to industry and academia. Content varies from semester to semester. Repeatable for up to six units.  
Prerequisite: Graduate Standing or instructor consent.  
Repeatable for credit  
Normal Grade Rules  
1-4 units

AE 298. Special Projects in Aerospace Engineering  
Advanced individual work in Aerospace Engineering.  
Prerequisite: Instructor consent.  
Repeatable for credit  
Credit / No Credit  
1-3 units

AE 299. Master’s Thesis  
Master’s thesis work in aerospace engineering. Participation in a teaching experience.  
Prerequisite: Admission to candidacy for the master’s degree and a written proposal approved by instructor and graduate advisor.  
Repeatable for credit  
Mandatory CR/NC/RP  
3 units
Aerospace Studies Department
(Air Force ROTC) Courses

AEROSPACE STUDIES

LOWER DIVISION

AS 001A. The Foundation of the United States Air Force
Introduces students to the Air Force and AFROTC with an overview of basic characteristics, missions, and organization of the Air Force; additional topics include officership and professionalism, career opportunities, military customs and courtesies, and an introduction to communications skills.
Notes: Year course. Enrollment in leadership lab required.
Normal Grade Rules
1 unit

AS 001B. The Foundation of the United States Air Force
Introduces students to the Air Force and AFROTC with an overview of basic characteristics, missions, and organization of the Air Force; additional topics include officership and professionalism, career opportunities, military customs and courtesies, and an introduction to communications skills.
Notes: Year course. Enrollment in leadership lab required.
Normal Grade Rules
1 unit

AS 002A. The Evolution of USAF Air and Space Power
Examines general aspects of air and space power through historical study and analysis and provides the student with a knowledge level understanding of the capabilities, function and doctrinal employment of aerospace forces; emphasizes development of oral and written communication skills.
Notes: Year course. Enrollment in leadership lab required.
Normal Grade Rules
1 unit

AS 002B. The Evolution of USAF Air and Space Power
Examines general aspects of air and space power through historical study and analysis and provides the student with a knowledge level understanding of the capabilities, function and doctrinal employment of aerospace forces; emphasizes development of oral and written communication skills.
Notes: Year course. Enrollment in leadership lab required.
Normal Grade Rules
1 unit

UPPER DIVISION

AS 131A. Air Force Leadership Studies
Study of leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills; develops application level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion.
Prerequisite: AS 1A and AS 1B, AS 2A and AS 2B, or as determined by department chair.
Notes: Year course. Enrollment in leadership lab required.
Normal Grade Rules
3 units

AS 131B. Air Force Leadership Studies
Study of leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills; develops application level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion.
Prerequisite: AS 1A and AS 1B, AS 2A and AS 2B, or as determined by department chair.
Notes: Year course. Enrollment in leadership lab required.
Normal Grade Rules
3 units

AS 141A. National Security Affairs
Examines the national security process, international and regional relations, advanced leadership ethics, and Air Force doctrine with focus on the military as a profession, officership, military justice, civilian control of the military and current issues affecting military professionalism.
Pre/Corequisite: AS 131A.
Notes: Enrollment in leadership lab required.
Normal Grade Rules
3 units

AS 141B. Preparation for Active Duty
Studies the role of the Air Force officer in contemporary society with emphasis on knowledge, comprehension, and application of skills needed to facilitate a smooth transition from civilian to military life.
Pre/Corequisite: AS 131B.
Notes: Enrollment in leadership lab required.
Normal Grade Rules
3 units

AS 180. Individual Studies
Application of theory and instruction in field and staff exercises.
Notes: By arrangement.
Repeatable for credit
Credit / No Credit
0.5-3 units
African Studies Program Courses

AFRICAN STUDIES

UPPER DIVISION

AFRS 105A. History of Africa
See HIST 105A.
Normal Grade Rules
3 units

AFRS 105B. History of Africa
See HIST 105B.
Normal Grade Rules
3 units

AFRS 116. Modern African Societies
The interrelationship of geography, economics, politics and impact of independence upon selected African traditional societies.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

AFRS 142. African Politics
See POLS 142.
Normal Grade Rules
3 units

AFRS 194. Colloquium in African Studies
Specialized problem areas in Africa. Topic varies each semester. Course is repeatable once for credit.
Notes: Offered only occasionally.
Repeatable for credit
Normal Grade Rules
3 units
AFAM 002A. African-Americans and the Development of America's History and Government
Major events in America's development, emphasizing African-Americans' relationship to government and other basic institutions.
Notes: Entire sequence satisfies GE Areas F1, 2, 3.
Normal Grade Rules
3 units
AFAM 002B. African-Americans and the Development of America's History and Government
Major events in America's development, emphasizing African-Americans' relationship to government and other basic institutions.
Notes: Entire sequence satisfies GE Areas F1, 2, 3.
Normal Grade Rules
3 units
AFAM 022. The Humanities in African-American Culture
Analysis of several of the most important African-American creative art forms and personalities. Special attention to Black contributions in music, literature, cinema, photography and painting.
Normal Grade Rules
3 units
AFAM 025. The Changing Majority: Power and Ethnicity in America
See MAS 025.
Normal Grade Rules
GE 02
3 units
AFAM 036. Black Theater Workshop
Survey of dramatic traditions that have involved African-Americans. Production activities are required that involve acting, dance and other forms of the creative arts.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units
AFAM 040. African Origins
Ancient African civilizations to the advent of the slave trade. Folklore and mythology manifested in ceremonies, rituals and rhythmic movements are examined.
Repeatability for credit
Normal Grade Rules
3 units
AFAM 100W. Writing Workshop
Development of advanced writing skills through study of principal techniques of communication in the Black community related to Black music, literature and politics.
Prerequisite: Completion of core GE, ENGL 1B (with a grade of “C” or better), satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE: Z
3 units
AFAM 102. African-American Music
Analysis of styles and techniques of major traditions in Black music. Development of music from slave work-a-day songs to rhythm and blues and modern jazz, 1950's to the present.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
AFAM 105. Health Issues in the African-American Community
A review of the health status of African-Americans within the context of U.S. health care delivery system. Major disease health trends are discussed as by-products of the interaction of biological, cultural, economic and social forces in the U.S.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
AFAM 110. Education of the Black Child
Analysis of economic, sociocultural and educational issues that affect Black students. Emphasis directed at elementary and secondary school systems.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
AFAM 111. African Nations
Analysis of African societies over time, beginning with the Africa of ancient civilizations, followed by Africa under European colonialism, and concluding with the sweeping changes in contemporary Africa.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
AFAM 112. New Faces in the African-American Community
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
AFAM 115. The Black Community Past and Present
Analysis of historical development of African-Americans including migrational trends of Blacks from the rural South to urban North. Search for alternatives in new institutions and modification of old ones.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
AFAM 119. Africana Philosophy and Culture
See PHIL 119.
Normal Grade Rules
3 units
AFAM 120. Sociological Analysis of African-American Communities
Sociological analysis of the African-American community traces development of the community from its historical inception to contemporary urban settings. Analyzes important trends, shifting values, institutional development and urban problems.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
AFAM 125. The Black Family
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
AFAM 130. Psychology of the Black Community
Impact of Black society and culture on personality growth in light of current sociological and social-psychological studies. Social interaction, group membership within the Black community and its influence on the shaping of behavior.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 133. Introduction to Social Issues in Planning
See URPB 133.
Normal Grade Rules
4 units

AFAM 134. Martin L. King and the Civil Rights Movement
Origins and development of Civil Rights movement from 1865 to present. Analysis of role of Martin L. King, Jr. in the Civil Rights movement in the South and of federal government response and struggle of African-Americans for civil and political equality.
Prerequisite: Completion of U.S. History graduation requirement.
Normal Grade Rules
3 units

AFAM 137. Religion in the Black Community
Analysis of formation and development of African-American religious ideas and institutions (i.e., Christianity, Islam, Judaism) in the Black community and their effect on the African American personality.
Normal Grade Rules
3 units

AFAM 142. Race, Ethnicity, and the Law
Analysis of the politics of law and race in the U.S. with a focus on the experience of African-Americans and other racial and ethnic minorities as offenders, victims and as citizens engaged in a continuing movement for equality and an end to injustice.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 145. Urban Policy and Its Impact on Inner City Residents
Effects of public policy decisions on inner city populations. Implications of urban planning processes for differential consumption costs of public goods and services.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

AFAM 150. West African Drumming and Culture
A study of the instrumental music, song, and dance of the African Diaspora with an emphasis on its cultural context.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

AFAM 151. Race, Poverty and the Environment
Analysis of the relationship between the environmental crisis and people of color and poor communities in the U.S., emphasizing the interplay among race/ethnicity, class and politics in the struggle for environmental justice and survival by communities of color and poor people.
Normal Grade Rules
3 units

AFAM 152. The Black Woman
Understanding historical and cultural factors influencing the Black woman such as slavery, racism and poverty, learning the contributions and strengths Black families provide to and for their families and culture.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 155. The Triumph and Tragedy of Black Athletes in U.S. History
This course examines the significance and impact of Black athletes on popular culture, race relations and U.S. society.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 156. Black Women Writers: Race, Culture and Life Cycle in Cross-Cultural Perspective
Comparative analysis of the meaning and developmental stages of womanhood for women of African ancestry as depicted in the fiction of women of African ancestry. Emphasis on the role of race and culture in shaping contemporary conceptions of womanhood among Black women.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 158. African-Caribbean Dance
This dance and discussion class includes instruction in dancing to the popular Caribbean basin rhythms and melodies, salsa, rumba, plena, merengue, cumbia, mambo, guaracha, guanche, guaguanco and son, and discussion of the Orisha tradition, which inspired them.
Normal Grade Rules
2 units

AFAM 159. Economic Issues in the Black Community
Analysis of continuing racial economic disadvantage in context of corporate and public policies. Exploration of new economic development and career opportunities emerging from changed environmental protection priorities.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 160. Blacks in U.S. Politics and Society
Examines the lives and major contributions of African-Americans to politics and U.S. society.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

AFAM 161. Black Images in American Film, TV and the Print Media
Course examines the representation of Black people in film, TV, and print media.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

AFAM 164. Survey of Black Business Organizations
Private sector businesses from the perspective of racial ownership and consumption patterns. Historical development, future trends, consumer market, government regulations and funding support as they impact the success of Black business.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

AFAM 165. Topics in Ethnic American Literature
See ENGL 165.
Repeatable for credit
Normal Grade Rules
3 units

AFAM 166. African-American Women in History
Role of African American women in shaping U.S. history through a shared afrocentric gender legacy of activism and public life guardianship. Resulting impacts on abolition, lynching deterrence, labor unions, civil rights and professional activities.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

AFAM 180. Individual Studies
Individual research project and field activity on phase or topic not covered in regular course offerings.
Prerequisite: Upper division standing.
Repeatable for credit
Credit / No Credit
1-4 units
AFAM 184. Directed Reading
Limited to qualified upper division students.
Repeatable for credit
Credit / No Credit
1-4 units

AFAM 190. Internship in Community Development
Supervised placement in practical situations where community workers are employed: community planning, correctional services, community development agencies, etc.
Prerequisite: Upper division standing or instructor consent.
Credit / No Credit
1-4 units

AFAM 194. Peoples of Color in the Making of the Americas: 1400-1850
See AAS 194.
Normal Grade Rules
3 units

AFAM 195. Peoples of Color in the Making of the Americas: 1850-Present
See AAS 195.
Normal Grade Rules
3 units

AFAM 198. Seminars in African-American Studies
Major themes and topics in the African-American experience analyzed through readings, reports and discussions. Topics and materials vary each semester. Course is repeatable for 6 unit maximum.
Prerequisite: AFAM 2A, AFAM 2B and senior standing.
Repeatable for credit
Normal Grade Rules
3 units

AFAM 200. Colloquium in African Origins
Analysis of historical writings of pre-colonial and colonial West Africa as a relevant background tool to the history of Black people in the U.S. Discussions based on assumption that assignments have been read in advance.
Prerequisite: Upper division or graduate standing.
Normal Grade Rules
3 units

AFAM 210. Seminar in African-American History
Detailed study and survey of the dispersal of African peoples from Africa to the United States and to other parts of the Americas.
Repeatable for credit
Normal Grade Rules
3 units

AFAM 298. Special Studies
Advanced individual research and projects related to the Black community.
Prerequisite: Consent of graduate advisor.
Repeatable for credit
Credit / No Credit
1-6 units
American Studies Program
Courses

AMERICAN STUDIES

LOWER DIVISION

AMS 001A. American Civilization
American culture examined through political, literary, artistic, economic and social development. American values, ideas and institutions from popular culture as well as traditional sources.
Note: Entire sequence satisfies GE Areas C1,2; D2,3; F1,2,3.
Normal Grade Rules
GE: M4
6 units

AMS 001B. American Civilization
American culture examined through political, literary, artistic, economic and social development. American values, ideas and institutions from popular culture as well as traditional sources.
Prerequisite: AMS 1A.
Note: Entire sequence satisfies GE Areas C1,2; D2,3; F1,2,3.
Normal Grade Rules
GE: M5
6 units

UPPER DIVISION

AMS 100W. Writing in the Humanities
See HUM 100W.
Normal Grade Rules
GE: Z
3 units

AMS 129. How the World sees the United States
Comparative analysis of the cultural meaning of “America” outside the United States from the perspectives of global interdependence and transnationalism, and including both pro- and anti-American views through history.
Prerequisite: Upper division standing
Normal Grade Rules
3 units

AMS 159. Nature and World Cultures
The influence of industrialization and globalization on earth and the environment as seen through culture.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

AMS 160. Seminar in Special Topics
See HUM 160.
Repeatable for credit
Normal Grade Rules
3 units

AMS 169. The American Dream
The American search for identity and meaning, the struggle for equality and success, in relation to myths, illusions and realities reflected in history, literature and the arts.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

AMS 179. American Popular Culture
Music, sports, fashion, popular literature, television and other arts and activities that are main forms of influence, entertainment and escape. Expressions of American attitudes and ideas as important influences upon evolving culture and consciousness.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

AMS 180. Individual Studies
Supervised study of a particular aspect of American culture not covered in a regular course offering.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

AMS 190. Senior Seminar in Humanities
See HUM 190.
Normal Grade Rules
3 units
Anthropology Department Courses

ANTHROPOLOGY

LOWER DIVISION

ANTH 011. Cultural Anthropology
Basic concepts, theories and methods used in the comparative study of socio-cultural systems. Includes cultural ecology and change; political, economic and kinship systems; language, art and religion; cultural perspectives on contemporary issues.
Normal Grade Rules
GE: D1
3 units

ANTH 012. Introduction to Human Evolution
The human organism from an evolutionary perspective. The foundations of life and evolutionary theory. Introduction to primate behavior and the fossil record. Human biocultural evolution over the last sixty million years.
Normal Grade Rules
GE: B2
3 units

ANTH 013. Archaeology
How archaeologists invent their own version of the past, illustrated with compelling Old and New World discoveries from early prehistory to the present. How archaeological sites are discovered, excavated and analyzed; how facts are tested and fictions unmasked.
Normal Grade Rules
3 units

ANTH 025. Human Lifecourse in Context
Normal Grade Rules
GE: E
3 units

ANTH 100W. Writing Workshop
Practice in improvement of writing skills appropriate to the fields of anthropology and behavioral science. Includes essays, reports and scholarly communication.
Prerequisite: Completion of core GE, ENGL 1B (with a grade of C or better), satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement.
Normal Grade Rules
GE: Z
3 units

ANTH 102. Silicon Valley Connections
Examines issues of cultural diversity, work and family, technology in daily life, attachment to organizations, and community building in Silicon Valley through an anthropological perspective. Connections with other global regions are explored. Public policy implications are developed and analyzed.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 105. Applied Anthropology
Use of anthropological knowledge in problem solving and policy making. Survey of applied anthropology, models of applying anthropology and affecting policy making, and the use of anthropology by non-professionals in diverse careers.
Prerequisite: ANTH 111 or instructor consent.
Normal Grade Rules
3 units

ANTH 108. Medical Anthropology
A comprehensive examination of culture, sickness and healing in a cross-cultural perspective, emphasizing ecological/evolutionary bases of disease and healing and cultural dimensions of health in modern world.
Prerequisite: ANTH 111 or instructor consent.
Normal Grade Rules
3 units

ANTH 109. Kids, Teens, and Culture
Examines children as social actors actively engaged in the production of culture. Topics include: ways or understanding children, institutions of socialization, gender, class, peer groups, "swoon: culture, resistance, sexualization, consumer and media culture.
Prerequisites: Upper division standing.
Normal Grade Rules
3 units

ANTH 114. Legacy of Asia
See HUM 114.
Normal Grade Rules
GE: V
3 units

ANTH 115. The Emerging Global Culture
Introduction to systems concepts and approach as a way to investigate the global impacts of industrial technology on political, economic, social and moral/psychological structures of humankind.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Notes: Recommended for behavioral science majors.
Normal Grade Rules
GE: V
3 units

ANTH 122. Magic, Science and Religion
See RELS 122.
Normal Grade Rules
GE: V
3 units

ANTH 125. Urban Anthropology
Anthropological theories and methods in analyzing the global effects of urban growth. Relevance of anthropological approach in understanding our local multiethnic metropolitan area.
Prerequisite: ANTH 111 or instructor consent.
Normal Grade Rules
3 units

ANTH 130. Kin, Kith, and Community: The Anthropology of Social Organization
Overview of social organization focused on local forms of human relationships: kinship, non-kin relations such as friendship and networking, and community. Explores the principles of kinship and community-building. Examples will be drawn from small-scale, complex and international societies.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 131. Theories of Culture
Seminar on evolutionary, functional and structural theories of culture. Analysis of contemporary theory and development of the discipline of anthropology.
Prerequisite: Upper division standing. ANTH 011; ANTH 012 or ANTH 013 or declared Anthropology major or instructor consent.
Normal Grade Rules
3 units

ANTH 132. Creating Built Worlds
Cross-cultural exploration of material expressions of culture. Analysis of production and consumption of places, shelters, and goods. Implications for design and policy.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 133. Organizational Cultures
Complex organizations as dynamic sociocultural systems. Topics include organizational culture, cross-cultural study of organizations, organizational ethnography, cultural diversity, organizational learning and relevance of a cultural approach to enhance organizational effectiveness in a rapidly-changing world.
Prerequisite: ANTH 111 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
ANTH 134. Systemic Leadership
Examination of systemic leadership thought and practice, especially its application to helping resolve complex problematic issues more effectively and responsibly. Focus is on leading collaborative change efforts with diverse sets of stakeholders in group, organizational, community, cultural, and global settings.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 135. Behavioral Systems
Introduction to systems concepts and approaches as a way of analyzing psyche, family, community, culture and global ecosystems in a holistic, integrative and interdisciplinary way.
Prerequisite: Upper division standing.
Notes: Recommended for behavioral science majors.
Normal Grade Rules
3 units

ANTH 136. Thought Control in Contemporary Society
Anthropological analysis of sociocultural controls influencing and regulating human thought and behavior in the contemporary period. Topics include propaganda, censorship, undue influence, coercive persuasion and "brainwashing," groupthink, messianic cults, totalitarianism, technologies of control, ritualized rebellion, resistance movements, and democratic alternatives.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 137. California in Historical and Social Scientific Perspectives
See SOCS 137.
Normal Grade Rules
3 units

ANTH 138. United States in Historical and Social Science Perspectives
See SOCS 138.
Normal Grade Rules
GE 5
3 units

ANTH 139. The World in Historical and Social Science Perspectives
See SOCS 139.
Normal Grade Rules
GE V
3 units

ANTH 140. Human Sexuality
Biological and sociocultural facets of human sexuality. Evolution and physiology of sex, reproductive biology/ethics and cross-cultural expression of sexual behavior.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE S
3 units

ANTH 141. Culture and Gender
Cross-cultural, anthropological perspective on how different cultures organize and give meaning to the "biological facts" of being male and female. Explores gender relations in small-scale and complex non-Western cultures as well as in contemporary American society.
Prerequisite: ANTH 11, ANTH 25, ANTH 140 or instructor consent.
Normal Grade Rules
3 units

ANTH 142. Culture in Mind
Prerequisite: ANTH 11, ANTH 25 or instructor consent.
Normal Grade Rules
3 units

ANTH 143. Culture and Adaptation
Explores the relationship between adaptive human behavior and the environment. Theories of interaction between biology, environment and culture are illustrated by examples of mobile foraging peoples, village sedentary farmers, complex chiefdoms and state-level societies.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 144. The Great Recession & American Dreams
Sociocultural implications of the Great Recession of 2007, analyzed from anthropological perspectives. Topics include: archaeology of debt, history of financial crises, rise of corporate capitalism, ideological aspects of deregulation, meanings of unemployment, banking culture, consequences of home foreclosure, and alternatives.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 145. Middle Eastern Traditions
See RELS 145.
Normal Grade Rules
GE V
3 units

ANTH 146. Culture and Conflict
Problems of change, especially in multiethnic societies of both established and emerging nations. Technological development, modernization, social changes and value conflicts.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE S
3 units

ANTH 148. Religion and Anthropology
Comparative anthropological study of religious systems and world views; Anthropological theories concerning origin and evolution of religion; structure and function of ritual and myth; types of religious specialists.
Prerequisite: ANTH 11, ANTH 25 or instructor consent.
Normal Grade Rules
3 units

ANTH 149. Ethnographic Methods
Qualitative methods: research design, participant observation, collection of life histories, ethical responsibilities, interviewing, analysis and ethnographic writing.
Prerequisite: ANTH 11 or instructor consent.
Normal Grade Rules
3 units

ANTH 151. Modernity and Disease
Modernity and Disease explores the effects of the modern world on human biology, with specific emphasis on adaptations to the last several decades of environmental changes. Topics include reproduction, diet, and infectious, geriatric and environmental diseases.
Prerequisite: ANTH 12 or instructor consent.
Normal Grade Rules
3 units

ANTH 152. Human Origins
Fossil evidence for human evolution, emphasizing areas of greatest controversy. Lab demonstration of modern skeletal material and reproductions of fossil hominids supplemental lecture.
Prerequisite: ANTH 12 or instructor consent.
Normal Grade Rules
3 units

ANTH 153. Human Variation and Behavior
Human variation and behavior is the study of the nature and extent of heritable biological and behavioral differences among human populations in an evolutionary perspective. Data drawn from non-human primates, medical fields, the fossil record and genetics will be reviewed. The role of genetics and environment in the formation of these differences is considered.
Prerequisite: Any lower division anthropology or psychology course or instructor consent.
Normal Grade Rules
3 units
ANG 154. Monkeys, Apes and Humans
Behavior, ecology and evolution of our closest animal relatives, the nonhuman primates. Interpretive emphasis toward broader understanding of human evolution and behavior.
Prerequisite: Any lower division anthropology or psychology course or instructor consent.
Normal Grade Rules
3 units

ANG 155. Human Osteology
The human skeletal system as an anatomical structure and biomechanical system. Lab experience in identification of osteological material and recognition of diseases associated with bone.
Prerequisite: ANTH 12 or instructor consent.
Misc/Lab: Lecture 3 hrs/lab 2 hrs.
Normal Grade Rules
3 units

ANG 156. Bioarchaeology
Study of human skeletal remains from archaeological setting to aid in reconstructing the biological and cultural past. Current theoretical and methodological issues in bioarchaeology. Emphasis on potential of skeletal analysis for uncovering disease and trauma, subsistence patterns, biological relatedness, physical activity and diverse reactions to stressors.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANG 157. Forensic Anthropology
An overview of forensic anthropological methods and applications emphasizing the recovery and interpretation of human remains within the context of multidisciplinary scientific death investigation. Topics include the history of the discipline and a concentrated hands-on overview of basic human osteological identification.
Prerequisite: ANTH 12, BIOL 10, BIOL 21, or BIOL 65.
Normal Grade Rules
3 units

ANG 159. Mummies
Explore mummies from around the world. Examine the archaeological and biological evidence of how and why mumification was practiced in these cultures, plus what the examination of mummies can tell us about past peoples cultures, diseases, and lifestyles.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

ANG 160. Reconstructing Lost Civilizations
Explores scientific archaeology and the reconstruction of civilizations. Topics include framing hypotheses, site selection, excavation, analysis of artifacts and ecofacts, and reconstructing social systems.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: B
3 units

ANG 161. Old World Civilizations
Prehistoric cultural development in Europe, Asia, and Africa from the Paleolithic to the development of civilizations. Discussions of early states include social organization, economic systems, art, architecture and intellectual achievements.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANG 162. Inca, Aztec and Maya Civilization
Ancient high civilizations of Mexico, Central America and Andean South America, their predecessors and contemporaries. Explores sociocultural systems with emphasis on art, architecture and intellectual achievements.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANG 163. Coastal and Island Societies
Archaeology of coastal and island peoples. Explores the unique opportunities and constraints coastal and island environments have presented to human societies. Case studies drawn from the Pacific, Atlantic, Caribbean, and the Mediterranean.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANG 164. Prehistory of North America
Archaeology and prehistory of North American cultures. Prehistoric culture areas and relationships between them; development of complex societies; and relationships to historic societies.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANG 165. Historical Archaeology
Course centers on the archaeology of the recent past. Students explore how to employ archaeological material analysis and archival research to develop a fuller understanding of the development of the modern industrialized world.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANG 166. Chiefdoms, States, & Empires
An archaeological perspective on the roots of economic inequality, social hierarchies, and oppressive political regimes. Case studies center on the evolution of the world's first stratified societies: chiefdoms, early states, and pre-industrial empires.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANG 167. Archaeological Laboratory Methods
General laboratory procedures in archaeological research. Collection, processing, and curating of artifacts.
Prerequisite: ANTH 13.
Normal Grade Rules
3 units

ANG 168. Archaeological Methodology
Central methods of archaeological practice. Methods of archaeological inquiry, research design, and the cultural resource management presented through case studies in historic and prehistoric archaeology.
Prerequisite: ANTH 13.
Normal Grade Rules
3 units

ANG 169. Archaeological Site Excavation
Artifact recovery and analysis during archaeological field project. All phases of professional archaeological practice leading to publication of findings. Sites may be local or distant.
Prerequisite: ANTH 13 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ANG 170. Language and Culture
Surveys anthropological, cross-cultural approaches to language including: its evolution, structure, function and change over time; its relationship to culture (worldview, perception, behavior); language in social interaction and social settings; and contemporary language diversity issues.
Prerequisite: ANTH 11 or instructor consent.
Normal Grade Rules
3 units

ANG 173. Culture Through Film
Survey of indigenous cultures represented in film. Critical evaluation of the role of films in describing and interpreting these cultures.
Prerequisite: ANTH 11, ANTH 25 or instructor consent.
Normal Grade Rules
3 units
ANTH 175. Anthropology of Native America
Survey of indigenous peoples of the Pacific Rim from ethnohistorical times to the present. Cultural adaptation, social organization, world view, intercultural contact and cultural portrayal. Emphasis on Western Native North America with examples drawn from other Asian, Pacific and American indigenous cultures. Prerequisite: Any lower division anthropology course or instructor consent. Normal Grade Rules. 3 units.

ANTH 176. Indians of California
Native Californian cultures as they functioned before white contact, emphasizing ecological, sociopolitical and religious interrelationships and historic culture change. Ethnographic, archaeological and documentary sources. Prerequisite: ANTH 11 or instructor consent. Normal Grade Rules. 3 units.

ANTH 177. Anthropology of Asia
Sociocultural themes of selected Asia cultures. Covers cultural pluralism, intercultural contact, social organization, worldview and economic adaptations. Explores connections within the Pacific Rim, especially to the local region. Course is repeatable once for credit when different cultures are emphasized. Prerequisite: Upper division standing. Repeatable for credit. Normal Grade Rules. 3 units.

ANTH 178. Anthropology of Latin America
Sociocultural themes of selected Latin American cultures. Covers cultural pluralism, intercultural contact, social organization, worldview and economic adaptations. Explores connections within the Pacific Rim, especially to the local region. Normal Grade Rules. 3 units.

ANTH 179. Anthropology of Mexico
Sociocultural themes of selected Latin American cultures. Covers cultural pluralism, intercultural contact, social organization, worldview and economic adaptations. Explores connections within the Pacific Rim, especially to the local region. Normal Grade Rules. 3 units.

ANTH 180. Individual Studies
Prerequisite: Instructor consent. Repeatable for credit. Credit / No Credit. 1-4 units.

ANTH 182. Ethnicity and Aging
See AAS 182.
Normal Grade Rules. 3 units.

ANTH 184. Directed Reading
Directed reading in cultural anthropology, physical anthropology or archaeology to gain a broader understanding of a particular topic, culture or theoretical issue. Prerequisite: Upper division standing and instructor consent. Repeatable for credit. Credit / No Credit. 1-4 units.

ANTH 187. Special Topics
Contemporary issues in anthropological theory including cultural anthropology, archaeology and physical anthropology. Course is repeatable once for credit on different issue. Prerequisite: Upper division standing. Repeatable for credit. Normal Grade Rules. 3 units.

ANTH 190. Designing Research
Describes research conception, development and implementation for academic research and applied careers alike. Emphasizes writing grant proposals, academic theses, and professional contracts. Topics include research question identification, methodological and technical approaches, broader significance and impact of research, and ethical considerations. Prerequisites: Declared major in Anthropology or Behavioral Sciences; Completion of Area Z (100W). Two of the following courses: ANTH 011, ANTH 012, ANTH 013 or Instructor consent. Normal Grade Rules. 3 units.

ANTH 191. Frontiers of Anthropology
Critical contemporary social issues that cut across archaeology and cultural and physical anthropology. Anthropology as a holistic social science. Seminar format uses reading, simulations and class discussions. Professionalism in the discipline stressed. Prerequisite: ANTH 131 and senior standing or instructor consent. Normal Grade Rules. 3 units.

ANTH 193. Behavioral Science in Practice
Capstone workshop for behavioral science majors. Students assess methods and knowledge of anthropology, psychology and sociology, and synthesize them by reflecting upon case studies of individual, organizational, community, and global issues. Emphasis is on cooperative learning, reflection and synthesis of skills and knowledge. Prerequisite: Senior standing, declared major in Behavioral Science or Behavioral Science double major. Normal Grade Rules. 3 units.

ANTH 195. Anthropology Practicum
Advanced practicum in archaeology, ethnography, physical anthropology or linguistics. Prerequisite: Instructor consent. Repeatable for credit. Credit / No Credit. 1-6 units.

ANTH 198. Special Projects
Independent research in cultural anthropology, physical anthropology or archaeology. Prerequisite: Upper division standing and instructor consent. Repeatable for credit. Credit / No Credit. 1-4 units.

ANTH 230. Theory in Practice
In-depth analysis of anthropological and related theory and accompanying methodology, emphasizing the use of theory in practice. Prerequisite: ANTH 131 or instructor consent. Normal Grade Rules. 3 units.

ANTH 231. Applications Core
Methods for the analysis of sociocultural systems, ethnographic evaluation, and program/design development. Emphasis on professionalism, project management, budgeting, ethics, and contracts. Prerequisite: ANTH 232, ANTH 105 or instructor consent. Normal Grade Rules. 3 units.

ANTH 232. Applications Core
Methods for the analysis sociocultural systems, ethnographic evaluation, and program/design development. Emphasis on professionalism, project management, budgeting, ethics, and contracts. Prerequisite: ANTH 231 or instructor consent. Normal Grade Rules. 3 units.

ANTH 233. Fields of Application
Survey of domains in which anthropological skills and knowledge are applied. Topics include health, business and industry, sustainable regions, and immigration. Emphasis is on opportunities for anthropological contributions. Corequisite: ANTH 231 or instructor consent. Normal Grade Rules. 3 units.
**ANTH 234. Advanced Research Methods**  
Advanced research methods including individual and group interviewing, structured observation, and formal analytical methods. Emphasis on data management, ethnographic writing, and presentation of data through different media.  
Prerequisite: ANTH 149 or equivalent.  
Normal Grade Rules  
3 units

**ANTH 235. Quantitative Methods**  
Advanced quantitative methods to gain comprehension of statistical analyses, especially in regards to predictive value for regional issues. Emphasis will be on understanding statistics, creating databases, using statistical software packages, and employing proper statistics.  
Prerequisite: STAT 95 or equivalent.  
Normal Grade Rules  
3 units

**ANTH 273. Systems Approach to Community Health Problems and Program Design**  
See HS 273.  
Repeatable for credit  
Normal Grade Rules  
3 units

**ANTH 280. Individual Studies**  
Advanced individual research and projects.  
Prerequisite: Instructor consent and department chair approval.  
Repeatable for credit  
Credit / No Credit  
1-4 units

**ANTH 287. Special Topics**  
Contemporary issues in applied and practicing anthropology not covered in other courses. Course is repeatable once for credit on different topic with advisor consent.  
Prerequisite: Graduate standing or instructor consent.  
Repeatable for credit when topic changes.  
Repeatable for credit  
Normal Grade Rules  
1-3 units

**ANTH 290R. Project/Thesis Supervision**  
Continued work on project or thesis.  
Pre-Requisite: Outstanding RP grade in a preceding semester in a project or thesis class  
Mandatory CR/NC/RP  
1 unit

**ANTH 297. Social Science Theory**  
See SOCS 297  
Normal Grade Rules  
3 units

**ANTH 298. Anthropology Project**  
Course consists of supervised units applying anthropology in a project, the documentation of that project and the evaluation of the project in a written report. Course is repeatable for credit in the same semester.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units

**ANTH 299. Master’s Thesis**  
Independent anthropological research conducted under supervision of faculty advisor.  
Prerequisite: Graduate standing.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units

**ORGANIZATIONAL STUDIES**

**UPPER DIVISION**

**ORGS 101. People & Organizations**  
Study of complex organizations in which people live their lives. Topics include organizational forms and functions; internal social and cultural dynamics; growth and change in material, social and symbolic environments; and ethical issues of organizational life.  
Prerequisite: Upper Division Standing  
Normal Grade Rules  
4 units

**ORGS 102. Organizations, Inquiry & Analysis**  
Development of skills to analyze and design organizations. Topics include analysis of environments and resources; use of technology; communication and decision-making; workflow and division of labor; and symbols. Research skills for understanding organizational values, patterns, processes and environments.  
Prerequisite: Upper Division Standing  
Normal Grade Rules  
4 units
Art and Art History Department Courses

ART

LOWER DIVISION

ART 001. Professional Preparation in Art
Introduction to skills and documents needed in preparation for professional careers in the arts. Intended for BA/BFA ART majors and minors.
Repealable for credit
Credit / No Credit
1 unit

ART 002. The Artist in Contemporary Culture
Introduces art beginners to roles that artists play in contemporary culture. Critical readings and problem-solving; principles of form and theory and research applied to real-world situations frequently confronted by contemporary artists.
Normal Grade Rules
3 units

ART 003. Medium and Message
This undergraduate seminar introduces intermediate-level artists to a research and project-based approach to artmaking with a focus on contemporary, idea-appropriate mediums and methods.
Normal Grade Rules
3 units

ART 012. Two-Dimensional Design and Color Concepts
Theories and applications of two-dimensional design and color in visual art and design. Studio practice.
Normal Grade Rules
3 units

ART 013. Three-Dimensional Design Concepts
Theories and applications of three-dimensional form in visual art and design. Studio practice.
Normal Grade Rules
3 units

ART 014. Color
Attributes of color. Studio practice exploring theories and creative use of color in visual art and design.
Normal Grade Rules
3 units

ART 024. Drawing I
Elements and principles of drawing. Studio practice emphasizing line, shape and light-dark used in visual art and design.
Normal Grade Rules
3 units

ART 025. Expressive Drawing
Drawing concepts emphasizing creative expression. Studio practice with a variety of methods and materials.
Prerequisite: ART 24.
Normal Grade Rules
3 units

ART 026. Drawing II
Observation and depiction of volume and perspective.
Prerequisite: ART 24.
Normal Grade Rules
3 units

ART 039. Multicultural Arts for Children
Focus on teaching arts of many cultures, places and times to young people (preschool through high school).
Misc/Lab: Lab 6 hours.
Normal Grade Rules
3 units

ART 042. Fiber Concepts
Introduction to basic vocabulary, materials and methods used in fiber and textile media. Course is repeatable for a total of 6 units.
Repealable for credit
Normal Grade Rules
3 units

ART 046. Introduction to Ceramics
Studio work in ceramics; a survey of methods used by contemporary artists. Includes use of the potter’s wheel, handbuilding techniques, clay preparation, glazing and firing for utilitarian and sculptural work.
Normal Grade Rules
3 units

ART 047. Introduction to Metalsmithing
Introduction to tools, materials and techniques for small scale metal work. Primer course for metalsmithing and jewelry.
Normal Grade Rules
3 units

ART 055. Life Drawing
Anatomy and representation of the human figure. Drawing from life. Course is repeatable for a total of 6 units.
Prerequisite: ART 24 and ART 26.
Repealable for credit
Normal Grade Rules
3 units

ART 061. Beginning Painting
Studio practice in selected media. Specific content, materials and subject matter may vary with instructors.
Prerequisite: ART 12, ART 14 and ART 24
Normal Grade Rules
3 units

ART 068. Beginning Sculpture: Object & Concept
Introduction to core sculptural media: woodworking, welding, mold-making, metal-casting and working with found objects. Emphasis on concept development and critical thinking.
Prerequisite: Art 13 or instructor consent.
Repeatable for credit
Normal Grade Rules
CAN ART 12
3 units

ART 074. Introduction to Digital Media
Fundamental concepts and methods of Digital Media production. Introduction to visualization software applications and web presentation techniques.
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ART 075. Introduction to Digital Video Art
Introduction of the fundamental skills, software and techniques involved in the production of Digital Video. Critical discourse and contemporary art theories will be explored.
Prerequisite: Upper division standing
Normal Grade Rules
3 units

ART 100W. Writing Workshop: Fine Arts
Advanced writing course for fine art majors, based upon philosophical issues and current professional practice in art. Clear analytical and critical writing in examination of these topics.
Prerequisite: Completion of core GE, ENGL 1B (with a grade of C or better), satisfaction of Writing Skills Test and upper division standing.
Note: Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE: Z
3 units

ART 101. Digital Media Art
Experimental applications of digital media art practice. Focus on information systems and structures.
Prerequisite: ART 074, ART 075 or instructor consent
Normal Grade Rules
3 units

ART 103. Art as System
Exploration of art as the experience of an information system. Methods and techniques for simulation, networks and information mapping.
Prerequisite: ART 101A, ART 101B. Admission to BFA in Digital Media Art.
Misc/Lab: Activity 6 hours.
Repealable for credit
Normal Grade Rules
3 units
ART 104. Interdisciplinary Seminar in Digital Media Art
Investigation of theoretical topics in digital media art and analysis of contemporary technology research issues.
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 105. Advanced Digital Video
Advanced exploration of digital video within the context of conceptual art practice. Focus on issues and applications of digital technology and critical thinking in art with specific focus on video, the Internet and alternative media applications. Course is repeatable for 6 units.
Prerequisite: ART 101B or permission of instructor.
Misc/Lab: Lab 9 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 106. Topics in Human Machine Interface
Concept design and exploration of methods involving computer controlled sensors and activators used in electronic sculpture, installation, environments or performance. Course is repeatable up to 9 units, when course topic changes.
Prerequisite: ART 101B or permission of instructor.
Misc/Lab: Lab 9 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 107. Advanced Projects in Digital Media Art
Advanced issues and applications of digital technology in art. Application of interactive technology in installation and performance. Emphasis on collaborative projects. Course is repeatable up to 6 units.
Prerequisite: ART 101B or permission of instructor.
Misc/Lab: Lab 9 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 108. Introduction to Game Studies
Introduction to the systems, design, history, and cultural analysis of games with emphasis on critical studies, development, technological literacy, markets and impact on society.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

ART 110. History and Theory of New Media
See ARTH 110.
Normal Grade Rules
3 units

ART 124. Drawing 3
Form and expression in Drawing. Emphasis may vary with instructor
Prerequisite: ART 024, ART 026
Normal Grade Rules
3 units

ART 131. Glaze Theory and Applications
Formulation of clay bodies, glazes and glasses, testing procedures, cost analysis, toxicology, and appropriate application to individual work.
Prerequisite: ART 46 or equivalent.
Repeatable for credit
Normal Grade Rules
3 units

ART 132. Topics in Intermediate Ceramics
Investigation of ceramic form and surface design with emphasis on the vessel. Development of skills on the potter’s wheel and in glazing, kiln loading and firing. Included are raku, salt, earthenware, stoneware and porcelain.
Repeatable for up to 9 units of credit when course topic changes.
Prerequisite: ART 46 or instructor consent
Repeatable for credit
Normal Grade Rules
3 units

ART 133. Topics in Ceramic Sculpture
Focus on handbuilding and nontraditional techniques in clay and related media. Includes gallery and studio visits. Repeatable for Credit when topic changes, up to 3 times.
Prerequisite: ART 13, ART 46 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 134. Topics in Advanced Ceramics
Focus on personal stylistic development, individual critiques and portfolio preparation. Includes gallery and studio visits. Repeatable for Credit when topic changes, up to 3 times.
Prerequisite: ART 132 or ART 133.
Repeatable for credit
Normal Grade Rules
3 units

ART 135. Topics in Moldmaking for Artists
Introduction to moldmaking for upper division/graduate students. Course will include techniques for rubber molds for wax or plastic, molds for pressed clay, slip casting and waste molds. Course is repeatable for a total of 6 units.
Prerequisite: ART 13 or instructor consent.
Notes: Offered only occasionally.
Repeatable for credit
Normal Grade Rules
3 units

ART 136. Ceramic Surfaces and Kilns
Basic technology of glazing and firing ceramic objects; contemporary principles of design, construction and firing of organic, fossil fuel and electric kilns. Course is repeatable for a total of 6 units.
Prerequisite: ART 46.
Repeatable for credit
Normal Grade Rules
3 units

ART 137. Figure Modeling
Representation of the human figure in three dimensions. Sculpting in clay from a live model. Course is repeatable for a total of 6 units.
Prerequisite: ART 13 and ART 55 or instructor consent.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 138. Studio Art Experiences for Young People
Two and three-dimensional art experiences using materials commonly found in schools with content focused upon perception, expression and forms of criticism and aesthetics appropriate for young people.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ART 139. Advanced Multicultural Art
Varied means of expression and ways of learning about cross-cultural imagery, values and beliefs through correlated studio experiences in the visual and performing arts.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ART 140. Topics in Glass
Introduction to glass working techniques, chemistry, history and concept. Basic glass blowing, sand casting, slumping, fusing, cold working, stained glass and gluing techniques. Taught through a series of hands-on projects. Repeatable for up to 9 units when topic changes.
Normal Grade Rules
3 units

ART 141. Topics in Advanced Glass
Technical and esthetic aspects of glass for sculpture and design. Advanced blowing, kiln casting, mold making, lamp working, lathe techniques and surface treatments. Repeatable for up to 9 units of credit, when topic changes.
Prerequisite: ART 140, ART 13 or instructor consent.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
3 units
ART 147. Topics in Metalsmithing and Jewelry
Technical and esthetic aspects of metalsmithing and jewelry design. Fabricating, surfacing, soldering, raising, forming and forging. Repeatable for 12 units of credit when topic changes.
Prerequisite: ART 47.
Repeatable for credit
Normal Grade Rules
3 units

ART 149. Topics in Jewelry and Small Sculpture
Technical and esthetic aspects of metalcasting for small-scale sculpture and jewelry: Pattern materials, gating techniques, burnout procedure, vacuum casting, centrifugal casting and finishing. Repeatable for 12 units of credit when topic changes.
Prerequisite: Upper division standing or permission of instructor.
Repeatable for credit
Normal Grade Rules
3 units

ART 151. Printmaking- Serigraphy
Screen printing and related photographic processes. Studio practice.
Social Grade Rules
3 units

ART 152. Topics in Lithography
Studio practice. A comprehensive study of the practice of stone and metal plate lithography. Course is repeatable for a total of 9 units when topic changes.
Prerequisite: ART 61 (or equivalent).
Repeatable for credit
Normal Grade Rules
3 units

ART 153. Topics in Intaglio Processes
Studio practice towards an understanding of the methods, techniques and procedures necessary to make intaglio prints. Course is repeatable for a total of 9 units when course topic changes.
Prerequisite: ART 61 (or equivalent).
Repeatable for credit
Normal Grade Rules
3 units

ART 154. Papermaking
Two and three-dimensional handmade paper processes, including forming, coloring and casting.
Prerequisite: ART 61, ART 162 or ART 68.
Repeatable for credit
Normal Grade Rules
3 units

ART 155. Topics in Monotype
Studio practice. An investigation of the methods, techniques and syntax of the monotype and monoprint. Course is repeatable for total of 9 units when course topic changes.
Prerequisite: ART 61 (or equivalent).
Repeatable for credit
Normal Grade Rules
3 units

ART 156. Intermediate Drawing
Further development of essential skills and abilities in the representation of the solid form and figure. Course is repeatable for credit up to 6 units.
Prerequisite: ART 24, ART 25, ART 26 or ART 28, ART 55 or ART 112A.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 157. Intermediate Life Drawing
Exposure to a wide range of stylistically diverse figurative compositions from which students can further develop their own visual vocabulary. Course is repeatable for credit up to 6 units.
Prerequisite: ART 24, ART 26, ART 55 and ART 112A or ART 156.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 158. Topics in Drawing III
Form and expression in drawing. Selected media. Course Repeatable for up to 9 units of credit when topic changes.
Prerequisite: Art 025 or Art 026.
Repeatable for credit
Normal Grade Rules
3 units

ART 159. Advanced Life Drawing
Course is repeatable for a total of 9 units.
Prerequisite: 3 units of ART 55 and 3 additional units of ART 55 or ART 112B.
Repeatable for credit
Normal Grade Rules
3 units

ART 160. Watercolor
Painting with various water base media.
Prerequisite: ART 12, ART 14 and ART 24
Normal Grade Rules
3 units

ART 162. Intermediate Painting II
Intermediate Painting II expands and builds on the concepts and skills introduced in ART 164A-Intermediate Painting I, with the goal of developing more complex content and process in preparation for Advanced Painting.
Prerequisite: ART 61 and ART 164A or instructor consent.
Normal Grade Rules
3 units

ART 165. Topics in Figure Painting
Figure and portrait painting from the model. Repeatable for up to 9 units of credit when course topic changes.
Prerequisite: ART 55, ART 61 and ART 164 (or equivalent).
Repeatable for credit
Normal Grade Rules
3 units

ART 166. Topics in Advanced Painting
Emphasis may vary with instructor. Repeatable for 9 units of credit when topic changes.
Prerequisite: ART 61 ART 164A, ART 164B and ART 165 or equivalent, or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 167. Woodworking
Introduction to the physical structure of wood and to the design and construction of furniture and sculptural objects in wood. Also, an introduction to the historical use of wood joinery in man-made objects. Course is repeatable for 6 units of credit.
Prerequisite: ART 13 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 169. Topics in Metal Sculpture
Conception and creation of three-dimensional aesthetic form using metal techniques including casting, welding, fabrication and other forming processes. Repeatable for up to 9 units when topic changes.
Prerequisite: ART 13.
Repeatable for credit
Normal Grade Rules
3 units

ART 170. Topics in Fabricated Sculpture
Fabricated Sculpture includes welding training, a concise history of fabricated metal sculpture since 1945, and studio time wherein the student practices skills and executes three steel sculptures. Repeatable for up to 9 units of credit when course topic changes.
Prerequisite: ART 13.
Misc/Lab: Lab 6 hours.
Repeatable for credit
Normal Grade Rules
3 units
ART 171. Advanced Sculpture
Self expression and advanced techniques in sculpture. Emphasis will be placed on individual development, current directions and goals.
Prerequisite: 6 units of sculpture.
Repeatable for credit
Normal Grade Rules
3 units

ART 172. Intermediate Sculpture: System/Structure
This is an intermediate-level sculpture class with a focus on contemporary materials and processes. Students will make sculptural responses to timely issues raised in course readings and lectures.
Prerequisite: ART 68 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 173. Topics in Installation Art
Exploration of cross-disciplinary artmaking, with an emphasis on conceptual development and critical dialogue. Students make installation art and site-specific artworks using a variety of techniques and processes, including time-based media. Course can be repeated for up to 6 units when course topic changes.
Prerequisite: ART 13 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 174A. Museum and Gallery Operations
Theoretical and technical problems of gallery and museum work including administration, security and curatorship.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ART 174B. Internship: Museum and Gallery Operations
Supervised internship in museum or gallery. Experience including installation, curating and administration. Course is repeatable for a total of 6 units.
Prerequisite: ART 174A.
Repeatable for credit
Credit / No Credit
3 units

ART 175. Special Topics in Studio Art
Varying concepts, media or techniques. Emphasizing individual expression, professional ability and recent movements and directions in art.
Prerequisite: Upper division standing in art.
Repeatable for credit
Normal Grade Rules
3 units

ART 177. Professional & Business Practices
An introduction to the ways and means necessary to build a career in the arts while successfully negotiating its challenges, this course will provide information on portfolio development and professional and business practices essential for the practicing artist.
Prerequisite: Upper division or graduate standing.
Normal Grade Rules
3 units

ART 178. Art Field Work
Professional practice in a selected field.
Prerequisite: Application for assignment made preceding semester. Supervisor and school approval.
Repeatable for credit
Credit / No Credit
1-3 units

ART 179. Special Problems in Art
Individual study on a tutorial basis.
Prerequisite: Qualified seniors or graduates.
Repeatable for credit
Credit / No Credit
3 units

ART 180. Individual Studies
Special topics or projects by arrangement with instructor. Course is repeatable up to 4 units of credit toward graduation.
Prerequisite: Majors or minors with School of Art and Design consent.
Repeatable for credit
Credit / No Credit
1-3 units

ART 197. BA Senior Project
Creation of a studio art or design capstone project consisting of new work in media selected by student to be documented and presented to studio or design faculty. Prerequisite: 15 units of upper division work in the major.
Credit / No Credit
3 units

ART 198. BFA Seminar
Preparation for BFA project and postgraduate career planning, this course includes field trips, class discussions and studio visits with art professionals.
Prerequisite: Prior acceptance in the B.F.A. program.
Normal Grade Rules
3 units

ART 198D. BFA Seminar in Digital Media Art
Preparation for BFA project and postgraduate career planning. Includes field trips, discussion and studio visits.
Prerequisite: Senior status, BFA status in Digital Media Art.
Normal Grade Rules
3 units

ART 199. BFA Project
A project demonstrating professional competence in area of concentration. A gallery exhibition with the approval of the student’s advisory committee is required.
Prerequisite: 30 units of upper division art, admission to the BFA program and ART 198, or ART 178 with advisor’s approval.
Credit / No Credit
3 units

GRADUATE

ART 200W. Professional Writing in Contemporary Art
Graduate seminar focusing on issues and practices of writing about contemporary art, including artist statements, exhibition catalogs and art criticism.
Prerequisites: Graduate Standing in Art and Design
Normal Grade Rules
3 units

ART 201. Aspects of Criticism
Examines the basis for critical judgments and explores the relationship of language and its expression to the experience of art.
Prerequisite: Classified or conditionally classified status in art.
Repeatable for credit
Normal Grade Rules
3 units

ART 202. Seminar in Spatial Arts
Investigation and analysis of problems related to spatial and/or pictorial art. Emphasis upon creation and critique of student work. Repeatable for credit.
Prerequisite: Classified status in art or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 204. Seminar in Pictorial Arts
An investigation of advanced issues related to pictorial art including classroom discussions, critiques and field trips.
Prerequisite: Classified status in art or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 208. Graduate Photography Critique
Professional practice in the discipline of fine art photography is multi faceted and complex. To embrace this diversity, Art 208 Graduate Photography Critique offers rotating topics that influence portfolio development, emphasize an ongoing critique of work, and build a healthy professional practice. Repeatable for up to 18 units of credit when course topic changes.
Prerequisite: Classified status in art or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
ART 210. Seminar in Digital Media Art  
Theoretical discourse involving art and information culture. Review and analysis of contemporary theory and critical literature. Emphasis on collaborative activities and art practice.  
Prerequisite: Classified status in art or instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

ART 212. Image as Icon  
An examination of a particular theme in contemporary art practice. Course may be repeated for up to a total of 9 units.  
Prerequisite: Instructor consent (upper division students).  
Repeatable for credit  
Normal Grade Rules  
3 units

ART 217. Tutorials in Pictorial Arts  
Individual projects in painting, drawing and printmaking supervised by an instructor.  
Prerequisite: Classified or conditionally classified status in art and instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

ART 218. Seminar in the Theory and Criticism of Contemporary Art  
A historical approach to the thought of major critics and theoreticians of contemporary art.  
Prerequisite: ARTH 191A and admission to classified MFA status in art or instructor consent.  
Normal Grade Rules  
3 units

ART 219. Tutorials in Spatial Art  
Individual projects in sculpture, installation, performance and other 3-D media supervised by an instructor.  
Prerequisite: Classified or conditionally classified status in art and instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

ART 220. Tutorials in Digital Media Art  
Individual problems in selected area of research or practice.  
Prerequisite: Classified status in art and instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

ART 221. Tutorials in Design  
Individual projects in specialized design areas supervised by an instructor.  
Prerequisite: Classified or conditionally classified status in art and instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

ART 222. Tutorials in Photography  
Individual projects employing photographic media supervised by an instructor.  
Prerequisite: Classified or conditionally classified status in art and instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

ART 260. Special Tutorials in Art  
Individual problems in a selected art area supervised by an instructor.  
Prerequisite: Classified or conditionally classified status in art and instructor consent.  
Repeatable for credit  
Credit / No Credit  
3 units

ART 276. Artists Teaching Art  
Seminar will examine theoretical and practical issues of art education which relate to traditional institutions of higher learning as well as to other teaching opportunities in the community.  
Prerequisite: Classified graduate status or instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

ART 281. Interdisciplinary Critique Seminar  
Interdisciplinary peer group critiques and discussion of individual student work. Repeatable for up to 9 units when topic changes.  
Prerequisite: Admission to the MFA in Art program.  
Repeatable for credit  
Normal Grade Rules  
3 units

ART 282A. Seminar in the Theory and Criticism of Contemporary Art  
A historical approach to the thought of major critics and theoreticians of contemporary art.  
Prerequisite: ARTH 191A and admission to classified MFA status in art or instructor consent.  
Normal Grade Rules  
3 units

ART 282B. Seminar in Contemporary Art  
An examination of a particular theme in contemporary art theory. Repeatable for credit.  
Prerequisite: ARTH 191A and admission to classified MFA status in art or instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

ART 290R. Thesis/Project Supervision  
This course satisfies the requirement that all graduate students must remain enrolled during semesters in which they are working solely on their theses or projects, for which they have previously received but not cleared an RP grade.  
Prerequisite: Existing RP grade in a graduate-level thesis or project course  
Repeatable for credit  
Mandatory CR/NC/RP  
1 unit

ART 297A. Master’s Special Study  
Advanced individual research in an area closely related to the master’s thesis, research or project. Course may be repeated for a total of 6 units.  
Prerequisite: Acceptance of qualifications for candidacy by Art Graduate Committee and permission of Thesis, Research or Project Committee chair.  
Repeatable for credit  
Credit / No Credit  
3 units

ART 297B. Master’s Project  
Advanced projects in Creative Expression.  
Prerequisite: Admission to candidacy for the master’s degree in art.  
Repeatable for credit  
Credit / No Credit  
3 units

ART 298A. MFA Special Study  
Advanced individual research in an area closely related to the MFA in Art project.  
Prerequisite: Admission to candidacy for the MFA in Art degree.  
Repeatable for credit  
Credit / No Credit  
3 units

ART 298B. MFA Project  
A creative project of professional caliber.  
Prerequisite: Admission to candidacy for the MFA in Art degree.  
Repeatable for credit  
Credit / No Credit  
3 units

ART 299. Master’s Thesis or Project  
Advanced problems in research. Course may be repeated for a total of 6 units.  
Prerequisite: Admission to candidacy for the master’s degree in art.  
Repeatable for credit  
Mandatory CR/NC/RP  
3 units

ART EDUCATION  

UPPER DIVISION  
ARED 150. Field Experience in the Arts  
Provides opportunities for those considering teaching, K-12 levels, to interact with outstanding teachers of the arts in the region through structured field experiences in classrooms, reflective writing, community service, and weekly discussion in a seminar setting.  
Prerequisite: ART 138 or ART 139, upper division standing, or instructor consent.  
Normal Grade Rules  
3 units
ARED 1841. Student Teaching for Art Individualized Interns
Supervised teaching in art class(es) in the public school where the student is employed as an Individualized Intern. Course is repeatable for a total of 12 units.
Prerequisite: Admission to Single Subject Credential Program; art advisor and Single Subject Coordinator consent.
- Repeatable for credit
- Credit / No Credit
- 2-4 units

ARED 184Y. Student Teaching II - Classroom Teaching
Minimum 80-120 class periods of classroom, teaching laboratory or field teaching in appropriate single subjects, grades K-12 and related teaching activities and seminar.
Prerequisite: Major and Education Department joint approval.
- Repeatable for credit
- Credit / No Credit
- 4-6 units

ARED 184Z. Student Teaching III - Classroom Teaching
Notes: May be in different subjects/school and will be at a different grade level. See ARED 184Y.
- Repeatable for credit
- Credit / No Credit
- 4-6 units

ARED 338. Principles of Art Education
Analysis of the function of art in secondary schools; survey of literature on art education; organization and presentation of demonstration lessons.
Prerequisite: Graduate standing or instructor consent.
- Normal Grade Rules
- 3 units

ARED 365. Field Experience Seminar in Art Education
This companion to the Phase II/III student teaching experience in the Single Subject Credential Program provides a forum for discussing field experiences and prepared candidates for the program’s capstone assessment: The performance Assessment for California Teachers (PACT).
Prerequisite: EDCS 184X
Corequisite: ARED 184Z (except for candidates in the Single Subject Internship Program).
- Credit / No Credit
- 1 unit

ART HISTORY AND VISUAL CULTURE

LOWER DIVISION

ARTH 010. Art Appreciation
Introduction to art for the general student. Illustrated lectures on creative projects in painting, sculpture and architecture from various historical periods and cultures. Emphasis on style, form and meaning. Focus varies with instructor.
- Normal Grade Rules
- 3 units

ARTH 011. Modern Art History
Introductory survey of 20th and 21st century art, its history, and its contexts. Related developments in illustration, design, other forms of art production, and cultural institutions such as museums, galleries, publications also considered.
Pre/Corequisite: ART 12 or ART 13 or PHOT 40 or instructor consent.
- Normal Grade Rules
- 3 units

ARTH 015. Intro to Visual Culture
Key ideas and debates pertaining to visual culture considered through interdisciplinary study of art and media as significant social forces.
- Normal Grade Rules
- GE: C1
- 3 units

ARTH 070A. Art History, Prehistoric to Medieval
Western painting, sculpture and architecture from Prehistoric times through the Middle Ages. Important art works of Egypt, Greece, Rome and Medieval Europe.
- Normal Grade Rules
- GE: C1
- 3 units

ARTH 070B. Art History, Renaissance to Modern
Western painting, sculpture and architecture from the Renaissance to the present. Masters of the Renaissance, Baroque, Rococo, Neo-Classic, Romantic and Modern periods, including Da Vinci, Michelangelo, Durer, Rembrandt, Vermeer, David, Delacroix and Monet.
- Normal Grade Rules
- GE: C1
- 3 units

ARTH 070C. Arts of Asia
Major trends in the art of China, India and Japan, as well as Southeast and Central Asia and Korea, from the Neolithic period to the twentieth century.
- Normal Grade Rules
- GE: C1
- 3 units

ARTH 072. Design in Society
Considers the cultural role of design in addressing human needs in shaping the environment, in providing shelter, clothing, utilitarian objects, and transportation, in visual communication for political and entertainment purposes.
- Normal Grade Rules
- GE: C1
- 3 units

ARTH 080. The Applied Arts in Interior Design
International survey of furniture and interior architectural details from the fifteenth century to the present. Emphasis on nineteenth and twentieth century figures who have made a significant impact in the field.
- Normal Grade Rules
- 3 units

UPER DIVISION

ARTH 100W. Writing Workshop for Art History and Visual Culture
Advanced writing course for art history and visual culture majors, based upon current professional practice of research and writing. Clear analytical and critical writing in examination of art history and visual culture.
Prerequisite: Completion of core GE, ENGL 1B (with a grade of ‘C’ or better), satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
- Normal Grade Rules
- GE: Z
- 3 units

ARTH 101. Introduction to Practice of Art History
Introduction to practice of art history including visual analysis, research tools, and examination of professional options.
Prerequisite: Art History and Visual Culture major or instructor consent.
- Normal Grade Rules
- 3 units

ARTH 110. History and Theory of New Media
The history of art and technology introducing contemporary critical theory and practice. Course will address digital visualization, simulation, interactive network technologies in the arts and speculate on the artistic implications of advances in engineering and science.
Prerequisite: ARTH 070B or ARTH 072 or instructor consent.
- Normal Grade Rules
- 3 units
ARTH 126. History of Photography
Technical developments and aesthetic trends in photography traced from its invention in the nineteenth century to the present day. Slide presentations, discussions, field trips. Prerequisite: ARTH 70B or instructor consent. Normal Grade Rules 3 units

ARTH 152. Visual Culture and Jewish Identity
Jewish Art explores the diversity of Jewish art as it responds to changing social, political, and economic climates from late antiquity to the present. Repeatable when instructor changes. Prerequisite: Upper division standing or instructor consent. Repeatable for credit Normal Grade Rules 3 units

ARTH 160. Modern Architecture
Development of modern architecture from the late 19th century to the present, including Richardson, Sullivan, Wright, Le Corbusier, the Bauhaus, Mies van der Rohe, Meier and Gehry. Prerequisite: ARTH 070B, ARTH 072 or instructor consent. Normal Grade Rules 3 units

ARTH 161. Contemporary Architecture
History of contemporary architecture since 1945, covering major trends and issues in a global context; includes Louis Kahn, Frank Gehry and Zaha Hadid. Prerequisite: ARTH 70B or instructor consent. Normal Grade Rules 3 units

ARTH 162. California Architecture
History of architecture in California since 1700, covering major architectural developments in a national and transnational context; includes Bernard Maybeck, Richard Neutra and Morphosis. Prerequisite: ARTH 70B or instructor consent. Normal Grade Rules 3 units

ARTH 163. Twentieth Century Urban Design
History of urban design since 1900, covering theories and practices of urban design in the industrialized world; includes Camillo Sitte, Le Corbusier and Frank Lloyd Wright. Prerequisite: ARTH 70B or URBP 151 or instructor consent. Normal Grade Rules 3 units

ARTH 174A. Museum and Gallery Operations
See ART 174A. Normal Grade Rules 3 units

ARTH 174B. Internship: Museum and Gallery Operations
See ART 174B. Repeatable for credit Credit / No Credit 3 units

ARTH 175. Theories of Art History and Art Criticism
The study of approaches used by professional art historians and critics. The focus will be on 20th century writers who helped shape the development of contemporary art history and criticism. Prerequisite: Upper division standing, 6 units of ARTH 70A, ARTH 70B, and/or ARTH 70C or instructor consent. Repeatable for credit Normal Grade Rules 3 units

ARTH 176A. Graphic Design History and Theory
The history of graphic design and typography with an emphasis on the 20th century. Define technological, historical and theoretical concerns and influences on individuals and movements in graphic design. Prerequisite: ARTH 072, completion of Area Z, or instructor consent. Normal Grade Rules 3 units

ARTH 176B. Industrial Design in Society
Design and the crafts of the nineteenth and twentieth centuries. Morris, Van de Velde, Mackintosh and Eames. Prerequisite: ARTH 072 or instructor consent. Normal Grade Rules 3 units

ARTH 178. Art History Field Work
Professional practice in a selected field of Art History. Prerequisite: Application for assignment made preceding semester. Supervisor and school approval. Repeatable for credit Credit / No Credit 1-3 units

ARTH 180. Individual Studies in Art History
Special topics or projects by arrangement with instructor. Course is repeatable up to 4 units of credit toward graduation. Prerequisite: Majors or minors with School of Art and Design consent. Repeatable for credit Normal Grade Rules 1-4 units

ARTH 181. Special Topics in Art History
In-depth analysis of a selected art historical topic. Prerequisite: ARTH 70A and ARTH 70B or instructor consent. Repeatable for credit Normal Grade Rules 3 units

ARTH 182A. Art of the Americas
A survey of architecture, ceramics, metalwork, sculpture, painting and textiles of North, South, and Meso American cultures. Prerequisite: ARTH 70A or instructor consent. Normal Grade Rules 3 units

ARTH 182B. American Art
From the Colonial Period to 1940. Social context of America. Prerequisite: Upper division standing. Normal Grade Rules 3 units

ARTH 183A. Art of Egypt and Mesopotamia
The Arts of Egypt, Sumer, Akkad, Babylonia, Assyria, Anatolia, Hittites, and Persia (Elamite to Sassanian). Prerequisite: ARTH 70A or instructor consent. Normal Grade Rules 3 units

ARTH 183B. Art of Islam-Early Islam to the Seljuks
Focus on the varied Islamic art and architecture from the 7th century to the 13th century, early Islamic period through the Seljuks. Prerequisite: Upper division standing or instructor consent. Normal Grade Rules 3 units

ARTH 183C. Art of Islam 13th-19th Century
This course will focus on the varied Islamic art and architecture from the 13th century to the 19th century, from Mongols through the Ottomans. Prerequisite: Upper division standing or instructor consent. Normal Grade Rules 3 units

ARTH 185. Art of the Classical World
Focus on the ancient arts of Greece, Roman and Etruria from the 8th century BC through the 4th century AD. Major monuments: Parthenon, Altar of Zeus at Pergamon, Ara Pacis and Forum of Trajan. Prerequisite: ARTH 70A or instructor consent. Normal Grade Rules 3 units

ARTH 185A. Greek Art
Art of Greece from the Bronze Age through Hellenistic. Emphasis on the art in its historical, social, and cultural contexts. Major monuments: Palace at Knossos, Parthenon, Aphrodisite of Knidos, and Pergamon Altar. Prerequisite: ARTH 70A or instructor consent. Normal Grade Rules 3 units
ARTH 185B. Roman/Etruscan Art
Art of Etruria and Rome from c 1000 B.C.E. to 337 C.E. Emphasis on art in its historical, social and cultural contexts. Major monuments: Etruscan tombs, Pompeii, Ara Pacis, Pantheon and Hadrian’s Villa.
Prerequisite: ARTH 70A or instructor consent.
Normal Grade Rules
3 units

ARTH 186A. Medieval Art from Fourth to Eleventh Centuries
Art and architecture of the early Christian and Byzantine world and early medieval Europe.
Prerequisite: ARTH 70A or instructor consent.
Normal Grade Rules
3 units

ARTH 186B. Medieval Art from Eleventh to Fifteenth Centuries
Europe from year 1000 to the beginning of the Renaissance. Major monuments: Durham, Moissac, Chartres, Notre Dame-Paris and Reims.
Prerequisite: ARTH 70A or instructor consent.
Normal Grade Rules
3 units

ARTH 187A. Art of the Italian Renaissance, Fifteenth Century
Early Renaissance art and architecture. Masaccio, Botticelli, Brunelleschi and Donatello.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 187B. Art of the Italian Renaissance, Sixteenth Century
High Renaissance and Mannerism in Italy. Leonardo, Michelangelo, Raphael and Titian.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 187C. The Art of Renaissance Venice
A study of Venetian art and its urban ideology, 11th through 18th century, emphasizing the great painters and architects of the Renaissance (Carpaccio, Bellini, Titian, Tintoretto and Veronese, Mauro Codussi, Sansovino and Palladio).
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 188A. Northern Renaissance Fourteenth and Fifteenth Centuries
Survey of art of Netherlands, France and Bohemia from mid-fourteenth through fifteenth century. Principal artists covered include the Limbourg Brothers, Van Eyck, Van der Weyden, Memling and Fouquet. Emphasis on northern painting, manuscripts, tapestry traditions, iconography and social history of northern European art.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 188B. Northern Renaissance, Sixteenth Century
Survey of fifteenth and sixteenth century art of Netherlands, France and Germany. Principal artists covered include Bosch, Durer, Cranewald, Holbein and Bruegel. Emphasis on northern painting, printmaking traditions, iconography, social history of northern European art.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 189A. Baroque Art and Architecture in Italy and France
The art and architecture of Italy and France in the late 16th and 17th centuries. Broad trends and issues, artists such as Bernini, Caravaggio, the Carracci, Borromini, Poussin, Mansart.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 189B. Northern Baroque Art and Architecture
Art and architecture of Spain, the Low Countries, Germany, Austria in the 17th and 18th centuries. Artists such as Velazquez, Rubens, Rembrandt, Vermeer and Goya.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 190A. Art of the Nineteenth Century
Western Europe from Neoclassicism through Post-Impressionism including David, Delacroix, Goya, Manet, Monet, Cassatt, Cezanne, Van Gogh and Gauguin.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 190B. Early Modernist Art
Critical investigation of modern art from the 1880’s (Post Impressionism) to World War I with an emphasis on painting and sculpture but some attention paid to architecture, photography, printmaking and design.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 190C. 20th Century Art: from Dada to Pop
Critical investigation of modernist art from World War I to the 1960s (from Dada to Pop art) with an emphasis on painting and sculpture but some attention paid to architecture, photography, printmaking and design.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 191A. Issues in Contemporary Art
A critical investigation of a theme which bears on the arts from mid-century to the present, looking closely at major artists and trends in order to understand their philosophies, objectives, styles, and contexts. Course is repeatable for a total of 6 units.
Prerequisite: ARTH 70B.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 191B. Women in Art
Contributions made to Western culture by women involved in the arts from the Middle Ages to the present and the influence on art of attitudes held about women.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 192A. Modern Design
History of design philosophy and practice from the Industrial Revolution to the present including Art Nouveau and Art Deco, the Bauhaus, International Style, Functionalism vs. Formalism, Post-Modern and Deconstructivism.
Prerequisite: ARTH 072, completion of Area Z, or instructor consent.
Normal Grade Rules
3 units

ARTH 192C. History of Interior Design
Survey of interior design through historical, political, social, economic, technological, and aesthetic factors that shape the built environment. Design will be analyzed formally and through parallel developments in the arts.
Prerequisite: ARTH 070B or ARTH 072, completion of Area Z, or instructor consent.
Normal Grade Rules
3 units

ARTH 193A. Worlds of Art and Culture
Focuses on the use of art images as primary sources for the study of cultural development in a globalized context and ways in which past cultures and their interactions influence the modern world.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units
ARTH 193B. East Meets West in Art
Comparative study of Eastern and Western art. Emphasis on cross-fertilization. Historical and cultural backgrounds. Includes lectures, discussions and presentations. Research or art project and paper required.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing; one art history course. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
   Normal Grade Rules
   GE: V
   3 units

ARTH 194A. Art of China
Architecture, sculpture and painting in China from prehistoric times to the Republic.
Prerequisite: Upper division standing or instructor consent.
   Normal Grade Rules
   3 units

ARTH 194B. Art of India and South East Asia
Major artifacts of South Asia and Southeast Asia, including India, Ceylon, Burma, Thailand, Cambodia, Vietnam and Indonesia.
Prerequisite: Upper division standing or instructor consent.
   Normal Grade Rules
   3 units

ARTH 195. Art of Japan
Architecture, sculpture and painting in Japan from prehistoric times to Edo era.
Prerequisite: Upper division standing or instructor consent.
   Normal Grade Rules
   3 units

ARTH 197A. The Art of Africa
Major art styles of Africa. Traditional tribal styles of the Sub-Saharan region. Paintings, sculpture and artifacts from ancient times to the contemporary.
Prerequisite: Upper division standing or instructor consent.
   Normal Grade Rules
   3 units

ARTH 199. Art History Capstone Seminar
This seminar explores art history as an academic discipline. Topics include: discovering subfields within art history; constructing art historical arguments; and the methods and practices of art history.
Prerequisites: ARTH 70A or 70C, ARTH 70B, ARTH 100W
   Normal Grade Rules
   3 units

ARTH 200. History of Art in Europe
Directed group research in art of late 20th century. In-Depth study of art and culture. Research project required. Course is repeatable for up to 9 units of credit when course topic changes. Repeatable for credit
   Normal Grade Rules
   3 units

ARTH 201. Seminar in Ancient Art
Directed group research in area of Egyptian, Mesopotamian, Minoan-Mycenaean, Greek, Etruscan or Roman Art History on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes.
Prerequisite: At least two upper division art history courses or instructor consent.
   Repeatable for credit
   Normal Grade Rules
   3 units

ARTH 204. Seminar in Medieval Art
Directed group research in area of European Medieval art history on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes.
Prerequisite: At least two upper division art history courses or instructor consent.
   Repeatable for credit
   Normal Grade Rules
   3 units

ARTH 205. Seminar in Renaissance Art
Directed group research in area of European art history of Renaissance period on topic designated by instructor. Research project required. Course is repeatable for up to 9 units of credit when course topic changes.
Prerequisite: At least two upper division art history courses or instructor consent.
   Repeatable for credit
   Normal Grade Rules
   3 units

ARTH 206. Seminar in Baroque Art
Directed group research in area of European or Latin American art history of Baroque period on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes.
Prerequisite: At least two upper division art history courses or instructor consent.
   Repeatable for credit
   Normal Grade Rules
   3 units

ARTH 207. Seminar in Nineteenth Century Art
Directed group research in area of European or American art of nineteenth century on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes.
Prerequisite: At least two upper division art history courses or instructor consent.
   Repeatable for credit
   Normal Grade Rules
   3 units

ARTH 208. Seminar in Twentieth Century Art
Directed group research in area of European or American art of twentieth century on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes.
Prerequisite: At least two upper division art history courses or instructor consent.
   Repeatable for credit
   Normal Grade Rules
   3 units

ARTH 275. Seminar in Twentieth Century Art
Directed group research in area of European or American art of twentieth century on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes.
Prerequisite: At least two upper division art history courses or instructor consent.
   Repeatable for credit
   Normal Grade Rules
   3 units

ARTH 276. Seminar in Oriental Art
Directed group research in area of Asian art on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes.
Prerequisite: At least two upper division art history courses or instructor consent.
   Repeatable for credit
   Normal Grade Rules
   3 units

ARTH 277. Seminar in Historiography
Directed group research in theories and methodologies of art history. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes.
Prerequisite: At least two upper division art history courses or instructor consent.
   Repeatable for credit
   Normal Grade Rules
   3 units

ARTH 278. Seminar in Myth and Symbol
Directed group research in sources and meanings of myths and symbols. Research projects required. Repeatable for up to 9 units of credit when course topic changes.
Prerequisite: At least two upper division art history courses or instructor consent.
   Repeatable for credit
   Normal Grade Rules
   3 units

ARTH 279. Seminar in Interdisciplinary Studies
Directed group research in examination of relationship of art history to other academic disciplines on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes.
Prerequisite: At least two upper division art history courses or instructor consent.
   Repeatable for credit
   Normal Grade Rules
   3 units
### LOWER DIVISION

#### PHOT 040. Beginning Photography
A Beginning photography course which introduces basic aesthetic issues in (primarily black and white) image making. Introduces photographic technique utilizing digital cameras, electronic image processing and digital printing. Requires a DSLR (digital single lens reflex) type camera. Requires Adobe Lightroom.

Normal Grade Rules
3 units

#### PHOT 110. Black and White Photography
A traditional darkroom photography class which introduces black and white film developing, fiber based printing, and image manipulation and presentation techniques. Taught with traditional film and photo paper; requires a film camera, limited number of which department can loan students.

Prerequisite: PHOT 40.
Normal Grade Rules
3 units

#### PHOT 111. Color Photography
An intermediate course introducing principles of color photography, color theory, a refined use of the camera and digital printing techniques. Requires a DSLR (digital single lens reflex) type camera. Requires Adobe Lightroom and Adobe Photoshop.

Prerequisite: PHOT 40.
Normal Grade Rules
3 units

#### PHOT 112. Color Photography
An intermediate course introducing principles of color photography, color theory, a refined use of the camera and digital printing techniques. Requires a DSLR (digital single lens reflex) type camera. Requires Adobe Lightroom and Adobe Photoshop.

Prerequisite: PHOT 40.
Normal Grade Rules
3 units

#### PHOT 113. Alternative Photo Media
Explores historical, handmade photographic printing processes which open avenues of expression unavailable through contemporary photographic processes. Cyanotype, Van Dyke, and gum bichromate techniques are covered, as well as creating traditional and digital negatives for contact printing.

Prerequisite: PHOT 040
Normal Grade Rules
3 units

#### PHOT 114. Advanced Black and White Photography
An advanced exploration of traditional silver based film and darkroom printing, the use of view cameras, and the Zone System. Provides students with the opportunity to explore qualities of expression unique to the gelatin silver process.

Prerequisite: PHOT 040 and PHOT 110 or instructor consent.
Normal Grade Rules
3 units

#### PHOT 115. Intermediate Digital Imaging
An intermediate level course investigating the unique possibilities afforded by contemporary digital imaging. Includes preparation of images for presentation via print, video and/or web. Emphasis upon incorporating digital tools with ongoing development of student work.

Prerequisite: PHOT 040.
Normal Grade Rules
3 units

#### PHOT 116. Contemporary Issues in Photography
Examination and discussion of aesthetic trends and philosophies in photography and related media, their impact on the medium and society.

Prerequisite: PHOT 040
Normal Grade Rules
3 units

#### PHOT 117. Modern and Contemporary Photography
An advanced studio photography course incorporating practices of professional photographic techniques that can be applied to commercial advertising photography or applied as fine art imagery. Training on professional level equipment is emphasized.

Prerequisite: PHOT 121
Normal Grade Rules
3 units

#### PHOT 118. Special Topic in Photography
The technical and conceptual aspects of producing effective photographic illustrations for various narrative purposes (e.g. advertisements, magazines, story illustrations, poster, etc.). Course is repeatable once for credit.

Prerequisite: PHOT 121.
Repeatable for credit
Normal Grade Rules
3 units

#### PHOT 119. Introduction to Studio Lighting
Designed to prepare graduating photo majors for practicing their profession. Emphasis will be placed on building a comprehensive portfolio and business identity. Course is repeatable once for credit.

Prerequisite: PHOT 120, PHOT 121, plus two additional upper division photography courses.
Repeatable for credit
Normal Grade Rules
3 units

#### PHOT 120. Image and Idea
An intermediate course in which students pursue individual projects. Emphasis on diverse strategies of approach and presentation which culminate in a group exhibition.

Prerequisite: PHOT 040 and PHOT 110 or PHOT 112 or PHOT 115.
Normal Grade Rules
3 units

#### PHOT 121. Introduction to Studio Lighting
Concepts and principles of lighting using both daylight and incandescent light sources and the use of standard studio lighting equipment.

Prerequisite: PHOT 112 or PHOT 115.
Normal Grade Rules
3 units

#### PHOT 122. Advanced Studio Lighting
An advanced studio lighting course incorporating practices of professional photographic techniques that can be applied to commercial advertising photography or applied as fine art imagery. Training on professional level equipment is emphasized.

Prerequisite: PHOT 121
Normal Grade Rules
3 units

#### PHOT 123. Photographic Illustration
The technical and conceptual aspects of producing effective photographic illustrations for various narrative purposes (e.g. advertisements, magazines, story illustrations, poster, etc.). Course is repeatable once for credit.

Prerequisite: PHOT 121.
Repeatable for credit
Normal Grade Rules
3 units

#### PHOT 125. Special Topics in Photography
Photography is a rapidly evolving field of study. In order to keep our curriculum current and add diversity to our staple of course offerings, our Photo 125, “Special Topics in Photography” offers a rotating variety of contemporary topics. Can be repeated for up to 15 units of credit when course topic changes.

Prerequisite: PHOT 112, PHOT 113, PHOT 115, or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

#### PHOT 126. History of Photography
See ARTH 126.
Normal Grade Rules
3 units

#### PHOT 127. Professional Practices in Photography
Designed to prepare graduating photo majors for practicing their profession. Emphasis will be placed on building a comprehensive portfolio and business identity. Course is repeatable once for credit.

Prerequisite: PHOT 120, PHOT 121, plus two additional upper division photography courses.
Repeatable for credit
Normal Grade Rules
3 units

#### PHOT 180. Individual Studies
Individual work under guidance of a special instructor.

Prerequisite: PHOT 110.
Repeatable for credit
Credit / No Credit
1-3 units
PHOT 197. Senior Project Photography
Advanced course focused on creation or further development of photo-based project to be determined by the student and consisting of new work. Course emphasizes developing professional exit skills, a final body of finished work, and a professional portfolio.
Prerequisite: 15 units of upper division courses in PHOT
Repeatable for credit
Normal Grade Rules
3 units

Aviation Courses

AVIATION

LOWER DIVISION

AVI 002. Introduction to Aviation
Prerequisite: AVI 2
Normal Grade Rules
3 units

AVI 003. Introduction to Private Pilot Part 141 Flight
This course covers the FAA requirements leading up to the award of the FAA Private Pilot Certificate. The course consists of flight training segments in an FAA-approved FAR part 141 flight training program.
Prerequisite: AVI 002
Credit / No Credit
2 units

AVI 031. Aircraft Theory and Design
Aerodynamics and aeroelastic forces. Load analysis of flight vehicles. Aircraft design optimization, material selection along with, safe-life, fail-safe and damage tolerance in design.
Prerequisite: PHYS 2A, MATH 71
Misc/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

AVI 042. Aircraft Systems
Operational and analytical aspects of key aircraft systems such as propulsion, flight control, electrical, and hydraulic. Reliability and maintainability concepts related to the design of aircraft systems. Emphasis is placed on general aviation aircraft.
Prerequisite: PHYS 2A, AVI 2
Misc/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

AVI 043. Propulsion Theory
Prerequisite: PHYS 2A
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

AVI 062. Instrument Flight Techniques
Flight procedures, radio navigation, air traffic control, use of instrument charts. Flight simulator exercises on instrument flight maneuvers, departure and approach procedures.
Prerequisite: AVI 2
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

AVI 063. Instrument Rating Part 141 Flight
This course covers the FAA requirements leading up to the award of the FAA Instrument Rating Certificate. The course consists of 29 instrument flight training segments in an FAA approved FAR part 141 instrument flight training program.
Prerequisite: AVI 003 or FAA Private Pilot Certificate, AVI 73
Credit / No Credit
2 units

AVI 068. Avionics and Airborne Communication
Communications and navigation systems installed on a typical general aviation aircraft. History of avionics. Laboratory exercises will include field-testing and airworthiness evaluation.
Pre/corequisite: AVI 42
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

AVI 073. Air Traffic Control
Prerequisite: AVI 2
Normal Grade Rules
3 units

AVI 078. Introduction to Aviation Management
Normal Grade Rules
3 units

AVI 091. Aircraft Turbine Engines
A study of gas turbine fundamentals, including various gas turbine cycles, components and component efficiency, thrust, specific fuel consumption, duct flow and inlet diffuser, centrifugal and axial compressors, combustion chambers and jet nozzles for aircraft propulsion.
Prerequisite: AVI 43
Normal Grade Rules
3 units

UPPER DIVISION

AVI 112. Professional Commercial Pilot
This course covers material necessary for the FAA requirements leading up to the award of the FAA Commercial Pilot Certificate. This course is formatted as a ground school and covers the aeronautical knowledge requirements for the Commercial Pilot Knowledge Test.
Prerequisite: AVI 002, AVI 31, AVI 42, AVI 43, AVI 91, AVI 092
Normal Grade Rules
3 units

AVI 113. Commercial Professional Pilot Part 141 Flight
This course covers the FAA requirements leading up to the award of the FAA Commercial Pilot Certificate. The course consists of 58 flight training segments in an FAA approved FAR part 141 flight training program.
Prerequisite: FAA Private Pilot Certificate
Co-requisite: AVI 112
Credit / No Credit
2 units

AVI 128. Aviation Safety and Security
Safety in aviation design, operation, and maintenance; hazardous materials; airport environment issues; security regulations for aviation.
Prerequisite: AVI 2
Normal Grade Rules
3 units

AVI 141. Human Factors in the Aviation Environment
See BIOL 141
Normal Grade Rules
3 units

AVI 168. Avionics and Microwave Systems
Avionics digital and microwave systems. Microwave theory and radar with application to airborne systems.
On-board navigation and display systems including computer-based components, digital avionics buses, flight management systems, EFIS, and ECAS.
Prerequisite: AVI 68, TECH 62, TECH 63
Normal Grade Rules
3 units

AVI 169. Avionic System Integration
Avionic System Integration in current aircraft. Avionic package design, aircraft mainframe effects on design, FAA regulations and certification. Heads-up displays and surveillance systems including weather radar, radar altimeter, transponder, TCAS, and GPWS.
Prerequisite: AVI 168
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units
AVIA 173. Aviation Law
Law and legal issues in aviation from both a national and international perspective. Rights and responsibilities of individuals, organizations, and the aviation community. Regulations and liability pertaining to the design, manufacture, operation and maintenance of aircraft.
Prerequisite: AVIA 78.
Normal Grade Rules
3 units

AVIA 176. Airline Operations and Management
Aspects of managing air transportation companies. Integration of technical, environmental, market and regulatory considerations in the decision-making process in airline management. Future planning techniques.
Prerequisite: AVIA 78, BUS 140.
Normal Grade Rules
3 units

AVIA 177. General Aviation Operations and Management
Aspects of managing general aviation companies, such as the structure of the general aviation industry, supply and demand of products, and technical and regulatory constraints.
Prerequisite: AVIA 78, BUS 140.
Normal Grade Rules
3 units

AVIA 178. Airport Planning and Management
Design, planning, and management of airports in the US including airport development and airport design. Legal responsibilities as an airport manager. Issues and regulations applicable to airport planning and management.
Prerequisite: AVIA 78.
Normal Grade Rules
3 units

AVIA 179. Advanced Airport Planning and Management
Noise generation and abatement. Leasing and property management including the impact of federal regulations. Concession planning. Use of technology to increase efficiency and security in airports.
Prerequisite: AVIA 78.
Normal Grade Rules
3 units

AVIA 180. Individual Studies
Special topics by arrangement. Course is repeatable for a maximum of 3 units.
Prerequisite: Aviation majors or minors after advisor consultation and department chair approval.
Repeatable for credit
Credit / No Credit
1-3 units

AVIA 180H. Individual Studies
Individual honors studies by arrangement. Course is repeatable for maximum of 2 units.
Prerequisite: Acceptance into Aviation Honors Program.
Repeatable for credit
Credit / No Credit
1-2 units

AVIA 190. Senior Capstone Seminar
Current industry analysis and career development, leadership skills for an aviation professional. Aviation standard procedures. Ethical principles for Aviation. Student projects related to Aviation major.
Prerequisite: Graduating senior, major form completed.
Normal Grade Rules
3 units

AVIA 191. International Flight Navigation and Planning in the Corporate Environment
Navigation and flight planning skills for the corporate international flight department. Demands placed on the pilot including long-range navigation, flight planning, interpreting adverse weather forecasts, aircraft systems, international navigational regulations and communications.
Prerequisite: AVIA 2, upper division standing.
Normal Grade Rules
3 units

AVIA 193. Aerodynamics
Aerodynamic forces involved in an airplane in flight. Fundamental flowing gas, incompressible and compressible flow, Bernoulli’s Principles, circulation forces, boundary layer, airfoils, measurement methods, laminar and turbulent flow, force and vortex interactions.
Prerequisite: PHYS 2A, MATH 71, AVIA 31.
Misc/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

AVIA 194. Pilot Avionics and General Aviation Systems
Operations of avionics as found on modern general aviation aircraft and turboprop/turbofan aircraft. Major systems used on general aviation aircraft including GPS, FMS, navigation systems, fuel systems, hydraulic systems, environmental systems, landing gear.
Prerequisite: AVIA 42, AVIA 43.
Normal Grade Rules
3 units

AVIA 195. Internship with the Aviation Industry
Practical experience with aviation industry under direct supervision of aviation professionals. Experience will relate to air carrier or general aviation aircraft operation/management/maintenance, fixed-based operation management and/or airport operation/management. Course is repeatable for a maximum of 12 units.
Prerequisite: Junior standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-6 units

AVIA 195C. Interdisciplinary Senior Project I
See ENGR 195C.
Normal Grade Rules
3 units

AVIA 195D. Interdisciplinary Senior Project II
See ENGR 195D.
Normal Grade Rules
3 units

AVIA 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

AVIA 199A. Special Topics in Aviation Management
Special topics in Aviation Management. Content varies from semester to semester. Course is repeatable for a total of 6 units.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

AVIA 199B. Special Topics in Aviation Operations
Special topics in Aviation Operations. Content varies from semester to semester. Course is repeatable for a total of 6 units.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

AVIA 199C. Special Topics in Avionics
Special topics in Avionics. Content varies from semester to semester. Course is repeatable for a total of 6 units.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

AVIA 199D. Special Topics in Aviation Maintenance Management
Special topics in Aviation Maintenance Management. Content varies from semester to semester. Course is repeatable for a total of 6 units.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
Biological Sciences Department Courses

BIOLOGY

LOWER DIVISION

BIOL 001A. Foundations of Biodiversity
The diversity of life and the mechanisms by which that diversity has arisen. Concepts include: scientific method, origins of life, adaptation of organisms to different environments and biotic interactions, comparative development of both plants and animals. Prerequisite: Satisfaction of the EPT and the ELM requirement.
Corequisite: ENGL 1A, CHEM 1A
Lecture 3 hours/lab 5 hours
Normal Grade Rules
GE: B2+B3
5 units

BIOL 001B. Foundations of Cell Biology & Physiology
Cellular and physiological aspects of biological diversity. Concepts include: biomolecules, cellular structures/ function, cell-cell communication, cellular energetics, molecular evolution, gene expression, enzymes, digestion, endocrine systems, cell cycle, and cancer. The course will culminate in a five week research project. Prerequisites: BIOL 001A and CHEM 001A (with a grades of “C” or better), ENGL 001A.
Prerequisite: BIOL 1A and Chem 1A (with a grade of C or better), Engl 1A
Corequisite: BIOL 006, CHEM 0018, ENGL 001B.
Lecture 3 hours/Lab 5 hours.
Normal Grade Rules
GE: B2+B3
5 units

BIOL 003W. Cell Biology Workshop
A discussion/demonstration course intended for those students concurrently enrolled in Biology 3 Cell Biology or those desiring an introduction to the material. Topics in cell biology are covered in various formats incorporating different learning styles. Pre/Corequisite: BIOL 3.
Credit / No Credit
1 unit

BIOL 004. The Profession of Biology
Career overview for biologists, including health, organismal biology, conservation, teaching and research. Path choices and pitfalls in undergraduate science. Required of all lower division majors as a prerequisite to upper division courses. Prerequisite: Required of all entering freshmen during their first semester and all entering transfer students during their first year at San Jose State.
Note: Offered every fall.
Normal Grade Rules
0.5 units

BIOL 005. Computer Literacy in Biology
Auto-tutorial course on hardware and software used in biology. Software includes operating system, database, spreadsheet, graphics, statistics, data acquisition, presentation, and word processing. Various file types are created, manipulated, imported, and exported. Prerequisite: Satisfaction of the ELM requirement.
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

BIOL 006. Biological Safety
Introduction to basic principles of laboratory safety with respect to the use and handling of organisms and chemicals in biology labs. Prerequisite: BIOL 001A.
Normal Grade Rules
1 unit

BIOL 010. The Living World
Provides students with an understanding of the most fundamental concepts of modern biology including ecology (the interaction between organisms and their environment), human inheritance, the structure and function of living organisms, evolution, strategies for survival and reproduction, and biotechnology. Notes: Not an elective in the department majors.
Normal Grade Rules
GE: B2
3 units

BIOL 020. Ecological Biology
Introduction to diversity, ecology, evolution and behavior. In conjunction with BIOL 21 a more complete survey of biology. Misc/Lab: Lecture 2 hours/lab 3 hours/field trips.
Notes: Not an elective in the department majors.
Normal Grade Rules
GE: B2+B3
3 units

BIOL 021. Human Biology
Introduction to physiology, reproduction, development, heredity and aging. With BIOL 20 a more complete survey of biology. Misc/Lab: Lecture 2 hours/Lab 3 hours.
Notes: Not an elective in the department majors.
Normal Grade Rules
GE: B2+B3
3 units

BIOL 023. Molecular Biology for Computer Scientists
Introduction to molecular biology, molecular genetics, and cell biology at the level required to understand bioinformatics applications. Intended for Computer Science majors. Not an elective for biology majors. Prerequisite: High school chemistry and biology, CS 46A and CS 46B.
Normal Grade Rules
3 units

BIOL 054. Human Understanding
Major issues in health and disease, learning and memory, maturation and aging (such as diet, exercise, mind-body medicine, and addictions). Emphasis on learning how to understand and apply physiologic information for personal growth and lifelong learning. Normal Grade Rules
GE: E
3 units

BIOL 065. Human Anatomy
Introductory study of gross and microscopic human anatomy including corresponding pathology. For majors in nursing and human performance. Misc/Lab: Lecture 3 hours/lab 3 hours.
Note: Not an elective in the department majors.
Normal Grade Rules
GE: B2+B3
4 units

BIOL 065O. Human Anatomy
Introductory study of gross and microscopic human anatomy including corresponding pathology. For majors in nursing and human performance. This online anatomy course is not intended for students pursuing degrees in kinesiology (pre physical therapy), recreation (therapeutic recreation) or to meet the anatomy prerequisite for occupational therapy at SJSU. Students who intend to transfer the human anatomy course to another institution which requires an “in class” lab should enroll in BIOL 65.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Notes: Not an elective in the department majors.
Normal Grade Rules
GE: B2+B3
4 units

BIOL 066. Human Physiology
Explanation of physiological principles from the molecular and cellular-levels to organ systems. Neural and endocrine controls and integration among systems. Health care orientation. Prerequisite: High school algebra. Recommended: Human Anatomy, Chemistry 30A.
Misc/Lab: Lecture 3 hours/lab 3 hours/seminar 1 hour.
Note: Not an elective in the major departments.
Note: A grade of “C” or better is required to receive B2 and B3 GE credit.
Normal Grade Rules
GE: B2+B3
5 units
UPPER DIVISION

BIOL 100W. Scientific Communication Workshop
Analysis and communication of scientific research to both scientific and general audiences. Satisfies upper division writing requirement.
Prerequisite: BIOL 001A, BIOL 001B (with grades of “C” or better); ENGL 001B (with a grade of “C” or better); completion of core GE, satisfaction of Writing Skills Test and upper division standing. BIOL 005 is recommended but not required.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules

BIOL 101. Origins of Life
Process of evolution, fossil evidence for life origins, and the place of humans in nature.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Notes: Not an elective in the department majors.
Normal Grade Rules
GE R
3 units

BIOL 104A. Natural History of California Wildlife
For those interested in the out-of-doors or elementary school teaching. A. Emphasis on identification and natural history of common vertebrate animals. Each requires an individual project.
Misc/Lab: Lecture 1 hour/lab and field 3 hours/activity
2 hours.
Notes: Not an elective in the department majors.
Normal Grade Rules
3 units

BIOL 104B. Natural History of California Wildlife
For those interested in the out-of-doors or elementary school teaching. Emphasis on plants. Each requires an individual project.
Misc/Lab: Lecture 1 hour/lab and field 3 hours/activity
2 hours.
Notes: Not an elective in the department majors.
Normal Grade Rules
3 units

BIOL 105. Principles of Developmental Biology
Emphasis on human development. Other animal systems (fly, frog, chick, mouse) will also be studied to aid in understanding anatomical, physiological, genetic and molecular mechanisms operating during gametogenesis, fertilization, cleavage, gastrulation and organogenesis.
Prerequisite: BIOL 1, BIOL 2 and BIOL 3 (with grades of “C” or better); BIOL 115.
Normal Grade Rules
3 units

BIOL 106. Physiological Ecology
Physiological ecology is the study of the interaction of an organism with its environment. Looking at both plants and animals, we will examine how both structure and function interact to enable an organism to survive under particular environmental conditions.
Prerequisites: BIOL 001B and BIOL 005 (with a grade of “C” or better), CHEM 008 and/or CHEM 112A and CHEM 112B (with a grade of “C” or better), BIOL111 recommended.
Normal Grade Rules
3 units

BIOL 106L. Physiological Ecology Lab
This course is the lab section that accompanies the lecture section, Bio 106 Physiological Ecology.
Prerequisite: BIOL 001B and BIOL 005 with a grade of “C” or better, CHEM 008 and/or CHEM 112A and CHEM 112B with a grade of “C” or better.
Normal Grade Rules
1 unit

BIOL 107. Immunology
Provides information about all areas of immunology with emphasis on the basic concepts of immune mechanisms of the acquired and innate immune systems. Uses the basic information to study immune disorders and the immune response to infectious agents.
Prerequisites: BIOL 001A and BIOL 001B, organic chemistry, all with a grade of C or better MICRO 101, all with a grade of C- or better
Normal Grade Rules
3 units

BIOL 107L. Immunology Laboratory
The experiments in this beginning immunology laboratory are designed to study both the innate and acquired immune systems. Experimentation into the formation, function and detection of antibodies provides students with skills in basic immunologic techniques. Flow cytometry is used in identification of immune cells as well as functional assays of complement mediated phagocytosis.
Prerequisite: BIOL 001A and BIOL 001B, organic chemistry, all with a grade of C or better, MICRO 101, all with a grade of C- or better.
Pre/Corequisite: BIOL 6 and BIOL 107.
Misc/Lab: 3 hour Lab
Normal Grade Rules
1 unit

BIOL 108. Biotechnology in the Twenty-First Century
Presentation of recent advances in biotechnology and discussion of societal implications. Topics include applications in basic research, medicine, agriculture, consumer products and warfare. Lecture 3 hours.
Notes: Not an elective in the department majors.
Normal Grade Rules
3 units

BIOL 109. Human Neuroanatomy and Physiology
Gross and microscopic structure and function of the human nervous system. Introduction to experimental and clinical techniques.
Prerequisite: BIOL 65.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Notes: Not an elective in the department majors.
Normal Grade Rules
4 units

BIOL 110. Biodiversity and Biopolitics
Application of ecological principles to the conservation of biodiversity and the management of ecosystems. Analysis of biological, economic, social and political interrelationships involved in conservation.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Notes: Not an elective in the department majors.
Normal Grade Rules
GE R
3 units

BIOL 111. Biology Teacher Enhancement
A thematic approach to the study of relevant topics and concepts in biology. Development of inquiry-based, hands-on classroom activities in biology.
Prerequisite: Teacher credential and/or instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

BIOL 112. Hazardous Waste
See ENVS 112.
Normal Grade Rules
3 units

BIOL 113. Comparative Taxonomy
This course will give students the understanding and skills needed to taxonomically study biodiversity, including the use of morphological and DNA sequence characters to examine phylogeny, and use of a range of biodiversity research techniques and tools.
Prerequisite: BIOL 001B and BIOL 005 with a grade of “C” or better
Normal Grade Rules
3 units
BIOL 114. Functional Morphology
This course will give students the understanding and skills needed to taxonomically study biodiversity, including the use of morphological and DNA sequence characters to examine phylogeny, and use of a range of biodiversity research techniques and tools.
Prerequisites: BIOL 1B and BIOL 5 with a grade of “C” or better.
Normal Grade Rules
3 units

BIOL 115. General Genetics
Principles and methods of microbial, plant and animal genetics. Mendelism, cytogenetics, molecular genetics, mutation, quantitative genetics and genetic aspects of evolution.
Prerequisite: BIOL 001A and BIOL 001B (with grade of “C” or better in each), CHEM 001A and CHEM 001B (with a grade of “C” or better in each).
Misc/Lab: Lecture 3 hours/discussion 1 hour.
Normal Grade Rules
4 units

BIOL 116. Molecular Genetics
Molecular genetics of prokaryotes and eukaryotes. Replication, repair, mutation, regulation of gene expression, gene organization and methods of recombinant DNA research.
Prerequisite: BIOL 115 or MICR 127 (with a grade of “C” or better); CHEM 112B and CHEM 135.
Pre/Corequisite: BIOL 6.
Normal Grade Rules
3 units

BIOL 116L. Genetics Laboratory
Selected experiments to demonstrate genetic concepts using Drosophila, bacteria and other organisms. Techniques include those of classical, bacterial and molecular genetics.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lab 6 hours.
Normal Grade Rules
3 units

BIOL 117. Human Genetics
Mendelian traits, classical and molecular cytogenetics, DNA variation, sex determination, gene mapping, mutation, population genetics, multifactorial inheritance, genetic counseling and prenatal diagnosis.
Prerequisite: BIOL 115 (with a grade of “C” or better).
Normal Grade Rules
3 units

BIOL 118. Evolutionary Genetics
Principles of molecular and population genetics from an evolutionary perspective. Application of DNA analyses and other techniques to conservation biology, evolution, ecology and systematics.
Prerequisite: BIOL 115.
Misc/Lab: Lecture 2 hours/seminar 1 hour.
Normal Grade Rules
3 units

BIOL 119. Neurogenetics
Molecular genetics of neurological disorders such as Alzheimer’s disease, Huntington’s disease, amyotrophic lateral sclerosis, and prion diseases.
Prerequisite: BIOL 115 (with a grade of “C” or better).
Normal Grade Rules
2 units

BIOL 120A. Electronics, Data Acquisition & Analysis
See PHYS 120A.
Normal Grade Rules
3 units

BIOL 120L. Introduction to Bioinformatics
An introduction to the use of computer applications available for the manipulation and analysis of DNA, RNA and protein sequences. The use of data on the internet to solve biological problems.
Prerequisite: BIOL 116 or CHEM 130A or CHEM 135 or CHEM 136.
Normal Grade Rules
3 units

BIOL 122. Bacterial Diversity
See MICR 122.
Normal Grade Rules
1 unit

BIOL 122L. Bacterial Diversity Laboratory
See MICR 122L.
Normal Grade Rules
2 units

BIOL 123. Bioinformatics I
See CS 123A.
Normal Grade Rules
3 units

BIOL 123B. Bioinformatics II
See CS 123B.
Normal Grade Rules
3 units

BIOL 124. Systems Physiology
Physiology of organ systems of mammals, with emphasis on the human. Neuromuscular, respiratory, digestive, cardiovascular, renal, endocrine, reproductive and thermoregulatory physiology.
Prerequisite: BIOL 001A and 001B; CHEM 112A, CHEM 112B, CHEM 113A, PHYS 002A, PHYS 002B with a grade of “C” or better.
Corequisite: BIOL 125 highly recommended.
Normal Grade Rules
3 units

BIOL 124L. Systems Physiology Laboratory
Selected lab units to demonstrate complex physiological mechanisms and the physiology of organ systems. Methods include animal experiments and physiological recording and stimulation.
Prerequisite: BIOL 006.
Pre/co-requisite: BIOL 124.
Misc/Lab: Lab 6 hours.
Normal Grade Rules
2 units

BIOL 126. Vertebrate Physiology Lab
Selected experiments in vertebrate physiology to demonstrate basic mechanisms, instrumentation and techniques.
Corequisite: BIOL 126.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
1 unit

BIOL 129. Neuroscience
See PSYC 129.
Normal Grade Rules
3 units

BIOL 131. Endocrine Physiology
Emphasis on mammalian systems. Mechanisms of hormone action, secretion and physiological effects; hormone assay techniques.
Prerequisite: Upper division organ systems physiology, e.g., BIOL 124.
Normal Grade Rules
3 units

BIOL 134. Vertebrate Histology
Light and electron microscopic structure of vertebrate tissues with consideration of related functions. Emphasis on the examination of human tissues including corresponding pathology.
Prerequisite: BIOL 001A, BIOL 001B.
Pre/Corequisite: BIOL 006.
Misc/Lab: Lecture 2 hours/lab 6 hours.
Normal Grade Rules
4 units

BIOL 135A. Eukaryotic Cell and Molecular Biology I
BIOL 135A is the first semester of a year-long, integrated, team-taught and inquiry-based cell and molecular course. The objective of BIOL 135A is to present concepts in an integrated fashion to gain an overall (big picture) understanding of cellular and molecular events.
Pre-requisites: BIOL 1A-1B, BIOL 115, CHEM 112A-B, all with a C or better.
Normal Grade Rules
3 units
BIOL 135B. Eukaryotic Cell and Molecular Biology II
BIOL 135B is the second semester of a year-long, integrated, team-taught and inquiry-based cell and molecular course. The objective of BIOL 135B is to present concepts in an integrated fashion to gain an overall (big picture) understanding of cellular and molecular events.
Prerequisite: BIOL 135A, Biol 100W, both with a grade of C or better
Normal Grade Rules
GE R
3 units

BIOL 135L. Molecular Cell Biology Lab
Lab experience in nucleic acid and protein purification, enzyme assay, bacterial and mammalian cell culture, immunofluorescence, radioisotopic labeling, column chromatography, agarose and polyacrylamide gel electrophoresis, spectrophotometry, liquid scintillation counting, etc.
Corequisite: BIOL 135.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lab 6 hours.
Normal Grade Rules
2 units

BIOL 136. Vertebrate Neurophysiology
Review of topics from the molecular to the organismal level. Chemical and electrotonic phenomena of membranes, neurochemistry, sensory transduction, information coding, neural control, consciousness and evolution of neural systems.
Prerequisite: BIOL 001A and BIOL 001B with a grade of “C” or better, organic chemistry and Biol 124 with a C or better, or instructor consent.
Pre/Corequisite: BIOL 124.
Normal Grade Rules
3 units

BIOL 137. Introduction to Principles of Toxicology
Emphasis on basic principles of toxicology. Toxicity of several classes of compounds covered in depth. Focus on basic chemical principles and appropriate applications.
Prerequisite: BIOL 001A, BIOL 001B, BIOL 124, and CHEM 112B with a grade of C or better, or instructor consent.
Normal Grade Rules
3 units

BIOL 141. Human Factors in the Aviation Environment
Effects of time zone changes, sleep disruption, drugs on pilot performance. Role of FAA inspectors, physicians, cabin attendants, unions. Cockpit crew coordination; pilot psychology; aviation safety and accident investigation. Experimental avionics.
Prerequisite: Upper division standing.
Notes: Not an elective in most department majors.
Normal Grade Rules
3 units

BIOL 142. Paleontology
See GEOL 142.
Normal Grade Rules
4 units

BIOL 144. Cumulating Experience for Biological Science Seniors
Students will reflect on their experiences as an undergraduate Biological Sciences major, and faculty will evaluate what students have gained from the major via tests, focus groups, student self-reflections, and other techniques.
Prerequisite: Open only to graduating seniors (students with no more than two semesters to graduate, including the one in which they take Biology 144) in Biological Sciences.
Notes: Offered in the Fall as needed and every Spring.
Normal Grade Rules
0.5 units

BIOL 145. Advanced Undergraduate Biology Seminar
Undergraduate Seminar in Biology. May be taken concurrently with BIOL 145L. Course is repeatable for credit when content changes.
Prerequisites: Completion of nine (9) units of upper division majors’ coursework. Instructor consent.
Note: Course is repeatable when content changes.
Repeatable for credit
Normal Grade Rules
1-3 units

BIOL 145L. Advanced Undergraduate Biology Lab
Advanced undergraduate laboratory or field experience. May be taken concurrently with BIOL 145. Course is repeatable for credit when content changes.
Prerequisites: Completion of nine (9) units of upper division majors’ coursework. Instructor consent.
Repeatable for credit
Normal Grade Rules
1-2 units

BIOL 150. Field Studies in Natural History
Field courses given on site, typically covering general ecology, botany, geology, zoology and specialized natural areas such as Baja California, Death Valley, seacoasts and mountains.
Notes: Not an elective in the department majors.
Repeatable for credit
Normal Grade Rules
GE E3
1-2 units

BIOL 155. Hypothesis Testing
Experimental design and statistical analysis of biological data from manipulative experiments. This course provides experience in designing and analyzing experiments using t-tests, 1- and 2-way ANOVA, Randomized Block ANOVA, Nested ANOVA, Linear Regression and Tests of Independence.
Prerequisite: BIOL 1A and 1B with a grade of C or better, satisfaction of ELM
Misc/Lab: Lecture 2 hours/lab 3 hours
Normal Grade Rules
3 units

BIOL 156. Ecological Sampling Design and Analyses
Sampling design and statistical analysis of biological patterns. In this course, students design and execute a field experiment (one required weekend field trip) that incorporates multivariate measurements. Students analyze the data with Log Linear analysis, Logistic Regression, Principal Components Analysis, Canonical Correlation and various Regression techniques.
Prerequisite: BIOL 1A, BIOL 1B, and BIOL 005 with a grade of “C” or better
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

BIOL 160. Ecology
Factors that influence the distribution and abundance of organisms; some aspects of applied ecology.
Prerequisite: Prerequisite: BIOL 003A and BIOL 001B with a grade of “C” or better, BIOL 155 or BIOL 156 or equivalent biostatistics course. Note: BIOL 156 can be taken as a corequisite.
Pre/Corequisite: BIOL 006.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE R
4 units

BIOL 163. Conservation Biology and Management
Principles of conservation biology, including management for the preservation of biodiversity and maintenance of viable populations. Examples from plants and animals.
Prerequisite: BIOL 160 or BOT 160 (with grade of “C” or better)
Normal Grade Rules
3 units

BIOL 164. Conservation and Management Techniques
Techniques for evaluating and managing the abundance and diversity of plants and animals.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lecture 1 hour/lab-field 6 hours.
Normal Grade Rules
3 units
BIOL 165. Advanced Human Anatomy
Study of human anatomy, including clinical correlations, for preprofessional students. Not open to students who have completed BIOL 065.
Prerequisite: BIOL 001A and BIOL 001B and senior or graduate standing.
Pre/Corequisite: BIOL 006.
Misc/Lab: Lecture 2 hours/lab 6 hours.
Normal Grade Rules
4 units

BIOL 167. Cardiorespiratory Physiology
Covers the normal anatomy and physiology of the cardiovascular and respiratory systems, as well as how they function following perturbations in homeostasis. Focuses on the mammalian system with some discussion of comparative physiology.
Pre-requisite: BIOL 124
Normal Grade Rules
3 units

BIOL 168. Reproductive Physiology
Reproductive Physiology covers the anatomy and physiology of the reproductive system, as well as how deviations from the norm affect reproduction. Course focuses on the mammalian system with discussion of comparative physiology.
Prerequisites: BIOL 124
Normal Grade Rules
3 units

BIOL 172. Ecology of Inland and Estuarine Waters
Biotic and abiotic principles and relationships in lakes, reservoirs, streams and estuaries. Water quality testing, aquatic habitat sampling and assessment, problem identification and agency responsibilities and jurisdictions.
Prerequisite: One year of chemistry and biology core (with grade of "C" or better).
Pre/Corequisite: BIOL 6.
Misc/Lab: Lecture 2 hours/lab and field 6 hours.
Normal Grade Rules
4 units

BIOL 177. Physiology for Engineers
See BME 177.
Normal Grade Rules
3 units

BIOL 178. Integrative Physiology
Integrative Physiology is the capstone course in the Systems Physiology concentration. The specific physiology topics covered may vary depending on the semester. Critical reading of scientific literature, experimental design and scientific communication skills will be emphasized.
Prerequisite: BIOL 124 and at least one upper division systems physiology elective
Normal Grade Rules
GE: R
3 units

BIOL 180. Individual Studies
Advanced lab work in special fields.
Prerequisite: Majors only.
Pre/Corequisite: BIOL 6
Repeatability for credit
Credit / No Credit
0-4 units

BIOL 181. Introduction to Health Care
Participation in various medical departments at a local hospital, opportunity to visit local dentists or work in an optometry clinic.
Prerequisites: Hepatitis B vaccination may be required in some settings.
Notes: Instructor consent.
Repeatability for credit
Credit / No Credit
1-2 units

BIOL 182. Tutor Assistant in Biology
Supervised classroom or field experience as a tutor-assistant in experiments, demonstrations and discussion.
Prerequisite: Upper division standing, instructor consent and appropriate academic background.
Repeatability for credit
Credit / No Credit
1-2 units

BIOL 184. Directed Reading
Assignments readings of selected books, journals and papers chosen to fill gaps in training or for contact with new fields. Evaluation through weekly reports and conferences.
Prequisite: Instructor consent.
Repeatability for credit
Credit / No Credit
1-4 units

BIOL 186. Senior Thesis
Advanced library, laboratory or field research under the supervision of a faculty member, culminating in a senior thesis.
Prerequisite: Instructor consent.
Pre/Corequisite: BIOL 6.
Credit / No Credit
2-4 units

BIOL 190. Field Studies in Biology
Field program involving planning and execution of a project. Course is repeatable for a maximum of 12 units.
Prerequisite: Instructor consent.
Pre/Corequisite: BIOL 6.
Repeatability for credit
Credit / No Credit
1-4 units

BIOL 193. Microbiological Techniques
Microbiological techniques for non-biologists.
Prerequisite: Upper division standing, lower division biology or instructor consent.
Pre/Corequisite: BIOL 6.
Normal Grade Rules
1 unit

BIOL 198. Undergraduate Research
Field or laboratory biological research under the direction of a faculty member.
Prerequisites: BIOL 6.
Corequisites: BIOL 6 and instructor consent
Repeatability for credit
Normal Grade Rules
0.5-4 units

GRADUATE

BIOL 201. Graduate Seminar in Biological Sciences
Seminar designed to introduce principles and topics in biological research. Mandatory during first semester of enrollment. Must be taken twice for credit.
Repeatable for credit
Credit / No Credit
0.5 units

BIOL 202. Graduate Studies in Biology
A seminar on current research and theory in the life sciences, emphasizing scientific writing and formal oral presentations.
Prerequisite: Instructor consent.
Misc/Lab: Lecture/seminar/discussion 5 hours.
Normal Grade Rules
3 units

BIOL 202TA. Biotech Seminar: Biotech Products
BIOL 202TA is a seminar course in which students develop professional skills in writing, speaking, literature review, and critical thinking. Assignments are targeted at developing expertise and knowledge useful in the biotechnology industry. BIOL 202TA focuses on biotechnology products.
Prerequisite: Enrollment in the Master of Biotechnology Program.
Normal Grade Rules
3 units

BIOL 202TB. Biotech Seminar: Drug Development Process
BIOL 202TB is a seminar course in which students develop professional skills in writing, speaking, literature review, and critical thinking. Assignments are targeted at developing expertise and knowledge useful in the biotechnology industry. BIOL 202TB focuses on the development of drugs and other biotechnology products.
Prerequisite: Enrollment in the Master of Biotechnology Program.
Normal Grade Rules
3 units
BIOL 202TC. Biotech Seminar: Biotech Business I
BIOL 202TC is a seminar course in which students develop their professional skills. Assignments are targeted at developing expertise and knowledge useful in the biotechnology and pharmaceutical industries. BIOL 202TC focuses on the financial aspects of business development in biotechnology.
Prerequisite: Enrollment in the Master of Biotechnology Program.
Normal Grade Rules 2 units

BIOL 202TD. Biotech Seminar: Biotech Business II
Seminar course in which students develop their professional skills. Assignments target developing expertise and knowledge useful in the biotechnology and pharmaceutical industries. Focuses on business development in biotechnology and a team project in which students develop a business plan.
Prerequisite: BIOL 202TC or instructor consent.
Normal Grade Rules 2 units

BIOL 205. Advanced Molecular Techniques
Emphasizes the laboratory techniques of modern molecular biology. Depending on instructor, focus will be on animal, plant, yeast, bacterial or viral systems. Course is repeatable for credit if content changes.
Prerequisite: BIOL 135L or instructor consent.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lecture 2 hours/lab 6 hours.
Repeatability for credit
Normal Grade Rules 4 units

BIOL 210. Molecular Mechanisms of Cellular Activation
Examines mechanisms by which cytokines, growth factors or immunoregulators initiate cellular activation, blastogenesis and differentiation. Receptor isolation/characterization and methods used in defining signal transduction pathways. Design of testable experimental models for growth control regulation.
Prerequisite: BIOL 135.
Normal Grade Rules 2 units

BIOL 215. Seminar in Advanced Genetics
Selected topics of current interest in advanced genetics. Each semester will emphasize a particular field of genetics; e.g., molecular genetics, human genetics, developmental genetics, population genetics, etc.
Normal Grade Rules 2 units

BIOL 218. Evolution
Integrated use of modern molecular techniques and classical evolutionary theory to address a broad array of questions in evolutionary biology.
Prerequisite: BIOL 115 and instructor consent.
Normal Grade Rules 3 units

BIOL 220. Science Communication
This course will focus on learning to effectively present ongoing scientific research to a wide audience, with an emphasis on developing science communication skills, learning to place data within the context of a field, and developing critical thinking skills.
Pre/Co-requisite: BIOL 202
Normal Grade Rules 3 units

BIOL 221. Bioinformatics
Supplemental discussion and use of bioinformatics applications to solve advanced problems in molecular and cell biology.
Corequisite: BIOL 121.
Normal Grade Rules 1 unit

BIOL 223. Radiation Biology
Introduction to the biological effects of ionizing radiation. Discussion of physical interactions, energy deposition and chemical changes that result in cell damage. Topics include survival and repair, mutagenesis and acute and late effects.
Prerequisite: BIOL 3, PHYS 2B or instructor consent.
Normal Grade Rules 3 units

BIOL 227. Advanced Physiology/Pharmacology Laboratory
Performance of lab units designed to illustrate complexities of physiological regulation and principles of pharmacology including pharmacokinetics and physiological responses to drugs and hormones. Techniques utilized include anesthesia, small animal surgery, use of the polygraph, electrophoresis, RIA and GLC.
Prerequisite: BIOL 124 and BIOL 125 (or equivalent) and instructor consent.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lab 9 hours.
Normal Grade Rules 3 units

BIOL 227T. Principles of Pharmacology
Principles of pharmacology, especially as related to the pharmaceutical industry and clinical applications.
Prerequisites: BIOL 001B or equivalent; Physiology recommended.
Normal Grade Rules 3 units

BIOL 229T. Biotechnology Instrumentation
Introduction to the principles of operation of common instruments used in the biotechnology and pharmaceutical industries. Includes understanding and experience with calibration, detection mechanisms, data output, trouble shooting and decision making process.
Prerequisite: Enrollment in the Master of Biotechnology program.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

BIOL 230. Comparative Animal Physiology
A seminar in the functional relationships of invertebrates and vertebrates. Evolutionary patterns and environmental adaptations are considered.
Prerequisite: An upper division course in physiology or instructor consent.
Pre/Corequisite: BIOL 6.
Normal Grade Rules 3 units

BIOL 233. Immunological Techniques
Principles, concepts and mechanisms relative to serological and other immunological procedures and reactions with emphasis on practical applications.
Prerequisite: Upper division microbiology or cell biology, or organic chemistry and instructor consent.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lab 9 hours.
Normal Grade Rules 3 units

BIOL 234. Cellular Ultrastructure
Structure and function of cellular components as revealed by the electron microscope. Principles and techniques of electron microscopy in biology, including introduction to electron optics, specimen preparation, microtomy, use of the electron microscope and interpretation of microphotographs.
Prerequisite: Instructor consent. BIOL 3, PHYS 2A, PHYS 2B.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lecture 2 hours/lab 6 hours.
Normal Grade Rules 4 units

BIOL 240. Scanning Electron Microscopy in Biology
Structure and function of cells and tissues as revealed by the Scanning Electron Microscope. Principles and techniques of SEM in biology, including electron optics, specimen preparation, use of SEM and photomicrographic interpretation.
Prerequisite: Instructor consent.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lecture 2 hours/lab 6 hours.
Normal Grade Rules 4 units
Biol 242. Advanced Paleontology
See Geol 242.
Normal grade rules
4 units

Biol 255. Seminar in Advanced Biology
Advanced study in biology. Course is repeatable for credit when content changes.
Prerequisite: Instructor consent.
Repeatable for credit
Normal grade rules
1-4 units

Biol 255E. Seminar in Advanced Biology: Organismal Biology
Advanced study in organismal biology, conservation and ecology. Specific topics will include, among others, population ecology, community ecology, animal behavior and the ecology of selected ecosystems. Course is repeatable for credit when content changes.
Prerequisite: Instructor consent.
Repeatable for credit
Normal grade rules
1-4 units

Biol 255L. Advanced Biology Laboratory
Laboratory or field experience in advanced biology. Course is repeatable for credit when content changes.
Prerequisite: Instructor consent.
Notes: May be taken concurrent with any 255 seminar.
Repeatable for credit
Normal grade rules
1-4 units

Biol 255M. Seminar in Advanced Biology: Molecular and Microbiology
Advanced study in molecular and microbiology. Course is repeatable for credit when content changes.
Prerequisite: Instructor consent.
Repeatable for credit
Normal grade rules
1-4 units

Biol 255P. Seminar in Advanced Biology: Physiology
Advanced study in plant or animal physiology. Course is repeatable for credit when content changes.
Prerequisite: Instructor consent.
Repeatable for credit
Normal grade rules
1-4 units

Biol 256. Advanced Experimental Design and Analysis
Provides training in advanced statistical procedures and experimental designs for graduate-level research. The content is tailored to research needs of enrolled students. Includes sampling schemes, randomization analyses, complex ANOVA and multivariate analyses.
Prerequisite: Upper division statistics course, graduate standing.
Normal grade rules
3 units

Biol 280. Individual Studies
Allow a graduate student to pursue an avenue of academic interest that is not a specific part of a thesis research project. The program of study must be approved by an academic advisor in the graduate program. Projects may include, but are not limited to: manuscript development, presentations of findings, development and leadership in developing seminars for other graduate students.
Prerequisite: Graduate standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

Biol 281T. Individual Studies in Biotechnology
See Sci 281T.
Repeatable for credit
Normal grade rules
1-4 units

Biol 283T. Topics in Biotech Regulatory Affairs
See Sci 283T.
Repeatable for credit
Normal grade rules
1-4 units

Biol 284. Tutorial
Directed reading and discussion of biological literature, professional skills coaching, career development tutorial and/or individualized preparation for culminating graduate experience.
Pre/corequisite: Graduate standing in MA program and instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

Biol 285. Colloquium in Biological Sciences
Meetings for the presentation and discussion of advanced studies in special fields including original work by the faculty, guest investigators and graduate students. Topics will vary from year to year.
Repeatable for credit
Credit / No Credit
1 unit

Biol 291A. Introduction to Molecular Diagnostics I
Graduate level course which will include topics relevant to all tests and methods used to identify a disease or the predisposition for a disease through DNA, RNA, or protein analysis. Methods for isolation from human clinical samples.
Prerequisite: Instructor consent.
Normal grade rules
3 units

Biol 291B. Introduction to Molecular Diagnostics II: Human Genetic Diseases and Detection
Graduate level course which will include topics relevant to all tests and methods used to identify a disease or the predisposition for a disease through DNA or RNA analysis of human samples.
Prerequisite: Biol 291A or Instructor Consent.
Normal grade rules
3 units

Biol 298. Research
Independent investigations of an advanced character for the student with adequate preparation, to be carried on under the direct supervision of a staff member.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

Biol 299. Master’s Thesis or Project
Prerequisite: Admission to candidacy for the Master of Science degree.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

Botany

Upper Division

Bot 104. Plant Taxonomy
Taxonomic relations and classification of ferns, conifers and flowering plants, with practice in their collection and identification. Selected techniques of cytotaxonomy, chemotaxonomy, palynology and numerical taxonomy.
Prerequisite: Biol 001A with a grade of “C” or better.
Pre/corequisite: Biol 006.
Misc/laboratory: Lecture 2 hours/lab 6 hours.
Normal grade rules
4 units

Bot 113. Comparative Taxonomy
See Biol 113
Normal grade rules
3 units
BOT 114. Functional Morphology
See BIOL 114
Normal Grade Rules
3 units

BOT 160. Ecology
See BIOL 160
Normal Grade Rules
GE R
4 units

BOT 165. Plant Communities of California
Prerequisite: BIOL 001A and BIOL 001B (with a grade of "C" or better).
Pre/Corequisite: BIOL 006.
Misc/Lab: Lecture 2 hours/lab-field 6 hours (some weekend field trips).
Normal Grade Rules
4 units

BOT 180. Individual Studies
Advanced work in special fields.
Prerequisite: Majors only or instructor consent
Pre/Corequisite: BIOL 6.
Repeatable for credit
Credit / No Credit
1-4 units

BOT 186. Senior Thesis
Advanced laboratory or field research under supervision of faculty member, culminating in a senior thesis.
Prerequisite: Instructor consent.
Pre/Corequisite: BIOL 6.
Credit / No Credit
2-4 units

BOT 299. Master’s Thesis or Project
Prerequisite: Admission to candidacy for the master’s degree.
Pre/Corequisite: BIOL 6.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

ENT 101. Insect Diversity
Introduction to biology, ecology and behavior of insects. Ways in which insects affect humans and the environment. Students collect, curate and identify common families of insects.
Prerequisite: BIOL 001A, BIOL 001B (with a grade of "C" or better); CHEM 001A, CHEM 001B
Pre/Corequisite: BIOL 006.
Misc/Lab: Lecture 3 hours/lab-field 3 hours.
Normal Grade Rules
4 units

ENT 106. Forensic Entomology
Forensic entomology examines the science and methodology used to collect, analyze, and present information regarding insects and other arthropods that are important in legal investigations.
Prerequisite: BIOL 1, BIOL 2, BIOL 3 (with grades of "C" or better).
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ENT 113. Comparative Taxonomy
See BIOL 113
Normal Grade Rules
3 units

ENT 114. Functional Morphology
See BIOL 114
Normal Grade Rules
3 units

ENT 180. Individual Studies
Advanced lab work in entomology.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

ENT 185. Seminar in Entomology
Current entomological literature and research and historical development of various entomological concepts.
Normal Grade Rules
1 unit

ENT 186. Senior Thesis
Advanced laboratory or field research under supervision of faculty member, culminating in a senior thesis.
Prerequisite: Instructor consent.
Credit / No Credit
2-4 units

GRADUATE

ENT 255. Advanced Botany
Advanced aspects of morphology, mycology and other fields of botany. Course may be repeated for credit with advisor consent.
Prerequisite: Specialization in botany and instructor consent.
Pre/Corequisite: BIOL 6.
Repeatable for credit
Normal Grade Rules
1-3 units

ENT 281. Advanced Laboratory Skills in Entomology
Advanced lab work in entomology.
Prerequisite: MA graduate standing.
Credit / No Credit
3 units

ENT 282. Entomology Internship
Professional career development and/or individualized preparation for culminating graduate experience.
Prerequisite: Graduate standing.
Credit / No Credit
3 units

ENT 283. Directed Readings in Entomology
Directed reading assignments in entomological literature including but not limited to: research, governmental guidelines/protocols/procedures and risk assessment/management.
Prerequisite: MA graduate standing.
Normal Grade Rules
2 units

ENT 298. Research
Independent investigations.
Prerequisite: Instructor consent.
Pre/Corequisite: BIOL 6.
Repeatable for credit
Credit / No Credit
1-4 units

ENT 299. Master’s Thesis or Project
Prerequisite: Admission to candidacy for the master’s degree.
Pre/Corequisite: BIOL 6.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units
**MICROBIOLOGY**

**LOWER DIVISION**

**MICR 020. General Bacteriology**
Morphology, physiology, genetics and diversity of bacteria; their control by chemical and physical means, and their role in disease. For majors in allied health professions.
Prerequisite: CHEM 1B, or CHEM 30A.
Misc/Lab: Lecture 4 hours/lab 3 hours.
Notes: Not an elective in the department majors.
Normal Grade Rules
CE: B2+B3
5 units

**MICR 101. General Microbiology**
The microbial world and its ecological interrelationships; skills required for the study of micro-organisms.
Prerequisite: BIOL 1A and 1B with a grade of "C" or better, CHEM 8 or CHEM 112A.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lecture 2 hours/lab 6 hours.
Normal Grade Rules
4 units

**MICR 122. Bacterial Diversity**
The focus of this course is the study of the characteristics and microecology of unusual prokaryotes. Molecular and traditional approaches will be discussed.
Prerequisite: MICR 101 (with grade of "C" or better).
Misc: Lecture 1 hour.
Normal Grade Rules
1 unit

**MICR 122L. Bacterial Diversity Laboratory**
Laboratory techniques in bacterial diversity.
Prerequisite: MICR 101 (with grade of "C" or better).
Pre/Corequisite: BIOL 6.
Misc/Lab: 6 hour Lab.
Normal Grade Rules
2 units

**MICR 123. Food Microbiology**
Detection and enumeration of both normal microbiological flora and spoilage organisms of specific foods. Control of sanitation problems in food production and processing.
Prerequisite: MICR 101 (or equivalent with grade of "C" or better).
Pre/Corequisite: BIOL 6.
Normal Grade Rules
1 unit

**MICR 123L. Food Microbiology Laboratory**
Practical microbiological techniques for the detection and enumeration of both normal microbiological flora and spoilage organisms of specific foods; and for the control of sanitation problems in food production and processing. Field trips to local food industries and/or a water treatment plant may be required within lab hours.
Prerequisite: MICR 101 or equivalent (with grade of "C" or better).
Pre/Corequisite: BIOL 6.
Misc/Lab: 6 hour Lab.
Normal Grade Rules
2 units

**MICR 127. Microbial Physiology**
Studies of the physiology of microbes specifically focusing on bacteria (growth, metabolism and regulation of gene expression); growth experiments and mutagenesis techniques.
Prerequisite: MICR 101 (with grade of "C" or better).
CHEM 135.
Pre/Corequisite: BIOL 6.
Normal Grade Rules
2 units

**MICR 127L. Microbial Physiology Laboratory**
Laboratory experiments involve small and large-scale growth experiments (fermentation, continuous culture and batch culture), techniques used in mutagenesis and mutant characterization as well as construction and studies of reporter fusions.
Prerequisites: MICR 101 (with grade of "C" or better).
Pre/Corequisite: BIOL 6.
Misc/Lab: Lab 6 hours.
Normal Grade Rules
2 units

**MICR 140. Hematology**
Blood and blood forming organs. Theoretical and clinical aspects of normal and pathologic conditions of the erythrocytic, leukocytic, coagulation and blood group systems.
Prerequisite: MICR 101 (with grade of "C" or better).
Pre/corequisite: BIOL 6.
Repeateable for credit
Normal Grade Rules
2 units

**MICR 140L. Hematology Laboratory**
Laboratory methodologies used to diagnose hematologic pathology.
Prerequisite: MICR 101 (with a grade of "C" or better).
Pre/corequisite: BIOL 6, MICR 140.
Misc/Lab: Lab 2 hours.
Repeateable for credit
Normal Grade Rules
2 units

**MICR 141. Pathogenic Microbiology I**
Concepts and principles of medical microbiology, emphasizing the biology of host-parasite interactions and mechanisms of infectious disease pathogenesis.
Prerequisite: MICR 101, BIOL 107 or BIOL 107S (with grades of "C" or better); organic chemistry.
Pre/Corequisite: BIOL 6.
Normal Grade Rules
3 units

**MICR 141L. Pathogenic Microbiology I - Laboratory**
Application of principles of medical microbiology to pathogen isolation, characterization and identification.
Prerequisite: BIOL 107, BIOL 107L and MICR 127 (with grades of "C" or better).
Corequisite: MICR 141.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lab 9 hours
Normal Grade Rules
3 units

**MICR 142. Pathogenic Microbiology II**
Concepts and principles of medical microbiology, emphasizing the biology of host-parasite interactions and mechanisms of infectious disease pathogenesis.
Continuation of MICR 141.
Prerequisite: MICR 141 (with grade of "C" or better).
Pre/Corequisite: BIOL 6.
Misc/Lab: Lecture 3 hours.
Normal Grade Rules
3 units

**MICR 142L. Pathogenic Microbiology II - Laboratory**
Application of principles of medical microbiology to pathogen isolation, characterization and identification.
Prerequisite: MICR 141 and MICR 141L (with grades of "C" or better); BIOL 107L.
Corequisite: MICR 142.
Pre/Corequisite: BIOL 6.
Misc/Lab: Lab 9 hours.
Normal Grade Rules
3 units

**MICR 170. General Virology**
Molecular and biological aspects of animal, plant and microbial viruses and their relationships with their hosts.
Prerequisite: BIOL 1A, BIOL 1B, and Organic Chemistry with a "C" or better
Normal Grade Rules
3 units

**MICR 180. Individual Studies**
Advanced lab work in special fields.
Prerequisite: Majors only or instructor consent.
Pre/Corequisite: BIOL 6.
Repeatable for credit
Credit / No Credit
1-4 units
MICR 184. Directed Reading
Assigned readings of selected books, journals and papers to fill gaps in training or for contact with new fields. Evaluation through weekly reports and conferences.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

MICR 250. Topics in Advanced Microbiology
A seminar exploring various aspects of microbiology. Course may be repeated for credit with advisor consent.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
1-3 units

MICR 270. Advanced Virology
Molecular and biological aspects of animal, plant and microbial viruses and their relationships with their hosts. Additional research and/or papers as required by the instructor.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

MICR 291. Field Work in Clinical Laboratory Science
Fieldwork in affiliated hospital laboratories prerequisite to the California Licensing examination for Clinical Laboratory Science (CLS).
Prerequisite: Baccalaureate degree in a biological science, valid license as a CLS Trainee, admission into the CLS Traineeship, and instructor consent. Concurrent enrollment in MICR 292.
Repeatable for credit
No Degree Credit
12 units

MICR 291A. Advanced Hematology
Students will engage in advanced study of normal and abnormal hematologic conditions, including molecular diagnosis of disorders.
Credit / No Credit
4 units

MICR 291B. Advanced Pathophysiology
Students will engage in advanced study of normal and abnormal physiologic conditions, including but not limited to diseases of glucose metabolism, organ dysfunction, endocrine disorders and electrolyte balance.
Note: Not an elective for Biology majors and not available to Open University students.
Credit / No Credit
4 units

MICR 291C. Advanced Human Immunology
Students will engage in advanced study of normal and abnormal immunologic conditions in humans, including molecular diagnosis of those disorders.
Note: Not an elective for Biology majors and not available to Open University students.
Repeatable for credit
Credit / No Credit
4 units

MICR 291D. Advanced Medical Microbiology
Students will engage in advanced study of bacteria, fungi, viruses and other organisms of significance in medical microbiology. Emphasis will be on experience through clinical practice.
Note: Not an elective for Biology majors and not available to Open University students.
Credit / No Credit
4 units

MICR 291E. Advanced Immunohematology
Students will engage in advanced study of immunohematology and the use of transfused products in medical treatment. Emphasis will be on experience through clinical practice.
Note: Not an elective for Biology majors and not available to Open University students.
Credit / No Credit
4 units

MICR 291F. Molecular Based Diagnostic Techniques
Students will engage in advanced study of application of molecular techniques for diagnostic purposes. Emphasis will be on advanced practical training.
Note: Not an elective for Biology majors and not available to Open University students.
Credit / No Credit
4 units

MICR 291G. Clinical Laboratory Management
Students will engage in advanced study of laboratory management skills, including finance, time management, team building, quality control, basic human resources management and other topics. Emphasis will be on practical training.
Note: Not an elective for Biology majors and not available to Open University students.
Repeatable for credit
Credit / No Credit
4 units

MICR 292. Topics and Demonstrations in Clinical Laboratory Science
Presentations and demonstrations of topics and selected clinical lab procedures.
Prerequisite: Baccalaureate degree in a biological science, valid license as a CLS Trainee, admission into the CLS Traineeship, and instructor consent. Concurrent enrollment in MICR 291.
Repeatable for credit
Normal Grade Rules
3 units

MICR 298. Research
Advanced individual work in a specialized field of microbiology.
Prerequisite: Instructor consent.
Pre/Corequisite: BIOL 6.
Repeatable for credit
Credit / No Credit
1-4 units

MICR 299. Master’s Thesis or Project
Prerequisite: Admission to candidacy for the Master of Science degree and instructor consent.
Pre/Corequisite: BIOL 6.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

ZOOLOGY

UPPER DIVISION

ZOOL 113. Comparative Taxonomy
See BIOL 113.
Normal Grade Rules
3 units

ZOOL 114. Functional Morphology
See BIOL 214.
Normal Grade Rules
3 units

ZOOL 115. Invertebrate Zoology and Natural History
The evolution, distribution, structure, natural history and systematics of invertebrates other than insects.
Prerequisite: BIOL 001A and BIOL 001B (with grades of “C” or better).
Misc/Lab: Lecture 2 hours/lab-field trips 6 hours.
Normal Grade Rules
4 units

ZOOL 116. Vertebrate Evolution and Natural History
Prerequisite: BIOL 001A and BIOL 001B (with grades of “C” or better).
Pre/Corequisite: BIOL 006.
Misc/Lab: Lecture 2 hours/lab 6 hours with several field trips.
Normal Grade Rules
4 units
ZOOL 150. Fishery Conservation and Management  
Principles and techniques for evaluating and managing  
habitat, life history characteristics and population  
dynamics of aquatic vertebrates.  
Prerequisite: BIOL 160 or BOT 160.  
Pre/Corequisite: BIOL 6.  
Misc/Lab: Lecture 1 hour/lab-field 6 hours.  
Notes: Some optional weekend field trips.  
Normal Grade Rules  
3 units  

ZOOL 160. Zoogeography  
Animal distribution throughout the world and factors and  
basic principles affecting it.  
Prerequisite: BIOL 2 (with grade of "C" or better) or  
upper division standing and instructor consent.  
Normal Grade Rules  
3 units  

ZOOL 180. Individual Studies  
Advanced lab work in special fields.  
Prerequisite: Majors only or instructor consent.  
Pre/Corequisite: BIOL 6.  
Repeatable for credit  
Credit / No Credit  
1-4 units  

ZOOL 186. Senior Thesis  
Advanced laboratory or field research under supervision  
of faculty member, culminating in a senior thesis.  
Prerequisite: Instructor consent.  
Pre/Corequisite: BIOL 6.  
Credit / No Credit  
2-4 units  

GRADUATE  

ZOOL 298. Research  
Independent investigations.  
Prerequisite: Instructor consent.  
Corequisite: BIOL 6.  
Repeatable for credit  
Credit / No Credit  
1-4 units  

ZOOL 299. Master’s Thesis or Project  
Prerequisite: Admission to candidacy for the master’s  
degree.  
Corequisite: BIOL 6.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-4 units
Biomedical, Chemical and Materials Engineering

Department Courses

BIOMEDICAL ENGINEERING

UPPER DIVISION

BME 115: Foundations of Biomedical Engineering
Introduction to the fundamental principles of biomedical engineering. Core conservation equations are applied to mass, energy, charge, and momentum transfer in biomedical systems. Additional topics provide a breadth of exposure in cell and molecular biology, diagnostics and analytical techniques, statistical analysis of biomedical data, bioinformatics, bioinstrumentation, FDA regulations, and biomedical ethics.
Prerequisite: ENGR 010, CHEM 001B, MATH 031 and PHYS 050.
Misc/Lab: Lecture 3 hours / Lab 3 hours
Normal Grade Rules
4 units

BME 117: Bionanotransport Phenomena
Applications of fundamentals of thermodynamic and kinetic aspects of energy and mass transport phenomena to biological systems. Development of quantitative description of transport processes beginning from the molecular level to entire organ systems.
Prerequisite: ENGR 115 with grade of ‘C’ or better.
Pre/corequisite: MATH 133A
Normal Grade Rules
3 units

BME 173: Clinical Trials in Bioengineering
Basics of clinical trials with emphasis on FDA and ISO guidelines, good clinical practices, eligibility requirements, statistics, and statistical analysis of biomedical data. Bioethics, bioinstrumentation, FDA regulations, and biomedical ethics.
Prerequisites: ENGR 100W, ENGR 115, ENGR 177, ENGR 179, ISE 130 or ISE 162 (with a grade of ‘C’ or better in each), or instructor consent.
Normal Grade Rules
3 units

BME 174: Biomedical Regulatory Requirements
Study of Food and Drug Administration regulations for design of bioengineering products and processes, including design review and documentation processes; Good Laboratory Practices; Good Manufacturing Practices; quality and reliability requirements.
Prerequisites: ENGR 100W, ENGR 173, ENGR 177, ISE 130 or CHE 162 with a grade of ‘C’ or better in each.
Normal Grade Rules
3 units

BME 177: Physiology for Engineers
Structure and function of physiological systems and discussion of topics of particular importance to the design, development, construction, and clinical application of biomedical devices. Practical application of new technologies to monitor, repair, replace or augment those systems.
Prerequisite: BIOL 65 or equivalent, college level physics and chemistry, or instructor consent.
Normal Grade Rules
3 units

BME 198A. Senior Design Project I
Apply bioengineering principles to the design and implementation of an approved project, from problem definition to analysis, design and validation, and experimentation, including possible construction and testing. Integrates global and social issues in engineering.
Prerequisite: ENGR 100W (with grade of ‘C’ or better), BME 117, BIOL 177
Corequisite: ENGR 195A
Normal Grade Rules
2 units

BME 198B. Senior Design Project II
Continuation of BME 198A. Culmination of project requiring formal oral presentation and report consisting of documentation of project methodology and results.
Prerequisite: BME 198A with a grade of ‘C’ or better.
Pre/corequisite: ISE / CHE 162
Normal Grade Rules
2 units

GRADUATE

BME 254. Microscale Biomedical Systems: Physics and Applications
Introduction to microscale physics and phenomena used in biomedical systems; analytical techniques and diagnostic applications. Course will discuss: microscale fluid mechanics (Navier-Stokes), electrical phenomena (Maxwell), and particle/molecule/device interactions. Case studies focus on applications of microscale physics to biomedical engineering analyses.
Prerequisite: BME 117, Math 133A, graduate standing (or instructor consent)
Normal Grade Rules
3 units

BME 256. Biomedical Applications of Nanoplatforms
Biomedical applications of nanoplatforms explores the development of three cutting edge sub fields: nanoplatforms in therapeutics; nanoplatforms in prosthetics and implants; and nanoplatforms in diagnosis and screening. The socioeconomic risks and solutions of nanoplatforms in biomedical applications are also explored.
Prerequisite: Graduate Standing or instructor consent
Normal Grade Rules
3 units

BME 272. Biomedical Devices Design and Principles
Principles involved in designing medical devices to function reliably in human body; interaction between synthetic and biological materials; use of design principles during conception and development of medical devices; effect of design on manufacture clinical performance, reliability and quality/regulatory assurance.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

CHEMICAL ENGINEERING

UPPER DIVISION

CHE 099. Chemical and Materials Engineering Seminar
Cutting-edge topics in Chemical and Materials Engineering. Research presentations and guest speakers.
Repeatable for credit
Credit / No Credit
1 unit
CHE 131. Air Pollution Meteorology
See METR 131.
Normal Grade Rules
3 units

CHE 151. Process Engineering Thermodynamics
Analysis of the ideal and real behavior of gases, liquids and solids from a macroscopic viewpoint; 1st and 2nd Law; phase rule, volumetric properties of fluids; heat effects; solution theory and applications; vapor-liquid and solid-solid equilibrium; chemical reaction equilibria.
Prerequisite: CHE 115 and ENGR 10
Misc/Lab: Lecture 3 hours/calculation period 3 hours.
Normal Grade Rules
4 units

CHE 158. Kinetics and Reactor Design
Analysis of unsteady chemical processes with emphasis on kinetics of reaction and application of fundamental principles to the design and operation of commercial reactors.
Prerequisite: CHE 115, CHE 151, CHE 160A, CHE 162 and CHE 190 (with an average of “C” or better in the five courses); ENGR 100W.
Misc/Lab: Lecture 2 hours/calculation period 3 hours.
Normal Grade Rules
3 units

CHE 160A. Unit Operations I
Materials transportation, fluid metering, mixing, sedimentation, filtration, heat exchange and evaporation; types of equipment used and numerous practical applications. Introduction to transport theory.
Prerequisite: CHE 115 and CHE 190
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

CHE 160B. Unit Operations II
Continuation of CHE 160A. Mass transfer operations, diffusion, absorption, extraction, distillation, humidification, membrane separations, drying and crystallization. Field trips to process industries. Integrate global and social issues in engineering.
Prerequisite: CHE 115, CHE 151, CHE 160A, CHE 162 and CHE 190 (with an average of “C” or better in the five courses); ENGR 100W.
Misc/Lab: Lecture 3 hours/calculation period 3 hours.
Normal Grade Rules
4 units

CHE 161. Process Safety and Engineering Ethics
Topics include principles of chemical process safety, risk assessment, analysis of ethics issues, and the application of the engineering ethical code using case studies. Integrate global and social issues in engineering.
Prerequisite: CHEM 1B
Misc/Lab: Lecture 1 hour.
Normal Grade Rules
1 unit

CHE 161L. Undergraduate Chemical Engineering Laboratory
Quantitative study of chemical engineering processes, with emphasis on fluid flow and heat transfer operations. Written and oral reports required.
Prerequisite: CHE 115, CHE 151, CHE 160A, CHE 162 and CHE 190 (with an average of “C” or better in the five courses); ENGR 100W.
Corequisite: CHE 160B and CHE 161.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

CHE 162. Engineering Statistics and Analysis
Topics will include error analysis, probability, statistics including hypothesis testing, confidence limits and control variables, design of experiments and statistical process control as they are utilized in the chemical, materials and process engineering industries.
Prerequisite: MATH 133A.
Normal Grade Rules
3 units

CHE 162L. Undergraduate Chemical Engineering Laboratory
Chemical engineering principles with an emphasis on traditional and novel applications in focuses such as environmental engineering and biotechnology. Written and oral reports will be required.
Prerequisite: ENGR 100W, CHE 160B and CHE 161L.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

CHE 165. Plant Design
Technical and economic evaluation of a chemical processing plant, including most aspects of a typical industrial design. Major plant design project report required. Integrate global and social issues in engineering.
Prerequisite: CHE 158 and CHE 160B, instructor consent.
Corequisite: ENGR 195B
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

CHE 166. Advanced Thin Film Processes
See MATE 166.
Normal Grade Rules
1 unit

CHE 174. Hazardous Materials
Review of current methods and procedures for management of hazardous materials and hazardous wastes; analysis of contaminated systems and remedial actions.
Prerequisite: PHYS 51, PHYS 52, or PHYS 71 and CHEM 1A or instructor consent.
Normal Grade Rules
3 units

CHE 180. Individual Studies
Individual work on special topics by arrangement.
Repeatable for credit
Credit / No Credit
1-3 units

CHE 185. Chemical Process Dynamics and Control
Dynamic behavior of representative chemical processes. Process control; dynamics of open-loop systems, techniques of closed-loop control.
Prerequisite: CHE 160B.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

CHE 190. Introduction to Transport Phenomena
Prerequisite: PHYS 051 (with a grade of “C-” or better), MATH 133A; CHEM 001B, CE 099
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

CHE 192. Introduction to Biochemical Engineering
Enzyme kinetics and enzyme reactors, enzyme isolation and purification; cellular regulation and recombinant DNA technology, microbial kinetics and design/operation of fermenters.
Prerequisite: CHEM 132A, or both CHEM 130A and CHEM 130B, or CHEM 135 or CHE 158.
Normal Grade Rules
3 units

CHE 193. Microbiological Techniques
See BIOL 393.
Normal Grade Rules
1 unit

CHE 194. Biochemical Engineering Lab
Principles, concepts and mechanisms of growth and purification of products from biological systems investigated, with emphasis on scale-up procedures. Recombinant DNA techniques and bioinformatics included.
Pre/Corequisite: CHE 192
Misc/Lab: Lecture 2 hour/lab 3 hours.
Normal Grade Rules
3 units

CHE 195C. Interdisciplinary Senior Project I
See ENGR 195C.
Normal Grade Rules
3 units
CHE 195D. Interdisciplinary Senior Project II
See ENGR 195D.
Normal Grade Rules
3 units

CHE 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

CHE 199. Special Topics in Chemical and Materials Engineering
Special Topics in Chemical and Materials Engineering. Content varies from semester to semester. Course is repeatable for a total of 6 units.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CHE 207. Mass Transfer
An advanced study of the principles of mass transfer in the diffusional operations of distillation, absorption, extraction, drying and humidification.
Prerequisite: CHE 160B.
Normal Grade Rules
3 units

CHE 211. Advanced Chemical Engineering Thermodynamics
Quantitative development of fundamental laws of thermodynamics and their application to chemical processes. Equilibria and thermal effects in homogeneous and heterogeneous systems. Studies of behavior of complex mixtures and high pressure phenomena.
Prerequisite: CHE 151 and MATH 133A.
Normal Grade Rules
3 units

CHE 218. Reaction Kinetics
Theoretical background of simple homogeneous reactions collision theory and absolute reaction rate theory, mechanisms of complex homogeneous reactions. Mechanisms of reactions catalyzed by solids; diffusion in solid catalyst. Reactor design.
Prerequisite: MATH 133A, CHE 151 and CHE 158.
Normal Grade Rules
3 units

CHE 219. Transport Processes
Derivation of general differential equations for transport of heat, mass and momentum; kinetic theory of fluids and its application to transport phenomena based on molecular motion; methods for estimating transport coefficients in fluids.
Prerequisite: CHE 160B.
Normal Grade Rules
3 units

CHE 281. MS Thesis/Project Preparation Seminar
See MATE 281.
Credit / No Credit
1 unit

CHE 293. Applied Bioinformatics
Bioinformatics theory and applications including sequence search, proteomics, molecular modeling, and combinatorial chemistry. Students will work in teams and be guided in independent inquiry to solve practical bioinformatics problems.
Prerequisite: Senior or graduate standing in engineering or science.
Normal Grade Rules
3 units

CHE 297. Special Topics in Chemical Engineering
Special topics to augment regularly-scheduled graduate courses.
Prerequisite: Graduate standing or instructor permission.
Repeatable for credit
Normal Grade Rules
1-4 units

CHE 298. Master’s Project
Master’s project work in Chemical Engineering.
Prerequisite: Admission to candidacy.
Corequisite: CHE 281.
Repeatable for credit
Mandatory CR/NC/RP
1-2 units

CHE 299. Master's Thesis
Master's thesis work in Chemical Engineering.
Prerequisite: Admission to candidacy.
Corequisite: CHE 281.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

MATERIALS ENGINEERING

LOWER DIVISION

MATE 025. Introduction to Materials
Atomic and crystal structures; imperfections and atom movement; phase equilibria and transformations; boundaries; heat treatment of metals; mechanical, physical and chemical properties of engineering materials.
Prerequisite: CHEM 001A, PHYS 050, MATH 031
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

MATE 099. Chemical and Materials Engineering Seminar
See CHE 099.
Repeatable for credit
Credit / No Credit
1 unit

MATE 115. Structure/Properties of Solids
Bonding and crystal structure; the space lattice and unit cell calculations; crystalline anisotropy; point, line and surface defects; phase equilibria and interpretation of phase diagrams; thermal activation and the vacancy mechanism of mass transport in solids.
Prerequisite: PHYS 051 (with a grade of “C-” or better); MATH 133A; CHEM 001B and MATE 025
Corequisite: ENGR 030.
Normal Grade Rules
3 units

MATE 129. Introduction to Integrated Circuits Processing and Design
Basic processes involved in fabrication of integrated circuits; semiconductor physics, material preparation, oxidation, diffusion; photolithographic, thin-film deposition and etching. Simple component layout and evaluation of device parameters.
Prerequisite: MATE 25 or MATE 153
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

MATE 135. Introduction to Composite Materials
Introduction to theory, application, and design with composite materials, including high performance resin-matrix fibrous composites and metal-matrix materials. Topics include materials, test techniques, environmental effects, design considerations, and application requirements.
Prerequisite: MATE 025.
Normal Grade Rules
3 units

MATE 141. Structure and Analysis of Materials
Crystallography and structural analysis of materials by x-rays and electrons. Imaging, diffraction, scattering and spectroscopic methods of characterization.
Prerequisite: MATE 115.
Corequisite: MATE 153.
Normal Grade Rules
3 units

MATE 143. Principles of Scanning Electron Microscopy
Principles and practice of scanning electron microscopy. Basic theory and skills development of electron microscopy, including electron dispersive spectroscopy. Imaging and compositional analysis of conductive and non-conductive samples.
Prerequisite: Introductory course in chemistry, physics or materials engineering.
Misc/Lab: 3 hour lab.
ABC/No Credit
1 unit
MATE 144. X-Ray Diffraction Lab
Practical applications of X-ray diffraction. Including phase identification, texture analysis, grain size determination.
Prerequisite or Corequisite: MATE 141 or instructor consent.
ABC/No Credit 1 unit

MATE 145. Principles of Scanning Probe Microscopy
Principles and practice of various surface probe microscopies including AFM and STM.
Prerequisite: Introductory course in chemistry, physics or materials engineering.
ABC/No Credit 1 unit

MATE 151. Solid State Thermodynamics
Analysis of the ideal and real behavior of gases, liquids and solids from a macroscopic viewpoint; 1st and 2nd Law; phase rule; volumetric properties of fluids; heat effects; solution theory and applications; vapor-liquid and solid-solid equilibria; chemical reaction equilibria.
Prerequisite: CHEM 115 and ENGR 10
Misc/Lab: Lecture 3 hours/calculation period 3 hours.
Normal Grade Rules 3 units

MATE 155. Materials Selection and Process Design
Methodology for selecting materials in process design for engineering applications. Case studies emphasizing materials selection and process parameters. Evaluation of material performance, robust design, and process control on semiconductor manufacturing, bioengineering devices, energy storage and conversion, water purification applications.
Prerequisite: MATE 115, CHEM 162, and ENGR 1010.
Normal Grade Rules 3 units

MATE 156. Photovoltaic Fabrication/Testing Lab
Laboratory course covering photovoltaic (solar cell) design, fabrication, and testing. TCAD simulation tools will be used in design. Fabrication processes will include cleaning, surface texturing, deposition, diffusion, metallization, photolithography, etching, and electrical testing.
Prerequisites: MATE 025 or MATE 153 or corequisite of MATE 129.
Misc/Lab: Lab 3 hours.
Normal Grade Rules 1 unit

MATE 157. Applied Design
Lab experience in common processing methods for polymers, ceramics and composite materials. Design and characterization of materials processing methods. Prerequisite: MATE 25 or TECH 25.
Normal Grade Rules 1 unit

MATE 158. Metals and Alloys
Thermal and mechanical processing of metals and alloys. Heat treatments, metallography and interpretation of microstructure. Biomedical, aerospace, automotive and other applications of metals discussed, including precipitation hardening of non-ferrous metal alloys, and the processing/structure/properties relationship in titanium alloys.
Prerequisite: MATE 115.
Corequisite: MATE 153 or ENGR 100W.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

MATE 159. Metallurgy of Polymers
Structure and properties of solid polymers; chemistry, thermal transitions; mechanical, electrical and optical properties; influence of chemical structure and processing on properties; applications. Prerequisite: MATE 25 (with a grade of “C”) and CHEM 161A (or equivalent as determined by instructor).
Normal Grade Rules 3 units

MATE 160. Polymers
Structure and properties of solid polymers; chemistry, thermal transitions; mechanical, electrical and optical properties; influence of chemical structure and processing on properties; applications. Prerequisite: MATE 25 or TECH 25.
Normal Grade Rules 1 unit

MATE 162. Solid State Kinetics
Diffusion and rates of reaction in solids. Transformations in solids, including nucleation and growth, martensitic transformation, spinodal decomposition and order-disorder reactions.
Prerequisite: 2.0 average for MATE 115, MATE 141, MATE 151, MATE 154 and MATE 155; ENGR 100W; CHEM 162.
Normal Grade Rules 3 units

MATE 163. Electronic, Optical and Magnetic Properties of Materials
Crystalline and energy band structure of materials, thermal properties and electrical conduction in semiconductors and metals, optical and magnetic properties of solids.
Prerequisite: PHYS 051; CHEM 001A; EE 098 and MATH 133A.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

MATE 164. Electronic Materials
Laboratory course covering the science and engineering of thin film deposition processes, etching and patterning used in microelectronics and microscale fabrication. Design of experiments methodology for examining process variables and process control is taught and utilized extensively.
Prerequisite: MATE 025 or MATE 153 or corequisite of MATE 129.
Misc/Lab: Lab 3 hours.
Normal Grade Rules 1 unit

MATE 165. Advanced Thin Film Processes
Laboratory course covering the science and engineering of thin film deposition processes, etching and patterning used in microelectronics and microscale fabrication. Design of experiments methodology for examining process variables and process control is taught and utilized extensively.
Prerequisite: MATE 025 or MATE 153 or corequisite of MATE 129.
Misc/Lab: Lab 3 hours.
Normal Grade Rules 1 unit

MATE 167. Microelectronics Manufacturing Methods
See EE 167
Normal Grade Rules 3 units

MATE 168. Microfluidics Fabrication and Design
See ME 168.
ABC/No Credit 1 unit

MATE 169. Microelectromechanical Systems Fabrication and Design
See ME 169.
Normal Grade Rules 1 unit

MATE 175. Biomaterials
Properties and biocompatibility of metallic, ceramic, polymeric and biological materials used in devices and biotechnology, with emphasis on interventional cardiology, surgical devices implants, vascular prostheses, catheters and drug delivery systems, orthopedics and ophthalmology.
Prerequisite: MATE 25 or instructor consent.
Normal Grade Rules 3 units

MATE 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Major form on file with department and instructor consent.
Repeatable for credit Credit / No Credit 1-3 units

MATE 185. Ceramics
Structure, properties and processing of crystalline and glassy ceramics, including defect thermodynamics, surfaces, ternary phase equilibria, and sintering. Applications include solid oxide fuel cells, oxide based chemical sensors, ceramics for biomedical and dental applications, and processing of electronic components.
Prerequisite: MATE 115, MATE 151, MATE majors must also satisfy Jr. Core requirements.
Normal Grade Rules 3 units

MATE 186. Polymers
Structure and properties of solid polymers; chemistry, thermal transitions; mechanical, electrical and optical properties; influence of chemical structure and processing on properties; applications. Prerequisite: MATE 25 (with a grade of “C”) and CHEM 161A (or equivalent as determined by instructor).
Normal Grade Rules 3 units

MATE 191. Materials Processing Laboratory
Lab experience in common processing methods for polymers, ceramics and composite materials. Design and characterization of materials processing methods. Prerequisite: MATE 25 or TECH 25.
Normal Grade Rules 1 unit
MATE 195. Mechanical Behavior of Materials
Elasticity, plasticity, anelasticity; deformation mechanisms; effect of microstructure and imperfections; fatigue, creep, fracture, plane stress and plane strain; failure analysis for structural applications involving engineering devices and systems, bulk and nanomaterials, material compatibility, and interfacial bonding in thin films.
Prerequisite: MATE 115, ENGR 100W, CHE 162, CE 099; MatE majors must satisfy the Junior core.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

MATE 195C. Interdisciplinary Senior Project I
See ENGR 195C.
Normal Grade Rules 3 units

MATE 195D. Interdisciplinary Senior Project II
See ENGR 195D.
Normal Grade Rules 3 units

MATE 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules 3 units

MATE 198A. Senior Design Project
Apply materials engineering principles to the design and implementation of an approved materials engineering project, Integrate global and social issues in engineering.
Prerequisite: 2.0 average and “C-“ minimum grade in (MATE 115, MATE 141, MATE 151, MATE 154, MATE 155), ENGR 100W, CHE 162.
Corequisite: ENGR 195A, MATE 195 and CHE 161
Misc/Lab: Lecture 1 hour/Lab 3 hours.
Normal Grade Rules 2 units

MATE 198B. Senior Design Project
Apply materials engineering principles to the design and implementation of an approved materials engineering project, Integrate global and social issues in engineering.
Prerequisite: MATE 198A with a minimum grade of “C”.
Corequisite: ENGR 195B
Misc/Lab: Lecture 1 hour/Lab 3 hours.
Normal Grade Rules 2 units

MATE 199. Special Topics in Chemical and Materials Engineering
See CHE 199.
Repeatable for credit
Normal Grade Rules 3 units

MATE 200. Principles and Applications of Electrochemistry
Applied electrochemical systems, such as fuel cells, batteries, electrolytic plating, electrosynthesis. Environmental degradation in biological and material systems. Modern electrochemical techniques in analytical chemistry, including polarography, cyclic voltammetry, coulometric and pulse methods.
Prerequisite: MATE 155 (or equivalent) or instructor consent.
Normal Grade Rules 3 units

MATE 201. Solid State Materials Engineering
Electrical, optical and magnetic properties. Includes wave mechanics, bonding theory, energy band theory, electronic transport, conduction, semiconduction and insulation.
Prerequisite: MATE 115 (or equivalent).
Normal Grade Rules 3 units

MATE 205. Advanced Mechanical Behavior of Solids
Structure-property relationships in mechanical behavior of materials, including elastic, anelastic and plastic behavior; creep characteristics, fracture, testing methods, dislocation dynamics, strengthening mechanisms.
Prerequisite: MATE 115 (or equivalent).
Normal Grade Rules 3 units

MATE 210. Experimental Methods in Materials Engineering
Advanced study of experimental techniques used in materials engineering, including data acquisition and analysis, experiment design strategy and hands-on operation of advanced equipment.
Prerequisite: MATE 115 (or equivalent).
Misc/Lab: Lecture 2 hour/lab 3 hours.
Normal Grade Rules 3 units

MATE 215. Solid State Materials Engineering
Thermodynamics of phase changes, nucleation and growth, martensitic changes, diffusion, rate theory, structural changes accompanying transformation, applications of theoretical concepts to materials development.
Prerequisites: MATE 115 and MATE 151 (or equivalent).
Normal Grade Rules 3 units

MATE 220. Principles of Semiconductor Materials
Advanced theory of constitution, structure and energy bands in semiconductors; material requirements of devices; different methods of doping, interconnection, isolation of circuits, material processing and failure analysis.
Prerequisite: MATE 25, MATE 115, MATE 153 or MATE 129 (or equivalent).
Normal Grade Rules 3 units

MATE 230. Plasma Processing of Materials
Principles of low temperature plasmas used for materials processing, including plasma fundamentals, plasma chemistry, collision and heating mechanisms and diagnostics. Material interactions in plasma assisted etching, deposition, and surface treatment will be emphasized.
Prerequisite: MATE 133A, MATE 25, and PHYS 51 or equivalent courses.
Normal Grade Rules 3 units

MATE 232. Plasma Processing of Materials
Principles of low temperature plasmas used for materials processing, including plasma fundamentals, plasma chemistry, collision and heating mechanisms and diagnostics. Material interactions in plasma assisted etching, deposition, and surface treatment will be emphasized.
Prerequisite: MATE 133A, MATE 25, and PHYS 51 or equivalent courses.
Normal Grade Rules 3 units

MATE 234. Microelectronic Packaging Materials Science
Materials engineering principles, as applied to microelectronic packaging. Topics covered include polymers/ceramics/metals structure-property relationships, phase diagrams, diffusion, bonding, corrosion, materials testing, characterization, materials selection and failure analysis, among others.
Prerequisite: ENGR 240 or instructor consent.
Normal Grade Rules 3 units

MATE 241. Advanced Methods of Materials Characterization
Methods for characterization and analysis of bulk materials, films, nanoscale structures and surfaces.
Prerequisite: Upper division undergraduate course in chemistry, condensed matter physics or materials.
Normal Grade Rules 3 units

MATE 251. Advanced Solid State Thermodynamics
Thermodynamics of phase changes, nucleation and growth, martensitic changes, diffusion, rate theory, structural changes accompanying transformation, applications of theoretical concepts to materials development.
Prerequisites: MATE 115 and MATE 151 (or equivalent).
Normal Grade Rules 3 units

MATE 256. Principles of Nanomaterials
The fundamental properties of nanomaterials including thermodynamic, mechanical, electrical, magnetic, optical and biochemical properties and synthesis and characterization. Applications including nanomaterials for structural composites, memory and logic devices, clean renewable energy technologies, bio materials in drug delivery, and aerospace applications.
Prerequisites: CHEM 001A, EE 098, MATH 133A, PHYS 051, PHYS 071, MATE 025, and MATE 153.
Normal Grade Rules 3 units
MATE 270. Methods of Thin Film Deposition
Chemical and physical methods of thin film deposition including evaporation, sputtering, chemical vapor deposition, and electroplating. Thermodynamics and kinetics of growth, considerations for reactor design, control of deposition to alter film properties, deposition processes used for metals, dielectrics and semiconductors.
Prerequisite: MATE 152 (or equivalent).

MATE 281. MS Thesis/Project Preparation Seminar
Development of project or thesis proposal.
Prerequisites: Classified standing, completion of minimum 9 units towards MS degree, candidacy form submitted, satisfactory completion of university graduate writing requirement.
Misc/Lab: Lab 3 hours.
Credit / No Credit
1 unit

MATE 297. Special Topics in Materials Engineering
Special topics to augment regularly-scheduled graduate courses.
Prerequisite: Graduate standing or instructor permission.
Notes: By arrangement only.
Repeatable for credit
Normal Grade Rules
1-4 units

MATE 298. Master’s Project
Master’s project work in Materials Engineering.
Prerequisite: Admission to candidacy
Corequisite: MATE 281.
Repeatable for credit
Mandatory CR/NC/RP
1-2 units

MATE 299. Master’s Thesis
Master’s thesis work in Materials Engineering.
Prerequisite: Admission to candidacy.
Corequisite: MATE 281.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units
BUSINESS Courses

BUSINESS

UPPER DIVISION

BUS 109. Climate Solutions Initiative
See UNVS 109
Normal Grade Rules
GE: Rv
6 units

BUS 180. Individual Studies in Business
Individual work on special topics by arrangement.
Notes: Business majors only. Petition and plan of study must have consent of instructor and Chairperson in the department of concentration.
Credit / No Credit
1-6 units

GRADUATE

BUS 200. Business, Economics and Society
Emphasizes the relationship between the micro and macro economic environment and thoughtful managerial decision-making. Examines various theories and techniques that underlie the market economy. Costs and benefits of various governmental policies are investigated in a historical context.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 200W. Business Research and Communications
Using a case approach, students will learn about communication within the business world, with the intention that they will practice interpersonal, team, and presentation skills that are expected of effective managers.
Prerequisite: Graduate standing and restricted to Business
- MBA majors only
Normal Grade Rules
3 units

BUS 202. Managing in the Global Economy
This course investigates the world economy, including how markets, institutions and organizations vary from country to country, and how global competition, climate change, digital and emerging economics, and shifting from manufacturing to a service economy affect management practice.
Prerequisite: Graduate standing and restricted to Business
- MBA majors only
Normal Grade Rules
3 units

BUS 210. Developing and Managing People
Based on the philosophy that increased self-awareness and effective self-management leads to more effective management of others, uses experientially focused, integrating models, principles, and activities.
Prerequisite: Graduate standing and restricted to Business
- MBA majors only
Normal Grade Rules
3 units

BUS 211. Orientation Workshop
Credit / No Credit
1 unit

BUS 220. Financial and Managerial Accounting
Introduces students to financial and managerial use of accounting information systems and concepts, including the sources, uses and limitations of accounting information as used by investors outside the firm and by managers within the firm.
Prerequisite: Graduate standing and restricted to Business
- MBA majors only
Normal Grade Rules
3 units

BUS 220A. Financial Statement Analysis for Accountants
Course develops the ability to understand, interpret, and analyze financial information, and examines the relationship between financial statement information and the capital markets. Students develop financial analysis skills, and expand business knowledge from an accounting perspective.
Prerequisite: MSA Classified Standing.
Normal Grade Rules
3 units

BUS 220B. Financial Reporting and Analysis I
Principles, control and theory of accounting for assets; correction of prior year’s earnings; measurement and determination of income.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220C. Accounting Information Systems I
Will provide conceptual framework concerning contemporary accounting information systems including: database concepts, internal control, use of systems technology, applications, management, systems analysis/design and auditing.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220D. Financial Analysis and Markets
Provides an overview of the required skills and the environment appropriate to the financial and economic decision-making function of the firm. The integrated approach of this course is designed to identify and analytically evaluate those internal and external variables which contribute to economic and financial decisions.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220E. Financial Reporting and Analysis II
Continuation of Financial Reporting and Analysis I. Principles, controls, and theory of accounting for liabilities and equities; preparation, utilization, and analysis of cash flow statements; financial ratios and statistical analysis of financial statements accounting data.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220F. Management Accounting and Control Systems
Provides the student techniques with an overview of the concepts and procedures of cost accounting relevant to managerial decision-making. Emphasizes planning and control, inventory valuation and income determination, and performance measurement.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220G. Tax Factors of Business and Investment Decisions: Theory and Practice
An introductory course with focus on concepts relating to the definition and federal taxation of: individuals; gross income, including inclusions and exclusions; deduction; credits; property transactions including capital, non-capital and non-taxable exchanges; and accounting methods.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220H. Auditing: Concepts/Practice
Discusses the public accounting profession and its socio-economic role; auditing techniques with an emphasis on EDP environment; audit procedures; practice and programs; working paper preparation; unqualified and qualified report writing.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units
**BUS 220I. Forensic Accounting**  
Course will examine the frauds perpetrated on companies and methods of discovery. The criminal justice system will be reviewed and litigation support services provided by accountants to attorneys, including damage computations and testifying techniques and skills will be covered.  
Normal Grade Rules  
3 units

**BUS 220J. Business Communications & Ethics**  
Emphasizes communication effectiveness and skill building for influencing and guiding people. Includes fundamental skill building in researching, organizing and writing reports, making persuasive presentations that are sensitive to the needs and requirements of clients, peers and managers.  
Prerequisite: MSA classified standing.  
Normal Grade Rules  
3 units

**BUS 220K. Accounting Practicum**  
The Accounting Practicum is an internship with an accounting firm or corporate finance group. This provides opportunities to apply program content to real-world environments, gain appreciation of work expectations and demands, and relate field experience to remaining program curriculum.  
Prerequisite: MSA classified standing.  
Credit / No Credit  
6 units

**BUS 220L. Legal and Ethical Environment of Accounting Practice**  
Emphasizes knowledge in the areas of the Law of Contracts and selected portions of the Uniform Commercial Code: Sales of Goods, Commercial Paper and other Negotiable Instruments; and Secured Transactions.  
Prerequisite: MSA classified standing.  
Normal Grade Rules  
3 units

**BUS 220M. Accounting Ethics**  
Examines professional ethical standards for accountants. Focuses on professional codes of conduct and workplace decisions for professionals in the fields of auditing, managerial accounting and taxation.  
Prerequisite: BUS 220H  
Normal Grade Rules  
3 units

**BUS 220N. Management of Organizations and Projects**  
Examines the integrative role of the general manager as a strategist responsible for leading and managing multi-functional projects and develop skills related to leadership, planning, decision-making, motivating, scheduling and shaping organizational team culture by making extensive use of team building exercises/cases.  
Prerequisite: MSA Classified Standing.  
Normal Grade Rules  
3 units

**BUS 220P. Taxation of Individuals and Flow-Through Entities**  
Introduces the essentials of research methodology, taxation of corporations and shareholders, partners and partnerships, and practice and procedure. The student upon completing this course should have the ability to analyze a fact situation, determine the potential problems presented, interpret the law and recommend a feasible solution.  
Prerequisite: MSA classified standing.  
Normal Grade Rules  
3 units

**BUS 220S. Financial Reporting and Analysis III**  
Accounting for multi-unit operations: consolidated reporting issues, transfer pricing issues, globalization issues (foreign tax structures, organizational forms and international accounting), translation of foreign currency transactions and operations, hedging foreign currency exposures, goodwill and brief exposure to business combinations.  
Prerequisite: MSA classified standing.  
Normal Grade Rules  
3 units

**BUS 220T. Accounting Information/Tax**  
Prerequisite: MSA classified standing.  
Normal Grade Rules  
3 units

**BUS 220U. IT Audit & Internal Controls**  
The course provides an understanding of the types of risk that arise in computer environments and consider the impact these risk and threats have on the audit by examining computer-assisted audit tools and techniques.  
Prerequisite: MSA Classified Standing.  
Normal Grade Rules  
6 units

**BUS 220V. Special Topics in Accounting**  
Current special topics in accounting including an understanding of the financial accounting policies and procedures followed by state, county, and municipal governments, universities, and other non-profits for accounting and budgeting of the receipt and expenditure of tax and related revenues.  
Prerequisite: MSA Classified Standing.  
Normal Grade Rules  
3 units

**BUS 220X. Business Analysis and Valuation Using Financial Statements**  
Development of Accounting based valuation framework that integrates a firm’s strategy, accounting performance, and value, assessing a firm’s value proposition and identifying key value drivers and risks; evaluating degree to which a firm’s accounting policies capture the underlying business reality.  
Prerequisite: MSA classified standing.  
Normal Grade Rules  
3 units

**BUS 220Y. Professional Communications and Relationships III**  
Skill development in converting critique into meaningful and important information to improve professional performance; integration of professional skills; personal style with effective communication skills to prepare the student for transition to professional in the further development of their careers.  
Prerequisite: MSA classified standing.  
Normal Grade Rules  
3 units

**BUS 221. Taxation of Business and Investment Decision-Making**  
Principles of federal income tax law as applied to business entities, including choice of entities, new ventures, tax deferred transactions such as installment sales, real estate exchanges, and reorgs; AMT, and personal tax planning, including stock options and capital gains.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

**BUS 222. Profit Planning and Control**  
Course covers how financial planning and control systems operate, and are used to deploy strategy, align interests, improve operations, and facilitate strategic change, maximizing firm value. Includes disciplined processes of decision-making, resource allocation, performance measurement to link strategy, management action, and shareholder accountability.  
Prerequisite: BUS 220 and graduate standing.  
Normal Grade Rules  
3 units

**BUS 223A. Tax Research and Decision Making**  
Develops basics for tax research and evaluates the interrelationships of statutes, regulations, rulings and court cases. Identifies tax services and other primary research materials with emphasis on their use in tax decision-making. Emphasizing critical thinking and communication skills.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units
BUS 223B. Taxation of Partnerships
Income tax treatment of partners and partnerships and LLCs, including the creation, operation, liquidation and sale or other amalgamation of organizations. Special allocation and non-recourse debt arrangements are also covered.
Pre/Corequisite: BUS 223A and graduate standing.
Normal Grade Rules
3 units

BUS 223C. Taxation of Corporations and Shareholders
Fundamentals of corporate taxation including formation and capital structure, treatment to shareholders and corporations of liquidating and non-liquidating distributions, redemptions, stock dividends, and corporate reorganizations.
Pre/Corequisite: BUS 223A and graduate standing.
Normal Grade Rules
3 units

BUS 223D. Seminar in Tax Planning and Practice
Capstone course for the MS in Taxation degree. Will integrate financial planning throughout the program, including sale of the business and estate planning, and will include a final written comprehensive project.
Preerequisite: Graduate standing and completion of at least 3 tax core courses.
Notes: Completion of the course or BUS 223E satisfies the MST comprehensive project requirement.
Normal Grade Rules
3 units

BUS 223E. Business and Tax Aspects of High Technology Companies
Tax in business issues facing high technology companies, including stock options, R&D, package design, fiscal and public policy issues, multi-stage financing, joint venturing, Sections 482, 197, 382, going public, etc. Includes comprehensive project.
Preerequisite: Graduate standing and completion of at least 3 tax core courses.
Notes: Completion of this course or BUS 223D satisfies the MST comprehensive project requirement.
Normal Grade Rules
3 units

BUS 223F. Tax Accounting Methods/Periods
Definition and importance of accounting methods and periods; timing rules for income, expenditures, inventory and R&D; change procedures; special methods; book-tax differences; introduction to provision for income taxes.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 223G. Taxation of Business Entities
Income tax treatment of different types of business entities and their owners. Focuses on operations, reporting, formation, restructuring and termination. Selected special state and international tax rules, tax planning, and underlying tax policies also covered.
Pre/corequisites: BUS 223A
Normal Grade Rules
3 units

BUS 223H. Tax Policy Capstone
Capstone course that examines the principles and policies that underlie and shape tax systems and rules. Students gain a broader perspective of the tax law beyond its technical application, and learn how tax, economic, social, and environmental policies interact.
Prerequisites: BUS 223A, BUS 223F, BUS 223G
Normal Grade Rules
3 units

BUS 224. Financial Statement Analysis
Course develops the ability to understand, interpret, and analyze financial information, and examines the relationship between financial statement information and the capital markets. Students develop financial analysis skills, and expand perspectives of business and professional roles.
Prequisite: BUS 220 and graduate standing.
Normal Grade Rules
3 units

Examine managerial accounting in medical product development with emphasis on financial aspects of the industry. Develops understanding of profit/loss statements, budget preparation and execution, financial implication of patent life, rationale for mergers and acquisitions, financial implications of outsourcing.
Prequisite: Admission to MPDM program and completion of BUS 212 and SMPD 281A.
Normal Grade Rules
3 units

BUS 225A. Taxation of Estates and Trusts
Examine transfer tax treatment of estates, gifts, trusts, creators, beneficiaries and fiduciaries. Distinguishes between revocable and irrevocable trusts, including proper trusts to achieve desired goals. Reviews taxation of asset sales and dissolution or liquidation of estates or trusts. Analyzes estate evaluation, family limited partnerships, grants, CGT, and planning opportunities.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225C. International Tax - US Corporations with Foreign Activities
Taxation of outbound investment and activities of the US corporations. Topics include sourcing, foreign tax credit, subpart F, Sections 482 and 367, income tax treaties, foreign currency, establishing foreign operations, and issues affecting expanding US multinational technology firms.
Pre requisite: BUS 223A.
Corequisite: BUS 223C.
Normal Grade Rules
3 units

BUS 225D. International Tax - Individuals and Foreign Corporations
Taxation of individuals with foreign activities, and inbound investment and activities of foreign corporations. Topics include taxation of US expatriates and foreign nationals, foreign tax credit, tax treaties, foreign-owned US real estate, and issues of mobile employees.
Pre requisite: BUS 223A.
Corequisite: BUS 223C.
Normal Grade Rules
3 units

BUS 225F. State Taxation Fundamentals
Introduction to the legal foundation, nature and operation of key state and local taxes. Constitutional constraints regarding nexus, sourcing and apportionment are covered. Additional topics include research techniques, compliance and planning considerations, current issues and state tax reform.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225G. Taxation of S Corporations
Topics include: Income tax treatment of S Corporations and their shareholders, built-in gains tax and excess net passive income tax; operating and distribution rules, shareholders basis, NOL, pass-through rules; formation, reorganizations, QSUBs, and state income tax consequences.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units
BUS 225H. Taxation of Property Transactions
Key rules and planning considerations of property development, transfer, lease, abandonment, worthlessness, and destruction; depreciation and amortization; special types of intangibles and relevant tax rules; property indebtedness; sale of a business; tax-deferred transactions; sale of a principal residence, and basics of non-income taxes applicable to property and property transactions.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225J. Taxation of Executive Compensation
Tax aspects of executive compensation includes qualified and nonqualified stock options, deferred compensation, fringe benefits, 401(k), 403(b), pension and profit sharing plans, rabbi trusts, etc.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225L. Accounting for Income Taxes
Financial accounting rules regarding the calculation and presentation of a company’s provision for income taxes.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 225M. State Tax Planning
Tax planning considerations are covered for multistate and single state businesses for key state taxes. Tax effects of location of property, payroll and sales are covered along with state tax incentives and dealing with incomplete guidance.
Prerequisite: BUS 225F
Normal Grade Rules
3 units

BUS 225N. Financing Options - New or Growing Bus
Covers the fundamentals of various financing techniques for such businesses including equity, debt and "going public". Decision-making considerations, strategy, valuation and relevant security and tax laws are covered.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225O. Taxation of Tax Exempt Organizations
Taxation of tax exempt organizations, including application of UBIT, investment in partnerships and S Corp., foundation, pension plans, VEBAS, form 990's.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225P. Advanced International Tax - US Corporations
Advanced study of income tax treatment of international corporate transactions including international reorganizations and Section 367, Section 304 and corporate inversions. Planning for intangibles, subpart F planning, foreign entity structuring including use of check-the-box entities, foreign currency transactions, and foreign tax credit planning.
Prerequisite: BUS225C
Normal Grade Rules
3 units

BUS 225R. Tax Policy and Tax Reform
Overview to principles and policies that underlie and impact tax systems and reforms. Students will gain a broader appreciation of the tax law beyond its technical application, as well as how tax, economic, social and environmental policies interact.
Prerequisite: BUS 223A.
Pre/corequisite: BUS 223B, BUS 223C, BUS 223F.
Normal Grade Rules
3 units

BUS 225S. Consolidated Returns
Review and analysis of theory, rules and practice involving affiliated entities and filing of consolidated returns.
Prerequisite: BUS 223A.
Pre/corequisite: BUS 223C.
Normal Grade Rules
3 units

BUS 225T. Intermediate Acctg for Income Taxes
Follow-up to BUS 225L, Accounting for Income Tax. Topics covered include IFRS-CAAP convergence, FAS 141R (Purchase accounting), International tax accounting (including APB 23, ARB 51, FAS 52), FAS 123R (advanced topics), State & Local considerations, FIN 48 and other relevant/current topics.
Prerequisite: BUS 225L
Normal Grade Rules
3 units

BUS 225U. Fundamentals of Transfer Pricing
Introduction to the fundamental principles of intercompany pricing, applications of transfer pricing methods to related party transactions under U.S. transfer pricing regulations and OECD Guidelines, and the economic analysis required for intercompany transactions of multinational corporations.
Prerequisites: BUS 223A.
Normal Grade Rules
3 units

BUS 225V. Tax Considerations for High Tech Companies
Explores the nature of high tech companies, special features, and why tax issues exist. In depth learning about tax incentives for innovation including the research credit, treatment of intangibles, stock options, multi-stage financing, multi-jurisdictional considerations, and book-tax differences.
Prerequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225W. Introduction to International Taxation
Introduction to the structure, basic rules, and policies of the federal income tax system with respect to international transactions of US and foreign persons. Topics include residency, sourcing, tax treaties, foreign tax credit, transfer pricing, and compliance.
Prerequisite: BUS 223A.
Corequisite: BUS 223C
Normal Grade Rules
3 units

BUS 226. Tax and Financial Reporting Issues of Emerging Firms
Management team and business plan issues; public offerings stock issues, certified audit issues, investment banking concerns, SEC requirements, mezzanine financing, purging the S corporation’s earnings; reporting requirements, insider trading, restricted stock issues, 10Q, K's and forecasts; tax issues.
Prerequisite: BUS 220 and graduate standing.
Normal Grade Rules
3 units

BUS 227A. Individual Tax Compliance
Basics of federal income tax compliance from information gathering to return filing. Includes practice preparing various individual forms and schedules, software tools, engagement letters, rules of conduct, disclosures, record keeping, key California adjustments, and completion of a moderately complex Form 1040.
Corequisites: BUS 223A.
Normal Grade Rules
1 unit
BUS 227B. Ethics for Tax Practitioners
Review of rules of conduct, tax penalties and professional ethical behavior relevant to tax compliance and planning. Key rules applicable to a CPA are covered in the context of their application in the day-to-day work of a tax practitioner.
Corequisites: BUS 223A.
Normal Grade Rules
1 unit

BUS 227C. Tax Symposium
Tax symposium topics may vary from year to year to allow for focus on new developments or special tax topics. Check the MST schedule for the topic description.
Corequisites: BUS 223A.
Repeatable for credit
Normal Grade Rules
1 unit

BUS 227D. Employment Taxation and the Modern Workforce
An overview to the types of employment tax and related issues that can arise for companies and workers when employees telecommute or have multiple work locations. The basics of federal employment taxes are covered along with worker classification rules as well as selected state and international tax issues and rules relevant for today’s workforce.
Pre/Corequisites: BUS 223A
Normal Grade Rules
1 unit

BUS 227E. Foundation for Understanding Taxation
Legal foundation of taxes, types of taxes, and underlying theories, definitions and concepts. How to analyze transactions and activities for tax consequences. Helps strengthen one’s overall understanding of taxation and application of analytical skills to resolving tax issues.
Prerequisites: Undergraduate tax course
Normal Grade Rules
1 unit

BUS 227F. Personal and Business Leadership Skills for Tax Practitioners
Learn the intrapersonal and interpersonal skills and knowledge a tax practitioner needs for personal and professional success. Includes listening, oral and written communication, ethical reasoning, relationship and team building, establishment and assessment of accountability measures, time management, and career planning.
Pre-Requisite: Graduate Standing
Normal Grade Rules
2 units

BUS 230. Marketing Management
Fundamental concepts and skills required for understanding markets and managing marketing efforts. Includes market orientation, consumer and industrial buyer behavior, market segmentation, target market identification, product development, pricing, distribution channels, marketing communication, strategy development, and marketing planning and control.
Prerequisite: Graduate standing and restricted to Business - MBA majors only
Normal Grade Rules
3 units

BUS 231. Consumer and Market Behavior
Influence of consumer behavior upon marketing management strategy; examination of behavioral concepts as they relate to purchase decisions; types of consumer research instructions and applications; focus on buyer behavior in action-oriented environments.
Prerequisite: BUS 230 and graduate standing
Normal Grade Rules
3 units

BUS 231A. Market Forecasting
Course will help business people in understanding and identifying the appropriate forecasting methods in order to make a more accurate prediction of future demand.
Prerequisite: BUS 230, Business statistics and graduate standing
Normal Grade Rules
3 units

BUS 231C. High Tech Marketing
Course will give students exposure to marketing in technology industries. Principal ideas from the technology adoption life cycle form the conceptual basis for the course. Differences between technology marketing and other kinds of marketing are explored and special skills identified.
Prerequisite: BUS 230, business statistics, and graduate standing
Normal Grade Rules
3 units

BUS 232. Third World Marketing Manager
Marketing in Third World high risk areas: Russian, African, Islamic. Understanding methods of marketing, as well as how to deal with specific third world risks: mafia, bribery, “black” market, smuggling and corruption.
Prerequisite: BUS 230 and graduate standing
Normal Grade Rules
3 units

BUS 233. Business to Business Marketing
Course deals with business-to-business marketing, that is, the marketing of goods, services, and ideas to business and non-retail institutions. Covers product, price, promotion and distribution with emphasis on strategy development and marketing decision-making.
Prerequisite: Bus 230 and graduate standing
Normal Grade Rules
3 units

BUS 233B. Relationship Marketing: Pacific Rim
Course focuses on how to launch a PacRim “start-up”. Topics include PacRim forms of product-launch, sales presentation, negotiation, product adaptation, promotion, PacRim risks. Special section on how to launch your overseas career.
Prerequisite: BUS 230 and graduate standing.
Normal Grade Rules
3 units

BUS 233E. Marketing to Eastern/Western Europe
Course reviews the region’s geography, histories, cultures, religions and those aspects of European lifestyle that directly facilitate our commercial efforts or marketing and doing business in Eastern and Western Europe.
Prerequisite: BUS 230 and graduate standing.
Normal Grade Rules
3 units

BUS 234B. Promotional Strategy
Explores the media and techniques used by businesses to communicate with consumers, resellers, and the public. Topics will include budgeting, choosing media, testing communication effectiveness, executing and controlling advertising, personal selling, and consumer trade promotions.
Prerequisite: BUS 230 and graduate standing.
Normal Grade Rules
3 units

BUS 235A. Introduction to Business Analytics
This course will introduce fundamental business analytics tools including Probability Analysis, Decision Analysis, and Linear and Discrete Optimization. An emphasis will be placed on conceptual understanding and analytic insight.
Normal Grade Rules
3 units

BUS 235B. Business Research
This course introduces participants to 21st Century business research methodology. The emphasis here is not on issues related to ongoing data sources but rather to unique, one-time problems that are best solved with custom research projects. Quantitative methods are emphasized but the advantages of the qualitative perspective are not overlooked. Other topics include questionnaire design, data collection, analysis, and presentation, highlighting appropriate new technology. The aim is to prepare managers to conduct research as well as to enable them to engage collaboratively with their research consultants.
Normal Grade Rules
3 units

BUS 235C. Data Mining
Data mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in transactional databases or gathered through web mining. Topics: data visualization, association rules, clustering, and various modern classification techniques.
Normal Grade Rules
3 units
BUS 235D. Business Analytics Simulation
Transforming diverse data into knowledge-driven business decisions. Participants make tactical and strategic decisions based on consumer, competitor, aggregate market, financial, etc. Success is gauged by monitoring a dashboard that includes manufacturing productivity, return on investment, investment in the future, market share, product quality, financial performance, etc.
Normal Grade Rules
3 units

BUS 236. Current Topics in Marketing
Emphasizes marketing and decision-making in social, government and business environments. Uses behavioral science and quantitative techniques to develop strategies for tactical and strategic marketing solutions to problems which impact on R&D, finance, logistics, manufacturing, distribution and others.
Prerequisite: BUS 230 and graduate standing.
Repeatable for credit
Normal Grade Rules
3 units

BUS 238. International Marketing
The development of international marketing strategy. Focus on the evaluation of the various environmental variables, selection of target markets, methods of entry, developing an appropriate marketing mix and planning/control of the international marketing effort.
Prerequisite: BUS 230 and graduate standing.
Normal Grade Rules
3 units

BUS 240. Electronic Commerce
Focuses on organizational uses of information technology, impacts of IT on organizational operations and strategies, and increasing importance of Internet in business activities. Covers fundamentals of IT, organizational applications of IT and Internet, and successfully developing and implementing IT-based applications.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 241. Structured Methods of Information Technology
An analysis of structured methodologies of programming, documentation, testing, and management. Examined in terms of various information technologies; emphasis on development of techniques to analyze, design and adapt system solutions to organizational information needs.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 242. Distributed Information Systems
An analysis of database management systems, data communications, and telecommunications in a distributed information network. Focus will concentrate on identifying the means through which an organization can use the information technologies of distributed systems to satisfy its data needs.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 243. Database Management
Introduction to database approach of planning, design and implementation of information systems applications in organizations from the viewpoint of the manager as a knowledgeable user. Includes data modeling, data integrity and practical project assignments.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 244R. Seminar in Organizational Communication
See COMM 244R.
Normal Grade Rules
4 units

BUS 245. Service Innovation
The course introduces students to the service in a variety of trade, enterprise and service industry settings. Students will learn about the economics and management of service systems and their design, operations, information technology, performance measurement, marketing, supply chain and quality assurance.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 248. Cyber Risk Management
This course surveys cyber risk management concepts and best practices. Topics include cyber security threats, countermeasures, vulnerabilities, cost/benefit analysis, incident handling/response, business contingency planning, ethics, and legal imperatives within the organizational context.
Normal Grade Rules
3 units

BUS 250. Law and Ethics
Course focuses on both law and ethics in the business environment, how individuals and organizations approach law and ethics, as well as the ethical, legal and social consequences of disregarding law and ethics in favor of other objectives.
Prerequisite: Graduate standing and restricted to Business MBA majors only.
Normal Grade Rules
3 units

BUS 251. Strategic Human Capital Performance Management
This course utilizes case and research discussions as well as quantitative costing and utility analyses to develop practical skills in the global deployment of human resources to achieve and sustain strategic competitive advantage.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 252. Managing Organizational Change
The focus will be upon applied organizational change by covering organizational behavior from a normative, policy-oriented perspective. The perspective will be one of viewing the person (student) as an actual or potential change agent; a consultant (internal or external), innovative personnel specialist, or middle or top level manager.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 253. Negotiation and Conflict Management
Introduces a theoretical framework and skill-building exercises/simulations for negotiating agreements in adversarial or competitive relationships. Explores conflict resolution methods applicable to commercial transactions, employee relations, union management negotiation and contract disputes, as well as international diplomacy.
Prerequisite: Graduate standing.
Normal Grade Rules
4 units

BUS 254. Advanced Personnel Management
Selected human resource management topics are studied, including: computer applications and quantitative methods, forecasting, job analysis, personnel recruitment and selection, training and development, EEO, compensation, performance appraisal, OSHA requirements, labor relations.
Prerequisite: BUS 251 (or equivalent); statistics and computer applications; graduate standing.
Repeatable for credit
Normal Grade Rules
3 units

BUS 255. Diversity in the Workforce
Analysis of communication, leadership, motivation, group dynamics, decision-making, problem solving, training, change, conflict resolution and other behavioral concerns as they apply to the management of the multicultural workforce.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
BUS 256. Labor and Employment Law  
Providing exposure to laws and regulations that govern the employment relationship, this course develops the critical thinking and research skills needed to recognize and effectively manage workplace legal issues such as discrimination, harassment or wrongful discharge.  
Normal Grade Rules  
3 units

BUS 257. Creativity in Managers  
Enhancing ability to manage one’s self and construct organizational processes and environments that help move individuals from mechanicalness to creativity.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 258. Leading Edge Managers  
Experiential seminar to develop specific managing and leading capabilities. Focus on skills typically missing from MBA education: managing a multi- and cross-cultural workforce; developing effective teams and collaborative work; building a high-performing work system.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 259. Mg Legal Aspects of Tech & New Prod Dev  
This course addresses emerging issues in intellectual property - patent, copyright, trademark, and trade secrets laws - with an emphasis toward managing and protecting innovation and new product development in areas such as computer technology, biotechnology, and cyber-space.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 260. Managerial Decision Analysis  
Concerns the inherent complexities in the process of choice. Covers decomposition of the decision environment, the use of decision trees, value theory, analysis of criterion, the statistical measurement of risk and uncertainty, preposterior analysis, and problems of collective choice.  
Prerequisite: Business statistics and graduate standing; restricted to Business - MBA majors only  
Normal Grade Rules  
3 units

BUS 261. Legal Challenges for the International Manager  
Learn how legal systems affect international business. Topics include: securities law in international transactions; US trade law; export regulations; foreign legal problems; legal risk analysis; labor law systems; control of capital and currency; intellectual property rights; licensing; business with state-controlled agencies.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 262. Leadership  
Explores classic and contemporary models of leaders and leadership and defines the difference between management and leadership. Practical applications of theory emphasizing the contingency perspective.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 262A. Global Leadership and Innovation  
This course provides an in-depth introduction to global leadership and its development and to fostering innovation and global change. Through assessments and behavioral simulations, it prepares students to do global work effectively in a complex context with people from various cultures.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 262B. Global Leadership and Development  
Students learn about global leadership and, in particular, its development in the Global Leadership Laboratory. As GLab Associates, they help facilitate high impact experiential exercises, learn to give feedback, and supervise and coach student teams in global leadership courses.  
Prerequisite: Graduate Standing  
Normal Grade Rules  
3 units

BUS 263. High Performance Management  
An intense analysis of management with main focus on understanding organizations as systems. Use of academic theories as tools with which you solve real-world tactical performance problems. Emphasizes critical thinking and problem solving.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 264. Introduction to Technology Planning and Management  
Develops technology strategies through a qualitative (scenario and strategy map-based) and a quantitative (decision analysis and option theory-based) approach for technology portfolio planning and management. It provides practical, stimulating, and easy-to-use methods for realistic applications.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 264A. Professional/Business Ethics  
Ethical principles relevant to decision-making in business situations. Using case studies, examines and analyzes moral issues to determine the most appropriate actions. Experiential and self-reflective as well as theoretical.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 267. Alternative Compensation Systems  
A systematic exposure to theories and practices of various organizational reward systems. Drawing on managerial, behavioral, and economic frameworks to review various compensation topics and tackle some of the most controversial or innovative issues in compensation management.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 268. Managing Across Cultures  
A comprehensive foundation for understanding, managing, and successfully interacting in the multi-faceted, culturally-embedded contexts of multinational firms. Understanding major issues facing multinational corporations in the management of international operations; insights into cultural, historical and institutional factors; skills for working effectively in international multicultural teams.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 268A. Global Business Management  
A global view on business, investigating why and how companies succeed internationally. It provides students a conceptual tool by which to understand how economic, social and political factors influence both domestic and international operations.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 269. Strategic Management in the Computer Industry  
The online course focuses on the industry-specific strategic challenges faced by companies that comprise the sector that is preeminent in the Information Age. Case studies favor PCs over big iron and software over hardware.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 270. Financial Management  
Introduces the structure, markets and regulatory factors within the financial system. Develops basic skills in preparing financial plans/budgets, valuing capital costs, financial assets and evaluating the firm’s capital structure, cost of capital, working capital, dividend policies, financing and investment decisions.  
Prerequisite: BUS 220 and graduate standing; restricted to Business - MBA majors only  
Normal Grade Rules  
3 units
BUS 271. Capital Markets  
Driven by technological change, deregulation and globalization, course provides students an overview of the U.S. and international financial environment through financial media, spreadsheets and the Internet. Students leave the class with knowledge of interest rates, flow of funds, derivatives, money and capital markets and financial intermediaries.  
Prerequisite: BUS 270 and graduate standing.  
Normal Grade Rules  
3 units

BUS 272. Current Topics in Finance  
Presented as a collection of topics of current interest and concern to managers, investors and creditors. A seminar approach emphasizes discussion, illustrations, examples and applications drawn from current financial practice to encourage exploration of all facets of select financial issues.  
Prerequisite: BUS 270 and graduate standing.  
Repeatable for credit  
Normal Grade Rules  
3 units

BUS 273. Business Valuation  
Course uses accounting and market data to determine the value of public and private businesses. The course considers methods and models whereby business values are created and destroyed. Techniques, from basic rules of thumb to holistic computer models are considered.  
Prerequisites: BUS 220 and BUS 270.  
Normal Grade Rules  
3 units

BUS 274. Financial Analysis of Technology-Based Firms  
Students will learn to develop financial strategies in practical settings. This includes the ability to construct and interpret pro forma financial statements, planning and control models, working capital analysis, capital structure studies, capital budgeting and cost of capital models, and valuation analysis.  
Prerequisites: BUS 270 and graduate standing.  
Normal Grade Rules  
3 units

BUS 275. Corporate Finance: Cases in High Tech Firms  
Course is a continuation of corporate finance where finance concepts directly related to high technology firms are examined. The concepts are enhanced by using five Harvard cases. Other data and handouts are provided to supplement these cases and the textbook.  
Prerequisite: BUS 270 and graduate standing.  
Repeatable for credit  
Normal Grade Rules  
3 units

BUS 276. New Venture Finance  
New ventures face different business and financing environments than large, publicly-traded firms. The risk of R&D failure is more severe for new ventures. Examines how business and financing decisions are intertwined. Topics: Venture capital, joint ventures and intrapreneurship.  
Prerequisite: BUS 270 and graduate standing.  
Normal Grade Rules  
3 units

BUS 277. Investment Analysis and Management  
Principles of financial and portfolio analysis applied to investments in common stocks and bonds. Descriptive characteristics of financial markets reviewed, with main emphasis on application of financial theory and statistics to understanding movements in security prices and portfolio values. A financial management viewpoint will be taken in conducting fundamental valuation analysis and formulating portfolio policy.  
Prerequisite: BUS 270 and graduate standing.  
Normal Grade Rules  
3 units

BUS 278. International Corporate Finance  
The finance manager’s responsibilities, risks, problems and need for strategic planning. Unique aspects of financial analysis for international business discussed and applied to real and/or similar decision situations.  
Prerequisite: BUS 270 and graduate standing.  
Normal Grade Rules  
3 units

BUS 280. Operations and Supply Chain Management  
Analysis of effective and efficient flow of materials, products, services, and information within and across organizations. Includes: process flow analysis, capacity planning, quality, lean supply chain, layout, aggregate planning, supply chain networks, inventory management, sourcing, ERP, and logistics planning.  
Prerequisite: Graduate standing and restricted to Business - MBA majors only  
Normal Grade Rules  
3 units

BUS 281. Management of High Technology Organizations  
Investigates ingredients for sustained profitable innovation. Emphasizes management of technological innovation, including: innovation strategies, organization, project selection, project management, managing and integrating functional areas. Analyzes developmental processes which enable small firms to grow and prevent large organizations from stifling innovation.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 282A. Essentials of Management and Organizational Behavior  
Familiarizes students with the challenges that arise for managers in organizational settings; surveys theories and practices relating to managerial roles, organizational cultures, strategy, planning, team building, communication, motivation, leadership, decision-making, control, structure, and change.  
Prerequisite: Enrollment in the MBT program.  
Normal Grade Rules  
3 units

BUS 282B. Essentials of Operations Management  
Familiarizes students with the role and importance of operations management and how it interacts with other parts of the organization; develops skills in applying analytical tools and techniques to operations management challenges.  
Prerequisite: Enrollment in the MBT program.  
Normal Grade Rules  
3 units

BUS 282C. Management of Innovation in the Biotechnology Sector  
Provides general management prespectives of biotechnological innovation; focuses on challenges of managing the development of new technologies, products, and processes in biotech sectors; examines management concepts, industry practices, and cases relevant to the biotechnology sector.  
Prerequisite: Admission to the MBT program; Director’s consent.  
Normal Grade Rules  
3 units

BUS 283. Entrepreneurship  
Examines the growth and nature of entrepreneurship and the support infrastructure of tasks, people, finances and technology. Emphasizes entrepreneur characteristics sought by venture capitalists and investors, role of the business plan and evolutionary stages of start-up activity.  
Prerequisite: Graduate standing.  
Normal Grade Rules  
3 units

BUS 284. Managing Product Development  
Views product development as a cross-functional business process. Examines concepts used and management challenges faced in structuring product development activity and in strategically managing a portfolio of product development projects.  
Prerequisite: Graduate Standing.  
Normal Grade Rules  
3 units
BUS 284C. Managing Medical Product Development
Views medical product development as a cross-functional business process. Examines concepts used and management challenges faced in structuring medical product development activity and in strategically managing a portfolio of medical product development projects. Examines industry practices and cases relevant to medical product development.
Prerequisite: Admission to MPDM program and completion of BUS 224C, BUS 286 and SMPD 289A.
Normal Grade Rules
3 units

BUS 285. Total Quality Management
Documents forces which propel quality (competition, Deming, Baldridge, etc.) and impact on planning, benchmarking and competitive analysis. Includes design for manufacturability, design of experiments, Taguchi methods, systems analysis, continuous process development and statistical process control.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 286. Project Management
Covers both strategic and operational points of view for managing projects. Quantitative methods include project planning, budgeting, selection, scheduling, evaluation and control. Qualitative methods include project organization, staffing and team building.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 287. Advanced Topics in Global Supply Chain Management
In depth analysis of current issues in global SCM with emphasis on industry best practices from around the globe. Topics may include continuous replenishment, value of information, outsourcing, collaboration, strategic alliances, e-SCM, supply chain risk, performance metrics, SCM simulations.
Prerequisite: Bus 280. Graduate standing.
Normal Grade Rules
3 units

BUS 288. Manufacturing Planning, Cost and Control
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 289. Managing Information and High Technology
Applies convergence among information, technology and strategy to organization and design of information and business systems for competitive advantage. Practical uses of electronic data interchange, expert systems and design and control of database systems to manage high-tech production.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 290. Strategic Thinking
Integrative focus on managing the total enterprise, including corporate and business-level strategy formation. Applies market and industry analysis, using qualitative and quantitative techniques, to position companies in their competitive environment. Students create a strategic plan for on-going or new organization.
Prerequisite: Completion of BUS 200W, BUS 202, BUS 210, BUS 220, BUS 230, BUS 250, BUS 260, BUS 270, BUS 280 and graduate standing; restricted to Business - MBA majors only
Note: Must receive a minimum grade of ‘B’ on project.
Normal Grade Rules
3 units

BUS 291. Global Strategy
This course examines the behavioral, managerial, organizational, and strategic consequences of globalization. Writings on global strategy, including the literature on multinational, transnational, and metanational firms, cases looking at the globalization of new technologies, economic development in a WTO world, and sustainable development or green strategies are covered.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 294. Management Simulation Competition
Developing analytical and general management decision-making skills as member of a team competing in the regional business schools’ management simulation game. Extensive use of computers for simulation and analytical/planning tools.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

BUS 295. Management Consulting Field Experience
Apply management theory and learn consulting skills by carrying out an intensive project. Identify and analyze actual business problems, develop and evaluate alternative solutions and present plan to management.
Prerequisite: Graduate standing and instructor consent.
Normal Grade Rules
1-3 units

BUS 297A. Special Topics in Business Administration
Special topics to augment regularly-scheduled electives. Prerequisite: Graduate standing and prerequisite courses as specified. Repeatable for credit Normal Grade Rules 1-4 units

BUS 297B. Special Topics in Business Administration
Special topics to augment regularly-scheduled electives. Prerequisite: Graduate standing and prerequisite courses as specified. Repeatable for credit Normal Grade Rules 1 unit

BUS 297C. Special Topics in Business Administration
Special topics to augment regularly-scheduled electives. Prerequisite: Graduate standing and prerequisite courses as specified. Repeatable for credit Normal Grade Rules 2 units

BUS 297D. Special Topics in Business Administration
Special topics to augment regularly-scheduled electives. Prerequisite: Graduate standing and prerequisite courses as specified. Repeatable for credit Normal Grade Rules 3 units

BUS 298. Individual Study Problems
For the student with a specific project in mind, in an area not covered by existing coursework. The student must submit a one-page formal proposal to be accepted by an assigned faculty member and approved by the MBA program director. Number of units received will be based on depth and breadth of project.
Prerequisite: Graduate standing.
Repeatable for credit
Credit / No Credit
1-6 units
BUS 298C. Applied Business Experience Internship
The course provides students with an opportunity to translate their academic training into real world practice and gain overall knowledge of key functional areas of business. The internship must offer students a valuable learning experience and must significantly increase their knowledge of business organizations. Students are responsible for identifying a specific internship opportunity and obtaining an official offer from an employer. Upon approval from the MBA Director, the students will be able to enroll in the 3-unit course which will count as one of the MBA electives. The course requires preparation of an internship journal & report. The internship qualifies as Curricular Practical Training (CPT) for international students. Prerequisites: Advancement to Candidacy Normal Grade Rules 3 units

BUS 298I. Applied Business Experience Internship
For the student who has identified a specific internship opportunity. The student must submit a one page formal proposal to the Associate Dean of the Lucas Graduate School of Business. An approved advancement to candidacy is required. The proposed internship must provide a quality business experience that reinforces the MBA curriculum as well as lead to meaningful work for the organization and student. A final report is required. The internship qualifies as Curricular Practical Training (CPT) for international students. Prerequisite: An approved advancement to candidacy. Repeatable for credit Credit / No Credit 1 unit

BUS 299. Master's Thesis
Master's Thesis Plan A. Prerequisite: Approval of the instructor and admission to candidacy. Mandatory CR/NC/RP 1-4 units

BUSINESS 1

LOWER DIVISION
BUS 1020. Financial Accounting
Accounting postulates and principles; application of accounting theory to accumulate and summarize financial data; critical analysis and interpretation of financial statements. Prerequisite: MATH 071. Normal Grade Rules 3 units

BUS 1020C. Network Environment and Accounting Controls
Introduction to current network arrangements in small, medium and large corporations, including hardware and software components used to control the integrity, and access of networks. Internet interfaces including TCP/IP basics and network configurations. A practical NT domain and its administration will be included. Prerequisite: BUS 1208 with a minimum grade of “C”. Normal Grade Rules 3 units

BUS 1021. Managerial Accounting
Uses of accounting data for managerial decision-making. Topics include: cost accumulation for product costing; cost structure for control and motivation; cost-volume-profit relationships; profit planning; standard costing; flexible budgets; and relevant costs for non-routine decisions. Prerequisite: BUS 20 or BUS 20N. Normal Grade Rules 3 units

BUS 1021A. Accounting Information Systems
Documentation, flow and processing of accounting information in business organizations, related principles of internal control, system design principles. Computerized and non-computerized procedures are used for processing. Prerequisite: BUS 20 with a minimum grade of “C”. Declared Major in Accounting, Accounting Information Systems or Corporate Accounting and Finance. Normal Grade Rules 3 units

BUS 1021B. Advanced AIS and IS Risk Assessment
Hands-on project-oriented computer lab to develop working knowledge and skills in using Microsoft Excel and Access as application development tools. Students design a prototype accounting system and generalized audit module prototype assessing integrity of previously designed databases. Prerequisite: BUS 120A and COMM 100W or ENGL 100WB or LLD 100WB with a minimum grade of “C” or better in both. Normal Grade Rules 3 units

BUS 1021D. Accounting Topics in IT Audit
Students will be exposed to real life audit environment cases. Students will apply the EDP auditing techniques of integrated audit risk management, auditing of platforms, applications, and network as appropriate. Discussion of network security, including telecommunications, firewall, encryption and other current IT Audit issues will be included as part of IT discussion. Prerequisite: BUS 1208 and BUS 120C with a grade of “C” in each. Normal Grade Rules 3 units

BUS 1200. Network and IS Controls
Introduction to current network arrangements in large organizations, including hardware and software components used to control the integrity, and access of networks. Internet interfaces including TCP/IP basics and network configurations. A practical NT domain and its administration will be included. Prerequisite: BUS 1208 with a minimum grade of “C”. Normal Grade Rules 3 units

BUS 120A. Accounting Information Systems
This course covers the process, technical elements and current techniques used in accounting systems development. Programming topics include business reporting languages. Systems development topics include requirements analysis, functional specification, system design, implementation, testing, and maintenance. Prerequisite: BUS 120 with a minimum grade of “C”. Normal Grade Rules 3 units

BUS 121A. Intermediate Accounting I
Principles, control and theory of accounting for assets; correction of prior year’s earnings; measurement and determination of income. Projects involving spreadsheet software required. Prerequisite: BUS 20 with a minimum grade of “C” and student must be a declared Accounting, Accounting Information Systems, Finance, or Corporate Financial Management major to enroll. Normal Grade Rules 3 units

BUS 121B. Intermediate Accounting II
Principles, controls, and theory of accounting for liabilities and equities; preparation, utilization, and analysis of cash flow and fund statements; financial ratios and statistical analysis of financial statements accounting data. Projects involving spreadsheet software required. Prerequisite: BUS 121A (with minimum grade of “C”). Normal Grade Rules 3 units

BUS 122A. Management Accounting and Control Systems
Examination of the nature, objectives and procedures of cost management as applied to product and service costing, decision-making and cost planning and control systems. Prerequisite: BUS 20 with a minimum grade of “C”. Declared Major in Accounting, Accounting Information systems or Corporate Accounting and finance. Normal Grade Rules 3 units
BUSI 122B. Advanced Management Accounting and Control Systems
Examination of contemporary issues and emerging practices in cost management. Topics include strategic cost management, activity-based cost management, life-cycle cost management, target costing, quality costing management and value chain-analysis.
Prerequisite: BUS 122A and COMM 100W or ENGL 100WB or LLD 100WB with a minimum grade of "C" in each.
Normal Grade Rules 3 units

BUSI 123A. Tax Factors of Business and Investment Decision
Introductory course in taxation with emphasis on certain themes that pervade the federal income tax system and its impact on business. Property transactions, deferral techniques, accounting periods, accounting methods and research techniques with emphasis on corporations.
Prerequisite: BUS 20 with a minimum grade of "C", and declared Accounting. Accounting Information Systems or Corporate Accounting Finance Major.
Normal Grade Rules 3 units

BUSI 123C. Taxation of Individuals and Pass Through Entities
Emphasis on the unique factors involved in taxation of individuals and pass-through entities (partnerships, S corporations, estates and trusts). Taxation of the transfer of wealth through gifts and inheritance.
Prerequisite: BUS 123A with a grade of "C" or better.
Normal Grade Rules 3 units

BUSI 124. Forensic Accounting
This course will examine the various frauds that are perpetrated on companies and discuss ways the accountant can uncover the frauds. The criminal justice system will be reviewed and the various litigation-support functions provided to attorneys by accountants will be discussed.
Prerequisite: BUS 20, COMM 100W or ENGL 100WB or LLD 100WB; BUS 122A and BUS 121B with a minimum grade of "C" in each.
Normal Grade Rules 3 units

BUSI 125. Special Financial Reporting Topics
Analysis of specialized and emerging accounting topics (such as interim reporting, deferred taxes, post-employment benefits and new FASB pronouncements) with emphasis on research, application and analytical skills.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB; BUS 121A and BUS 121B (with minimum grade of "C" in each).
Normal Grade Rules 3 units

BUSI 125A. Advanced Writing for Accounting
Students learn to communicate accounting and other specialized financial information to a variety of audiences including employers, clients and the investing public in a manner that promotes clarity, accuracy and professionalism.
Prerequisite: BUSI 121A
Normal Grade Rules 3 units

BUSI 125B. Accounting Ethics
Students study accounting ethics, professional codes of conduct and the application of accounting ethics in various fields of accounting including auditing, managerial accounting and taxation.
Prerequisite: BUSI 121A, BUSI 122A
Normal Grade Rules 3 units

BUSI 125C. Professional Development and Communications
Interview and verbal presentation skills, including computer applications, in professional, business and social situations are developed. Professional Skills and personal awareness are emphasized.
Prerequisites: BUSI 20
Normal Grade Rules 3 units

BUSI 125D. Internship in Accounting
Course integrates accounting education with work experience and exposes students to career opportunities and accounting in the business environment. It provides individualized educational experience through structured employment and on-the-job learning.
Prerequisite: BUSI 121A and BUSI 125A
Normal Grade Rules 3 units

BUSI 126. Advanced Accounting
Accounting for multi-unit operations: consolidated reporting issues, transfer pricing issues, globalization issues (foreign tax structures, organizational forms, and international accounting) translating foreign currency transactions and operations, hedging foreign currency exposures, goodwill, and business combinations. Extensive use of spreadsheets (Excel).
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, BUS 121A and BUS 121B (with minimum grade of "C" in each).
Normal Grade Rules 3 units

BUSI 127A. Honors Practicum in Corporate Financial Management
Corporate sponsored projects in accounting and finance. Students are assigned to a host company and are required to work with the host company and faculty advisor on a topic in financial management. A report will be presented.
Prerequisites: COMM 100W (or ENGL 100WB or LLD 100WB), BUS 121A, BUS 121B, BUS 122A, and BUS 170 with a minimum grade of "C" in each and instructor approval.
Repeatable for credit Normal Grade Rules 3 units

BUSI 127B. Advanced Honors Practicum
Course involves advanced corporate sponsored projects in accounting and finance. Students are assigned to supervisory personnel at the host company under the advisement of the instructor. Course is repeatable for credit for a total of 6 units.
Prerequisite: Declared major in Accounting, Finance, AIS or Corporate Financial Management and instructor consent.
Repeatable for credit Normal Grade Rules 3 units

BUSI 128. Accounting for Nonprofit Organizations
Principles, objectives and methods of accounting for governmental and other nonprofit organizations.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB and BUS 121A (with minimum grade of "C" in each).
Normal Grade Rules 3 units

BUSI 129A. Financial Auditing
Emphasis on traditional role of a test function-rendering of an opinion or published financial statement. The public accounting profession, generally accepted auditing standards, professional ethics, auditing procedures, work paper preparation and report writing. Projects involving spreadsheet software required.
Prerequisite: BUS 120A, BUS 121A, BUS 121B and BUS 122A with a minimum grade of "C" in each.
Normal Grade Rules 3 units

BUSI 129B. Operational Auditing
Study of professional and technical aspects of internal and operational auditing with emphasis on concepts, ethical conduct and significance in preparation/implementation of the audit and its findings. Effectiveness and efficiency of audits in industry and not-for-profits will be covered.
Prerequisite: COMM 100W (or ENGL 100WB or LLD 100WB), BUS 120A, BUS 121A, BUS 122B and BUS 122A (with minimum grade of "C" in each).
Normal Grade Rules 3 units
BUS1 170. Fundamentals of Finance
The finance function and its relationship to other decision-making areas in the firm; the study of theory and techniques in acquisition and allocation of financial resources from an internal management perspective.
Prerequisite: BUS 21 or BUS 122A, ECON 1A, ECON 1B and BUS 90.
Normal Grade Rules
3 units

BUS1 171A. Financial Institutions and Markets
Study of financial markets and institutions that operate in them. Examinations of money and capital markets, interest rates and financial institutions, both depository and non-depository. Emphasis on past, current and future industry and regulatory authorities.
Prerequisite: BUS 170 (with minimum grade of “C”).
Normal Grade Rules
3 units

BUS1 171B. Commercial Banking
Asset/liability management principles and decision experience in banking investment policy, loan policy, money desk operations, and corporate planning. Industry historical implications for banking policy and current applications via an interteam computer simulation exercise.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB and BUS 171A with a minimum grade of “C” in both.
Normal Grade Rules
3 units

BUS1 172A. Investment Analysis
Procedures and tools necessary to evaluate investment variables, determine value and analyze risk/return characteristics of equity, fixed income securities, and alternative individual investments. Emphasizes responsible decisions and provides background for portfolio analysis.
Prerequisite: BUS 170 (with minimum grade of “C”).
Normal Grade Rules
3 units

BUS1 172B. Portfolio Management
Basic procedures and analytical tools necessary to construct, analyze, evaluate and revise investment portfolios or groups of assets, including computerized portfolio models. Approach and content consistent with objectives of Chartered Financial Analyst (CFA) program.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB and BUS 172A with a minimum grade of “C” in both.
Normal Grade Rules
3 units

BUS1 172C. Futures and Options
The use of derivatives for risk management by individuals, banks and corporations. The functioning of the futures and options markets for equities, fixed income and commodities. Option valuation models, Black-Scholes and beyond. Risk arbitrage. Applications in personal investment strategies.
Prerequisite: BUS 170 and BUS 172A with a minimum grade of “C” in each.
Normal Grade Rules
3 units

BUS1 173A. Financial Management: Theory and Policy
From the financial manager’s perspective, considerations and alternatives for maximizing a firm’s value. Tools for understanding what determines value and what managerial actions can alter value, by combining theory with practical knowledge of marketplace limitations.
Prerequisite: BUS 170 (with minimum grade of “C”).
Normal Grade Rules
3 units

BUS1 173B. Problems in Financial Management
Advance study of business case materials, including assessment of financial condition; projection of capital requirements; and analysis of decisions pertaining to working capital, capital expenditures, financing, capital structure, dividends, mergers and reorganization.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB and BUS 173A with a minimum grade of “C” in both.
Normal Grade Rules
3 units

BUS1 173C. Entrepreneurial Finance
Basic principles of finance applied to new ventures and small businesses. Topics include incorporation, venture capital, business models, financial analysis, valuation, capital structure, cash flow forecasting, growth and exit strategies.
Prerequisite: BUS 170 with a minimum grade of “C” and Upper Division Standing
Normal Grade Rules
3 units

BUS1 174. Risk Management and Insurance
Principles and applications of risk determination and measurement in a firm’s operations. Using cases, evaluate needs for insurance purchases or alternative risk handling techniques.
Prerequisite: BUS 170.
Normal Grade Rules
3 units

BUS1 175. Real Estate Finance
Real estate financing from the viewpoint of borrower and lender. Financing mathematics, legal aspects of lending, appropriate financial instruments, taxes and real estate, loan cost analysis, loan valuation, development and assumability. Mortgage markets/ Institutions considered together with alternative financing techniques for various types of properties.
Prerequisite: BUS 170 (with minimum grade of “C”).
Normal Grade Rules
3 units

BUS1 177. International Business Finance
Focuses on the determination of exchange rates and the workings of international financial markets. Develops exchange rate parity relationships and techniques for hedging exchange rate risk. Strategies for managing working capital, long term debt, fixed asset selection and international financial reporting are also examined.
Prerequisite: BUS 170 (with minimum grade of “C”).
Normal Grade Rules
3 units

BUS1 179A. Selected Topics in Business Finance
Extensive investigation of selected topics with major emphasis on integration of finance theory and practice within a current business context.
Prerequisite: BUS 173A (with minimum grade of “C”).
Normal Grade Rules
3 units

BUS1 195. Accounting Concepts for Engineers
Introduces the accounting process and the creation and analysis of financial statements (balance sheet, income statement, statement of retained earnings, statement of cash flows) information for decision making. Includes case versus accrual accounting with a focus on corporate business and annual reports.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

BUSINESS 2

LOWER DIVISION

BUS2 090. Business Statistics
In terms of theory and application; collection and presentation of data; measures of central values and spread; probability as a measure of uncertainty; sampling and sampling distribution of the sample mean; confidence intervals; hypothesis testing; regression and correlation.
Prerequisite: MATH 071.
Normal Grade Rules
3 units
**UPPER DIVISION**

**BUS 130. Introduction to Marketing**
Analysis of marketing opportunities; planning of marketing programs with emphasis on product, price, promotion and distribution; control of the marketing effort; social and ethical responsibilities of marketing.
Prerequisite: Junior standing.
Recommended: COMM 100W or ENGL 100WB or LLD 100WB.
Normal Grade Rules
3 units

**BUS 131A. Business to Business Marketing**
Marketing of goods, services and ideas to businesses. Examines distribution, pricing, promotion, marketing research and planning. Emphasizes strategy development and the decision-making processes of customers.
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 131B. Retail Marketing Management**
Special issues faced and approaches taken in retailing. Topics include store location, merchandise selection and display, financial management, promotion, store layout and image.
Prerequisite: BUS 130.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

**BUS 131C. Marketing of High Technology**
Course is for students who have exposure to Marketing and who want to apply marketing concepts and methods in a high technology situation. A hands-on course as much as possible. Toward the end students will pursue individual group projects and several in-class exercises.
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 131D. Marketing in New Ventures**
Examines and explores the roles of marketing in the new venture. Focuses on learning conceptual framework for understanding customers, designing appropriate marketing activities, making marketing decisions and addressing marketing problems in building a new venture. Students analyze cases and undertake projects.
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 132A. Marketing Channels and Institutions**
Study of the interrelationship of channel members (vendors, manufacturers, wholesalers, retailers) and the collaborative nature of successful channels. The impact of the legal environment in marketing channels is examined.
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 132B. Business Logistics**
Logistics in the process of planning, implementing and controlling the efficient, effective flow and storage of goods, services and related information from the point of origin to the point of consumption for the purpose of conforming to customer requirements.
Prerequisite: BUS 130 and BUS 130.
Normal Grade Rules
3 units

**BUS 133A. International Marketing**
Impact of the international business environment on the development of marketing strategy and marketing mix, with emphasis on development of a global perspective and cultural sensitivity. Also covers international trade, importing and exporting.
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 133B. Relationship Marketing: Pacific Rim**
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 133C. International Marketing: Developing Nations**
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 133D. Marketing to Eastern/Western Europe**
To market in Europe, one must learn how Europeans market. Developed and evolved over centuries, European business methods are complex, subtle, and largely unknown to America. This course provides insights into these methods.
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 134A. Consumer Behavior**
An examination of psychological, sociological, and other factors that affect customer behavior. These factors are examined in an effort to help businesses and other organizations to accurately assess and effectively satisfy customer needs.
Prerequisite: BUS 130, COMM 100W or ENGL 100WB or LLD 100WB.
Normal Grade Rules
3 units

**BUS 134B. Integrated Marketing Communications**
Focus is on design and delivery of marketing messages to targeted audiences. Analysis and planning seeks integration of messages delivered through advertising, sales promotion, personal selling, public relations, and other communication methods.
Prerequisite: BUS 130 and COMM 100W or ENGL 100WB or LLD 100WB.
Normal Grade Rules
3 units

**BUS 134C. Marketing Through New Technology**
This course seeks to provide students with insights into the latest technologies and media platforms available to marketers and used in marketing practice. Students will learn about major theories, best practices, new technologies, and new media platforms and apply them to real-life examples.
Prerequisite: BUS2 130.
Normal Grade Rules
3 units

**BUS 135. Sales Management**
Teaches skills in personal selling with guidelines for designing and managing the sales function. Topics include advanced sales techniques, high impact questioning methodologies, closing techniques and managing objections, account and territory planning and management, resource planning and management, and sales compensation programs.
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 136. Product Development**
Integrative analysis of product development related to life-cycle management. Emphasis is on new product/service planning.
Prerequisite: BUS 130.
Normal Grade Rules
3 units
BUS 136E. Product Development in New Ventures
The course focuses on new products in new ventures. Topics areas include success and failure determinants, analysis of market opportunities, new idea generation, planning and development processes, incubation and acceleration, entrepreneurial high-tech product development, and product portfolios.
Prerequisite: BUS 130.
Normal Grade Rules
3 units

BUS 137A. Soft Skills
An examination of the soft skills (self-management skills and people skills) employers feel recent college graduates are lacking. Some of these skills include, but aren’t limited to, listening skills, likability, flexibility, giving/receiving criticism, work ethic, dining etiquette, cultural sensitivity, etc.
Prerequisites: BUS 130
Normal Grade Rules
3 units

BUS 137D. Special Topics in Decision Sciences
Special topics in the management of decision sciences or in the decision sciences environment. The instructor may choose to address one special topic, theme, or several related topics.
Prerequisite: BUS 130
Normal Grade Rules
3 units

BUS 137H. Marketing Honors Practicum
Course involves sponsored projects in the area of Marketing. Students are assigned to a host company and are required to work with the host company and faculty advisor on a topic in Marketing. A report will be presented.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

BUS 137S. Special Topics in Marketing
Special topics in the management of marketing or in the marketing environment. The instructor may choose to address one special topic, theme, or several related topics. Requires one or more projects, at instructors discretion.
Prerequisite: BUS 130
Normal Grade Rules
3 units

BUS 138. Marketing Research
Fundamentals of empirical study in marketing, including hypotheses formulation, testing, and the basis of inference. Questionnaire and experimental design, attitude measurement, sampling and data collection, and analysis are emphasized along with applications to marketing decision-making.
Prerequisite: BUS 90, BUS 130, Recommend: COMM 100W or ENGL 100WB or LLD 100WB.
Normal Grade Rules
3 units

BUS 139. Marketing Management
Marketing management is a capstone course whose purpose is to provide the student with the opportunity to demonstrate and integrate the capabilities acquired from the prerequisite courses.
Prerequisite: BUS 130, BUS 134A, BUS 134B, BUS 138, COMM 100W or ENGL 100WB or LLD 100WB.
Recommend: BUS 190 is strongly recommended.
Normal Grade Rules
3 units

BUS 190. Quantitative Business Analysis
Quantitative models and computer software used in business decision-making. Studies of network and transportation models, linear programming, CPM/PERT project analysis, decision analysis, simulation and other techniques used in management science applications.
Prerequisite: BUS 209 and MATH 071.
Normal Grade Rules
3 units

BUS 191. Decision Making Under Uncertainty
Decision analysis models and methods for optimizing decision policies: Bayes’ Theorem, decision trees, influence diagrams, utility functions and certainty equivalence functions for risk-averse analyses, measures of the value of information, use of relevant spreadsheet computer tools.
Prerequisite: BUS 209 or any one of the following: MATH 161, HS 167, ISE 130, ECON 003, ECON 103A, or Instructor Consent.
Note: Offered only occasionally.
Normal Grade Rules
3 units

BUS 193. Data Mining
Data Mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in very large databases or through web mining. Topics: data visualization, association rules, clustering, and various modern classification techniques.
Prerequisite: BUS 90 or Instructor Consent
Normal Grade Rules
3 units

BUS 2139. Marketing Management
Marketing management is a capstone course whose purpose is to provide the student with the opportunity to demonstrate and integrate the capabilities acquired from the prerequisite courses.
Prerequisite: BUS 130, BUS 134A, BUS 134B, BUS 138, COMM 100W or ENGL 100WB or LLD 100WB.
Recommend: BUS 190 is strongly recommended.
Normal Grade Rules
3 units

BUS 2190. Quantitative Business Analysis
Quantitative models and computer software used in business decision-making. Studies of network and transportation models, linear programming, CPM/PERT project analysis, decision analysis, simulation and other techniques used in management science applications.
Prerequisite: BUS 209 and MATH 071.
Normal Grade Rules
3 units

BUS 2191. Decision Making Under Uncertainty
Decision analysis models and methods for optimizing decision policies: Bayes’ Theorem, decision trees, influence diagrams, utility functions and certainty equivalence functions for risk-averse analyses, measures of the value of information, use of relevant spreadsheet computer tools.
Prerequisite: BUS 209 or any one of the following: MATH 161, HS 167, ISE 130, ECON 003, ECON 103A, or Instructor Consent.
Note: Offered only occasionally.
Normal Grade Rules
3 units

BUS 2193. Data Mining
Data Mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in very large databases or through web mining. Topics: data visualization, association rules, clustering, and various modern classification techniques.
Prerequisite: BUS 90 or Instructor Consent
Normal Grade Rules
3 units

BUS 3139. Marketing Management
Marketing management is a capstone course whose purpose is to provide the student with the opportunity to demonstrate and integrate the capabilities acquired from the prerequisite courses.
Prerequisite: BUS 130, BUS 134A, BUS 134B, BUS 138, COMM 100W or ENGL 100WB or LLD 100WB.
Recommend: BUS 190 is strongly recommended.
Normal Grade Rules
3 units

BUS 3012. Money Matters
Learn to manage your money for a more meaningful life: afford your life goals, pay for college, avoid financial stress, talk to family about money, choose a credit card, understand investing. Bonus: learn how to pump-up your grades.
Normal Grade Rules
GE: E
3 units

BUS 3080. Legal Environment of Business
Understand the judicial system and dispute resolution with emphasis on the role of law in purchasing, contracting and administering a business as it impacts the firm’s constituencies and society as a whole.
Prerequisite: Sophomore status.
Normal Grade Rules
3 units

BUS 3140. Negotiation and Conflict Resolution
Provides conflict resolving and negotiation techniques. Case studies demonstrate applications of these methods in real world business, personal, interpersonal and international situations. Emphasis on acquiring and improving skills.
Normal Grade Rules
3 units

BUS 3150. Fundamentals of Human Resource Management
Theories, concepts and processes of human resource management; specific topics include EEO, employee motivation, job analysis and work design, strategic human resource planning, recruitment and selection, talent assessment and development, performance management, compensation and benefits, OSH, and employee rights and discipline.
Prerequisite: BUS 91L or instructor consent.
Normal Grade Rules
3 units

BUS 3151. Labor Relations
Private sector union-management relations; labor history, basic labor economics. Legislative, judicial, administrative issues in collective bargaining; contract negotiations, grievance procedures, dispute resolution. Overview of public sector collective bargaining and comparative labor relations. Current trends, including labor-management cooperation.
Normal Grade Rules
3 units
BUS3 152. Human Resource Information Systems
Examines the strategic role of Human Resource Information Systems (HRIS) in the effective management of organizations; needs analysis, criteria for selection and evaluation of software tools for HR decision-making; HRIS issues in Internet, privacy, security, system integration, expert systems. Prerequisite: BUS 150 or instructor consent. Normal Grade Rules 3 units.

BUS3 153. Management of Diversity
Cross-cultural differences in effective HR management; organizational culture, cross-cultural communication, opportunity structures, organizational change, legal compliance and planning models such as Equal Employment Opportunity and Affirmative Action; conflict resolution strategies; dealing with internal and external compliance agencies. Prerequisite: BUS 150 or instructor consent. Normal Grade Rules 3 units.

BUS3 154. Workforce Planning, Staffing and Training
Examines basic concepts, strategies and current issues in recruitment, talent acquisition, selection and training. Involves use of computer tools to analyze impacts of legal compliance, diversity, technology, outsourcing, restructuring and downsizing on effective management of human resources. Prerequisite: BUS 150 and COMM 100W or ENGL 100WB or LLD 100WB. Normal Grade Rules 3 units.

BUS3 155. Performance Management and Development
Assessment and performance management of individuals, groups and organizations in a rapidly changing environment. Explores need for change management skills such as organizational development, career development and coaching to assess and improve the talent base of organizations. Prerequisite: BUS 150, COMM 100W or ENGL 100WB or LLD 100WB. Normal Grade Rules 3 units.

BUS3 156. International Issues in Human Resource Management
Personnel practices in international context; cross-cultural management; human resource planning, recruitment and selection, expatriation/repatatriation, training, performance appraisal, compensation and benefits, labor relations as experienced by multinational corporations; comparative human resource management. Pre/Corequisite: BUS 150 or instructor consent. Normal Grade Rules 3 units.

BUS3 157. Legal Issues in Human Resource Management
Legal aspects of the employment relationship, including employment at will; contract, privacy, public policy, and whistleblower exceptions; EEO and affirmative action; prohibitions against discrimination and harassment; arbitration, trade secrets and non-competition agreements; occupational safety/health; compensation, benefits and family leave laws. Project required. Prerequisite: BUS 80, BUS 150 and COMM 100W or ENGL 100WB or LLD 100WB. Normal Grade Rules 3 units.

BUS3 158. Compensation and Reward Systems
Theories and practices of compensation and benefits; strategies to establish and administer equitable pay structures; job analysis, and evaluation, salary surveys, pay and motivation, skill-based pay systems, long-term and short-term performance plans, merit increase, bonus, stock options, profit-sharing, executive compensation and computer tools in compensation. Prerequisite: BUS 91L and BUS 150. Normal Grade Rules 3 units.

BUS3 159. Senior Seminar in Human Resource Management
Extension and integration of student knowledge, skills and abilities in strategic HRM, critical analysis of current HRM issues, exploration of HR career options; analysis of existing organization to develop methods of improving HRM decision-making in a real-world setting. Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, BUS 150, BUS 157 and BUS 158. Restricted to Human Resource Management majors with graduating senior status. Normal Grade Rules 3 units.

BUS3 160. Fundamentals of Management and Organizational Behavior
Provides a foundation for major topics in management and organizational behavior by surveying theories and practices relating to managerial roles, organizational cultures, fundamental strategic issues, planning, team building, communication, motivation, leadership, decision-making, control, structure and change. Normal Grade Rules 3 units.

BUS3 161A. Applied Organizational Behavior
Focuses on high-level application, analysis, synthesis and evaluation of group dynamics, interpersonal communication, motivation, leadership, perception and attitudes, individual power and politics, conflict and stress management. In-depth emphasis on key theories plus interpersonal managerial skills. Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB. Normal Grade Rules 3 units.

BUS3 161B. Organizational Theory, Design and Change
Managing organization-wide structural and cultural changes leading to designs that enhance organizational effectiveness. Change issues of managing growth, resistance, intervention phases, crisis management, intergroup conflict/power are combined with design issues of balancing innovation and predictability, decentralization and centralization. Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB and BUS 161A. Normal Grade Rules 3 units.

BUS3 166. Business, Government, & Society
Analysis of the American business system in terms of socio-economic and political constraints imposed upon business organizations by external, physical, legal, political, social and economic environments. Special reference to ethical issues in business, corporate social responsibility, profit maximization and countervailing powers in a pluralistic society. Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB. Normal Grade Rules 3 units.

BUS3 168. Global Business and Human Rights
Examines the implications of global business for human rights; the costs and benefits of globalization to various stakeholders; the institutional context within which global business is transacted; and the proliferation of international codes governing human rights. Includes a series of cases that focus on the human rights impacts of business practices in a range of industries and regions of the world. Repeatable for credit Normal Grade Rules 3 units.

BUS3 169A. Honors Seminar
This course will introduce some of the seminal theories in management and related fields. The seminar will provide a variety of views on organizations, organizational life and the way organizations function. The course will be cross-disciplinary, drawing on readings about organizations from a variety of sources and disciplines. Students will be required to apply theoretical concepts to their own work, field study, or internship experiences. Prerequisite: BUS 160 or BUS 161B. Normal Grade Rules 3 units.

BUS3 186. Professional and Business Ethics
See PHIL 186. Normal Grade Rules GE: S 3 units.
BUS 189. Strategic Management  
Integrative capstone seminar analyzing interrelationships of managerial decisions/actions within and between the firm and its environment. Applies multi-disciplinary techniques to diagnose and recommend actions appropriate to specific company situations, using case method.  
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB. Restricted to graduating seniors only.  
Normal Grade Rules  
3 units

BUS 4115. Advanced Working and Data Organization  
For ld and Data Organization  
Prerequisite: BUS 91L.  
Providing practice sessions and activities to strengthen students' mastery of key business skills and knowledge.  
Repeatable for credit  
Normal Grade Rules  
1-3 units

BUS 4116. Advanced Database Management Systems  
An overview of computer hardware and software concepts and common operating system functions. Instruction in the use of microcomputer-based word processing, presentation graphics and spreadsheet productivity tools. Lab meets for 5 weeks.  
Credit / No Credit  
1 unit

BUS 4109. The Digital World and Society  
See CMPE 025  
Normal Grade Rules  
GE: D1  
3 units

BUS 4109L. Computer Tools for Business  
Analysis of business problems to design and implement the software component of an information system. Emphasis on structured design and programming. Introduction to visual programming languages.  
Prerequisite: BUS 93L  
Normal Grade Rules  
3 units

BUS 4110A. Fundamentals of Management Information Systems  
Prepares students for upper division MIS courses by providing an overview of the strategic and managerial issues involved in the design, implementation, and maintenance of information systems. Includes an introduction to business application programming.  
Prerequisite: BUS 92, upper division standing.  
Normal Grade Rules  
3 units

BUS 4110B. Systems Analysis and Design  
Introduction to systems development methodologies, techniques and tools. Emphasis on enterprise, process, data and object modeling techniques. Students use UML and prototyping tools to analyze and design an information system.  
Corequisite: BUS 412.  
Normal Grade Rules  
3 units

BUS 4111. Networking and Data Communications  
Emphasis on the concepts, architectures, components, protocols and standards for message movement within information networks. Uses the network design process to develop understanding of business and information technology perspectives.  
Prerequisite: Upper Division Standing  
Normal Grade Rules  
3 units

BUS 4112. Database Management Systems  
Intermediate database management systems and procedures, stressing the design and development of efficient business information systems. Emphasis on data modeling, data integrity, SQL and implementation of a database application.  
Prerequisite: A grade of “C” or better in BUS 412.  
Normal Grade Rules  
3 units

BUS 4113. Advanced Business Programming  
Development of complex business applications; integration of structured programming methodologies and visual programming languages.  
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, a grade of “C” or better in BUS 111 and BUS 112, senior status.  
Normal Grade Rules  
3 units

BUS 4113J. Advanced Business Programming in Java  
Students gain experience with developing complex business application programs in the electronic commerce environment with an emphasis on the integration between structured and object oriented programming. Applications will be built for Unix and Windows platforms using the Java programming language.  
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, a grade of “C” or better in BUS 111 and BUS 112, senior status.  
Normal Grade Rules  
3 units

BUS 4114. Advanced Systems Analysis and Design  
Advanced topics in systems development, including CASE tools, object technologies, enterprise analysis and project management.  
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, a grade of “C” or better in BUS 111 and BUS 112, senior status.  
Normal Grade Rules  
3 units

BUS 4115. Advanced Networking and Data Communications  
Integration of telecommunications and database management systems concepts in a distributed information systems environment. Emphasis on information systems architectures, systems integration, open systems and other advanced topics.  
Prerequisite: BUS 411.  
Normal Grade Rules  
3 units

BUS 4116. Advanced Database Management Systems  
Advanced topics in database management, including data analysis and design, SQL and client/server database development tools and applications.  
Prerequisite: BUS 412.  
Normal Grade Rules  
3 units

BUS 4118B. Executive Support and Expert Systems  
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, a grade of “C” or better in BUS 111 and BUS 112, senior status.  
Normal Grade Rules  
3 units

BUS 4118C. Information Security and Assurance Management  
Introduces the spectrum of threats and associated best practices for managing information security and assurance in organizations. Covers use of education/training, policy/procedure and technology to balance information confidentiality, integrity and accessibility requirements against associated costs to support organizations' strategic goals.  
Corequisite: BUS 411.  
Note: Offered only occasionally.  
Normal Grade Rules  
3 units
BUS 118S. Special Topics in MIS
Special topics to augment regularly scheduled electives. Course is repeatable for credit, maximum 9 units.
Prerequisite: BUS 111, BUS 112, and COMM 100W or ENGL 100WB or LLD 100WB.
Repeatability: Credit/No Credit
Normal Grade Rules
3 units

BUS 118W. Web Based Computing
Explores Web applications for personal, E-Commerce and corporate computing. Covers essentials of WWW protocols. Students will learn to design and program both client and server-side applications using HTML and extensions, JavaScript, Perl, VBScript, Active Server Pages, database connections, XML, Java.
Prerequisite: Grade of "C" or better in BUS 110A and BUS 112
Normal Grade Rules
3 units

BUS 119A. Practicum in MIS
Students, working in teams, will complete an MIS project for a community organization. Requirements include using industry-standard project management tools and methods, interacting with project stakeholders in a professional manner, and applying appropriate technical skills and processes to the project.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, and a grade of "C" or better in BUS 111 and BUS 112, senior status.
Normal Grade Rules
3 units

BUS 119B. Business Strategy and Information Systems
Analysis of effective use of information systems and technology for competitive advantage by a business organization for enterprise, business-to-business, and E-Commerce computing. Emphasis on integration of information systems and technology with business strategy, financial justification, personnel and organizational considerations.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, a grade of "C" or better in BUS 111 and BUS 112, senior status, taken in last semester before graduation.
Normal Grade Rules
3 units

BUS 119H. Honors Practicum in MIS
Honors student teams will work to complete an MIS project for a community organization. Requirements include using industry-standard project management tools and methods, interacting with project stakeholders in a professional manner, and applying appropriate technical skills/processes to the project.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, BUS 111 and BUS 112 (with a grade of "C" or better), senior standing.
Normal Grade Rules
3 units

BUS 188. Business Systems and Policy
Provides system perspective on organizations, using information as an integrating vehicle. Examines how information systems can serve business functions and integrate value chain activities.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB.
Pre/Corequisite: Fundamental courses. Normal Grade Rules
3 units

BUS 188L. Team Skills Workshop
A laboratory experience emphasizing experimental learning by working on a comprehensive project in Bus 188. Provides guided insights and techniques to enhance team learning and performance, with a focus on developing skills that transfer to other team projects.
Corequisite: BUS 188.
Credit/No Credit
1 unit

BUSINESS 5

LOWER DIVISION

BUS 016. Introduction to Leadership & Innovation
This interdisciplinary course covers basic theories of leadership and innovation and investigates key topics that influence contemporary social leadership issues. Students assess their leadership styles to create personal development plans leading toward positive, innovative impacts on society.
Normal Grade Rules
3 units

BUS 142. Total Quality Management
Holistic approach to managing quality: interaction of production design, work design and the manufacturing process. International view and roles qualitative and quantitative techniques play in successful quality management programs.
Normal Grade Rules
3 units

BUS 143. Intro Private Development and Planning
See URBP 143.
Normal Grade Rules
4 units

BUS 144. Supply Chain Management
Addresses concepts/tools for effective and efficient management of supply chains. Topics include materials planning/control, sourcing strategy, strategic alliances, information technology role, quality/customer issues, inventory management, and distribution/logistics management.
Normal Grade Rules
3 units

BUS 145. Global Operations Management
Studies operations management issues unique to manufacturers with extensive international operations. Educational objectives are to develop an understanding of: the strategic tradeoffs associated with global operations, total supply chain management and the economics of transnational logistics.
Normal Grade Rules
3 units

BUS 146. Project Management
Project management from both strategic and operational points of view. Quantitative methods include project planning, budgeting, evaluation, selection, scheduling and control. Qualitative methods include project organization structure, staffing and team building. Role and responsibilities of the project manager and interfaces with other managers.
Normal Grade Rules
3 units

BUS 147. Service Operations Management
Develops skills in setting formal standards for product attributes and operating procedures that comprise service experience. Categories of services; indirect and direct consumption. Psychological/social characteristics of the consumer/server encounters, enhancing ability to monitor service quality. Total quality management.
Normal Grade Rules
3 units
BUSS 162. International and Comparative Management
Management functions and practices in an international context; comparison of management and business practices from various political and cultural perspectives; emphasis on what managers need to be aware of in order to perform in the international environment.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100W, BUS 187 or instructor consent.
Normal Grade Rules 3 units
BUSS 163. Management Issues in High Technology Companies
Provides an overview of a wide variety of key managerial concerns, industry knowledge and management techniques that are especially relevant in high technology companies. Such organizations compete within an environment characterized by rapid technological change and a high degree of uncertainty.
Prerequisite: Senior standing.
Normal Grade Rules 3 units
BUSS 164. Strategies in High Technology Companies
Examines strategies for companies within high technology industries, focusing on how to anticipate, identify and exploit such technological change for competitive advantage. Technological change creates opportunities for new industries and products, but at the same time renders obsolete existing company capabilities.
Prerequisite: BUS 161A.
Repeatable for credit Normal Grade Rules 3 units
BUSS 165A. Global Leadership
This course introduces students to global leadership and its development and is designed for students who want to work effectively with people in diverse settings. Taught experientially, the course involves simulations, innovation projects, and extensive individual feedback.
Prerequisite: Any 100W.
Normal Grade Rules 3 units
BUSS 165B. Leadership & Innovation Practicum
This is a project-based practicum course for students interested in global leadership and innovation. Course topics include project management of multicultural teams, innovation, and change management. Students apply theory and skills gained in previous courses as they implement personal leadership projects.
Prerequisites: Any 100W, BUSS 016, BUSS 165A, or instructor consent.
Normal Grade Rules 3 units
BUSS 167. Managing Environmental Issues
The management of environmental issues, including the relationship of business to the natural environment; the public policy context of management decision-making; and the greening of the corporation and implications for strategic management, operations, human resources, marketing and accounting.
Normal Grade Rules 3 units
BUSS 169B. Honors Practicum in Organization and Management
Second part of a two-semester honors program sequence. Student teams will work on a project sponsored by a company or other organization, under the supervision of the sponsor and the instructor. Teams will present their final report to the sponsor.
Prerequisite: BUS 160 or BUS 161A and permission of the instructor.
Normal Grade Rules 3 units
BUSS 181. Introduction to Entrepreneurship
Will offer an insight into the characteristics of entrepreneurs, the approaches they use to create, identify and evaluate opportunities for new ventures and the skills that are needed to start and manage new ventures and develop a preliminary business plan.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100W; BUS 130; BUS 22 or instructor consent.
Repeatable for credit Normal Grade Rules 3 units
BUSS 182. Business Plans for New Ventures
An integrative course involving teamwork to prepare complete plans for starting a new business. This will require analyzing the industry and potential market, the competitive advantage of the business proposition, human and financial resource requirements and the founders’ skills.
Prerequisite: BUS 181 or instructor consent.
Repeatable for credit Normal Grade Rules 3 units
BUSS 183. Global Entrepreneurship
Will explore the opportunities that entrepreneurs create, encounter and change in the global and cross-cultural arena. It will examine how entrepreneurs adapt to and succeed in a global economy and how institutional networks facilitate global and immigrant entrepreneurship.
Prerequisite: BUS 181.
Repeatable for credit Normal Grade Rules 3 units
BUSS 184. Business Strategy in Practice in Technology Enterprise
See ENGR 184.
Normal Grade Rules 3 units
BUSS 185. Family Business Dynamics
This course explores and analyzes the unique issues and challenges of family businesses in terms of the dynamic relationship between the family and business and its impact on decision-making and performance of the business.
Prerequisite: BUS 181 or instructor consent.
Normal Grade Rules 3 units
BUSS 186H. Entrepreneurship Laboratory
Explores all facets of growing an entrepreneurial organization, including building the team, sales, marketing, operations, and finance. Opportunity to learn with practical internship and roundtables with entrepreneurs, venture capitalists and others in the new venture ecosystem.
Prerequisite: Instructor’s consent.
Normal Grade Rules 3 units
BUSS 186S. Current Issues in Entrepreneurship
A presentation of topics of current interest to entrepreneurs and intrapreneurs. Focuses on one or more special topics of concern to current practice, such as green entrepreneurship, social entrepreneurship, or managing high-growth ventures.
Prerequisites: BUS 181 or instructor consent.
Normal Grade Rules 3 units
BUSS 187. Global Dimensions of Business
An integrative interdisciplinary foundation for more specialized courses and self-directed learning. Provides an overview of economic, social, cultural and political/legal forces and factors influencing crossborder business and an introduction to international dimensions of business functions and operations.
Normal Grade Rules 3 units
BUSS 194. Business Organization and Management of Technology Enterprise
See ENGR 194.
Normal Grade Rules 3 units
BUSS 198. Strategic Consulting for Small Business
An integrative course requiring student work in a consulting arrangement with a local small business. Field study involves working within an integrated strategic framework to guide original data collection/analysis/recommendations encompassing external and internal considerations.
Prerequisite: Senior standing.
Normal Grade Rules 3 units
TRANSPORTATION MANAGEMENT

GRADUATE

MTM 201. Fundamentals of Transportation Management
Provides a common core of surface transportation knowledge for further MS/MT courses. Includes discussion of the historic development of transportation economics, policy and culture. Reviews stakeholders whose commitment is necessary to create and sustain a successful transportation entity.
Normal Grade Rules
3 units

MTM 202. Introduction to Transportation Funding & Finance
Introduces financial and managerial uses of accounting information systems and concepts. Includes standard costs, cost-volume-profit relationships, contribution analysis, budgeting, performance measurement, variance analysis, working capital, valuation, capital costs and financing investment decisions. Explores use of complex information decision systems.
Normal Grade Rules
3 units

MTM 203. Transportation Marketing and Communications Management
Emphasizes positioning services to meet the needs of particular groups/market segments and marketing the system to new users/user groups (including developing the public/private sector relationship). Examines strategies for developing the community relationship with marketing and public relations efforts (and using the media to advantage).
Normal Grade Rules
3 units

MTM 214. Transportation Policy and Regulation
Surveys political frameworks of governments as both customer and provider, development of transportation policy with public involvement, and performance measurement with public oversight. Reviews policy impact on intermodal development in seeking to manage public and private objectives and diverse agendas of federal, state and local agencies.
Normal Grade Rules
3 units

MTM 215. Transportation System Planning and Development
Examines transportation system development interrelationships with land use, environmental management and urban planning. Includes realities of politics, public administration, regulations and financing alternatives. Extends to construction administration including governmental approvals, specification development, contracting law and regulations and fiscal control.
Prerequisite: MTM 214.
Normal Grade Rules
3 units

MTM 217. Leadership and Management of Transportation Organizations
A study of the human resource aspects of managing transportation systems, including labor/management collaboration/negotiation and consultative employee relations programs. Builds skills in leadership and team building within the context of bringing about organizational change in a complex transportation system.
Normal Grade Rules
3 units

MTM 221. Introduction to Transportation Technologies
Provides students without technical backgrounds with an overview of various modes, systems and technologies with an intermodal focus. Discusses technology and environmental policy and issues.
Normal Grade Rules
3 units

MTM 222. Transportation Data Collection and Analysis
A survey of analytical and quantitative techniques used in transportation systems to determine information needs in a decision situation and assess results. Develops awareness of tools, techniques and methods to enable selection of an appropriate research supplier on a basis beyond reputation alone.
Normal Grade Rules
3 units

MTM 226A. Emergency Management Issues for Transportation Professionals
Examines the role of emergency management within transportation agencies and the role of transportation and related resources in community-wide responses to emergencies disasters. Includes instruction in Standardized Emergency Management Systems (SEMS).
Normal Grade Rules
3 units

MTM 226B. Security Issues for Transportation Professionals
Examines contemporary challenges to transportation security. Topics to be covered include: management of infrastructure challenges (such as tunnel, bridge, road and rail vulnerabilities); prevention of and response to theft, work place violence, disruptive terrorism, suicide and placement combing attacks, and their related protection strategies. Students will learn about federal and state grants for security, as well as regional transportation planning for disaster response planning.
Normal Grade Rules
3 units

MTM 230. Multi Modal Transportation in CA
Course provides an overview of public transit systems in California. It examines the maze of public transit services, funding and regulation.
Repeatable for credit
Normal Grade Rules
3 units

MTM 236. Contemporary Issues in Transportation Management
Emphasizes the impact of contemporary, political, and popular views on decision-making in transportation, and how collaborative efforts are made within the framework of government and business environments. May include significant content via guest speakers/professionals in transportation industry and government.
Prerequisite: Graduate standing and prerequisite courses as may be specified.
Normal Grade Rules
3 units

MTM 245. High Speed Rail Mgmt I
The course is designated for students interested in participating in the evolving high-speed rail program in the United States. The course will introduce students to the HS Passenger Rail mode and describe its attributes and technical components. The course will also deal with general enterprise management and the management competencies required. It will also introduce students to the issues of organizing for HSR project development and implementation.
Normal Grade Rules
3 units

MTM 246. High Speed Rail Mgmt II
Designed for students interested in participating in the evolving Intercity and High Speed Passenger Rail Program in the United States, the course is a companion to MTM245, and will introduce students to the Intercity and High Speed Passenger Rail mode and describe its attributes and technical components. The worldwide status of the mode will be described as well as the path being taken in the United States. The course will also deal with general enterprise management and the management competencies required. It will introduce students to the issues of organizing project development and implementation.
Normal Grade Rules
3 units

MTM 250. Transportation and the Environment
Students will be introduced to the complexities in the relationship of transportation and the environment. An important theme of this class is that real world trade-offs are inherent in addressing transportation as an important cause of environmental degradation. Solutions considered have technical, socio-economic, and cultural impediments. Students will learn from case studies of success in creating more environmentally-benign forms of access and mobility. Students will contribute their own ideas in class discussions and a term paper on innovation in transportation policy to address environmental concerns.
Normal Grade Rules
3 units
MTM 283. Research Internship  
With approval of the program administrator and the  
IISTPS Research Director, students may apply for an  
internship with IISTPS. A research team, consisting of a  
student cohort group and/or IISTPS research associates,  
will conduct research related to a specific aspect of  
surface transportation management.  
Credit / No Credit  
3 units

MTM 290. Strategic Management in  
Transportation  
Provides a culminating experience through an individual  
comprehensive project. A variety of external learning  
experiences (internships, field assignments and  
mentors) and in-class discussions and exercises  
provide a capstone seminar with practice in strategic  
planning to positively impact market environments in  
surface transportation.  
Prerequisite: Prior completion of 21 MTM units.  
Mandatory CR/NC/RP  
3 units

MTM 290R. Thesis/Project Supervison  
Continued work on thesis or project.  
Pre-Requisite: Outstanding RP grade in a preceding  
semester in a project or thesis class  
Mandatory CR/NC/RP  
1 unit

MTM 295. Worldwide Approaches to  
Transportation  
An optional summer international study tour, providing  
cross-cultural experiences with various surface  
transportation systems in other countries.  
Prerequisite: Prior completion of 15 MTM units or  
permission of graduate advisor.  
Normal Grade Rules  
3 units

MTM 297. Special Topics in Transportation  
Management  
Special topics to supplement regularly programmed  
elective course. Topics can include, but are not limited to,  
special skills development, labor relations, information  
systems, legal environment, public policy, and urban  
planning.  
Prerequisite: Graduate standing and prerequisite courses  
as may be specified.  
Repeatable for credit  
Normal Grade Rules  
3 units
Chemistry Department Courses

**CHEMISTRY**

**LOWER DIVISION**

**CHEM 001A. General Chemistry**
Topics including stoichiometry, reactions, atomic structure, periodicity, bonding, states of matter, energy changes, solutions using organic and inorganic examples. Lab program complements lecture.
Prerequisite: Proficiency in high school chemistry or CHEM 010 (with a grade of "C" or better; "C-" not accepted) or instructor consent; proficiency in high school algebra and eligibility for MATH 019; eligibility for ENGL 001A.
Misc/Lab: Lecture 3 hours/lecture 1 hour/lab 3 hours.
Normal Grade Rules
GE B1+R3
5 units

**CHEM 001B. General Chemistry**
Topics including stoichiometry, colligative properties, kinetics, equilibria, thermodynamics and electrochemistry. Lab program complements lecture.
Prerequisite: CHEM 001A (with a grade of "C" or better; "C-" not accepted).
Misc/Lab: Lecture 3 hours/lab
Normal Grade Rules
GE B1+R3
5 units

**CHEM 008. Organic Chemistry**
Introduction to the chemistry of carbon compounds for allied health majors and others requiring only 3 units of organic chemistry lecture.
Prerequisite: CHEM 001B (with a grade of "C" or better; "C-" not accepted).
Notes: CHEM 008 is not a satisfactory prerequisite for CHEM 112B. No credit toward Chemistry major or minor.
Normal Grade Rules
3 units

**CHEM 009. Organic Chemistry Lab**
Organic chemistry laboratory for allied health majors and others requiring only 1 unit of organic chemistry lab.
Pre/Corequisite: CHEM 008.
Misc/Lab: Lab 3 hours.
Notes: No credit toward Chemistry major or minor.
Normal Grade Rules
1 unit

**CHEM 010. Chemical Calculations and Concepts**
Fundamental concepts in chemistry and problems in chemical symbolism and calculations. For students wishing to continue in chemistry, but lacking prerequisites for CHEM 001A.
Prerequisite: One year high school algebra.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Notes: No credit towards chemistry major or minor.
Normal Grade Rules
3 units

**CHEM 030A. Introductory Chemistry**
The physical world as seen by a chemist; the ways this world affects humans, other animals and plants used as illustrations of fundamental general chemistry.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Notes: No credit toward Chemistry major or minor.
Normal Grade Rules
GE B1+R3
3 units

**CHEM 030B. Introductory Chemistry**
Organic compounds produced both in nature and artificially and the reactions they undergo, particularly in the human.
Prerequisite: CHEM 030A or CHEM 001A (with a grade of "C" or better; "C-" not accepted).
Misc/Lab: Lecture 2 hours/lab 3 hours.
Notes: No credit toward Chemistry major or minor.
Normal Grade Rules
3 units

**CHEM 055. Quantitative Analysis**
Introduction to theories and techniques of chemical analysis.
Prerequisite: CHEM 001B (with a grade of "C" or better; "C-" not accepted); eligibility for ENGL 001A.
Misc/Lab: Lecture 2 hours/lab 6 hours.
Notes: A basic algebra, logarithms and chemistry test is given the first class meeting to determine eligibility.
Normal Grade Rules
2 units

**CHEM 055L. Quantitative Analysis Laboratory**
Introduction to chemical analysis techniques.
Pre/Corequisite: CHEM 055
Normal Grade Rules
2 units

**CHEM 090. Problem Solving for Chemistry**
Supplemental course taken simultaneously with lower division chemistry lecture courses. Techniques for studying and problem solving emphasis. Preparation and active participation expected. Consult schedule of classes for current offering(s).
Notes: No credit toward chemistry major or minor.
Repeatable for credit
Credit / No Credit
1 unit

**UPPER DIVISION**

**CHEM 100W. Writing Workshop: Chemical Communications**
Improvement of skills in scientific writing and speaking.
Prerequisite: ENGL 001B (with a grade of C or better).
Completion of core GE, satisfaction of Writing Skills Test and upper division standing; CHEM 055 or CHEM 112A (with grades of "C" or better; "C-" not accepted).
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE CW Z
3 units

**CHEM 101. Chemistry and the Computer**
Analysis of chemical problems. Spreadsheets, mathematical software packages, computer programming, computational chemistry methods.
Prerequisite: CHEM 055 and MATH 030 or MATH 030P (with a grade of "C" or better; "C-" not accepted).
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

**CHEM 112A. Organic Chemistry**
Chemistry of the carbon compounds, both aliphatic and aromatic, emphasizing underlying concepts.
Prerequisite: CHEM 1B (with a grade of "C" or better; "C-" not accepted).
Normal Grade Rules
3 units

**CHEM 112B. Organic Chemistry**
Continuation of CHEM 112A.
Prerequisite: CHEM 112A (with a grade of "C" or better; "C-" not accepted).
Normal Grade Rules
3 units

**CHEM 113A. Organic Chemistry Lab**
Fundamental techniques for the isolation, characterization and synthesis of organic compounds.
Prerequisite: CHEM 112A (with a grade of "C" or better; "C-" not accepted).
Misc/Lab: Lab 6 hours.
Normal Grade Rules
2 units

**CHEM 113B. Organic Chemistry Lab**
Continuation of CHEM 113A including more advanced work.
Prerequisite: CHEM 113A (with a grade of "C" or better; "C-" not accepted). Chemistry majors only or instructor consent.
Pre/Corequisite: CHEM 112B.
Misc/Lab: Lecture 1 hour/lab 6 hours.
Normal Grade Rules
3 units
CHEM 114. Advanced Organic Chemistry Lab
A capstone course on special topics in laboratory experiments utilizing modern chemical, physical and spectrometric methods. A grade of C or better is required for majors.
Prerequisite: CHEM 055, CHEM 100W, CHEM 112B and CHEM 113B (with grades of "C" or better; "C-" not accepted).
Misc/Lab: Lecture 1 hour/lab 6 hours.
Normal Grade Rules
3 units

CHEM 118. Special Topics in Organic Chemistry
Introduction to a wide range of subjects typically missing from the traditional organic chemistry sequence (CHEM 112A and CHEM 112B, CHEM 133A and CHEM 113B). Consult schedule of classes for current offering(s).
Prerequisite: CHEM 112B (with a grade of "C" or better, "C-" not accepted).
Repeatable for credit
Normal Grade Rules
1 unit

CHEM 120S. Chemical Safety Seminar
Safety protocol appropriate to working with hazardous chemicals. Physical nature of hazards, biological effects, permissible exposures, safety precaution techniques. OSHA requirements.
Prerequisite: College level chemistry course.
Credit / No Credit
1 unit

CHEM 121S. Radiation Safety
See NUCS 121S.
Normal Grade Rules
1-2 units

CHEM 123. Radiation and Biological Systems
See NUCS 123.
Normal Grade Rules
2 units

CHEM 126. Introduction to Nuclear Science
Properties of the atomic nucleus. Applications of nuclear science in biology, chemistry, engineering, geology and physics.
Prerequisite: Lower division calculus, chemistry and physics.
Normal Grade Rules
3 units

CHEM 127. Nuclear Science Lab
Basic techniques and procedures used in nuclear science. Nuclear decay, nuclear reactions, radiation detection and measurements, nuclear analytical methods and tracer techniques.
Prerequisite: NUCS 121S, CHEM 100W and CHEM 126 (with grades of "C" or better; "C-" not accepted); or instructor consent.
Misc/Lab: Lecture 1 hour/lab 6 hours.
ABC/No Credit
3 units

CHEM 130A. Biochemistry
Chemistry of amino acids, carbohydrates, lipids and nucleotides. Studies of protein structure and function, protein isolation, enzyme kinetics and enzyme mechanisms.
Prerequisite: CHEM 055, CHEM 112B (with grades of "C" or better; "C-" not accepted).
Normal Grade Rules
4 units

CHEM 130B. Biochemistry
Continuation of CHEM 130A, Concepts of bioenergetics; biochemical pathways of degradation and synthesis; metabolic regulation.
Prerequisite: CHEM 112B, CHEM 130A and BIOL 3 (with a grade of "C" or better; "C-" not accepted).
Normal Grade Rules
4 units

CHEM 130C. Biochemistry
Advanced biochemical topics selected from the fields of immunology, physiology, molecular and cellular biology.
Prerequisite: CHEM 112B, CHEM 130A and BIOL 3 (with a grade of "C" or better; "C-" not accepted).
Pre/Corequisite: CHEM 130B.
Normal Grade Rules
3 units

CHEM 131A. Biochemistry Lab
Fundamental qualitative and quantitative techniques and methodology in modern biochemistry.
Prerequisite: CHEM 113A (with a grade of "C" or better; "C-" not accepted).
Pre/Corequisite: CHEM 130A.
Misc/Lab: Lab 6 hours.
Normal Grade Rules
2 units

CHEM 131B. Biochemistry Lab
A capstone course on advanced isolation techniques and enzyme methodology. A continuation of CHEM 131A. A grade of "C" or better is required for majors.
Prerequisite: CHEM 100W, CHEM 130A, CHEM 131A (with grades of "C" or better; "C-" not accepted).
Pre/Corequisite: CHEM 130B or CHEM 130C.
Misc/Lab: Lecture 1 hour/lab 6 hours.
Normal Grade Rules
GE: R
3 units

CHEM 132. Introductory Biochemistry
Cellular and nutritional biochemistry for those who do not plan to continue in biochemistry, such as nutritional science and other science majors.
Prerequisite: CHEM 308 or CHEM 8 (with grades of "C" or better; "C-" not accepted).
Notes: No credit toward Chemistry major or minor.
Normal Grade Rules
4 units

CHEM 134. Inorganic Chemistry
Development of unifying principles to understand the chemistry of the elements. An introduction to the chemistry, bonding theories and applications of coordination compounds.
Prequisite: CHEM 112B and CHEM 160 or CHEM 161A (with grades of "C" or better; "C-" not accepted).
Normal Grade Rules
3 units

CHEM 135. General Biochemistry
A survey course on structure/function of biological molecules such as amino acids, proteins including enzymes, lipids/membranes, carbohydrates, and nucleic. Course topics include intermediary metabolism, regulation, and molecular biology.
Prerequisite: BIOL 001B, CHEM 112A, CHEM 112B (with a grade of "C" or better; "C-" not accepted).
Normal Grade Rules
4 units

CHEM 137. Medical Biochemistry
Chemistry and pathology of some of the physiological processes of the body, especially those of importance to the medical sciences.
Prerequisite: CHEM 9 or CHEM 112B with a grade of "C" or better.
Notes: No credit toward Chemistry major or minor.
Normal Grade Rules
3 units

CHEM 137L. Medical Biochemistry Lab
Diagnostic biochemistry including typical analysis of body fluids, function tests, and other clinical lab techniques emphasizing instrumentation.
Corequisite: CHEM 137.
Misc/Lab: Lab 3 hours.
Notes: No credit toward Chemistry major or minor.
Normal Grade Rules
1 unit

CHEM 145. Inorganic Chemistry
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 146</td>
<td>Physical-Inorganic Techniques</td>
<td>Application of advanced instrumental and preparative techniques to the study of structure, reactivity and spectroscopy of inorganic and organic substances including materials. This is a capstone course. A grade of &quot;C&quot; or better is required for majors. Prequisite: CHEM 100W, CHEM 101, CHEM 145, CHEM 161A (with grades of &quot;C&quot; or better; &quot;C-&quot; not accepted) or instructor consent. Pre/corequisite: CHEM 155 Misc/Lab: Lecture 1 hour/lab 6 hours. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CHEM 155</td>
<td>Instrumental Analysis</td>
<td>Principles and practices in the use of instrumental methods in chemical analysis. Basic physical chemistry necessary to understand the operation and limitations of the instruments. Prerequisite: CHEM 100W, CHEM 160 or CHEM 161A (with grades of &quot;C&quot; or better; &quot;C-&quot; not accepted). Misc/Lab: Lecture 3 hours/lab 3 hours. Normal Grade Rules 4 units</td>
</tr>
<tr>
<td>CHEM 159</td>
<td>Advanced Analytical Chemistry</td>
<td>A lecture and problem course which considers advanced topics in chemical analysis. Consult schedule of classes for current offering(s). Prerequisite: Upper division standing or instructor consent. Notes: A total of 6 units may apply toward degree. Repeatable for credit Normal Grade Rules 1-2 units</td>
</tr>
<tr>
<td>CHEM 160</td>
<td>Physical Chemistry</td>
<td>Introduction to the fundamental principles of physical chemistry. Thermodynamics, kinetics, quantum mechanics and spectroscopy. Prerequisite: CHEM 55, PHYS 2B and MATH 30 (with grades of &quot;C&quot; or better; &quot;C-&quot; not accepted). Normal Grade Rules 4 units</td>
</tr>
<tr>
<td>CHEM 161A</td>
<td>Physical Chemistry</td>
<td>Principles of classical physical chemistry. Chemical thermodynamics, kinetics and electrochemistry. Prerequisite: CHEM 55 (or CHEM 1B and upper division standing for engineering majors), PHYS 50 and MATH 32 (with grades of &quot;C&quot; or better; &quot;C-&quot; not accepted). Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CHEM 161B</td>
<td>Physical Chemistry</td>
<td>Principles of modern physical chemistry. Quantum chemistry, spectroscopy and statistical mechanics. Prerequisite: CHEM 161A and PHYS 52 (with grades of &quot;C&quot; or better; &quot;C-&quot; not accepted). Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CHEM 162L</td>
<td>Physical Chemistry Lab</td>
<td>Physical chemical measurements with data analysis and written reports. Prerequisite: CHEM 100W or ENGR 100W, CHEM 160 or CHEM 161A with concurrent enrollment in either CHE 158 or CHEM 161B (all prerequisites with grades of &quot;C&quot; or better; &quot;C-&quot; not accepted). Misc/Lab: Lab 6 hours. Normal Grade Rules 2 units</td>
</tr>
<tr>
<td>CHEM 172</td>
<td>Chemistry of Wine</td>
<td>Introduction to chemistry of important components (organic acids, pigments, tannins, flavor constituents, etc.) of grape wine. Chemical changes that occur during fermentation, maturation and aging. Prerequisite: CHEM 1B (with a grade of &quot;C&quot; or better; &quot;C-&quot; not accepted) or instructor consent. Normal Grade Rules 1 unit</td>
</tr>
<tr>
<td>CHEM 173</td>
<td>Polymer Chemistry</td>
<td>Chemistry of polymeric substances, both natural and synthetic, emphasizing polymers of current interest. Prerequisite: CHEM 112B (with a grade of &quot;C&quot; or better; &quot;C-&quot; not accepted) or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CHEM 180</td>
<td>Individual Studies</td>
<td>Advanced supervised lab work. Work and results described in written and oral reports as required by instructor. An honors course. Prerequisite: CHEM 120S, instructor consent and &quot;B&quot; average. Repeatable for credit Credit / No Credit 1-4 units</td>
</tr>
<tr>
<td>CHEM 184</td>
<td>Directed Reading</td>
<td>Assigned readings of selected books, journals and papers to fill gaps in training or for contact with new fields. Regular conferences with instructor. Written report required. An honors course. Prerequisite: Instructor consent and CHEM 55. Repeatable for credit Credit / No Credit 1-3 units</td>
</tr>
<tr>
<td>CHEM 189</td>
<td>Advanced Problem Solving for Chemistry</td>
<td>Supplemental course taken simultaneously with upper division chemistry lecture courses. Techniques for studying and problem solving emphasis. Preparation and active participation expected. Consult schedule of classes for current offering(s). Notes: No credit toward chemistry major or minor. Repeatable for credit Credit / No Credit 1 unit</td>
</tr>
<tr>
<td>CHEM 190</td>
<td>Undergraduate Seminar</td>
<td>Problem solving and presentation of topics within specialized sub-areas of chemistry by students, faculty and guests. A total of 2 units may be repeated. Prerequisite: CHEM 1B. Repeatable for credit Credit / No Credit 0.5 units</td>
</tr>
<tr>
<td>CHEM 191</td>
<td>Senior Thesis or Project</td>
<td>Prerequisite: Minimum of 2 units of CHEM 180 or CHEM 184, instructor consent and CHEM 100W. Credit / No Credit 1 unit</td>
</tr>
<tr>
<td>CHEM 201</td>
<td>Graduate Studies in Chemistry</td>
<td>Principles and topics in contemporary chemical research. Open to senior undergraduates with instructor consent. Credit / No Credit 1 unit</td>
</tr>
<tr>
<td>CHEM 203</td>
<td>Methods of Instruction in Chemistry</td>
<td>A seminar and discussion course to introduce effective methods for teaching undergraduate chemistry laboratories. Management issues such as record-keeping, grading and classroom administration will be covered. This course is highly recommended for those graduate students who plan to teach. Open to senior undergraduates with instructor consent. Credit / No Credit 1 unit</td>
</tr>
<tr>
<td>CHEM 205</td>
<td>Methods of Chemical Research</td>
<td>Concepts and techniques used in chemical research. Topics include theory of experimental design, analog and digital electronics, optical and mechanical design of scientific instruments. Prerequisite: CHEM 155, CHEM 161B and CHEM 162L (or equivalents with grades of &quot;C&quot; or better; &quot;C-&quot; not accepted). Misc/Lab: Lecture 1 hour/lab 6 hours. Notes: Alternate years. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CHEM 210</td>
<td>Advanced Organic Chemistry</td>
<td>Structures and mechanisms in organic chemistry. Prerequisite: CHEM 120B and CHEM 161A (or equivalents with grades of &quot;C&quot; or better; &quot;C-&quot; not accepted). Notes: Alternate years. Normal Grade Rules 3 units</td>
</tr>
</tbody>
</table>
CHEM 212. Natural Products
Topics from the structure proof, synthesis and biosynthesis of secondary metabolites.
Prerequisite: CHEM 114 (or equivalent with a grade of "C" or better; "C-" not accepted) or other advanced organic course.
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 213. Organic Synthesis
Synthetic methods and their application to multistep organic syntheses. Emphasis will be placed on synthetic strategy and a mechanistic understanding of synthetic reactions.
Prerequisite: CHEM 112B (or equivalent with a grade of "C" or better; "C-" not accepted). Alternate years 3 units.
Normal Grade Rules
3 units

CHEM 214. Heterocyclic Compounds
A course devoted to the organic chemistry of the ring compounds of oxygen, nitrogen and sulfur.
Prerequisite: CHEM 112B (or equivalent with a grade of "C" or better; "C-" not accepted).
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 216. Physical Organic Chemistry
Application of molecular orbital theory to organic chemistry and related topics.
Prerequisite: CHEM 112B and CHEM 161B (or equivalents with grades of "C" or better; "C-" not accepted).
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 218. Organotransition Metal Chemistry
Structure and reaction chemistry of compounds which contain transition metal-carbon bonds. Applications to catalytic processes and to organic synthesis.
Prerequisite: CHEM 112B and CHEM 145 (or equivalents with grades of "C" or better; "C-" not accepted) or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 221L. Synthesis with Radioisotopes
Basic techniques of handling, synthesizing and assaying labeled compounds.
Prerequisite: CHEM 112B (or equivalent). CHEM 120S, CHEM 121S and CHEM 127 (with grades of "C" or better, "C-" not accepted).
Misc/Lab: Lab 6 hours.
Notes: Alternate years.
Normal Grade Rules
2 units

CHEM 231. Advanced Biochemistry
Chemistry of the amino acids, peptides and proteins, the chemistry of enzyme action and introduction to the metabolism of amino acids and related compounds.
Prerequisite: CHEM 130B or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted).
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 232. Nucleic Acids
Topics include structural features of DNA and RNA, protein-DNA or RNA interactions, chemical and enzymatic basis for gene expression, and recombinant DNA methods.
Prerequisite: CHEM 130C or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted).
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 233. Immunochemistry
Topics include antibody-antigen reaction theory in solution, gels and solid phase; function and structure at both protein and gene level of immunoglobulins and other immunochemicals. Papers from immunochemical literature critiqued.
Prerequisite: CHEM 130A or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted) or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 234. Enzymology
Enzyme structure, function, classification, isolation and methodology, mechanisms, theory of catalysis, enzyme kinetics, pH effects, allosterism and regulation.
Prerequisite: CHEM 130B or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted) or instructor consent.
Notes: Alternate years.
Repeatable for credit
Normal Grade Rules
3 units

CHEM 235. Biochemical Separation Methods
Theory and methodology of biochemical separations. Topics selected from adsorption, bioaffinity, gas, gel, hydrophobic, ion-exchange and partition chromatography as well as electro-migration methods and centrifugation.
Prerequisite: CHEM 130B or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted).
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 236. Biophysical Methods
Advanced lectures on theory and methodology of biophysical measurements. Topics selected from spectroscopic, electromigration and hydrodynamic methods. Practice, limitations and data reduction procedures for each method examined.
Prerequisite: CHEM 130A or CHEM 135 (or equivalent with a grade of "C" or better, "C-" not accepted) or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 237. Bioinorganic Chemistry
Provides an in-depth survey of the frontiers of bioinorganic chemistry from both biochemical and synthetic inorganic chemistry perspectives.
Prerequisite: CHEM 130A (or equivalent with a grade of "C" or better; "C-" not accepted) or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 245. Advanced Inorganic Chemistry
Advanced topics of current interest in inorganic chemistry.
Prerequisite: CHEM 145 (or equivalent with grade of "C" or better; "C-" not accepted).
Notes: Alternate years.
Repeatable for credit
Normal Grade Rules
3 units

CHEM 250. Current Topics in Analytical Chemistry
Lecture, discussion and reading assignments on special topics in analytical chemistry. Topics vary each semester. Course may be repeated for credit for different topics.
Prerequisite: CHEM 155 (or equivalent with a grade of "C" or better; "C-" not accepted).
Notes: Alternate years.
Repeatable for credit
Normal Grade Rules
3 units

CHEM 258. Advanced Analytical Chemistry - Chemometrics
Introduction to chemometric methods in analytical chemistry. Development and discussion of advanced numerical methods and simplex analysis in the design and refinement of experimental techniques in analytical chemistry.
Prerequisite: Satisfactory background in upper division chemistry, physics or engineering, or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

<td>Advanced Laboratory</td>
<td>Advanced laboratory assignments in special fields of chemistry. Topics vary. Maximum of 4 units may be repeatable.</td>
<td>Prerequisite: Satisfactory background in upper division chemistry and instructor consent. Repeatable for credit Normal Grade Rules 1-3 units</td>
<td></td>
</tr>
<tr>
<td>CHEM 270L</td>
<td>Advanced Chemistry Laboratory</td>
<td>Lectures, discussions and reading assignments in special fields of chemistry. Topics vary. Course may be repeatable for maximum of 10 units.</td>
<td>Prerequisite: Satisfactory background in upper division chemistry, CHEM 120S and instructor consent. Repeatable for credit Normal Grade Rules 1-5 units</td>
<td></td>
</tr>
<tr>
<td>CHEM 272</td>
<td>Addition Polymerization</td>
<td>The synthesis and mechanisms of chain growth polymerizations. Introduction to copolymerization, coordination polymerization and emulsion polymerization.</td>
<td>Prerequisite: Satisfactory background in upper division chemistry or materials science or instructor consent. Notes: Alternate years. Normal Grade Rules 3 units</td>
<td></td>
</tr>
<tr>
<td>CHEM 273</td>
<td>Condensation Polymerization</td>
<td>Step growth polymerizations. Stoichiometric, kinetic and statistical approaches to linear polymerization and gelation. Introduction to interfacial polymerization, copolymerization and ring opening polymerization.</td>
<td>Prerequisite: Satisfactory background in upper division chemistry or materials science or instructor consent. Notes: Alternate years. Normal Grade Rules 2 units</td>
<td></td>
</tr>
<tr>
<td>CHEM 274</td>
<td>Physical Polymer Chemistry</td>
<td>Techniques for characterizing molecular weights of polymers, their distribution functions, polymer chain statistics and solution thermodynamics.</td>
<td>Prerequisite: Satisfactory background in upper division chemistry or materials science or instructor consent. Notes: Alternate years. Normal Grade Rules 3 units</td>
<td></td>
</tr>
<tr>
<td>CHEM 277</td>
<td>Analytical Polymer Chemistry</td>
<td>Modern analytical methods used to identify and characterize polymeric materials, such as DSC, TGA, TMA, DMA, chromatographic techniques, solid state NMR, FT-IR, introductory surface analysis techniques and x-ray diffraction methods.</td>
<td>Prerequisite: Satisfactory background in upper division chemistry or materials science or instructor consent. Notes: Alternate years. Normal Grade Rules 3 units</td>
<td></td>
</tr>
<tr>
<td>CHEM 285</td>
<td>Seminar</td>
<td>Presentation of chemical topics by graduate students, faculty and guests. A maximum of 2 units may be repeated.</td>
<td>Repeatable for credit Normal Grade Rules 0.5 units</td>
<td></td>
</tr>
<tr>
<td>CHEM 290R</td>
<td>Thesis Supervision</td>
<td>Continued work on thesis or project.</td>
<td>Pre-requisite: Outstanding RP grade in a preceding semester in Chem 299, Master’s Thesis Mandatory CR/NC/RP 1 unit</td>
<td></td>
</tr>
<tr>
<td>CHEM 291</td>
<td>Divisional Seminar</td>
<td>Problem solving and presentation of topics in chemistry by graduate students, faculty and guests. A maximum of 2 unit may be repeated.</td>
<td>Repeatable for credit Credit / No Credit 0.5 units</td>
<td></td>
</tr>
<tr>
<td>CHEM 297</td>
<td>MA Special Study</td>
<td>Supervised individual MA project. Maximum of 12 unit may be repeated. Pre/corequisite: CHEM 201 and instructor consent. Repeatable for credit Credit / No Credit 1-3 units</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CHEM 298</td>
<td>Research</td>
<td>Supervised individual laboratory work or directed chemical field studies for the student with adequate preparation. Maximum of 12 unit may be repeated. Pre/Corequisite: CHEM 120S, CHEM 201 and instructor consent. Repeatable for credit Credit / No Credit 1-6 units</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
CHEM 299. Master's Thesis
Prerequisite: CHEM 298, instructor consent and admission to candidacy for the master's degree. Maximum of 6 unit may be repeated.
Notes: 1-2 units per semester.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
Child and Adolescent Development, Department of Courses

CHAD 060. Child Development
The child in the family and community from prenatal life throughout the adolescent years. Observation required.
Normal Grade Rules
GE: E
3 units

CHAD 067. Development of Human Potential
Examines the interaction of psychosocial, cognitive, psychomotor, and physical attributes as related to the development and realization of human potential across the lifespan in a contemporary multicultural society.
Notes: Not open to KIN majors and minors for major/minor credit.
Normal Grade Rules
GE: E
3 units

CHAD 070. Lifespan Development in the 21st Century
Understanding life-long development in the 21st century is promoted through studying theories, research, and the role of culture in shaping physical, cognitive, social, and emotional development. We explore commonalities and differences in human development to understand ourselves as global citizens.
Normal Grade Rules
GE: E
3 units

CHAD 075. Imagination, Play and Adult Creativity
Explores childhood play and imagination as well as adult creativity and the influence of value systems, economic structures, political institutions, social groups and natural environments on the development of play, imagination and creativity.
Normal Grade Rules
GE: D1
3 units

UPPER DIVISION

CHAD 100W. Writing Workshop
Development of advanced skills in writing, particularly in the field of child development. Focus on development of a mature writing style and organization of persuasive and analytical prose.
Prerequisite: ENGL 1B (with a grade of C or better);
Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE: Z
3 units

CHAD 101. Research Methods in Child Development
Study of various techniques and methods used in child development research. Development of proposal writing skills.
Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units

CHAD 102. Development of Self in a Culturally Diverse Society
Examines the influence of various institutions and society on the psychosocial development of children and adolescents from culturally diverse backgrounds in the United States.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Lecture and field observations.
Normal Grade Rules
GE: S
3 units

CHAD 104. Program Evaluation and Assessment in Community-Based Programs
Optimizing services for children and families requires knowledge and skills in program evaluation and assessment. Through lecture, discussion and case studies, students are introduced to the principles and varied methods of evaluation, and to underlying ethical issues and cultural competencies.
Prerequisite: CHAD 060
Normal Grade Rules
3 units

CHAD 106. Concepts of Childhood
Explores the historical diversity in the ways in which childhood has been defined; investigates diverse cultural definitions of childhood; examines the impacts of those beliefs and definitions on human development.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

CHAD 123. Children and Youth in Contemporary Schools
Historical and contemporary school/society relationships which shape American educational institutions and practices. Focus on the influences of philosophical, social, political, demographic, economic, and public health trends on the delivery of educational programs.
Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units

CHAD 149. Child Health and Physical Activity
An integrative approach to understanding the multiple factors that impact children’s health and physical fitness and that influence the development of lifelong habits. Emphasis is on the inter-relationships between health and fitness and cognitive, social, and emotional well-being.
Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units

CHAD 150. Development of Communicative Competence
Survey of major topics in the development of communicative competence (theoretical approaches to understanding language acquisition, contexts for development, language diversity, relationship between language and cognition). Attention given to language acquisition, media influences and language assessment.
Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units

CHAD 151. Developing Literacy in a Diverse Society
Knowledge of a balanced literacy approach, including an understanding and use of the major descriptors of developing literacy, appropriate assessment methods and instruments, and a developmental and analytical appreciation for writing strategies, conventions, and applications.
Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units
CHAD 157. Adult Supervision for Programs Serving Children, Youth, and Families
The course is designed to provide students with the practical knowledge necessary to meet criteria for adult supervision in programs that serve children and youths.
Prerequisite: CHAD 060
  Normal Grade Rules
  3 units

CHAD 158. Practicum in Community-Based Organizations Serving Children and Youth
This course provides for a practical application of the theoretical information acquired across the CHAD major coursework. Students will participate in the context of a community service organization serving youth and families.
Prerequisite: CHAD 060
  Normal Grade Rules
  3 units

CHAD 159. Child Development K-8 Practicum
Principles, techniques, observation and participation in the guidance of elementary and middle school children. Prerequisite: CHAD 060 or instructor consent.
Misc/Lab: Lecture 1 hour/lab 6 hours.
  Normal Grade Rules
  3 units

CHAD 160. Child Development Practicum
Principles, techniques, observation and participation in the guidance of children. Prerequisite: CHAD 060 or instructor consent.
Misc/Lab: Lecture 1 hour/activity 4 hours.
  Normal Grade Rules
  3 units

CHAD 161. Child Care Administration I
Survey of practices and procedures integral to designing, operating, and assessing high quality care programs for young children. Focus is on parent and staff development, curriculum design, and hands-on activities designed to develop administrative skills.
Prerequisite: CHAD 060 or instructor consent.
  Normal Grade Rules
  3 units

CHAD 162. Childhood and Adolescence in a Multicultural Society
Exploration of the agents and processes by which cultural values and social attitudes are transmitted. Interactions of individuals from four groups in the U.S. examined from culturally monolithic and pluralistic perspectives.
Prerequisite: CHAD 060 or instructor consent.
  Normal Grade Rules
  3 units

CHAD 163. Critical Issues in Adolescent Development
Relationships among major socialization agents (family, peers, school, media). Ethnicity, primary language and socioeconomic status as they affect adolescents.
Prerequisite: CHAD 060 or instructor consent.
  Normal Grade Rules
  3 units

CHAD 164. Contemporary Parenting
Philosophies and theories of parent-child relationships in a multicultural society.
Prerequisite: CHAD 060 or instructor consent.
  Normal Grade Rules
  3 units

CHAD 165. Risk and Resilience in a Community Context
This course provides students with an understanding of theories, concepts and research that explain risk and resilience. Students will explore community-based organizations that promote resilience and apply their knowledge of risk and resilience to a variety of settings and contexts.
Prerequisite: CHAD 060
  Normal Grade Rules
  3 units

CHAD 167. Child Care Administration I
Policies, regulations, and licensing requirements related to administering and supervising child care facilities.
Prerequisite: CHAD 060 or instructor consent.
Misc/Lab: Lecture/activity 7 hours.
  Normal Grade Rules
  3 units

CHAD 168. Social and Emotional Development in Childhood and Adolescence
Understanding issues in social and emotional development and processes of development underlying the emergence of self, social behavior, and emotional competence. Study coping and models of resilience as related to familial and extrafamilial contexts of social and emotional development.
Prerequisite: CHAD 060 or instructor consent.
Repeatable for credit
  Normal Grade Rules
  3 units

CHAD 169. Motivating Children and Adolescents in Educational Settings
Perspectives of psychoanalysis, individual psychology, behaviorism and cognitive psychology as applied to the motivation of children and adolescents in educational settings.
Prerequisite: CHAD 060 and PSYC 001 (or equivalent) or instructor consent.
  Normal Grade Rules
  3 units

CHAD 170. Contextual Influences on Cognitive Development
Survey of major topics and issues in cognitive development and the acquisition of communication skills. The influence of family, school and cultural environment on these developmental changes.
Prerequisite: CHAD 060 or instructor consent.
  Normal Grade Rules
  3 units

Surveys infant and toddler development in five domains (i.e. social, emotional, cognitive, language, physical) as well as relevant contexts (e.g. culture). Attention given to best practices in infant and toddler care and factors that place infants and toddlers at risk.
Prerequisite: CHAD 060 (or equivalent) and PSYC 001.
  Normal Grade Rules
  3 units

CHAD 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Program director consent.
Repeatable for credit
  Credit / No Credit
  1-4 units

CHAD 195. Senior Seminar in Child Development
Advanced study of recent and seminal research and writing in the area of child and adolescent development.
Prerequisite: CHAD major, 12 units completed in CHAD, senior standing, and completion of CHAD or LLD 100W with a grade of ‘C’ or better (‘C-' not accepted).
  Normal Grade Rules
  3 units

CHAD 199. Senior Honors Thesis
Supervised thesis. Enrollment limited to qualified senior child and Adolescent development majors.
Prerequisite: Senior or graduate standing and instructor consent.
Repeatable for credit
  Credit / No Credit
  1-3 units

GRADUATE
CHAD 260A. Seminar in Child and Adolescent Development: Research
Advanced study of recent child and adolescent development research. Examination of quantitative and qualitative research methodologies used in the field.
Prerequisite: Graduate standing, 12 units in CHAD or related disciplines; CHAD 101 (or equivalent); CHAD majors.
  Normal Grade Rules
  3 units
CHAD 260B. Seminar in Child and Adolescent Development
Capstone course with advanced study of recent research and writings in the area of child and adolescent development. Course includes completion of the cumulative experience project.
Prerequisite: Graduate standing; 9 units in CHAD MA core courses, co-registration in CHAD 298, CHAD majors.
Normal Grade Rules
3 units

CHAD 262. Multicultural Issues in Child and Adolescent Development
Examination of factors influencing the psychosocial development of children and adolescents in a multicultural society. Theoretical and methodological issues affecting the understanding of diversity in child development are also explored.
Prerequisite: 9 units in CHAD or related disciplines.
Normal Grade Rules
3 units

CHAD 266. Social Policy Issues in American Childhood and Youth
Survey of issues in child and adolescent development which are the topics of national debate in the United States. Research background and social policy implications of these topics are addressed.
Prerequisite: 9 units in CHAD or related disciplines.
Normal Grade Rules
3 units

CHAD 268. Seminar in Social and Emotional Development
Examination of current issues in childhood and adolescent social and emotional development: processes underlying self-esteem and self-control and emergence of the self. Contributions of family, school and society are considered.
Prerequisite: 9 units in CHAD or related disciplines.
Normal Grade Rules
3 units

CHAD 270. Seminar in Cognitive and Language Development
Examination of major topics in cognitive and language development: stages of development, nature/nurture controversy, stability of behavior over time. Individual differences in cognition and cognitive styles are also explored.
Prerequisite: 9 units in CHAD or related disciplines.
Normal Grade Rules
3 units

CHAD 298. Special Studies in Child and Adolescent Development
Supervised study in the field of child development.
Prerequisite: Admission to candidacy for the master’s degree.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units

CHAD 299. Master’s Thesis
Supervised thesis in the field of child development.
Prerequisite: Admission to candidacy for the master’s degree.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units
Civil and Environmental Engineering Department Courses

CIVIL ENGINEERING

LOWER DIVISION

CE 008. Plane Surveying
Theory and practice of engineering measurements. Techniques and instruments used establish horizontal and vertical control. Topographic methods. Prerequisite: MATH 019 (or eligibility for MATH 30) Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules 3 units

CE 020. Engineering Graphics, CAD and Programming
Develop visualization skills by using technical sketching, AutoCAD and manual drafting to solve civil engineering graphical problems. Subjects include: isometric sketching, orthographic projection, descriptive geometry, and plan reading. Writing computer programming code and logic flow. Prerequisites: MATH 019 (or eligibility for MATH 30) Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules 3 units

CE 095. Theory and Application of Statics
Detailed study of bodies in equilibrium to provide background for advanced study of engineering mechanics. Applications to general three-dimensional bodies and structural systems. Topics include free body diagrams, centroids, internal forces, distributed loads, moments of inertia and friction. Prerequisites: MATH 031, PHYS 050 Normal Grade Rules 3 units

CE 099. Introductory Statics
Introduction to the study of two-dimensional bodies in equilibrium. Applications to two-dimensional particles and structural systems. Topics include free body diagrams, centroids, and moments of inertia. Prerequisite: MATH 031, PHYS 050 Normal Grade Rules 2 units

UPPER DIVISION

CE 105. Professional Design I
Planning, design, construction, maintenance and operation of civil engineering projects. Conducted as an internship program under supervision of a professional engineer. Prerequisite: CE 140, CE 150, CE 160. Credit/No Credit 1 unit

CE 112. Mechanics of Materials
Stress distributions, strain, stresses and deformations in machines and structures subject to axial, bending and torsional loads, including combined loads. Stability of columns. Prerequisite: CE 99 Normal Grade Rules 3 units

CE 113. Mechanics of Materials Laboratory
Experimental stress analysis. Verification of theoretical models through testing. Deflection of beams, inelastic bending and column instability. Prerequisite: CE 112 Normal Grade Rules 1 unit

CE 120. Construction Materials Laboratory
Properties, testing and design of civil engineering construction materials, including aggregates for concrete and bituminous mixes. Theory and design of bituminous and portland cement-aggregate mixes. Prerequisite: CE 112 Misc/Lab: Lab 3 hours. Normal Grade Rules 1 unit

CE 121. Transportation Engineering
Principles, theories, practices in transportation engineering design, planning surveys and data analysis; traffic flow characteristics; location and geometric design of systems to include highways, rail, airports, waterways and pipelines. Problems in planning, design and operations. Prerequisite: CE 008, CE 020, MATH 032, PHYS 050. Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules 3 units

CE 122. Traffic Engineering
Design of traffic control systems to include traffic signals and other traffic control devices for safe and efficient vehicular flow; traffic surveys; traffic operations. Prerequisite: MATH 032 or graduate standing. Normal Grade Rules 3 units

CE 123. Highway and Street Design
Geometric design of highways and streets. Discussion of design policy. Safety and operational features as well as the evaluation of improvements. Prerequisite: CE 121 or graduate standing Normal Grade Rules 3 units

CE 130. Civil Engineering Economic Analysis
Marginal theoretic procedures for identifying optimal investment alternatives. Algorithmic approaches to one-dimensional deterministic benefit-cost analysis. Multidimensional and probabilistic decision problems. Prerequisite: MATH 032 Normal Grade Rules 2 units

CE 131. Introduction to Construction Engineering
Introduction to construction engineering, construction contract types, contracting documents, project delivery methods, owner-engineer-contractor relationships, professional liability, engineering ethics, construction cost estimates, construction planning, basic concepts and techniques of scheduling, creating CPM scheduling, updating and reporting a schedule. Prerequisite: CE 130 Normal Grade Rules 3 units

CE 132. Construction Methods and Equipment
Construction earthmoving, excavating, loading, compacting; safety, equipment productivity, construction methods and materials. Prerequisite: CE 130, CE 140 or graduate standing Normal Grade Rules 3 units

CE 133. Construction Structures
Design elements for timber and metal temporary structures, formwork, falsework, trenching, shoring and scaffolding, construction safety. Prerequisite: CE 20, CE 160 (with a grade of “C-“ or better). Corequisite: CE 140. Normal Grade Rules 3 units

CE 134. Project Management for Construction
Methods of planning and controlling construction including the participants, processes and techniques required to maintain the life cycle of a construction project. Planning construction operations, estimating, analyzing the bid process, jobsite operations and functions, safety, quality and scheduling. Prerequisite: CE 131 or Graduate standing Normal Grade Rules 3 units

CE 140. Geotechnical Engineering
Soil as an engineering material; Classification, compaction, consolidation, shear strength, and permeability of soils; Basic design concepts for bearing capacity of shallow foundations, lateral earth pressures and slope stability. Prerequisite: CE 20, CE 112, ME 111, ENGR 100W Misc/Lab: Lecture 3 hours/lab 3 hours. Normal Grade Rules 3 units

CE 141. Foundation Design
Design of spread footings, piers, piles and caissons. Analysis of mat foundations. Lateral loads and retaining structures. Eccentric and inclined foundation loads. Prerequisite: CE 140 or graduate standing Normal Grade Rules 3 units
CE 142. Construction Dewatering  
Applications of soil mechanics to excavations and  
construction dewatering, groundwater hydrology and  
modeling; design of dewatering systems.  
Prerequisite: CE 140 or graduate standing  
Normal Grade Rules  
3 units  

CE 144. Transport in Porous Media  
Flow of groundwater through soil; Unsaturated flow;  
Groundwater and Geologic Processes; Flow nets for  
structures; Groundwater Contaminant Remediation;  
Seepage.  
Prerequisite: CE 140, CE 150 or equivalent  
Normal Grade Rules  
3 units  

CE 145. Foundation Engineering  
Use of field data in Geotechnical design; Design of  
shallow foundations for bearing capacity and settlement;  
Design of deep foundations for shear and tip resistance;  
Analysis of mat foundations. Design of retaining walls.  
Prerequisite: CE 140 or equivalent  
Normal Grade Rules  
3 units  

CE 150. Introduction to Hydrology and  
Hydraulics  
Analysis and design of open channels and pipe networks.  
Introduction to hydraulic structures, machinery, basic  
hydrology, and computer modeling. Social impacts of  
Civil Engineering.  
Prerequisite: CE 20, ME 111, ENGR 100W  
Misc/Lab: Lecture 2 hours/design period 3 hours.  
Normal Grade Rules  
3 units  

CE 152. Engineering Hydrology  
Hydrologic processes; streamflow, hydrographs and flood  
routing; groundwater hydrology; flood frequency analysis.  
Prerequisite: CE 150 or graduate standing  
Normal Grade Rules  
3 units  

CE 153. Groundwater Flow and Transport  
Study of subsurface flow theory; storage properties,  
Darcy’s equation, the aquifer flow equation,  
heterogeneity and anisotropy, unsaturated flow, well  
hydraulics. Introduction to subsurface contaminant  
transport and remediation.  
Prerequisite: MATH 133A, CE 130, CE 150 or instructor consent.  
Normal Grade Rules  
3 units  

CE 154. Hydraulic Design  
Design of hydraulic structures-reservoirs, dams, spillways,  
energy dissipators, outlet works, hydroelectric systems  
and flood control.  
Prerequisite: CE 150 and graduate standing  
Normal Grade Rules  
3 units  

CE 160. Structural Analysis  
Analysis of statically determinate beams, frames, and  
plane trusses. Force method of analysis of statically  
indeterminate structures. Applications to building design.  
Introduction to computer analysis.  
Prerequisite: CE 20, CE 112, and ME 101  
Misc/Lab: Lecture 3 hours/computation period 3 hours.  
Normal Grade Rules  
3 units  

CE 161. Indeterminate Structural Analysis  
Classical analysis of indeterminate structures; consistent  
defonnations, slope-deflection and moment distribution.  
General methods of force and displacement analysis,  
matrix methods. Application of computer programs.  
Prerequisite: CE 160  
Normal Grade Rules  
3 units  

CE 162. Structural Concrete Design  
Strength design and alternative load and strength  
reduction factor theories of reinforced concrete. Design  
of beams, Slabs, compression members, foundations and  
building frames. Design project required. Social impacts  
of Civil Engineering.  
Prerequisite: CE 160 and ENGR 100W  
Misc/Lab: Lecture 3 hours/computation period 3 hours.  
Normal Grade Rules  
3 units  

CE 163. Design of Steel Structures  
Structural steel design elements for buildings and bridges,  
tension members, beams, columns, bolted and welded  
connections. Design project.  
Prerequisite: CE 160 or graduate standing  
Normal Grade Rules  
3 units  

CE 164. Design of Wood Structures  
Design of structural elements for wood buildings.  
Horizontal and vertical plywood diaphragms for seismic  
and wind loads. Tension members, beams, columns and  
connections. Design project using the National Design  
Specifications and the Uniform Building Code.  
Prerequisite: CE 160 and graduate standing  
Normal Grade Rules  
3 units  

CE 165. Earthquake Resistant Design  
Seismic resistant design according to the provisions of the  
Uniform Building Code. Elements of seismic hazard  
analysis.  
Prerequisite: CE 160  
Normal Grade Rules  
3 units  

CE 170. Principles of Environmental Engineering  
Introduction to environmental (water, air and land)  
pollution problem, surface water and groundwater quality,  
water and wastewater treatment processes, drinking  
water and wastewater treatment flowsheets, design  
of drinking water treatment processes, contemporary  
environmental issues, and environmental sustainability.  
Prerequisite: CE 20, ME 111, CHEM 1A, and ENGR 100W  
Misc/Lab: Lecture 2 hours; lab/design 3 hours.  
Normal Grade Rules  
3 units  

CE 171. Environmental Engineering Analysis and  
Design  
Fundamentals of environmental systems and design.  
Pollution flow and concentration, pollution materials  
balance, reaction kinetics for destruction of pollutants,  
pollution control reactor analysis and design, application  
in the design of water and wastewater treatment  
processes.  
Prerequisite: CE 170 and graduate standing  
Normal Grade Rules  
3 units  

CE 172. Solid Waste Management Engineering  
Introduction to engineering analysis, planning and design  
problems associated with storage, collection, processing,  
treatment and disposal of solid waste.  
Corequisite: CE 170 or equivalent  
Normal Grade Rules  
3 units  

CE 173. Engineering for Sustainable  
Environment  
Introduction to environmentally conscious engineering  
and pollution prevention for sustainable environment,  
and a review of impact of engineering projects, processes  
and products on the environment.  
Prerequisite: CE 170 or graduate standing  
Normal Grade Rules  
3 units  

CE 174. Design of Water Distribution and  
Wastewater Collection Systems  
Application of environmental engineering and fluid  
mechanics to the design of water distribution systems,  
water/wastewater collection systems, water/wastewater  
storage systems, and appurtenances.  
Prerequisite: CE 150 and CE 170  
Normal Grade Rules  
3 units  

CE 180. Individual Studies  
Individual work on special topics by arrangement.  
Prerequisite: Upper division standing.  
Repeatable for credit  
Credit / No Credit  
1-3 units
CE 181. Civil Engineering Systems
Principles of systems design for civil engineers, including formulation of project objectives, constraints, problem statements, alternatives generation, alternatives evaluation and decision analysis. Principles demonstrated through case studies.
Prerequisite: CE121, CE 130, CE131, CE140, CE150, CE160, CE170, CE192
Normal Grade Rules
3 units

CE 190. Numerical Solutions of Civil Engineering Problems
Reformulating linear and non-linear, static and dynamic civil engineering problems for numerical solution by computers.
Prerequisite: MATH 133A, ENGR 10.
Normal Grade Rules
2 units

CE 192. Probabilistic Models for Civil Engineering Decisions
Elementary concepts of probability theory, statistics and decision theory. Applications to modeling and decision-making.
Prerequisite: MATH 032
Normal Grade Rules
2 units

CE 201. Advanced Mechanics
Beams on elastic foundations, curved beams, torsion of non-circular sections, introduction to the theory of elasticity, three dimensional stress and strain, failure theories, deep beams.
Prerequisite: CE 161 and MATH 133A (or equivalent).
Normal Grade Rules
3 units

CE 210. Structural Dynamics
Analysis of lumped and distributed parameter systems subject to dynamic loading; matrix analysis and orthogonal functions applied to beams, frames and complex structures. Introduction to earthquake response spectrum analysis.
Prerequisite: CE 161 (or equivalent).
Normal Grade Rules
3 units

CE 212. Finite Elements with Civil Engineering Applications
Theory of finite elements applied to analysis and design of structures: plane stress and plane strain; axisymmetric and general solids; plates; axisymmetric and general shells; dynamic response and elastic instability.
Prerequisite: MATH 133A and CE 161 (or equivalent).
Normal Grade Rules
3 units

CE 220. Rigid and Flexible Pavement Design
Advanced study of the theories and practices in the structural design of flexible and rigid pavements for highways and airports; magnitude and arrangement of wheel loads; stresses in flexible and rigid pavements; pavement behavior under moving loads; design of bases and subbases; methods of structural design of flexible and rigid pavements; pavement evaluation, strengthening and selection criteria; accelerated traffic and loading tests.
Prerequisite: CE 120 and CE 140 (or equivalent).
Normal Grade Rules
3 units

CE 221. Advanced Highway Design
Advanced study of highway location and design principles; advanced analysis of criteria controlling geometric design of highways including design speed, design volume, vehicle requirements and capacity; advanced theory and practice in the design of alignment, grade and cross-section; design of intersections and interchanges; access control, frontage roads.
Prerequisite: CE 121 (or equivalent).
Normal Grade Rules
3 units

CE 222. Transportation Engineering Planning
Technical and economic evaluation of transportation improvements; capacity restraints; geometric design factors, location and relocation principles; optimization theory in transportation system design; user costs and benefits; transport equipment; operation and safety; economic impact, construction and maintenance practices; intergovernmental coordination, cooperation, responsibility and financial participation.
Prerequisite: CE 121 and CE 130.
Normal Grade Rules
3 units

CE 223. Airport Planning and Design
Determination and evaluation of requirements including planning, location and design of airports and heliports. Special emphasis on traffic operations and aircraft performance as related to design features such as site selection, configuration, geometric design, terminals, lighting and drainage.
Prerequisite: CE 121.
Normal Grade Rules
3 units

CE 224. Traffic Operations
Flow, density and speed characteristics. Capacity and level of service analysis of transportation facilities with emphasis on highways and streets. Analysis of strategies and tactics, including traffic control, related to optimal use of facilities.
Prerequisite: Instructor consent
Normal Grade Rules
3 units

CE 225. Public Transportation Systems
Performance characteristics of public transportation systems. Planning, design and operational issues related to public transportation systems. Emerging technologies.
Prerequisite: CE 121 or instructor consent.
Normal Grade Rules
3 units

CE 226. Topics in Transportation Engineering
Presentation and discussion of special topics in transportation engineering. Topics may vary each semester. Course may be repeated with instructor consent.
Prerequisite: Graduate standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CE 230. Construction Project Development
Operations required to develop construction projects from the preplanning to the construction stage including feasibility analysis, project development, construction funding, engineering economic analysis, marketing starting a company and other aspects required to develop projects.
Prerequisite: CE 130.
Normal Grade Rules
3 units

CE 231. Construction Estimating and Cost Analysis
Estimating and bid preparation in the construction industry including cost analysis techniques for labor, materials, equipment and overhead costs on a construction project. Development of schedules and networks for construction.
Prerequisite: CE 130 and CE 131.
Repeatable for credit
Normal Grade Rules
3 units

CE 232. Construction Management
Provides a foundation of management skills appropriate for use in the engineering and construction industry such as management functions, time management, motivation, decision-making, conflict resolution, organizational design, leadership and the construction culture.
Normal Grade Rules
3 units

CE 234. Construction Law
Construction contracts and specifications, bid documents, sources of law, agency relationships, contract formation, release of contract, tort law, contract interpretation, changes, mechanics liens, claims and disputes.
Prerequisite: CE 131 (or equivalent).
Normal Grade Rules
3 units
CE 235. Information Systems in Construction Management
Provides knowledge and skills to conceive, plan, organize, develop and implement construction decision support systems; decision and risk analysis techniques, construction computer applications, management information systems and data flow diagrams.
Prerequisite: CE 131, graduate standing or instructor consent.
Normal Grade Rules 3 units

CE 236. Construction Operations Analysis
Overall aspects of productivity improvement for construction operations. Quantitative methods for measuring, analyzing and improving productivity at job sites. Concepts of computer simulation to study, plan and optimize construction operations.
Prerequisite: CE 132 or instructor consent.
Normal Grade Rules 3 units

CE 237. Sustainable Construction
Green construction processes, sustainable construction materials, material recycling and reuse in construction, green construction policy, green building case study, economic analysis of green buildings, and LEED rating systems and certification.
Prerequisite: CE 130 and CE 131, or instructor consent.
Normal Grade Rules 3 units

CE 238. Advanced Construction Project Management
Provides the principles and techniques of construction project management and develops the engineering project management skills necessary to successfully participate in the management of the project delivery process.
Prerequisite: CE 131 or instructor consent.
Normal Grade Rules 3 units

CE 239. Information Technology in Construction
Provides information technology applications in construction, from traditional computer applications to emerging web-based and mobile technologies. Design, development, and implementation of decision support systems for construction management applications.
Prerequisite: CE 131 or instructor consent.
Normal Grade Rules 3 units

CE 240. Advanced Soil Mechanics
Advanced study of classical and modern soil mechanics theories, including: consolidation, stress and deformation, shear strength. In-depth discussion of stress paths, flow nets and stress variants.
Prerequisite: CE 140 (or equivalent).
Normal Grade Rules 3 units

CE 241. Groundwater, Seepage and Drainage Control
Permeability, flow net construction and seepage in soils. Groundwater, filter design, slope drainage, seepage control in earth dams and levees, foundation dewatering and pavement drainage.
Prerequisite: CE 140 (or equivalent).
Normal Grade Rules 3 units

CE 242. Experimental Soil Mechanics
Project-oriented laboratory studies of permeability and seepage, pore pressures, compressibility, expansibility and shear strength. Effects of structure and time. Study of exploration and sampling techniques, in-situ soil tests.
Prerequisite: CE 140 (or equivalent).
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CE 243. Advanced Foundation Design
Advanced analysis of foundation design for atypical soil conditions. Seismic design of foundations. Lateral loaded foundations. Structural design of shallow foundations.
Prerequisite: CE 141 (or equivalent).
Normal Grade Rules 3 units

CE 244. Earth Structures
Analysis and design of structures made of earth. Permeability, shear strength and compressibility of compacted soils. Field observations. Influence of available materials on design and construction.
Prerequisite: CE 140 (or equivalent).
Normal Grade Rules 3 units

CE 245. Geotechnical/Structural Seminar
Meetings for the presentation and discussion of special topics and case histories of significant engineering projects by the faculty, guest lecturers and graduate students. Topics will vary each semester. May be repeated for credit when content changes.
Prerequisite: CE 140 (or equivalent).
Repeatable for credit
Normal Grade Rules 3 units

CE 246. Geotechnical Earthquake Engineering
Wave propagation in soils, seismology, fundamentals of dynamic soil behavior, seismic hazard analysis, site effects, liquefaction, and seismic design.
Prerequisite: CE 140 (or equivalent).
Normal Grade Rules 3 units

CE 247. Earth Retention and Stability
Design of classic retaining walls using lateral earth pressure theory; Slope stability of earthen embankments, cut slopes and natural slopes; Design of modern earth-retention systems, including soil nails, mechanically stabilized earth walls, soil anchors, etc.
Prerequisite: CE 140 or instructor consent.
Normal Grade Rules 3 units

CE 248. Forensic Engineering and Failure Analysis
Analysis of civil engineering failures. Investigation into causes of failure, implications of failure and lessons learned from failure. Legal obligations and responsibilities of ethical engineers.
Prerequisite: Graduate Standing.
Normal Grade Rules 3 units

CE 250. Modeling in Water Resources Engineering
Technical, economic, legal, political, environmental and social factors in decision-making in water project planning and water resources development and management.
Prerequisite: Instructor consent.
Normal Grade Rules 3 units

CE 251. Hydraulics of Open Channels
Conveyance curves, the varied flow equation, specific energy, channel transitions, waves, routing of floods and super-critical flow.
Prerequisite: ME 111; Math 133A or instructor consent.
Normal Grade Rules 3 units

CE 252. Advanced Hydrology
Advanced topics in hydrograph analysis, flood routing, statistical methods and groundwater flow.
Prerequisite: CE 150 and CE 152.
Normal Grade Rules 3 units

CE 253. Advanced Hydraulics
In-depth treatment of hydraulics. Intended to equip the students with the necessary background to pursue more specialized topics in pipe networks and open channels.
Prerequisite: CE 150 or instructor’s consent.
Normal Grade Rules 3 units

CE 254. Water Resources Systems Management
Various modeling techniques for optimal planning and operation of water resources systems, which involve many random variables.
Prerequisite: CE 150 or instructor’s consent.
Normal Grade Rules 3 units
CE 255. Sediment Transport
Introduction to sediment transport; concepts of bedload, suspended load, bed formation, stable channels and regime theory; environmental issues.
Prerequisite: CE 150.
Normal Grade Rules
3 units

CE 256. Sustainable Water Resources Engineering
Water use, water-energy nexus, water excess management, environmental impact assessment, risk-based analysis, and water resources management.
Prerequisite: CE 150 or instructor’s consent.
Normal Grade Rules
3 units

CE 258. GIS Applications in Water Resources Engineering
Geographic Information Systems (GIS) Applications in hydrology and water supply, spatial analysis, Digital Elevation Model (DEM), pre and post processing of hydrologic model.
Prerequisites: CE 150 or instructor consent
Normal Grade Rules
3 units

CE 260. Matrix Analysis of Structures
Linear static and dynamic analysis of structures by matrix methods, including sideways of frames and multistory buildings. Introduction to finite element analysis of structural systems. Discussion of computer-aided design of structures.
Prerequisite: CE 161 (or equivalent).
Normal Grade Rules
3 units

CE 261. Advanced Structural Concrete Design
Design of beams, columns, slabs, walls and connections according to provisions of the American Concrete Institute. Advanced topics in compression elements, shear torsion and development. Elements of bridge and building systems.
Prerequisite: CE 161 and CE 162 (or equivalent).
Normal Grade Rules
3 units

CE 264. Prestressed Concrete Design
Basic concepts and history, pretensioned and post-tensioned systems; prestress losses; cracking and ultimate moments; design of simple spans, continuous spans and slabs; composite beams; tanks.
Prerequisite: CE 161 and CE 162 (or equivalent).
Normal Grade Rules
3 units

CE 265. Advanced Seismic Design
Design of frames, shear walls and other building systems to resist earthquake accelerations. Applications of dynamic analysis. Introduction to performance-based engineering.
Corequisite: CE 212 or instructor consent.
Normal Grade Rules
3 units

CE 267. Advanced Steel Design
LRFD (Load Resistant Design) of steel structures, including buildings and bridges. Detailing of steel frames for seismic resistance. Structural details of connections.
Prerequisite: CE 163 or instructor consent.
Normal Grade Rules
3 units

CE 269. Advanced Topics in Structural Design
Concepts in reinforced masonry, seismic isolation, structural retrofitting, computer aided design and modern construction materials. Topics to be specified at beginning of semester. May be repeated for credit when content changes.
Repeatable for credit
Normal Grade Rules
3 units

CE 270. Environmental Engineering Process Kinetics
Prerequisite: CE 170
Normal Grade Rules
3 units

CE 271. Physical/Chemical Processes in Environmental Pollution Control
Theory, analysis and engineering design of physical and chemical systems in environmental pollution control. Topics include mechanisms involved in physical/chemical destruction of pollutants, clarification, softening, coagulation and others.
Prerequisite: CE 170 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CE 272. Biological Processes in Environmental Pollution Control
Theory, analysis and engineering design of biological systems in environmental pollution control. Topics include mechanism of biological destruction of pollutants, aerobic and anaerobic processes, nutrient removals and others.
Prerequisite: CE 170 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CE 273. Water Treatment and Plant Design
Studies in the theory, design and operation of water treatment facilities. Water quality standards and water quality control.
Prerequisite: CE 170 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CE 274. Wastewater Treatment and Plant Design
Studies in the theory, design and operation of traditional primary and secondary sewage treatment facilities. Review of water pollution control laws and regulations.
Prerequisite: CE 170 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CE 275. Industrial and Hazardous Waste Management and Treatment
Study of industrial and hazardous wastes. Sources, characteristics, management, treatment and disposal. Effects on the environment.
Prerequisite: CE 170 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CE 276. Management and Reuse of Process Solids
Solids production at water and wastewater treatment plants, types, characteristics, processing, management and reuse including biofuel production from wastewater biosolids, and disposal of residual matter.
Prerequisite: CE 271 and CE 272.
Repeatable for credit
Normal Grade Rules
3 units

CE 277. Environmental Sustainability
Studies of various engineering design and practices for sustainable environment.
Prerequisite: CE 170 or Instructor Consent
Normal Grade Rules
3 units

CE 279. Special Topics in Environmental Engineering
Current problems in environmental engineering. Course is repeatable for credit with instructor consent.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
CE 290. Civil Engineering Analysis I
Study of mathematical techniques applicable to a broad range of problems. Included are topics in linear algebraic equations, ordinary differential equations, Fourier series, Bessel functions, Legendre polynomials and partial differential equations.
Prerequisite: MATH 133A.
Normal Grade Rules
3 units

CE 291. Civil Engineering Analysis II
Study of mathematical techniques applicable to a broad range of problems. Included are topics in functions of a complex variable and applications of conformal mapping and vector analysis.
Prerequisite: MATH 133A.
Normal Grade Rules
3 units

CE 292. Civil Engineering Economic Analysis
Principles of project feasibility and benefit analysis. Selected topics from utility and demand theory and from production theory, with applications in civil and environmental engineering. Study of unconstrained and constrained decision models in project planning.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

CE 297. Special Topics in Civil Engineering
Special topics to augment regularly-scheduled graduate courses.
Normal Grade Rules
1-4 units

CE 298. Special Problems
Advanced individual research and projects.
Repeatable for credit
Credit / No Credit
1-6 units

CE 299. Master’s Thesis or Project
Prerequisite: Admission to candidacy for the MS degree.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
College of Engineering Courses

Academic Year 2014-2015
Course Descriptions

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE
**COMMUNICATION STUDIES**

**LOWER DIVISION**

**COMM 010. Communication and Human Relationships**
Course examines role of communication in developing/maintaining human relationships. Discussion focuses on relational communication processes as they occur in various settings, such as the intercultural, the family, the intimate, the organizational, the public and between/within genders.
- Normal Grade Rules
- GE: D1
- 3 units

**COMM 020. Public Speaking**
Principles of rhetoric applied to oral communication; selecting, analyzing, adapting, organizing and delivering ideas effectively.
- Normal Grade Rules
- GE: A1
- 3 units

**COMM 020N. Public Speaking for Nonnative Speakers**
Public speaking for the nonnative speaker. Course content identical to COMM 20 with intercultural emphasis.
- Repeatable for credit
- Normal Grade Rules
- GE: A1
- 3 units

**COMM 021. Performing Culture and Society**
Live performance used as a method for exploring human behavior as it occurs within contemporary cultures and societies. Performance assignments will draw from among the following: performance of texts, street performance, personal narrative, oral history, everyday life, and social justice.
- Normal Grade Rules
- GE: D1
- 3 units

**COMM 040. Argumentation and Advocacy**
Principles of inquiry and advocacy in public discussion and necessary basic skills for intelligent participation in discussion and debate.
- Normal Grade Rules
- GE: A1
- 3 units

**COMM 041. Critical Decision Making**
Critical reasoning and problem solving in group discussion. Examination of the relationship between critical decision-making and group communication. Practice in group problem solving as a means for developing critical thinking skills.
- Normal Grade Rules
- GE: M9
- 3 units

**COMM 045. Communication Criticism**
Application of critical reasoning skills to public communication. Examination of rhetorical and cultural criticism and standards used to evaluate communication in a variety of contexts. Practice in evaluating arguments and becoming critical consumers of public messages.
- Normal Grade Rules
- 3 units

**COMM 060. Verbal Reasoning**
Focus on analysis of propositions, assumptions and issues; uses of deductive and inductive reasoning in ordinary discourse; recognition of formal and informal fallacies of language and thought.
- Normal Grade Rules
- 3 units

**COMM 074. Fundamentals of Intercultural Communication**
Emphasis on direct experience and the development of skill in intercultural communication. Provides opportunity for discussion of variations within and among cultures. Encourages students to examine their own cultural heritage.
Note: All courses with a ‘Q’ suffix are designated as First Year Experience courses.
- Normal Grade Rules
- GE: Z
- 3 units

**COMM 074Q. Fundamentals of Intercultural Communication**
Emphasis on direct experience and the development of skill in intercultural communication. Provides opportunity for discussion of variations within and among cultures. Encourages students to examine their own cultural heritage.
Note: All courses with a ‘Q’ suffix are designated as First Year Experience courses.
- Normal Grade Rules
- GE: Z
- 3 units

**COMM 080. Communication Workshop**
Designed to enhance student personal and professional communication and public speaking skills. Flexible student-directed course requires completion of instructional modules and workshops.
- Repeatable for credit
- Credit / No Credit
- 1 unit

**COMM 091. Activity Project in Forensics: Intramural Debate**
Supervised activity in the forensics program. A: Intramural competition in debate. A total of 3 units applicable to the major may be repeated.
- Repeatable for credit
- Normal Grade Rules
- 1 unit

**COMM 091B. Activity Projects in Forensics: Intramural Platform Speaking**
Supervised activity in the forensics program. B: Intramural Individual events-Platform Speaking including persuasive speaking and communication analysis. A total of 3 units applicable to the major may be repeated.
- Repeatable for credit
- Normal Grade Rules
- 1 unit

**COMM 091J. Judge Training**
Community service course designed to train students to judge high school speech and debate tournaments. Students are taught the rules and given criteria for judging each event in oral interpretation of prose poetry, and drama; platform speaking, debate; and Student Congress. Students are required to write cogent ballots that help competitors.
- Credit / No Credit
- 1 unit

**COMM 100W. Writing Workshop: Writing for Influence**
Current conventions and forms of exposition, argument and persuasion. Writing for the general and specialized audience from the thesis statement approach.
Prerequisite: ENGL 1B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
- Normal Grade Rules
- GE: Z
- 3 units

**COMM 101C. Junior Seminar: Theorizing Communication**
Overview of the contemporary field of communication studies based on survey of theoretical and practical responses to communication problems arising from changing social contexts. Discussion of communication literature, resources and methods of inquiry. Students will begin their major portfolios.
Prerequisite: Completion of GE oral communication.
- Normal Grade Rules
- 4 units
COMM 105P. Communication, Self and Society
Examines the role of communication in the development of the self and the creation of social worlds. Students develop an appreciation for and practical skills in negotiating self-society tensions inherent in a diverse, global, and mediated environment.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 110F. Interpersonal Communication
Integration of theory and practice to facilitate student understanding and skills in evaluating and participating in interpersonal relationships across contexts and the lifespan.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 111P. Interviewing
Setting and achieving communicative goals essential in preparing for and conducting interviews. Special attention on developing effective questions and responses. Participation in a variety of interviews, including employment, appraisal, journalistic, research, survey, health care, and persuasive.
Prerequisite: Completion of the GE oral communication.
Normal Grade Rules
4 units

COMM 114P. Business and Professional Speaking
Application of current theory and research to develop communications skills within larger global and ethical issues across a range of professional and workplace contexts, including interviews, oral reports, persuasive presentations, group meetings, and mediated public speaking.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 115P. Communication and Conflict
Focus on theories of communication as related to interpersonal and group conflict. Development of communication skills in conflict management, and applied activity in interpersonal conflict management.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 116P. Mediation: Theory and Practice
Theoretical background and communication skills training in Mediation Practice. Basic 40 hours of training includes readings, analysis and role plays as well as some observation.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 120P. Persuasive & Presentation Skills
Applies theories, concepts, and research associated with persuasive communication to develop effective presentation skills. Considers broader issues of persuasion and influence at societal and global levels, examining how those issues provide a context for everyday persuasion.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 121P. Performance as Practice
Exploration of performance as a site of communication and embodied practice. Will examine the many ways in which performance exists and operates in our culture with a focus on literature, ethnographic fieldwork, personal narrative, and everyday rituals.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 122P. Performing Studies
Examines the constitutive effects of performance, broadly understood, across a variety of communication contexts. Special attention paid to how performances construct experiences of culture, everyday life, ritual, political protest, social belonging, and identity.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 123P. Performance of Ethnodrama
Explores how live performance can be used to create, interpret, and present arts-based scholarship. Students will read ethnodramatic texts and engage in original research, script writing, rehearsal, and performance. Emphasis is on cross-cultural performances.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 124P. Communication Training and Development
Principles of designing and delivering ethical and socially responsible communication training programs including needs assessment, setting objectives, program design, selection and development of training materials, presentation skills, facilitation skills, and training evaluation.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 125P. Ensemble Performance
Students will collaborate to conceive, write, rehearse, and produce an ensemble project culminating in a public performance. Readings and written work will focus on performance as a community-building process as well as dramaturgical research for the production.
Prerequisites: Completion of A1 of Core GE requirement or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units

COMM 130F. Social Movements Communication
Study of theoretical and historical documents that reveal how social movements and protests have shaped and fueled political and cultural communication both nationally and internationally. Civil rights, women’s liberation, GLBT, environmentalism, labor, global justice, and indigenous movements.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 131P. New Media/You Media
Practical application of current communication theories and research to facilitate skill development in the use and critique of new media tools, such as social networking sites, blogs, microblogs, wikis, personal webpages, video sharing sites, and similar digital communication venues.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 133P. Ethical Problems in Communication
Examines current and historical theoretical approaches to ethical problems across communication contexts, including workplace, interpersonal, and mediated settings. Explores the role of cultural and societal practices in ethical communication.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units
COMM 140P. Argumentation and Debate
Principles of argumentation including analysis of propositions, issues, evidence and reasoning. Training and experience in debate forms.
Prerequisite: Completion of A1 of Core CE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 141P. Small Group Communication
An applied approach to small groups and teamwork that links theory and practice across a variety of contexts. Emphasis on the relationships between group communication and larger cultural issues, such as diversity and democracy.
Prerequisite: Completion of GE oral communication.
Normal Grade Rules
4 units

COMM 144F. Organizational Communication
Communication processes and functions in organizational life. Networks, culture, power, leadership, and ethics. Practical application of organizational communication theories and concepts.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 145I. Rhetorical and Cultural Criticism
Survey of leading theorists, critics and movements in the area of rhetorical and cultural studies. Examines interpretations of speech and discourse as an approach to understanding both real life issues and advanced work in communication studies.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 146F. Communication and the Environment
Examination of communication in environmental issues, especially conflicting values and modes of discourse that assume different meanings of human-nature relationship. Emphasis on environmentalism as popular movement, rhetoric of radical ecology and the technical discourse of environmental policy administration.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 147P. Argumentation and Persuasion in Courts of Law
Principles of legal argumentation, cross-examination, jury selection and strategy. Selected trial transcripts studied to explore differing uses of the trial forum.
Prerequisite: Completion of GE oral communication.
Normal Grade Rules
4 units

COMM 149F. Rhetoric and Public Life
Knowledge of rhetorical theory and practice as they relate to public life, democratic governance and social conflict and consensus from the classical era to contemporary times.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 150I. Inquiry in Organizational Communication
Introduction to research methods commonly used in studies of organizational communication, such as focus group, interviewing, survey, ethnography, appreciative inquiry, and textual analysis.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 151I. New Media/New Methods
Examines the internet and related digital communication systems as both a site of and a tool for communication research. Special attention to legal and ethical concerns associated with communication research in digital environments.
Prerequisite: Upper division standing
Normal Grade Rules
4 units

COMM 152I. Communication in World Cultures
Origins of human communication studies in early societies, including those of China, Egypt, Greece, India, Mesopotamia and Rome. Special attention to the cultural origins of classic texts and significant patterns of communication which continue to inform our contemporary experiences.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 153I. Quantitative Communication Inquiry
Quantitative social scientific approaches to communication facilitate students understanding of the philosophical foundations of quantitative methods and skills in hypothesis testing, research design, data collection, analysis, and interpretation. Methods to be covered include experimental design, survey research and content analysis.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 156I. Observation and Interviewing Methods
Observation and interviewing methods, or qualitative approaches to communication, facilitate student understanding of the philosophical foundations of developing research questions, research design, data collection, analysis and interpretation. Methods covered include ethnography and participant observation, interviewing, focus groups, and action research.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 157. Community Action/Community Service
A campus-wide service learning program with opportunities for direct involvement with local community services, both off campus and on campus. Weekly seminars held on campus or at the field site, plus four to six hours of community service work per week at the field site.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Repeatable for credit
Normal Grade Rules
GE: S 3 units

COMM 157SL. Community Action/Community Service
A campus-wide service learning program with opportunities for direct involvement with local community services, both off campus and on campus. Weekly seminars held on campus or at the field site, plus four to six hours of community service work per week at the field site.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S 3 units

COMM 160F. Language, Meaning and Culture
Course addresses the question of how language, symbols and society work together. Students will learn about the nature of language and how language and symbols shape individual and collective actions.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units
COMM 161F. Communication and Culture
Human communication explored as a mechanism of control and as a vehicle of cultural change. Applies theoretical principles of communication to social issues and communication settings in different cultures.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 164F. Communication and Global Organizations
Examines the relationships among culture, communication, technology, and ways of organizing in various types of global organizations (e.g., nongovernmental organizations, not-for-profits, corporations). Explores the unique communicative processes and ethical issues that arise in international organizing.
Pre/Corequisite: upper division standing.
Normal Grade Rules
4 units

COMM 168A. Global Climate Change I
Scientific and social scientific approaches to the process and effects of global climate change. Climate changes in the Earth’s past, interactions between climate and life, anthropogenic climate change, socioeconomic contexts of environmental effects, cultural influences on climate change mitigation strategies.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
6 units

COMM 168B. Global Climate Change II
Scientific and social scientific approaches to the process and effects of global climate change. Climate changes in the Earth’s past, interactions between climate and life, anthropogenic climate change, socioeconomic contexts of environmental effects, cultural influences on climate change mitigation strategies.
Prerequisites: COMM/ENVS/GEOL/HUM/METR 168A, with a grade of “C” or better (“C-” not accepted); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
3 units

COMM 169I. The Media: Response and Criticism
Examination of media as a locus of meaning making. Critical analysis of communication practices and content in a variety of venues, such as television, film, radio, social networking, and other sites of web-based communication.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 170F. Persuasion
Examines theories, concepts, and research associated with persuasive communication. Considers broader issues of persuasion and ethics at societal and global levels, examining how these issues provide a context for the kinds and contexts of persuasion encountered in everyday life.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 171F. Visual Communication
Examines theories, concepts, and research associated with visual communication. Considers power of imagery to shape conceptions of truth and beauty, impact of image production upon identity and society, and application of architectural imagery to enact and challenge perceptions of place.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 172F. Multicultural Communication in the United States
Analysis of the communication process between and among people in a culturally diverse domestic population (United States). Topics cover speech communication principles, conflict management, language, script analysis, attitudes and values. Includes both theory and activity-based exercises.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 173F. Intercultural Communication and Global Understanding
Analysis of communication among persons from different U.S. and world cultures. Experiences and research in intercultural communication. The influence of varying values, norms, belief structures and roles. Prejudice, ethnocentrism, nationalism and racism in communication.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 174. Intercultural Comm & Struct Inequality
Analysis of intercultural communication in the U.S. as it relates to social inequalities, power differences, and diversity. Examines identities and interactions between people of different racial/ethnic backgrounds. Investigates influence of sociocultural forces on intercultural communication encounters and relationships.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

COMM 175F. Nonverbal Communication
A look at differences between and the interdependency of verbal and nonverbal messages. Students will study the role of nonverbal communication in everyday life.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 176P. Communication and Gender
An analysis of issues and problems related to communication and gender. The course will consider theoretical and practical perspectives on male-female and same-sex interactions in a variety of situations and cultures.
Prerequisite: Completion of A1 of Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 179. Global Media and Resistance
Study of communication issues facing global resistance movements, particularly the role of new technology and social media in public dissent. Covers the application of social movements and resistance theories and concepts. 
Prerequisites: Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Normal Grade Rules
GE: V
3 units

COMM 180. Individual Studies
Supervised study in specific fields of speech not covered by offered courses.
Prerequisite: Department chair consent.
Repeatable for credit
Credit / No Credit
1-3 units
COMM 181F. New Media/New World
Explores the impact of the internet, mobile devices, and other information and communication technologies on social interaction, self-representation, business, politics, and cultural production. Covers the application of mediated communication theories and concepts. Prerequisite: Upper division standing. Normal Grade Rules
4 units

COMM 182P. Communication in the Classroom
Analysis of the classroom as a communication system. Application of communication principles to the facilitation of educational dialogue. Prerequisite: Completion of GE oral communication. Normal Grade Rules
4 units

COMM 184. Directed Reading
Prerequisite: Upper division or graduate standing and department chair approval. A total of 3 units may be repeated. Repeatable for credit Credit / No Credit
1-2 units

COMM 190. Activity Projects in Speech
Supervised activity in communication studies. Application of principles and theories of communication in business, community and professional settings. Prerequisite: Upper division or graduate standing and department chair approval. Repeatable for credit Credit / No Credit
1-6 units

COMM 190I. Activity Proj in Speech International
Supervised activity in communication studies for international students. Application of principles and theory of communication in business, community, and professional settings with specific attention to needs of visiting international students. Prerequisite: Upper division or graduate standing, or department chair approval. Repeatable for credit Normal Grade Rules
1-6 units

COMM 191A. Activity Projects in Forensics
M: Research and oral presentation of appellate court arguments from simulated cases before law judges or in intercollegiate tournaments. A total of 6 units applicable to the major may be repeated. Repeatable for credit Credit / No Credit
1-3 units

COMM 191B. Activity Projects in Forensics
M: Research and oral presentation of appellate court arguments from simulated cases before law judges or in intercollegiate tournaments. A total of 6 units applicable to the major may be repeated. Repeatable for credit Credit / No Credit
1-3 units

COMM 191C. Activity Projects in Forensics
M: Research and oral presentation of appellate court arguments from simulated cases before law judges or in intercollegiate tournaments. A total of 6 units applicable to the major may be repeated. Repeatable for credit Credit / No Credit
1-3 units

COMM 191J. Activity Projects in Forensics
M: Research and oral presentation of appellate court arguments from simulated cases before law judges or in intercollegiate tournaments. A total of 6 units applicable to the major may be repeated. Repeatable for credit Credit / No Credit
1 unit

COMM 191M. Activity Projects in Forensics
M: Research and oral presentation of appellate court arguments from simulated cases before law judges or in intercollegiate tournaments. A total of 6 units applicable to the major may be repeated. Repeatable for credit Credit / No Credit
1 unit

COMM 195. Special Topics in Communication Studies
Investigation of topics not included in regular departmental offerings. Topics range from corporate training to communication in health settings to teaching speech in the high school. Focus varies each semester and is announced in the schedule of classes. Course is repeatable with department chair consent no more than 3 times. Repeatable for credit Normal Grade Rules
1-3 units

COMM 198. Applied Activity in Communication
Practical application of communication theory to real world settings to provide meaningful applied capstone experiences. Students demonstrate proficiency in the critical application of core communication requirements to speech acts and contexts outside the traditional classroom. Prerequisite: COMM 101 or COMM 101C, upper division standing. Repeatable for credit Credit / No Credit
1-2 units
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 199C</td>
<td>Senior Seminar: Synthesis &amp; Application</td>
<td>Capstone overview of the contemporary field of communication studies that builds on theory, concepts, and skills learned in COMM 101C and upper-division major courses. Synthesis and application of communication literature, resources and methods of inquiry. Students complete their major portfolios. Preprerequisite: COMM 101 or COMM 101C; upper division standing. Normal Grade Rules. 4 units.</td>
</tr>
<tr>
<td>COMM 200R</td>
<td>Graduate Study in Communication</td>
<td>History of and current research in the communication field, introduction to humanistic and social science methods and computer applications, theory-building and meta-theoretical issues, reviewing and critiquing studies, preparing research questions/hypotheses and prospectus. Prerequisite: Admission into the Graduate Program, Graduate standing. Normal Grade Rules. 4 units.</td>
</tr>
<tr>
<td>COMM 201</td>
<td>Communication Methodologies</td>
<td>Introduction to the methodologies and methodological considerations pertinent to the field of communication studies, including social scientific, humanist and critical approaches to quantitative, qualitative and rhetorical methods. Prerequisite: Graduate standing or instructor consent. Corequisites: COMM 200R. Normal Grade Rules. 3 units.</td>
</tr>
<tr>
<td>COMM 203</td>
<td>Intro to Communication Research Methods</td>
<td>Introduction to the methodologies and methodological considerations pertinent to the field of communication studies, including reliability, validity, design, and ethics. Prerequisite: Graduate Standing, or instructor consent. Pre/Corequisite: COMM 200R. Normal Grade Rules. 1 unit.</td>
</tr>
<tr>
<td>COMM 204</td>
<td>Introduction to Quantitative Methods</td>
<td>Quantitative social scientific approaches to communication. Facilitate student understanding and practice of methods and skills such as survey research, experiment, content analysis, statistical data analysis. Prerequisite: Graduate standing, or instructor consent. Pre/Corequisites: COMM 200R and COMM 203. Normal Grade Rules. 1 unit.</td>
</tr>
<tr>
<td>COMM 204A</td>
<td>Advanced Quantitative Methods</td>
<td>Advanced quantitative social scientific approaches to communication. Focus on in depth understanding and practice of specific method and its technical application, such as survey research, experiment, content analysis, statistical data analysis. Prerequisite: Graduate standing, or instructor consent. Pre/Corequisites: COMM 200R, COMM 203, and COMM 204. Repeatable for credit. Normal Grade Rules. 1 unit.</td>
</tr>
<tr>
<td>COMM 205</td>
<td>Qualitative Research Methods</td>
<td>Understanding and practice of qualitative approaches to communication research, including ethnography, auto-ethnography, ethnomethodology, focus groups, and interviewing. Prerequisite: Graduate standing, or instructor consent. Pre/Corequisites: COMM 200R and COMM 203. Normal Grade Rules. 1 unit.</td>
</tr>
<tr>
<td>COMM 205A</td>
<td>Advanced Qualitative Methods</td>
<td>Understanding and practice of a specific qualitative communication research method and techniques of application. Individual methods application workshops in ethnography, auto-ethnography, ethnomethodology, focus groups, or interviewing. Prerequisite: Graduate standing, or instructor consent. Pre/Corequisites: COMM 200R, COMM 203, and COMM 205. Repeatable for credit. Normal Grade Rules. 1 unit.</td>
</tr>
<tr>
<td>COMM 206</td>
<td>Intro to Critical &amp; Rhetorical Methods</td>
<td>Understanding and practice of critical and rhetorical approaches to communication research. Facilitate student understanding and practice of methods and skills associated with areas such as performance studies, rhetorical criticism, and cultural studies. Prerequisite: Graduate standing, or instructor consent. Pre/Corequisites: COMM 200R and COMM 203. Normal Grade Rules. 1 unit.</td>
</tr>
<tr>
<td>COMM 206A</td>
<td>Advanced Critical &amp; Rhetorical Methods</td>
<td>Advanced understanding and practice of a specific critical or rhetorical method and technique of application. Focused methods workshops in performance studies, rhetorical criticism, or cultural studies. Prerequisite: Graduate standing, or instructor consent. Pre/Corequisites: COMM 200R, COMM 203, and COMM 206. Repeatable for credit. Normal Grade Rules. 1 unit.</td>
</tr>
<tr>
<td>COMM 210R</td>
<td>Seminar in Interpersonal Communication</td>
<td>Examination of the role of communication in creating and maintaining social relationships. Drawss on interpretive, critical, and/or quantitative theories and methods for investigating relationships in different cultural contexts and across the life span. Prerequisite: Graduate standing. Normal Grade Rules 4 units.</td>
</tr>
<tr>
<td>COMM 231R</td>
<td>Performing Presentational Aesthetics</td>
<td>Explores the practice and theory of presentational aesthetics through performance. Students will acquire the skills of writing, adapting, directing, and presenting performances of literary texts, ethnographic interviews, and social activism. Required of graduate students who wish to do thesis performances. Prerequisite: Graduate standing, or instructor consent. Normal Grade Rules 4 units.</td>
</tr>
<tr>
<td>COMM 232R</td>
<td>Seminar in Performance and Culture</td>
<td>Explores cultural identity as constructed, contested, and displayed through acts of performance such as theatre, dance, storytelling, performance art, film, literature, and everyday behavior. Focuses on performance as a site of cultural manifestation and transformation. Normal Grade Rules 4 units.</td>
</tr>
<tr>
<td>COMM 240R</td>
<td>Seminar in Argument and Debate</td>
<td>Advanced study of patterns, techniques, and theory of argumentation and advocacy as reflected in debates on significant issues in a variety of contemporary and historical settings. Prerequisite: Graduate standing. Normal Grade Rules 4 units.</td>
</tr>
<tr>
<td>COMM 241R</td>
<td>Seminar in Small Group Communication</td>
<td>Exploration of group process and structure. Special attention given to democratic process, effective group decision-making, team-building concerns, group leadership, the distinctive place of communication research in small group studies. Prerequisite: Graduate standing. Normal Grade Rules 4 units.</td>
</tr>
</tbody>
</table>
COMM 244R. Seminar in Organizational Communication
Examination of internal communication processes in large organizations. Emphasis on information flow, communication networks, communication relations and the design and management of communication systems. Experience in gathering and analyzing data to monitor and assess a communication system. Prerequisite: Graduate standing. Notes: MBA recommended elective. Normal Grade Rules 4 units

COMM 245R. Seminar in Communication Criticism
Theories guiding critical evaluation of messages communicated in a variety of media, from oral to digital. Emphasis on the historical, political, and social contexts where such messages are designed, transmitted, interpreted, and used. Prerequisite: Graduate standing. Repeatable for credit Normal Grade Rules 4 units

COMM 249R. Seminar in the Philosophy of Communication
Study of philosophical models of communication, their foundations, insights, and implications for social practice. Prerequisite: Graduate standing, or instructor consent. Normal Grade Rules 4 units

COMM 250R. Seminar in Communication Theory: Critical and Interpretive
Major theorists and theories of communication in the rhetorical, historical, critical, empirical, and philosophical traditions. Prerequisite: Graduate standing. Pre/Corequisite: COMM 200R. Normal Grade Rules 4 units

COMM 255R. Seminar in Communication Theory
Review and evaluation of communication theories and research, past and present. Examination of methods of theory construction and scholarly inquiry. Experience in applying theory to designing and conducting communication research. Prerequisite: Graduate standing, or instructor consent. Normal Grade Rules 4 units

COMM 260R. Seminar in Language and Social Interaction
Study of how language, politics, and diverse cultures interrelate. Examines language use in interpersonal, intercultural, organizational, mass media, and online contexts. Prerequisite: Graduate standing. Pre/Corequisite: COMM 200R. Normal Grade Rules 4 units

COMM 265. Seminar in Crisis Communication
Role of public communication in crisis situations, types of crisis, pre- and post-crisis planning, crisis communication management, risk communication, crisis narratives and rhetoric, ethical obligations of crisis communication, dealing with media, image restoration. Independent research project required. Prerequisite: Classified Graduate Standing or instructor consent. Normal Grade Rules 3 units

COMM 269R. Seminar in Contemporary Communication
Advanced analysis of recent developments and trends in communication. Topics include globalization, symbolic power and creativity, media and information technology, and formation of cultural styles and identities. Prerequisite: Admission into the Graduate Program, Graduate standing. Normal Grade Rules 4 units

COMM 270R. Seminar in Social Influence
Advanced study of social and cultural influences on the formation of attitudes about contemporary life, both private and public. Draws upon historical, political, interpretive, and quantitative studies of the covert and overt forms of persuasion. Prerequisite: Graduate standing. Normal Grade Rules 4 units

COMM 274R. Seminar in Intercultural Communication
Advanced study of the theories, perspectives, and processes that affect intercultural communication among diverse cultural groups in the world. Prerequisite: Graduate standing. Pre/Corequisite: COMM 200R. Normal Grade Rules 4 units

COMM 280. Independent Study
Supervised and specialized study in specific fields of communication not covered by offered courses or that extends beyond what can be covered in an offered course. Prerequisite: Department Chair consent Repeatable for credit Mandatory CR/NC/PR 1-3 units

COMM 282R. Seminar in Communication Pedagogy
Investigation and analysis of the intersections of communication and instruction, including communication education, instructional communication, and critical communication pedagogy. Prerequisite: Graduate standing, or instructor consent. Normal Grade Rules 4 units

COMM 285A. Teaching Associate Practicum I
Instruction and supervised experience in teaching university level courses in Communication Studies. Topics include curriculum design, instructional objectives and activities and assessment. Prerequisite: Appointment as Departmental Teaching Associate, or instructor consent. Credit / No Credit 2 units

COMM 285B. Teaching Associate Practicum II
Instruction and supervised experience in teaching university level courses in Communication Studies. In addition to advanced discussion of topics from 285A, topics will include theories of teaching and learning, identity, culture and power. Prerequisites: Appointment as Departmental Teaching Associate and COMM 285A, or instructor consent. Repeatable for credit Credit / No Credit 1-3 units

COMM 291. Communication Studies Graduate Internship Program
Practical application of communication theory and research methods to real world settings to provide applied capstone experiences. Students demonstrate proficiency in the critical application of core communication requirements to speech acts in engaged and applied settings outside the traditional classroom. Prerequisite: Graduate Standing, Permission of Director Repeatable for credit Credit / No Credit 1-4 units

COMM 294. Comprehensive Graduate Exam
Comprehensive exam in communication theory, communication studies research methods, and special topics relevant to the student’s program of study. Prerequisite: COMM 200R; completion of at least 18 units of graduate coursework. Credit / No Credit 2 units

COMM 295R. Special Topics in Communication
Advanced consideration of selected topics in communication research and theory with emphasis on current literature. The topic will vary from term to term. Course may be repeated with instructor and advisor consent. Repeatable for credit Normal Grade Rules 4 units
COMM 297. Advanced Writing Workshop
Advanced graduate level writing instruction in preparation for the culminating experience.
Prerequisite: Graduate standing or instructor consent.
Pre/Corequisite: COMM 200R.
Repeatable for credit
Normal Grade Rules
2 units
COMM 298. Master’s Project
Supervised project work in the field of Communication Studies.
Prerequisites: Admission to candidacy for the master’s degree, completion of core requirements and instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units
COMM 299. Master’s Thesis
Supervised thesis work in the field of Communication Studies.
Prerequisites: Admission to candidacy for the master’s degree, completion of core requirements and instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

SPEECH EDUCATION

UPPER DIVISION
SPED 184Y. Student Teaching II - Classroom Teaching
Minimum 80-120 class periods of classroom, teaching laboratory or field teaching in appropriate single subjects, grades K-12 and related teaching activities/seminar.
Prerequisite: Joint approval of major and Education departments.
Repeatable for credit
Credit / No Credit
4-6 units
SPED 184Z. Student Teaching III - Classroom Teaching
Notes: May be in different subject/school and will be at a different grade level.
See SPED 184Y.
Repeatable for credit
Credit / No Credit
4-6 units

GRADUATE
SPED 242C. Educational Internship in Teaching
Designed to provide opportunity for supervised teaching on either the elementary or secondary school level on the basis of a special provisional credential.
Prerequisite: Matriculation as a Graduate student
Repeatable for credit
Credit / No Credit
4-6 units
SPED 257. Supervised Student Teaching in the Community College
Prerequisite: Permission of the instructor.
Credit / No Credit
4 units
SPED 382. Drama and Speech - Communication Curricula and Techniques
Content, bibliography, materials and methods in drama and speech-communication education.
Prerequisite: Joint approval of major and Education departments.
Normal Grade Rules
3 units
Computer Engineering Courses

COMPUTER ENGINEERING

LOWER DIVISION

CMPE 025. The Digital World and Society
The secure, effective and ethical use of information technology. The effect of such technology on people and institutions. Technology-related challenges to society and policy. Frameworks for the analysis of information technology with respect to its cultural, historical, environmental, and spatial contexts.

Prerequisites: ENGR 010
Corequisites: MATH 030 or equivalent. MATH 071 for BSIT and BS Aviation majors.

CMPE 030. Programming Concepts and Methodology
Introduction to programming; overview of computer organization and introduction to software engineering. Topics include methodologies for program design, development, style, testing, and documentation; algorithms, control structures, functions, and elementary data structures.

CMPE 046. Computer Engineering I
Introduction to computing and computer engineering; problem solving with structured and object-oriented programming using the C++ language.

CMPE 050. Object-Oriented Concepts and Methodology
Application of object-oriented software engineering techniques to the design and development of larger programs; data abstraction, structures, classes and associated algorithms.

CMPE 101. Programming Concepts and Problem Solving
Develop skills and proficiency in the design and implementation of solutions to computer engineering problems using structured and object-oriented programming techniques using the C++ programming language.

CMPE 102. Fundamentals of Embedded Software
Assembly programming; assembly-C interface; CPU and memory organization; addressing modes; arithmetic, logic and branch instructions; arrays, pointers, subroutines, stack and procedure calls; software interrupts; multiplication, division and floating point arithmetic.

CMPE 104. Fundamentals of Software Engineering

CMPE 110. Electronics for Embedded Systems
RC, RL and RLC circuit analysis, diodes and diode circuits, MOSFET and bipolar transistor I-V characteristics and circuits, TTL and CMOS logic circuits, CMOS-TTL interface, sensors and signal conditioning circuits using operational amplifiers, A/D and D/A converters, electromechanical device control.

CMPE 120. Computer Organization and Architecture
Introduction to computer organization and architecture, system buses, internal memory and external memory, input/output, central processing unit CPU, instruction sets, CPU structure and function, RISC, control unit. Develop an understanding of computer systems and the hardware resources they provide.

CMPE 124. Digital Design I
Combinational and sequential logic theory and circuits. Emphasis on mixed logic and algorithmic state machines. Design projects using standard integrated circuit packages.

CMPE 125. Digital Design II
Digital system building blocks, data path and control units, system-level RTL design, Verilog HDL for design and verification, contemporary design flow and methodology, lab experiments using industry standard CAD tools and field programmable gate array (FPGA) devices.

CMPE 126. Algorithms and Data Structure Design
Object-oriented data organization and representation as strings, arrays, stacks, queues, dequesues, lists, sets, trees, tables, and graphs. Sorting and searching and algorithm design and performance analysis. Testing methods and data will be discussed.

CMPE 130. Advanced Algorithm Design
Advanced data structures and algorithms. Advanced tree structures, hashing, searching and sorting. Divide-and-conquer, greedy and dynamic programming algorithm design techniques.

UPPER DIVISION

CMPE 127. Microprocessor Design I
Microprocessor architecture and assembly language. Design of peripheral blocks and their interfaces to the microprocessor. Design projects using standard integrated circuit packages.

CMPE 130. Advanced Algorithm Design
Design and analysis of data structures and algorithms. Advanced tree structures, hashing, searching and sorting. Divide-and-conquer, greedy and dynamic programming algorithm design techniques.

normal grade rules

RETURN TO LAST PAGE

DESCRIPTION CONTENTS
CMPE 131. Software Engineering I
Why software engineering? What is software engineering? Software development lifecycle activities: project planning and management requirements analysis, requirement specification, software design, software testing, verification, validation, and documentation. Software quality assurance and review techniques, software maintenance, team-based projects. Prerequisite: For CMPE Major: CMPE126 with a grade of "C-" or better. For SE Majors: CS 046B with a grade of "C-" or better. Normal Grade Rules 3 units

CMPE 132. Information Security
A study of computer and network security from centralized systems to distributed networks. Cryptology, vulnerabilities and controls. Firewalls, privacy enhanced e-mail, viruses and worms. Case studies will be featured. Prerequisite: CMPE 126. Normal Grade Rules 3 units

CMPE 133. Software Engineering II
Software Architecture, Software Technical Metrics, evaluating products, processes, and resources, improving predictions, products, processes, and resources. Advanced topics such as: Formal Methods, Software Reuse, Reengineering, Client/Server Software Engineering, Computer-Aided Software Engineering, Team-Based Projects. Prerequisite: CMPE 131 (with a grade of "C-" or better). Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules 3 units

CMPE 135. Object-Oriented Analysis and Design
Feasibility analysis and system requirements determination, object-oriented design methodology, and information systems design using object-oriented modeling techniques. Emphasis on both theoretical and practical aspects of object-oriented systems analysis and design. Team-based design project. Prerequisite: For SE Majors: CS 046B or for others CMPE 126. Normal Grade Rules 3 units

CMPE 136. Information Engineering
Major topics include computer-based information systems, electronic commerce, database management, network management, mobile computing, reengineering concepts, virtual office, knowledge-base systems artificial intelligence, expert systems, Computer-Aided Software/Systems Engineering (CASE). Prerequisite: ENGR 100W (with a grade of "C-" or better), CMPE 131, CMPE 135. Normal Grade Rules 3 units

CMPE 137. Wireless Mobile Software Engineering
Mobility analysis, design principles, techniques, and methods for software systems on a variety of wireless and mobile Internet based computing and communication platforms, such as advanced pocket/tablet PC, GPS, Bluetooth, Infrared, Wi-Fi, and RFID. Design multidisciplined mobile project. Prerequisite: CMPE 131. Normal Grade Rules 3 units

CMPE 138. Database Systems I
File organization and storage structure, database system architecture, entity relationship model, normalization techniques, SQL, relational algebra, storage organization, query processing, and concurrency control. Prerequisite: CMPE 126 (with a grade of "C-" or better). Normal Grade Rules 3 units

CMPE 139. Fundamentals of Data Mining
Introduction to data management and data mining, data preprocessing, OLAP and data warehousing, frequent pattern mining and association rules, clustering, classification, web mining, web search, recommender systems, social network analysis. Pre-requisites: CMPE 126 or CS 146 (with C- or better). Normal Grade Rules 3 units

CMPE 140. Computer Architecture and Design
Pipelining and timing issues in CPU data-paths. Principles of RISC-type CPU instruction set and architecture. Structural, data and control hazards in a RISC processor, forwarding loops, branch mechanisms. Memory architectures in CPUs such as register files and caches. Prerequisite: CMPE 125 (with grade of "C-" or better) and ENGR 100W (with a grade of "C-" or better). Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules 3 units

CMPE 142. Operating Systems Design
Overview: history, concepts, system calls and structures. Management of major components: processes, memory, input/output and files. Design of system calls and device drivers for hardware dependence. Concepts of kernel and shell, file protection and interactive computation. Prerequisite: CMPE 102, CMPE 126 (all with grades of "C-" or better). Corequisite: CMPE 130 (with grades of "C-" or better). Normal Grade Rules 3 units

CMPE 143. Microcomputer Design
Microcomputer architecture using modern microprocessors and related integrated circuits: clock subsystem, BUS drivers, map decoders, R/W memory, ROM, serial and parallel I/O, DMA, interrupt. Prerequisite: CMPE 127 (with a grade of "C-" or better). Misc/Lab: Lecture 2 hours/lab 3 hours. Notes: Offered only occasionally. Normal Grade Rules 3 units

CMPE 144. Real-Time Embedded System Co-Design
Embedded system architecture with real-time operating system including microcontrollers, interfacing techniques for industrial applications using transducers, sensors, and A/D-D/A converters. Hardware/software integration and code. Prerequisite: CMPE 127 with grade of "C-" or better. Misc/Lab: Lecture 2 hrs/lab 3 hrs. Normal Grade Rules 3 units

CMPE 145. Fundamentals of System on Chip (SoC) Design
Review of system timing for pipelined structures. ARM processor and its Advanced Microprocessor Bus Architecture (AMBA) protocol. The fundamentals of SRAM, SDRAM and E2PROM and their interfaces with AMBA. Direct Memory Access (DMA) design and its interface with AMBA. Verilog skills are required for the labs. Prerequisite: CMPE 125 and CMPE 127 (both with grades of "C-" or better). Misc/Lab: 2 hours seminar/3 hours lab. Normal Grade Rules 3 units

CMPE 146. Computer Networks I
Comparative evaluation of network architecture, layering model, standards, protocol examples for ISO and TCP/IP layers. Network applications, transport layer protocols, Internet routing, data link and physical transmissions. Applications in world wide web, file transfer, electronic mail, peer-to-peer and other areas. Prerequisite: CMPE 050 or CS 046B, and ISE 130 or MATH 161A. Normal Grade Rules 3 units

CMPE 147. Computer Networks II
Protocol design and simulation in local and metropolitan area networks. Prerequisite: CMPE 148. Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules 3 units
CMPE 152. Compiler Design
Principles of lexical analysis, finite state automata and parsing; issues of variable declarations, variable types, control statements, function calls, nested scopes and efficient assembler target code.
Prerequisite: CMPE 126, CMPE 102 (both with grade of "C-" or better).
Miss/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

CMPE 163. Computer Graphics Program Design
Prerequisite: CMPE 050; CMPE 125; ENGR 100W; MATH 123 or MATH 129A or EE 112.
Normal Grade Rules
3 units

CMPE 164. Wireless Networks Architecture and Design
Wireless Network Design and Architecture, including the communication theory, communication protocols, wireless processors and system level design, based band encoding and communications, Ir/RF communications, error correction coding, and system level implementation.
Prerequisite: CMPE 127 and CMPE 140.
Normal Grade Rules
3 units

CMPE 165. Software Engineering Process Management
Integrated approach to managing development within small teams, including mission statement, synthesis of design concepts, tradeoff studies, risk assessment and the interactions encountered in the optimal design, development, manufacture and test of systems.
Prerequisite: CMPE 133.
Normal Grade Rules
3 units

CMPE 168. Software Design Studio I
Advanced software requirements elicitation, analysis and documentation. Software architectural design. Software team process infrastructure. Technical management of software development teams and resource estimation to support appropriate levels of quality. Quality assurance planning and execution.
Prerequisite: CMPE 133, CMPE 104, CMPE 138, CS 146, CS 157A or instructor consent.
Co-requisite: CMPE 195A.
Miss/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

CMPE 172. Enterprise Software Platforms
Introduction to enterprise software systems. Covers network operating systems, DBMS, transaction monitors, groupware, distributed objects, system management and the Web. Covers standards such as J2EE, CORBA, SQL, JDBC, and HTTP; and emerging software technologies.
Prerequisite: CMPE 142 or CS 149 with grade of "C-" or better.
Normal Grade Rules
3 units

CMPE 179. Digital Design Using Hardware Description Languages
See EE 179.
Repeatability for credit
Normal Grade Rules
3 units

CMPE 180. Individual Studies
Individual work in computer engineering.
Prerequisite: Upper division standing and instructor consent.
Repeatability for credit
Credit/No Credit
1-3 units

CMPE 187. Software Quality Engineering
Software testing and quality assurance engineering concepts, processes, models, criteria, and methods. Software unit testing, integration, function validation, system performance and reliability evaluation; Software security testing methods and tools; software quality management, control systems, standards, and evaluation metrics.
Prerequisite: CMPE 131
Normal Grade Rules
3 units

CMPE 188. Machine Learning for Big Data
Introduction to machine learning and pattern recognition for big data analytics; machine learning concepts, theories, approaches, algorithms, and big data analytic applications; supervised learning unsupervised learning and learning theory.
Pre-requisite: CMPE 139
Normal Grade Rules
3 units

CMPE 189. Special Topics in Computer Engineering
Advanced topics in Computer Engineering. Content varies from semester to semester.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

CMPE 195A. Senior Design Project I
Comprehensive plan and preliminary design of a group computer/software engineering project; integration of knowledge in science, technologies and team processes; group written report and oral presentation; global and social issues in engineering; individual professional development plans.
Corequisite: ENGR 195A
Prerequisite: For CMPE Majors: CMPE 125; CMPE 127; CMPE 130; CMPE 131; ISE 130; ENGR 100W (all with a grade of "C-" or better); in good standing in the major; minor form on file.
For SE Majors: CMPE 131, ISE 130 or MATH 161A (all with a grade of "C-" or better). CS 100W or ENGR 100W (with a grade of "C-" or better); in good standing in the major; major form on file.
Normal Grade Rules
2 units

CMPE 195B. Senior Design Project II
Implementation of group design project initiated in CMPE 195A; group oral presentation and written report; integrated global and social issues in engineering.
Prerequisite: CMPE 195A (with grade of "C-" or better).
Corequisite: ENGR 195B
Miss/Lab: Lab 9 hours.
Normal Grade Rules
3 units

CMPE 195C. Interdisciplinary Senior Project I
See ENGR 195C.
Normal Grade Rules
3 units

CMPE 195D. Interdisciplinary Senior Project II
See ENGR 195D.
Normal Grade Rules
3 units

CMPE 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

CMPE 198. Technology and Civilization
See TECH 198.
Normal Grade Rules
3 units

GRADUATE

CMPE 200. Computer Architecture
Computer design overview; processor instruction set architecture and microarchitecture, instruction-level parallelism, memory hierarchy, storage and I/O systems, multithread/multiprocessor and data/thread-level parallelism, introduction to parallel programming.
Prerequisite: Classified graduate standing or graduate advisor consent.
Normal Grade Rules
3 units
CMPE 202. Software Systems Engineering
Integrated approach to software design and development including requirements elicitation and analysis, system design and construction through studying multiple facets of software development processes, design methodologies, modeling approaches, and implementation techniques.
Prerequisite: Classified graduate standing or instructor consent.
Misc/Lab: Lecture 3 hours.
Normal Grade Rules
3 units

CMPE 203. Software Engineering Management
Development of software systems from the perspective of project management within the dynamic and complex nature of software technologies and environments; development lifecycle, communications, team dynamics, planning, estimation, scheduling, risk analysis, metrics tracking, problem management, and configuration management.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

CMPE 206. Computer Network Design
Prerequisite: Classified graduate standing or instructor consent.
Normal Grade Rules
3 units

CMPE 207. Network Programming and Application
Prerequisite: CMPE 206, or instructor consent.
Normal Grade Rules
3 units

CMPE 208. Network Architecture and Protocols
In-depth study of the principles and architecture of Internet protocols in current practice. Analysis of protocols of network, transport, and application layers. Topics will also cover emerging network architecture and protocols. Network analysis project.
Prerequisite: CMPE 206 or instructor consent.
Normal Grade Rules
3 units

CMPE 209. Network Security
Network security protocols and applications, cryptography algorithms, authentication systems, intrusion detection, network attacks and defenses, system-level security issues, and how to build secure systems.
Prerequisite: CMPE 206 or EE 281.
Normal Grade Rules
3 units

CMPE 212. Computer System Design with SoC Approach
System-on-Chip technology overview, on-chip bus protocol, bus interface design, IP design and in-system verification, SoC system functional verification environment, SoC system integration and verification. Student must be fluent with Verilog HDL.
Prerequisite: CMPE 200 and CMPE 264 or instructor consent.
Normal Grade Rules
3 units

CMPE 213. Parallel Processing
Parallel processing hardware, software, and applications. State-of-the-art description of parallel architectures, communication operations, parallel programming models, parallel algorithms, and performance analysis.
Prerequisite: Classified graduate standing or instructor consent.
Normal Grade Rules
3 units

CMPE 217. Human Computer Interaction
See ISE 217.
Normal Grade Rules
3 units

CMPE 219. HCI for Cyber Security
See ISE 219.
Normal Grade Rules
3 units

CMPE 220. System Software
System software overview, assemblers, macro-assemblers, loaders and linkers, compilers and operating systems. Design project.
Prerequisite: Classified graduate standing or graduate advisor consent.
Normal Grade Rules
3 units

CMPE 221. SOA Analysis and Design
Service-oriented software development processes; service modeling, service-oriented analysis and design, service-oriented architecture (SOA) platforms and standards, SOA and Web services, software development tools, and group design projects.
Prerequisite: CMPE 275 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CMPE 225. Operating System Design
Theory of operating systems: concepts, system calls, O/S structures, process management, input/output, memory management and file systems. Application of theory to a real operating system.
Prerequisite: CMPE 142.
Normal Grade Rules
3 units

CMPE 226. Database Systems
Database architectures, technologies, and practices for enterprise systems that use structured, semi-structured, and unstructured data. Provides opportunities to research and acquire experience using modern and emerging concepts in relational and non-relational database theory and technologies.
Prerequisite: CMPE 272 or instructor consent.
Normal Grade Rules
3 units

CMPE 227. Distributed Systems
Motivation for distributed systems, communications issues in distributed computing, design issues and alternative computing models.
Prerequisite: CMPE 220.
Normal Grade Rules
3 units

CMPE 228. Component-Based and Reuse-Driven Software Engineering
Advanced topics in industrial object-oriented and reuse-driven software engineering, processes, software architecture, architectural style, organizing a reuse business, and industrial examples of systematic large-scale software reuse. Team-based projects.
Prerequisite: ENGR 200W, CMPE 220, CMPE 221, CMPE 271 or instructor consent.
Normal Grade Rules
3 units

CMPE 231. Multimedia Systems Design
Multimedia software systems concepts and architecture. Topics include multimedia retrieval, representations, multimedia databases, geographic information systems. R-tree, video databases, and multimedia operating systems. Design of high performance media servers.
Prerequisite: CMPE 142 and CMPE 220 or instructor consent.
Normal Grade Rules
3 units
CMPE 235. Mobile Software System Design
Study of wireless-based software systems in design and engineering, underlying networks, infrastructures and frameworks, wireless security, mobile user security & privacy (e.g. biometric security), emergent mobile programming platforms and technologies (such as RFID/Barcode/NFC), mobile commerce and service application systems.
Prerequisite: CMPE 220 or CMPE 202 or instructor consent.
Normal Grade Rules
3 units

CMPE 236. Mobile Web Application Systems
Mobile web system concepts, technology, architectures, security, design methods, validation techniques, mobile platforms and enabled technologies, mobile cloud, database and access services, mobile app development and platform solutions.
Prerequisite: CMPE 202 or instructor consent.
Normal Grade Rules
3 units

CMPE 237. Design of E-Commerce Systems
Current e-commerce concepts, business models, electronic transaction processing, e-commerce security problems and solutions, e-commerce systems and components, electronic auctions and negotiation, trading methods, business framework for e-commerce applications, and web advertising and marketing.
Prerequisite: CMPE 271 and CMPE 220 or CMPE 202.
Normal Grade Rules
3 units

CMPE 238. Agent-Oriented Enterprise Software Engineering
Key concepts of agent-oriented enterprise software engineering, agent technologies, multi-agent systems, software agents and workflows for enterprise application system engineering. Industrial examples: Team-based projects.
Prerequisite: ENGR 200W, CMPE 220, CMPE 221, or instructor consent.
Normal Grade Rules
3 units

CMPE 239. Web and Data Mining
Data mining and Web mining, data preprocessing, association rules and sequential patterns, classification, clustering, Web crawling, information retrieval and search engines, social network analysis, link analysis, ranking, Web usage mining, Web personalization and recommender systems, advanced topics.
Prerequisites: CMPE 272 or instructor consent.
Normal Grade Rules
3 units

CMPE 240. Advanced Computer Design
Architecture of a computing system including system bus, memory subsystems and peripherals. Unidirectional and bidirectional bus architectures. SRAM, SDRAM and FLASH memories. Design of DMA, interrupt controller, transmitter/receiver, timer, display adapter, A/D and D/A converters and other system peripherals. Design of memory and peripheral bus interfaces.
Prerequisite: CMPE 127 or instructor consent.
Normal Grade Rules
3 units

CMPE 241. Embedded System Development Tools
Advanced topics dealing with embedded system development software tools, including system monitors, macro assemblers, in-circuit emulators, simulators, cross compilers, cross assemblers and interpreters.
Prerequisite: CMPE 240 or instructor consent.
Normal Grade Rules
3 units

CMPE 242. Embedded Hardware Design
Advanced topics dealing with microprocessor and microcontroller hardware and firmware including processor architecture, advanced memory and I/O systems design, multilevel bus architecture, interrupt systems. Design project.
Prerequisite: CMPE 240 or instructor consent.
Normal Grade Rules
3 units

CMPE 243. Embedded Systems Applications
Embedded system interfacing techniques; peripheral devices; discussion of industrial, telecommunication, automotive, medical, and consumer applications of embedded systems. Design project.
Prerequisite: CMPE 242 or instructor consent.
Normal Grade Rules
3 units

CMPE 244. Embedded Software
Experiments dealing with advanced embedded software programming concepts, interfacing techniques, hardware organization and software development using an embedded systems. Individual projects.
Prerequisite: CMPE 200, CMPE 220 or instructor consent.
Normal Grade Rules
3 units

CMPE 245. Embedded Wireless Architecture
Embedded Wireless architecture with basic communication protocols, hands on labs with state of the art embedded system development tools.
Prerequisites: CMPE 240 or instructor consent.
Normal Grade Rules
3 units

CMPE 250. Computerized Robots
Prerequisite: Classified standing or instructor consent.
Normal Grade Rules
3 units

CMPE 251. Software Techniques in Robotics
Discussion of software methods in robotics, robot programming languages, robot architecture and operating systems, robot interfacing and robot task software. Extensive software projects dealing with robots.
Prerequisite: CMPE 250 or instructor consent.
Normal Grade Rules
3 units

CMPE 261. Real Time Computer Systems
Applications of real time computer systems in different fields; characteristics, hardware and software aspects of real time systems; design of real time systems; application programs, files, databases and operating systems for real time systems; testing and debugging of real time systems.
Prerequisite: CMPE 240.
Normal Grade Rules
3 units

CMPE 262. Embedded Multimedia Architecture
Embedded RISC architecture for portable video, graphics processing engine, 2D/3D graphics module development, texture mapping, animation, H264 implementation, streaming and delivery, embedded multimedia servers, Linux OS and Web technology for web based multimedia applications are investigated.
Pre/Corequisite: CMPE 242.
Normal Grade Rules
3 units

CMPE 264. Advanced Digital and Computing System Design
Advanced topics in register-transfer-level design of complex digital functional blocks, application-specific instruction set processors, and system-level integration/ validation using Verilog/VHDL/C-level hardware description languages.
Prerequisite: CMPE 200 or instructor consent.
Normal Grade Rules
3 units

CMPE 265. High Speed Digital System Design
Introduction to high speed interface design techniques and analyzing high speed circuits utilizing latest modeling and simulation tools to provide necessary knowledge for the printed circuit board layout.
Prerequisite: CMPE 200 or instructor consent.
Normal Grade Rules
3 units
CMPE 270. Information Engineering
See ISE 270.
Normal Grade Rules
3 units

CMPE 271. Advanced Java Programming
Language, environment tools for Mobile Object Application Construction, object-oriented software engineering principles and practices highlighting mobile objects design and performance; laboratory applications and applets with Java IDE.
Prerequisite: High-level language.
Misc/Lab: Lecture 3 hours.
Normal Grade Rules
3 units

CMPE 272. Enterprise Software Platforms
Enterprise software, system and virtualized platforms. Covers OSs, NOS, security, databases (OLTP, Big Data, Analytics), transactions, groupware, components, web services, web, systems management and app development.
Covers standards and emerging technologies.
Prerequisite: Classified graduate standing or instructor consent.
Normal Grade Rules
3 units

CMPE 273. Enterprise Distributed Systems
Introduction to application protocols for large scale distributed systems including object request brokers, asynchronous messaging, and Web services. Lab is based on using protocols to build distributed systems.
Prerequisites: Java programming or instructor consent.
Corequisites: CMPE 272
Normal Grade Rules
3 units

CMPE 274. Business Intelligence Technologies
This course covers technologies that are key to delivering business intelligence to an enterprise. The goal of business intelligence is to analyze and mine business data to understand and improve business performance by transforming business data into information into knowledge.
Prerequisite: CMPE 272 or instructor consent.
Normal Grade Rules
3 units

CMPE 275. Enterprise Application Development
Distributed component design, scalability, messaging, and integration practices for modern and emerging architectures and technologies.
Prerequisite: CMPE 273 or instructor consent.
Normal Grade Rules
3 units

CMPE 276. XML for E-Business
XML technologies for enabling e-business. Covers XML, (Namespaces), DTD, XML Schema, (DTD and XSD), XML APIs (SAX and DOM) XML languages (XPath, XPointer, and XSLT), and XML databases (XQuery). Lab is based on Xerces/Xalan, DTC/XSD, SAX/DOM, and XSLT.
Prerequisite: CMPE 273
Corequisite: CMPE 275 or instructor consent.
Normal Grade Rules
3 units

CMPE 277. Smartphone Application Development
Architectures, technologies, and programming concepts for developing smartphone applications. Covers current smartphone/tablet OSs, application development, and deployment environments.
Prerequisites: Classified graduate standing or instructor consent.
Normal Grade Rules
3 units

CMPE 278. Advanced Enterprise Components
Server-side component construction on the J2EE application server platform focusing on the use of design patterns and advanced technologies. Includes UML modeling, database, user interface design, component testing, packaging and installation, and J2EE clustering.
Team development is emphasized.
Prerequisite: CMPE 275.
Normal Grade Rules
3 units

CMPE 279. Software Security Technologies
The course provides the fundamental concepts, methods and tools used to design and implement software security technologies for constructing trustworthy centralized, distributed or enterprise-wide software systems.
Prerequisite: CMPE 220 or CMPE 202 or instructor consent.
Normal Grade Rules
3 units

CMPE 280. Web UI Design and Development
Web User-interface (UI) design and development with contemporary web standards. Understand interaction and interface design principles and processes for rich web applications, mobile web, web graphics, web design fundamentals, tools, interaction using client side scripting and server side frameworks.
Pre-requisite: Classified graduate standing or instructor consent.
Normal Grade Rules
3 units

CMPE 281. Cloud Technologies
Cloud computing concepts, evolution, architectures, infrastructures, opportunities, risks, enterprise adoption strategies, standards and policies, Software-as-a-Service (SaaS), Platform-as-a-Service (PaaS), Infrastructure-as-a-Service (IaaS), modern cloud computing technologies and tools, case studies and team projects.
Corequisites: CMPE 272 or instructor consent.
Normal Grade Rules
3 units

CMPE 282. Cloud Services
Cloud service architecture and layering, administrative issues, resiliency and security considerations; business development, operations and business support service, case studies and team projects.
Prerequisites: CMPE 281 or instructor consent.
Normal Grade Rules
3 units

CMPE 283. Virtualization Technologies
Virtualization concepts, components and infrastructure, hardware and software virtualization, virtualization machine life cycle management, virtualization services, case studies and team projects.
Prerequisites: CMPE 272 or instructor consent.
Normal Grade Rules
3 units

CMPE 284. Storage and Network Virtualization
Network and storage technologies, network virtualization and storage virtualization, including virtual local area networks, load balancers, firewalls, virtual private networks, network attached storage and storage area networks, case studies, and team projects.
Prerequisites: CMPE 283 or instructor consent.
Normal Grade Rules
3 units

CMPE 285. Software Engineering Processes
Software system development with emerging software engineering processes and technologies; planned and agile development processes, processes of Service-Oriented Architecture; component-based, Web-based, mobile based, event programming, wireless, user interface, and database access technologies.
Corequisite: CMPE 202 or CMPE 220 or instructor consent.
Normal Grade Rules
3 units

CMPE 286. Advanced Software Engineering Processes
Object-oriented analysis/design methodologies, tools and measures. A software maturity model used to explain the evolution of software processes. Advanced systems, networks and architectures.
Prerequisite: CMPE 285 or instructor consent.
Misc/Lab: Lecture 3 hours.
Normal Grade Rules
3 units
<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMPE 287. Software Quality Assurance and Testing</td>
<td>Software testing concepts, processes, models, criteria, and methods; software unit testing, integration, function validation, system performance measurement, and reliability evaluation; software security testing methods, assurance criteria, and validation tools; software security assurance process, standards, techniques, and case study. Prerequisite: CMPE 202 or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CMPE 289. Cloud Security Engineering</td>
<td>Cloud security engineering concepts, issues, infrastructures, risks, enterprise adoption concerns; cloud security management, standards, criteria, processes, polices, regulations, identity and access management; security as a service and emergent security solutions and tools in clouds, case studies and team projects. Prerequisites: CMPE 272 or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CMPE 290. Computer Engineering Research and Development Methods</td>
<td>Discussion of research and development methods and current R&amp;D topics in computer engineering. Selection of topics for individual projects. Literature search, intensive readings, discussions and reports. Completion of individual project plans. Prerequisite: CMPE 200. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CMPE 292. Int’l Program Studies</td>
<td>Repeatable for credit Mixed Grading 1-9 units</td>
</tr>
<tr>
<td>CMPE 294. Computer Engineering Seminar</td>
<td>Provides graduate students with a background to conduct research, write proposals and present results in oral and written form. Prerequisite: Instructor consent. ABC/No Credit 3 units</td>
</tr>
<tr>
<td>CMPE 294A. Cyber Security Seminar</td>
<td>Provides graduate students with the background and capability to conduct research and write technical reports in the area of cyber security Prerequisites: Instructor consent Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CMPE 294L. Graduate Laboratory</td>
<td>Advanced laboratory in computer or software engineering to augment regularly-scheduled graduate courses and laboratories. Contents vary from semester to semester. May be repeated when content changes. Prerequisite: Instructor consent. Misc/Lab: Lab 3 hours. Repeatable for credit Credit / No Credit 1 unit</td>
</tr>
<tr>
<td>CMPE 295A. Master Project I</td>
<td>Comprehensive plan and preliminary design of a computer/software engineering project; integration of knowledge in technologies, processes and management to support program outcomes. Prerequisite: Classified status, good standing, completed 2 degree core courses, completed 2 courses in specialization, and graduate advisor consent. Misc/Lab: Lab 9 hours. Repeatable for credit Mandatory CR/NC/RP 3 units</td>
</tr>
<tr>
<td>CMPE 295B. Master Project II</td>
<td>Completion of an in-depth project to achieve the program outcomes and satisfy the cumulating experience; write a detailed project report; make a comprehensive presentation and demonstration. Prerequisite: CMPE 295A or CMPE 295W, completed all degree core courses, admission to candidacy and graduate advisor consent. Misc/Lab: Lab 9 hours. Repeatable for credit Mandatory CR/NC/RP 3 units</td>
</tr>
<tr>
<td>CMPE 295W. Master Project</td>
<td>In-depth developmental engineering work relating to problems of interest. Project includes proposal formulation, analysis, design, implementation, and testing. Prerequisites: Completed degree and specialization core requirements, classified status, in good standing and graduate advisor consent. Mandatory CR/NC/RP 3 units</td>
</tr>
<tr>
<td>CMPE 296. Special Topics in Computer Engineering</td>
<td>Special topics to augment regularly-scheduled graduate courses. Prerequisite: Instructor consent Repeatable for credit Normal Grade Rules 1-4 units</td>
</tr>
<tr>
<td>CMPE 297. Special Problems</td>
<td>Advanced individual work in computer engineering. Prerequisite: Instructor consent. Repeatable for credit Mandatory CR/NC/RP 1-6 units</td>
</tr>
<tr>
<td>CMPE 298. Computer/Software Engineering Internship</td>
<td>Field work for computer and software engineering graduate students. A report is required at the end of the semester addressing the goals set at the start of the assignment. Prerequisite: Completed 6 units degree core plus six additional degree program units, classified status, in good standing and graduate advisor consent. Mandatory CR/NC/RP 3 units</td>
</tr>
<tr>
<td>CMPE 299A. Master Thesis I</td>
<td>The first part of a thesis culminating the work for the master’s degree in the specialization. Prerequisite: Completed core courses and classified status. Mandatory CR/NC/RP 3 units</td>
</tr>
<tr>
<td>CMPE 299B. Master Thesis II</td>
<td>The second part of a thesis culminating the work for the master’s degree in the specialization. Prerequisite: Admission to Candidacy of Master Degree and CMPE 299A. Mandatory CR/NC/RP 3 units</td>
</tr>

## Computer Science Department Courses

### COMPUTER SCIENCE

#### LOWER DIVISION

**CS 023. Introduction to Computer Science for Biologists and Chemists**
Introduction to computer science topics needed to enter the field of bioinformatics. Intended for Biology and Chemistry students. Simple C and Perl programming in a Unix environment and basic database access techniques will be covered. No prior knowledge of computer programming required.
Prerequisite: BIOL 5 or CHEM 55; or instructor consent.
Normal Grade Rules
3 units

**CS 025. The Digital World and Society**
See CMPE 025.
Normal Grade Rules
GE: D1
3 units

**CS 040. Introduction to Computers**
For students with little or no computer experience. Topics include history of computing, user interfaces, computer applications, programming, hardware and software, computer networks.
Normal Grade Rules
3 units

**CS 046A. Introduction to Programming**
Basic skills and concepts of computer programming in an object-oriented approach using Java. Classes, methods and argument passing, control structures, iteration. Basic graphical user interface programming; Problem solving, class discovery and stepwise refinement. Programming and documentation style. Weekly hands-on activity.
Prerequisite: Eligibility for college level mathematics; Computer Science, Software Engineering, or Undeclared major; or instructor’s consent.
ABC/No Credit
4 units

**CS 046B. Introduction to Data Structures**
Prerequisite: Knowledge of Java equivalent to that obtained by completing CS 046A or CS 046J (with grade of “C-” or better). Eligibility for MATH 030 or MATH 030P, or instructor consent.
Pre/Corequisite: MATH 42.
Normal Grade Rules
4 units

**CS 047. Introduction to Computer Systems**
Instruction sets, assembly language and assemblers, linkers and loaders, data representation and manipulation, interrupts, pointers, function calls, argument passing, and basic gate-level digital logic design.
Prerequisite: CS 046B (with a grade of “C-” or better)
Normal Grade Rules
4 units

**CS 049C. Programming in C**
Beginning course in the C language.
Prerequisite: Previous programming experience and completion of math GE.
Normal Grade Rules
3 units

**CS 049J. Programming in Java**
Introduction to the Java programming language and libraries. Topics include fundamental data types and control structures, object-oriented programming, string processing, input/output, and error handling. Use of Java libraries for mathematics, graphics, collections, and for user interfaces.
Prerequisite: Previous programming experience in a language other than Java.
Normal Grade Rules
3 units

**CS 050. Scientific Computing I**
See METR 050.
Normal Grade Rules
2 units

**CS 072. Unix and Unix Utilities**
A practical introduction to Unix and Unix utilities. Topics include use of the major utilities, Unix file structure, interaction with the shell, graphical user interfaces and networking commands. This course is the first in the Unix Systems Administration Certificate Program.
Prerequisite: CS 046A (with a grade of “C-” or better) or equivalent.
Normal Grade Rules
3 units

**CS 085A. Practical Computing Topics**
Computing topics of current interest in industrial practice. Emphasis on effective use and integration of software/hardware. Different topics may be offered at different times in a short-course lecture/lab format. Different versions of this course may be repeated for credit.
Prerequisite: Varies with topic.
Repeatable for credit
Normal Grade Rules
1 unit

**CS 085B. Practical Computing Topics**
Computing topics of current interest in industrial practice. Emphasis on effective use and integration of software/hardware. Different topics may be offered at different times in a short-course lecture/lab format. Different versions of this course may be repeated for credit.
Prerequisite: Varies with topic.
Repeatable for credit
Normal Grade Rules
2 units

**CS 085C. Practical Computing Topics**
Computing topics of current interest in industrial practice. Emphasis on effective use and integration of software/hardware. Different topics may be offered at different times in a short-course lecture/lab format. Different versions of this course may be repeated for credit.
Prerequisite: Varies with topic.
Repeatable for credit
Normal Grade Rules
3 units

#### UPPER DIVISION

**CS 100W. Technical Writing Workshop**
Advanced writing through preparation of technical reports and presentations. Improving skills for writing subject-related reports, project proposals and personal resumes through practice and evaluation. Course assignments will be related to issues concerning careers in computer science.
Prerequisite: ENGL 1B (with a grade of “C” or better); Completion of core GE; satisfaction of Writing Skills Test; upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE: Z
3 units

**CS 108. Introduction to Game Studies**
See ART 108.
Normal Grade Rules
3 units

**CS 110L. Advanced Computing Laboratory**
Programming projects demonstrating data structures, modular design, input/output handling, debugging, testing, error trapping, documentation. Required for use of department labs.
Corequisite: Any CS course and instructor consent.
Misc/Lab: Lab 3 hours.
Repeatable for credit
Credit / No Credit
1 unit
CS 116A. Introduction to Computer Graphics
Vector geometry, geometric transformations and the graphics pipeline. Basic raster graphics algorithms for drawing discrete lines, clipping, visible surface determination and shading. Display of curves and surfaces. Graphics data structures.
Prerequisite: MATH 31, MATH 129A, CS 146 (with a grade of "C-" or better in each) and previous programming experience in C/C++, or instructor consent.
Normal Grade Rules
3 units

CS 116B. Computer Graphics Algorithms
In-depth discussion of algorithms and techniques used in computer graphics and their implementation. Topics include: animation, fractals, anti-aliasing, fill algorithms, visible surface algorithms, color and shading, ray tracing, radiosity and texture maps. Substantial programming required.
Prerequisite: CS 116A (with a grade of "C-" or better) or instructor consent.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

CS 120A. Electronics, Data Acquisition & Analysis
See PHYS 120A.
Normal Grade Rules
3 units

CS 122. Advanced Programming with Perl
Introduction to the Perl programming language, with emphasis on data manipulation, file processing, and database access. Real-life applications in various fields such as system administration, networking, and bioinformatics.
Prerequisite: CS 146 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

CS 123A. Bioinformatics I
Introduction to the main public domain tools, databases and methods in bioinformatics. Analysis of algorithms behind the most successful tools, such as the local and global sequence alignment packages, and the underlying methods used in fragment assembly packages. Solution of complex biological questions requiring modification of standard code.
Prerequisite: CS 23, and BIOL 115 or CHEM 130A, or CS 46B and a molecular biology course.
Normal Grade Rules
3 units

CS 123B. Bioinformatics II
Computational methods used for searching, classifying, analyzing, and modeling protein sequences. Tools for analyzing DNA and RNA sequences. More advanced topics, such as genetic algorithms and simulated annealing, which can be used to address folding problems.
Prerequisite: CS 123A.
Normal Grade Rules
3 units

CS 130. Windows Programming
Introduction to the concepts and techniques of windows programming using the .NET Foundation Class Library (FCL) and C#. Topics include graphics programming, graphical user interface programming, current technology for code reuse (components), and programmatic access to web services.
Prerequisite: CS 46B (with a grade of "C-" or better), or instructor consent.
Normal Grade Rules
3 units

CS 134. Computer Game Design and Programming
Architectures and object-oriented patterns for computer game design. Animation, simulation, user interfaces, graphics, and intelligent behaviors. Team projects using an existing game engine framework.
Prerequisite: CS 146 and either CS 151 or CMPE 135 (with a grade of "C-" or better in each), or instructor consent.
Normal Grade Rules
3 units

CS 143C. Numerical Analysis and Scientific Computing
See MATH 143C.
Normal Grade Rules
3 units

CS 143M. Numerical Analysis and Scientific Computing
See MATH 143M.
Normal Grade Rules
3 units

CS 144. Advanced C++ Programming
Advanced features of C++, including operator overloading, memory management, templates, exceptions, multiple inheritance, RTTI, namespaces, tools.
Prerequisite: CS 46B and CS 49C (with a grade of "C-" or better in each), or equivalent knowledge of object-oriented programming and C, or instructor consent.
Normal Grade Rules
3 units

CS 146. Data Structures and Algorithms
Implementations of advanced tree structures, priority queues, heaps, directed and undirected graphs. Advanced searching and sorting (radix sort, heapsort, mergesort, and quicksort). Design and analysis of data structures and algorithms. Divide-and-conquer, greedy, and dynamic programming algorithm design techniques.
Prerequisite: MATH 030, MATH 042, CS 049J (or equivalent knowledge of Java), and CS 046B (with a grade of "C-" or better in each), or instructor consent.
Normal Grade Rules
3 units

CS 147. Computer Architecture
Introduction to the basic concepts of computer hardware structure and design, including processors and arithmetic logic units, pipelining, and memory hierarchy.
Prerequisite: CS 47 or CMPE 102 (with a grade of "C-" or better), or instructor consent.
Normal Grade Rules
3 units

CS 151. Object-Oriented Design
Prerequisite: MATH 42, CS 46B, and CS 49J (or equivalent knowledge of Java) (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

CS 152. Programming Paradigms
Prerequisite: CS 151 or CMPE 135 (with a grade of "C-" or better), or instructor consent.
Normal Grade Rules
3 units
CS 153. Concepts of Compiler Design
Theoretical aspects of compiler design, including parsing context-free languages, lexical analysis, translation specification and machine-independent code generation. Programming projects to demonstrate design topics. Prerequisite: CS 47 or CMPE 102, CS 146, and CS 354 (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

CS 154. Formal Languages and Computability
Finite automata, context-free languages, Turing machines, computability. Prerequisite: MATH 42 and CS 46B (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

CS 155. Introduction to the Design and Analysis of Algorithms
Algorithm design techniques: dynamic programming, greedy algorithms, Euclidean and extended Euclidean algorithms, Discrete and Fast Fourier transforms. Analysis of algorithms, intractable problems and NP-completeness. Additional topics selected from selection algorithms and adversary arguments, approximation algorithms, parallel algorithms, and randomized algorithms. Prerequisite: CS 146 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

CS 156. Introduction to Artificial Intelligence
Basic concepts and techniques of artificial intelligence: problem solving, search, deduction, intelligent agents, knowledge representation. Topics chosen from logic programming, game playing, planning, machine learning, natural language, neural nets, robotics. Prerequisite: CS 146 and either CS 153 or CMPE 135 (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

CS 157A. Introduction to Database Management Systems
Current, classical database systems. Entity-relationship and enhanced entity models. Relational model, algebra, calculus. Current, emerging SQL standard. Embedded Dynamic SQL. Application perspective on transactions and security. Interactive and programmatic interfaces to database systems. Application programming project using commercial database system. Prerequisite: CS 146 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

CS 157B. Database Management Systems II
Survey course. Object-oriented data model, definition language, query language. Object relational database systems. Database trends like active, temporal, multimedia, deductive databases. Web database topics, namely, architectures, introduction to interface languages. Team projects. Prerequisite: CS 157A (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

CS 158A. Computer Networks
Introduction to computer networks, including network layered architecture, local area networks, mobile wireless networks, Internet TCP/IP protocol suite, network resource management, network programming, network performance, network security, network applications. Prerequisite: CS 158A or CMPE 148 (with a grade of "C-" or better), or instructor consent.
Normal Grade Rules
3 units

CS 158B. Computer Network Management
Principles and technologies of network management: reference models, functions (fault, configuration, performance, security and accounting management), management information, communication protocols, integration, and assessment. Network security and cyber defense: cryptography, key distribution, authentication protocols, network attacks, access control, and example systems. Prerequisite: CS 158A or CMPE 148 (with a grade of "C-" or better), or instructor consent.
Normal Grade Rules
3 units

CS 159. Introduction to Parallel Processing
Major parallel architectures: shared memory, distributed memory, SIMD, MIMD. Parallel algorithm design techniques for scientific applications, measures of performance. Parallel programming: principles and implementations in various languages. Assignments on available parallel and vector computers. Prerequisite: CS 146 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

CS 160. Software Engineering
Software engineering principles, requirements elicitation and analysis, design, configuration management, quality control, project planning, social and ethical issues. Required team-based software development, including written requirements specification and design documentation, oral presentation, and tool use. Prerequisite: CS 146, CS 351 (with a grade of "C-" or better in each), CS 100W (with a grade of "C" or better) or instructor consent.
Normal Grade Rules
3 units

CS 161. Software Project
A substantial project based on material from an advanced area of computer science. Includes lectures on the project topic and on the testing and maintenance of software systems. At least 50% of the course grade to be based on the project. Prerequisites: CS 160 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

CS 166. Information Security
Fundamental security topics including cryptography, protocols, passwords, access control, software security, and network security. Additional topics selected from multi-level security, biometrics, tamper-resistant hardware, information warfare, e-commerce, system evaluation and assurance, and intrusion detection. Prerequisite: CS 146 (with a grade of "C-" or better) and either CS 67 or CMPE 102 or CMPE 120 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

CS 167A. DB2 Fundamentals for z/OS
Overview of the DB2 database systems for z/OS, including DB2 anatomy, application development with DB2, system administration for DB2, and performance issues in DB2 on the enterprise platform. Hands-on labs included. Prerequisites: CS 146 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

CS 167B. DB2 Application Development for z/OS
Application interface for DB2 such as embedded SQL, ODBC, CLI, JDBC, pureQuery. Preparation, execution, and advanced SQL functions of DB2 applications. Service-oriented architecture and data Web services. Current industrial applications. Hands-on labs included. Prerequisites: CS 157A or CS 167A (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

CS 167C. DB2 Query Optimization for z/OS
Overview of query processing including query transformation, runtime environment, and predicate application. Discussion of access path, optimizer statistics, and access path selection. Query performance monitoring and tuning with industrial tools. Hands-on labs included. Prerequisites: CS 157A or CS 167A (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units
CS 172A. Fundamentals of Unix System Administration
Basic tasks for Unix systems administration including system installation, administration of user accounts, file system installation and maintenance, backups, process management and introduction to shell scripting. Second course in Unix Systems Administration Certificate Program.
Prerequisite: CS 72 (with a grade of "C-" or better).
Normal Grade Rules 3 units

CS 172B. Unix System Administration
Topics include external device configuration, introduction to Perl programming, file and disk management, log files, script writing for common tasks, troubleshooting, TCP/IP and routing fundamentals, NFS and security. Third course in Unix Systems Administration Certificate program.
Prerequisite: CS 172A (with a grade of "C-" or better).
Normal Grade Rules 3 units

CS 173. Advanced Unix System Administration
System performance management including tuning to enhance performance. Network administration including NIS, DNS, email. Disk management including RAID. Large scale administration including software distribution and routine task automation. Required for Unix Systems Administration Certificate Level 2.
Prerequisite: CS 172B (with a grade of "C-" or better).
Normal Grade Rules 3 units

CS 174. Server-side Web Programming
Development and deployment of multi-tier web-based applications. Introduction to HTML, XML, enterprise design patterns, web services and database access.
Prerequisite: CS 468 (with a grade of "C-" or better).
Normal Grade Rules 3 units

CS 175. Mobile Device Development
Mobile Platform APIs including those for networking, touch, graphics, data, location, and camera. Testing and profiling on devices and emulator/simulators.
Prerequisites: CS 047, and knowledge of Java equivalent to that of CS 046A or CS 049.
Normal Grade Rules 3 units

CS 180. Individual Studies
Individual study in a specific field.
Prerequisite: Department chair consent.
Repeatable for credit Credit / No Credit 1-3 units

CS 180H. Individual Studies for Honors
Senior project on advanced topics in computer science as determined by the instructor. Written paper or oral presentation of the project required. Intended for students graduating with departmental honors.
Prerequisite: At least junior standing as computer science major. GPA of 3.5 or higher in the major and department chair consent.
Credit / No Credit 3 units

CS 180I. Internship Project
Work on an approved semester-long paid project at an industrial site. Meet once per week on campus. Progress reports, oral presentations, final report, and evaluation by project supervisor will be used to demonstrate the acquisition of skills identified as goals prior to the start of the assignment.
Prerequisite: CS 146 (with a grade of "C-" or better), selection by a company, and instructor consent.
Repeatable for credit Normal Grade Rules 3 units

CS 180J. Internship Project
Course in Unix Systems Administration Certificate program.
Prerequisite: CS 149 Normal Grade Rules 3 units

CS 180K. Internship Project
Topics in cloud computing, including distributed system models, virtual machines, virtualization, cloud platform architectures (IaaS, PaaS, SaaS), service-oriented architectures, cloud programming and software environments, peer-to-peer computing, ubiquitous cloud, cloud security and trust management.
Prerequisite: CS 149 Normal Grade Rules 3 units

CS 180L. Internship Project
The course investigates the main algorithms for solving computational problems in bioinformatics. Methods will include Hidden Markov Models for gene prediction and protein profiling, and Genetic Algorithms for biological sequence analysis and structure prediction. Students will be given programming projects.
Prerequisite: CS 123A or CS 155 Normal Grade Rules 3 units

CS 180M. Internship Project
Human-computer interaction principles. Direct manipulation, focus plus context, interaction history, interfaces for websites and website collections; usability testing, role of metaphors; case studies; advanced topics include information visualization, interfaces for collaboration, intelligent interfaces, and software agents.
Prerequisite: CS 130 or CS 116A, or instructor consent.
Normal Grade Rules 3 units

CS 180N. Internship Project
A semester-long project, assigned by the instructor. Class discussion of project issues, including software design methodologies, applicable algorithms/data structures and system interfaces.
Prerequisite: Classified standing in MSCS program, and either CS 100W or concurrent enrollment in CS 100W.
Normal Grade Rules 3 units

CS 200W. Graduate Technical Writing
Graduate technical writing workshop to develop advanced communication skills that will meet the professional needs of computer scientists, along with research methodologies and proper documentation for the master’s thesis project. (This course does NOT satisfy the undergraduate GE Area Z requirement.)
Prerequisite: Graduate standing.
ABC/No Credit 3 units

CS 216. Geometric Modeling
Representation of curves and surfaces, basic differential geometry, solid modeling fundamentals, implementation considerations.
Prerequisite: CS 116A or instructor consent.
Normal Grade Rules 3 units

CS 218. Topics in Cloud Computing
Topics in cloud computing, including distributed system models, virtual machines, virtualization, cloud platform architectures (IaaS, PaaS, SaaS), service-oriented architectures, cloud programming and software environments, peer-to-peer computing, ubiquitous cloud, cloud security and trust management.
Prerequisite: CS 149 Normal Grade Rules 3 units

CS 223. Bioinformatics
The course investigates the main algorithms for solving computational problems in bioinformatics. Methods will include Hidden Markov Models for gene prediction and protein profiling, and Genetic Algorithms for biological sequence analysis and structure prediction. Students will be given programming projects.
Prerequisite: CS 123A or CS 155 Normal Grade Rules 3 units

CS 235. User Interface Design
Human-computer interaction principles. Direct manipulation, focus plus context, interaction history, interfaces for websites and website collections; usability testing, role of metaphors; case studies; advanced topics include information visualization, interfaces for collaboration, intelligent interfaces, and software agents.
Prerequisite: CS 130 or CS 116A, or instructor consent.
Normal Grade Rules 3 units

CS 240. Advanced Software Project
A semester-long project, assigned by the instructor. Class discussion of project issues, including software design methodologies, applicable algorithms/data structures and system interfaces.
Prerequisite: Classified standing in MSCS program, and either CS 100W or concurrent enrollment in CS 100W.
Normal Grade Rules 3 units
CS 243A. Advanced Numerical Analysis  
See MATH 243A.  
3 units  
Normal Grade Rules  
CS 243B. Advanced Topics in Numerical Analysis  
See MATH 243B.  
3 units  
Normal Grade Rules  
CS 247. Advanced Computer Architecture  
Advanced topics in vector architectures, including:  
pipelined architectures, dataflow computers, VLSI  
architectures, butterfly connections, bus and  
memory architectures, cache structures, hardware  
implementations of algorithms.  
Prerequisite: CS 147 and CS 149 or instructor consent.  
Normal Grade Rules  
3 units  
CS 249. Distributed Computing  
Current issues in operating systems, including  
multiprocessor systems and distributed computing,  
networks, security and performance. Case studies of  
current operating systems.  
Prerequisite: CS 149 or instructor consent.  
Normal Grade Rules  
3 units  
CS 251A. Object-Oriented Analysis  
Emphasizes the important concepts, activities, and  
artifacts of the analysis phase of object-oriented software  
development. CASE tools and UML are used to model  
application domain data, workflows, system requirements,  
deployment, and life cycles.  
Prerequisite: CS 160 or instructor consent.  
Normal Grade Rules  
3 units  
CS 251B. Object-Oriented Design  
Course covers important concepts, activities, and  
artifacts of the design phase of object-oriented software  
development. Topics include design metrics, design  
patterns, refactoring, frameworks, and testing.  
Prerequisite: CS 160 or instructor consent.  
Normal Grade Rules  
3 units  
CS 252. Advanced Programming Language  
Principles  
Language design and paradigms, including concepts  
underlying functional, logic, object-oriented and parallel  
paradigms. Theoretical foundations, including lambda  
calculus, denotational and axiomatic semantics. Proof of  
program correctness. Programming projects emphasizing  
different aspects of language design.  
Prerequisite: CS 152 or instructor consent.  
Normal Grade Rules  
3 units  
CS 253. Advanced Compiler Design  
Review of attribute analysis and static semantic  
evaluation. Runtime environments and code generation.  
Basic blocks and flow graphs. Register allocation and  
storage classes. Common subexpression elimination and  
constant propagation. Loop optimizations. Global data  
flow analysis. Completion of a code optimization project.  
Prerequisite: CS 153 or instructor consent.  
Normal Grade Rules  
3 units  
CS 254. Theory of Computation  
Models of computation; decidability, complexity  
measures; hierarchies; P, NP and other complexity classes;  
tractable problems.  
Prerequisite: CS 154 or instructor consent.  
Normal Grade Rules  
3 units  
CS 255. Design and Analysis of Algorithms  
Randomized algorithms. Parallel algorithms. Distributed  
algorithm. NP-completeness of particular problems.  
Approximation algorithms.  
Prerequisite: CS 155 or instructor consent.  
Normal Grade Rules  
3 units  
CS 256. Topics in Artificial Intelligence  
Introduction to topics in artificial intelligence such as  
problem solving methods, game playing, understanding  
natural languages, pattern recognition, computer vision  
and the general problem of representing knowledge. Students  
will be expected to use LISP.  
Prerequisite: CS 156 or instructor consent.  
Normal Grade Rules  
3 units  
CS 257. Database System Principles  
Design and management issues on: file  
organization and access methods, buffer management  
and storage management. Query processing and query  
optimization, transaction management, recovery, and  
concurrency control techniques. Reliability, protection  
and integrity techniques. Extensive programming project.  
Prerequisite: CS 157B or instructor consent.  
Normal Grade Rules  
3 units  
CS 258. Computer Communication Systems  
Design, analysis and survey of the latest advancements  
in network and Internet technologies, such as supporting  
TCP/IP over various network media, software-defined  
networks, networks supporting cloud computing,  
network security, peer-to-peer and overlay networks, and  
quality of services.  
Prerequisite: CS 158A or instructor consent.  
Normal Grade Rules  
3 units  
CS 259. Advanced Parallel Processing  
An advanced hardware architecture and software  
development class focused on multi-threaded, parallel  
processing algorithms and techniques. A study of high-  
performance parallel hardware architectures and parallel  
programming languages. Applications of parallel and GPU  
processing, including computer gaming.  
Normal Grade Rules  
3 units  
CS 262. Randomized Algorithms and  
Applications  
Design and analysis of algorithms which incorporate  
randomness in their design. Applications will be given in  
some of the following areas: data structures, pattern  
matching, cryptography, parallel computing, distributed  
computing, and interactive proof systems.  
Prerequisite: CS 154 or CS 155.  
Normal Grade Rules  
3 units  
CS 263. Information Security I  
Selected security topics in cryptography and access  
control.  
Prerequisite: CS 149 or instructor consent.  
Normal Grade Rules  
3 units  
CS 264. Information Security II  
Selected security topics in security protocols and  
software.  
Prerequisite: CS 149 and CS 265, or instructor consent  
Normal Grade Rules  
3 units  
CS 265. Cryptography and Computer Security  
Security mechanisms for protecting information in  
computer systems and networks. Includes cryptography  
and its applications to security services in distributed  
systems, mathematics of cryptography, access control,  
protection models, security policies, design of secure  
systems, firewalls, and intrusion detection.  
Prerequisite: CS 149 or instructor consent.  
Normal Grade Rules  
3 units  
CS 266. Topics in Information Security  
Advanced topics in the area of information security.  
Content differs with each offering. Possible topics  
include, but are not restricted to: Network Security,  
Software Reverse Engineering and Cryptanalysis.  
Prerequisite: CS 166 or instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units
CS 267. Topics in Database Systems
Advanced topics in the area of database and information systems. Content differs in each offering. Possible topics include though not restricted to: Data Mining, Distributed Databases and Transaction Processing.
Prerequisite: CS 157B.
Repeatable for credit
Normal Grade Rules
3 units

CS 268. Topics in Wireless Mobile Networking
Advanced topics in the area of wireless mobile networking. Content may differ in each offering. Possible topics include though not restricted to: wireless local and metropolitan area networks, mobile Internet, sensor networks, mobile computing, wireless network security. Repeatable when topic changes.
Prerequisite: CS 158A.
Repeatable for credit
Normal Grade Rules
3 units

CS 274. Topics in XML and Web Intelligence
XML: DTD, Schema, Namespace, XSLT, XPath, XQuery, Encryption; Signature in XML; applications in vertical industries; Semantic Web; RDF, RDF, Ontology, Inferences; Web services, relevant tools for search, inference, data conversion in XML, Semantic web applications.
Prerequisites: CS 160 or instructor consent.
Normal Grade Rules
3 units

CS 280. Graduate Individual Studies
Individual study in specific field.
Prerequisite: Department chair consent.
Repeatable for credit
Credit / No Credit
1-3 units

CS 286. Advanced Topics in Computer Science
Selected topics in computer science. Topics vary each semester and may be repeated for a maximum of 6 units.
Prerequisite: Suitable upper division background in mathematics and computer science as set by instructor.
Repeatable for credit
Normal Grade Rules
3 units

CS 297. Preparation for Writing Project or Thesis
Supervised individual research and project work to prepare for a master’s writing project or thesis.
Prerequisite: Department chair consent and either CS 100W or concurrent enrollment in CS 100W.
Credit / No Credit
3 units

CS 298. Master’s Writing Project
Prerequisite: CS 297 or CS 240, and department chair consent and admission to candidacy for the MS degree.
Repeatable for credit
Credit / No Credit
3 units

CS 299. Master’s Thesis
Prerequisite: CS 297 and department chair consent and admission to candidacy for the MS degree.
Repeatable for credit
Mandatory CR/NC/RP
3 units
Creative Arts Program Courses

CREATIVE ARTS

UPPER DIVISION

CA 100W. Written Communication II
Examination and practice of professional writing for the arts.
Prerequisite: ENGL 1B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE: Z
3 units

CA 121. Music and Religious Experience
See RELS 121.
Normal Grade Rules
3 units

CA 124. Literature and Religious Experience
See RELS 124.
Repeatable for credit
Normal Grade Rules
3 units

CA 134. Religion Film & Media
See RELS 134.
Normal Grade Rules
3 units

CA 139. Advanced Multicultural Art
See ART 139.
Normal Grade Rules
3 units

CA 148. The Art of Movement
See TA 148.
Normal Grade Rules
3 units

CA 150. Field Experience in the Arts
See ARED 150.
Normal Grade Rules
3 units

CA 172. The Arts in U.S. Society
Study of American arts and artists in their aesthetic, social, and political contexts, focusing on 20th and 21st centuries. Arts examined include architecture, poetry, music, visual arts, dance, theatre, performance art, and fiction. Special emphasis on issues of cultural diversity.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

CA 173. Thinking About Contemporary World Arts
An interdisciplinary course on contemporary arts and culture which investigates connections between arts disciplines and world cultures. The course uses critical and creative thinking as the lens to focus on issues in the arts, especially personal and cultural identities.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

CA 174. Special Topics Seminar
In-depth study of historical and/or contemporary topics in the interdisciplinary creative arts. Content changes each semester.
Course repeatable when content changes
Prerequisite: Upper division standing
Repeatable for credit
Normal Grade Rules
3 units

CA 175. Seminar in Creative Process
An exploration of the Creative Process as it is reflected in producing cross-disciplinary works in the arts. Artistic productions will reflect their multi-trans-cultural context.
Prerequisite: Upper division standing and completion of 15 units in the arts.
Repeatable for credit
Normal Grade Rules
3 units

CA 176. Creativity and Creative Leadership
A course focusing on mastering current theories about creativity, adapting theoretical knowledge for an individual/personal strategy, and embodying both the knowledge and strategy in a collaborative project.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

CA 177. Interdisciplinary Arts for Teaching
Creativity in teaching and learning-a course designed for prospective teachers; connections between the various arts disciplines, integrating other core subjects taught in California’s classrooms.
Normal Grade Rules
3 units

CA 178. Senior Seminar in Creative Arts
A capstone seminar in two sections. First, students present and facilitate discussion of a major book on a topic in creative arts. Second, students devote themselves to the production of senior projects (a written thesis and/ or work in other media).
Prerequisite: CA 172 or CA 173.
Normal Grade Rules
3 units

CA 180. Individual Studies
Individual work on special topics, by arrangement.
Prerequisite: Coordinator approval.
Notes: Mixed grading.
Repeatable for credit
Credit / No Credit
1-4 units

CA 190. Field Work/Internship
Pre-professional experience in arts management/program design/implementation in a public setting.
Prerequisite: Coordinator approval.
Repeatable for credit
Credit / No Credit
1-3 units

CA 194. Creative Arts Administration for Public Benefit Corporations
In-depth study of strategies and methods for administration of corporations for the public benefit (non profit arts organizations).
Prerequisite: Upper Division Standing
Normal Grade Rules
3 units

Notes: Mixed grading.
Design Department Courses

ANIMATION AND ILLUSTRATION

LOWER DIVISION

ANI 001. Animation / Illustration Survey
Survey of animation and illustration practice and its respective impact on modern culture. Evolution of both will be examined relative to current paradigms in the screen arts industry.
Prerequisites: Allowed declared Animation major only
Normal Grade Rules
3 units

ANI 012. Light & Optics
An investigation into the physical properties of light and optics relevant to the visualization of artwork for the screen arts industry.
Prerequisites: Allowed declared Animation major only
Normal Grade Rules
3 units

ANI 014. Color Principles for Screen Arts
Exploration of basic illustration problems involving studies in color, light, painting technique, and their application to color scripting in the screen arts industry.
Prerequisites: Allowed declared Animation major only
Normal Grade Rules
3 units

ANI 024. Illustration Fundamentals
Basic principles of animation and illustration stressing composition, sequential visual storytelling, value drawing and other visual art techniques utilized by professionals in the screen arts industry.
Prerequisites: Allowed declared Animation major only
Normal Grade Rules
3 units

ANI 028. Animation Fundamentals
Introduction to the basic elements of animation and representation. Included are motion and animation exercises to understand mass, movement through space, and reaction to external forces. Progressing to other fundamental animation studies culminating in a short original film of each student’s creation.
Prerequisites: Allowed declared Animation major only
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ANI 050. Visual Principles
Presents concepts of 2D design as they apply to the creation of sequential narrative imagery for the screen arts.
Prerequisites: Allowed declared Animation major only
Normal Grade Rules
3 units

ANI 051A. Introduction to 3D Modeling
Emphasis is on generating an in-depth understanding of digital media using commercial 2-D and 3-D software. Students will be introduced to the underlying mathematical and conceptual processes of computer graphics.
Prerequisites: ANI 024 and Allowed declared Animation major only
Normal Grade Rules
3 units

ANI 051B. Introduction to 3D Animation
Basic concepts and professional practices used in 3D computer animation. Application of traditional principles of animation to the 3D digital environment.
Prerequisites: Allowed declared Animation major only
Normal Grade Rules
3 units

ANI 055. Beginning Drawing for Animation/Illustration
Principles of drawing for illustration and animation: gesture, construction, anatomy and technique. An intensive study of the human figure from life, and its use in working in animation and the screen arts industry.
Prerequisites: ANI 024 and Allowed declared Animation major only
Normal Grade Rules
3 units

UPPER DIVISION

ANI 112A. Intro to Illustration/Animation
Basic principles of animation and illustration stressing composition, sequential visual storytelling, value drawing and other visual art techniques utilized by professionals in the screen arts industry.
Prerequisites: ANI 012, ANI 024, Allowed declared Animation major only
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ANI 112B. Drawing for Animation/Illustration
Principles of drawing for illustration and animation: gesture, construction, anatomy and technique. An intensive study of the human figure from life, and its use in working in animation and the screen arts industry.
Prerequisites: ANI 55, Allowed declared Animation major only
 Misc/Lab: Activity 6 hours.
 Normal Grade Rules
 3 units

ANI 113A. Intermediate Animation / Illustration
Exploration of basic illustration problems involving studies in color, light, painting technique, and their application to the screen arts industry.
Prerequisites: ANI 014, Allowed declared Animation major only
Normal Grade Rules
3 units

ANI 113B. Intermediate Project
Completion of a complex painting incorporating knowledge of drawing principles, construction, composition, value and technique.
Prerequisite: ANI 055; Allowed declared Animation major only
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ANI 114. Animation
Fundamentals of animation involving the completion of a series of basic exercises in motion, action analysis and kinetics.
Prerequisite: ANI 113A, Passage of Mid-Program Review; Allowed declared Animation major only
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ANI 115. Intermediate Animation
Demonstrate understanding of animation principles through the completion of a series of advanced exercises.
Prerequisite: ANI 114; Allowed declared Animation major only
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ANI 116. Conceptual Illustration
Emphasis on individual expression and development of personal direction.
Prerequisite: ANI 115B; Passage of Mid-Program Review; Allowed Declared Majors: Animation
Normal Grade Rules
3 units

ANI 117A. Advanced Illustration
Narrative problems for illustrative assignments, professional processes and technical accomplishment.
Prerequisite: ANI 114; Allowed Declared Majors: Animation
Normal Grade Rules
3 units

ANI 117B. Visual Development
Advanced visual development projects with emphasis on attaining professional standards.
Prerequisite: ANI 117A; Allowed Declared Majors: Animation
Normal Grade Rules
3 units

ANI 118. Advanced Animation
Special problems in animation studies: film making, professional practices and portfolio preparation.
Prerequisite: ANI 115; Allowed Declared Majors: Animation
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units
ANI 118B. Application of Advanced Animation to Film
Students will learn the concepts of sound design, video editing, compositing, and post production; principles necessary to put Advanced Animation skills into practical application for film production.
Prerequisite: Instructor Consent Required and BFA Status in Animation/Illustration
Normal Grade Rules
3 units

ANI 128A. Digital Animation I
This class focuses on how to create believable movement by applying the traditional principles of animation to 3D digital characters, focusing on body mechanics, with emphasis on the building blocks of an animated scene, and the work flow from planning phase to final animation.
Prerequisite: ANI 051B
Normal Grade Rules
3 units

ANI 128B. Digital Animation II
How to apply the traditional principles of animation for intermediate level character animation, with focus on arcs, overlapping action, spacing, squash and stretch, strong posing and silhouette. In terms of workflow, the emphasis will be on achieving a strong blocking more efficiently, and on techniques for polishing the animation.
Prerequisite: ANI 128A
Normal Grade Rules
3 units

ANI 130A. Digital Modeling I
This class will introduce students to intermediate level 3D Digital modeling techniques using current industry standard software for the creation of 3D digital models. This class will also introduce students to the concept of production pipelines, with focus on modeling.
Prerequisites: ANI 051A
Normal Grade Rules
3 units

ANI 130B. Digital Modeling II
This class we re-investigates the character pipeline with focus on a human character with complicated costing and accessories. This class expands the practice of standard industry software for modeling, focusing in high end organic modeling.
Prerequisites: ANI 130A
Normal Grade Rules
3 units

ANI 178. Animation / Illustration Internship
Professional practice in a selected field relevant to current practices in the screen arts industry.
Prerequisite: Program and Supervisor Approval; Allowed declared Animation major only
Repeatable for credit
Credit / No Credit
1-6 units

ANI 179. Special Topics in Animation/ Illustration
Individual Studies on a tutorial basis.
Prerequisites: Upper-Division standing in Animation/ Illustration; Allowed declared Animation major only
Repeatable for credit
Credit / No Credit
3-6 units

ANI 180. Individual Studies
Special topics or projects by arrangement with instructor
Prerequisites: Upper-Division standing in Animation/ Illustration; Allowed declared Animation major only
Repeatable for credit
Credit / No Credit
3-6 units

ANI 198. Senior Seminar Animation/ Illustration
The first in a two-course sequence that constitutes the capstone for the BFA degree in Animation/Illustration. In ANI 198, students will undertake the necessary research to successfully complete the second course in the sequence.
Prerequisite: ANI 115 or ANI 117, Allowed declared Animation major only
Normal Grade Rules
3 units

ANI 199. Senior Project Animation/ Illustration
A project demonstrating professional competence in area of concentration. A gallery exhibition with the approval of the student’s advisory committee is required.
Prerequisite: ANI 198, Allowed declared Animation major only
Normal Grade Rules
3 units

DESIGN STUDIES

UPPER DIVISION

DSGN 100W. Writing Workshop: Design
Advanced writing course for design majors, based upon philosophical issues and current professional practices in design. Clear analytical and critical writing in examination of these topics.
Prerequisites: Completion of core GE, ENGL 1B (with a grade of C or better), satisfaction of Writing Skills Test and upper division standing. Fulfills junior level writing requirement.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE: 2
3 units
**GRAPHIC DESIGN**

**LOWER DIVISION**

**DSGD 063. Fundamental Graphic Visualization**
Critical examination and theories on how to work with two-dimensional compositional space and the interrelated basic principles, attributes, and elements of graphic design, includes the relationships between some production methods and materials.
Normal Grade Rules
3 units

**DSGD 083. Digital Applications: Basics**
The fundamental use of features and functions inherent within graphic software programs for graphic design.
Normal Grade Rules
3 units

**DSGD 099. Introduction to Typography**
Study and demonstration of letterforms and fundamental typographic principles. Emphasis on the vocabulary of typographic form and its relationship to message/purpose.
Prerequisite: CD majors: ART 24 or ANI 12, DSGD 63, DSGD 83; IT majors: DSIT 33, DSIT 10, DSIT 83; ID majors: completion of DSID 22 or completion of DSGD 83 and concurrently enrolled in DSID 22
Normal Grade Rules
3 units

**DSGD 103. Advanced Typography I**
Advanced conceptual investigations, verbal and visual problem solving utilizing typography and image.
Prerequisite: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units

**DSGD 103B. Advanced Typography II**
Capstone conceptual investigations, verbal and visual problem solving utilizing typography and image.
Prerequisite: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units

**DSGD 104. Introduction to Graphic Design**
Familiarization to form and message development. Emphasis on visual concepts and fundamental design theory. Course is repeatable for a total of 6 units.
Prerequisite: DSGD 100, DSGD 99
Repeatable for credit
Normal Grade Rules
3 units

**DSGD 105. Intermediate Graphic Design**
Development of concepts combining image/form, message, typography and function with fundamental design theory. Course is repeatable for a total of 6 units.
Prerequisite: Pass BFA Portfolio Review, DSGD 102, DSGD 110
Normal Grade Rules
3 units

**DSGD 106. Advanced Graphic Design**
Advanced and diverse series of topics confronting a wide variety of situations and needs emphasizing conceptual innovation, organization, planning and analysis.
Prerequisite: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units

**DSGD 107. Special Topics in Graphic Design**
The course focuses on comprehensive design problems utilizing design theories, analysis, experimentation, innovation and conceptual development as systematic approaches to structuring various degrees of graphic design issues; database scientific visualization, graphic information system, publication design, and promotion & media graphics.
Prerequisite: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Misc/Lab: Lab 6 hours.
Normal Grade Rules
3 units

**DSGD 107B. Special Topics in Experience Design**
Capstone design problems utilizing design methodologies, theories, and analysis in the area of time-base multi-media design; narrative filming, kinetic typography in motion, interaction design, and event design as related to visual information design.
Prerequisite: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Misc/Lab: Lab 6 hours.
Normal Grade Rules
3 units

**DSGD 108. Graphic Design Portfolio**
Portfolio preparation using various media and methods for effective professional presentation.
Prerequisite: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units

**DSGD 110. Visual Literacy: Image Making**
A course that defines the ability to assess and utilizes communications composed of various visual images (hybridization of manual, analog, and digital processes) for goal oriented projects. Students will develop tools needed to critically examine the visual world and strategies for creating unique visual forms and process of visual encoding and visual decoding for incorporating into graphic design projects.
Prerequisites: Pass BFA portfolio review; DSGD 104.
Normal Grade Rules
3 units

**DSGD 120. Exhibition Design & Info Graphics**
Introducing principles, processes, and vocabularies of exhibition design. A substantial amount of student activity in the classroom will address acquiring and refining the two- and three-dimensional visualization of objects and spaces.
Prerequisites: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units

**DSGD 127. Design Practicum**
Building a successful design career requires an understanding of best practices and the standards governing the ever-evolving business of graphic design. This course aims to explore the creative business processes, marketing, negotiation and pricing, ethical standards of design business, and professional relationships in design.
Prerequisite: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units

**DSGD 131. Motion Graphics**
A capstone design problems course that exposes students to the principles, methodologies, and elements of motion graphics and narrative design. Students will develop techniques and skills for synthesizing the language of motion simultaneously with an emphasis on narrative structure, and text and image in relation to time-based media. The project will be examined in terms of its historical, cultural and conceptual implications.
Prerequisites: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units
DSGD 132. User Interface & Interaction Design
An advanced course focusing on the fundamental theory and practice of computer user interface and interactive design with emphasis on: the 2D graphic digital user interfaces, the current interaction development technology, theory, process and methods, and its overall impact on culture and society.
Prerequisites: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units

DSGD 141. 3D Branding & Promotion Design
Experimental problems and themes exploring theories, strategies, and methodologies in 3D branding and Promotion Design such as marketing communication tools, packaging and P.O.P design, emphasizing innovative expression. Projects also examine contextual and conceptual prototyping for point of purchase display.
Prerequisite: Pass BFA Portfolio Review, DSGD 105 and DSGD 186
Normal Grade Rules
3 units

DSGD 150. Degree Project: Senior Studio
This in-depth studies course focuses on research concerning current issues in visual communication/information/graphic design fields. This course is for procuring the undergraduate degree in BFA Graphic Design degree where the student will develop an individual design approach, process, and methodology for the application of graphic design solutions as the thesis project that will fulfill the criteria expected for graduation.
Prerequisites: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
4 units

DSGD 176A. Graphic Design History and Theory
See ARTH 176A.
Normal Grade Rules
3 units

DSGD 186. Digital Applications: Methodology
This course will provide and expose students to the tools, skill sets, and languages that are essential to understanding the fundamentals for web based information and interaction design principles and discovery of its practice in the profession.
Prerequisite: Pass BFA Portfolio Review, DSGD 102 and DSGD 110
Miss/Lab Lab 6 hours.
Normal Grade Rules
3 units

INDUSTRIAL DESIGN

LOWER DIVISION

DSID 021. Visualization I
Presenting design concepts in both preliminary and finished states. Appraisal and application of media used in industry. Includes elements of color theory.
Prerequisites: Declared BS Industrial Design Major
Corequisites: DSID 031
Normal Grade Rules
3 units

DSID 022. Visualization II
Sketching techniques commonly used by designers for communicating their concepts.
Prerequisites: Declared BS Industrial Design Major, DSID 021, DSID 031.
Corequisites: DSID 032, DSID 032A
Repeatable for credit
Normal Grade Rules
3 units

DSID 031. Industrial Design Foundation I
Practical exploration of the basics of industrial design aesthetics. Introduction to the design process with special emphasis on 3D form development and presentation.
Prerequisites: Declared BS Industrial Design Major
Corequisite: DSID 021
Repeatable for credit
Normal Grade Rules
3 units

DSID 032. Industrial Design Foundation II
Development and application of basic industrial design skills, methodology and aesthetics to elementary product design. Project assignments leading from abstract exercises to actual product design.
Prerequisites: Declared BS Industrial Design Major, DSID 021, DSID 031
Corequisites: DSID 022, DSID 32A
Normal Grade Rules
3 units

DSID 032A. ID Portfolio Project 1
ID portfolio project class combines 2D and 3D skills from previous ID classes, in the first complete product design application. Complete presentation for ID faculty review required.
Prerequisites: Declared BS Industrial Design Major, DSID 021, DSID 031
Corequisites: DSID 022, DSID 032
Repeatable for credit
Credit / No Credit
1 unit

DSID 041. Materials and Processes I
Introduction to materials and manufacturing processes as they relate to product development and the Industrial Design profession.
Prerequisites: DSID 021, DSID 022, DSID 032, DSID 032A
Repeatable for credit
Normal Grade Rules
3 units

UPPER DIVISION

DSID 121. Industrial Design Process
Explores how a conscious and rational approach can enhance creativity. Techniques used include goalsetting, brainstorming, time-management, evaluation matrices and journal keeping.
Prerequisite: DSID 123A or Instructor consent
Normal Grade Rules
3 units

DSID 122. Cont. & Crit. Studies: Industrial Design
This course thematically offers readings in Industrial Design theory, considers specific applications intended to highlight problems in contemporary practice, and is divided into five modules. Course content and examples will be selected to complement the studio projects in the program.
Prerequisite: DSGN 072 and DSGN 100w
Corequisite: DSGN 100w
Normal Grade Rules
3 units

DSID 123. Intermediate Industrial Design
Design theories, methods and presentation techniques used by product designers in small scale product design. Stress application of knowledge of ergonomics, industrial materials and manufacturing processes. Course is repeatable for total of 6 units.
Prerequisite: DSID 032A Credit; PHYS 001, ARTH 070B
Repeatable for credit
Normal Grade Rules
3 units

DSID 123A. ID Portfolio Project 2
Provides instruction on integrating ergonomics (DSID 126), CAD (DSID 129), typography (DSGD 99 or equivalent), materials and processes (DSID 41), and at least two major design projects (DSID 123 and at least one Design Elective) into Intermediate Design Projects and Portfolio. Comprehensive presentation to ID faculty required.
Pre/Co-requisites: DSID 041, DSID 123, DSID 126, DSID 129, DSGD 099, Design Elective
Credit / No Credit
3 units
DSID 124. Design for All
Designing for as broad a percentage of the population as possible. Course focuses on accessible design despite physical, cognitive and/or socioeconomic obstacles. Course is repeatable for a total of 6 units.
Prerequisite: DSID 123A or DSID 125A, Instructor Permission
Prerequisite: Pass portfolio review.
Misc/Lab: Lab 9 hours.
Repeatable for credit
Normal Grade Rules
3 units

DSID 125. Advanced Industrial Design
Advanced exploration of industrial design theory and practice with projects involving high levels of complexity of technological, functional and aesthetic constraints. Course is repeatable for a total of 6 units.
Prerequisite: DSID 123A, DSID 137, 6 units of Design Electives
Corequisites: DSID 142, DSID 136
Misc/Lab: Lab 9 hours.
Repeatable for credit
Normal Grade Rules
3 units

DSID 125A. ID Portfolio Project 3
Class requires integration of advanced computer graphics and technology knowledge in the advanced ID Projects, comprehensive presentation for ID faculty and invited professionals required.
Prerequisites: DSID 123A
Corequisites: DSID 121, DSID 127
Pre/Corequisites: DSID 122, DSGN 100W
Credit / No Credit
2 units

DSID 126. Ergonomics for Design
Aspects of products affecting human performance, comfort and safety. Emphasis on design of computer interfaces, automobiles and furniture. Topics include visual displays, anthropometry, seating design and safety design.
Prerequisite: DSID 022, DSID 032, DSID 032A
Normal Grade Rules
3 units

DSID 128. Advanced Projects in Industrial Design
Comprehensive, in-depth analysis and design of faculty-appointed projects as well as a student-proposed project. Student proposed projects must meet with the approval of the Industrial Design faculty.
Prerequisite: DSID 125A, DSGN 100W, DSGN 127
Corequisites: DSID 125 or DSID 130
Misc/Lab: Lab 9 hours.
Repeatable for credit
Normal Grade Rules
3 units

DSID 128A. ID Portfolio Project 4
Class requires integration of business and advanced technologies into the special graduating project. Final show and presentation for ID faculty and invited professionals required.
Prerequisite: DSID 125A, DSID 128, DSID 124 or DSID 130
Corequisites: DSID 128 and Design elective
Repeatable for credit
Credit / No Credit
1 unit

DSID 129. Visualization III
Principles of computer graphics, computer-aided technology and applications in industrial design. Emphasis on the transition from 2D applications to 3D applications.
Prerequisite: DSID 022, DSID 032, DSID 032A
Corequisites: DSID 126 or DSID 123 or Design elective.
Repeatable for credit
Normal Grade Rules
3 units

DSID 130. Sustainable Design
Design products with a focus on minimizing their impact on the environment. The entire lifespan of designed and manufactured products will be explored. Course is repeatable for credit for a total of 6 units.
Prerequisite: DSID 123A or Instructor Permission
Notes: Offered only occasionally.
Repeatable for credit
Normal Grade Rules
3 units

DSID 131. Interactive and Interface Design
Advanced practical applications of interactive design theory, involving hardware and software/human interface. Emphasis on computer-related interface design.
Prerequisite: DSID 126, DSGD 099; HFE Graduate Student
Repeatable for credit
Normal Grade Rules
3 units

DSID 132. Softgoods
Design of products that incorporate soft materials and textiles in their construction. Products include furniture, clothing, shoes, and other products that contribute to current lifestyles.
Prerequisite: DSID 032A, ARTH 070B, DSID 041; or Instructor’s Consent
Repeatable for credit
Normal Grade Rules
3 units

DSID 133. Design Projects: Making It
Students take an idea from concept to actual product (and multiples of the product) in one semester. The course ends with the creation of a store and the sale of the products produced.
Prerequisite: DSID 032A credit or instructor permission.
Repeatable for credit
Normal Grade Rules
3 units

DSID 134. Design and Meaning
This course will focus on the formal properties of products to better understand how design addresses and projects meaning as it relates to designed and manufactured objects. Coursework will explore this via experiments in specification and fabrication.
Prerequisite: DSID 32A
Normal Grade Rules
3 units

DSID 135. Design, Entrepreneurship, Intellectual Property and Professional Practice
Strategies for entering the profession as a business owner or design entrepreneur. Course includes the exploration of past and future business models as well as issues of intellectual property protection.
Prerequisite: DSID 123A or Instructor Permission.
Repeatable for credit
Normal Grade Rules
3 units

DSID 136. Advanced Digital Workshop
Advanced Digital modeling and prototyping tools for Industrial Design.
Prerequisite: DSID 123A, DSID 129; or Instructor Permission
Repeatable for credit
Normal Grade Rules
3 units

DSID 137. Advanced Physical Prototyping
Advanced Prototyping techniques for Industrial Design including patternmaking, sewing and casting.
Prerequisite: DSID 032A (credit), DSID 041, DSID 129, DSID 126
Repeatable for credit
Normal Grade Rules
3 units

DSID 142. Materials and Process II
Further exploration into materials and manufacturing processes as they relate to product development and the Industrial Design profession.
Prerequisite: DSID 032A and DSID 041 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
DSID 143. Advanced Materials, Process & Technology
Advanced Materials, Processes and Technology will enhance themes covered in Materials and Processes coursework with the addition of study of the relevance and implications of advanced materials and technologies on designed artifacts.
Prerequisite: DSID 041, DSID 123A, or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

DSID 144. Transportation Design
This course introduces students to traditional and innovative ideas about design, materials, and manufacturing processes related to personal and public transport design. It focuses on how regional endeavors could bring sustainable transport methods to populated and condensed urban regions.
Prerequisites: DSID 136 or instructor consent
Normal Grade Rules
3 units

DSID 176B. Industrial Design in Society
See ARTH 176B.
Normal Grade Rules
3 units

GRADUATE

DSID 226. Ergonomics for Design
Aspects of products which affect human performance, comfort and safety. Emphasis on design of computer interfaces, automobiles and furniture. Topics include visual displays, anthropometry, seating design and safety design.
Prerequisite: Graduate standing or pass BS Design portfolio review.
Normal Grade Rules
3 units

INTERIOR DESIGN

LOWER DIVISION

DSIT 005. Introduction of Interior Design and Architecture
A comprehensive introduction to the field of Interior Architecture. Focuses on social, psychological, economic and aesthetic challenges facing designers in the 21st century. Integration of design principles, creative expression and consumer information pertaining to living environments and public spaces.
Normal Grade Rules
3 units

DSIT 010. Sketching, Drawing + Modeling
Explore the processes of conceptual sketching and drawing. Utilize and teach architectural documentation techniques such as interior: floor plans, reflected ceiling plans, elevations, sections, details, perspectives and axonometric drawings. Demonstrate techniques in pencil, contemporary pens, markers, and artistic visualization techniques.
Corequisite: DSIT 005
Normal Grade Rules
3 units

DSIT 015. Architectural Drawing and 3-D Modeling
Study, exploration and comprehensive development of the technical and conceptual aspects of architectural drawing and architectural modelmaking used to visualize innovative and functional interior spaces.
Prerequisite: ART 12 or ART 13, and ART 24.
Normal Grade Rules
3 units

DSIT 029. Design Process
Study, exploration and comprehensive development of the technical and conceptual methodologies used to formulate innovative and functional interior spaces.
Prerequisite: DSIT 15
Normal Grade Rules
3 units

DSIT 033. Architectural Presentation
Further study, exploration, and comprehensive development of the technical and conceptual aspects of architectural drawing and modelmaking used to visualize innovative and functional interior spaces.
Prerequisite: DSIT 15
Normal Grade Rules
3 units

DSIT 034. Interior Architecture Foundation Studio
In-depth study, exploration, and comprehensive development of innovative and functional interior spaces using the technical and conceptual aspects of architectural drawing and architectural modelmaking and the theoretical and conceptual methodologies used to formulate interior spaces.
Prerequisite: DSIT 15, DSIT 29, DSIT 33.
Normal Grade Rules
3 units

DSIT 080. The Applied Arts in Interior Design
See ARTH 080.
Normal Grade Rules
3 units

DSIT 083. Visual Communication I
The first half of this course introduces the principles of digital drawing and presentation tools essential to 2D architectural representation. The second half of this course introduces students to the principle skills and disciplines of making 3D forms through the use of digital technology.
Prerequisites: DSIT 005, DSIT 010.
Corequisites: DSIT 015, DSIT 029.
Normal Grade Rules
3 units

DSIT 088. Visual Communication II
Introduction to Building Information Modeling concepts, practices, and drafting techniques. Using parametric 3D modeling software, students will create a virtual architectural model that will aid in the creation of construction documents and design presentation materials.
Prerequisites: DSIT 005, DSIT 010.
Corequisites: DSIT 033, DSIT 034.
Normal Grade Rules
3 units

DSIT 098. Architectural Forum
Discussion and analysis of the processes of interior architecture; lectures and field trips emphasizing critical thinking, communication skills and professional ethics.
Prerequisite: ART 1.
Normal Grade Rules
3 units

UPPER DIVISION

DSIT 100. Building Codes
Introduction to building codes and legal regulations relating to interior architecture design. Egress, occupancy levels, regulations for the handicapped, general accessibility requirements, finishes and material specifications and fire ratings, will be highlighted in the class.
Prerequisites: DSIT 303.
Normal Grade Rules
3 units

This course covers functional, aesthetic and environmental aspects of building materials and systems, focusing on the documentation of design in 3D modeling software.
Prerequisites: DSIT 033, DSIT 034, DSIT 088.
Normal Grade Rules
3 units

DSIT 102. Computer Graphics for Interior Architecture
Examination of programs related to the development of the state of the art presentation methods and portfolios.
Prerequisite: DSIT 34.
Normal Grade Rules
3 units
DSIT 103. Interior Architecture Conceptual Design Studio  
Project oriented study, examination, and analysis of planning and designing innovative and functional interior spaces. Emphasis on the conceptual design of state of the art commercial environments. Additional emphasis on implementation and interpretation of laws, codes and regulations. 
Prerequisite: DSIT 34, DSIT 102.  
Normal Grade Rules  
3 units

DSIT 104. Interior Architecture Space Planning Studio  
Further project oriented study, examination and analysis of planning and designing innovative and functional interior spaces. Emphasis on the space planning of state of the art commercial environments. Additional emphasis on implementation and interpretation of laws, codes and regulations. Course is repeatable for a total of 6 units. 
Prerequisite: DSIT 103 and pass portfolio review.  
Repeatable for credit  
Normal Grade Rules  
3 units

DSIT 105. Interior Architecture Advanced Design Studio  
In-depth project oriented study, examination and analysis of planning and designing innovative and functional interior spaces. Emphasis on the advanced design of state of the art commercial environments. Additional emphasis on implementation and interpretation of laws, codes and regulations. 
Prerequisite: DSIT 103, and pass portfolio review.  
Normal Grade Rules  
3 units

DSIT 106. Architectural Project Materials  
Discussion and analysis of materials for interior architecture lectures and field trips emphasizing aesthetic sensibilities, human factors, manufacturing processes and specifications. 
Prerequisite: DSIT 34.  
Normal Grade Rules  
3 units

DSIT 107. Furniture Design  
Design and production of original furniture, including drawing, prototypes and materials selection. Course is repeatable for a total of 6 units. 
Prerequisite: DSIT 105 or upper division standing and instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

DSIT 108. Architectural Lighting Design  
Theory and practice of architectural lighting emphasizing aesthetics, drawing, specifications, terminology, calculations and advances in technology. Course is repeatable for a total of 6 units. 
Prerequisites: DSIT 103, DSIT 104 or upper division standing and instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

DSIT 109. Object Design for Interiors  
Advanced exploration of object design theory and practice with projects involving high levels of aesthetic and functional complexity. 
Prerequisite: DSIT 105, DSIT 106 and DSIT 108.  
Normal Grade Rules  
3 units

DSIT 110. Capstone Thesis Studio  
Students will select an appropriate project type, determine the site, prepare existing drawings, write a project statement and program, and develop a design solution. Work must be presented to a jury of professionals, and exhibited in a thesis exhibition. 
Prerequisites: DSIT 104, DSIT 105.  
Normal Grade Rules  
3 units

DSIT 111. Interior Architecture Seminar  
A capstone course for discussion of design work and professional values as a basis for portfolio and resume preparation. 
Prerequisite: DSIT 105 and enrollment in graduation semester.  
Normal Grade Rules  
3 units

DSIT 112. Professional Practice of Interior Architecture  
This course focuses on the business, legal, financial, and managerial considerations of interior design practice as well as the role and responsibilities of a design assistant, with emphasis on ethical considerations and the legal issues of the profession and licensing. 
Prerequisites: DSIT 103, Pass portfolio.  
Corequisites: DSIT 104.  
Normal Grade Rules  
3 units

DSIT 116. Solar Energy Analysis  
See ENVS 116.  
Normal Grade Rules  
3 units

DSIT 132. Solar Home Design  
See ENVS 132.  
Normal Grade Rules  
3 units
Economics Department Courses

LOWER DIVISION

ECON 001A. Principles of Economics: Macroeconomics
Determination of economic aggregates such as total output, total employment, the price level and the rate of economic growth.
Notes: May be taken concurrently or prior to ECON 1B.
Normal Grade Rules
Normal Grade Rules

ECON 001B. Principles of Economics: Microeconomics
Allocation of resources and distribution of income as affected by the workings of the price system and by government policies.
Notes: May be taken concurrently or prior to Econ 1A.
Normal Grade Rules
Normal Grade Rules

ECON 002A. Principles of Macroeconomics Online Lab
Self-paced, online lab guides students through practice and graded problem sets of key macroeconomics tools and concepts.
Credit / No Credit
1 unit

ECON 002B. Principles of Microeconomics Online Lab
Self-paced online lab guides students through practice and graded problem sets of key microeconomics tools and concepts.
Credit / No Credit
1 unit

ECON 003. Economic Statistics
Elementary statistical analysis of economic data, probability theory, probability distributions, sampling, sampling distributions, estimation, hypothesis testing, simple linear regression, correlation and index numbers.
Prerequisite: ECON 1A, and ECON 1B
Normal Grade Rules
Normal Grade Rules

UPPER DIVISION

ECON 100W. Writing Workshop: Economic Reports
Writing skills appropriate to majors in economics of lucid expression in essays, reports and other types of communication.
Prerequisite: ENGL 1B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
Normal Grade Rules

ECON 101. Microeconomic Analysis
Consumer behavior determining demands for goods and services. Theory of the firm including theories of production and cost. Theory of distribution to production factors.
Prerequisite: ECON 1B.
Normal Grade Rules
Normal Grade Rules

ECON 102. Macroeconomic Analysis
Theory of aggregate demand and related topics: national income accounting, employment and inflation, monetary and fiscal policies, economic stability, growth and balance of payments equilibrium.
Prerequisite: ECON 1A.
Normal Grade Rules
Normal Grade Rules

ECON 103. Introduction to Econometrics
Use of econometric methods in analyzing economic data. Simple and multiple regression. Problems of autocorrelation multicollinearity and heteroskedasticity.
Prerequisite: ECON 3.
Misc/Lab: Lecture 3 hours/lab 2 hours.
Normal Grade Rules
Normal Grade Rules

ECON 104. Mathematical Methods for Economics
Applications of linear algebra and differential calculus to economic analysis. Topics include market equilibrium, properties of production functions, multipliers, optimization methods, comparative statics analysis.
Prerequisite: ECON 1A, ECON 1B & MATH 30 or MATH 71
Normal Grade Rules
Normal Grade Rules

ECON 106. Managerial Economics
Applications of economic analysis to practical problems in the private and public sector. Demand and cost analysis, market structure, statistical estimation and forecasting, case studies.
Prerequisite: ECON 1B.
Normal Grade Rules
Normal Grade Rules

ECON 107. Introduction to Environmental Economics and Policy
See ENVS 107.
Normal Grade Rules
Normal Grade Rules

ECON 108. Cost-Benefit Analysis
Theory and practice of cost-benefit analysis applied to various topics including public projects and environment. Welfare foundations of CBA, valuation of goods (such as clean air, wilderness, and sports arenas), discounting future values and cost.
Prerequisite: ECON 1B and ECON 3 or STAT 95, or instructor consent
Normal Grade Rules
Normal Grade Rules

ECON 109. Analysis of Economic Issues for Teachers
Economic analysis of such topics as unemployment, inflation, poverty, pollution, education and international trade will be covered within the context of K-12 education.
Prerequisite: Upper division standing.
Notes: Not acceptable for Economics majors, except double majors; acceptable for Economics minors.
Normal Grade Rules
Normal Grade Rules

ECON 111. Economic Development
Theories of development and underdevelopment. Problems of initiating and sustaining growth. Relations between developed and underdeveloped regions. Economic reform and change in the underdeveloped world.
Prerequisite: ECON 1A and ECON 1B.
Normal Grade Rules
Normal Grade Rules

ECON 112A. Economic History of the United States
Economic analysis of U.S. and Canadian history to the mid-20th century and its application to understanding the causes, patterns and consequences of economic development.
Prerequisite: Upper division standing or instructor consent
Normal Grade Rules
Normal Grade Rules

ECON 112B. Economic History of Europe
Economic analysis of U.S. history to the mid-20th century and its application to understanding the causes, patterns and consequences of economic development.
Prerequisite: Upper division standing or instructor consent
Normal Grade Rules
Normal Grade Rules
ECON 121. Industrial Organization
Microeconomic theory applied to pricing of products by seller having different market structures such as competition, imperfect competition, monopoly, public utility regulation or government pricing.
Prerequisite: ECON 1B.
Normal Grade Rules
4 units

ECON 132. Public Finance
Prerequisite: ECON 1B.
Normal Grade Rules
4 units

ECON 133. Public Choice
Economic analysis applied to non-market decision making. Topics may include: voting, special interests, rent-seeking, legislative decision-making, bureaucracy, collective action problems, judicial decision-making, political business cycles, and comparative political institutions.
Prerequisite: ECON 001B
Normal Grade Rules
4 units

ECON 135. Money and Banking
Monetary institutions and theory, central banking, Federal Reserve System, interest rates, foreign exchange, price level theory, flow of funds, policy relative to private, government and international finance.
Prerequisite: ECON 1A.
Normal Grade Rules
4 units

ECON 136. International Economics
International trade theory, customs union, tariffs, quota policies. International monetary system balance of payments problems, foreign exchange markets.
Prerequisite: ECON 1A and ECON 1B.
Normal Grade Rules
4 units

ECON 137A. Fundamentals of Corporate Finance
Net present value criterion for investment and financial decisions, portfolio analysis, capital assets pricing model, information efficiency of security markets, influence of dividend policy on stock prices and optimality of financial structure of corporations.
Prerequisite: ECON 1B.
Normal Grade Rules
4 units

ECON 137B. Topics in Corporate Finance
Analytical coverage of topics such as role of leverage, valuation of options (warrants, puts, calls and convertibles), valuation of risky debt, capital budgeting, mergers, financial planning and international aspects of corporate finance.
Prerequisite: ECON 137A or instructor consent.
Normal Grade Rules
4 units

ECON 138. Business and Economic Forecasting
Use of regression techniques to forecast movements in economic conditions having effects on business firms and governments.
Prerequisite: ECON 1A, ECON 1B and a semester of statistics.
Normal Grade Rules
4 units

ECON 139. Principles of Investments
Stocks, bonds, money market instruments, options, futures and real estate. Institutions, markets and theory. Speculation, present value theory, yields, term structure, taxes, portfolios and insurance.
Prerequisite: ECON 1A and ECON 1B.
Normal Grade Rules
4 units

ECON 140. Economics of Race and Gender
Race and gender in the American economy. Economic origins of race and sex discrimination as they relate to markets in labor, land (housing) and capital.
Prerequisite: ECON 1B.
Notes: Offered summer and winter sessions and occasionally during the academic year.
Normal Grade Rules
3 units

ECON 141. Law and Economics
Effects on resource use of existing and proposed laws concerning contracts, tort liability, crime, water resources, antitrust, real property, the environment and corporations.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

ECON 151. Labor Economics
Development of labor institutions and markets, public regulation of unions, economics of collective bargaining. Theories of wages, employment and labor income.
Prerequisite: ECON 1A or ECON 1B.
Notes: Offered occasionally during the academic year.
Normal Grade Rules
4 units

ECON 158. Economics of Entrepreneurship
Examines how economists have approached the phenomenon of entrepreneurship, from its behavioral foundations to its effects on economic growth and progress. Explores the role of entrepreneurship in theory and policy, and emphasizes its cultural, legal, and political determinants.
Prerequisite: ECON 001A and ECON 001B.
Normal Grade Rules
4 units

ECON 160. Public Regulation of Business
Economic criteria of public regulation and control of private business with emphasis on the problems of public policy.
Prerequisite: ECON 1B.
Notes: Offered summer and winter sessions and occasionally during the academic year.
Normal Grade Rules
4 units

ECON 165. Regional Economics
The economic structure of a region, including the economic base and its relation to industries serving the local market, the relationships among the subregions and the location of industry.
Prerequisite: ECON 1A or ECON 1B.
Notes: Offered occasionally during the academic year.
Normal Grade Rules
4 units

ECON 166. Urban Economics
Analysis of major economic problems of metropolitan areas: taxation, financing of urban services, transportation, residential and industrial development, local growth controls, zoning and housing.
Prerequisite: ECON 1B.
Normal Grade Rules
4 units

ECON 180. Individual Studies
Prerequisite: Instructor consent and department chair approval.
Repeatable for credit
Credit / No Credit
1-4 units

ECON 185. Applied Economics Internship
Supervised work with a private or public employer. Provides opportunity to gain experience in applied economics or in a discipline closely related to economics.
Prerequisite: Junior or senior standing and consent of internship coordinator.
Repeatable for credit
Credit / No Credit
3 units
ECON 190. History of Economic Thought
The meaning and relevance of classical economic theory; origins of political economy; Adam Smith to J.S. Mill. 
Prerequisite: Upper division standing or instructor consent. 
Normal Grade Rules
4 units

ECON 193. New Institutional Economics
Introduces recent approaches to the study of institutions in economics and other social sciences. Examines how formal and informal institutions, including laws, contracts, norms and conventions, affect economic and political outcomes from a global perspective. 
Prerequisite: ECON 001B
Notes: Offered summer and winter sessions and occasionally during the academic year.
Normal Grade Rules
4 units

ECON 195. Computational Methods for Economics
Covers the use of software which has the greatest applicability in economics and related social sciences; i.e., spreadsheets, databases, and programs for statistical analysis of data and numerical computation. Examples of software programs that may be covered include Excel, Gretl, Matlab/Octave, Netlogo, R, and STATA. 
Prerequisite: ECON 1A, ECON 1B and a semester of statistics.
Normal Grade Rules
4 units

ECON 196. History of Economic Thought
The meaning and relevance of classical economic theory; origins of political economy; Adam Smith to J.S. Mill. 
Prerequisite: Upper division standing or instructor consent. 
Normal Grade Rules
4 units

ECON 200. Seminar in Law and Economics
Examines economic effects of legal institutions and doctrines, existing and proposed, on managerial decision making. Evaluates the interactions between legal and economic principles using examples of escalating demands on private firms and public agencies presented by changing legal and quasi-legal structures. 
Prerequisite: Previous education in economics and business law helpful, but not essential. 
Normal Grade Rules
3 units

ECON 201. Seminar in Microeconomic Analysis
Advanced analysis of costs, pricing, revenue, market structures, economic efficiency, rates of wages, rent, interest, profits and allocation of resources; analytical models and economic equilibrium. 
Prerequisite: ECON 101 and ECON 104. 
Normal Grade Rules
3 units

ECON 202. Seminar in Macroeconomic Analysis
Aggregate analyses of inflation and unemployment (and of alternative fiscal and monetary policies) using general equilibrium and dynamic disequilibrium adjustment models of real output, labor, real capital and financial markets (both domestic and international). 
Prerequisite: ECON 101, ECON 102 (or equivalents approved by the instructor, with grades of "B" or better). 
Normal Grade Rules
3 units

ECON 203. Seminar in Econometric Methods
Elements of statistical inference (t, F and Chi-square tests); the classical regression model and simultaneous equations models; estimation and prediction; the use of lagged and dummy variables; problems of multicollinearity, heteroskedasticity, serial correlation of disturbances and errors in the variables. 
Prerequisite: ECON 103 or instructor consent. 
Normal Grade Rules
3 units

ECON 204. Seminar in Mathematical Economics
The use of mathematical techniques such as differential and integral calculus, linear algebra, topology, differential and difference equations, mathematical programming, optimal control theory and game theory to analyze economic models. 
Prerequisite: ECON 104 (or equivalent). 
Notes: Offered summer and winter sessions and occasionally during the academic year. 
Normal Grade Rules
3 units

ECON 205A. Economic Decision Making (Quantitative Economic Analysis for Public Decision-Making)
The nature and use of techniques for estimating the impact of alternative courses of action. Emphasizes fiscal impact analysis, cost benefit analysis, input-output analysis and multiplier methods. 
Prerequisite: ECON 101 and ECON 102, or instructor consent. 
Notes: Usually offered in the Fall semester. 
Normal Grade Rules
3 units

ECON 205B. Workshop in Policy Analysis
Survey of major areas of economic policy such as taxes, transportation, health, housing, environment, trade and education. Students prepare a written report on some topic of policy analysis and present the results to the class. 
Prerequisite: ECON 205A or instructor consent. 
Notes: Usually offered in the Spring semester. 
Repeatable for credit 
Normal Grade Rules
3 units

ECON 206. Managerial Economics
Aspects of microeconomic theory relevant to managerial decision-making; consumer demand theory, estimation and forecasting; production and cost theory and estimation; managerial decision-making under the competitive market structure; optimal pricing strategies; investment decisions and capital budgeting. 
Prerequisite: ECON 1A, ECON 1B, ECON 101 or ECON 106, elementary statistics or instructor consent. 
Notes: Usually offered once per year. 
Normal Grade Rules
3 units

ECON 212. Seminar in Economic Development and Institutions
Advanced topics in development and under-development in world economy, growth theory, empirical data sources and analysis and use of quantitative methods in development planning. 
Prerequisite: Instructor consent. 
Normal Grade Rules
3 units

ECON 221. Industrial Organization
Analysis of the relations between industry structures, business conduct and economic performance under conditions of limited governmental interference. Appraises the role of competition and monopoly in the American economy. Stresses the role played by antitrust laws and regulatory commissions in the U.S. economy. 
Prerequisite: Instructor consent. 
Normal Grade Rules
3 units

ECON 232. Seminar in Public Finance
The public sector. Determination of objectives of the public sector; pricing and output in the public sector; taxes, their distribution and allocative effects; public expenditure theory, public debt theory and policy. 
Prerequisite: Instructor consent. 
Normal Grade Rules
3 units

ECON 235. Seminar in Monetary Theory and Policy
Concentration on the theoretical aspects of money and monetary policy. Early and modern theories of money demand; early Keynesian and Monetarist monetary analysis; expectations and dynamic monetary business cycles; monetary policy under the Keynesian, Monetarist and New Classical assumptions; open economy monetary theory. 
Prerequisite: ECON 1A, ECON 102 and ECON 135, or instructor consent. 
Normal Grade Rules
3 units
ECON 236. Seminar in International Trade and Finance
Advanced theory of international trade and finance and its application to current problems in international economics.
Prerequisite: Instructor consent.
Notes: Not offered on a regular basis.
Normal Grade Rules
3 units

ECON 250. Seminar in Labor Economics
Analysis of labor markets, utilizing economic theory and empirical techniques with applications to public policy. Topics include: investment in human capital, employee compensation issues, compensating wages, discrimination, unions, and public sector labor markets.
Prerequisite: Instructor consent.
Notes: Offered summer and winter sessions and occasionally during the academic year.
Normal Grade Rules
3 units

ECON 285. Applied Economics Internship
Supervised work with a private or public employer.
Prerequisite: Graduate standing and 3.0 GPA.
Credit / No Credit
3-6 units

ECON 290R. Culminating Experience Support
Department and University support for progress to completion of culminating experience.
Pre-requisite: Outstanding RP grade in a preceding semester in a culminating experience class or project.
Mandatory CR/NC/RP
1 unit

ECON 298. Special Study
Advanced individual research projects.
Prerequisite: Instructor consent and department chair approval.
Repeatable for credit
Credit / No Credit
1-3 units

ECON 298E. Special Study Comprehensive Exam
Individual preparation for the comprehensive exam. Students must file for candidacy before enrolling. Approval of department chair, graduate advisor, or instructor is required. Satisfactory completion satisfies culminating experience requirement.
Mandatory CR/NC/RP
1 unit

ECON 299. Master's Thesis or Project
Open only to approved candidates for the MA - Economics degree.
Description: Open only to approved candidates for the MA - Economics degree.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
Education - Communicative Disorders and Sciences, Department of Courses

AUDIOLOGY

UPPER DIVISION

EDAU 115. Introductory Hearing Science
Anatomy, physiology and psychoacoustics of the auditory system; theories of hearing and physics of sound.
Prerequisite: CDS major, upper division standing, or instructor consent.
Normal Grade Rules
3 units

EDAU 170. Audiology I
Theory and application of the fundamentals of pure tone and speech, audiometric procedures and immittance measurements basic to identification audiometry and the differential diagnosis of peripheral auditory problems.
Prerequisite: EDAU 115 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
  Normal Grade Rules
  3 units

EDAU 172. Introduction to Principles of Aural Rehabilitation
Principles and methods of aural rehabilitation procedures. Components include development of listening, visual and oral communication skills; psycho-social aspects of hearing loss.
Prerequisite: EDAU 115 and EDAU 170.
  Normal Grade Rules
  3 units

EDAU 177. Practicum in Audiology
Supervised clinical experience in basic testing and treatment of children and adults with communicative disorders due to hearing impairments.
Prerequisite: EDAU 170 and EDAU 172 or instructor consent.
  Repeatable for credit
  Credit/No Credit
  3 units

EDAU 180. Individual Studies
Supervised study in specific fields of audiology not covered by offered courses.
Prerequisite: Upper division standing and area coordinator consent.
  Repeatable for credit
  Credit/No Credit
  1-3 units

SPEECH PATHOLOGY

LOWER DIVISION

EDSP 060. Communication Disorders Service Program
For students with speech, language and hearing behaviors that interfere with daily communication. Individual student needs determined by assessment conducted at beginning of semester.
Misc/Lab: Lab 3 hours.
  Repeatable for credit
  Credit/No Credit
  1 unit

EDSP 102. Language Development in Children
Students will acquire knowledge concerning the language learning process and theories as well as the factors that intervene in its normal development. We will review linguistic terminology, components in language, stages of language development, and language diversity factors.
Prerequisites: CDS major or instructor consent.
  Normal Grade Rules
  3 units

EDSP 110. Resources for Human Communication Disorders
Scope of human communication disorders and public attitudes affecting educational, sociological, psychological and vocational opportunities of the communication disordered. Management resources for the communication handicapped.
Prerequisite: CDS major, upper division standing, or instructor consent.
  Normal Grade Rules
  3 units

EDSP 111. Introduction to Phonetics
Principles of the International Phonetic Alphabet and their application.
Prerequisite: CDS major, upper division standing, or instructor consent.
  Normal Grade Rules
  3 units

EDSP 112. Treatment and Management of Speech-Language Disorders
Impact of technological and societal changes on the delivery of human communication services with emphasis on study of cultural diversity in communication disorders.
Prerequisite: EDSP 110 and EDSP 111.
Misc/Lab: Lecture/lab 5 hours.
  Normal Grade Rules
  3 units

EDSP 113. Speech Science
Analysis and measurement of the components and processes involved in the production and reception of speech.
Prerequisite: CDS major, upper division standing, or instructor consent.
  Normal Grade Rules
  3 units

EDSP 120. Articulation and Language Disorders
Etiology and remediation for deviant and disordered articulation and language.
Prerequisite: EDSP 102, EDSP 110, EDSP 111 EDSP 113 or instructor consent.
Misc/Lab: Lecture/lab 5 hours.
  Normal Grade Rules
  3 units
EDSP 124. Assessment in Speech Pathology
Principles and practices of assessment of language, speech and communication disorders. Clinical procedures and theory in diagnostic evaluations.
Prerequisite: EDSE 102, EDSP 110, EDSP 111 or instructor consent.
Misc/Lab: Lecture/lab 5 hours.
Normal Grade Rules
3 units

EDSP 125. Language Disorders
Etology and remediation of deviant and disordered language.
Prerequisite: EDSE 102, EDSP 110, EDSP 111 or instructor consent.
Misc/Lab: Lecture/lab 5 hours.
Normal Grade Rules
3 units

EDSP 161. Normal Processes of Speech, Language and Hearing
Normal neuropsychological processes of swallowing, speech, language and hearing. Normal functioning of the nervous system in sensory, cognitive and motor processes.
Prerequisite: Upper division standing, EDSP 113 or instructor consent.
Normal Grade Rules
3 units

EDSP 162. Communication Disorders of Aging
Prerequisite: EDSP 110, EDSP 112, EDSP 113, EDSP 120, EDSP 125, EDSP 161 or instructor consent.
Normal Grade Rules
3 units

EDSP 177. Practicum in Speech Pathology
Supervised clinical experience with children and adults who have speech and language disorders.
Prerequisite: EDSP 112, EDSP 120 and EDSP 125 or instructor consent.
Credit / No Credit
1-3 units

EDSP 180. Individual Studies
Supervised study in specific fields of speech pathology.
Prerequisite: Upper division standing and area coordinator consent.
Repeatable for credit
Credit / No Credit
1-3 units

EDSP 212. Research Seminar in Communicative Disorders
An overview of the theory, procedures, application and use of research in educational settings; assist in the study of a specific area of applied research from the current professional literature; and assist in the development of a specific research proposal.
Normal Grade Rules
3 units

EDSP 222. Navigating Oral and Written Connections: Theory and Applications
Explores and discusses connections between listening, speaking, reading and writing with applications in assessing and planning intervention programs for monolingual and bilingual individuals who have a developmental or acquired language-learning disabilities. Required for speech-language pathologists.
Prerequisite: EDSP 251, EDSP 259, EDSP 262, EDSP 276 or instructor consent.
Normal Grade Rules
3 units

EDSP 251. Seminar in Phonological Disorders
Establishes a level of advanced competency in the knowledge and understanding of phonology and phonological disorders: the procedures of analysis, the assessment of phonological disorders and the establishment of intervention strategies as a logical consequence of diagnostic findings.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 254. Seminar in Neurological Disorders
Provides an understanding of the neuropsychological, cognitive and linguistic correlates underlying adult neurological disorders. Assessment and treatment for a variety of disorders emphasized.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 255. Seminar in Motor Speech Disorders
Provides an understanding of anatomy, physiology and neurology of motor speech disorders. Emphasis on assessment and treatment of apraxia and dysarthrias.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 258. Seminar in Fluency and Voice Disorders
Explores the anatomical, neuroanatomical, physiological, and behavioral foundations of fluency and voice disorders. Methods for assessing fluency and voice disorders will be reviewed. Evidence-based individual and group therapy approaches to treatment.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 259. Seminar in Language Disorders in Children
Provides an understanding of the neuropsychological, cognitive and linguistic correlates of developmental language disorders which underlie the competencies to diagnose and provide treatment for children with language impairments.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 260. Seminar in Dysphagia
A review of the anatomic, neurologic, physiologic, and behavioral correlates of normal and disordered swallowing across the life-span. Assessment and treatment of swallowing disorders will be emphasized in children and adults with genetic and acquired disorders.
Prerequisite: EDSP 254, 255, 265 or Instructor Consent.
Normal Grade Rules
3 units

EDSP 262. Speech and Language in a Cross-Cultural Society
Communication development and disorders in bilingual clients. Emphasis on the assessment of such disorders to the bilingual population.
Normal Grade Rules
3 units

EDSP 264. Contemporary Professional Issues
Organization and development of profit and nonprofit agencies that serve the communicatively impaired. Role and responsibilities of supervisors included.
Normal Grade Rules
3 units

EDSP 265. Seminar in Cognitive Disorders
Provides a framework for better understanding the process of cross-generational communication and the improvement of communication competencies for interaction with cognitively impaired persons.
Normal Grade Rules
3 units

EDSP 269. Field Experience in Public Schools - Speech Pathology and Audiology
Supervised teaching in speech pathology and audiology. Two hundred clock hours minimum requirement for credential as speech, language and hearing specialist.
Repeatable for credit
Normal Grade Rules
10 units

EDSP 276. Practicum in Advanced Assessment
Supervised clinical experience in assessment of a variety of speech/language disorders. Laboratory and classroom experience required.
Prerequisite: EDSP 124 and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
EDSP 277. Advanced Practicum-Speech Pathology
Working with children, adult, and group clients within a clinical practicum setting including preparing lesson plans, analyzing assessment results, developing and implementing therapy activities, collecting data, conducting client conferences and writing reports and home programs.
Prerequisite: Graduate standing and instructor consent.
Repeatable for credit
Normal Grade Rules
1-3 units

EDSP 278. Clinical Management and Practicum
Supervised clinical experience
Prerequisite: EDSP 254, EDSP 255, EDSP 276, EDSP 277 and instructor consent.
Repeatable for credit
Credit / No Credit
6-10 units

EDSP 288. Seminar in ACC and Communication Disorders
Exploration of how augmentative and alternative communication is used for individuals with complex communication needs. The impact of cognition, educational, physical, psychosocial and linguistic aspects of behavior on AAC use, assessment, intervention and research will be explored.
Prerequisite: EDSP 255, graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 298. Special Studies
Supervised study in a specific field of speech pathology.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

EDSP 299. Master’s Thesis
Supervised thesis work in the field of speech pathology.
Prerequisite: Instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units
Education - Counselor Education, Department of Courses

COUNSELOR EDUCATION

LOWER DIVISION

EDCO 004. Personal, Academic and Career Exploration
This course explores the concepts and applications of personal decision-making. Introduction to lifespan development concepts through the use of self-assessment instruments and procedures. Orientation to San Jose State University.
- Normal Grade Rules
- GE: E
- 3 units

EDCO 010. Adjunct Learning
Reading/writing/learning skills necessary for comprehension of textbooks and lectures in various disciplines; includes notetaking, exam preparation and library techniques. Not repeatable for graduation credit.
- Repeatable for credit
- Credit / No Credit
- 1-2 units

EDCO 215. Introduction to Counseling and Guidance
Introduction to the theories, concepts and competencies of counseling and guidance. Overview of the related professional roles and settings.
- Normal Grade Rules
- 3 units

EDCO 218. Practicum in Guidance I
Develops skills in the use of a systematic communication process and psychodynamic action methods. In Program courses, these processes together are basic to all further individual and group counseling and teaching courses. One weekend required.
- Credit / No Credit
- 3 units

EDCO 219. Practicum in Guidance II
Provides for the expansion and extension of the skills with a focus on group systems communication. Media will be used to help students be aware of constructive and destructive elements of interpersonal functioning in group systems. Two intensive training weekends.
- Repeatable for credit
- Credit / No Credit
- 3 units

EDCO 221. Research Seminar in Counselor Education
An overview of the theory, procedures, application and use of research in educational settings; assist in the study of a specific area of applied research from the current professional literature; and assist in the development of a specific research proposal.
- Normal Grade Rules
- 3 units

EDCO 227. Dynamics of Community/School Relations
Psychological dynamics and social relationships influencing community and school. A major focus on increased understanding of multicultural and historical traditions in relation to pupil personnel services.
- Normal Grade Rules
- 3 units

EDCO 232. Laws and Ethics for Counselors
Meets the requirement “Laws relating to children and child welfare” in the Student Counseling Programs. Covers local, state and federal laws relating to children, youth and family.
- Normal Grade Rules
- 2-3 units

EDCO 244G. Seminar in Cultural Perspectives in Counseling
Advanced study of concepts and procedures of counseling and consulting with an emphasis on understanding human behavior dynamics in the context of specific ethnic and cultural experiences.
- Normal Grade Rules
- 3 units

EDCO 248. Dynamics of Behavior and Development
Study of the dynamics of individual and group behavior over the lifespan. Specific study of selected personality and development theory and practices.
- Normal Grade Rules
- 3 units

EDCO 266. Education and Career Planning
Study of theory and practice of educational and career planning. Includes sources, uses, evaluation and filing of educational and career information and procedures for working with both individuals and groups.
- Normal Grade Rules
- 3 units

EDCO 267. Practicum in Lifespan and Career Development
Practicum in lifespan development and career planning with emphasis on the development of applied skills in career counseling. May be repeated for credit when an alternate focus is shown in the Schedule of Classes.
- Prerequisite: Core curriculum.
- Repeatable for credit
- Normal Grade Rules
- 1-3 units

EDCO 268. Lifespan Development Theory
Study of lifespan and career development across cultures and ages. Emphasis on the holistic integration of cognitive, affective and physiological aspects of development over the lifespan. This development considered in the context of diverse cultural and ethnic perspectives.
- Normal Grade Rules
- 3 units

EDCO 269. Transpersonal Development Theory
Development of further understanding of theoretical material focusing on transpersonal theory and its application to individual and institutional renewal, creativity, curricula and workshops. Recommended for further journal practice.
- Normal Grade Rules
- 3 units

EDCO 279. Advanced Group Process Theory and Practice
Focus on diverse theoretical approaches in group dynamics, group facilitation/leadership and the group as an instrument of learning within varying institutional settings.
- Prerequisite: Core curriculum and instructor consent.
- Normal Grade Rules
- 3 units

EDCO 280. Practicum in Multicultural Counseling
Focus on individual and group counseling skills with emphasis on unique aspects of varying cultures. May be repeated for credit when an alternate focus is shown in the Schedule of Classes.
- Prerequisite: Core curriculum.
- Repeatable for credit
- Normal Grade Rules
- 3 units

EDCO 282. Educational Assessment for Counselors
Utilization of standardized group tests and other evaluative techniques of ability and achievement with special emphasis upon interpretation and use of test results in the improvement of instruction and in administrative procedures. Elementary statistical techniques essential for test interpretation.
- Normal Grade Rules
- 3 units
EDCO 283. Advanced Educational Assessment
Concept and practice in uses of standardized evaluative instruments in school and community. Emphasis on generating curriculum and guidance hypotheses for groups.
Prerequisite: Core curriculum.
Normal Grade Rules
3 units

EDCO 286. Theory of Organization Change
Organizational development theory and practice with emphasis given to school and related agency settings. Knowledge and skill development in using institutional change strategies and innovations stressed.
Prerequisite: Core curriculum.
Normal Grade Rules
3 units

EDCO 287. Seminar in Guidance Systems Analysis
Problems of handling data in school systems. In addition to the functional analysis, includes development of computer software applications. Flexibility given in terms of the special areas of interest to the students.
Prerequisite: Core curriculum and instructor consent.
Normal Grade Rules
3 units

EDCO 288. Seminar in Counseling Theory and Practice
Assists students in the clarification of philosophical and psychological theory and develops a consistent individual and group counseling theory in relation to a defined lifestyle and the study of practice in school and agency settings.
Prerequisite: Core curriculum.
Corequisite: EDCO 280.
Normal Grade Rules
3 units

EDCO 289. Seminar in Professional Counseling
A culminating seminar which emphasizes a critical review and critique of theory and research in application of human development specialties. May be repeated for credit when an alternate focus is shown in the Schedule of Classes.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

EDCO 292. Supervised Experience in Counseling
Supervised field experience in guidance and counseling. Assignments to public schools or agencies.
Prerequisite: Core curriculum.
Repeatable for credit
Credit / No Credit
3-6 units

EDCO 293. Practicum in Child and Substance Abuse
A practicum in peer group systems and psychodrama counseling intervention for treatment of addiction, physical and sexual abuse, teen pregnancy and other at-risk groups. Required participation in a peer group counseling process.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

EDCO 294. Practicum in Self-Development
Facilitates training in individual and group counseling methods, including transpersonal journal, psychodrama and peer group techniques.
Prerequisite: EDCO 218, EDCO 219 and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

EDCO 298. Special Studies in Education
Supervised study in the field of counseling and guidance.
Prerequisite: Consent of program director or designated faculty.
Repeatable for credit
Credit / No Credit
1-3 units

EDCO 299. Master’s Thesis
Supervised thesis in the field of counseling and guidance.
Prerequisites: Advanced to candidacy, satisfactory completion of EDCO 221 & advisor/designated faculty consent
Repeatable for credit
Mandatory CR/NC/RP
3 units
EDUCATIONAL LEADERSHIP

EDD 501. Quantitative Analysis for Educational Research
Students will develop a comprehensive understanding of the statistical principles used in the description and analysis of data. Students will also learn how to conduct appropriate statistical analyses, interpret findings, and compose meaningful reports while examining how these skills can lead to being a more informed and involved educator.
Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 502. Qualitative Methods in Educational Research
Explores qualitative research approaches and methods including participant observation, interviews, ethnography, narrative and case study approaches; includes methods of data analysis such as discourse analysis, dialogic analysis, and visual analysis.
Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 510. Educational Leadership: Theory and Practice
This course presents an overview of the major concepts and theories that constitute the knowledge base in the leadership of education, including an examination of leadership theories from early models of hierarchical control to contemporary models of shared leadership and organizational transformation.
Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 511. Leadership for Learner Centered Organizations
Students will develop the knowledge and skills for examining, designing and implementing organizational, classroom, and training conditions that support quality learning experiences for individuals in the organization.
Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 512. Leadership, Complexity, and Systems Thinking
This course presents principles, theories, attributes related to individual leadership development. It includes concepts related to systems thinking that are critical to the long-term sustainability of your school, agency, or organization.
Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 515. Leadership, Diversity, and Culture: Family, School and Community Connections
Educational leadership and management issues related to an increasingly diverse student body in educational institutions. Reviews educational research, practice, theory and legal matters within local and global contexts. Students engage in activities and discussions focused on strategies utilized by social justice advocates that have the potential to improve educational experiences and opportunities in P-12 settings, and in university-school-community partnerships. Emphasis placed on the interaction between underrepresented segments of society and educational institutions with attention to varying cultural backgrounds, communication patterns, social networks, leadership and administrative styles.
Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 520. Organizational Behavior and Change in Education
This course seeks to interpret and analyze observed organizational processes, behavior, and potential solutions using theoretical insights. The course relies on seminar discussions, theory applications, and an organizational change design project and evaluation research design.
Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 522. Communication and Educational Leadership
This course analyzes popular narratives on education and practices persuasive, rhetorical strategies for using those narratives to shape public expectations of educators, students, and schools.
Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 525. District Office Administration: The Superintendent
An overview of the major concepts and theories that constitute the knowledge base in the superintendency, including public education governance, roles, characterizations and management responsibilities, the conditions of practice and contemporary challenges, the school organization, federal and state policy and superintendent-school board relations.
Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 530. Assessment, Testing and Evaluation: Contexts and Implications for School Reform
This course provides a historical, analytical and empirical framework for understanding assessment, testing and evaluation in K-12 education. The context aims at exploring the current national and state accountability policy regimes in the U.S. particularly those linked to the Common Core Standards movement.
Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 535. Education Policy, Resource Allocation and School Reform
This course is designed for students to develop understanding of education policy. The course explores the formation, design, and implementation of school reform efforts across different levels of educational system.
Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 540. Education and Leadership in Global Context: Globalization & Narrative Ethics
This course provides global perspectives on education and leadership in contemporary society with emphasis on social, political, and economic factors that affect access and equity and the role of leadership.
Normal Grade Rules
3 units

EDD 585. Field Experience: Global Context
Lectures, field visits, and extended study of education and leadership in global context
Mandatory CR/NC/RP
3 units

EDD 591A. Proseminar I: Introduction to Doctoral Studies in Educational Leadership
This course provides an orientation to the doctoral program in educational leadership, doctoral studies more generally, and an overall introduction to educational leadership studies. The seminar will discuss the skills and practices needed to be successful doctoral students, both as consumers and producers of research.
Normal Grade Rules
3 units
EDD 591B. Proseminar II - Practitioner-Led Research
The course content focuses on practice-led research methods and the problems they are best suited to answer. In practice-led research, the primary focus of the research is to advance knowledge about practice, or to advance knowledge within practice.
Normal Grade Rules
3 units

EDD 591C. Professional Seminar III: Structuring & Writing a High Quality Dissertation
The focus of the seminar is to facilitate the production of a high quality dissertation. Candidates will gain a deep understanding of the expectations of dissertation writing by examining published dissertations and considering relevant applications to their own dissertation writing.
Normal Grade Rules
3 units

EDD 599. Dissertation
Over the final year of the program, students must enroll in 12 units of dissertation credit. This course carries degree credits to recognize work done on the dissertation and is to be used on the candidacy form and to fulfill graduation requirements.
Prerequisite: Acceptance into the Ed.D. Program
Credit / No Credit
1-12 units
Education - Educational Leadership, Department of Courses

ADMINISTRATION AND HIGHER EDUCATION

GRADUATE

EDAD 200. The School Manager
Management skills for leading effective school organizations. Present and emerging issues in our society and how they relate to schooling. Governance of education.
Prerequisite: Admission to Graduate Division.
Normal Grade Rules
3 units

EDAD 201. The School Leader
Leadership as principal and program administrator in a variety of settings. Promotion of successful learning. Instructional program administration. Personnel functions at school level. Group problem solving and decision-making.
Prerequisite: Admission to Graduate Division
Normal Grade Rules
3 units

EDAD 202. The Educator
Prerequisite: Admission to Graduate Division
Repeatable for credit
Normal Grade Rules
3 units

EDAD 203. The School Human Resources Administrator
Certificated staff supervision and staff development. Organization development, staff motivation and personnel management functions at the district level.
Prerequisite: Admission to Graduate Division
Normal Grade Rules
3 units

EDAD 204. School Fiscal and Legal Leadership
Prerequisite: EDAD 200 and admission to Graduate Division
Normal Grade Rules
3 units

EDAD 205. The School Leader in the Community
Mobilization of community and public agency resources. Response to cultural and socio-economic diversity in the community. Communication with the community.
Prerequisite: Admission to Graduate Division.
Normal Grade Rules
3 units

EDAD 206. Advocate for All Students
Administration of programs for handicapped, economically disadvantaged and other exceptional students. Needs assessment and goal setting. Preparation of proposals for competitive funding to foundations and public agencies.
Prerequisite: Admission to Graduate Division.
Normal Grade Rules
3 units

EDAD 221A. Research Seminar Ed Leadership
To provide an overview of the theory, procedures, application, and use of research in educational settings. To deepen your understanding of the ways that educational research can be brought to bear on the challenges of practice.
Normal Grade Rules
3 units

EDAD 221B. Research Seminar Ed Leadership: Methods
To provide an overview of theory, procedures, application, and research in educational settings. To assist in the study of a specific area of applied research from the current professional literature and in the development of a specific research proposal.
Prerequisite: EDAD 221A
Normal Grade Rules
3 units

EDAD 221C. Research Ed Leadership: Data Collection
To provide an overview of and support during data collection, data organization, and preliminary analyses of findings. To assist in the study of a specific area of applied research from the current professional literature to carry out a specific research project.
Prerequisites: EDAD 221A and EDAD 221B
Normal Grade Rules
3 units

EDAD 242A. Fieldwork: Effective Leadership
This fieldwork course focuses on dispositions of effective educational leadership and provides for the application of administrative skills in various educational settings in instructional leadership, school management, personnel management, and business management.
Prerequisite: Program director consent.
Repeatable for credit
Credit / No Credit
3 units

EDAD 242B. Fieldwork: Instructional Leadership
This fieldwork course focuses on dispositions of effective instructional leadership and provides for the application of administrative skills in various educational settings in instructional leadership, school management, personnel management, and business management.
Prerequisite: EDAD 242A
Repeatable for credit
Credit / No Credit
6 units

EDAD 242C. Fieldwork: Assessing Resources
This fieldwork course focuses on the application of administrative skills in various educational settings in instructional leadership, school management, personnel management, and business management. Leadership skills will be developed for the management of school change initiatives.
Prerequisite: EDAD 242A and EDAD 242B
Credit / No Credit
6 units

EDAD 242D. Fieldwork: Advocacy
This fieldwork course focuses on dispositions of critical leadership while advocating for all students and provides for the application of administrative skills in various educational settings in instructional leadership, school management, personnel management, and business management.
Prerequisite: EDAD 242A, EDAD 242B, and EDAD 242C
Credit / No Credit
6 units

EDAD 242H. Educational Field Work in Higher Education
Designed to provide opportunity for supervised field experience in administration in community colleges and universities.
Repeatable for credit
Credit / No Credit
3 units

EDAD 253. Seminar in Administration in Educational Settings
Analysis of practical problems in educational administration. Application of planning, evaluation and research methodologies to problems in education.
Prerequisite: Completion of all other courses in the administrative credential sequence and EDLD 221.
Repeatable for credit
Normal Grade Rules
3 units
EDAD 270. Administrative Assessment and Induction
Assessment activities for development of Professional Development Action Plan. Development of a plan with official district representative, student, mentor and university supervisor.
Prerequisite: Admission to Professional Services Credential Program.
Credit / No Credit
2 units

EDAD 275A. The Successful School
Based on problem approach to educational administration through exploration of essential questions dealing with leadership in successful schools. Challenged to answer questions/problems in a way that continues development as an educational leader. Challenged to raise questions/problems that you feel are essential.
Prerequisite: EDAD 270 and admission to Professional Services Credential Program.
Normal Grade Rules
2 units

EDAD 275B. Improving Schools From Within and Without
One of the courses in the core program of the Professional Credential Program. Assessment and improvement of school level learning support systems; development, supervision and evaluation of certificated staff.
Prerequisite: EDAD 270 and admission to the Professional Services Credential Program.
Normal Grade Rules
6 units

EDAD 275C. Building Equity in Diverse Communities
One of the courses in the core program of the Professional Credential Program. Exploring leadership behaviors that maximize learning for all students.
Prerequisite: EDAD 270 and EDAD 275B.
Normal Grade Rules
2 units

EDAD 275D. Politics and Economics of Education
One of the courses in the core program of the Professional Credential Program. School, district, state and federal governance, and management. Private sector/public sector financial relationships and school/community pressure groups.
Prerequisite: EDAD 270 and admission to the Professional Services Credential Program.
Normal Grade Rules
2 units

EDAD 285A. Advanced Fieldwork/Peer Coaching/Mentoring
Supervised advanced field experiences for school administrators. Peer coaching skills are applied to specialization areas. May not be repeated in the same semester.
Prerequisite: EDAD 270, admission to Graduate Division and admission to the Professional Services Credential Program.
Repeatable for credit
Credit / No Credit
2-6 units

EDAD 298. Individualized Studies in Education
Supervised study in school administrations for both the Preliminary and Professional Services Credential Programs.
Prerequisite: Admission to Graduate Division, EDAD 200 or EDAD 270, advisor consent.
Repeatable for credit
Credit / No Credit
1-4 units
Education - Elementary Education, Department of Courses

ELEMENTARY EDUCATION

UPPER DIVISION

EDEL 102. Psychological Foundations of Education
Cognitive, affective and social/emotional development related to school settings. Theories of development, learning and instruction, critically examined. Other topics include individual differences, measurement, evaluation, instructional goals, classroom management and diversity in the classroom.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

EDEL 103. Social-Multicultural Foundations of Education
Foundational preparation focused on implications of social, cultural, linguistic and economic diversity on teaching and learning. Emphasis on understanding the implications of history and social context on the educational endeavor in a pluralistic and democratic society.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

EDEL 108A. Curriculum: Reading/Language Arts
Elementary school language/literacy acquisition in culturally diverse classrooms; emphasis on listening, speaking, reading and writing within the context of theory and practice. May be repeated for different subtitle.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
2-6 units

EDEL 108B. Curriculum: Science
Elementary school science curriculum and theoretical approaches; emphasis on materials, methods, content and evaluation procedures for teaching science in elementary and middle schools in a multicultural and technological society. May be repeated for different subtitle.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
1-3 units

EDEL 108C. Curriculum: Social Studies
Elementary school social studies curriculum and instruction with emphasis on the influence of ethnic, linguistic, cultural, economic, gender and disability factors on present day culture.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
1-3 units

EDEL 108D. Curriculum: Mathematics
Elementary school mathematics curriculum and methodology relationships between instructional materials and how children construct knowledge; the role of technology and issues that bear on the teaching of school mathematics. May be repeated for different subtitle.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
1-3 units

EDEL 108E. Teaching Reading in Linguistically and Culturally diverse classrooms
Prerequisite: LLD 108, ENGL 103 or LLD 107.
Note: Should be taken in final semester of undergraduate program.
Repeatable for credit
Normal Grade Rules
3 units

EDEL 143A. Beginning Student-Teaching (Phase I)
Role of state and local government in education. Clinical observation of classroom, school and district organization. Emphasis on lesson planning.
Prerequisite: Upper division standing.
Repeatable for credit
Credit / No Credit
1-6 units

EDEL 143B. Advanced Student-Teaching (Phase II)
Practicum in public school classrooms at two grade levels for student teaching experience; includes field and campus seminar. Supervision by College of Education faculty.
Prerequisite: EDEL 143A.
Repeatable for credit
Credit / No Credit
1-10 units

GRADUATE

EDEL 205. Advanced Studies in Early Childhood Education Curriculum
Prerequisite: EDEL 102 and EDTE 208.
Normal Grade Rules
3 units

EDEL 243. Seminar in Early Childhood Education
Application of the psychological and sociological foundations of early childhood education to the classroom. Meets requirements of students seeking MA degrees in education with a concentration in early childhood education.
Prerequisite: EDTE 208 or instructor consent.
Normal Grade Rules
3 units

EDEL 286. Elementary School Mathematics
Comprehensive study of the theoretical and practical considerations underlying effective elementary and middle school mathematics programs. Emphasis on psychological/epistemological factors, research in mathematics education, including curriculum, materials, and gender and cross-national/cultural issues.
Prerequisite: EDEL 108D or instructor consent.
Normal Grade Rules
3 units

EDEL 291. Seminar in Teaching Elementary Social Studies
Recent developments and innovations in elementary social studies education including inquiry teaching, curriculum development and revision, implementation of social science concepts and development and utilization of multicultural studies for effective teaching.
Prerequisite: EDEL 108C.
Normal Grade Rules
3 units
TEACHER EDUCATION

UPPER DIVISION

EDTE 107. Clinical Supervision for Master Teachers
For master/resident teachers focusing on supervision of student teachers using clinical perspective. Proficiency in conferencing, observing instruction, data collecting and providing feedback gained while assisting student teacher’s progress in instructional planning, implementation and evaluation.
Prerequisite: Teaching credential or instructor consent.
Misc/Lab: Activity 2 hours.
Notes: Offered only on an irregular basis.
Repeatable for credit
Credit / No Credit
1 unit

EDTE 160. Integrating Asian Culture Into the Classroom
Integrating Asian languages and cultures into the classroom, enhancing knowledge and developing strategies for teaching in multicultural settings.
Prerequisite: Upper division standing.
Normal Grade Rules
1-3 units

EDTE 162. Meeting the Needs of Second Language Learners
Second Language acquisition theories and application of teaching in diverse secondary classrooms.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

EDTE 166. Pre-Professional Experience
Observation of learners; service as teacher assistants in public school classrooms; tutoring. May be repeated once.
Prerequisite: Upper division standing.
Repeatable for credit
Credit / No Credit
1-3 units

EDTE 180. Individual Studies
Supervised study in specific fields of elementary or secondary education not covered by offered courses.
Prerequisite: Division head consent.
Repeatable for credit
Credit / No Credit
1-3 units

EDTE 190. Health Education for the Classroom Teacher
Current problems of individual, family and community health. Theories, organization, methods and materials for teaching health education.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

EDTE 201. Critical Issues in Education
A cross-disciplinary investigation of fundamental value issues of American education in a democratic society, considered in the context of the problems and prospects of world civilizations.
Normal Grade Rules
3 units

EDTE 206. Advanced K-8 Curriculum and Instruction
Advanced methods in K-8 school curriculum and instruction for beginning teachers. Emphasis on best practices as delineated in the California Standards for the Teaching Profession.
Normal Grade Rules
3 units

EDTE 207. Comparative Education
Education systems in selected foreign countries. Emphasis given to educational objectives, curriculum content, teacher education and school organization.
Normal Grade Rules
3 units

EDTE 208. Educational Sociology
Role of education in modern social, economic and political life. The school as institution. Problems in American life which affect and are affected by public schools.
Normal Grade Rules
3 units

EDTE 209. History of Education
Major developments in educational thought and practice from ancient Greece to now; emphasis on Western Civilization.
Normal Grade Rules
3 units

EDTE 210. Becoming a Reader at Any Age
Theory and practice of teaching beginning and struggling readers and writers, both native and nonnative English speakers.
Prerequisite: EDEL 108A or EDSC 138A.
Normal Grade Rules
3 units

EDTE 211. Developing Academic Language for Reading Across the Curriculum
Focus on comprehension across subject areas for first and second language learners: background knowledge, fluency, vocabulary, and metacognition.
Prerequisite: EDEL 108A or EDSC 138A.
Normal Grade Rules
3 units

EDTE 212. Leadership, Politics and Literacy Program Evaluation
Review of reading research, public policy and effective literacy programs for curriculum leaders.
Prerequisite: EDTE 216 and EDTE 217.
Notes: Open to MA candidates in Reading only.
Normal Grade Rules
3 units

EDTE 213. Multicultural Literature for Children and Young Adults
Literature for children and young adults that reflects diverse experiences and perspectives. Will address the role of this literature in classrooms.
Normal Grade Rules
3 units

EDTE 214. Learning in a High Tech Environment
Teaching and learning with high technology from student-centered perspectives. Lab activities, field observations and investigations in individual areas of specialization. Includes theory to practice, exploring new uses of technology, logistics, leadership roles. May not repeated in the same semester.
Prerequisite: EDIT 122 (or equivalent).
Repeatable for credit
Normal Grade Rules
3 units

EDTE 215. A Constructivist Approach to Science
Advanced seminar in elementary and middle level science teaching and learning with emphasis on constructivist perspectives.
Prerequisite: EDEL 108B or equivalent.
Normal Grade Rules
3 units

EDTE 216. Ongoing Assessment in Your Classroom
Prevention and correction of reading/writing/language difficulties with emphasis on diagnosis and evaluation.
Prerequisite: EDEL 108A, EDSC 138A or instructor consent.
Normal Grade Rules
3 units

EDTE 217. Ongoing Assessment in a Clinical Setting
Application of research, diagnostic, prognostic and program development methodology in field settings.
Prerequisite: EDTE 216.
Credit / No Credit
3 units
EDTE 217A. Reading Practicum I  
For Reading/Language Arts Specialist Credential or Reading Certificate candidates. In a supervised after-school program, candidates work with struggling readers and implement effective ongoing assessment and instructional strategies to meet the needs of diverse struggling readers.  
Prerequisites: EDTE 210, EDTE 211, EDTE 216, EDTE 292.  
Misc/Lab: Lecture 2.5 hours/Activity 1.0 hours  
Credit / No Credit  
3 units  
EDTE 217B. Reading Practicum 2  
For Reading/Language Arts Specialist Credential or Reading Certificate candidates. In a supervised summer school program, candidates work with struggling readers and implement effective ongoing assessment and instructional strategies to meet the need of diverse struggling readers.  
Prerequisites: EDTE 210, EDTE 211, EDTE 216, EDTE 292.  
Misc/Lab: 2.5 hour Seminar/1.0 hour activity  
Credit / No Credit  
3 units  
EDTE 221. Research Seminar in Elementary Education  
An overview of the theory, procedures, application and use of research in educational settings; assist in the study of a specific area of applied research from the current professional literature; and assist in the development of a specific research proposal.  
Normal Grade Rules  
3 units  
EDTE 223. The Politics of Literacy  
State, national and global decisions about literacy instruction and the impact on the profession.  
Prerequisite: Teaching experience or English major.  
Normal Grade Rules  
3 units  
EDTE 224. Seminar in Educational Psychology  
Role of psychology in education. Contributions of educational research to current classroom practice and curriculum design. Applications of educational psychology research to current problems in education. Theoretical and practical approaches to understanding learning and teaching.  
Prerequisite: EDSC 172A and EDEL 102.  
Normal Grade Rules  
3 units  
EDTE 225. Theory and Practice of Dual Language Instruction  
Exploration of the historical, social and political contexts and theoretical foundations of bilingual education. Useful for all who will work with culturally or linguistically different children.  
Prerequisite: EDEL 103 or instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units  
EDTE 226. Seminar in Literacy Theories  
This course will explore various theoretical perspectives on literacy and language acquisition and development, the underlying research and practices related to some of the theories, and their impact on schooling and assessment.  
Normal Grade Rules  
3 units  
EDTE 230. Mathematics: Teaching Common Core (K-3)  
Course focuses on the mathematical knowledge for teaching K-3 Common Core content standards and mathematical practices within the domains of number, operations, and algebraic thinking. Additional emphasis on pedagogical strategies to foster motivation, engagement, and development of academic language.  
Normal Grade Rules  
3 units  
EDTE 231. Math Seminar: Common Core (grades K-3)  
Seminar focuses on implementation of Common Core standards and mathematical practices within teachers' specific curricular and school context. Emphasis on classroom implementation of high leverage mathematical practices within foundational K-3 content domains of number and operations, measurement, geometry, and data.  
Normal Grade Rules  
3 units  
EDTE 232. Mathematics: Teaching Common Core (4-8)  
Course focuses on mathematical knowledge for teaching 4th -8th grade Common Core content standards and mathematical practices within the domains of number, operations, proportional relationships, and algebra. Additional emphasis on strategies to foster motivation, engagement, and development of academic language.  
Normal Grade Rules  
3 units  
EDTE 233. Math Seminar: Common Core (grades 4-8)  
Seminar focuses on implementation of Common Core standards and mathematical practices within teachers' specific curricular and school context. Emphasis on classroom implementation of high leverage mathematical practices within foundational 4-8 content domains of algebraic thinking, measurement, geometry, statistics, and probability.  
Normal Grade Rules  
3 units  
EDTE 242C. Educational Internship in Teaching  
Repeatable for credit  
Credit / No Credit  
4-6 units  
EDTE 242R. Field Experience - Reading/Language Arts Specialist  
Conducting reading/language arts assessments; designing, organizing and implementing reading programs; assisting teachers with reading programs.  
Credit / No Credit  
1-4 units  
EDTE 244. Seminar in School Curriculum  
Curriculum in the elementary and middle level school. Includes current issues and practices, curriculum planning and interrelation of theory and practice in elementary education curriculum.  
Prerequisite: EDTE 208.  
Normal Grade Rules  
3 units  
EDTE 245. Supervision of Student Teaching  
Principles, procedures and problems of supervising classroom student teachers.  
Prerequisite: Teaching experience.  
Normal Grade Rules  
3 units  
EDTE 246. Classroom Management and Governance  
Study of theory, practice and research related to effective communication in bilingual/cross-cultural settings.  
Prerequisite: EDEL 102, EDEL 103, EDSC 172A and EDSC 173, or instructor consent.  
Normal Grade Rules  
1-3 units  
EDTE 247. Supervisory/Coaching Practices for Teacher Leaders  
Development of coaching/supervisory behaviors which encourage the development of reflective practitioners. Includes understanding of principles and methods of observing teachers and children, and how to record, analyze and share data to best meet their needs.  
Prerequisite: Two years teaching experience.  
Normal Grade Rules  
3 units  
EDTE 250. Qualitative Research in Education  
The role of qualitative research in education and society. Historical theoretical groundings, ethical considerations, procedures in development and evaluation of research proposals, techniques of research data analysis.  
Prerequisite: EDEL 221 or instructor consent.  
Normal Grade Rules  
3 units  
EDTE 255. Community College Education  
Introduction to the principles and practices of the community college. Course content includes background, organization, curriculum and contemporary issues in higher education.  
Prerequisite: Classified graduate status and/or instructor consent.  
Normal Grade Rules  
3 units
EDTE 256. Learning and Instruction in the Community College
Principles of learning, instructional materials and procedures; and evaluation of learning applied to community college instruction. 
Prerequisite: Classified graduate status and/or instructor consent.
Normal Grade Rules
3 units

EDTE 257. Supervised Student Teaching in the Community College
An assignment of teaching in the student’s major field in a community college for one quarter or one semester. Students are required to meet periodically with the supervisors from the Teacher Education Program.
Prerequisite: Instructor consent.
Credit / No Credit
3-4 units

EDTE 260. Critical Perspectives on Schooling for a Pluralist Democracy
Critical study of theory, practice and research related to effective communication in cross-cultural, multilingual settings.
Prerequisite: EDEL 103.
Normal Grade Rules
3 units

Study of cross-cultural communication for teachers with a focus on theory and practice related to language, culture and narrative in educational settings.
Prerequisite: EDTE 225 or instructor consent.
Normal Grade Rules
3 units

EDTE 262. Classroom Issues in the Language/Literacy Development of L2 Learners
Theories of first and second language acquisition and their application to teaching reading, writing and SDAIE in linguistically diverse classrooms.
Prerequisite: EDEL 108A, EDSC 138A or instructor consent.
Normal Grade Rules
3 units

EDTE 281. Philosophy of Education
Critical philosophical issues as they bear on education in a democratic society.
Normal Grade Rules
3 units

EDTE 290A. ESL Curriculum: Theoretical Foundations
Designed for practicing or prospective teachers of English as a Second Language. Emphasizes the social, psychological and cultural foundations of first and second language learning as they apply to the teaching of language minority students in American schools.
Normal Grade Rules
3 units

EDTE 290B. ELD Curriculum: Methods and Approaches
Emphasizes a practical approach to the learning and teaching of English to nonnative speakers. Focuses on all language modalities. Pays particular attention to specially designed academic instruction in English (SDAIE).
Normal Grade Rules
3 units

EDTE 290C. Research on Literacy Across the Curriculum for an Equitable Society
Emphasis on research/teacher inquiry with attention to research designs and methods from various disciplinary perspectives for the study of literacy. An historical look at three additional program themes: Reading and Writing Across Cultures and the Curriculum; Second Language Learners; and The politics of Literacy.
Pre/Corequisite: EDTE 290A or EDTE 290B.
Repeatable for credit
Normal Grade Rules
3 units

EDTE 290F. Assessing L1 and L2 Language and Literacy
Assessment of L1/L2 students’ language and literacy development and learning. Emphasis on authentic assessment, diagnosis and instructional decision-making. Classroom case studies.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

EDTE 292. Writing Across Cultures and the Curriculum
Research, theory and practice of writing development of instruction for native and nonnative English speakers. Emphasis on writing in an integrated curriculum.
Prerequisite: EDEL 108A or instructor consent.
Normal Grade Rules
3 units

EDTE 298. Special Studies in Education
Supervised study in a specific educational field.
Prerequisite: Consent of program director.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

EDTE 299. Master’s Thesis
Supervised thesis in the field of education. 
Prerequisite: Admission to candidacy for the master’s degree.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
EDSC 138A. Reading, Language and Instruction in Diverse Content Area Classrooms
Methods for incorporating reading and language instruction in subject area courses; theory and practice of specially designed academic instruction in English for limited English speaking students. Models of instruction for bilingual and limited English speaking students. Prerequisite: Program director consent.
Normal Grade Rules
3 units

EDSC 151. Learning Theories and Reading Instruction for Secondary Students
Addresses theories of teaching and learning, instructional design, and supporting diverse learning needs. Foundation for implementing learning theory and literacy instruction. Interns reflect on practice and apply theory through the development of professional portfolio. Prerequisite: EDSC 184X, Methods.
Normal Grade Rules
4 units

EDSC 152. Student Teaching/Seminar for Interns
Second course in a series required of second year interns. Interns examine student work and curriculum and implement literacy strategies and theories of learning. Includes classroom observation and feedback. Prerequisite: EDSC 151.
Credit / No Credit
3 units

EDSC 153. Student Teaching/Seminar for Interns
Third of three courses required of second year interns. Action research, peer observation, and self-reflection serve as vehicles for examining how instructional design affects student outcomes in content literacy. Includes classroom observations and professional development activities. Prerequisite: EDSC 152.
Credit / No Credit
2 units

EDSC 162. Language/Literacy Development of L2 Learners
Principles of language structure, variation, and usage. First and second language acquisition theories and application of teaching in diverse secondary classrooms. Social and psychological influences on linguistic behavior of students. Cultural and political issues affecting language attitudes. Prerequisite: Program Director consent.
Normal Grade Rules
3 units

EDSC 172A. Social, Philosophical Multicultural Foundations of Secondary Education
Social, cultural, historical and philosophical concepts in secondary teacher education. Application to problems of curriculum and instruction in multilingual, multicultural classrooms. Prerequisite: Program director consent.
Normal Grade Rules
4 units

EDSC 173. Psychological Foundations of Secondary Teacher Education
Application of developmental cognitive and socio-cultural theories of adolescent psychology and culture as a rationale for teaching and learning. Prerequisite: Program director consent.
Normal Grade Rules
3 units

EDSC 182. Assessment and Evaluation
Principles and practices of measurement and evaluation. Instructional objectives as criteria; construction, selection and use of evaluation instruments. Interpretation of data. Prerequisite: Program director consent.
Normal Grade Rules
3 units

EDSC 184X. Student Teaching I
Supervised teaching of public middle or high school students. In-class experience ranging from observation to classroom teaching. Emphasis on application of theories examined in foundation courses. Prerequisite: Program director consent.
Repeatable for credit
Credit / No Credit
5 units

EDSC 184Y. Student Teaching II
Minimum 80-120 class periods of classroom teaching in grades K-12. Related school activities. Prerequisite: Joint approval of major advisor, program director and field placement coordinator.
Repeatable for credit
Credit / No Credit
2-6 units

EDSC 184Z. Student Teaching III
Minimum 80-120 class periods of classroom teaching in grades K-12. Related school activities. Prerequisite: Joint approval of major advisor, program director and field placement coordinator.
Repeatable for credit
Credit / No Credit
1-6 units
SPECIAL EDUCATION

LOWER DIVISION

EDSE 014A. American Sign Language I
Introductory course covering basic vocabulary and grammatical structures, appropriate cultural and linguistic behaviors within the deaf community and basic information about the deaf community.
Normal Grade Rules
3 units

EDSE 014B. American Sign Language II
Continuation of EDSE 14A. Covers additional basic vocabulary and grammatical structures, cultural and linguistic behaviors within the deaf community and information about the deaf community.
Prerequisite: EDSE 14A or instructor consent.
Normal Grade Rules
3 units

UPPER DIVISION

EDSE 102. Speech, Language & Typical, Atypical Dev
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 104. Atypical Development in Young Children
Historical and philosophical background of intervention theories of learning related to young children with high risk development. Skills and techniques to promote optimal environments and appropriate methods for early intervention and stimulation of young children with special needs.
Prerequisite: CD 60 (or equivalent).
Normal Grade Rules
3 units

EDSE 105. Supervision and Induction Plan Evaluation
Supervised observation, support and feedback for new special education teachers and evaluation of the induction plan.
Prerequisite: Department consent.
Credit / No Credit
6 units

EDSE 108. Assessment and Evaluation: Atypical Young Children
Identification, description and assessment of atypical children ages birth through 8 years. Introduction to early intervention and collaboration.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 109. Introduction to Education of Deaf and Hard of Hearing Students
Characteristics of deaf and hard of hearing students. Historical, cultural, educational and linguistic aspects. Introduction to teaching and training techniques for deaf and hard of hearing students.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 114. Practicum and Student Teaching in Special Education
Field-based course to measure competency in a special education setting.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 118. Individual Studies
Supervised study of a specific problem or topic.
Prerequisite: Upper division standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

EDSE 192A. Including and Supporting Students
Preparation for teaching students with disabilities in general education; provides intervention strategies prior to referral for special education with policies and procedures regarding placement of and services for students with disabilities, either in special education or within an inclusive classroom.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 105X. Intern Support Seminar
Discussion about challenging aspects of Interns' jobs and a focus on problem solving. Collaboration and effective practices for collaborative group work is addressed. Interns learn to collaboratively interact with others, and to provide support to each other.
Prerequisite(s): Enrollment in the Collaborative Intern Program and teaching with an Intern Credential.
Repeatable for credit
Credit / No Credit
1 unit

EDSE 209. Educating Students with Emotional Disorders
Identification of students with emotional disorders, effective models of instruction, educational theories, teaching strategies and positive behavior support.
Prerequisite: Department consent.
Corequisite: EDSE 105 or instructor consent.
Normal Grade Rules
3 units

EDSE 213A. Curriculum, Instruction and Transition
Exploration of instructional practices and current issues for students with moderate-severe disabilities and English Learners with moderate-severe disabilities. Curriculum design aligned with content standards that promote life skills and successful student transition into school and community settings.
Prerequisite: EDSE 206A and department consent.
Normal Grade Rules
3 units

EDSE 214A. Augmentative and Alternative Comm Strat
The use of augmentative and alternative communication (AAC) devices and strategies for assessing and instructing individuals with complex communication needs in home, school, and community settings, and computer-based technology to facilitate the teaching and learning process.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 215. Assessment And Evaluation Of Individuals With Mild/Moderate Disabilities
Formal and non-formal evaluation methods to assess students with mild/moderate disabilities for first and second language learners. Includes standardized and alternative assessment, tools and practices, case studies, report development, and a comprehensive understanding of related research.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 206A. Assessment Strategies for M/S
Strategies for comprehensive assessment of students from diverse backgrounds and with a variety of language and cognitive skills for the purpose of making instructional decisions. Required field experiences and an emphasis on developing effective communication practices and collaborative partnerships.
Prerequisite: Department consent.
Normal Grade Rules
3 units
EDSE 216A. Teaching Reading and Language Arts
Emphasis on socio-cultural propensities of diverse groups and theories of culturally relevant pedagogy and a model of teaching reading and writing that is based in scientific research.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 217A. Directed Teaching I
Supervised teaching experience in educational settings for students with mild to moderate disabilities. Concurrent seminar.
Prerequisite: Department consent.
Credit / No Credit
6 units

EDSE 217B. Directed Teaching II
Supervised teaching experience in educational settings for students with mild to moderate disabilities. Concurrent seminar.
Prerequisite: Completion of prescribed credential program including EDSE 217A and departmental consent.
Credit / No Credit
6 units

EDSE 217D. Advanced Directed Teaching
Supervised teaching experience in educational settings for students with disabilities.
Prerequisite: Departmental consent.
Credit / No Credit
6 units

EDSE 218A. ASD: Moderate to Severe Disabilities
Theoretical foundations and application of evidence-based best practices for students with ASD and M/S disabilities including social language interventions, social stories, integrated playgroups, positive behavior support, self-advocacy skills inclusive education, recreation and leisure, and special interventions for young children.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 218B. ASD: Mild to Moderate Disabilities
Theoretical foundations and application of evidence-based best practices for students with ASD and M/M disabilities including social language interventions, social stories, integrated playgroups, positive behavior support, self-advocacy skills, inclusive education, recreation and leisure, and special interventions for young children.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 218C. ASD: Collaboration and Implementation of Best Practices
Focus on collaboration and understanding roles of service providers for students with autism spectrum disorders. Team work and strategies for working with educational professionals and parents or significant others in the life of the students with autism spectrum disorders.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 220. Research Seminar on Exceptional Individuals
Applied research or projects in the field of special education.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 221. Intervention for Young Children with Disabilities and Delays
Intervention strategies for young children with special needs; theory and design of content; linkage between assessment, intervention and evaluation; inclusion of motor, adaptive, cognitive communication and social skills development; attention to multicultural/linguistic considerations. When content changes may be repeated.
Prerequisite: Department consent.
Normal Grade Rules
4 units

EDSE 224. Methodologies for Second Language Learners in Special Education Programs
Examines the unique considerations, legislation, and approaches to working with culturally and linguistically diverse students with special education needs.
Prerequisite: Department consent.
Normal Grade Rules
1-3 units

EDSE 228A. Topics in Collaboration and Transition
Strategies for effective communication and collaboration practices with members of the various teams that plan and serve students receiving special education services. Emphasis in planning transitional life experiences across the lifespan.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 230A. Curriculum and Instruction M/M
Focus on special education alignment with content standards, integrated curriculum design, information literacy, evidence-based practices for differentiated classroom instruction, multiple intelligences, and modeling and integrating habits of mind.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 231. Issues and Research in Special Education
Evaluation of research on characteristics and methods of identification of individuals with disabilities; including minority and underachieving students. Current funding issues; research models, research on individuals with disabilities and instructional organization are reviewed and analyzed.
Prerequisite: Department consent.
Repealable for credit
Normal Grade Rules
3 units

EDSE 231X. Educational Research: Design and Implementation
EDSE 231X is a continuation of the process for the development of educational research, implementation of the study, and writing for the Masters of Arts project or thesis started in EDSE 231.
Prerequisites: EDSE 231 and EDSE 285.
Normal Grade Rules
3 units

EDSE 234. Advanced Fieldwork in Special Education
Application of knowledge and skills in classrooms. Examination of ethical practices, work with parents, challenges in application, and professional growth.
Prerequisite: Department consent.
Repealable for credit
Credit / No Credit
6 units

EDSE 235A. Movement, Mobility, Sensory and Health
Identifies the special services available to students with moderate/severe disabilities and defines the implementation of these services in the school and community. The course will define the role, function and services provided by professionals available to meet the health care and educational needs of students with multiple disabilities. The course will also address appropriate assessment and referral practices for teachers, seizures protocols, basic first aid and universal precautions, medication administration, positioning and handling for students with severe disabilities and feeding techniques.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 241. Emerging Technology for All Learners
Effective use of the computer to meet exceptional learning needs, including special education software evaluation, word processing for written language development, logo, individualized lessons with graphics and speech and database management for cognitive and language development.
Prerequisite: Department consent.
Repealable for credit
Normal Grade Rules
3 units
EDSE 276C. Speech and Auditory Development for Deaf and Hard of Hearing Students
Evaluating, implementing and facilitating speech development in deaf and hard of hearing youth. Practical preparation in use and care of hearing aids and amplification systems. Includes techniques for educating parents on topics pertaining to speech and auditory habilitation.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 276D. Language and Literacy Assessment
Assessment strategies for communication, language and literacy skills of deaf and hard of hearing students, with focus on the socio-cultural perspective and the development of instruction and lesson planning based on assessment results.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 277. Principles of Curriculum and Instruction for Deaf and Hard of Hearing Students
Advanced study of the pedagogy, assessment, curricular theories and instruction strategies appropriate for deaf and hard of hearing students.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 279. Managing Behavior and Emotional Problems of Students in Special Education
Introduction to the application of various management approaches to individual and group instruction of exceptional individuals.
Prerequisite: Department consent.
Repeatable for credit
Normal Grade Rules
3 units

EDSE 281. Student Teaching with Deaf and Hard of Hearing Students
Classroom teaching with hearing impaired students in an educational setting under supervision of the instructor.
Prerequisite: Department consent.
Repeatable for credit
Credit / No Credit
3 units

EDSE 285. Seminar on Issues Related to Teaching Exceptional Individuals
Issues, trends and research in educating handicapped students.
Prerequisite: Department consent.
Repeatable for credit
Normal Grade Rules
3 units

EDSE 298. Special Studies
Supervised study in a specific field of special education; to be taken only with the consent of the division head.
Prerequisite: Department consent.
Repeatable for credit
Credit / No Credit
1-3 units

EDSE 299. Master’s Thesis
Supervised thesis in the field of special education, to be taken only with chair consent.
Prerequisite: Department consent.
Repeatable for credit
Mandatory CR/NC/RP
3 units
Electrical Engineering Department Courses

ELECTRICAL ENGINEERING

LOWER DIVISION

EE 030. Introduction to Programming Microcontrollers for Electrical Engineering
Introduction to C programming and development of software in an integrated development environment. Program development includes program design, development, debugging, testing and documentation. Experiments are conducted with microcontroller and interface circuits. Prerequisite: ENGR 10 or permission of instructor. 1 unit

EE 097. Introductory Electrical Engineering Laboratory
Basic electrical instruments and experimental techniques in electrical engineering including oscilloscopes, function generators, frequency counters and multiple-use meters. Pre/Corequisite: ENGR 10. 3 units

EE 098. Introduction to Circuit Analysis
Introduction to the fundamental theory and applications of DC circuits, including resistive, ideal operational amplifier, controlled sources, and multivibrator circuits. Pre/Corequisite: ENGR 10. 1 unit

EE 104. Numerical Methods in Electrical Engineering

EE 105. Electronics and Microprocessor Applications
Introduction to microprocessor, hardware interfacing, A/D and D/A converters and data acquisition. Microprocessor assembly language and programming. Emphasis on computer application of microprocessors. Pre: EE 110 and EE 140 (with grades of “C” or better). 3 units

EE 106. Fundamentals of Mechatronics Engineering
See ME 106. 3 units

EE 107. Probability and Statistics in Electrical Engineering
Discrete probability theory. Theory of one and two random variables. Elementary statistics and hypothesis testing. EE Applications. Prerequisite: EE 112 with a grade of “C” or better. Normal Grade Rules 3 units

EE 110. Circuits and Systems
Continuous-time signals, circuits and systems. Impulse response and convolution. Laplace and Fourier transforms. Frequency response, transfer function, poles/zeros, filtering. Application to passive and active circuits, and to basic control, communications, and bio-systems. Pre: EE 098 and MATH 133A (with grade of “C” or better) and EE 101 Normal Grade Rules 3 units

EE 112. Introduction to Signal Processing
Introduction to discrete-time signal processing. Sampling and aliasing. Frequency response, transfer function, poles/zeros. Z-transform. FIR and IIR filtering. The four Fourier transforms. Computing spectra and spectrograms. Bio-systems, speech, music, image processing applications with Matlab. Pre: EE 098 and MATH 133A (with grade of “C” or better) and EE 101 Normal Grade Rules 3 units

EE 118. Digital Logic Circuit Design
Fundamentals of digital logic design. Boolean logic, MUXes, DEMUXes, decoders, encoders, comparators, arithmetic blocks, flip-flops, counters, registers, RAMs/ROMs, PLDs and FPGAs. Design of simple computer CPU. Schematic capture and Hardware Description Language (HDL), particularly, Verilog. Prerequisite: EE 98 and EE 99 with a grade of “C” or better. Normal Grade Rules 4 units

EE 120. Microprocessor Based System Design
Advanced algorithms for designing microcomputer based systems. Organization and interface requirements for microcomputer based systems. Pre: EE 110 with grade of “C” or better. Normal Grade Rules 4 units

EE 122. Electronic Design I
Design and analysis of analog circuits. Topics include current sources, active loads, differential amplifiers, frequency response, frequency compensation, output stages, feedback amplifiers and operational amplifiers. Pre: EE 122 and EE 128 with grade of “C” or better. Normal Grade Rules 4 units

EE 124. Electronic Design II
Analysis and design of analog circuits. Topics include current sources, active loads, differential amplifiers, frequency response, feedback amplifiers and operational amplifiers. Pre: EE 124. Normal Grade Rules 4 units

EE 125. Analog CMOS Integrated Circuits
Analysis and design of analog CMOS integrated circuits. Voltage references, noise analysis, amplifiers and comparators, sample-and-hold circuits, switched-capacitor circuits and converters. Pre: EE 124. Normal Grade Rules 3 units

EE 127. Electronics for Bioengineering Applications
Study of the fundamental concepts of electrical circuits and computer applications relevant to the use and design of biomedical instruments and data acquisition systems currently used for patient care using several examples. Pre: EE 98 with “C” or better. Normal Grade Rules 3 units
EE 128. Physical Electronics
Review of semiconductor theory. Methods of device fabrication; p-n junctions; bipolar junction transistors; field-effect transistors (FETS); MOSFETS; and equivalent circuits.
Prerequisite: MATE 153.
Misc/Lab: Lecture 3 hours.
Normal Grade Rules
3 units

EE 129. Introduction to Integrated Circuits Processing and Design
See MATE 129.
Normal Grade Rules
3 units

EE 130. Electric Machines and Drives
This course introduces the theory of operation and the control of electro-mechanical machines including DC machines, DC brushless machines, and AC synchronous machines and their electric drive systems. Applications include robotics, electric vehicle, and electric power generation.
Prerequisite: EE 110 and EE 112 (with grade of "C" or Better).
Misc/Lab: Lecture 3 hours.
Normal Grade Rules
3 units

EE 132. Theory of Automatic Controls
Theory of linear feedback control systems. Transfer functions and block diagrams; root-locus techniques; frequency analysis techniques; compensation; transducers and servo-system elements.
Prerequisite: EE 110 with a grade of "C" or better.
Normal Grade Rules
3 units

EE 134. Power Systems
Introduction to power systems including: complex power; power factor correction; power quality; power flow analysis; grid steady state and transient stability, fault analysis, integration of renewable energy, theory and modeling of transformers, transmission lines, and synchronous generators.
Prerequisites: EE 110 and EE 112 (with grade of "C" or Better).
Normal Grade Rules
3 units

EE 135. Control and Electronics for Renewable Energy Systems
This course introduces control methodology and electrical systems commonly used in renewable energy systems including wind turbines and solar panels. Topics include control of turbine, generator, peak power tracking for solar panels, and power conversion circuits.
Prerequisites: EE 110 and EE 112 (with grade of "C" or better) or ME 147 (with grade of "C" or better).
Normal Grade Rules
3 units

EE 136. Semiconductor Power Electronics
Study of power electronic circuits and applications including switch-mode regulators, AC-DC, DC-DC and DC-AC conversion, uninterruptible power supplies, variable speed drives, active filtering and harmonic cancellation; laboratory demonstrations. Applications include electric vehicle propulsion and spacecraft power systems.
Prerequisite: EE 124.
Normal Grade Rules
3 units

EE 138. Introduction to Embedded Control System Design
Embedded system design challenge and metrics. Processor and IC technologies. Software and hardware architectures for ESD. Design flow and tools. The design of standard peripherals, microcontrollers, single-purpose and general-purpose processors. Basic concepts of interfacing and communication protocols in ESD.
Prerequisite: EE 120.
Normal Grade Rules
3 units

EE 140. Principles of Electromagnetic Fields
Static electric and magnetic fields using vector calculus methods. Development of Maxwell's Equations.
Prerequisite: PHYS 52 or PHYS 72, EE 98 (with grade of "C" or better), MATH 133A, ENGL 1A.
Normal Grade Rules
3 units

EE 142. Fields and Waves
Application of Maxwell's Equations to time-varying electric and magnetic fields. Plane waves, transmission lines, waveguides and antennas.
Prerequisite: EE 140 with grade of "C" or better.
Normal Grade Rules
3 units

EE 153. Introduction to Digital Signal Processing
Digital signal processing fundamentals, discrete system theory, convolution, DFT, and design of IIR and FIR filters.
MATLAB based lab exercises are used for verification of DSP principles, signal analysis, and design of filters for audio signals.
Prerequisite: EE 112.
Normal Grade Rules
3 units

EE 155. Introduction to Communication Systems
Introduction to communication systems. Harmonics for analysis of amplifiers and amplitude modulators. Sampling and its application to frequency shifting. Communication receiver architectures: Direct conversion and heterodyne. Amplitude modulators and demodulators. Basic binary modulation techniques.
Prerequisite: EE 112 with grade of "C" or Better.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

EE 161. Digital Communication Systems
Prerequisite: EE 102, EE 112.
Normal Grade Rules
3 units

EE 164. Fiber Optic Communication
Fiber optic systems components (cables, sources, detectors, and transmitters); systems transmission noise and reliability; system design (specifications, limitations, components). Design project.
Prerequisite: EE 128.
Normal Grade Rules
3 units

EE 165. Photovoltaic Fabrication/Testing Lab
See MATE 165.
Normal Grade Rules
1 unit

EE 166. Design of CMOS Digital Integrated Circuits
Analysis and design of MOS based combinational sequential digital integrated circuits. Industry standard CAD tools (Cadence) will be used extensively in homework and a group final project.
Prerequisite: EE 128.
Normal Grade Rules
3 units

EE 167. Microelectronics Manufacturing Methods
CMOS manufacturing methods; advanced processing for integrated circuits. Analysis of yield, statistical process control and design of experiments as applied to process design, integration and characterization.
Prerequisite: MATE 129 and EE 128.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

EE 168. Microfluidics Fabrication and Design
See ME 168.
ABC/No Credit
1 unit

EE 169. Microelectromechanical Systems Fabrication and Design
See ME 169.
Normal Grade Rules
1 unit
EE 170. CMOS Radio Frequency Circuit Design
High frequency modeling of CMOS transistors, noise analysis, distortion, impedance matching, low noise amplifiers, power amplifiers, mixers, super heterodyne transmitters, image reject receivers.
Prerequisites: EE 122 with a grade of C or better
Normal Grade Rules
3 units

EE 172. Introduction to Microwave Engineering
Introduction to microwave engineering and techniques. Transmission lines and waveguides, microwave network analysis, impedance matching and tuning. Resonators, dividers, couplers.
Prerequisite: EE 140 with a C or better.
Normal Grade Rules
3 units

EE 173. Active Microwave Circuit Design
Active microwave circuits. Microwave amplifier and oscillator circuits. BJT, MESFET/PHEMT devices introduced. Introduction to microwave systems.
Prerequisite: EE 172.
Normal Grade Rules
3 units

EE 174. Analog Peripheral for Embedded Systems
Introduction to analog peripherals for embedded systems such as ADC/DAC, DC-DC Converters, Energy harvesting and solar cells, near field communication, RF-IDs, phase lock loops, clock generators, displays and touch screens. Industry based projects and applications are integral to the course.
Prerequisite: EE110 and EE112 with C grade or better.
Normal Grade Rules
3 units

EE 175. Filter Design: Passive, Active and Switched-Capacitor
Prerequisites: EE 112, EE 122.
Normal Grade Rules
3 units

EE 176. Computer Organization
Design of instruction set, addressing modes and memory management. Data and control paths of the CPU. Microprogramming. Arithmetic units and I/O organization.
Prerequisite: EE 120.
Normal Grade Rules
3 units

EE 177. High Speed System Design and Interfacing
Prerequisite: EE 120 with a grade of C- or better.
Normal Grade Rules
3 units

EE 178. Digital Design with FPGAs
Advanced Digital Design Technologies as they relate to synchronous digital systems. Requires student design projects that deal with the use of CAD tools for the Design, Simulation, and Implementation of Systems with FPGAs.
Prerequisite: EE 118.
Normal Grade Rules
3 units

EE 179. Digital Design Using Hardware Description Languages
Basic constructs of Verilog/VHDL: modeling techniques; chip-level and system level design. Compilation, simulation, source-level debugging, and synthesis. Design exercises and major project carried out in open lab.
Prerequisite: EE 118.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Repeatable for credit
Normal Grade Rules
3 units

EE 180. Individual Studies
Individual work on special topics arranged by the student and faculty mentor. Enrollment is handled by the EE department office. A completed and approved application is required.
Prerequisite: BS in Electrical Engineering Senior in good standing.
Repeatable for credit
Credit / No Credit
1-3 units

EE 181. Fundamentals of Internetworking
Data communication concepts, protocols, algorithms; 7-layer OSI reference model and implementations; physical media (fiber, wire); switching systems; LAN architectures and components, Ethernet, FDDI, TCP/IP, and related standards.
Prerequisite: EE 118.
Normal Grade Rules
3 units

EE 182. Electronics Test Design Engineering I
Introduction to Test Design Engineering; Basic IC and Component measurements; Measurement accuracy, Correction, and Calibration; DSP based testing; Design for Test; Laboratory Bench test development and execution.
Prerequisite: EE 122.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

EE 183. Electronics Test Design Engineering II
Best practices in Test methods and techniques; ATE Test hardware/software, Device characterization; Multi-system reliability; Device interface board design, building, debug, ATE development and Execution.
Prerequisite: EE 182.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

EE 184. Special Topics in Electrical Engineering
Advanced topics in Electrical Engineering. Content varies from semester to semester.
Prerequisite: Instructor consent/senior standing.
Repeatable for credit
Normal Grade Rules
3 units

EE 195C. Interdisciplinary Senior Project I
See ENGR 195C.
Normal Grade Rules
3 units

EE 195D. Interdisciplinary Senior Project II
See ENGR 195D.
Normal Grade Rules
3 units

EE 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

EE 198A. Senior Design Project I
Prerequisite: EE Senior in good standing in Major, ENGR 100W (with grade of “C” or better), EE120, EE122, and EE128 (with grades of “C-” or better.
Corequisite: ENGR 199A
Misc/Lab: Lab 3 hours.
Normal Grade Rules
1 unit
<table>
<thead>

<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EE 198B</td>
<td>Senior Design Project II</td>
<td>Implementation of group design projects initiated in EE 198A. Group oral and written reports. Integrate global and social issues in engineering. Prerequisite: EE 198A (with grade of “C” or better), Senior EE student in good standing. Corequisite: ENGR 195B. Misc/Lab: Lab 9 hours. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 209</td>
<td>Network Security</td>
<td>See CMPE 209. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 210</td>
<td>Linear System Theory</td>
<td>Continuous and discrete convolution and correlation. Review of transform theory. Two-side transforms including continuous and discrete Fourier transforms. Continuous and discrete state variable theory. Applications and computer simulations. Prerequisite: Graduate standing. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 211</td>
<td>Network Analysis and Synthesis</td>
<td>Basic methods for synthesizing passive one-port and two-port networks. Review of analysis methods and mathematical tools; LC, RC input impedance synthesis, two-port synthesis, properties of second-order systems; sensitivities; operational-amplifier considerations. Prerequisite: EE 112. Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 212</td>
<td>Active Network Synthesis</td>
<td>Active network synthesis. Advanced and specialized techniques of analysis, synthesis and approximation; consideration of recent developments in the field. Prerequisite: EE 211. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 220</td>
<td>Radio Frequency Integrated Circuit Design I (RFIC Design I)</td>
<td>Study of transmitter and receiver architectures and their building blocks for modern wireless communication standards, high frequency modeling of passive and active circuit components realized in CMOS and BiCMOS technologies, networks theory, wideband matching, nonlinearity and noise link budgets. Prerequisite: EE 124 or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 221</td>
<td>Semiconductor Devices I</td>
<td>Study of semiconductors in equilibrium and nonequilibrium conditions; principles of semiconductor device fabrication, p-n junctions; and junction transistors; device modeling for circuit analysis. Prerequisite: Graduate standing. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 222</td>
<td>Semiconductor Devices II</td>
<td>Continuation of EE 221. MOS devices; short channel effects; Device Scaling, NMOS, CMOS and BiCMOS technologies; device modeling and simulation, memory cell design. Optoelectronic and microwave devices. Prerequisite: EE 221. Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 223</td>
<td>Analog Integrated Circuits</td>
<td>Introduction to analog integrated circuits. Bipolar and MOS transistor models. Analysis and design of monolithic operational amplifiers. Frequency response. Feedback amplifier theory and design. Applications to specific case studies, such as phase-locked oscillators and wide-band amplifiers. Switched-capacitor filters. Prerequisite: EE 221. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 224</td>
<td>High Speed CMOS Circuits</td>
<td>Analysis and design of digital integrated circuits; bipolar and MOS inverters and logic gates; semiconductor memories; gate arrays; standard cells, programmable logic array; computer-aided design; SPICE program will be used extensively. Prerequisite: EE 221. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 224B</td>
<td>Advanced High Speed CMOS Circuits</td>
<td>EE224B covers advanced high speed CMOS design circuit design and challenges. The course will focus on design of advanced circuits such as arithmetic circuits, memory. Overall concepts will be tied together by a design project. Team work will be stressed. Prerequisite: EE 224. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 225A</td>
<td>Analog IC Transistor Process Design</td>
<td>Advanced process design, fabrication and testing of transistors for analog integrated circuits, design of statistical process control procedures for yield management, industry standard TCAD tools (Synopsys) and IC fabrication equipment will be used extensively in lab. Prerequisite: EE 221. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 226</td>
<td>VLSI Technologies</td>
<td>CMOS/BiCMOS technologies for VLSI circuits; theoretical and practical aspects of individual fabrication steps; necessity of particular steps in order to achieve required device/circuit parameters; trade-offs in optimizing device performance; CMOS memory design projects. Prerequisite: EE 221. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 227</td>
<td>Signal Integrity in AMS IC</td>
<td>This course studies essential blocks for wire-line communication integrated circuits such as analog equalizer circuits, Decision-Feedback Equalization (DFE), Phase Locked Loop (PLL) and Clock and Data Recovery (CDR) circuits. True understanding of system level modeling and behavioral of the PLL will be discussed. Matlab/Simulink Modeling techniques will be introduced as new vehicle for system level design and simulation. Performance metrics, such as random jitter, BER, jitter transfer, jitter tolerance, phase noise, will be introduced. Integrated circuit design consideration for the key essential blocks for PLL and equalizer block will be covered. Prerequisite: EE 221. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 228</td>
<td>Design Projects in VLSI Systems</td>
<td>Students must complete modest sized MOS projects through layouts, simulation and design rule checking. Topics include: design tools, logic simulation, placement, routing, floor planning, cell library, test pattern generation, and design for testability. Prerequisite: EE 227. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 229</td>
<td>Advanced Topics in Microelectronics</td>
<td>Current topics in electronic devices, technology and design; applications to state of the art topics in the microelectronics area. Prerequisite: EE 221 or instructor consent. Repeatable for credit Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>EE 230</td>
<td>Radio Frequency Integrated Circuit Design II</td>
<td>Low noise amplifiers, mixers, power amplifiers, LC voltage controlled oscillators, phase shifters, patch antennas and advanced layout to improve noise, stability, efficiency and bandwidth performance of nanoscale CMOS integrated circuits. Prerequisite: EE 220 or instructor consent. Normal Grade Rules 3 units</td>
</tr>
</tbody>
</table>
EE 231. Automatic Control Theory
Fundamentals of state space techniques in the analysis and synthesis of dynamic control systems; relationship to classical control theory via the Laplace transform; controllability, observability, performance indices discrete systems, introduction to optimal control and Kalman filtering.
Prerequisite: EE 132.
Normal Grade Rules
3 units

EE 232. Sampled-Data Control Systems
Reconstruction of sampled systems. Root locus analysis of sampled data control systems, the discrete compensation method and physical realization of discrete compensators. Statistical analysis and design of sampled data systems with emphasis on robotics applications.
Prerequisite: EE 231.
Normal Grade Rules
3 units

EE 233. Optimal Control Systems
Optimization of discrete and continuous systems with applications from aerospace, robotic and process control areas. Variational calculus, numerical solutions, dynamic programming and steepest descent algorithms. Optimal linear regulator problem, matrix Ricatti equation and stochastic processes.
Prerequisite: EE 231.
Normal Grade Rules
3 units

EE 235. Nonlinear Control Systems Analysis
Linearized approximations, Polynomial approximations, phase plane analysis; numerical integration and describing function techniques of analysis and computer simulation.
Prerequisite: EE 112 and EE 231.
Normal Grade Rules
3 units

EE 237. Vector Control of AC Machines
This course introduces modeling and control of electrical drive for AC motors and generators including induction, permanent magnet, and synchronous machines. The dynamic model, control methods, current regulation, and space vector modulation are discussed by both analysis and computer simulation.
Prerequisites: EE 210
Normal Grade Rules
3 units

EE 238. Advanced Power Electronics
Adv. study of switching regulators in power management, including energy conversion topologies, state space averaging techniques, assessing voltage mode/current mode control to embedded hardware. Applications include photo-voltaic /solar grid-tied inverters, active power factor correction, analysis, computer simulation.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

EE 239. Selected Topics in Systems and Control
Critical analysis of current literature pertinent to control systems.
Prerequisite: EE 231 and instructor consent.
Normal Grade Rules
3 units

EE 240. Introduction to Nanoelectronics
This course introduces basic concept of nanoelectronics. The course covers related concepts in solid state physics, quantum mechanics, and general nano electronic structures fabrication and characterization.
Prerequisites: EE 221 or Instructor consent.
Normal Grade Rules
3 units

EE 241. Fundamental of Signal Integrity
The course will introduce the essential knowledge on signal integrity. The course covers transmission line theory, channel loss, coupling, signal lunch and termination, timing issues on clock distribution and EDA tools usage for modeling and analysis of signal integrity in a system.
Normal Grade Rules
3 units

EE 249. Integrated Circuits for Biomedical Application
EE249 aims to introduce the essential knowledge and techniques for designing integrated circuits for biomedical applications. An introduction to the deep-submicron effects and noise in transistors, the principles for designing low-power, low-noise electronics and RF/inductive coupling links will be discussed.
Prerequisite: EE 223
Normal Grade Rules
3 units

EE 250. Probabilities, Random Variables and Stochastic Processes
Random variables, random processes, power spectral density, optimum linear systems, queuing theory.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

EE 251. Digital Communication Systems
Prerequisite: EE 250.
Normal Grade Rules
3 units

EE 252. Advanced Communication Systems
Digital modulation techniques for power and bandwidth limited communication systems. Offset QPSK, CMSK, noncoherent modulation and detection. Multipath fading channels, diversity and combining methods.
Prerequisite: EE 251.
Normal Grade Rules
3 units

EE 253. Digital Signal Processing I
Time/frequency analysis of discrete-time signals and systems. Fast implementations of the DFT and its relatives. IIR and FIR digital filter design, implementation and quantization error analysis. Decimation, interpolation and multirate processing.
Prerequisite: EE 210.
Normal Grade Rules
3 units

EE 254. Digital Signal Processing II
Prerequisite: EE 250 and EE 253.
Normal Grade Rules
3 units

EE 255. Wireless/Mobile Communications
Cellular mobile radio systems, propagation models, multipath propagation effects, diversity and combining noise, and interference are discussed. Analog and digital modulation techniques and their performance measures of multiple access techniques such as FDMA, TDMA and CDMA are discussed.
Prerequisite: EE 142.
Normal Grade Rules
3 units

EE 256. Programmable DSP Architectures and Applications
Implementations of DSP algorithms using programmable DSP architectures. Internal architectural requirements for a DSP device, system level hardware/software design and applications of programmable DSP architectures.
Prerequisite: EE 210.
Normal Grade Rules
3 units

EE 257. Digital Communications Processing
Application of signal processing techniques to analysis and simulation of basic digital communication functions. Optimal filtering, digital modulation, optimal receivers in the presence of noise, carrier and symbol synchronization, ISI and channel equalization, adaptive implementation, digital beamforming.
Prerequisite: EE 210, EE 250.
Normal Grade Rules
3 units
EE 258. Neural Networks
Principles of neural networks. Basic neurophysiology, neural nets as finite-state machines, synaptic learning, perceptrons, the LMS and back propagation algorithms, capacity theorems, feedforward nets as statistical classifiers, stability of feedback nets, self-organizing feature maps, adaptive resonance theory, retinal and cochlear models.
Prerequisite: EE 210.
Normal Grade Rules
3 units

EE 259. Selected Topics in Signal Processing
Advanced topics in signal processing. Content varies from semester to semester.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

EE 261. Acq. & Analysis of Biomedical Imaging
Study of the image acquisition physics and analysis concepts of biomedical imaging systems like X-Ray, MRI, Ultrasound etc. currently used for patient care in diagnosing various disease conditions.
Prerequisite: EE 210 or equivalent.
Normal Grade Rules
3 units

EE 262. Acquisition and Analysis of Biosignals
Study of various biomedical signals and their physiological origin. Study of analog instrumentation design to extract such signals with extensive biomedical signal analysis in the context of disease management, pathology and treatment with numerous case studies.
Prerequisite: EE 210 or equivalent, or instructor consent.
Normal Grade Rules
3 units

EE 263. Digital Image Processing
Fundamental principles and algorithms for digital image processing. Topics include image formation, modeling, transforms, enhancement, compression, segmentation, representation, feature extraction, and object recognition. Introduction to imaging system hardware components and architectures.
Prerequisite: EE 210.
Normal Grade Rules
3 units

EE 264. Computed Imaging
Fundamentals of the two-dimensional Fourier transform and its relatives. Application to selected problems in Imaging Transducer Arrays, Transform Image Coding, Spatial Filtering, Computed Tomography, Radar Imaging, Medical Imaging and Planetary Exploration.
Prerequisite: EE 112 or equivalent.
Normal Grade Rules
3 units

EE 265. Hands-on Wireless Communications using Software Defined Radios
This course is an experimental approach to wireless communications. The topics will include analog/digital transmission, ADC/DAC, and wireless channel modeling. Students will be exposed to MATLAB, software defined radios (USRP boards), GNU Radio, CRC (GNU Radio Companion) as part of homework assignments and projects. GNU Radio (http://gnuradio.org) software development platform is based on Python and C++. At the end of the class, students will be able to describe design challenges associated with building a wireless digital communication system.
Prerequisite: EE 210
Normal Grade Rules
3 units

EE 267. Advanced Logic Design
Logic design theory, advanced logic minimization, design and analysis of sequential circuits, asynchronous circuit design, logic circuit testing and design for testability. Review Verilog/VHDL. CAD tools are used for design, modeling and simulation.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

EE 270. Advanced System Design and Synthesis
In depth study of concepts and practices in modern digital system design, such as high-speed arithmetic, cache memory design, advanced pipelining and processor design. Verilog or VHDL is used for simulation and synthesis.
Prerequisite: EE 270.
Normal Grade Rules
3 units

EE 271. SoC Design & Verifi. with System Verilog
The course covers topics in System-on-Chip design and verification with SystemVerilog. Major topics include top-down SoC design; design metrics, techniques, and system-level synthesis; IP integration and system-level verification; SystemVerilog design hierarchy, data types, assertions, interfaces, verification constructs, and testbench structures.
Prerequisite: EE 271 or instructor consent.
Normal Grade Rules
3 units

EE 272. Special Topics in Digital Systems
Advanced topics in digital systems. Content varies from semester to semester.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

EE 273. Digital Design for Testability
Test generation methods for analog, digital logic, memories and microprocessors. Design to enhance testability of analog, digital, and mixed-signal circuits including data converters and frequency synthesizers. Built-in self test and built-in self repair. SOC testing.
Prerequisite: EE 270.
Normal Grade Rules
3 units

EE 274. Very Large Scale Integration Design for Testability
Normal Grade Rules
3 units

EE 275. Advanced Computer Architectures
Performance metrics, instruction set architectures, instruction pipelining and pipeline hazards, instruction-level parallelism, multithreading, cache and virtual memory, I/O performance and advanced topics in storage systems, topologies and hardware/software issues of interconnection networks.
Prerequisite: EE 270.
Normal Grade Rules
3 units
academic year 2014-2015

Course Descriptions

v01

Monday, June 9, 2014

All dates, fees & information subject to change without notice

EE 282. Internet Security and Cryptography
Internet security principles, protocols and cryptographic hardware designs, private and public key cryptosystems, DES, RSA, and AES, CIP(p) and encryption engines, hash functions and digital signatures, authentication, key management and security assessments.
Prerequisite: EE 281 or equivalent.
Normal Grade Rules
3 units

EE 283. Broadband Communication Networking
Packet Delay Modeling, Network of Queues, Quality of Service in Broadband Networks and Bandwidth Allocations, Architecture of High-Speed Switches and Routers, Multicast Protocols, VPs, Overlay Networks, Multi-Protocol Label Switching, and Broadband Network Architectures.
Prerequisite: EE 281.
Normal Grade Rules
3 units

EE 284. Convergent Voice and Data Networks
Prerequisite: EE 281.
Normal Grade Rules
3 units

EE 285. Fiber Optic Networking
Principles of photonic communication systems. Photonic components, optical fibers, detectors, sources, modulation methods, electrical interfaces, multiplexing strategies, optical-electronic-optical systems, all-optical systems, switches, routers, optical networking architectures.
Prerequisite: EE 164 and EE 221 or instructor consent.
Normal Grade Rules
3 units

EE 287. ASIC CMOS Design
CMOS ASIC design principles. Topics include ASIC architectures, cell libraries, synthesis issues, latches, clocking multiple clock synchronizers, delay calculation, timing closure, I/O specification, and testing.
Prerequisite: EE 270.
Normal Grade Rules
3 units

EE 288. Data Conversions/Analog Mixed Signal ICs
Study of different architectures for analog to digital converters and digital to analog converters. System level modeling & simulation. Design considerations and techniques for circuit implementation. Data conversion testing methods.
Prerequisites: EE 221.
Normal Grade Rules
3 units

EE 289. Special Topics in Networking
Advanced topics in networking that are currently of high interest to both industry and academia. Content varies from semester to semester, and may include, but not limited to, network security, virtual private network, network availability and reliability, network management.
Repeatable for credit
Normal Grade Rules
3 units

EE 290R. MSEE Thesis/Project Continuing Supervision
Continued work on thesis or project beyond minimum required units, for cases in which final deliverables are still in progress.
Pre-requisite: RP grade in a preceding thesis or project semester
Mandatory CR/NC/RP
1 unit

EE 295. Technical Writing - Engineering Ethics
Students learn to analyze and write about issues in engineering ethics. Three types of ethics are explored: ethics of the person, the process, and the product.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

EE 297A. MSEE Project Proposal
Written project proposal development for research/design project, subsequently culminating the MSEE work in EE297B. An approved application for EE299A registration, including project title and abstract, formal proposal presentation and defense required.
Prerequisite: Competency in written English certification and admission to Candidacy for the Master's Degree.
Mandatory CR/NC/RP
3 units

EE 299A. MSEE Thesis Proposal
Written Thesis proposal development for research/design, subsequently culminating the MSEE work in EE299B. An approved application for EE299A registration including project title and abstract, graduate seminar participation, oral proposal presentation and defense required.
Prerequisite: Competency in written English certification and admission to Candidacy for the Master's Degree.
Mandatory CR/NC/RP
3 units

EE 299B. MSEE Thesis
Implementation of the research/design, culminating the MSEE work proposed in EE 297A. Formal Master's Thesis report and its formal defense required.
Prerequisite: EE 299A
Mandatory CR/NC/RP
3 units

EE 299I. Electrical Engineering Internship Experience
For this course a student is employed in industry as an electrical engineering intern or in an equivalent position. The course supplements and supports student’s plan of study.
Prerequisite: Graduate standing.
Repeatable for credit
Credit / No Credit
1-3 units

EE 299L. MSEE Thesis Proposal
Written Thesis proposal development for research/design, subsequently culminating the MSEE work in EE299B. An approved application for EE299A registration, including project title and abstract, graduate seminar participation, oral proposal presentation and defense required.
Prerequisite: Competency in written English certification and admission to Candidacy for the Master's Degree.
Mandatory CR/NC/RP
3 units

EE 299M. MSEE Thesis
Implementation of the research/design, culminating the MSEE work proposed in EE 297A. Formal Master's Thesis report and its formal defense required.
Prerequisite: EE 299A
Mandatory CR/NC/RP
3 units

EE 299S. MSEE Thesis Proposal
Written Thesis proposal development for research/design, subsequently culminating the MSEE work in EE299B. An approved application for EE299A registration including project title and abstract, graduate seminar participation, oral proposal presentation and defense required.
Prerequisite: Competency in written English certification and admission to Candidacy for the Master's Degree.
Mandatory CR/NC/RP
3 units

EE 299T. MSEE Thesis
Implementation of the research/design, culminating the MSEE work proposed in EE 297A. Formal Master's Thesis report and its formal defense required.
Prerequisite: EE 299A
Mandatory CR/NC/RP
3 units

EE 299V. MSEE Thesis Proposal
Written Thesis proposal development for research/design, subsequently culminating the MSEE work in EE299B. An approved application for EE299A registration, including project title and abstract, graduate seminar participation, oral proposal presentation and defense required.
Prerequisite: Competency in written English certification and admission to Candidacy for the Master's Degree.
Mandatory CR/NC/RP
3 units

EE 299W. MSEE Thesis
Implementation of the research/design, culminating the MSEE work proposed in EE 297A. Formal Master's Thesis report and its formal defense required.
Prerequisite: EE 299A
Mandatory CR/NC/RP
3 units
English and Comparative Literature Courses

COMPARATIVE LITERATURE

UPPER DIVISION

CLIT 121. Introduction to Comparative Literature
Critical approaches, reference sources, problems of translation.
Prerequisite: One year of college level foreign language or instructor consent.
Normal Grade Rules
3 units

CLIT 122. Topics in Comparative World Literature
An exemplary theme as treated in various literatures in different languages, e.g., war, love, freedom, religious experience. May be repeated when course content changes.
Prerequisite: One year of college level foreign language or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CLIT 124. Literature and Religious Experience
See RELS 124
Repeatable for credit
Normal Grade Rules
3 units

ENGLISH

LOWER DIVISION

ENGL 001A. Composition I
Expository writing, supplemented by critical reading.
Prerequisite: English Placement Test.
Normal Grade Rules
GE: A2
3 units

ENGL 001B. Composition 2
Continuation of expository writing, supplemented by critical reading and analysis of expository prose or literature.
Prerequisite: ENGL 1A and English Placement Test.
Normal Grade Rules
GE: M9
3 units

ENGL 007. Critical Thinking
Nature and meaning of critical thought, Western and non-Western. Relationship between logic and language. Examination of contrasting arguments on related subjects as a means for developing skill in analysis of prose.
Prerequisite: ENGL 1A.
Normal Grade Rules
GE: M9
3 units

ENGL 010. Great Works of Literature
Fiction, drama and poetry for non-English majors. Emphasis on critical appreciation of various literary forms.
Notes: No credit in the English major.
Normal Grade Rules
GE: C2
3 units

ENGL 022. Fantasy and Science Fiction
Students will examine works of literary fantasy and science fiction to understand them as expressions of human intellect and imagination, to comprehend their historical and cultural contexts; and to recognize their diverse cultural traditions. Both contemporary and historical works will be studied.
Notes: No credit in the English major.
Normal Grade Rules
GE: C2
3 units

ENGL 040. Contemporary World Fiction
A study of selected works of fiction in English and in English translation written since 1975. The course both focuses on international texts that address significant themes of our time and explores ways of reading and understanding literature.
Notes: No credit in the English major.
Normal Grade Rules
GE: C2
3 units

ENGL 056A. English Literature to the Late 18th Century
Major literary movements, figures and genres from the Anglo-Saxon period through the eighteenth century. Works and writers may include Beowulf, Sir Gawain, Chaucer, Spenser, Sidney, Shakespeare, Donne, Milton, Dryden, Pope, Swift, Fielding, Johnson, Boswell.
Normal Grade Rules
3 units

ENGL 056B. English Literature Late 18th Century to Present
Major literary movements, figures and genres from the Romantic age to the present. Writers may include Austen, the Romantics, Tennyson, Browning, Arnold, Dickens, the Brontes, George Eliot, Hardy, Yeats, Joyce, Lawrence, Forster, Woolf, T. S. Eliot, Auden, Beckett.
Normal Grade Rules
3 units

ENGL 068A. American Literature to 1865
Survey of American literature. Native American myths to Walt Whitman.
Normal Grade Rules
3 units

ENGL 068B. American Literature 1865 to Present
Survey of American literature. Emily Dickinson to present.
Normal Grade Rules
3 units

ENGL 071. Creative Writing
Examinations of works of poetry, creative nonfiction and short fiction as expression of human intellect and imagination, to comprehend the historic and cultural contexts, and recognize issues related to writing by men and women of diverse cultural traditions. Students will also write poetry, creative nonfiction, and a short fiction.
Normal Grade Rules
GE: C2
3 units

ENGL 078. Introduction to Shakespeare's Drama
Reading of five or six representative plays. The Elizabethan era, dynamics of performance and close analysis of the plays.
Notes: No credit in the English major.
Normal Grade Rules
GE: C2
3 units

UPPER DIVISION

ENGL 100A. Writing Competency Through Genres
Satisfies the WST requirement if passed with a C or better (C- or lower will not satisfy the WST). Prepares students for 100W through drafting, feedback, and revision to demonstrate writing competency. Develops ability to analyze written genres used in the students’ chosen disciplines as well as write analytical and reflective essays.
Prerequisite: Must have failed the WST at least once.
Note: A CR/NC option may not be used to satisfy the WST requirement.
Normal Grade Rules
3 units

ENGL 100W. Writing Workshop
Advanced workshops in Reading and Composition.
Prerequisite: ENGL 1B (with a grade of C or better). Completion of Core GE, satisfaction of Writing Skills Test and upper division standing.
Notes: Required of all English majors before they achieve senior standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE: Z
3 units
ENGL 100WB. Written Communication: Business
Written communications for business majors; includes minimum of 8,000 words of writing spaced throughout the semester. Prerequisites: English 1B (with a grade of C or better), completion of Core GE, satisfaction of Writing Skills Test and upper-division standing. Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement. Normal Grade Rules
GE: Z
3 units

ENGL 101. Introduction to Literary Criticism
Study and application of various historical and contemporary approaches to literature, such as formalism, structuralism, new criticism, cultural studies, new historicism, post-structuralism, Marxism, post-colonialism, feminism, etc. Application of these approaches to works of literature. Prerequisite: ENGL 100W.
Normal Grade Rules
3 units

ENGL 102. History of the English Language
Course traces the development of the English language--its sounds, word forms, grammatical structures, vocabulary, and punctuation--from its origins as a dialect of the Germanic-speaking peoples to its status as a world language today. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 103. Modern English
The growth and structure of modern English, including its phonology, morphology, syntax and semantics. Attention to social and regional varieties, with implications for language development and literacy among native and nonnative speakers. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 105. Seminar in Advanced Composition
Advanced expository writing. Prerequisite: Six units of lower division composition and completion of the Written Communication II requirement (ENGL100W). May be repeated once for credit with different instructor and department chair consent. Repeatable for credit.
Normal Grade Rules
3 units

ENGL 106. Editing for Writers
Copy editing, substantive editing and reorganization of technical documents. Review of grammar and punctuation to ensure technical mastery and ability to justify editing decisions. Graphics editing, access aids and professional skills of an editor. Prerequisite: ENGL 1A and ENGL 1B.
Normal Grade Rules
3 units

ENGL 107. Professional Technical Writing
Research methods, audience analysis and development of reader-based writing techniques. Writing based on models from scientific and technical discourse. Prerequisite: ENGL 1A and ENGL 1B.
Normal Grade Rules
3 units

ENGL 108. Interactive Fiction: Narratology and Games
Study of the relationship between literary narrative theory (narratology) and interactive fiction (books and games designed to produce different stories for different readers or players). Course focuses on whether interactive fiction has changed or reinvented the possible spaces of narrative. Pre-Requisite: Upper Division Standing.
Normal Grade Rules
3 units

ENGL 109. Writing and the Young Writer
Emphasis on workshop approach to improve creative and expository writing skills and to transfer knowledge gained as a writer into practice as a prospective teacher of writing. Normal Grade Rules
3 units

ENGL 110A. Children’s Literature
Study of literature for young children, representing a variety of cultures and genres. Evaluation and selection of texts. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 110B. Literature for Young Adults
Study of selected literary material, representing a variety of cultures, chosen to motivate secondary school readers. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 113. Gothic Novel and Horror Fiction
Study of the gothic novel in Britain and America 1795-1900. Current trends in horror fiction and film will be traced to these gothic predecessors. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 114. Myth, Fantasy, and Science Fiction
A historically-based introduction to two of the most popular contemporary literary genres. Authors studied may include: Apuleius, Malory, More, Shelley, Wells, Carroll, Tolkien, Lewis, Williams, Clarke, Bradbury, Le Guin, Bradley, Stephenson, Butler and Delany. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 115. The Bible as Literature
Study of the Bible from the perspective of literature, examining key portions of the Bible, its subjects, themes, literary styles and genres, and contributions to Western Literature. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 116. Myth in Literature
Relations between archetypes, artistic style and cultural context in masterworks, ancient through modern. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 117A. American Literature, Film, & Culture
Using both film and literature, course examines narratives that create and define cultural identities in the United States. A variety of cultural moments in the history of North America as depicted in both film and literature as well as the artistic practices used to shape those representations will be discussed. Prerequisites: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required. Normal Grade Rules
GE: S
3 units

ENGL 117B. Global Film, Literature, and Cultures
Using films and literary works, students will appreciate and understand the narratives (myths and other stories) that create and define cultural identity, explore cultural interaction, and illustrate cultural preservation and cultural difference over time. Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required. Normal Grade Rules
GE: V
3 units
ENGL 118. Modern European Fiction
Representative European novels in English translation from the French, German, Scandinavian, Russian, Central European, Spanish and Italian.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 119. Topics in Jewish Literature
Topics in Jewish Literature: Studies in Jewish Literature by authors from around the world
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 120. Theatre History
See TA 120.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 121. Introduction to Comparative Literature
See CLIT 121.
Normal Grade Rules
3 units

ENGL 122. Topics in Comparative World Literature
See CLIT 122.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 123A. Literature for Global Understanding-The Americas
Course promotes global understanding by examining the cultures and literary arts of a selected region of the world, the Americas, and covers representative texts and authors from Latin America and the Caribbean/West Indies.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE V
3 units

ENGL 123B. Literature for Global Understanding-Africa
Course promotes global understanding by examining the cultures and literary arts of a selected region of the world, Africa, and covers representative texts and authors from North Africa and Sub-Saharan Africa.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE V
3 units

ENGL 123C. Literature for Global Understanding-Oceania
Course promotes global understanding by examining the cultures and literary arts of a selected region of the world, Oceania, and covers representative texts and authors from Australia, New Zealand, and the Pacific Islands.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE V
3 units

ENGL 123D. Literature for Global Understanding-Asia
Course promotes global understanding by examining the cultures and literary arts of a selected region of the world, Asia, and covers representative texts and authors from a sub-region of Asia such as East Asia, South Asia, Southeast Asia, Central Asia, or West Asia/the Middle East.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE V
3 units

ENGL 124. Literature and Religious Experience
See RELS 124.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 125. European Literature: Homer through Dante
Classical and medieval literature in translation: Homer, Aeschylus, Sophocles, Euripides, Virgil and Dante.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 126. Holocaust Literature
Survey of literature written by survivors or witnesses of the Holocaust, the destruction of European Jewry during World War II, focusing upon diaries, memoirs, fiction, and occasionally poetry and drama. Writers may include Elie Wiesel, Primo Levi, Anne Frank, Charlotte Delbo.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE V
3 units

ENGL 127. Contemporary Theatre
See TA 127.
Normal Grade Rules
GE V
3 units

ENGL 128. Scriptwriting
See TA 128.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 129. Introduction to Career Writing
Practice in various professional writing tasks: instructions, descriptions, reviews, interviews, articles, creative nonfiction, short stories, poetry. Publication of a newsletter. Study of models and application of techniques to achieve given stylistic effects.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 130. Writing Fiction
Workshop in short stories or other short fiction. Beginning the novel in individual cases. May be repeated once for credit.
Prerequisite: ENGL 71 (or equivalent) or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 131. Writing Poetry
Workshop in verse forms. Study of traditional and contemporary models. May be repeated once for credit.
Prerequisite: ENGL 71 (or equivalent) or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 133. Reed Magazine
Student-edited and managed literary magazine. Contents selected from local, national and international submissions. Students urged to work on the magazine for the two semesters required for publication. Open to all majors. May be repeated once for credit.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 135. Writing Nonfiction
Advanced creative writing workshop in literary nonfiction. Study of traditional and contemporary models. May be repeated once for credit.
Prerequisite: ENGL 71, ENGL 100W, ENGL 105, ENGL 129 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
ENGL 139. Visiting Authors
Study of works by contemporary writers participating in the Major Authors series and other programs sponsored by the Center for Literary Arts. Includes meetings with visiting authors and attending their various presentations. Required for the Creative Writing Concentration.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 140A. Old English
Introduction to the language, with short selections for translation.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 141. Medieval Literature
Middle English and continental literature, including such forms as the lyric, allegory, narrative, romance and biblically-based drama.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 142. Chaucer
Chaucer's language and major poetic works. The Legend of Good Women, The Canterbury Tales and Troilus and Cressida.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 143. The Age of Elizabeth
Poetry and prose of the early English Renaissance. Origin and development of English literary genres. Focus on Sidney and Spenser, lyric and narrative poetry of Shakespeare.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 144. Shakespeare I
Major plays such as Twelfth Night, Henry IV, Part I and Hamlet.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 145. Shakespeare and Performance
Course examines in depth several of Shakespeare's plays, specifically addressing issues of performance. We will discuss each play in the context of its original performance during Shakespeare's time and its life on stage and screen in the ensuing centuries.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 146. The Later English Renaissance
English poetic forms and prose styles from the accession of James I to the fall of the Commonwealth. Writers may include Donne, Bacon, Wroth, Lanyer, Browne and Marvell.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 147. Milton
The man, the thinker, the revolutionary, the poet. English poems, major prose, selected modern criticism.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 148. British Literature: 1660-1800
Major writers including Dryden, Behn, Swift, Pope and Johnson. With instructor consent may be repeated.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 149. The Romantic Period
Study of major British authors and poets from 1780 to 1837, tracing changes in philosophy, religion, society, and culture represented in their works.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 150. The Victorian Age
Study of major British authors and poets from 1837 to 1900, tracing changes in philosophy, religion, society and culture represented in their works.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 151. Twentieth Century Poetry
Major British and American poets, including figures such as Yeats, Eliot, Pound, Frost, Auden, Stevens, Rich.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 152A. English Drama to 1642
Drama and theater in the Middle Ages and Renaissance. Marlowe, Jonson, Webster and other contemporaries and successors of Shakespeare.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 152B. English Drama from 1660
Masterpieces of Restoration and modern drama.
Prerequisite: Upper division standing.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

ENGL 153A. Eighteenth Century British Novel
Study of the novel as a new literary form expressing psychological and sociological realities of the individual as hero/heroine in eighteenth century England. Authors may include Defoe, Richardson, Fielding, Smollett, Sterne, Burney and Austen.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 153B. Nineteenth Century British Novel
Study of the novel through the early nineteenth century and into the early modern period. Novelists may include Shelley, Scott, Dickens, Thackeray, the Brontes, Eliot, Hardy and Conrad.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 156. Black Women Writers: Race, Culture and Life Cycle in Cross-Cultural Perspective
See AFAM 156.
Normal Grade Rules
3 units

ENGL 161. American Literature to 1830
Major literary works of the Colonial, Revolutionary and post-Colonial periods. In addition to selected translations of non-English materials, readings may include Bradstreet, Wheatley, Rowson, Mather, Cooper, Taylor and Jefferson.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 162. American Literature: 1830-1865
Writers may include Emerson, Douglass, Fuller, Hawthorne, Stowe, Thoreau, Melville and Whitman.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 163. American Literature: 1865-1910
Rise of realism and the seeds of modernism. Writers may include Twain, James, Howells, Dickinson, DuBois, Dunbar, Dreiser, Wharton, Chesnutt and Chopin.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 164. American Literature: 1910-1945
Writers may include Wright, Hurston, Cather, Eliot, Moore, Faulkner, William Carlos Williams and Gertrude Stein.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units
ENGL 165. Topics in Ethnic American Literature
Focused study of a topic in ethnic American literature, such as African American, Asian American, Latino American, or ethnic autobiography. Check schedule of classes for current offering.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 166. American Literature Since 1945
Major works of American literature since 1945, including writers such as Barth, Reed, Kingston, Lowell, Rich, Pynchon and Ozick.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 167. Steinbeck
Major works of John Steinbeck. Use of Steinbeck Center for research.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 168. The American Novel
Selected American novels from the Revolution to the present.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 169. Ethnicity in American Literature
Study of race and ethnicity in the literary arts of North America. Selected works of authors from such groups as African Americans, European Americans, Asian Americans, Chicanos, Latinos and American Indians.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE S
3 units

ENGL 172. The Arts in U.S. Society
See CA 172.
Normal Grade Rules
GE S
3 units

ENGL 173. Thinking About Contemporary World Arts
See CA 173.
Normal Grade Rules
GE V
3 units

ENGL 174. Directed Reading
For upper division students with special objectives.
Prerequisite: Instructor and department chair approval.
Repeatable for credit
Credit / No Credit
1-2 units

ENGL 175. The Short Story
Analysis and interpretation of selected short stories from the nineteenth century to the present.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 177. Topics in Fiction Since 1900
Course will focus on different topics in modern fiction. Novels and short stories will be examined as works of art and as expressions of intellectual and social movements. May be repeated when course content changes.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 178. Creative Nonfiction
This class will study the canonical texts in the genre of creative nonfiction and the historical influences which led to its development.
Prerequisite: Upper Division Standing
Normal Grade Rules
3 units

ENGL 180. Individual Studies
By arrangement with instructor and department chair approval.
Prerequisite: Upper division standing.
Repeatable for credit
Credit / No Credit
1-3 units

ENGL 181. Special Topics
Significant topics or themes in English or Comparative Studies.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 182. Women in Literature
Image of women in literature or works of significant women writers.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 183. Major Authors
One major author’s works. Author changes each semester.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 184. Directed Reading
For upper division students with special objectives.
Prerequisite: Instructor and department chair approval.
Repeatable for credit
Credit / No Credit
1-2 units

ENGL 190. Honors Colloquium
Selected topics.
Prerequisite: Admission to departmental honors program.
Normal Grade Rules
3 units

ENGL 193. Capstone Seminar in Literature and Self-Reflection
This Capstone Course invites students to reflect on the English major by compiling a portfolio of written work from at least five courses. Students also respond to readings on representations of self and write a research-informed critical or creative paper.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 193C. Capstone Seminar in Creative Writing and Self Reflection
Culminating seminar for the Creative Writing Concentration, requiring students to reflect on experiences and revise work completed in several other courses taken in the Concentration. New writing done for the seminar will be included with revised work in a final Portfolio.
Prerequisite: Upper division standing. For Creative Writing Concentration Credit only.
Normal Grade Rules
3 units

ENGL 195. Literary Theory
Examines major theoretical approaches to literature with attention to the history and politics of reception and canon formation.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 199. Writing Internship
Internship at a local industry, publisher, arts or public agency. Discussion of experiences and problems in the internship. Study of professional practices and demands, including those of career preparation and development.
Prerequisite: 3.0 GPA both overall and in English; no credit in English major.
Repeatable for credit
Credit / No Credit
3 units

GRADUATE

ENGL 201. Materials and Methods of Literary Research
Use and evaluation of resource for literary research; problems in critical writing and literary history. Required for all English Masters students (to be taken as early as possible after achieving Classified standing).
Normal Grade Rules
3 units
ENGL 201C. Materials and Methods of Literary Production
Introduces Creative Writing graduate students to the resources, traditions, techniques, and standards for writing poetry, fiction, and creative nonfiction. Students will study the role of the individual writer within the literary and academic communities, and explore various forms of literary activity and the literary life. Co-requisite with first MFA Workshop Course.
Prerequisite: Classified standing or instructor consent.
Normal Grade Rules
3 units

ENGL 202. Poetic Craft and Theory
Poetry as a literary genre - its patterns and sub-types (such as the epic, lyric, pastoral, and elegy). Attention to the theories of poetics applied to practical criticism. Prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 203. Narrative Craft and Theory
Study of prose fiction and nonfiction as a literary genre (with sub-genres) and an art which can be learned through imitation and analysis. Course emphasizes the formal and technical properties of prose narrative, with attention to Narratology. Prior permission of graduate advisor may be repeatable once for credit.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 204. Seminar in Modern Approaches to Literature
Study of modern approaches to the theory and practice of literary criticism. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 208. Seminar in Comparative Literature
Study of selected topics in comparative literature. Students will be encouraged to do some reading and research in a language other than English. With prior permission of graduate advisor repeatable twice for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 211. Seminar in Twentieth Century Poetry
Intensive study of selected major English and American poets of the twentieth century. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 215. Seminar in Myth and Symbolism
Comparative study of mythic and symbolic forms in literature, focusing on theory and a variety of texts. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 216. Seminar in Medieval English Literature
Study of selected writings in medieval English literature and their continental sources. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 217. Seminar in English Renaissance
Study of selected writers of the sixteenth century. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 218. Seminar in Twentieth Century British Literature
Study of selected British writers from 1600 to 1660. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 220. Seminar in Performance Cultures
See TA 220.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 224. Studies in English Early Modern Literature
Study of selected writers or topics of the sixteenth and seventeenth century.
Prerequisite: Classified graduate standing or instructor consent.
Normal Grade Rules
3 units

ENGL 225. Seminar in Shakespeare
A close study of selected plays and of selected major issues in Shakespearean criticism. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 226. Seminar in Tragedy
An exploration of the nature of tragedy based on a study of the theory of tragic drama and of representative works from the Greeks to the moderns. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 227. Seminar in Comedy
Study of the bases of the comic and their application in dramatic form.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

ENGL 228. Seminar in Genre Studies
Provides focused study of a single genre of British and/or World Literature.
Prerequisite: Classified graduate standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 229. Seminar in Seventeenth Century British Literature
Study of selected writers from 1600 to 1660. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 230. Seminar in Eighteenth Century British Literature
Study of selected writers from 1660 to 1789. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 232. Seminar in Romanticism
Study of selected British writers from the late eighteenth and early nineteenth centuries. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 233. Seminar in the Victorian Period
Study of selected British writers from 1832 to 1900. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units
ENGL 240. Poetry Writing Workshop
Poetics and poetry writing as preparation for thesis. Includes theory and practice of major trends in contemporary poetry. Intensive workshop experience. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Graduate standing and admission via portfolio acceptance to the Writing Focus.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 241. Fiction Writing Workshop
Fiction writing as preparation for thesis. Study of canonical and contemporary fiction and fiction produced by students. Intensive workshop experience. May be repeatable twice for credit.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 242. Nonfiction Writing Workshop
Nonfiction writing as preparation for thesis. Study and critique of canonical and contemporary nonfiction. Intensive workshop experience. May be repeatable twice for credit.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 253. Seminar in Period Studies of American Literature
Focuses on a period of American literature such as Colonial, Revolutionary/Federal, Romantic, Realist, Modernist, Post-modernist. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 254. Seminar in Genre Studies of American Literature
Focuses of a genre of American Literature such as poetry, the novel, the short story, drama, autobiography, the personal and/or philosophical essay. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 255. Seminar in Thematic Studies of American Literature
Focuses on development of a theme in American Literature. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 256. Seminar in Twentieth Century British Literature
Study of selected British writers since 1900. With prior permission of graduate advisor may be repeatable once for credit.
Prerequisite: Classified standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ENGL 257. Seminar in the History of Rhetoric
Study of rhetorical theory and practice from classical to modern times.
Prerequisite: Classified standing or instructor consent.
Normal Grade Rules
3 units

ENGL 259. Seminar in Composition Studies
Study of current approaches to composition.
Prerequisite: Classified standing or instructor consent.
Normal Grade Rules
3 units

ENGL 290R. Thesis/Project Supervision
Continued work on thesis or project.
Pre-Requisite: Outstanding RP grade in a preceding semester in a project or thesis class
Mandatory CR/NC/RP
1 unit

ENGL 292. Beowulf
A critical reading of the Anglo-Saxon poem in the original language.
Prerequisite: Classified standing or instructor consent.
Normal Grade Rules
3 units

ENGL 298. Special Study
Advanced and individual research and projects.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-6 units

ENGL 299. Master's Thesis or Project
Prerequisite: Admission to candidacy for the master's degree.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

ENGLISH EDUCATION

UPPER DIVISION
ENED 184Y. Student Teaching II - Classroom Teaching
Minimum of 75 periods of classroom teaching, laboratory or field teaching in appropriate subject, grades 7-12, plus related school activities and seminar. Course is repeatable for credit in the same term.
Prerequisite: ENED 353.
Repeatable for credit
Credit / No Credit
4 units

ENED 184Z. Student Teaching III - Classroom Teaching
Notes: May be in a different subject/school and will be at a different grade level. Includes final summary project for student teaching.
See ENED 184Y.
Repeatable for credit
Credit / No Credit
4 units

GRADUATE

ENED 242C. Educational Internship in Teaching
Designed to provide opportunity for supervised teaching on either the elementary or secondary school level on the basis of a special provisional credential.
Prerequisite: Matriculation as a Graduate student.
Repeatable for credit
Credit / No Credit
4-6 units

ENED 353. Methods of Teaching English
Theory and practice of teaching literature and language arts to a diverse student population. Strategies for planning and implementing curricula appropriate to junior and senior high school.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

ENED 365. Seminar in English Education
Topics in English Education for middle and high school English teachers.
Prerequisite: Acceptance into the English Credential Program.
Repeatable for credit
Credit / No Credit
1 unit
Environmental Studies, Department of Courses

ENVIRONMENTAL STUDIES

LOWER DIVISION

ENVS 001. Introduction to Environmental Issues
What effects are human activities having on the natural environment and our quality of life? Discover the technical and social causes of environmental degradation; learn how your personal and career choices can protect the environment for current and future generations.
Prerequisite: ENVS 100W or instructor consent.
Normal Grade Rules
GE D3
3 units

ENVS 010. Life on a Changing Planet
An introduction to basic knowledge and theory in the life sciences, focusing on the theme of environmental change. Examines challenging issues in biology and methods for evaluating conflicting data and claims. Develops students' analytical and writing skills.
Prerequisite: As required for Core GE courses in B2.
Normal Grade Rules
GE B2
3 units

ENVS 100W. Environmental Research and Writing
Advanced research and writing skills for future environmental professionals. Focus on issues, literature and challenges associated with environmental writing. Emphasis on writing for technical and general audiences. Prerequisite: ENGL 1B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing; declared major in Environmental Studies.
Normal Grade Rules
GE Z
3 units

ENVS 105. Environmental Change and Problems, San Francisco Bay Area
Systematic inquiry into physical environments of the San Francisco Bay Area, with emphasis on impacts and changes to those systems by human action. Analysis of public action and policies regarding regional environmental issues.
Prerequisite: ENVS 1 and ENVS 100W
Notes: Offered only occasionally.
Normal Grade Rules
3 units

ENVS 107. Introduction to Environmental Economics and Policy
Analysis of basic economic and political factors related to the environmental crisis. Surveys policy approaches to the problem: regulation, taxes, subsidies, cost benefit analysis.
Prerequisite: ECON 1B or instructor consent.
Normal Grade Rules
3 units

ENVS 108. Cost-Benefit Analysis
See ECON 108.
Normal Grade Rules
4 units

ENVS 110. Resource Analysis
Quantitative analysis of Earth's natural resources. Topics typically include the status and trends of resources such as topsoil, agriculture, water, energy, wildlife and the impacts of human population growth on these resources. Emphasis is on problem solving and computational methods applied to resource management problems.
Prerequisite: ENVS 001, ENVS 010, STAT 095.
Normal Grade Rules
4 units

ENVS 111. Geology and the Environment
See GEOL 111.
Normal Grade Rules
GE R
3 units

ENVS 112. Hazardous Waste
Familiarization with major environmental problems through study of federal, state and regional regulation of hazardous waste management. Methods of treatment, disposal and destruction.
Prerequisite: Junior standing, two semesters chemistry and biological science or instructor consent.
Normal Grade Rules
3 units

ENVS 113. Atmospheric Pollution
See METR 113.
Normal Grade Rules
GE R
3 units

ENVS 116. Solar Energy Analysis
Provides a comprehensive overview of sustainable solar energy resources, economics, and policy. Includes a review of basic solar energy physics and interdisciplinary analysis of economic, social justice and environmental strategies for a solar powered civilization.
Prerequisite: ENVS 119, CHEM 001A, PHYS 002A (or equivalent).
Normal Grade Rules
3 units

ENVS 117. Human Ecology
Diversity and similarity of human adaptation, cultural evolution, cultural change and environmental modification in African, Asian, Oceanic and Latin American cultural groups. Emphasis: traditional non-Western conservation practices and their lessons for the modern-day resource manager.
Prerequisite: ENVS 1, ENVS 10 and ENVS 100W, or instructor consent.
Normal Grade Rules
3 units

ENVS 118. Sustainable Home Gardens
Techniques for designing landscape gardens which are sustainable in the various biomes of California. Students first research, explore, and photograph California native plant communities. Then, they design a California native home garden based on their field investigations and principles of ecology.
Prerequisite: ENVS 001 or instructor consent.
Miss/Lab: Lecture 3 hours / Activity 2 hours
Repeatable for credit
Normal Grade Rules
4 units

ENVS 119. Energy and the Environment
Introduces students to the sources of energy that fuel industrial civilization and the environmental impacts of energy extraction, distribution, and consumption. Explores a range of approaches to moving society toward a more sustainable energy future.
Prerequisite: ENVS 001.
Normal Grade Rules
GE R
3 units

ENVS 120. Population and Global Change
See GEOG 120.
Normal Grade Rules
3 units

ENVS 122. Atmospheric Pollution
See METR 113.
Normal Grade Rules
GE R
3 units

ENVS 123. Intro to Historic Preservation Planning
See URB 123.
Normal Grade Rules
4 units

ENVS 124. Introduction to Environmental Law
Development, interpretation, application and enforcement of environmental laws, regulations and legal policies by legislatures, courts, administrative agencies and citizens. Examination of air and water quality, hazardous materials, workplace, land use and wetlands regulation, international, ethical and efficacy issues.
Prerequisite: ENVS 1.
Normal Grade Rules
3 units
ENVS 125. Advanced Environmental Law
Detailed evaluation of practical environmental law problems. Students use an interdisciplinary approach, combining evaluation of technical data with review and application of law and policy. Extensive legal analysis and writing.
Prerequisite: ENVS 1 and ENVS 124
Normal Grade Rules
3 units

ENVS 126. Environmental Ethics and Philosophy
See PHIL 126
Normal Grade Rules
3 units

ENVS 128. Water Resource Management
Water uses and supplies; water resource measurement methods; hydrology, erosional processes; sediment production and transport particularly on Northern California coastal watershed; flood hazards and methods of control; groundwater and groundwater aquifers; water quality.
Prerequisite: ENVS 129 and STAT 095 or appropriate math course; or instructor consent.
Normal Grade Rules
3 units

ENVS 129. Water Policy in the Western U.S.
Water resource development, federal reclamation policy; water law and water rights; interbasin transfers, Colorado River, Central Valley Project and State Water Project, groundwater overdrafting; agricultural water and water pricing.
Prerequisite: ENVS 001.
Normal Grade Rules
3 units

ENVS 130. Energy Policy Analysis
Energy policy questions and examination of choices including energy pricing, options for controlling oil imports, incentives for reducing consumption, allocation and end use controls, synthetic fuel production, offshore oil development.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENVS 131. Air Pollution Meteorology
See METR 131
Normal Grade Rules
3 units

ENVS 132. Solar Home Design
Techniques for designing environmentally-sensitive, healthy, passive solar homes via site selection, energy conservation, lighting, non-hazardous natural building materials. Residential passive solar heating and cooling approaches for retrofits and new construction. For homeowners, teachers, professional designers and architects.
Prerequisite: ENVS 001 or instructor consent.
Normal Grade Rules
3 units

ENVS 133. Sustainable Energy Strategies
Challenges and opportunities facing sustainable energy pathways for heat, fuel, and electricity with a focus on energy efficiency, solar, wind, geothermal, bioenergy, alternative modes of transportation and other energy consuming infrastructures.
Prerequisite: ENVS 119 and Phys 2B, or instructor consent
Normal Grade Rules
3 units

ENVS 135. U.S. Environmental Policy
See POLS 135
Normal Grade Rules
3 units

ENVS 136. Intro to Land Use and Urban Planning
See URBP 136
Normal Grade Rules
3 units

ENVS 137. Green Building Design Issues
Provides an overview of green building design strategies based on renewable energy, water conservation, healthy interior design, beneficial building orientation, native landscaping, sustainable building materials; includes economics, policy, and green building auditing and certifications.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENVS 140. Politics and the Environment
Application of different political strategies to local issues examined through examples from specific environmental challenges facing the Bay Area. Considers relative contributions of the public, elected officials, government employees and interest groups in environmental decision-making.
Prerequisite: ENVS 1, ENVS 107 and ENVS 124 or instructor consent.
Normal Grade Rules
3 units

ENVS 142. Introduction to Environmental Planning
See URBP 142
Normal Grade Rules
4 units

ENVS 144. California Wetland Controversies
Impact of agriculture, urbanization and other human land uses upon the California coastal wetlands with emphasis on current environmental problems and controversies. State public agencies concerned with vital environmental problems and analysis of current environmental legislation. May be repeated for a maximum of 8 units.
Prerequisite: ENVS 1 or instructor consent.
Repeatable for credit.
Normal Grade Rules
4 units

ENVS 146F. Communication and the Environment
See COMM 146F
Normal Grade Rules
4 units

ENVS 148. Recycling and Resource Management
Principles and techniques of applying integrated waste management solutions to the municipal solid waste problem. Examines environmental, political, technological and economic aspects. Concentration on source reduction, recycling, composting, incineration and landfilling.
Prerequisite: ENVS 1 or instructor consent.
Normal Grade Rules
3 units

ENVS 150. Introduction to Environmental Thought
An introduction to significant works in the field of environmental studies. Topics covered include preservation, conservation, biocentrism, environmental justice, eco-feminism, deep ecology, and environmental activism.
Prerequisites: Pass the WST before enrollment. Upper division standing or instructor consent.
Normal Grade Rules
GE: S
3 units

ENVS 151. Race, Poverty and the Environment
See AFAM 151
Normal Grade Rules
3 units

ENVS 152. Globalization and the Environment
Scientific approach to goods distribution worldwide, and environmental consequences of shipping materials and packaging, which when discarded become waste. Mutual interests of commerce and environment.
Prerequisite: Completion of Core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: R
3 units

ENVS 154. Sustainable Agriculture
Analysis of and practicum in environmentally sustainable methods of food production, emphasizing biological diversity, water conservation, air quality, social equity and economic justice. Special focus on primary research in natural and social sciences for sustainable agriculture. Field trips and labs.
Prerequisite: ENVS 001 and GE B2 course, or instructor consent.
Misc/Lab: Lecture 3 hours/lab 2 hours.
Normal Grade Rules
4 units
ENVS 156. Introduction to Local Transportation Planning
See URBP 156.
Normal Grade Rules
4 units

ENVS 158. Environmental Education
Education of individuals can make a difference in protecting the environment. Comprehensive overview from the perspective of schools, American culture and law. Interdisciplinary approaches for correcting conditions created by modern living, energy and environmental demands.
Prerequisite: ENGL 1A and ENGL 1B; upper division standing or instructor consent.
Normal Grade Rules
3 units

ENVS 159. Nature and World Cultures
See AMS 159.
Normal Grade Rules
GE V
3 units

ENVS 160. Topics in Environmental Planning
See URBP 160.
Repeatable for credit
Normal Grade Rules
4 units

ENVS 165. National Parks
See GEOG 165.
Normal Grade Rules
3 units

ENVS 166. Nature and Conservation Photography
Still photography of nature and illustrative conservation subjects in both color and black and white. Theory critique sessions supplemented with field experience. May be repeated for a maximum of 8 units.
Prerequisite: Photo experience or instructor consent.
Misc/Lab: Lecture 2 hours/activity 4 hours.
Repeatable for credit
Normal Grade Rules
4 units

ENVS 167. Managing Environmental Issues
See BUSS 167.
Normal Grade Rules
3 units

ENVS 168A. Global Climate Change I
See COMM 168A.
Normal Grade Rules
6 units

ENVS 168B. Global Climate Change II
See COMM 168B.
Normal Grade Rules
GE: Rs+V
3 units

ENVS 169. Introduction to Social Media in Planning
See URBP 169.
Normal Grade Rules
1-4 units

ENVS 170. Introduction to Environmental Health and Safety
An overview of environmental health and safety issues that affect industry and government, including regulatory framework and basic technical elements; course covers historical and legislative background, risk management and training required in the field.
Prerequisite: ENVS 100W.
Normal Grade Rules
3 units

ENVS 173. Sustainable Forest Management
A field based course that provides students with a conceptual framework and practical tools for understanding sustainable forest management. Students explore issues such as forest restoration, community based forestry, forest diversity, agroforestry, and techniques for monitoring forest health.
Prerequisite: ENVS 01, ENVS 10, or upper division standing.
Normal Grade Rules
4 units

ENVS 178. Intro to Regional Transport Planning
See URBP 178.
Normal Grade Rules
4 units

ENVS 179A. Fundamentals of GIS for Urban Planning
See URBP 179A.
Normal Grade Rules
4 units

ENVS 181. Environmental Resource Center
Supervised projects that support the Environmental Resource Center, a source of sustainability information and activities for the campus and community; projects help students take personal action toward achieving a sustainable lifestyle.
Prerequisite: ENVS 001 or instructor consent.
Misc/Lab: Activity 2-6 hours.
Repeatable for credit
Credit / No Credit
1-3 units

ENVS 184. Directed Reading
Directed reading in an environmental subject to gain broader knowledge.
Prerequisite: Specific proposal to or need defined by department, with consent of faculty.
Credit / No Credit
1-4 units

ENVS 185. Environmental Impact Analysis
Current environmental impact reports subjected to critical review; determination of alternative procedures and mitigating opportunities; extensive field analysis and practice.
Prerequisite: ENVS 1, ENVS 124
Misc/Lab: Lecture 3 hours/lab 2 hours.
Normal Grade Rules
4 units

ENVS 187. Environmental Restoration
Interdisciplinary art and science of restoring destroyed or degraded habitats. Emphasis on the interplay of ecological principles, policy, public involvement and economics in the planning, implementation and monitoring of restoration plans. Field work and independent research required.
Prerequisite: ENVS 001, GE B2 course and any 100W, or instructor consent.
Misc/Lab: Lecture 3 hours/lab 2 hours.
Normal Grade Rules
4 units

ENVS 189. Coastal Field Studies
Introduction to coastal resource management. Field work and independent research ranging from Big Sur to Tomales Bay emphasizing marine sanctuaries, environmental problems and conservation strategies. Suitable for Multiple Subjects Waiver Program elective. May be repeated for a maximum of 12 units.
Prerequisite: ENVS 1
Misc/Lab: Lecture 2 hours/lab 3 hours.
Repeatable for credit
Normal Grade Rules
3 units

ENVS 190. Advanced Environmental Impact Assessment
Advanced work in the field of environmental impact assessment. Analysis of EIA documents for regulatory adequacy, consistency with local planning documents and technical accuracy.
Prerequisite: Familiarity with CEQA and NEPA required; ENVS core, ENVS 185 or instructor consent.
Misc/Lab: Lecture 3 hours/lab 2 hours.
Normal Grade Rules
4 units

ENVS 191. Advanced Environmental Restoration
Advanced restoration research and applications. Emphasis on independent literature research and field data collection. Participation in on-going restoration project. Fieldwork and grasp of restoration principles required.
Prerequisite: ENVS 187
Misc/Lab: Lecture 3 hours/lab 2 hours.
Notes: Offered only occasionally.
Normal Grade Rules
4 units
ENVS 193. Supervised Projects and Research
Projects and/or research to build practical environmental skills. Work on or off campus on projects with direct social value.
Prerequisite: Upper division standing.
Repealtable for credit Normal Grade Rules
1-15 units

ENVS 194. Environmental Internship
Service in a local, city, county, state or federal environmental/sustainability agency, school or in environmental/sustainability industry, or with a worthwhile environmental education or protection organization or center.
Prerequisite: Senior standing in Environmental Studies.
Repealtable for credit
Credit / No Credit
1-9 units

ENVS 195. Instructor Assistant in Environmental Studies
Experience as a tutor assistant in classroom demonstrations, field techniques and discussion. May be repeated for a 4 unit maximum, but not for same course or instructor.
Prerequisite: Senior standing, ENGL 1A, instructor consent and appropriate academic background.
Repealtable for credit
Credit / No Credit
1-3 units

ENVS 198. Senior Seminar
Culmination of interdisciplinary curriculum in environmental studies through integration and critical assessment of the field. Goal is transition from undergraduate experience to full professionalism.
Prerequisite: Filed for graduation, completion of Environmental Studies core, including ENVS 100W.
Normal Grade Rules
3 units

ENVS 199. Senior Thesis
Thesis demonstrating grasp of environmental subjects and principles, ability to research in depth particular environmental problems and facility at recommending practical solutions.
Prerequisite: Senior standing in Environmental Studies, completion of all Environmental Studies core requirements and university 100W writing requirement.
Credit / No Credit
3 units

ENVS 200. Seminar: Environmental Methods
Rigorous analysis of methods used by social, physical and natural scientists in assessing a region's natural resources and quality of environment. Environmental application of such techniques as field methods, maps, social surveys and project evaluation. Critique of individual research proposals.
Description: ENVS 297 and consent of graduate advisor.
Normal Grade Rules
3 units

ENVS 210. Current Topics in Environmental Studies
An investigation of current research topics in the field of Environmental Studies. Lectures by faculty, visiting scholars, and Master's student candidates are accompanied by class discussions and analysis of academic journal articles.
Prerequisites: Graduate Student Standing or instructor consent.
Repealtable for credit
Credit / No Credit
1-3 units

ENVS 230. Seminar: Environmental Theory
Intensive probe into interdisciplinary research and theories related to natural resources and environmental management. Applications of these theories to the present-day concerns of the resource manager and environmental professional. Oral critiques of various theories; advanced individual research paper and presentation.
Prerequisite: Graduate standing in Environmental Studies or instructor consent.
Normal Grade Rules
3 units

ENVS 250. Seminar: Environmental Thought and Philosophy
An in-depth critical analysis of significant works in the field of environmental studies. Topics covered include preservation versus conservation, biocentrism, environmental justice, eco-feminism, deep ecology, and environmental activism. Individual student research is presented with oral and written reports.
Prerequisite: Graduate standing in Environmental Studies or instructor consent.
Normal Grade Rules
3 units

ENVS 260. Computer Applications in Environmental Analysis
Overview of environmental simulation software used by professionals to investigate design alternatives and decision-making in the social and life sciences. Application of model designs to individual projects.
Prerequisite: Graduate standing in Environmental Studies or instructor consent.
Repealtable for credit
Normal Grade Rules
3 units

An intensive field investigation of water resource agencies and projects to acquaint resource managers, environmental quality specialists and other interested students with projects and philosophies unique to particular geographic areas.
Prerequisite: Upper division standing and ENVS 128 or ENVS 129, or instructor consent.
Normal Grade Rules
4 units

ENVS 284. Directed Reading for Graduate Students
Directed reading on an environmental subject to assist graduate-level research thesis development. Analysis of peer-reviewed and grey literature; development of a literature review.
Prerequisite: Graduate student standing or instructor consent.
Repealtable for credit
Credit / No Credit
3 units

ENVS 285. Graduate Internship
Advanced service in a local, city, county, state agency, federal agency or environmental industry.
Prerequisite: Graduate standing in Environmental Studies or instructor consent.
Repealtable for credit
Credit / No Credit
3-9 units

ENVS 291. Advanced Topics in Environmental Restoration
High-level restoration research and applications for advanced students. Emphasis on independent literature research and field data collection/analysis. Participation in ongoing restoration project and/or thesis research. Fieldwork and grasp of restoration principles required.
Repealtable for up to 8 units of credit.
Prerequisite: Graduate standing and ENVS 187 or equivalent, or instructor consent.
Repealtable for credit
Credit / No Credit
3-9 units

ENVS 295. Graduate Teaching Assistant
Teaching experience in environmental studies at the college level. Does not meet requirements for California Certification in Elementary or Secondary Education. May be repeated for maximum of 6 units, but not for same course or instructor.
Prerequisite: Graduate standing in Environmental Studies or instructor consent.
Repealtable for credit
Credit / No Credit
3 units
ENVS 297. Research and Proposal Development
Students develop their thesis topic through extensive literature research. The product will be a draft thesis proposal to be circulated among potential committee members.
Prerequisite: Graduate Standing in Environmental Studies or consent of instructor.
Repeatable for credit
Normal Grade Rules
3 units

ENVS 298. Special Study
Advanced individual research and projects.
Prerequisite: Graduate standing in Environmental Studies or instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

ENVS 299. Master’s Thesis or Project
Masters thesis research.
Prerequisite: Graduate standing in Environmental Studies or instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
General Engineering Courses

GENERAL ENGINEERING

LOWER DIVISION

ENGR 005. Science of High Technology
Scientific principles underlying commonly used high technology devices and systems such as the computer, cell phone, IPods, cameras, and the Internet. Emphasizes practical applications of scientific principles to contemporary engineering products and services.
Normal Grade Rules
GE: B1
3 units

ENGR 080Q. Engineering Success
Combination of workshop and lab exercises emphasizing group interaction, communications skills and problem solving for incoming students. May be repeated for a total of 2 units.
Misc/Lab: Activity 2 hours.
Repeatable for credit
Credit / No Credit
1 unit

ENGR 010. Introduction to Engineering
Introduction to engineering through hands-on design projects, case studies, and problem-solving using computers. Students also acquire non-technical skills, such as team skills and the ability to deal with ethical dilemmas.
Prerequisite: Eligible for MATH 019 or ENGL 001A. Engineering Majors Only
Misc/Lab: Lecture 2 hour/lab 3 hours.
Normal Grade Rules
GE: E
3 units

ENGR 011. Intro to Engineering: Transfer Students
Ethical issues related to engineering. Information literacy and communication skills in engineering. Working on multidisciplinary teams on collaborative engineering projects.
Prerequisite: Upper division transfer student in engineering
Normal Grade Rules
1 unit

ENGR 081W. Basic Writing Workshop
Weekly writing to improve grammar and punctuation skills needed for student success. Repeatable for up to 6 units. No Degree Credit.
Misc/Lab: Activity 3 hours.
Repeatable for credit
No Degree Credit
1 unit

ENGR 090W. Technical Writing Workshop
Weekly writing and speaking practice to develop technical communication skills. Repeatable not for graduation credit.
Prerequisite: Referral by engineering faculty.
Repeatable for credit
Credit / No Credit
2 units

ENGR 098. Technology and Women
See TECH 098
Normal Grade Rules
GE: D1
3 units

UPPER DIVISION

ENGR 100W. Engineering Reports
Regular technical writing assignments and company-focused oral presentations while integrating effects of environmental factors as they relate to products, systems and engineering processes.
Prerequisite: ENGL 1B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE: R
3 units

ENGR 102. Renewable Energy Engineering
Prerequisite: CHEM 1A and (PHYS 71 or PHYS 52 or PHYS 2B); Upper division standing in engineering.
Normal Grade Rules
3 units

ENGR 103. Life Cycle Engineering
Life cycle analysis of products focused on the contexts of reducing energy and the carbon footprint. Methods to analyze and evaluate the environmental impacts of engineering activities. Interdisciplinary case studies and projects related to life cycle engineering.
Prerequisite: ENGR 102, ME 172, ISE 105 or METR 135, or instructor consent.
Normal Grade Rules
3 units

ENGR 108. Green Electronics
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: R
3 units

ENGR 109. Climate Solutions Initiative
See UNVS 109.
Normal Grade Rules
GE: R+V
6 units

ENGR 119. Energy and the Environment
See ENVS 119
Normal Grade Rules
GE: R
3 units

ENGR 157. Community Action/Community Service
See COMM 157.
Repeatable for credit
Normal Grade Rules
GE: S
3 units

ENGR 157SL. Community Action/Community Service
See COMM 157SL.
Normal Grade Rules
GE: S
3 units

ENGR 180. Individual Studies
Individual work on special topics, by arrangement.
Prerequisite: Upper division standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

ENGR 184. Business Strategy in Practice in Technology Enterprise
This course provides students with the practical tools and assessment for applying their business acumen. The first half introduces the students to standard business assessment tools that feed business strategies, such as marketing, business development and M & A. The second half of the course is comprised of developing the basic elements of a formal Business Plan and providing both comprehension and application levels of learning of business strategy.
Prerequisite: BUS 193 or ENGR 193 and BUS 181.
Normal Grade Rules
3 units
ENGR 194. Business Organization and Management of Technology Enterprise
This course provides a "top down" overview of how commercial business works, including the business components: Corporate Environments, Human Resources, Legal, Marketing, Customer Insights, Management/Leadership. Communication and business soft skills will be covered providing a foundation for a solid business acumen. All class sessions focus on local and global perspectives.
Prerequisite: BUS 193 or ENGR 193.
Normal Grade Rules
3 units

ENGR 195A. Global and Social Issues in Engineering
Interdisciplinary seminar treating social and global impacts of technology and engineering. This integrated GE experience requires students to apply these concepts in their senior project classes. Students must enroll concurrently in their department senior project course Part A.
Prerequisite: ENGR 100W with a C or better.
Corequisite: Enrollment in major capstone course or equivalent.
Repeatable for credit
Normal Grade Rules
GE: S
1 unit

ENGR 195B. Global and Social Issues in Engineering
Interdisciplinary seminar treating social and global impacts of technology and engineering. This integrated GE experience requires students to apply these concepts in their senior project classes. Students must enroll concurrently in their department senior project course Part B.
Prerequisite: ENGR 195A (with a grade of "C" or better).
Corequisite: Enrollment in major capstone course or equivalent.
Repeatable for credit
Normal Grade Rules
GE: V
1 unit

ENGR 195C. Interdisciplinary Senior Project I
Interdisciplinary team senior design projects. Proposal preparation with feasibility plans and specifications; oral and written reports; professional seminars.
Prerequisites: ENGR 100W; eligible for senior project course in major
Normal Grade Rules
3 units

ENGR 195D. Interdisciplinary Senior Project II
Construction, testing, and evaluation of the design from ENGR 195C culminating in demonstrations and written and oral presentations to faculty, industry mentors and peers.
Prerequisites: ENGR 195C with a grade of "C" or better.
Normal Grade Rules
3 units

ENGR 197. Cooperative Education Project
Part or full-time on-site paid work experience based on a pre-approved project assignment in area of student’s career objective. Oral presentations, written final report and evaluation by project supervisor. Approved technical elective.
Prerequisite: Instructor consent
Normal Grade Rules
3 units

ENGR 198. Technology and Civilization
See TECH 198.
Normal Grade Rules
GE: V
3 units

GRADUATE

ENGR 200W. Engineering Reports and Graduate Research
Graduate level technical writing workshop designed to develop advanced communication skills that will readily transfer to the engineer’s professional needs, along with research methodologies, copyright issues, and proper documentation for the master’s thesis project.
Prerequisite: Graduate standing and completion of an undergraduate writing course.
ABC/No Credit
3 units

ENGR 201. Engineering Analysis
Mathematical techniques for solving engineering problems. Topics include linear systems analysis, probability and statistics, and differential equations. Applications include modeling and simulation, optimization, projection, experimental design. Several computer projects are required.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

ENGR 202. Systems Engineering
Large scale system design and development. Integrated approach including mission statement, synthesis of design concepts, tradeoff studies, risk assessment and interactions encountered in the optimal design, development, manufacture and test of systems.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

ENGR 203. Engineering Management
Students will develop contemporary expertise in the principles of engineering finance, management, IP, operations management, performance metrics, and their application to design, development, and commercialization of new products and services in dynamic environments.
Prerequisite: Graduate standing and instructor consent.
Normal Grade Rules
3 units

ENGR 205. Machine Learning
Prerequisite: Instructor consent
Normal Grade Rules
3 units

ENGR 206. Renewable Energy Systems
Advanced knowledge in renewable energy resources such as solar, wind, geothermal, biomass, waves and tidal energy. Solar resources and technologies, Integrated Resource Planning and System Operations, Enabling technologies and new energy use trends: Smart Grid, Demand Response, Energy Storage, and Electric Vehicles.
Prerequisite: Instructor consent
Normal Grade Rules
3 units

ENGR 207. Solar Cell Device Physics
P/N Junction, Band Structures, Energy levels, Material types, Defects, Contacts, Physics of light, Carrier life times, Doping concentrations, Diffusion lengths, Absorption refraction reflection, Theoretical efficiencies, Other technologies, Multi-junction, and Cell Models.
Prerequisite: Instructor consent
Normal Grade Rules
3 units

ENGR 208. Solar Module Technologies
Prerequisite: Instructor consent
Normal Grade Rules
3 units

ENGR 210. Green Technology
This multi-disciplinary course instructs students about how Environmental Management Systems are planned and organized. How enterprizes systematically manage interactions with the environment within ISO standards will be covered. Case studies in solar, wind, and geothermal are covered.
Prerequisites: Graduate student or undergraduate with upper division standing.
Normal Grade Rules
3 units
ENGR 211. PV Manufacturing
Prerequisite: Instructor Consent
Normal Grade Rules 3 units

ENGR 212. Engineering Management in a Global Economy
Application of engineering methodologies and practices to manage projects and organizations in a global digital economy. Topics include shifting from a manufacturing, production, marketing, and supply chain to a service economy, premium manufacturing, ethics, and competitive soft skills.
Prerequisites: ENGR 203 or Instructor Consent.
Normal Grade Rules 3 units

ENGR 220. Bioinfo Comp Tools & Alg for Engr
Students will experience hands-on application and problem-solving oriented introduction to Perl, Python, or R script programming and the analysis and management of bioengineering and biological data.
Prerequisite: Instructor consent
Normal Grade Rules 3 units

ENGR 230. Special Topics Next Generation Sequencing for Engineers
This course will provide students with an understanding of the genomic landscape, description of sequence generation methodologies and technologies, computational tools for genome browsing and mining data, association studies, genomic microbes and microbiomes, pharmacogenomics, and large-scale expression analysis.
Prerequisite: BIOL 023, BIOL 116, or BIOL 117, and CHE 162, HS 167, ISE 130, or equivalent, or instructor consent.
Normal Grade Rules 3 units

ENGR 236. Design for Manufacturability
Knowledge-based design, value engineering, DFM methodologies, robust design, process and materials selection, design constraints, design for assembly. Techniques of quality engineering, CAD/CAM integration and simultaneous engineering, cost estimating, activity-based costing, case studies, team projects.
Prerequisite: Principles of Design and Manufacturing Processes.
Normal Grade Rules 3 units

ENGR 240. Introduction to Microelectronic Packaging
Fundamental principles of packages and packaging requirements for microelectronic circuitry. Topics include: survey of package types, future trends, design, fabrication, processing, assembly, electrical requirements, reliability, and testing.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules 3 units

ENGR 242. Electrical Requirements for Microelectronic Packaging
Study of high speed requirements, design and characterization. Topics include: high speed system design, packaging and interconnect properties, modeling and simulation, transmission line effects and measurement techniques.
Prerequisite: ENGR 240 or instructor consent.
Normal Grade Rules 3 units

ENGR 244. Mechanical and Thermal Requirements for Microelectronic Packaging
Study of thermal and mechanical requirements for microelectronic packaging, covering fundamentals of heat transfer, strength of materials, thermal stresses, vibration theory and modeling. Application of fundamental theories to package design.
Prerequisite: ENGR 240 or instructor consent.
Normal Grade Rules 3 units

ENGR 271. Passive Optical Sensing
An introduction to passive optical sensing systems, including application areas, phenomenology and component/technology performance analysis. Detector types, principles, noise and sensor cooling issues will be addressed. Case studies and system analysis of complete passive optical sensing systems included.
Prerequisite: Instructor consent
Normal Grade Rules 3 units

ENGR 273. Active Optical Sensing
Fundamentals of active optical sensing systems, including application areas, phenomenology and component/technology performance analysis. Laser fundamentals/properties (emphasis in solid-state and fiber lasers), light detection and ranging (LIDAR) principles and sensor cooling/noise. Direct detection vs. heterodyne detection and case studies.
Prerequisite: ENGR 271.
Normal Grade Rules 3 units

ENGR 281. Master’s Project/Thesis Preparation Seminar
Preparation for project or thesis research, including development of scope, assembly of committee, preparation of schedule, completion of literature survey, completion of introductory chapter for final report, and research proposal examination at the end of the course.
Prerequisite: Complete common and option core courses, a grade of "B" or better in ENGR 200W or any GS&R approved course that satisfies the Graduate Writing Competency Requirement and approved candidacy form on file.
Mandatory CR/NC/RP 1 unit

ENGR 282A. Engineering for Teachers: Introduction to Engineering Design
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education. Design process, research and analysis, teamwork, communication methods, global and human impacts, engineering standards, and technical documentation.
Prerequisites: Instructor consent
Mandatory CR/NC/RP 3 units

ENGR 282B. Engineering for Teachers: Principles of Engineering
A thematic approach to the study of relevant topics and concepts in engineering. Communication, presentation skills and teamwork, visualization and sketching techniques, introduction to mechanical systems and mechanisms, basic thermodynamics, fluid control and hydraulic systems, control systems and feedback, robotics, engineering units, instruments, tools and measurements, statics, material properties and strength of materials
Prerequisites: Instructor consent
Mandatory CR/NC/RP 3 units

ENGR 282C. Engineering for Teachers: Digital Electronics
A thematic approach to the study of relevant topics and concepts in electronics engineering. Introduction to process and control of digital signals, design process for combinational and sequential logic design, teamwork, communication methods, engineering standards, and technical documentation.
Prerequisites: Instructor consent
Mandatory CR/NC/RP 3 units
ENGR 282D. Engineering for Teachers: Gateway to Technology Foundations
A project-based curricular approach to the teaching of technology, designed to challenge and engage the natural curiosity and imagination of middle school students. Introduction to mechanical and computer control systems, robotics and animation, and explorations of the importance of energy, including innovative ways to reduce, conserve and produce it using solar, thermal and wind power.
Prerequisites: Instructor consent
Mandatory CR/NC/RP
3 units

ENGR 282E. Engineering for Teachers: Gateway to Technology Specializations
A project-based curricular approach to the teaching of technology, designed to challenge and engage the natural curiosity and imagination of middle school students. Includes units on the impact of energy on our lives and the environment; the science behind aeronautics; design, build and test an airfoil; the science of electricity, behavior and parts of atoms, and sensing devices; knowledge and skills in basic circuitry design and examine the impact of electricity on our lives.
Prerequisites: Instructor consent
Mandatory CR/NC/RP
3 units

ENGR 282F. Engineering for Teachers: Civil Engineering and Architecture
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education. History of and careers in civil engineering and architecture including residential and commercial design, aesthetics and building safety codes.
Prerequisites: Instructor consent
Mandatory CR/NC/RP
3 units

ENGR 282G. Engineering for Teachers: Aerospace Engineering
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education. Introduction to the study of relevant topics and concepts in aerospace engineering, including the history and physics of flight, flight navigation, aerospace design, materials and structures, propulsion, flight physiology, space travel and aerospace careers.
Prerequisites: Instructor consent
Mandatory CR/NC/RP
3 units

ENGR 282H. Engineering for Teachers: Biotechnical Engineering
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education and careers. Topics include biotechnical history and industry, impact of technology on human health and safety, forensics, biomedical, environmental and agricultural applications.
Prerequisites: Instructor consent
Mandatory CR/NC/RP
3 units

ENGR 282J. Engineering for Teachers: Computer Integrated Manufacturing
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education and careers. Topics include: history of manufacturing, control systems, design for manufacturability, cost estimating, and elements of automation.
Prerequisites: Instructor consent
Mandatory CR/NC/RP
3 units

ENGR 282K. Engineering for Teachers: Engineering Design and Development
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education and careers. Topics include: project management, research and development of problem solutions, prototyping and testing, project and process evaluation, documentation and presentation.
Prerequisites: Instructor consent
Mandatory CR/NC/RP
3 units

ENGR 290R. Thesis and Project Culmination
This course covers the same topics and has the same objectives as ENGR298/ENGR299.
Pre-requisite: Student must have been enrolled in ENGR298 or ENGR299 in a previous semester.
Mandatory CR/NC/RP
1 unit

ENGR 295A. Master Project I
In-depth developmental engineering work relating to problems of interest to an individual or a group of students. Project includes proposal formulation, analysis, design, implementation, and testing.
Prerequisite: Graduate Advisor consent.
Repeatable for credit
Mandatory CR/NC/RP
3 units

ENGR 295B. Master Project II
A continuation of ENGR 295A. Students complete the in-depth project, write a detailed project report and make a comprehensive presentation and demonstration of project.
Prerequisite: Approval of Master’s Degree and CMPE 295A or CMPE 295W
Mandatory CR/NC/RP
3 units

ENGR 297B. Special Topics in Bioinformatics
This course augments regularly-scheduled graduate courses and programs in bioinformatics by providing an opportunity for students to learn about and develop skills in specialized and well focused areas of bioinformatics.
Prerequisites: BIOL 135, CHEM 130A, CS 123A (all with grades of B or better)
Normal Grade Rules
1-3 units

ENGR 297C. Special Topics in Systems Engineering
Special seminars and discussions to augment regularly-scheduled graduate courses. Emphasis on systems, process, product, and service integration in short-life cycle product and service industries using systems, concurrent engineering, and cost of ownership principles.
Prerequisite: Instructor consent
Normal Grade Rules
3 units

ENGR 297D. Special Topics in Emerging Technologies
Special topics in emerging technologies that emphasize new development in technologies, skills and knowledge which are suitable for the new technologies development such as but not limited to Machine Learning, Big Data Processing, Analytics, Data Analysis, and Information retrieval.
Prerequisite: Instructor consent
Normal Grade Rules
1-3 units

ENGR 297E. Special Topics in Electronic Materials and Devices
Special seminars and discussions to augment regularly-scheduled graduate courses. Emphasis on VLSI design computer-aided design, modeling, simulation and testing, Materials and processes includes characterizing and processing of electronic materials.
Prerequisite: Instructor’s consent
Normal Grade Rules
3 units
ENGR 297G. Special Topics in Green Technology
Special seminars and discussions to augment regularly-scheduled graduate courses. Emphasis on how Environmental Management Systems work, and how enterprises systematically manage interactions with the environment within ISO standards, and contemporary solar, wind, and geothermal case studies.
Prerequisite: Graduate standing or instructor’s consent

Normal Grade Rules
3 units

ENGR 297M. Special Topics in Engineering Management
Special seminars and discussions to augment regularly-scheduled graduate courses. Emphasis on engineering management fundamentals, product development and marketing, finance management, managing people and organizations and communication, planning, estimation, tracking metrics, risk analysis, e-business, project and change management.
Prerequisite: Graduate standing or instructor’s consent

Normal Grade Rules
3 units

ENGR 298. Master’s Project
Completion of an in-depth project, a detailed project report, followed by a comprehensive presentation and demonstration of project.
Prerequisite: ENGR 281, satisfaction of English Proficiency requirement, advancement to candidacy.

Misc/Lab: Lab 6 hours
Mandatory CR/NC/RP

2 units

ENGR 298I. MSE Internship
Student will be employed in an industry as an intern, working in an engineering area to their MSE option. This course supplements and supports the student’s program of study.
Prerequisite: Students must have graduate standing.

Credit / No Credit
1-3 units

ENGR 299. Master’s Thesis
Master’s thesis work in engineering.
Prerequisite: Admission to candidacy for master’s degree, written contract with thesis advisor and graduate coordinator.

Misc/Lab: Lab 9 hours
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
Geography Department Courses

GEOGRAPHY

LOWER DIVISION

GEOG 001. Geography of Natural Environments
Atmospheric, biologic and geologic processes that create the natural environments of the world. Discovery of local, regional and global patterns in the location and distribution of environmental phenomena, and the human modifications of natural environments.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
GE B1
3 units

GEOG 010. Cultural Geography
The human population studied through the perspective of cultural groups, their institutions and geographic distributions, how different people occupy, use, and modify their environment, and the interaction of individuals from one group with those of another.
Prerequisite: Sophomore or upper division standing.
Normal Grade Rules
GE D1
3 units

GEOG 012. Global Geography
Comparative geography of our world: regions and countries, natural environments and resources, settlements and land use, cultural diversity, economic and political patterns.
Prerequisite: Sophomore or upper division standing.
Normal Grade Rules
GE D2
3 units

UPPER DIVISION

GEOG 100W. Writing Workshop
Development of skills required for geographical research and writing.
Prerequisite: Prerequisite: Completion of core GE, ENGL 1B (with a grade of “C” or better), satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE Z
3 units

GEOG 105. Urban Geography
Spatial patterns in the urban environment: City function and morphology; population patterns and functional zonation; analysis of recent changes.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 107. Mapping the World
Finding, preparing, and using maps, satellite and aerial images, and spatial data to create effective presentations. Includes a basic introduction to geographic visualization through cartography, geographic information systems, and remote sensing for professionals outside geography.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
GE B1
3 units

GEOG 110. Urbanization in the Global South
This course explores issues and debates that relate to urbanization in the developing world. Students will gain a general understanding of the concept of urbanization in the developing world, and what are some of the issues, challenges, and policy responses found in these urban environments.
Prerequisite: Completion of the WST and core GE. Upper division standing
Pre/co-requisite: 100w
Normal Grade Rules
3 units

GEOG 112. Nations, Cultures, and Territorial Disputes
In a world with rapidly diminishing resources new conflicts are emerging based on factors such as ethnicity, economic opportunity, religion, and nationalism. Explore global circumstances leading to conflict.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE V
3 units

GEOG 115. Geography of the Global Economy
Exploration of contemporary global economy using variety of analytical approaches developed by geographers. Provides geographic perspective on world economy and environmental issues within a spatial context.
Prerequisite: Upper division standing. GEOG 101 recommended.
Normal Grade Rules
3 units

GEOG 120. Food Supply and Agricultural Systems
Geography of world agriculture and nutritional needs of a growing world population. Comparison of traditional and modern agricultural systems in their use of resources and technologies. Effectiveness in meeting demands and sustainability.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 121. Population and Global Change
Impact of population changes on countries, regions, and their environments. Demographic comparisons of developed and developing societies from perspectives of land use, economics and politics.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GEOG 123. Geography for K-12 Teachers
Geography for future K-12 teachers. Topics include mapping, places, and regions, and themes of human, physical and historical geography. Overview of geography in the California K-12 Frameworks as well as the geography in the California teacher credential examinations.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 124. Topics in Physical Geography
Interactions between humans and environment from a geographical perspective.
Prerequisite: GEOG 1 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

GEOG 125. Selected Topics in Human Geography
Changing topics in human geography.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

GEOG 130. Natural Resources
Geography of economic, environmental, political and technological factors that define natural resources and affect their availability and use. Focus on water, food-producing and energy resources.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 132. Creating Built Worlds
See ANTH 132.
Normal Grade Rules
3 units

GEOG 135. Qualitative Methods in Geographical Research
Development of skills required for geographical research and writing. Library research, oral presentations, variety of writing assignments dealing with diverse geographic problems.
Prerequisite: ENGL 1B.
Normal Grade Rules
3 units

<tr>
<td>GEOG 171</td>
<td>Map and GIS Analysis</td>
<td>Maps as tools of geographic expression and research. Introduction to spatial analysis through geographic information systems. Data collection and description; measuring absolute and relative location, patterns, interaction and association.</td>
<td>Prerequisite: GEOG 1, GEOG 170 or instructor consent. Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules \ 3 units</td>
<td></td>
<td></td>
</tr>
<tr>
<td>GEOG 172</td>
<td>Cartography: Compilation and Presentation</td>
<td>Techniques of compilation, design, construction and production. Lab projects applying computer graphics and geographic information systems to the effective presentation of geographic themes and information.</td>
<td>Prerequisite: GEOG 1 and GEOG 170 or instructor consent. Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules \ 3 units</td>
<td></td>
<td></td>
</tr>
<tr>
<td>GEOG 173</td>
<td>Cartography: Dynamic and Interactive Mapping</td>
<td>Design and implementation of dynamic and interactive presentations for visualizing geographic information. Lab projects creating animated and multimedia presentations. Designing user-interfaces for interactive mapping systems.</td>
<td>Prerequisite: GEOG 170, GEOG 172 or instructor consent. Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules \ 3 units</td>
<td></td>
<td></td>
</tr>
<tr>
<td>GEOG 175</td>
<td>Geographic Information Systems: Project Development</td>
<td>Creation of geographic information system databases and application software to solve specific problems in such areas as resource and facilities management, demographic analysis and planning.</td>
<td>Prerequisite: GeoG 170 or instructor consent. Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules \ 3 units</td>
<td></td>
<td></td>
</tr>
<tr>
<td>GEOG 178</td>
<td>Geographic Information Systems Project</td>
<td>Develop geographic database, web mapping, interactive mapping, and/or remote sensing solutions to a GIS problem. Identification of appropriate methods, and design, implementation, testing, and documentation of solution.</td>
<td>Prerequisites: GEOG 170 and GEOG 173, 3 units from GEOG 173, GEOG 175, GEOG 181, or GEOG 182, or instructor consent. Normal Grade Rules \ 3 units</td>
<td></td>
<td></td>
</tr>
<tr>
<td>GEOG 180</td>
<td>Individual Studies</td>
<td>Student-initiated in-depth study of a mutually agreeable topic conducted under faculty guidance.</td>
<td>Prerequisite: Supervisor and department chair approval. Repeatable for credit Credit / No Credit \ 1-4 units</td>
<td></td>
<td></td>
</tr>
<tr>
<td>GEOG 181</td>
<td>Remote Sensing: Basic Theory and Image Interpretation</td>
<td>Acquisition, interpretation and applications of imagery obtained from both airborne and satellite platforms. Includes visual interpretation and analysis of airphotos and non-photographic images, such as radar and thermal infrared. Remotely-sensed imagery as a source for mapping and geographic information systems.</td>
<td>Prerequisite: GEOG 170 or instructor consent. Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules \ 3 units</td>
<td></td>
<td></td>
</tr>

</table>

**Academic Year 2014-2015**

**Course Descriptions**

**Monday, June 9, 2014**

**ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE**
GEOG 182. Remote Sensing: Digital Analysis
Digital image systems and application to earth resource problems. Emphasis on non-photographic sensors, including digital manipulation and image enhancement. Integration of digital imagery with geographic information systems.
Prerequisite: GEOG 170 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours/field trips.
Normal Grade Rules
3 units

GEOG 186. Field Study in Physical Geography
Field research methods in physical geography, including biogeography, hydrology, soils, geomorphology, and human-environment studies. Mapping, GPS, landscape remote sensing, and field measurements. Local field trips and projects tailored to class interests.
Prerequisite: 6 units of upper division geography courses.
Credit / No Credit
3 units

GEOG 187. Field Study in Human and Historical Geography
Introduction to field methods in human and historical geography. Field trips, archival research, and student projects provide practical and applied skills and an informed view of the relationships between people and their environments.
Prerequisite: 6 units of upper division geography courses.
Credit / No Credit
3 units

GEOG 195. Spatial Analysis
Quantitative analysis of geographic information, including spatial statistics and analytical mapping; application of descriptive and inferential statistics to geographic problems.
Prerequisite: GEOG 170 and GEOG 171 or instructor consent.
Normal Grade Rules
3 units

GEOG 197. Geography Internship
Work/activity with professional application in off-campus establishment or agency. Course requirements and units determined in consultation with faculty advisor and work/activity supervisor.
Prerequisite: 12 units of geography.
Repeatable for credit
Credit / No Credit
1-6 units

GEOG 199. Senior Seminar
Capstone course examining the history of geographic thought and themes with emphasis on critical assessment of issues affecting current trends; objective of placing undergraduate experience in a professional context.
Prerequisite: Senior standing in geography.
Credit / No Credit
3 units

GEOG 239. Geographic Information Technology
Research in application of technology to the design and implementation of computer mapping, remote sensing, and geographic information systems. Includes spatial database design issues, spatial processing algorithms, and cartographic visualization. Research project and paper. May be repeated for credit when offered as a different technology.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

GEOG 279. Geographic Information Science Applications
Research in applications of geographic information science in such areas as urban spatial analysis, environmental analysis, geo-demographic analysis, regional analysis, facilities management, and geographic education. Research project and paper. May be repeated for credit when offered as a different technology.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

GEOG 282. Advanced Geographic Techniques
Specific topics in display and analysis of geographic information. Possible topics include advanced spatial analysis, cartographic representation, user-interface design, internet map server technology. May be repeated for credit when offered as a different technique.
Prerequisite: GEOG 170 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

GEOG 286. Geographic Information Systems: Project Management
Principles of project management applied to geographic information systems projects. Requirements assessment, estimating, scheduling, system design, and acceptance testing. Students will negotiate, plan and execute projects for outside agencies. May be repeated when course content changes.
Prerequisite: GEOG 175 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

GEOG 290. Seminar in Research Design for Geographic Information Science
Introduction to research in geographic information science. Includes definition of research problems, design of research project, identification of appropriate methodologies for acquiring, organizing and analyzing data, and presentation of research results. Research paper.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

GEOG 298. Special Study
Advanced individual research and projects unavailable in other department offerings conducted under the supervision of a faculty member.
Prerequisite: Approval of supervising faculty member and department chair.
Repeatable for credit
Credit / No Credit
1-4 units

GEOG 299. Master’s Thesis or Project
Prerequisite: Approved master’s degree candidate.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
Geology Department Courses

GEOL

LOWER DIVISION

GEOL 001. General Geology
Examination of geologic processes and materials, including volcanoes, earthquakes, rock formation, oceans, streams, and plate tectonics and their importance to society.
Misc/Lab: Lecture 3 hours/field trips.
Normal Grade Rules
GE B1+B3
4 units

GEOL 002. Introduction to Earth Science
Unified interdisciplinary study of the Earth. Overview of geologic processes, emphasizing the place of humans in space and time and the origin and distribution of resources.
Normal Grade Rules
3 units

GEOL 003. Planet Earth
Origins and processes of Earth’s interconnected physical and chemical systems, including aspects of astronomy, geology, meteorology, and oceanography. Impacts of these systems on humans, and of humans on the systems.
Normal Grade Rules
GE B1
3 units

GEOL 004L. Planet Earth Laboratory
Hands-on investigations, measurements, and analysis of Earth’s materials, processes, and hazards. Supplements general lecture courses in Geology.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
GE B3
1 unit

GEOL 005. Human Development and the Natural World
Introductory course examining the role of the natural world on the physiological, social, and psychological development of human beings within the context of the environmental, social, and academic community system.
Normal Grade Rules
GE E
3 units

GEOL 006. Geology of California
California’s geology, illustrating physical processes, landscapes, geologic history and resources. California’s seismic, volcanic, landslide and flooding hazards, and their impact on society.
Misc/Lab: Lecture 3 hours/field trips.
Normal Grade Rules
GE B1
3 units

GEOL 007. Earth, Time and Life
Earth’s geosphere: processes that act on it and materials that comprise it; how rocks and fossils are used to interpret the history of Earth’s geosphere, atmosphere, oceans, and life forms.
Misc/Lab: Lecture 3 hours/field trips.
Normal Grade Rules
GE B1+B3
4 units

GEOL 010. Planet Earth
The dynamic interplay of processes that shape the Earth system—the solid planet, its atmosphere, its oceans, and the universe that spawned and supports it. Investigations of humanity’s impact on the Earth system, and its impact on us.
Misc/Lab: Lecture 2 hours/field trips.
Normal Grade Rules
3 units

GEOL 012. Historical Geology
Principles of geology used in interpretation of the history of the Earth as revealed in rocks and their fossils.
Misc/Lab: Lecture 2 hours/field trips.
Normal Grade Rules
3 units

GEOL 013. Earth Systems and the Environment
Fundamental earth/space science concepts. Emphasis on active learning and guided inquiry. Recommended for students preparing for multiple subject credential.
Prerequisite: PHYS 001 or CHEM 030A, completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Notes: Departmental consent required.
Normal Grade Rules
GE: R
3 units

GEOL 014. Earth Science Teacher Enhancement
A thematic approach to the study of regionally significant topics, including earthquakes, landslides and volcanoes. Development of hands-on classroom activities. Normally offered through University Continuing Education. Field trips.
Prerequisite: Teaching credential and instructor consent.
Repeatable for credit
Credit / No Credit
0.5-3 units

GEOL 014L. Earth Science Teacher Enhancement Laboratory
Laboratory-based studies to supplement concepts developed in Geol 104. Normally offered through University Continuing Education.
Prerequisite: Instructor consent.
Misc/Lab: Lab 3 hours.
Notes: Offered through Continuing Education.
Repeatable for credit
Normal Grade Rules
1 unit

GEOL 015. General Oceanography
Scientific examination of the impact of oceans on global society, and human impacts on the oceans, through classroom discussions, computer exercises and field trips.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Misc/Lab: Lecture 3 hours/field trips.
Normal Grade Rules
GE: R
3 units

<tbody>
<tr>
<td>GEOL 107</td>
<td>Prehistoric Life</td>
</tr>
<tr>
<td></td>
<td>Integrated interdisciplinary examination of the fossil record, including</td>
</tr>
<tr>
<td></td>
<td>information from the fields of paleontology, genetics and cos., that aids</td>
</tr>
<tr>
<td></td>
<td>in understanding of organic evolution and periodic massive extinctions.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: Completion of core GE, satisfaction of Writing Skills Test</td>
</tr>
<tr>
<td></td>
<td>and upper division standing. For students who begin continuous enrollment at</td>
</tr>
<tr>
<td></td>
<td>a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a</td>
</tr>
<tr>
<td></td>
<td>100W course is required.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 3 units</td>
</tr>
<tr>
<td>GEOL 108</td>
<td>Water, Ecosystems and Society</td>
</tr>
<tr>
<td></td>
<td>Interdisciplinary investigation of hydrologic systems and their relations</td>
</tr>
<tr>
<td></td>
<td>with biologic communities and society. Streams, lakes, estuaries, groundwater</td>
</tr>
<tr>
<td></td>
<td>and the protection of water resources.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: Upper division standing.</td>
</tr>
<tr>
<td></td>
<td>Misc/Lab: Lecture 3 hours/field trips.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 3 units</td>
</tr>
<tr>
<td>GEOL 111</td>
<td>Geology and the Environment</td>
</tr>
<tr>
<td></td>
<td>The effect of Earth processes on humans and their structures. Environmental</td>
</tr>
<tr>
<td></td>
<td>problems related to earthquakes, landslides, minerals, energy, water and</td>
</tr>
<tr>
<td></td>
<td>urban growth.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: Completion of core GE, satisfaction of Writing Skills Test</td>
</tr>
<tr>
<td></td>
<td>and upper division standing. For students who begin continuous enrollment at</td>
</tr>
<tr>
<td></td>
<td>a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a</td>

</tr>
<tr>
<td>Normal</td>
<td>GE R, 3 units</td>
</tr>
<tr>
<td>GEOL 112</td>
<td>Hazards, Risks of Earthquakes and Volcanoes</td>
</tr>
<tr>
<td></td>
<td>How, where and why earthquakes and volcanic eruptions occur. Analysis of</td>
</tr>
<tr>
<td></td>
<td>hazards posed by earthquakes and volcanoes. Risks incurred by humankind due</td>
</tr>
<tr>
<td></td>
<td>to these hazards. Minimizing risk, economic, social and political problems</td>
</tr>
<tr>
<td></td>
<td>associated with earthquakes.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: Completion of core GE, satisfaction of Writing Skills Test</td>
</tr>
<tr>
<td></td>
<td>and upper division standing. For students who begin continuous enrollment at</td>
</tr>
<tr>
<td></td>
<td>a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a</td>
</tr>
<tr>
<td></td>
<td>100W course is required.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 3 units</td>
</tr>
<tr>
<td>GEOL 120</td>
<td>Fundamentals of Mineralogy</td>
</tr>
<tr>
<td></td>
<td>Laboratory course designed to give students basic skills for identifying</td>
</tr>
<tr>
<td></td>
<td>minerals and basic understanding of geologic processes that form minerals.</td>
</tr>
<tr>
<td></td>
<td>Emphasis is on hand specimen and microscope identification.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: GEOL 003, GEOL 004L, and GEOL 007.</td>
</tr>
<tr>
<td></td>
<td>Misc/Lab: Lecture 2 hours / Lab 3 hours.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 3 units</td>
</tr>
<tr>
<td>GEOL 122</td>
<td>Petrology</td>
</tr>
<tr>
<td></td>
<td>Identification of minerals and rocks in hand sample and under the microscope.</td>
</tr>
<tr>
<td></td>
<td>Processes of formation, description, and classification of igneous, sedimentary</td>
</tr>
<tr>
<td></td>
<td>and metamorphic rocks.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: GEOL 120; completion of or co-enrollment in CHEM 1A.</td>
</tr>
<tr>
<td></td>
<td>Misc/Lab: Lecture 3 hours/lab 3 hours.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 3 units</td>
</tr>
<tr>
<td>GEOL 124</td>
<td>Sedimentology and Stratigraphy</td>
</tr>
<tr>
<td></td>
<td>Study of the origin and description of sediment and sedimentary rocks; study</td>
</tr>
<tr>
<td></td>
<td>of the formation, sequence, and correlation of stratified rocks.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: GEOL 003, GEOL 004L, GEOL 007.</td>
</tr>
<tr>
<td></td>
<td>Misc/Lab: Lecture 2 hours/lab 3 hours.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 3 units</td>
</tr>
<tr>
<td>GEOL 125</td>
<td>Structural Geology</td>
</tr>
<tr>
<td></td>
<td>Recognition, interpretation and representation of structures of the Earth’s</td>
</tr>
<tr>
<td></td>
<td>crust. Analysis of basic principles of rock deformation.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: MATH 019, GEOL 001 or GEOL 003, GEOL 004L, GEOL 007, GEOL 028.</td>
</tr>
<tr>
<td></td>
<td>Misc/Lab: Lecture 3 hours/lab 3 hours.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 3 units</td>
</tr>
<tr>
<td>GEOL 127</td>
<td>Tectonics</td>
</tr>
<tr>
<td></td>
<td>Description of large-scale features of the Earth’s crust and upper mantle</td>
</tr>
<tr>
<td></td>
<td>and the processes which formed them. Emphasis on plate tectonics and its</td>
</tr>
<tr>
<td></td>
<td>implications for the evolution of North America.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: GEOL 100W, GEOL 122, GEOL 124, GEOL 125.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 3 units</td>
</tr>
<tr>
<td>GEOL 128</td>
<td>Geologic Field Techniques</td>
</tr>
<tr>
<td></td>
<td>Introduction to geologic mapping and use of geologic field instruments.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: GEOL 124 and GEOL 125.</td>
</tr>
<tr>
<td></td>
<td>Misc/Lab: Lecture 1 hour/field 6 hours.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 3 units</td>
</tr>
<tr>
<td>GEOL 129A</td>
<td>Introductory Field Geology</td>
</tr>
<tr>
<td></td>
<td>Introductory level field methods, field mapping and interpretation of</td>
</tr>
<tr>
<td></td>
<td>geologic and tectonic history. Students stay at camp sites that vary from</td>
</tr>
<tr>
<td></td>
<td>year to year.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: GEOL 120, 122, 124 and 125 or permission of instructor.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 2 units</td>
</tr>
<tr>
<td>GEOL 129B</td>
<td>Advanced Field Geology</td>
</tr>
<tr>
<td></td>
<td>Geologic field mapping and interpretation of geologic and tectonic history.</td>
</tr>
<tr>
<td></td>
<td>Students stay at camp sites that vary from year to year.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: GEOL 122, 124, 125, or Permission of Instructor</td>
</tr>
<tr>
<td></td>
<td>Misc/Lab: Lab 6-12 hours. Repeatable for credit</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 4 units</td>
</tr>
<tr>
<td>GEOL 130</td>
<td>Marine Geology</td>
</tr>
<tr>
<td></td>
<td>Introduction to the geology of continental margins and ocean basins.</td>
</tr>
<tr>
<td></td>
<td>Discussions focus on crustal structures and the effect of plate tectonics</td>
</tr>
<tr>
<td></td>
<td>and oceanographic processes on modern marine sedimentation.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: GEOL 3, GEOL 4L, and GEOL 7.</td>
</tr>
<tr>
<td></td>
<td>Misc/Lab: Lecture 2 hours/lab 3 hours.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 3 units</td>
</tr>
<tr>
<td>GEOL 132</td>
<td>Mineralogy and Petrology II</td>
</tr>
<tr>
<td></td>
<td>Investigations of minerals and rocks in hand sample and under the microscope.</td>
</tr>
<tr>
<td></td>
<td>Introductions to petrogenesis, lithospheric evolution, and other advanced</td>
</tr>
<tr>
<td></td>
<td>petrologic topics.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: GEOL 122.</td>
</tr>
<tr>
<td></td>
<td>Misc/Lab: Lecture 3 hours/lab 6 hours.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 5 units</td>
</tr>
<tr>
<td>GEOL 134</td>
<td>Geomorphology</td>
</tr>
<tr>
<td></td>
<td>Earth’s surficial processes and landforms; effects of tectonics, climate</td>
</tr>
<tr>
<td></td>
<td>and geology, landscape evolution.</td>
</tr>
<tr>
<td></td>
<td>Landform interpretation using maps, surface water hydrology, applications.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite: GEOL 003 and GEOL 004L, GEOL 007, or instructor consent; year</td>
</tr>
<tr>
<td></td>
<td>of college calculus and physics recommended.</td>
</tr>
<tr>
<td></td>
<td>Misc/Lab: Lecture 3 hours/lab 3 hours.</td>
</tr>
<tr>
<td>Normal</td>
<td>GE R, 4 units</td>
</tr>
</tbody>
</table>
GEO 135. Geochemistry
Application of geochemical and thermodynamic principles to solution of geologic problems. Topics include: equilibrium-disequilibrium reactions, major and trace element behavior, isotope systematics and modern analytical methods.
Prerequisite: GEO 122 and CHEM 1B (or equivalent).
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

GEO 136. Map and Aerial Photo Interpretation
Use of topographic maps, aerial photographs and satellite imagery to interpret geologic features. Introduction to computer mapping applications in geology.
Prerequisite: GEO 125, GEO 134 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

GEO 137. Introduction to GPS/GIS for Geologic Applications
Introduction to digital geologic mapping and analysis using Trimble GPS and ArcView GIS.
Prerequisite: GEO 3, GEO 4L, and GEO 7, or instructor consent. Computer literacy assumed.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
4 units

GEO 138. Hydrogeology
Geological principles of the occurrence, accumulation and migration of water; groundwater as a manageable resource; groundwater geochemistry and contaminant transport.
Prerequisite: GEO 125 or instructor consent.
Recommend: MATH 32 and GEO 135.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

GEO 140. Principles of Engineering Geology
Qualitative and quantitative analysis of geologic factors influencing site selection, development and use; methods of data collection, interpretation and presentations.
Prerequisite: GEO 125.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

GEO 142. Paleontology
Study of the major groups of invertebrate fossils and their use in geological studies; principles of stratigraphy, including seismic stratigraphy.
Prerequisite: GEO 003, GEO 004L, and GEO 007.
Misc/Lab: Lecture 2 hours/lab and field trips 3 hours.
Normal Grade Rules
4 units

GEO 147. Introduction to Applied Geophysics
Introduction to modern geophysical techniques with emphasis and environmental applications. Field techniques and case histories.
Prerequisite: PHYS 2A and PHYS 2B (or equivalent); GEO 100W
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
4 units

GEO 150. Field Studies in Natural History
See BIOL 150
Repeatable for credit
Normal Grade Rules
GE: B3
1-2 units

GEO 168A. Global Climate Change I
See COMM 168A.
Normal Grade Rules
6 units

GEO 168B. Global Climate Change II
See COMM 168B.
Normal Grade Rules
GE: R
3 units

GEO 171. The End of the World (as you knew it)
Examines challenges to the survival of modern complex societies. Natural resources, particularly petroleum; the economics of energy resources; possible replacements for petroleum; climatic impacts of available choices; futures ranging from zero-growth sustainability to plagues in economic and social stability.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: R
3 units

GEO 174. Hazardous Materials
See CHE 174.
Normal Grade Rules
3 units

GEO 180. Individual Studies
Advanced lab or field work.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

GEO 184. Directed Reading
Reading of books, journals and papers chosen to fill gaps in training. Evaluation through weekly reports and conference.
Repeatable for credit
Credit / No Credit
1-3 units

GEO 204. Earth Systems Science for Teachers
Peer teaching and leadership instruction in earth science. Demonstrations, classroom activities, field projects and teaching strategies for K-12 teacher groups.
Prerequisite: Teaching credential and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

GEO 205. Advanced Earth Science
Selected topics in earth science. Topics change with each offering.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
1-3 units

GEO 213. Advanced Igneous and Metamorphic Petrology
Igneous and metamorphic processes and the evolution of the lithosphere. Application of field, petrographic and chemical data to models of petrogenesis. Laboratory emphasizes microscope studies and computer modeling.
Prerequisite: GEO 121 (or equivalent).
Misc/Lab: Lecture 3 hours/lab 3 hours; field trips.
Normal Grade Rules
4 units

GEO 214. Sedimentary Petrology and Petrography
Petrographic study of sedimentary rocks with application of petrographic information to reconstructions of source terranes, depositional conditions and diagenesis. Discussion of nature and origin of carbonate and terrigenous components is emphasized.
Prerequisite: GEO 124 and GEO 213 or instructor consent.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

GEO 220. Advanced Engineering Geology
Application of geologic and engineering concepts to construction practices and land use planning.
Prerequisite: GEO 140 or instructor consent.
Misc/Lab: Lecture 3 hours/lab 3 hours; field trips.
Normal Grade Rules
4 units

GEO 222. Advanced Sedimentary Geology
Analysis of sedimentary facies, patterns of facies architecture and major controls on evolution of sedimentary basins.
Prerequisite: GEO 123 and GEO 127.
Misc/Lab: Lecture 3 hours/lab 3 hours; field trips.
Normal Grade Rules
4 units
GEOG 231. Advanced Structural Geology
Analysis of deformed rocks with emphasis on
deformation mechanisms, small-scale structures, shear
zones, faults and folds. Techniques of strain analysis
and analyzing structure on maps are emphasized in the
laboratory.
Prerequisite: GEOL 125.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

GEOG 234. Advanced Geomorphology
Applications of geomorphology and Quaternary geology
in evaluating landscape development. Topics include soil
chronosequences, Quaternary dating methods, long-
term flood frequency, active fault investigations. Field
techniques and data analysis emphasized in laboratory.
Prerequisite: GEOL 134 or instructor consent.
Misc/Lab: Lecture 3 hours/lab 3 hours; 3-day field trip
required.
Normal Grade Rules
4 units

GEOG 237. Advanced GIS/GPS Mapping
Advanced methods of ArcGIS mapping and analysis using
published digital datasets and/or student-generated
Differential GPS files. Topics vary, depending on student
interest, but are generally limited to natural sciences.
Prerequisite: GEOL 137 or instructor consent.
Normal Grade Rules
3 units

GEOG 238. Advanced Hydrogeology
Numerical methods in groundwater modeling, vadose
zone monitoring and transport and geochemistry of
natural and contaminated waters.
Prerequisite: GEOL 138 or instructor consent.
Misc/Lab: Lecture 3 hours/lab 3 hours; field trips.
Normal Grade Rules
4 units

GEOG 242. Advanced Paleontology
The lecture portion of this course will be conducted
as a seminar; students will read and discuss classic and
important newer papers on macroevolutionary theory
and paleobiology. In the lab portion of this course,
students will use fossil samples to develop and test
scientific hypotheses that will be part of a semester-long
project.
Prerequisites: Suitable background in geology or
evolutionary biology.
Normal Grade Rules
4 units

GEOG 255. Advanced Geology
Selected topics in geology. Topics change with each
offering.
Prerequisite: Suitable background in geology.
Repeatale for credit
Normal Grade Rules
1-5 units

GEOG 285. Seminar
Fundamental problems in geology. Topics change with
each offering. May be repeated when content changes.
Prerequisite: Instructor consent.
Misc/Lab: Discussion 2 hours.
Normal Grade Rules
2 units

GEOG 298. Research
Advanced individual study in geology.
Repeatable for credit
Credit / No Credit
1-4 units

GEOG 299. Master's Thesis
Prerequisite: Admission to candidacy for the master's
degree.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units
Global Studies Courses

GLOBAL STUDIES

LOWER DIVISION

GLST 001A. Introduction to Global Studies
Introduces students to the scope of global studies as seen from the social and cultural perspectives. Readings based on the best critical studies of globalization and its outcomes. Occasionally, visiting professors will give new academic approaches to this field.
- Normal Grade Rules
- 3 units

GLST 001B. Introduction to Global Studies
Presents scientific ways for understanding global phenomena and for developing policy to achieve positive outcomes of globalization. Interdisciplinary approaches require new analytical models. Visiting professors will collaborate with instructor.
- Normal Grade Rules
- 3 units

UPPER DIVISION

GLST 100W. Writing Workshop
See GEOG 100W
- Normal Grade Rules
- GE Z
- 3 units

GLST 109. Climate Solutions Initiative
See UNVS 109
- Normal Grade Rules
- GE R+V
- 6 units

GLST 143. Technology, Politics, and International Development
Exploration of links between technology & politics in the world of international development and technology aid programs. Case studies identify trends and ideas that influence the direction of technology-focused aid programs.
- Prerequisite: Upper Division Standing
- Normal Grade Rules
- 3 units

GLST 156. Inventing the Modern World: History of Technology
Analysis of development and diffusion of technology since 1500. Interrogate historical narratives of modern technology, reflecting on broader ethical, political, human significance of modern technology. Ecological impacts of technologies. Power, problems, promise of technology.
- Normal Grade Rules
- 3 units

GLST 162. Contemporary Global Issues
Interdisciplinary approach to contemporary global issues. Understanding and analyzing global issues are the focus of the course. Students will explore, analyze, and articulate the unique challenges each of the issues pose to the global community in ways that will foster student’s ability to understand and evaluate causes, consequences, and responses to global challenges.
- Pre-requisite: Upper Division Standing or Instructor Consent
- Normal Grade Rules
- 3 units

GLST 164. Advanced Seminar in Global Citizenship
Designed to encourage and inspire students to develop their own understanding of the concept of global citizenship and to develop informed perspectives related to concerns of the global community. Students will be asked to consider the impact they may have, as well as their individual and collective responsibilities, as global citizens, within their local, national, and global communities.
- Pre-requisite: Upper Division Standing or Instructor Consent
- Normal Grade Rules
- 3 units

GLST 167. Changing Ecologies of Globalization
Environmental and human issues and challenges 1492 to present. Global environmental shifts & relationship to social, demographic, cultural, political change. Human interaction with natural environment.
- Prerequisite: WST, Core GE, Upper Division Standing, co-requisite in 100W or completed
- Normal Grade Rules
- 3 units

GLST 179. Capstone Seminar in Global Studies
Course is designed for majors to help them to gain coherence in their theoretical knowledge, factual grounding, international living, personal aptitudes, and career aspirations. It will also give them experience in interdisciplinary research through preparation of a major scholarly paper. The format includes discussion, group analysis, visiting professors, and individual work.
- Prerequisite: Completion of GLST 1A, GLST 1B, senior standing
- Normal Grade Rules
- 3 units

GLST 187. Special Topics
Selected topics in Global Studies. Topics vary and will be announced each semester.
- Prerequisite: Upper division standing
- Repeatable for credit
- Normal Grade Rules
- 3 units

GLST 188. Special Topics in International Experiences
Study of modern French history, government, immigration and impacts on development of diverse communities. Study of effects of immigration, economics, biases, and other factors on community development, as well as comparing and contrasting French, US, European, and other cultural perspectives.
- Prerequisites: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or co-requisite in a 100W course is required.
- Repeatable for credit
- Normal Grade Rules
- GE V
- 3 units

GLST 189. Global Experience
Required for Global Studies majors. Completion of Global Studies sponsored faculty-led international educational study, semester-long residence abroad, for formal study, research, service learning, or internship. Students will develop their programs with the advice and approval of the GLST advisor and the International Programs and Service office. Students may transfer in additional credits from approved study, with prior approval of the GLST advisor.
- Prerequisite: Completion of GLST 1A and GLST 1B, junior standing
- Repeatable for credit
- Credit / No Credit
- 1-3 units
Health Professions Division Courses

HEALTH PROFESSIONS

UPPER DIVISION

HPRF 100W. Writing Workshop
Development of skills in scientific and technical writing. How to write a critical review of published writing, a business letter, a scholarly paper, and give an oral presentation.
Prerequisite: ENGL 001B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE: Z
3 units

HPRF 134. Complementary and Alternative Health Practices
Philosophical, historical, clinical, and scholarly aspects of complementary and alternative medicine and associated health practices used in the US, with emphasis on scientific clinical investigation and evidence based efficacy.
Prerequisite: Completion of Core GE or instructor consent.
Normal Grade Rules
3 units

HPRF 135. Health Issues in a Multicultural Society
Multidisciplinary interpretation and evaluation of consumer health issues. Impact of cultural variables (including communication methods, socioeconomic status and traditional beliefs) on health and illness. Interaction of individuals in families and other groups.
Prerequisite: Completion of Core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

HPRF 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Upper division standing, instructor consent and division director approval.
Repeatable for credit
Credit / No Credit
1-5 units

GRADUATE

HPRF 221. Patient Education
Theory relating to planning and implementing patient education programs. Aspects of training, behavior modification and working within the health care system.
Normal Grade Rules
3 units

HPRF 260. Multidisciplinary Health Promotion in Later Life
See NUFS 260.
Normal Grade Rules
3 units

HPRF 295. Research Methodology
This course provides basic principles of research, both quantitative and qualitative. Novice researchers are familiarized with research methodology. Candidates engage in evaluating public research, and develop and write a feasible proposal ready for implementation as a research project.
Prerequisite: STAT 095 (or equivalent).
Normal Grade Rules
3 units
Health Science and Recreation
Department Courses

GERONTOLOGY

LOWER DIVISION

GERO 015. Human Life Span
See HS 015.
Normal Grade Rules
GE D1
3 units

GERO 025. Health Team Building
See HS 025.
Normal Grade Rules
3 units

GERO 099. Death, Dying and Religions
See RELS 099.
Normal Grade Rules
GE E
3 units

UPPER DIVISION

GERO 107. Aging and Society
Social, psychological and physiological aging processes. Implications of aging for individuals and societies, with emphasis on issues related to diversity, equality and gender in the U.S.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE S
3 units

GERO 108. Health in Later Life
Normal age-related health changes and common illnesses in later life. Health status, behavior and attitudes of older adults. The continuum of health care services. Professional and ethical issues in service delivery.
Prerequisite: College biological sciences course.
Normal Grade Rules
3 units

GERO 111. Medical Ethics
See PHIL 111
Normal Grade Rules
3 units

GERO 114. Psychology of Aging
See PSYC 114
Normal Grade Rules
3 units

GERO 115. Human Life Span
See HS 015.
Normal Grade Rules
3 units

GERO 117. Social Policy and Services in Aging
Social policy on aging from a historical perspective. Implications for service to the elderly. Indicators for future program projections.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GERO 118. Long Term Care Services
History and organization of the continuum of long term care for U.S. families, financing and regulatory policies, and factors influencing the quality of care. Professional and ethical issues facing long term care providers.
Prerequisite: GERO 107 or HS 162.
Normal Grade Rules
3 units

GERO 122. Women in the Second Half of Life
The roles and problems of the older woman in a changing society. Societal attitudes, stereotypes, employment and interaction patterns. Opportunity for focus on specific areas of interest.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GERO 127. Aging and Mental Health
Prerequisite: PSYC 1 (or equivalent).
Normal Grade Rules
3 units

GERO 133. Gerontology Field Work
Supervised work experience in an organization providing services to older adults. Short-term projects, observation of organizational dynamics and individual skills development.
Prerequisite: Completion of 9 units in gerontology.
Repeatable for credit
Credit / No Credit
3 units

GERO 137. Families, Aging, and Diversity
Family relationships of older adults in diverse U.S. ethnic groups. Current patterns of family and formal assistance to elders with disabilities. Critical analysis of eldercare policies and services.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GERO 156. Independent Living for the Aging and Disabled
See OCTH 156.
Normal Grade Rules
3 units

GERO 166. Medical Sociology
See SOCI 166.
Normal Grade Rules
3 units

GERO 180. Individual Studies
Individual work on special topics in gerontology by arrangement.
Prerequisite: Coordinator approval and upper division standing.
Repeatable for credit
Credit / No Credit
1-4 units

GERO 182. Ethnicity and Aging
See AAS 182.
Normal Grade Rules
3 units

GERO 185. Leisure, Recreation and Aging
See RECL 185.
Normal Grade Rules
3 units

GRADUATE

GERO 210. Issues in Gerontology: Theory and Research
Interdisciplinary examination of current theories and research on biological, psychological and social aspects of aging. Application to issues faced by professionals working with elderly persons.
Prerequisite: One undergraduate gerontology course or instructor consent.
Normal Grade Rules
3 units

GERO 220. Gerontological Services Administration
Application of administrative principles and skills to services for older adults and their families in community and institutional settings. Covers planning, service delivery, human resource management, budgeting, marketing and evaluation.
Prerequisite: GERO 117, SCWK 250 or instructor consent.
Normal Grade Rules
3 units
GERO 230. Long Term Care: Organization and Administration
History and organization of residential and community-based long term care services, funding and regulatory policies, and factors affecting quality of care. Development of skills for effective management.
Prerequisite: One course in health services organization or instructor consent.
Normal Grade Rules
3 units

GERO 251. Social Work with Aging Populations
See SCWK 251.
Normal Grade Rules
3 units

GERO 260. Multidisciplinary Health Promotion in Later Life
See NUFS 260.
Normal Grade Rules
3 units

GERO 265. Seminar in Cognitive Disorders
See EDCO 265.
Normal Grade Rules
3 units

GERO 268. Lifespan Development Theory
See EDCO 268.
Normal Grade Rules
3 units

GERO 292. Graduate Internship in Gerontology
Supervised work experience in an organization serving older adults. Emphasis on the development of management, advanced clinical or applied research skills in multicultural settings. Ten hours a week for fifteen weeks.
Prerequisite: GERO 210 and HPRF 295 (may be taken concurrently with or following GERO 220).
Repeatable for credit
Credit / No Credit
3 units

GERO 298. Special Project
Supervised research in the field of gerontology to be taken only with approval of the program coordinator.
Credit / No Credit
3 units

GERO 299. Master's Thesis or Project
Supervised individual research in gerontology. Preparation for doctoral level study.
Prerequisite: Admission to candidacy for the master's degree and instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units

HEALTH SCIENCE

LOWER DIVISION

HS 001. Understanding Your Health
Introductory course on the interdependence of the physiological, social and psychological factors influencing the healthy well-being of individuals throughout the life span. Emphasis is on identifying and utilizing both university and community resources to assist in personal and educational development.
Normal Grade Rules
GE: E
3 units

HS 015. Human Life Span
Emphasizes growth and development of the individual from conception to death - perspective on biological, cultural, sociological and psychological changes and continuities during the human life span. Special attention will be given to socioeconomic status, gender and ethnic variations.
Normal Grade Rules
GE: D1
3 units

HS 025. Health Team Building
Develops skills to work effectively on a health team. Learning to plan, implement and evaluate health programs; understanding the dynamic forces operating in groups, integrating and applying theory and practice.
Normal Grade Rules
3 units

HS 067. Introductory Health Statistics
A practical introduction to the statistical methods used in health, health care, biomedical, and public health settings. Concepts are illustrated with concrete examples that demonstrate how principles operate and are applied to common health problems.
Prerequisite: Satisfaction of ELM requirement.
Normal Grade Rules
GE: B4
3 units

HS 074. Healthy Communities
Transdisciplinary introduction to community health. Strategic analysis of local communities, evidence-based interventions, impact of environmental changes at individual, family, neighborhood, and community levels. Focus on healthy policies, built environment, leisure, equity, and integration of recreation and population health approaches.
Prerequisites: Successful Completion of HS 001 or RECL 10
Normal Grade Rules
3 units

UPPER DIVISION

HS 100W. Writing Workshop
See HPRF 100W.
Normal Grade Rules
GE: 2
3 units

HS 101B. Computer Applications for Professionals
See NUFS 301B.
Normal Grade Rules
3 units

HS 103. Introduction to Health Policy
Examination of historical and current policies related to public health, stakeholders in health policy making and advocacy, and health policy frameworks for conducting policy analysis and policy making.
Prerequisites: HS/HPRF 100w
Normal Grade Rules
3 units

HS 104. Community Health Promotion
Examination of community health issues, needs and assets, core determinants, enabling factors, and levels of intervention. Introduction to community approaches to disease prevention and health promotion, risk and resilience, social capital, and social change to promote community health. Restricted to majors and minors.
Prerequisite: Completion of HS 74, HS Majors and Minors only or instructor consent.
Normal Grade Rules
3 units

HS 105. Current Issues in Nutrition
See NUFS 105.
Normal Grade Rules
3 units

HS 106. Concepts in Peer Health Education
Exploration of peer and lay health education as an effective health promotion strategy. Emphasis on college health and the skills and knowledge to be a successful peer health educator in a university setting. Interactive, skills-based seminar includes service-learning at SJSU.
Repeatable for credit
Normal Grade Rules
3 units

HS 107. Aging and Society
See GERO 107
Normal Grade Rules
GE: 5
3 units

HS 108. Health in Later Life
See GERO 108
Normal Grade Rules
3 units
HS 111. Medical Ethics
See PHIL 111
Normal Grade Rules
3 units

HS 117. Social Policy and Services in Aging
See GERO 117.
Normal Grade Rules
3 units

HS 118. Long Term Care Services
See GERO 118.
Normal Grade Rules
3 units

HS 122. Women in the Second Half of Life
See GERO 122.
Normal Grade Rules
3 units

HS 126. Drugs, Brain and Behavior
See PSYC 126.
Normal Grade Rules
3 units

HS 135. Health Issues in a Multicultural Society
See HPRF 135.
Normal Grade Rules
GE S
3 units

HS 137. Families, Aging, and Diversity
See GERO 137.
Normal Grade Rules
3 units

HS 140. Human Sexuality
See ANTH 140.
Normal Grade Rules
GE S
3 units

HS 145. Community Mental Health
Theories and knowledge of mental health factors influencing the well-being of individuals across the lifespan. Emphasis is on identifying and utilizing community resources to facilitate personal development and empowerment at all ages. 
Prerequisite: Completion of a 100W workshop, or instructor consent.
Normal Grade Rules
3 units

HS 158. Health Communications and Technology
Explores the evolving use of Internet technology in health care, disease prevention, and health promotion. The health professional's role as developer and user of online health resources is examined. The Internet's future role in health is assessed.
Prerequisite: HS 1, HS 15, and HS 67 with a grade of C or better in each.
Normal Grade Rules
3 units

HS 159. Health Program Planning
Students will develop a community health plan that is based on an assessment of needs and community assets. The plan will include interventions that reflect “Best Practices” and recognize the value of partnerships, media advocacy and policy advocacy.
Prerequisite: HPRF 100W and HS 104 with a grade of C or better in each.
Normal Grade Rules
3 units

HS 159A. Community Assessment for Health Promotion Program Planning
Introduction to principles and practices of community health assessment with a focus on health disparities and social equity. Application of ecological perspective to community health issues. Development of community health assessment.
Prerequisites: HS/HPRF 100W, HS 104, HS 161
Normal Grade Rules
3 units

HS 159B. Health Promotion Program Planning for Community Change
Continued development of community health program planning skills. Application of behavioral and social science theory to community health challenges. Creation of community health promotion program plan using assessment created in HS 159A.
Pre/Co-requisite: HPRF 100W preferred, other 100W considered upon petition.
Normal Grade Rules
3 units

HS 161. Epidemiology
The study of population-based risks of infectious and noninfectious diseases and how these risks relate to cause, treatment and prevention. Restricted to Majors and minors.
Prerequisite: Completion of HS 2, HS 15, and HS 67 with a grade of C or better. HS Majors only or instructor consent.
Normal Grade Rules
3 units

HS 162. Health Care Organization and Administration
Exploration of health economics, financing, insurance theory and contemporary trends in health care organization, management and administration.
Prerequisite: HPRF 100W, HS Majors only
Normal Grade Rules
3 units

HS 164. Health Services and Social Marketing
Introduction to marketing principles and concepts as applied in community health education and health services settings. Examination of difference between strategic business marketing and social marketing for health, through examples of successful health education and health services programs. Restricted to HS Majors or instructor consent.
Prerequisite: HS 158 and HS 159 with a grade of C or better in each.
Normal Grade Rules
3 units

HS 165. The Health Professional
Preparation for entry into community health professions with an emphasis in four areas: (1) settings and roles, (2) skills for practice, (3) ethics, and (4) leadership and professional associations.
Prerequisite: HS majors in Final Semester.
Normal Grade Rules
3 units

HS 166A. Field Experience Seminar
Theory and practice in a community health agency, health care facility or industry.
Prerequisite: HS 159, HS 161 and HS 162.
Corequisite: HS 166B.
Notes: For majors only with instructor consent.
Credit / No Credit
3 units

HS 166B. Field Experience in Health Science
Supervised work experience in an official or voluntary health agency, health care facility or industrial setting: short-term projects, observation of agency or facility dynamics and individual skills development.
Prerequisite: HS 159A, HS 161 and HS 162
Notes: For majors only with instructor consent.
Credit / No Credit
3 units

HS 167. Biostatistics
Statistical analysis of health and biological data covering measurement scales, random sampling, data quality, data storage descriptive and exploratory techniques, probability distributions, estimation and hypothesis testing, includes an integrated lab activity.
Prerequisite: HS 67 with a minimum grade of C. HS Majors only.
Misc/Lab: Lecture 2 hours/activity 2 hours
Normal Grade Rules
3 units

HS 168. Health Education Theory and Methods
Explores the foundations and applications of health education theory. Students will study models of individual, interpersonal and community health behavior. They also will learn methods for applying theory in research and health education practice.
Prerequisite: HS 104.
Normal Grade Rules
3 units
Academic Year
2014-2015
Course Descriptions

v01
Monday, June 9, 2014

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE

HS 169. Diversity, Stress and Health
See KIN 169.

Normal Grade Rules

GE: S

3 units

HS 170. Health Care Economics
Study of the economics of health care and understanding cost-benefit, cost-effectiveness ratio and decision tree analysis for health care.

Prerequisite: HS 162 with a minimum grade of C.

Normal Grade Rules

3 units

HS 171. Managed Health Care
Study of managed health care and its growth and impact on the organization and delivery of health services in the United States.

Prerequisite: HS 162 with a grade of C or better.

Normal Grade Rules

3 units

HS 172. Contemporary Environmental Health Issues
Examines the complex and interdependent relationship between environment and health outcomes. Advances scientific understanding of evolution and biodiversity, ecosystems, population dynamics, sustainability of earth’s resources, pest management, solid and hazardous waste, water and air pollution, climate change, and environmental/occupational exposures.

Prerequisites: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.

Normal Grade Rules

GE: R

3 units

HS 173. Comparative Healthcare Systems
A comprehensive examination of the structure of healthcare systems in selected countries worldwide. Specific attention is paid to the developmental history of the national healthcare systems, financing, and delivery infrastructure. The impact of international relations is also examined.

Prerequisite: HS 162 with grade of ‘C’ or higher.

Note: HS 173 required for students completing the Health Science, Option 4, Health Services Administration Concentration.

Normal Grade Rules

3 units

HS 174. Fundamentals of Health Information Technology
Introduction to the principles and practices of health information technology to administer healthcare systems and promote public health. Focus on best practices, case-based learning, and global comparisons of innovative systems.

Prerequisite: HS 162

Normal Grade Rules

3 units

HS 175. Legal/Ethical Aspects, Healthcare Admin
Exploration of legal and ethical issues facing the health care industry, government regulation, patient rights, and corporate/administrative responsibility.

Prerequisite: HS 162

Note: HS 175 required for students completing the Health Science, Option 4 Health Services Administration Concentration. To register, students must have completed HS 162 with grade of ‘C’ or higher.

Normal Grade Rules

3 units

HS 176. Introduction to Global Health

Addresses ethics and leadership in global health.

Prerequisite: Upper Division Standing

Normal Grade Rules

3 units

HS 180. Individual Studies
Individual work on special topics by arrangement.

Prerequisite: Upper division standing, instructor consent and department chair approval.

Repeatable for credit

Credit / No Credit

1-4 units

HS 184. Directed Reading
Directed reading in journals and books of authorities in the field of health.

Prerequisite: Upper division standing and department chair consent.

Repeatable for credit

Credit / No Credit

1-4 units

HS 200. Contemporary Practice in Public Health
Introduction to the philosophy, ethics, historical roots, and approaches of contemporary public health education and health promotion. Emphasis is on frameworks and strategies used in practice.

Repeatable for credit

Normal Grade Rules

2 units

HS 201. Groups and Training: Theory and Practice
Study of group processes and learning theories as they apply in the public health training environment. Apply experiential learning concepts and principles in the design, implementation, and evaluation of training programs.

Normal Grade Rules

2 units

HS 230. Long Term Care: Organization and Administration
See GERO 230.

Normal Grade Rules

3 units

HS 261. Principles of Epidemiology
Introduction to epidemiologic concepts and methods with applications to public health practice for students intending to engage in, collaborate in, or interpret the results of epidemiologic studies in the scientific appraisal of community health.

Prerequisite: HS 167 or equivalent.

Normal Grade Rules

3 units

HS 262. Health Services Organization
In-depth examination of the organization and administration of health services in the United States. Topics explored include health care economics, health service expenditures, insurance theory, comparative health systems, government role, cost containment and quality.

Normal Grade Rules

2 units

HS 263. Principles and Skills of Health Administration
Application of administrative concepts and skills in health systems agencies. Includes decision-making, communication, funding, budgeting, marketing, personnel management, labor relations, planning, evaluation and health promotion.

Normal Grade Rules

2 units

HS 264. Health Policy
Analysis of major policy issues with an emphasis on neoclassical economics. Topics to be explored include health insurance and its effect on utilization, antitrust, managed care, health care legislation and health care reform.

Prerequisite: HS 117 (or equivalent).

Normal Grade Rules

3 units

HS 265. Environmental Health
Investigation of environmental health issues: risk evaluation, risk management, hazardous materials, occupational health and safety, plus air, water and noise pollution. Learning fundamentals of managing environmental health problems.

Repeatable for credit

Normal Grade Rules

3 units

<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HS 267</td>
<td>Computational Public Health Statistics</td>
<td>Methods of public health and biostatistical data collection, management, analysis and reporting using microcomputers, including the detection and control of confounding factors. Prerequisite: HS 167 or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>HS 268</td>
<td>Advanced Program Evaluation</td>
<td>Advanced study of health program evaluation. Includes examination of key concepts, integrating qualitative and quantitative methods, selecting appropriate indicators of measuring success, and overcoming barriers evident in community settings. Prerequisite: HS 272. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>HS 269</td>
<td>Applied Data Analysis</td>
<td>Overview of quantitative and qualitative data analysis and reporting. Application of basic quantitative analysis concepts introduced in computational statistics and research courses. Specific emphasis of interpretation of qualitative data including data reduction, text management, coding, content analysis, and data trustworthiness. Prerequisites: HS 295 Pre/Corequisites: HS 267 Repeatable for credit Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>HS 270</td>
<td>Interpersonal Processes</td>
<td>Study of group processes and their effects on changes in health behavior within individuals and members of groups. Practice interpersonal skills in group problem solving, conflict resolution and management, communications and creative learning. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>HS 271</td>
<td>Theoretical Foundations of Public Health</td>
<td>Role of theory in shaping practice, research and evaluation that facilitates social change and promotes health across the spectrum of prevention, including individual, community, organization, and policy levels. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>HS 272</td>
<td>Health Promotion Planning and Evaluation</td>
<td>Theory and practice of developing community health programs. Focus on program planning within the context of strategic planning, problem/needs assessment, setting of program goals and objectives, approaches to program evaluation and grant writing. Prerequisite: HS 271. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>HS 273</td>
<td>Systems Approach to Community Health Problems and Program Design</td>
<td>General systems theory and its application to a selected community health problem. Systems analysis and the use of a variety of specific and broad systems tools within the context of program design. Structured opportunities to apply and practice specific methodologies. Repeatable for credit Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>HS 274</td>
<td>Training</td>
<td>Students learn and apply theory and skills by participating in a training design process. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>HS 275</td>
<td>Community Organization and Health Promotion</td>
<td>Advanced study of the principles, practices and ethical considerations underlying community organization, health promotion, empowerment and advocacy. Includes examination of the change process and introduction to the skills and tools of effective public health organizing. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>HS 276</td>
<td>Multicultural Communication for Health Professionals</td>
<td>Theories and skills of multicultural communication necessary for effective professional practice with diverse clients, communities, staff and colleagues. Examination of concepts and indicators of cultural competence begins with intensive self-study and concludes with community examples. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>HS 277</td>
<td>Organizational Behavior and Development in Health Care Settings</td>
<td>Organizational behavior, development and change in health care settings; the practice of organizational development technology skills. Prerequisite: HS 270 or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>HS 278</td>
<td>Practicum I: Professional Experience</td>
<td>Supervised work experience in community, health care organization or worksite setting; emphasis will be on individual responsibility in a program area and joint responsibility in several ongoing programs. Credit / No Credit 6 units</td>
</tr>
<tr>
<td>HS 279</td>
<td>Fieldwork Seminar</td>
<td>Preparation for fieldwork placement, with emphasis on (1) self-assessment of strengths, competencies, professional objectives, and fieldwork priorities; (2) identification of fieldwork site and negotiation of Memorandum of Understanding, and (3) planning for professional development. Prerequisite: HS 200, HS 201, HS 271, HS 272 or instructor consent. Repeatable for credit Normal Grade Rules 1 unit</td>
</tr>
<tr>
<td>HS 280</td>
<td>Fieldwork Practicum</td>
<td>Application of theory and skills to health education practice, research, and/or policy under the supervision of a preceptor. Prerequisite: HS 200, HS 201, HS 271, HS 272, HS 291A or instructor consent. Corequisite: HS 291P Repeatable for credit Credit / No Credit 1-2 units</td>
</tr>
<tr>
<td>HS 281</td>
<td>Fieldwork Synthesis</td>
<td>Critical reflection on and synthesis of fieldwork experience. Prerequisite: HS 291B or instructor consent. Normal Grade Rules 1 unit</td>
</tr>
<tr>
<td>HS 282</td>
<td>Work Experience Practicum</td>
<td>Supervised work experience in community, health care organization, or worksite settings. Prerequisites: HS 200, HS 201, HS 271, HS 272, HS 291A. Repeatable for credit Credit / No Credit 1-2 units</td>
</tr>
<tr>
<td>HS 283</td>
<td>Work Experience Synthesis</td>
<td>Critical reflection and synthesis of fieldwork experience, including lessons learned, organizational analysis, and professional self-assessment. Prerequisites: HS 200, HS 201, HS 271, HS 272, HS 291A, HS 291D. Normal Grade Rules 2 units</td>
</tr>
<tr>
<td>HS 284</td>
<td>Professional Development</td>
<td>Strategically selected professional development activities to supplement experiences during fieldwork and advance public health career objectives. Prerequisite: HS 291A Credit / No Credit 1 unit</td>
</tr>
<tr>
<td>HS 285</td>
<td>Practicum II: Professional Experience</td>
<td>Supervised experience. Emphasis is on short term projects and observations related to practice. Prerequisite: HS 291. Credit / No Credit 3 units</td>
</tr>
</tbody>
</table>
RECL 090. Foundations of Recreation Parks & Tourism
Field of parks and recreation; history of development of the recreation profession; survey of recreation and leisure services.
Normal Grade Rules
3 units
RECL 094. The Outdoor Recreation Experience
Students will explore, understand, and experience firsthand the value, meaning, and benefits of a variety of outdoor recreation activities. Socio-cultural and ecological systems will be examined as they relate to the delivery of outdoor recreation experiences in both the public and private sector.
Normal Grade Rules
3 units
RECL 097A. Event Planning
Principles of event planning with emphasis on development and integration of operational strategies in recreation and hospitality management. Application of programming techniques and exploration of career opportunities in event management.
Normal Grade Rules
3 units
RECL 100W. Writing Workshop
Developing and enhancing written communication skills in the recreation and leisure profession in the following areas: scientific/technical writing, administrative writing, public-relations-related writing and funding proposals.
ENGL 1B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Normal Grade Rules
GE: Z
3 units
RECL 109. Foundations of Recreation Parks & Tourism
Field of parks and recreation; history of development of the recreation profession; survey of recreation and leisure services.
Normal Grade Rules
3 units
RECL 094. The Outdoor Recreation Experience
Students will explore, understand, and experience firsthand the value, meaning, and benefits of a variety of outdoor recreation activities. Socio-cultural and ecological systems will be examined as they relate to the delivery of outdoor recreation experiences in both the public and private sector.
Normal Grade Rules
3 units
RECL 097A. Event Planning
Principles of event planning with emphasis on development and integration of operational strategies in recreation and hospitality management. Application of programming techniques and exploration of career opportunities in event management.
Normal Grade Rules
3 units
UPPER DIVISION
RECL 100W. Writing Workshop
Developing and enhancing written communication skills in the recreation and leisure profession in the following areas: scientific/technical writing, administrative writing, public-relations-related writing and funding proposals.
ENGL 1B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Normal Grade Rules
GE: Z
3 units
RECL 110. Leisure, Life and Contemporary Society
Explore conceptual foundations of play, recreation and leisure and their importance in physical, social, psychological and spiritual development across the lifespan. Assess the roles of existing services in enhancing quality of life across social, cultural, economic and environmental realms.
Upper division standing.
Normal Grade Rules
3 units
RECL 111. Leisure, Culture, and Identity
Perspectives of leisure as a source of self-expression and social control related to cultural beliefs, values, and practices and institutionalized social systems. Observation, analysis and critique of history and social structures, leisure and culture, and personal opportunities for change.
Completion of core GE, successful completion of Writing Skills Test, upper division standing.
Normal Grade Rules
GE: S
3 units
RECL 112. Foundations of Recreation Therapy
Fundamentals of the profession, history, delivery models, theory and practice of Recreation Therapy as a treatment modality for persons whose functional abilities are impaired. Exposure to ADA facility assessment, inclusion, and impact of social attitudes through didactic and experiential learning.
Upper division standing.
Normal Grade Rules
3 units
RECL 113. Leisure: Philosophy and Education
Examination of philosophical, historical, psychological, and wellness foundations for education for leisure. Learning systems to facilitate the process of change through leisure opportunities for wellness.
Upper division standing.
Normal Grade Rules
3 units
RECL 130. Event Marketing in Recreation Enterprises
Develop competence in event promotion and marketing. Explore marketing fundamentals, such as targeting an audience, creating promotional materials and pricing to cover event costs as well as event sponsorship. The role of social media in special themed events will be surveyed.
RECL 097A
Normal Grade Rules
3 units
RECL 132. Recreation Program Planning
Learn to plan and implement programs and events for diverse individual, group and community recreation experiences using contemporary needs assessment, outcomes oriented goal setting, program/event selection, leadership techniques and evaluation tools.
RECL 110
Normal Grade Rules
3 units
RECL 133. Principles of Recreation Leadership
In-service training workshops to develop skills in planning, implementation and evaluation processes. Self-awareness, communication and group process.
Upper division standing.
Normal Grade Rules
4 units
RECL 135. Planning and Managing Rec Areas & Facilities
Content includes legal principles and risk management, as well as fundamentals of facility design and preventive maintenance in reaction, park, and tourism settings. This is a problem-based learning course, including case study, problem solving, project applications, and working with stakeholders.
Prerequisites: RECL 090, RECL 110.
Corequisite: RECL 137.
Normal Grade Rules
3 units

RECL 136. Principles of Recreation and Park Administration
In the context of leadership roles and responsibilities in the field of recreation and park administration, this course examines issues related to the organization and administration of human resources, finances, areas and facilities, programs, risk management, and liability.
Prerequisites: RECL 090, RECL 110.
Corequisite: RECL 136.
Normal Grade Rules
3 units

RECL 137. Recreation Risk & Financial Management
Legal and financial aspects of managing parks, recreation and leisure service organizations.
Prerequisites: Upper division standing; RECL 090, RECL 110.
Corequisite: RECL 136.
Normal Grade Rules
3 units

RECL 143. Festivals and Community Special Events
Principles and applications for effective management of festivals, fairs and community special events; including planning, marketing, financing, evaluating, logistics, consumer behavior, corporate sponsorship, licensing agreements, risk management, and sustainable practices.
Prerequisite: RECL 097.
Normal Grade Rules
3 units

RECL 144. Natural and Cultural Resource Interpretation in Recreation and Parks
Explore the interpretive approach to communicating value and vision of nature, outdoor recreation and tourism sites. Gain skills to develop and conduct activities such as guided walks, interpretive programs and fireside chats. Learn fundamentals of creating interpretive media such as brochures, displays, and exhibits as well as e-media.
Normal Grade Rules
3 units

RECL 148. Biofeedback Principles and Practices
Conceptual and historical review of Biofeedback theory and practice. Experiential engagement with software, instrumentation, data interpretation and personal reflection. Assessment, treatment, evaluation, and case studies applied to medical and non-medical practices.
Normal Grade Rules
3 units

RECL 150. For-Profit Enterprises in Recreation
Development of knowledge and skills relating to the variety and types of for-profit recreation enterprises, including planning for and management of commercial ventures; development of corporate identity and market niche, and forecasting of trends and shifts in consumer culture.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 151. Planning and Development of Tourism and Event Enterprises
Practices utilized in private profit, nonprofit and commercial sectors for planning, developing and operating leisure, tourism, and event enterprises. Management functions and consumer behavior related to products and services.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 152. Non-Profit Leadership & Management
Introduction to the historical and philosophical foundations of the Non-Profit sector. Provides a basic understanding of key issues in managing contemporary nonprofit organizations including: organizational behavior; board development; fund-raising; boundary-spanning skills; and developing leadership skills for social innovation and entrepreneurship.
Prerequisite: Upper Division Standing.
Normal Grade Rules
3 units

RECL 153. Youth Development and Services
Surveys the field of youth development, its historical roots, sociocultural and psychological development, and contemporary innovations. Develop knowledge of the institutional and programmatic factors that lead to positive developmental outcomes for youth in leisure and human service organizations.
Prerequisite: Upper Division Standing.
Normal Grade Rules
3 units

RECL 155. Outdoor Recreation Systems
Overview of outdoor recreation in the United States. Study of the historic, social, economic and political factors influencing natural resource protection. Includes a survey of organizations that manage visitors and protected areas to provide quality outdoor recreation experiences.
Prerequisite: Upper Division Standing.
Normal Grade Rules
3 units

RECL 156. Principles of Sustainable Travel and Tourism
Examination of travel and tourism as it relates to tourist motivations, hospitality and destination management. The impact of tourism on the physical, cultural and economic environment.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 157. Sustainable Recreation & Ecotourism
Course examines cultural, ethical, environmental and social science issues, and uses applied research methods to achieve competence in making programmatic and resource management decisions for recreational and tourism purposes.
Prerequisite: Upper division standing, RECL 110.
Normal Grade Rules
3 units

RECL 158. Cultural and Heritage Tourism
Heritage experiences leading to deeper cultural understanding are essential in the tourism segment of recreation. Exploration of culture and heritage using the lens of growth, popularity or compression will be examined. Discussion on practices and concerns associated with cultural heritage-based tourism.
Normal Grade Rules
3 units

RECL 160. Research and Evaluation in Recreation
Methods applicable to recreation problem-solving, leading to the completion of an individual research project. Exposure to computer-assisted applications regarding retention, retrieval and analysis of research-generated data.
Prerequisite: Upper division standing, RECL 090, RECL 100W, RECL 110.
Corequisite: RECL 136.
Normal Grade Rules
3 units
RECL 165. Senior Seminar in Recreation
A capstone experience designed to help students synthesize and further develop skills acquired in program planning and development, implementation, and evaluation. Emphasis placed on negotiation of all phases of designing and facilitating meaningful recreation experiences in a variety of agencies and communities. Prerequisite: Completion of 36 units of HRTM coursework including HRTM 90, HRTM 97, HRTM 110 and HRTM 113. Major form completed and signed by HRTM advisor and chair. Senior standing.
Normal Grade Rules: 3 units

RECL 169. Practicum in Recreation Therapy
Supervised 100 hour competency-based field learning in approved health agency (e.g., hospital, community health, municipal). Learning exposes the learner to different populations, interventions, terminology, resources. Learner will observe job task skills, apply knowledge, and gain abilities of Recreation Therapy practice. Pre-requisites: RECL 90
Credit / No Credit: 1 unit

RECL 170A. Pre-Intern Workshop
Introduces and prepares upper division majors for senior internship. Includes career goal clarification, resume development and interviewing through both workshops and online delivery. Prerequisites: RECL 090, RECL 100W, RECL 110.
Corequisites: RECL 136, RECL 137.
Credit / No Credit: 1 unit

RECL 170B. Internship in Recreation
Supervised 40-hour per week internship (minimum of 12 weeks) in one of a variety of approved agencies (lesser services, park and recreation, or tourism/commercial recreation).
Prerequisites: Upper division standing; RECL 136, RECL 160, RECL 170A.
Credit / No Credit: 4-10 units

RECL 170C. Internship in Therapeutic Recreation
Supervised 40-hour per week internship program (minimum of 12 weeks) in one of a variety of approved health agencies (e.g. hospital, rehabilitation clinic).
Prerequisites: Upper division standing; RECL 136, RECL 160, RECL 170A.
Credit / No Credit: 4-10 units

RECL 180. Individual Studies
Individual work investigating special topics/problems through research, applied projects, and/or field experiences. Assessment by project(s) and/or paper(s). Prerequisites: Upper division standing, supervising instructor approval, and department chair consent.
Repeatable for credit: Credit / No Credit
1-4 units

RECL 184. Directed Reading
Directed reading in journals and books by authorities in Hospitality, Recreation, Tourism and related fields. Assessment by project(s) and/or paper(s). Prerequisite: Upper division standing, supervising instructor approval, and department chair consent.
Repeatable for credit: Credit / No Credit
1-4 units

RECL 185. Leisure, Recreation and Aging
Theory and practice related to the role of leisure services in maximizing the quality of life for older adults. Interrelationship of leisure and other supportive services for older adults in community and institutional settings.
Prerequisite: Upper division standing.
Normal Grade Rules: 3 units

RECL 187. Leisure Education in Recreation Therapy
Overview of leisure education as it is used both in medical and non-medical settings to improve functioning and wellbeing among diverse clientele. Students will learn historical, philosophical, and contemporary conceptual foundations, evidence-based and practical applications to service delivery.
Normal Grade Rules: 3 units

RECL 193. RT Interventions for People with Physical Conditions
Theoretical foundations, research, and evidenced based Recreation Therapy interventions for persons with physical, intellectual, and developmental disabilities and other chronic conditions. Focuses on rehabilitation, community reintegration, day programs, and inclusion.
Prerequisite: Upper division standing.
Normal Grade Rules: 3 units

RECL 194. Advanced Practices in Therapeutic Recr
The application and examination of concepts, techniques, research, and legal issues utilized by advanced practitioners and managers. Includes trends and issues related to clinical supervision, reimbursement, quality improvement, legislation, comprehensive program design, and applied research that produces evidenced based practice.
Prerequisite: RECL 112.
Normal Grade Rules: 3 units

RECL 197. Recreation Therapy in Mental Health
Application of theory, models, concepts and facilitation processes used in Recreation Therapy and related professions for people with mental health conditions. Experiential learning and facilitation of leisure education, clinical interventions, and behavioral change processes used in medical and non-medical settings.
Prerequisite: Upper division status, RECL 112 and RECL 113.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules: 3 units

RECL 198. Rec Therapy Assessment and Documentation
Clinical procedures utilized in Recreation Therapy whereby habilitation/rehabilitation is the primary goal, client assessment, development of behavioral objectives and treatment plans, evaluation, documentation, medical terminology, and charting procedures are covered. Extensive skill development regarding critique and development of assessment tools.
Normal Grade Rules: 3 units

RECL 200. Foundations of Recreation and Tourism
Basic philosophical, historical, and scientific foundations and developments in leisure, recreation and tourism; analyses of the significance of leisure in modern societies; critical review of major and classical writings in the field with special attention to academic writing.
Corequisite: HRTM 110
Normal Grade Rules: 3 units

RECL 202. Evaluation and Assessment in Recreation and Tourism
Acquires knowledge and principles of evaluating selected areas in recreation and tourism services. Through use of analytical tools and processes, students learn how to write evaluation report to meet stakeholders information and decision-making needs.
Prerequisite: HRTM 200.
Normal Grade Rules: 3 units

RECL 203. Seminar in Recreation-Park Administration
A discussion of selected problems and their possible solutions dealing with personnel administration, planning of recreation and park areas and facilities, program organization, public relations, financial procedure, legal aspects of recreation, etc.
Normal Grade Rules: 3 units
RECL 204. Research Methods in Recreation and Tourism
A critical examination of the various approaches and methods used in research; a survey of research design, data collection, data coding, and analysis in the recreation, tourism, and related fields.
Prerequisite: HRTM 202 or instructor consent.
Normal Grade Rules
3 units

RECL 205. Finance in Recreation
Examination of bases, sources and strategies for financing and marketing of recreation programs and services. Includes public, private-for-profit, nonprofit and commercial leisure service agencies.
Normal Grade Rules
3 units

RECL 210. Contemporary Theories in Recreation and Tourism
Reviews theoretical and empirical social science literature in recreation and tourism. Review, interpretation and evaluation of contemporary research in recreation, leisure, tourism, and related fields.
Prerequisite: HRTM 200.
Normal Grade Rules
3 units

RECL 211. Therapeutic Recreation Practices
Development and analysis of individualized program plans based upon selected theoretical foundations; emphasis on assessment, program design, follow-up services. Major service delivery systems studied in depth with regard to implications for leisure service delivery affecting disabled or ill individuals.
Normal Grade Rules
3 units

RECL 212. Facilitation and Intervention in Therapeutic Recreation
Theories of intervention and facilitation integrated with methodology to recognize the interdependence of the individual and the environment. Direct and enabling technique application to the therapeutic recreation profession analyzed for situational effectiveness.
Normal Grade Rules
3 units

RECL 213. Advanced Professional Therapeutic Recreation Practices
Professional practices, including in-service and pre-service training, consultation and group facilitation; processes for addressing professional trends and issues, including credentialing, legislative processes, interdisciplinary service delivery and networking.
Prerequisite: HRTM 211 and HRTM 212.
Normal Grade Rules
3 units

RECL 215. International Tourism Trends and Issues
Analyze international tourism concepts, trends, and issues associated with development. Study goals and procedures for basic and applied tourism research and introduce varied information sources for independent research. Adopt a culturally sensitive perspective for interpreting information related to different cultures.
Normal Grade Rules
3 units

RECL 216. Marketing for Tourism and Recreation
Study of characteristics which define cultural groups around the world. Learn to adjust marketing approaches, materials, and technology to accommodate the different ways people communicate to attract specific markets. Includes field-based market research.
Normal Grade Rules
3 units

RECL 217. Information Technology and Tourism
Analysis of concepts, trends, and issues associated with technology and tourism development. History and applications of various information technologies in tourism businesses. Trends in technology and the impact on the travel industry.
Normal Grade Rules
3 units

RECL 218. Tourism Planning and Development
Review, analysis, and application of concepts, strategies, techniques, and approaches associated with destination tourism planning, development, and management. Emphasis is on integrated and sustainable tourism planning and development models at global, national, regional, and local/community levels.
Normal Grade Rules
3 units

RECL 219. Cultural and Heritage Tourism
Introduction to the concerns and issues involved in studies of heritage, tradition, historic preservation, public archaeology, and heritage tourism.
Normal Grade Rules
3 units

RECL 265. Graduate Research Seminar
Presentation, discussion, and evaluation of leisure research.
Prerequisite: RECL 200, RECL 202, or instructor consent.
Normal Grade Rules
3 units

RECL 270. Graduate Internship in Recreation and Tourism
A 12-week, 15 hours per week of applied management experience in a leisure service or tourism organization under the joint supervision of a faculty advisor and an organizational representative.
Prerequisite: RECL 200, RECL 202, RECL 204.
Normal Grade Rules
3 units
History Department Courses

HISTORY

LOWER DIVISION

HIST 001A. World History to 1500
Introduces students to the world’s regions and civilizations as interconnected entities. HIST 1A examines the growth and development of traditional civilizations to 1500. HIST 1B surveys the transformation of civilizations since 1500.
Normal Grade Rules
3 units

HIST 001B. World History from 1500
Introduces students to the world’s regions and civilizations as interconnected entities. HIST 1A examines the growth and development of traditional civilizations to 1500. HIST 1B surveys the transformation of civilizations since 1500.
Normal Grade Rules
3 units

HIST 010A. Western Civilization
History and culture of Europe; social and political structures; roles of individuals and groups; relationships among ideas, institutions, society and culture; to 1648.
Normal Grade Rules
GE D2
3 units

HIST 010B. Western Civilization
History and culture of Europe; social and political structures; roles of individuals and groups; relationships among ideas, institutions, society and culture; to present.
Normal Grade Rules
GE D2
3 units

HIST 015A. U.S. History and Government
Treatment of essentials of U.S. history and politics. Satisfies the American Institutions requirements in history, government and ideals.
Note: Entire sequence satisfies GE Areas D2,3, F1,2,3.
Normal Grade Rules
GE M6
3 units

HIST 015B. U.S. History and Government
Treatment of essentials of U.S. history and politics. Satisfies the American Institutions requirements in history, government and ideals.
Note: Entire sequence satisfies GE Areas D2,3, F1,2,3.
Normal Grade Rules
GE M7
3 units

HIST 020A. History of the American People
Survey of continuity and change in society, culture, institutions and environment. Origins through slavery conflict.
Normal Grade Rules
3 units

HIST 020B. History of the American People
Survey of continuity and change in society, culture, institutions and environment. Emergence of modern society and world power status.
Normal Grade Rules
3 units

HIST 050. Historical Process: Understanding Historical Reasoning
Modes and skills of practical logic and reasoning through study of historical method. Historical problems examined to that end.
Normal Grade Rules
GE M9
3 units

HIST 099. History Fundamentals
An introduction to the skills, technology and technique of history reading, writing and research. It is a prerequisite to History 100W. Sophomores and transferring juniors are required to take this course.
Prerequisite: Open to history majors only; lower or upper division standing.
Normal Grade Rules
3 units

UPPER DIVISION

HIST 100W. History Writers’ Workshop
Development of skills required for the art and practice of historical research and writing. Library research, oral reports and written exercises dealing with a variety of historical problems.
Prerequisite: ENCL 001B (with a grade of C or better); Completion of Core GE; satisfaction of Writing Skills Test and upper division standing. HIST 099 required or Department permission.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement.
Normal Grade Rules
GE Z
3 units

HIST 101. History Honors
Selected topics in history in more than one area or chronological period.
Prerequisite: History major or minor or social science major with overall GPA of 3.0 and a history GPA of 3.5.
Normal Grade Rules
4 units

HIST 102. Historiography
Critical study of the writings of great historians.
Prerequisite: HIST 099 and HIST 100W.
Normal Grade Rules
4 units

HIST 103. History of the Modern Middle East
Survey from late 18th century to the present. Topics include imperialism and dissolution of the Ottoman Empire, World War I, the Mandate System, and the growth of nationalism; secularism versus fundamentalist Islam; formation of the state of Israel and the Israeli-Palestinian conflict; the Iranian Revolution; U.S.-Middle East relations and the quest for oil; the changing status of women.
Prerequisites: Upper division standing and instructor consent.
Normal Grade Rules
4 units

HIST 104. Advanced Topics in Ancient History
An investigation in depth of selected periods or topics in Ancient history. Repeatable for credit when topic changes up to 8 units.
Prerequisites: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units

HIST 105A. History of Africa
Sub-Saharan Africa from Paleolithic times to the nineteenth century: Development of the Sudanic state and the pre-European empires of Africa.
Normal Grade Rules
3 units

HIST 105B. History of Africa
African history in the nineteenth and twentieth centuries, emphasizing the growth of African nationalism.
Normal Grade Rules
3 units

HIST 106. History of the Holy Land
This course covers the history of the land successively known as Canaan, Israel and Palestine—the Holy Land of the Jews, Christians and Moslems—from the Neolithic down to the present.
Prerequisite: Upper division standing
Normal Grade Rules
3 units

HIST 107. History of Southeast Asia
Southeast Asia from the eighteenth century to the present with emphasis on European colonization and the emergence of independent states in the region.
Normal Grade Rules
3 units

HIST 109A. History of China
Traditional society from earliest times to 1800.
Normal Grade Rules
3 units

HIST 109B. History of China
China’s revolutions and ongoing modernization.
Normal Grade Rules
3 units
HIST 110A. History of Japan
From earliest times to 1750.
Normal Grade Rules
3 units

HIST 110B. History of Japan
Since 1750 emphasizing the process of modernization.
Normal Grade Rules
3 units

HIST 111. Special Topics in Jewish Studies
See JWSS 111.
Repeatable for credit
Normal Grade Rules
3 units

HIST 112. Ancient West to 500 BCE
Political, social and cultural history of the Ancient West (Europe, the Middle East and North Africa, from ca. 15,000 BCE to 500 BCE).
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 113A. Economic History of the United States
See ECON 113A.
Normal Grade Rules
4 units

HIST 113B. Economic History of Europe
See ECON 113B.
Normal Grade Rules
4 units

HIST 114. The Ancient West, 500 BCE-400 CE
Political, social, and cultural history of the Ancient West (Europe, the Middle East, and North Africa), from ca. 500 BCE to 400 CE.
Prerequisites: Upper division standing or instructor consent
Normal Grade Rules
4 units

HIST 115. Ancient Near East
Great river civilizations (Nile, Tigris-Euphrates and Indus) from 3500 BC to the Roman Conquest, including the empires of the Hittites, Assyrians, Persians and the Hebrews. Emphasis on politics, culture, religion and contributions to Greek, Roman and Christian developments.
Normal Grade Rules
3 units

HIST 116. History of Greece
Ancient Near East and the Hellenic world from earliest times to the Roman conquest of Greece.
Normal Grade Rules
3 units

HIST 117. History of Rome
Romans from the founding of Rome to the end of the ancient world.
Normal Grade Rules
3 units

HIST 118. Byzantine World to 1453
The political, social, economic and cultural history of the Byzantine Empire from the fourth to the fifteenth centuries.
Normal Grade Rules
3 units

HIST 121A. Medieval Worlds, 400-1000
This course surveys European Medieval History from the late fourth century through the first millennium. It examines the political, economic, social, cultural, and religious changes that constituted the transformation of the antique world into a unique “European” civilization.
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 121B. Medieval Worlds, 1000-1500
From 1000 - 1500 emphasizing growth of papal power, commercial revolution and revival of urban life, twelfth century Renaissance, interactions between the European, Byzantine, and Islamic worlds, and late medieval transformations leading to modernity.
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 122. The Renaissance and Reformation
The European world in transition from 1400-1600.
Normal Grade Rules
3 units

HIST 123. Intro to Historic Preservation Planning
See URBP 123.
Normal Grade Rules
4 units

HIST 124. Early Modern Europe
The European world in transition from 1580 to 1750. A continuation of History 122, exploring the central place of the princely court in the transformation of politics, religion, art, culture, science, technology and philosophy. Introduction to the Enlightenment.
Normal Grade Rules
3 units

HIST 126. Advanced Topics in Medieval History
An investigation in depth of selected periods or topics in Medieval history. Repeatable for credit when topic changes.
Prerequisites: Upper division standing or instructor consent
Repeatable for credit
Normal Grade Rules
4 units

HIST 130A. Military History
Principles and problems of strategy, tactics and military relationships. To the end of the Franco-Prussian War (1871).
Normal Grade Rules
3 units

HIST 130B. Military History
Principles and problems of strategy, tactics and military relationships. From 1871 to the present.
Normal Grade Rules
3 units

HIST 132. Advanced Topics in World History
Aspects of world history under various topics. Repeatable for credit when topic changes.
Prerequisites: Upper division standing or instructor consent
Repeatable for credit
Normal Grade Rules
4 units

HIST 134. History of the Vietnam War
Normal Grade Rules
3 units

HIST 136. History of Terrorism in the Modern World
A study of the historical origins of modern terrorism—both domestic and international. Includes an examination of terrorist typologies and demographics, as well as the economic, social, psychological, and political consequences of terrorism.
Normal Grade Rules
3 units

HIST 137. California in Historical and Social Scientific Perspectives
See SOCS 137.
Normal Grade Rules
3 units

HIST 138. United States in Historical and Social Science Perspectives
See SOCS 138.
Normal Grade Rules
GE: S 3 units

HIST 139. The World in Historical and Social Science Perspectives
See SOCS 139.
Normal Grade Rules
GE: V 3 units
HIST 142. History of Science, Medicine and Technology in the Modern World
Survey of major developments in science, medicine, and technology since 1500. Focus on their impacts on thought, politics, economies and societies.
 Normal Grade Rules
  3 units

HIST 143. Europe, 1750-1900
Major political, economic, social and cultural themes of European history from the Enlightenment to 1900.
Prerequisites: Upper division standing
 Normal Grade Rules
  4 units

HIST 144. Europe, 1900-1945
A history of political, economic, social and cultural developments in Europe during the era of the two world wars.
Prerequisites: Upper division standing
 Normal Grade Rules
  4 units

HIST 145. Europe and the World Since 1945
Political, economic and social developments since World War II, with emphasis on Europe.
Prerequisites: Upper division standing
 Normal Grade Rules
  4 units

HIST 146. Advanced Topics in European History
An investigation in depth of selected periods or topics in European history. Repeatable for credit when topic changes up to 12 units.
Prerequisites: Upper division standing
Repeatable for credit
 Normal Grade Rules
  4 units

HIST 149. History of Music
A lecture course designed to introduce students to the way in which “sound” has influenced and reflected the lives of humans throughout history.
Prerequisite: Upper division standing or instructor consent.
 Normal Grade Rules
  3 units

HIST 151A. History of Britain
Ancient-Medieval Britain from the first century BCE to the end of the fifteenth century CE. May be repeated for up to 6 units of credit when content changes.
Prerequisite: Upper division standing
Repeatable for credit
 Normal Grade Rules
  3 units

HIST 151B. History of Britain
Early Modern Britain from the fifteenth to the eighteenth centuries.
 Normal Grade Rules
  3 units

HIST 151C. History of Britain
Modern Britain from the eighteenth century to the present.
 Normal Grade Rules
  3 units

HIST 151D. Women in the British Empire
Course will examine women in Britain and in areas that it dominated from the eighteenth to twentieth centuries. These areas include India, South Africa, Nigeria, Egypt, Iraq, Palestine, Hong Kong and the Caribbean Islands (Bermuda and Jamaica).
Prerequisite: Upper division standing.
 Normal Grade Rules
  3 units

HIST 152. The History of the City
The origin and development of the city in its several modes within traditional societies.
Notes: Offered only once every three years.
 Normal Grade Rules
  3 units

HIST 153. History of Women in Europe
Changes in women’s private and public roles in diverse national, class, religious, ethnic and racial contexts from Ancient Greece to Modern Europe.
Prerequisite: Completion of Core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
 Normal Grade Rules
GE: V
  3 units

HIST 154. Global Jewish History
The Jews from their origins in the ancient Near East, through their diaspora to every part of the world, to the present. Jewish life and thought within the framework of individual regions, as well as of global history.
Notes: Cross-listed with Jewish studies.
 Normal Grade Rules
  3 units

HIST 155. 20th Century World
Global perspectives on a century of scientific progress that also saw the violent deaths of millions, with emphasis on the decline of traditional imperialism and the ideological contention that led to World War II and the Cold War.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
 Normal Grade Rules
GE: V
  3 units

HIST 156. Contemporary Mexico
History of Mexico from 1910 to the present, with emphasis on the political, social and economic impact of the first major revolution of the twentieth century and the rise and decline of the ruling PRI.
 Normal Grade Rules
  3 units

HIST 159. Gender and Medicine
Roles and experiences of American women as both patients and practitioners of western medicine. The medical invention of sex and gender, gendered medical definitions and experiences of bodily functions, disease and suffering, women as healers and health care professionals.
Prerequisite: Upper division standing.
 Normal Grade Rules
  3 units

HIST 162. Colonial Latin America
The course covers the colonial administration and society of the Spanish and Portuguese colonies in the New World. I also look at social, economic, and political conditions of the Iberian Peninsula and of the Amerindian empires on the eve of the conquest. The course concludes with an overview of the independence movements in Hispanic America and Brazil.
Pre-requisites: Upper division standing or instructor consent
 Normal Grade Rules
  4 units

HIST 163. Modern Latin America, 1800-Present
Latin America since 1800. Focus on major political changes, such as independence, wars, popular uprisings, and systems of government. Also economic and cultural affairs, especially when they disrupt existing societies, and outstanding leaders who charted their nations’ destinies.
Prerequisites: Upper division standing or instructor consent
 Normal Grade Rules
  4 units

HIST 164. Latin America in the Twentieth Century
Latin American history since the Mexican Revolution of 1910, with emphasis on revolution, military rule, religion, economics, race, gender and inter-American relations.
 Normal Grade Rules
  3 units

HIST 165. History of Brazil
Brazilian history and civilization from the Portuguese discovery to the present day.
Prerequisite: Upper division standing.
Repeatable for credit
 Normal Grade Rules
  3 units

HIST 166. Contemporary Mexico
History of Mexico from 1910 to the present, with emphasis on the political, social and economic impact of the first major revolution of the twentieth century and the rise and decline of the ruling PRI.
 Normal Grade Rules
  3 units
HIST 167. Advanced Topics in Latin American History
An investigation in depth of selected periods or topics in Latin American history. Repeatable for credit when topic changes up to 12 units.
Prerequisites: Upper division standing or instructor consent
Repeatable for credit
Normal Grade Rules
4 units

HIST 170. Topics in American History
An investigation in depth of selected periods or problems. Repeatable for credit when topic changes.
Prerequisite: Upper division standing.
Note: No credit for history majors or minors.
Repeatable for credit
Normal Grade Rules
3 units

HIST 170S. Topics in American History: American Identities and Institutions
An investigation in depth of selected periods or problems. This topic focuses on historical relationships between social groups and the political, social, economic and cultural institutions they created.
Prerequisites: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE S
3 units

HIST 171. American Constitutional and Legal History
Origins and evolution of the United States Constitution and federal system from the American Revolution to the present.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

HIST 172A. History of American Foreign Relations to 1913
The United States’ foreign relations, from the American Revolution to 1913.
Normal Grade Rules
3 units

HIST 172B. History of American Foreign Relations from 1913
The United States’ foreign relations, since 1913.
Normal Grade Rules
3 units

HIST 173. New World Encounters, 1400-1750
Examines the first wave of European expansion, from 1400-1750, through the prism of cultural and religious interactions. Explores how Europeans, Africans, and Indians understood each other during European exploration, conquest, and colonization of the “New World.”
Prerequisite: Upper division standing or instructor consent.
Notes: Offered only occasionally.
Normal Grade Rules
4 units

HIST 174. Colonial & Revolutionary America
Investigates the socio-political development of British North America from the 1600s to the era of the American Revolution. Examines how mentalities, voluntary and involuntary immigration, demographic catastrophes, rebellions, and religious revivals shaped the British Atlantic.
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 175. Inventing America, 1800-1860
The history of the United States from 1800-1860. Topics include the rise of democratic political culture, industrialization, the emergence of a market economy, pivotal changes in institutions such as the family and church and the redefinition of key American values.
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 176. The Civil War and Reconstruction
Course takes a topical approach, examining the political, social, economic, military, and ideological dimensions of the Civil War and Reconstruction. Focus will be on the war and its aftermath as a revolutionary experience rather than solely as a military struggle.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

HIST 177. Industrial America, 1877-1920
Economic, social, and political history from the end of Reconstruction to the achievement of women’s suffrage. Topics include the triumph of industrial capitalism, labor conflict, women’s suffrage, Populism/Progressivism, race/ethnicity, and World War I.
Prerequisites: Upper division standing or instructor consent.
Normal Grade Rules
4 units

HIST 178. Crash, Depression and War, 1920-1950
The United States from the “Roaring Twenties” through the Great Crash, the Great Depression, the New Deal, World War II, the home front, the Atomic Age, and the beginning of the Cold War.
Prerequisites: Upper division standing or instructor consent.
Normal Grade Rules
4 units

HIST 179. Cold War America, 1950-Present
Modern history of the United States since 1950 including the Cold War, the Korean and Vietnam wars, the Civil Rights Movement, postwar society, culture, economics and politics.
Prerequisites: Upper division standing or instructor consent
Normal Grade Rules
4 units

HIST 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: History majors or minors.
Repeatable for credit
Credit / No Credit
1-4 units

HIST 180H. Senior Honors Thesis Seminar
Topic arranged with the instructor.
Prerequisite: Enrollment in honors program and HIST 101
Normal Grade Rules
4 units

HIST 181. Advanced Topics in American History
An investigation in depth of selected periods or topics in American history. Repeatable for credit when topic changes up to 8 units.
Prerequisites: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units

HIST 182. Business, Industry and Technology in America
Historical survey of business from commerce in a predominantly agricultural society through the evolution of corporate structures in the modern industrial state, with emphasis on the impact of technology.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

HIST 183. The American West
History of the North American West from 1492 to the present. Native American civilizations, European contact, trade and colonization; American expansion, conquest and development. Emphasis on race, class, economics, politics, society, environment and culture.
Normal Grade Rules
3 units
HIST 184. Directed Reading
Directed reading on a specific topic in history.
Prerequisite: History major/minor and instructor and department chair consent.
Repeatable for credit
Credit/No Credit
1-4 units

HIST 186. Ethnicity and Race in United States History
Formulation of multiracial society in the United States. Comparison of immigration with experiences of slaves and Native Americans. Ethnic incorporation contrasted with racism and domination. Significance of gender, class and ideology.
Prerequisites: History major/minor and instructor consent.
Normal Grade Rules
3 units

HIST 187. United States Social History
Aspects of social history under various topics such as urbanization, class stratification, labor, sports, family and community life and others. May be repeated for credit for different topics.
Repeatable for credit
Normal Grade Rules
3 units

HIST 188. History of Women in the United States
A multi-faceted history of women in the United States from colonial times to the present.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Repeatable for credit
Normal Grade Rules
3 units

HIST 189A. California History to 1900
Topics include Native American civilizations, Spanish discovery and missions, the Mexican era, the American conquest, the Gold Rush, Chinese immigration, the railroad, growth, development, politics and class conflict.
Prerequisite: Upper division standing or instructor consent.
Notes: Satisfies American Institutions requirement in California government.
Normal Grade Rules
4 units

HIST 189B. California History Since 1900
Social, political, and economic history of California since 1900.
Prerequisite: Upper division standing or instructor consent.
Notes: Satisfies American Institutions requirement in California government.
Normal Grade Rules
4 units

HIST 194. Colloquium in African Studies
See AFRS 194
Repeatable for credit
Normal Grade Rules
3 units

HIST 197. Introduction to Public History
Introduction to preservation and presentation of history to the community and to roles historians play in public agencies. Exploration of archives, museums and historic sites. Required for admission to Public History internship.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

HIST 199. Public History Internship
Supervised placement in historical organizations, public institutions and community agencies concerned with preservation of history. May be repeated for 6 unit maximum.
Prerequisite: Instructor consent.
Repeatable for credit
Credit/No Credit
3 units

GRADUATE

HIST 200. Graduate Methodology, Research and Writing
An orientation to history graduate study focusing on the critical advanced writing, library, research and historiographical skills needed for success as a graduate student and professional historian. Includes an overview of current methodologies and trends in the field.
Normal Grade Rules
4 units

HIST 205. Topics in History
Supervised readings, discussions and reports in areas unavailable in other departmental offerings.
Prerequisite: Instructor consent and approval by graduate advisor.
Repeatable for credit
Normal Grade Rules
3 units

HIST 209. Colloquium in Ancient and Medieval Europe
Intensive readings, discussions and reports on Ancient and Medieval Europe. For areas and field of emphasis see the schedule of classes. May be repeated when content changes.
Prerequisites: Graduate standing or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units

HIST 210A. Advanced Colloquium United States History
Intensive readings, discussions, and reports on American history in the seventeenth and eighteenth centuries. Repeatable for credit once with different instructor.
Prerequisites: Graduate standing
Repeatable for credit
Normal Grade Rules
4 units

HIST 210B. Advanced Colloquium United States History
Intensive readings, discussions, and reports on American history in the nineteenth century. Repeatable for credit once with different instructor.
Prerequisites: Graduate standing
Repeatable for credit
Normal Grade Rules
4 units

HIST 210C. Advanced Colloquium United States History
Intensive readings, discussions, and reports on American history in the twentieth century. Repeatable for credit once with different instructor.
Prerequisites: Graduate standing
Repeatable for credit
Normal Grade Rules
4 units

HIST 211. Advanced Colloquium in Modern Europe
Intensive readings, discussions and reports. Topics have included the French Revolution, the Holocaust in Europe and issues of marginalization of gender and class during the modern period. May be repeated with different instructor or topic.
Prerequisites: Graduate standing or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units

HIST 220. Advanced Colloquium in World History
Intensive readings, discussions and reports in Asian, African, European and North and South American history, in one of three eras: ancient and classical eras (before 1000), between 1000 and 1750 or since 1750. May be repeated with different instructor or topic.
Prerequisites: Graduate standing or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units
### HIST 221. Seminar in World History
An intensive study of some area, problem or period in world history. Topics have included World War II, the Atlantic Economy, World Slavery, British Imperialism. Repeatable for up to 8 units when course content changes.
Prerequisite: Graduate Standing
Repeateable for credit
Normal Grade Rules
4 units

### HIST 230. Seminar in Ancient and Medieval Europe
An intensive study of some areas, problem or period in Ancient or Medieval Europe. Individual research with oral and written reports. May be repeated for up to 8 units with different instructor or topic.
Prerequisite: Graduate Standing
Repeateable for credit
Normal Grade Rules
4 units

### HIST 240. Seminar in Pre-Twentieth Century Europe
An intensive study of some area, problem or period in European history before 1900. Topics have included economic, social and gender differences in Industrial Europe and social theories of Max Weber. May be repeated when content changes.
Prerequisite: Instructor consent.
Normal Grade Rules
4 units

### HIST 241. Seminar in Twentieth Century Europe
An intensive study of some area or problem. Individual research with oral and written reports. Topics have included the Cold War, European diplomacy and international security.
Prerequisite: Graduate standing
Normal Grade Rules
4 units

### HIST 272. Seminar in American Diplomatic History
An intensive analysis of some chronological period, area or major problem in American diplomatic history. Individual research with oral and written reports.
Prerequisite: Graduate standing
Repeateable for credit
Normal Grade Rules
4 units

### HIST 274. Seminar in American Social and Intellectual History
An intensive study of some phase of American social and intellectual history. Individual research with oral and written reports. Topics have included the economic, social and gender differences in American history. May be repeated when content changes.
Prerequisite: Instructor consent.
Repeateable for credit
Normal Grade Rules
3 units

### HIST 276. Seminar in Early American History
An intensive study of some phase in, or problem of, American history from colonial period through the Civil War. Topics have included American independence from British control, the development of the industrial North and the colonization of the West. May be repeated when content changes.
Prerequisite: Instructor consent
Repeateable for credit
Normal Grade Rules
4 units

### HIST 280. Seminar in Recent American History
An intensive study of some phase or problem in the period from the Civil War to the present. Individual research with oral and written reports. May be repeated when content changes.
Prerequisite: Graduate standing or instructor consent.
Repeateable for credit
Normal Grade Rules
4 units

### HIST 283. Seminar in California and Western History
An intensive study of an area, phase or period of history associated with California or the West. Individual research with oral and written reports. May be repeated for credit when course content changes.
Prerequisite: Graduate standing and instructor consent.
Repeateable for credit
Normal Grade Rules
4 units

### HIST 288. Seminar in the History of Women in the United States
An intensive study of some phase of the history of women in the United States. Individual research with oral and written reports.
Prerequisite: Graduate Standing
Repeateable for credit
Normal Grade Rules
4 units

### HIST 290R. Thesis Culmination
This course is offered in special sessions for 1 unit. It is repeatable up to 12 times. It is required of, and limited to, graduate students who have an outstanding RP grade in a preceding semester in a project or thesis class. If one has an outstanding RP, this course must be taken unless the student is enrolled in any other course. By outstanding, it is meant that the RP grade has not been changed to any other grade, including a CR or NC. The RP grade in the project or thesis course remains on the official record until a culminating memo has been submitted by the graduate advisor to the Office of Graduate Admissions & Program Evaluations and the course instructor of the class in which an RP was received has petitioned for a grade change to CR. This course receives no degree credit and therefore cannot be used on the candidacy form or to fulfill graduation requirements.
Prereq: HIST 299
Mandatory CR/NC/RP
1 unit

### HIST 299. Special Study
Advanced individual research.
Prerequisite: Instructor consent and approval by graduate advisor.
Notes: More than 3 units only in areas where graduate courses not normally offered.
Repeateable for credit
Credit / No Credit
1-6 units

### HIST 299. Master’s Thesis or Project
Open only to approved master’s candidates in history. Reserved for students under Plan A.
Repeateable for credit
Mandatory CR/NC/RP
3-6 units
Hospitality Management Courses

HOSPITALITY MANAGEMENT

LOWER DIVISION
HSPM 001. Introduction to Hospitality Management
Overview of structure and financial performances of hospitality industry; food and lodging, resorts, tourism enterprises, attractions and related operations. Focus on orientation to customer service, cultural/economic trends and career opportunities.
Normal Grade Rules
3 units

HSPM 011. Restaurant Management
Overview of food and beverage with emphasis on food quality.
Prerequisites: HSPM 001, HSPM 065.
Corequisite: HRTM 001
Normal Grade Rules
3 units

HSPM 012. Cost Control in Hospitality
Food, beverage and payroll systems, including standards determination; variable, semi-variable and fixed costs; the operating budget; income and cost control and menu pricing. Cost control simulation exercises implemented through software programs.
Prerequisites: HSPM 001, BUS 020N.
Co-Requisite: HSPM 11 and HSPM 65
Normal Grade Rules
3 units

HSPM 020. Sanitation and Environmental Issues in the Hospitality Industry
See NUFS 020.
Normal Grade Rules
2 units

HSPM 022. Catering and Beverage Management
See NUFS 022.
Normal Grade Rules
2 units

HSPM 023. Culinary Concepts
Food and beverage production techniques; preparation of food and beverage with emphasis on quality standards.
Misc/Lab: Lecture 1 hour/Lab 6 hours.
Normal Grade Rules
3 units

HSPM 065. Professional Seminar in Hospitality Mgmt
Designed for students who have declared a major in the Hospitality, Tourism and Event Management degree. The topics selected will facilitate the student’s entry into the academic program and the profession of hospitality management.
Corequisite: HSPM 001.
Normal Grade Rules
1 unit

HSPM 097B. Special Events Management in Hospitality Recreation and Tourism
This course provides students with hands-on experience in the operation, coordination, and management of special events as they relate to hospitality recreation and tourism. Students will develop management skills and experience in the planning and execution of a major event.
Prerequisite: Instructor consent
Normal Grade Rules
3 units

UPPER DIVISION
HSPM 100W. Writing Workshop
Developing and enhancing written communication skills in the hospitality, recreation and tourism professions in the following areas: scientific/technical writing, administrative writing, public-relations-related writing and funding proposals.
Prerequisites: ENGL 1B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Prerequisite: HSPM 001, HSPM 65 or instructor consent
Normal Grade Rules
3 units

HSPM 101. Multicultural & Intl Issues in Hospitality
Multicultural/international issues in the hospitality industry; historical, socioeconomic, cultural and linguistic variables presented in relationship to these issues.
Prerequisite: HSPM 001.
Normal Grade Rules
3 units

HSPM 102. Hotel & Lodging Operations
Principles of organization, management and decision models applied to the tasks and challenges of hotel operations. Includes techniques of problem solving (including planning, organizing, staffing, directing and controlling operations) in areas of front office operations, housekeeping, food/beverage and personnel.
Prerequisites: HSPM 001, HSPM 065 or instructor consent. HSPM Majors and Minors only.
Corequisite: HSPM 001.
Normal Grade Rules
3 units

HSPM 103. Facility Planning and Design in Hospitality & Tourism
Development, planning, and maintenance of hospitality/tourism facilities. Topics include real estate economics, income generation, lease and management contracts, project development sequencing, space and building operations planning, financing, asset management, industry practices, renovation, environmental impact and public relations.
Prerequisite: Upper division standing
Normal Grade Rules
3 units

HSPM 104. Hospitality Marketing
Applying marketing principles, theories, and concepts in developing marketing strategies for hospitality, recreation and tourism organizations in a dynamic business environment. Emphasis is placed on marketing mix, market segmentation and analysis, sales planning, and public relations.
Prerequisites: HSPM 001, HSPM 065, BUS 20 or BUS 20N
Normal Grade Rules
3 units

HSPM 105. Finance in Hospitality
This course provides an introduction to the fundamentals of hotel and restaurant finance and develops an understanding of the strategic roles and financial analysis and finance play in internal management decision-making.
Prerequisites: HSPM 001, HSPM 65, BUS 020 or BUS 020N, HSPM 102
Normal Grade Rules
3 units

HSPM 107. Legal Aspects of Hospitality Management
Introduction to fundamental legal issues and concepts related to the fields of hospitality, recreation and tourism. Content will include legal process, source of law, organization structure, and a survey of selected legal principles from the areas of employment, public health and safety, contract, negligence, premise liability, personal property, environmental and constitutional law.
Prerequisite: HSPM 011, HSPM 65, BUS 020 or BUS 020N.
Normal Grade Rules
3 units

HSPM 108. Hospitality Information Systems
Focuses on the application of various information systems to the management of facilities, programs, services, finances and accounting, products, marketing and sales, human resources and other major functions of hospitality, recreation, and tourism organizations/agencies.
Prerequisite: HSPM 1, HSPM 65, BUS 20 or BUS 20N, HSPM 102
Normal Grade Rules
3 units
HSPM 121. Hospitality Leadership and Management
This course acquaints students with the theory and practice of management and leadership principles in a hospitality operation. Topics include: manager roles, leadership principles, goal setting, power, and empowerment, communication skills, coaching and team building, diversity, career planning, and organizational development.
Prerequisite: HSPM 001, HSPM 065
Normal Grade Rules
3 units

HSPM 130. Hospitality Event Production
Planning and execution of a hospitality event. Topics include strategic planning, event design, event project management, event related technology, financial management, human resources, event marketing, and on-site management.
Corequisites: HSPM 1 and HSPM 65
Normal Grade Rules
3 units

HSPM 134. Human Resource Management
Explores HR functions in business settings with a focus on development of knowledge and skills needed by managers. Supervisor’s role within organizations with emphasis on recruitment, selection, staff training and development, legal issues, performance appraisal, motivational strategies, public relations, and maintenance of effective environments.
Prerequisite: HSPM 001, HSPM 065, BUS1 20 or BUS1 20N
Normal Grade Rules
3 units

HSPM 140. Meeting, Convention and Event Industry
Leisure service system planning through explanation of the scope and segmentation of the conference, convention and event market. Strategies in planning, developing and implementing meeting and convention services.
Prerequisite: HSPM 001, HSPM 065, BUS1 020 or BUS1 020N
Normal Grade Rules
3 units

HSPM 141. Resort and Club Management
Management and operation of resort and private club properties from their historical development to their economic and environmental impact; marketing and managing of services provided by these facilities within the leisure industry.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

HSPM 142. Tradeshow Event & Meeting Mgmt
Management and operations of tradeshows from business, economic and hospitality service perspectives; understanding the marketing, fiscal, and evaluative processes necessary to provide large scale meetings including hotel negotiations, food service, contract negotiation, and onsite management.
Prerequisites: HSPM 140 or instructor consent.
Normal Grade Rules
3 units

HSPM 147. Service Operations Management
See BUSS 147.
Normal Grade Rules
3 units

HSPM 148. Wine Appreciation
Introduces the student to the significance of wine in the dining experience. The class will study the wine-making process, wine grape varieties, health and legal issues of wine and include in-class evaluation of wine.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

HSPM 152. Hotel Catering and Banquet Management
Overview of hotel group sales, convention services, catering sales and banquet operations. Learn tools and applications necessary to be successful in providing catering and banquet operations for hotel, restaurant, or corporate events.
Prerequisites: HSPM 001, HSPM 11, HSPM 12, HSPM 065, HSPM 102
Normal Grade Rules
3 units

HSPM 154. Revenue Management
Formulating tactical pricing decisions to maximize revenues for hospitality organizations. Topics include: history of revenue management, reservation systems, forecasting demand, inventory control, cost analysis, pricing strategy, channel management, revenue management tactics, and applications.
Prerequisites: HSPM 001, HSPM 065, BUS1 020 or BUS1 020N, HSPM 102
Normal Grade Rules
3 units

HSPM 175. Entrepreneurship in Hospitality
Explores the entrepreneurial opportunities available in the public, non-profit, and private sectors by examining the process of creating, planning, and managing hospitality, recreation, and tourism ventures, programs, and services.
Prerequisite: HSPM 001, HSPM 065, BUS1 020 or BUS1 020N
Normal Grade Rules
3 units

HSPM 177. Hospitality Service Management
Develops skills in setting formal service standards and procedures to deliver customer experience and evaluate service quality for hospitality businesses. Topics include service excellence design, psychological/social characteristics of customer satisfaction, service delivery processes, consumer/server encounters, service quality, and service recovery.
Prerequisite: HSPM 001, HSPM 011, HSPM 065, HSPM 102, HSPM 130, Senior Standing
Normal Grade Rules
3 units

HSPM 180. Individual Studies
Investigation of special problems, including research project and/or field experience.
Prerequisite: Instructor consent.
Credit / No Credit
1-3 units

HSPM 184. Directed Reading
Directed reading in journals and books by authorities in Hospitality, Recreation, Tourism and related fields. Assessment by project(s) and/or paper(s).
Prerequisite: Upper division standing, supervising instructor approval, and department chair consent.
Repeatable for credit
Credit / No Credit
1-4 units

HSPM 186. Strategic Management
A capstone course focuses on the development and evaluation of management strategies with special emphasis on hospitality, recreation and tourism fields.
Prerequisite: HSPM 001, HSPM 011, Upper division standing.
Normal Grade Rules
3 units

HSPM 191A. Internship Level 1
Supervised professional broad-based work experience in hospitality management industry for a total of 200 hours.
Prerequisite: HSPM 1, HSPM 65, Bus 20 or 20N, HSPM Major only
Credit / No Credit
1-4 units

HSPM 191B. Internship Level 2
Supervised professional in-depth work experience in hospitality management industry for total of 300 hours.
Prerequisite: HSPM 1, HSPM 65, Bus 20 or 20N, HSPM Major only
Credit / No Credit
3 units

HOSPITALITY, RECREATION AND TOURISM MANAGEMENT
Humanities Department Courses

AMERICAN STUDIES

LOWER DIVISION

AMS 001A. American Civilization
American culture examined through political, literary, artistic, economic and social development. American values, ideas and institutions from popular culture as well as traditional sources.
Prerequisite: AMS 1A.
Note: Entire sequence satisfies GE Areas C1,2; D2,3; F1,2,3.
Normal Grade Rules
GE: M4
6 units

AMS 001B. American Civilization
American culture examined through political, literary, artistic, economic and social development. American values, ideas and institutions from popular culture as well as traditional sources.
Prerequisite: AMS 1A.

HUMANITIES

LOWER DIVISION

HUM 001A. World Cultures and Societies - Honors
Prehistory to the seventeenth century. Courses cover political, historical, social-institutional, philosophical, and literary thought and the arts of the ancient and medieval world.
Entire four-semester sequence satisfies GE areas A1,2,3; C1,2,3,D2,3; F1,2,3.
Prerequisite: HUM 1A.
Note: Entire sequence (HUM 1A/B and 2A/B) satisfies GE areas A1,2,3; C1,2,3; D2,3; F1,2,3.
Normal Grade Rules
  GE M1
  6 units

HUM 001B. World Cultures and Societies - Honors
Prehistory to the seventeenth century. Courses cover political, historical, social-institutional, philosophical, and literary thought and the arts of the ancient and medieval world.
Entire four-semester sequence satisfies GE areas A1,2,3; C1,2,3,D2,3; F1,2,3.
Prerequisite: Hum 1A.
Note: Entire sequence (HUM 1A/B and 2A/B) satisfies GE areas A1,2,3; C1,2,3; D2,3; F1,2,3.
Normal Grade Rules
  GE M2
  6 units

HUM 002A. Modern World Cultures - Honors
Seventeenth century to the present. Courses cover political, historical, social-institutional, philosophical, and literary thought and the arts of the modern world.
Entire four-semester sequence satisfies GE areas A1,2,3; C1,2,3,D2,3; F1,2,3.
Prerequisite: HUM 1B.
Note: Entire sequence (HUM 1A/B and 2A/B) satisfies GE areas A1,2,3; C1,2,3; D2,3; F1,2,3.
Normal Grade Rules
  GE M3
  6 units

HUM 002B. Modern World Cultures - Honors
Seventeenth century to the present. Courses cover political, historical, social-institutional, philosophical, and literary thought and the arts of the modern world.
Entire four-semester sequence satisfies GE areas A1,2,3; C1,2,3,D2,3; F1,2,3.
Prerequisite: HUM 2A.
Note: Entire sequence (HUM 1A/B and 2A/B) satisfies GE areas A1,2,3; C1,2,3; D2,3; F1,2,3.

HUM 085. Introduction to Liberal Education
This course will introduce students to interdisciplinary humanistic learning through critical evaluation of the aims and purposes of liberal education, the nature of “good work” (work that is excellent, ethical and personally meaningful), and their connections.
Normal Grade Rules
  1 unit

HUM 090. Bible History and Literature
See RELS 090.
  Normal Grade Rules
  GE C2
  3 units

HUM 099. Death, Dying and Religions
See RELS 099.
  Normal Grade Rules
  GE E
  3 units

UPPER DIVISION

HUM 100W. Writing in the Humanities
Advanced workshop in composition and reading. Composition further develops skills of Core G.E.: writing expository essays, doing library research. Readings acquaint students with major works and ideas of Eastern and Western civilizations.
Prerequisite: Completion of core GE, ENGL 1B (with a grade of C or better), satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
  GE Z
  3 units
HUM 101. Human Life: Let’s think about it  
Introduction to interdisciplinary comparative and creative studies. A range of methodologies will be explored through two contrasting subjects. Students learn and synthesize approaches - geography, history, literature, arts, and social science - to achieve a holistic understanding of the topics. 
Prerequisites: Upper Division Standing. 
Normal Grade Rules 3 units

HUM 106. History of the Holy Land 
See HIST 106. 
Normal Grade Rules 3 units

HUM 111. Special Topics in Jewish Studies 
See JWSS 111. 
Repeatable for credit 
Normal Grade Rules 3 units

HUM 114. Legacy of Asia 
Interdisciplinary focus on continuity and change in China and India as these ancient civilizations responded to challenges throughout their history. 
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required. 
Normal Grade Rules GE: V 3 units

HUM 114A. Interdisciplinary Studies of Antiquity 
Interrelationships of literature, the arts, philosophy, and social and political institutions from a global perspective during a time from the Paleolithic to 400 CE. 
Normal Grade Rules 3 units

HUM 114B. Interdisciplinary Studies of the Middle Ages 
Interrelationships of institutions, thought, literature and arts in Europe during selected periods of the Middle Ages. 
Normal Grade Rules 3 units

HUM 120A. Interdisciplinary Studies of the Renaissance and Baroque Eras 
Interrelationships of institutions, thought, literature and arts in Europe during the fifteenth, sixteenth and seventeenth centuries. 
Normal Grade Rules 3 units

HUM 120B. Interdisciplinary Studies of the Enlightenment and Romantic Eras 
Interrelationships of institutions, thought, literature and arts in Europe from about 1700 to 1800. 
Normal Grade Rules 3 units

HUM 121. Introduction to Comparative Literature 
See CLIT 121. 
Normal Grade Rules 3 units

HUM 122. Topics in Comparative World Literature 
See CLIT 122. 
Repeatable for credit 
Normal Grade Rules 3 units

HUM 124. Literature and Religious Experience 
See RELS 124. 
Repeatable for credit 
Normal Grade Rules 3 units

HUM 126. Holocaust Literature 
See ENGL 126. 
Normal Grade Rules GE: V 3 units

HUM 128. Perspectives on the Twentieth Century: The West in a Global Context 
Literature and the arts of selected world cultures contextualized in significant events and concepts of the twentieth century, such as two world wars, totalitarian systems, the revolt against colonial powers, modernity and postmodernity, and the global challenge to western hegemony. 
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required. 
Normal Grade Rules GE: V 3 units

HUM 134. Religion Film & Media 
See RELS 134.

### HUM 177A. Advanced Honors in Integrated Science, Social Science, and Humanities

SJSU Studies Honors cultivates scientific study of the physical universe and life form, explores individuals and groups in the USA regarding diversity equality, and institutional inequalities and practices, and develops appreciation for human cultures and their diverse development globally over time.

**Prerequisite:** WST essay score 8, all college GPA 3.0

**Co-requisite:** 100WP pre- or co-requisite strongly recommended

- **Normal Grade Rules**
- 6 units

### HUM 177B. Advanced Honors in Integrated Science, Social Science, and Humanities

SJSU Studies Honors cultivates scientific study of the physical universe and life form, explores individuals and groups in the USA regarding diversity equality, and institutional inequalities and practices, and develops appreciation for human cultures and their diverse development globally over time.

**Prerequisite:** Completion of Hum 177A with C or better, or instructor permission

- **Normal Grade Rules**
- GE: Rs+S+V
- 3 units

### HUM 179. American Popular Culture

See AMS 179

- **Normal Grade Rules**
- 3 units

### HUM 180. Individual Studies

Directed reading and thesis by arrangement.

**Prerequisite:** Department chair consent.

- Repeatable for credit
- Credit / No Credit
- 1-3 units

### HUM 183C. Art of Islam 13th-19th Century

See ARTH 183C.

- **Normal Grade Rules**
- 3 units

### HUM 185. Field Experience in Humanities

Supervised field work for liberal studies and humanities majors. Includes weekly meetings to discuss readings and field work experiences and to reflect upon humanities education, multicultural school settings and other nonprofit agencies and organizations that promote the humanities.

**Prerequisite:** HUM 85.

- Credit / No Credit
- 3 units

### HUM 190. Senior Seminar in Humanities

Readings, discussions and individual research projects relating to an interdisciplinary theme selected by the instructor.

**Prerequisite:** Any 100W class.

- **Normal Grade Rules**
- 3 units

### HUM 191. Religion in America

See RELS 191

- **Normal Grade Rules**
- GE: S
- 3 units

RELS 015B. Intermediate Hebrew
See HEBR 015B.
3 units

RELS 070A. Western Religions
Primer beginnings to present expressions such as Egyptian, Greek, Roman, Jewish, Christian and Islamic. Structure and dynamics manifest in sacred texts, institutions, rituals, central figures and movements. Emphasis on living religions and their traditional roots.
Normal Grade Rules
GE: C2
3 units

RELS 070B. Eastern Religions
Hindu, Buddhist, Confucian, Taoist and other Asian traditions from ancient beginnings to present expressions. Structure and dynamics manifest in sacred texts, institutions, rituals, central figures and movements. Emphasis on living religions and their traditional roots.
Normal Grade Rules
GE: C2
3 units

RELS 090. Bible History and Literature
The Bible in context of its history, literary sources and as a reflection of Jewish and Christian traditions. Motifs and themes in light of their original audience, historical usage and contemporary development.
Normal Grade Rules
GE: C2
3 units

RELS 099. Death, Dying and Religions
Is death the end or the beginning? Learn how people integrate the physical, emotional, psychological, and spiritual dimensions of living and dying. Examine religious teachings and practices for making death personally meaningful, socially significant, or even politically powerful.
Normal Grade Rules
GE: E
3 units

UPPER DIVISION

RELS 100W. Writing in the Humanities
See HUM 100W.
Normal Grade Rules
GE: Z
3 units

RELS 101. Introduction to the Study of Religion
Introduction to the approaches of various disciplines (sociology, psychology, theology, philosophy, textual criticism, etc.) to the study of religion. Experience in using these approaches to understand religious theory, practices and organizations.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RELS 102A. Advanced Hebrew
See HEBR 102A.
Normal Grade Rules
3 units

RELS 102B. Advanced Hebrew
See HEBR 102B.

Normal Grade Rules
3 units

RELS 108. Jewish Mysticism, Magic and Folklore
Jewish sacred texts from the Talmudic Period (200 BCE - 500 CE) to the development and elaboration of Kaballah. Theological and legal development of Midrash, Mishna and Gemara. Primary sources in translation and the Talmudic method. Jewish mysticism and symbols of the Zohar.
Prerequisite: Upper divisions standing or instructor consent.
Normal Grade Rules
3 units

RELS 109. Philosophy of Religion
See PHIL 109.
Normal Grade Rules
3 units

RELS 111. Special Topics in Jewish Studies
See JWSS 111.
Repeatable for credit
Normal Grade Rules
3 units

RELS 112. Topics in the Bible
Specific areas of the Bible explored in depth according to announced topics: e.g. Psalms, Prophets, Gospels, Letters of Paul. Course is repeatable for credit for different topic.
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

RELS 114. Legacy of Asia
See HUM 114.
Normal Grade Rules
GE: V
3 units

RELS 121. Music and Religious Experience
The relationship between music and religion, including sacred music, chant traditions, and/or religious themes in popular music. The use of music in ritual, trance, and mystical experience.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RELS 122. Magic, Science and Religion
Exploring the ways in which people have attempted to gain mastery over the natural and supernatural worlds beginning with prehistoric times and concluding with modern day society and the contemporary world.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
3 units

RELS 124. Literature and Religious Experience
How authors and poets represent spiritual ideals and human dilemmas in a variety of literary genres such as the epic, the novel, the essay, love poetry and the haiku; and writers such as Plato, Emerson, Emily Dickinson, Thomas Merton, Shakespeare, Basho, Han Shan, Rumi and Sufi poets, Kabir, Indian Virashaiva poets, and authors of The Book of Odes and The Mahabharata. Course is repeatable as readings and themes change.
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
### Academic Year 2014-2015

#### Course Descriptions

**v01**

**Monday, June 9, 2014**

**ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE**

---

**RELS 130. Psychology and Religious Experience**

Interdisciplinary approaches to religious experiences (such as confession, conversion, mystical ecstasy, and possession). Discussion of writings and empirical research on consciousness; dream, trance, meditative states; religious healing, and so forth. Comparing religious interpretations to psychological and scientific explanations of religious phenomena.

Prerequisite: Upper division standing and one prior course in Psychology or Religious Studies, or instructor consent.

Normal Grade Rules
3 units

---

**RELS 131. Gender, Sexuality, and Religion**

Women’s roles and gendered categories within diverse religions. Feminist critiques, reforms, and creations of religious institutions. The political and feminist dimensions of women’s religious experience. Understanding the roles of sexuality in religion.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 134. Religion Film & Media**

Depictions of religion, religions, religious behavior, and religious propaganda in film and media. Exploring these from several perspectives, (e.g. emic and etic, cross-national, aesthetic) and examining the murky problem of “the truth” in the depiction of religious and spiritual experience.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 137. Religion in the Black Community**

See AFAM 137

Normal Grade Rules
3 units

---

**RELS 142. Contemporary Buddhism and its Roots**

Teachings of Gautama, the Buddha and ways in which those teachings were modified in forms of Buddhism that followed: Theravada in southeast Asia and Mahayana in east Asia.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 143. Spiritual Traditions of India**

History, scriptures, practices, and contemporary movements of the Hindu, Jain, Sikh, and Islamic traditions of India. From Vedic gods and goddesses to Sufi masters. From Guru Nanak to Mahatma Gandhi. Religious art, music, meditation, pilgrimage, and philosophy.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 144. Chinese Traditions**

Religious thought and practice of China’s three Great Traditions (Buddhism, Taoism, and Confucianism) as well as China’s Little Tradition (Chinese folk religion). The role of these traditions within traditional Chinese culture and their relevance to the modern world, including China.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 145. Middle Eastern Traditions**

Introduction to the peoples and cultures of the Middle East through exploration of the cooperation, competition, conflict and dialogues between the ethnic, national, and religious communities of contemporary Middle Eastern countries.

Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.

Normal Grade Rules
GE: V
3 units

---

**RELS 148. Religion and Anthropology**

See ANTH 148.

Normal Grade Rules
3 units

---

**RELS 151. Catholic and Protestant Traditions**

Christian religious history from Jesus to the present day, development of Roman Catholic traditions, Protestant traditions and especially living thought and practice in Christianity today.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 152. Visual Culture and Jewish Identity**

See ARTH 152.

Repeatable for credit

Normal Grade Rules
3 units

---

**RELS 153. Jewish Cultures**

Tradition, law, ceremony, people and expressions of Judaism from the Old Testament period to the present.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 154. Chinese Traditions**

Religious thought and practice of China’s three Great Traditions (Buddhism, Taoism, and Confucianism) as well as China’s Little Tradition (Chinese folk religion). The role of these traditions within traditional Chinese culture and their relevance to the modern world, including China.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 155. Pagan Traditions**

Thematic and historical examination of localized religious traditions; e.g., Shamanic, Animistic, Polytheistic, Pantheistic. These traditions will be studied through their arts, music, myths, life patterns, cosmologies and contact between indigenous and universalizing religions.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 156. Islam, Politics and the West**

An in-depth look at the roots of Islamic tradition, law, politics, culture, and society. Emphasis on Islam’s growing global prominence; relations with the West, stereotypes and misconception, as well as the nature of the Islamic state.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 157. Islamic Cultures**

Exploring how diverse Islamic communities have addressed and debated issues of love, sexuality, power, grief and spiritual growth through visual art, music and poetry. Special focus on Sufi devotional music, love, poetry, and architecture.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 161. Varieties of Spiritual Experience**

Comparative analysis of mystical experience, emphasizing the writings and creative works of the mystics themselves. Perspectives include comparative religions, theology, psychology, anthropology, philosophy, music and literature. Focus on ultimate transformation of self and the world.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

---

**RELS 162. Religion and Political Controversy in the US**

Contemporary problems (e.g., ecology, abortion, war, gender, sexuality and race) as interpreted by diverse range of American ethnico-religious groups.

Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.

Normal Grade Rules
GE: S
3 units
RELS 180. Individual Studies
A project.
Prerequisite: Religious studies upper division major or minor and coordinator consent.
Repeatable for credit
Credit / No Credit
1-4 units

RELS 184. Directed Reading
Prerequisite: Religious studies upper division major or minor and coordinator consent.

Industrial and Systems Engineering Courses

INDUSTRIAL AND SYSTEMS ENGINEERING

UPPER DIVISION

ISE 102. Engineering Economic Systems
Systems analysis applied to economic decisions in engineering; comparison of alternatives based on cost breakdown structure and time value of money; system life-cycle process; life-cycle economic concepts, costing methodology and applications.
Corequisite: MATH 31 and ENGR 10 or equivalent.
Normal Grade Rules
3 units

ISE 103. Life Cycle Engineering
See ENGR 103.
Normal Grade Rules
3 units

ISE 105. Introduction to Systems Engineering and Activity Costing
Techniques for integrating engineering problem solving methods with systems theory including principles of problem identification, description, modeling, solution and implementation; applying traditional and activity based cost systems to assist engineers in decision making process through the product life cycle.
Prerequisite: MATH 31.
Normal Grade Rules
3 units

ISE 110. Manufacturing Processes
See ME 110.
Normal Grade Rules
3 units

ISE 112. Occupational Health Engineering
Legislative framework and historical perspective of work-related injuries and diseases: prevention assessments, legal and regulatory issues surrounding solutions to occupational health problems, principles of industrial hygiene and program management.
Prerequisite: Junior standing in engineering.
Normal Grade Rules
3 units

ISE 114. Safety Engineering
Hazards, accident prevention and engineering approaches to the design of equipment, facilities and processes; provides familiarity with system safety, system evaluation and evaluation of alternative countermeasures. Latest safety regulations and agencies responsible for their enforcement.
Prerequisite: Junior standing.
Normal Grade Rules
3 units

ISE 115. Computer Integrated Manufacturing
Analyzes design and integrate manufacturing processes with CAD/CAM technologies including numerical control, material handling and storage, group technology and computer control.
Prerequisite: ISE 120.
Msc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ISE 120. Work Methods Design and Measurement
Design of efficient and effective work processes, includes process management, methods analysis and improvement and work measurement.
Prerequisite: MATH 032.
Corequisite: ISE 130.
Normal Grade Rules
3 units

ISE 130. Engineering Probability and Statistics
Probability theory, graphical displays of data, graphical methods of comparisons of samples and hypotheses testing. Statistical estimation and inference uses graphical statistical packages.
Prerequisite: MATH 32 or MATH 071.
Normal Grade Rules
3 units

ISE 131. Statistical Process Control and Improvement
Statistical computations, sampling procedures, development and use of control charts and utilization of computerized statistical packages. Design of statistical quality control systems. The seven tools of quality, process capability studies.
Prerequisite: ISE 130 (with a grade of "C-" or better) or equivalent.
Normal Grade Rules
3 units

ISE 135. Design of Experiments
Tests of composite hypotheses, analysis of variance, statistical decision theory, sampling procedures, design and implementation of statistical process control systems, response surface experimental design, Taguchi experimental design, system reliability, utilization of computerized statistical packages.
Prerequisite: ISE 130 (with grade of "C-" or better) or equivalent.
Normal Grade Rules
3 units

ISE 140. Operations Planning and Control
Design, implementation and evaluation of manufacturing, planning and control systems. Includes MRP II, ERP, JIT.
Prerequisite: ISE 102, ISE 120.
Normal Grade Rules
3 units

ISE 145. Lean Manufacturing
See TECH 145.
Normal Grade Rules
3 units

ISE 151. Managing Engineering
Broad overview of engineering management theory and practice including: management’s roles, responsibilities, skills, strategy and planning, management systems, human resource management, problem solving and decision-making, engineering ethics.
Prerequisite: 100W course.
Normal Grade Rules
3 units

ISE 155. Supply Chain Engineering
A comprehensive coverage of supply chain topics; real world applications including logistics, inventory management, risk pooling, value of information, strategic alliance, procurement and outsourcing strategies, information technology, coordinated product and supply chain design, customer value, decision, support systems.
Prerequisite: ISE 140.
Normal Grade Rules
3 units

ISE 159. Materials Handling and Distribution
Prerequisite: ISE 135.
Normal Grade Rules
3 units

ISE 162. Engineering Statistics and Analysis
See CHE 162.
Normal Grade Rules
3 units

ISE 164. Computer and Human Interaction
Introduction to human/computer interaction, paradigms for interaction, human performance capabilities, computer input/output device analysis and design, pattern recognition 3D audio, 3D visualization, application to virtual reality and multimedia.
Prerequisite: Junior standing.
Normal Grade Rules
3 units
ISE 167. System Simulation
Introduction to simulation. Monte Carlo techniques. Design and use of discrete-event computer simulation modeling techniques; theoretical and practical treatment of input to models, model validation methods and output analysis. Synchronized sampling, model comparisons. Prerequisite: CMPE 30 or CMPE 46, ISE 130 (with grade of "C-" or better); ISE 170.
MISC/LAB: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ISE 170. Operation Research
Development and application of mathematical models to industrial problems: Linear programming, network analysis, Markov models, game theory, queuing theory and decision analysis. Prerequisite: ISE 130 (with grade of "C-" or better). Pre/corequisite: MATH 123.
Normal Grade Rules
3 units

ISE 180. Individual Studies
Individual work on special topics by arrangement. Prerequisite: Upper division standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

ISE 190. Industrial Engineering Design
Design of a complete industrial system including quality function development, technology trends, financial analysis, functional specifications, process design, production capability, quality management, manufacturing resource planning, equipment requirements, human resource management, MIS, facility design, and project management. Prerequisite: ISE 115, ISE 140 and instructor consent.
MISC/LAB: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ISE 195A. Senior Industrial Engineering Design I
Individual or group design projects. Proposal preparation with plans and specifications. Oral and written reports. Professional seminars: global and social issues in engineering. Prerequisite: ISE 105, ISE 120, ENGR 100W, major form on file and good standing in the major.
Corequisite: ENGR 195A
MISC/LAB: Lab 3 hours.
Normal Grade Rules
1 unit

ISE 195B. Senior Industrial Engineering Design II
Design of industrial system: Quality function deployment, technology trends, financial analysis, functional specifications, process design, production capability, quality management, manufacturing resource planning, equipment requirements, human resource management, MIS, facility design, and project management. Integrated global and social issues in engineering. Prerequisite: ISE 140 and ISE 195A (with grade of "C-" or better).
Corequisite: ENGR 195B
MISC/LAB: Lecture 9 hours.
Normal Grade Rules
3 units

ISE 195C. Interdisciplinary Senior Project I
See ENGR 195C.
Normal Grade Rules
3 units

ISE 195D. Interdisciplinary Senior Project II
See ENGR 195D.
Normal Grade Rules
3 units

ISE 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

ISE 199. Special Topics in Industrial & Systems Engineering
Special Topics in Industrial & Systems Engineering. Content varies from semester to semester. May be repeated for a total of 6 units. Prerequisite: Instructor approval. Repeatable for credit
Normal Grade Rules
3 units

GRADUATE

ISE 200. Financial Methods for Engineers
Systematic approach and methods for engineering decision making where economic outcomes are principal criteria. Accounting analysis and decision making topics that aid in understanding the relationships between various functional areas of business and the decision making processes of engineering managers.
Normal Grade Rules
3 units

ISE 201. Software Engineering Analysis
Mathematical concepts, techniques relevant to software engineering, motivation by real world examples. Discrete mathematics including: Algorithms, efficiency, mathematical induction. Probability, statistics including set theory, combinatorics, random variables, distributions, estimation, confidence interval, hypothesis testing, regression. Prerequisite: MSE or CMPE graduate standing.
Normal Grade Rules
3 units

ISE 202. Design and Analysis of Engineering Experiments
Normal Grade Rules
3 units

ISE 210. Human Factors/Ergonomics
Analysis and evaluation of work systems in terms of the capabilities and limitations of human participants. Person as a system component. Emphasis is on evaluation of how work affects people and how people affect the work. Prerequisite: Graduate standing.
Normal Grade Rules
3 units

ISE 212. Human Factors Experiments
Research and experimentation on specific aspects of the person as a system or in systems. Particular emphasis is placed on in-depth studies of unique human factors. Prerequisite: ISE 210 or instructor consent.
Normal Grade Rules
3 units

ISE 215. Usability Evaluation and Testing
Seminar is designed to provide students with a comprehensive overview of usability testing methods, as applied to systems products and software-web applications. Course will address testing methods, processes and marketing justification for usability testing. Prerequisite: ISE 130 or instructor consent.
Normal Grade Rules
3 units

ISE 217. Human Computer Interaction
Human performance characteristics, computational tools, and HCI applications. How to access/evaluate HCI requirements, to design HCI requirements, to assess the impact of design on performance, and to generalize the design implication to system function.
Normal Grade Rules
3 units
ISE 218. Advanced Interaction Design
Theory, science and application of user experience interaction design. Latest tools and techniques. Relationship between software interaction design patterns, usability, learnability and human performance in man-machine systems.
Pre-requisite: ISE 217
Co-requisite: ISE 215
Normal Grade Rules
3 units

ISE 219. HCI for Cyber Security
The course covers HCI in cyber security that include: authentication and access control, trust, user privacy and data protections, cyber security in social networking, data protection and security in healthcare, cyber security in eCommerce, mobile, computing & cloud computing, compliance and regulation, visualization tools and techniques in cyber security and privacy.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

ISE 220. Advanced Operations Research
Advanced operations research techniques and topics. Practical consideration in understanding and utilizing operations research methods. Critical analysis of case studies.
Prerequisite: ISE 130
Normal Grade Rules
3 units

ISE 221. Advanced Systems Engineering
Comparison of different kinds of systems; unique characteristics. Mathematical models for the description, analysis and design of systems. Synthesis and analysis of systems of various types. Theory of organizations, information theory and control theory applied to problems in system design.
Prerequisite: ISE 130
Normal Grade Rules
3 units

ISE 222. Advanced Systems Engineering
Advanced studies of operational productivity, operational quality, strategy and information technology applications in the service sector through the use of tools, techniques and case studies. Current literature review of issues related to service sector productivity, quality and value.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

ISE 223. Industrial Systems Seminar
Familiarization with research techniques in industrial and systems engineering. The broad range of literature studies will develop the student’s ability to solve practical engineering problems in areas not previously encountered.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

ISE 224. Advanced Service Systems Engineering and Management
Prerequisite: ISE 222
Normal Grade Rules
3 units

ISE 225. Advanced Supply Chain Engineering
Supply chain concepts, strategies, emphasis on analytical tools to solve supply chain problems. Fundamentals of supply chain modeling of inventory, transportation, location, facility planning problems. Information sharing, risk pooling, mechanisms for increasing profits.
Prerequisite: ISE 140
Normal Grade Rules
3 units

ISE 226. Process Improvements in Healthcare
Evaluation of US healthcare systems with emphasis on operational and quality aspects. Quantitative techniques and applications to improve health care systems efficiency and quality. Queueing models, capacity planning and analysis. Quality control and six sigma deployment in healthcare environment.
Prerequisite: ISE 230 and ISE 235
Normal Grade Rules
3 units

ISE 227. Logistics for Supply Chain
An exploration of logistics for entire supply chain system from inbound movement through material management to physical distribution to customers. Topics include: packaging and handling, material management, transportation and traffic management, facility location and global logistics.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

ISE 228. Quality Assurance and Reliability
Selection of adequate variables to monitor a manufacturing/service process; quality improvement through process design, vendor management, customer feedback and product development; use of statistical control charts, the Pareto principle, PDCA, process capability, design for reliability, statistical techniques for analysis of reliability and reliability growth.
Prerequisite: ISE 130 (or equivalent).
Normal Grade Rules
3 units

ISE 240. Mathematical Models in Systems Engineering
Prerequisite: ISE 130.
Normal Grade Rules
3 units

ISE 241. Advanced Operations Planning and Control
Design, implementation and evaluation of production and service systems; manufacturing strategy, choice of processes, resources planning, production and procurement control, forecasting methods, scheduling considerations and decision-making techniques.
Prerequisite: ISE 140 or instructor consent.
Normal Grade Rules
3 units

ISE 242. Advanced Service Systems Engineering and Management
Prerequisite: ISE 222
Normal Grade Rules
3 units

ISE 245. Advanced Supply Chain Engineering
Prerequisite: ISE 225
Normal Grade Rules
3 units

ISE 246. Medical Errors Reduction and Patients Safety Engineering
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

ISE 250. Leading the Six Sigma Improvement Project
Prerequisite: ISE 225.
Normal Grade Rules
3 units

ISE 251. Managing the Lean Enterprise Improvement Program
The elements of an effective organizational improvement program composed of multiple projects. Covers capabilities-based strategy; dimensions of performance such as cost, quality and time; when to use Six Sigma, Lean, Theory of Constraints and Reengineering.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units
ISE 263. Healthcare Information Systems
Prerequisite: Graduate standing.
  Normal Grade Rules
  3 units

ISE 265. Advanced System Simulation
Use of computerized simulation and modeling techniques to conduct experiments, evaluate the costs of a process, evaluate alternative inspection policies and determine effects of JIT management models for shop setting.
Prerequisite: ISE 167 or instructor consent.
  Normal Grade Rules
  3 units

ISE 270. Information Engineering
Technologies, strategies and systems for planning, analyzing, designing and implementing data resources in order to ensure and continuously improve processes in the enterprise; object-oriented development, Computer-Aided Software/Systems Engineering (CASE); information superhighway, client/server computing and distributed database management systems.
Prerequisite: CMPE 46 or instructor consent.
  Normal Grade Rules
  3 units

ISE 290. Human Factors & Ergonomics
Professional Seminar
Real world skills necessary to start your professional HR/Ergo career, i.e. public presentation, terminology, field evaluations, current research and industry issues in human factors and ergonomics.
Prerequisite: Graduate standing.
  Credit / No Credit
  2 units

ISE 290R. Project/Thesis Culmination
Continued work on thesis or project.
Pre-requisite: Outstanding RP grade in a preceding semester in a thesis or project class
  Mandatory CR/NC/RP
  1 unit

ISE 297. Special Topics in Industrial Engineering
Special topics to augment regularly-scheduled courses.
Prerequisite: Graduate standing in industrial engineering.
  Repeatable for credit
  Normal Grade Rules
  1-4 units
Jewish Studies Program Courses

JEWISH STUDIES

LOWER DIVISION

JWSS 010A. Elementary Hebrew
See HEBR 010A.
Normal Grade Rules
3 units

JWSS 010B. Elementary Hebrew
See HEBR 010B.
Normal Grade Rules
3 units

JWSS 015A. Intermediate Hebrew
See HEBR 015A.
Normal Grade Rules
3 units

JWSS 015B. Intermediate Hebrew
See HEBR 015B.
Normal Grade Rules
3 units

JWSS 018Q. Superheroes & Geeks
This FYE seminar studies a key moment in American/Jewish-American history: World War II, the Holocaust, and the Golden Age of Comics. Key authors include Michael Chabon and Art Spiegelman.
Prerequisite: First Year Freshmen.
Note: All courses with a 'Q' suffix are designated as First Year Experience courses.
Normal Grade Rules
GE C2
3 units

JWSS 090. Bible History and Literature
See RELS 090.
Normal Grade Rules
GE C2
3 units

UPPER DIVISION

JWSS 102A. Advanced Hebrew
See HEBR 102A.
Normal Grade Rules
3 units

JWSS 102B. Advanced Hebrew
See HEBR 102B.
Normal Grade Rules
3 units

JWSS 106. History of the Holy Land
See HIST 106.
Normal Grade Rules
3 units

JWSS 108. Jewish Mysticism, Magic and Folklore
See RELS 108.
Normal Grade Rules
3 units

JWSS 111. Special Topics in Jewish Studies
Special Topics in Jewish Studies. Topics vary and will be announced each semester. Repeatable for credit when topic changes.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

JWSS 115. Ancient Near East
See HIST 115.
Normal Grade Rules
3 units

JWSS 119. Topics in Jewish Literature
See ENGL 119.
Repeatable for credit
Normal Grade Rules
3 units

JWSS 126. Holocaust Literature
See ENGL 126.
Normal Grade Rules
GE V
3 units

JWSS 136. WWII Press Coverage: Holocaust Concentration Camps and Japanese Internment Camps
See MCOM 136.
Normal Grade Rules
3 units

JWSS 144. Middle Eastern Politics
See POLS 144.
Normal Grade Rules
3 units

JWSS 152. Visual Culture and Jewish Identity
See ARTH 152.
Repeatable for credit
Normal Grade Rules
3 units

JWSS 153. Jewish Cultures
See RELS 153.
Normal Grade Rules
3 units

JWSS 154. Global Jewish History
See HIST 154.
Normal Grade Rules
3 units

JWSS 180. Individual Studies
Directed studies in relevant fields not covered by courses offered.
Prerequisite: Instructor consent and program coordinator.
Repeatable for credit
Credit / No Credit
1-3 units
## Journalism and Mass Communications Courses

### ADVERTISING

#### LOWER DIVISION

**ADV 091. Introduction to Advertising**
Comprehensive survey of the basic principles of advertising. Topics include: strategic planning, integrated communications, audience targeting, creative strategy, advertising media, social responsibility, advertising ethics, international advertising and current issues in advertising.
- Normal Grade Rules
- 3 units

**ADV 092. Int’l Program Studies**
Repeatable for credit
- Mixed Grading
- 1-6 units

#### UPPER DIVISION

**ADV 116. Spartan Daily Advertising Staff**
This class constitutes the paid advertising staff of the online and print editions of the Spartan Daily. Students work with clients and handle the newspaper’s advertising sales and production.
- Prerequisite: ADV 91 or instructor consent
- Misc/Lab: Daily lecture and production.
- Repeatable for credit
- Normal Grade Rules
- 3 units

**ADV 121. Consumer Advertising**
Principles and practices of advertising consumer products and services using traditional mass media, alternative media and new media. Topics include consumer behavior; branding, targeting, and positioning; national brand advertising; retail strategy, advertising and merchandising.
- Prerequisite: ADV 91
- Normal Grade Rules
- 3 units

**ADV 122. Business-to-Business Advertising**
Principles and practices of developing marketing communications programs and collateral materials for business-to-business products and services; translating technical information into persuasive communications; direct marketing, and other forms of sales support communications.
- Prerequisite: ADV 091
- Normal Grade Rules
- 3 units

**ADV 123. Broadcast and New Media Advertising**
History, development, and current applications of traditional broadcast advertising, the Internet as an advertising medium, and the implications of emerging new media. Focus is on creative strategy and media strategy.
- Prerequisite: ADV 91
- Normal Grade Rules
- 3 units

**ADV 124. Copywriting**
- Prerequisite: ADV 091, MCOM 100W and ENGL 071
- Normal Grade Rules
- 3 units

**ADV 125. Advertising Layout and Production**
Principles of design applied to print advertising, print production theory and practical application. Preparation of layouts and mechanicals utilizing latest computer applications. Instruction in use of type, printing processes, types of paper, uses of color.
- Prerequisite: ADV 91
- Normal Grade Rules
- 3 units

**ADV 126. Media Planning and Buying**
Theory, evaluation and selection of advertising media for a variety of target audiences; demographics and psychographics. Students plan, buy and measure the success of a real media plan.
- Prerequisite: ADV 091 and BUS 130.
- Normal Grade Rules
- 3 units

**ADV 127. Integrated Marketing Communications (IMC)**
Learn how advertising, public relations, promotions, and marketing all work together to achieve campaign objectives. Strategic planning, budgeting, research, tactics, evaluation, presentation skills and team building.
- Prerequisite: Three ADV courses and BUS 2 130.
- Normal Grade Rules
- 3 units

**ADV 128. Integrated Marketing Communications (IMC)**
Creative development, strategy, concept, and execution using InDesign and PhotoShop. Advanced layout and design principles, integration of language, and visual communication theory will be emphasized in product positioning.
- Prerequisite: ADV 125 or instructor consent.
- Normal Grade Rules
- 3 units

#### JOURNALISM

**LOWER DIVISION**

**JOUR 061. Writing for Print, Electronic and Online Media**
Introduction to writing for media—newspapers, magazines, electronic and the Internet—as well as producing content for multi-media distribution in a converged media environment. Emphasis on how different media require different writing styles and content.
- Prerequisite: ENGL 1A, ENGL 1B.
- Normal Grade Rules
- 3 units

**JOUR 095. Beginning Digital News Photography**
Basic introduction to news photography and photojournalism field. Includes camera use -- composition, aperture, shutter speed and lens selection -- and processing for print or electronic media using PhotoShop. Emphasis on technical aspects of digital news photography and storytelling with photographs.
- Normal Grade Rules
- 3 units

**UPPER DIVISION**

**JOUR 132. Information Gathering on the Internet**
Development of expertise and strategies for finding information for news stories from computerized databases, public records and reports. Also includes techniques for interviewing and covering press conferences and meetings.
- Prerequisite: JOUR 61A, JOUR 61B, JOUR 61C or instructor consent.
- Normal Grade Rules
- 3 units

**JOUR 133. Editing and News Management**
Media Lab. for the editor serving as wordsmith and coach, a hands-on approach to copy editing and headline writing for online and print media. Students work as editors for media lab publications.
- Prerequisite: JOUR 61 or instructor consent.
- Normal Grade Rules
- 3 units
JOUR 134. In-Depth Online Reporting
Media Lab. Designed for experienced writers who want to report for online media. Includes feature and in-depth reporting as well as Web design for a team project. Prerequisite: JOUR 61 or instructor consent. Normal Grade Rules 3 units

JOUR 135. Reporting, Editing, and Management
Media Lab. A team of reporters, photographers and editors will produce the Spartan Daily online publications as well as its daily newspaper and magazines. The editors will direct the coverage, including digital photography and audio/video streaming. May be repeated for credit with instructor consent. Prerequisite: Reporters, JOUR 61, JOUR 132A; Photographers, JOUR 142; Editors, JOUR 135 as reporters; non majors with demonstrated writing and/or Web-design skills, instructor consent. Repeatable for credit Normal Grade Rules 1-3 units

JOUR 136. Newspaper and Magazine Design
Principles of newspaper and magazine design—news judgment, story and headline hierarchy, typography and meaningful visual storytelling through use of photos/art. Practice in creating newspaper pages and magazine layouts and cover designs. Prerequisite: JOUR 061, JOUR 133 or instructor consent. Normal Grade Rules 3 units

JOUR 142. Beginning Visual Journalism for Print/Electronic Media
Media Lab. Introduction to basic principles and practices of photjournalism for online media, newspapers, magazines and corporate publications, using still photographs to tell the story. Prerequisite: JOUR 95, PHOT 040, or instructor consent. Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules 3 units

JOUR 144. Picture Editing for Print/Electronic Media
Presentation and picture editing for online media, newspapers, magazines and other publications; visual tactics to bring readers to a page, picture selection, graphics, layout, design and ethical considerations using illustrative art and photography. Prerequisite: Upper division standing. Normal Grade Rules 3 units

JOUR 145. Advanced Visual Journalism for Print/Electronic Media
Media Lab. Advanced practices in photojournalistic storytelling with single and multiple picture color assignments. Technical emphasis on achieving proper color balance via lighting techniques. Aesthetic emphasis on pictures elevating a student’s portfolio to professional level. Prerequisite: JOUR 142 or instructor consent. Misc/Lab: Lecture 2 hours/lab 3 hours. Normal Grade Rules 3 units

JOUR 153. Magazine Writing & Editing
Overview of magazine field, focusing on reporting, writing and editing. Students learn how an idea progresses from manuscript through art meetings to the printed or online page. Prepares students to produce San Jose State’s student magazine, Access, in JOUR 155. Prerequisite: JOUR 132C. Normal Grade Rules 3 units

JOUR 155. Magazine Editing and Production
Media Lab. Editing/producing print and online versions of award-winning Access and Etc. magazines. Staff edits articles, art and photography submitted by media lab students and other SJSU freelancers. Prerequisite: JOUR 132C, JOUR 153. Misc/Lab: Lecture 2 hours/activity 2 hours Repeatable for credit Normal Grade Rules 3 units

JOUR 164. Electronic News Gathering for Television
Media Lab. Principles and techniques of covering news for electronic media. Instruction in all aspects of television news gathering, presentation and production including writing, shooting, editing, producing and anchoring. Includes both field and studio work. Prerequisite: JOUR 61 or instructor consent. Misc/Lab: Lecture 2 hours/activity 2 hours. Normal Grade Rules 3 units

JOUR 165. Television News Staff
Media Lab. Reporting, shooting and editing in digital and analog formats, producing and anchoring for television. Working in the field and studio to produce a weekly newscast/Webcast. May be repeated for credit with instructor consent. Prerequisite: JOUR 164 or instructor consent. Repeatable for credit Normal Grade Rules 1-3 units

JOUR 166. Convergence Newsroom
This course is designed for the experienced journalism major who wishes to learn about multimedia reporting for online platforms. Reporting/editing, magazine, broadcast and photo majors will work together to produce multimedia packages for posting online. Prerequisites: Upper division standing, JOUR 135, JOUR 155, JOUR 165, or instructor consent. Misc/Lab: Lecture 2 hours/activity 2 hours. Normal Grade Rules 3 units

MASS COMMUNICATIONS

LOWER DIVISION

MCOM 063. New Media
Hands on instruction in multimedia and emerging new media technologies. Print and web page design, blogging, podcasting, videocasting, RSS and creation of multimedia presentations by combining still photos, graphics, and video with music and/or audio. Normal Grade Rules 3 units

MCOM 064A. Special Topics: Technology
Seminar/workshop course focusing on a particular technology skill for the advertising, journalism, or public relations professions. Repeatable for credit Credit / No Credit 1 unit

MCOM 070. Visual Communication for Modern Media
Design for television, newspapers, advertising, public relations, magazines, film and video. Modules include design and impact of visual imagery and how to apply sound ethical principles. Normal Grade Rules 3 units

MCOM 072. Mass Communication and Society
Mass communication and its relationship to society. Basic theories in mass communication, contemporary issues and milestones in our understanding of media effects. Prerequisite: Not repeatable for credit if equivalent course has been taken elsewhere. Normal Grade Rules GE: D3 3 units

MCOM 092. Int’l Program Studies
Repeatable for credit Mixed Grading 1-12 units
UPPER DIVISION

MCOM 100W. Writing Workshop: Mass Communications
Advanced writing across the media -- advertising, journalism and public relations. Writing and research for an increasingly convergent media with multiple media formats from the Word to print and broadcast, including writing to accompany audio and visual images. Prerequisite: ENGL 1B (with a grade of C or better); completion of core GE, satisfaction of Writing Skills Test and upper division standing. Should be taken junior year; required of all advertising, journalism and public relations majors before they reach senior standing. The course will be waived for students receiving a waiver score on the Writing Skills Test. Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE Z
3 units

MCOM 101. Media Law and Ethics
Principles and case studies of mass communications law and ethics; Constitutional guarantees, libel, privacy, contempt, privilege, copyright, Internet law, FCC and FTC regulatory law. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MCOM 103. History of American Media
Development of mass communications in the United States from colonial times to the present. Social, economic and political factors that shaped modern media and the impact of mass media on the society. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MCOM 104. Introduction to Mass Communications Research
Introduction to social science research in mass communications; emphasis on public opinion research, including sampling, survey research design, measurement, also precision journalism, content analysis and external databases; may include class project. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MCOM 105. Lifestyles, Diversity and the Media
Identities and evaluates the impact of ethnicity/culture, alternative lifestyles and gender issues on advertising, television, radio, newspapers, magazines and public relations. Examines attitudes, trends and perceptions that help shape mass communication messages. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MCOM 106. Global Mass Communication
Societal factors behind gathering and disseminating information and entertainment content among mass communication systems of the world. Basic theoretical concepts about international communication and international relations. Impact on economy, politics, culture and governmental communication policies. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MCOM 111. Internship
Field work for advertising, journalism and public relations majors near end of junior or beginning of senior year, including summer term. Prerequisite: At least 9 units of major course work in the department (including specified foundation courses) and advisor consent.
Credit / No Credit
3 units

MCOM 136. WWII Press Coverage: Holocaust Concentration Camps and Japanese Internment Camps
Investigation of World War II American media coverage of the Holocaust and Concentration Camps in Europe, and relocation and internment camps in the USA for Japanese Americans. Review of extent of coverage and placement in media.
Normal Grade Rules
3 units

MCOM 139. Specialized Writing
Writing for mass communication with focus on specific topic during the semester. Topics may include specialized writing in public relations, advertising, broadcast and print media. Prerequisite: JOUR 61, upper division standing or instructor consent.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

MCOM 163. Advanced New Media Technologies
Hands on instruction in multimedia and emerging new media technologies. Print and web page design, blogging, podcasting, RSS and creation of interactive multimedia presentations by combining still photos, graphics, and video with music and/or other audio. Prerequisites: MCOM 63 or Instructor Consent
Normal Grade Rules
3 units

MCOM 180. Global Leadership
This program is designed to help students begin a journey of becoming globally competent. Through classroom instruction, interaction with local business leaders, and cultural excursions, this course will introduce students to the theories and practices of global leadership.
Repeatable for credit
Credit / No Credit
1-6 units

MCOM 181A. Special Topics: Professional Development
Seminar/workshop course focusing on a particular professional skill for advertising, journalism and public relations. Prerequisite: Upper division standing.
Repeatable for credit
Credit / No Credit
1 unit

MCOM 199A. Advertising & Public Relations Agency I
The first of a two-semester capstone course where seniors will work in teams in a School-sponsored Advertising and Public Relations Agency to plan and execute real-world integrated strategic campaigns as well as to prepare entries for national competitions. Enrollment by permission only. Prerequisite: PR Majors: PR 099, PR 190 or PR 192; PR 191; ADV Majors: ADV 091.
Normal Grade Rules
3 units

MCOM 199B. Advertising & Public Relations Agency II
The second of a two-semester capstone course where seniors will work in teams in a School-sponsored Advertising and Public Relations Agency to plan and execute real-world integrated strategic campaigns as well as to prepare entries for national competitions. Enrollment by permission only. Prerequisite: MCOM 199A.
Normal Grade Rules
3 units

GRADUATE

MCOM 210. Media and Social Issues
Selected readings and group discussions of significant published works dealing with mass communications: history, biography and appraisal; law and ethics of the print and broadcast media, advertising and public relations; public opinion and propaganda.
Normal Grade Rules
3 units

MCOM 215. New Media Visionaries
Class lecture series by visiting Silicon Valley leaders on the development of new media products, including such topics as idea generation, intellectual property, funding, design, development and integrated communication strategies. Prerequisites: Admission to Graduate program.
Normal Grade Rules
3 units

MCOM 240. Mass Communications History
Application of historical method in mass communications research; emphasis on source and bibliographical materials. Research projects in media history and development.
Normal Grade Rules
3 units
MCOM 250. International Communications
Factors affecting the international flow of news; sociocultural-economic influences on national media systems and concepts of press freedom; comparative mass media systems; the technology of international communications and its implications in developing a world community.
Normal Grade Rules
3 units

MCOM 260. Integrated Strategic Communications
Investigates the theory and practice of integrated communications to include promotion, advertising, public relations, direct marketing and branding. It explains how to integrate these processes of communication and how to develop a comprehensive integrated marketing communications plan.
Prerequisite: Intro course in advertising, public relations or marketing, or instructor consent.
Normal Grade Rules
3 units

MCOM 270. Communication Law and Public Policy
A case history approach to the law of communications, including libel, privacy and regulation of broadcasting. Major development and landmark decisions, with emphasis on contemporary ethical and social issues such as free-press/fair trial and new technology.
Normal Grade Rules
3 units

MCOM 280. Communication Management
Explores the practice and theory of media management as it applies to: online media, newspapers, magazines, radio stations, television stations, advertising agencies, public relations firms, corporate communications and marketing communications. It incorporates leadership, media economics and conflict resolution.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

MCOM 284. Interactive Project Management
Students will work in teams to create, develop and implement hypothetical Web and mobile applications while living the role of the interactive project manager, design manager and development manager. This class focuses on the rapidly changing creative and technological base of interactive Web and mobile application development.
Prerequisites: Admission to Graduate Program.
Normal Grade Rules
3 units

MCOM 285. New Media Technologies
An examination of new technologies and the ways they influence and converge with traditional media and other communication specialties. Social, political, and regulatory aspects of emerging technologies are discussed.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

MCOM 290. Theory of Mass Communications
Basic theories of communications systems. Functional comparisons of various communications systems in relation to political structure. Communications theories in related disciplines of psychology, sociology, anthropology, economics and political science.
Prerequisite: MCOM 210 or instructor consent.
Normal Grade Rules
3 units

MCOM 295. Mass Communications Research
Methodologies of research in mass communications: historical, descriptive and empirical with emphasis on statistical aspects of data processing and interpretation.
Prerequisite: MCOM 210 and MCOM 290 or instructor consent.
Normal Grade Rules
3 units

MCOM 298. Special Studies in Mass Communications
Independent studies in specific areas of mass communications. May be repeated for credit (not in same semester).
Notes: Units can be used for Plan B master's degree projects.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

MCOM 299. Master's Thesis
Supervised thesis in the field of mass communications. May be repeated for credit (not in same semester).
Prerequisite: Admission to candidacy for the master's degree and approval of thesis proposal.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units

PUBLIC RELATIONS

LOWER DIVISION

PR 099. Contemporary Public Relations
Principles, evolution and professional practice of modern public relations. Concepts of planning and executing effective communication strategies, including message design and distribution for any organization.
Normal Grade Rules
3 units

UPPER DIVISION

PR 190. Media Writing in the Information Age
Writing and preparation of public relations materials for distribution to today's print, broadcast, and Internet media. Writing techniques for various media to reach specific audiences.
Prerequisite: JOUR 061.
Normal Grade Rules
3 units

PR 191. Strategic Writing for the Organization
Writing and production of marketing communication materials such as speeches, direct mail, brochures, newsletters and Web sites, all with an emphasis on computer-aided design and graphics.
Prerequisite: JOUR 061.
Normal Grade Rules
3 units

PR 192. Case Studies in Strategic Communication
Case studies focusing on the problems and challenges faced by a variety of organizations. Practical application of creative problem-solving, theory, and research about "real world" situations.
Prerequisite: PR 099.
Normal Grade Rules
3 units

PR 193. Special Event Management
The planning and managing of events for the purpose of accomplishing organizational objectives. Emphasis on creative thinking, logistics and practical application of strategies and tactics. A major project is the execution of an actual event.
Prerequisite: PR 099 or instructor consent.
Normal Grade Rules
3 units

PR 194. Fund Raising Management
Strategies and tactics of managing fund development programs for non-profits and charitable organizations. The planning and execution of annual giving programs, major gifts, capital campaigns, and fund-raising events.
Prerequisite: PR 099 or instructor consent.
Normal Grade Rules
3 units

PR 199. Campaign Planning and Management
Creative problem-solving in strategic planning and program management. Conceive, develop and present an integrated communications plan to a "real-world" client.
Prerequisite: PR 099, PR 190 or PR 191, PR 192, and MCOM 111.
Normal Grade Rules
3 units
Justice Studies Department Courses

FORENSIC SCIENCE

LOWER DIVISION

FS 011. Survey of Forensic Science
This survey course introduces students to the profession of forensic science. Topics include the field’s history and sub-disciplines, the CSI Effect, the application of the scientific method to physical evidence analysis. Virtual labs may be used to augment readings.
Normal Grade Rules
3 units

FS 160. Special Topics in Forensic Science
Range of topics in Forensic Science which will vary by semester. Topics may include Blood Spatter Analysis, Microscopy and Trace Evidence, Forensic Art, Facial Reconstruction, and others.
Repeatable for up to 9 units credit when content changes.
Prerequisite: Justice Studies or Forensic Science major; Justice Studies minor.
Repeatable for credit
Normal Grade Rules
1-5 units

FS 161. Crime Scene Investigation
Fundamental theories of physical evidence practically applied and the legal considerations involved in its recognition, collection preservation and presentation in court are covered. Topics include securing and recording the crime scene, collecting evidence, maintaining the chain of custody and reconstruction.
Prerequisites: Upper division standing.
Normal Grade Rules
3 units

FS 162. Forensic Science Applications
Scientific analysis and interpretation of physical evidence using identification and comparison techniques. Practical lab exercises in human identification, questioned documents, bite marks, trace evidence, presumptive testing and glass analysis. Additional topics include court testimony, quality assurance and ethics.
Prerequisites: Upper division standing.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

FS 163. Fingerprint Science
History and use of fingerprints in criminal identification. Topics include the scientific basis for fingerprint ID, anatomy of friction ridge skin, pattern classification, minutiae marking, the Henry System, AFIS and ACE-V, and court presentation of fingerprint evidence.
Prerequisite: Justice Studies or Forensic Science major; Justice Studies minor.
Normal Grade Rules
3 units

FS 164. Crime Scene and Evidence Photography
Practical use of photography in documenting crime scenes and evidence. Topics will include 35mm camera operation, lenses, focus, exposure, depth of field, lighting, composition, flash, injury documentation, digital cameras and video, and court presentation of photographic evidence.
Prerequisite: JS 010 or FS 011.
Normal Grade Rules
3 units

FS 165. Forensic Biometrics
A survey of scientific and biometric tools and applications used to establish human identity. Topics include identification of missing persons; casualties of mass disasters; victims of war crimes; and the ethical, legal and social implications of such technology.
Prerequisites: JS 161 or JS 162
Normal Grade Rules
3 units

FS 166. Forensic Chemistry
An exploration of scientific concepts, methods, practices, instrumentation, interpretation, statistics and court issues of chemistry as applied in forensic science including special topics: drug analysis, toxicology, arson and trace analysis emphasizing the instrumentation that allows chemical examination of evidence.
Prerequisites: CHEM 001A, CHEM 001B, FS 11
Normal Grade Rules
3 units

FS 167. Forensic Molecular Biology
History, scientific concepts, methods, practices, instrumentation, interpretation, statistics and court issues of forensic DNA analysis via lectures, hands-on activities/ laboratories, and videos. Collection, documentation and preservation of biological evidence, bioethics, QA validation, admissibility and training will also be covered.
Prerequisite: BIOL 001A, CHEM 001A, and CHEM 001B
Misc/Lab: Lecture 4 hours/lab 2 hours.
Normal Grade Rules
5 units

FS 168. Fluorescent Applications in Molecular Biology and Forensic Science
This course covers scientific concepts, methods, practices, instrumentation, interpretation, statistics and court issues of fluorescent applications in molecular biology and forensic science. Topics include, atomic and molecular basis of fluorescence, emission, photophysical processes, energy transfer, QA, validation, accreditation, and admissibility.
Prerequisites: BIOL 001A, BIOL 001B, CHEM 001A, CHEM 001B, FS 162 all with grades of ‘C’ or better.
Normal Grade Rules
3 units

FS 169. FS Senior Sem: Studies in Contemporary FS Issues
Identification, discussion and analysis of selected problems in forensic science. A major term paper, presentation on a selected topic and participation on written as well as in-class assignments and activities are required.
Prerequisites: Justice Studies Majors: Senior standing, JS 100W and JS 114 or instructor consent, graduation application filed and you must have already filled out and have a signed major form. Note: JS 114 is waived as a prerequisite for forensic science majors.
For Forensic Science Majors: Senior standing, JS 100W, FS 161, FS, 162, Biology 1A, CHEM 1A and CHEM 1B or by instructor consent, graduation application filed and you must have already filled out and have a signed major form.
Normal Grade Rules
3 units

JUSTICE STUDIES

LOWER DIVISION

JS 010. Introduction to Justice Studies
Historical and philosophical development of the justice system. Description, analysis and evaluation of criminal justice agencies. Relationship between theory and practice.
Normal Grade Rules
3 units

JS 012. Introduction to Legal Studies
The course presents historical and modern perspectives of the theories and structures of law, and provides an overview of the economic and sociological challenges to law making. This course also examines the nexus between law, social change, and dispute resolution.
Normal Grade Rules
3 units

JS 015. Introductory Statistics in Justice Studies
Introduction to measures of central tendency, variation, correlation and regression, probability, estimation and hypothesis testing as used in Justice Studies.
Normal Grade Rules
3 units
JS 025. Introduction to Human Rights and Justice
This course is a lower division introduction to the history of human rights as a concept and body of international law, and to the complicated role of human rights in contemporary social justice campaigns.
Normal Grade Rules
  3 units

UPPER DIVISION

JS 100W. Writing Workshop
Development of advanced communication skills, both written and oral. Emphasis on writing formats used by criminal justice professionals. A scholarly paper, written in APA format and informed by research, will be required.
Prerequisite: Completion of core GE, ENGL 1B (with a grade of C or better), and satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
  GE: Z
  3 units

JS 101. Critical Issues and Ideas in Justice
Interdisciplinary, historical and comparative examination of justice concepts and controversies, including the state’s role in promoting justice and perpetuating injustice, legitimate versus illegitimate violence, human rights, stateless persons, and the international community; the relationship between social justice and criminal justice.
Prerequisite: Upper Division Standing; JS 10, 11, 12, or 25; Co-requisite: JS 100W
Note: A grade of “C” or better is required for Justice Studies majors.
Normal Grade Rules
  3 units

JS 102. Police and Society
A multidisciplinary study of law enforcement from the early 1800s to the present. Focus on significant studies in relation to the role of police and analysis of current models and practices.
Prerequisite: Upper division standing.
Note: A grade of “C” or better is required for graduation.
Normal Grade Rules
  3 units

JS 103. Courts and Society
Structure and functions of the court system. Emphasizes attorneys’ and judges’ roles and the court process. Examination of federal and state legislative, executive and judicial branch actions, including Supreme Court decisions in civil and criminal cases.
Prerequisite: Upper division standing.
Note: A grade of “C” or better is required for graduation.
Normal Grade Rules
  3 units

JS 104. Penal Politics & Institutions
Interdisciplinary examination of issues of race, class, gender, ethnicity, economy, and culture as it relates to punishment, the penal process, and social control.
Prerequisite: Upper division standing; restricted to Justice Studies majors and minors or with departmental consent.
Note: A grade of “C” or better is required for Justice Studies majors.
Normal Grade Rules
  3 units

JS 106. Forensic Entomology
See ENT 106.
Normal Grade Rules
  3 units

JS 107. Justice Management and Ethics
The theory and practice of managing justice system agencies, including organizational change and contemporary issues. In-depth examination of ethical challenges in managing justice agencies, and strategies for ensuring ethical practices.
Prerequisite: Upper division standing.
Note: A grade of “C” or better is required for graduation.
Normal Grade Rules
  3 units

JS 114. Research Methods in Justice Studies
Introduction to qualitative and quantitative research methods used in Justice Studies. Includes relationship of theory to empirical evidence, logic underlying methods of inquiry; ethics in conducting empirical research; and methodological design, operationalization, and data analysis.
Prerequisite: Upper Division Standing; JS 10, 11, 12, or 25; 100W; Stat 95 or equivalent.
Note: A grade of “C” or better is required for Justice Studies majors.
Normal Grade Rules
  3 units

JS 121. Media and Justice
This course is an interdisciplinary and comparative media examination of justice concepts and controversies, including forms of violence, human rights, undocumented persons, the state’s role in promoting criminalization and social inequality, and the need for social justice and media reform.
Prerequisites: Upper division standing, JS 100W. Restricted to JS majors and minors or with departmental consent.
Normal Grade Rules
  3 units

JS 122. Drugs and Society
Examines the physiological effects of psychoactive drugs; history of legal and illegal drug use; causes and rates of use and addiction; drugs in the media; drug-related crime and violence; criminalization, decriminalization, legalization, harm reduction, drug courts; drug treatment.
Prerequisite: Upper Division Standing; JS 10, 11, 12, or 25; 100W.
Note: A grade of “C” or better is required for graduation.
Normal Grade Rules
  3 units

JS 123. Terrorism, Intelligence, and Security
Examination of terrorist organizations and activities, definitions of terrorism, and social and political consequences of terrorism. Includes policy responses to terrorism, including roles of intelligence and security agencies, and impacts on law, rights and liberties.
Prerequisite: Upper division standing.
Note: A grade of “C” or better is required for Justice Studies majors.
Normal Grade Rules
  3 units

JS 128. Punishment, Culture and Society
Critical analysis of the cultural, political and economic dimensions of penal politics in contemporary American society, with particular reference to the relationships between criminal justice and social justice. Emphasis on issues of racial, economic, and gender inequality.
Prerequisite: Upper Division Standing; JS 10, 11, 12, or 25; 100W.
Normal Grade Rules
  3 units
JS 129. International Crime and Deviance
This course offers an international perspective on violence. This course analyzes transnational crime and deviance trends, their causes, as well as organizational responses. Topics discussed in this class include international drug markets, sexual commerce, child soldiers, and terrorism.
Prerequisite: Any 100W, upper division standing, or instructor permission.
Normal Grade Rules
3 units

JS 130. Sexuality & Justice
JS130 surveys the relationship between sexuality and social and criminal justice. Students explore the nature and extent of sexual offenses against adults and children. A critical examination of recent public policies aimed at managing sexual aggression is included.
Prerequisite: Upper Division Standing; JS 10, 11, 12, or 25; 100w. Restricted to JS majors and minors.
Normal Grade Rules
3 units

JS 131. Crisis Intervention, Mediation and Restorative Justice
Review of theory, research and practical skill development in communication and problem resolution strategies using techniques of crisis intervention, mediation and restorative justice in community policing, family court, dependency court and juvenile justice settings.
Prerequisite: Upper division standing, completion of 100W.
Note: A grade of “C” or better is required for Justice Studies majors.
Normal Grade Rules
3 units

JS 132. Race, Gender, Inequality and the Law
History of legal issues and individual and institutional discrimination of women, ethnic/cultural and religious minorities, gays and lesbians and the disabled in education, employment, criminal justice and the family. Affirmative action and reverse discrimination. Solutions for structured inequality in the U.S.
Prerequisites: Completion of core GE, satisfaction of Writing Skills Test, and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

JS 136. Family and Community Violence
Examines abusive relationships and responsive community and justice system policy and preventive interventions. Topics include child abuse, neglect, gang and hate crimes, rape, marital violence and elderly abuse.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

JS 137. Collaborative Response to Family Violence
Employs an ecological framework to explore the scope, effects and response to family violence by diverse services and systems. Students are introduced to theory and practice of interdisciplinary collaboration and how it applies to respond more effectively to family violence.
Prerequisite: 100W, upper division standing or instructor permission
Corequisite: JS 136 or instructor permission
Normal Grade Rules
3 units

JS 140. Record Clearance Project
RCP teaches students to give community education presentations and advise clients regarding court procedures to clear criminal convictions. Students learn legal interviewing, counseling, ethics, reading rap sheets, performing legal research and writing, court interpreting and related skills.
Prerequisites: JS 100W.
Normal Grade Rules
3 units

JS 141. Record Clearance Project Representation
Record Clearance Project Representation teaches students to assist clients in preparing and filing petitions to clear criminal convictions in court, and related tasks. Under attorney supervision, students represent between two to four clients.
Prerequisites: JS 140 or instructor consent.
Credit / No Credit
3 units

JS 142. RCP - Advanced Study and Comm Involvement
Record Clearance Project - Advanced Study and Community Involvement involves mentoring RCP students in client interviews, coordinating project tasks and events, collecting data from former clients and students, helping with RCP community involvement, and assisting in other tasks.
Prerequisites: JS 141 or instructor consent.
Credit / No Credit
3 units

JS 143. Criminal Evidence and Procedure
Origin, development, philosophy and constitutional basis of evidence; administrative and judicial rules and procedures that govern admissibility; examination of judicial decisions interpreting individual rights; exploration of process by which attorneys introduce evidence as proof or exculpation of crime.
Prerequisite: Upper Division Standing; JS 10, 11, 12, or 25.
Corequisite: JS 100W
Normal Grade Rules
3 units

JS 144. Criminal Law
Historical development of philosophy of law and constitutional provisions, legal definitions, classifications of crime, case law, methodology and concepts of criminal law as a social force.
Prerequisites: Upper Division Standing; JS 10, 11, 12, or 25.
Co-requisite: JS 100W
Normal Grade Rules
3 units

JS 145. White Collar Crime
Growth and development of white collar crime in the United States: crimes at the workplace, computer fraud, swindles, embezzlement, bribery and graft at the corporate and governmental levels.
Prerequisite: Upper division standing.
Note: A grade of “C” or better is required for Justice Studies majors.
Normal Grade Rules
3 units

JS 150. Gender and Crime
Analysis of gender and its influence upon criminal participation and victimization, treatment in the criminal justice system, and those working in the criminal justice fields. Emphasis on women’s experiences.
Prerequisite: Upper Division Standing; JS 10, 11, 12, or 25, 100W
Normal Grade Rules
3 units

JS 151. Criminological Theory
Analysis of the nature and extent of crime, including causation and prevention. Descriptions of offenses, criminal typologies and victim surveys. Evaluation of various control and prevention strategies.
Prerequisite: Upper division standing. Completion of 100W
Note: A grade of “C” or better is required for Justice Studies majors.
Normal Grade Rules
3 units
JS 152. Juvenile Delinquency & Justice
History, theory and functions of the juvenile justice system. The legal processes for delinquent minors, status offenders and dependent children, including intake, detention, adjudication and disposition. Current legal issues and debate.
Prerequisites: Upper Division Standing; JS 10, 11, 12, or 25; 100W
Normal Grade Rules
3 units

JS 153. Crime and Justice Across the Life Course
Explores how crime and justice are experienced by individuals over time. The nature and extent of offending and victimization at various ages across the life course is examined. A critical consideration of the criminal career paradigm is also provided.
Prerequisites: Upper Division Standing; JS 10, 11, 12, or 25
Pre/corequisites: JS 100W
Normal Grade Rules
3 units

JS 155. Victimology
Examination of the relationship between victim and offender; the behavior and attitudes of family, society and justice system toward the victim; nature and extent of loss, injury and damage to the victim.
Prerequisite: Upper Division Standing; JS 10, 11, 12, or 25
Co-require: JS 100W
Normal Grade Rules
3 units

JS 156. Gangs, Criminal Syndicates & Justice
A socio/historical examination of the emergence, evolution, persistence, activities and social structure of gangs and mobs, the effects of social factors, e.g., politics, law, technology and the economy, and consequences for communities and social institutions.
Prerequisite: Upper Division Standing; JS 10, 11, 12, or 25
Co-require: 100W
Normal Grade Rules
3 units

JS 157. Deviance and Justice
This course examines various areas of norm violations and rule-breaking behaviors including, alcohol and drug abuse, criminal violence, corporate deviance, gang violence, and sexual deviance, child abuse, hate crime, mental illness, computer piracy and evaluates justice policies.
Prerequisites: Upper Division Standing; JS 10, 11, 12, or 25
Co-require: JS 100W
Normal Grade Rules
3 units

JS 158. The Prison Community
Analysis of formal and informal systems of organization and interaction among inmates and staff. Effects of the social structure and external system on the organization of the prison community.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

JS 171. Human Rights and Justice
Interdisciplinary exploration of human rights instruments, institutions, and notable human rights campaigns. The historical development of human rights and contemporary threats to the realization of fundamental dignity for humans and non-humans will also be explored.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
3 units

JS 172. Human Trafficking and Modern Day Slavery
This course examines the social, cultural, and historical dimensions of global human trafficking and modern-day slavery, with special attention to the efficacy, effectiveness, and unintended consequences of various anti-trafficking policies from around the world, including the United States.
Co-Require: JS 100W
Normal Grade Rules
3 units

JS 174. Fundamentals of Health Information Technology
Introduction to the principles and practices of health information technology to administer healthcare systems and promote public health. Focus on best practices, case-based learning, and global comparisons of innovative systems.
Prerequisite: HS 162
Normal Grade Rules
3 units

JS 175. Human Rights Practicum and Seminar
Complete field experience in human rights advocacy/reporting/organizing while surveying recent human rights scholarship in seminar format.
Prerequisites: JS 025, JS 171 or SOCI 118
Pre/co-require: any 100W course
Normal Grade Rules
3 units

JS 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Upper division standing.
Repeatable for credit
Credit / No Credit
1-3 units

JS 181. Internship: Justice Studies
The internship is designed to provide broad exposure to the operations of a variety agencies and organizations that range from a criminal justice to social justice focus, including courts, law enforcement agencies, law offices, nonprofit organizations and community based programs.
Prerequisite: Upper division standing, Justice Studies major, instructor consent and 2.0 GPA
Notes: 4 units are required. Students can take up to 3 additional units as JS electives.
Repeatable for credit
Credit / No Credit
1-7 units

JS 184. Directed Reading
Designed to meet individual needs and interests.
Prerequisite: Upper division standing.
Repeatable for credit
Credit / No Credit
1-3 units

JS 185. Special Topics in Law and Justice
Range of law and justice issues and topics may be addressed. Content varies by semester. Topics may include international law and globalization, the struggle for justice, human rights, law, inequality and injustice, and others. May be repeated for credit when content changes for a maximum of 9 units.
Prerequisites: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

JS 189. Senior Seminar: Contemporary Problems
Identification, discussion and analysis of selected problems in justice studies. A major term paper on a selected topic is required
Prerequisite: Senior Standing; JS 100w, 101, 114 or 117, and 171 with a C or better
Note: A grade of “C” or better is required for Justice Studies majors.
Normal Grade Rules
3 units

JS 201. Justice and Social Theory
Examines classic and contemporary theories of justice, including legal, social, economic and criminal justice and their application to current social issues.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
JS 202. Survey of Research Methods
Examination of research methods applied to solving problems and resolving issues in justice-related agencies, organizations and processes. Focuses on the application of the scientific method to problem-solving and program evaluation. Prerequisite: STAT 95 or equivalent, JS 105 or equivalent, and graduate standing. Normal Grade Rules 3 units

JS 203. Seminar in Applied Statistics in Justice
An evaluation of specific statistical methods for quantitative and nonquantitative analyses, concentrating on applications and interpretations in justice related settings. Prerequisite: STAT 95 or equivalent, JS 105 or equivalent, and graduate standing. Normal Grade Rules 3 units

JS 204. Justice Organizations, Ethics & Change
An examination of significant organization and management theories, behavioral processes, and organizational change and development. Prerequisite: Graduate standing, JS 201, JS 202. Corequisite: JS 203. Normal Grade Rules 3 units

JS 205. Seminar in Law and Courts
Roles of the law in society. Analysis and critique of courts, attorneys, judges and juries; dispute resolution; race, class, sex inequality; law’s symbolic functions and unintended consequences; new socio-legal research, and comparative perspectives. Normal Grade Rules 3 units

JS 206. Seminar in Juvenile Justice
Analysis of philosophy, theories, relevant law, research, constitutional issues related to juvenile justice. Structure and purpose of juvenile court proceedings. Minors in criminal and civil court, juvenile corrections, death penalty for juveniles, transfers to adult court, child victims, fetal abuse. Normal Grade Rules 3 units

JS 207. Seminar in Qualitative Research Methods
Qualitative research methods used in Justice Studies. Includes relationship of empirical evidence to theory, ethics in conducting empirical research, methodological design, interviewing techniques, field methods, participant observation, and content analysis. Prerequisites: Graduate standing, or instructor permission. Normal Grade Rules 3 units

JS 208. Seminar: Punishment & Society
Examination of a range of penal ideas and practices; includes historical analysis of punishment, overview of theoretical perspectives and empirical social science research on punishment and alternative sanctions and implications for contemporary penal policy. Normal Grade Rules 3 units

JS 209. Seminar in Police and Social Control
Critical examination of democratic policing, including internal and external strategies for control and reform. Emphasis on police role in democracy, policy, culture, performance measures for individuals and organizations, and alternative policing methods and policies. Normal Grade Rules 3 units

JS 211. Historical Issues in Justice Studies
A core course in the master’s program designed to equip students to do historical research, understand the significance of a historical perspective for contemporary issues, and explore the place of historical obligations and entitlements in a theory of justice. Normal Grade Rules 3 units

JS 212. Local & Global Perspectives on Human Rights
This course is a graduate level exploration of contemporary human rights scholarship and praxis in the United States and in relation to U.S. domestic and foreign policy. Normal Grade Rules 3 units

JS 214. Seminar: Social Movement, Community Organizing, and Social Justice
This course is an exploration of social movement praxis. The class investigates community organizing broadly and discusses the idea of associational justice specifically how it relates to establishing human rights in our communities through the active participation of informed citizens. Normal Grade Rules 3 units

JS 218. Seminar: Immigration, Law & Justice
Graduate level interdisciplinary analysis of the cultural, political and socioeconomic implications of contemporary migratory movements and immigration control policies in the United States, with particular emphasis on notions of international human rights and global justice. Normal Grade Rules 3 units

JS 220. Seminar: Criminological Theory
A critical review of classical and contemporary theories and research in criminology. Examination of contemporary criminal justice and its relationship to theories of criminal behavior. Normal Grade Rules 3 units

JS 221. Seminar: Deviance & Social Control
This course examines various areas of norm violations and rule-breaking behaviors including, alcohol and drug use/abuse, criminal violence, corporate deviance, gang violence, and sexual deviance, child abuse, hate crime, mental illness, computer piracy and evaluates justice policies. Prerequisite: Graduate standing. Normal Grade Rules 3 units

JS 222. Seminar: Penal Policies and Justice
A critical review of historical and contemporary theoretical models. Evaluation of current research on treatment, rehabilitation/punishment models and their use in adult and juvenile institutions and community settings. Normal Grade Rules 3 units

JS 223. Seminar: Comparative Criminology & Criminal Justice
This course provides a comparative perspective on crime, violence and punishment in contemporary global societies. The course analyzes transnational trends in crime, as well as organizational responses to criminality. Topics include international drug markets, sexual commerce, child soldiers, and terrorism. Prerequisite: Graduate Standing Normal Grade Rules 3 units

JS 288. Seminar in Special Topics
In-depth exploration and analysis of selected justice-related topic. Course will consider relevant theories, issues, and research on the selected topic. Prerequisite: Graduate standing or instructor consent. Repeatable for credit Credit / No Credit 1-3 units

JS 297. Program Evaluation Project
A substantial paper/mock evaluation of a justice agency program, justice policy, or organizational issue. Prerequisite: Completion of JS 201, JS 202, JS 203, JS 204 Repeatable for credit Mandatory CR/NC/RP 3 units
JS 298. Special Study
Advanced individual research not covered in a regular course and not related to the project or the thesis topic. Prerequisite: Instructor and Grad Coordinator permission. Repeatable for credit. Credit / No Credit. 1-3 units.

JS 299. Master's Thesis
Six units are required to complete the thesis and oral defense of the thesis. Required for Plan A. Must be repeated for a total of 6 semester units. Prerequisite: Admission to candidacy for the MS degree and thesis chair consent. Repeatable for credit. Mandatory CR/NC/RP. 3-6 units.
Kinesiology Department Courses

KINESIOLOGY

LOWER DIVISION

KIN 001. Adapted Physical Activities
Structured individualized physical activities to enhance physical/motor fitness and develop an active, health-oriented lifestyle for students unable to participate in the general activity program.
Repeatable for credit
Normal Grade Rules
1 unit

KIN 002A. Beginning Swimming
This course is designed for the non-swimmer and beginning swimmer. It is assumed that all students enrolled in the class have had little or no experience in learning the basic skills of swimming. The course is designed to instruct the student in the basic skills necessary to enable him/her to swim safely in deep water. There are no prerequisites for the course.
Normal Grade Rules
1 unit

KIN 002B. Intermediate Swimming
This course is designed to meet the needs of students who have satisfactorily completed the skills involved in beginning swimming.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 002C. Advanced Swimming
This course is designed to refine and extend the development of advanced skills in swimming.
Prerequisite: Intermediate level or its equivalent.
Normal Grade Rules
1 unit

KIN 005. Lifeguard Training
This course is designed to teach the basic concepts involved in "nonsurf" lifeguard training in accordance with the American Red Cross and the criteria set forth by that organization.
Normal Grade Rules
1 unit

KIN 008. Skin and SCUBA Diving
Both skin and SCUBA diving skills for enjoyment and to understand dangers connected with the sport. Only one unit can be applied for the physical education graduation requirement.
Prerequisite: KIN 2C (or equivalent).
Msc/Lab: Lecture 1 hour/activity 3 hours.
Normal Grade Rules
2 units

KIN 009A. Beginning Sailing
Basic skills and safety knowledge in small boats for those with little or no sailing experience
Prerequisite: Student must be able to swim 100 yards without stopping, tread water for 5 minutes, and exit from an overturned dinghy. Students will be tested for this in the SPX pool.
Normal Grade Rules
1 unit

KIN 010A. Beginning Kayaking
Beginning skills and knowledge for those with little or no experience of flat water kayaking. The emphasis will be on safe operation at all times.
Prerequisite: Students must be able to swim 100 yards without stopping, tread water for 5 minutes, and exit from an overturned kayak. Students will be tested for this in the SPX pool.
Normal Grade Rules
1 unit

KIN 011A. Beginning Rowing
Basic skills and knowledge for those with little or no experience of sweep rowing or sculling. Initial classes will be on indoor rowing machines, then eight-oared boats will be used. Students will learn both how to row and how tocox; improvement of strength / fitness is central.
Prerequisite: Swim 100 yards without stopping; thread water for 5 minutes; don lifejacket in the water. Tested in pool.
Normal Grade Rules
1 unit

KIN 013A. Beginning Rugby
This course is designed to familiarize the student with the rules, skills and basic concepts of modern Rugby Union Football. The class will equip the student to be an informed rugby spectator and/or participant.
Normal Grade Rules
1 unit

KIN 014A. Beginning Volleyball
This course provides the opportunity to learn and develop the basic rules and skills of volleyball, the 6-6 offense and the defense against the 6-6 offense.
Normal Grade Rules
1 unit

KIN 014B. Intermediate Volleyball
This course provides the intermediate student with the opportunity to refine and perfect the basic volleyball skills and to master individual positions when using the 6-2 offense and the defense against the offense.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 014C. Advanced Volleyball
This course is designed to teach advanced skills, principles and techniques necessary and fundamental to understanding and playing volleyball.
Prerequisite: Intermediate level or its equivalent.
Normal Grade Rules
1 unit

KIN 015A. Beginning Basketball
This course is designed to assist students in the development of fundamental skills necessary for effective involvement in playing the game of basketball.
Normal Grade Rules
1 unit

KIN 015B. Intermediate Basketball
This course provides the intermediate student with the opportunity to refine and perfect basic basketball skills.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 018A. Beginning Handball
Designed to develop beginning level handball skills, tactics/strategies, rules, court etiquette, sportsmanship, and game play that will lead to a positive attitude toward handball as a lifetime activity.
Normal Grade Rules
1 unit

KIN 019A. Beginning Soccer
This course is designed to introduce students to the game of soccer, and to provide students with the fundamental ability and knowledge needed to enjoy this game as players and spectators.
Normal Grade Rules
1 unit

KIN 020A. Beginning Badminton
The purpose of this course is to give the student basic understanding of the game of badminton. Students will be given a chance to learn and practice all aspects of the game, which will include strokes, strategy and rules.
Normal Grade Rules
1 unit

KIN 020B. Intermediate Badminton
Emphasis on improving basic badminton skills and tactics; learning intermediate skills, tactics and strategies; and playing more effective games.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 020C. Advanced Badminton
Emphasis on the development of advanced skills, drills, tactics and strategies through practice and games. The class focuses on drills and game play applying a variety of professional rules and etiquette, advanced skills and strategies.
Prerequisite: Intermediate level or its equivalent.
Normal Grade Rules
1 unit

KIN 021A. Beginning Tennis
This course is designed to give students a basic understanding of the game of tennis. Students will be given a chance to learn through lecture, demonstration, drilling and match play.
Normal Grade Rules
1 unit
KIN 021B. Intermediate Tennis
This course is designed to review the students’ understanding of the game of tennis. Students will be given a chance to review and practice all aspects of the game, which will include strokes, strategy and rules.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 021C. Advanced Tennis
This course deals with the maximizing of tennis skills techniques and high levels of strategy in order to compete successfully in a competitive game situation.
Prerequisite: Intermediate level or its equivalent.
Normal Grade Rules
1 unit

KIN 022A. Beginning Racquetball
This course is designed to acquaint the student with the game of racquetball. Content area in this course will include rules, safety, appreciation of the game and introductory skills.
Normal Grade Rules
1 unit

KIN 022B. Intermediate Racquetball
This course is designed to assist students in the enhancement of their skill level in the game of racquetball, through involvement in a variety of skills, drills, lead-up games and play situations.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 023A. Beginning Archery
This course is designed to introduce the student to the basic skills and concepts, provides the opportunity to learn, practice and analyze correct shooting form and to participate in a variety of archery tournaments.
Normal Grade Rules
1 unit

KIN 023B. Intermediate Archery
This course builds upon beginning level skills and knowledge and provides the opportunity to shoot a variety of different archery rounds.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 024A. Beginning Bowling
This course is designed to give students an understanding of the sport of bowling and develop fundamental bowling skills.
Normal Grade Rules
1 unit

KIN 024B. Intermediate Bowling
This course is designed to meet the needs of students who have satisfactorily completed the skills in beginning bowling. The course will add more advanced theory and techniques.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 024C. Advanced Bowling
Designed for students who are skilled bowlers. A brief review of bowling fundamentals and principles will be followed by in depth lectures on application of principles.
Drills will be used to improve skills.
Prerequisite: KIN 24B and a bowling average of 150 or better; alternative would be “scratch” league or a low handicap league plus instructor consent.
Normal Grade Rules
1 unit

KIN 025A. Beginning Golf
This course is designed for those who have never played golf or who have played very little and have had no basic formal instruction. This course will provide the student with a sound set of fundamentals to prepare for further instruction, if desired.
Normal Grade Rules
1 unit

KIN 025B. Intermediate Golf
This course is designed for those who have played some golf but have had little or no formal instruction. The student should finish the class knowing enough golf fundamentals, terminology and rules to play the game and/or proceed on with private, advanced instruction.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 025C. Advanced Golf
This course is designed for people who might score from the high seventies to the high eighties on a regular basis.
Prerequisite: Intermediate level or its equivalent.
Normal Grade Rules
1 unit

KIN 027A. Beginning Table Tennis
Emphasis on learning fundamental table tennis skills, basic tactics, strategies, etiquette, rules, and application to game situations.
Normal Grade Rules
1 unit

KIN 027B. Intermediate Table Tennis
Emphasis on improving fundamental skills and learning intermediate/advanced skills, tactics, and strategies for more effective games.
Prerequisite: Beginning level or its equivalent
Normal Grade Rules
1 unit

KIN 028A. Beginning Gymnastics
This course is designed to develop the student’s awareness and performance of basic skills in gymnastics.
Normal Grade Rules
1 unit

KIN 029. Cardio Kickboxing
Cardio Kickboxing is a noncontact aerobic conditioning activity combining punches, kicks, and traditional aerobic skills. This activity is designed to enhance cardiovascular endurance, muscular strength, and muscular endurance.
Normal Grade Rules
1 unit

KIN 030. Pilates
Pilates develops core strength and enhances range of motion in the major joints of the body. This course teaches the fundamentals of the Pilates workout: breathing, relaxation, neutral spine position, key bony landmarks used in alignment cueing, and limb control.
Normal Grade Rules
1 unit

KIN 031. Body Sculpting
Increases muscular endurance and improves muscle tone by performing a higher number of repetitions using light to moderate weights. Taught in a group setting with music. Equipment includes: dumbbells, tubing, light weight barbells, and steps.
Normal Grade Rules
1 unit

KIN 032. Aerobics
This course is designed to teach the key components of fitness, using aerobics as the mode of exercise. Aerobics can be defined as group exercise to music, using large, continuous, rhythmic movements to elevate the heart rate and produce a training effect, enhancing cardiorespiratory endurance.
Normal Grade Rules
1 unit

KIN 033. Advanced Aerobic Activities
A combination of intense activities designed to enhance cardiorespiratory endurance and muscular strength and endurance. Activities include: power aerobics, power step, interval training, resistance/step (aerobelt), jump rope, and boxaerobics.
Prerequisite: KIN 032 or KIN 034 or instructor consent.
Normal Grade Rules
1 unit

KIN 034. Step Training
Step training is a low-impact aerobic conditioning activity designed to enhance cardiorespiratory endurance and muscular strength and endurance.
Normal Grade Rules
1 unit
KIN 035A. Beginning Weight Training
This course is designed to teach the basic concepts of weight training for muscular strength and endurance. Its goal is to provide students with knowledge about the principles involved in weight training and the health-related components of fitness through a variety of exercises.
Normal Grade Rules
1 unit

KIN 035B. Intermediate Weight Training
This course is designed for individuals with prior training experience and involves higher level exercises. Students will be exposed to a wide variety of machines as well as free weight exercises and will then design a program based on individual needs.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 035C. Advanced Weight Training
This course is designed for students who have had prior class experience in resistive exercise training. Students who have not taken these classes must demonstrate adequate knowledge of lifting technique, terminology and weight room etiquette.
Prerequisite: Intermediate level or its equivalent.
Normal Grade Rules
1 unit

KIN 037. Fitness Walking
This course is designed to develop cardiovascular endurance at a low intensity level. Walking at a brisk pace with full arm movement.
Normal Grade Rules
1 unit

KIN 038. Beginning Jogging
The purpose of this class is to assist the student in the improvement of his or her cardiovascular fitness through running. This course also seeks to increase the student's knowledge of training methods so that they may develop their own training programs.
Normal Grade Rules
1 unit

KIN 040A. Topics in Modern Dance I
See DANC 040A.
- Repeatable for credit
Normal Grade Rules
2 units

KIN 040B. Topics in Modern Dance II
See DANC 040B.
- Repeatable for credit
Normal Grade Rules
2 units

KIN 041A. Topics in Ballet I
See DANC 041A.
- Repeatable for credit
Normal Grade Rules
2 units

KIN 041B. Topics in Ballet II
See DANC 041B.
- Repeatable for credit
Normal Grade Rules
2 units

KIN 042A. Topics in Jazz Dance I
See DANC 042A.
- Repeatable for credit
Normal Grade Rules
2 units

KIN 042B. Topics in Jazz Dance II
See DANC 042B.
- Repeatable for credit
Normal Grade Rules
2 units

KIN 044. Line/Country Western Dance
Basic skills, techniques, and rhythmic progressions of current line and country western dancing.
Normal Grade Rules
1 unit

KIN 045A. Beginning Lindy Hop and Night Club Swing
This course is focused on the development of fundamental Swing dance skills and knowledge. Steps, technique, and styling will be drawn from Lindy Hop, Jitterbug, Street Swing, Jive and Triple-Time Swing dances.
Normal Grade Rules
1 unit

KIN 046A. Beginning Social Dance
This course is focused on the development of fundamental social dance skills and knowledge. Dances will be selected from the American Smooth (e.g. Waltz, Tango), American Rhythm (e.g. Rumba, Cha Cha) and night club (e.g. Hustle, West Coast Swing) dance categories.
Normal Grade Rules
1 unit

KIN 046B. Intermediate Social Dance
This course is focused on the development of intermediate level social dance skills and knowledge. Dances will be selected from the American Smooth (e.g. Waltz, Tango), American Rhythm (e.g. Rumba, Cha Cha) and night club (e.g. Hustle, West Coast Swing) dance categories.
Prerequisite: KIN 046A or KIN 048A, or equivalent dance experience.
Normal Grade Rules
1 unit

KIN 047A. Beginning West Coast Swing
Designed to improve students' understanding of West Coast Swing dancing and to improve fundamental dance skills common to the dance.
Normal Grade Rules
1 unit

KIN 048A. Beginning Latin Dance
This course is focused on the development of fundamental Latin dance skills and knowledge. Dances will be selected from the International Latin, American Rhythm (e.g. Rumba, Cha Cha) and night club (e.g. Salsa) dance categories.
Normal Grade Rules
1 unit

KIN 048B. Intermediate Latin Dance
This course is focused on the development of intermediate level latin dance skills and knowledge. Dances will be selected from the International Latin, American Rhythm (e.g. Rumba, Cha Cha) and night club (e.g. Salsa) dance categories.
Prerequisite: KIN 046A or KIN 048A, or equivalent dance experience.
Normal Grade Rules
1 unit

KIN 049A. Topics in Tap Dance I
See DANC 049A.
- Repeatable for credit
Normal Grade Rules
1 unit

KIN 049B. Topics in Tap Dance II
See DANC 049B.
- Repeatable for credit
Normal Grade Rules
1 unit

KIN 050. Tai Chi (Non-Combative)
Emphasis on knowledge and skill, development of the standard Simplified Tai Chi Form and applications of Tai Chi for life. It is assumed that students enrolled in the class have had little or no experience in Tai Chi.
Normal Grade Rules
1 unit

KIN 051A. Beginning Aikido
An introduction to the philosophy, history and basic level training skills in the Japanese-derived martial art of Aikido.
Normal Grade Rules
1 unit

KIN 051B. Intermediate Aikido
Intermediate level training in the Japanese-derived martial art of Aikido.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 052A. Beginning Judo
Judo is a challenging martial art based on the philosophy of using maximum efficiency and maximum effort. This course is designed to teach the fundamental skills and techniques to the student as a recreational activity and/or on a competitive basis.
Normal Grade Rules
1 unit
KIN 052B. Intermediate Judo
This course is designed to continue the study of fundamental techniques of Judo from the Beginning Judo course. This course will introduce the student to more advanced Judo techniques for the purpose of recreational activity and/or on a competitive basis.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 052C. Competitive Judo
Prepares students to use Judo techniques in competitive tournaments. The course will offer intermediate and advanced skills (standing, mat and falling techniques) and strategies to improve competitiveness.
Prerequisite: KIN 052A or KIN 052B, and/or instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

KIN 053A. Beginning Karate
This course is designed to teach the beginning concepts of Japanese Karate-do. Its goal is to provide the student with the skills and knowledge necessary for belt promotion and insights into the martial arts.
Normal Grade Rules
1 unit

KIN 053B. Intermediate Karate
This course is designed to reinforce basic level skill fundamentals and to introduce intermediate techniques required for higher levels of performance in the art of Karate-do.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 054A. Beginning Tae Kwon Do
Introduction to history, forms, techniques, practice and etiquette of the martial art of Tae Kwon Do. Techniques include basic prearranged patterns (poomse), basic kicking and combination of kicking, and basic prearranged one-step defenses.
Normal Grade Rules
1 unit

KIN 054B. Intermediate Tae Kwon Do
Continuation of beginning level pattern series and defenses. Introduction to tournament rules, regulations and techniques (competition, footwork, blocking, attacking, point scoring, and knowledge of free-sparing), leading to advancement in rank.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 055A. Beginning Self-Defense
Emphasis on the development of basic self-defense awareness, knowledge, mental strategies, physical skills, self-confidence and hands-on experience.
Normal Grade Rules
1 unit

KIN 061A. Beginning Hatha Yoga
In this course the student will learn the correct movements, postures and sequence used in traditional Hatha Yoga.
Normal Grade Rules
1 unit

KIN 061B. Intermediate Hatha Yoga
Further exploration of the theories and practices of Hatha Yoga encompassing the second level series of traditional intermediate Hatha Yoga postures, breathing exercises, and relaxation techniques.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
1 unit

KIN 062A. Beginning Ice Skating
A beginning ice skating course that covers the skills identified by the International Ice Skating Association (IIAS).
Normal Grade Rules
1 unit

KIN 062B. Intermediate Ice Hiking and Backpacking
Intermediate course designed for the student with previous hiking or outdoor adventure experience.
Pre-requisite: KIN 063A or instructor approval.
Normal Grade Rules
1 unit

KIN 063A. Beginning Hiking and Backpacking
An introductory course designed to impact skills such as topographical map reading, navigation and hiking. The emphasis will be on logistics and operations of adventure excursions and fitness in various wilderness environments.
Normal Grade Rules
1 unit

KIN 063B. Intermediate Hiking and Backpacking
Intermediate course designed for the student with previous hiking or outdoor adventure experience. Students are responsible for planning, packing and leading at intervals, the entire group on a 3-day overnight hiking and backpacking excursion. Students will learn topographical map, compass reading, fundamental hiking and trip planning.
Prerequisite: KIN 063A or instructor approval.
Normal Grade Rules
1 unit

KIN 065A. Beginning Ice Hockey
Basic skills, techniques, strategies and rules of ice hockey.
No previous skating is required but the ability to skate is highly recommended.
Normal Grade Rules
1 unit

KIN 066. Fit for Life!
Concepts of fitness and wellness, focusing on the importance of regular physical activity for health and well-being throughout the lifespan.
Co-Requirement: Enrollment in a college level physical education activity course for academic credit at a CCC or CSU.
Pre-requisite: Course is only open to students in approved high unit majors that have received a waiver for the physical education graduation requirement.
Normal Grade Rules
CE E
2 units

KIN 067. Development of Human Potential
See CHAD 067.
Normal Grade Rules
CE E
3 units

KIN 068. Visual Representations of Sport in Popular Culture
Critical examination of visual representations of sport in popular culture. Facilitate a deeper understanding and appreciation of the artistic qualities that exemplify works of human creativity as related to sport.
Normal Grade Rules
CE C1
3 units

KIN 069. Stress Management: A Multidisciplinary Perspective
The stress process and its relation to health, disease, lifestyle, and the sociocultural environment. Physiological, psychological, sociological, and environmental parameters of stress across the lifespan, emphasizing university resources and stress management strategies to enhance academic, personal, and social development.
Normal Grade Rules
CE E
3 units

KIN 070. Introduction to Kinesiology
Explores the broad spectrum of kinesiology as an academic discipline, fundamental concepts and meaning of movement/physical activity, diversity of humans as moving beings, professional/career options, current issues, personal characteristics/professional responsibilities, Kinesiology at SJSU; initiates professional portfolio.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Notes: Required for KIN majors and minors only.
Normal Grade Rules
3 units

KIN 080. Individual Movement Studies
Individual work related to motor performance and activity made by special arrangement.
Misc/Lab: Activity 2 hours.
Repeatable for credit
Credit / No Credit
1 unit

UPPER DIVISION

KIN 100W. Writing Workshop
Advanced skills in writing. Development of writing style and creation of organized, persuasive and analytical prose. Generalized and specialized forms of writing.
Prerequisite: ENGL 001B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing; KIN 70 for major/minors only or instructor consent.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
CE Z
3 units
KIN 101. Sport in America
The role of sport (recreational and professional) as a social, political and economic institution in American society. Critical examination of contemporary issues affecting sport and sport involvement by diverse cultural groups within American society.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Notes: Not open to KIN majors for major/minor credit.
Normal Grade Rules
GE S
3 units

KIN 105. Water Safety Instructor’s Course
Designed to teach the basic concepts, skills and knowledge for successful teaching in the American Red Cross aquatics program. The content and requirements are in accordance with the American Red Cross and the criterion set forth by the organization.
Prerequisite: Minimum age of 18.
Misc/Lab: Lecture 1 hour/activity 2 hours.
Normal Grade Rules
2 units

KIN 106. Advanced SCUBA and Aquatic Technology
Underwater navigation, light salvage, searches, biological sampling, communications, weightless simulations, construction problem solving and lighting.
Prerequisite: NAUI SCUBA certification (or equivalent).
Misc/Lab: Lecture 1 hour/activity 4 hours.
Normal Grade Rules
3 units

KIN 107. Adapted Aquatics
Theories, techniques and practices in the instruction of persons with disabilities as they function in the aquatic environment.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Misc/Lab: Activity 2 hours.
Normal Grade Rules
1 unit

KIN 145A. Physical Activity for Older Adults
Analyses of development and implementation processes of exercise programs for older adults.
Prerequisite: KIN 070 or instructor consent
Normal Grade Rules
3 units

KIN 145B. Physical Activity for Older Adults
Analyses of development and implementation processes of exercise programs for older adults.
Prerequisite: KIN 70 or instructor consent
Normal Grade Rules
3 units

KIN 149. Child Health and Physical Activity
See CHAD 149.
Normal Grade Rules
3 units

KIN 152. Theory of Sport and Fitness Management
Basic theory of sport management. Topics include sport management and organizational skills, sport marketing and sales, sport communication, sport finance, economics, law and governance.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units

KIN 153. Sport Facility and Event Management
Provide students with the skills necessary to effectively manage sport and fitness facilities and events.
Prerequisite: KIN 070, and KIN 152 for sports management emphasis. Open only to declared KIN majors/minors, or instructor consent.
Normal Grade Rules
3 units

KIN 154A. Instrumentation in Exercise Physiology and Biomechanics
Familiarity and proficiency with methods and instruments of assessing physiological and biomechanical characteristics of human performance.
Prerequisite: KIN 070 (or equivalent) for majors/minors only or instructor consent; KIN 070, KIN 155; KIN 158 with grades of ‘C’ or better in each.
Misc/Lab: Lecture 1 hour/activity 4 hours.
Normal Grade Rules
3 units

KIN 154B. ECG Interpretations and Graded Exercise Testing
Theoretical background and practical proficiency in the methods and instruments of electrocardiogram interpretations and graded exercise testing.
Prerequisite: KIN 070 (or equivalent) for majors/minors only or instructor consent; KIN 070, KIN 155 with grades of ‘C’ or better in each.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 155. Exercise Physiology
Physiological responses and adaptations of the human organism to physical activity.
Prerequisite: KIN 070, BIOL 066 and CHEM 030A with a grade of ‘C’ or better in each; approved GE Math Concept course. Open only to declared KIN majors/minors, or instructor consent.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 156. Introduction to Adapted Physical Activity
Focus on attitude change as well as knowledge, comprehension and application of human movement principles related to individuals with disabling conditions.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units

KIN 158. Biomechanics
Relationship of structural and mechanical principles of the musculoskeletal system to the analysis of human performance.
Prerequisite: KIN 070, BIOL 065 with a grade of ‘C’ or better; approved GE Math Concept Course. Open only to declared KIN majors/minors, or instructor consent.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 159. Sport and Adapted Activities
Principles of kinesiology for adapting sport and activity for individuals with disabling conditions.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 160. History of Sport and Physical Education
Historical survey of physical education and sport from primitive societies through classical and medieval periods to the nineteenth and twentieth centuries. Development of sport, physical education and recreation in the U.S. and factors affecting their growth.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units

KIN 161. Philosophical Perspectives of Sport
Emphasis on systems of philosophy, aesthetic and moral considerations, metaphysical fitness and contemporary issues. Review of leading human movement theorists.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units
KIN 162. Advanced Fitness Assessment and Exercise Prescription
In-depth study and analysis of the principles and techniques used in the assessment of physical fitness and health as well as the design of conditioning programs and physical activities.
Prerequisite: KIN 070 (or equivalent) for majors/minors only and KIN 155, or instructor consent. Grade of ‘C’ or better in KIN 070 and KIN 155.
Miss/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

KIN 163. Physical Fitness and Nutrition
See NUFS 163.
Normal Grade Rules
GE: R
3 units

KIN 164. Sociocultural Perspectives
Sociocultural processes of sport and play in contemporary society. The study of phenomena arising out of group relations within the realm of kinesiology.
Prerequisite: KIN 070 for majors/minors only or instructor consent or lower division social science core GE.
Repealtable for credit
Normal Grade Rules
3 units

KIN 165. Motor Development
Motor development of the individual from birth to maturity. Emphasis upon motor behavior, needs, capacities and interests.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units

KIN 166. Motor Learning
Concepts, principles and theories of motor learning with application to physical activities.
Prerequisite: KIN 070 for majors/minors only or instructor consent; BIOL 066 with a grade of ‘C’ or better.
Miss/Lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

KIN 167. Sports Psychology
See PSYC 167.
Normal Grade Rules
3 units

KIN 168. Psychology of Coaching
Social, clinical, child, measuring, industrial, personality and organizational psychology and the practical application of the material to coaching.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units

KIN 169. Diversity, Stress and Health
Impact of structured inequalities on stress and health of diverse populations. Analysis of physiological/psychosocial health factors related to diversity, as well as behavioral interventions and social actions that mediate stress and optimize health and social justice.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

KIN 170A. Field Experience Teaching on Campus
Practical experiences for developing teaching competencies in an on-campus or field-based activity.
Prerequisite: KIN 070 for majors/minors only or instructor consent; 35 completed units in major courses.
Repeatable for credit
Credit / No Credit
1 unit

KIN 170B. Field Experience-Teaching
Practical experiences to satisfy certification requirement in off-campus or field-based programs. May be repeated for a maximum of 4 units.
Prerequisite: KIN 070 for majors/minors only or instructor consent. Concurrent enrollment in KIN 172, KIN 173, KIN 178, or KIN 179.
Repeatable for credit
Credit / No Credit
1 unit

KIN 170C. Fieldwork in Adapted Physical Activity
Supervised experiences in adapted physical activity at selected public and private agencies.
Prerequisite: KIN 070 for majors/minors only or instructor consent; KIN 156. Concurrent enrollment in KIN 172 or KIN 178 or KIN 179.
Repeatable for credit
Credit / No Credit
1-3 units

KIN 170D. Fieldwork in Sport Management
Practical experience in a professional work setting while working and observing 100 hours under direct supervision of qualified sport management professionals. Interns assigned a variety of duties and experiences.
Prerequisite: KIN 070, KIN 152, and upper division standing.
Repeatable for credit
Credit / No Credit
1-3 units

KIN 170E. Field Experience Coaching on Campus
Practical experience in on-campus programs for coaching minors. May be repeated once for credit.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Repeatable for credit
Credit / No Credit
2 units

KIN 170F. Field Experience Coaching off Campus
Practical experience in off-campus programs for coaching minors. May be repeated once for credit.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Repeatable for credit
Credit / No Credit
2 units

KIN 170G. Field Experience Activity Programs on Campus
Practical experience in on-campus activity programs. Appropriate only for non-teaching concentration areas. Maximum of 3 units may be repeated.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Repeatable for credit
Credit / No Credit
1 unit

KIN 170H. Field Experience Skin and SCUBA Diving on Campus
Practical experience in skin and SCUBA diving situations. Appropriate for certified SCUBA divers to satisfy certification requirements in on-campus program. Maximum of 4 units may be repeated.
Prerequisite: SCUBA Diver Certificate, Life-Saving, first-aid and CPR certification.
Repeatable for credit
Credit / No Credit
1 unit

KIN 171A. Non Traditional Game and Sport Activities
Non traditional and global game and sport activities appropriate for preadolescents and adolescents in instructional settings.
Prerequisite: KIN 070 for majors/minors only or instructor consent, upper division standing.
Miss/Lab: Lecture/activity 4 hours
Normal Grade Rules
3 units
**KIN 172. Elementary School Programs, K-6**
Philosophy, principles and activities of physical education appropriate for children. 
Prerequisite: KIN 070; KIN 165 or KIN 173. Open only to declared KIN majors/minors or instructor consent. 
Co-requisites: KIN 170B or KIN 170C. 
Misc/Lab: Lecture/activity 4 hours. 
Normal Grade Rules 3 units 

**KIN 173. Intro to Teaching PE & Non-trad Sports**
This course will introduce future physical educators to profession of teaching and will include philosophies, ethics, and standards for teaching, legal and current issues, learning-communities, inclusion of non-traditional and global games and sport activities, and observations of effective teaching. 
Prerequisite: KIN 070 for majors/minors only or instructor consent or concurrent enrollment; KIN 171A. 
Co-requisite: KIN 170B. 
Normal Grade Rules 3 units 

**KIN 174. Assessment of Psychomotor Function**
Basic procedural elements of informal observation, formal performance testing and direct measures of psychomotor function of individuals with disabling conditions. 
Prerequisite: KIN 070; Open only to declared KIN majors/minors or instructor consent. 
Normal Grade Rules 3 units 

**KIN 175. Measurement and Evaluation in Kinesiology**
Designed to develop an understanding of measurement and evaluation concepts and application relevant to assessment in the psychomotor, cognitive and affective domains. Activities include collection and computer analysis of data. 
Prerequisite: KIN 070 for majors/minors only or instructor consent; approved GE Math Concept Course. 
Misc/Lab: Lecture/activity 4 hours. 
Normal Grade Rules 3 units 

**KIN 176. Movement Experiences for Children**
Physical Education K-6 curricular philosophy and activities appropriate for elementary school personnel; emphasizes the social, emotional, physical and skill development of children in the elementary school setting. 
Prerequisite: CHAD 060 or CHAD 067. 
Misc/Lab: Lecture 2 hours/activity 2 hours. 
Normal Grade Rules 3 units 

**KIN 177. Management Practices for Physical Education Teachers**
Examines current practices for managing student behaviors, instructional technology, legal regulations, and physical fitness needs as well as exploring adolescent development. 
Prerequisite: KIN 070 for majors/minors only or instructor consent; KIN 172, KIN 171A or concurrent enrollment and upper division standing. 
Co-requisite: KIN 170B or KIN 170C. 
Misc/Lab: Lecture 2 hours/lab 2 hours. 
Normal Grade Rules 3 units 

**KIN 179. Design and Assessment of Movement Experiences**
Integrate concepts from kinesiology, motor learning, motor development to address sequential movement experiences, including qualitative analysis and interactions with performer. 
Prerequisite: KIN 070 for majors/minors only or instructor consent; KIN 158, KIN 166 and KIN 178. 
Corequisite: KIN 170B or KIN 170C. 
Misc/Lab: Lecture/activity 4 hours. 
Normal Grade Rules 3 units 

**KIN 179. Design and Assessment of Movement Experiences**
Integrate concepts from kinesiology, motor learning, motor development to address sequential movement experiences, including qualitative analysis and interactions with performer. 
Prerequisite: KIN 070 for majors/minors only or instructor consent; KIN 158, KIN 166 and KIN 178. 
Corequisite: KIN 170B or KIN 170C. 
Misc/Lab: Lecture/activity 4 hours. 
Normal Grade Rules 3 units 

**KIN 180. Individual Studies**
Individual work on special topics by arrangement. May be repeated for a total of 4 units. 
Prerequisite: KIN 070 for majors/minors only or instructor consent; physical education major or minor; minimum GPA 2.5; advisor consent. 
Repealable for credit 
Credit / No Credit 1-4 units 

**KIN 180C. Individual Studies: Coaching**
Individual education in selected coaching situations. 
Prerequisite: KIN 070, upper division coaching minor; appropriate concepts and performance course, intermediate level competency or instructor consent. 
Repealable for credit 
Credit / No Credit 2 units 

**KIN 184. Directed Reading**
Assign reading of selected books, journals and papers. Conferences with instructor, seminars, reports (oral and written). May be repeated for a total of 4 units. 
Prerequisite: KIN 070 for majors/minors only for; instructor and department chair consent. 
Repealable for credit 
Credit / No Credit 1-4 units 

**KIN 185. Senior Seminar**
Problem centered study of perspectives on human beings in motion; a culminating class for students to synthesize their undergraduate preparation, including completion of a professional portfolio and movement project. 
Prerequisite: KIN 070 for majors/minors only for instructor consent. 35 units of KIN upper division coursework; major form completed and signed by an advisor, advising manager, and undergraduate coordinator. 
Normal Grade Rules 3 units 

**KIN 185H. Senior Seminar - Honors**
Examination of a topic of current interest in human performance. Summarized paper to be presented at student seminar. 
Prerequisite: KIN 070 for majors/minors only or instructor consent; senior standing, 3.2 or better GPA and 3.5 or better average in major. 
Normal Grade Rules 3 units 

**KIN 186. Pharmacology in Sports Medicine**
Focuses on the basic pharmacology principles including legislation, administration, pharmacotherapeutics, drug classifications, and drug therapy and testing. Primary emphasis is placed upon pharmacology in the sports medicine arena. This course is accessible only on-line. 
Prerequisite: A basic prevention and care of athletic injuries course is highly recommended. 
Normal Grade Rules 3 units 

**KIN 187. Clinical Exercise Physiology**
Physiological principles applied to the prevention, management, and treatment of chronic health conditions. Focus on the pathophysiology, acute response to exercise, chronic training effects, and development of appropriate conditioning and training programs for chronic conditions. 
Prerequisite: KIN 070 (or equivalent) for majors/minors only or instructor consent; KIN 155, with grades of ‘C-‘ or better in each. 
Normal Grade Rules 3 units 

**KIN 188. Prevention and Care of Athletic Injuries**
Prevention through safe equipment, facilities and protective strapping. Methods used to aid recovery. 
Prerequisite: KIN 070, BIOL 065 with a grade of ‘C‘ or better, or instructor consent. 
Misc/Lab: Lecture/activity 4 hours. 
Normal Grade Rules 2 units
KIN 189. Prevention and Care of Athletic Injuries Laboratory
The laboratory course is designed to provide hands-on experience in the prevention and care of athletic injuries, including preventive and supportive taping techniques, emergency management, and various hands-on experiences related to the prevention of activity related injuries.
Prerequisite: KIN 070, KIN 188 (concurrent enrollment acceptable).
Normal Grade Rules
1 unit

KIN 191A. Advanced Assessment of Lower Extremity Injuries
An advanced course designed to develop knowledge and skills in recognition, assessment, and medical referral of athletic injuries to the lower extremity, thoracoolumbar spine, posture and gait. Activity sessions are designed to assist in the development of clinical assessment skills.
Prerequisite: KIN 070, KIN 188, KIN 189. Open only to declared KIN majors/minors or instructor consent.
Normal Grade Rules
3 units

KIN 191B. Advanced Assessment of Upper Extremity Injuries
An advanced course designed to develop knowledge and skills in recognition, assessment, and medical referral of athletic injuries to the upper extremity, abdomen, thorax, cervical spine, head, and general medical conditions. Activity sessions are designed to develop clinical assessment skills.
Prerequisite: KIN 070, KIN 191A.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

KIN 193. Organization & Administration in Athletic Training
Theoretical and practical information concerning organization and administration of a modern athletic training program, including managerial styles, personnel, facilities/equipment management, budget, medical records, insurance issues, legal aspects, public relations, and other current topics in athletic training.
Prerequisite: KIN 070 for majors/minors only or instructor consent; KIN 188.
Normal Grade Rules
2 units

KIN 194. Therapeutic Exercise
Theoretical and clinical bases for the use of therapeutic exercise in rehabilitation settings; basic biomechanics, indications, contraindications, and proper application procedures of therapeutic exercise in athletic injury rehabilitation.
Pre/Corequisite: KIN 191A and KIN 191B.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 195. Therapeutic Modalities
Theoretical and clinical aspects of therapeutic modalities in athletic rehabilitation. Includes the physics and physiological effects, indications and contra-indications, as well as application procedures of various therapeutic modalities.
Prerequisite: KIN 070 for majors/minors only or instructor consent. KIN 188 and upper division standing.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 197A. Practicum in Athletic Training I
Introductory level supervised practical experiences at selected athletic training clinical settings.
Prerequisite: BIOL 065 and BIOL 066 with a grade of 'C' in each, KIN 188, KIN 189 and 50 hours of observation.
Open only to KIN majors.
Repeatable for credit
Credit / No Credit
1 unit

KIN 197B. Practicum in Athletic Training II
Experiences will include exercise testing and evaluation, exercise prescription and program design, leadership and fitness program administration. Maximum of 4 units may be repeated.
Prerequisite: KIN 070 for majors/minors only or Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

KIN 197C. Practicum in Athletic Training III
Clinical internship in allied health-related situations, e.g., physician’s offices, physical therapy sports medicine clinics, etc. Typically off-campus assignment.
Prerequisite: KIN 191A and KIN 191B (concurrent enrollment in KIN 191B is allowed), KIN 197B and professional insurance recommended.
Repeatable for credit
Credit / No Credit
1 unit

KIN 197D. Practicum in Athletic Training IV
Course is designed to provide the student with advanced, diverse, supervised, and practical experiences in the athletic training profession. Selected on-off campus clinical settings will be used to assist the student in the development of professional competencies and proficiencies.
Prerequisite: KIN 195, KIN 197C.
Credit / No Credit
1 unit

KIN 198. Internship in Kinesiology
Practical experiences in a professional work setting. Experiences will include exercise testing and evaluation, exercise prescription and program design, leadership and fitness program administration. Maximum of 4 units may be repeated.
Prerequisite: KIN 070 for majors/minors only or Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

KIN 250. Fundamentals of Quantitative Research
Design, analysis and interpretation of quantitative research. Course focuses on the research process from the formulation of a research problem through the analysis of data. Topics include: ethics in research, research design and analysis issues and techniques, psychometrics, descriptive statistics, parametric and non-parametric inferential statistics, critiquing research.
Prerequisite: KIN 175 (or equivalent).
Normal Grade Rules
3 units

KIN 251. Fundamentals of Qualitative Research
Design, analysis and interpretation of qualitative research. Course focuses on the research process from the formulation of a research problem through the analysis of data. Topics include: ethics in research, research design and analysis issues and techniques, data representation, critiquing research.
Normal Grade Rules
3 units

KIN 255. Advanced Exercise Physiology
Survey and critical evaluation of current concepts and literature regarding physiological regulatory mechanisms of the oxygen transport system and muscle metabolism. Acute and chronic effects of exercise with emphasis placed on physiological limitations.
Prerequisite: KIN 155 (or equivalent).
Normal Grade Rules
3 units

KIN 256. Environmental Exercise Physiology
Survey and critical evaluation of current concepts and literature regarding various and environmental (heat, cold, altitude, etc.) conditions as they affect the typical responses to exercise. Acute effects and chronic adaptations examined.
Prerequisite: KIN 155 (or equivalent).
Normal Grade Rules
3 units
KIN 257. Biomechanics
Principles and laws of physics and mechanics as applied to analysis of human movement activities. Critical evaluation of current research findings in sport biomechanics.
Prerequisite: KIN 158 (or equivalent).
Normal Grade Rules
3 units

KIN 258. Adapted Physical Activity
Continuum of comprehensive service delivery in Adapted Physical Activity. Advanced Pedagogical, Adapted Physical Recreation and Disability Sport areas are addressed.
Prerequisite: KIN 156 (or equivalent).
Normal Grade Rules
3 units

KIN 259. Advanced Internship in Adapted Physical Activity
Advanced, supervised practicum for the development of direct service, administration/supervision, in-service training and advocacy/leadership competencies in adapted physical activity.
Prerequisite: BS degree with emphasis in adapted physical education and/or satisfactory completion of specified didactic curriculum.
Repeatable for credit
Credit / No Credit
1-3 units

KIN 260. Philosophy of Sport and Embodiment
Development of a consistent set of basic professional values compatible with individual differences which may serve as a frame of reference for professional behavior.
Prerequisite: KIN 161 (or equivalent).
Normal Grade Rules
3 units

KIN 261. Historical Interpretations of Sport and Physical Education
An historical examination of the origins and development of the various sport and physical education forms around the world.
Prerequisite: KIN 160 (or equivalent).
Normal Grade Rules
3 units

KIN 262. International Sport and Physical Education
An analysis of the current structure, organization and methods of physical education and sport in selected countries. Social, cultural, political, economic and religious influences.
Normal Grade Rules
3 units

KIN 264. Sport Sociology
An in-depth study of the relationship between sport and society. Focus will be on social and cultural factors that affect how Americans play and view sport.
Prerequisite: KIN 164 (or equivalent).
Normal Grade Rules
3 units

KIN 265. Advanced Motor Development
Examination of specific theory and research related to the movement changes that occur across the lifespan. Interpretation of recent related research and individually guided investigation of a specific area of concern in motor development.
Prerequisite: KIN 165 (or equivalent).
Normal Grade Rules
3 units

KIN 266. Principles and Concepts of Perceptual Motor Learning
Motor behavior and the learning patterns developed in acquiring skill in a motor activity.
Prerequisite: KIN 166 (or equivalent).
Normal Grade Rules
3 units

KIN 267. Advanced Sport Psychology
Sport psychology research and its use in field settings. Major theoretical areas (anxiety, motivation, cohesion, etc.) and their application in sport.
Prerequisite: KIN 167 and KIN 168 (or equivalent).
Normal Grade Rules
3 units

KIN 268. Evidence Based Research and Practice in Management and Assessment of Injuries to Lower Extremities
Multidisciplinary approach for recognition, initial care, treatment, and rehabilitation used to return athletes to lower extremity pre-injury fitness levels. (First course in two-course series.)
Prerequisite: BIOL 065, BIOL 066, KIN 155, KIN 158 and KIN 188.
Normal Grade Rules
2 units

KIN 269. Evidence Based Research and Practice in the Mgmt and Assessment of Injuries to the Upper Extremity
Multidisciplinary approach for recognition, initial care, treatment and rehabilitation used to return an athlete to upper extremity pre-injury fitness levels (second course in two-course series).
Prerequisite: KIN 268.
Normal Grade Rules
2 units

KIN 272. Evidence Based Research in the Practice of Therapeutic Exercise
Investigation of the scientific and philosophical bases of therapeutic exercise and therapeutic modalities with reference to the rehabilitation process, and to acquire skills necessary for prudent application of current modalities and techniques.
Prerequisite: KIN 155, KIN 158 and KIN 188 (or equivalent).
Normal Grade Rules
3 units

KIN 273. Evidence Based Research in the Practice of Therapeutic Modalities
An advanced course designed to critically evaluate the scientific and philosophical bases of therapeutic modality use. The course is intended to provide the student with the information necessary to perform prudent clinical applications of therapeutic modalities on orthopedic injuries.
Normal Grade Rules
2 units

KIN 275. Measurement Theory and Design
Theory and procedures related to the analysis, selection and design of tests in human performance. Emphasis on validity, reliability and statistical interpretation of test data.
Prerequisite: KIN 175 and competency in elementary statistics.
Normal Grade Rules
3 units

KIN 280. Advanced Fieldwork in Sport Management
Advanced practical experience in a professional work setting under the direct supervision of qualified sport management professionals. Interns assigned a variety of duties and experiences.
Prerequisite: Graduate standing or instructor consent.
Credit / No Credit
1-3 units

KIN 281. Legal and Ethical Aspects of Sport
Topics include sport and its relationship to the common law of contracts and torts, the statutory law of labor and antitrust, constitutional and civil rights law, communications law and ethics.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

KIN 282. Marketing and Social Aspects of Sport
Sport and its relationship to market research designs, strategies, plans, fundraising, consumer behavior, political, sociological and historical parameters.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

KIN 283. Management, Leadership and Communication in Sport
Management, administration, organizational behavior and communication theories, problems and issues in leadership in sport.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
KIN 284. Financial Aspects of Sport
Examines traditional and innovative methods of revenue acquisition available to sport organizations. Current financial challenges, innovative concepts and strategies used in financing sport operation.
Prerequisite: Graduate standing or approval of the instructor.
Normal Grade Rules
3 units

KIN 285. Internship in Kinesiology
Advanced practical experience in a professional work setting under direct supervision of qualified professionals. Interns assigned various duties and experiences related to areas of specialization.
Prerequisite: Graduate standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

KIN 286. Independent Study
Independent study through research projects, creative intellectual productions or directed reading/literature review related to the field of Kinesiology. May be repeated for a total of 6 units.
Prerequisite: Graduate Standing
Repeatable for credit
Credit / No Credit
1-3 units

KIN 289. Master of Arts Seminar in Kinesiology
The purpose of this seminar course is to offer an intensive, comprehensive focus of a specific topic, and/or theme as it relates to the study of kinesiology.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

KIN 292A. Leadership and Administration in Athletic Training
Current problems and issues related to the athletic training profession. Topics include professional ethics and competency, medicolegal issues, administration of athletic training programs, stress management and drug testing.
Normal Grade Rules
1 unit

KIN 292B. Seminar in Sports Medicine II
Current issues related to the athletic training profession. Topics include eating disorders, injury rehabilitation and management. Related topics of medical and scientific nature will be discussed with guest lecturers.
Normal Grade Rules
2 units

KIN 293A. Fieldwork in Athletic Training I
Advanced practical experience in athletic training under the direct supervision of qualified sports medicine professionals.
Credit / No Credit
3 units

KIN 293B. Fieldwork in Athletic Training II
Advanced practical experience in athletic training under the direct supervision of qualified sports medicine professionals.
Prerequisite: KIN 293A.
Credit / No Credit
3 units

KIN 293C. Fieldwork in Athletic Training III
Advanced practical experience in athletic training under the direct supervision of qualified sports medicine professionals.
Prerequisite: KIN 293A, KIN 293B.
Credit / No Credit
3 units

KIN 293D. Fieldwork in Athletic Training IV
Advanced practical experience in athletic training under the direct supervision of qualified sports medicine professionals.
Prerequisite: KIN 293A, KIN 293B and KIN 293C.
Credit / No Credit
3 units

KIN 298. Special Studies
Advanced individual research and projects.
Prerequisite: KIN 250.
Repeatable for credit
Credit / No Credit
3 units

KIN 299. Master’s Thesis or Project
Prerequisite: KIN 250 and admission to candidacy for the master’s degree.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

KINEOSIOLOGY TEACHER EDUCATION

UPPER DIVISION

KNED 184Y. Student Teaching II: Classroom Teaching
Minimum 80-120 class periods of classroom, teaching laboratory or field teaching in appropriate single subjects, grades K-12 and related teaching activities and seminar.
Prerequisite: Joint approval of major and Education departments.
Repeatable for credit
Credit / No Credit
4-6 units

KNED 184Z. Student Teaching III - Classroom Teaching
Notes: May be in different subject/school and will be at a different grade level.
See KNED 184Y.
Repeatable for credit
Credit / No Credit
4-6 units

KNED 339. Instructional Materials and Procedures in Physical Education
Application of theories of learning and principles of teaching to the selection of instructional procedures to be used in physical education. Practical experience provided.
Prerequisite: KIN 170B, KIN 172 and KIN 179 and department teacher education approval.
Notes: Physical education majors and minors only.
Misc/Lab: Lecture/activity 4 hours.
Normal Grade Rules
3 units
Linguistics and Language Development Department Courses

LINGUISTICS

LOWER DIVISION

LING 020. Nature of Language
Introduction to the nature of language as a social institution and practice in observing language structure and use in local speech communities.
Normal Grade Rules
GE: D1
3 units

LING 021. Language and Thinking
Exploring systems of language and logic in oral and written discourse, with a focus on the role of shared cultural assumptions, language style and the media of presentation in shaping the form and content of argumentation.
Normal Grade Rules
GE: M9
3 units

LING 022. Language across the Lifespan
Introduction to what is known about how people successfully learn second languages, with a focus on physiological, psychological, social-cultural and linguistic factors that affect second language acquisition, and on skills and strategies that promote language learning across the lifespan.
Normal Grade Rules
GE: E
3 units

LING 092. Int’l Program Studies
Repeatable for credit
Mixed Grading
1-9 units

LING 101. Introduction to Linguistics
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

LING 107. Patterns of English
Description of the sound, word-formation, sentence, semantic and discourse patterns of English. Analysis of contemporary examples of spoken and written English.
Prerequisite: Written Communication I (or equivalent).
Normal Grade Rules
3 units

LING 108. Introduction to Second Language Development, Teaching, and Assessment
Theoretical and practical approaches to how people learn first, second, and foreign languages in bilingual and multilingual educational settings. Methods, materials, and assessment of language development for English language learners K-16.
Prerequisite: LING 101 or ENGL 103 or LLD 107.
Normal Grade Rules
3 units

LING 111. Introduction to Linguistic Phonetics
Production, recognition and accepted transcription of speech sounds used in languages. Physiological and acoustic analysis of speech.
Prerequisite: LING 101 or instructor consent.
Normal Grade Rules
3 units

LING 112. Introduction to Syntax
Introduction to the study of sentence structure: Syntactic constructions; constituent structure; grammatical relations; dependency relations; problems in syntactic analysis; formal systems for describing syntactic structure; typological range of syntactic phenomena.
Prerequisite: LING 101.
Normal Grade Rules
3 units

LING 113. Introduction to Phonology
Examination of sound patterns found in the world’s languages, their description via traditional phonemic analysis, distinctive feature analysis and rule writing in the format of generative phonology.
Prerequisite: LING 101 and LING 111.
Normal Grade Rules
3 units

LING 114. Introduction to Semantics and Discourse
Approaches to meaning, truth conditional semantics, relation of semantics to pragmatics and speech act theory (e.g., presupposition, deixis, adjacency pairs) and text structure (cohesion).
Prerequisite: LING 101 or instructor consent.
Normal Grade Rules
3 units

LING 115. Corpus Linguistics
Introduction to the use of large collections of computer-readable text (“corpora”) in linguistics. Focus on text processing techniques and quantitative data analysis.
Other topics: philosophical foundations; lexical resources; the WWW as corpus; applications to stylistics, language teaching, and sociolinguistics.
Prerequisite: LING 101 or instructor consent.
Normal Grade Rules
3 units

LING 122. English as a World Language
A survey of the ways and the purposes which English is used in diverse societies and cultures around the world, including the United States; implications for international and cross-cultural communication.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

LING 123. Sound and Communication
Basic acoustics and nature of sound as applied to the study of vocal communication by humans and other animals. Voice communication as transmission of a speech code via sound.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: R
3 units

LING 124. Introduction to Speech Technology
Strategies in man-machine communication, with a focus on speech recognition and speech synthesis. Computer modeling of speech production and perception.
Prerequisite: LING 101, LING 111 or instructor consent.
Normal Grade Rules
3 units

LING 125. Introduction to Historical-Comparative Linguistics
Why and how languages change; how linguists go about studying, documenting and explaining such change. Social and phonetic motivations for change. Language families and proto-languages.
Prerequisite: LING 101, LING 111, LING 112, LING 113 or instructor consent.
Normal Grade Rules
3 units

LING 129. Culture, Language and Ethnicity in the U.S.
The role of language in the formation of culture and ethnicity in the U.S. Language and culture contact between indigenous, colonial and immigrant peoples.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units
LING 161. Psycholinguistics
Psychology of language. Child language acquisition, language disorders, representation of language in the brain, cognitive aspects of linguistic communication, theories of language in linguistics and psychology.
Prerequisite: LING 101
Normal Grade Rules
3 units

LING 162. Introduction to Morphology
Examination of the morphological structure of words; morphological typology; morphemes, morphs and allomorphs; issues in inflectional and derivational morphology; morphophonemics; word syntax; productivity; markedness, iconicity.
Prerequisite: LING 101 or instructor consent.
Normal Grade Rules
3 units

LING 165. Introduction to Natural Language Processing
Computer processing of text using data-driven (statistical) and knowledge-driven (rule-based) methods. Applications including spelling correction, information retrieval, question answering, and machine translation.
Prerequisite: LING 101 and LING 115, or instructor consent.
Normal Grade Rules
3 units

LING 166. Sociolinguistics: Cross-Cultural Communication
Relationship between language and society, inter- and intracultural communication, non-verbal communication, language and cognition; language planning.
Prerequisite: LING 101 or Instructor Consent
Normal Grade Rules
3 units

LING 180. Individual Studies
Individual work by arrangement.
Prerequisite: Instructor consent and department chair approval.
Repeatable for credit
Credit / No Credit
1-3 units

LING 201. Phonology: Theory and Applications
Survey of the theoretical issues in phonology; language universals, notions of markedness and natural rules; psychological reality of phonological constructs. Applications to language teaching, speech synthesis and automatic speech recognition.
Prerequisite: LING 101, LING 111 and LING 113.
Normal Grade Rules
3 units

LING 202A. Syntactic Theory
Aspects of syntax and grammatical theory.
Prerequisite: LING 101 and LING 112.
Normal Grade Rules
3 units

LING 202B. Current Issues in Syntactic Theory
Aspects of syntax and grammatical theory.
Prerequisite: LING 101, LING 112 and LING 202A.
Normal Grade Rules
3 units

LING 203. Semantic Structures
Aspects of meaning and semantic theory.
Prerequisite: LING 101 and LING 114, or instructor consent.
Normal Grade Rules
3 units

LING 204. English Sound Patterns
English phonological structure and type of argumentation leading to knowledge of English segmental and prosodic phonology, theoretical issues involved in the analysis of the phonologies of languages and the critical ability to be able to evaluate alternative theories and analyses; relationship of English spelling to pronunciation.
Prerequisite: LING 101, LING 111 and LING 113.
Normal Grade Rules
3 units

LING 206. English Language Change
The nature and motivation of language change, including perspectives from neogrammarian, structuralist and transformational-generativist traditions; construction of a comprehensive theory of language change based upon studies of language acquisition, pidgins/creoles and dialectology.
Prerequisite: LING 101, LING 111, LING 112 or instructor consent.
Normal Grade Rules
3 units

LING 213. Linguistic Field Methods
Methods in phonological, morphological and syntactic analysis of linguistic data obtained from native-speaker informants.
Prerequisite: LING 101, LING 111, LING 112 and LING 113 (or equivalents).
Normal Grade Rules
3 units

LING 219. Language and Communication Development
Development of academic writing skills.
Prerequisite: LING 101, LING 111, LING 112 or instructor consent.
Credit / No Credit
1-4 units

LING 220. Tutorial
Tutorial consists of a combination of one-on-one interaction with a tutor and facilitated word processing in the computer lab. It is designed to support the development of academic writing skills.
Notes: No graduation credit.
No Degree Credit
3 units

LING 290R. Thesis/Project Supervision
Continued work on thesis or project.
Pre-requisite: Outstanding RP grade in a preceding semester in a project or thesis class.
Mandatory CR/NC/RP
1 unit

LING 297. Computers and Language
Natural language processing by computers; elements of syntactic recognition for natural language, language understanding in limited semantic domains, database structure, machine translation, automatic speech recognition and speech synthesis.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

LING 299. Master's Thesis or Project
Thesis or project research.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

LINGUISTICS AND LANGUAGE DEVELOPMENT

LOWER DIVISION

LLD 001. Academic English I
Emphasis on development of English for academic purposes. Integration of reading and writing, supplemented by use of oral language. Required for students scoring 141 and below on the EPT.
Misc/Lab: Lecture 3 hours/act 2 hours
Notes: No graduation credit.
No Degree Credit
5 units

LLD 002. Academic English II
Continued emphasis on the development of English for academic purposes. Integration of reading and writing, supplemented by use of oral language. Required for students scoring between 142 and 148 (inclusive) on the EPT or advancing from LLD 01.
Notes: No graduation credit.
No Degree Credit
3 units

LLD 004. Tutorial for Successful Writing
Tutorial consists of a combination of one-on-one interaction with a tutor and facilitated word processing in the computer lab. It is designed to support the development of academic writing skills.
Notes: No graduation credit.
Repeatable for credit
No Degree Credit
1 unit
UPPER DIVISION

**LLD 100A. Writing Competency through Genres**
Satisfies the WST requirement if passed with a C or better. Prepares students for 100W through drafting feedback and revision to demonstrate competency. Develops the ability to analyze written genres used in the students’ chosen disciplines and to write analytical and reflective essays.
Prerequisite: Must have failed the WST at least once. Note: A CR/NC option may not be used to satisfy the WST requirement.
Normal Grade Rules
3 units

**LLD 100W. Writing Workshop**
Advanced composition. Instruction and practice in reading, discussing and writing about issues germane to the student’s major field of study.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE Z
3 units

**LLD 100WB. Writing Workshop for Business Students**
Instruction and practice in reading, oral interaction and writing activities germane to the genres of the business world.
Prerequisite: "C" or better in ENGL 1B or its equivalent, completion of Core GE, satisfaction of Writing Skills Test, and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE Z
3 units

**LLD 104. Introduction to Second Language Learning and Teaching**
A survey of historical and contemporary approaches to language learning and teaching in bilingual and multilingual settings. Methods, materials and assessment for language learners.
Prerequisite: LING 101, LLD 107 or ENGL 103.
Normal Grade Rules
3 units

**LLD 163. Introduction to Second Language Development**
Theoretical and practical considerations in understanding how people learn first, second and foreign languages in various settings; introduces basic techniques in analyzing data from language learners.
Prerequisite: LING 101, ENGL 103 or LLD 107.
Normal Grade Rules
3 units

**LLD 182. Tutorial Practicum**
Directed practical experience in tutoring academic English at the college level.
Prerequisite: LING 101, LLD 107 or ENGL 103.
Repeatable for credit
Credit / No Credit
1 unit

**LLD 230. Seminar in Linguistics/TESOL**
Topics in TESOL or linguistic theory.
Prerequisite: Instructor consent
Repeatable for credit
Normal Grade Rules
3 units

**LLD 250C. Oral Communication Competence for Multicultural Students**
Emphasis on the development of spoken English in academic and professional settings.
Notes: No graduation credit
Repeatable for credit
No Degree Credit
3 units

**LLD 250W. Becoming a Professional in Linguistics/TESOL**
Course focuses on the research and communication skills needed to become an active and effective member of the professional community in linguistics or TESOL.
Prerequisite: LING 101.
Normal Grade Rules
3 units

**LLD 260. English Structures for Teaching I**
The phonological, morphological and syntactic structures of English for pedagogical purposes.
Prerequisite: LING 101 and LLD 107.
Normal Grade Rules
3 units

**LLD 261. English Structures for Teaching II**
The semantic, pragmatic and discourse structure of English for pedagogical purposes.
Prerequisite: LLD 260 or Instructor Consent
Normal Grade Rules
3 units

**LLD 270. Second Language Acquisition**
Processes and products of child and adult second language acquisition: classroom instruction versus untutored settings; psychological variables; individual differences; interlanguage hypothesis; input and interaction in language development; organization of language systems of bilinguals.
Prerequisite: LING 101.
Normal Grade Rules
3 units

**LLD 271. Intercultural Communication and Second Language Acquisition**
The social and cultural factors that affect first and second language acquisition and use. Understanding how to function in intercultural settings.
Prerequisite: LING 101.
Normal Grade Rules
3 units

**LLD 280. Methods and Materials for Teaching English to Speakers of Other Languages**
A critical approach to evaluating learners’ needs, designing curricula, identifying and evaluating materials, and applying appropriate methods and techniques in the ESL classroom.
Prerequisite: LING 101.
Normal Grade Rules
3 units

**LLD 282. Practicum in Teaching English to Speakers of Other Languages**
Directed practical experience in teaching English to speakers of other languages.
Prerequisite: LLD 280.
Credit / No Credit
3 units

**LLD 283. Curriculum and Assessment in TESOL**
Theories and practices of needs analysis, curriculum design and assessment. Hands-on experience in identifying learner needs, determining instructional objectives, designing curricula/syllabi and constructing appropriate assessment instruments.
Prerequisite: LLD 280 (or equivalent).
Normal Grade Rules
3 units

**LLD 289. Classroom Techniques for TESOL Professionals**
Practical approaches for teachers to maximize learning potential; use of cognitively, affectively and communicatively-based high involvement techniques for TESOL learners.
Prerequisite: LLD 280 (or equivalent).
Normal Grade Rules
3 units

**LLD 290. Foundations of ESP**
Principles and theories involved in the teaching/planning of ESL/EFL courses for vocational, professional, academic or sociocultural purposes. Needs assessment of a local setting.
Prerequisite: LING 101.
Normal Grade Rules
3 units

**LLD 290R. Thesis/Project Supervision**
Continued work on thesis or project. Pre-requisite: Outstanding RP grade in a preceding semester in a project or thesis class
Mandatory CR/NC/RP
1 unit
LLD 293. Developmental Reading/Writing: Principles and Practices  
Cognitive and sociocultural perspectives on reading and writing; contrastive rhetoric; teaching developmental reading and writing.  
Prerequisite: LING 101, LLD 107 or ENGL 103.  
Normal Grade Rules  
3 units

LLD 294. Analyzing Classroom Language  
Theoretical and practical approaches to observing, analyzing and reflecting on the processes of classroom second/foreign language teaching and learning.  
Prerequisite: LLD 260 (or equivalent).  
Normal Grade Rules  
3 units

LLD 295. Cross-Cultural Literacy  
Reading and writing in different social and cultural settings: acquisition of literacy, contrastive rhetoric, reading and writing in a second language.  
Prerequisite: LING 101, ENGL 103 or LLD 107.  
Normal Grade Rules  
3 units

LLD 297. English in the Global Context  
The spread of English as a native and nonnative language around the world. Implications of this spread for linguistics, language planning and TESOL.  
Prerequisite: LLD 260 (or equivalent).  
Normal Grade Rules  
3 units

LLD 298. Individual Studies  
Advanced individual research.  
Prerequisite: Instructor consent.  
Repeatable for credit  
Credit / No Credit  
1-4 units

LLD 299. Master's Thesis or Project  
Thesis or project research.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units
Mathematics and Statistics Department Courses

MATH 003A. Intensive Learning Mathematics I
A first course in a two semester sequence of courses designed to review topics from elementary and intermediate algebra. A credit grade in MATH 3A is required to enroll in MATH 3B. Four hours discussion per week.
Prerequisite: A score of 370 or less on the ELM exam, or a score of 30 or less on the ELM2 exam.
Notes: No credit for graduation.
No Degree Credit
4 units

MATH 003B. Intensive Learning Mathematics II
The second course in a two semester sequence of courses designed to review topics from elementary and intermediate algebra. A credit grade in MATH 3A is required to enroll in MATH 3B. Completion of 8 units of MATH 3A and MATH 3B with a credit grade indicates satisfaction of the ELM requirement. Four hours discussion per week.
Prerequisite: CR grade in MATH 3A.
Notes: No credit for graduation.
No Degree Credit
4 units

MATH 003R. Entry Level Mathematics Review
Review of topics from elementary and intermediate algebra. Completion of this course with a credit grade indicates satisfaction of the ELM requirement.
Notes: No credit for graduation.
No Degree Credit
5 units

MATH 006A. Entry Level Mathematics I
A first course in a two semester sequence of courses designed to review topics from elementary and intermediate algebra. A credit grade is required to enroll in MATH 6B.
Prerequisite: A score from 380 through 450 on the ELM exam, or a score from 33 through 40 on the ELM2 exam.
Misc/Lab: Discussion 2 hours/act 2 hours.
Notes: No credit for graduation.
No Degree Credit
3 units

MATH 006B. Entry Level Mathematics II
The second course in a two semester sequence of courses designed to review topics from elementary and intermediate algebra. A credit grade in MATH 6A is required to enroll in MATH 6B. Completion of MATH 6B with a credit grade indicates satisfaction of the ELM requirement.
Prerequisite: A credit grade in MATH 6A.
Misc/Lab: Lecture 2 hours/act 2 hours.
Notes: No credit for graduation.
No Degree Credit
3 units

MATH 006D. Entry Level Mathematics
A review of topics from elementary and intermediate algebra. Completion of this course with a credit grade indicates satisfaction of the ELM requirement.
Prerequisite: A score from 500 through 540 on the ELM exam, or a score from 46 through 49 on the ELM2 exam.
Misc/Lab: Discussion 5 hours/week.
Notes: No credit for graduation.
No Degree Credit
5 units

MATH 006L. Entry Level Mathematics
A review of topics from elementary and intermediate algebra. Completion of this course with a credit grade indicates satisfaction of the ELM exam.
Prerequisite: A score from 460 through 490 on the ELM exam, or a score from 41 through 49 on the ELM2 exam.
Misc/Lab: Lecture 3 hours/lab 2 hours.
Notes: No credit for graduation.
Repeatable for credit
No Degree Credit
5 units

MATH 008. College Algebra
Review of basic algebra. Complex numbers, functions, graphs, polynomials, inverse functions, exponential and logarithmic functions.
Prerequisite: Satisfaction of ELM requirement.
Corequisite: MATH 008W, to opt out of MATH 008W contact the Math Department office.
Normal Grade Rules
GE: B4
3 units

MATH 008W. College Algebra Workshop
A course designed to help all students excel in College Algebra. Students work in groups on challenging college algebra problems to help them understand the concepts in College Algebra more deeply and lay the groundwork for success in future math courses.
Corequisites: MATH 8 is required.
Repeatable for credit
Credit / No Credit
1 unit

MATH 010. Mathematics for General Education
Topics: methods of proof, problem solving, trigonometry, probability, statistics, applications to scheduling and apportionment, population studies, consumer math, theory of games, polyhedra, networks, graph theory, linear programming.
Prerequisite: Satisfaction of ELM requirement.
Normal Grade Rules
GE: B4
3 units

MATH 012. Number Systems
Structure of the real number system, numeration systems, elementary number theory, and problem-solving techniques; technology integrated throughout the course.
Prerequisite: Two years of high school algebra; one year of high school geometry; satisfaction of ELM requirement.
Normal Grade Rules
GE: B4
3 units

MATH 015A. Statway A: Statistics-Concepts & Methods
See UNVS 015A.
No Degree Credit
5 units

MATH 015B. Statway B: Statistics-Concepts & Methods
See UNVS 015B.
No Degree Credit
2 units

MATH 015C. Statway C: Statistics-Concepts & Methods
See UNVS 015C.
Normal Grade Rules
GE: B4
3 units

MATH 016A. Statway A: Statistics-Concepts & Methods
See UNVS 016A.
No Degree Credit
5 units

MATH 016C. Statway C: Statistics-Concepts & Methods
See UNVS 016C.
Normal Grade Rules
GE: B4
3 units

MATH 019. Precalculus
Preparation for calculus: polynomial, rational, exponential, logarithmic and trigonometric functions; analytic geometry.
Prerequisite: Satisfaction of ELM requirement.
Corequisite: MATH 19W, to opt out of MATH 19W contact the Math department office.
ABC/No Credit
GE: B4
5 units
MATH 019W. Precalculus Workshop
A course designed to help all students excel in Math 19. Students work in groups on challenging problems to help them understand precalculus concepts more deeply and lay the groundwork for success in future math courses.
Prerequisite: Concurrent enrollment in Math 19 required.
Repeatable for credit
Credit / No Credit
1 unit

MATH 030. Calculus I
Introduction to calculus including limits, continuity, differentiation, applications and introduction to integration. Graphical, algebraic and numerical methods of solving problems.
Prerequisite: Satisfaction of ELM requirement; Satisfactory score on the Calculus Placement Exam, or MATH 019 (with a grade of "B" or better to waive the placement exam).
Corequisite: MATH 030W, to opt out of MATH 030W contact the Math department office.
Note: For students who pass this course with a grade of "C" or better ("C-") not accepted), course will be allowed to fulfill Area B4.
Normal Grade Rules
GE B4
3 units

MATH 030P. Calculus I with Precalculus
Selected topics in precalculus. Introduction to calculus including limits, continuity, differentiation, applications, and introduction to integration. Graphical, algebraic and numerical methods of solving problems.
Prerequisite: Satisfaction of ELM requirement; Satisfactory score on the Calculus Placement Exam, or MATH 019 (with a grade of "C" or better).
Corequisite: MATH 030W, to opt out of MATH 030W contact the Math department office.
Note: For students who pass this course with a grade of "C" or better ("C-") not accepted), course will be allowed to fulfill Area B4.
Normal Grade Rules
GE B4
5 units

MATH 030W. Calculus I Workshop
A course designed to help all students excel in Calculus I. Students work in groups on challenging calculus problems to help them understand the concepts in Calculus I more deeply and lay the groundwork for success in future math courses.
Corequisite: MATH 30 or MATH 30P required.
Repeatable for credit
Credit / No Credit
1 unit

MATH 031. Calculus II
Definite and indefinite integration with applications. Sequences and series. Graphical, algebraic and numerical methods of solving problems.
Prerequisite: MATH 030 or MATH 030P (with a grade of "C" or better).
Corequisite: MATH 031W, to opt out of MATH 031W contact the Math department office.
Note: For students who pass this course with a grade of "C" or better ("C-") not accepted), course will be allowed to fulfill Area B4.
Normal Grade Rules
GE B4
4 units

MATH 031W. Calculus II Workshop
A course designed to help all students excel in Calculus II. Students work in groups on challenging calculus problems to help them understand the concepts in Calculus II more deeply and lay the groundwork for success in future math courses.
Pre/Corequisite: Concurrent enrollment in MATH 31 is required.
Repeatable for credit
Credit / No Credit
1 unit

MATH 032. Calculus III
Functions of more than one variable, partial derivatives, multiple integrals and vector calculus. Graphical, algebraic and numerical methods of solving problems.
Prerequisite: MATH 031 (with a grade of "C" - or better)
Note: For students who pass this course with a grade of "C" or better ("C-") not accepted), course will be allowed to fulfill Area B4.
Normal Grade Rules
GE B4
3 units

MATH 032W. Calculus III Workshop
A course designed to help all students excel in Calculus III. Students work in groups on challenging calculus problems to help them understand the concepts in Calculus III more deeply and lay the groundwork for success in future courses.
Corequisite: Concurrent enrollment in MATH 032 required.
Repeatable for credit
Credit / No Credit
1 unit

MATH 042. Discrete Mathematics
Sets, logic, methods of proof including mathematical induction, functions, relations, elementary combinatorics, probability, Boolean algebras.
Prerequisite: MATH 19 with a grade of "C" or better, or eligibility for MATH 30 or 30P.
Normal Grade Rules
3 units

MATH 042W. Discrete Math Workshop
A course designed to help all students excel in Discrete Mathematics. Students work in groups on challenging discrete math problems to help them understand the concepts in discrete math more deeply and lay the groundwork for success in future courses.
Corequisite: Concurrent enrollment in MATH 042 required.
Repeatable for credit
Credit / No Credit
1 unit

MATH 050. Scientific Computing I
See METR 050
Normal Grade Rules
2 units

MATH 060. Calculus for Biological Sciences
Selected topics in precalculus and an introduction to calculus for students of the biological sciences. Functions and graphs, differentiation, optimization, exponential and logarithmic functions, and integration. Emphasis on applications in the life sciences.
Prerequisites: Satisfaction of the ELM requirement. Satisfactory score on the Calculus Placement Exam, or MATH 019 (with a grade of "C" or better).
Note: For students who pass this course with a grade of "C" or better ("C-") not accepted), course will be allowed to fulfill Area B4.
Normal Grade Rules
GE B4
5 units

MATH 070. Finite Mathematics
Systems of linear equations and inequalities, matrices, linear programming, set theory and probability theory, applications to business and to social sciences.
Prerequisite: Satisfaction of ELM requirement.
Note: For students who pass this course with a grade of "C" or better ("C-") not accepted), course will be allowed to fulfill Area B4.
Normal Grade Rules
GE B4
3 units

MATH 071. Calculus for Business and Aviation
Functions and graphs, limits, continuity, differentiation, integration, partial differentiation. Emphasis on business and economics applications.
Prerequisites: Math Remediation Completed, or a post baccalaureate, or Open University; MATH 008 (with a grade of C- or better), or MATH 019 (with a grade of C or better), or a score of 550 or higher on the SAT Math, or a score of 23 or higher on ACT math.
Corequisites: MATH 071W.
Note: For students who pass this course with a grade of "C" or better ("C-") not accepted), course will be allowed to fulfill Area B4.
Normal Grade Rules
GE B4
3 units
MATH 071W. Calculus Workshop for Business/Aviation
A course designed to help all students excel in Calculus for Business/Aviation. Students work in groups on challenging calculus problems to help them understand the concepts in calculus more deeply and lay the groundwork for success in future courses. Corequisite: Concurrent enrollment in MATH 071 is required.  Repeatable for credit
Credit / No Credit
1 unit

MATH 101. Problem Solving for Teachers
Problem solving involving elementary number theory, algebra, geometry, logic, measurement, probability and statistics. Selected problems explored and extended across content strands. Various instructional methods and assessment alternatives modeled. Designed specifically for teachers of mathematics, grades K-8. Prerequisite: MATH 106 (with a grade of "C-" or better) or instructor consent. Normal Grade Rules
3 units

MATH 102. Secondary School Mathematics
Secondary school mathematics from an advanced viewpoint, plus topics from higher mathematics. Emphasizes inductive reasoning in problem solving. Applications useful to junior and high school teachers. Prerequisite: Equivalent of mathematics minor (with 9 upper division units) or instructor consent. Normal Grade Rules
3 units

MATH 104. History of Mathematics
Mathematical development from earliest times to the twentieth century. Prerequisite: MATH 42 and MATH 115 (with a grade of "C-" or better in each), or instructor consent. Normal Grade Rules
3 units

MATH 105. Concepts in Mathematics, Probability and Statistics
Introduction to functions and algebraic reasoning, introduction to probability, data, graphs, statistics, problem solving; technology integrated throughout the course. Prerequisite: Two years of high school algebra, one year of high school geometry, MATH 12 with a "C-" or better. Normal Grade Rules
3 units

MATH 106. Intuitive Geometry
Introductory geometry, measurement, inductive and deductive reasoning, introduction to transformations, and problem-solving techniques; technology integrated throughout the course. Prerequisite: MATH 012 and MATH 105 (with grades of "C-" or better), two years of high school algebra, one year of high school geometry. Normal Grade Rules
3 units

MATH 107A. Explorations in Algebra
Comprehensive view of school algebra primarily for the mathematical preparation of teachers. The computer will be used to generate examples, investigate relationships, explore algorithms and solve problems. Functions and relations used as a unifying theme throughout. Prerequisite: MATH 106 (with a grade of "C-" or better), or instructor consent. Normal Grade Rules
3 units

MATH 107B. Explorations in Geometry
Comprehensive view of elementary geometry primarily for the mathematical preparation of teachers. The computer will be used to investigate two- and three-dimensional patterns, measurement and parallelism. Transformational approach to congruence and similarity. Nature of inductive reasoning and deductive proof. Prerequisite: MATH 106 (with a grade of "C-" or better), or instructor consent. Normal Grade Rules
3 units

MATH 107C. Explorations in Number Theory
Comprehensive view of elementary number theory and its applications. The computer will be used to investigate patterns, number properties, relationships, and problem solving. Prerequisite: MATH 106 (with a grade of "C-" or better), or instructor consent. Normal Grade Rules
3 units

MATH 108. Introduction to Abstract Mathematics and Proofs
The purpose of this course is to develop students' mathematical maturity and skill with proofs. Material covered will include logic; set theory; including functions, relations, and cardinality; the real number system, including the completeness axiom; and selected topics. Prerequisite: MATH 31 and MATH 42 (with a grade of "C-" or better in each) or instructor consent. Normal Grade Rules
3 units

MATH 109. Mathematical Software
Use of mathematical software in selected fields of mathematics such as calculus, multivariable calculus, differential equations, combinatorics, statistics, and linear algebra. A programming project will be required. Prerequisite: MATH 32 and either MATH 123 or MATH 129A (with a "C-" or better in each course), or instructor consent. Normal Grade Rules
3 units

MATH 110. Mathematics Computing Laboratory
Programming projects related to mathematics courses. Required for use of department labs. Corequisite: Any Math course and instructor consent. Notes: Does not count towards major or minor requirements. Repeatable for credit
Credit / No Credit
1 unit

MATH 112. Vector Calculus
Vector fields, line and surface integrals, Green’s Theorem, Stokes’ Theorem, Divergence Theorem and advanced topics such as differential forms or applications to mechanics, fluid mechanics, or electromagnetism. Prerequisite: MATH 32 (with a grade of "C-" or better) or instructor consent. Normal Grade Rules
3 units

MATH 113. Differential Geometry
Properties of curves and surfaces, Frenet-Serret formulas and the fundamental forms. Study of curves and surfaces in the small by means of differential calculus. Prerequisite: MATH 32 and MATH 129A (with a grade of "C-" or better in each) or instructor consent. Notes: Offered only occasionally. Normal Grade Rules
3 units

MATH 115. Modern Geometry and Transformations
Synthetic and analytic theory of projective transformations, similarities, Euclidean motions, inverese geometry and an introduction to non-Euclidean geometry. Prerequisite: MATH 31 (with a grade of "C-" or better) or instructor consent. Normal Grade Rules
3 units

MATH 123. Differential Equations and Linear Algebra
Matrices, determinants, systems of linear equations, vector geometry, linear transformations, eigenvalues and eigenvectors, diagonalization, first order differential equations, linear systems of differential equations, higher order differential equations, Laplace transforms. Prerequisite: Math 31 (with a grade of "C-" or better) or instructor consent. Normal Grade Rules
3 units
MATH 126. Theory of Numbers
Divisibility, prime numbers, congruences of first and higher degrees, theorems of Fermat, Euler and Wilson. Quadratic residues.
Prerequisite: MATH 31 and MATH 42 (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

MATH 128A. Abstract Algebra I
Group theory: permutation groups, abelian groups, morphism theorems, finite groups. Introduction to rings and fields.
Prerequisite: MATH 108 and MATH 129A (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

MATH 128B. Abstract Algebra II
Emphasis on rings, integral domains, fields, field extensions, Galois theory.
Prerequisite: MATH 128A (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 129A. Linear Algebra I
Matrices, systems of linear equations, vector geometry, matrix transformations, determinants, eigenvalues and eigenvectors, orthogonality, diagonalization, applications, computer exercises. Theory in R^n emphasized; general real vector spaces and linear transformations introduced.
Prerequisite: MATH 31 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 129B. Linear Algebra II
Continuation of Math 129A. Abstract vector spaces and linear transformations, diagonalization, Cayley-Hamilton theorem, minimal polynomials, Jordan canonical form. Selected topics from inner product and adjoint, duality, rational canonical form and applications.
Prerequisite: MATH 108 and MATH 129A (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

MATH 131A. Introduction to Analysis
Properties of real numbers including completeness and compactness. Continuous functions, uniform continuity, the derivative.
Prerequisite: MATH 32 and MATH 108 (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

MATH 131B. Introduction to Real Variables
The theory of the Riemann integral, sequences and series of functions, spaces of functions.
Prerequisite: MATH 131A (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 132. Advanced Calculus
Calculus of several variables; Jacobian, inverse and implicit function theorems, contracting mapping theorem, change of variables in integration and applications.
Prerequisite: MATH 32 and MATH 129A (with a grade of "C-" or better in each), or instructor consent.
Normal Grade Rules
3 units

MATH 133A. Ordinary Differential Equations
First order differential equations, first order linear systems, second order linear equations, applications, Laplace transforms, series solutions. Additional topics.
Prerequisite: MATH 32 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 133B. Partial Differential Equations
Partial differential equations of physics and engineering, Fourier series, Legendre polynomials, Bessel functions, orthogonal functions, the Sturm-Liouville equation.
Prerequisite: MATH 133A (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 134. Ord. Diff. Eqns and Dynamical Systems
Prerequisite: MATH 032 and MATH 129A (with a grade of "C-" or better in each), or instructor consent.
Normal Grade Rules
3 units

MATH 138. Complex Variables
Analytic functions, complex integration, residues and power series.
Prerequisite: MATH 32 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 142. Introduction to Combinatorics
Sets, permutations, combinations, probability, mathematical induction, counting techniques, generating functions, partitions, recurrence relations, inclusion-exclusion. Polya’s theorem and applications to computer science, mathematics, engineering and physical sciences.
Prerequisite: MATH 31 and MATH 42 (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

MATH 143C. Numerical Analysis and Scientific Computing
Development and comparison of important algorithms for scientific computing in terms of efficiency, accuracy and reliability. Topics include nonlinear equations, interpolation, approximation theory, differentiation, integration, differential equations, numerical stability and error analysis. Substantial assignments using contemporary software packages and professional subprogram libraries.
Prerequisite: MATH 032, one of CS 050, CS 046A or CS 049 (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

MATH 143M. Numerical Analysis and Scientific Computing
Development and comparison of important algorithms for scientific computing in terms of efficiency, accuracy and reliability. Topics include systems of linear equations-direct and iterative methods, least squares problems, eigenvalues and eigenvectors, numerical stability and error analysis. Substantial assignments using contemporary software packages and professional subprogram libraries.
Prerequisite: MATH 129A, one of CS 50, CS 46A or CS 49 (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

MATH 160. Statistics for Biol Sciences
Calculus-based introductory course in statistical data analysis with applications in the biological sciences. Emphasis on applications of statistical inference methods through software. Design of experiments, descriptive statistics, confidence intervals, hypothesis tests, regression, analysis of variance, and categorical data analysis.
Prerequisites: BIOL 001 and BIOL 002 with a grade of "C-" or better in each, and MATH 060 with a grade of "C-" or better; or instructor consent.
Normal Grade Rules
3 units
MATH 161A. Applied Probability and Statistics I
Descriptive and inferential statistics. Collection and analysis of data, discrete and continuous probability models, random variables, Central Limit Theorem, confidence intervals, hypothesis testing. Prerequisite: MATH 31 (with a grade of "C-" or better) or instructor consent. Normal Grade Rules 3 units

MATH 161B. Applied Probability and Statistics II
A continuation of Math 161A. Two sample confidence intervals and hypothesis tests, analysis of variance, simple and multiple regression, chi-square tests of homogeneity and goodness-of-fit, other topics as time permits. Use of statistical software is integral to the course. Student project required. Prerequisite: MATH 161A (with a grade of "C-" or better), or instructor consent. Normal Grade Rules 3 units

MATH 162. Statistics for Bioinformatics
Introduction to the theory and applications of statistical methodology in the biological sciences. Topics include inference, stochastic processes, Markov chains, hidden Markov models, clustering, and gene expression analysis. Applications to current molecular biology and genetics problems. No biology background required. Prerequisite: MATH 161A (with a grade of "C-" or better) or instructor consent. Normal Grade Rules 3 units

MATH 163. Probability Theory
Probability axioms; random variables; marginal and conditional density and distribution functions; binomial, geometric, Poisson, gamma and normal probability laws; mathematical expectations, moment generating functions; limit theorems; sampling distributions. Prerequisite: MATH 32 and MATH 161A (with a grade of "C-" or better in each) or instructor consent. Normal Grade Rules 3 units

MATH 164. Mathematical Statistics
Sampling distributions, confidence intervals, order statistics, sufficient statistics, the Rao-Blackwell Theorem, completeness, uniqueness, point estimation, maximum likelihood, Bayes' methods, testing hypotheses, likelihood ratio tests, categorical data analysis, nonparametric tests. Prerequisite: MATH 163 (with a grade of "C-" or better) or instructor consent. Normal Grade Rules 3 units

MATH 165. Mathematical Statistics II
An introduction to the theory of estimation. Point estimation, sampling distributions, interval estimation, hypothesis testing. Prerequisite: MATH 164 (with a grade of "C-" or better). Normal Grade Rules 3 units

MATH 167. Programming in SAS
Programming and applying the computer language SAS to perform statistical computations and to analyze large amounts of data. Data preparation and transformations, creating and managing data files, macros, data reporting techniques, basic statistical methods. Prerequisite: MATH 161A (with grade of "C-" or better), or instructor consent. Normal Grade Rules 3 units

MATH 168. Mathematics for Secondary Studies
Introduces students to the sequence of mathematics courses from middle school through college. Prerequisite: Equivalent of mathematics minor or instructor consent. Normal Grade Rules 3 units

MATH 170. Individual Studies
Individual study in a specific field. Prerequisite: Department chair consent. Repeatable for credit Credit / No Credit 1-4 units

MATH 180H. Individual Studies for Honors
Senior project on advanced topics in mathematics as determined by the instructor. Written paper and oral presentation of the project required. Intended for students graduating with departmental honors. Prerequisite: At least junior standing as mathematics major. GPA of 3.5 or higher in the major and department chair consent. Credit / No Credit 3 units

GRADUATE
MATH 201A. Mathematics for Secondary Teachers
Secondary school mathematics from an advanced viewpoint, plus topics from higher mathematics. Emphasizes inductive reasoning in problem solving. Applications useful to junior and senior high school teachers. Prerequisite: Equivalent of mathematics minor or instructor consent. Normal Grade Rules 3 units

MATH 201B. Mathematics for Secondary Teachers II
Secondary school mathematics from an advanced viewpoint, plus topics from higher mathematics. Emphasizes deductive reasoning in problem solving. Applications useful to junior and senior high school teachers. Prerequisite: Equivalent of mathematics minor or instructor consent. Normal Grade Rules 3 units

MATH 203. Applied Mathematics, Computation, and Statistics Projects
Supervised teamwork to solve a substantial problem in mathematics or computer science usually supplied by an outside agency such as a local company. The number of different projects offered and the topics will vary widely. A project usually continues for two consecutive semesters. Prerequisite: Instructor consent. Repeatable for credit Credit / No Credit 3 units
MATH 211A. Geometry of Projective Spaces
Structure of projective planes, finite planes and
combinatorics; automorphism groups; configuration
theorems and coordinatizations; conics, introduction to
projective n-space over a field; topological properties;
subgeometries.
Prerequisite: MATH 112 or MATH 115 or instructor
consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 211B. Advanced Topics in Geometry
Projective n-space, linear geometry, crystallography,
algebraic geometry and additional topics.
Prerequisite: MATH 211A or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 213A. Introduction to Smooth Manifolds
Smooth manifolds and maps. Tangent bundle. Sand’s
theorem, transversality, Whitney embedding theorem.
Vector fields and flows on manifolds, Lie derivative, Lie
groups and Lie algebras. Frobenius theorem, differential
forms, Stokes’ theorem. Basic Morse theory. Additional
topics chosen by the instructor.
Prerequisite: MATH 113 or MATH 175 or MATH 132, or
instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 213B. Introduction to Riemannian Geometry
Riemannian metric and Levi-Civita connection. Geodesics,
complete and Hopf-Rinow theorem. Curvature. First
and second variations of arc-length. Spaces of constant
curvature. Additional topics selected by the instructor
such as theorems of Myers, Hadamard, Synge, and
Gauss-Bonnet.
Prerequisite: MATH 213A or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 215A. Higher Algebra I
Topics from groups, rings, integral domains, modules,
fields, vector spaces.
Prerequisite: MATH 128B or instructor consent.
Normal Grade Rules
3 units

MATH 215B. Higher Algebra II
Continuation of Math 215A with additional advanced
topics in algebra selected by instructor.
Prerequisite: MATH 221A or instructor consent.
Normal Grade Rules
3 units

MATH 226. Theory of Numbers
Advanced topics in number theory selected by the
instructor. Emphasis may be in algebraic number theory
(e.g. Diophantine equations), analytic number theory
(e.g. the prime number theorem), and/or computational
number theory (e.g. cryptography).
Prerequisite: MATH 126 and MATH 128A or instructor
consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 229. Advanced Matrix Theory
Eigenvalues, unitary equivalence and Schur’s theorem.
Normal, Hermitian and symmetric real matrices. Positive
definite matrices, polar and singular value factorizations,
and selected topics at the discretion of the instructor.
Prerequisite: MATH 129B or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 231A. Real Analysis
Sigma algebras, construction of measures, differentiation,
product measures, integration theory, the spaces L1 and
L2.
Prerequisite: MATH 131B or instructor consent.
Normal Grade Rules
3 units

MATH 231B. Functional Analysis
Function spaces and their duals, operators on function
spaces, applications to analysis (classical and functional)
and topics selected at the discretion of the instructor.
Prerequisite: MATH 231A or instructor consent.
Normal Grade Rules
3 units

MATH 233A. Applied Mathematics I
Derivation of the partial differential equations of classical
mathematical physics. Existence and uniqueness of
solutions of first order ordinary and partial differential
equations. The classical theory of initial and boundary
value problems for hyperbolic, parabolic and elliptic
sections and transforms. Nonlinear partial
differential equations.
Prerequisite: MATH 133B or instructor consent.
Normal Grade Rules
3 units

MATH 233B. Applied Mathematics II
Continuation of Math 233A. Selected topics such as
Green’s functions, eigenvalue problems, integral
equations, perturbation theory or variational methods.
Prerequisite: MATH 138 and MATH 233A or instructor
consent.
Normal Grade Rules
3 units

MATH 234. Advanced Dynamical Systems
Continuous and discrete dynamical systems with
applications. Topics include stability of equilibria and
closed orbits, structural stability, applications in classical
mechanics, biology and engineering, including control
systems.
Prerequisite: MATH 134 or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 235. Wavelets and their Applications
Wavelets with particular emphasis on their use in the
representation of digital signals and image analysis.
Theory of filters, filter banks and wavelets with
applications selected from image and video compression,
speech, audio and ECG compression, and communication
applications.
Prerequisite: MATH 129A and MATH 133A, or instructor
consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 238. Advanced Complex Variables
A course specializing in one or more of the advanced
branches of the theory of complex functions.
Prerequisite: MATH 138 or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 243A. Advanced Numerical Analysis
Finite difference methods applied to parabolic, elliptic
and hyperbolic equations including numerical methods
for solving the discretized problem, convergence, stability,
error control, and applications.
Prerequisite: MATH 143C or MATH 143M or instructor
consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 243B. Advanced Topics in Numerical Analysis
Advanced topics in numerical methods.
Prerequisite: MATH 143C or MATH 143M, and instructor
consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 258. Categorical Data Analysis
Analysis of categorical multivariate data, including
analysis of multi-way contingency tables, logistic and
loglinear regression, goodness of fit statistics, measures
of association, model selection, and inference.
Prerequisites: Math 161B or Math 261A. Math 261A may
be taken concurrently.
Normal Grade Rules
3 units
MATH 259. Sampling Design and Analysis
Prerequisites: Math 161B or Math 261A. Math 261A may be taken concurrently.
Normal Grade Rules
3 units

MATH 261A. Regression Theory and Methods
Simple linear regression, multiple regression, indicator variables, influence diagnostics, transformations, assumption analysis, generalized linear models, nonlinear regression, CART, hypothesis testing, confidence and prediction intervals, variable selection and model building.
Prerequisites: MATH 129A and either MATH 161A or MATH 164.
Normal Grade Rules
3 units

MATH 261B. Design and Analysis of Experiments
Principles, construction and analysis of experimental designs. ANOVA; randomized blocks, Latin squares, factorial, nested and other designs; fixed and random effects, multiple comparisons, repeated measures. Expected mean squares. Diagnostics and model comparison.
Prerequisite: MATH 261A.
Normal Grade Rules
3 units

MATH 265. Time Series Theory and Methods
Analysis of correlated data in time, trends, seasonal patterns, periodicity, autocorrelation, spectral/frequency analysis, filtering, ARIMA models, state-space models, forecasting. Applications from various fields including economics, signal processing, finance, atmospheric science.
Prerequisites: MATH 129A and either MATH 161A or MATH 164.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 266. Survival Analysis
Statistical methods for analysis of time-to-event censored data. Survival distributions and hazard rates; Kaplan-Meier estimator; proportional hazards; partial likelihood; diagnostics. Applications from clinical trials, toxicology and tumorigenicity studies, epidemiological studies, and engineering reliability.
Prerequisite: MATH 161A or MATH 164.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 267. Computational Statistics
Use of statistical software in programming statistical applications. Data extraction and processing. Use and linking of a variety of programming languages and environments. Random number generation, Monte Carlo and Bayesian methods, randomization tests, simulation, exploratory data analysis.
Prerequisites: MATH 129A, MATH 161B or MATH 261A; a computer programming course (e.g., MATH 109, MATH 167, CS 046A, CS 049C, or CS 049J).
Normal Grade Rules
3 units

MATH 269. Statistical Consulting
Theoretical and practical aspects of statistical consulting. Development through coursework, group discussion, role-playing and real consulting activities, of tools necessary to conduct effective consulting sessions, present oral arguments and written reports, and work collaboratively to solve problems.
Prerequisite: By permission of instructor.
Note: This course is normally taken near the end of a student’s course of study.
Normal Grade Rules
3 units

MATH 271A. Mathematical Logic
Formal systems; introductory model theory (Gödel’s completeness theorem, compactness, Lowenheim-Skolem theorem, etc.); Gödel’s incompleteness theorems.
Prerequisite: MATH 171 or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 271B. Advanced Mathematical Logic
A course specializing in one or more of the branches of mathematical logic such as set theory, model theory, recursion theory, proof theory.
Prerequisite: MATH 271A or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 275. Topology
A course specializing in one or more topics from advanced topology such as homotopy and the fundamental group, homology groups of spaces, continuum theory, function spaces, metrization, dimension theory, manifolds, topological groups.
Prerequisite: MATH 175 or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 279A. Graph Theory
Advanced course in graph theory covering graphs, digraphs, trees, networks, connectedness, eulerian circuits, hamiltonian cycles, graph embeddings, matchings, factorizations, graph colorings and Ramsey theory.
Prerequisite: MATH 179, or both MATH 142 and an upper division algebra class, or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 285. Advanced Topics in Mathematics
Selected topics in Mathematics. Topics vary each semester. A maximum of 12 units may be repeated.
Prerequisite: Suitable upper division background in mathematics set by instructor.
Repeatable for credit
Normal Grade Rules
3 units

MATH 290R. Thesis/Project Supervision
Continued work on thesis or project.
Pre-Requisite: Outstanding RP grade in a preceding semester in a project or thesis class.
Mandatory CR/NC/RP
1 unit

MATH 297. Professional Development in College Teaching
Required for all teaching assistants in the master’s program. Practical and technical aspects of college teaching; current pedagogical techniques and educational issues.
Corequisite: TA position in the Mathematics and Statistics Department
Credit / No Credit
1 unit

MATH 298. Special Study
Advanced individual research and projects.
Prerequisite: Department chair consent.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

MATH 298L. Statistics Internship
Professional work experience under the supervision of a statistician.
Prerequisite: Graduate standing and MS Statistics Project Coordinator consent
Mandatory CR/NC/RP
1-3 units
MATH 299. Master’s Thesis
Prerequisite: Admission to candidacy for the MA or MS degree.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

MATHEMATICS EDUCATION

UPPER DIVISION

MTED 166. Pre-Professional Experience
Participation in a tutoring program for lower division mathematics students or serving as teacher assistant. Instruction appropriate to tutoring. A maximum of 6 units may be repeated.
Repeatable for credit
Credit / No Credit
1-3 units

MTED 184I. Student Teaching for Mathematics Individualized Interns
Supervised student teaching in mathematics class(es) in the public school where the student is employed as an Individualized Intern. A total of 12 units may be repeated.
Prerequisite: Admission to Single Subject Credential Program; mathematics advisor and Single Subject Coordinator consent.
Repeatable for credit
Credit / No Credit
2-4 units

MTED 184Y. Student Teaching II - Classroom Teaching
Minimum 80-120 class periods of classroom teaching, laboratory or field teaching in appropriate single subjects, grades K-12 and related teaching activities. Attendance at a weekly seminar is required.
Prerequisite: MTED 394 and joint approval of Mathematics and Education departments.
Repeatable for credit
Credit / No Credit
4-6 units

MTED 184Z. Student Teaching III - Classroom Teaching
Same as MTED 184Y, including the seminar, but in a different course. May be in a different school.
Prerequisite: MTED 394 and joint approval of the Mathematics and Teacher Education Departments.
Repeatable for credit
Credit / No Credit
4-6 units

GRADUATE

MTED 209. Research in Mathematics Education
Theories of learning mathematics; recent trends in mathematics curriculum and pedagogy; types of research in mathematics education; methods of conducting research in mathematics education; developing research questions; conducting library research; and synthesis of research in various areas of mathematics education.
Prerequisite: MATH 201A or MATH 201B or instructor consent.
Normal Grade Rules
3 units

MTED 394. Secondary School Mathematics
The place and function of mathematics in secondary education, improvement and evaluation of instruction. Teaching the subject matter of secondary mathematics.
Prerequisite: MATH 201A or MATH 201B and, either passing score on the CSET exams or be within 3 courses of completing the subject matter preparation program, or instructor consent.
Normal Grade Rules
3 units
MECHANICAL ENGINEERING

LOWER DIVISION

ME 015. Empower MAE Students
Empower MAE students to stay on course towards achieving career goals as engineers. Provide tools and opportunities to guide students towards career development, community and service involvement, technology and entrepreneurship. Expose these students to career opportunities through technical seminars, outreach technical and community related projects, and tours.
Normal Grade Rules
3 units

ME 019. Graphics for Engineers
Introduction to graphical communication tools. Design and graphical solutions to two and three-dimensional design problems. Development of visualization and technical sketching skills in conjunction with pictorial projections. Individual design project. Focus on computer-aided drawing and design.
Normal Grade Rules
1 unit

ME 020. Design and Graphics
Introduction to design and graphical solutions to three-dimensional design problems involving points, lines, surfaces and solids. Development of visualization and technical sketching skills in conjunction with orthographic and pictorial projections. Focus on computer-aided design and graphical analytical methods.
Corequisite: Engineering majors: ENGR 10; Technology majors: none
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

ME 030. Computer Applications
Using a computer to solve engineering problems through programming and the use of engineering application procedures. Use of procedural and informational problem solving methods and practices applied to software design, application, programming and testing.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

ME 040. Product Design & Manufacturing
See TECH 040.
Repeatable for credit
Normal Grade Rules
3 units

ME 041. Machine Shop Safety
See TECH 041.
Repeatable for credit
Normal Grade Rules
1 unit

ME 042. Manufacturing and Machine Shop Projects and Practices
See TECH 042.
Repeatable for credit
Credit / No Credit
1 unit

UPPER DIVISION

ME 101. Dynamics
Vector mechanics. Two and three dimensional motion of particles and rigid bodies. Force, energy and momentum principles.
Prerequisite: CE 095 or 099 and MATH 032 (with a grade of "C"- or better in each).
Normal Grade Rules
3 units

ME 106. Fundamentals of Mechatronics Engineering
Foundational concepts in mechatronics including analog and digital electronics, sensors, actuators, microprocessors and microprocessor interfacing to electromechanical systems. Hands-on laboratory experiments with components and measurement equipment used in the design of mechatronic products.
Prerequisites: EE 098 and ME 030 (with a grade of "C"- or better in each). For IT majors: TECH 060, MATH 071, CMP E 046 (with a grade of "C"- or better in each).
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ME 109. Heat Transfer in Electronics
See CHE 109.
Normal Grade Rules
3 units

ME 110. Manufacturing Processes
Fundamentals of manufacturing processes such as machining, forming, casting, molding and welding. Surface treatments, powder-based processes, and microfabrication methods. Materials behavior and selection for manufacturing. Geometric dimensions and tolerancing.
Prerequisite: ME 020 with a grade of "C"- or better.
Pre/Corequisites: MATE 025
Normal Grade Rules
3 units

ME 111. Fluid Mechanics
Fluid properties, statics, dynamics of fluids; continuity, linear and angular momentum and energy principles. Viscous and non-viscous flow. Pumps, turbines, flow in pipes and around submerged obstacles. Dimensional analysis and dynamic similarity.
Prerequisite: CE 095 or 099 and MATH 032 (with a grade of "C"- or better in each).
Normal Grade Rules
3 units

ME 113. Thermodynamics
Prerequisite: PHYS 070 or PHYS 052, and MATH 032 (with a grade of "C"- or better in each).
Normal Grade Rules
4 units

ME 114. Heat Transfer
Conduction, convection and radiation heat transfer with applications. Analytical, experimental, and computational methods of analyzing heat transfer behavior.
Prerequisites: MATH 133A or MATH 123, and ME 113 (with a grade of "C"- or better in each).
Normal Grade Rules
3 units

ME 115. Thermal Engineering Laboratory
Thermodynamics and heat transfer experiments. Temperature, pressure, and flow rate measurements. Technical reports and presentations.
Pre/Corequisite: ME 114.
Misc/Lab: 3 hour Lab
Normal Grade Rules
1 unit

ME 120. Experimental Methods
Theory and practice of experimental methods and sensors for mechanical measurements; statistical and uncertainty analysis; computer-hosted data acquisition, processing and analysis; formal report writing and presentations.
Prerequisite: CE 112, ENGR 100W, ME 130 (with a grade of "C"- or better in each). AE majors may substitute AE 162 and AE 168 (with a grade of "C"- or better in each) for ME 130.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

ME 130. Applied Engineering Analysis
Analytic models for physical systems in mechanical engineering. Practical interpretations of analytical solutions. Introduction to linear algebra and statistics.
Prerequisite: MATH 133A, ME 101 and ME 113 (with a grade of "C"- or better in each).
Pre/Corequisite: ME 111 or AE 160.
Normal Grade Rules
3 units
ME 135. Introduction to Composite Materials
See MATE 135.
Normal Grade Rules
3 units

ME 136. Design for Manufacturability
Principles and practice of design and manufacturability, design parameters, manufacturing techniques; reliability; design for quality, assembly and environmental considerations; case study projects and laboratory activities.
Prerequisite: ME 110 and either ME 154 or AE 114, all with C- or better.
Normal Grade Rules
3 units

ME 140. Green & Sustainable Product Design
See TECH 140.
Repeatability for credit
Normal Grade Rules
3 units

ME 141. Product Design III
See TECH 141.
Normal Grade Rules
3 units

ME 145. Electronic Packaging and Design
Introduction to electronic packaging including thermal management and application of integrated cooling and thermal MEMS; shock and vibrations; materials; EMI/RFI/ESD; reliability and standard test.
Prerequisite: ME 114 and ME 130 (with a grade of 'C-' or better in each).
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ME 146. Thermal Management of Electronic Systems
Fundamentals of heat transfer in electronic systems. Application of theory and engineering practice to the design and analysis of systems for the thermal management of electronic systems.
Prerequisite: ME 114 or ME 109 or CHE 109 (with a grade of 'C-' or better).
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ME 147. Dynamic Systems Vibration and Control
Prerequisite: ME 130 (with a grade of 'C-' or better).
Normal Grade Rules
3 units

ME 149. Engineering Acoustics
Generation, transmission and absorption of sound. Noise measurement. Applications to architectural design, control and reduction of noise.
Prerequisite: ME 130.
Normal Grade Rules
3 units

ME 154. Mechanical Engineering Design
Prerequisite: CE 112, ME 20 and ME 101 (with a grade of 'C-' or better in each).
Corequisites: TECH/ME 041
Normal Grade Rules
4 units

ME 157. Mechanical System Design
Introduction to the mechanical design process. Design and selection of specific machine components including springs, bearings, brakes, clutches and gears. Introduction to fatigue design using fracture mechanics. Application of plastics, composite materials and finite element methods in design. Group design project. Computer applications in the design process and in design optimization.
Prerequisite: ME 154 (with a grade of 'C-' or better).
Pre/Corequisites: ME 110, ME 147.
Normal Grade Rules
3 units

ME 160. Introduction to Finite Element Method
Matrix algebra, interpolation functions. Deformation and stress analysis, using truss, beam, plate and axisymmetric elements.
Prerequisite: CE 112 and either ME 130 or MATH 129A, with a grade of 'C-' or better in each.
Normal Grade Rules
3 units

ME 165. Computer-Aided Design in Mechanical Engineering
Theory and application of CAD 2-dimensional and 3-dimensional modeling, commercial CAD software. Application to finite element analysis.
Prerequisite: ME 020, CE 112, and either ME 130 or MATH 129A, with a grade of 'C-' or better in each.
Normal Grade Rules
3 units

ME 167. Introduction to Engineering Biomechanics
Introduction to the mechanics of the muscular-skeletal system, kinematics and dynamics of motion, mechanical behavior of physiological systems. Application of engineering fundamentals to the human body structure and functional relationship
Prerequisites: ME 130, ME 154, Instructor Consent.
Normal Grade Rules
3 units

ME 168. Microfluidics Fabrication and Design
Hands-on design, fabrication, and testing of microfluidic devices. Processes including photolithography, soft lithography, and plasma bonding. Design problems for microfluidic devices. Introduction to microfluidics simulation.
Prerequisite: MATE 025 or MATE 153 or MATE/EE 129.
ABC/No Credit
1 unit

ME 169. Microelectromechanical Systems Fabrication and Design
Hands-on design, fabrication, and testing of micro electro-mechanical systems (MEMS). Processes including photolithography, etching, and metal deposition applied to MEMS. Design problems for MEMS transducer components. Introduction to MEMS simulation.
Prerequisite: MATE 25 or MATE 153 or MATE/EE 129.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
1 unit

ME 170. Solar Energy Engineering
Fundamentals of solar energy engineering, basic principles, design and operation of solar systems. Solar energy generation, storage and system efficiency.
Prerequisites: EE 98 and ME 109, ME 114 or CHE 190 (with a grade of 'C-' or better in each).
Normal Grade Rules
3 units

ME 172. Alternative and Renewable Energy Resources
An introduction to alternative energy sources such as solar, wind, nuclear, geothermal, hydroelectric, biomass and fuel cell. Stationary power generation and storage.
Prerequisite: ME 114 or CHE/ME 109 or CHE 190.
Normal Grade Rules
3 units

ME 180. Individual Studies
Individual work on special topics. By arrangement.
Prerequisite: Upper division standing and instructor consent.
Repeatability for credit
Credit / No Credit
1-3 units

ME 182. Thermal Systems Design
Integration of thermodynamics, fluid mechanics, heat transfer and economics in the design of energy conversion and transfer systems, e.g., power generation, electronics and human thermal control.
Prerequisite: ME 114, and either ME 111 or AE 160 (with a grade of 'C-' or better in each).
Normal Grade Rules
3 units
ME 183. HVAC Systems Design
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ME 184. High Vacuum Systems Engineering with Applications
Normal Grade Rules
3 units

ME 186. Automotive Engineering
Overview of automotive engineering including aerodynamics, structures, suspension, steering, brakes and drive-train. Application of engineering principles in automotive design and analysis. Use of vehicle dynamic simulation for performance analysis. Prerequisite: ME 114, ME 130, ME 154 with a grade of 'C-' or better in each.
Normal Grade Rules
3 units

ME 187. Automatic Control Systems Design
Analysis of dynamic systems in time and frequency domain. Design of automatic control systems. Analog and digital control systems design. Computer aided control system design and performance evaluation. Prerequisite: ME 147 with a grade of 'C-' or better.
Normal Grade Rules
3 units

ME 188. Introduction to Hard Disk Drive Technology
Overview of the technologies involved in computer hard disk drives. Topics such as magnetic recording principles, tribology, shock and vibration, electromechanical devices and control, thermal, and reliability will be presented. Prerequisite: ME 106, ME 147, ME 154.
Normal Grade Rules
3 units

ME 189. Design and Manufacture of Microsystems
Overview of design and manufacture of microdevices and systems including MEMS. Engineering physics and mechanics; scaling laws for miniaturization, microfabrication technique, material selection, microsystems design methodologies, microsystems packaging design. Prerequisite: ME 106, ME 154.
Normal Grade Rules
3 units

ME 190. Mechatronics System Design
Process modeling from test data. Computer-aided dynamic system control analysis and design. Application and integration of micro-controller for digital process and servo control. Development of smart and intelligent products with micro-controller. Prerequisite: ME 106 (with a grade of 'C-' or better). Corequisite: ME 147.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ME 192. Robotics and Manufacturing Systems
Scientific and engineering principles of robotics in the area of mechanical manipulation, dynamics, sensing, actuation, control, computer vision and manufacturing automation application. Motor, motion control, digital control devices application and integration. Prerequisite: ME 106 and ME 130 (with a grade of 'C-' or better in each).
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ME 195A. Senior Design Project I
First half of a one-year team project carried out under faculty supervision. Project will proceed from problem definition to analysis, design and validation, experimentation including possible construction and testing. Prerequisite: ME 114, ME 154 and ENGR 100W (with a grade of 'C-' or better in each).
Pre/Corequisite: ME 120, good standing in the program with an approved major form. Note: ME 195A and B sequence must be completed in the same academic year.
Misc/Lab: Lab 9 hours.
Normal Grade Rules
3 units

ME 195B. Senior Design Project II
Continuation of ME 195A. Culmination of project requiring a formal report consisting of documentation of project results and oral presentation. Prerequisite: ME 195A with a 'C-' or better. Note: ME 195A and B sequence must be completed in the same academic year.
Misc/Lab: Lab 9 hours.
Normal Grade Rules
3 units

ME 195C. Senior Design Project III
Third half of a one-year team project carried out under faculty supervision. Project will proceed from problem definition to analysis, design and validation, experimentation including possible construction and testing. Prerequisite: ME 114 and ME 130 (with a grade of 'C-' or better in each).
Misc/Lab: Lab 9 hours.
Normal Grade Rules
3 units

ME 196. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

ME 197. Technology and Civilization
See TECH 198.
Normal Grade Rules
GE: V
3 units

ME 199. Special Topics in Mechanical Engineering
Special Topics in Mechanical Engineering. Content varies from semester to semester. A total of six units may be repeated. Prerequisite: Instructor Consent. Repeatable for credit
Normal Grade Rules
3 units

GRADUATE

ME 200. Thermal/Fluids Engineering
Application of fundamental thermal-fluids relationships to the analysis, selection, and modeling of thermal-fluid equipment such as pumps, compressors, fans, and heat exchangers. Computer simulations of thermal-fluid systems. System optimization using economic and energy-based constraints. Prerequisite: ME 111 and ME 114 or equivalent.
Normal Grade Rules
3 units

ME 210. Advanced Thermodynamics
Application of the first and second laws of thermodynamics to the analysis of engineering systems. Equations of state and thermodynamic property relations. Chemical equilibrium and combustion. Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 211. Advanced Heat Transfer
Conduction, convection and radiation heat transfer, including conjugate problems. Numerical methods and use of the computer to solve heat transfer problems. Prerequisite: ME 114 or equivalent.
Normal Grade Rules
3 units

ME 221. Viscous Flow Analysis and Computation
The Navier-Stokes equations for laminar flow; exact solutions, lubrication theory and boundary layer forms with computer-based solution techniques. Reynolds-averaging and turbulent flow; solution of the Reynolds-averaged full and boundary layer equations using computers. Prerequisite: ME 200 and ME 270.
Normal Grade Rules
3 units

ME 223. Gas Dynamics
Integral and differential mass, momentum, energy equations for compressible flow. One-dimensional flow with area change, heat addition, friction. Normal and oblique shocks, expansion waves and unsteady wave motion. Linearized flow. Numerical techniques. Real gas effects. Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units
ME 230. Advanced Mechanical Engineering Analysis
Designed to supplement and enrich students with advanced mathematical methods in treating problems selected from various areas of mechanical engineering. Topics discussed will include Fourier series, special functions, solutions to partial differential equations and numerical methods.
Prerequisite: BSME or BSAE or Instructor Consent.
Normal Grade Rules
3 units

ME 240. Rigid Body Dynamics
Introduction to Euler’s method, Lagrange’s equations of motion and Hamilton’s principle. Three-dimensional dynamics in vector and tensor notation. Multi-body dynamics. Application to engineering problems including numerical solutions.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 243. Vibration of Mechanical Systems
Prerequisite: BSME degree or instructor consent.
Normal Grade Rules
3 units

ME 244. Modal Analysis Theory and Applications
Structural dynamic analysis, test data acquisition, transfer function measurement and the estimation of modal parameters. Digital signal processing, Fourier transform, random vibrations, sampling, measurement of power and cross spectrum, the frequency response function and Coherence function.
Prerequisite: Graduate standing in ME, AE or Instructor Consent.
Normal Grade Rules
3 units

ME 250. Precision Machine Design
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 260. Applied Stress Analysis
Introduction to stress analysis techniques, including advanced strength of materials, energy methods and theory of elasticity. Elastic-plastic stresses, creep, fatigue, fracture mechanics, failure analysis.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 265. Computer-Aided Mechanical Engineering Design
Integrated approach to CAD including: overview of CAD, numerical techniques for CAD, computer graphics and design, principles and management of design database systems, finite element analysis and CAD, design optimization, computer-aided linkage design and integrated CAD systems.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 267. Engineering Biomechanics
Biomechanics and biodynamics modeling of physiological components, application of engineering fundamentals to the human body structure and function. Bioelastica and biofluids, bioengineering, and design consideration for biomedical and orthopedic devices.
Prerequisite: Graduate standing or Instructor Consent.
Normal Grade Rules
3 units

ME 270. Numerical Methods in Engineering
Prerequisite: BSME or BSAE or Instructor Consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ME 273. Finite Element Methods in Engineering
Introduction into various finite element methods for developing stiffness equation. Truss, beam, 2-D, 3-D and axysymmetric elements. Applications and case studies.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 274. Advanced Finite Element Methods in Engineering
Advanced concepts in finite element analysis, assembly modeling, contact and welded joints, anisotropy and composites, structural dynamics, nonlinear modeling, linear and nonlinear multiphysics coupled heat transfer and fluid flow, thermal stress analysis, and electromechanical coupling.
Prerequisites: ME 160 or ME 273, or instructor consent.
Normal Grade Rules
3 units

ME 275. Computer-Aided Mechanical Engineering Design
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 282. Advanced Control System Design
Establishment of design criteria. Digital control system design based on conventional and modern approaches. Intelligent control system design. Digital control system hardware and software. Case studies: Microprocessor implementation of control systems.
Prerequisite: ME 280 or equivalent.
Normal Grade Rules
3 units

ME 283. Automatic Control of Manufacturing Processes
Develops general concepts for control of manufacturing processes. The concepts of and tools for process modeling, process optimization and process control. Emphasizes the integrated approach combining statistical process control (SPC) and automatic process control.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 284. Sensor Technology and Principles
Sensors and principles, including mechanical and magnetic sensors, optical sensors, chemical sensors, and bio sensors; Sensor circuitry, signal characterization and processing; Sensor design, fabrication and applications.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 285. Mechatronic Systems Engineering
Introduction of mechatronic systems. Combine hardware, software and system integration. Subjects include basic circuits, logic gates, OpAmps, encoder/decoder, DC and stepper motor, A/D and D/A, C-language, interfacing and control. Hands-on lab practices.
Prerequisite: BSME or Instructor Consent.
Misc/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

ME 290R. MSME Thesis/Project Continuing Supervision
Continued work on thesis or project beyond minimum required units, for cases in which final deliverables are still in progress.
Pre-requisite: RP grade in a preceding thesis or project semester.
Mandatory CR/NC/RP
1 unit
ME 295A. Mechanical Engineering Project I
Advanced individual work in mechanical engineering, including but not limited to research, design, development, and simulation studies.
Prerequisite: Admission to Candidacy for Master’s Degree in Mechanical Engineering; written proposal approved by instructor and graduate advisor.
   Mandatory CR/NC/RP
   3 units

ME 295B. Mechanical Engineering Project II
Continuation of ME 295A. Students complete the in-depth project, write a detailed engineering report and make a comprehensive presentation.
Prerequisite: ME 295A.
   Mandatory CR/NC/RP
   3 units

ME 297. Special Topics in Mechanical Engineering
Special topics in Mechanical Engineering. Content varies from semester to semester.
Prerequisite: Instructor Consent.
Repeatable for credit
Normal Grade Rules
   3 units

ME 298. Special Project in Mechanical Engineering
Advanced individual work in mechanical engineering for Plan B.
Prerequisite: Consent of project advisor.
Repeatable for credit
Credit / No Credit
   1-3 units

ME 299. Master’s Thesis
Advanced individual work in mechanical engineering for Plan A.
Prerequisite: Consent of thesis advisors.
Repeatable for credit
Mandatory CR/NC/RP
   3 units
Meteorology and Climate Science Department Courses

METEOREOLOGY

LOWER DIVISION

METR 001B. Introduction to Global Studies
See GLST 001B.
Normal Grade Rules
3 units

METR 010. Weather and Climate
A descriptive introduction to the atmosphere, with emphasis on weather phenomena, climate, climate change, forecasting and air pollution.
Normal Grade Rules
GE B1
3 units

METR 012. Global Warming: Science and Solutions
Examination of past, present and future climates. Examination of global warming and mitigation strategies.
Normal Grade Rules
GE B1
3 units

METR 040. Weather Seminar
Meteorology program planning; careers in Meteorology; a survey of major problems in the atmosphere; faculty research programs; department, college and university resources; survival in the university; strategies for success.
Repeatable for credit
Credit / No Credit
1 unit

METR 050. Scientific Computing I
Computer systems and programming, emphasizing solution of problems in atmospheric sciences. Includes computer systems, flow diagrams, UNIX and FORTRAN programming, mass data handling and formatting.
Prerequisite: MATH 030
Corequisite: MATH 031, METR 060, PHYS 050 (or CHEM 001A and METR 060 for Climate Science Concentration).
Misc/Lab: Lecture 1 hour/Lab 3 hours.
Normal Grade Rules
2 units

METR 051. Scientific Computing II
Computer systems and C programming, and UNIX, emphasizing solution of problems in atmospheric sciences. Includes computer systems, flow diagrams, advanced programming, mass data handling and formatting.
Prerequisite: METR 050 (or equivalent).
Corequisite: METR 061 or METR 071.
Misc/Lab: Lecture 1 hours/lab 3 hours.
Normal Grade Rules
2 units

METR 060. Meteorology I
A quantitative introduction to Atmospheric Science for Meteorology majors.
Prerequisite: MATH 030 or MATH 030P (and PHYS 002B for Climate Science Concentration).
Corequisite: MATH 031, PHYS 050, METR 050 (or CHEM 001A and METR 050 for Climate Science Concentration).
Lecture 2 hours/Lab 3 hours
Normal Grade Rules
3 units

METR 061. Meteorology II
A continuation of METR 060, introducing Meteorology majors to quantitative aspects of the science.
Prerequisite: METR 060, CHEM 001A.
Corequisite: METR 051, MATH 032, PHYS 052, METR 163.
Normal Grade Rules
2 units

METR 071. Introduction to Climate Science
Continuation of METR 060, but with an emphasis on Climate Science.
Prerequisite: METR 060.
Corequisite: METR 051, BIOL 001A.
Normal Grade Rules
2 units

UPPER DIVISION

METR 100W. Writing Workshop: Meteorological Reports
Introduction to scientific writing, research methods and preparation of technical reports in the meteorology field.
Prerequisite: ENGL 010B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Corequisite: METR 121A or METR 135, or instructor consent.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement.
Normal Grade Rules
GE Z
3 units

METR 110. Aviation Meteorology
Introduction to meteorology with emphasis on aviation applications.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

METR 112. Global Climate Changes
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE R
3 units

METR 113. Atmospheric Pollution
Descriptive discussion of the sources, effects and fates of pollutants in the atmosphere. Interaction of pollutants and weather systems, including acid precipitation, ozone destruction; air pollution policy and regulations.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE R
3 units

METR 120A. Electronics, Data Acquisition & Analysis
See PHYS 120A.
Normal Grade Rules
3 units

METR 121A. Dynamic Meteorology
Theoretical examination of the motion and behavior of the atmosphere. Governing equations and applications; vorticity, waves; numerical prediction, baroclinic instability.
Prerequisite: METR 051, METR 061
Corequisite: MATH 133A
Notes: Year course.
Normal Grade Rules
4 units

METR 121B. Dynamic Meteorology
Theoretical examination of the motion and behavior of the atmosphere. Governing equations and applications; vorticity, waves; numerical prediction, baroclinic instability.
Prerequisite: METR 121A.
Notes: Year course.
Normal Grade Rules
3 units

METR 123. Advanced Climatology
The physical basis of climate with emphasis on the theory of global warming.
Prerequisite: METR 061 or METR 071.
Normal Grade Rules
3 units
**METR 125. Physical Meteorology**  
Cloud and precipitation physics, atmospheric electricity, optics and acoustics.  
Prerequisite: METR 124 or instructor consent.  
Normal Grade Rules  
3 units

**METR 130. Boundary Layer Meteorology**  
Structure of the atmospheric planetary boundary layer with applications to air pollution, agriculture and cities; meso-circulations such as sea breeze.  
Prerequisite: METR 121B or instructor consent.  
Normal Grade Rules  
3 units

**METR 131. Air Pollution Meteorology**  
Quantitative description of contaminants in the atmosphere: sources, dispersion and sinks; their effects on atmospheric energy balance and condensation.  
Prerequisite: METR 121B or instructor consent.  
Normal Grade Rules  
3 units

**METR 135. The Global Carbon Cycle**  
A quantitative examination of the global carbon cycle through the solid earth, atmosphere, oceans, and biosphere.  
Prerequisite: METR 071.  
Normal Grade Rules  
3 units

**METR 136. Empirical Techniques in Meteorology**  
Applications of statistical methods to analysis of meteorological and climatological data; use of the internet to obtain climate data; objective forecasting methods; elementary decision theory; data analysis using contemporary computer software.  
Prerequisite: METR 061 or METR 071 (for Climate Science Concentration), or STAT 095 and METR 012 (or METR 112), and upper division standing (for ENVS majors).  
Misc/Lab: Lecture 2 hours/lab 3 hours.  
Normal Grade Rules  
3 units

**METR 143C. Numerical Analysis and Scientific Computing**  
See MATH 143C.  
Normal Grade Rules  
3 units

**METR 150. Computers in Meteorology III**  
Computer applications to advanced problems in atmospheric science, including specialized computer systems, mass data handling, weather data communications.  
Prerequisite: MATH 043, METR 051 or instructor consent.  
Misc/Lab: Lecture 2 hours/lab 3 hours.  
Notes: Offered only occasionally.  
Normal Grade Rules  
3 units

**METR 155. Remote Sensing**  
This course will cover the background of remote sensing, current status of sensors and platforms, and recent satellite-based results on climate change.  
Prerequisite: METR 124.  
Normal Grade Rules  
3 units

**METR 160. Tropical Meteorology**  
Local and diurnal variations in tropical weather; mean and synoptic fields of meteorological parameters in the tropics; general circulation; hurricanes; monsoons.  
Prerequisite: METR 121B.  
Notes: Offered on an irregular basis only.  
Normal Grade Rules  
3 units

**METR 163. Meteorological Instrumentation**  
Measurement techniques and instruments used in atmospheric and climate sciences, using lecture, laboratory and field work. Students will learn techniques of instrument calibration, deployment, and data acquisition.  
Prerequisite: METR 060 (or PHYS 002B; CHEM 001A; STAT 095; AND METR 012 or METR 112 for ENVS majors).  
Corequisite: METR 061 (METR majors)  
Misc/Lab: Lecture 2 hours/lab 3 hours.  
Normal Grade Rules  
3 units

**METR 164. Introduction to Fire Weather**  
Quantitative description of weather conditions that lead to fire danger around the world and atmospheric conditions leading to extreme fire behavior.  
Prerequisite: METR 061.  
Normal Grade Rules  
3 units

**METR 165. Mountain Meteorology**  
Examination of atmospheric processes in mountain environments including micro and mesoscale wind systems, precipitation processes and convection, snow and avalanche mechanics.  
Prerequisite: METR 061.  
Corequisite: METR 121A.  
Normal Grade Rules  
3 units

**METR 166. Field Studies in Meteorology**  
Intensive summer observing campaign in the field.  
Prerequisite: METR 100W, METR 121B, METR 124, METR 170B.  
Lecture 1 hour / Activity 4 hours  
Normal Grade Rules  
3 units

**METR 168A. Global Climate Change I**  
See COMM 168B.  
Normal Grade Rules  
6 units

**METR 168B. Global Climate Change II**  
See COMM 168B.  
Normal Grade Rules  
GE: R+S+V  
3 units

**METR 170A. Weather Briefing**  
Weather briefing associated with Meteorology 121A,B.  
Corequisite: METR 121A.  
Misc/Lab: Lab 3 hours.  
Notes: Year course 1 unit each semester.  
Credit / No Credit  
1 unit

**METR 170B. Weather Briefing**  
Weather briefing associated with Meteorology 121A,B.  
Corequisite: METR 121B.  
Misc/Lab: Lab 3 hours.  
Credit / No Credit  
1 unit

**METR 171A. Synoptic Weather Analysis and Forecasting**  
Structure and behavior of atmospheric circulation systems, practical weather analysis and forecasting techniques. Acquisition, manipulation and display of real-time data sets, verbal presentations of weather analyses and forecasts.  
Prerequisite: METR 100W, METR 121B or instructor consent.  
Pre/Corequisite: METR 125 .  
Misc/Lab: Lecture 1 hour/lab 6 hours each semester.  
Notes: Year course.  
Normal Grade Rules  
3 units

**METR 171B. Synoptic Weather Analysis and Forecasting**  
Structure and behavior of atmospheric circulation systems, practical weather analysis and forecasting techniques. Acquisition, manipulation and display of real-time data sets, verbal presentations of weather analyses and forecasts.  
Prerequisite: METR 171A.  
Misc/Lab: Lecture 1 hour/lab 6 hours each semester.  
Normal Grade Rules  
3 units

**METR 172. Mesoscale Meteorology**  
Structure and behavior of mesoscale atmospheric circulations, practical weather forecasting techniques.  
Prerequisite: METR 171A.  
Normal Grade Rules  
3 units
METR 173. Global Climate Modeling
Senior level course focused on climate modeling using the CMIP 3 intercomparison (models used for the IPCC 2007) as the primary study area.
Prerequisites: METR 051, METR 071, METR 100W, METR 136.
Normal Grade Rules 3 units

METR 174. Climate Change Solutions
Senior level capstone course in which students will define and conduct a project which is both climate change related and of a practical nature.
Prerequisite(s): METR 173, METR 100W.
Normal Grade Rules 3 units

METR 179. Topics in Senior Thesis
Supervised research and the preparation of a senior thesis.
Prerequisite: METR 100W.
Pre/Corequisite: METR 171A (first semester) METR 171B (second semester).
Repeatability for credit Credit / No Credit 1-2 units

METR 180. Individual Studies
Independent work on topics by special arrangement. A maximum of four units may be repeated.
Prerequisite: Meteorology major or minor.
Repeatable for credit Credit / No Credit 1-4 units

METR 182. Tutor Assistant in Meteorology
Supervised instructional experience as a tutor assistant. A maximum of four units may be repeated.
Prerequisite: Upper division standing and instructor consent.
Repeatable for credit Credit / No Credit 1 unit

METR 185. Special Topics
Selected topics in meteorology. Topics vary and are announced each semester.
Prerequisite: METR 121B.
Repeatable for credit Normal Grade Rules 1-3 units

GRADUATE

METR 202. Research Methods in Meteorology
The nature of research in meteorology with particular reference to formulation of the problem, methods of attack and presentation of results. Proposal writing and selection of MS thesis topic.
Prerequisite: Instructor consent.
Notes: Offered on an irregular basis only.
Normal Grade Rules 3 units

METR 205A. Advanced Atmospheric Dynamics I
Dynamics of synoptic- and large-scale flows. Quasi-geostrophic theory and applications to mid-latitude storms; atmospheric waves; barotropic and baroclinic instabilities; energetics of atmospheric systems; wave-mean flow interactions; dynamics of the general circulation; tropical and stratospheric dynamics.
Prerequisite: METR 121B.
Normal Grade Rules 3 units

METR 205B. Advanced Atmospheric Dynamics II
Advanced topics in dynamic meteorology. Observations and theory of the structure and behavior of large-scale waves; atmospheric tides; dynamics of planetary atmospheres; dynamics of hurricanes; application of chaos theory to atmospheric dynamics.
Prerequisite: METR 205A or instructor consent.
Normal Grade Rules 3 units

METR 206. Advanced Synoptic Meteorology
Structure and theory of the observed features of atmospheric circulation regimes. Dynamical and thermodynamical interpretation of various scales of disturbances; application of numerical weather analysis and prediction methods; use of satellite data.
Prerequisite: METR 171B (or equivalent).
Notes: Offered on an irregular basis only.
Normal Grade Rules 3 units

METR 208. Turbulence
Properties of turbulence in the atmosphere; theories of boundary layer; turbulent flux of heat, momentum and mass in the atmosphere.
Prerequisite: METR 130 or satisfactory background in fluid mechanics.
Notes: Offered on an irregular basis only.
Normal Grade Rules 3 units

METR 209. Advanced Fire Behavior
Introduces students to advanced topics in the meteorology of extreme fire behavior, including fire-atmosphere interactions, microscale turbulence in fires, flame properties, combustion physics, fuel dynamics, and extreme fire behavior such as fire whirls.
Prerequisite: METR 124 or instructor consent.
Normal Grade Rules 3 units

METR 215. Advanced Physical Meteorology
Thermodynamics of moist air; nucleation processes; particulates in air; microphysics and cloud dynamics, sampling techniques.
Prerequisite: METR 125 (or equivalent).
Normal Grade Rules 3 units

METR 220. Biometeorology
Interrelationships between plants and animals and their physical environment; techniques of biometeorological measurements and instrumentation in both artificial and natural environments; methods of forecasting and controlling the biosphere.
Prerequisite: Instructor consent.
Notes: Offered on an irregular basis only.
Normal Grade Rules 3 units

METR 224. The Upper Atmosphere
Physical and chemical processes of the air above the troposphere; aeronomy, with emphasis on radiation and rocket and satellite measurements.
Prerequisite: METR 121B and METR 125 (or equivalent).
Notes: Offered on an irregular basis only.
Normal Grade Rules 3 units

METR 240. Numerical Modeling
Numerical analysis and prediction in meteorology. Numerical methods and their errors; finite-difference and spectral methods; atmospheric models.
Prerequisite: METR 050 (or equivalent); METR 205A or instructor consent.
Normal Grade Rules 3 units

METR 241. Parameterization in NWP
Studies of parameterization schemes for sub-gridscale physics in numerical models. Included are schemes for surface fluxes, soil-vegetation models, convection, clouds, and radiative transfer. Why these are needed, and how they are developed and implemented.
Prerequisite: METR 240
Normal Grade Rules 3 units
**METR 245. Mesoscale Modeling**
Formulation and solution techniques for numerical models of the polluted atmospheric boundary layer, including meso-circulations such as sea breezes.
Prerequisite: METR 130 and METR 240.
- Normal Grade Rules
  - 3 units

**METR 245L. Mesoscale Modeling Lab**
Experience porting, compiling, initializing and running mesoscale models, data analysis and visualization.
Prerequisite: METR 245.
- Normal Grade Rules
  - 1 unit

**METR 280. Recent Developments in Meteorology**
Intensive study of a particular topic in the atmospheric sciences with special emphasis on recent research results, such as instrumentation or modeling techniques. Topics vary and are announced each semester.
Prerequisite: Instructor consent.
- Repeatable for credit
- Normal Grade Rules
- 1-3 units

**METR 285. Colloquium**
Advanced studies in special fields, including original work by faculty, guest speakers and graduate students. One presentation required of each enrolled student and attendance required for all graduate students.
Prerequisite: Instructor consent.
- Repeatable for credit
- Mandatory CR/NC/RP
  - 1 unit

**METR 298. Research**
Supervised individual laboratory or field work.
Prerequisite: Instructor consent.
- Repeatable for credit
- Credit / No Credit
- 1-4 units

**METR 299. Master’s Thesis or Project**
Prerequisite: Admission to candidacy for the MS degree and approval of topic by thesis advisor.
- Repeatable for credit
- Mandatory CR/NC/RP
- 1-6 units
Mexican American Studies Department Courses

MEXICAN AMERICAN STUDIES

LOWER DIVISION

MAS 010A. Mexican Americans and the Development of U.S. History and Government
The American people and institutions from various ethnic points of view. Historical similarities and differences of various groups that make up the U.S. and its historical/political institutions. From pre-Columbian times to 1865.
Normal Grade Rules
GE: M6
3 units
Note: Entire sequence satisfies GE Areas D2, F1,2,3.

MAS 010B. Mexican Americans and the Development of U.S. History and Government
The American people and institutions from various ethnic points of view. Historical similarities and differences of various groups that make up the U.S. and its historical/political institutions. From 1865 to the present.
Note: Entire sequence satisfies GE Areas D2,3, F1,2,3.
Normal Grade Rules
GE: M7
3 units

MAS 025. The Changing Majority: Power and Ethnicity in America
Comparative and historical analysis of racial minorities. Focus on Euro American response to American Indians, Asian Americans, African Americans and Mexican Americans to provide understanding of minority experience in the U.S. as well as American culture.
Normal Grade Rules
GE: D2
3 units

MAS 030. Race and Ethnicity in Public Space
This course focuses on race and ethnicity. Using readings, field trips, media images, and course discussion students learn about racialization in American society. We explore uses of racial and ethnic categories and their institutionalization in everyday life.
Normal Grade Rules
GE: D3
3 units

MAS 040. The Chicano Theatre (El Teatro Chicano)
Prerequisite: ENGL 1A or instructor consent.
Misc/Lab: Lecture 1 hour/activity 2 hours.
Repeatable for credit
Normal Grade Rules
3 units

MAS 074. Public Address
Techniques of effective oral communication. Principles of rhetoric through analysis and critique of contemporary issues concerning Mexican Americans.
Normal Grade Rules
GE: A2
3 units

UPPER DIVISION

MAS 105. Chicanos: United States/Mexico Relations
Exploration of U.S./Mexico relations through the Chicana/o perspective. Emphasis is on both historical and contemporary issues.
Normal Grade Rules
3 units

MAS 115. Chicana/o Families
Examines Mexican and Mexican American families from the 19th to the 21st century. Special attention is given to the diversity of family structures in terms of incorporation, settlement, and socio-cultural interfacing within group and with diverse race/ethnic communities.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MAS 120. Political Economy and Chicana/o Communities
Analysis of the American political and economic systems and institutions and their inter-connections from a Chicana/o perspective. Focus on the changing roles of Chicanas/os in the U.S. and global economies and political processes.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MAS 125. Chicana/o Community Studies
Examination of Chicana/o community activities, including organizations and contemporary issues.
Normal Grade Rules
3 units

MAS 127. Chicanas/os and the Criminal Justice System
Crime, delinquency and the interaction between Chicano/Latino communities and the criminal justice system. The roles of government agencies, local law enforcement, the courts and corrections.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

MAS 130. Chicanas and Chicanos in American Society
Analysis of the Chicana/o community and its role in US society, emphasizing understanding social change. Covers critical areas of the Chicana/o experience, including family, politics, gender and sexual orientation, education, immigration, identity, institutional racism and discrimination, class, and environmental justice.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

MAS 135. Contemporary Chicana/o Issues
Analysis of selected issues/topics involving Chican/o/Latino communities. May be repeated with different topic/issue.
Prerequisite: ENGL 1A or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

MAS 144. Chicana/o Literature
An examination of selected Chicana/o literature including poetry, short stories, essays, and novels. May be repeated with different topic.
Prerequisite: ENGL 1A or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

MAS 150. Research Methods
A survey of research methods used in Chicana/o studies that address issues in Chicana/o communities.
Prerequisite: ENGL 1A and MAS 130.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

MAS 160. Gender and Sexuality in the Chicana/o Community
An examination of how patriarchy, race, and class shape Chicanas in their everyday lives in American society. It explores how women resist and challenge the limitations placed on them as a result of being women and members of a racial/ethnic group.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units
MAS 170. Hollywood’s Image of Chicanos/Chicanas
Analysis of Hollywood’s contribution, through cinema, to shaping the socio-political relations between Chicanas/os and the dominant society, plus the use of traditional ideological concepts in promoting stereotyped images of Chicanas/os.
Prerequisite: ENGL 1A and ENGL 1B or instructor consent.
Normal Grade Rules
3 units

MAS 175. Human Migrations: Global Reach
Examines Mexican immigration to the United States within the context of global movements as both historical and contemporary phenomena. Considers social, political, cultural, and economic forces that influence immigration.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MAS 180. Individual Studies
Individual research projects and field activities.
Prerequisite: Upper division standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

MAS 185. Teaching in a Diverse Society
See SOCS 185.
Normal Grade Rules
3 units

MAS 192. Int’l Program Studies
Repeatable for credit
Mixed Grading
1-6 units

MAS 194. Peoples of Color in the Making of the Americas: 1400-1850
See AAS 194.
Normal Grade Rules
3 units

MAS 195. Peoples of Color in the Making of the Americas: 1850-Present
See AAS 195.
Normal Grade Rules
3 units

MAS 200. Ideology and the Chicana/o Experience
Seminar examining the ideological and philosophical forces that shape Chicana/o experiences and identities.
Normal Grade Rules
3 units

MAS 205. Chicana/o History
Seminar exploring the historical experiences of Chicanas/os, from the indigenous past to the present. Integrates historiography, as it is grounded in an analysis of the development of and changes in the field of Chicana/o history.
Normal Grade Rules
3 units

MAS 210. Foundations in Chicana/o Studies
An analysis of the evolution of Chicana/o thought and intellectual production and the development of the field of Chicana/o Studies. Analyzes the basic constructs and theories underlying Chicana/o Studies, from early works to the present.
Normal Grade Rules
3 units

MAS 215. Chicanas/os and Education
Focus is on key educational issues facing Chicanas/os both historically and currently, including policy, curriculum, cultural conflict, and the different efforts to address them.
Normal Grade Rules
3 units

MAS 225. The Impact of American Institutions on the Chicana/o Community
Seminar analyzing the impact of social, political, economic, and cultural systems on Chicana/o communities.
Normal Grade Rules
3 units

MAS 230. Policy Analysis and the Chicana/o Community
Policy analysis focusing on a specific institution or institutions. Emphasis is on analyzing major issues and social policies that affect the Chicana/o community. Effective strategies to affect social change are examined.
Repeatable for credit
Normal Grade Rules
3 units

MAS 240. Applied Chicana/o Studies Seminar
Integrates major issues and theories from MAS core courses and applies them to current problems. Includes analyses of the latest research on: politics, economics, gender, immigration, education, community development, sexual orientation, and interethnic conflicts and collaborations.
Prerequisite: MAS core.
Repeatable for credit
Normal Grade Rules
3 units

MAS 252. Comparative Ethnic Studies
Interdisciplinary introduction to critical topics and debates in comparative ethnic studies, including race and representation, racialized and gendered labor and citizenship, indigeneity, feminism, nationalism, segregation and environmental injustices.
Normal Grade Rules
3 units

MAS 275. Research Methods
Seminar exploring the methodological challenges posed by Chicana/o Studies. The course helps students develop skills in specific research methods of their choice as well as research proposals for the project/thesis, or other areas of post-graduate work.
Prerequisite: Core courses.
Normal Grade Rules
3 units

MAS 298. Special Studies
Supervised project with advisor.
Prerequisite: Completion of core courses and written consent of the department’s graduate advisor.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

MAS 299. Master’s Thesis
Supervised thesis.
Prerequisite: Admission to candidacy for master’s degree and written consent of the department’s graduate advisor.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units
Middle East Studies Program

Military Science Department (Army ROTC) Courses

MILITARY SCIENCE

LOWER DIVISION

MILS 001A. Leadership & Personal Development
Introduction to the personal challenges and competencies that are critical for effective leadership. The focus is on developing basic knowledge and comprehension of Army leadership dimensions while gaining a big picture understanding of the ROTC program.

Normal Grade Rules
2 units

MILS 001B. Introduction to Tactical Leadership
Overviews leadership fundamentals such as setting direction, problem-solving, listening, presenting briefs, providing feedback, and using effective writing skills. Students explore leadership attributes and core leadership competencies in the context of practical, hands-on, and interactive exercises.

Normal Grade Rules
2 units

MILS 002A. Innovative Team Leadership
Explores creative and innovative tactical leadership strategies and styles by examining team dynamics and trait and behavior theories. Students practice aspects of personal motivation and team building during planning, executing, and assessment of team exercises and participation in leadership labs.

Normal Grade Rules
2 units

MILS 002B. Foundations of Tactical Leadership
Examines the challenges of leading tactical teams in today’s complex world. The course highlights dimensions of terrain analysis, patrolling, and orders. Students develop greater awareness as they assess their own leadership styles and practice communication and team building skills.

Normal Grade Rules
2 units

MILS 002C. Leader’s Training Course (LTC)
Four week summer camp in Kentucky. Travel, lodging, most meal costs defrayed by Army. No military obligation incurred. Open to sophomores and juniors who have not taken ROTC courses during regular school year.

Notes: Physical Exam required (paid for by ROTC).
Credit / No Credit
4 units

UPPER DIVISION

MILS 130A. Adaptive Team Leadership
Challenges students to study, practice, and evaluate adaptive leadership skills as they overcome challenging squad tactical operations scenarios. Cadets hone their leadership and critical thinking while they prepare for success at ROTC’s summer Leadership Development and Assessment Course (LDAC).

Normal Grade Rules
4 units

MILS 130B. Applied Team Leadership
Uses situational team leadership challenges to build awareness and skills in leading small units. Students review aspects of full spectrum operations, and conduct military briefings to develop proficiency giving operation orders. This is the final course before students attend LDAC.

Normal Grade Rules
4 units

MILS 130C. Leader Development and Assessment Course (LDAC)
Five week camp in Washington State. Pay with travel, lodging and most meal costs defrayed by Army. Structured environment stressing leadership under varying circumstances. Leadership/skills evaluations weigh heavily in determining commissioning type and post graduate opportunities.

Credit / No Credit
4 units

MILS 140A. Adaptive Leadership
Students learn how to train, mentor and evaluate underclassmen. They will learn the duties and responsibilities of an Army staff officer and apply those lessons during weekly training meetings to plan, execute and assess battalion training events.

Normal Grade Rules
4 units

MILS 140B. Leadership in a Complex World
Explores the realities of leading in the Contemporary Operating Environment (COE). Students learn to adapt to operations in unfamiliar lands and international terrorism. The course places significant emphasis on preparing cadets for their first assignment in the US Army.

Normal Grade Rules
4 units

MILS 180. Individual Studies
Individual work on special topics by arrangement.

Prerequisite: Instructor consent and Military Science Chair approval.
Repeatable for credit
Credit / No Credit
1-4 units

MILS 199. American Military History
A survey of diplomatic, international, military and economic aspects of American involvement in conflicts from the Anglo-Indian Wars to present time. Study of leadership, weapons technology, politics, humanitarian operations and critical thinking.

Prerequisite: Upper division standing.
Normal Grade Rules
3 units
Moss Landing Marine Laboratories Courses

MARINE SCIENCE

UPPER DIVISION

MS 103. Marine Ecology
Field-oriented introduction to interrelationship between marine and estuarine organisms and their environment. Emphasis on quantitative data collection and analysis. Prerequisite: Ecology, statistics (or concurrent registration in MS 104), or instructor consent. Misc/Lab: Lecture 2 hours; lab/field 6 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

MS 104. Quantitative Marine Science
Mathematical methods for analysis of biological, chemical and physical from the marine environment; experimental design, parametric and non-parametric statistics. Prerequisite: College mathematics. Notes: Course cannot be used to meet 30-unit degree requirement. Offered fall semester. Misc/Lab: Lecture 3 hours/lab 3 hours. Normal Grade Rules 4 units

MS 105. Marine Science Diving
Skin and SCUBA diving course; pool-training culminates in ten ocean dives. Topics covered include diving physics physiology, diving environments night diving and research diving. Successful completion gives NAUI and MLML certification. Prerequisite: Certified SCUBA diver (or equivalency as determined by instructor), upper division science major status, thorough physical examination, ability to pass swimming test. Notes: Course cannot be used to meet 30-unit degree requirement. Offered fall & summer. Misc/Lab: Lecture 1 hour; lab/field 6 hours. Normal Grade Rules 3 units

MS 112. Marine Birds and Mammals
Systematics, morphology, ecology and biology of marine turtles, birds, and mammals. Prerequisite: Upper division college vertebrate zoology, instructor's consent; MS 103 recommended. Misc/Lab: Lecture 2 hours lab/field 6 hours. Notes: Course is generally offered alternate fall semesters during the odd years. Normal Grade Rules 4 units

MS 113. Marine Ichthyology
A description of the taxonomy, morphology and ecology of marine fishes. Both field and laboratory work concentrate on the structure, function and habits of marine fishes and the ecological interactions of these fishes with their biotic and abiotic surroundings. Prerequisite: College zoology (or equivalent) or instructor's consent. MS 103 recommended. Misc/Lab: Lecture 2 hours lab/field 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units

MS 124. Marine Invertebrate Zoology I
A field-oriented introduction to the structure, systematics, evolution and life histories of the major marine phyla. Prerequisite: College zoology or instructor consent; MS 103 recommended. Misc/Lab: Lecture 2 hours lab/field 6 hours. Notes: Course is generally offered alternate fall semesters during the odd years. Normal Grade Rules 4 units

MS 125. Marine Invertebrate Zoology II
A field-oriented introduction to the structure, systematics, evolution and life histories of the minor marine invertebrate phyla. Prerequisite: College zoology or instructor consent, MS 103 and MS 124 recommended. Misc/Lab: Lecture 1 hour; lab/field 6 hours. Normal Grade Rules 3 units

MS 131. Marine Botany
Introduction to the plants of the sea, marshes and dunes, with emphasis on the morphology, taxonomy and natural history of seaweeds and vascular plants. Prerequisite: MS 103 recommended, or instructor consent. Misc/Lab: Lecture 2 hours/lab 6 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

MS 135. Physiological Ecology of Marine Algae
Understanding the adaptations of marine algae to their environment, including respiration, enzyme activity, and biochemical composition. Hands-on experience in basic electronic instrumentation, chemical separations, optical measurements, culturing methods and radiotrace techniques. Designed for students interested in the biology of seaweeds and phytoplankton. Prerequisite: MS 103, 131, 144 or instructor consent. Misc/Lab: Lecture 2 hours/lab and field 6 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

MS 141. Geological Oceanography
A study of the structures, physiography and sediments of the sea bottom and shoreline. Prerequisite: Instructor consent. Misc/Lab: Lecture 2 hours; lab/field 6 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

MS 142. Physical Oceanography
An introduction to the nature and causes of various oceanic motions including currents, waves, tides and mixing, and the physical properties of seawater including transmission of sound and light. Limited use of calculus. Prerequisite: College algebra, college physics recommended, or instructor consent. Misc/Lab: Lecture 2 hours/lab 4 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

MS 143. Chemical Oceanography
An introduction to the theoretical and practical aspects of the chemistry of the oceans, including major salts, dissolved gases, nutrient ions, carbonate system, transient tracers and shipboard sampling techniques. Prerequisite: One year of college chemistry. Misc/Lab: Lecture 2 hours/lab 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units

MS 144. Biological Oceanography
The ocean as an ecological system. Emphasis on the complexity of environmental influences on plankton, the transfer of organic matter between trophic levels and nutrient cycles. Laboratory sessions will include methods in sampling, shipboard techniques, identification of the plankton, and current analytical techniques. Prerequisite: General biology, general chemistry, or instructor consent. Misc/Lab: Lecture 2 hours/lab 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units

MS 175A. Topics in Marine Sciences (Lecture)
Study of selected area of marine sciences. Subjects vary depending upon demand and availability of instructors. May be repeated once for credit when topic changes. Prerequisite: Instructor consent. Repeatable for credit Normal Grade Rules 1-4 units
**MS 175B. Topics in Marine Sciences (Lab)**
Study of selected area of marine sciences. Subjects vary depending upon demand and availability of instructors. May be repeated once for credit when topic changes.
Prerequisite: Instructor consent.
Misc/Lab: Lab 3-12 hours.
Repeatable for credit
Credit/No Credit
1-4 units

**MS 175C. Topics in Marine Sciences (Lecture and/or Lab)**
Study of selected area of marine sciences. Subjects vary depending on student demand and availability of instructors. May be repeated once for credit when topic changes.
Prerequisite: Instructor consent.
Misc/Lab: Lecture variable hours/lab variable hours.
Repeatable for credit
Normal Grade Rules
1-4 units

**MS 180. Independent Studies**
Faculty-directed study of selected problems, open to undergraduate students with adequate preparation. Offered every semester. May be repeated once for credit.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
1-4 units

**MS 201. Library Research Methods in Marine Science**
Students will gain an advanced understanding of the nature of scientific information. Lectures, discussions and assignments will provide the framework for using and evaluating a variety of information sources in marine and ocean sciences. Strong emphasis will be placed on developing critical skills to interweave knowledge of the history of science into the context of bibliographic tools including the digital realm.
Prerequisite: Graduate standing, instructor consent.
Notes: Offered spring semester.
Normal Grade Rules
1 unit

**MS 202. Oceanographic Instrumentation**
Principles of instruments used in oceanographic research, introduction to electronics, and applications of instrument measurements. Emphasis will vary from CTD profilers, current meters, radiometry and chemical measurement.
Prerequisite: Graduate standing; MS 141, MS 142 and instructor consent.
Misc/Lab: Lecture/discussion 2 hours; lab/field 6 hours.
Notes: Offered alternate spring semesters.
Normal Grade Rules
4 units

**MS 204. Sampling and Experimental Design**
Basic design of experiments and field sampling. Biases and problems of sampling marine biota.
Prerequisite: Graduate standing; MS 103 and MS 104.
Notes: Offered spring semester.
Normal Grade Rules
4 units

**MS 206. Molecular Biological Techniques**
Laboratory-based overview of concepts and techniques for the isolation, characterization, and analysis of DNA and RNA. Covers standard methods (amplification, cloning, and sequencing), and selected specialized techniques (analysis of gene expression), emphasizing marine science applications.
Prerequisite: Graduate standing; college level genetics, molecular biology, or instructor consent.
Misc/Lab: Lecture 2 hours/Lab 6 hours.
Notes: Offered spring semester.
Normal Grade Rules
4 units

**MS 208. Scientific Methods**
Course is designed to help students develop an understanding of strengths and limitations of various types of scientific reasoning, methodology, and analysis as they relate to scientific progress. Course centers on: round-table discussions of papers and techniques; interactive computer, laboratory, and field learning experiences; and development of critical thinking and writing skills.
Prerequisite: Graduate standing; instructor consent and approved thesis proposal.
Misc/Lab: Lecture 3 hours/Lab 2 hours.
Notes: Offered spring semester.
Normal Grade Rules
4 units

**MS 211. Ecology of Marine Turtles, Birds, and Mammals**
Community approach to the ecology of marine birds and mammals using experimental and sampling methodology. The class will examine the distribution, abundance, trophic ecology, and behavior of birds and mammals in Elkhorn Slough and Monterey Bay.
Prerequisite: Graduate standing; MS 103, MS 104 and MS 112 and instructor consent.
Misc/Lab: Lecture/discussion 2 hours; lab and field 6 hours.
Notes: Generally offered alternate fall semesters during even years.
Normal Grade Rules
4 units

**MS 212. Advanced Topics in Marine Vertebrates**
Advanced consideration of the ecology, physiology and phylogeny of fishes, birds, reptiles or mammals, emphasizing current literature and research. Topics and emphasis will vary with term and instructor. May be repeated once for credit.
Prerequisite: Graduate standing; MS 112 or MS 113 and instructor consent.
Misc/Lab: Lecture, lab and field work variable.
Repeatable for credit
Normal Grade Rules
1-4 units

**MS 221. Advanced Topics in Marine Invertebrates**
Advanced consideration of the ecology, physiology and phylogeny of the various invertebrate phyla emphasizing current literature and research. Topics and emphasis will vary from term to term. May be once repeated for credit when topic changes.
Prerequisite: MS 124 and instructor consent.
Misc/Lab: Lecture, laboratory and field work variable.
Repeatable for credit
Normal Grade Rules
1-4 units

**MS 231. Biology of Seaweeds**
Discussions on on marine macroalgal biology with extensive reading of original literature. Ecologically-oriented individual research projects involving laboratory culture and field experimentation.
Prerequisite: Graduate standing; MS 131 or instructor consent.
Misc/Lab: Lecture 2 hours; lab/field work 6 hours.
Notes: Offered fall semester.
Normal Grade Rules
4 units

**MS 233. Advanced Topics in Marine Ecology**
Selected topics and current issues in marine ecology. Subjects vary depending on student demand and availability of instructors. May be repeated once for credit when topic changes.
Prerequisite: Graduate standing; MS 103 and instructor consent.
Misc/Lab: Lecture, lab/field work variable.
Repeatable for credit
Normal Grade Rules
1-4 units

**MS 234. Advanced Biological Oceanography**
Experimental techniques in biological oceanography with emphasis on problems important in plankton ecology. An individual research project involving the use of one or more modern analytical tools will be required.
Prerequisite: Graduate standing; MS 144 or instructor consent.
Misc/Lab: Lecture 2 hours; lab/field work 6 hours.
Notes: Offered fall semester.
Normal Grade Rules
4 units
MS 242. Plate Tectonics
Historical background, modern theory and geophysical evidence for continental drift, sea-floor spreading and plate tectonics. Examination of the impact of this recent revolution in historical geology. Prerequisite: Graduate standing; MS 141 or instructor consent. Notes: Offered alternate fall semesters. Normal Grade Rules 3 units.

MS 246. Geology of the Monterey Bay Region
Geology, tectonic, and active naturally occurring processes in the Monterey Bay region and in the Monterey Bay National Marine Sanctuary. The geologic and tectonic history of central California, plate tectonic processes, and representative stratigraphy and geomorphology of the Monterey Bay region. Prerequisite: Graduate standing; instructor consent. Misc/Lab: Lecture 2 hours; lab/field work 6 hours. Notes: Offered alternate fall semesters. Normal Grade Rules 4 units.

MS 248. Marine Benthic Habitat Techniques
Collection and interpretation of geophysical data used to characterize marine benthic habitats. Basic geophysical principals will be reviewed. Application of techniques to identify and characterize marine benthic habitats, including echosounders, multibeam bathymetry and backscatter, sidescan sonar, seismic profiling, and GIS. Prerequisite: Graduate standing; MS 141 or instructor consent. Misc/Lab: Lecture 2 hours; lab/field work 6 hours. Notes: Offered alternate spring semesters during odd years. Normal Grade Rules 4 units.

MS 251. Marine Geochemistry
Geochemical processes in the oceans; low temperature thermodynamics of aqueous reactions, weathering, oxidation-reduction and biologically mediated reactions, processes occurring at the sea floor and air-sea interface. Prerequisite: Graduate standing; MS 143, quantitative analysis, one year of calculus or instructor consent. Misc/Lab: Lecture 2 hours; lab/field work 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units.

MS 261. Mixing, Estuarine and Sediment Transport
The mathematical description of the distribution of properties (density, dissolved oxygen, etc.) in the oceans relating to physical and biochemical processes. Equations of motion, geotrophic method, and theory of distribution of variables. Prerequisite: Graduate standing; MS 342 and college physics strongly recommended, or instructor consent. Misc/Lab: Lecture 3 hours; lab/field work 3 hours. Notes: Offered alternate spring semesters during odd years. Normal Grade Rules 4 units.

MS 263. Data Analysis in Marine Science
Introduction to using observational oceanographic data, with hands on practice in scientific programming for data analysis. Lecture, discussion, and practical experience including the use of existing programs and subroutine libraries. Semester project required. Prerequisite: Graduate standing; MS 104, college math and instructor consent. Misc/Lab: Lecture 2 hours/lab 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units.

MS 271. Population Biology
Principles involved in the interaction among marine organisms which result in the alteration of population structures. Techniques for assessment and management of animal populations. Prerequisite: Graduate standing; MS 103, MS 104 or instructor consent. Misc/Lab: Lecture 2 hours; lab/field work 3 hours. Notes: Offered fall semester. Normal Grade Rules 3 units.

MS 272. Subtidal Ecology
The ecology of nearshore rocky subtidal populations and communities with emphasis on kelp forests. Lectures and discussions of original literature. Field work with SCUBA including group projects on underwater research techniques and community analysis. Individual research on ecological questions chosen by the student. Knowledge of marine algae, invertebrates and statistics recommended. Prerequisite: Graduate standing; MS 103; MLML diver certification and marine ecology. Misc/Lab: Lecture 2 hours; lab/field work 6 hours. Notes: Offered alternate spring semesters during odd years. Normal Grade Rules 4 units.

MS 273. Marine Environmental Studies of the Gulf of California
An analysis of Gulf of California marine environments. Lectures, readings, intensive field work, and written scientific paper based on original research. Topics vary. Taught with Mexican faculty and students from La Paz, Mexico. Must be able to participate in 2 weeks of field work. Prerequisite: Graduate standing; instructor consent. Misc/Lab: Lecture 2 hours/lab 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units.

MS 274. Advanced Topics in Oceanography
Study of selected area in oceanography. Subjects vary depending on student demand and availability of instructors. May be repeated once for credit when topic changes. Prerequisite: Graduate standing and instructor consent. Misc/Lab: Lecture, lab/field work variable. Repeatable for credit Normal Grade Rules 1-4 units.

MS 280. Scientific Writing
Techniques and strategies of scientific writing used for proposals, journal submissions and abstracts of meetings. Emphasis to develop writing skills by preparing, editing, and rewriting manuscripts. Prerequisite: Graduate standing and instructor consent. Notes: Offered spring semester. Normal Grade Rules 3 units.

MS 281. Coastal Dynamics
Oceanographic dynamics of coastal environments, with an emphasis on eastern boundary current systems influenced by coastal upwelling. Interactions of physical and geological oceanography and how both affect coastal ecosystem dynamics. Prerequisite: Graduate standing and MS 142 or MS 141. Notes: Offered spring semester. Normal Grade Rules 4 units.

MS 285. Graduate Seminar in Marine Science
Seminar will be held on topics changing each semester. Each student will be required to give at least one seminar. Prerequisite: Graduate standing and instructor consent. Notes: Offered fall and spring semesters. Repeatable for credit Normal Grade Rules 2 units.

MS 290R. Thesis Continuation
Continued work on thesis. Pre-requisite: Outstanding RP grade in a preceding semester in MS 299 Mandatory CR/NC/RP 1 unit.
MS 298. Research in the Marine Science
Independent investigations of an advanced character for the graduate student with adequate preparation.
Prerequisite: Graduate standing and instructor consent.
Repeatable for credit
Normal Grade Rules
1-4 units

MS 299. Master's Thesis
Repeatable for credit
Mandatory CR/NC/RP
1-4 units
Music and Dance Courses

DANCE

LOWER DIVISION

DANC 010. Dance Appreciation
A survey of dance as an art in the Western world. The course examines the diversity of people, cultures and events that led to the development of Ballet, Modern, Jazz, Tap and Musical Theatre Dance.
Prerequisite: DANC 41A (or equivalent).
Normal Grade Rules
CE C1
3 units

DANC 012. Ensemble Dance Rehearsal and Performance
ENS: Training and performance experience in the field of dance. Fully-staged productions of original professional choreographic works.
Pre-requisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
2 units

DANC 040A. Topics in Modern Dance I
Training experience in the field of beginning modern dance with varied topics. Can be repeated when topic changes.
Misc/Lab: Activity 4 hours.
Notes: One unit may be used one time towards the two unit Physical Education graduation requirement.
Repeatable for credit
Normal Grade Rules
2 units

DANC 040B. Topics in Modern Dance II
Training experience in the field of intermediate modern dance with varied topics. Can be repeated when topic changes.
Prerequisite: DANC 40A (or equivalent).
Misc/Lab: Activity 4 hours.
Notes: One unit may be used one time towards the two unit Physical Education graduation requirement.
Repeatable for credit
Normal Grade Rules
2 units

DANC 041. Topics in Ballet I
Training experience in the field of beginning ballet dance with varied topics. Can be repeated when topic changes.
Misc/Lab: Activity 4 hours.
Note: One unit may be used one time towards the two unit Physical Education graduation requirement.
Repeatable for credit
Normal Grade Rules
2 units

DANC 041A. Topics in Ballet I
Training experience in the field of beginning ballet dance with varied topics. Can be repeated when topic changes.
Prerequisite: DANC 41A (or equivalent).
Misc/Lab: Activity 4 hours.
Notes: One unit may be used one time towards the two unit Physical Education graduation requirement.
Repeatable for credit
Normal Grade Rules
2 units

DANC 041B. Topics in Ballet II
Training experience in the field of intermediate ballet with varied topics. Can be repeated when topic changes.
Prerequisite: DANC 41A (or equivalent).
Misc/Lab: Activity 4 hours.
Notes: One unit may be used one time towards the two unit Physical Education graduation requirement.
Repeatable for credit
Normal Grade Rules
2 units

DANC 042A. Topics in Jazz Dance I
Training experience in the field of beginning Jazz dance with varied topics. Can be repeated when topic changes.
Misc/Lab: Activity 4 hours.
Notes: One unit may be used one time towards the two unit Physical Education graduation requirement.
Repeatable for credit
Normal Grade Rules
2 units

DANC 042B. Topics in Jazz Dance II
Training experience in the field of intermediate Jazz dance with varied topics. Can be repeated when topic changes.
Prerequisite: DANC 42A (or equivalent).
Misc/Lab: Activity 4 hours.
Notes: One unit may be used one time towards the two unit Physical Education graduation requirement.
Repeatable for credit
Normal Grade Rules
2 units

DANC 043. Dance Improvisation
Introduction to dance improvisation, developing skills in creativity in preparation for DANC 145A.
Prerequisite: Intermediate technique standing and permission of instructor.
Normal Grade Rules
1 unit

DANC 044. Line/Country Western Dance
See KIN 044.
Normal Grade Rules
1 unit

DANC 045A. Beginning Lindy Hop and Night Club Swing
See KIN 045A
Normal Grade Rules
1 unit

DANC 046A. Beginning Social Dance
See KIN 046A
Normal Grade Rules
1 unit

DANC 046B. Intermediate Social Dance
See KIN 046B
Normal Grade Rules
1 unit

DANC 048A. Beginning Latin Dance
See KIN 048A
Normal Grade Rules
1 unit

DANC 048B. Intermediate Latin Dance
See KIN 048B
Normal Grade Rules
1 unit

DANC 049A.Topics in Tap Dance I
Training and experience in the field of beginning tap dance with varied topics. Can be repeated when topic changes.
May be taken only once for physical education graduation requirement.
Misc/Lab: Activity 3 hours.
Repeatable for credit
Normal Grade Rules
1 unit

DANC 049B. Topics in Tap Dance II
Training and experience in the field of intermediate tap dance with varied topics. Can be repeated for up to 2 units of credit when topic changes.
May be taken only once for physical education graduation requirement.
Prerequisite: DANC 49A (or equivalent).
Misc/Lab: Activity 3 hours
Repeatable for credit
Normal Grade Rules
1 unit

DANC 051A. Dance Production
Practical experience in technical aspects of producing a dance concert.
Prerequisite: Instrucon consent.
Misc/Lab: Lecture 1 hour/activity 3 hours.
Repeatable for credit
Normal Grade Rules
3 units

DANC 051B. Topics in Dance Crewing
The purpose of this course is to apply practical application of skills in dance production.
Repeatable for credit
Credit / No Credit
0.5 units

DANC 053. Techniques in World Dance
Traditional or theatrical dance forms selected from one or at the most two specific cultures. Classical ballet, modern, jazz, and tap dance are excluded.
Prerequisite: Level II technique standing.
Misc/Lab: Activity 3 hours.
Repeatable for credit
Normal Grade Rules
1 unit
DANC 075. Rhythmic Fundamentals for the Dance
Basic music theory and the relationship of dance and music.  
Misc/Lab: Lecture/activity 3 hours.  
Normal Grade Rules 2 units

UPPER DIVISION
DANC 102. Dance in World Cultures
Survey of dance in selected world cultures; the role of dance in society; consideration of style, historical background and religious/cultural influences. Included are: Caribbean, West African, Mexican, Balkan, European, Asian and American cultures.  
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.  
Normal Grade Rules 3 units

DANC 112. ENS: Dance Rehearsal and Performance
ENS: Training and performance experience in the field of dance. Fully-staged productions of original professional choreographic works of varying styles.  
Prerequisite: Audition and instructor consent  
Misc/Lab: Lab hours required.  
Repeatable for credit  
Credit / No Credit 2 units

DANC 140A. Topics in Modern Dance III
Training experience in the field of intermediate advanced modern dance with varied topics. Can be repeated for credit when topic changes.  
Prerequisite: DANC 040B and permission of instructor.  
Notes: One unit may be used one time towards the two unit Physical Education graduation requirement.  
Repeatable for credit  
Normal Grade Rules 2 units

DANC 140B. Topics in Modern Dance IV
Training experience in the field of advanced modern dance with varied topics. Can be repeated for credit when topic changes.  
Prerequisite: DANC 140A and permission of instructor.  
Misc/Lab: Activity 6 hours.  
Repeatable for credit  
Normal Grade Rules 2 units

DANC 141A. Topics in Ballet III
Training experience in the field of intermediate/advanced ballet with varied topics. Can be repeated for credit when topic changes.  
Prerequisite: DANC 041B and permission of instructor.  
Misc/Lab: Activity 4 hours.  
Notes: One unit may be used one time towards the two unit Physical Education graduation requirement.  
Repeatable for credit  
Normal Grade Rules 2 units

DANC 141B. Topics in Ballet IV
Training experience in the field of advanced ballet with varied topics. Can be repeated for credit when topic changes.  
Prerequisite: DANC 141A and permission of instructor.  
Misc/Lab: Activity 6 hours.  
Notes: One unit may be used one time towards the two unit Physical Education graduation requirement.  
Repeatable for credit  
Normal Grade Rules 2 units

DANC 142A. Topics in Jazz Dance III
Training experience in the field of Intermediate advanced Jazz dance with varied topics. Can be repeated for credit when topic changes.  
Prerequisite: DANC 042B and permission of instructor.  
Notes: One unit may be used one time towards the two unit Physical Education graduation requirement.  
Repeatable for credit  
Normal Grade Rules 2 units

DANC 142B. Topics in Jazz Dance IV
Training experience in the field of advanced Jazz dance with varied topics. Can be repeated for credit when topic changes.  
Prerequisite: DANC 142A and permission of instructor.  
Misc/Lab: Activity 6 hours.  
Notes: One unit may be used one time towards the two unit Physical Education graduation requirement.  
Repeatable for credit  
Normal Grade Rules 2 units

DANC 144A. Dance History and Repertory
History of dance and dances from ancient time to the court of King Louis XIV. Selected repertory works.  
Prerequisite: Upper division standing.  
Misc/Lab: Lecture 2 hours/activity 3 hours.  
Normal Grade Rules 3 units

DANC 144B. Dance History and Repertory
History of dance and dances from the court of King Louis XIV through the twentieth century. Selected repertory works.  
Prerequisite: Upper division standing.  
Misc/Lab: Lecture 2 hours/activity 3 hours.  
Normal Grade Rules 3 units

DANC 145A. Choreography I
Presentation and criticism of solo choreography; introduction to improvisational techniques.  
Prerequisite: DANC 043 and permission of instructor.  
Misc/Lab: Activity 4 hours.  
Normal Grade Rules 3 units

DANC 145B. Choreography II
Styles; forms; use of improvisation; presentation and criticism of small group dance.  
Prerequisite: DANC 145A and permission of instructor.  
Misc/Lab: Activity 4 hours.  
Normal Grade Rules 3 units

DANC 145C. Choreography III
Practical application of external style in relationship with art from the primitive to contemporary times. Concepts, styles and forms of modern dance in the twentieth century.  
Prerequisite: DANC 145B and permission of instructor.  
Misc/Lab: Activity 4 hours.  
Repeatable for credit  
Normal Grade Rules 3 units

DANC 147A. Dance Seminar
Course geared toward the understanding of a broader perspective of the Art of Dance with emphasis on current trends, development of personal artistic statement and introductory teaching techniques.  
Prerequisite: Senior standing and completion or concurrent enrollment in DANC 144A and/or DANC 144B.  
Normal Grade Rules 3 units

DANC 147B. Senior Portfolio
Capstone course entailing final production and evaluation of performance and choreography and submission of written portfolio.  
Prerequisite: Senior standing and completion of DANC 145 A, DANC 145B, DANC 145C, DANC 147A and completion or concurrent enrollment in DANC 186.  
Normal Grade Rules 3 units
DANC 148. Children’s Dance
Study of dance for children as personal expression through movement. Use of creative dance as a tool for the enrichment of learning. Experiencing dance in a variety of cultures.
Prerequisite: Upper division standing.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

DANC 149C. Tap Dance III
Technique and performance of advanced tap for the advanced tap dancer. One unit may be used one time towards the two unit Physical Education graduation requirement.
Prerequisite: DANC 049B and instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

DANC 150A. Kinesiology I
This course is designed to help provide the dancer with essential information about structure and function of the human body and the achievement of optimal performance through the science of human motion.
Misc/Lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

DANC 150B. Kinesiology II
This course is designed to help provide the dancer with essential information about injury prevention and introduce active somatic techniques to increase muscular efficiency, balance and overall awareness of the body.
Prerequisite: DANC 150A.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

DANC 158. African–Caribbean Dance
See AFAM 158.
Normal Grade Rules
2 units

DANC 186. Choreographing the Musical
Study and practice of staging and choreographing musical comedy. Analysis of scripts and choreographic techniques.
Prerequisite: DANC 75, DANC 145A and permission of instructor.
Misc/Lab: Lecture/activity 3 hours.
Normal Grade Rules
3 units

DANC 194. Repertory Dance Activity
REP: Training and performance experience in the field of dance. Fully-staged productions of original student choreographic works. Can be repeated when repertory changes.
Prerequisite: DANC 146 or instructor consent.
Repeatable for credit
Credit / No Credit
1 unit

DANC 198. Internship in Dance
Supervised internship with approved dance organization. Written evaluation submitted by organizations and student after field work.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

MUSIC

LOWER DIVISION

MUSC 001A. Music Systems I
First course in a four-semester core sequence of study of analytical systems of music. Topics include rhythm, melody, harmony, timbre, structure, texture, style and contexts for performance and composition.
Prerequisite: Placement examination.
Normal Grade Rules
2 units

MUSC 001B. Music Systems II
First course in a four-semester core sequence of aural skills acquisition, including dictation, sight-singing and analysis.
Prerequisite: Placement examination.
Normal Grade Rules
1 unit

MUSC 002A. Music Systems IIIA
Second course in a four-semester core sequence of study of analytical systems of music. Topics from MUSC 1A are continued in greater detail with increased complexity.
Prerequisite: Placement examination or enrollment in final four semesters of major.
Normal Grade Rules
2 units

MUSC 002B. Music Systems IIIB
Second course in a four-semester core sequence of aural skills acquisition, including dictation, sight-singing and analysis.
Prerequisite: Placement examination or enrollment in final four semesters of major.
Normal Grade Rules
2 units

MUSC 003A. Music Systems IVA
Third course in a four-semester core sequence of study of analytical systems of music. Topics from MUSC 2A are continued in greater detail with increased complexity.
Prerequisite: Placement examination or enrollment in final four semesters of major.
Normal Grade Rules
2 units

MUSC 003B. Music Systems IVB
Third course in a four-semester core sequence of aural skills acquisition, including dictation, sight-singing and analysis.
Prerequisite: Placement examination or enrollment in final four semesters of major.
Normal Grade Rules
1 unit

MUSC 004A. Music Systems IVC
Fourth course in a four-semester core sequence of study of analytical systems of music. Topics from MUSC 3A are continued in greater detail and with increased complexity.
Prerequisite: MUSC 3A or placement examination.
Normal Grade Rules
2 units

MUSC 004B. Music Systems IVB
Fourth course in a four-semester core sequence of aural skills acquisition, including dictation, sight-singing and analysis.
Prerequisite: MUSC 3B or placement examination.
Normal Grade Rules
1 unit

MUSC 006. Jazz Theory
Understanding of traditional jazz nomenclature including chord symbols, chord/scale relationships, and jazz harmony. Various scales, their modes and their applications will be addressed as well as their applications to harmonic progressions common to the jazz idiom.
Prerequisite: MUSC 1A, MUSC 1B, MUSC 25A.
Normal Grade Rules
2 units

MUSC 009. Music Fundamentals
Understanding music terminology, fundamental concepts in music theory and techniques in music reading. Required of all music minors. Acceptable as elective credit for music major (as review of fundamentals or for individual instruction in conjunction with applied music study) only with prior advisor approval.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

MUSC 010A. Music Appreciation
General survey of Western music focusing on recorded and live performances.
Normal Grade Rules
CE: C1
3 units

MUSC 010B. Introduction to Music
Beginning piano playing as a means to understanding music. Listening skills developed through exposure to a variety of music: Popular/classical, old/new, Western/ non-Western.
Normal Grade Rules
CE: C1
3 units

MUSC 012. Medieval and Renaissance Music
A brief introduction to the six major periods of music history (Ancient and Medieval, Renaissance, Baroque, Classical, Romantic and Modern) followed by a survey of the Ancient, Medieval, and Renaissance periods with a study of notation, theory, composers, works, and cultural history.
Prerequisite: MUSC 2A or instructor consent.
Normal Grade Rules
3 units
MUSC 013. Music Technology
Hands-on skills development in music hardware and software, including music integration in word processing and graphics, music notation and Internet/WWW-based research tools for music majors or non-music majors with some music background.
Normal Grade Rules
1 unit

MUSC 019. Music in World Cultures
Introduction to music in various cultural contexts outside European classical tradition. Live performances, film, video tapes and slides. Projects involving related arts encouraged.
Normal Grade Rules
GE: Cs
3 units

MUSC 025A. Piano Proficiency I
Skills development in performing four-part harmony; harmonizing melodies in pianistic style, modulation, simple score reading and sight-reading.
Prerequisite: MUSC 9, MUSC 10 (or equivalent).
Normal Grade Rules
1 unit

MUSC 025B. Piano Proficiency II
25B continuation of 25A.
Prerequisite: MUSC 25A or equivalent, instructor consent
Normal Grade Rules
1 unit

MUSC 025C. Piano Proficiency III
Preparation for Piano Proficiency Exam
Prerequisite: MUSC 9, 25B or equivalent, instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 026A. Voice Fundamentals
Principles of voice production and performance.
Prerequisite: MUSC 9 or MUSC 10B (or equivalent).
Normal Grade Rules
1 unit

MUSC 027A. Fundamentals of Jazz Keyboard I
For any instrumental/voice student. Basic skills in jazz keyboard: Chord voicings, symbols, progressions and rhythmic patterns, jazz styles, simple melodic techniques and accompaniment.
Normal Grade Rules
1 unit

MUSC 027B. Fundamentals of Jazz Keyboard II
Advanced applications of materials presented in MUSC 27A, including keyboard performance of selected lead-sheet literature, chord symbol recognition, keyboard techniques, chord substitutions introduced, polychords.
Prerequisite: MUSC 27A (or equivalent).
Normal Grade Rules
1 unit

MUSC 028. Guitar Fundamentals
The purpose of this course is to develop basic skills and techniques in guitar playing, applicable to various types of music and teaching.
Prerequisite: Ability to read music.
Normal Grade Rules
1 unit

MUSC 029. Electro-Acoustics
Incorporating current music technology and instrumentation in creating works and projects. Required each semester of lower division electro-acoustic majors.
Pre-requisite: Audition or Instructor Consent
Normal Grade Rules
1-2 units

MUSC 029A. Electro-Acoustics 1
APPLIED LESSONS: Electro-acoustics level 1, incorporating current music technology and instrumentation into projects. For music technology majors.
Prerequisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 029B. Electro-Acoustics 2
APPLIED LESSONS: Electro-acoustics level 2, incorporating current music technology and instrumentation into projects. For music technology majors.
Prerequisite: Audition and instructor consent, MUSC 29A or equivalent
Normal Grade Rules
1-2 units

MUSC 029C. Electro-Acoustics 3
APPLIED LESSONS: Electro-acoustics level 3, incorporating current music technology and instrumentation into projects. For music technology majors.
Prerequisite: Audition and instructor consent, MUSC 29B or equivalent
Normal Grade Rules
1-2 units

MUSC 029D. Electro-Acoustics 4
APPLIED LESSONS: Electro-acoustics level 4, incorporating current music technology and instrumentation into projects. For music technology majors.
Prerequisite: Audition and instructor consent, MUSC 29C or equivalent
Normal Grade Rules
1-2 units

MUSC 030. Piano
Required each semester of lower division piano majors.
Prerequisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 030A. Piano 1
APPLIED LESSONS: Piano level 1. Required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 030B. Piano 2
APPLIED LESSONS: Piano level 2. Lessons required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 030C. Piano 3
APPLIED LESSONS: Piano level 3. Lessons required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 30B or equivalent.
Normal Grade Rules
1-2 units

MUSC 030D. Piano 4
APPLIED LESSONS: Piano level 4. Lessons required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 30C or equivalent.
Normal Grade Rules
1-2 units

MUSC 031. Harpsichord or Organ
APPLIED LESSONS: Harpsichord or organ. Required of BM harpsichord or organ majors every semester.
Pre-requisite: Audition or instructor consent
Normal Grade Rules
1-2 units

MUSC 031A. Harpsichord or Organ 1
APPLIED LESSONS: Harpsichord or organ level 1. Required of BM piano majors every semester.
Pre-requisite: Audition or Instructor Consent
Normal Grade Rules
1-2 units

MUSC 031B. Harpsichord or Organ 2
APPLIED LESSONS: Harpsichord or organ level 2. Required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 31A or equivalent
Normal Grade Rules
1-2 units

MUSC 031C. Harpsichord or Organ 3
APPLIED LESSONS: Harpsichord or organ level 3. Required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 31B or equivalent
Normal Grade Rules
1-2 units

APPLIED LESSONS: Harpsichord or organ level 1. Required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

APPLIED LESSONS: Harpsichord or organ level 2. Required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 31A or equivalent
Normal Grade Rules
1-2 units

APPLIED LESSONS: Harpsichord or organ level 3. Required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 31B or equivalent
Normal Grade Rules
1-2 units
MUSC 031D. Harpsichord or Organ 4
APPLIED LESSONS: Harpsichord or organ level 4. Required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 31C or equivalent
Normal Grade Rules
1-2 units

MUSC 033. Voice
Required each semester of lower division voice majors. Study and development of vocal techniques and performance of representative repertoire from principal periods in music. Includes compositions embracing the English, Italian, French and German languages. Prerequisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 033A. Voice 1
APPLIED LESSONS: Voice level 1. Required of BM vocal majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 033B. Voice 2
APPLIED LESSONS: Voice level 2. Required of BM vocal majors every semester.
Pre-requisite: Audition and instructor consent, 33A or equivalent
Normal Grade Rules
1-2 units

MUSC 033C. Voice 3
Pre-requisite: Audition and instructor consent, 33B or equivalent
Normal Grade Rules
1-2 units

MUSC 033D. Voice 4
APPLIED LESSONS: Voice level 4. Required of BM vocal majors every semester.
Pre-requisite: Audition and instructor consent, 33C or equivalent
Normal Grade Rules
1-2 units

MUSC 034. Strings
Required each semester of lower division string majors.
Pre-requisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 034A. Strings 1
APPLIED LESSONS: Strings level 1. Required of BM string majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 034B. Strings 2
APPLIED LESSONS: Strings level 2. Required of BM string majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 34A or equivalent
Normal Grade Rules
1-2 units

MUSC 034C. Strings 3
APPLIED LESSONS: Strings level 3. Required of BM string majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 34B or equivalent
Normal Grade Rules
1-2 units

MUSC 034D. Strings 4
APPLIED LESSONS: Strings level 4. Required of BM string majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 34C or equivalent
Normal Grade Rules
1-2 units

MUSC 035. Woodwinds
Required each semester of lower division woodwind majors.
Pre-requisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 035A. Woodwinds 1
APPLIED LESSONS: Woodwinds level 1. Required of BM woodwind majors every semester. Flute, oboe, bassoon, clarinet or saxophone.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 035B. Woodwinds 2
APPLIED LESSONS: Woodwinds level 2. Required of BM woodwind majors every semester. Flute, oboe, bassoon, clarinet or saxophone.
Pre-requisite: Audition and instructor consent, MUSC 35A or equivalent
Normal Grade Rules
1-2 units

MUSC 035C. Woodwinds 3
APPLIED LESSONS: Woodwinds level 3. Required of BM woodwind majors every semester. Flute, oboe, clarinet, bassoon or saxophone.
Pre-requisite: Audition and instructor consent, MUSC 35B or equivalent
Normal Grade Rules
1-2 units

MUSC 035D. Woodwinds 4
APPLIED LESSONS: Woodwinds level 4. Required of BM woodwind majors every semester. Flute, oboe, bassoon, clarinet or saxophone.
Pre-requisite: Audition and instructor consent, MUSC 35C or equivalent
Normal Grade Rules
1-2 units

MUSC 036. Brass
Required each semester of lower division brass majors.
Pre-requisite: Audition or instructor consent.
Repeatable for credit
Normal Grade Rules
1-2 units

MUSC 036A. Brass 1
APPLIED LESSONS: Brass level 1. Required of BM brass majors every semester. Trumpet, trombone, french horn, euphonium, tuba.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 036B. Brass 2
APPLIED LESSONS: Brass level 2. Required of BM brass majors every semester. Trumpet, trombone, french horn, euphonium, tuba.
Pre-requisite: Audition and instructor consent, MUSC 36B or equivalent
Normal Grade Rules
1-2 units

MUSC 036C. Brass 3
Pre-requisite: Audition and instructor consent, MUSC 36C or equivalent
Normal Grade Rules
1-2 units

MUSC 036D. Brass 4
APPLIED LESSONS: Brass level 4. Required of BM brass majors every semester. Trumpet, trombone, french horn, euphonium, tuba.
Pre-requisite: Audition and instructor consent, MUSC 36D or equivalent
Normal Grade Rules
1-2 units

MUSC 037. Percussion
Required each semester of lower division percussion majors.
Pre-requisite: Audition or instructor consent.
Normal Grade Rules
1-2 units
MUSC 037A. Percussion 1
APPLIED LESSONS: Percussion level 1. Required of BM percussion majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 037B. Percussion 2
APPLIED LESSONS: Percussion level 2. Required of BM percussion majors every semester.
Pre-requisite: Audition and instructor consent, 37A or equivalent
Normal Grade Rules
1-2 units

MUSC 037C. Percussion 3
APPLIED LESSONS: Percussion level 3. Required of BM percussion majors every semester.
Pre-requisite: Audition and instructor consent, 37B or equivalent
Normal Grade Rules
1-2 units

MUSC 038. Composition
Required each semester of lower division composition majors. Works created incorporating traditional and twentieth century procedures.
Pre-requisite: Audition or instructor consent
Normal Grade Rules
1-2 units

MUSC 038B. Composition 1
APPLIED LESSONS: Composition level 1. Required of BM composition majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 038C. Composition 2
APPLIED LESSONS: Composition level 2. Required of BM composition majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 1A, MUSC 1B, MUSC 38B, with a B or better
Co-requisite: MUSC 2A and MUSC 2B
Normal Grade Rules
1-2 units

MUSC 038D. Composition 3
APPLIED LESSONS: Composition level 3. Required of BM composition majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 2A and MUSC 2B, MUSC 38C, with a B or better
Co-requisite: MUSC 3A and MUSC 3B
Normal Grade Rules
1-2 units

MUSC 038E. Composition 4
APPLIED LESSONS: Composition level 4. Required of BM composition majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 3A and MUSC 3B, MUSC 38D, with a B or better
Co-requisite: MUSC 4A and MUSC 4B
Normal Grade Rules
1-2 units

MUSC 039A. Jazz: Improvisation, Composition or Arranging 1
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 1. Required of BM Jazz Studies majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 039B. Jazz: Improvisation, Composition or Arranging 2
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 2. Required of BM Jazz Studies majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 39A or equivalent
Normal Grade Rules
1-2 units

MUSC 039C. Jazz: Improvisation, Composition or Arranging 3
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 3. Required of BM Jazz Studies majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 39B or equivalent
Normal Grade Rules
1-2 units

MUSC 039D. Jazz: Improvisation, Composition and Arranging 4
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 4. Required of BM Jazz Studies majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 39C or equivalent
Normal Grade Rules
1-2 units

MUSC 040A. Jazz Improvisation - I
Development of performance skills for lead-sheet interpretation: response and interplay, ear-training for improvisors, basic chord-scales and jazz vocabulary. Vocal, instrumental, and transcription exercises. In-class performance. Emphasis will be placed on blues, modal compositions, and simple song forms.
Pre/Corequisite: MUSC 1A, MUSC 1B and MUSC 25A; or equivalent.
MISC/Lab: Seminar 1 hour/activity 2 hours.
Normal Grade Rules
2 units

MUSC 041A. Applied Lyric Diction
Pronunciation and applied execution of correct diction in English and Italian for singers in a master class setting. Performance of specific literature of these languages with emphasis on correct usage of the International Phonetic alphabet for lyric diction.
Prerequisite: Instructor consent.
Normal Grade Rules
1 unit

MUSC 041B. Applied Lyric Diction
Pronunciation and applied execution of correct diction in French and German for singers in a master class setting. Performance of specific literature of these languages with emphasis on correct usage of the International Phonetic Alphabet for lyric diction.
Prerequisite: Instructor consent.
Normal Grade Rules
1 unit

MUSC 050A. ENS: Concert Choir
Ensemble. Large select choral ensemble, specializing in advanced a cappella and symphonic major works from all periods.
Prerequisite: Audition and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 051. ENS: University Chorales
ENS: Rehearsal and performance of choral masterpieces and music with wide popular appeal. Students involved in the University Chorales will participate in either the SJSU Women's Choruses, Men's Glee Club, or other specialized choral ensemble and will have the opportunity to study and perform high quality choral literature.
Prerequisite: Audition or Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 052. ENS: Opera Theater
Ens. Training and performance experience in the field of opera. Fully-staged productions of one-act and conventional length works of varying styles.
Prerequisite: Audition and instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit
MUSC 053. ENS: University Symphony Orchestra
Ens: Rehearsal and performance of standard orchestral and operatic repertory.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 054. ENS: Symphonic Band
ENS: Rehearsal and performance of large symphonic band repertory.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 055. ENS: Afro-Latin Ensemble
ENS: Performance of Afro-Latin jazz and popular music repertoires of the US, the Caribbean, and Latin America. Ensemble techniques and solo improvisation. Concert performances.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 056. ENS: Spartan Marching Band
ENS: Open by permission to all students who play saxophone, brass or percussion instruments. Performs at all home and selected away Spartan football games.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 057. ENS: Jazz Orchestra
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
2 units

MUSC 058. ENS: Choraliers
ENS: Small select chamber vocal group specializing in music from all periods, Renaissance to Contemporary.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 059. ENS: Afro-Latin Jazz Ensemble
ENS: Performance of Afro-Latin jazz and popular music repertoires of the US, the Caribbean, and Latin America. Ensemble techniques and solo improvisation. Concert performances.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060. ENS: Chamber Music
ENS: In-depth chamber music study and performance of standard repertoire with two or more instruments plus piano.
Prerequisite: Audition and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060A. ENS: Chamber Orchestra
ENS: Study and performance of advanced literature for small orchestra, with music selected from a broad range of stylistic periods and composers.
Prerequisite: Audition or Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060B. ENS: Chamber Orchestra
ENS: Study and performance of advanced literature for small orchestra, with music selected from a broad range of stylistic periods and composers.
Prerequisite: Audition or Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060C. ENS: Collegium Musicum
ENS: Reinforces music history studies through performance. Authenticating performance of pre-Classical music on period instruments and accurate vocal/instrumental practices. Vocal and instrumental, sacred and secular music performed.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060D. ENS: Percussion Ensemble
ENS: In-depth chamber music study and performance of standard repertoire with two or more instruments plus piano.
Prerequisite: Audition and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060E. ENS: Jazz Singer
ENS: Performance of advanced music literature for jazz choral and mixed chamber singing groups. Concert performances.
Prerequisite: Rehearsal and performance experience
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060F. ENS: Chamber Music
ENS: In-depth chamber music study and performance of standard repertoire with two or more instruments plus piano.
Prerequisite: Audition and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060G. ENS: Small Jazz Ensembles
ENS: Small-group jazz performance: standard literature, modern and classical, and informal (“head”) arrangements. In-class and/or public performances.
Prerequisite: MUSC 001A, MUSC 001B, MUSC 40A and MUSC 40B or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060H. ENS: Jazz Ensemble
ENS: Large jazz ensemble focused on learning standard repertoire, style, pedagogy and improvisation.
Prerequisite: Audition and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060I. ENS: Woodwind Ensemble
ENS: Chamber works for various woodwind combinations. Rehearsal and performance techniques for small chamber groups.
Prerequisite: Audition or Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060J. ENS: Saxophone Ensemble
ENS: Overview of music for saxophone ensemble for two to twenty players. All styles studied from Renaissance to Jazz.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060K. ENS: Trombone Ensemble
ENS: Chamber works for various brass instruments. Rehearsal and performance techniques for small chamber groups.
Prerequisite: Audition or Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060L. ENS: String Ensemble
ENS: Chamber works for various string combinations studied and performed. Rehearsal and performance techniques for small chamber groups.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060M. ENS: Saxophone Ensemble
ENS: Overview of music for saxophone ensemble for two to twenty players. All styles studied from Renaissance to Jazz.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit
MUSC 060T. ENS: Wind Ensemble
ENS: Major performing group open to all wind instrumentalists by audition. Select group that performs the most advanced and high quality contemporary and traditional literature for wind ensemble from all periods. Programming changes every semester. Performances can include but not be limited to state and national conferences.
Prerequisite: Audition and instructor consent
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 061. REP: Styles and Interpretation of Opera I
REP: Introduction to styles of opera composition and presentation focusing on opera scenes being presented by the Opera Theater.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 062. ENS: Opera Production
ENS: Hands-on training and experience in all phases of opera production.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 063. REP: Styles and Interpretation of Opera II
REP: Advanced styles of opera composition and presentation focusing on opera scenes being presented by the Opera Theater.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 081. Concert Listening I
Active involvement in the professional musical life of the campus and community through attending programs from the master list published each semester and writing five critical reviews.
Notes: Open to all university students.
Repeatable for credit
Credit / No Credit 1 unit

UPPER DIVISION

MUSC 100W. Written Communication II
Examines the process of critique, creative description, research, and professional communications central to the performing arts. Students develop writing skills through the study of varied formats focused on the arts.
Prerequisite: ENGL 1B (with a grade of C or better);
Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE: Z 3 units

MUSC 102. Orchestration
Ranges, sonorities, transposition and technical considerations of orchestral instruments. Performance of project for full orchestra as culminating activity.
Prerequisite: MUSC 13, MUSC 4A and MUSC 4B or equivalents
Notes: May be taken singly or in any sequence.
Normal Grade Rules 3 units

MUSC 103. Form and Analysis
Formal design and pitch structure of Western art music.
Prerequisite: MUSC 4A and MUSC 4B.
Normal Grade Rules 3 units

MUSC 104. Counterpoint
The study of the art of counterpoint from the sixteenth century to the present. Includes analysis, imitative and original compositions.
Prerequisite: MUSC 4A or MUSC 4B, placement examination.
Notes: May be taken singly or in any sequence. Emphasis may vary.
Normal Grade Rules 3 units

MUSC 106. Jazz Theory and Arranging
Principles and conventions of melody, harmony, and rhythm in jazz. Significant genres of jazz composition. Fundamentals of arranging for ensembles of various sizes. Composition and arrangement of exercises and pieces in prescribed genres. In-class performance of student works.
Prerequisite: MUSC 2A, MUSC 2B and MUSC 40A, or equivalent.
Normal Grade Rules 3 units

MUSC 106A. Jazz Arranging I
First in a two-semester sequence of jazz arranging and composition required of all jazz majors. Deals primarily with techniques involved in writing and arranging music for the small jazz ensemble and addresses skills used jazz composition.
Prerequisite: MUSC 2A, MUSC 2B, MUSC 6, MUSC 40A.
Normal Grade Rules 2 units

MUSC 106B. Jazz Arranging II
Second in a two-semester sequence of jazz arranging and composition required of all jazz majors. Deals primarily with techniques involved in writing and arranging music for the large jazz ensemble. Computer notation is required on all finished projects.
Prerequisite: MUSC 2A, MUSC 2B, MUSC 6, MUSC 106A.
Normal Grade Rules 2 units

MUSC 109. Film Scoring Techniques
Prerequisite: MUSC 102 or equivalent.
Notes: Emphasis may vary.
Normal Grade Rules 3 units

MUSC 110. Baroque and Classical Music History
Exploration and survey of the Baroque and Classical periods with study of styles, composers, works, music theory, performance practices, and cultural and intellectual history. Application of research and library skills through research assignments.
Prerequisite: MUSC 12, MUSC 3A (or equivalent), or instructor consent.
Normal Grade Rules 3 units

MUSC 111. Romantic and Modern Music History
Exploration and survey of Romantic and Modern classical music with study of styles, composers, works, music theory, performance practices, and cultural and intellectual history. Demonstration of research and library skills through a term paper.
Prerequisite: MUSC 110, or equivalent.
Normal Grade Rules 3 units

MUSC 112. Historical Periods in Western Music
In-depth study of individual periods of European music with the focus changing to cover Middle Ages, Renaissance, Baroque, Classical and Romantic.
Prerequisite: MUSC 110.
Normal Grade Rules 3 units

MUSC 116. Aspects of Twentieth Century Music
In-depth study of contemporary music from the various major musical cultures of the world including the European-American classical tradition. Content will vary depending upon national and international trends, compositional techniques and performance media. Formal analysis, listening and performance.
Prerequisite: MUSC 111 (or equivalent).
Note: Emphasis may vary. Offered only occasionally.
Repeatable for credit
Normal Grade Rules 3 units
MUSC 117. Music and Culture in Latin America
Traces development of musical traditions in Latin America. Analyzes formation of musical styles resulting from socio-political, cultural and economic processes. Prerequisite: Completion of one GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
- Normal Grade Rules
- GE V
- 3 units

MUSC 120. Worlds of Jazz
Course approaches jazz as part of American and global cultural history, exploring the changing social contexts in which jazz musicians in the US and abroad have worked and lived throughout the 20th century and today.
- Normal Grade Rules
- GE 5
- 3 units

MUSC 121. Music and Religious Experience
See RELS 121.
- Normal Grade Rules
- 3 units

MUSC 122A. Fundamental Techniques and Literature: Instrumental
Woodwinds: Flute, Clarinet, and Saxophone. Required for credential. Instrumental emphasis in music education must take two units including clarinet, saxophone, flute, oboe, and bassoon. Choral/general emphasis must take a minimum of one unit to include flute, clarinet and saxophone.
Prerequisite: Upper division standing,
- Misc/Lab: Activity 4 hours.
- Normal Grade Rules
- 1 unit

MUSC 122B. Fundamental Techniques and Literature: Instrumental
Woodwinds: double reeds and saxophone. Required for credential. Instrumental emphasis in music education must take two units including flute, clarinet, saxophone and double reeds. Choral/general emphasis must take a minimum of one unit including flute, clarinet, and saxophone.
Prerequisites: Upper Division Standing, and Instructor Consent
- Normal Grade Rules
- 1 unit

MUSC 123A. Fundamental Techniques and Literature: Instrumental
Upper Brass. Required for credential. Instrumental emphasis in music education must take two units including upper and lower brass. Choral/general emphasis must take a minimum of one unit of brass.
- Prerequisite: Upper division standing,
- Misc/Lab: Activity 4 hours.
- Normal Grade Rules
- 1 unit

MUSC 123B. Fundamental Techniques and Literature: Instrumental
Lower Brass. Required for credential. Instrumental emphasis in music education must take two units including upper and lower brass. Choral/general emphasis must take a minimum of one unit of upper brass.
Prerequisite: Upper Division Standing and Instructor Consent
- Normal Grade Rules
- 1 unit

MUSC 124. Special Topics in Music History/Literature
Content varies to allow presentation of one-time courses by specialists from artist-faculty and guests.
Prerequisite: Upper division standing or instructor consent.
- Repeatable for credit
- Normal Grade Rules
- 1-3 units

MUSC 125D. Fundamental Techniques and Literature: Instrumental
Percussion. Required for credential.
- Prerequisite: Upper division standing,
- Misc/Lab: Activity 2 hours.
- Normal Grade Rules
- 1 unit

MUSC 126. Marching Band Techniques
Methods and materials of marching band instruction. Techniques of show development, arranging, drill design, charting, and drill instruction. Principles of band administration, such as budget management, purchasing, and program development. Required for credential.
Prerequisite: Upper division standing and instructor consent.
- Notes: Offer through Extended Studies.
- Normal Grade Rules
- 1 unit

MUSC 127A. Fundamental Techniques and Literature: Instrumental
Upper Strings. Required for credential. Instrumental emphasis in music education must take two units including upper and lower strings. Choral/general emphasis must take a minimum of one unit of strings.
Prerequisite: Upper division standing,
- Misc/Lab: Activity 4 hours.
- Normal Grade Rules
- 1 unit

MUSC 127B. Fundamental Techniques and Literature: Instrumental
Lower Strings. Required for credential. Instrumental emphasis in music education must take two units including upper and lower strings. Choral/general emphasis must take a minimum of one unit of upper strings.
Prerequisite: Upper Division Standing and Instructor Consent
- Normal Grade Rules
- 1 unit

MUSC 129. Electro-Acoustics
Incorporating current music technology and instrumentation in creating advanced works and projects. Required each semester of upper division electro-acoustic majors.
Prerequisite: Audition or instructor consent
- Repeatable for credit
- Normal Grade Rules
- 1-2 units

MUSC 129A. Electro-Acoustics 5
APPLIED LESSONS: Electro-acoustics level 5, incorporating current music technology and instrumentation into projects. For music technology majors.
- Pre-requisite: Audition and instructor consent, MUSC 29D or equivalent
- Normal Grade Rules
- 1-2 units

MUSC 129B. Electro-Acoustics 6
APPLIED LESSONS: Electro-acoustics level 6, incorporating current music technology and instrumentation into projects. For music technology majors.
- Pre-requisite: Audition and instructor consent, MUSC 129A or equivalent
- Normal Grade Rules
- 1-2 units

MUSC 129C. Electro-Acoustics 7
APPLIED LESSONS: Electro-acoustics level 7, incorporating current music technology and instrumentation into projects. For music technology majors.
- Pre-requisite: Audition and instructor consent, MUSC 129B or equivalent
- Normal Grade Rules
- 1-2 units

MUSC 129D. Electro-Acoustics 8
APPLIED LESSONS: Electro-acoustics level 8, incorporating current music technology and instrumentation into projects. For music technology majors.
- Pre-requisite: Audition and instructor consent, MUSC 129C or equivalent
- Normal Grade Rules
- 1-2 units
MUSC 130. Piano
Required each semester of upper division piano majors. Continuation of MUSC 30. Study and performance of selections comparable to Bach Preludes and Fugues from Well-Tempered Clavier; Beethoven Sonata, Op. 31 No. 3; Chopin Ballade in A-flat and Debussy Preludes. Pre-requisite: Audition or instructor consent. Normal Grade Rules 1-2 units

MUSC 130A. Piano 5
APPLIED LESSONS: Piano level 5. Lessons required of BM piano majors every semester. Pre-requisite: Audition and instructor consent, MUSC 30D or equivalent. Normal Grade Rules 1-2 units

MUSC 130B. Piano 6
APPLIED LESSONS: Piano level 6. Lessons required of BM piano majors every semester. Pre-requisite: Audition and instructor consent, MUSC 130A or equivalent. Normal Grade Rules 1-2 units

MUSC 130C. Piano 7
APPLIED LESSONS: Piano level 7. Lessons required of BM piano majors every semester. Pre-requisite: Audition and instructor consent, MUSC 130B or equivalent. Normal Grade Rules 1-2 units

MUSC 130D. Piano 8
APPLIED LESSONS: Piano level 8. Lessons required of BM piano majors every semester. Pre-requisite: Audition and instructor consent, MUSC 130C or equivalent. Normal Grade Rules 1-2 units

MUSC 131. Keyboard
APPLIED LESSONS: Harpsichord or organ. Required of BM piano majors every semester. Upper division. Pre-requisite: Audition or instructor consent, 31D or equivalent. Normal Grade Rules 1-2 units

MUSC 131A. Harpsichord or Organ 5
APPLIED LESSONS: Harpsichord or organ level 5. Required of BM piano majors every semester. Pre-requisite: Audition and instructor consent, MUSC 31D or equivalent. Normal Grade Rules 1-2 units

MUSC 131B. Harpsichord or Organ 6
APPLIED LESSONS: Harpsichord or organ level 6. Required of BM piano majors every semester. Pre-requisite: Audition and instructor consent, MUSC 131A or equivalent. Normal Grade Rules 1-2 units

MUSC 131C. Harpsichord or Organ 7
APPLIED LESSONS: Harpsichord or organ level 7. Required of BM piano majors every semester. Pre-requisite: Audition and instructor consent, MUSC 131B or equivalent. Normal Grade Rules 1-2 units

MUSC 131D. Harpsichord or Organ 8
APPLIED LESSONS: Harpsichord or organ level 8. Required of BM piano majors every semester. Pre-requisite: Audition and instructor consent, MUSC 131C or equivalent. Normal Grade Rules 1-2 units

MUSC 132. Voice
Required each semester of upper division voice majors. Continuation of MUSC 32. Study of more advanced repertoire and techniques. Pre-requisite: Audition or instructor consent. Normal Grade Rules 1-2 units

MUSC 133A. Voice 5
APPLIED LESSONS: Voice level 5. Required of BM vocal majors every semester. Upper division. Pre-requisite: Audition and instructor consent, 33D or equivalent. Repeatable for credit Normal Grade Rules 1-2 units

MUSC 133B. Voice 6
APPLIED LESSONS: Voice level 6. Required of BM vocal majors every semester. Upper division. Pre-requisite: Audition and instructor consent, MUSC 133A or equivalent, MUSC 25C or equivalent. Normal Grade Rules 1-2 units

MUSC 133C. Voice 7
APPLIED LESSONS: Voice level 7. Required of BM vocal majors every semester. Pre-requisite: Audition and instructor consent, MUSC 133B or equivalent. Normal Grade Rules 1-2 units

MUSC 133D. Voice 8
APPLIED LESSONS: Voice level 8. Required of BM vocal majors every semester. Upper division. Pre-requisite: Audition and instructor consent, MUSC 133C or equivalent. Normal Grade Rules 1-2 units

MUSC 134. Strings
Required each semester of upper division string majors. Violin: All major and minor scales and arpeggios in three octaves; double stops; Kreutzer, Fiorillo, Rode etudes; Bach unaccompanied sonatas and standard concert repertoire, including concerti and sonatas by Vivaldi, Bach, Mozart, Mendelssohn, Beethoven and Brahms. Viola: All major and minor scales in three octaves; double stops; standard etudes including Kreutzer, Mazas, Bruni, Bach suites; all standard repertoire including Block suites, Brahms, Hindemith and Schubert. Cello: All major and minor scales and arpeggios, Samiand Reinshagen, Bile, Storch, Hrabe etudes. Includes solo literature of Bottesini, Dittersdorf, Dragonetti, Koussevitzky, Hindemith, Marcello, Vivaldi and standard orchestral literature. Harp: Literature and techniques, with solo and ensemble performances. Etudes by Salzedo, Lariviere and standard concert works comparable to Ravel Introduction and Allegro, Salzedo Preludes; Prescetti Sonata and Pierre Impromptu CapriGuitar: Literature and technique of the guitar including studies by Shearer, Casassi, Guilian, Torrega and Segovia, and solos by J. S. Bach, Carulli, De Visee, Fernando Sor and Paganini. Pre-requisite: Audition or instructor consent. Normal Grade Rules 1-2 units

MUSC 134A. Strings 5
APPLIED LESSONS: Strings level 5. Required of BM string majors every semester. Upper division. Pre-requisite: Audition and instructor consent, MUSC 34D or equivalent. Normal Grade Rules 1-2 units

MUSC 134B. Strings 6
APPLIED LESSONS: Strings level 6. Required of BM string majors every semester. Upper division. Pre-requisite: Audition and instructor consent, MUSC 134A or equivalent, MUSC 25C or equivalent. Normal Grade Rules 1-2 units

MUSC 134C. Strings 7
APPLIED LESSONS: Strings level 7. Required of BM string majors every semester. Upper division. Pre-requisite: Audition and instructor consent, MUSC 135B or equivalent. Normal Grade Rules 1-2 units
MUSC 134D. Strings 8
APPLIED LESSONS: Strings level 8. Required of BM string majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 134C or equivalent
Normal Grade Rules
1-2 units

MUSC 135. Woodwinds
Prerequisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 135A. Woodwinds 5
APPLIED LESSONS: Woodwinds level 5. Required of BM woodwind majors every semester. Flute, oboe, saxophone, clarinet or bassoon. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 350 or equivalent
Normal Grade Rules
1-2 units

MUSC 135B. Woodwinds 6
Pre-requisite: Audition and instructor consent, MUSC 25C or equivalent, MUSC 135A or equivalent
Normal Grade Rules
1-2 units

MUSC 135C. Woodwinds 7
Pre-requisite: Audition and instructor consent, MUSC 135B or equivalent
Normal Grade Rules
1-2 units

MUSC 135D. Woodwinds 8
Pre-requisite: Audition and instructor consent, MUSC 135C or equivalent
Normal Grade Rules
1-2 units

MUSC 136. Brass
Prerequisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 136A. Vocal-Instrumental Improvisation
Advanced vocal and instrumental private lessons. Development of performing skills in various styles, with emphasis on soloing, reading lead sheets and advanced levels of musicianship and musicality.
Prerequisite: Instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 136B. Brass 5
Pre-requisite: Audition and instructor consent, MUSC 360 or equivalent
Normal Grade Rules
1-2 units

MUSC 136C. Brass 6
Pre-requisite: Audition and instructor consent, MUSC 25C or equivalent, MUSC 136B or equivalent
Normal Grade Rules
1-2 units

MUSC 136D. Brass 7
Pre-requisite: Audition and instructor consent, MUSC 136C or equivalent
Normal Grade Rules
1-2 units

MUSC 136E. Brass 8
Pre-requisite: Audition and instructor consent, MUSC 136D or equivalent
Normal Grade Rules
1-2 units

MUSC 137. Percussion
Required each semester of upper division percussion majors. Performance on timpani, percussion and snare drum as well as the accessory percussion instruments. Timpani etudes: Goodman, Firth, Cirone and the classical timpani repertoire. Keyboard repertoire includes Orchestral Mallet Player by Cirone. Goldberg etudes, standard orchestral literature plus 4-mallet literature. Snare drum methods of Pedomski, Whaley and Cirone and the standard orchestral literature.
Prerequisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 137A. Percussion 5
APPLIED LESSONS: Percussion level 5. Required of BM percussion majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, 37D or equivalent
Repeatable for credit
Normal Grade Rules
1-2 units

MUSC 137B. Percussion 6
Pre-requisite: Audition and instructor consent, MUSC 137A or equivalent, MUSC 25C or equivalent
Normal Grade Rules
1-2 units

MUSC 137C. Percussion 7
Pre-requisite: Audition and instructor consent, 137B or equivalent
Normal Grade Rules
1-2 units

MUSC 137D. Percussion 8
Pre-requisite: Audition and instructor consent, MUSC 137C or equivalent
Normal Grade Rules
1-2 units
MUSC 138A. Composition/Arranging - Improvised Music
Private studio lessons. Advanced applications of the process needed to bring personal musical ideas and concepts to realities, such as compositions or arrangements in concert performance and video productions.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 138B. Composition 5
APPLIED LESSONS: Composition level 5. Required of BM composition majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 4A and MUSC 4B, MUSC 38E
Normal Grade Rules
1-2 units

MUSC 138C. Composition 6
Pre-requisite: Audition and instructor consent, MUSC 25C or equivalent, MUSC 138B
Normal Grade Rules
1-2 units

MUSC 138D. Composition 7
APPLIED LESSONS: Composition level 7. Required of BM composition majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 102, MUSC 103, MUSC 104 and MUSC 138C
Normal Grade Rules
1-2 units

MUSC 138E. Composition 8
Pre-requisite: Audition and instructor consent, MUSC 138D
Normal Grade Rules
1-2 units

MUSC 139. Music Systems/History
Applied studies in music systems and history areas, leading to an approved senior thesis project.
Prerequisite: Upper division standing, area and instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 139A. Jazz: Improvisation, Composition or Arranging 5
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 5.
Required of BM Jazz Studies majors every semester. Upper Division.
Pre-requisite: Audition and instructor consent, MUSC 39D or equivalent
Normal Grade Rules
1-2 units

MUSC 139B. Jazz: Improvisation, Composition or Arranging 6
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 6.
Required of BM Jazz Studies majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 139A or equivalent, MUSC 25C or equivalent, MUSC 27A
Normal Grade Rules
1-2 units

MUSC 139C. Jazz: Improvisation, Composition or Arranging 7
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 7.
Required of BM Jazz Studies majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 139B or equivalent
Normal Grade Rules
1-2 units

MUSC 139D. Jazz: Improvisation, Composition or Arranging 8
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 8.
Required of BM Jazz Studies majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 139C or equivalent
Normal Grade Rules
1-2 units

MUSC 140B. Jazz Improvisation-II
Continuation of 40A in greater depth and complexity: developing coherent solos and musical conversations, building bebop vocabulary, working with alternate melodic and rhythmic resources. Vocal, instrumental, and transcription exercises. In-class performance. Emphasis will be placed on bebop compositions, complex song forms, and rhythm changes.
Pre/Corequisite: MUSC 2A, MUSC 2B and MUSC 40A, or equivalent.
Musc/Lab: Seminar 1 hour/activity 2 hours.
Repeatable for credit
Normal Grade Rules
2 units

MUSC 140C. Jazz Improvisation-III
Continuation of MUSC 140B in greater depth and complexity: advanced transcription projects, style analysis, developing personal improvisatory style, advanced rhythmic, melodic, and harmonic techniques. Emphasis will be placed on complex jazz compositions primarily those of Wayne Shorter, Chick Corea, and Tom Harrell.
Pre/Corequisite: MUSC 2A and MUSC 2B and MUSC 140B, or equivalent.
Musc/Lab: Seminar 1 hour/activity 2 hours.
Repeatable for credit
Normal Grade Rules
2 units

MUSC 142. REP: Art Song Repertoire
Content varies each semester, with focus on German, French, Italian and Spanish, English and American, or Russian, Polish, Slavic and Scandinavian literature. Performance practice, language, style and history.
Prerequisite: Upper division standing or instructor consent.
Prerequisite: Seminar 1 hour/activity 2 hours.
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 143. REP: Collaborative Keyboard Performance
For piano majors who wish to broaden their pianistic skills by performing with singers and instrumentalists both in studio sessions and recital situations. A maximum of four units may be repeated.
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 144. REP: Solo Lit., Performance, Pedagogy
Performance of vocal or piano literature studied in studio lessons, with discussion of technique, pedagogy, recital preparation and interpretive, stylistic and linguistic aspects of literature in a master class setting to develop confidence and serve as a forum for exchange of ideas.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 145. REP: Performance Concepts
Content varies to allow presentation of one-time courses by specialists from artist-faculty and guests. Repeatable for up to 4 units of credit when topic changes.
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
2 units

MUSC 146A. Pedagogy - Piano
For piano majors and established teachers who primarily wish to teach. Teaching techniques and application of these skills from elementary to most advanced levels.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
2 units

MUSC 146B. Pedagogy - Percussion
Two projects chosen from the following areas: conducting, composition, clinics, orchestral repertoire, lesson plans, article, book or research projects.
Prerequisite: Upper division percussion majors only.
Normal Grade Rules
1 unit
MUSC 147A. Beginning Conducting
Basic choral and instrumental conducting techniques. Prerequisite: Upper division standing or instructor consent. Misc/Lab: Seminar 1 hour/activity 2 hours. Normal Grade Rules 2 units

MUSC 147B. Advanced Conducting: Instrumental
Advanced instrumental conducting techniques. Rehearsal and performance of instrumental groups under supervision. Prerequisite: MUSC 147A or instructor consent. Misc/Lab: Seminar 1 hour/activity 2 hours. Normal Grade Rules 2 units

MUSC 147C. Advanced Conducting: Choral
Advanced choral conducting techniques. Rehearsal and performance of choral groups under supervision. Prerequisite: MUSC 147A or equivalent. Repeatable for credit Normal Grade Rules 2 units

MUSC 148A. Improvisational Traditions of the World - Africa and Diaspora
Selected topics in performance practice and social context of improvisational musics from African and African-Diaspora cultures: selected genres from Sub-Saharan Africa and their relations to Diasporic traditions in the Americas, the Caribbean, and elsewhere. In-class and/or public performances. Pre/Corequisite: MUSC 2A and MUSC 2B or equivalent. Misc/Lab: Seminar 1 hour/activity 2 hours. Repeatable for credit Normal Grade Rules 2 units

MUSC 148B. Improvisational Traditions of the World - Asia
Selected topics in performance and social context of improvisational musics of Asia: gamelan and/or other selected genres. In-class and/or public performances. Pre/Corequisite: MUSC 2A and MUSC 2B or equivalent. Misc/Lab: Seminar 1 hour/activity 2 hours. Normal Grade Rules 2 units

MUSC 150A. ENS: Concert Choir
Ensemble. Large select choral ensemble, specializing in advanced a cappella and symphonic major works from all periods. Prerequisite: MUSC 50A or equivalent, audition and instructor consent. Repeatable for credit Normal Grade Rules 1 unit

MUSC 151. ENS: University Chorales
ENS: Rehearsal and performance of choral masterpieces and music with wide popular appeal. Students involved in the University Chorales will participate in either the SJSU Women's Chorus, Men's Glee Club, or other specialized choral ensemble and will have the opportunity to study and perform high quality choral literature. Prerequisite: MUSC 51 or equivalent, audition and instructor consent Repeatable for credit Normal Grade Rules 1 unit

MUSC 152. ENS: Opera Theater
ENS: Training and performance experience in the field of opera. Fully-staged productions of one-act and conventional length works of varying styles. Prerequisite: MUSC 52 or equivalent. Audition and instructor consent Repeatable for credit Normal Grade Rules 1 unit

MUSC 153. ENS: University Symphony Orchestra
ENS: Rehearsal and performance of standard orchestral and operatic repertory. Prerequisite: MUSC 053 or equivalent. Audition and instructor consent Repeatable for credit Normal Grade Rules 1 unit

MUSC 154. ENS: Symphonic Band
ENS: Rehearsal and performance of large symphonic band repertory. Prerequisite: MUSC 54 or equivalent. Audition and instructor consent Repeatable for credit Normal Grade Rules 1 unit

MUSC 156. ENS: Spartan Marching Band
ENS: Open by permission to all students who play saxophone, brass or percussion instruments. Performs at all home and selected away Spartan football games. Prerequisite: MUSC 56 or equivalent. Audition and instructor consent Repeatable for credit Normal Grade Rules 2 units

MUSC 157. ENS: Jazz Orchestra
ENS: Big band jazz performance for instrumentalists and singers. Classic and new repertoire. Concert performances. Prerequisite: MUSC 057 or equivalent. Audition and instructor consent Repeatable for credit Normal Grade Rules 1 unit

MUSC 159. ENS: Afro-Latin Jazz Ensemble
ENS: Performance of Afro-Latin jazz and popular music repertoires of the US, the Caribbean, and Latin America. Ensemble techniques and solo improvisation. Concert performances. Prerequisite: MUSC 59 or equivalent. Audition and instructor consent Repeatable for credit Normal Grade Rules 1 unit

MUSC 160A. ENS: Choraliers
ENS: Small select chamber vocal group specializing in music from all periods, Renaissance to Contemporary. Prerequisite: 60A or equivalent. Audition and instructor consent Repeatable for credit Normal Grade Rules 1 unit

MUSC 160B. ENS: Chamber Orchestra
Study and performance of advanced literature for small orchestra, with music selected from a broad range of stylistic periods and composers. Prerequisite: MUSC 60B or equivalent. Instructor consent Repeatable for credit Normal Grade Rules 1 unit

MUSC 160C. ENS: Chamber Music
ENS: In-depth chamber music study and performance of standard repertoire with two or more instruments plus piano. Prerequisite: Audition and instructor consent Repeatable for credit Normal Grade Rules 1 unit

MUSC 160D. ENS: Collegium Musicum
ENS: Reinforces music history studies through performance. Authenticating performance of pre-Classical music on period instruments and accurate vocal/instrumental practices. Vocal and instrumental, sacred and secular music performed. Prerequisite: MUSC 60D or equivalent. Instructor consent Repeatable for credit Normal Grade Rules 1 unit

MUSC 160E. ENS: Jazz Singers
Performance of advanced literature for chamber jazz chorus in concerts, festivals, and special events. Performance techniques, improvisation, musicianship and studio-recording techniques. Prerequisite: MUSC 60E or equivalent. Instructor consent Repeatable for credit Normal Grade Rules 1 unit
MUSC 160F. ENS: Small Jazz Ensembles
Small-group jazz performance: standard literature, informal ("head") arrangements. In-class and/or public performances.
Prerequisite: MUSC 1A, MUSC 1B and MUSC 40A, MUSC 40B or equivalents.
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 160C. ENS: Pep Band
Limited to twenty-five woodwind, brass and percussion players, performs at home Spartan basketball games and certain campus functions.
Prerequisite: 60G or equivalent. Instructor consent.
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 160H. ENS: Percussion Ensemble
Performing class consisting of percussion majors. Master classes during fall semester.
Prerequisite: 60H or equivalent. Instructor consent.
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 160I. ENS: Jazz Ensemble
ENS: Large jazz ensemble focused on learning standard repertoire, style, pedagogy and improvisation.
Prerequisite: Audition and instructor consent
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 160J. ENS: String Ensemble
Chamber works for various string combinations studied and performed. Rehearsal and performance techniques for small chamber groups.
Prerequisite: 60J or equivalent. Instructor consent.
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 160K. ENS: Brass Ensemble
Performance of duet, trio, quartet and quintet literature for mixed and homogenous brass instruments. Literature used represents all style periods with either original or transcription materials.
Prerequisite: 60K or equivalent. Instructor consent.
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 160L. Woodwind Ensemble
Chamber works for various woodwind combinations. Rehearsal and performance techniques for small chamber groups.
Prerequisite: 60L or equivalent. Instructor consent.
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 160M. ENS: Saxophone Ensemble
Overview of music for saxophone ensemble for two to twenty players. All styles studied from Renaissance to Jazz.
Prerequisite: 60M or equivalent. Instructor consent.
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 160O. Trombone Ensemble
Rehearsal and performance of literature for trombone ensemble. Weekly meetings will also include discussion of brass related topics.
Prerequisite: MUSC 60O or equivalent. Instructor consent
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 160T. Wind Ensemble
Major performing group open to all wind instrumentalists by audition. Select group that performs the most advanced and high quality contemporary and traditional literature for wind ensemble from all periods.
Prerequisites: MUSC 60T or equivalent. Instructor's Consent
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 160P. Styles and Interpretation of Opera I
REP: Introduction to styles of opera composition and presentation focusing on opera scenes being presented by the Opera Theater.
Prerequisite: 61 or equivalent. Audition and instructor consent.
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 161A. ENS: Opera Production
ENS: Hands-on training and experience in all phases of opera production.
Prerequisite: MUSC 62 or equivalent. Audition and instructor consent.
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 161B. Styles and Interpretation of Opera II
REP: Advanced styles of opera composition and presentation focusing on opera scenes being presented by the Opera Theater.
Prerequisite: MUSC 61 or equivalent. Audition and instructor consent.
Repeatalbe for credit
Normal Grade Rules
1 unit

MUSC 161C. REP: Advanced styles of opera composition and presentation focusing on opera scenes being presented by the Opera Theater.
Prerequisite: MUSC 61 or equivalent. Audition and instructor consent.
Repeatalbe for credit
Normal Grade Rules
1 unit

GE: R
3 units

MUSC 167. Electro-Acoustic Music I
Overview of electro-acoustic studio production/research techniques and hands-on study of analog, digital and hybrid synthesis techniques related to composition and performance. Introduction to signal processing, MIDI and basic software/hardware systems applications.
Prerequisite: MUSC 4A and MUSC 4B or instructor consent.
Repeatalbe for credit
Normal Grade Rules
3 units

MUSC 168. Electro-Acoustic Music II
Continuation of MUSC 167, covering advanced synthesis, programming and production. Development of strategies for sound design and music composition toward applications in studio and performance environments.
Introduction to algorithmic composition.
Prerequisite: MUSC 167 or instructor consent.
Normal Grade Rules
3 units

MUSC 169. Digital Synthesis
Techniques of direct digital synthesis and digital signal processing as related to composition, performance and research in new music. In-depth study of hardware and software instrument configurations as applied to various composition and processing algorithms.
Prerequisite: MUSC 168 (or equivalent) or instructor consent.
Normal Grade Rules
3 units

MUSC 170A. Fundamentals of Sound Recording
Beginning techniques in studio sound and music recording: terminology, tape editing, overdubbing, microphone technique and production techniques.
Prerequisite: MUSC 1A and MUSC 1B.
Normal Grade Rules
3 units

MUSC 170B. Intermediate Sound Recording
Intermediate sound recording and processing techniques in audio production: emphasis on microphone techniques, analog processing and multi-track production.
Prerequisite: MUSC 170A or instructor consent.
Normal Grade Rules
3 units
MUSC 170C. Advanced Sound Recording Production
Advanced production techniques in multi-track recording and digital recording, including sound construction, modulation and digital processing. Emphasis on application of techniques to group productions in synchronized audio-visual media.
Prerequisite: MUSC 170B or instructor consent.
Normal Grade Rules
3 units

MUSC 172. The Arts in U.S. Society
See CA 172.
Normal Grade Rules
GE: S
3 units

MUSC 173. Thinking About Contemporary World Arts
See CA 173.
Normal Grade Rules
GE: V
3 units

MUSC 180. Individual Studies
Prerequisite: Upper division standing and instructor and director consent. May be repeated up to 4 units of credit.
Repeatable for credit
Credit / No Credit
1-2 units

MUSC 181. Concert Listening II
Required active involvement of all music majors in the professional musical life of the campus and community through attending programs from the master list published each semester and writing five critical reviews.
Prerequisite: Upper division music major.
Repeatable for credit
Credit / No Credit
1 unit

MUSC 182. Senior Project
Senior capstone project for B.A. in music. By advisement and according to degree requirements either a senior thesis, lecture/demonstration or lecture/recital.
Prerequisite: Upper division standing, instructor consent and area approval.
Credit / No Credit
1 unit

MUSC 185A. Music for Children
Music fundamentals for the classroom teacher. Singing, playing instruments, movement, reading notation, creating music. Kodaly, Orff, Dalcroze, techniques emphasized with multicultural approach. Technology for elementary music through lab experience.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MUSC 186. Singing for Music Theatre
Theoretical and practical study of music as an extension, intensification and completion of the drama. Musical exercises and scenes, emphasizing singing, to introduce the functions and potentials of music in music theatre.
Prerequisite: MUSC 10B, MUSC 26A and MUSC 26B.
Normal Grade Rules
2 units

MUSC 190A. Honors Project
Prerequisite: Upper division standing; instructor and director consent.
Notes: MUSC 190B must be completed before total of 3 units is granted.
Credit / No Credit
1 unit

MUSC 190B. Honors Project
Prerequisite: MUSC 190A.
Credit / No Credit
2 units

MUSC 200. Methods of Music Research & Writing
Use and evaluation of resources for music research and writing; problems in critical writing and music literature history.
Normal Grade Rules
3 units

MUSC 201. Seminar in Music History
Research and analytical studies on selected topics in music history. May be repeated once for elective credit.
Prerequisite: MUSC 200 and classified standing.
Normal Grade Rules
3 units

MUSC 202. Seminar in Music Systems & Theory
Research and analytical studies of selected theoretical and applied compositional techniques in music.
Prerequisite: MUSC 200 and classified standing.
Normal Grade Rules
3 units

MUSC 203. Seminar in Style & Performance Practices
Study of the history of performance practices and applications in contemporary performances. May be repeated once for elective credit.
Prerequisite: MUSC 200 and classified standing.
Normal Grade Rules
3 units

MUSC 204. Materials for Graduate Music Studies
This course presents the foundation knowledge and practical skills of music systems and music history for graduate music studies.
Normal Grade Rules
3 units

MUSC 220. Seminar in Advanced Conducting
Problems in conducting, advanced score reading and interpretation.
Prerequisite: Two semesters of undergraduate conducting (or equivalent) and instructor consent.
Normal Grade Rules
2 units

MUSC 221. Seminar in Jazz History
Research and analytical studies on selected topics in jazz history.
Prerequisite: MUSC 200 and classified standing.
Normal Grade Rules
3 units

MUSC 222. Special Topics in Music
Study of specialized subjects in music history, theory, performance or education.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
1-3 units

MUSC 224. Supervised Graduate Study
Prerequisite: Audition and/or consent of instructor and graduate advisor. Repeatable for credit.
Repeatable for credit
Normal Grade Rules
1-2 units

MUSC 232. Advanced Field Experience--Pedagogy
Provides opportunity for the qualified graduate student to be involved in planning and assisting in teaching college courses in music. The work is carried on in conjunction with the regular college teacher and must have this supervising teacher's approval.
Repeatable for credit
Credit / No Credit
1 unit

MUSC 290R. Thesis/Composition/Project Supervision
Continued work on thesis, composition, or project
Pre-Requisite: Outstanding RP grade in a preceding semesters in a thesis, composition, or project class.
Mandatory CR/NC/RP
1 unit
MUSC 298. Special Study
Special study in the field of music (excluding applied instruction).
Prerequisite: Consent of instructor, graduate advisor and the School of Music director.
Repeatable for credit
Credit / No Credit
1-2 units

MUSC 299. Master’s Thesis, Recital or Composition
Prerequisite: Admission to candidacy and consent and approval of graduate study instructor, graduate advisor and School of Music department chair.
Mandatory CR/NC/RP
1-3 units

MUSIC EDUCATION

UPPER DIVISION

MUED 140. Foundations of Music Education
Survey of music education’s historical, philosophical, psychological and sociological foundations.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

MUED 142. Introduction to Music Education: Early Field Experience
Introduction to teaching music in the public schools. Includes in-school paraprofessional work in approved music program under supervision of university faculty and master teachers.
Prerequisite: Sophomore standing.
Credit / No Credit
1 unit

MUED 170A. Teaching Instrumental Music
Materials, literature, methods and pedagogy for teachers of instrumental music.
Normal Grade Rules
2 units

MUED 170B. Teaching Choral Music
Materials, literature, methods and pedagogy for teachers of choral music.
Prerequisite: Upper division standing.
Normal Grade Rules
2 units

MUED 175. Practicum in Music Education
Practical experience in music education including pedagogy, classroom management and practice teaching.
Prerequisite: MUED 140, MUED 170, MUED 147A, MUED 147B or instructor consent.
Normal Grade Rules
3 units

MUED 184I. Student Teaching for Music Individualized Interns
Supervised student teaching in music class(es) in the public school where the student is employed as an Individualized Intern.
Prerequisite: Admission to Single Subject Credential Program; music advisor and Single Subject Coordinator consent.
Repeatable for credit
Credit / No Credit
2-4 units

MUED 184Y. Student Teaching II - Classroom Teaching
Minimum 80-120 class periods of classroom, teaching lab or field teaching in music subjects, grades K-12. Includes seminar.
Prerequisite: Upper division standing and joint approval of major and education departments.
Repeatable for credit
Credit / No Credit
4-6 units

MUED 184Z. Student Teaching III-Classroom Teaching
To be taken concurrently or in different semester than 184Y. May be in a different subject or in different school and will be at a different grade level.
Prerequisite: Upper division standing and joint approval of major and education departments.
Repeatable for credit
Credit / No Credit
4-6 units

GRADUATE

MUED 221. Foundations of Music Education
This course provides an introduction to graduate studies in music education. Topics include: historical contexts; philosophy; sociology; aesthetics; psychology; and learning theory in music education.
Prerequisite: Graduate student standing and instructor consent.
Normal Grade Rules
3 units

MUED 228. Research in Music Education
This course examines research in music education, concentrating on qualitative, quantitative, and historical methodologies. Attention will focus on applications of research within music education, and the course will culminate in a capstone project using one of these research methodologies.
Prerequisite: Graduate student standing, instructor consent.
Normal Grade Rules
3 units

MUED 232. Directions and Issues in Music Education
This course examines current issues and directions in music education. Topics include historical, sociological, and philosophical contexts for music education; learning and development issues; curriculum and pedagogy; assessment; applied research in music education, and leadership development.
Prerequisite: Graduate student standing and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

MUED 290R. Thesis/Composition/Project Supervision
Continued work on thesis or project
Pre-requisite: Outstanding RP grade in a preceding semesters in a thesis, composition, or project class.
Mandatory CR/NC/RP
1 unit

MUED 370A. Methodology for Music Educators: Elementary K-8
Study of Kodaly, Orff and Dalcroze elementary methods including a multicultural emphasis. A review of materials for the comprehensive elementary music curriculum. Peer teaching/field observations of classrooms, choral and instrumental classes required.
Prerequisite: Upper division standing or instructor consent.
Notes: Required for certification.
Normal Grade Rules
2 units

MUED 370B. Methodology for Music Educators: Secondary
Prepares secondary music instructors to teach non-performance courses, including music appreciation, theory, technology, history and multicultural survey. Peer teaching/field observations required. Organization of comprehensive secondary music departments included.
Prerequisite: MUED 370A.
Normal Grade Rules
2 units
Nuclear Science Program Courses

NUCLEAR SCIENCE

UPPER DIVISION

NUCS 120A. Electronics, Data Acquisition & Analysis
See PHYS 120A.
Normal Grade Rules
3 units

NUCS 121S. Radiation Safety
Health hazards involved in working with radioactive substances. Physical nature of hazards, biological effects, standards of permissible exposures, safety precautions and protection techniques. Two units meet State of California recommendations.
Prerequisite: Lower division calculus, chemistry and physics.
Normal Grade Rules
1-2 units

NUCS 123. Radiation and Biological Systems
Radiation-induced chemical changes in biologically important molecules, in simple cell systems and in complex mammalian systems, including humans.
Prerequisite: CHEM 8, CHEM 112A, college level biology course or instructor consent.
Pre/Corequisite: NUCS 121S or NUCS 126.
Notes: Offered only occasionally.
Normal Grade Rules
2 units

NUCS 126. Introduction to Nuclear Science
See CHEM 126.
Normal Grade Rules
3 units

NUCS 127. Nuclear Science Lab
See CHEM 127.
ABC/No Credit
3 units

GRADUATE

NUCS 205. Environmental Monitoring
Radiation and radioactivity in the environment. Natural and man-made sources, radiation detection techniques and the problems and pitfalls in environmental sampling and analysis. Examples of typical measurement problems and methodologies.
Prerequisite: NUCS 121S, NUCS 123, NUCS 126 or instructor consent.
Normal Grade Rules
2 units

NUCS 206. Advanced Nuclear Instrumentation
Radiation detection and measurement. The laboratory builds on techniques learned in NUCS 127, leading students to build innovative detector systems for special applications.
Prerequisite: NUCS 127 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

NUCS 208A. Advanced Radiation Protection
Discussion of laboratory, industrial and environmental sources of radiation; in-depth review of the interactions of radiation with matter; concepts of radiation dose from external and internal sources; review of radiation measurements, radiation protection standards and procedures.
Prerequisite: NUCS 121S and NUCS 126 or instructor consent.
Normal Grade Rules
3 units

NUCS 208B. Applied Radiation Protection
Practical exercises in personnel monitoring, area monitoring, radiation surveys, hazards evaluations, storage operations, radioactive waste disposal, etc.
Pre/Corequisite: NUCS 208A or instructor consent.
Misc/Lab: Seminar 2 hours.
Normal Grade Rules
2 units

NUCS 208C. Medical Radiation Protection
Introduction to concepts of diagnostic radiology, nuclear medicine and radiotherapy and overview of the role of the radiation safety officer in medicine. Topics include imaging, organ function tests, external and internal X and gamma sources, quality control, treatment planning and equipment calibration.
Prerequisite: NUCS 208A or instructor consent.
Misc/Lab: Seminar 3 hours.
Normal Grade Rules
2 units

NUCS 209A. Dosimetry and Shielding I
An advanced treatment of dosimetry of ionizing radiation for medical and biological applications. Topics include: Bragg-Gray cavity ionization measurements, chemical dosimetry, calorimetry, solid-state dosimetry, TLD, dose distribution, microdosimetry.
Prerequisite: NUCS 208A or instructor consent.
Misc/Lab: Lecture 3 hours.
Normal Grade Rules
3 units

NUCS 209B. Dosimetry and Shielding II
Extension of concepts presented in NUCS 209A through practical exercises in effective use of dosimeters (chemical, TLD, solid state).
Pre/Corequisite: NUCS 209A or instructor consent.
Misc/Lab: Seminar 2 hours.
Normal Grade Rules
2 units

NUCS 209C. Internal Dosimetry
The physical, chemical and biokinetic basis for calculations of dose from internally deposited radionuclides. Topics include biokinetic models, performance and interpretation of bioassay sampling and regulatory requirements.
Prerequisite: NUCS 209A or instructor consent.
Normal Grade Rules
2 units

NUCS 227L. Synthesis with Radioisotopes
See CHEM 227L.
Normal Grade Rules
2 units

NUCS 255. Advanced Topics in Nuclear Science
Lectures and discussions in special fields of nuclear science and radiological health physics. Topics vary. A maximum of 6 units may be repeated.
Prerequisite: Appropriate background in science/engineering and instructor consent.
Misc/Lab: Lecture 2-3 hours.
Repeatable for credit
Normal Grade Rules
1-3 units

NUCS 285. Seminar in Nuclear Science
Presentation of nuclear science and radiological health physics topics by graduate students, faculty, guests. A maximum of 4 units may be repeated.
Misc/Lab: Seminar 1 hour.
Repeatable for credit
Credit / No Credit
1 unit

NUCS 298. Research
Directed individual laboratory work or field studies in radiological health physics and nuclear science for students with adequate preparation. A maximum of 8 units may be repeated.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-6 units

NUCS 299. Master’s Thesis
Prerequisite: NUCS 298, instructor consent and admission to candidacy for the master’s degree.
Repeatable for credit
Mandatory CR/NC/RP
2-4 units
Nursing Courses

NURSING

LOWER DIVISION

NURS 020. Nursing as a Career
Overview of professional nursing, including preparation for nursing education, roles, opportunities, and strategies.
Normal Grade Rules
2 units

NURS 023. Pathophysiology - Theory I
Introduction to biologic basis for health problems in children and adults. Focuses on the pathophysiology of a variety of disease processes using systems theory as an organizing framework.
Prerequisite: Admission to nursing program. BIOL 65, BIOL 66, CHEM 30A, CHEM 30B, MICR 20, ENGL 1A, ENGL 1B, COMM 20, STAT 95, (all with grades of “C” or better). Satisfaction of the Writing Skills Test.
Corequisites: NURS 33, NURS 43, NURS 53; completion of core GE.
Normal Grade Rules
3 units

NURS 024. Adult Care Management I
Covers the knowledge, skills, and attitudes required to provide safe nursing care to adults / older adults. A systems approach integrates concepts of health promotion, disease prevention, and evidence-based interventions related to actual/potential alterations in: oxygenation, circulation, metabolism, and elimination.
Prerequisite: Completion of NURS 023, NURS 033, NURS 043, NURS 053; CHAD/KIN 067.
Normal Grade Rules
4 units

NURS 033. Professional Role Development I
An overview of the professional nursing role. Includes: nursing, core values, roles of professional nurse, the nursing process, code of ethics, legal issues, Nurse Practice Act, and interpersonal communication skills in preparation for clinical practice.
Prerequisite: Admission to nursing program. BIOL 065, BIOL 066, CHEM 030A, CHEM 030B, MICR 020, ENGL 001A, ENGL 001B, COMM 020, STAT 095, (all with grades of “C” or better). Satisfaction of the Writing Skills Test.
Corequisites: NURS 023, NURS 043, NURS 053; completion of core GE.
Normal Grade Rules
2 units

NURS 034. Nursing Process II
Focuses on therapeutic communication, teaching, learning and research, explored in a culturally diverse environment.
Prerequisite: Completion of Semester 3; CHAD/KIN 67.
Corequisite: NURS 44.
Normal Grade Rules
2 units

NURS 034A. Professional Role Development II
Focus is on the role of the professional nurse in providing patient-centered care, applying principles of the nursing process, professional communication, evidence-based practice and quality improvement in acute care setting.
Prerequisite: Completion of NURS 23, NURS 33, NURS 43, NURS 53.
Corequisite: NURS 44
Normal Grade Rules
1 unit

NURS 043. Pharmacology
Focuses on drug prototypes from major drug categories. Emphasizes the pharmacodynamics, calculations, nursing assessments and interventions of drugs commonly prescribed.
Prerequisite: Admission to nursing program. BIOL 065, BIOL 066, CHEM 030A, CHEM 030B, MICR 020, ENGL 001A, ENGL 001B, COMM 020, STAT 095, (all with grades of “C” or better). Satisfaction of the Writing Skills Test.
Corequisites: NURS 023, NURS 033, NURS 053; completion of core GE.
Normal Grade Rules
3 units

NURS 044. Adult Care Clinical Practicum I
Focus is on applying the nursing process to provide safe, client-centered nursing care to acute and chronically ill adults and older adults in the acute care setting.
Prerequisite: NURS 023, NURS 033, NURS 043, NURS 053.
Credit / No Credit
3 units

NURS 053. Skills in Nursing I
A beginning simulation course for the learning and practice of psychomotor and cognitive skills used to provide direct care in the acute care setting. Includes: hygiene, safety, mobility, asepsis, medication administration, health assessment, interpersonal relationship skills.
Prerequisite: Admission to nursing program. BIOL 065, BIOL 066, CHEM 030A, CHEM 030B, MICR 020, ENGL 001A, ENGL 001B, COMM 020, STAT 095, (all with grades of “C” or better). Satisfaction of the Writing Skills Test.
Corequisites: NURS 023, NURS 033, NURS 043; completion of core GE.
Normal Grade Rules
3 units

NURS 054. Skills in Nursing II
A simulation course for the learning and practice of advanced psychomotor and cognitive skills used to provide direct care in the acute care setting. Skills include: IV therapy, venipuncture, trach care, wound care, NG tubes, blood transfusions, and postmortem care.
Prerequisite: Completion of NURS 023, NURS 033, NURS 043, NURS 053.
Corequisite: NURS 024 and NURS 034.
Normal Grade Rules
2 units

UPPER DIVISION

NURS 100W. Writing Workshop
See HPRF 100W.
Normal Grade Rules
GE: Z
3 units

NURS 101B. Competency Assessment
Competency assessment related to content from Semesters 3-7. Assists in identifying areas where further study is needed.
Prerequisite: Completion of semester 6 or instructor consent.
Repeatable for credit
Credit / No Credit
1 unit

NURS 104. Health Assessment
Using a systems theory approach, acquisition of knowledge and skills to complete health histories and physical assessments on a variety of culturally and ethnically diverse patients across the lifespan.
Prerequisite: Advanced Placement standing.
Normal Grade Rules
3 units

NURS 108. Special Topics in Nursing
Significant nursing topics, issues, or themes. Consult Schedule of Classes and/or School of Nursing for focus which varies each semester.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

NURS 111. Medical Ethics
See PHIL 111
Normal Grade Rules
3 units
NURS 120. Preparation for NCLEX-RN
Case study approach used to review knowledge learned from all previous nursing courses. Content includes stress management and test-taking strategies in preparation for taking NCLEX-RN licensure examination.
Prerequisite: NURS 125, NURS 133, NURS 145, NURS 155.
Repeatable for credit
Credit / No Credit
2 units

NURS 124. Theory Overview
Promotes RN students’ theoretical basis for health and illness management for individuals, families and groups with various cultural backgrounds. Concepts include professionalism, nursing process, health promotion and teaching, managing curable and chronic conditions, and nursing leadership.
Prerequisite: Advanced Placement standing.
Corequisite: NURS 144.
Normal Grade Rules
3 units

NURS 125. Adult Care Management II
Focus is on concepts and care related to adult medical-surgical clients in the acute care setting. Systems approach integrates human response to alterations in physiological functioning related to disorders of the musculoskeletal, neurological, gastrointestinal, integumentary, endocrine systems and oncologic disorders.
Prerequisite: PSYC 1, CHAD 67, NURS 8, HPRF or NURS 100W, NURS 126, NURS 136, NURS 146A, NURS 146B
Normal Grade Rules
4 units

NURS 126A. Pediatric Health Theory
Focus is on direct health care of children in various health care settings. Exploration of biopsychosocial processes involved in health, life transitions, and illness with identification of related preventative and therapeutic nursing behaviors
Prerequisite: NURS 24, NURS 34, NURS 44, NURS 54, NURS 128
Normal Grade Rules
2 units

NURS 126B. Maternal / Newborn Health Theory
Focus is on direct health care of the childbearing family in various health care settings. Exploration of biopsychosocial processes involved in health, life transitions, and illness with identification of related preventative and therapeutic nursing behaviors.
Prerequisite: NURS 24, NURS 34, NURS 44, NURS 54, NURS 128
Normal Grade Rules
2 units

NURS 127A. Psychiatric / Mental Health Theory
Concepts for nursing in psychiatric-mental health settings with clients from culturally diverse backgrounds. Systems approach integrates psychiatric/mental health nursing care for individuals, families and communities with complex health problems.
Prerequisite: NURS 125, NURS 133, NURS 145.
Normal Grade Rules
2 units

NURS 127B. Community Theory
Utilizes a systems approach to integrate the study of community and public health nursing care for culturally diverse individuals, families, and communities with complex health problems, and promotion of health and wellness across the lifespan.
Prerequisite: NURS 125, NURS 133, NURS 145 or NURS 124, NURS 144.
Normal Grade Rules
2 units

NURS 128. Evidence-Based Nursing Practice
Focus is on research methodology and terminology related to nursing process and evidence based nursing practice.
Prerequisites: NURS 023, NURS 033, NURS 043, NURS 053.
Normal Grade Rules
2 units

NURS 133. Professional Role Development IV
Focus is on the role of the professional nurse in providing patient-centered care, applying principles of the nursing process, professional communication, evidence-based practice and quality improvement in the acute care setting.
Prerequisite: NURS 126, NURS 136, NURS 146A, NURS 146B.
Normal Grade Rules
2 units

NURS 135. Health Issues in a Multicultural Society
See HPRF 135
Normal Grade Rules
CE 5
3 units

NURS 136. Professional Role Development III
Expansion of the professional role in the childbearing-childrearing setting to include further application of: evidence-based practice, therapeutic communication, developmentally appropriate teaching/learning strategies, informatics, health literacy, developmental and cultural assessment, leadership and ethical principles, grief and loss.
Prerequisite: NURS 24, NURS 34, NURS 44, NURS 54, NURS 128.
Normal Grade Rules
2 units

NURS 137. Professional Role Development V
Using a collaborative learning environment, students acquire professional role competencies for community health and psychiatric/mental health nursing practice.
Prerequisite: NURS 125, NURS 133, NURS 145.
Normal Grade Rules
2 units

NURS 138. Professional Role Development VI
Focus is on demonstration of the professional nurse role. Includes integration of theoretical concepts and clinical practice skills know-how into the practice setting. Encompasses models and theories of nursing management and leadership, communication, economics, quality improvement, ethics, and safety.
Prerequisite: NURS 127A, NURS 127B, NURS 137, NURS 147A, NURS 147B or NURS 139.
Normal Grade Rules
2 units

NURS 139. Professional Role Development for Nurses
Students use a systems approach to acquire professional role competencies required in a variety of healthcare settings (community health, acute care) in a collaborative learning environment. Focus is on nursing management and integration of nursing role concepts into professional practice.
Prerequisites: NURS 124, NURS 144.
Corequisites: NURS 127B, NURS 147B.
Normal Grade Rules
3 units

NURS 140. Introduction to Critical Care
Introductory critical care course focusing on nursing priorities for selected adult pathophysiological conditions using case study application based on systems theory. Includes didactic content and case studies.
Prerequisite: Successful completion of semester 6.
Credit / No Credit
3 units

NURS 144. Clinical Nursing Applications
Implements concepts and activities using a variety of health care settings. Focus on health promotion, chronic illness and leadership/management.
Prerequisite: California RN License.
Pre/Corequisite: NURS 124 and NURS 134.
Normal Grade Rules
2 units

NURS 145. Adult Care Clinical Practicum II
Focus is on applying the knowledge, skills, and attitudes required to provide safe, client-centered care to acute and chronically ill adults and older adults in a variety of settings.
Prerequisite: NURS 126, NURS 136, NURS 146A, NURS 146B.
Credit / No Credit
4 units
NURS 146A. Pediatric Clinical
Focuses on providing family centered care to culturally diverse childrearing families and children using concepts of systems theory in acute care, home, and community settings.
Prerequisite: NURS 24, NURS 34, NURS 44, NURS 54, NURS 128.
Credit / No Credit
2 units

NURS 146B. Maternal Health Clinical
Focuses on providing family centered care to culturally diverse childrearing families using concepts of systems theory in acute care, home, and community settings.
Prerequisite: NURS 24, NURS 34, NURS 44, NURS 54, NURS 128.
Credit / No Credit
2 units

NURS 147A. Psychiatric/Mental Health Clinical
Supervised participation in nursing and healthcare of clients with psychiatric-mental health problems in varied settings. Concepts include a systems approach to therapeutic communication and relationships, evidence-based care, symptom management, teaching/learning, leadership, and collaboration with other health care workers.
Prerequisite: NURS 125, NURS 133, NURS 145.
Credit / No Credit
2 units

NURS 147B. Community Health Clinical
Applies nursing process to care of clients from diverse populations in the community in a variety of settings. Utilizes a systems approach to promoting health and wellness for individuals and groups across the lifespan.
Prerequisite: NURS 125, NURS 133, NURS 145.
Credit / No Credit
3 units

NURS 148. Nursing Practicum V
Using a systems approach, applies professional practices in a variety of health care settings. This is a preceptored experience.
Prerequisite: Completion of Semester 7 and successful completion of NURS 101B or Licensure as a Registered Nurse.
Corequisite: NURS 128 and NURS 138.
Credit / No Credit
3 units

NURS 148A. Senior Preceptorship
Independent, precepted experience in a clinical setting. Uses a systems approach integrating knowledge of research, leadership, pathophysiology, and nursing into practice.
Prerequisite: NURS 127A, NURS 127B, NURS 137 or NURS 139, NURS 147A, NURS 147B.
Corequisite: NURS 138
Credit / No Credit
4 units

NURS 155. Skills in Nursing III
Simulation course for the practice of advanced, specialized psychomotor and cognitive skills used to provide direct care.
Prerequisite: Completion of Semester 4.
Corequisite: NURS 125, NURS 133 and NURS 145.
Normal Grade Rules
2 units

NURS 180. Individual Studies
Individual study or project work on a selected problem or professional issue in nursing.
Prerequisite: Arrangement must be made with a nursing faculty member and approved by the school director during the semester prior to taking course.
Repeatable for credit
Credit / No Credit
1-4 units

GRADUATE

NURS 200. Health Care Systems
Planning, policy, organization, and financing health care systems. Prepares nurses to participate in design, implementation, and evaluation of ethical, cost-effective, quality health care in health care systems in order to improve health care delivery and client outcomes.
Normal Grade Rules
3 units

NURS 202. Theoretical Foundations
Addresses the theoretical underpinnings of nursing practice and research, including a wide range of theories from nursing and other disciplines. Students develop and apply relevant criteria in evaluating theories for practice and research with individuals, families and communities.
Normal Grade Rules
2 units

NURS 203. Introduction to Technology
Online course introduces graduate students to various new and emerging technologies used in today's online learning environment. It covers various social networking platforms, content and learning management tools, web conferencing, immersive environments, and social computing trends specific to nursing practice.
Prerequisites: Admission to School of Nursing graduate program.
Credit / No Credit
1 unit

NURS 204. Diverse Populations and Health Care
Planning for health promotion and disease prevention among diverse populations, providing available, accessible, and culturally competent care for individuals, families, and communities.
Prerequisite: Concurrent courses: NURS 200, NURS 202.
Repeatable for credit
Normal Grade Rules
3 units

NURS 206. Advanced Health Assessment: CNS
This advanced assessment course focuses on differentiation between normal and pathologic changes experienced by clients. Using systems theory framework, students formulate nursing diagnoses using pertinent symptomatologies and etiologies.
Prerequisite: NURS 104 or equivalent within 3 years.
Repeatable for credit
Normal Grade Rules
3 units

NURS 208. Advanced Nursing Seminar
Study of selected topics in nursing science. Course developed and structured by faculty mentor in consultation with student. Theories and research in advanced nursing practice emphasized.
Prerequisite: Consent of graduate coordinator and faculty preceptor.
Repeatable for credit
Normal Grade Rules
3 units

NURS 212. Curriculum Development in Nursing
Curriculum development with application to programs in nursing and health education. Focuses on formulation of conceptual framework for curriculum development and utilization in making decisions regarding the objectives, learning experiences, and evaluation strategies.
Normal Grade Rules
3 units

NURS 214. Nursing Educator Theory and Practicum I
Covers theories, models, and concepts relevant to teaching and learning in nursing education and health care systems. Experience in implementing the educator role using teaching processes and strategies for diverse students and settings.
Prerequisite: NURS 200 or NURS 202 or NURS 204.
Normal Grade Rules
5 units

NURS 216. Nurse Educator Theory and Practicum II
Continuing experience with educational theories, models, concepts, and strategies, focusing on educational research, and contemporary educational issues. Advanced experience in implementing the teaching role. Using concepts, models, and theories, the student assumes the educator role with increasing independence.
Prerequisite: NURS 214.
Repeatable for credit
Normal Grade Rules
5 units
NURS 220. Gerontology Pathophysiology and Pharmacology
Biologic basis for common health problems in ethnically diverse geriatric populations with emphasis on pathophysiologic mechanisms of disease. Management modalities including disease prevention, pharmacological, and other treatment modalities, using systems theory as the organizing framework.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

NURS 222. Gerontological Nursing I
Preparation as a gerontological clinical nurse specialist (CNS) is based on systems framework, focusing on wellness. Theory and practice emphasize the CNS roles: advanced practice clinician, teacher, consultant, coordinator, researcher, leader, and interdisciplinary collaborator.
Prerequisite: NURS 206, NURS 220.
Repeatable for credit
Normal Grade Rules
5 units

NURS 226. Gerontological Nursing II
Preparation as a gerontological clinical nurse specialist is continued and strengthened. Emphasis on communication, interdisciplinary and professional networking and leadership, needs assessment and program planning, coordination of management of gerontological nursing services and contemporary issues.
Prerequisite: NURS 206, NURS 220, NURS 222.
Repeatable for credit
Normal Grade Rules
5 units

NURS 236A. Nursing Administration Theories, Concepts and Practicum I
Emphasis on administrative concepts necessary for management of a health care system in a diverse environment. Opportunity for experience in the nurse administrator role in a practicum.
Pre/Corequisite: NURS 200, NURS 202, NURS 204.
Repeatable for credit
Normal Grade Rules
3 units

NURS 236B. Nursing Administration Theories, Concepts and Practicum II
Opportunity for advanced experience in the nurse administrator role. Applying conceptual models and theories for operations and personnel management, the student assumes the administrator role in a practicum with minimal supervision within a diverse health care setting.
Prerequisite: NURS 236A.
Repeatable for credit
Normal Grade Rules
4 units

NURS 246. Modern Organizations and Health Care
Theoretical analysis of organization systems using the modern health care organization within an ethnically diverse environment as a model, organizational dynamics, goals formation and implementation, control systems and organizational effectiveness.
Prerequisite: NURS 200.
Normal Grade Rules
3 units

NURS 248. Advanced Health Assessment: FNP
This advanced assessment course focuses on differentiation between normal and pathologic changes experienced in a primary care practice. Using systems theory framework, students formulate appropriate diagnoses using pertinent symptomologies and etiologies. May be repeated, but not in same semester.
Prerequisite: NURS 200, NURS 202, NURS 104 (or equivalent).
Repeatable for credit
Normal Grade Rules
3 units

NURS 250. Family Nurse Practitioner Concepts and Theory I
Diagnosis and management of common illnesses in primary care practice. Research and theory used to identify strategies to promote health and prevent illness. Introduction to pharmacologic therapeutic regimens with emphasis on interdisciplinary care primary and secondary prevention.
Pre/Corequisite: NURS 250 and NURS 253.
Repeatable for credit
Normal Grade Rules
2 units

NURS 252. Family Nurse Practitioner Concepts and Theory II
Diagnosis and management of common illnesses in primary care practice. Research and theory used to identify strategies to promote health and prevent illness. Introduction to pharmacologic therapeutic regimens with emphasis on interdisciplinary care, secondary and tertiary prevention.
Pre/Corequisite: NURS 250 and NURS 253.
Repeatable for credit
Normal Grade Rules
2 units

NURS 253. Family Nurse Practitioner Practicum I
First clinical practicum increases nurse practitioner competence in the domain of management of patient health/illness status in the areas of health promotion, health protection, disease prevention, and management of patient illness; using evidence-based clinical practice guidelines.
Prerequisite: NURS 248 and NURS 250.
Credit / No Credit
5 units

NURS 254. Family Nurse Practitioner Practicum II
Second clinical practicum increases nurse practitioner competence in the domain of management of patient health/illness status in the areas of health promotion, health protection, disease prevention, and management of patient illness; using evidence-based clinical practice guidelines.
Prerequisite: NURS 250, NURS 252 and NURS 253.
Credit / No Credit
5 units

NURS 256. Family Nurse Practitioner Practicum III
Final clinical practicum increases nurse practitioner competence in the domain of management of patient health/illness status in the areas of health promotion, health protection, disease prevention, and management of patient illness; using evidence-based practice guidelines.
Prerequisite: NURS 254.
Credit / No Credit
5 units

NURS 258. Professional Issues for Nurse Practitioners
Exploration of current health care environment as it pertains to policy development, health planning, and economic management at the national, state, and local levels. Exploration of equitable distribution of existing resources, policy development, program evaluation, and client/population outcomes.
Pre/Corequisite: NURS 250, NURS 252 and NURS 253.
Repeatable for credit
Normal Grade Rules
2 units

NURS 259. Advanced Clinical Pharmacology
Advanced pharmacotherapeutic management of acute and chronic illness, including understanding pharmacokinetic and pharmacodynamic function of drug therapies. Assessing needs of patients, prescribing, furnishing, and monitoring procedures of drug treatment regimes across the life span and across levels of acuities.
Prerequisites: Graduate status and instructor consent.
Normal Grade Rules
3 units

NURS 260. Advanced Physiology and Pathophysiology for Advanced Practice Nursing
Advanced physiology and compensatory mechanisms are examined with emphasis on system interaction, homeostasis, and pathophysiology. Focus for this course is on physiologic processes with clinical application to individuals across the lifespan. Course has both online and in-class components.
Prerequisites: Graduate status or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
NURS 266. Health Care Informatics
This on-line course examines informatics in health care emphasizing information systems and use of the information technology (IT) applications to support health. Evaluation of actual and potential IT applications in health care administration, practice, research, and education is included.
Prerequisite: Either NURS 200, NURS 202 or NURS 204 and instructor consent.
Normal Grade Rules
3 units

NURS 270. School Nursing Pathophysiology and Pharmacology
Biologic basis for common health problems in ethnically diverse school age populations with emphasis on pathophysiologic mechanisms of disease. Management modalities including disease prevention, pharmacologic and other treatment modalities using systems theory as organizing framework.
Repeatable for credit
Normal Grade Rules
3 units

NURS 272. School Nursing I: Clinical Nurse Specialist
Preparation of school nurse as an advanced practice clinical nurse specialist. Practicum emphasizes the beginning Clinical Nurse Specialist roles of School Nurse.
Prerequisite: NURS 270 or instructor consent.
Repeatable for credit
Normal Grade Rules
5 units

NURS 274. School Nursing II: Clinical Nurse Specialist
Preparation of a school nurse advanced practice clinical nurse specialist is continued and strengthened. Practicum emphasizes the incorporation, integration, and application of the Clinical Nurse Specialist roles into the professional practice of school nursing.
Prerequisite: NURS 272.
Repeatable for credit
Normal Grade Rules
5 units

NURS 295. Research Methodology
See HPRF 295
Normal Grade Rules
3 units

NURS 297. Master’s Project
Project option is an alternative to thesis option. Students integrate learning from graduate courses and clinical practice by developing a project proposal, implementing and reporting the project in the form of a publishable paper. May not be repeated in same semester.
Prerequisite: HPRF 295 and advancement to candidacy.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

NURS 298. Special Studies
For students pursuing advanced study related to populations-at-risk. Independent study project developed by the student may be an individualized small research activity or special study topic.
Repeatable for credit
Credit / No Credit
1-6 units

NURS 299. Master’s Thesis
Research proposal developed, research completed and study reported in approved thesis format during three semesters.
Prerequisite: Instructor consent.
Mandatory CR/NC/RP
1-4 units

NURS 574. The Role of Diversity and Social Issues in Healthcare
Analysis of social and cultural factors affecting health among populations defined by age, education, gender, ethnicity, culture, religion, occupation, income, mental or physical disability and language.
Prerequisite: Admission to the DNP program.
Normal Grade Rules
2 units

NURS 575. Application of Theories in Advanced Nursing Practice
Application of theories of nursing, ethics, and teaching-learning to advanced nursing practice and healthcare leadership.
Prerequisite: Admission to the DNP program.
Normal Grade Rules
2 units

NURS 576. Application of Biostatistics to Population
Examination of methods to generate and analyze biostatistical data to design, implement, and evaluate programs and policies for the healthcare of populations.
Prerequisite: Admission to the DNP program.
Normal Grade Rules
3 units

NURS 583. Leadership and Professional Responsibility in Complex Healthcare Systems
Analysis of leadership and evidence-based management theories necessary for the leadership of complex healthcare systems. Application of concepts of leadership, management, planning, and evaluation of population based efforts to provide quality affordable care. Analysis of professional role and responsibilities.
Prerequisites: NURS 274, NURS 275 and NURS 276.
Normal Grade Rules
2 units

NURS 584. Technology, Informatics, and Data Management in the Transformation of Healthcare
Overview of patient-centered technology and clinical information systems. Application of nursing informatics in healthcare systems. Use of technology in evaluation of clinical outcomes to improve the healthcare system and to evaluate the effectiveness, quality, and efficiency of healthcare programs.
Prerequisites: NURS 274, NURS 275 and NURS 276.
Normal Grade Rules
3 units

NURS 585. Foundations of Evidence-Based Practice
Prerequisites: NURS 274, NURS 275 and NURS 276.
Normal Grade Rules
2 units

NURS 586. Transformation of Health Care Systems: Health Policy and Economics
Healthcare policies and economics and the political forces that shape them. Role of the DNP in the analysis, formulation, and implementation of healthcare policies.
Prerequisites: NURS 283, NURS 284 and NURS 285.
Normal Grade Rules
2 units

NURS 587. Principles of Epidemiology
Prerequisites: NURS 283, NURS 284 and NURS 285.
Normal Grade Rules
3 units

NURS 591. Curriculum Development
Prerequisites: NURS 286, NURS 287.
Normal Grade Rules
3 units

NURS 592. Evaluation in Nursing Education
Focuses on assessment, measurement, and evaluation of learning and program outcomes in nursing. Explores theories of educational measurement and evaluation and of measures to evaluate teaching effectiveness, student learning, student outcomes, and student clinical performance.
Prerequisites: NURS 291, NURS 293 and NURS 295.
Normal Grade Rules
3 units
NURS 593. Financial Aspects of Projects and Practice
Principles of health care economics, third-party reimbursement, costing, budgets and budgeting, variance, economic evaluation methods, and writing a business plan to defend or market a health care program. Management of a successful project or practice emphasizing fiscal planning and control.
Prerequisites: NURS 286, NURS 287.
Normal Grade Rules
2 units

NURS 594. Application of Evidence-Based Teaching in Nursing
Prerequisites: NURS 291, NURS 293 and NURS 295.
Normal Grade Rules
2 units

NURS 595. Translating Evidence into Reflective Practice I
Integration of clinical practice, theory, and research. Development of clinical expertise in management of health problems in selected populations. Identification and development of a project proposal for implementation. Formal defense of proposal and IRB approval. One hour clinical conference per week. (204-306 total practicum hours).
Prerequisites: NURS 286, 287.
Normal Grade Rules
4-6 units

NURS 596. Translating Evidence into Reflective Practice II
Integration of clinical practice, theory, and research. Development of clinical expertise in management of health problems in selected populations. Implementation of project proposal. One hour clinical conference per week. (204-306 total practicum hours).
Prerequisites: NURS 291, NURS 293 and NURS 295.
Normal Grade Rules
4-6 units

NURS 597. Doctoral Project
Evaluation of data and completion of doctoral project. Dissemination of results through an oral defense and manuscript submission to a peer-reviewed journal.
Prerequisites: NURS 292, NURS 294 and NURS 296.
Mandatory CR/NC/RP
2 units
Academic Year 2014-2015
Course Descriptions

NUTRITION AND FOOD SCIENCE

LOWER DIVISION

NUFS 001A. Physical Science of Food
Introductory course to the physical, chemical and sensory properties of food for students not majoring in the sciences. Basic structure, function and organization of foods, laws of thermodynamics, systems of classification, as well as the interactions of energy and matter.
Normal Grade Rules
GE B1
3 units

NUFS 008. Nutrition for the Health Professions
Nutrients and their functions; recommended nutrient intakes and evaluation of dietary adequacy; relationship of nutrition to optimum health and dietary changes in disease. For nutritional science, nursing and other health profession majors. Prerequisite: CHEM 001A or CHEM 030A (with a grade of ‘C’ or better), or instructor consent.
Normal Grade Rules
3 units

NUFS 009. Introduction to Human Nutrition
Principles and methodology of nutritional science; standards of nutrient intake; physiological functions and chemical classification of nutrients; nutrient needs throughout the lifespan; relationship between diet and disease; scientific, social, and psychological issues. Notes: Not open to majors.
Normal Grade Rules
GE E
3 units

NUFS 012. Cost Control in Hospitality
See HSPM 012.
Normal Grade Rules
3 units

NUFS 016. Science, Physiology, and Nutrition
Introduction to life sciences, from chemistry to cellular and physiologic functions, with nutrition as an underlying theme. Interactions with environment, including effect of culture, genetics, and nutrition on susceptibility to disease. Applications of biotechnology in the life sciences.
Normal Grade Rules
GE B2
3 units

NUFS 020. Sanitation and Environmental Issues in the Hospitality Industry
Sanitation in food service, hotel and travel/tourism industries; study of pathogenic organisms and food handling procedures. Occupational health, safety and environmental control in the hospitality industry.
Normal Grade Rules
2 units

NUFS 021. Culinary Principles and Practice
Introduction to principles of food and beverage production and techniques. Emphasis on quality and culinary standards.
Misc/Lab: Lecture 2 hour/Lab 3 hours.
Normal Grade Rules
3 units

NUFS 022. Catering and Beverage Management
Planning and executing catering and buffet functions. Evaluation of alcoholic and non-alcoholic beverages regarding purchasing, storage, preparation, merchandising and regulations.
Prerequisite: NUFS 020 or instructor consent
Misc/Lab: Lecture/lab 4 hours.
Normal Grade Rules
2 units

NUFS 023. Culinary Concepts
See HSPM 023.
Normal Grade Rules
3 units

NUFS 025. Internship in Foodservice Management
Approved professional broad-based work experience in foodservice management industry for total of 200 hours. Written report due at completion. A maximum of 2 units may be repeated.
Prerequisite: NUFS 020 and instructor consent.
Repeatable for credit
Credit / No Credit
1-2 units

NUFS 031. Professionalism in Nutrition, Food Science and Packaging
Professional roles, skills and opportunities in the fields of dietetics, foodservice, food science, and packaging.
Prerequisite: ENGL 001B or instructor consent.
Normal Grade Rules
1 unit

UPPER DIVISION

NUFS 100W. Writing Workshop
See HPRF 100W.
Normal Grade Rules
GE W
3 units

NUFS 101A. Food Science
Experimental study of food and introduction to scientific methods used in food evaluation; functions of ingredients in prepared foods.
Prerequisite: CHEM 030B or CHEM 008. College basic food preparation course or instructor consent.
Misc/Lab: Lecture/lab 6 hours.
Normal Grade Rules
4 units

NUFS 101B. Computer Applications for Professionals
Computer applications for storage, editing, communication, managing, composition and processing of information. Focus on providing information and experience in using standard software packages for word processing, data management, graphics and statistics in educational and professional applications.
Prerequisite: Upper division standing.
Misc/Lab: Lecture 2 hours/lab 2 hours
Normal Grade Rules
3 units

NUFS 103. Food Processing and Packaging I
Principles and methods of food preservation/processing and packaging operations. Raw materials handling, effect of processing on nutritional value of foods, packaging and food additives. Recommended: College basic food preparation course.
Prerequisite: CHEM 030B or CHEM 008 or instructor consent.
Misc/Lab: Lecture/lab 5 hours.
Normal Grade Rules
2 units

NUFS 103L. Food Processing Laboratory
Laboratory activities associated with the principles and methods of food preservation/processing and packaging operations; raw materials handling, effect of processing on nutritional value of foods, packaging and food additives.
Pre-requisites: CHEM 030B or CHEM 008; instructor consent.
Normal Grade Rules
1 unit

NUFS 104A. Cultural Aspects of Food
Regional, ethnic and religious influences on food culture. Activity with foods of several cultures.
Prerequisite: Upper division standing.
Misc/Lab: Lecture/activity 4 hours.
Normal Grade Rules
3 units

NUFS 105. Current Issues in Nutrition
Controversial topics, including the relation of nutrition to cancer, coronary heart disease, hypertension, diabetes, eating disorders, osteoporosis and athletic performance; recommended nutrient intakes; and other current issues.
Prerequisite: NUFS 008, NUFS 009, NUFS 163 or equivalent introductory course in human nutrition.
Normal Grade Rules
3 units
NUFS 106A. Human Nutrition in the Life Span
Integrates chemical, biological and social sciences into a comprehensive concept of human nutrition. Emphasis on assessing nutrient status; planning and intervention throughout the life cycle.
Prerequisite: NuFS 008 (with a grade of 'C' or better) or passing grade on a challenge exam.
Corequisite: HPRF 100W, NuFS 31.
Normal Grade Rules
3 units

NUFS 106B. Research Methodology in Nutrition and Food Science
Research design, process and methodology. Scientific methods of research, interpretation of results; statistical procedures and application of research to nutritional sciences.
Prerequisite: STAT 095.
Corequisite: NuFS 106A and HPRF 100W.
Normal Grade Rules
2 units

NUFS 107. Principles of Packaging
See PKG 107.
Normal Grade Rules
3 units

NUFS 108A. Nutrition and Metabolism
Chemical and physiological studies of carbohydrate, protein, lipid, vitamin and mineral metabolism. Application to the normal nutrition of human beings.
Prerequisite: NuFS 106A, BIOL 066, CHEM 132 (both with a grade of 'C' or better), and HPRF 100W.
Normal Grade Rules
3 units

NUFS 108L. Nutrition Laboratory
Chemical and biochemical analysis of nutrients and metabolites in body fluids for the assessment of nutritional status of humans.
Prerequisite: CHEM 132L, STAT 095 or BUS 090 or HS 167.
Corequisite: NuFS 108A.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
1 unit

NUFS 109. Advanced Nutrition
Advanced studies of vitamins and minerals. Evaluation and interpretation of nutritional research methodology and findings.
Prerequisite: NuFS 106A, CHEM 132 (with grades of 'C' or better in each), HPRF 100W, and BIOL 066, BUS 090, STAT 095 or HS 167.
Normal Grade Rules
3 units

NUFS 110A. Medical Nutrition Therapy
Application of nutritional principles and dietary intake to meet the needs of various pathological conditions.
Prerequisite: NuFS 108A (with grade of 'C' or better).
Corequisite: NuFS 109.
Misc/Lab: Lecture/activity 4 hours.
Normal Grade Rules
3 units

NUFS 110B. Medical Nutrition Therapy
Application of nutritional principles and dietary intake to meet the needs of various pathological conditions.
Prerequisite: NuFS 110A and NuFS 109 (with a grade of 'C' or better in each).
Misc/Lab: Lecture/activity 4 hours.
Normal Grade Rules
3 units

NUFS 111. Foodservice Production Management
Principles and procedures for menu planning, production scheduling, volume food production, operation of foodservice equipment, sanitation control and formula costing.
Prerequisite: NuFS 101A or HRTM 011, NuFS 008 or NuFS 009, or instructor consent.
Normal Grade Rules
2 units

NUFS 111L. Foodservice Production Management Laboratory
Experience in foodservice production management.
Prerequisite: NuFS 101A or NuFS 023, NuFS 008 or NuFS 009, MICR 020 or NuFS 020, CHEM 030A.
Corequisite: NuFS 111 or instructor consent.
Misc/Lab: Lab 6 hours.
Normal Grade Rules
2 units

NUFS 112. Foodservice Procurement
Purchasing in foodservice operations: food and equipment. Selection and storage of food and writing food specifications. Selection and layout of equipment and writing equipment specifications.
Prerequisite: NuFS 111 and NuFS 111L or instructor consent.
Misc/Lab: Lecture/activity 3 hours.
Normal Grade Rules
2 units

NUFS 113. Foodservice Systems Management
Allocation and management of resources in foodservice systems: materials (food and supplies), facilities (equipment and space), human (management and employee labor), operational (time and money).
Prerequisite: NuFS 111 and NuFS 111L or instructor consent.
Misc/Lab: Lecture/lab 5 hours.
Normal Grade Rules
3 units

NUFS 114A. Community Nutrition for Majors
Nutrition problems; public policy, advocacy and legislation; government programs; needs assessments; management of community services.
Prerequisite: NuFS 106A, senior standing and instructor consent.
Normal Grade Rules
3 units

NUFS 114B. Community Nutrition (non-majors)
Key nutrition concepts and terms; age appropriate nutritional interventions focusing on school-age children; nutrition and public policy, advocacy and legislation; government programs and provision of community nutrition services focusing on mother and children.
Repeatable for credit
Normal Grade Rules
3 units

NUFS 115. Issues in Food Toxicology
Introduction to toxicology of foods, and food-borne chemicals and organisms. Scientific basis for determining biological and environmental safety of the food supply from food development, growth and production through harvesting, processing, storage and eventual consumption.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: R
3 units

NUFS 116. Aging and Nutrition
The aging process, physiological changes, dietary requirements, diseases, environmental factors, housing, economic status, handicaps, personal relations and current programs for the aged.
Prerequisite: One college nutrition course or instructor consent.
Normal Grade Rules
3 units

NUFS 117. Food Evaluation Techniques
Studies in food experimentation, sensory evaluation and objective methods.
Prerequisite: NuFS 008 and NuFS 101A, CHEM 030A, CHEM 030B, CHEM 001A or instructor consent.
Misc/Lab: Lecture/lab 5 hours.
Normal Grade Rules
2 units
NUFS 118. Food Chemistry
Important classes of food constituents, their nature, occurrence, chemical and biochemical significance, and the changes they undergo during food preservation and processing.
Prerequisite: NUFS 101A and/or NUFS 103; CHEM 308 or CHEM 8; CHEM 132 and CHEM 132L or CHEM 135; or instructor consent.
Misc/Lab: Lecture/lab 5 hours.
Normal Grade Rules
3 units

NUFS 122. Chemical Analysis of Food
Techniques in chemical analysis of nutrients and other components of food. Planning, conducting and evaluating a scientific experiment and presenting the data in technical written form.
Prerequisite: NUFS 103, NUFS 118, HPRF 100W and instructor consent; BUS 090 or STAT 095.
Misc/Lab: Lecture/lab 7 hours.
Normal Grade Rules
3 units

NUFS 123. Nutrition for Sport
Planning optimum diets for performance and health; metabolism and energy systems; roles of nutrients in physical performance; efficacy of ergogenic nutrition aids.
Prerequisite: NUFS 008 or NUFS 009.
Normal Grade Rules
3 units

NUFS 124. Disordered Eating and Nutrition Therapy
Metabolic, physiological, and psychological determinants and effects of disordered dietary behaviors. Disorders in regulation of food intake, case studies, and different intervention approaches explored. Screening and treatment of disordered eating in athletes emphasized. Opportunities provided to develop counseling strategies.
Prerequisite: NUFS 008.
Normal Grade Rules
3 units

NUFS 125. Child Nutrition Program Administration
Study of the components of model child nutrition programs through application of current child health and nutrition principles, education practices, marketing procedures, communication strategies, computer-based nutrient and business analysis and operations management skills.
Prerequisite: Upper division standing.
Notes: Offered Summer only.
Normal Grade Rules
2 units

NUFS 133. Food Processing and Packaging II
Continuation of NUFS 103, emphasizing control of critical points, quality assurance, sanitation, waste disposal, packaging and use of computers in food processing.
Prerequisite: NUFS 103, STAT 095, MICR 123 and instructor consent.
Misc/Lab: Lecture/activity 4 hours.
Normal Grade Rules
3 units

NUFS 134. Complementary and Alternative Health Practices
See HPRF 134.
Normal Grade Rules
3 units

NUFS 135. Health Issues in a Multicultural Society
See HPRF 135.
Normal Grade Rules
3 units

NUFS 139. Hunger and Environmental Nutrition
Physiology of hunger/malnutrition on human development and health; political, social, cultural and gender factors that contribute to world hunger; scientific/technological foundation to population research and food production and their effect on the environment.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: R
3 units

NUFS 141A. Packaging Materials I, Paper, Metal, and Wood Based
See PKG 141A.
Normal Grade Rules
3 units

NUFS 141B. Packaging Materials II, Plastics, Composites, and Glass
See PKG 141B.
Normal Grade Rules
3 units

NUFS 144. Food Culture: Consuming Passions
Cultural aspects of food as related to regional, ethnic and religious influences. Issue based examination of effects of food behavior on culture, society, health, and economics.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing (60 units).
For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

NUFS 146. Packaging for Medical Devices and Pharmaceuticals
See PKG 146.
Normal Grade Rules
3 units

NUFS 150. Food and Nutritional Toxicology
Major classes of food toxicants, their importance, properties, detection, metabolism, control and regulation; and basic issues in food/diet safety and toxicology.
Prerequisite: NUFS 103, CHEM 030B or CHEM 008; introductory courses in nutrition and biology and instructor consent.
Normal Grade Rules
2 units

NUFS 155. Food Process Engineering
Study of engineering principles, their application in the processing of foods and importance in solving problems in food science and technology.
Prerequisite: PHYS 002A; NUFS 103, calculus.
Misc/Lab: Lecture/lab 5 hours.
Normal Grade Rules
3 units

NUFS 156. Packaging Machinery Systems
See PKG 156.
Normal Grade Rules
3 units

NUFS 158. Protective Package Design and Testing
See PKG 158.
Normal Grade Rules
3 units

NUFS 159. Packaging Material Handling and Distribution
See PKG 159.
Normal Grade Rules
3 units

NUFS 163. Physical Fitness and Nutrition
Use of scientific principles, scientific investigation, and current technological advances to assess the relationship between diet, physical fitness, and disease. Examine scientific literature to evaluate the effects of nutritional intervention on exercise performance.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Notes: Not for Nutrition majors or minors.
Normal Grade Rules
GE: R
3 units

NUFS 169. Food Packaging and Preservation
See PKG 169.
Normal Grade Rules
3 units
NUFS 170. Packaging Development and Management  
See PKG 170.  
Normal Grade Rules  
3 units  

NUFS 180. Individual Studies  
Individual work for majors or minors on special topics by arrangement.  
Prerequisite: NUFS 008, instructor and department chair consent during semester prior to enrollment.  
Repeatable for credit  
Credit / No Credit  
1-6 units  

NUFS 190. Nutrition Education  
Education and behavior change theories and techniques; development of an educational session or program/educational strategy for a target population.  
Prerequisite: NUFS 106A and senior standing.  
Normal Grade Rules  
2 units  

NUFS 191. Nutrition Counseling  
Theoretical approaches to nutrition counseling; concepts of behavior change, basic listening and responding skills, empathy development and cultural competence in counseling.  
Prerequisite: NUFS 106A.  
Normal Grade Rules  
1 unit  

NUFS 192. Field Experience in Nutrition and Food Science and Packaging Technology  
Practical application of academic principles in nutrition, food science, packaging, dietetics food management, nutrition education, and/or sports nutrition.  
Prerequisite: Senior standing in NUFS; instructor consent by end of prior semester.  
Misc/Lab: Supervision 3 to 18 hours.  
Repeatable for credit  
Credit / No Credit  
1-6 units  

NUFS 194. Entrepreneurial Nutrition  
Introduction to entrepreneurial nutrition including professional roles, skills and opportunities.  
Prerequisite: ENGL 001A or instructor consent.  
Normal Grade Rules  
1 unit  

NUFS 201. Colloquium in Nutrition, Food Science and Packaging  
Presentation and discussion of original research or specialized studies in nutrition, food science, foodservice systems management, and packaging by graduate students, faculty and guest speakers. Course is repeatable two times.  
Prerequisite: Instructor consent.  
Repeatable for credit  
Normal Grade Rules  
1 unit  

NUFS 216. Seminar in Food Chemistry and Packaging  
Chemical and physical properties of food constituents as they relate to food quality, functionality and the use of proper packaging techniques to preserve nutritive value.  
Prerequisite: NUFS 103.  
Misc/Lab: Lecture 3 hours.  
Repeatable for credit  
Normal Grade Rules  
3 units  

NUFS 217. Issues in Nutrition, Food and Packaging  
Discussion and critical evaluation of advanced topics in nutritional science, food science and technology, foodservice management, and packaging.  
Prerequisite: Passing score on NUFS competency exam in emphasis area.  
Corequisite: HS 167 or SOCI 103 or STAT 115.  
Repeatable for credit  
Normal Grade Rules  
3 units  

NUFS 219A. Advanced Nutrition and Metabolism  
Biochemical and physiological processes of nutrients and their needs by humans. Vitamins and minerals.  
Prerequisite: Biochemistry, NUFS 108A or NUFS 109 (each with a grade of “C” or better).  
Repeatable for credit  
Normal Grade Rules  
3 units  

NUFS 219B. Advanced Nutrition and Metabolism  
Biochemical and physiological processes of nutrients and their needs by humans. Proteins, carbohydrates and lipids.  
Prerequisite: Biochemistry, NUFS 108A or NUFS 109 (each with a grade of “C” or better).  
Repeatable for credit  
Normal Grade Rules  
3 units  

NUFS 220A. Advanced Medical Nutrition Therapy  
Assessment and evaluation of nutritional status; diet planning in health and disease; counseling techniques; and medical documentation.  
Prerequisite: NUFS 110A and NUFS 110B (each with a grade of “C” or better).  
Normal Grade Rules  
3 units  

NUFS 242. Advanced Foodservice/Restaurant Management  
Quantitative and qualitative analyses of foodservice/restaurant operations as bases for managerial decision-making.  
Prerequisite: NUFS 113.  
Misc/Lab: Lecture 3 hours.  
Normal Grade Rules  
3 units  

NUFS 260. Multidisciplinary Health Promotion in Later Life  
Multidisciplinary assessment and planning. Principles of promoting health and preventing disability in later life. Physical, psychological, social, cultural, spiritual, and environmental factors that affect length and quality of life.  
Prerequisite: BIOL 066 or GERO 108 or instructor consent.  
Normal Grade Rules  
3 units  

NUFS 270. Package Design for End Use  
See PKG 270.  
Normal Grade Rules  
3 units  

NUFS 280B. Dietetic Internship  
Supervised professional field experience to fulfill ADA eligibility requirements for registered dietitian examination.  
Prerequisite: DPD or instructor consent.  
Notes: Course can be taken for 1, 3, 6, 9 or 12 units.  
Repeatable for credit  
Credit / No Credit  
1-12 units  

NUFS 290. Advanced Nutrition Education  
Emphasis on nutrition competencies, goals/objectives, preparation and presentation of teaching-learning strategies and evaluation.  
Prerequisite: Instructor consent.  
Normal Grade Rules  
3 units
NUFS 290R. Thesis/Project Supervision
This course satisfies the requirement that all graduate students must remain enrolled during semesters in which they are working solely on their theses or projects, for which they have previously received but not cleared an RP grade.
Prerequisite: Existing RP grade in a graduate-level thesis or project course
1-6 units

NUFS 295. Research Methodology
See HPRF 295.
Normal Grade Rules
3 units

NUFS 298. Special Studies in Nutrition, Food Science and Packaging
Advanced individual research and projects.
Prerequisite: Consent of graduate advisor.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

NUFS 299. Master's Thesis
Prerequisite: Admission to candidacy for the master's degree.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

PACKAGING

UPPER DIVISION

PKG 107. Principles of Packaging
Basic knowledge of packaging functions, materials and industry. A variety of packaging topics including distribution systems, packaging development, package design, legislation, regulations, societal and environmental issues, ergonomics and packaging careers.
Prerequisite: ENGL 001A or equivalent.
Normal Grade Rules
3 units

PKG 141A. Packaging Materials I, Paper, Metal, and Wood Based
In-depth study of selected materials to provide a working knowledge of structures, physical and chemical properties, development, evaluation and design. Experiments in applications, design limitations and cost.
Prerequisite: PKG 107 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

PKG 141B. Packaging Materials II, Plastics, Composites, and Glass
In-depth study of plastic and glass materials in packaging, chemical and physical properties, design, manufacturing, compatibility, and evaluation. Experiments in applications, design limitations and cost.
Prerequisite: PKG 107, PKG 141A or instructor consent.
Misc/Lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

PKG 146. Packaging for Medical Devices and Pharmaceuticals
Chemical and physical properties of medical device and pharmaceuticals packages, fabrication techniques, package testing and evaluation methods, regulatory requirements, ergonomics and child resistant packages, tamper evidence, shelf life and aging, coding.
Prerequisite: PKG 107, PKG 141A, PKG 141B or instructor consent.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

PKG 152. Globalization and the Environment
See ENVS 152.
Normal Grade Rules
GE R
3 units

PKG 156. Packaging Machinery Systems
Evaluation of packaging machinery as a subset of a packaging production system. Component selection, design, and implementation of package filling lines in a production facility. Package design requirements for filling lines.
Prerequisite: PKG 107, PKG 141A, PKG 141B, MATH 070, MATH 071, STAT 095.
Misc/Lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

PKG 158. Protective Package Design and Testing
In-depth study of protective packaging dynamics; theory and practice of shock, vibration, compression, humidity, temperature extremes. Measurement and analysis of the dist environment, product fragility, package design principles, package testing and evaluation.
Prerequisite: PKG 107, PKG 141A, PKG 141B, MATH 070, MATH 071, STAT 095.
Misc/Lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

PKG 159. Packaging Material Handling and Distribution
Transportation, handling, and storage of packaged goods. Transportation modes, environment hazards, measurement techniques. Military and Hazmat packaging regulations and testing, classification of goods, legal requirements, export packaging.
Prerequisite: PKG 158 or instructor consent.
Normal Grade Rules
3 units

PKG 169. Food Packaging and Preservation
This course investigates the interaction of food processing and packaging technology. Content includes food chemistry, microbiology in foods, food processing, and finally how packaging augments these areas in food protection and preservation.
Prerequisite: PKG 107 or instructor consent.
Normal Grade Rules
3 units

PKG 170. Packaging Development and Management
Capstone course emphasizing development and evaluation of packaging systems. Specifications and design, marketing criteria, package production, distribution performance, legal and environmental evaluations.
Prerequisite: PKG 107, PKG 141A, PKG 141B, PKG 156, PKG 158 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

PKG 180. Individual Studies
Individual work for majors or minors on special topics by arrangement.
Prerequisite: PKG 107, instructor and department chair consent during semester prior to enrollment.
Repeatable for credit
Credit / No Credit
1-6 units

GRADUATE

PKG 270. Package Design for End Use
Current Package Design and Influences on Designs
Normal Grade Rules
3 units
Occupational Therapy
Department Courses

OCCUPATIONAL THERAPY

LOWER DIVISION

OCTH 010. Homeless Americans: Loss of the American Dream
Explores historical and contemporary issues of homelessness in America with special attention to the homeless population in Santa Clara County. Characteristics of homeless persons and the social, economic and political issues as well as options for intervention will be addressed.
Normal Grade Rules
GE: D1
3 units

OCTH 108. Conditions of Human Dysfunction
Course provides an overview of general medical and psychiatric conditions commonly seen in occupational therapy clinical practice. Emphasis is placed upon learning the process of diagnosis, pathologic processes, medical management, medical terminology and impact of disease on occupational performance.
Prerequisite: Acceptance to the OT Program.
Normal Grade Rules
3 units

OCTH 110. Introduction to the Profession of Occupational Therapy
Occupational therapy as a profession including exploration of professional organizations, roles, attitude, and behavior and team building. Introduction to theoretical models. Teaches rudimentary skills of how to read research articles, the use of APA, and concept of evidence-based practice.
Prerequisite: Acceptance to Program.
Normal Grade Rules
3 units

OCTH 113. Human Adaptation through the Life Span
Students will relate the concepts of human adaptation in age specific stages through the life span to the occupational therapy domain and process.
Prerequisite: Acceptance to Program.
Normal Grade Rules
3 units

OCTH 115. Occupations, Activities, and the OT Process
Understanding the concept of occupation and activity as it relates to occupational therapy and engagement in occupation to support performance in contexts. Development of pre-entry level competency in group dynamics, team work and therapeutic relationships.
Prerequisite: Acceptance to Program.
Normal Grade Rules
3 units

OCTH 120. Functional Kinesiology
Study of normal body movements based on neurophysiological and biomechanical principles of joint and muscle action correlated with analysis of the body in motion, physiological effects of activity and adaptation to physical dysfunction.
Prerequisite: BIOL 109.
Normal Grade Rules
3 units

OCTH 122. Occupational Therapy in Mental Health
The occupational therapy process of evaluation, intervention planning, and implementation of treatment through individual, group and systems methods in all psychosocial settings with an emphasis on psychiatric problems.
Prerequisite: Abnormal Psychology.
Normal Grade Rules
3 units

OCTH 126. Communication and Occupational Adaptation
Student will learn foundational concepts and practices of occupational therapy through experiential and kinesthetic learning.
Prerequisite: Acceptance to the OT Program.
Normal Grade Rules
3 units

OCTH 130. Evaluation in Occupational Therapy
Approaches to evaluation in occupational therapy. Includes purpose and methods of assessment such as observation, interview, nonstandard and standardized tests. Application of psychometric measurement theory for selection and use of appropriate instruments.
Introduction to critical analysis and inquiry.
Prerequisite: Statistics.
Normal Grade Rules
3 units

OCTH 131. Occupational Therapy Practice in Neurorehabilitation
Basic knowledge, skills and attributes necessary to work with individuals with neurological disorders. Includes an overview of theories of nervous system organization along with the pathophysiology and management of various neurological disorders.
Prerequisite: OCTH 130.
Normal Grade Rules
3 units

OCTH 132. Occupational Therapy for Physical/Orthopedic Disabilities
The Occupational therapy process of evaluation, planning, and implementation applied to physical dysfunction.
Prerequisite: OCTH 120.
Normal Grade Rules
3 units

OCTH 133. Occupational Therapy Practice in Pediatrics
Knowledge, skills and attributes necessary to work with infants, children, and adolescents who are ill or who have disabilities. The Occupational Therapy Practice Framework serves as the foundation for assessment and treatment planning.
Prerequisite: OCTH 130.
Normal Grade Rules
3 units

OCTH 134. OT Practicum and Seminar I
Level I practicum placement in a designated agency where students will lead occupation groups. Seminar assists students in applying knowledge of group leadership and professionalism.
Prerequisite: OCTH 122 and OCTH 130.
Misc/Lab: Seminar 2 hour/lab 3 hours.
Credit / No Credit
3 units

OCTH 135. Health Issues in a Multicultural Society
See HPRF 135.
Normal Grade Rules
GE: G
3 units

OCTH 136. Occupational Therapy in Geriatric Practice
Focuses on the occupational performance of older adults whose function is impaired by normal aging, illness, injury or disability. The occupational therapy process is applied to promote independence, remediate dysfunction, adapt to disability, promote wellness and enhance quality of life.
Prerequisite: OCTH 122, OCTH 130.
Normal Grade Rules
3 units

OCTH 144. OT Practicum and Seminar II
Clinical experience in an area of specialty. Seminar involves sharing experiences, peer review and problem solving.
Prerequisite: OCTH 122, OCTH 130.
Credit / No Credit
4 units

OCTH 156. Independent Living for the Aging and Disabled
Identification and application of basic management concepts used by the disabled and aging in daily living.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units
OCTH 180. Individual Studies
Investigation of special problems not covered in regular courses, including research project and/or field experience. Course is repeatable for credit in the same term.
Prerequisite: Upper division majors with department chair approval.
Repeatable for credit
Credit / No Credit
1-4 units

OCTH 180H. Individual Studies
Individual project or special study in an area not covered in the regular curriculum. Results presented in departmental seminar and written report. An honors course.
Prerequisite: 3.0 overall GPA, 3.5 GPA in major.
Repeatable for credit
Credit / No Credit
1-3 units

OCTH 185. Honors Seminar
Self-directed learning, discussion, independent research and study of advanced topics in occupational therapy.
Prerequisite: OCTH 131, OCTH 133, OCTH 134, senior standing, 3.0 overall GPA and 3.5 GPA in the major.
Normal Grade Rules
3 units

OCTH 190. Foundations of Neuroscience for Occupational Therapy
Foundations of neuroscience related to occupational performance. Topics include an overview of anatomy and physiology of the human nervous system and the interaction among the central, peripheral and autonomic nervous systems related to function.
Prerequisite: BIOL 65 or BIOL 65O, BIOL 66
Normal Grade Rules
3 units

OCTH 201A. Field Work Experience
Three months in full-time field work are required.
Prerequisite: OCTH 134
Notes: This course fulfills departmental prerequisite requirements. It does not fulfill requirements for the graduate degree program. Travel to on-site facilities is the student’s responsibility.
Credit / No Credit
6 units

OCTH 201B. Advanced Field Work Experience
Three months in full-time field work are required.
Prerequisite: OCTH 201A.
Notes: This course fulfills departmental prerequisite requirements. It does not fulfill requirements for the graduate degree program. Travel to on-site facilities is the student’s responsibility.
Credit / No Credit
6 units

OCTH 202. Professional Concepts
Exploration of the role of occupational therapy with various client populations in a variety of practice settings through case study analysis and presentations. Professional and ethical behavior will also be explored.
Prerequisite: OCTH 110
Normal Grade Rules
3 units

OCTH 204. Introduction to the History of Occupational Therapy
Traces the ideas, values and beliefs that have formed the basis for occupational therapy practice in the United States. Analyzes events and leaders who influenced the evolution of occupational therapy from its founding in 1937 to the present.
Normal Grade Rules
3 units

OCTH 206. Occupational Performance Throughout the Life Span
Introduction to occupational therapy and activity analysis. Analyzes occupational performance and the developmental tasks that individuals face at each stage of human development. Introduction to occupation-based theories.
Prerequisite: Acceptance to Program.
Normal Grade Rules
3 units

OCTH 210. Seminar in Occupational Therapy
Seminar on special topics in occupational therapy. Students will develop knowledge and skills in a selected practice area.
Repeatable for credit
Normal Grade Rules
2-3 units

OCTH 211. Historical and Theoretical Foundations of Occupational Therapy
History of occupational therapy practice, evolution of the concepts and values underlying its theoretical constructs, and the leaders who shaped the profession. Development of ideas, values, and beliefs concerning occupation within the context of historical, social, and scientific advances.
Normal Grade Rules
3 units

OCTH 212. Occupations through the Lifespan
The development of occupations, their meaning and role in human development through the lifespan, and the conditions that create barriers to engagement in meaningful occupations. Students will analyze how interactions between self and environment influence occupational participation at all ages.
Normal Grade Rules
3 units

OCTH 213. Professional Development I
Introduces occupational therapy as a profession and addresses professional organizations, roles, attitudes, behaviors, and ethics. Explores the influence of culture on worldview, communication, and health behaviors. Students engage in personal and professional self-assessment and goal setting for professional development.
Normal Grade Rules
3 units

OCTH 216. Evaluation in Occupational Therapy
The purpose and process of evaluation in determining need for and outcomes of intervention. Application of measurement theory, theoretical perspectives and practice models for selection, administration, and interpretation of appropriate instruments, including occupational profiles, skilled observation, interviews and standardized tests.
Normal Grade Rules
3 units

OCTH 220. Education and Occupational Therapy
Study of learning theory and teaching strategies used in teaching occupational therapy and other health-related professions. Content includes learning styles, effective teaching, learning, use of media and evaluations.
Credit / No Credit
3 units

OCTH 221. Occupational Analysis
Course focuses on analyzing occupations and occupational performance. Meaning and significance of competence, challenge, and success in occupations are explored through engagement in selected projects. Students learn to structure, adapt, plan, teach, and assess activities for therapeutic use.
Normal Grade Rules
3 units

OCTH 222. Functional Kinesiology for Occupational Therapists
Study of body movements based on neurophysiological and biomechanical principles of joint and muscle action correlated with analysis of the body in motion, physiological effects of activity and adaptation to physical dysfunction.
Normal Grade Rules
3 units
OCTH 224. Occupational Therapy Practice in the Community I
Introduction to community focused interventions based on the social model of health and occupational justice concepts, designed to promote health, well-being, social inclusion, empowerment, and health disparity reduction for populations and communities. Focus is on emerging and non-traditional practice settings.
Normal Grade Rules
3 units

OCTH 226. Occupational Therapy with Children
Occupational therapy practice for children from birth to early adolescence, focusing on integrating knowledge of theoretical frameworks, practice settings, research evidence, clinical reasoning and regulatory and reimbursement policies in the provision of interventions for conditions and disorders in this age group.
Normal Grade Rules
3 units

OCTH 230. Management and Occupational Therapy
Principles of ethical administrative, supervisory, and consultative practice in occupational therapy organizational settings. Students review the profession's ethics and learn ethical decision making. Basic grant writing skills and OT advocacy are also included.
Normal Grade Rules
3 units

OCTH 233. Professional Development II
Deeper exploration into occupational therapy leadership, supervision, ethical conduct, advocacy, program development, and management principles related to current service models. Recent legislation and its impact on occupational therapy practice will be reviewed.
Prerequisite: OCTH 213
Normal Grade Rules
3 units

OCTH 234. Occupational Therapy Practice in the Community II
Community focused seminar and practicum providing intervention in emerging and non-traditional practice settings and underserved communities. Seminars address the diverse dimensions of practice in the community related to needs assessment, the community site, program development and implementing occupational therapy services.
Normal Grade Rules
3 units

OCTH 235. Cultural Diversity in Occupational Therapy
Notes of occupational therapist treating diverse populations is examined through exploration of professional culture, the cultures of poverty and disability, and cultures identified by ethnicity or lifestyle. Cultural variables include time, space, relationships, value, beliefs, communication, socioeconomics, gender and tradition.
Repeatable for credit
Normal Grade Rules
3 units

OCTH 236. Occupational Therapy with Youth
Occupational therapy practice for adolescents and young adults, focusing on integrating knowledge of theoretical frameworks, practice settings, research evidence, clinical reasoning and regulatory and reimbursement policies in the provision of interventions for conditions and disorders in this age group.
Normal Grade Rules
3 units

OCTH 245. Introduction to Research Methods
Introduction to research methodology and the process of critical inquiry. How one conducts research, including traditions and methods used in occupational therapy and how to understand research publications.
Prerequisite: Introductory Statistics
Normal Grade Rules
3 units

OCTH 246. Occupational Therapy with Young Adults
Occupational therapy practice for young adults ages 25-40, focusing on integrating knowledge of theoretical frameworks, practice settings, research evidence, clinical reasoning and regulatory and reimbursement policies in the provision of interventions for conditions and disorders in this age group.
Normal Grade Rules
3 units

OCTH 251. Information Literacy Competence for Occupational Therapists
Provides basic understanding of how to access the published knowledge in Occupational Therapy, online and in print. Emphasis is placed on searching, evaluating, and using research and evidence-based journal literature. Health ethics covered.
Prerequisite: Admission to Program.
Credit / No Credit
1 unit

OCTH 255. Occupational Justice
Examines the theoretical development of social and occupational justice concepts, global citizenry, and occupational therapy internationalization. Implications for practice and research are explored within the framework of the disability rights movement and the culture of poverty.
Prerequisite: Admission to the program.
Repeatable for credit
Normal Grade Rules
3 units

OCTH 256. Occupational Therapy with Middle Aged Adults
Occupational therapy practice for adults age 41-65, focusing on integrating knowledge of theoretical frameworks, practice settings, research evidence, clinical reasoning and regulatory and reimbursement policies in the provision of interventions for conditions and disorders experienced in this age group.
Normal Grade Rules
3 units

OCTH 263. Theory and Advanced Clinical Practice for Occupational Therapists I
Context, identity, research, clinical reasoning, and personal values with a focus on evidence based practice in OT intervention and application to clinical settings. The theoretical focus is on the CMOP and OTPF.
Prerequisite: Admission to the Program.
Normal Grade Rules
3 units

OCTH 266. Occupational Therapy with Older Adults
Focuses on older adults whose occupational participation and wellness are affected by age associated change, illness, injury, or disability. The occupational therapy process is applied to facilitate independence, remediate dysfunction, adapt to disability, and enhance wellness and quality of life.
Normal Grade Rules
3 units

OCTH 272. Management and Organizational Change for Occupational Therapists
Leadership, management principles and impact of the healthcare environment and reform on OT practice. Designed for post-professional students to apply to their practice setting through the development of a strategic plan.
Prerequisite: Admission to the Program.
Normal Grade Rules
3 units

OCTH 274. Education for Occupational Therapists
Examines effective teaching theories and methods for occupational therapists to use in their clinical practice as well as in the academic and professional arena. Constructivist philosophy and learning theories are explored.
Prerequisite: Admission to the program.
Normal Grade Rules
3 units
OCTH 275. Evidence Based Practice in Occupational Therapy
Evidence based practice is explored through lecture, in-class activities and data base research. Emphasis is on strategies for selecting, evaluating and analyzing professional literature in clinical decision making and exploration of quantitative and qualitative analysis to support evaluation of literature.
Prerequisite: OCTH 245
Normal Grade Rules
3 units

OCTH 276. Practicum and Seminar 1A
Introductory practicum and seminar in occupational therapy. Students will develop beginning observation, reasoning, and documentation skills through placement at practice sites, and explore the integration of evidence and theory in the practice of occupational therapy through online and on-campus seminars.
Credit / No Credit
3 units

OCTH 286. Practicum and Seminar 1B
Clinical practice in occupational therapy. Students engage in direct intervention in departmental clinics. Seminars, in-service education, direct supervision, and one to one mentoring are used to develop practice skills.
Prerequisite: OCTH 276
Repeatable for credit
Credit / No Credit
4 units

OCTH 295. Advanced Research Methods in Occupational Therapy
Advanced topics in research methodology and critical inquiry. Instrument development, the human subjects review process, quantitative and qualitative data analysis, interpretation and reporting of results. Critical analysis and synthesis of the gathered information crafted into a publishable quality paper and oral presentation.
Prerequisite: OCTH 245 and OCTH 275
Credit / No Credit
3 units

OCTH 295A. Introduction to Research Methodology in Occupational Therapy
Introduction to research methodology and the process of critical injury. How one conducts research, including traditions and methods used in occupational therapy and how to understand research publications.
Prerequisite: Statistics.
Normal Grade Rules
3 units

OCTH 295B. Advances Research Methodology in Occupational Therapy
Advances topics in research methodology and critical inquiry. Instrument development, the human subjects review process, quantitative and qualitative data analysis, interpretation, and reporting of results.
Prerequisite: OCTH 295A.
Credit / No Credit
3 units

OCTH 298. Supervised Study in Occupational Therapy
Special problems assigned for individual study.
Repeatable for credit
Credit / No Credit
1-3 units
Philosophy Department Courses

PHILO09. Mathematics and Logic for General Education
A survey of basic concepts and methods, focusing on logic, computation, sets, numbers, geometry and probability. Emphasis will be placed on using these concepts in daily life and in coping with public issues.
Prerequisite: Intermediate Algebra; satisfaction of ELM requirement.
Normal Grade Rules
GE B4
3 units

PHILO10. Introduction to Philosophy
Perennial problems in philosophy, such as: Who am I? What can I know? How should I live? Classical philosophical statements bearing on these issues.
Normal Grade Rules
GE C2
3 units

PHILO12. Philosophy of the Person
Philosophical issues concerning the origins, development and maturation of the self.
Normal Grade Rules
GE E
3 units

PHILO57. Logic and Critical Reasoning
Basic concepts of logic; goals and standards of both deductive and inductive reasoning; techniques of argument analysis and assessment; evaluation of evidence, language and definition; fallacies.
Normal Grade Rules
GE M9
3 units

PHILO61. Moral Issues
Moral philosophy covering major ethical theories and contemporary moral issues, such as abortion, euthanasia, animal rights, capital punishment, and sexuality.
Normal Grade Rules
GE C2
3 units

PHILO66. Introduction to Aesthetics
Issues such as the nature of beauty and ugliness, definition of art, creativity, and interpretation and evaluation of art. Philosophical discussion of works of art and our responses to them.
Normal Grade Rules
GE C1
3 units

PHIL 070A. Ancient Philosophy
Includes pre-Socratics, Socrates, Plato and Aristotle; Hellenistic, Roman and Medieval philosophy.
Normal Grade Rules
GE C2
3 units

PHIL 070B. Modern Philosophy
Seventeenth and eighteenth century philosophers such as Bacon, Descartes, Hobbes, Spinoza, Locke, Leibniz, Berkeley, Hume and Kant.
Normal Grade Rules
GE C2
3 units

PHIL 070C. Contemporary Philosophy
Introduction to 20th century philosophical movements, such as Feminism, Pragmatism, Logical Positivism, Ordinary Language Analysis, Asian Philosophy, and Phenomenology. Topics come from metaphysics, epistemology, aesthetics, ethics, and social and political philosophy.
Repeatable for credit
Normal Grade Rules
3 units

UPPER DIVISION

PHIL 104. Asian Philosophy
Philosophical examination of Confucianism, Daoism, Buddhism and some other significant movements of thought originated in Asia. Comparison with Western philosophy.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE V
3 units

PHIL 106. Philosophy of Art
Aesthetics covering the main schools of thought about art and selected topics related to specific arts, music, theatre, sculpture, painting, literature, etc.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 107. Philosophy and Literature
Philosophical theories presented through philosophical texts and philosophically focused literary works.
Prerequisite: 3 units of Philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 108. Political and Social Philosophy
Equality, justice, rights, liberty, the state, law and revolution. Readings drawn from classical and contemporary sources.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 109. Philosophy of Religion
Philosophical issues regarding the existence of a supreme being, evil, mysticism, miracles, reincarnation, faith, the possibility of enlightenment, and the connection between religion and morality.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 110. Science, Technology and Human Values
The aims, methods and world views of science and technology; such value issues as technological determinism, design aesthetics and moral implications of computer and other technologies.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE V
3 units

PHIL 111. Medical Ethics
Selected ethical problems in health care practices. For example, abortion, patient rights, national health care, euthanasia and genetic engineering, with emphasis on philosophical methods.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 112. American Philosophy
The eighteenth century beginnings of American philosophy, Transcendentalism, Pragmatism, classic American philosophy, including Emerson, Peirce, James, Santayana, Dewey, and recent developments.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units
PHIL 113. Existentialism and Phenomenology
Twentieth century philosophies of experience and human existence. Main topics include description of consciousness, personal authenticity, choice, anxiety, death of God. Philosophers range from Husserl and Heidegger to Sartre and de Beauvoir.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 114. Postmodern Philosophy
Contemporary criticisms of philosophy and culture. From early formulations in Nietzsche and Heidegger through current thinkers such as Foucault, Derrida, Irigaray, and others.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 118. Latin American Philosophy
Analysis of main themes of Latin-American, Mexican and Mexican-American thought.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 119. Africana Philosophy and Culture
Philosophical examination of the ideological roots of social movements in black diaspora cultures from Be-Bop to Hip-Hop.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 120. Eastern and Western Philosophy
Comparative examination of Eastern philosophy (including Confucianism, philosophical Taoism, Buddhist thought) and Western philosophy around some perennial issues and concerns, investigating how they could jointly contribute to the common philosophical enterprise in a complementary way.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 121. Philosophy and Feminism
A philosophical examination of writings that deal with issues of special concern to women, with emphasis on feminist writings.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 122. Social Justice
Critical examination of competing conceptions of justice and their application to social issues in a pluralistic society.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 126. Environmental Ethics and Philosophy
Extensions and applications of Kantian, Lockean, consequentialist and other philosophical theories of value to problems of the environment such as pollution, global warming, species depletion and overpopulation.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 132. Ethical Theory
Theoretical problems in the understanding of right conduct, value, obligation, justice, and virtue.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 133. Ethics in Science
An examination of values and practices in the culture of science. Issues: transmission of values in scientific communities, interactions between scientific and lay communities, historical development of norms of responsible research, cultural influence on scientific values.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
3 units

PHIL 134. Computers, Ethics and Society
The nature of privacy in a technologically interconnected world; the role of computer technologies in the exercise of the human intellect and imagination with respect to freedom of expression and the social good; rights and responsibilities of intellectual property ownership.
Prerequisites: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

PHIL 135. Philosophy of Art
Philosophical analysis and critical theory of art, literature, music and visual art.
Prerequisites: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

PHIL 136. Philosophy of Religion
Philosophical analysis and critical theory of religion.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 138. Philosophy of Law
Theoretical foundations of modern legal systems. Analysis of legal rights, duties, obligations, legal and immoral conduct, legal reasoning, and the concept of law.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 139. Philosophy of Mind
Problems in connection with emotion, intention, human action and personal identity.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 140. Philosophy of Science
Scientific methodology, explanation and verification; science and society. Varying topics from physical, biological and social sciences.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: R
3 units

PHIL 141. Philosophy of Race
Philosophical examination of race, racism, and race relations.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 143. Philosophy of Genetics
Philosophical analysis and critical theory of genetics.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 145. Philosophy of Language
Philosophical investigation into the nature of language in its relation to reality, thought, and the operation of the human intellect.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 146. Philosophy of Natural Science
Philosophical analysis of scientific research and theory with emphasis on the nature of scientific explanation and scientific methodology.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 147. Philosophy of Social Science
Philosophical analysis of the nature of social science, its relationship to the natural sciences, and the nature of social facts.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 148. Philosophy of History
Philosophical examination of the nature of history and the methodology of historical research.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 149. Philosophy of Technology
Philosophical analysis and critical theory of technology.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 150. Philosophy of Religion
Philosophical investigation into the nature of religion, the philosophy of religion, and the relationship of religion to other aspects of human experience.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 151. Philosophy of Science
Philosophical analysis and critical theory of science, with emphasis on the nature of scientific explanation and scientific methodology.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 152. Moral and Political Philosophy
Philosophical analysis and critical theory of moral and political questions.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 153. Philosophy of the Natural World
Philosophical examination of the nature of the natural world, its relationship to human action, and the methodology of natural science.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 154. Philosophy of the Social World
Philosophical examination of the nature of the social world, its relationship to human action, and the methodology of social science.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 155. Philosophy of Law
Philosophical analysis of the nature of law, legal reasoning, and morality. Philosophical analysis of the relationship of law to reality, thought, and action.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 156. Philosophy of Science
Philosophical analysis of scientific research and theory with emphasis on the nature of scientific explanation and scientific methodology.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 157. Intermediate Logic & Language Analysis
Predicative logic, methods of proof and some meta theory. Additional systems of logic may be considered.
Prerequisite: PHIL 009 or instructor consent.
Normal Grade Rules
3 units

PHIL 158. Philosophy of Language
Philosophical investigations into the nature of language in its relation to reality, thought, and action.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 159. Philosophy of Mind
Philosophical analysis and critical theory of mind, consciousness, and the relationship of mind to brain.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 160. Philosophy of Science
Philosophical analysis of scientific research and theory with emphasis on the nature of scientific explanation and scientific methodology.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

PHIL 161. Philosophy of Art
Philosophical analysis and critical theory of art, literature, music and visual art.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 162. Philosophy of Religion
Philosophical analysis and critical theory of religion.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 163. Philosophy of Science
Philosophical analysis of scientific research and theory with emphasis on the nature of scientific explanation and scientific methodology.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

PHIL 164. Philosophy of Art
Philosophical analysis and critical theory of art, literature, music and visual art.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 165. Philosophy of Religion
Philosophical analysis and critical theory of religion.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 166. Philosophy of Science
Philosophical analysis of scientific research and theory with emphasis on the nature of scientific explanation and scientific methodology.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

PHIL 167. Philosophy of Art
Philosophical analysis and critical theory of art, literature, music and visual art.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 168. Philosophy of Religion
Philosophical analysis and critical theory of religion.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 169. Metaphysics & Epistemology
Philosophical analysis of the nature of reality, knowledge, science, and the relationship of science to reality.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 171. Foundations of Mathematics and Computer Science
See MATH 171.
Normal Grade Rules
3 units
PHIL 180. Individual Studies
By arrangement. Course is repeatable for a total of 4 units.
Prerequisite: Department chair consent.
Repeatable for credit
Credit / No Credit
1-3 units

PHIL 184. Directed Reading
Course is repeatable for a total of 4 units.
Prerequisite: Qualified upper division student.
Repeatable for credit
Credit / No Credit
1-3 units

PHIL 186. Professional and Business Ethics
Interdisciplinary study of types of ethical problems which arise within the contexts of business occupations and professions. Major ethical theories, critique of economic and criminal justice. Focus is on issues of justice and equality in the U.S. Case studies.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE 5
3 units

PHIL 190. Seminar in Philosophical Classics
Works of a major philosopher or philosophical tradition. Course is repeatable for up to 12 units of credit when a seminar topic is different.
Prerequisite: PHIL 70A and PHIL 70B and 6 units of upper division philosophy or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

PHIL 195. Seminar in Philosophy of Law
Critical examination of topics in legal philosophy.
Prerequisite: 3 units of Philosophy and upper division standing.
Normal Grade Rules
3 units

GRADUATE

PHIL 264A. Professional/Business Ethics
See BUS 264A.
Normal Grade Rules
3 units

PHIL 281. Philosophy of Education
See EDTE 281.
Normal Grade Rules
3 units

PHIL 290. Advanced Seminar in a Selected Philosopher or Tradition
An exhaustive and detailed study of the entire, or most significant, writings of some outstanding philosopher or philosophical tradition. Course is repeatable for credit when seminar topic is different.
Prerequisite: Nine units of philosophy including PHIL 70A and PHIL 70B or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

PHIL 291. Advanced Seminar in Epistemology and Metaphysics
Classical or contemporary problems in knowledge and reality. Course is repeatable for credit when seminar topic is different.
Prerequisite: At least one upper division course in epistemology or metaphysics, or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

PHIL 292. Advanced Seminar in Ethics or Aesthetics
Classic or contemporary problems in some value area such as that of moral or aesthetic value. Course is repeatable for up to 12 units of credit when seminar topic is different.
Prerequisite: At least one upper division course in ethics or value theory, or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

PHIL 293. Advanced Seminar in Logical Theory
Concepts of logic, such as truth and inference, considered on an advanced level. Course is repeatable for credit when seminar topic is different.
Prerequisite: PHIL 9, PHIL 157 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

PHIL 298. Special Studies
Prerequisite: Advisor consent.
Repeatable for credit
Credit / No Credit
1-3 units

PHIL 299. Master’s Thesis
Prerequisite: Advisor consent.
Repeatable for credit
Mandatory CR/NC/RP
3 units
Physics and Astronomy Department Courses

ASTRONOMY

LOWER DIVISION

ASTR 010. Descriptive Astronomy
A generally non-mathematical examination of principles, facts and logic of astronomy, emphasizing arrangement, origin and evolution of the solar system.
Normal Grade Rules
GE B1
3 units

UPPER DIVISION

ASTR 101. Modern Astronomy
A principally non-mathematical discussion of current scientific observational and theoretical understanding of the origin and evolution of stars, galaxies and the cosmos.
Prerequisite: Completion of Core GE, satisfaction of Writing Skills Test and upper division standing and a college physical science course. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE R
3 units

ASTR 102. Astronomy Lab
Experimental examination of specific astronomical topics: coordinate systems, constellations, etc. Astronomical applications of general physical principles: gravitational motion, stellar spectra, etc.
Prerequisite: Completion of or concurrent enrollment in a college-level astronomy course.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
GE B3
1 unit

ASTR 117A. Astrophysics I
Physics and chemistry of the solar system and other planetary systems; orbital properties and physical nature of the interiors, surfaces and atmospheres of planets, moons, rings, asteroids and comets.
Prerequisite: a C- or better in MATH 31 and PHYS 52
Normal Grade Rules
3 units

ASTR 117B. Astrophysics II
Physics of stellar structure and evolution; observed properties of stars; physics and chemistry of the interstellar medium; galaxies and cosmology.
Prerequisite: PHYS 52 and MATH 31
Normal Grade Rules
3 units

ASTR 155. Topics in Modern Astronomy and Astrophysics
Selected topics in astronomy and astrophysics. Topics vary each semester, and may include observational, computational or analytic techniques. Course is repeatable for a total of 9 units.
Prerequisite: ASTR 117A and ASTR 117B.
Repeatable for credit
Normal Grade Rules
3 units

PHYSICS

LOWER DIVISION

PHYS 001. Elementary Physics
Mechanics, energy, electricity, magnetism, optics, atomic and nuclear physics, properties of matter; emphasizes practical applications of physics principles to contemporary problems.
Normal Grade Rules
GE B1
3 units

PHYS 001L. Elementary Physics Lab
Selected experiments on topics covered in Phys 1.
Co-requisite: PHYS 001.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
GE B3
1 unit

PHYS 002A. Fundamentals of Physics
First semester of a two-semester sequence that is non-calculus based and covers the topics of mechanics, heat, and sound.
Prerequisite: Algebra.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE B1+B3
4 units

PHYS 002A. Fundamentals of Physics
A discussion course for students concurrently registered in PHYS 002A covering problem solving methods as related to topics normally covered in PHYS 002A.
Corequisites: PHYS 002A.
Repeatable for credit
Credit / No Credit
1 unit

PHYS 0040. Physics and the Computer
In this course, students will learn how to use the computer to solve physics problems and to plot and analyze data. They will learn how to program in MatLab, a powerful and versatile programming language that is standard in many high-tech industries and in research.
Prerequisite: PHYS 050
Pre/Corequisite: PHYS 051
Normal Grade Rules
2 units

PHYS 049. Introduction to Physics
A preparatory course in physics for science and engineering majors, emphasizing significant figures, unit conversions, vectors, quantitative reasoning. Introduction to Newton’s Laws and conservation laws. The relevance of physics to science and engineering careers.
Prerequisites: Math 19 or pre-calc placement test
co-requisites: Math 30 or Math 30P
Normal Grade Rules
3 units

PHYS 050. General Physics/Mechanics
A calculus-based treatment of particle kinematics and dynamics, work and energy, linear momentum, rotational motion, equilibrium, and simple harmonic motion.
Prerequisite: MATH 30 or MATH 30P, with a grade of “C-” or better, and eligibility for ENGL 1A.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE B1+B3
4 units

PHYS 050W. General Physics/Mechanics Workshop
A discussion course for students concurrently registered in PHYS 050 General Physics/Mechanics covering problem solving methods as related to topics normally covered in PHYS 050.
Corequisites: PHYS 050
Repeatable for credit
Credit / No Credit
1 unit

PHYS 051. General Physics/Electricity and Magnetism
A calculus-based treatment of particle kinematics and dynamics, work and energy, linear momentum, rotational motion, equilibrium, and simple harmonic motion.
Prerequisite: PHYS 050, MATH 031, both with grades of “C-” or better.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE B1+B3
4 units
Academic Year 2014-2015
Course Descriptions

v01
Monday, June 9, 2014

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE

RETURN TO LAST PAGE
DESCRIPTION CONTENTS

PHYS 051W. General Phys / Electricity and Magnetism
A discussion course for students concurrently registered in PHYS 051 covering problem solving methods as related to topics normally covered in PHYS 051.
Corequisite: PHYS 051
Repeatable for credit
Credit / No Credit
1 unit

PHYS 052. General Physics/Waves, Light, Heat
Mechanical Waves, Light, Spectra, Quantization of electromagnetic radiation, Geometric and Physical Optics, Temperature, Heat and Thermodynamics.
Prerequisite: PHYS 051 with grade of “C-” or better or permission of instructor.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE B1+B3
4 units

PHYS 053. General Physics/Atomic Physics
Introduction to quantum physics emphasizing electronic structure of atoms and solids, radiation and relativity.
Prerequisite: PHYS 50, PHYS 51 and PHYS 52; CHEM 1A, (with grades of "C-" or better).
Normal Grade Rules
2 units

UPPER DIVISION

PHYS 104. Physics Teacher Enhancement
A thematic approach to the study of relevant topics and concepts in physics. Development of inquiry-based, hands-on classroom activities in physics.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

PHYS 105A. Advanced Mechanics
Dynamics of particles: oscillations, Lagrange’s and Hamilton’s equations, central-force motion.
Prerequisite: PHYS 70 or PHYS 50, MATH 32.
Corequisite: MATH 133A.
Note: Year course.
Normal Grade Rules
3 units

PHYS 105B. Advanced Mechanics
Dynamics of systems of particles: collisions, rigid body rotations, non-inertial frames, coupled oscillations, waves.
Prerequisite: PHYS 070 or PHYS 050, PHYS 105A, MATH 032.
Corequisite: MATH 133A.
Normal Grade Rules
3 units

PHYS 110A. Electricity and Magnetism
Theories of electrostatics, magnetostatics, electrodynamics and electromagnetic waves.
Prerequisite: PHYS 71 or PHYS 51; MATH 112 and MATH 133A.
Note: Year course.
Normal Grade Rules
3 units

PHYS 110B. Electricity and Magnetism
Theories of electrostatics, magnetostatics, electrodynamics and electromagnetic waves.
Prerequisite: PHYS 71 or PHYS 51; MATH 112 and MATH 133A.
Normal Grade Rules
3 units

PHYS 120A. Electronics, Data Acquisition & Analysis
The characteristics of basic analog and digital electronic circuits used in a scientific laboratory. Topics include transistors, operational amplifiers, digital electronic circuits, and computer data acquisition.
Prerequisite: PHYS 002B, PHYS 71, or PHYS 051.
Misc/Lab: Seminar 2 hours/lab 3 hours.
Normal Grade Rules
3 units

PHYS 120B. Modern and Solid State Physics Lab
Experimental methods of modern physics and solid state physics, including semiconductors, superconducting quantum interference, Faraday effect, magnetic resonance and electron spin resonance.
Pre/Corequisite: PHYS 122 and PHYS 120A.
Misc/Lab: Seminar 1 hour/lab 6 hours.
Normal Grade Rules
3 units

PHYS 120C. Advanced Physics Lab: Optics
Experiments in optics covering geometrical optics, interference, holography, diffraction and polarization.
Prerequisite: PHYS 158.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
3 units

PHYS 121S. Radiation Safety
See NUCS 121S.
Normal Grade Rules
1-2 units

PHYS 122. Modern Physics
Relativistic mechanics, particle-wave duality, introduction to quantum theory of atoms, nuclei and solids.
Prerequisite: PHYS 72 or PHYS 52.
Normal Grade Rules
3 units

PHYS 123. Physics of Animation
An introduction to the principles and concepts of physics relevant to animation and special effects.
Prerequisite: Completion of Core GE, satisfaction of WST, and upper division standing.
Normal Grade Rules
GE R
3 units

PHYS 126. Introduction to Nuclear Science
See CHEM 126.
Normal Grade Rules
3 units

PHYS 127. Nuclear Science Lab
See CHEM 127.
ABC/No Credit
3 units

PHYS 140. Computational Methods in Physics
An introduction to the programming of algorithms and numerical techniques pertinent to physical systems.
Prerequisite: PHYS 50, PHYS 51, PHYS 52, PHYS 53 or PHYS 70, PHYS 71, PHYS 72, or equivalent.
Misc/Lab: Seminar 2 hours/lab 3 hours.
Normal Grade Rules
3 units

PHYS 158. Modern Optics
Thin and thick lens systems. Double and multiple beam interference, holography, Fraunhofer and Fresnel diffraction, Fourier optics, spatial filtering, polarization and birefringence.
Prerequisite: PHYS 72 or PHYS 52, MATH 32.
Normal Grade Rules
3 units

PHYS 160. Thermodynamics and Statistical Physics
The laws of thermodynamics and kinetic theory with introduction to statistical mechanics.
Prerequisite: PHYS 72 or PHYS 52, MATH 32.
Normal Grade Rules
3 units

PHYS 163. Quantum Mechanics
General principles of quantum theories. Wave functions, operator algebra and approximation methods. Applications to atomic structure and solid state physics.
Prerequisite: PHYS 122, MATH 133A.
Normal Grade Rules
3 units

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
PHYS 263B. Quantum Theory
Prerequisite: PHYS 263A.
Normal Grade Rules
3 units

PHYS 265. Elementary Particles and Nuclear Physics
Elementary particle production and transformations, detectors and accelerators, nuclear structure and nuclear reactions.
Prerequisite: PHYS 163.
Normal Grade Rules
3 units

PHYS 268. Laser Spectroscopy
Importance of spectroscopy. Interaction of radiation with matter. Instrumentation for laser spectroscopy. Examples of various techniques, cw and pulsed.
Prerequisite: PHYS 110B, PHYS 158 or instructor consent.
Normal Grade Rules
3 units

PHYS 275. Solid State Physics
Properties of crystals; electric, magnetic and thermal properties of solids.
Prerequisite: PHYS 175A and PHYS 263A or instructor consent.
Normal Grade Rules
3 units

PHYS 277. Superconductivity and Magnetism in Solids
Prerequisite: PHYS 175A, PHYS 275 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

PHYS 285. Seminar
Meetings for the presentation and discussion of advanced studies in special fields including work by the faculty, guest investigators and graduate students. Topics will vary each semester.
Credit / No Credit
1 unit

PHYS 290R. Supervision of Completion of Degree Requirements
Continued work on thesis or project.
Pre-requisite: Outstanding RP grade in a preceding semester in Chem 299, Master’s Thesis.
Mandatory CR/NC/RP
1 unit

PHYS 298. Research
Advanced individual work in physics.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

PHYS 299. Master’s Thesis
Prerequisite: Admission to candidacy for the master’s degree.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units
Political Science Department Courses

POLITICAL SCIENCE

LOWER DIVISION

POLS 001. American Government
Institutions and processes of American government and democracy; the U.S. Constitution and California state and local government.
Notes: Satisfies American Institutions requirements in American and California government.
Normal Grade Rules
3 units

POLS 002. Introduction to Comparative Politics
Comparative analysis of different kinds of political systems; their political institutions, processes and policies; the environments in which they occur and their consequences.
Normal Grade Rules
GE: D2
3 units

POLS 003. Introduction to Political Thought
Thinking critically about the classic problems of politics; learning how to interpret, discuss and write about historical and contemporary political thought.
Normal Grade Rules
GE: C2
3 units

Introductory survey of major topics in international relations, including global, national and individual causes of war and peace, international cooperation, north-south relations and political economy.
Normal Grade Rules
GE: D3
3 units

POLS 014Q. Awake in Utopia
Asleep for 117 years, a wealthy Bostonian awakens in Boston in 2000 and finds horrible, degrading living conditions that all but the wealthy must endure has evolved into utopia. A surreal, multidisciplinary exploration of the perfect human society.
Prerequisite: First term freshmen only.
Note: All courses with a 'Q' suffix are designated as First Year Experience courses.
Normal Grade Rules
GE: D1
3 units

POLS 015A. U.S. History and Government
See HIST 015A.
Normal Grade Rules
GE: M6
3 units

POLS 015B. U.S. History and Government
See HIST 015B.
Normal Grade Rules
GE: M7
3 units

POLS 020. Controversial Legal Issues
Basic concepts in critical thinking as demonstrated in legal reasoning and analysis of contemporary legal issues possibly including abortion, drug testing, offensive speech, affirmative action, gender and sexual preference discrimination, school prayer and pornography.
Normal Grade Rules
GE: M9
3 units

UPPER DIVISION

POLS 100W. Writing Workshop
Writing skills for majors in political science. Basic materials; research; memos and research reports, press releases, analyses of political/electoral behavior; political speeches.
Prerequisite: ENGL 1B (with a grade of C or better);
Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement. Should be taken junior year.
Normal Grade Rules
GE: Z
3 units

POLS 101. American Government for Teachers
Introduction to the institutions and processes of American and California governments with emphasis on meeting CCTC Teacher Preparation Standards. Topics include U.S. Constitution, federalism, political participation, civil rights and liberties, Congress, the presidency.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

POLS 102. State Government and Politics
Origins, development, modern organization and contemporary problems of state government, with special reference to California.
Prerequisite: Upper division standing or instructor consent.
Notes: Satisfies American Institutions requirement in California government.
Normal Grade Rules
3 units

POLS 103. Local Government and Politics
Government and politics of communities, cities, counties and urban regions, including power inside and outside city hall and other institutions of local government.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

POLS 105. The Legislative Process
Political decision-making in Congress and other legislative agencies. Includes organizational and procedural problems of modern legislatures and problems of legislative-executive relations.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

POLS 106. The United States Presidency
Selection, organization, powers and functioning of the United States presidency.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

POLS 107. Politics and Public Opinion
Relations between government and opinions of groups and individuals. U.S. political culture. Political socialization: how opinions are formed. Socialization agents: parents, peers, the media, class, religion, education. Measurement of public opinion: survey research and political polling.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

POLS 108. Political Participation
Political participation in the United States, focusing on civic engagement through parties, interest groups, campaigns, and elections.
Normal Grade Rules
3 units

POLS 109. Women and Politics
The significance of gender in policy-making and political behavior. Comparative status of women in various polities; emphasis on the United States.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 110. Ethnic Politics
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 114. Introduction to Public Administration
Organizing assumptions, concepts and definitions underlying public administration. Application of public management theories to government efforts at national, state and local levels to translate public policies into action.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 120. Law and Society
Social and philosophical foundations of law and legal systems and development of legal institutions in various cultures. Anglo-American law and administration of justice in the U.S. emphasized.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE S
3 units
POLS 121A. Constitutional Law: Institutional Powers
The U.S. Supreme Court, its processes and place in the U.S. political system. Includes judicial policy-making through cases on judicial review, separation of powers, federalism, and the commerce, tax and treaty powers.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 121B. Constitutional Law: Civil Liberties
Analysis of leading Supreme Court decisions regarding the Bill of Rights and the due process clauses, including speech, religion, criminal justice and privacy.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 121C. Constitutional Law: Civil Rights
This course analyzes the constitution as it relates to discrimination in both the public and private sector. Discrimination based on race, sex, sexual orientation, religion, national origin, age and other criteria are the main criteria of constitutional analysis.
Prerequisite: Upper division standing
Normal Grade Rules
3 units
POLS 122. Judicial Politics
American courts analyzed as political institutions. Highlights the role played by personality, structure and politics in the making of judicial policy. Topics include judicial selection, agenda-setting, decision-making and relations with other branches of government.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 124. Introduction to Environmental Law
See ENVS 124.
Normal Grade Rules
3 units
POLS 130. Making Public Policy
Public policy formation related to economic, social and political problems; governmental planning and programming.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 135. U.S. Environmental Policy
Inquiry focuses on state of the environment, public attitudes toward the problem, interest groups involved in formulation of policy, the response of government leaders to the problem and what the future outlook is for addressing the agenda.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 136. History of Terrorism in the Modern World
See HIST 136
Normal Grade Rules
3 units
POLS 140. European Union
The politics, processes, and critical issues of European integration and unification.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 141. Eurasian Politics
Political developments in Russia and Soviet Successor States, with emphasis on democratization, privatization, and international relations with the European Union and the United States.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 142. African Politics
Political structures and policies of Africa, emphasizing Africa south of the Sahara. African nationalism and its impact.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 144. Middle Eastern Politics
Political systems of the Middle East. The significance of Islam and the role of the region in global politics.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 145. Asian Politics
Political systems of Asia and critical issues among Asian states.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 146. Latin American Politics
Political development in Mexico, Central and South America focusing on recent transitions to democracy, civil-military relations and economic integration.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 147. Globalization
Comparative exploration of the complex issues of poverty, justice, and uneven economic and political development in the Third World in a globalized economy.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 148. Nationalism and Comparative Political Cultures
Comparative exploration and analysis of the origin, nature, and importance of nationalism and political culture in Western and non-Western settings.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
POLS 149. Comparative Public Policy and Administration
Ideologies, institutions and public policy making in a comparative context. Policy making process in various countries, from emerging issues to choices to implementation and subsequent impact on political systems.
Prerequisite: Upper division standing or instructor consent.
   Normal Grade Rules
   3 units

POLS 150. War and Peace
Fundamental human questions about causes of war, definitions of peace and approaches toward achieving peace from perspectives of historical and contemporary thinkers, including philosophers, political leaders, military strategists and diplomats.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required. Not counted as a core course in the international relations subfield.
   Normal Grade Rules
   GE V
   3 units

POLS 152A. International Organizations and NGOs
International and functional organizations and regimes analyzed in terms of origins, structure, functions and policies, such as the United Nations, International Monetary Fund, World Trade Organization, NATO, and Red Cross.
Prerequisite: POLS 4 or instructor consent.
   Normal Grade Rules
   3 units

POLS 152B. Model United Nations
Structure and operations of the United Nations explored and analyzed through participation in annual U.N. simulation.
Prerequisite: POLS 152A or instructor consent.
   Repeatable for credit
   Credit / No Credit
   3 units

POLS 154. U.S. Foreign Policy: Formulation and Administration
Factors that shape American foreign policy decision-making; organization, administration, parties, groups and public opinion. Relations among government branches and democratic responsibility in foreign policy making.
   Normal Grade Rules
   3 units

POLS 155. The Wealth of Nations
This course explores the politics of global economic relations by examining the role of states, international organizations, multinational corporations, and social movements in shaping international trade, financial, and labor relations.
Prerequisite: POLS 004
   Normal Grade Rules
   3 units

POLS 156. Islam, Politics and the West
See RELS 156
   Normal Grade Rules
   3 units

POLS 160A. Classical Political Thought
Critical examination of the foundations of Western political thought and the continuing influence of these foundations; sources chosen from among a variety of pre-Renaissance traditions and include writers such as Plato, Aristotle, Augustine and Aquinas.
Prerequisite: Upper division standing or instructor consent.
   Normal Grade Rules
   3 units

POLS 160B. Modern Political Thought
The basis of the modern state and society as interpreted by political thought between (and including) the Renaissance and the French Revolution; this key period includes writers such as Machiavelli, Hobbes, Locke and Rousseau.
Prerequisite: Upper division standing or instructor consent.
   Normal Grade Rules
   3 units

POLS 160C. Recent Political Thought
The roots of today’s politics in the ideas and writers of the nineteenth and twentieth centuries; sources drawn from a variety of recent traditions such as democratic theory, Marxism, political psychology and political sociology.
Prerequisite: Upper division standing or instructor consent.
   Normal Grade Rules
   3 units

POLS 163. American Political Thought
Critical examination of the origins and development of American politics as seen through theorists, concepts and forces which have shaped American political consciousness.
Prerequisite: Upper division standing or instructor consent.
   Normal Grade Rules
   3 units

POLS 170V. American Politics in Global Perspective
A survey of U.S. and California political institutions and culture in comparison with political institutions and cultures outside the U.S.
Prerequisites: Completion of Core GE, satisfaction of writing skills test and upper division standing.
   Normal Grade Rules
   GE V
   3 units

POLS 177. Political Psychology
This course provides an introduction to the interdisciplinary field of political psychology. Students will learn to apply psychological theories to political topics including personality and leadership, attitudes and voting, group dynamics, racism and ethnic conflict, terrorism, and international relations.
Prerequisite: POLS 1 or other courses satisfying GE areas US2-US3, PSYC 1, or instructor consent
   Normal Grade Rules
   3 units

POLS 180. Individual Studies
Individual study for advanced work in areas where no courses are offered.
Prerequisite: Appropriate courses, instructor consent and department chair consent.
   Repeatable for credit
   Credit / No Credit
   1-4 units

POLS 181. Internships
Supervised practical experience in public administration or politics. Course is not repeatable for credit when internship is in a substantially different area.
Prerequisite: POLS 100W and instructor consent.
   Repeatable for credit
   Credit / No Credit
   0-3 units

POLS 184. Directed Reading
Program of reading and writing created through student/faculty consultation in areas not covered by other courses. Course is not repeatable for credit.
Prerequisite: Appropriate courses, instructor consent and department chair consent.
   Normal Grade Rules
   1-4 units

POLS 190. Senior Seminar
Integrative capstone course and culminating experience for political science majors focusing on the advanced study of selected topics.
Prerequisite: POLS 100W or instructor consent
   Repeatable for credit
   Normal Grade Rules
   3 units
POLS 190H. Honors Thesis
Preparation and writing of an original project.
Prerequisite: Senior standing. 3.2 CPA and instructor consent.
Normal Grade Rules
1 unit

POLS 195A. Political Inquiry
Introduction to a variety of methods used by contemporary political scientists to comprehend the world of politics. Examines assumptions, logic and usefulness of a scientific study of politics and other approaches to understanding political phenomena.
Prerequisite: Upper division standing or instructor consent.
Notes: Should be taken junior year.
Normal Grade Rules
3 units

POLS 199. Current Political Issues
Major political issues of the day. Topics vary each semester. Course is repeatable for credit with instructor consent.
Repeatable for credit
Normal Grade Rules
1-3 units

PUBLIC ADMINISTRATION

GRADUATE

PADM 201. Computer Applications in Public Administration
An examination of the software environment and applications related to policy analysis and public management. Discussion of policy issues related to management information systems (MIS) and decision support systems (DSS).
Normal Grade Rules
3 units

PADM 202. Regional Governance
An exploration of current theories, practices, issues and problems in the governance of urban regions in the United States.
Prerequisite: POLS 001, PADM 210.
Normal Grade Rules
3 units

PADM 203. Introduction to Public Administration
A broad overview of public administration, including policy analysis, budgeting, personnel, organization, leadership, decision-making and ethics in a political environment. Examination of the theory and application of public management practices at all levels of government.
Normal Grade Rules
3 units

PADM 211. Public Administration and the Political Process
A study of the mutual relationships between American politics and public administration. Special focus on the nature of political factors in administration, methods of coping with politics and ethical considerations.
Normal Grade Rules
3 units

PADM 212. Administrative Research Methods
The study and application of principles and methods of social science research and evaluation in a public administration context. Emphasis on learning research designs and using statistics and computers.
Prerequisite: Statistics.
Normal Grade Rules
3 units

PADM 213. Policy Analysis and Evaluation
An examination of the application of analytical and administrative tools to solving public problems. Study of the processes of policy formulation and the research and political tools necessary to assess program effectiveness.
Prerequisite: Statistics.
Normal Grade Rules
3 units

PADM 214. Introduction to Public Management
A study of current principles and practices of effectively managing public service organizations. Emphasis on critical thinking, project management, and implementation processes.
Prerequisite: Statistics.
Normal Grade Rules
3 units

PADM 215. Public Personnel Administration
An overview of personnel management in a political environment and its role in maintaining a democratic society. Methods and problems of job analysis, compensation, staffing, EEO, evaluation, training and union relations.
Prerequisite: PADM 210.
Normal Grade Rules
3 units

PADM 217. Organizational Theory
Analysis and application of theories about organizations, including organizational goals, structures, authority, leadership, decision patterns and communications. Emphasis on methods of change and differences between the public and private sectors.
Prerequisite: PADM 210.
Normal Grade Rules
3 units

PADM 218. Public Budgeting
A study of current theory, techniques and practice of public budgeting for political decision-making, planning and management. Focus on executive and legislative budget processes, reform efforts, public choice analysis, financial processes and the role of accounting.
Prerequisite: PADM 210, ECON 1A (or equivalent).
Normal Grade Rules
3 units

PADM 219. Public Financial Administration
An overview of public financial administration, including microeconomic concepts and techniques, tax theory and policy, user charges, inter-governmental transfers, debt administration and risk management in a political environment.
Prerequisite: PADM 218.
Normal Grade Rules
3 units

PADM 223. Law and Public Administration
An overview of legal and political processes affecting relationships among the public, government institutions, administrative agencies and the courts. Focus on major cases related to administrative agency use of rules and orders to implement public policy.
Prerequisite: POLS 001 and PADM 210
Normal Grade Rules
3 units

PADM 228. Urban Community Development
See URBP 228.
Normal Grade Rules
4 units

PADM 240. Environmental Planning
See URBP 240.
Normal Grade Rules
4 units

PADM 241. Public Administration Internship
Supervised practical experience in public administration. Focus on integrating student work experiences with the academic program by means of seminars and consultation.
Prerequisite: Instructor consent.
Credit / No Credit
3 units

PADM 290R. Project Supervision
Continued work on thesis or project.
Pre-requisite: Outstanding RP grade in a preceding semester in a project class
Mandatory CR/NC/RP
1 unit

PADM 295. Topics in Public Administration
An exploration of current theories, problems and techniques in a selected major topic of current importance in public administration.
Repeatable for credit.
Normal Grade Rules
3 units
PADM 297. Advanced Seminar in Public Management
This course serves as the “capstone” of the MPA program. It uses an analysis of real world cases to relate principles and theories of public administration to concrete, real world problems. The individual subject papers dealing with the main class topic that earn a grade of A- or better will be published as an electronic journal. The culminating project for this class is the approved prospectus for the PADM 298 project.
Prerequisite: Classified standing.
Normal Grade Rules
3 units

PADM 298. Special Problems
Advanced individual research and projects.
Prerequisite: PADM 210, 212, 213, 214 and 218; instructor consent; consent of the chair.
Mandatory CR/NC/RP
3 units

PADM 299. Master’s Thesis
Independent research conducted under the supervision of a permanent faculty member and two other qualified persons. Emphasis on applying administrative concepts and analytical skills to actual problems of policy and administration in the public sector.
Note: Repeatable once for credit.
Repeatable for credit
Mandatory CR/NC/RP
3 units
Academic Year 2014-2015

Course Descriptions

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE

Psychology Department Courses

PSYCHOLOGY

LOWER DIVISION

PSYC 001. General Psychology
Study of perception, attention, learning, remembering, thinking, development of the individual, intelligence, aptitudes, emotions, motivation, adjustment and conflict; designed to give insight into oneself and others.

Normal Grade Rules
GE 01
GE E
3 units

PSYC 002Q. Identity Development and Prejudice
This seminar is designed to facilitate the transition to the university smoothly with a view to an increased understanding of one’s cultural identity; and exploring mechanisms and consequences of prejudice and discrimination in American cultural groups.

Prerequisite: First term freshmen only.
Note: All courses with a ‘Q’ suffix are designated as First Year Experience courses.

Normal Grade Rules
GE E
3 units

PSYC 018. Introduction to Research Methods
Psychological research methods, including experimental, correlational and observational investigations; illustrated by lab and field studies.

Prerequisite: STAT 95.
Misc/Lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

PSYC 030. Introductory Psychobiology
Biological approaches to understanding behavior: evolutionary, genetic, neural and hormonal influences on normal and abnormal behavior.

Prerequisite: BIOL 021 or BIOL 065.
Normal Grade Rules
3 units

PSYC 082. Child and Adolescent Psychology
Psychological development of children from conception to adolescence. Observation required.

Prerequisite: Not counted as units in the Psychology Major. Satisfies requirement for candidates for Multiple Subject Teaching Credential.

Normal Grade Rules
GE 01
3 units

UPPER DIVISION

PSYC 100W. Writing Workshop
Practice in improvement of writing skills appropriate to the broad field of psychology, including essays, reports and scholarly communication.

Prerequisite: ENGL 1B (with a grade of C or better).
Completion of core GE, satisfaction of Writing Skills Test and upper division standing; PSYC 1; STAT 95 or senior standing. Psychology Majors/Minors and Behavioral Science Majors only.

Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.

Normal Grade Rules
GE Z
3 units

PSYC 102. Child Psychology
Psychological development of children from conception to adolescence, including perceptual, cognitive, personality and social development. Outside activities may be required.

Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 105. Special Topics in Developmental Psychology
Intensive examination of current research and theory in a specialized area of developmental psychology. Course is repeatable for credit when course content changes.

Prerequisite: PSYC 102 (or equivalent).
Repeatable for credit
Normal Grade Rules
3 units

PSYC 107. Psychology of Women
Sex-role development of women in terms of bio-social factors involved in intellectual and personal-emotional functions. Psychological theory and research.

Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 110. Abnormal Psychology
What is considered normal and abnormal in human behavior and psychological functioning. Emphasis on psychological, social and biological determinants of human behavioral and psychological deviance.

Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 112. Psychology of Adolescence
Adolescent personality as the product of cultural and psychological factors, emphasizing normal behavior and development.

Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 114. Psychology of Aging
Developmental patterns of aging (middle to old age); cognition, personality, interpersonal relationships, psychology and physiology of health, living arrangements, aging in other cultures and times, dying and death and counseling.

Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 117. Psychological Tests and Measures
Test and questionnaire construction, evaluation and interpretation applied to intelligence and ability tests, personality and adjustment questionnaires, ratings and behavioral observation techniques.

Prerequisite: STAT 095.
Normal Grade Rules
3 units

PSYC 120. Advanced Research Methods and Design
Descriptive, correlational, quasi-experimental, and experimental approaches: design, methodology, and analysis. Experience designing, conducting, analyzing, and presenting (verbal and written) research findings. Topics will include: hypothesis testing, validity, reliability, scales of measurement, questionnaire development, power, statistical significance, and effect size.

Prerequisite: PSYC 001, STAT 095, and PSYC 100W.
Misc/Lab: Lecture 3 hours/activity 2 hours.
Normal Grade Rules
4 units

PSYC 121A. Advanced Research Methods Social/Personality Laboratory
Advanced treatment of research approaches used in Social and Personality. The focus for this course is shared between traditional laboratory and fieldwork experimental designs and methods. Data collection and statistical data analysis facilitate experiential learning.

Prerequisite: PSYC 001, STAT 095, PSYC 100W, plus either: PSYC 139 or PSYC 154.
Pre/Corequisite: PSYC 120 must be taken either before, or concurrently with, this course.
Misc/Lab: Lecture 1 hour/lab 3 hours.
ABC/No Credit
2 units

PSYC 121B. Advanced Research Methods: Cognition/Perception Laboratory
Advanced treatment of research approaches used in Cognition and/or Perception. The primary focus of the course is on traditional laboratory experimental designs and methods. Laboratory-based data collection and analysis facilitate experiential learning.

Prerequisite: PSYC 001 STAT 095, PSYC 100W, plus any one of: PSYC 135, PSYC 153, or PSYC 158.
Pre/Corequisite: PSYC 120 must be taken either before, or concurrently with, this course.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units
PSYC 121C. Advanced Research Methods: Clinical Laboratory
Advanced treatment of research approaches used in clinical research. The primary focus of the course is on traditional field and laboratory research methodologies. Data collection and statistical data analysis facilitate experiential learning.
Prerequisites: PSYC 001, STAT 095, PSYC 100W, PSYC 110.
Pre/Corequisite: PSYC 120 must be taken either before, or concurrently with, this course.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules 2 units

PSYC 121E. Advanced Research Methods: Psychophysiology Lab
This course is an intensive experiential introduction to applied laboratory work in human psychophysiology and hormonal influences on human behavior. Focus on experimental methodology, data analysis, and laboratory technique.
Prerequisites: PSYC 030, PSYC 100W.
Pre/Corequisite: PSYC 120 must be taken either before, or concurrently with, this course.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules 2 units

PSYC 125. Introduction to Group Dynamics
Major theories of small-group behavior; experiential course requiring group participation.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 126. Drugs, Brain and Behavior
Survey of psychoactive drugs, including prescription and street drugs; social, behavioral and physiological effects of drugs; neural mechanisms of drug action; history of drug use.
Prerequisite: PSYC 030 or 3 units of biology.
Normal Grade Rules 3 units

PSYC 129. Neuroscience
Principles of brain organization and function underlying behavior. Topics include neuroanatomy and physiology of language, vision, sexual behavior, memory and abnormal behavior.
Prerequisite: Either PSYC 030 and 3 units of biology, or 9 units of biology.
Notes: Not acceptable as an elective in the Biology major.
Normal Grade Rules 3 units

PSYC 130. Psychology and Religious Experience
See RELS 130.
Normal Grade Rules 3 units

PSYC 135. Cognition
The activity of knowing: acquisition, organization and use of knowledge. Processes involved in that activity, including perception, memory, thinking and language.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 138. Exercise and Mental Health
The role of exercise in mental health, with special emphasis on its effectiveness as a primary or supplementary treatment for depression and anxiety; examined within an evolutionary framework, with lifestyle as a central issue.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 139. Psychology of Personality
Current approaches to the study of personality and personality processes.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 140. Child Psychopathology
Nature, causes and handling of emotional and personality problems of children.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 142. Community Mental Health
See HS 145.
Normal Grade Rules 3 units

PSYC 145. Community Mental Health
See HS 145.
Normal Grade Rules 3 units

PSYC 150. Educational Psychology
Development of individuals and how they learn. Intelligence, emotions, interests, social relations as related to development and learning.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 150A. Principles of Research: Educational Psychology
Development of individuals and how they learn. Intelligence, emotions, interests, social relations as related to development and learning.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 153. Psychology in the Courtroom
Role of psychology in the legal system: legal procedure and adversary system, jury selection, jury decision-making, eyewitness testimony, mental health law, criminal responsibility and legal insanity, expert psychological testimony, role of forensic psychologists.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 154. Social Psychology
Theories, problems and issues in the study of human social behavior.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 155. Human Learning
Memory, forgetting, concept formation, language learning, reinforcement and related topics. Traditional learning concepts, theories and findings with reference to contemporary classroom management, behavior modification and other applications.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 157. Psychology of Motivation
Empirical findings and theoretical developments in motivation in relationship to concepts of need, arousal, drive and emotion.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 160. Clinical Psychology
Survey of clinical psychology as profession and the role of the clinical psychologist as therapist, diagnostician, administrator, scientist and agent of individual and social change.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 165. Theory and Methods of Counseling
Major theories of behavioral change, with emphasis on counseling of persons with problems in occupational, social, family and individual adjustment.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 167. Sports Psychology
Psychological aspects of sports, including the value of sports, psychological factors involved in competitive as well as non-competitive athletic activities and the role of sports psychologists.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units

PSYC 170. Industrial and Organizational Psychology
Application of psychological theory, research and methodology to the work environment. Topics covered include leadership, power, group processes, motivation, satisfaction and issues in personnel psychology.
Prerequisite: PSYC 001.
Normal Grade Rules 3 units
PSYC 173. Human Factors
Human psychology and physiological characteristics and methods for taking these into account in designs and development of human-machine systems. Current human factor engineering efforts in lab, design process and operational environment.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 175. Management Psychology
Theory and practice of psychology in organizations and management. Topics include learning, motivation, perception, attitudes, personality, stress, groups, culture, careers, communication, leadership, politics, conflict, cooperation, decision-making and organizational change.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 177. Political Psychology
See POLS 177.
Normal Grade Rules
3 units

PSYC 180. Individual Studies
Research project in psychology.
Prerequisite: 12 units of psychology and instructor and department chair consent.
Repeatable for credit
Credit / No Credit
1-4 units

PSYC 184. Directed Reading
Directed reading on a specific psychological topic.
Prerequisite: 12 units of psychology and instructor and department chair consent.
Repeatable for credit
Credit / No Credit
1-4 units

PSYC 186. Psychology Field Work
Supervised field work in a selected area of psychology. Course is repeatable for 4 unit maximum.
Prerequisite: Instructor and department chair consent.
Repeatable for credit
Credit / No Credit
1-4 units

PSYC 190. Current Issues Capstone
Integrative survey of current viewpoints and issues in psychology, how they developed and likely future directions of psychology.
Prerequisite: PSYC 100W and senior standing.
Pre/Corequisite: PSYC 120 or PSYC 018.
Normal Grade Rules
3 units

PSYC 191. The Psychology of Prejudice
Provides an examination of psychological theory and research related to prejudice and discrimination from the perspectives of both the holders and targets of prejudice. Includes individual and small group exercises to provide experiential learning.
Prerequisite: Completion of Core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

PSYC 193. Behavioral Science in Practice
See ANTH 193.
Normal Grade Rules
3 units

PSYC 195. Honors Seminar in Psychology
Intensive examination of background and current status of student-selected problems. Course is repeatable once for credit.
Prerequisite: At least 18 units of PSYC or STAT with a GPA of at least 3.5, PSYC 120, and senior standing.
Notes: Enrollment limited to qualified students.
Repeatable for credit
Normal Grade Rules
3 units

PSYC 199. Senior Honors Thesis
Supervised thesis open only to exceptional senior psychology majors.
Prerequisite: Senior or graduate standing and instructor consent.
Mandatory CR/NC/RP
3 units

GRADUATE

PSYC 200. Seminar in Personality Theory
A survey of contemporary approaches to personality study.
Prerequisite: PSYC 139 (or equivalent) plus a total of nine semester semester hours of upper division psychology courses.
Normal Grade Rules
3 units

PSYC 203A. Clinical Assessment I
An in-depth introduction to objective, projective and behavioral assessment techniques used in the clinical evaluation of the behavior and functioning of adults, children and families.
Prerequisite: PSYC 117 (or equivalent).
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 204. Advanced Child Psychology
An intensive examination of significant developments in child psychology with emphasis on current theories.
Prerequisite: PSYC 102 (or equivalent).
Normal Grade Rules
3 units

PSYC 208. Family Assessment and Intervention
An interdisciplinary exploration of how therapists can analyze and change interpersonal dynamics in couples and families.
Normal Grade Rules
3 units

PSYC 209. Psychology of Contemporary Families
An overview of current family issues faced by psychotherapists in clinical settings. Emphasis will be placed on identification and conceptualization of these issues from a psychological perspective, stressing integration of issues into clinical practice. MS Clinical program priority.
Prerequisite: PSYC 208.
Normal Grade Rules
3 units

PSYC 210. Advanced Psychopathology
Advanced course to provide knowledge and experience in the classification and treatment of disorders of childhood, adolescence and adulthood as they are identified in schools, family interactions and workplace settings. Critical review of research related to the evaluation of treatment strategies.
Prerequisite: PSYC 110.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 211. Child Psychopathology
An overview on the nature, assessment and treatment of Child Psychopathology. Emphasis will be placed on understanding DSM-IV diagnoses from a developmental prospective. Objective methods of assessment and empirically supported treatments will be covered.
Normal Grade Rules
3 units

PSYC 212. Life Span Development
Psychological, biological and social development throughout the life cycle. Interdisciplinary lecture course includes infancy, childhood, adolescence, young adulthood, middle age and old age. Topics include theories, research, influences, changes, problems and patterns of human development.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 219. HCI for Cyber Security
See ISE 219.
Normal Grade Rules
3 units
PSYC 220. Seminar in Experimental Psychology
Applications of experimental method to current problems in psychology. Individual design and experimental work required.
Prerequisite: PSYC 120A.
Normal Grade Rules
3 units

PSYC 222. Gender and Ethnic Issues in Counseling and Therapy
Theoretical and practical understanding of gender and ethnic issues in clinical practice, including issues arising from differing socialization, psychological structures, values and cultural assumptions that may affect therapeutic intervention within individuals, couples and families.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 223A. Clinical Psychology Theory I
Application of clinical theory to the treatment of behavioral problems of individuals and families.
Prerequisite: PSYC 203A, PSYC 210, PSYC 258 and PSYC 265 (or equivalents).
Corequisite: PSYC 224A.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 223B. Clinical Psychology Theory I
Application of clinical theory to the treatment of behavioral problems of individuals and families.
Prerequisite: PSYC 223A.
Corequisite: PSYC 224B.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 224A. Clinical Psychology Practicum I
Supervised experience in the treatment of behavioral and emotional problems of individuals and families.
Prerequisite: Same as PSYC 223A.
Corequisite: PSYC 223A.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 224B. Clinical Psychology Practicum II
Advanced supervision in the treatment of behavioral and emotional problems of individuals and families.
Prerequisite: Same as PSYC 224A.
Corequisite: PSYC 223B.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 225. Advanced Group Dynamics
Advanced study of the dynamics of small group interaction. Limited supervised training in group facilitation techniques.
Prerequisite: PSYC 125 (or equivalent).
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 226. Addictions and Treatment
Advanced course in assessment, diagnosis, and treatment, and prevention of substance abuse and dependence and co-occurring disorders in multiple settings. Critical review of research related to the evaluation of treatment strategies are provided from recovery models, family, and individual perspectives.
Prerequisite: PSYC 203A & graduate standing in MS psychology program
Normal Grade Rules
3 units

PSYC 228. Professional Ethics for Psychologists
Consideration of ethical and legal issues related to the professional application of psychology. Designed particularly for students involved in field work.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 230. Seminar in Physiological Psychology
An advanced consideration of the neurophysiological correlates of behavior.
Prerequisite: PSYC 129 (or equivalent).
Normal Grade Rules
3 units

PSYC 232. Clinical Psychopharmacology
Prepares counseling professionals to understand aspects of drug use, mechanisms of change and clinical outcomes.
Prerequisite: PSYC 126 or equivalent.
Normal Grade Rules
3 units

PSYC 235. Seminar in Cognitive Psychology
Theories and current research in cognitive psychology with emphasis on components of cognitive processing from pattern recognition to problem solving. Substantial emphasis on cognitive development and mechanisms of cognitive change.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

PSYC 240. Research Design and Applied Psychometrics
Advanced introduction to issues in psychological research (experimental, quasi-experimental and survey research), measurement and test construction (item analysis, test reliability and validity and development of norms).
Prerequisite: PSYC 117, STAT 115 or instructor consent.
Normal Grade Rules
3 units

PSYC 243. Field Work in Psychology
Supervised field work experience in outside agency settings. Open through consultation only to students in MS programs.
Repeatable for credit
Credit / No Credit
1-6 units

PSYC 249. Field Work in Industrial/Organizational Psychology
Supervised experience applying psychological and organizational theory and practice in business, industrial and other organizational settings.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-6 units

PSYC 254. Social Psychology Seminar
Theoretical and practical approaches to the understanding of human behavior within a social context.
Prerequisite: PSYC 154 (or equivalent).
Normal Grade Rules
3 units

PSYC 255. Seminar in Learning
Current problems in learning with primary emphasis on learning theory.
Prerequisite: PSYC 155 (or equivalent).
Normal Grade Rules
3 units

PSYC 256. Seminar in Perception
Selected issues in visual sensation and perception. Topics include the perception of color, form, depth and motion. Emphasis on the relationship of perception to sensory physiology.
Prerequisite: PSYC 158 (or equivalent).
Normal Grade Rules
3 units

PSYC 258. Methods of Psychotherapy
Survey of the theoretical background and practical application of various approaches to psychotherapy.
Prerequisite: PSYC 139.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 260. Crisis and Trauma Counseling
Advanced course on trauma including strategies for assessing, managing, short and long term treatment for acute and chronic stress reactions. Empirically supported risk and protective factors, and evidence-based treatments are covered. Resilience, personal, multidisciplinary, and community perspectives are emphasized.
Prerequisite: PSYC 203A and Graduate Standing in MS Psychology program
Normal Grade Rules
3 units
PSYC 270. Seminar in Industrial and Organizational Psychology
Psychological theory, research and practice in organizations. Topics emphasized include motivation, job satisfaction, communication, leadership, group processes, decision-making, conflict, cooperation, power and organization development and change.
Prerequisite: Instructor consent.
Notes: MS I/O program priority.
Normal Grade Rules
3 units

PSYC 271. Seminar in Personnel Psychology
In-depth introduction to relevant methodology, research, applications and issues. Topics include legal issues in personnel, test validation, selection, job analysis, performance appraisal and training and development.
Prerequisite: Instructor consent.
Notes: MS I/O program priority.
Normal Grade Rules
3 units

PSYC 272. Training and Development in Organizations
Course will address 'classic', current, and future issues in training and development. Topics covered include theories of learning, needs assessment, training methodology, program evaluation, management development, and trends that may influence future training and development programs.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

PSYC 273. Seminar in Human Factors
Data and theory of sensory and cognitive psychology and their application to the design of systems used by humans.
Prerequisite: PSYC 135 and PSYC 158 (or equivalent).
Normal Grade Rules
3 units

PSYC 276. Groups at Work
Group process and performance, types of work groups and tasks, group development (norms, roles and strategies), group leadership approaches and skills, decision-making, team building, high performing and self-managing teams.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

PSYC 280. General Seminar
Current psychological literature in selected fields and the development of a specific topic by the student.
Prerequisite: Undergraduate major in psychology (or equivalent).
Normal Grade Rules
3 units

PSYC 290R. Thesis/Project Supervision
Continued work on thesis or project unless concurrently enrolled in another SJSU course.
Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class.
Mandatory CR/NC/RP
1 unit

PSYC 291. Method and Design for Applied Research
Development and management of applied research programs based on contributions of psychological research and methodology. Critiquing existing and proposed research. Reporting and communicating research results.
Prerequisite: PSYC 18 or PSYC 120A; STAT 95 and STAT 115.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 293. Organizational Development
Theory and practice of organization development, including systems thinking, action research, organization assessment and diagnosis; survey development and feedback; individual, group, inter-group and organization-wide interventions; consultant roles; and ethics of practice in organizations.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

PSYC 295. Substance Abuse, Human Sexuality, and Life-Span Issues for Therapists
An examination of current issues in marriage and family therapy related to substance use, sexual issues, and development across the lifespan. Course will cover theories and contemporary issues in these areas with an emphasis on application in treatment.
Normal Grade Rules
3 units

PSYC 298. Special Problems
Advanced work in areas not covered in any regular course offering. Course is repeatable for a maximum of four units.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-6 units

PSYC 299. Master's Thesis or Project
Five units required for the M.A.; six units for the M.S.
Prerequisite: Admission to candidacy for the MA or MS degree and thesis chair permission.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

STATISTICS

LOWER DIVISION
STAT 095. Elementary Statistics
Hypothesis testing and predictive techniques to facilitate decision-making; organization and classification of data, descriptive and inferential statistics, central tendency, variability, probability and sampling distributions, graphic representation, correlation and regression, chi-square, t-tests, and analysis of variance. Computer use in analysis and interpretation.
Prerequisite: Satisfaction of ELM requirement and two years of high school algebra.
Notes: Intended for Psychology majors and minors as well as for programs in Behavioral Science, Child Development, Education, Health Science, Nursing, Nutritional Science, Social Science, and Social Work.
Normal Grade Rules
CE: B4
3 units

UPPER DIVISION
STAT 115. Intermediate Statistics
Statistical analysis at the intermediate level; chi-square, analysis of variance, correlation and regression, and topics in experimental design; use of microcomputers for statistical calculations.
Prerequisite: STAT 95 (or equivalent).
Notes: Intended for majors in education, nursing, personnel administration, psychology, social service and sociology, and psychology minors.
Normal Grade Rules
3 units

STAT 125. Analysis of Variance
Applications to a variety of experimental designs. Use in hypothesis testing and estimation of magnitude of effects; use of microcomputers for statistical calculations.
Prerequisite: STAT 115.
Normal Grade Rules
3 units

GRADUATE
STAT 235. Multivariate Analysis
Multivariate techniques for analyzing social science data with emphasis on multiple regression, multivariate analysis of variance, factor analysis, discriminant analysis and canonical correlation.
Prerequisite: STAT 115 or instructor consent.
Normal Grade Rules
3 units
STAT 245. Advanced Statistics
Advanced problems in statistical analysis. Advanced consideration of hypothesis testing, estimation and analysis of variance.
Prerequisite: STAT 115 or instructor consent.
Normal Grade Rules
3 units
School of Information Courses

LIBRARY AND INFORMATION SCIENCE

LOWER DIVISION

LIBR 020. Introduction to Computing for Personal Information Management
Introduction to computing for personal information access, use and management including basic computer operations, access to geographically distributed information on the global Internet, electronic communication, word processing and document design, data modeling with spreadsheets, database design and maintenance for information storage and retrieval and information presentation.
Normal Grade Rules
3 units

LIBR 210. Reference and Information Services
Process-oriented examination of how information professionals answer reference questions. Stresses interpersonal skills required for effective question negotiation and sources with which questions are answered.
Prerequisite: LIBR 202.
Normal Grade Rules
3 units

LIBR 211. Transfer Course One
Prerequisite: Transfer content for MLIS students who transfer graduate credits. Needs graduate advisor and/or academic advisor approval.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

LIBR 212. Transfer Course Two
Prerequisite: Transfer Content for MLIS Students who transfer graduate credits. Needs graduate advisor and/or academic advisor approval.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

LIBR 213. Transfer Course Three
Prerequisite: Transfer content for MLIS students who transfer graduate credits.
Needs graduate advisor and/or academic advisor approval.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

GRADUATE

LIBR 200. Information Communities
Examines information users and the social, cultural, economic, technological, and political forces that shape their information access and use.
Prerequisite: Demonstrated computer literacy.
Normal Grade Rules
3 units

LIBR 202. Information Retrieval System Design
The systems and knowledge structures that information professionals create and use to connect users with information.
Prerequisite: Demonstrated computer literacy.
Normal Grade Rules
3 units

LIBR 203. Online Learning: Tools and Strategies
This course introduces students to new and emerging technologies used in today’s online learning environment. It covers learning management tools, various social networking platforms, web conferencing, as well as strategies and skills needed for success in online learning.
Credit / No Credit
1 unit

LIBR 204. Information Professions
Examines the organizations and environments in which information professionals work.
Prerequisite: Demonstrated computer literacy.
Normal Grade Rules
3 units

LIBR 210. Reference and Information Services
Process-oriented examination of how information professionals answer reference questions. Stresses interpersonal skills required for effective question negotiation and sources with which questions are answered.
Prerequisite: LIBR 202.
Normal Grade Rules
3 units

LIBR 211. Transfer Course One
Prerequisite: Transfer content for MLIS students who transfer graduate credits. Needs graduate advisor and/or academic advisor approval.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

LIBR 212. Transfer Course Two
Prerequisite: Transfer Content for MLIS Students who transfer graduate credits. Needs graduate advisor and/or academic advisor approval.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

LIBR 213. Transfer Course Three
Prerequisite: Transfer content for MLIS students who transfer graduate credits.
Needs graduate advisor and/or academic advisor approval.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

LIBR 220. Resources and Information Services in Professions and Disciplines
Examination of the nature of resources for, and services to, professions and disciplines. Possible disciplines for study may be law, business and economics, life and/or physical sciences, medical sciences, engineering and computer science, maps, and visual and performing arts. Course is repeatable in the same semester for a maximum of nine units when content changes.
Repeatable for credit
Normal Grade Rules
1-3 units

LIBR 221. Government Information Sources
Study in government publications and databases, their bibliographic organization, use in all types of libraries and information centers, methods of acquiring information from federal, state and local sources; problems of depository and non-depository collections.
Prerequisite: LIBR 210.
Repeatable for credit
Normal Grade Rules
3 units

LIBR 288. Advanced Information Resources and Services
In-depth survey of information needs, uses, and sources across different user groups; current methods of providing reference services and instruction in different information seeking contexts; and techniques for evaluating reference sources and services.
Prerequisite: LIBR 202 and LIBR 210.
Normal Grade Rules
3 units

LIBR 229. Practicum/Seminar in Information Services
Opportunity to work in a setting delivering information services. Discussion of encountered problems, current trends and contemporary approaches to information service delivery.
Prerequisite: LIBR 244 or instructor consent.
Credit / No Credit
3 units

LIBR 230. Issues in Academic Libraries
Investigate current issues that impact the functioning of the academic library. Topics include issues related to social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the academic library sector.
Prerequisite: LIBR 200, LIBR 202 and LIBR 204.
Normal Grade Rules
3 units

LIBR 231. Issues in Special Libraries and Information Centers
This course will investigate current issues that impact the functioning of special libraries/information centers. Topics covered will include issues related to social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special library/information center sector.
Prerequisite: LIBR 200, LIBR 202, LIBR 204.
Normal Grade Rules
3 units

LIBR 232. Issues in Public Libraries
This course will investigate current issues that impact the functioning of the public library. Topics covered will include issues related to social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the public library sector.
Prerequisite: LIBR 200, LIBR 202, LIBR 204.
Normal Grade Rules
3 units

LIBR 233. School Library Media Centers
The role of the school library media teacher and the school library media program in the educational community. Emphasis on creation of effective learning environments, involvement in the curriculum and teaching process as well as philosophies of service and management.
Prerequisites: LIBR 204 and LIBR 250.
Normal Grade Rules
3 units

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Prerequisite(s)</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>LIBR 234</td>
<td>Intellectual Freedom Seminar</td>
<td>Focuses on current intellectual freedom issues and the centrality of intellectual freedom to librarianship.</td>
<td>LIBR 200, LIBR 204</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 237</td>
<td>School Library Media Materials</td>
<td>Survey of materials in a variety of formats that meet the needs of K-12 students. Materials will be examined that support state and national curriculum standards as well as material that support independent reading and learning. Course can be repeated one time.</td>
<td>Prerequisites: LIBR 200, LIBR 202, Libr 203, Libr 204. Repeatable for credit.</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 240</td>
<td>Information Technology Tools and Applications</td>
<td>Focuses on building practical skills in a variety of networked computer applications. Topics will vary, but will typically include web coding languages and designing web sites.</td>
<td>Prerequisite: LIBR 202. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 241</td>
<td>Automated Library Systems</td>
<td>Review of major systems for library automation. Problems associated with the planning, implementation and use of the systems, negotiation of systems acquisition and trends in the field.</td>
<td>Prerequisite: LIBR 200, LIBR 202 and LIBR 204. Not available to Open University Students. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 242</td>
<td>Database Management</td>
<td>Design and implementation of fully interactive database-driven Web-applications. Includes ODBC and SQL compliant database systems such as Oracle.</td>
<td>Prerequisite: LIBR 200, LIBR 202 and LIBR 204. Not available to Open University Students. Repeatable for credit. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 243</td>
<td>Systems Analysis</td>
<td>Study of systems as applied to libraries and information centers. Application of methods for studying the means by which libraries deliver information services to users.</td>
<td>Prerequisite: LIBR 200, LIBR 202 and LIBR 204. Not available to Open University Students. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 244</td>
<td>Online Searching</td>
<td>Techniques of searching and managing online search services. Includes searching strategies, evaluation of database structures, implementation and management of search services and online experience.</td>
<td>Prerequisite: LIBR 202. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 245</td>
<td>Advanced Online Searching</td>
<td>Emphasis is on on-line techniques for developing current awareness services.</td>
<td>Prerequisite: LIBR 244. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 246</td>
<td>Information Technology Tools and Applications - Advanced</td>
<td>Designing advanced Web applications using technology such as dynamic HTML and XML and Web programming languages such as XSLT, JavaScript, JSP, Perl, PHP, MYSQL, and ASP. May be repeated for up to 12 units when content changes.</td>
<td>Prerequisite: LIBR 202. Repeatable for credit. Normal Grade Rules 1-3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 247</td>
<td>Vocabulary Design</td>
<td>Survey of principles and practices used to index information-bearing objects such as documents or images. Includes term assignment, review of existing vocabularies, thesaurus design, metadata structures and automatic and natural language processes.</td>
<td>Prerequisite: LIBR 202. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 248</td>
<td>Beginning Cataloging and Classification</td>
<td>Theory and practice of bibliographic control including the study of representative cataloging using AACR2, machine-based representation using MARC formats and other standards, subject analysis and classification using LCSH. Dewey, and LCC with application to books, non-book materials and serials.</td>
<td>Prerequisite: LIBR 202. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 249</td>
<td>Advanced Cataloging and Classification</td>
<td>Application of cataloging and organization of information principles to multi- and hyper-media resources. Complex serial publications, evolving standards for representation of non-traditional networked information, and cataloging policy development. Specific focus of the course may vary each time taught.</td>
<td>Prerequisite: LIBR 202, LIBR 248. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 250</td>
<td>Design and Implementation of Instructional Strategies for Information Professionals</td>
<td>Examination of concepts of instruction in the use of information technologies, information services and sources. Emphasis on integration of learning theory and instructional design. Emphasis on application of theory through development of instruction and instructional resources in various media for use in a broad array of institutional environments.</td>
<td>Prerequisite: LIBR 200. Not available to Open University Students. Repeatable for credit. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 251</td>
<td>Web Usability</td>
<td>Surveys the theory and practice of designing user-centered interfaces in information systems and services. Includes theories of user information seeking, cognition, human-computer interaction, the design process, and application in information systems and the Internet. Emphasis on the design and evaluation of interface.</td>
<td>Prerequisite: LIBR 202. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 252A</td>
<td>Information Processing and Management I</td>
<td>An introduction to programming in the Java programming language. Emphasis on techniques necessary for manipulating character strings, sorting and searching algorithms frequently used for information storage and retrieval problems, and fundamental concepts of modern software engineering.</td>
<td>Prerequisite: Computer Literacy. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 252B</td>
<td>Information Processing and Management II</td>
<td>Introduction to Object-Oriented Programming (OOP) and Object-Oriented Database Design (OODB) in the Java programming language. Emphasis is on how to apply these concepts and techniques to problem solving in the field of information storage and retrieval.</td>
<td>Prerequisite: LIBR 252A or instructor consent. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
<tr>
<td>LIBR 253</td>
<td>Natural Language Processing and Automatic Indexing/Abstracting</td>
<td>Introduction to natural language processing and automatic indexing/abstracting with emphasis on text processing. Topics include: semantic dictionary, lexical analysis, word frequency analysis and automatic selection of indexing tokens, term weighting, the vector space model and document representation.</td>
<td>Prerequisite: LIBR 252B or instructor consent. Normal Grade Rules 3 units</td>
<td>3</td>
</tr>
</tbody>
</table>
LIBR 254. Information Literacy and Learning
Provides theory and practice for teaching information literacy in an LIS setting. The course emphasizes learning theory as well as the practical aspects of teaching. Students learn methods and tools for teaching in both synchronous and asynchronous settings.
Prerequisite: LIBR 200
Normal Grade Rules
3 units

LIBR 256. Archives and Manuscripts
An introduction to the theory and practice of managing archival documents, such as personal papers, institutional records, photographs, electronic records and other unpublished material. Topics covered include manuscript and records acquisition and appraisal, arrangement and description, conservation and preservation, reference and access.
Prerequisite: LIBR 200, LIBR 202, LIBR 204.
Normal Grade Rules
3 units

LIBR 257. Records Management
An introduction to the theories, methodologies and technologies used in managing institutional information and records. Topics include the history of records management, the records’ life cycle, record inventory and analysis, classification and filing, retention scheduling and equipment.
Prerequisite: LIBR 200, LIBR 202, LIBR 204.
Normal Grade Rules
3 units

LIBR 259. Preservation Management
An introduction to the philosophies and techniques used to preserve manuscript, printed and digital materials. Examination of the evolution of preservation practice, with emphasis on emerging theories, models and technologies in digital preservation.
Prerequisite: LIBR 200, LIBR 202, LIBR 204.
Normal Grade Rules
3 units

LIBR 260. Resources for Children, Ages 0-6
Survey of children’s materials for infants to age six, with emphasis on books for beginning readers, integration of this material into library and school programs, planning and implementation of public relations. Repeatable for credit when content changes.
Repeatable for credit
Normal Grade Rules
3 units

LIBR 260A. Programming and Services for Children Ages 0-8
This course examines the importance of programming for children, including parent education programs, story hours, outreach techniques, services with schools, summer reading programs, and program series such as weekly or monthly programs on manga, knitting, book discussions, or homework help.
Prerequisite: LIBR 200
Normal Grade Rules
3 units

LIBR 261. Resources for Children, Ages 6-12
A survey of the books and media available for children 6-12, and of the evaluation, selection, and use of these materials in the contexts of collection development, children’s reading interests, informational needs, school curricula, and multicultural library service. Repeatable for credit when content changes.
Repeatable for credit
Normal Grade Rules
3 units

LIBR 261A. Programming and Services for Young Adults Ages 9-18
Administration and delivery of professional library and information services with multi-cultural young adult populations: features critical youth studies cultural/historical research, resources, policy, threats, tools, methods, service philosophies and management skills necessary for a comprehensive profile of YA library services.
Prerequisite: LIBR 200
Normal Grade Rules
3 units

LIBR 262. Resources for Young Adults
Materials for adolescents and pre-adolescents and methods for incorporating these materials into library planning. Collection development, needs assessment and programming will be featured. Information services for young adults in a variety of settings will also be addressed. Repeatable for credit when content changes.
Repeatable for credit
Normal Grade Rules
3 units

LIBR 262A. Materials for Children Ages 0-4
Survey of children’s materials, including “toy” books, picture books, and various media and technology appropriate for this age group, and how they can meet developmental needs. Collection development tools and techniques for these materials will also be included.
Prerequisite: LIBR 200
Normal Grade Rules
3 units
LIBR 268. History of Youth Literature
The history of literature for children and teens from its earliest examples to today's current trends, including how childhood has changed over the years, the influence of culture on those changes, and on the materials created for children and teens.
Prerequisite: LIBR 200
Normal Grade Rules
3 units

LIBR 269. Reading and Development
This course will focus on the developmental needs and tasks of children and teens, and how library materials can help meet those needs. A variety of developmental theorists and the value of literature as bibliotherapy will also be examined.
Normal Grade Rules
3 units

LIBR 270. Intellectual Freedom and Youth
This course will focus on intellectual freedom issues with youth, the value of youth literature to enhance individuals' lives, the ethics of intellectual freedom, the psychology of censorship and how to combat it, and how to defend materials for youth.
Normal Grade Rules
3 units

LIBR 271A. Genres and Topics in Youth Literature
Various topics and genres in literature for children or teens will be examined in depth, such as graphic novels, poetry, fantasy, science fiction, publishing and writing trends, reading motivation techniques, literature in the classroom, and the art of picture books. Repeatable for up to 9 units.
Prerequisite: LIBR 200
Repeatable for credit
Normal Grade Rules
3 units

LIBR 272. Authors and Illustrators in Youth Literature
This course will look at selected authors and/or illustrators of youth literature, examining their work, their lives, their motivations, their criticism, and the usefulness of their work.
Repeatable for credit
Normal Grade Rules
3 units

LIBR 275. Library Services for Racially and Ethnically Diverse Communities
This course focuses on developing skills for planning, implementing and evaluating programs for addressing the information needs of racially, ethnically and linguistically diverse communities. Reviews the major national, state and local studies.
Prerequisites: LIBR 200 and LIBR 204. Not available to Open University Students.
Normal Grade Rules
3 units

LIBR 280. History of Books and Libraries
This class traces the development of the book through its many stages and explores how the creation, use, and storage of information are affected by social and technological change. The development of libraries and librarianship and how they have accommodated themselves to the changing form of the book will also be considered.
Prerequisite: LIBR 200
Normal Grade Rules
3 units

LIBR 281. Seminar in Contemporary Issues
Investigation of major contemporary issues within the information profession. Topics range from censorship to the need for a national information policy and change each time the course is offered. A maximum of nine units may be repeated in the same semester when content changes.
Prerequisite: LIBR 200, LIBR 202, LIBR 204.
Repeatable for credit
Normal Grade Rules
1-3 units

LIBR 282. Seminar in Library Management
Application of management theory to specific problems. Readings and discussions of the development of effective strategies for planning and implementing organizational change. Content changes each time offered. A maximum of nine units may be repeated in the same semester when content changes.
Prerequisite: LIBR 200 and LIBR 204.
Not available to Open University Students.
Repeatable for credit
Normal Grade Rules
1-3 units

LIBR 283. Marketing of Information Products and Services
Applications of marketing concepts to library and information services. Market analysis, use surveys, market targeting and introduction of services.
Prerequisites: LIBR 200 and LIBR 204.
Not available to Open University Students.
Normal Grade Rules
3 units

LIBR 284. Seminar in Archives and Records Management
In-depth study of current issues and practices in archives and records management. The course addresses new areas of research and application such as oral history, sound and visual archives, digitization, archival automation, archival security, genealogy, and more. Course is repeatable for credit for up to 12 units.
Prerequisite: Libr 200, Libr 202, Libr 204.
Repeatable for credit
Normal Grade Rules
1-3 units

LIBR 285. Research Methods in Library and Information Science
Selection, formulation and development of problems in library and information science research. Evaluation of published research and in the field.
Prerequisites: LIBR 200, LIBR 202, LIBR 204.
Repeatable for credit
Normal Grade Rules
1-4 units

LIBR 286. Interpersonal Communication Skills for Librarians
The principles and practice of interpersonal communication, small group and peer relationships.
Prerequisites: LIBR 200 and LIBR 204.
Not available to Open University Students.
Repeatable for credit
Normal Grade Rules
1-3 units

LIBR 287. Seminar in Information Science
Current issues and problems in information retrieval as related to concepts and theories of information science. A maximum of nine units may be repeated with different content.
Prerequisite: LIBR 200.
Not available to Open University Students.
Repeatable for credit
Normal Grade Rules
1-3 units

LIBR 289. Advanced Topics in Library and Information Science
Advanced independent examination of selected issues and problems in library and information science with a focus on the integration of theory and practice. Issues and problems addressed will vary each semester.
Mandatory CR/NC/RP
3 units

LIBR 292. Professional Experience: Projects
Gives students the opportunity to complete a professional project related to the theory and method of Library & Information Science in an information organization or institution, and to gain practical experience in one or more areas of LIS.
Prerequisites: LIBR 200, 202, 204, plus six advanced courses.
Credit / No Credit
3 units

LIBR 293. Introduction to Data Networking
An introduction to computer networking in both Lan and Wan environments with an emphasis on hands-on projects.
Prerequisite: LIBR 200, LIBR 202, LIBR 204.
LIBR 240 desirable.
Repeatable for credit
Normal Grade Rules
3 units
LIBR 294. Professional Experiences: Internships
Supervised professional experience in an approved public, academic, or special library or other information-based organization.
Prerequisite: LIBR 200, LIBR 202, LIBR 204, and three advanced courses.
Repeatable for credit
Credit / No Credit
2-4 units

LIBR 295. School Library Field Work
A supervised professional experience of school librarianship at the levels of both elementary and secondary (middle or high) schools. Emphasis is on observation and guided practice with a credentialed school librarian (library media teacher).
Prerequisite: LIBR 200, LIBR 202, LIBR 204.
Credit / No Credit
3 units

LIBR 297. Practicum in Instruction for Information Literacy
Experience with instruction in the computer, network and media aspects of information literacy. Course may be repeated in different semester.
Repeatable for credit
Credit / No Credit
3 units

LIBR 298. Special Studies
Advanced individual research and projects related to libraries and information systems. Available only to those students who have completed the major portion of the degree coursework. May be repeated for a maximum of six units of credit.
Prerequisite: LIBR 200, LIBR 202, LIBR 204, instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

LIBR 299. Thesis
Approved thesis proposal and consent of a faculty advisor required. May be repeated for a maximum of six units of credit.
Prerequisite: LIBR 200, LIBR 202, LIBR 204, LIBR 285.
Repeatable for credit
Mandatory CR/NC/RP
3 units
Science Education Program
Courses

SCIENCE

LOWER DIVISION

SCI 001. Academic Excellence Workshop
Co-requirement: Selection of college science courses and sections.
Corequisite: Enrollment in relevant section accompanying workshop. No graduation credit.
Misc/Lab: Activity 4 hours. Repeatable for credit Credit / No Credit 1-2 units

SCI 002. Success in Science
Emphasis on development of study skills, time management, and personal growth needed to transition from high school to university. Orientation to SJSU's policies and procedures; and degree and career options in science. Guest lecturers, peer advisors, and community building.
Note: All courses with a 'Q' suffix are designated as First Year Experience courses.
Misc/Lab: Lecture 2 hours/activity 2 hours. GE: E Normal Grade Rules Credit 3 units

SCI 003. Workshop Facilitator Training
Practical collaborative education theory and techniques for academic excellence workshop facilitators.
Prerequisite: Current appointment as AEW Facilitator.
Note: No graduation credit. Repeatable for credit Credit 1 unit

SCI 090. Success as Transfer Students
Emphasis on development of study skills, time management, and personal growth needed to transition from community college to university. Orientation to SJSU's policies and procedures; and degree and career options. Guest lecturers, peer advisors, and community building.
Misc/Lab: Lecture 1 hour/activity 2 hours/recitation 1 hour. Normal Grade Rules 2-3 units

UPPER DIVISION

SCI 104. Physical Science Teacher Enhancement
A thematic approach to the study of relevant topics and concepts in physical science. Development of inquiry-based, hands-on classroom activities in physical science.
Prerequisite: Teacher credential and/or instructor consent. Repeatable for credit Credit / No Credit 1-3 units

SCI 105. Integrated Science Teacher Enhancement
A thematic approach to the study of relevant topics and concepts in integrated science. Development of inquiry-based, hands-on classroom activities in integrated science.
Prerequisite: Teacher credential and/or instructor consent. Repeatable for credit Credit / No Credit 1-3 units

SCI 109. Climate Solutions Initiative
See UNVS 109.
Normal Grade Rules GE: R+V 6 units

SCI 110. Global Themes of Science
The themes of energy, evolution, and systems & interactions will be used to examine conceptual connections between biological, earth and physical sciences. Emphasis will be given to strategies best suited to teach these unifying global themes of science.
Prerequisite: BIOL 21, CHEM 35, and GEOL 103.
Normal Grade Rules 3 units

SCI 111. Explore Beyond Your Baccalaureate Degree
This course introduces students to education beyond the baccalaureate degree. Specifically, this course facilitates an exploration of graduate professional school focusing on the following: types of degrees, admissions requirements and application processes, necessary exams, degree descriptions and exit requirements.
Prerequisites: SCI 002, SCI 090T or instructor consent. Credit / No Credit 1 unit

SCI 157. Community Action/Community Service
See COMM 157.
Repeatable for credit Normal Grade Rules GE: S 3 units

SCI 157SL. Community Action/Community Service
See COMM 157SL.
Normal Grade Rules GE: S 3 units

SCI 180. Individual Studies
Work, under guidance, in special fields.
Prerequisite: Instructor consent. Repeatable for credit Credit / No Credit 1-4 units

SCI 184. Directed Reading
Assigned readings of selected books, journals and special papers chosen to fill gaps in training or to introduce new fields. Evaluation through weekly reports and conferences.
Prerequisite: Instructor consent. Repeatable for credit Credit / No Credit 1-4 units

SCI 189. Multimedia Production Seminar
See TECH 189.
Normal Grade Rules 3 units

SCI 199. Senior Project Seminar
Capstone seminar dealing with investigation and analysis applied to the senior project and other data sets from topical issues in science.
Prerequisite: BIOL 155 and BIOL 100W, advanced standing in the BA Biological/Physical Science teaching major.
Corequisite: SCI 180.
Notes: Offered only occasionally. Repeatable for credit Normal Grade Rules 1 unit

GRADUATE

SCI 201. Nature of Science
Individualized studies for all science candidates to improve their scholarship ability in selected science areas. Standards and practices in the synthesis, analysis and research of scientific topics at master's level.
Misc/Lab: Lecture/seminar 3 hours.
Normal Grade Rules 3 units

SCI 205. Methods of Research
Introduction to techniques and procedures of scientific research. Each student required to prepare and defend a working outline of a master's thesis or project in his or her area of concentration.
Misc/Lab: Lecture/seminar 3 hours.
Notes: Introductory course in statistics or equivalent recommended. Normal Grade Rules 3 units
SCI 208. Science, Technology and Society
A study of scientific enterprise and its interactions with technology and with the political, economic, educational, religious, philosophical and social aspects of society.
Misc/Lab: Lecture/sem 3 hours.
Normal Grade Rules
3 units

SCI 210. Integrative Science in the Outdoor Classroom
Inquiry-based instructional methods and practices for teaching integrative science beyond the traditional classroom.
Repeatable for credit
Normal Grade Rules
3 units

SCI 220. Theories and Practices in Science Education
Analysis of current trends in science curriculum and instruction. Orientation for the philosophy and scope of the program. Emphasis on development of a theory of instruction and curriculum in science with implications for practice.
Misc/Lab: Lecture/sem 3 hours.
Notes: Teaching experience preferred. Must be taken during first year in program.
Normal Grade Rules
3 units

SCI 255. Advanced Natural Science
Selected topics in natural science or science education.
Repeatable for credit
Normal Grade Rules
1-3 units

SCI 283T. Individual Studies in Biotechnology
Supervised, advanced work in specialized fields relevant to biotechnology.
Prerequisite: Admission to the Master of Biotechnology program; instructor consent and Program Director.
Repeatable for credit
Normal Grade Rules
1-4 units

SCI 283T. Topics in Biotech Regulatory Affairs
Introduction to laws regulating the pharmaceutical, biotechnology, medical device industries. Discussions of company organization; product development and commercialization; Good Manufacturing Practice.
Prerequisite: Admission to the Master of Biotechnology program and consent of the Program director.
Repeatable for credit
Normal Grade Rules
3 units

SCI 285. Seminar
Provides a format for the presentation and discussion of original work by faculty, guest investigators and graduate students.
Normal Grade Rules
2 units

SCI 290R. University Studies - Thesis and Project Culmination
Continued Work on Thesis
Pre-Requirement: Outstanding RP grade in a preceding semester in a project or thesis class.
Mandatory CR/NC/RP
1 unit

SCI 298. Research
Project development for Plan B MA Natural Science students, to be carried out under direct supervision of a faculty member and committee. Seminar presentation required upon final completion of project.
Repeatable for credit
Credit / No Credit
1-6 units

SCI 299. Master’s Thesis
Thesis development for Plan A MA Natural Science students, to be carried out under direct supervision of a faculty member and committee. Seminar presentation required upon final completion of thesis.
Prerequisite: Admission to candidacy for the master’s degree and selection of a thesis committee.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

SCED 175. Classroom Experiences in Science Teaching
The goal of this hybrid online/faceto-face course is to provide students with the opportunity to complete their 45 hours of science teaching observation in California public schools while also reflecting on teaching and learning practices. The course will emphasize the multi-faceted aspects of the teaching profession and most importantly will provide a forum for sharing experiences with other students who are similarly placed. The course will fulfill pre-professional teaching observation experience required of most Single Subject Teacher Credential Programs.
Repeatable for credit
Normal Grade Rules
1 unit

SCED 184I. Student Teaching for Science Individualized Interns
Supervised student teaching in science class(es) in the public school where the student is employed as an Individualized Intern. Repeatable for a total of 12 units.
Prerequisite: Admission to Single Subject Credential Program; science advisor and Single Subject Coordinator consent.
Repeatable for credit
Credit / No Credit
2-4 units

SCED 184Y. Student Teaching II - Classroom Teaching
Minimum 80-120 class hours of classroom, lab or field teaching in appropriate single subject, grades K-12 and related teaching activities/seminar.
Prerequisite: SCED 173 (Science Credential Candidates must complete SCED 173 with a grade of “B” or better, “B-” not accepted) and joint approval of the Science Education Program and the Secondary Education Department.
Repeatable for credit
Credit / No Credit
4 units

SCED 174. Training to Teach
This is a service learning course in which students will investigate how people learn and how to teach as they are immersed in teaching roles in the San Jose community that involve them acting as: Instructors leading small groups in science after school activities, facilitators assisting teachers with student centered activities and tutors providing personalized assistance.
Pre-requirestes: CHEM 001A or CHEM 030A, Math 19
Normal Grade Rules
3 units

SCED 184Z. Student Teaching III - Classroom Teaching
Minimum 80-120 class hours of classroom, lab or field teaching in appropriate single subject, grades K-12 and related teaching activities/seminar.
Prerequisite: SCED 173 (Science Credential Candidates must complete SCED 173 with a grade of “B” or better, “B-” not accepted) and joint approval of the Science Education Program and the Secondary Education Department.
Notes: May be in different subject/school and will be at a different grade level.
Repeatable for credit
Credit / No Credit
4 units

SCED 204. Science in the Classroom
Teaching Integrative Science beyond the traditional classroom. Emphasis on development of a theory of instruction and curriculum in science with implications for practice.
Misc/Lab: Lecture/semin 3 hours.
Notes: Teaching experience preferred. Must be taken during first year in program.
Normal Grade Rules
3 units
GRADUATE

SCED 204. Earth Systems Science for Teachers
See GEOL 204.
  Repeatable for credit
  Normal Grade Rules
  3 units

SCED 375. Colloquium in Science Education
Resources and innovations for science curriculum development and instruction. An interface with people and facilities which can enhance Bay Area science instruction.
Corequisite: SCED 184Y or SCED 184Z.
Notes: Also open to experienced teachers.
  Credit / No Credit
  2 units
Social Work Program Courses

SOCIAL WORK

LOWER DIVISION
SCWK 030. Introduction to Social Welfare and Social Work
Social welfare institutions and the social work profession: its development, knowledge base, value system and specific areas of direct practice.
Normal Grade Rules
3 units

UPPER DIVISION
SCWK 100W. Writing Workshop
This course focuses on developing and enhancing writing and presentation skills vital to the social work profession in the following areas: research, grant writing, clinical documentation, and administration.
Prerequisites: ENGL 1B (with a grade of "C" or better); completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with "C" or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE Z
3 units
SCWK 107. Aging and Society
See GERQ 107
Normal Grade Rules
GE S
3 units
SCWK 110. Foundations of Social Work Practice
Introduction to the history, mission, values, skills and knowledge base of generalist social work practice within a transcultural perspective. Focus on social work practice with emphasis on those populations-at-risk who are disenfranchised and marginalized.
Prerequisite: Junior standing, Social Work majors only.
Normal Grade Rules
3 units
SCWK 111. Generalist Social Work Practice I
Knowledge, values and skills for generalist social work practice utilizing problem-solving methods with systems of all sizes. Focus on developing professional relationships, defining issues, communication skills, collecting data and assessing individuals from diverse backgrounds interacting with their environments.
Prerequisite: SCWK 110, SCWK 120, SCWK 130, SCWK 140.
Corequisite: SCWK 141
Normal Grade Rules
3 units
SCWK 112. Generalist Practice II
Knowledge, values and skills for generalist social work practice with emphasis on families, groups, organizations and communities. Focus on transactions to optimize social well-being and empowerment of individuals, families and communities utilizing strengths and transcultural perspectives.
Prerequisite: SCWK 111 (with a grade of "C" or better).
Corequisite: SCWK 142.
ABC/No Credit
3 units
SCWK 120. Social Welfare Institutions and Policies I
Development of social work as a profession, including mission, values, ethics. Development and changes in the philosophy, legislative base and structures for social services as these affect social and economic justice and impact health and well-being.
Prerequisite: Junior standing, Social Work majors only.
Normal Grade Rules
3 units
SCWK 121. Social Welfare Institutions and Policies II
Methodology and framework for analyzing social policy and understanding institutional discrimination, particularly related to populations-at-risk and other disenfranchised groups. Political and organizational processes to influence policy development.
Prerequisite: SCWK 120, junior standing, Social Work majors only.
Normal Grade Rules
3 units
SCWK 130. Human Behavior in the Social Environment I
Theories and knowledge of bio-psycho-social development from birth to old age. The dynamics of interacting social systems and culture on human development. Theories and research on risk and resilience. Human diversity and populations-at-risk emphasized.
Prerequisite: Junior standing, Social Work majors only.
Normal Grade Rules
3 units
SCWK 131. Human Behavior in the Social Environment II
Theories and knowledge about families, groups, organizations, and communities from a systems perspective. The impact of discrimination, economic deprivation and oppression on populations-at-risk. Emphasis on the promotion of optimal health and well-being.
Prerequisite: SCWK 130, junior standing, Social Work majors only.
Normal Grade Rules
3 units
SCWK 140. Introduction to Field Practicum
Direct involvement with community services to provide the student with exposure to clients/client systems prior to Field Practicum I. Six to eight hours weekly in community-based agencies and on-campus seminars.
Pre/Corequisite: SCWK 110 or consent of advisor. Social Work majors only.
Credit / No Credit
3 units
SCWK 141. Field Practicum I
Generalist social work practice with individuals, families and communities from a transcultural perspective in an agency under supervision. Sixteen hours per week required in placement.
Prerequisite: SCWK 110, SCWK 120, SCWK 130 and SCWK 140.
Corequisite: SCWK 111.
Credit / No Credit
2-5 units
SCWK 142. Field Practicum II
Generalist social work practice in an agency setting continued. Emphasis on individuals, small groups and communities from a transcultural perspective. Sixteen hours per week required in placement.
Prerequisite: SCWK 111, SCWK 141.
Corequisite: SCWK 112.
Credit / No Credit
2-5 units
SCWK 165. Community Field Practicum
Assignment to various community projects, programs or agencies with emphasis on children and youth to focus on group development and empowerment. Data collection, problem identification and community analysis to identify resources for problem resolution.
Prerequisite: Upper division standing.
Credit / No Credit
1-6 units
SCWK 170. Introduction to Research Methods
Scientific and analytic approaches to building knowledge for social work practice, including ethical issues in social research. Evaluation of service delivery systems using qualitative and quantitative research methodologies.
Prerequisite: Junior standing, Social Work majors only.
Pre/Corequisite: STAT 95.
Normal Grade Rules
3 units
SCWK 175. Social Work Senior Seminar
An integrative capstone seminar reviewing current trends, problems and issues confronting the profession. Developments and challenges in California and the country for BA level generalist practitioners evaluated in light of the student’s own personal and professional goals. Pre/Corequisite: SCWK 112 and SCWK 142, or taken in the semester immediately following completion of SCWK 142, and all other Social Work courses must have been completed. 
ABC/No Credit
3 units

SCWK 180. Individual Studies
Individual work on special topics by arrangement. Prerequisite: Department major. Repeatable for credit. Credit / No Credit 1-4 units

SCWK 190. Social Welfare: A World View
A basic understanding of how societies address social risks and meet human need. The values and concepts of social welfare are examined. Global perspectives of social development and social welfare systems in other countries are surveyed and compared. Prerequisite: ENGL 100W or equivalent. Normal Grade Rules 3 units

SCWK 192. Social Work with Families
Exploration of various family forms, cultural factors and dynamics influencing family interaction with agencies and community. Practice strategies include assessment, defining strengths and focusing on interventions to promote health and well-being. Prerequisite: SCWK 110, SCWK 120 or SCWK 130 (or equivalent). Normal Grade Rules 3 units

SCWK 192. Int’l Program Studies
Repeatable for credit. Mixed Grading 1-6 units

SCWK 195. Social Services for Children and Youth
Policies, programs and methods utilized in providing services to children and their families. Child and youth behavior analyzed in relation to interaction with family, peers, schools, community and other institutions. Impact of service structures on individuals from diverse backgrounds considered. Prerequisite: SCWK 110, SCWK 120 or SCWK 130 (or equivalent). Normal Grade Rules 3 units

SCWK 197. Alcoholism, Substance Abuse and the Family
An overview of alcohol and substance use and abuse. Effects on client systems, particularly families and children. Identification of symptoms and addictive behaviors, strengths and limitations of interventions, with a special focus on oppressed and marginalized populations. Prerequisite: SCWK 110, SCWK 120 or SCWK 130 (or equivalent). Normal Grade Rules 3 units

SCWK 202. Social Policy and Services: History and Values
History of social welfare and work with emphasis on diverse populations, particularly Latinos/as, African Americans and Asian Americans. Social policy and social work values in relation to practice issues and social services. Normal Grade Rules 3 units

SCWK 204. Social Policy Analysis
Frameworks for analyzing social policies using principles of social and economic justice. The role of policy in helping or deterring people in attaining well-being. Focus on diverse populations and populations-at-risk. Prerequisite: SCWK 202. Normal Grade Rules 3 units

SCWK 209. Community-Based Practice I
Introduction to community practice. Application of macro practice skills and concepts in community practice settings. Emphasis on development of client capacity, community development, and community action. Focus on communities of color, low-income, and high risk populations. Prerequisite: SCWK 110, SCWK 120 or SCWK 130. ABC/No Credit 3 units

SCWK 211. Human Behavior in the Social Environment I
Systems theory and the ecological model presented with transcultural perspectives from infancy through the end of adult life cycle. Emphasizes behavior of individuals and families, especially Latinos/as, African Americans, Asian Americans and other diverse and oppressed populations. Normal Grade Rules 3 units

SCWK 212. Human Behavior in the Social Environment II
Systems theory and the ecological model presented with transcultural perspectives. Emphasizes behavior in groups, communities and organizations with a focus on Latinos/as, African Americans, Asian Americans and other diverse and oppressed populations. Prerequisite: SCWK 211. Normal Grade Rules 3 units

SCWK 213. Transcultural Generalist Practice I
Transcultural generalist practice with client systems, particularly individuals and families, at micro, mezzo and macro levels. Assessment, planning and implementing interventions within a professional relationship, utilizing a strengths perspective, focusing on Latinos/as, African Americans and Asian Americans. Corequisite: SCWK 230. Normal Grade Rules 3 units

SCWK 214. Transcultural Generalist Practice II
Transcultural generalist practice with client systems, particularly groups, organizations and communities to enhance well-being. Approaches and skills to ameliorate conditions affecting people adversely, particularly those of diverse backgrounds and populations-at-risk. Emphasis on promoting social and economic justice. Prerequisite: SCWK 220 and SCWK 230. Normal Grade Rules 3 units

SCWK 218. Social Work with Children and Youth
Analysis of culturally relevant services to linguistic populations. Focusing on enhancing the health and well-being of diverse populations-at-risk. Emphasis on promoting social and economic justice. Prerequisite: SCWK 211. ABC/No Credit 3 units

SCWK 220. Transcultural Generalist Practice I
Transcultural generalist practice with client systems, particularly individuals and families, at micro, mezzo and macro levels. Assessment, planning and implementing interventions within a professional relationship, utilizing a strengths perspective, focusing on Latinos/as, African Americans and Asian Americans. Corequisite: SCWK 230. Normal Grade Rules 3 units

SCWK 221. Transcultural Generalist Practice II
Transcultural generalist practice with client systems, particularly groups, organizations and communities to enhance well-being. Approaches and skills to ameliorate conditions affecting people adversely, particularly those of diverse backgrounds and populations-at-risk. Emphasis on promoting social and economic justice. Prerequisite: SCWK 220 and SCWK 230. Normal Grade Rules 3 units

SCWK 222. Transcultural Advanced Generalist Practice I: Family Systems Focus
Transcultural advanced generalist practice with an emphasis on family systems, diverse cultural patterns and varying family forms. Assessment of multi-system interactions with communities and organizations, focusing on enhancing the health and well-being of marginalized populations and populations-at-risk. Prerequisite: SCWK 221. Corequisite: SCWK 232. Normal Grade Rules 3 units

SCWK 223. Transcultural Advanced Generalist Practice II: Community Systems Focus
Methods of community intervention at multiple levels focused on empowerment and developing the strengths of diverse groups, particularly Latino/a, African American, Asian American and other oppressed and marginalized populations. Includes community social work, assessment and interventions. Prerequisite: SCWK 221. Normal Grade Rules 3 units

SCWK 224. Advanced Generalist Practice With Spanish Speaking Populations
Analysis of culturally relevant services to linguistic minority Spanish-speaking population from a transcultural generalist perspective. Skills to include Spanish language interventions appropriate for cultural access, appropriate assessment, individual, family and group interventions and advocacy for client systems at all levels. Prerequisite: SCWK 221. Normal Grade Rules 3 units
SCWK 230. Social Work Practicum I
Development of transcultural practice skills with families, groups and individuals in their social contexts. Emphasis on developing professional roles and relationships, applying multi-system assessment and interventions, particularly with Latino/a, African American and Asian American clients/client systems.
Corequisite: SCWK 220.
Credit / No Credit
2-5 units

SCWK 231. Social Work Practicum II
Development of skills to differentially assess the strengths and capacities of interacting individuals, families, groups, organizations and communities. Application, termination and evaluation of problem-solving interventions from a transcultural generalist practice perspective.
Prerequisite: SCWK 230.
Corequisite: SCWK 221.
Credit / No Credit
2-5 units

SCWK 232. Social Work Practicum III
Development of advanced generalist practice skills with individuals, families, groups, organizations and communities from a transcultural perspective emphasizing family, community and policy practice. Development of skill to use self effectively with diverse clients, colleagues and community members from various backgrounds.
Prerequisite: SCWK 231.
Corequisite: SCWK 222.
Repeatability for credit
Credit / No Credit
2-5 units

SCWK 233. Social Work Practicum IV
Development of advanced generalist practice skills with the aged, children and youth, health/mental health or educational settings. Developing culturally competent skills to assess, plan, implement and evaluate interventions from transcultural and strengths perspectives to address family and community well-being.
Prerequisite: SCWK 232.
Credit / No Credit
2-5 units

SCWK 240. Research Methods and Design
Scientific method and problems of knowledge. Basic concepts and models of research methodology, qualitative research, program and practice evaluation in social work. Critical analysis of existing research on ethnic minorities and other populations-at-risk.
Normal Grade Rules
3 units

SCWK 242. Research Methods, Data Analysis and Evaluation
Basic concepts and models for research methodology applied to the analysis of data in social work. Emphasis on quantitative analysis using microcomputers.
Prerequisite: SCWK 240.
Normal Grade Rules
3 units

SCWK 245. Management in Human Services
The organization and continuous operation of services delivery systems including the functions of management, decision-making, communication, authority, delegation, planning and staffing.
Notes: An elective.
Normal Grade Rules
3 units

SCWK 246. Supervision and Consultation
Focus on the knowledge and skill base of the social worker in supervision and consultation. Identification and analysis of the functions of the social worker as supervisor and consultant.
Notes: An elective.
Normal Grade Rules
3 units

SCWK 247. Collaborative Leadership in Social Service Contexts
Theory and practice of cross-systems collaboration in social services, grounded in an ecological and systems perspective. Emphasizes collaborative leadership and effective interdisciplinary collaboration in addressing complex social problems.
Pre-requisites: Undergraduates may enroll upon instructor approval.
Normal Grade Rules
1 unit

SCWK 250. Policy Practice in Aging
Critical analysis of the impact of policies on the elderly and their families, particularly those who are Latino/a, African American and Asian American. Assessment of organizations and policy implementation. Development of strategies to promote well-being and social change.
Prerequisite: SCWK 204.
Normal Grade Rules
3 units

SCWK 251. Social Work with Aging Populations
Notes: An elective.
Normal Grade Rules
3 units

SCWK 260. Policy Practice in Child and Family Welfare
Critical analysis of the impact of social policies on children and families, particularly those who are Latino/a, African American and Asian American. Assessment of organizational structures and policy implementation. Development of strategies to promote well-being and social change.
Prerequisite: SCWK 204.
Normal Grade Rules
3 units

SCWK 261. Social Work Practice with Children
Skills and knowledge in working with high-risk children and families from an advanced generalist perspective. Focus on understanding of child and family development as well as assessment and intervention at various levels in a transcultural context.
Notes: An elective.
Normal Grade Rules
3 units

SCWK 262. Social Work Practice with Adolescents
Skills and knowledge in working with diverse populations of high-risk adolescents from an advanced generalist perspective. Focus on understanding adolescent and family development as well as assessments and interventions at various levels in a transcultural context.
Notes: An elective.
Normal Grade Rules
3 units

SCWK 263. Social Work and the Law
Analytical skills to understand the legal system, its functions, organization, jurisdiction and case processing methods. An examination of the legal environment of social work practice in selected settings: domestic violence, child abuse and neglect, sexual abuse and education.
Notes: An elective.
Normal Grade Rules
3 units

SCWK 270. Policy Practice in Schools
Critical analysis of the impact of educational policies on students and parents, particularly those who are Latino/a, African American and Asian American. Assessment of policy implementation and schools as organizations. Development of strategies to promote well-being and social change.
Prerequisite: SCWK 204.
Normal Grade Rules
3 units

SCWK 271. Social Work in Educational Settings
Knowledge and skill development for advanced generalist practice in school settings. Roles and functions of social workers in education. Emphasis on schools as community service agencies to meet the needs of culturally diverse student populations and families.
Normal Grade Rules
3 units
SCWK 272. Social Work in Educational Settings
Examines the promotion of well-being and social change, with emphasis on attainment of educational goals. Individual and family needs are explored in the context of educational policies, organizational dynamics, pupil adjustment and assessment, life cycle development, and advocacy.
Prerequisite: SCWK 212, SCWK 214, SCWK 220, SCWK 221.
Normal Grade Rules
3 units

SCWK 280. Policy Practice in Health/Mental Health
Critical analysis of the impact of health/mental health policies on populations-at-risk, particularly those who are Latino/a, African American and Asian American. Assessment of organizations and policy implementation. Development of strategies to promote well-being and social change.
Prerequisite: SCWK 204.
Normal Grade Rules
3 units

SCWK 281. Social Work in Health/Mental Health
Normal Grade Rules
3 units

SCWK 283. Psychopharmacology for Social Workers
Historical trends and specific cultural, ethnic, gender and age related issues of alcohol and drug use are presented. Psychotherapeutic drugs and the pharmacologic basis of medicines for psychiatric disorders and culturally competent treatment interventions for substance abuse will be discussed. Social Work program elective.
Normal Grade Rules
3 units

Examination of selected social problems related to the direct practice of social work that focus on in-depth knowledge of the problems and of the required direct practice skills and techniques.
Notes: An elective.
Normal Grade Rules
3 units

SCWK 287. Advanced Generalist Practice in Substance Abuse
An examination of clinical, policy, and practice issues regarding abuse and dependence of alcohol and other drugs. Analysis and utilization of micro, mezzo and macro considerations related to prevention, harm reduction, drug policies, and current intervention models and treatment approaches.
Notes: An elective.
Normal Grade Rules
1-3 units

SCWK 298. Special Study
Planning and implementation of research practical emphasizing culturally appropriate measures and design strategies. Students produce a professionally written project demonstrating and understanding of the knowledge base underlying appropriate social work interventions.
Prerequisite: SCWK 242.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

SCWK 299. Master’s Thesis or Project
Prerequisite: Admission to candidacy for the master’s degree; approval of the college’s research committee. Repeatable for a total of 4 units.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units
Sociology and Interdisciplinary Social Sciences Department Courses

ASIAN AMERICAN STUDIES

LOWER DIVISION

AAS 020. Women of Color in the US
See WOMS 020.
Normal Grade Rules
GE: D2
3 units

AAS 022. Asian America: Diversity in the United States
This course offers an introduction to the Asian American experiences from an interdisciplinary perspective. Examines the factors that define minority groups and their positions in the United States, emphasizing the fact that while there are common experiences, many racial minorities have distinct experiences.
Normal Grade Rules
3 units

AAS 025. The Changing Majority: Power and Ethnicity in America
See MAS 025.
Normal Grade Rules
GE: D2
3 units

AAS 033A. Asian Americans in the United States Historical and Political Process
Historical and political factors which shaped the culture, institutions and society of America. The role of workers, immigrants and people of color, with Asian Americans as a particular focus.
Note: Entire sequence satisfies GE Areas D2,3, F1,2,3.
Normal Grade Rules
GE: M6
3 units

AAS 033B. Asian Americans in the United States Historical and Political Process
Historical and political factors which shaped the culture, institutions and society of America. The role of workers, immigrants and people of color, with Asian Americans as a particular focus.
Note: Entire sequence satisfies GE Areas D2,3, F1,2,3.
Normal Grade Rules
GE: M7
3 units

UPPER DIVISION

AAS 125. Filipino Experience in the United States
Filipinos in the United States beginning with immigration and culminating with analysis of past and contemporary issues facing Filipino Americans.
Normal Grade Rules
3 units

AAS 133. Introduction to Social Issues in Planning
See URBP 133.
Normal Grade Rules
4 units

AAS 136. WWII Press Coverage: Holocaust Concentration Camps and Japanese Internment Camps
See MCOM 136.
Normal Grade Rules
3 units

AAS 144. Vietnamese Women in America
See WOMS 144.
Normal Grade Rules
3 units

AAS 145. Urban Policy and Its Impact on Inner City Residents
See AFAM 145.
Normal Grade Rules
4 units

AAS 160. Asian American Women
Sociological and historical study of the role and condition of Asian women in America, with focus on the history of their arrival in America, difficulties of adjustment, etc.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

AAS 170. Special Topics in Asian American Studies
Focus varies each semester and is announced in the schedule of classes. Repeatable for credit with program coordinator approval.
Repeatable for credit
Normal Grade Rules
3 units

AAS 175. Asian American Communities
Asian American demography, institutions and contemporary issues.
Prerequisite: Completion of Core GE, Satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

AAS 180. Individual Studies
Individual study and research.
Repeatable for credit
Credit / No Credit
1-4 units

AAS 182. Ethnicity and Aging
Exploration of aging in American cultures. Multiple aspects of aging and the biological, social, cultural and psychological factors that bear upon ethnic elders.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

AAS 185. Multicultural Perspectives within American Society
Examination of historical and sociocultural perspectives of American ethnic minorities. Theoretical and methodological approaches to the study of American ethnic minorities.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

AAS 186. The Vietnamese Experience in America
The experience of Vietnamese refugees from their exodus after the end of the Vietnam War in 1975 to their resettlement in America, emphasizing processes by which a new immigrant group is incorporated into the society.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

AAS 187. Multiracial Asian Americans Experience
The lives and families of Multiracial Asian Americans are explored through their social histories, identity, and experiences in the development and evolution of Asian American ethnic communities.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

AAS 190. Internship
On-site experience with an Asian American community organization. Regular class meetings scheduled to discuss knowledge, skills and ideas related to the internship experience. Repeatable for credit with program coordinator approval.
Prerequisite: AAS 33B or instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units
AAS 191. History of Chinese Americans
Chinese Americans in historical perspective from Chinese immigration to contemporary social conditions.
Normal Grade Rules
3 units

AAS 192. History of Japanese Americans
The Japanese in America from approximately 1800. Includes relocation, wartime conditions, post-war history and contemporary situations.
Normal Grade Rules
3 units

AAS 193. Women and Minorities in the Social Sciences
See SOCS 193.
Normal Grade Rules
3 units

AAS 194. Peoples of Color in the Making of the Americas: 1400-1850
Analysis of the impact that people of color have had on the formation of New World culture and society, from 1400-1850.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

AAS 195. Peoples of Color in the Making of the Americas: 1850-Present
Analysis of the impact that people of color have had on the formation of New World culture and society from 1850 to the present.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GRADUATE

AAS 275. Asian American Communities
Examination of the social and historical contexts of the development of Asian American communities and the impact of major social institutions, such as educational, political, economic and cultural, upon these communities.
Normal Grade Rules
3 units

AAS 393. History of Japanese Americans
The Japanese in America from approximately 1800. Includes relocation, wartime conditions, post-war history and contemporary situations.
Normal Grade Rules
3 units

SOCIAL PLURALISM

CULTURAL PLURALISM

SOCIAL SCIENCE

LOWER DIVISION

SOCS 015. Statistical Applications in the Social Sciences
See SOCI 015.
Normal Grade Rules
GE: B4
3 units

UPPER DIVISION

SOCS 100W. Writing Workshop
Practice in improvement of writing skills appropriate to the broad field of social science. Includes essays, reports and scholarly communication.
Prerequisite: ENGL 1B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement.
Normal Grade Rules
GE: V
3 units

SOCS 137. California in Historical and Social Scientific Perspectives
This interdisciplinary course examines the evolution of the state of California through the perspectives of historians, geographers, economists, political scientists, and other social scientists.
Notes: Not acceptable for Economics majors, except double majors; acceptable for Economics minors.
Normal Grade Rules
3 units

SOCS 138. United States in Historical and Social Science Perspectives
Examines the development of the US to 1900 through the combined lenses of History and the Social Science disciplines of Geography, Political Science, Economics, Sociology, and Anthropology.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: B4
3 units

SOCS 139. The World in Historical and Social Science Perspectives
This interdisciplinary course investigates world civilizations from the dawn of mankind until 1750.
Prerequisite: HIST 015A and HIST 015B or AAS 033A and AAS 033B. Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

SOCS 177. Sociology of Education
This course applies sociology of education theory to the analysis of the relationship between society and education. The course focuses on race/ethnicity, class and gender in the U.S. educational system.
Prerequisites: Upper division standing or instructor consent.
Normal Grade Rules
3 units

SOCS 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Major or minor in the department.
Repeatable for credit
Credit / No Credit
1-4 units

SOCS 185. Teaching in a Diverse Society
This course will provide future teachers with an understanding of the ways in which diversity in the classroom influences the learning process and how specific teaching strategies can enhance student learning.
Normal Grade Rules
3 units

SOCS 187. Multiracial Asian Americans Experience
See AAS 187.
Normal Grade Rules
3 units

SOCS 190. Internship
On-site experience with schools and other institutions.
Repeatable for credit with program coordinator approval.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

SOCS 193. Women and Minorities in the Social Sciences
Seminar on contributions made by women and minorities in the social sciences.
Prerequisite: WOMS 010, WOMS 020, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

UPPER DIVISION

SOCI 100W. Writing Workshop
Practice in improvement of writing and research skills appropriate to the field of sociology, including formal reports, journals and articles.
Prerequisite: Required for Sociology Majors, SOCI 1, ENGL 1B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE: Z
3 units

SOCI 101. Social Theory
Comparative analysis of micro and macro sociological theories and their origins, including, but not limited to, conflict theories, consensus theories, structural functionalism, symbolic interaction and recent theoretical developments. Required for majors.
Prerequisite: SOCI 1 (or equivalent) and upper division standing.
Pre/corequisite: SOCI 100W
Normal Grade Rules
3 units

SOCI 102. Introduction to Statistics
Introduction to measures of central tendency, variation, correlation and regression, probability, estimation and hypothesis testing.
Prerequisite: SOCI 1 (or equivalent).
Normal Grade Rules
3 units

SOCI 103. SPSS Computer Analysis
Statistical analysis of social science data using SPSS.
Online course with periodic required on-campus meetings.
Prerequisite: SOCI 1 (or equivalent) and must have completed or be concurrently enrolled in an introductory statistics course.
Misc/Lab: Activity 2 hours.
Normal Grade Rules
1 unit

SOCI 104. Quantitative Research Methods
Quantitative research methods including survey research design, hypothesis formulation, questionnaire and interview design, scaling, sampling and data preparation and SPSS analysis. Completion of a class research project plus individual research reports. Required for majors.
Prerequisite: SOCI 1 or equivalent, SOCI 15 or SOCI 102 or approved Statistics course from another school; SOCI 100W, SOCI 101 and upper division standing.
Normal Grade Rules
3 units

SOCI 104B. Advanced Quantitative Research Methods
Quantitative research project, typically applied, focused on a particular topic. Emphasis is given to research on local issues. Students will define research problems, design appropriate data gathering methods, collect data, conduct data analyses, and submit written research reports in professional formats.
Prerequisites: SOCI 001, SOCI 15 or SOCI 102, SOCI 100W, SOCI 101, SOCI 104.
Normal Grade Rules
3 units

SOCI 105. Qualitative Research Methods
Philosophy and logic of research design, interviewing techniques, field methods, issues of participant observation, theoretical perspectives, content analysis and qualitative microcomputer techniques. Required for Sociology majors.
Prerequisite: SOCI 1 or equivalent, SOCI 100W, SOCI 101 and upper division standing.
Normal Grade Rules
3 units

SOCI 105B. Advanced Qualitative Research Methods
Involves planning and conducting an in-depth research project utilizing interviews and/or participant observation. Students will design research project, collect data and take field-notes, code and analyze data, and write-up results. Project may involve exploration of a local issue.
Prerequisites: SOCI 001, SOCI 100W, SOCI 101 and SOCI 105.
Normal Grade Rules
3 units

SOCI 116. Global Society
Examination of global social issues, evaluation of the impact of change on world communities and analysis of the response of specific groups to emerging problems and opportunities. Required for majors.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
GE: D3
3 units

SOCI 118. Sociology of Human Rights and Social Justice
Analyse meanings and practices of human rights violation and promotion by exploring the social consequences of issues such as war crime, sexism, migrant rights, and social displacement and by reflecting on prevailing and alternative institutions for social justice.
Prerequisite: SOCI 001 or equivalent.
Normal Grade Rules
3 units

SOCI 120. Contemporary Social Issues
A current issue in contemporary society. Content differs each semester. Repeatable for 6 unit maximum of SOCI 120, SOCI 123 or any combination.
Prerequisite: SOCI 001 or equivalent.
Repeatable for credit
Normal Grade Rules
3 units

SOCI 122. Women in the Second Half of Life
See GERO 122.
Normal Grade Rules
3 units

SOCI 123. Sociology of the Future
Anticipated and possible social changes which could have an impact on American society and the rest of the world. Probable effects upon norms, values, styles of life, social inequality, education, the family, the economy and politics.
Prerequisite: SOCI 1 or instructor consent.
Normal Grade Rules
3 units

SOCI 140. Sociology of Media
Examines the historical development of popular mass media and its role in contemporary society. Explores the relationship between culture, social behavior, and various media forms. Analyzes how gender, race, class, and sexuality have been depicted and represented in media images.
Prerequisite: SOCI 001.
Normal Grade Rules
3 units

SOCI 145. Community Mental Health
See HS 145.
Normal Grade Rules
3 units

SOCI 146. Work, Power, and Leisure
Explores power in organizational settings where we work and play, and how these settings affect the family, the economy and communities. Settings examined may include corporations, cooperatives, social change organizations, community organizations, non-profit organizations such as hospitals and schools.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 151. Violence in the Family
A sociological examination of violence in families focusing on the causes and consequences of violence and on the ways in which various social institutions and community agencies respond to violence among intimates.
Prerequisite: SOCI 1.
Normal Grade Rules
3 units
SOCI 154. Sociology and Non-Conforming Behavior  
Sociological analysis of behavior outside of social conventions including crime, mental illness, suicide and chemical dependency.  
Prerequisite: SOCI 1 or equivalent.  
Normal Grade Rules  
3 units

SOCI 159. Violence and War  
Examination of the causes and consequences of violence and war. Topics may include religious ideologies and their roles in fostering terrorism globally, nationally or locally. Analysis of peaceful alternatives to conflict.  
Prerequisite: SOCI 001.  
Normal Grade Rules  
3 units

SOCI 160. Immigration and Identity  
Examination of topics related to immigration and population movements. Includes the historical context of major migrations, legal, political and social issues and debates, opportunities, prejudices, immigrant communities, intergenerational tensions, and social and personal identity pressures.  
Prerequisite: SOCI 1 or equivalent.  
Normal Grade Rules  
3 units

SOCI 161. City Life  
The city as a setting for diverse lifestyles. Challenges facing urban dwellers and adaptive strategies they take. Comparison of city, suburb and rural countryside as social environments.  
Prerequisite: SOCI 1 or equivalent.  
Normal Grade Rules  
3 units

SOCI 162. Race and Ethnic Relations  
Analysis of racial and ethnic groups in American society; contacts and conflicts; prejudice and discrimination; dominant and subordinate group status; social structure of racial and ethnic inequality within society. Comparison of global race and ethnic relations.  
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.  
Normal Grade Rules  
GE S  
3 units

SOCI 163. Social Change  
Analysis of causes, consequences and the role of individuals, organizations and social structures in producing social change.  
Prerequisite: SOCI 1 or equivalent.  
Normal Grade Rules  
3 units

SOCI 164. Social Action  
The tactics and strategies of social action. Topics may include applying social action to the local community, studying current and past U.S. and international social action organizations, or examining theories of social movements. Repeatable once when content changes.  
Prerequisite: SOCI 1 or equivalent.  
Repeatable for credit  
Normal Grade Rules  
3 units

SOCI 165. Poverty, Wealth and Privilege  
An examination of the causes and consequences of inequality along the dimensions of social class, race/ethnicity, gender, citizenship status, and/or sexualities. Approach may be local, national or global.  
Prerequisite: SOCI 1 or equivalent.  
Normal Grade Rules  
3 units

SOCI 166. Medical Sociology  
Sociological analysis of medical and mental health institutions, values and roles. Patient-doctor interaction, influence of hospital structure on health care, social class and illness, cultural determinants of illness and related areas of old age (gerontology) and death.  
Prerequisite: SOCI 1 or equivalent.  
Normal Grade Rules  
3 units

SOCI 169. Political Sociology  
Analysis of cultural, social and institutional foundations of political policies and actions. Emphasis on patterns affecting political behavior and processes in the industrialized and developing countries.  
Prerequisite: SOCI 1 or equivalent.  
Normal Grade Rules  
3 units

SOCI 170. Sociology of Family  
Examines the historical development of family in the context of social, cultural, political, and economical inequalities, and how intersections of gender, race, class, nationality, sexuality, and age impact understandings of family and intimacy. Explores relationships within families and new family forms.  
Prerequisite: SOCI 001.  
Normal Grade Rules  
3 units

SOCI 171. Person and Society  
Analyses our “self” as socially created and maintained through everyday interactions. Explores how individuals manage and protect self identity in settings, e.g. school, family, work. Effects of race/ethnicity, gender, sexuality, and age on definitions of self and reality.  
Prerequisite: SOCI 1 or instructor consent.  
Normal Grade Rules  
3 units

SOCI 172. Lesbian, Gay, Bi, Transgender Studies  
Explores lesbian, gay, bisexual, transgender, and intersex communities. Analyzes sexual behavior, attitudes, and identities from historical, cross-cultural, and “insider” and “outsider” perspectives. Presents social reactions to LGBT movements and persons. Includes current stereotypes, misinformation, and movements to achieve equality.  
Prerequisite: SOCI 001.  
Normal Grade Rules  
3 units

SOCI 173. Socialization and Identity  
Personality formation in the context of family, social interaction and institutions of socialization such as workplace, family and community. Emphasis on childhood and the social processes that mold basic beliefs and values in the formation of adult identity.  
Prerequisite: SOCI 001.  
Normal Grade Rules  
3 units

SOCI 174. Sexualities  
Examines diverse social constructions of sexual intimacy, meanings, identities, practices, and power embedded in relationships, communities and organizations. Sociological themes of morality, control, sexual citizenship, science and the production of sexual subjects, and the political economy of sex may be examined.  
Prerequisite: SOCI 001.  
Normal Grade Rules  
3 units

SOCI 175. Sociology of Masculinities and Femininities  
Examination and analysis of social construction of gender through interaction and social institutions. Explores gender-based identities and how intersections of gender, race, class, and sexuality shape men’s and women’s experiences. Examines theories of gender and gender-based social movements.  
Prerequisite: SOCI 001.  
Normal Grade Rules  
3 units

SOCI 176. Sociology of Everyday Life  
Examination of micro-sociology, small group processes, and interactions. Using the framework of Everyday Life, this includes studies of power, status, communication, cooperation, conflict resolution, task performance. Provides understanding of small formal and informal groups, work groups and intimate relationships.  
Prerequisite: SOCI 001 or instructor consent  
Normal Grade Rules  
3 units

SOCI 177. Sociology of Education  
See SOCS 177.  
Normal Grade Rules  
3 units
SOCI 178. Sociology of Childhood
Examination of sociological issues, theories, and research on childhood from infancy to adolescence, including the role of social institutions in shaping the childhood experience and the emergence of peer cultures that change societies.
Prerequisite: SOCI 001.
Normal Grade Rules
3 units

SOCI 180. Individual Studies
Prerequisite: Instructors consent and department chair approval.
Repeatable for credit
Credit/No Credit
1-4 units

SOCI 181. Service Internship
Supervised placement in practical situations where sociologists are employed, including correctional services, community planning, industry, research, social action and social welfare agencies.
Prerequisite: SOCI 1 or equivalent, SOCI 100W, SOCI 101 and upper division standing, or graduate standing. Department Chair approval.
Repeatable for credit
Credit/No Credit
1-4 units

SOCI 181B. Sociology Career Capstone
Capstone course to expand undergraduate senior opportunities and options. Analyzes trends in sociology, explores employment and careers, reflection and assessment of learning in the major.
Prerequisites: SOCI 001, SOCI 100W, SOCI 101, and SOCI 104 or SOCI 105.
Note: Students must have taken at least one of the required research method courses before enrolling in the capstone course.
Normal Grade Rules
3 units

SOCI 182. Ethnicity and Aging
See AAS 182.
Normal Grade Rules
3 units

SOCI 187. United States Social History
See HIST 187.
Repeatable for credit
Normal Grade Rules
3 units

SOCI 193. Behavioral Science in Practice
See ANTH 193.
Normal Grade Rules
3 units

SOCI 199H. Senior Honors Thesis
Preparation and writing of an original project. Repeatable for a total of 4 units.
Prerequisite: Sociology Honors Program student.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

GRADUATE

SOCI 200A. Methods of Social Research I: Research Design
Focus on quantitative research methods used in the social sciences. Emphasis on survey research method, including statement of the research problem, literature review, hypothesis construction, measurement, sampling and data collection.
Prerequisite: SOCI 104 with a grade of "B" or better.
Normal Grade Rules
3 units

SOCI 200B. Methods of Social Research II: Statistical Techniques
Understanding of basic statistical concepts and procedures, development of a familiarity with advanced techniques such as multiple regression, and appreciation of strength, weaknesses, and uncertainty inherent in statistical analysis.
Prerequisite: SOCI 200A with a grade of "B" or better.
Normal Grade Rules
3 units

SOCI 201A. Sociological Theory I
Fundamental theoretical issues from the emergence of modern societies (Marx, Durkheim, Weber) to current debates about research, individuals, meanings, inequalities, institutions, and community change, and theory application. Content varies with instructor.
Prerequisite: SOCI 101 with grade of "B" or better.
Normal Grade Rules
3 units

SOCI 201B. Sociological Theory II
Analysis of contemporary social theories, with an emphasis on critical and interpretive traditions in sociology. Theoretical perspectives covered may include various micro sociological approaches, feminist and critical race theories, post-modernism and post-structuralism.
Prerequisite: SOCI 201A with a grade of "B" or better.
Normal Grade Rules
3 units

SOCI 223. Seminar in Sociological Issues
Analysis of a current issue in sociology which is not covered by other graduate seminars. Content differs each semester. Repeatable once with advisor consent when content changes.
Repeatable for credit
Normal Grade Rules
3 units

SOCI 254. Seminar in Deviance and Social Control
Historical and comparative theories of deviance, its function in society and its relation to formal and informal systems of regulation and control.
Normal Grade Rules
3 units

SOCI 256. Seminar in Contemporary Issues in Criminology
Analysis of a current issue in criminology which is not covered by other graduate seminars. Content differs each semester. Repeatable once with advisor consent.
Repeatable for credit
Normal Grade Rules
3 units

SOCI 261. Seminar in Urban Sociology
Trends related to local, U.S., and globalization processes and their effects on changing social structures and patterns of life in cities. Analysis of implications for various populations of people and exploration of potential solutions.
Normal Grade Rules
3 units

SOCI 263. Seminar in Social Change
Theories of the origins and processes of social change. Analysis of efforts to control or to produce social change. Problems of research on the causes, effects and prediction of social change.
Normal Grade Rules
3 units

SOCI 269. Seminar in Political Sociology
The interrelationship between social structures and political institutions with special attention to questions of social inequality, power and legitimization in modern and developing societies.
Normal Grade Rules
3 units

SOCI 270. Seminar in the Modern Family
Comparative analysis of institutional forms and family small group systems including alternative life styles and minority families. Problems of the family. Changes in family roles and in family law.
Normal Grade Rules
3 units

SOCI 273. Selected Topics in Microsociology
Content differs each semester and may include such topics as personality, socialization, gender roles, small groups, self and role theory. Repeatable with advisor consent for a total of 6 units.
Repeatable for credit
Normal Grade Rules
3 units
SOCI 276. Small Group Theory and Research
Analysis of theoretical research programs in small groups, organizations, social psychology and family processes. Attention paid to logical articulation of theoretical structure and research design. Laboratory, field or clinical studies. Course is repeatable with advisor consent for a total of 6 units.
Repeatable for credit
Normal Grade Rules
3 units

SOCI 281. Internship in Sociology
Supervised placement in practical situations where sociologists are employed: correctional services, community planning, industry, counseling agencies and others. Course is repeatable for a total of 6 units.
Notes: Open to graduate students by arrangement with the department.
Repeatable for credit
Credit / No Credit
1-6 units

SOCI 285. Seminar in Social Inequality
Emphasis on qualitative research methods. Topics may include social class, race/ethnicity, gender, sexualities, citizenship status and the social construction of self and identity. Methodological issues involved in qualitative research will be addressed.
Normal Grade Rules
3 units

SOCI 290R. Thesis and Special Project Culmination
Continuing analysis of data and writing of thesis. Pre-requisites: Outstanding RP in a preceding semester for a Thesis or Special Project course.
Mandatory CR/NC/RP
1 unit

SOCI 294. Seminar in Research Design
Advanced problems in research design. Evaluation of theoretically relevant multivariate models, including design of experimental, sampling and statistical models, interpretation of results and report writing.
Prerequisite: SOCI 200.
Repeatable for credit
Normal Grade Rules
3 units

SOCI 298. Special Study
Advanced individual research and projects. May not be related to thesis topic. Course is repeatable for a total of 4 units.
Prerequisite: Consent of instructor and approval by graduate advisor or department chair.
Repeatable for credit
Credit / No Credit
1-4 units

SOCI 299. Master’s Thesis or Project
Prerequisite: Consent of thesis committee chair and approval by graduate advisor or department chair.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

WOMEN’S STUDIES

LOWER DIVISION

WOMS 005Q. Gender, Race & Sexuality in Media
This course uses a cultural studies approach to explore the production and consumption of contemporary media in our everyday lives with a focus on race, class, gender, sexuality, and nation.
Prerequisite: First term freshmen only.
Note: All courses with a ‘Q’ suffix are designated as First Year Experience courses.
Normal Grade Rules
GE: D1
3 units

WOMS 010. Women, Gender, and Sexuality Studies
Interdisciplinary introduction to core concepts and analytical tools addressing the diversity of human experience across gender, sexuality, embodiment, and class location. Students will become familiar with key contemporary and historical debates in both global and local contexts.
Normal Grade Rules
GE: D1
3 units

WOMS 020. Women of Color in the US
Constructs knowledge of the historical and contemporary experience of women of color. Focuses on Native American, African American, Latina, and Asian American women and considers contributions they have made to the shaping of the nation.
Normal Grade Rules
GE: D2
3 units

UPPER DIVISION

WOMS 101. The Study of Women
Multidisciplinary introduction to traditional and new images, roles, experiences, ethnic similarities and differences, and contemporary problems of American women.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

WOMS 102. The Global Study of Women
This course will be a survey of literature on the interaction of gender and forces of globalization.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

WOMS 107. Psychology of Women
See PSYC 107.
Normal Grade Rules
3 units

WOMS 112. Women in the Global Economy
Women’s participation in the economy, US and internationally: paid employment, consumption, subsistence labor, reproduction, volunteerism. It connects daily life activities with international economic trends, with particular attention to race, class, implications for families and strategies for equity.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 114. Politics of Mothering and Reproduction
Explore contemporary definitions and values inscribed in issues pertaining to mothers and reproduction. It will be built upon three literatures: discourses of law and legality, discourses of nature and science, and discourses based in feminist thinking.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 120. Special Topics in Women’s Studies
Focus announced in the schedule of classes. Repeatable for credit with program coordinator approval.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 121. Philosophy and Feminism
See PHIL 121.
Normal Grade Rules
3 units

WOMS 122. Women in the Second Half of Life
See GERO 122.
Normal Grade Rules
3 units

WOMS 131. Gender, Sexuality, and Religion
See RELS 331.
Normal Grade Rules
3 units
WOMS 144. Vietnamese Women in America
The transitions of Vietnamese American women: the history and culture of Vietnam, the war, the exodus, survival in American society, changes and conflicts for individuals and within families, higher education, the feminist movement.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 150. Women and Popular Culture
The course will use feminist and cultural studies theory to discuss the historical development and contemporary representations of women in popular culture. It will specifically examine meanings, implications and the impact of commodification and mass production of images of women.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 155. Contemporary Women’s Movement
Development of the women’s movement in the U.S. in relation to the changing political and social climate. Forms of activism in different ethnic groups. Analysis of issues, ideologies, strategies and accomplishments. International comparisons.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 156. Black Women Writers: Race, Culture and Life Cycle in Cross-Cultural Perspective
See AFAM 156.
Normal Grade Rules
3 units

WOMS 157. Feminist Oral History and Personal Memoir
Course is designed to train students in oral history and personal memoir. Emphasizing the specialness of women’s voices, and of race, class and sexuality, women’s silence, erasure, censorship and marginalization will be addressed.
Prerequisite: Junior standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 159. Gender and Medicine
See HIST 159
Normal Grade Rules
3 units

WOMS 160. Gender, Race, and Class
Interdisciplinary analysis of race and class diversity among women and social, political and economic hierarchies of race, class and gender in the U.S. Topics may include sexuality, rape and racism, immigrant experiences; welfare system.
Prerequisite: WOMS 010, WOMS 020, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 169. Sexualities and the Body
This course explores the social construction of sexuality and the body from a feminist perspective. It investigates various aspects of sexuality and gendered bodies including identity, community, and social movements based on intersections of race, gender, sexuality, culture, and nation.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 175. Sociology of Masculinities and Femininities
See SOCI 175.
Normal Grade Rules
3 units

WOMS 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Minor or emphasis in women’s studies.
Repeatable for credit
Credit / No Credit
1-4 units

WOMS 182. Women in Literature
See ENGL 182.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 184. Vietnamese Women in America
The transitions of Vietnamese American women: the history and culture of Vietnam, the war, the exodus, survival in American society, changes and conflicts for individuals and within families, higher education, the feminist movement.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 185. Vietnamese Women in America
The transitions of Vietnamese American women: the history and culture of Vietnam, the war, the exodus, survival in American society, changes and conflicts for individuals and within families, higher education, the feminist movement.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 187. Feminist Perspectives on Gender and Education in the U.S.
The role of gender in the educational system in the United States from both a historical and contemporary context. We will focus on the significance of schools as the primary socializing institution for boys and girls.
Prerequisite: Junior standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 189. Islamic Perspectives on Gender
Contemporary feminist theories analyze premises of gender roles in Islamic cultures and variety of sexual expressions. This class will sensitize students to the diversity of Islamic cultures and communities, in addition to geographical, political, and social locations, like ethnicity and class affect the gender debate in Islamic perspectives.
Prerequisite: Upper division standing.
Notes: Required for topical major and minor in Women’s Studies.
Normal Grade Rules
3 units

WOMS 190. Internship
On-site experience with community or campus organization or other agency involved with women’s issues. Individual and group advising augments the experiential learning. Repeatable for credit with program coordinator approval.
Prerequisite: WOMS 101 or instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

WOMS 193. Women and Minorities in the Social Sciences
See SOCS 193.
Normal Grade Rules
3 units

GRADUATE

WOMS 201A. Seminar in Feminism
Research, readings and discussion of subjects from the field of feminist thought. Particular attention will be paid to theories of the development of woman’s present position and schema for social change. May be repeated once for credit with instructor consent.
Prerequisite: Classified standing, an undergraduate course concerned with feminism and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 201B. Seminar in Feminism
Research, readings and discussion of subjects from the field of feminist thought. Particular attention will be paid to theories of the development of woman’s present position and schema for social change. May be repeated once for credit with instructor consent.
Prerequisite: Classified standing, an undergraduate course concerned with feminism and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
WOMS 212. Seminar on Women in the Community
Integration and application of theoretical and empirical knowledge of feminism to a realistic field experience. Students will be placed with women’s social, economic and political organizations.
Normal Grade Rules
3 units

WOMS 220. Seminar in Women's Studies Topics
Advanced study of selected issues in women’s studies. Topics will vary and will be announced in the schedule of classes.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

WOMS 238. Feminist Methodology
This interdisciplinary course asks whether unique methods characterize feminist research in social sciences and examines the epistemology and methodology of feminist social science scholarship. Particular attention given to race, class and sexuality.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units
Software Engineering Courses

SOFTWARE ENGINEERING

LOWER DIVISION

SE 046A. Introduction to Programming
See CS 046A.
ABC/No Credit
4 units

SE 046B. Introduction to Data Structures
See CS 046B.

Technology Courses

TECHNOLOGY

LOWER DIVISION

TECH 020. Design and Graphics
See ME 020.
Normal Grade Rules
2 units

TECH 025. Introduction to Materials Technology
Designed to introduce students to materials used to make consumer and commercial products. Including metals, plastics, and composites. How materials impact our lives and standard of living. Materials selection and the role of experimentation, testing and evaluation procedures.
Prerequisites: Math 008 or equivalent
Corequisites: Chem 001A or 030A or equivalent
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 031. Quality Assurance and Control
Introduction to concepts and statistical methods that companies use to manage and improve quality. Sampling inspection, statistical process control, quality function deployment, cost of quality, design of experiment and Taguchi’s method for designing in quality.
Prerequisite: BUS 090 or equivalent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 040. Product Design & Manufacturing
Prerequisite: BSIT: CHEM 030A, TECH 020, TECH 025; ME: ME 020.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Repeatable for credit
Normal Grade Rules
3 units

TECH 041. Machine Shop Safety
Introduction to basic machine shop safety and skills. Fabricating of mechanical components and assemblies from engineering drawings, performing tolerance inspection, developing fabrication process plans.
Prerequisite: ME 020, TECH 020, CE 020 or equivalent.
Repeatable for credit
Normal Grade Rules
1 unit

TECH 042. Manufacturing and Machine Shop Projects and Practices
Individual manufacturing processes and machine shop practices. Fabrication of mechanical components and assemblies in fulfillment of senior, course, special, and approved student club assignments and projects.
Prerequisites: TECH/ME 041 (with grade “C-” or better).
Misc/Lab: 3 hours lab
Repeatable for credit
Credit / No Credit
1 unit

TECH 045. Sustainable Facilities Design & Planning
Construction, planning, and maintenance of physical facilities and equipment for sustainable manufacturing operations. Green and sustainable practices and standards, plant facilities layout/design, regulatory and environmental compliance, safety/security and energy conservation. Production line planning and OSHA and NIOSH standards.
Prerequisite: ME/TECH 020, CE 020 or equivalent
Normal Grade Rules
3 units

TECH 046. Machine Operation and Management
Prerequisite: TECH 020.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 060. Introduction to Electronics
Emphasizes practical electronics applications and products. DC and AC theory; Ohm’s Law, Kirchhoff’s Laws, Power Laws, network theorems, schematic diagrams, instrumentation and measurement, and functions of discrete components.
Corequisites: Math 008 or equivalent
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 061. Analog Circuits
Semiconductor theory; p-n junction, bipolar transistors, JFETs and MOSFETs, optoelectronic devices. Operational amplifiers and 555 timers. Device applications: comparators, signal generators, active filters, instrumentation amplifiers, voltage regulators and power supplies.
Prerequisite: TECH 060, MATH 071 or MATH 030.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 062. Digital Circuits
Logic gates emphasizing TTL and CMOS Design techniques. Combinational circuits, counters, registers, multiplexers, demultiplexers, encoders, decoders, DAC, ADC and ALU.
Prerequisite: TECH 060.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 065. Networking Theory and Application
Prerequisites: TECH 060 or equivalent
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 066. Network Administration
Prerequisite: TECH 065.
Misc/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

TECH 098. Technology and Women
Exploration of the interaction of gender with technology. Myths and misconceptions about gender roles and technology. Stereotypes of men and women. Focus on the technological changes since 1900 and how these have affected both men and women.
Normal Grade Rules
GE D1
3 units

TECH 099. Statics and Dynamics for Manufacturing Systems
Study of bodies in equilibrium and motion. Applications to particles, two-dimensional and three-dimensional structural systems. Applications of statics and dynamics in manufacturing.
Prerequisite: MATH 071, PHYS 02A.
Normal Grade Rules
3 units
### TECH 101. Product Design, Development and Manufacturing

Product design, development, and manufacturing in the product life cycle. Comparison of functions and systems in traditional versus integrated manufacturing environments. Benefits of integrated approach, development cycle time, manufacturing/material cost, quality, time-to-market.

- **Prerequisite:** ENGL 001A.
- **Normal Grade Rules**
  - 3 units

### TECH 115. Automation and Control

Theory and application of automation elements including analog and digital sensors, controllers, indicators, actuators. Control modes for proportional, derivative, and integral control systems. Hands-on integration practices among PLC, robots, automatic identification devices, computers, and other industrial equipment.

- **Prerequisite:** TECH 060, PHYS 002A, PHYS 002B, MATH 071.
  - **Misc/Lab:** Lecture 2 hours/lab 3 hours.
  - **Normal Grade Rules**
  - 3 units

### TECH 139. Quality Management

Planning, designing and managing the performance of quality in an organization. Synthesis, modeling and application of total quality management to case studies in manufacturing and service industries.

- **Prerequisite:** TECH 031.
  - **Misc/Lab:** Lecture 2 hours/lab 3 hours.
  - **Normal Grade Rules**
  - 3 units

### TECH 140. Green & Sustainable Product Design

Advanced product and process design with a focus on green and sustainable design and on manufacturing green products. Analysis of process and material selection for environmental impact. Composite and advanced materials processing. Laboratory exercises and planning for green manufacturing.

- **Prerequisite:** ME/TECH 020, CHEM 001A or CHEM 030B, MATH 071 or MATH 030 or MATH 030P.
  - **Repeatable for credit**
  - **Normal Grade Rules**
  - 3 units

### TECH 141. Product Design III

Explorations of interrelationships of design to function and aesthetics. Focus on solid model representations, design-build decision making, design for manufacturability, and assembly based on aesthetics and product functionality.

- **Prerequisite:** TECH 140.
  - **Normal Grade Rules**
  - 3 units

### TECH 143. Polymers and Composites Fabrication Technology

- **Prerequisite:** TECH 020, CHEM 001A and PHYS 002A.
  - **Misc/Lab:** Activity 6 hours.
  - **Normal Grade Rules**
  - 3 units

### TECH 145. Lean Manufacturing

- **Prerequisite:** BUS 140 or BUS 145 or ISE 140.
  - **Normal Grade Rules**
  - 3 units

### TECH 147. Green Manufacturing Analysis & Management

Design, operation, and control of green production systems using techniques to promote sustainability and minimize environmental impact. Emphasis is on the physical design of high performance manufacturing and will include production flow, scheduling, work flow, layout of manufacturing plants, and material handling.

- **Prerequisite:** TECH 045, TECH 046, TECH 115.
  - **Pre/corequisite:** TECH 140.
  - **Misc/Lab:** Lecture 2 hours/lab 3 hours.
  - **Normal Grade Rules**
  - 3 units

### TECH 148. Product Prototyping and Non-Traditional Manufacturing Processes

Design and development of prototype products. Traditional and non-traditional processes including chemical, electromechanical, mechanical, and thermal. Building jigs, fixtures, patterns, and molds. Emphasis on manufacturing products by casting and molding. Includes mold making and machining for the polymer industry.

- **Prerequisite:** TECH 040, TECH 046.
  - **Misc/Lab:** Lecture 2 hours/lab 3 hours.
  - **Normal Grade Rules**
  - 3 units

### TECH 160. Microprocessors Theory and Applications

Microprocessor concepts and applications to testing and data management. Assembly language and high-level language programming and techniques, including assembling, compiling, debugging. Current trends and issues in microprocessors.

- **Prerequisite:** TECH 063, TECH 115, and CMPE 030 or CS 049 or CS 049J.
  - **Misc/Lab:** Lecture 2 hours/lab 3 hours.
  - **Normal Grade Rules**
  - 3 units

### TECH 162. Analog Systems Design and Applications

System level concepts; analog systems building blocks; system problems including grounding, stability, accuracy and compensation. Design, analysis and applications of analog systems.

- **Prerequisite:** TECH 062.
  - **Misc/Lab:** Lecture 2 hours/lab 3 hours.
  - **Normal Grade Rules**
  - 3 units

### TECH 163. Telecommunications Systems

- **Prerequisite:** TECH 062, TECH 063.
  - **Normal Grade Rules**
  - 3 units

### TECH 164. Electronics Manufacturing

Computer-aided design and manufacturing of electronic systems. PCB fabrication and manufacturing. IC technology and testing techniques. Various electronics manufacturing techniques such as SMT, MCM, TAB, and emerging technologies. Current trends and issues in electronics manufacturing.

- **Prerequisite:** TECH 062, TECH 063.
  - **Misc/Lab:** Lecture 2 hours/lab 3 hours.
  - **Normal Grade Rules**
  - 3 units

### TECH 165. Wireless Communications Technologies

- **Prerequisites:** TECH 063, TECH 065.
  - **Normal Grade Rules**
  - 3 units
TECH 167. Control Systems
Theory and applications of feedback systems, transfer functions and block diagrams. Transducers, analog and digital controllers, signal conditioners and transmission. Analysis, testing, and troubleshooting of electronic systems with feedback.
Prerequisite: TECH 063, TECH 115, and CMPE 030 or CS 049C or CS 049J.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 168. Analysis and Applications of Integrated Circuits
Analysis, testing, and troubleshooting of bipolar and unipolar integrated circuits. Masking techniques. Analysis, testing, interpretation, identification, and applications of analog and digital integrated circuits.
Prerequisite: TECH 160.
Pre/corequisite: TECH 162.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Repeatable for credit
Normal Grade Rules
3 units

TECH 169. Applied Electronic Design
Design, test, simulation, development and implementation of electronic systems for control of industrial processes using project management techniques and team work. Hardware, software, and system interfacing.
Pre/corequisite: TECH 167.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 180A. Individual Studies in Electronics and Computer Technology
Prerequisite: Upper division standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

TECH 180B. Individual Studies in Manufacturing Technology
Prerequisite: Upper division standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

TECH 180H. Individual Studies in Materials Technology
Prerequisite: Upper division standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

TECH 180J. Individual Studies in Technology Issues
Prerequisite: Upper division standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

TECH 189. Multimedia Production Seminar
Project-oriented course and seminar focused on allowing advanced students from a variety of disciplines to create interactive multimedia projects. Use of computer applications to plan, design, and develop web pages and desktop multimedia.
Prerequisite: Upper division standing and advisor approved course in computer fundamentals.
Normal Grade Rules
3 units

TECH 190. Senior Seminar in Technology
Current industry analysis and career development. Technology trends in manufacturing and electronics. Leadership skills for a technology professional. Ethics for technology managers.
Prerequisite: Graduating senior, major form completed.
Normal Grade Rules
3 units

TECH 195. Cooperative Internship
Assignment to companies for industrial experiences based on student’s instructional program and previous experience. Special projects concurrent with work experience.
Prerequisite: Senior standing.
Credit / No Credit
3 units

TECH 199A. Special Topics in Electronics and Computer Technology
Special topics in Electronics and Computer Technology. Content varies from semester to semester. Repeatable for a total of 6 units.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

TECH 199B. Special Topics in Manufacturing Systems
Special topics in Manufacturing Systems. Content varies from semester to semester. Repeatable for a total of 6 units.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

TECH 199C. Interdisciplinary Senior Project I
See ENGR 195C.
Normal Grade Rules
3 units

TECH 199D. Interdisciplinary Senior Project II
See ENGR 195D.
Normal Grade Rules
3 units

TECH 199E. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

TECH 199F. Technology and Civilization
History, development, and use of technology in different cultures. Technology’s impact on society, global environment, the workplace, cultural values, gender roles, and newly industrialized countries of the world.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: V
3 units

TECH 200. Research Methods for Engineering and Technology
Current applied research methods applied to problems in engineering, technology, and other technical fields. Exposure to current literature, scientific/technological research ethics, research and experimental design and methods, skills in research proposal development and locating funding.
Prerequisite: STAT 115 (or equivalent) and graduate standing.
Normal Grade Rules
3 units
TECH 230. Six-Sigma and Continuous Improvement Systems Management
Six-Sigma quality systems for design production and business processes. Statistical foundations, implementation strategies, and practical industrial applications. Methods and practices of achieving continuous quality improvement, defect reduction, project planning and management methods to achieve universal participation in process improvement.
Prerequisite: STAT 115 or equivalent.
Normal Grade Rules
3 units

TECH 231. Systems Reliability and Maintainability
Analysis of models for systems reliability including static, dynamic, and probabilistic engineering models; reliability estimation and optimization, life cycle prediction techniques; failure modes and effects analysis; maintainability prediction and analysis.
Prerequisite: TECH 230.
Normal Grade Rules
3 units

TECH 232. Advanced Statistical Process Control
Analysis of advanced statistical process control (SPC) systems for monitoring and controlling process performance. Statistical methods for sample selection, probability theory, partition of variation, blanket studies, out-of-control action plans, process capability measurement, and SPC implementation strategies and analysis.
Prerequisite: STAT 115.
Normal Grade Rules
3 units

TECH 233. Design and Analysis of Experiments
Analysis of experimental design strategies for process and design improvement. Industrial application of single factor, multi-factor, and optimization designs. Experimental analysis using t-tests, ANOVA, Chi-square, linear and multiple regression techniques. Model building and model validation.
Pre/Corequisite: TECH 232.
Repealble for credit
Normal Grade Rules
3 units

TECH 234. Quality Systems Management: ISO 9000 and 14000
Strategies for developing and implementing ISO standards: Project management and planning, cost estimation, supply chain management, audit plans and documentation systems for ISO system compliance. Analysis of ISO 9000 and 14000 quality systems for product design, development and production.
Normal Grade Rules
3 units

TECH 235. Measurement Systems and Analysis
Analysis of variables and attributes methods for measurement systems analysis and control including; repeatability, reproducibility, accuracy, linearity and stability. A survey of measurement and testing systems; dimensional metrology, destructive and nondestructive testing, calibration methods, and inspection equipment and techniques.
Prerequisite: TECH 232.
Normal Grade Rules
3 units

TECH 236. Foundations in Quality Assurance for Software
Analysis of software development strategies, design and configuration control systems, development standards, performance measurement, documentation and revision control systems, defect reduction methods, modular design approaches, and software maintainability.
Prerequisite: TECH 232, TECH 200, TECH 234, CS 46A or equivalent.
Normal Grade Rules
3 units

TECH 239. Design Assurance in Product Development
Analysis of product development strategies, understanding design constraints and market conditions, design and configuration control systems, documentation and revision control systems, design for manufacturability and techniques.
Prerequisite: TECH 200, TECH 230, and TECH 234.
Normal Grade Rules
3 units

TECH 290. Graduate Problems
Graduate study or research of technical problems.
Prerequisite: TECH 200 and instructor consent.
Repeatable for credit
Credit / No Credit
2-4 units

TECH 290R. Thesis/Project Supervision
Continued work on thesis or project.
Pre-requisite: Outstanding RP grade in a preceding semester in a project or thesis class
Mandatory CR/NC/RP
1 unit

TECH 298. Graduate Project
Graduate study research of professional problems.
Prerequisite: Admission to candidacy for the master’s degree and instructor consent.
Repeatable for credit
Credit / No Credit
2-4 units

TECH 299. Master’s Thesis
Prerequisite: Admission to candidacy for the master’s degree and instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
2-6 units
Television, Radio, Film and Theatre, Department of Courses

RADIO-TELEVISION-FILM

LOWER DIVISION

RTVF 010. The Art of Film
Study of the formal, aesthetic, historical, and cultural contexts of film as an art form.
Prerequisite: Instructor consent
Normal Grade Rules
GE: C1
3 units

RTVF 020. Introduction to Sound Production
Fundamentals of sound production.
Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

RTVF 021. KSJS On-Air Operations
On-Air operation of campus radio station KSJS-FM, FCC, equipment, D.J. interview, sports; all activities and processes required for live broadcasting, music, public service and community service programming.
Misc/Lab: Lecture 1 hour /Activity 4 hours.
Normal Grade Rules
3 units

RTVF 030. Introduction to Film/TV Production
Fundamentals of film and television production.
Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

RTVF 031. Film and Television Aesthetics
Aesthetic analysis of video, film, and related new electronics media based on an examination of fundamental image and sound elements.
Normal Grade Rules
3 units

RTVF 080. Introduction to Electronic Media
Analysis of the history and evolution of radio (audio) and television (video) in the U.S. Examination of programming, government regulation, advertising, networking, development of electronic media technologies and world media systems.
Normal Grade Rules
3 units

RTVF 082. Introduction to Film History
The history and evolution of the motion picture from 1895 to 1945. Viewing of representative films, study and discussion of major world film movements, important directors, and key genres.
Normal Grade Rules
3 units

UPPER DIVISION

RTVF 110. Electronic Media and Culture
Critical survey of roles played by electronic media in shaping culture. Media institutions are examined regarding information they distribute, entertainment they provide and influence they bring. Analysis of media sources, messages and audiences.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: 5
3 units

RTVF 111. Alternative Cinema
Uses films from previously marginalized national cinemas from around the world as primary sources to teach students to appreciate, understand and compare diverse cultures.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Repeatable for credit
Normal Grade Rules
GE: V
3 units

RTVF 120. Intermediate Sound Production
Intermediate sound recording and post-production techniques (audio and radio KSJS-FM).
Prerequisites: RTVF 020, RTVF 030 and RTVF 031, upper division standing or instructor consent.
Misc/Lab: Lecture 2 hours /Activity 2 hours.
Normal Grade Rules
3 units

RTVF 121. KSJS-FM Radio Activity
Student participation in radio with KSJS-FM and Update News. Activities supervised by area faculty. Repeatable, but up to 6 units may be used for graduation.
Prerequisite: Instructor consent
Repeatable for credit
Credit / No Credit
1-3 units

RTVF 122. KSJS Station Operation & Mgmt
Structure and operation of non-commercial radio station KSJS-FM. Theory and practice of radio management, programming, production, public service, sales and engineering.
Prerequisite: Appointment to KSJS management staff or instructor consent
Repeatable for credit
Normal Grade Rules
3 units

RTVF 130. Intermediate Film & TV Production
Techniques of film and television production.
Prerequisite: RTVF 020, RTVF 030 and RTVF 031, upper division standing or instructor consent.
Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

RTVF 131A. Post Production: Color Correction
Post production course with emphasis on color correction of film and television production projects.
Prerequisite: RTVF 130 or instructors consent
Normal Grade Rules
3 units

RTVF 131B. Post Production & Delivery
Post production techniques and associated delivery of film and television projects.
Prerequisite: RTVF 130 or instructor consent.
Misc/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

RTVF 132A. Introduction to Cinematography
This is the first in-depth course in cinematography. You will achieve an understanding of the principles of motion picture photography through lecture, discussions, projects and screenings; develop the skills of the cinematographer by shooting exercises during and outside of the class; and acquire an appreciation of the art and technology of cinematography.
Prerequisite: RTVF 030 or Instructor Consent
Normal Grade Rules
3 units

RTVF 132B. Advanced Cinematography
This is an advanced, in-depth course in cinematography. The course consists of mostly hands-on practicum, with lectures as needed. Dramatic scenes will be filmed in realistic production shooting situations, both in the studio and on location. Scripts to be photographed will be selected by the professor and the students, based on the challenges they present.
Prerequisite: RTVF 131A or Instructor Consent
Normal Grade Rules
3 units

RTVF 133. Film & TV Production Management
Analysis of film and television organization and programming concepts, including production management, decision-making processes, technical script breakdown, and its relation to budgeting and finance.
Prerequisite: RTVF 120, RTVF 130, upper division standing or instructor consent.
Normal Grade Rules
3 units
RTVF 135. RTVF Production: Special Projects
Principles, procedures and techniques of radio, television and film production. Use of cameras, sound, lighting, pictorial composition, cinematic effects, color and editing. See department office for specific project information.
Prerequisite: RTVF 020, RTVF 030, upper division standing or instructor consent.
Misc/Lab: Lecture 2 hours/Activity 2 hours
Repeatable for credit
Normal Grade Rules
3 units

RTVF 136. Advanced Film & TV Production
Creation, production and direction of senior-level short dramatic or informational film and television projects.
Prerequisite: Upper division standing or instructor consent.
Misc/Lab: Lecture 2 hours/Activity 2 hours
Normal Grade Rules
3 units

RTVF 160. Introduction to Screenwriting
Basic principles and practices in writing scripts for film and/or television.
Prerequisite: RTVF 020, RTVF 030 and TA 100W, upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

RTVF 161. Advanced Screenwriting
Each student develops an original screenplay through several drafts in this workshop. Drawing on constructive feedback from classmates and instructor. The course focuses on dramatic structure, character and plot development as well as visual language of the screen.
Prerequisite: RTVF 160.
Normal Grade Rules
3 units

RTVF 180S. Individual Studies
Directed study (special production or research projects) in specified fields not covered by offered courses.
Prerequisite: Instructor Consent
Repeatable for credit
Normal Grade Rules
1-3 units

RTVF 181. Modern Film History
The history and evolution of the motion picture after 1945. Viewing of representative films, study and discussion of major world film movements, important directors, and key genres.
Prerequisite: RTVF 082, upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

RTVF 183. Critical Studies & Research in RTVF
Critical and scholarly inquiry into established and emerging areas of criticism, theory and research in RTVF studies. Production of scholarly criticism and research suitable for delivery at an academic conference or submission to a refereed journal.
Prerequisites: RTVF 010, RTVF 080, upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

RTVF 185. Special Topics in RTVF
Special topics in radio, television and film. Repeatable for credit as topics change. See department office for specific topic information.
Prerequisite: RTVF 010, RTVF 080, RTVF 110, RTVF 180, upper division standing or instructor consent.
Notes: See department office for specific information.
Repeatable for credit
Normal Grade Rules
3 units

RTVF 198. RTVF Internships, Portfolio, Career Prep
Supervised internships with approved radio, television, film or media organizations. Written evaluation submitted by sponsor and student after field work. Repeatable for credit up to 6 units.
Repeatable for credit
Normal Grade Rules
3 units

RTVF 199H. Honors Program
See TA 199H.
Repeatable for credit
Credit / No Credit
2-3 units

TA 011. Script Analysis
Detailed analysis of dramatic and screenplay scripts related to performance and production.
Normal Grade Rules
3 units

TA 013. Great Comedies for Theatre
This course is designed to introduce students to comedic dramatic literature and the performance techniques to stimulate the proper audience response.
Normal Grade Rules
GE: C2
3 units

TA 015. Voice and Diction
Voice production and articulation for the performer. Voice and speech improvement through guided exercises in posture/relaxation, respiration, phonation, resonance and articulation. Standard American diction taught through use of the International Phonetic Alphabet.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TA 017. Intermediate Acting
Analysis, internal methods and characterization for playing scenes. Lab exercises in disciplined stage movement.
Prerequisite: TA 5 and TA 11 (can take TA 11 concurrently with TA 17).
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TA 048. Voice & Movement for the Actor
Course focuses on using voice & movement to understand different stages of human life, in its biological and cultural configurations we bring to the stage. Voice and movement shapes, unites and differentiates our communications and expressions as performers.
Normal Grade Rules
GE: E
3 units

TA 051A. Scenery and Props for the Performing Arts
Introduction to facilities, materials and tools; safety guidelines for production shop and stage. Standard construction techniques and production vocabulary.
Note: Lec and Misc/Lab
Normal Grade Rules
1 unit

TA 051B. Costume for the Performing Arts
Costume production laboratory introducing costume construction techniques and materials, basic alteration techniques, costume craft techniques, costume shop organization, management, personnel and equipment.
Misc/Lab: Activity 2 hours.
Normal Grade Rules
1 unit

THEATRE ARTS

LOWER DIVISION

TA 005. Acting
Basic acting class for non-theatre arts majors. Exploration of inner and external resources for performance, analysis of text and character; guidelines for successful rehearsal and performance. Learning to be seen, heard, understood and believed.
Normal Grade Rules
GE: C3
3 units

TA 010. Theatre Appreciation
Study of the historical and cultural contexts of theatre around the world. Seeing and critical writing about plays. Hands-on experiences in the arts and crafts of live theatre.
Normal Grade Rules
GE: C3
3 units
TA 051C. Stage Management for the Performing Arts
Stage management practices including responsibility, communication, audition and rehearsal supervision, audience services coordination and working relationship with performance and production staff. Health and safety issues for performers and technical staff.
Misc/Lab: Activity 2 hours.
Normal Grade Rules
1 unit

TA 064. Make-up for Performing Arts
Makeup techniques for stage, television, film and print. Course covers makeup design, makeup materials and two dimensional application techniques. Laboratory work on actual stage productions, video and film shoots.
Misc/Lab: Lecture/demonstration 2 hours/lab 2 hours.
Normal Grade Rules
3 units

TA 091. Introduction to Tech Theatre Activity
Supervised activity with individual instruction in stage production topics for regularly-scheduled theatre production. Prerequisite: Instructor consent. Repeatable for up to 6 units when topic changes.
Repeatable for credit
Credit / No Credit
1-3 units

UPPER DIVISION

TA 100W. Writing Workshop: Theatre Arts
Development of skills appropriate to the theatre profession: criticism, research, publicity and promotion materials, and cover letter and resume composition.
Prerequisite: ENGL 1B (with a grade of C or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. Allowed Declared Majors: Radio/Television/Film, Theatre Arts, Dance, Animation/Illustration, Special Majors (BA)
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement.
Normal Grade Rules
GE Z
3 units

TA 103. Musical Theatre
The repertoire of musical theatre with intensive training in appropriate acting, singing and dance techniques.
Prerequisite: Upper division standing.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Repeatable for credit
Normal Grade Rules
3 units

TA 110. Advanced Acting
Preparation and presentation of roles to develop authority, characterization, range and clarity. Repeatable once with different instructor.
Prerequisite: TA 15, TA 5, TA 17 and instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Repeatable for credit
Normal Grade Rules
3 units

TA 112. Rehearsal and Performance
Analysis and production of a dramatic work that presents unusual problems of background, interpretation, style or meaning. Lectures, discussions, readings; rehearsal of play and participation in other aspects of the final production.
Prerequisite: TA 15, TA 5, TA 17 or instructor consent.
 Misc/Lab: Lab hours required.
Repeatable for credit
Normal Grade Rules
3 units

TA 113. Acting Techniques and Professional Career Preparation
External techniques for playing a role and techniques for beginning a professional career in acting. Exercises in quick study, taking stage, resume/picture/portfolio selection, audition techniques, selecting an agent, finding work.
Prerequisite: TA 15, TA 5, TA 17 and instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TA 114. Directing
Study and discussion of and practice in the fundamental principles of play direction; stage composition, movement, business, tempo; directing procedures; play selection and interpretation; problems in styles, casting and rehearsal and performance.
Prerequisite: TA 11, TA 5 or TA 17, TA 105.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

TA 116. Directing
Study and discussion of and practice in the fundamental principles of play direction; stage composition, movement, business, tempo; directing procedures; play selection and interpretation; problems in styles, casting and rehearsal and performance.
Prerequisite: TA 11, TA 5 or TA 17, TA 105.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

TA 117. Practice in Acting or Directing
Director analyzes, casts, reheases scenes. The actor performs in a variety of roles. Repeatable for credit when content changes.
Prerequisite: TA 17 or TA 16 and instructor consent.
Misc/Lab: Lecture 1 hour/activity 6 hours.
Repeatable for credit
Normal Grade Rules
1-3 units

TA 120. Theatre History
Examines the historical roots, many manifestations, and diversity of theatrical performances with particular attention to theatre’s role within and between cultures. When content changes may be repeated.
Prerequisite: TA 011 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

TA 121. Topics in Performance History
Examines relationships between performance and unique historical/cultural conditions which motivate change or continuity in a specific area of performing arts. Not a historical survey, but a problem-centered course which focuses on developing the power to think historically about performance.
Prerequisite: TA 011 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

TA 127. Contemporary Theatre
European and American playwrights from 1950 to the present and important theatre practices for this period.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE V
3 units

TA 128. Scriptwriting
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

TA 129. Advanced Scriptwriting
Prerequisite: TA 128 or RTVF 1 (or equivalent) and instructor consent. Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

TA 130. Broadcast Performance and Spoken Word
Performance class focuses on vocal techniques for broadcast, voice over and public performance of Spoken Word and Oral Interpretation.
Prerequisite: Upper division credit
Normal Grade Rules
3 units
TA 131. Storytelling
Course focuses on Storytelling and Creative Dramatics to teach Multiple Subject Credential Students theatre techniques.
Prerequisite: Upper division standing.
   Normal Grade Rules
   3 units

TA 144. Shakespeare I
See ENGL 144.
   Normal Grade Rules
   3 units

TA 145. Shakespeare and Performance
See ENGL 145.
   Normal Grade Rules
   3 units

TA 148. The Art of Movement
Explores the expressive, restorative and communicative nature of movement as applied to human performance, the arts, therapy, education and management.
Prerequisite: TA 015 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
   Normal Grade Rules
   3 units

TA 151. Lighting for Performing Arts
Fundamentals of fixtures, distribution, control, color/diffusion media and systems for lighting stages, video studios, sound stages and locations. Portable and permanent installations examined. Emphasis on state of the art technology. Laboratory work on actual stage presentations, video productions and film shoots.
Prerequisite: Upper division standing.
   Normal Grade Rules
   3 units

TA 152A. English Drama to 1642
See ENGL 152A.
   Normal Grade Rules
   3 units

TA 152B. English Drama from 1660
See ENGL 152B.
   Normal Grade Rules
   3 units

TA 153. Costume for Performing Arts
Intermediate construction of stage and screen costumes. Introduction to the design process. Emphasis on history of costume as it pertains to costume design and construction. Laboratory work on actual stage, video and film shoots.
Prerequisite: TA 051B or instructor consent.
Misc/Lab: Lecture 2 hours/Activity 2 hours.
   Repeateable for credit
   Normal Grade Rules
   3 units

TA 154. Scenery for Performing Arts
Advanced construction techniques and stage machinery design for stage and studio.
Prerequisite: TA 051A.
   Normal Grade Rules
   3 units

TA 161. Theatre Design Topics
Discussion of theatre design including scenic, property, costume, makeup, lighting, sound and facility design. Subject matter varies depending on specialty of faculty.
Prerequisite: TA 105 and upper division standing.
   Misc/Lab: Lecture 2 hours/activity 2 hours.
   Repeateable for credit
   Normal Grade Rules
   3 units

TA 167. Theatre in Education
Materials, problems and techniques of producing formal drama with and for children at the school, community and professional levels.
Prerequisite: Upper division standing.
   Repeateable for credit
   Normal Grade Rules
   3 units

TA 168. Arts Management
Planning, communication, organizational structure and supervision as applied to performing arts management, audience development, programming, fiscal control, personnel, publicity, promotion, and public relations.
Prerequisite: Upper division standing.
Notes: Offered Summer only.
   Normal Grade Rules
   3 units

TA 170A. Acting and Directing for the Camera
Acting techniques, voice and microphone use, movement for camera, gesture and the frame, role analysis for non-sequential performance, concentration, relaxation. Preparation, performance and critique of taped scenes.
Prerequisite: RTVF 130 or TA 017.
Misc/Lab: Lecture 2 hours/activity 2 hours.
   Repeateable for credit
   Normal Grade Rules
   3 units

TA 170B. Advanced Acting and Directing for the Camera
Using the grammar of film and narrative storytelling to direct, produce and write contemporary film and television scenes. Use of single- and multi-camera techniques.
Prerequisite: TA 170A or RTVF 132.
Misc/Lab: Lecture 2 hours/activity 2 hours.
   Repeateable for credit
   Normal Grade Rules
   3 units

TA 172. The Arts in U.S. Society
See CA 172.
   Normal Grade Rules
   CE: S
   3 units

TA 173. Thinking About Contemporary World Arts
See CA 173.
   Normal Grade Rules
   CE: V
   3 units

TA 180. Individual Studies
Directed study in specified fields not covered by offered courses.
Prerequisite: Department chair consent.
   Repeatable for credit
   Credit / No Credit
   1-3 units

TA 191. Activity Projects in Theatre Production
Supervised activity with individual instruction in staging, lighting, sound, properties, costuming and makeup for regularly-scheduled production of plays.
Prerequisite: Instructor consent.
   Repeatable for credit
   Normal Grade Rules
   1-3 units

TA 198. Internship
Supervised internships with approved radio, television or theatre organizations. Written evaluation submitted by sponsor and student after field work. Repeatable for credit up to 6 units.
Prerequisite: Junior or senior standing and instructor consent.
   Repeatable for credit
   Normal Grade Rules
   1-3 units

TA 199H. Honors Program
Demanding project demonstrating student’s ability to do independent action and research. Written thesis or, in the case of the creative project, analysis and evaluation of the aesthetic problem; thesis to be defended orally by the student before a theatre arts staff committee. May be repeated once for credit.
Prerequisite: Senior standing/3.0 GPA; by invitation only.
   Repeatable for credit
   Credit / No Credit
   2-3 units
### GRADUATE

**TA 200. Graduate Research in Theatre Arts**  
Graduate study in theatre arts, bibliography, methods of investigation and reporting techniques applicable. Reading and research.  
Prerequisite: Acceptance to MA program or instructor consent.  
Normal Grade Rules  
3 units

**TA 201. Theoretical Perspectives in the Performing Arts**  
Analysis and exploration of significant theories defining the values ascribed to the performing arts in different media. Emphasis on conditions for establishing credibility of a theory and on intercultural, interdisciplinary applicability of theories. Course may be repeatable when content changes.  
Repeatable for credit  
Normal Grade Rules  
3 units

**TA 220. Seminar in Performance Cultures**  
Special investigation into how performance in different media constructs cultural identity and difference, including issues related to gender representation, cultural appropriation and audience market formation. Course may be repeatable when content changes.  
Prerequisite: Instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

**TA 221. Seminar in History of the Performing Arts**  
Focus on a problem related to conditions of change in different performance media in different cultures and historical eras. Course may be repeatable when content changes.  
Prerequisite: Instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

**TA 225. Seminar in Shakespeare**  
See ENGL 225.  
Repeatable for credit  
Normal Grade Rules  
3 units

**TA 226. Seminar in Tragedy**  
See ENGL 226.  
Repeatable for credit  
Normal Grade Rules  
3 units

**TA 231R. Performing Presentational Aesthetics**  
See COMM 231R.  
Normal Grade Rules  
4 units

**TA 241. Seminar in Dance of the Twentieth Century**  
Concepts, styles and forms of the dance in this century. Study and investigation of significant trends, theories and artistic philosophies of the major dance movements: ballet, modern dance, non-narrative, “avant-garde” and “non-dance.”  
Normal Grade Rules  
3 units

**TA 242. Seminar in Performance Audiences**  
Specific attention is given to audiences. Varying methodologies are applied to audience reception and meaning making in different performance settings, especially film, television, radio, theatre, and multimedia venues. Course may be repeatable when content changes.  
Repeatable for credit  
Normal Grade Rules  
3 units

**TA 260. Graduate Problems in Theatre Arts**  
Problems in selected television, radio, film and theatre topics.  
Prerequisite: Graduate standing in theatre arts and instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

**TA 270. Seminar in Radio-Television or Film**  
Investigation of the literature of radio and television or film including the history and development, government and self-regulation in broadcasting or film and the use of media for commercial, artistic and educational purposes.  
Prerequisite: Instructor consent.  
Normal Grade Rules  
3 units

**TA 275. Graduate Scriptwriting Seminar**  
Advanced study and practice of narrative script writing.  
Prerequisite: Graduate standing or completion of TA 129 and instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

**TA 298. Special Study**  
Supervised research or creative project in a specific field of theatre. Written report.  
Prerequisite: Department chair consent.  
Repeatable for credit  
Credit / No Credit  
1-3 units

**TA 299. Master’s Thesis**  
Supervised thesis in theatre, television, radio, film or dance.  
Prerequisite: Admission to candidacy for the master’s degree and approval of the graduate committee. Professional nomination is required.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-4 units
Undergraduate Studies Courses

EARLY START ENGLISH

LOWER DIVISION

ESE 002. Introduction to Analytical Writing
Students will submit an analytical essay on an assigned topic, master a rubric for evaluating analytical writing, peer review essays written by classmates, and then reevaluate their own writing. All deadlines must be strictly adhered to. Online course.
Prerequisite: English Placement Test (EPT) score of 146 or below
Early Start Program
1 unit

EARLY START MATH

LOWER DIVISION

ESM 003. Comprehensive Algebra Review
This course reviews topics from elementary and intermediate algebra in a hybrid classroom/online setting. Full participation satisfies the Early Start requirement in mathematics. Chapter tests and an optional ELM retest may be used to improve freshman mathematics placement.
Prerequisite: Entry Level Mathematics test (ELM) score of 48 or below
Early Start Program
3 units

ESM 004. Topics in Elementary Algebra
This course reviews topics from elementary algebra using an online tool called ALEKS. To fulfill the Early Start requirement, students must spend at least 15 hours using ALEKS. This course may not be used to improve freshman mathematics placement.
Prerequisite: Entry Level Mathematics test (ELM) score of 48 or below
Early Start Program
1 unit

UNIVERSITY STUDIES

LOWER DIVISION

UNVS 010. First Year Seminar
An introduction for first year students to the demands and opportunities of the college experience. Students will learn the social, academic, and cultural resources within the university. Some topics explored will be study skills, diversity, adjusting to college, and community involvement.
Normal Grade Rules
3 units

UNVS 015A. Statway A: Statistics-Concepts & Methods
Concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data, graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis test for means and proportions, and chi-square tests. Completion with a 'CR' satisfies the GE Area B4 Mathematical Concepts requirement.
Prerequisite: A score below '50' on the ELM Exam;
Note: No degree credit
5 units

UNVS 015B. Statway B: Statistics-Concepts & Methods
Concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data, graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis tests for means and proportions, and chi-square tests. Completion with a CR (C or better) satisfies the GE Area B4 Mathematical Concepts requirement.
Prerequisite: UNVS 15A with a grade of 'CR';
Corequisites: UNVS 15C.
Note: No degree credit.
No Degree Credit
2 units

UNVS 015C. Statway C: Statistics-Concepts & Methods
Concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data, graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis tests for means and proportions, and chi-square tests. Completion with a CR (C or better) satisfies the GE Area B4 Mathematical Concepts requirement.
Prerequisite: UNVS 15A with a grade of 'CR';
Corequisites: UNVS 15B.
Normal Grade Rules
GE: B4
3 units

UNVS 016A. Statway A: Statistics-Concepts & Methods
Concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data, graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis tests for means and proportions, and chi-square tests. Completion with a CR (C or better) satisfies the GE Area B4 Mathematical Concepts requirement.
Prerequisite: A score below '50' on the ELM Exam;
Note: No degree credit
5 units

UNVS 016C. Statway C: Statistics-Concepts & Methods
Concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data, graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis tests for means and proportions, and chi-square tests. Completion with a CR (C or better) satisfies the GE Area B4 Mathematical Concepts requirement.
Prerequisite: UNVS 16A with a grade of CR
Normal Grade Rules
GE: B4
3 units

UNVS 057. Community Involvement and Personal Growth
See SOCI 057
Normal Grade Rules
GE: E
3 units

UNVS 090. Leadership in Residential Life
Class is designed for students selected by University Housing Services to serve as leaders in the residence halls. Students will receive an introduction to residential education, student development theory, conflict mediation, community development, and leadership as well as training in university policies and procedures. Classroom learning will be integrated with on the job experience.
Prerequisite: Current application or employment with University Housing Services.
ABC/No Credit
3 units

UNVS 095. Academic Success
Course enhances student success in college through basic and leadership skills development, pertinent academic information and strategies or achieving personal and academic goals. Students will lead themselves through the educational process rather than be led by institutional bureaucracy.
Normal Grade Rules
1-3 units

UNVS 095A. Service Learning for Academic Leaders
Course enhances student success in college through basic and leadership skills development, pertinent academic information, and strategies for achieving personal and academic goals.
Normal Grade Rules
2 units

UNVS 095V. Warriors at Home: Success in College and Life
This course will assist veteran/military students in making positive transitions from military to civilian life or from deployment to post-deployment life. It provides essential tools to navigate the university, succeed in academics and interpersonal relationships, and develop a career plan.
Normal Grade Rules
3 units
UPPER DIVISION

UNVS 109. Climate Solutions Initiative
Interdisciplinary project work focused on developing solutions to issues related to the global climate crisis. Application of economic, technological, social, political, and cultural components and methods to solve real world environmental problems.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test, and upper division standing.
Normal Grade Rules
GE: R+V
6 units

UNVS 120. Peer Mentor
Seminar course intended to provide the knowledge and skills necessary to be an effective Peer Mentor who will work in the new student seminars and in the Peer Mentor Center at San Jose State University.
Prerequisite: Must apply and be accepted.
Normal Grade Rules
3 units

UNVS 125M. McNair Research Colloquium
Course is designed to assist students in the SJSU McNair Scholars Program to prepare for graduate study at the doctoral level. Various faculty will lecture on topics including research methodology, research writing, protocol for presenting research results conferences, graduate school experiences and academic expectations.
Prerequisite: Students must be accepted in the SJSU McNair Scholars Program.
Repeatable for credit
Credit / No Credit
3 units

UNVS 190. University Internship
Supervised placement in student support services for advanced students.
Repeatable for credit
Credit / No Credit
1-4 units

UNVS 195H. Interdisciplinary Research Practicum
This practicum will integrate the methods of at least two disciplines to conduct basic and applied research. Undergraduate students will have hands-on experiences working with faculty from different disciplinary traditions in real research projects.
Prerequisites: Upper Division Standing
Credit / No Credit
3 units

UNVS 199. Orientation Leadership Studies
This class is designed for students selected by Student Life Center to serve as SJSU Orientation Leaders. Students will learn theoretical/practical aspects of leadership, and receive training in university policies/procedures. Curriculum will apply to students' leadership experiences.
Prerequisite: Apply and be selected (fall semester), 2.0 G.P.A., upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

GRADUATE

UNVS 290. Thesis/Project Supervision
Continued work on thesis or project writing.
Prerequisites: Outstanding RP grade in a preceding semester in a project or thesis class.
Repeatable for credit
No Degree Credit
1 unit

UNVS 295H. Interdisciplinary Research Graduate Practicum
This practicum will integrate the methods of at least two disciplines to conduct basic and applied research. Graduate students will have hands-on experiences working with faculty from different disciplinary traditions in real research projects.
Prerequisites: Graduate standing
Mandatory CR/NC/RP
3 units
Urban and Regional Planning Department Courses

**URBAN PLANNING**

**LOWER DIVISION**

**URBP 092. Int’l Program Studies**
Repeatable for credit
Mixed Grading
1-6 units

**URBP 101. The City**
History and organization of the city, emphasizing contemporary issues and strategies for influencing urban policy.
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Normal Grade Rules
GE: S
3 units

**URBP 102. Introductory Community Planning and Development Studio**
This course introduces students to the tools and techniques of working directly with diverse local communities to develop priorities and recommendations for improving neighborhood quality of life. Students learn about collaborative planning techniques via lectures, comparative studies, and group discussion.
Prerequisite: Upper Division Standing
Normal Grade Rules
4 units

**URBP 103. Local Government and Politics**
See POLS 103.
Normal Grade Rules
3 units

**URBP 107. Introduction to Real Estate Development Business and Planning**
This course will introduce students to the business of real estate development and how the field of urban planning intersects with the development process. Topics addressed include development approval feasibility, land use regulation reform, and development during business cycles.
Prerequisite: Upper Division Standing
Normal Grade Rules
3 units

**URBP 120. Intro to Housing Economics and Policy**
Historic and policy aspects of housing, focusing on housing characteristics and public sector intervention. Topics may vary. Course may be repeated for credit when topic changes.
Prerequisite: Upper division standing or instructor consent.
Notes: Offered only occasionally.
Normal Grade Rules
4 units

**URBP 123. Intro to Historic Preservation Planning**
Preservation and its relationship to housing and neighborhood issues. Includes landmark law, neighborhood change, restoration, adaptive reuse, public and private programs, fiscal incentives and housing market impacts.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

**URBP 125. Urban Anthropology**
See ANTH 125.
Normal Grade Rules
3 units

**URBP 132. Creating Built Worlds**
See ANTH 132.
Normal Grade Rules
3 units

**URBP 133. Introduction to Social Issues in Planning**
Contemporary social issues related to urban and regional planning. Assessment of community social needs and resident planning. Focus on ethnic areas such as African, Asian and Mexican American neighborhoods.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

**URBP 136. Intro to Land Use and Urban Planning**
Land use and facilities planning practices in the context of American cities, emphasizing interrelationships between various land uses and public facilities and service requirements. Study of the role of public law in addressing urban growth and environmental change issues.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

**URBP 142. Introduction to Environmental Planning**
Environmental sustainability and its application to local planning. Review of regulatory tools and legislation that underlie most environmental planning and current environmental planning topics. Course may be repeated for credit when topic changes.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

**URBP 143. Intro Private Development and Planning**
Introduction to the real estate development process from preliminary product analysis through planning, construction, and marketing.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

**URBP 145. Urban Policy and Its Impact on Inner City Residents**
See AFAM 145.
Normal Grade Rules
4 units

**URBP 148. Computers in Urban Design**
Examination of computer-aided graphics and three-dimensional visualization processes applied to urban design and planning.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

**URBP 150. Introduction to Municipal Finance**
An introduction to the theory and practice of municipal finance. Topics include public goals and externalities, the function of the budget, sources of revenues, finance tools, expenditure types, the planning programming-budgetary system (PPBS), and methods of project evaluation.
Prerequisite: Upper Division Standing
Normal Grade Rules
4 units

**URBP 151. Introduction to Urban Design**
Principles, goals and methods of the urban design process. Urban design as the comprehensive treatment of the human-made environment.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units
URBP 152. Introduction to Urban Design Studio
Introduction to the analysis of alternative urban design policies to direct urban form development. Course may be repeated for credit when topic changes.
Prerequisite: URBP 151 or instructor consent.
Misc/lab. Activity 6 hours.
Normal Grade Rules
4 units

URBP 156. Introduction to Local Transportation Planning
Examination of transportation planning issues addressed at the neighborhood and municipal level such as bicycle and pedestrian planning, traffic calming, and parking policy.
Prerequisites: Upper division standing or instructor consent.
Normal Grade Rules
4 units

URBP 160. Topics in Environmental Planning
In-depth examination of selected topics specifically related to environmental planning. Consult department for current offerings. Course may be repeated for credit when topic changes.
Prerequisites: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units

URBP 163. Twentieth Century Urban Design
See ARTH 163.
Normal Grade Rules
3 units

URBP 169. Introduction to Social Media in Planning
An introduction to social media tools and their use in urban planning, with a particular emphasis on public participation.
Prerequisite: Upper division standing
Normal Grade Rules
1-4 units

URBP 175. Urban Studies Topics
In depth examination of selected topics. Consult schedule of classes for current offerings. Course may be repeatable for credit with different topic.
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
1-4 units

URBP 178. Intro to Regional Transport Planning
Principles and concepts relevant to transportation planning and policy at the regional level, such as historical and current regional transportation planning processes, the relationship between regional travel demand and transportation infrastructure, and travel demand modeling practices.
Prerequisite: Upper division standing
Normal Grade Rules
4 units

URBP 179A. Fundamentals of GIS for Urban Planning
Exploration of Geographic Information Systems (GIS) area analysis techniques for spatial information management in local government planning support systems, needs analysis, envisioning neighborhoods utilizing multiple maps, charts, photos and the Internet. Course may be repeated for credit when topic changes.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

URBP 179B. Advanced GIS for Urban Planning
Continued study of geographic information systems (GIS) can be applied to urban and regional planning topics.
Prerequisites: URBP 179A or instructor consent.
Normal Grade Rules
4 units

URBP 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Instructor consent and department chair approval.
Repeatable for credit
Credit / No Credit
1-4 units

URBP 184. Directed Reading
Directed reading on a specific urban studies topic.
Prerequisite: Instructor consent and department chair approval.
Repeatable for credit
Credit / No Credit
1-4 units

URBP 185. Environmental Impact Analysis
See ENVS 185.
Normal Grade Rules
4 units

URBP 190. Advanced Environmental Impact Assessment
See ENVS 190.
Normal Grade Rules
4 units
URBP 207. Real Estate Development Business and Planning
This course will introduce students to the California planning system, real estate development entitlement process, and contemporary issues in urban and regional planning.
Normal Grade Rules
3 units

URBP 208. Urban Real Estate Development Studio
This is a capstone studio course designed to immerse students in the real world of urban property development. Students will explore this world by taking part in a major mock-development project of an actual site in the San Francisco Bay Area.
Prerequisites: URBP 205, URBP 206, and URBP 207, or instructor consent
Normal Grade Rules
3 units

URBP 211. Regional Analysis and Planning
Students learn the major concepts and techniques of regional analysis and apply these to assess and solve current planning problems.
Prerequisite: Instructor consent.
Normal Grade Rules
4 units

URBP 214. Introduction to Public Management
See PADM 214.
Normal Grade Rules
3 units

URBP 220. Economic Analysis for Urban Planning
Application of economic theory to urban planning including utility theory, area supply and demand functions and spatial monopoly, rent theory with emphasis on urban land as a factor of production; agglomeration and deagglomeration effects and economics of scale, community welfare and cost-benefit analysis, economic base analysis.
Normal Grade Rules
3 units

URBP 223. Housing Economics and Policy
Overview of the housing situation in the United States; examination of the theory of housing markets and framework for analyzing housing policies; in-depth study of the problem of affordable housing and critical examination of the steps that the public, private, and non-profit sectors have taken to alleviate the problem.
Normal Grade Rules
4 units

URBP 225. Land Use Planning and Law
Study of contemporary growth and land use management techniques used by local, state and federal governments. Examination of the role of public law in addressing urban growth and environmental change issues, and the legal aspects of preparing and administering planning controls and incentives.
Normal Grade Rules
4 units

URBP 226. Regional Transportation Planning
Overview of the evolution of key transportation institutions and policies at the metropolitan, state, and federal levels. Assessment of the current challenges facing regional transportation systems and evaluation of different planning and policy approaches proposed to improve the performance of regional transportation systems.
Prerequisite: Instructor consent
Normal Grade Rules
4 units

URBP 228. Urban Community Development
The role, objectives and policies of the urban community development process; the social, economic, political and physical implications underlying community development programs; and relationships of these programs to comprehensive urban planning.
Normal Grade Rules
4 units

URBP 231. Urban Design in Planning
Urban design as part of the planning process; contemporary and historic urban design thought and ways of improving design quality in the urban environment.
Normal Grade Rules
4 units

URBP 232. Urban Design Studio
Through fieldwork and laboratory assignments, the student applies urban design theories, methods and principles to a current urban development issue.
Prerequisite: URBP 231 or instructor consent.
Normal Grade Rules
4 units

URBP 233. Social Issues in Planning
Multi-disciplinary study of the principles that guide the growth of a community so all members have equal access to the benefits of living in an urban environment. The course examines the coordination of citizen groups and government bodies to secure needed social services and facilities, champion initiatives that improve quality of life in our community, and engage issues important to underrepresented groups.
Normal Grade Rules
4 units

URBP 234. Field Study Seminar
Discussion and analysis of experience in the planning field under internship programs. May not be counted towards the Master of Urban Planning program of study. Repeatable for credit with approval of the Graduate Student Advisor.
Prerequisites: Instructor consent and enrollment in the Master of Urban Planning degree program.
Repeatable for credit
Normal Grade Rules
1 unit

URBP 236. Urban and Regional Planning Policy Analysis: Tools and Methods
Analytical approaches to explain and evaluate the public policy making process with particular reference to urban and regional planning and development. Apply quantitative methods such as extrapolation techniques, population and economic projection models, and spatial interaction models for policy analysis.
Prerequisites: Passage of the Writing Skills Test.
Normal Grade Rules
4 units

URBP 240. Environmental Planning
Examination of the fundamental concepts and issues related to urban environment that planners face. Focus on land use and open space planning, planning and use of urban resources, interactions of urban residents and the physical environment, and the role of government in formulating appropriate policies and strategies.
Normal Grade Rules
4 units

URBP 241. Planning Sustainable Cities
An overview of urban sustainability covering topics such as the origins of urban sustainability, tools for sustainability planning, global dimensions of sustainability (including different approaches to planning across world regions), and visions for creating sustainable futures.
Repeatable for credit
Normal Grade Rules
2 units

URBP 242. Historic Preservation Planning
Survey of the growth of historic preservation in the United States. Identification of preservation techniques, and federal, state and private preservation agencies and legislation; value and objectives of preservation. Particular emphasis is given to the use of historic preservation planning as a strategy for community revitalization. Components of a preservation plan to be reviewed include history, urban design, architecture, economics, implementation, and preservation law and public policy.
Normal Grade Rules
4 units

URBP 248. Advanced Computers in Urban Design
Examination of computer-aided graphics and three-dimensional visualization processes applied to urban design and planning.
Normal Grade Rules
4 units
URBP 250. Urban Planning Public Finance
An investigation of both the theory and practice of local public finance with emphasis on applications relevant to urban and regional planning. Topics include: public goals and externalities; the function of the budget; sources of revenue and expenditure; the planning programming-budgetary system (PPBS); methods of project evaluation; and traditional as well as innovative methods of public finance including property tax, user fee, impact fee, tax increment financing and use of special districts.
Normal Grade Rules
4 units

URBP 255. Urban Growth Management
Extensive study of causes, consequences and costs of sprawl; study of growth management and smart growth programs at the state, regional and local level, including the rationale, techniques, and economic, political, and organizational implications. 
Normal Grade Rules
4 units

URBP 256. Transportation Planning: Local Issues
Examination of transportation planning issues addressed at the neighborhood and municipal level. Not to substitute for transportation engineering. Course may be repeated for credit when topic changes.
Repeatable for credit
Normal Grade Rules
4 units

URBP 260. Environmental Planning Topics
In-depth examination of selected topics specifically related to environmental planning. Consult department for current offerings. Course may be repeated for credit when topic changes.
Repeatable for credit
Normal Grade Rules
4 units

URBP 275. Urban Planning Topics
In-depth examination of selected topics introduced in the core seminars for the Master of Urban Planning degree. Consult schedule of classes for current offerings. Course may be repeated for credit when topic changes.
Repeatable for credit
Normal Grade Rules
1-4 units

URBP 275G. Geographic Information Systems Overview: Urban Planning Applications
An overview of Geographic Information Systems with a focus on applications to urban planning, including demographic data analysis, land use mapping, cartographic techniques and methods for determining the most appropriate display of quantitative data for a variety of intended audiences.
Normal Grade Rules
1 unit

URBP 276. Social Media in Planning
An overview of social media tools and their use in urban planning, with a particular emphasis on public participation.
Normal Grade Rules
1-4 units

URBP 278. Introduction to GIS for Urban Planning
Examination of geographic information systems (GIS) applications to urban and regional planning topics. Course may be repeated for credit when topic changes.
Repeatable for credit
Normal Grade Rules
4 units

URBP 279. Advanced GIS for Urban Planning
Further examination of advanced geographic information systems (GIS) applications to urban and regional planning topics
Prerequisite: URBP 278 or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units

URBP 280. Planning Research Topics
In-depth examination of selected planning research topics introduced in core seminars for the Master of Urban Planning degree, such as the social and environmental impacts of planning policies.
Repeatable for credit
Normal Grade Rules
1-4 units

URBP 297P. Planning Report Preliminary Proposal
Advanced research and proposal writing. Students do independent research, analysis, and writing about a complex planning problem.
Prerequisite: Passage of 298A and Graduate Student Advisor approval.
Credit / No Credit
3 units

URBP 298A. Special Study: Planning Report Development
Advanced research and report writing. Students conduct background research and develop a preliminary research proposal that demonstrates their capacity to do independent research, analysis, and writing about a complex planning problem.
Prerequisites: Passage of URBP 200, Writing Skills Test (WST), and Graduate Student Advisor approval.
Credit / No Credit
3 units

URBP 298B. Special Study: Planning Report Completion
Advanced individual research and report writing. Students work with a faculty advisor to complete a professional planning report that demonstrates their capacity to do independent research, analysis, and writing about a complex planning problem.
Prerequisite: Passage of 298A and Graduate Student Advisor approval.
Credit / No Credit
3 units
### WOMEN, GENDER, SEXUALITY STUDIES COURSES

#### LOWER DIVISION

**WOMS 005Q. Gender, Race & Sexuality in Media**
This course uses a cultural studies approach to explore the production and consumption of contemporary media in our everyday lives with a focus on race, class, gender, sexuality, and nation. Prerequisite: First term freshmen only. Note: All courses with a ‘Q’ suffix are designated as First Year Experience courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Description</th>
<th>Prerequisite</th>

WOMS 160. Gender, Race, and Class
Interdisciplinary analysis of race and class diversity among women and social, political and economic hierarchies of race, class and gender in the U.S. Topics may include sexuality, rape and racism, immigrant experiences, welfare system.
Prerequisite: WOMS 010, WOMS 020, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 169. Sexualities and the Body
This course explores the social construction of sexuality and the body from a feminist perspective. It investigates various aspects of sexuality and gendered bodies including identity, community, and social movements based on intersections of race, gender, sexuality, culture, and nation.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 175. Sociology of Masculinities and Femininities
See SOCI 175.
Normal Grade Rules
3 units

WOMS 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Minor or emphasis in women’s studies.
Repeatable for credit
Credit / No Credit
1-4 units

WOMS 182. Women in Literature
See ENGL 182.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 187. Feminist Perspectives on Gender and Education in the U.S.
The role of gender in the educational system in the United States from both a historical and contemporary context. We will focus on the significance of schools as the primary socializing institution for boys and girls.
Prerequisite: Junior standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 189. Islamic Perspectives on Gender
Contemporary feminist theories analyze premises of gender roles in Islamic cultures and variety of sexual expressions. This class will sensitize students to the diversity of Islamic cultures and communities, in addition to geographical, political, and social locations, like ethnicity and class affect the gender debate in Islamic perspectives.
Prerequisite: Upper division standing.
Notes: Required for topical major and minor in Women’s Studies.
Normal Grade Rules
3 units

WOMS 190. Internship
On-site experience with community or campus organization or other agency involved with women’s issues. Individual and group advising augments the experiential learning. Repeatable for credit with program coordinator approval.
Prerequisite: WOMS 101 or instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

WOMS 193. Women and Minorities in the Social Sciences
See SOCS 193.
Normal Grade Rules
3 units

GRADUATE

WOMS 201A. Seminar in Feminism
Research, readings and discussion of subjects from the field of feminist thought. Particular attention will be paid to theories of the development of woman’s present position and schema for social change. May be repeated once for credit with instructor consent.
Prerequisite: Classified standing, an undergraduate course concerned with feminism and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 201B. Seminar in Feminism
Research, readings and discussion of subjects from the field of feminist thought. Particular attention will be paid to theories of the development of woman’s present position and schema for social change. May be repeated once for credit with instructor consent.
Prerequisite: Classified standing, an undergraduate course concerned with feminism and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 212. Seminar on Women in the Community
Integration and application of theoretical and empirical knowledge of feminism to a realistic field experience. Students will be placed with women’s social, economic and political organizations.
Normal Grade Rules
3 units

WOMS 220. Seminar in Women’s Studies Topics
Advanced study of selected issues in women’s studies. Topics will vary and will be announced in the schedule of classes.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

By arrangement.
Prerequisite: 6 units of upper division Greek (or equivalent) and instructor consent.
Repeatable for credit
Credit/No Credit
1-3 units

HEBREW

LOWER DIVISION

HEBR 010A. Elementary Hebrew
Basic structure of the language in the context of culture.
Normal Grade Rules
3 units

HEBR 010B. Elementary Hebrew
Basic structure of the language in the context of culture.
Prerequisite: HEBR 010A (or equivalent).
Normal Grade Rules
3 units

HEBR 010X. Elementary Hebrew- Individual Learning
Basic structure of the language in the context of culture.
Repeatable for credit
Normal Grade Rules
1-3 units

HEBR 015A. Intermediate Hebrew
Developing speaking skills.
Prerequisite: HEBR 010A and HEBR 010B (or equivalent).
Normal Grade Rules
3 units

HEBR 015B. Intermediate Hebrew
Developing speaking skills.
Prerequisite: HEBR 010A and HEBR 010B (or equivalent).
Normal Grade Rules
3 units

HEBR 015X. Intermediate Hebrew- Individual Learning
Developing speaking skills.
Repeatable for credit
Normal Grade Rules
1-3 units

UPPER DIVISION

HEBR 102A. Advanced Hebrew
Readings, grammar, discussion and composition.
Prerequisite: 12 units of college Hebrew (or equivalent).
Normal Grade Rules
3 units

HEBR 102B. Advanced Hebrew
Readings, grammar, discussion and composition.
Prerequisite: 12 units of college Hebrew (or equivalent).
Normal Grade Rules
3 units

HEBR 102X. Advanced Hebrew- Individual Learning
Readings, grammar, discussion and composition.
Repeatable for credit
Normal Grade Rules
1-3 units
ITALIAN

LOWER DIVISION

ITAL 001A. Elementary Italian
Basic skills and structure of the language in the context of culture.
Normal Grade Rules
5 units

ITAL 001B. Elementary Italian
Basic skills and structure of the language in the context of culture.
Prerequisite: ITAL 001A (or equivalent).
Normal Grade Rules
5 units

ITAL 001X. Elementary Italian - Individualized Learning
Alternate to Ital 1A and Ital 1B. Student sets own rate of progress. May be repeated for a 5 unit maximum.
Repeatable for credit
Normal Grade Rules
1-5 units

ITAL 002. Basic Reading and Writing
Sentence structure and idiomatic usage in compositions, translations and simple essays.
Prerequisite: 2 semesters of college Italian (or equivalent).
Normal Grade Rules
1-5 units
