Curricula
- BS, Aerospace Engineering
- MS, Aerospace Engineering

Introduction
Aerospace engineers research, design, and develop high-speed transportation vehicles, such as airplanes, spacecraft, space stations, planetary vehicles, and space probes. Approximately half of all aerospace engineers work in the aerospace industry (e.g. Boeing, Lockheed-Martin, Cessna, etc.), 15% work for government agencies (e.g. NASA, Department of Defense, etc.), and the rest work in engineering services, research, testing, and navigation functions. Aerospace engineers also work in industries not associated with aerospace, such as automotive, where they work to improve the aerodynamics of automobiles. Students in our program have opportunities to participate in international hands-on design-build-fly competitions or work with engineers from local industry to design-build-test and launch microsatellites into space. The BS Aerospace Engineering program is accredited by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org).
BS - Aerospace Engineering

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions
This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements
Students in this major must complete all courses in Required in the Major (All courses in Core, Concentration/Specialization) with a “C- or better” to graduate. The following course in Preparation for the Major must be completed with a “C or better”: ENGL 001B

### University Graduation Requirements

### Technical Electives

A technical elective may be chosen from a variety of courses with advisor approval.

### Total Units Required

120
MS - Aerospace Engineering

The MSAE Program is designed to prepare students for professional careers in industry or advanced study in Ph.D. programs. Students develop skills in research, design, development, testing, and systems integration in air and space transportation systems. In addition to advanced aerospace engineering courses, electives are available in science, business, and other engineering fields.

Class schedules are designed for the convenience of employed engineers who wish to pursue graduate work on a part-time basis.

The MSAE Program welcomes students with undergraduate degrees in other engineering or science disciplines.

For more information visit ae.sjsu.edu

Educational Objectives for Graduate Program

To provide MSAE graduates with:

1. A strong foundation beyond the undergraduate level in their chosen focus area as well as in mathematics, basic science, and engineering fundamentals, so they can solve current aerospace engineering problems.

2. Contemporary professional and lifelong learning skills to successfully compete for technical engineering positions in the local, national, and global engineering market, advance in their current position or pursue doctoral studies.

3. Expertise necessary to work in the analysis, design, development, and testing of aerospace engineering systems with possible specialization in areas such as aircraft design or space transportation & exploration.

4. The ability to perform research and work independently to solve open-ended aerospace engineering problems.

General Admissions Requirements

Candidates must meet all the university admission requirements. Students can be admitted in either classified or conditionally classified standing.

To be admitted to classified standing, a student must possess a BSAE degree or related (e.g. aeronautical engineering, astronautical engineering, space engineering, etc.) from an accredited institution with a grade point average of 2.6 or better in the last 60 units.

Students may be admitted with conditionally classified standing if they have a BS degree in any engineering discipline or science from an accredited institution. Students with conditionally classified standing will take a series of BSAE core courses based on their evaluation by the AE Graduate Coordinator.

Students from non-English speaking countries must achieve a minimum TOEFL score of 550. This requirement is waived if the language of instruction in the home country is documented to be in English.

Candidacy for MS - Aerospace Engineering

Prior to registering for the first time, (or upon reentering), a student should consult with the AE Coordinator, to develop a schedule of courses. Students admitted as conditional must satisfy the requirements listed in their letter of acceptance. Students who have completed matriculation and received classified standing in the master’s degree curriculum must next be admitted to candidacy for the degree. A student may be admitted to candidacy after completing a minimum of nine units of graded work as a graduate student in 100- or 200- level courses, which are acceptable to the AE Department.

If a student’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, it will be necessary to take the preparatory courses to meet these requirements. Such courses will not count as part of the master’s degree program requirements.

Students must meet the university requirements for candidacy, which includes successful completion of the Graduation Writing Assessment Requirement (GWAR). The University requires that all graduate students complete the GWAR as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Requirements for MS - Aerospace Engineering

The AE Department offers courses designed to provide a flexible curriculum structure that allows students to follow a program of study to meet their individual career goals. As shown below, the program consists of 30 semester units of approved work including six units devoted to a thesis or project. The required coursework includes 6 units of advanced mathematics and computational methods, 12 units of aerospace core subjects, 6 units of electives, and 6 units of thesis or project.

Both the university GPA and the Department GPA must be at least 3.0.
## Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

## Requirements of the Masters

### Advanced Mathematics and Numerical Methods

<td>3</td>
</tr>
</tbody>
</table>

### Area of Specialization

Students may opt to specialize in one of the two areas listed below. Each area has a required technical elective, as shown below. The other elective may be chosen from Aerospace Engineering, from other engineering programs or from Physics, Chemistry, Mathematics, and Computer Science.

- **Aircraft Design**
  - AE 271. Advanced Aircraft Design | 3 |
  - Other Elective | 3 |

- **Space Transportation and Exploration**
  - AE 210. Advanced Space Systems Engineering | 3 |
  - Other Elective | 3 |

### Culminating Experience

**COMPLETE ONE OPTION:**

- **Thesis**
  - AE 299. Master’s Thesis | 3 |
  - Students take AE 299 twice.

- **Project**
  - AE 295A. Aerospace Engineering Project I | 3 |
  - AE 295B. Aerospace Engineering Project II | 3 |

### Total Units Required

Elective courses must be planned in consultation with the AE Graduate Coordinator. Students may also choose electives from other engineering fields, from science, as well as from business.

Upon completion of the degree requirements, the student must have achieved a minimum grade point average of 3.0 in order to graduate.

In selecting a thesis or project topic, the student first identifies a faculty member in their area of interest. Once the faculty member agrees to act as the student’s advisor, a program of study is established, including the thesis or project topic. The student consults with and selects his or her advisor during the first semester of graduate study.

Curricula
- Minor, Aerospace

Introduction
San José State University supports a wing of Air Force Reserve Officer Training Corps (AFROTC) with cadets from San José State University, Santa Clara University, Stanford University and many local community colleges. The Air Force ROTC program provides instruction in leadership, management, and national security studies along with military education and training. This program prepares the cadet for assignment to positions of responsibility and importance in the modern Air Force. Instruction is conducted on and off campus. This program offers all eligible SJSU students the opportunity to obtain an officer’s commission in the United States Air Force while earning their college degrees.

Program Overview
Our faculty brings a wealth of experience and diversity to the program. Instructors are active duty Air Force officers from various career areas and provide students with a first rate academic education and military training experience. Each faculty member also acts as a student advisor to guide students through the program and help them reach the goal of an officer’s commission in the United States Air Force.

College students wishing to commission as an Air Force officer through ROTC may enroll in a three, three-and-a-half, or four-year program. Students attend Air Force ROTC classes along with other college courses and receive elective academic credit.

After successfully completing all requirements, the cadets are commissioned as Air Force officers with a minimum four-year active duty service commitment.

Four-Year Program
The first two years of the Air Force ROTC four-year program, the General Military Course (GMC), consist of 1 hour of classroom work, two hours of leadership laboratory, and a minimum of two hours of physical conditioning each week. Upon completion of GMC requirements, cadets who wish to compete for entry into the last two years of the program, the Professional Officer Course (POC), must do so under the requirements of the POC selection system. This system uses qualitative factors, such as grade-point average, unit commander’s evaluation, aptitude test scores and physical fitness test scores to determine a student’s officer potential. After selection, students must successfully complete a four-week summer field training program at Maxwell Air Force Base in Montgomery, AL before entering the POC.

In the POC, cadets attend class three hours a week, participate in a weekly leadership laboratory lasting two hours, and perform a minimum of two hours of physical conditioning per week. Cadets apply what they have learned in the GMC and at field training. POC cadets conduct the leadership laboratories and manage the unit’s cadet corps. Each unit has a cadet corps based on the Air Force organizational pattern of flight, squadron, group, and wing. POC classes are small, with emphasis on group discussions and cadet presentations. Classroom topics include leadership, communication skills and national defense policy. Once enrolled in the POC, all cadets enlist in the Air Force Reserve and assigned to the Obligated Reserve Section.

Scholarships
Current emphasis in the Air Force ROTC College Scholarship Program is to award scholarships to candidates pursuing undergraduate engineering or other scientific and technical disciplines. More than half of Air Force ROTC scholarships are awarded to students in these disciplines. Additionally, scholarships are available for foreign language majors; contact the Aerospace Studies department for more information regarding which foreign language majors are eligible. Students in every degree program may enjoy scholarship opportunities, as the Air Force seeks to engage students who excel both academically and militarily.

Air Force ROTC offers several types of scholarships, awarded in increments of two, three, and four years. All types of awards provide an allowance for books, most required fees and a monthly nontaxable stipend. All scholarship cadets are required to meet certain academic, military, and physical fitness standards to earn and maintain scholarship benefits.
Field Training
Field Training, in many cases, is a cadet’s first exposure to a working Air Force environment and the Aerospace Expeditionary Force (AEF) concept. The program develops military leadership and discipline, and provides Air Force officer familiarization, orientation and motivation. At the same time, the Air Force can evaluate each cadet’s potential as an officer and entry into the POC.

Field training provides Air Force leadership opportunities, professional development, marksmanship training, team building, physical fitness, and AEF orientation. Lodging, meals and transportation (from the cadet’s home of record or school) are provided at no cost.

Medical Professions
Nursing majors may apply for an AFROTC scholarship and graduates agree to accept a commission in the Air Force Nurse Corps and serve four years on active duty after successfully completing their licensing examination. Cadet premedical scholarship recipients who are accepted to medical school within one year of graduating may be sponsored in their pursuit of medical degrees.

Legal Professions
Both first-year and second-year law students can apply for ROTC scholarships. Students complete either a one-year or a two-year ROTC program while attending law school. Additionally, second-year law students can pursue an Air Force commission through Air Force ROTC’s graduate law program. This program guarantees judge advocate duty after a student completes all Air Force ROTC, law school, and bar requirements. After graduating from an American Bar Association-accredited law school, the student must be admitted to practice law before the highest state court of any state or a federal court. The new lawyer is then commissioned into the Air Force in the grade determined by the laws and directives in effect at the time of call to active duty.

Aerospace Studies Minor
All undergraduate students are eligible for the minor in aerospace studies. Those wishing a career as an Air Force officer after graduation should contact the Department of Aerospace Studies.

African Studies Program
College of Social Sciences

BUSINESS TOWER 464
408-924-5568

Curricula
⦁ Minor, African Studies

Introduction
The Interdepartmental minor in African Studies consists of courses from anthropology, art, African American studies, history and political science. The interdepartmental structure of this minor will enable students, while pursuing degrees in specific disciplines, to concentrate their efforts more efficiently upon the African continent.
Minor - African Studies
This degree is cross listed with the History Department.
African-American Studies Department

College of Social Sciences

WASHINGTON SQUARE HALL 216
408-924-5871

Professors
Steven M. Millner
Ruth P. Wilson, Chair

Curricula
⦁ BA, African-American Studies
⦁ Minor, African-American Studies
⦁ Minor, African Studies

Introduction
An indispensable part of the mission of a metropolitan university, the Department of African-American Studies provides a comprehensive liberal arts education by training our students to appreciate diversity and multicultural American society. Our unique interdisciplinary curriculum focuses on the areas of: crime/justice, politics, urbanization, religion, history, sociology/welfare, psychology, African history/politics, gender equality, aesthetics and general education courses. Our upper division courses cover such topics as the Harlem Renaissance, African-American women in history, and black images in American film and television. Our faculty contributes to scholarship in the field, and we are intellectually and professionally linked to local and national African-American communities through our membership and support of professional associations such as the National Council of Black Studies.
## University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Professors
Scot M. Guenter, Coordinator

Associate Professors
Todd Ormsbee

Assistant Professors
Tova Cooper
Funie Hsu

Curricula
⦁ BA, Humanities, Concentration in American Studies
⦁ Minor, American Studies

Introduction
The American Studies Program provides useful preparation for graduate study, for elementary or secondary teaching, or for careers in law, public service or government. In addition to the minor in American Studies, a student can receive a Bachelor of Arts in Humanities with a concentration in American Studies through the Humanities Department. All American Studies courses, whether for a major, minor, or for general education, enhance our understanding of how our nation developed in the past, what it has become, and how these changes affect us today. Courses focus on subjects such as the American dream, interracial relations, environmental issues, popular culture and women’s concerns.
Minor - American Studies

This degree is cross listed with the Humanities Department.
BA - Humanities, Concentration in American Studies
This degree is cross listed with the Humanities Department.

Curricula
- BA, Anthropology
- BA, Behavioral Science
- BA, Organizational Studies
- Minor, Anthropology
- Minor, Native American Studies
- Minor, Values, Technology and Society
- MA, Applied Anthropology

Introduction
Anthropology majors study how humans live and have lived, present and past, and apply that knowledge to contemporary issues, learning how to articulate an anthropological perspective on human behavior. Our students develop skills in research, data analysis and clear and effective communication, preparing them to live in a complex, culturally diverse world. The Department of Anthropology’s core curriculum provides an overview to the discipline as well as courses in cultural anthropology, archaeology, and physical anthropology. There are many opportunities for students to engage in research and service projects, and our faculty are scholars who bring their research into the classroom to enhance learning. We offer a BA in anthropology, an MA in applied anthropology, a BA in behavioral science, and a BA in organizational studies. Our graduates pursue careers in a wide range of professions, including law, medicine, business, social work, and health care.
BA - Anthropology

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

SOCI 102. Introduction to Statistics

UNVS 015C or UNVS 016C may be used in lieu of the statistics course required by this major.

Methods Requirement

Students must complete at least one of the following courses: ANTH 149, ANTH 165, PSYC 018, PSYCH 120, or SOCI 104. A 3-unit maximum of individual studies may be used to meet the degree requirements.

Anthropology

Three courses (at least 2 upper division) which may include
ANTH 149. Ethnographic Methods
ANTH 165. Historical Archaeology

Psychology

Three courses in psychology (at least 2 upper division) which may include
PSYC 018. Introduction to Research Methods
PSYC 120. Advanced Research Methods and Design

Sociology

SOCI 101. Social Theory
Two additional upper division sociology courses which may include
SOCI 104. Quantitative Research Methods

Area Specialization

Specializations are a cluster of courses used by departments for advising purposes. Specializations will not appear on transcripts or diplomas. Please see advisor for more details.

Two additional upper division anthropology, psychology, or sociology courses approved by Behavioral Science advisor. Three units of SJSU Studies coursework may be used to meet the major specialization requirements.

University Electives

At least one unit must be Upper Division course.

After consultation with an advisor, experimental courses (ANTH 196) may be used to fulfill minor requirements.
Minor - Values, Technology and Society

This interdisciplinary minor groups existing courses from a number of departments into an integrated study of the interaction of values, technology and society as they give shape and direction to the world in which we live. In particular, the minor focuses on the increasing recognition of the need to assert human values (in particular, moral, social, aesthetic and political values) given the accelerating development of modern technology and the associated increasing complexity and interconnectedness of our lives. Courses in the minor examine these themes as they are reflected in such issues as war and peace, the environment, health, modern science and technology, our use of computers, and the expression of values in our technological society through ethics, art, design and religion.

Students may take up to 6 units of lower division coursework in completing the minor requirements.

Total Units Required | **18**
MA - Applied Anthropology

Requirements for Admission to Classified Standing

Minimum requirements for admission to the Graduate Division are outlined in the Admissions section of this catalog. The university-level graduate application is separate from the application you send to the department. You will need to separately apply to the university to obtain approval for university-level admission and to the department to obtain approval for admission into the Applied Anthropology Program. Minimum requirements for the program are a bachelor’s degree in anthropology or: a core of introductory cultural, and physical or archaeological anthropology; upper division methods course in ethnography, or archaeology or osteology; upper division anthropological theory; and six elective units in upper division anthropology (approximately 18 units). A 3.0 grade point average (B or better) in the last 60 semester units of undergraduate work and all anthropology courses is required. Information on dates and the program can be obtained at the department website: http://www.sjsu.edu/anthropology.

Requirement for Admission to Candidacy for the MA in Applied Anthropology

General university requirements for admission to candidacy for the MA degree are outlined in detail in the Academic Regulations section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. After the completion of 18 units in the graduate program and the completion of a project or thesis proposal the student’s work will be evaluated by the department’s graduate committee. If the performance of the student is satisfactory and the student is considered to be a potentially competent and mature practitioner, he or she will be advanced to candidacy. Students who fail to meet the expected standards will be terminated from the program.

Specific Requirements for the MA-Applied Anthropology

Students are required to demonstrate their competency with regard to writing skills as a requirement for candidacy by completing a project proposal. Students are expected to conduct original research and write a thesis or to be engaged in professional activity and write a project report. All research or professional activity must conform to the ethical standards of the discipline of anthropology as outlined by the American Anthropological Association, the Society for Applied Anthropology and the requirements of the University’s Institutional Review Board. Each program of study must include 36 semester units. Eighteen of the units are in the Applied Anthropology Core. Six units of upper division or graduate anthropology depth courses will be taken with the permission of the student’s advisor and 6 units of upper division or graduate classes outside of anthropology emphasizing the area of application will be taken, also with the permission of the student’s advisor. SJSU Studies courses may not be used to fulfill the anthropology depth requirement or or field of application requirement. Six additional units will reflect research or professional internships and thesis or project report preparation.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Introduction
Visual art and art history play a central role in our increasingly visual and interactive culture. Without the barriers of language, the visual arts are able to foster the kind of cross-cultural understanding required of global citizens. Founded in 1913, the Department of Art and Art History is committed to researching, teaching and practicing conceptual creativity and creative problem solving in media which encompass equally the most contemporary technologies and the most ancient forms of artistic practice. We are dedicated to the understanding and analysis of visual communication, to complex critical thinking and writing, and to the interpretation of local and global culture, past and present. Our BA, BFA, MA, and MFA degrees, accredited by the National Association of Schools of Art and Design (NASAD), offer students the opportunity to study with award-winning faculty in a “best-in-the-West” combination of facilities for making, exhibiting, and researching art across many media. All programs are supported and enriched by a diverse schedule of exhibitions in the Natalie and James Thompson Gallery, eight student galleries, and weekly public lectures.
BA - Art, Concentration in Art History and Visual Culture

The Art History and Visual Culture major enriches the lives of its students by providing an in-depth knowledge of cultural traditions and creative accomplishment, and by providing the skills necessary for applying that knowledge in the service of our multicultural society. Course offerings include a wide range of themes and topics in Modern, Contemporary, Classical, Renaissance, Islamic, and Nineteenth Century art, architecture, and design. Examination of these diverse areas encourages students to become responsible citizens through an understanding of the aesthetic, cultural, and ethical choices inherent in human development. Students in this program acquire the communication skills, research techniques, and methods of critical inquiry that have become a vital part of modern life.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### University Electives | 15-19

### Total Units Required | 120
### BA - Art, Concentration in Studio Practice

The BA Art, Concentration in Studio Practice is a degree for artists who wish to chart their own path. This could include a broad-based approach to artistic media or a focus on a single medium; the contemporary art world embraces both these ways of working. Artists who put more emphasis on the communication of ideas and who wish to try everything may opt to take classes ranging from painting, to video art, to glassblowing, to photography, to woodworking. Others may desire to specialize in jewelry and metalsmithing, or drawing and printmaking, for example. The BA Art, Concentration in Studio Practice allows students to tailor their own degree to meet precisely their artistic interests, while progressing through a rigorous core of theoretical seminars and art history lecture classes that will inform their work in any medium. The degree puts an emphasis on entrepreneurship and the ability to fit into a variety of creative career prospects.

#### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

- ART 180. Individual Studies                                      | 3
- ART 197. BA Senior Project                                       | 3
- PHOT 197. Senior Project Photography                             | 3

### University Electives

- **Total Units Required**: 120
BA - Art, Concentration in Studio Practice, Preparation for Teaching

The BA in Studio Practice/Preparation for Teaching is designed for students interested in teaching art in high school or middle school and has been approved by the California Commission on Teacher Credentialing (CCTC) as meeting the undergraduate subject matter preparation for a single subject credential program to be completed after the BA. The Preparation for Teaching degree provides a broad foundation in contemporary art practice and permits some specialization in a favorite art medium as well as specialized courses in teaching art education for young people. (Note that completing this major does not guarantee admission to a credential program; see http://www.sjsu.edu/education/ for more information.) This is an excellent time to prepare for a teaching career in California.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of “C or better” (“C- not accepted”) is required to meet graduation requirement.

BFA - Art, Concentration in Digital Media Art

The BFA Concentration in Digital Media Art (DMA) offers a multidisciplinary degree in digital art and design in the areas of computer graphics, web development, programming, physical computing, fabrication, prototyping, human computer interface (HCI), interaction design and computer games. Our curriculum is hands-on, providing project-oriented learning in collaborative workshop environments along with individually directed research and culminating exhibition opportunities. The DMA program area teaches technical, aesthetic, and critical thinking skills to empower students as problem solvers and innovators in the field of digital technology. Located in the heart of Silicon Valley, the DMA program is dedicated to the advancement of contemporary technologies through research and experimentation at the intersection of art and science. Students graduating from the program develop real-world skills using a wide range of tools, technologies, and techniques.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

No portfolios are required at the time of application for admission to SJSU. Major requirements for the first two years of study for BA Art/Studio Practice and all BFA degrees are very similar so that students have time to choose the right path and can apply for the BFA, if they choose to do so. At that time BFA program applicants must meet the following departmental requirements:

1. Have completed, be currently enrolled in, or planning to enroll within the following two semesters in all coursework in the common preparation for the BA and BFA Art majors (25-28 units of drawing, digital media, photography, sculpture, art history, ART 001, ART 002, ART 003 and ART 100W) with a minimum grade point average of 3.0 on a 4.0 scale. Also recommended, are three to six additional units from the desired BFA concentration area.

2. Pass the BFA - Art admissions review. During the review, which is held in October and March each year, images of the applicant’s creative work are reviewed by the art faculty to determine if the work demonstrates the creative level expected of BFA candidates. Instructions are available on the Art and Art History Department website.

Students complete the BFA Art program with a capstone project, for which each candidate prepares an individual art exhibit to demonstrate the candidate’s professional competence.

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C- or better" to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do not meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

BFA - Art, Concentration in Photography

The BFA Concentration in Photography prepares students for careers in photography by providing courses that emphasize image as it relates to concept, theory, and professional practice in commercial and fine art photography. Our curriculum engages students in a diverse range of contemporary practices in the medium, from innovative approaches to digital imaging and traditional silver-based photography, to historic alternative photographic processes. We recognize the possibilities of the interdisciplinary nature of photographic practice and encourage interested students to explore installation, video and electronic media. In addition to our emphasis on fine art photography, our program includes a strong commercial photography component, offering introductory through advanced courses in studio lighting and professional practices. The blend of fine art and commercial photography makes our program unique. Our technical facilities are extensive and include traditional black and white darkroom, commercial lighting studio stations, alternative practices studio, and large format digital printers.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

No portfolios are required at the time of application for admission to SJSU. Major requirements for the first two years of study for BA Art/Studio Practice and all BFA degrees are very similar so that students have time to choose the right path and can apply for the BFA, if they choose to do so. At that time BFA program applicants must meet the following departmental requirements:

1. Have completed, be currently enrolled in, or planning to enroll within the following two semesters in all coursework in the common preparation for the BA and BFA Art majors (25-28 units of drawing, digital media, photography, sculpture, art history, ART 001, ART 002, ART 003 and ART 100W) with a minimum grade point average of 3.0 on a 4.0 scale. Also recommended, are three to six additional units from the desired BFA concentration area.

2. Pass the BFA - Art admissions review. During the review, which is held in October and March each year, images of the applicant’s creative work are reviewed by the art faculty to determine if the work demonstrates the creative level expected of BFA candidates. Instructions are available on the Art and Art History Department website.

Students complete the BFA Art program with a capstone project, for which each candidate prepares an individual art exhibit to demonstrate the candidate's professional competence.

BFA - Art, Concentration in Pictorial Art

The Pictorial Art BFA program provides students with an intellectual, creative, and physical setting that supports excellence in painting, drawing, and printmaking. It provides a mix of discipline and autonomy. Preparation begins with a strong understanding of the fundamentals of drawing. From that foundation, the program provides comprehensive challenges in all pictorial disciplines and emphasizes both the historical traditions of painting and contemporary approaches. Faculty and students engage in critical and personal dialogue to encourage the development of a strong independent vision.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

No portfolios are required at the time of application for admission to SJSU. Major requirements for the first two years of study for BA Art/Studio Practice and all BFA degrees are very similar so that students have time to choose the right path and can apply for the BFA, if they choose to do so. At that time BFA program applicants must meet the following departmental requirements:

1. Have completed, be currently enrolled in, or planning to enroll within the following two semesters in all coursework in the common preparation for the BA and BFA Art majors (25-28 units of drawing, digital media, photography, sculpture, art history, ART 001, ART 002, ART 003 and ART 100W) with a minimum grade point average of 3.0 on a 4.0 scale. Also recommended, are three to six additional units from the desired BFA concentration area.

2. Pass the BFA - Art admissions review. During the review, which is held in October and March each year, images of the applicant’s creative work are reviewed by the art faculty to determine if the work demonstrates the creative level expected of BFA candidates. Instructions are available on the Art and Art History Department website.

Students complete the BFA Art program with a capstone project, for which each candidate prepares an individual art exhibit to demonstrate the candidate’s professional competence.

BFA - Art, Concentration in Spatial Art

The BFA Art, Concentration in Spatial Art is a degree for artists seeking to specialize in sculpture and three-dimensional art processes. Spatial Art students begin with the common Art core of drawing, photography, digital media art, three-dimensional design, art history, and seminars about making a career as an artist. They then move into intermediate and advanced classes focused on large metal casting, woodworking, glass, ceramics, jewelry, and installation art. All studio classes emphasize concept development and recognition of contemporary art-world trends, while upper-division art history classes provide context and develop students’ critical thinking skills.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

No portfolios are required at the time of application for admission to SJSU. Major requirements for the first two years of study for BA Art/Studio Practice and all BFA degrees are very similar so that students have time to choose the right path and can apply for the BFA, if they choose to do so. At that time BFA program applicants must meet the following departmental requirements:

1. Have completed, be currently enrolled in, or planning to enroll within the following two semesters in all coursework in the common preparation for the BA and BFA Art majors (25-28 units of drawing, digital media, photography, sculpture, art history, ART 001, ART 002, ART 003 and ART 100W) with a minimum grade point average of 3.0 on a 4.0 scale. Also recommended, are three to six additional units from the desired BFA concentration area.

2. Pass the BFA - Art admissions review. During the review, which is held in October and March each year, images of the applicant’s creative work are reviewed by the art faculty to determine if the work demonstrates the creative level expected of BFA candidates. Instructions are available on the Art and Art History Department website.

Students complete the BFA Art program with a capstone project, for which each candidate prepares an individual art exhibit to demonstrate the candidate’s professional competence.

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

COMPLETE ONE SEQUENCE FROM:

African American Studies

AFAM 002A. African-Americans and the Development of America’s History and Government .......................................................... D2  3
AFAM 002B. African-Americans and the Development of America’s History and Government .......................................................... M7  3

Asian American Studies

AAS 033A. Asian Americans in U.S. History I ........................................................................................................ D2 3
AAS 033B. Asian Americans in U.S. History II ........................................................................................................ M7 3

U.S. History and Government

HIST 015A. Essentials of U.S. History ........................................................................................................ M12 3

Can be taken as POLS 015 A/B as well.
## Mexican American Studies

## Physical Education

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

MA - Art, Concentration in Art History and Visual Culture

The Master of Arts in Art History and Visual Culture offers a broad education in art history including preparation for a Ph.D. degree program. It also helps to prepare students for a graduate library degree with specialization in art history as well as a variety of positions including community college professor, researcher, museum curator, art administrator, conservator, and visual resource librarian.

Admission Requirements

Step I. Admission to MA - Classified Standing
Admission to any of these programs requires two steps:

1. Art History and Visual Culture: Completion of 30 or more college level semester units or equivalent in art history courses with a minimum 3.0 GPA. At least 24 units should be in upper division art history courses. Courses in related academic areas will be assessed in reviewing qualifications of applicants. Reading knowledge of a foreign language related to the subject of the intended thesis research strongly recommended.

2. Art Education: Completion of 45 or more college level semester units or equivalent in appropriate art courses with a minimum 3.0 GPA. At least 12 of these units must be in art history of which 6 units are upper division courses and 3 units of Art 138, Studio Art Experiences for Young People, or equivalent.

Admission to Conditionally Classified Standing
Applicants who successfully complete the review, and who meet minimum requirements for admission to the Graduate Division, but who do not meet all other requirements, (i.e., lacking prerequisites or GPA) may be admitted to conditionally classified standing. They will be advanced to classified standing when the art graduate advisor certifies they have satisfied all appropriate requirements.

Step II. Candidacy for the MA - Art
Candidacy denotes that the student is fully qualified to complete the final stages of the MA - Art and is thus eligible to enroll in ART 299, Master’s Thesis or ART 297A, Master’s Special Study, ART 297B, Master’s Project. In order to attain candidacy, the student must meet the university requirements for admission to candidacy as outlined in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

- Secure commitment of three faculty members of the university, two of whom must be members of the Art and Art History faculty, to serve as members of the student’s MA - Art project or thesis committee, with one regular art faculty member agreeing to serve as chair. For candidates in art history and visual culture, the chair of the committee and at least one other committee member must be art historians. This committee must approve the student’s proposed program for the MA - Art degree no later than one month prior to the end of the semester preceding the one in which enrollment in the final project or thesis course(s) is planned.

- Submit a proposed program conforming to university and school requirements. The proposed program must be approved by the art graduate committee and the University Graduate Studies Committee before the student may be considered for the MA - Art. The proposed program must list a total of 30 semester units, of which at least 15 must be in courses at the 200 level. The proposed program must include the required seminars and ART 299, Master’s Thesis, or ART 297B, Master’s Project. Electives to complete the 30 units may be drawn from approved 100 and 200 level courses.

- Pass the first of two comprehensive exams and also the language exam.

Additional information regarding advancement to candidacy is available in the Art & Art History Department Office.

Completing Requirements for the MA - Art
All students must meet university requirements for the master’s degree as outlined in this catalog. The University requires that all graduate students demonstrate the graduation writing assessment requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Area Requirements:

a. Art Education: Of the 30 units required, 21 must be in art courses and 9 units may be in related areas of study. The upper division writing requirement and EDLD 221, ART 260 and one seminar must be completed before candidacy may be granted.

b. Art History and Visual Culture: Of the 30 units required, 21 must be in art history and visual culture courses and 9 units may be in related areas of study. Five seminars (15 units) must be included. The MA - Art student with a concentration in art history and visual culture must demonstrate reading knowledge of a foreign language related to the subject of the intended thesis research. The student must also pass a two-part comprehensive written examination designed to test general competence in art history and visual culture. The second part of the exam is based on the candidate’s thesis proposal once that has been approved by a pre-thesis committee. Attainment of candidacy, and eligibility to enroll in ART 299, Master’s Thesis, will be contingent upon satisfactory completion of all comprehensive and language examinations.
Thesis Requirements:
1. Thesis: The thesis must meet university requirements as stipulated in this catalog. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee.
2. Thesis Examination: The candidate for the MA - Art degree must successfully pass a final examination based on the thesis.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

</table>
**MFA - Art, Concentrations in Digital Media Art, Photography, Pictorial Art and Spatial Art**

**Step I. Admission to MFA Classified Standing**

Applicants must meet university requirements for admission to classified standing as outlined in this catalog. In addition, they must meet the following requirements:

1. Demonstrated interest in the area of study by a professional portfolio. The equivalent to a Bachelor of Fine Art (BFA) degree in the applicant’s designated area of graduate emphasis is recommended. At least 6 upper division units in art history are required.

2. Successful completion of the application procedure for the MFA Admission Review. During the MFA Admission Review, appropriate materials documenting the applicant's creative work are examined by the art faculty to determine whether the quality of the work meets the standards expected for MFA graduate work. Applicants should submit copies of their creative materials for the MFA Admission Review; applicants should not submit their original materials unless requested to do so by the faculty. Applicants who pass the review and who meet minimum school and university requirements are admitted to classified standing for the following semester.

Applicants for the MFA Admission Review will be considered only if the review instructions have been carefully followed and all requested materials (including official transcripts) are supplied. Email or call the Art and Art History department, art@sjsu.edu or 408-924-4320, for details. The deadline for application to the departmental review is the second Friday in January each year; application to this departmental review should not be confused with application to SJSU which is also required prior to the university’s deadline.

**Admission to Conditionally Classified Status**

Applicants who meet the University’s minimum requirements for graduate admission and whose creative work, as examined during the MFA Admission Review, shows promise but is not supported by traditional undergraduate preparation in Art may be admitted to conditionally classified status and provided with a list of requirements to be addressed as soon as they enroll. They will be advanced to classified status when the art graduate advisor certifies all appropriate requirements for classified standing have been satisfied. Applicants who have completed an MA - Art degree must meet all prerequisites and requirements for the MFA - Art degree program.

**Step II. Admission to Candidacy for the MFA - Art**

Candidacy denotes that the classified graduate student is fully qualified to complete the final stages of the MFA - Art program and is thus eligible to enroll in ART 298A, MFA Special Study, and 298B, MFA Project. In order to attain candidacy, the student must meet the university requirements for admission to candidacy as outlined in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluation website at [www.sjsu.edu/gape](http://www.sjsu.edu/gape). In addition, the student must:

1. Formulate their MFA project committee by obtaining the signatures of at least three university faculty members (two must be members of the art faculty) to serve as members of the student’s committee. A regular art faculty member who teaches in the student’s major area of emphasis must serve as chair. This committee must approve the student’s proposed program of study for the MFA - Art degree no later than one month prior to the end of the semester preceding the one in which the final project is created.

2. The student must submit a proposed program of study conforming to university and school requirements on the “Departmental Request for Candidacy” form obtained from Graduate Admissions and Program Evaluations and filed according to university deadlines. The proposed program of study must be approved by the art graduate committee and the University Graduate Studies Committee before the student may be considered for the MFA - Art.

3. Pass the Advancement to Candidacy (ATC) Review. This is an exhibition of original work which can be scheduled during any semester in one of the department’s student galleries. Students must obtain signatures of two faculty members willing to serve on their thesis committee, including at least one faculty member teaching in the designated area of emphasis, in order to apply to the ATC Review. Passing the review is necessary before the student may file for the “Departmental Request for Candidacy” and enroll in their thesis project classes, ART 298A and Art 298B.

Additional information regarding advancement to candidacy is available in the Art & Art History Department Office.

**Completing Requirements for the MFA - Art**

1. General Requirements: The MFA - Art program requires a minimum of 60 units of approved courses completed after admission to classified status in the program, of which at least 30 units must be in courses at the 200 level. Electives to complete the 60 units may be drawn from approved 100 and 200 level courses. The program also requires the student to participate in regularly scheduled departmental activities such as studio visits by faculty, first-semester review, first-year review, and Advancement to Candidacy reviews.

2. Required Courses: see below.

3. All students must meet the university’s graduation writing assessment requirement.

4. MFA - Art Project: The culmination of the degree is the MFA - Art thesis project which must demonstrate the professional level of the candidate’s accomplishment. After admission to candidacy the thesis project will be developed under the guidance of the candidate’s MFA - ART project committee chair with the assistance of the project committee. Upon the committee’s prior approval of the completed work, projects will be appropriately exhibited in accordance with departmental requirements.
All candidates must also submit to the Department of Art and Art History a satisfactory report of the project, following the department’s approved format. MFA project reports will document the creative project and the creative process and context for that project with color images that illustrate each work in the project. The project report and the image record (in the case of studio projects) must be approved by the candidate’s project committee and by the art graduate advisor before the degree may be awarded.

5. Final Examination: The candidate must successfully complete an oral examination based on the area of the MFA - Art project.

6. The application for graduation form must be filed with the university Graduate Admissions and Program Evaluations (GAPE) according to the posted deadline during the semester prior to completion of degree requirements.
# MFA - Art, Digital Media Art

## Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Asian Studies Program
College of Humanities and the Arts

CLARK HALL 419
408-924-4465

Professors
Christian Jochim, Coordinator

Curricula
⦁ BA, Humanities, Concentration in Asian Studies
⦁ Minor, Asian Studies

Introduction
The interdepartmental Minor in Asian Studies permits students to concentrate their course work in one of the following areas: General Asian Studies, East Asia, South Asia, or Southeast Asia. For each area, students will study the cultural background (6-9 units), social sciences (6-9 units), and language (3-6 units).

The Asian Studies minor will acquaint students with the histories, traditional cultures and contemporary conditions of Asian countries and societies. Courses may be selected from anthropology, art, foreign languages, geography, history, music, philosophy, political science, religious studies and business.
Minor - Asian Studies

This degree is cross listed with the Humanities Department.
BA - Humanities, Concentration in Asian Studies
This degree is cross listed with the Humanities Department.

Introduction

Intercollegiate athletics offers a comprehensive spectrum of 17 sports (6 men’s and 11 women’s) which compete at the NCAA Division I level (the highest level of collegiate competition). San Jose State University is a member of the Mountain West Athletic Conference. Over the years, San Jose State athletics teams have won 10 NCAA team and 50 individual championships.

Course offerings are designed to satisfy the needs and interests of highly skilled student-athletes and provide them with the highest level of intercollegiate athletics experience. Note: Courses are open only to those SJSU students who are currently on one of the Spartan team rosters.

seth.bates@sjsu.edu
www.engr.sjsu.edu/avtech

Professors
Seth Bates, Chair
Wenben Wei

Curricula
⦁ BS, Aviation
⦁ Minor, Aviation

Introduction
The oldest and largest provider of aviation degrees on the West Coast, the Aviation programs in the Department of Aviation and Technology prepare students for careers as professional pilots, airport managers, technical, marketing and quality control managers, and other aviation industry professionals. Students receive hands-on experience in both basic and advanced aviation principles and procedures, including aircraft design, aviation safety, air traffic control, and legal and labor issues in national and international aviation. Bachelor degree candidates have the option to focus on professional flight, operations, aviation management, or maintenance management—a specialty that complements an AS-level Federal Aviation Administration (FAA)-approved community college maintenance program. Aviation classes are held both on campus and off-site at our Reid-Hillview Airport facility.

Note to Veterans
Those students who have successfully completed armed forces instructional programs in aviation and who have been awarded units by the Admissions Office for this service training may apply such credit as appropriate toward any of the major or minor programs offered by the department.

Honors Program
Students who have maintained a 3.5 grade point average in all aviation courses are eligible for the departmental honors program. Qualified candidates may apply or be nominated by the faculty, during their junior year. To meet the honors course requirements, candidates must enroll for a one-unit course, Aviation 180H Individual Studies, for two semesters. This individual studies course is specifically structured for honors students. Students who successfully complete the two, one-unit honors courses, and who maintain the required 3.5 grade point average, will qualify for the award of departmental honors at graduation.
BS - Aviation

The curriculum provides a four-year pattern of course work for those interested in the several different aspects of aviation. In addition to the required course work in general education, aviation, science and business, the student has the opportunity to choose one of four options - Professional Flight, Operations, Aviation Management, or Maintenance Management.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the <a href='http://info.sjsu.edu/web-dbgen/narr/static/schedules/majormod.html'>Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All courses in the Preparation and Required in Major (all courses in preparation, core, and concentration) must be completed with a grade of “C- or better”.

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 24 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

Physical Education

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

Minor - Aviation

A minor in aviation is granted upon the completion of a coherent course of study and may be designed to fit the needs of a student from another major. The minor must include at least 12 units, six of which must be upper division. Six units must be completed in residence. Contact the department office (IS 111) for more details.
Behavioral Sciences Program
College of Social Sciences

CLARK HALL 469
408-924-5710

Curricula
- BA, Behavioral Science

Introduction
Behavioral science majors develop an interdisciplinary perspective on human behavior and an understanding of the psychological, social and cultural dimensions to being human in a complex society. Offered cooperatively by the Departments of Anthropology, Psychology and Sociology, the Behavioral Science Program is housed in the Department of Anthropology, which oversees academic advising. The program prepares graduates for a variety of jobs that require working with social science data and with people. Many of our alumni have pursued graduate work in health care, social work, human resources, and other fields.

The Department of Anthropology provides all academic advising for the Behavioral Science Program. Students are encouraged to call the Department of Anthropology, (408) 924-5710, with any questions about the program, including the availability of advisors.
BA - Behavioral Science (Interdepartmental)

This degree is cross listed with the Anthropology Department.

- MS, Biological Sciences, Concentration in Molecular Biology and Microbiology
Introduction
As leaders in the education of a highly trained and diverse scientific workforce, our mission is to provide a dynamic educational experience by engaging students in hands-on, inquiry-based learning activities at the bench and in the field. Through these experiences our students will gain a conceptual and experiential understanding of the biological sciences spanning from molecules to ecosystems.

Our Program goals are to:

• Serve the diverse student population of our region.
• Educate students to be intellectually agile and technologically proficient.
• Provide students with intensive, rigorous laboratory and field experiences within the context of their regular coursework.
• Create individualized mentoring opportunities and state-of-the-art learning experiences within the context of our faculty research programs.
• Foster creativity, a sound theoretical foundation, and the ability to communicate effectively and interact cooperatively.
• Make substantial contributions to the scientific community through our research efforts and that of our students.

Honors Program
Students may apply for the honors program in Biology in BS - Biological Sciences, Concentration in Systems Physiology.

Students wishing to complete the honors program must:
1. Have a GPA of 3.5 or higher in courses required in the major,
2. Have an overall SJSU GPA of 3.0 or higher, and
3. Complete Biology, Botany, or Zoology 186 “Senior Thesis”.

Senior thesis courses involve the student in the completion of a research project under the direct supervision of a faculty member. As such, the research project must be on a mutually agreed upon topic. It is recommended that the student submit a proposal for research to the faculty member and have that proposal approved in the last semester of his/her junior year. The student is required to present the results of the research in written form and as a seminar.
## BA - Biological Science

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

### Major-Specific Graduation Requirements

Students in this major must complete all lower division courses in the Requirements of the Major with a “C- or better” to graduate.

### Prerequisite Requirements

Any course that is prerequisite to any Chemistry Course must be passed with a grade of “C or better” (C- not accepted).

### University Graduation Requirements

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

Students in this major must complete all lower division courses in the Requirements of the Major with a “C- or better” to graduate.

Prerequisite Requirements

Any course that is prerequisite to any Chemistry Course must be passed with a grade of “C or better” (C- not accepted).

**Total Units Required**: 120

Students pursuing the California State Clinical Laboratory Science license should consult an advisor for additional requirements.
# BS - Biological Science, Concentration in Molecular Biology

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

## 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

## Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

## Major-Specific Graduation Requirements

Students in this major must complete all lower division courses in the Requirements of the Major with a “C- or better” to graduate.

## Prerequisite Requirements

Any course that is prerequisite to any Chemistry Course must be passed with a grade of “C or better” (C- not accepted).

## University Graduation Requirements

At least six (6) units, selected in consultation with the Biological Sciences Department advisor for minors, must be taken at San Jose State University.

| Total Units Required | 18 |

Courses that meet General Education/American Institution requirements are noted with area designation for required area.

For Legend please see page 2
## Minor - Science

The science minor does not qualify for a science teaching minor. See the Science Education Program advisor for the supplementary science credential requirements. This minor is not open to majors in College of Science, except mathematics and computer science.

### Requirements of the Minor 22

**Prerequisite 6**

General Education requirements in science at San Jose State University

### Additional Courses 16

Select at least 3 units per category; complete at least one of each category.

#### Biological Science

**COMPLETE ONE COURSE FROM:**

- **BIOL 054. Human Understanding**
- **BIOL 101. Origins of Life**
- **BIOL 110. Biodiversity and Biopolitics**
- **ENT 101. Insect Diversity**

#### Physical Science

**COMPLETE ONE COURSE FROM:**

- **CHEM 001A. General Chemistry**
- **CHEM 008. Organic Chemistry**
- **CHEM 030B. Introductory Chemistry**
- **PHYS 001. Elementary Physics**
- **PHYS 001L. Elementary Physics Lab**
- **PHYS 002A. Fundamentals of Physics**
- **PHYS 002B. Fundamentals of Physics**

#### Earth Science

**COMPLETE ONE COURSE FROM:**

- **ASTR 101. Modern Astronomy**
- **ASTR 102. Astronomy Lab**
- **GEOL 001. General Geology**
- **GEOL 006. Geology of California**
- **GEOL 111. Geology and the Environment**
- **METR 110. Aviation Meteorology**
- **METR 112. Global Climate Changes**

### Total Units Required 22

For all courses for the minor, the instructor may accept related course work or experimental learning in lieu of stated prerequisites.
Masters in Biotechnology

The MBT program integrates advanced, hands-on training in laboratory-based biotechnologies with MBA-level business courses from the College of Business.

Through elective choices, students supplement the core program with additional hands-on science or MBA courses to support their career goals. MBT program graduates are highly trained individuals who have had direct exposure to the biotechnology corporate world and are ready to make immediate contributions to biotechnology companies. Graduates work in a variety of positions in research, product development, marketing, regulatory affairs, clinical affairs, project management, quality, and others.

Special Session Program Information

Academic Programs offered through Special Session are operated by the College of International and Extended Studies (IES). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.

Completing Requirements for the MA/MS - Biological Sciences

Graduate Coordinator: Dr. Shannon Bros-Seeeman

Requirements for Admission to Classified Standing and Candidacy
Minimum requirements for admission to the Graduate Division, including satisfactory completion of the Graduate English Writing Requirements, are outlined in this catalog. To be admitted to classified graduate status, the student ordinarily will have an undergraduate degree in biological sciences or its equivalent, and will have achieved not less than a 3.0 grade point average. Applicants are expected to present an expanded statement of purpose, two letters of recommendation and Graduate Record Examination scores (if available) to the Department Graduate Coordinator. These materials will be added to Graduate Standing Summaries and transcripts and will be evaluated by faculty committees once each semester. Admission to candidacy follows admission to classified standing. Minimum university requirements are listed in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled "Graduation Writing Assessment Requirement" for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Foreign students from countries where English is not the language of instruction throughout the educational system must meet the following requirements: a score of 610 or better on the T.O.E.F.L. (no waivers permitted) and at least a score of 400 (40%) on the verbal section of the G.R.E. (Graduate Record Examination).

Completing Requirements for the MA - Biological Sciences

See the introduction to department graduate programs for policies governing admission to classified standing for all master's programs in biology. All students, in consultation with their graduate faculty advisor and committee members, must prepare a master's degree program for approval by the Department Graduate Coordinator and the Associate Dean for Graduate Studies.

MS - Biological Sciences
All students in the MS Biological Sciences Program are required to choose a concentration. There are currently three concentrations available: (1) Organismal Biology, Conservation and Ecology, (2) Physiology, (3) Molecular Biology and Microbiology.
# MA - Biological Sciences

Students in this degree program emphasize areas of General Biology, Microbiology, Molecular Biology or Physiology through choice of advisor, committee, course work and examination.

## Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

## Requirements of the Masters

30 units

### Core Courses

### Additional Courses

1-4 units

Any approved 255 course (any department prefix or suffix)

### Culminating Experience

100- or 200-level courses chosen with advisor consent

19-24 units

### Total Units Required

30 units

All students must complete the Graduation Writing Assessment Requirement. Final written and oral examination must be completed.
### MS - Biological Sciences, Concentration in Ecology and Evolution

**Completing Requirements for the MS - Biological Sciences, Concentration in Ecology and Evolution**

See the introduction to department graduate programs for policies governing admission to classified standing for all master's programs in biology. All students, in consultation with their graduate faculty advisor and committee members, must prepare a master’s degree program for approval by the Department Graduate Coordinator and the Associate Dean for Graduate Studies.

Students in this degree program emphasize botany, entomology, zoology or conservation biology through choice of advisor, committee, course work and thesis or project. A Master of Science degree in Marine Science is available through San José State University at Moss Landing Marine Laboratories. See appropriate section of this catalog.

#### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

A grade of “B or better” in BIOL 202 will satisfy the graduate competency in writing requirement.

Introduction
Researchers, process engineers, failure analysis engineers, and biomedical device engineers-graduates of the Department of Biomedical, Chemical and Materials Engineering find jobs in Silicon Valley and beyond. Our alumni work in the traditional industries of petroleum processing and metallurgy, as well as in industrial sectors as diverse as semiconductors and microelectronics, biomedical devices, nanotechnology and biotechnology, alternative energy and environmental remediation. In addition to bachelor’s and master’s degrees in biomedical engineering, chemical engineering and materials engineering, we offer undergraduate minors in biomedical engineering and materials science and engineering. A high percentage of our graduates pursue masters of science and doctorate degrees in graduate schools across the country. The BS Materials Engineering and BS Chemical Engineering programs are both accredited by the Engineering Accreditation Commission of ABET, www.abet.org.
BS - Biomedical Engineering

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

The following course in Preparation for the Major must be completed with a “C or better”: ENGL 001B.

The following courses in Required in the Major Lower Division Core (LD Core) must be satisfied “C- or Better”: MATH 030, MATH 031, MATH 032, PHYS 050, PHYS 051, CHEM 001A, CHEM 001B, Biol 030 and ENGR 010.

The Junior Core which consists of BME 115, BME 117*, BME 130*, BME 174*, BME 177*, and ENGR 100W*, must be completed with a 2.0 or Better, and no individual course grade lower than “C-”. Those identified with an asterisk (*) must be completed before enrolling in Senior Project (BME 198A).

Prerequisite Requirements

Any course that is prerequisite to any Chemistry Course must be passed with a grade of “C or better” (C- not accepted).

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 33 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Of the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

Physical Education

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html. A grade of “C or better” (C- not accepted) is required to meet graduation requirement.

Must take both MATE and ENGR 195 A and B to meet Area requirements

## Technical Major Electives

Electives must be selected from the approved departmental list in consultation with the students’ advisor.

## Total Units Required

Total Units Required: 120
Minor - Biomedical Engineering

Students must complete a minimum of 13 units as listed under the course requirements. All of these units must be outside the requirements for the student’s major, i.e., the same courses cannot be listed both on the minor and the major forms. BME 115 (4 units) and BME 177 (3 units) are required for all students taking this minor. In consultation with the Biomedical Engineering advisor, students must select one additional course from a group of biomedical engineering-based courses. It is the student’s responsibility to make sure that the prerequisites for each course are met. Students in majors other than engineering, biology, chemistry or physics will probably need to take additional courses to meet prerequisites for the courses required for this minor. This sequence of courses is the recommended pattern for engineering majors. Alternative patterns may be approved by the Biomedical Engineering advisor for students majoring in biology, physics or chemistry.

**Requirements of the Minor**

Minor - Materials Science and Engineering

Students enrolled in good standing in an engineering or science major may complete a Minor in Materials Science and Engineering. To be awarded the Minor, which appears on the official diploma and transcript, the student must complete 12 units, all of which must be outside the required courses in the major. The 12 units cannot be counted on both the Minor Form and the Major Form. Either MATE 025 or MATE 115 (or both) must be included in the Minor. The student, in consultation with a Materials Engineering academic advisor, should select 12 units in either the electronic materials option, the structural materials option or the general materials option. Prerequisites for each course must be met unless student receives instructor permission to waive them.

**MS - Biomedical Engineering**

Students pursuing the MS Biomedical Engineering degree will have the satisfaction of being actively engaged in a discipline that has human health and welfare as its primary focus. It is an inherently interdisciplinary field in which professionals from engineering and the physical sciences play a major role in developing engineered products for deployment in the human body.

The MS Biomedical Engineering program has been designed, in consultation with potential employers, to prepare graduates for the wide variety of emerging interdisciplinary careers at the interfaces between engineering and the life sciences. The coursework has been designed to build upon the student’s background in engineering, chemistry, physics or biology. Students will take courses that uniquely prepare them to function effectively in a regulated environment in which they will develop health-related products and techniques that improve the quality of life. Technical elective courses may be taken from the list of electives provided on the department website, in consultation with the academic advisor. The electives, in combination with the required thesis or project research, will enable the student to develop depth in one of the many areas that biomedical engineering encompasses.

**Program Objectives**

This program incorporates oral and written communication skills, team work, and the ability to address and deal with ethical issues that are necessary for professional success in the global marketplace and lifelong learning. The MS Biomedical Engineering program is designed to produce graduates who will be able to:

- Solve complex biomedical engineering problems and tasks, including in design, manufacturing and quality control, and use engineering, science, and relevant regulations to justify recommendations.
- Evaluate the impact of their work on their fellow human beings and society, including regulatory, ethical, economic, global and environmental considerations.
- Deliver effective presentations of biomedical engineering results in written and oral formats.
- Engage in lifelong self-directed learning to maintain and enhance professional skills and capabilities and keep abreast of the rapid developments in biomedical engineering and science.
- Be effective leaders capable of working in diverse environments and teams, in a globally competitive landscape.

**Requirements for Admission**

Candidates must meet all university admission requirements. Students with a major GPA of 3.0 or higher are not required to take the GRE. All others must take the GRE General Test and obtained a combined score of 315 or higher in the Verbal and Quantitative sections, and 3.5 or higher in the Analytical Writing section. Students can be admitted in either classified or conditionally classified standing. To be admitted to classified standing, a student must possess a BS degree in biomedical engineering or its equivalent from an accredited institution with a grade point average of 2.75 or better in the last 60 semester units, have met the GRE requirement if their major GPA is below 3.0, and also have completed the Transition Courses with grades of B or better.

Students can be admitted to conditionally classified standing if they have a BS degree in an engineering discipline, chemistry, physics or biology from an accredited institution. Students with conditionally classified standing will take a series of Transition Courses. Once these are completed satisfactorily, students can petition for transfer to classified standing. For more information on the transition courses contact the biomedical engineering coordinator at either bcm-engineering@sjsu.edu or gradadvisor-biomedicalengineering@sjsu.edu.

**Requirements for Candidacy**

Students must meet the university requirements for candidacy which includes successful completion of the Graduation Writing Assessment Requirement. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details.

**Course Requirements**

To meet the requirements for the MS-Biomedical Engineering degree, a student must complete 30 units of approved courses. Students must achieve a minimum of a “C” in each course and a cumulative GPA of 3.0 or better. In addition to the 30 approved course units, students must also complete a written thesis or project report and an oral defense of their thesis or project. Either Plan A (thesis) or Plan B (project) may be chosen by the candidate. Minimum requirements for each plan are as follows:

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

**Preparation for the Masters**

Students must complete the following transition courses (or equivalent courses) prior to being admitted to Classified Standing in the major.

MS - Biomedical Engineering, Concentration in Biomedical Devices

The concentration in Biomedical Devices offers the student the opportunity to focus on the design, development and manufacture of medical devices that either come into contact with the human body or are implanted within the human body. This is an inherently interdisciplinary field. The concentration area has been created to provide individuals with B.S. degrees in an engineering field or chemistry or physics with the necessary graduate level education that prepares them to function effectively in this environment.

A student must meet all of the requirements for entry into the Master of Science in Biomedical Engineering Program. The transition courses for this concentration are:

- BIOL 65 - Human Anatomy (4 units)
- BME 115- Fundamentals of Biomedical Engineering (4 units)
- CE 99- Statics (2 units)
- CE 112 - Mechanics of Materials (3 units)
- CHE 162- Engineering, Statistics and Analysis (3 units)
- MATE 25 - Introduction to Materials Engineering (3 units)
- MATH 133A- Ordinary Differential Equations (3 units)
- EE 98 - Circuit Analysis (3 units)
- CHEM 1A - General Chemistry (5 units)
- CHEM 1B - General Chemistry (5 units)
- PHYS 50 - General Physics/Mechanics (4 units)
- PHYS 51 - General Physics/Electricity and Magnetism (4 units)

Students who have not completed the equivalent of these classes during their undergraduate program will be required to complete these classes with a grade of B or better, in addition to the 30 semester units required for the Master of Science degree.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

MS - Chemical Engineering

The MS Chemical Engineering program provides advanced study of chemical engineering topics with emphasis on both the fundamental and applied aspects. A multi-disciplinary approach to education is evident in the Chemical Engineering program’s specialization areas of biotechnology, environmental engineering, and semiconductor processing. Elective courses are also available in science, business, and other engineering fields. This broad-based, multi-disciplinary education has proven to be an important factor for a student’s future success, either at leading Silicon Valley companies or in Ph.D. programs. Class schedules are designed for the convenience of employed engineers who wish to pursue graduate work on a part-time basis.

The faculty are actively involved in research in a number of areas including: biochemical engineering, semiconductor processing, polymers and nanocomposites, nanotechnology and environmental health, safety and remediation. Research activity is sponsored by local industries as well as by government funding agencies.

The Chemical Engineering program welcomes students with undergraduate degrees in a variety of other engineering and science disciplines.

For more information visit the department website: bcme.sjsu.edu or email: cme@email.sjsu.edu.

Program Objectives
The CHE Master’s program is designed to produce graduates who:

- Are able to solve complex engineering problems and tasks, and use engineering, science and statistics principles to justify recommendations.
- Are able to evaluate the impact of their work on society, including ethical, economic, global and environmental aspects.
- Can deliver effective presentations of engineering results in written and oral formats.
- Have life-long learning skills and are able to apply their engineering knowledge to critically evaluate relevant literature and new technologies or systems.
- Are effective leaders, capable of working in diverse environments.
- Are able to apply their engineering education to a variety of career paths.

Requirements for Admission
Candidates must meet all the university admission requirements. Students can be admitted in either classified or conditionally classified standing. To be admitted to classified standing, a student must possess a U.S. baccalaureate degree with a major in chemical engineering and a grade point average of 3.0 or better in the last 60 units, from an ABET accredited chemical engineering program.

Students can be admitted with conditionally classified standing if they have a CHE degree from a US accredited university in which they obtained a 2.7-2.99 GPA in the last 60 units; a CHE degree from a non-US institution; or a BS degree in an engineering discipline, chemistry, biology, or physics from an accredited institution. Students with conditionally classified standing will take a series of transition courses. Once these are completed satisfactorily, students can petition for classified standing. For more information on the transition courses, contact the graduate coordinator at cme@email.sjsu.edu.

Requirements for Candidacy
Students must meet the university requirements for candidacy which includes successful completion of the Graduation Writing Assessment Requirement (GWAR). The University requires that all graduate students complete the Graduation Writing Assessment Requirement as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

- BS, Business Administration, Concentration in International Business
Introduction

Since 1928, the College of Business has served the business education needs of our community. We provide San José and Silicon Valley with talent, thought leadership and service, ensuring our region’s growth in the global marketplace. An institution of opportunity, our accessible, high-value education empowers and transforms the lives of people of all ages and backgrounds. Both our challenging undergraduate curriculum and our innovative graduate program in the Donald and Sally Lucas Graduate School of Business equip graduates with the tools, work ethic and skills to succeed in the ever-changing global economy. The college is accredited by the Western Association of Schools and Colleges, the California State Board of Education, and the prestigious AACSB International (www.aacsb.edu). Fewer than five percent of business programs worldwide have earned the AACSB’s certification of excellence.

The Gary J. Sbona Honors Practicum

The Gary J. Sbona Honors Practicum provides the best students in the College of Business with the opportunity to apply what they have learned in the classroom to real business problems. Students are selected based on a combination of high GPA, prerequisites, and excellent communication skills. Students are typically placed in groups of three to work on projects at Silicon Valley businesses for college course credit. The program also includes international study trips, executive level guest speakers, and networking events. Through seminar sessions students are also exposed to current issues, ideas, and practices in their own disciplines and other fields of business. Students who complete two semesters in the program, have a 3.5 GPA or above and write a scholarly paper qualify to graduate with honors from the College of Business.
BS - Business Administration, Concentration in Accounting

Accounting is a recognized profession concerned with the measurement, analysis, interpretation and communication of economic data. Students are prepared for careers as certified public accountants and managerial accountants for both the private and public sectors of the economy. The curriculum is designed to develop a basic understanding of the conceptual framework underlying the measurement and communication of economic data; a technical competence for effectively measuring, assimilating and communicating economic data; an awareness of the moral and ethical considerations involved; and incentives to grow and keep pace with ever-changing issues, conditions, forces and ideas.

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements
All courses in the Concentration Requirements for the Accounting Foundation Courses must be completed with a grade of "C or better". The following Preparation for the Major and Required for the Major courses must be completed with a grade of "C or better": ENGL 2, MATH 71, BUS1 20, BUS2 90.

University Graduation Requirements

Core Lower Division General Education
Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C- or better" to meet the requirement. Consult with major advisor for details.

Upper Division General Education
Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions
Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

COMPLETE ONE SEQUENCE FROM:

African American Studies
AFAM 002A. African-Americans and the Development of America's History and Government D2 ......................................................... 3
AFAM 002B. African-Americans and the Development of America's History and Government M7 ........................................................ 3

Asian American Studies
AAS 033A. Asian Americans in U.S. History I D2 ......................................................... 3
AAS 033B. Asian Americans in U.S. History II M7 ........................................................ 3

U.S. History and Government
HIST 015A. Essentials of U.S. History M12 ..................................................... 3
Can be taken as POLS 015 A/B as well.

Mexican American Studies
MAS 010A. Mexican Americans and the Development of U.S. History and Government D2 ......................................................... 3
MAS 010B. Mexican Americans and the Development of U.S. History and Government M7 ........................................................ 3

Physical Education
Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.
A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

### University Electives

- Total Units Required: 120
**BS - Business Administration, Concentration in Accounting Information Systems**

This unique program prepares students to bridge the gap between two disciplines that are critical to business operations: Accounting and Management Information Systems. The program is taught exclusively within the Department of Accounting and Finance which strengthens the curriculum structure of the program focusing on important, relevant accounting, internal controls, and information technology issues. AIS students take courses in database design, networking and data communications, systems analysis and design, and IT audit, all with an accounting emphasis.

Students who complete this concentration will be entering into one of the fastest growing, most dynamic areas in accounting. Graduates are attractive to public accounting firms and corporations with jobs such as liaisons between the accounting/financial systems users and the information systems technical staff or to design and deploy information technology to improve the accounting systems of an organization. Careers might take paths in areas such as IT or internal audit, forensic accounting, risk management, or litigation services. This qualifies students to sit for the CPA (Certified Public Accountant) and CISA (Computer Information Systems Auditor) examinations.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### BS - Business Administration, Concentration in Business Analytics

Business Analytics is a quantitative approach to business, driven by the intelligent use of data and mathematical models. Practitioners leverage methods from statistics and operations research to form insights and make decisions that improve business performance. Business analytics is crucial to a broad range of industries. Banks need to perform credit risk analysis and analyze streaming transactions in real time to quickly identify potential fraud. Utility companies need to analyze energy usage data to gain a better understanding of demand patterns. Retailers need to perform markdown optimizations, firm-wide liquidity management, and understand the social sentiment around their products and markets to develop more effective campaigns and promotions. Business Analytics helps such organizations uncover insights from big data, build models that relate actions to consequences, and perform optimization and simulation analyses that lead to quality decisions and better outcomes in shorter times. The job opportunities for graduates with data analytical skills have never been more numerous. The business analytics concentration is designed to cater to this need by equipping our undergraduates with the skills needed to crunch huge data sets into meaningful information to further facilitate smart business decision-making.

#### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

#### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. ### Total Units Required

120

Courses that meet General Education/American Institution requirements are noted with area designation for required area.

For Legend please see page 2
BS - Business Administration, Concentration in Corporate Accounting and Finance

This unique concentration is designed for students who are attracted to career opportunities in corporate financial management. The concentration integrates two highly valued disciplines, Accounting and Finance.

The curriculum design develops a basic understanding of the conceptual framework underlying the measurement and communication of accounting data; a technical competence for effectively measuring, and assimilating and communicating economic data, ultimately to make sound financial decisions. Awareness of moral and ethical considerations in business is emphasized along with identifying incentives to grow and keep paced with ever-changing issues, conditions, forces, and ideas. The curriculum significantly enhances the attractiveness of its graduates to corporate finance groups as entry-level hires, and for the long-term, positions them to compete for roles in management. Required courses include four accounting and three finance courses. CFM graduates are able to move seamlessly between accounting and finance careers increasing their marketability in a field that has limitless opportunities.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and CPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for Corporate Accounting Finance must be completed with a grade of “C or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ENGL 2, MATH 71, BUS1 20, BUS2 90.

### University Electives

- Total Units Required: **120**

---

**For Legend please see page 2**
BS - Business Administration, Concentration in Entrepreneurship

The concentration in entrepreneurship prepares students with a drive for innovation and the passion to create new businesses to be entrepreneurs or corporate innovators. Students who complete the program will gain a global perspective of entrepreneurship, an understanding of the key management principles across business functions and the need to embrace change in a rapidly evolving environment due to global competition, new technology and changing customer requirements.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for Entrepreneurship must be completed with a grade of “C- or Better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ENGL 2, MATH 71, BUS1 20, BUS2 90.

### Total Units Required

120
BS - Business Administration, Concentration in Finance

Three areas of financial decision-making are emphasized: corporate finance, investments and financial institutions. Corporate finance courses are designed to prepare the student for financial analysis and planning as essential functions of a business enterprise. The investments area emphasizes the decision-making processes required to analyze the valuation of securities such as stocks or bonds and the principles of managing an investment portfolio. Financial institutions are studied both from an external viewpoint that emphasizes the function of money and capital markets, and from the internal perspective of a manager of a financial institution such as a commercial bank, savings and loan, mutual fund or life insurance company. The objective is to prepare students for careers such as financial officer of a corporation or a financial institution responsible for investment and financing decisions.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for Finance must be completed with a grade of “C or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”:\n
- ECON 1A, ECON 1B, ENGL 2, MATH 71, BUS1 20, BUS1 21, BUS2 90, BUS1 170.

Core Lower Division General Education

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

**BS - Business Administration, Concentration in General Business**

The general business concentration offers students a broad spectrum of courses to prepare them for careers in small, medium-sized or family businesses and for jobs with companies that train new employees in a specific job largely unrelated to a functional area such as managing a large retail store or servicing technology company's customers.

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#). Students must also complete all residency, curriculum, unit, and GPA requirements as outlined in the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### Major-Specific Graduation Requirements

All courses in the Concentration Requirements for General Business must be completed with a grade of "C or better". The following Preparation for the Major and Required for the Major courses must be completed with a grade of "C or better": ENGL 2, MATH 71, BUS 20, BUS 90.

One non-business global perspectives course in Area V.

#### Concentration Requirements

- **Required Courses**
  
  Courses selected must include at least one each from Marketing and Organization and Management. There could be as many as 12 units from any one department and as many as 6 units of advisor approved transfer credit. All these courses require grades of “C- or better”.

- **Additional Courses**
  
  Any upper division business courses. Please see an advisor for a current list of acceptable courses. All these courses require grades of “C- or better”.

#### University Electives

Total Units Required: 120
BS - Business Administration, Concentration in Global Operations Management

The Global Operations Management (GOM) concentration prepares graduates with state-of-the-art knowledge of managing operations in a global context. The focus will be on contemporary issues related to operations function which are of relevance in a firm’s ability to effectively collaborate with its supply chain partners in order to remain competitive in a global economy. The GOM concentration prepares students for careers with global manufacturing, service, and consulting organizations by offering a variety of courses in management of materials, quality, supply chains, services, global projects, and operations strategy. As part of this concentration, students have an opportunity to interact with GOM-related industry professionals as facilitated by the Global Operations Management Association, a GOM-affiliated student club at SJSU. They can also work on real-world consulting projects or explore internships in operations as facilitated by Silicon Valley Center of Operations and Technology Management.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. BS - Business Administration, Concentration in Human Resource Management

The program provides the academic foundation for careers concerned with activities related to creating and sustaining the competitive advantage of organizations through the effective management of human capital. This area of study is concerned with both the strategic and current day-to-day activities in areas such as performance management, human resource planning and information systems, recruitment and staffing, training and employee development, compensation and benefits and union-management relations in an environment that changes rapidly due to competition, globalization, diversity, technology and laws. The program qualifies graduates for positions in private sector, non-profit and public sector organizations.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

**University Electives** ........................................................................................................ 7

**Total Units Required** ...................................................................................................... 120
The concentration in International Business (IB) is designed to prepare students for today’s global business environment. IB as an interdisciplinary program builds capacity around key challenges and opportunities confronting all global businesses, including managing across borders, fostering innovation and entrepreneurship, and developing effective global strategies. In addition students may select an area of specialization, either a business functional area, an industry area, a geographic area of study, or language studies. Study abroad is required with one of three options: 1) a short-term faculty-led program; 2) a semester of study at a foreign university approved by CSU; or 3) an internship through AIESEC or other international internship program. The Director of the School of Global Innovation and Leadership can waive this requirement (e.g., international students need not study abroad). Study abroad courses that are regarded as equivalent can be substituted for IB program course requirements. This interdisciplinary approach provides a foundation for starting an international career. Graduates work in a variety of international areas and industries such as import/export, global operations, marketing, finance, hospitality and tourism, consulting, and project management, in both the private sector as well as governmental and non-governmental organizations.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for International Business must be completed with a grade of “C- or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ENGL 2, MATH 71, BUS1 20, BUS2 90.

BS - Business Administration, Concentration in Management

Although presented and conducted in an overall business context, the Management Program is fundamentally designed to prepare its graduates for careers in management in all forms of business and nonbusiness, public or private, foreign or domestic. The objective is to teach the fundamental principles underlying organizations, to emphasize education which will improve students’ thought processes, to provide a familiarity with the analytical tools of management and to develop the student’s ability to use the techniques involved in analyzing and evaluating managerial problems and making sound decisions. Attention is focused on systems and quantitative analysis, behavioral science, the environment and the forces/processes of change within organizations.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for Management must be completed with a grade of “C- or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ENGL 2, MATH 71, BUS1 20, BUS2 90.

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

BS - Business Administration, Concentration in Management Information Systems

The Concentration in Management Information System merges the knowledge of information technologies, systems and management. Students gain practical knowledge and skills in integrating computers and other data/text/image/graphics/voice technologies into the management of business information. Computerized systems are developed as applied information tools for managerial decision making and action taking. Graduates of the MIS concentration will be prepared for careers in the rapidly expanding profession of using information technologies to support management planning and control.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for Management Information Systems must be completed with a grade of "C- or better". The following Preparation for the Major and Required for the Major courses must be completed with a grade of "C or better": ENGL 2, MATH 71, BUS1 20, BUS2 90.

BS - Business Administration, Concentration in Marketing

Business graduates with a marketing concentration are prepared to pursue careers in small business and retail store management; in marketing, product or advertising management; also direct marketing, customer service and sales. The marketing program focuses on the business function concerned with market definition and objectives, product or service development, customer segmentation and product positioning, sales management, advertising and promotion, pricing and distribution.

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements
All courses in the Concentration Requirements for Marketing must be completed with a grade of “C- or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ENGL 2, MATH 71, BUS1 20, BUS2 90, BUS2 130.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of “C or better” (C- not accepted) is required to meet graduation requirement.

## Minor - Business

A minor consists of a minimum of 15 units and may be designed to fit the needs of a student majoring in any non-business department. The minor must include at least BUS 20N, Survey of Accounting, and BUS 160, Fundamentals of Management and Organizational Behavior, and nine additional units, three of which must be upper division courses. Six units must be completed in residence. Some majors have specific minor requirements. For engineering students, the following courses are required: BUS 195 (instead of BUS 20N), BUS 194 (instead of BUS 160), BUS 181, BUS 184, and ENGR 100W. Contact the Business Student Advisement Center (BBC 008) or your major advisor for more information.

Certificate - Advanced Accounting Topics

The certificate in Advanced Accounting Topics provides in-depth study of topics useful for CPA exam preparation and a career in accounting. It supplements coursework in the Certificate in Accounting Fundamentals and in the MSA program with advanced issues and topics relevant for a career in accounting. Specialized issues covered in the certificate program deepen understanding of accounting practice, broaden career preparation and better equip students for the CPA examination.

Certificate - Accounting Fundamentals (Special Session)

The certificate in Accounting Fundamentals is an intensive program providing a broad foundation of concepts and practices in financial reporting, managerial accounting, accounting information systems and corporate taxation. Over the course of one semester, it covers essential topics needed both for a career in accounting and for graduate study. The program is taught in its entirety during the summer, with each course taught in either two- or five-week sessions. The program is designed for both non-matriculated students and those satisfying entrance requirements for both the MS in Accounting program. As this certificate is comprised of fundamental accounting knowledge and skills, students entering MSA program without an undergraduate degree in accounting will be required to complete this certificate before enrolling in MSA classes.

Total Units Required 9
The Certificate in Tax Practice provides nine units of graduate level tax research and tax foundation skills and knowledge to students who already have either an undergraduate or graduate degree in accounting. This certificate can also assist someone seeking nine units to help meet the required 150 units to become a CPA. It can help with career advancement and passing the CPA examination. The nine units can be applied to the MST program (if within the required time limits for degree completion).

Donald and Sally Lucas Graduate School of Business

The Donald and Sally Lucas Graduate School of Business offers the following graduate degree programs:

- Master of Business Administration
- Master of Science in Accountancy
- Master of Science in Taxation (Special Session)
- Master of Science in Transportation Management (Special Session)

All of the Lucas School’s business degree programs are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

Mission of the Donald and Sally Lucas Graduate School of Business

The Lucas School provides advanced business and professional education to high potential individuals with diverse backgrounds and work experiences. We prepare our graduates to make responsible, personally enriching, and professionally advantageous decisions. The Lucas School’s business programs bring together an interesting mix of full-time and part-time students from a variety of academic, career, and cultural backgrounds. Given SJSU’s Silicon Valley location, students come to the classroom with a wealth of real-world experience, including technical expertise (in engineering or software, for example), and wanting to develop business acumen, advance in managerial positions, or deepen their knowledge base.

Our Programs

The programs are innovative in design and delivery and offer a range of academically challenging and multi-disciplinary opportunities that enable students to improve and keep pace continuously within the dynamic Silicon Valley environment.

1. The Master of Business Administration provides advanced management education with the opportunity for a generalist degree. The Lucas MBA programs offer high caliber applied learning in an enriching environment thoroughly integrated with the Silicon Valley Experience. Courses are taught by an optimal mix of academics involved in cutting-edge research and professionals with extensive experience in the mosaic of high-tech and service businesses that constitute Silicon Valley. Students are exposed to leading business practices in the classroom and networking opportunities as an integral part of an innovative educational experience. The Lucas MBA programs consist of forty-two semester units including thirty units of core courses and twelve units of elective courses. Within an MBA program, all students complete the same core courses whereas the elective courses are selected depending on the individual’s interests and learning objectives.

1.1 The Early Career MBA is a program tailored for individuals with limited professional work experience (0-5 years). Classes meet on the vibrant San José State University Campus where students have access to a wealth of resources. Courses typically meet evenings and Saturdays in eight-week sessions during the Fall and Spring semesters and five-week sessions during the Summer semester. Students follow a pre-set sequence of core courses and select elective courses depending on their area of interest. An approved three unit Internship may count as one of the elective courses. This unique MBA program offers three different tracks that vary in length and pace:
   - Accelerated Track - Designed for individuals who are willing to follow a very intense academic pace and wish to complete their MBA degree in 12 months.
   - Full-Time Track - Designed for individuals who are interested in completing their MBA degree in 21-24 months. The full-time track is ideal for international students and complies with all student visa requirements.
   - Part-Time Track - Designed for individuals who are working in full-time professional positions and are interested in completing their MBA degree in 33 to 36 months.

1.2. The MBA for Professionals is a Special Session program that is tailored for individuals with extensive professional work experience (5+ years). Offering a high level of flexibility, this program accommodates students with a demanding work and life schedule. Classes meet off-campus at the Lucas Business Complex in Santa Clara, an ideal location for many working professionals. The diverse educational and professional backgrounds of the students makes the Silicon Valley Experience an integral part of the MBA classroom. Courses typically meet evenings and Saturdays in eight-week sessions during the Fall and Spring semesters and six-week sessions during the Summer semester, with some courses available on-line. Students are able to choose and adjust the pace in which they complete their degree. This program can be completed in 2 to 3 years.

3. The MS - Accountancy (MSA) program is a full-time, daytime, 12-month program that admits a limited number of only non-accounting undergraduate majors on the basis of a competitive process that includes assessments by practitioners as well as faculty. Course work is structured around the accounting cycle to strongly encourage students to combine academic learning with accounting work experience (or internships) as well-rounded preparation for careers in professional accounting.

4. The MS - Taxation (MST) is a Special Session program that offers students technical knowledge, an understanding of tax policies and research and analytical skills development. Study of the tax law is enhanced through discussion of related accounting, legal and financial concepts and issues. The academic calendar is designed around the scheduling needs of working tax professionals. The extensive range of courses allows students flexibility in career specialization. The MST is offered at the Lucas School’s Silicon Valley site.

5. The MS - Transportation Management (MSTM) is a Special Session program that provides opportunities for individuals from both technical and non-technical disciplines to obtain advanced specialization in surface transportation management. The program draws on the latest in transportation policy, administration and management concepts from several disciplines, and enables students to develop a fuller understanding of the diverse and sometimes conflicting needs of modern transportation management for better serving their employers, community and society. The degree is available through distance-learning facilities and electronic technologies, providing an opportunity for students to obtain the degree at remote locations.

6. The MBA/MS Engineering (with specializations in Systems Engineering and Software Engineering) - is a Special Session Off-Campus accelerated evening sequential degree program is a combined program for engineering professionals who wish to pursue technical and executive management positions.
MBA - Master of Business Administration

Purpose of the MBA Program
The MBA program provides a strong foundation of business concepts, models, skills and methods with which to face immediate and future career challenges. The basic program aims at creating a general management (rather than a functional specialist) perspective. Pragmatic in perspective, the focus is on problem analysis and synthesis, decision making, action taking throughout the functional areas of business and understanding the international context of business. The Lucas School’s MBA prepares students through a broad curriculum of functional core courses, cross-functional and integrative courses, and elective courses.

Educational Objectives
The educational objectives of the Donald and Sally Lucas Graduate School of Business MBA are threefold: to provide a solid base of interdisciplinary business theories and techniques; to apply theory and analytic tools to the practical improvement of organizational performance; and to explore personal beliefs and values as they affect ethical and economic organizational practices. Key processes involve: investigating opportunities and problems; defining causes or contributing factors to problems, including those that cut across organizational units; generating alternatives from which feasible programs of action are selected and implemented; and monitoring and changing where necessary, the progress of enacted decisions.

These skills are developed using a combination of approaches including: the case method, experiential exercises, computer simulations, team projects and problem sets. Students are expected to develop competencies both as action-oriented leaders and as logical decision makers.

Benefits of the MBA
The program is geared to the professionally oriented person who aspires to move into middle management or to undertake greater managerial responsibility. It is designed to aid those who have the capabilities or potential to be action initiators rather than those who prefer to develop reports and recommendations for decision makers. The MBA program accommodates students with a variety of educational and work backgrounds. Business development projects are available to MBA students. The Lucas School has alliances with business incubator partners in Silicon Valley. Students have an opportunity to work with international businesses and Silicon Valley entrepreneurial start ups.

San José State University Requirements for Graduate Admission to Classified Standing
To be considered for admission to graduate study, San José State University requires that an applicant has:

1. A bachelor’s degree from an accredited university in the U.S. or the equivalent of a U.S. bachelor’s degree earned from a recognized institution if the degree was earned outside of the U.S.
2. A 2.5 (on a 4.0 scale) grade point average (GPA) in the last 60 semester units or 90 quarter units of study.
3. Applicants who have earned a degree from an institution in which the principal language of instruction was not English must demonstrate English language proficiency. Either the TOEFL (Test of English as a Foreign Language), IELTS (International English Language Testing System) or PTE (Pearsons) English language proficiency exam is required.

Admission to the Lucas MBA Programs
The Lucas School does not follow a set formula for determining admission to the MBA programs. Our goal is to admit academically qualified candidates who show potential for completing the program and advancing into a successful business career. We seek to admit students whose backgrounds will enable them to contribute to the academic excellence and the demographic, educational and experiential diversity of each class.

An applicant’s academic profile - undergraduate major and institution, any graduate level work, GPA, and GMAT scores - is a major factor in the admission decision. Other important areas of evaluation include essay responses, work experience, letters of recommendation, writing skills, and extracurricular, community and professional activities. From this overall review, we assess an applicant’s potential for success and compatibility with our MBA program.

The GMAT or GRE score is just one part of a candidate’s overall profile. An applicant’s score must rank in at least the 50th percentile in both the verbal and quantitative components of the exam. We realize that the GMAT/GRE has certain limitations, as does any standardized test; however, these exams do allow comparison among applicants from different schools, different countries and different majors. We encourage all applicants to prepare for the exam, take it as early as possible, and retake it if their score is not competitive.

The average GPA of admitted candidates is 3.3. Ideally a candidate’s GPA will be at 3.0 or above. Many circumstances may exist which offer explanation for a GPA below 3.0; candidates are encouraged to submit a statement of explanation if this is the case. However, please note that an absolute minimum GPA of 2.5 is required for graduate admission at San José State University.

Prerequisite Courses
Three undergraduate courses, Introduction to Microeconomics; Introduction to Macroeconomics; and Business Statistics are courses that must be completed as prerequisites for the MBA program and do not count as part of the program of study.

An applicant may be admitted to the MBA program prior to completion of these three classes but will need to provide proof of completion of all three prerequisites by the first day of orientation.
Program of Study Requirements for the MBA Degree

To earn the MBA degree, all students must satisfy the following requirements:

1. Business Prerequisite Courses
   - Introduction of Macroeconomics (at SJSU this course is ECON 001A, Principles of Economics Macro)
   - Introduction to Microeconomics (at SJSU this course is ECON 001B, Principles of Economics Micro)
   - Business Statistics (at SJSU this course is BUS 90, Business Statistics)

2. Advanced Management Courses (Core Courses)
   In the Early Career MBA, all students are required to successfully complete eleven core courses for a total of thirty semester units. In the MBA for Professionals, all students are required to successfully complete ten core courses for a total of thirty semester units. Although the total units of core courses are identical across the two MBA programs, the composition of the core curriculum is slightly different to account for the differences in student academic and professional profiles. The advanced graduate courses (core courses - 30 units) ensure breadth in general management knowledge and help the student to develop mastery in applying essential business skills.

3. Elective Courses
   Four elective courses (12 units) are required of all students. As an elective course, a graduate student can select a maximum of one upper-division business undergraduate course (100-level) OR one graduate non-business course (200-level). Enrollment in such elective course is conditional on the written approval by the MBA Director and it is specific to a given course and a given semester.

4. Comprehensive Project
   The comprehensive project is incorporated in the Strategic Thinking course (BUS 290). The comprehensive project is a culminating experience integrating business functional and interdisciplinary areas. An individual written project report is required and an oral examination may be included. The project may take the form of a field study, research project, business simulation, or a strategic plan for an organization, as assigned by the Business 290 instructor. Students must receive an overall equivalent grade of “B” or better on the comprehensive project, and may be given a maximum of two opportunities to satisfy requirements.

5. Graduation Writing Assessment Requirement
   The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

6. Maintenance of 3.0 GPA
   Students must maintain a grade point average of 3.0 or better on all graduate level course work. Students who receive grades of “C-”, “D”, “F” or “WU” in any business graduate course must repeat that course to achieve a grade of “C” or better. In addition, any student whose overall GPA falls below 3.0, regardless of the number of units completed, may be disqualified from the MBA program. It is the policy of the Donald and Sally Lucas Graduate School of Business not to readmit disqualified graduate students after a second disqualification.

7. Transfer Credit
   Subject to the approval of the Donald and Sally Lucas Graduate School of Business MBA Program Director and validation by the Associate Vice President for Graduate Studies and Research, students may transfer a maximum of twelve semester units of business graduate course work from another regionally accredited institution. Grades in the transfer courses must be “B” or better.

8. Other University Requirements
   Students must comply with all other graduate requirements contained in this catalog.
Early Career MBA

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

**Special Session Program Information**

Academic Programs offered through [Special Session](http://ies.sjsu.edu/) are operated by the College of International and Extended Studies (IES). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.
MS - Accountancy

The Master of Science in Accountancy is a flexible degree program designed for both accounting and non-accounting undergraduates who aspire to a profession in accounting. Coursework includes advanced financial reporting, auditing, taxation, IT auditing and financial statement analysis. Undergraduate accounting students enroll in a course of study to earn a masters degree and 30 additional units required for CPA licensure. An ambitious, highly motivated liberal arts, sciences or business undergraduate will need to complete the intensive Certificate in Accounting Fundamentals program during the summer semester before matriculation into the MSA degree program.

Purpose of the MSA Program
The MSA program prepares students for a career in public or corporate accounting with a strong foundation for both public accounting certification (CPA) and career advancement.

Educational Objectives
Students with an MSA degree should understand the accounting principles and procedures involved in measuring, recording, summarizing and reporting financial and nonfinancial data for business organizations; taxation concepts; auditing and control procedures; and the ethical and legal challenges in an accounting career. They should communicate effectively, both orally and in writing.

Benefits of the MSA
The program is designed for accounting undergraduates who want to further their studies in accounting while acquiring an additional 30 units needed for CPA licensure. It also allows liberal arts /sciences/business undergraduates who are interested in changing careers an entrance to the accounting profession. The course work and optional internship provide opportunities to build a framework for a successful and rewarding career in public or corporate accounting.

Requirements for Admission to Classified Standing
To be fully accepted into classified standing, an applicant must:

• Have a baccalaureate degree from an accredited four-year college or university;
• Have a grade point average (CPA) of 3.0 or better (on a 4.0 scale) in the last 60 semester units or 90 quarter units of course work;
• Have taken the Graduate Management Admission Test (GMAT) or the GRE exam. The ideal candidate will have scores at the 50th percentile or above in both quantitative and verbal sections, or GRE scores of 151 in Verbal Reasoning and 152 in Quantitative Reasoning. The AWA portion of the GMAT is also required. Test scores are one part of the selection process, but the Test score for students admitted into the program averages 600.
• Have taken an English proficiency exam if the applicant graduated from a postsecondary institution in a country where English is not the principal language. Accepted exams include the TOEFL (Test of English as a Foreign Language) with a preferred score of 90, the International English Language Testing System (IELTS) with a preferred score of 7.5, and the Pearson Test of English (PTE) with a preferred score of 75.

In addition, a personal interview may be conducted for each applicant.

Program of Study Requirements
To receive the Master of Science in Accountancy, students must complete 30 semester units of prescribed course work. Specific program policies include the following:

1. Prerequisites
The curriculum requires completion of one lower division and five upper division prerequisite courses (3 semester hours or equivalent) within the past five years with an average grade in the courses of “B” or better prior to the start of the program. All upper division prerequisites must be completed at an accredited 4-year university in the U.S.

The six prerequisite courses are:
1) Introductory Financial Accounting (lower division course, gateway to upper division courses 2-6)
2) Intermediate Financial Accounting I
3) Intermediate Financial Accounting II
4) Accounting Information Systems
5) Management Accounting and Control Systems
6) Tax Factors of Business and Investment Decisions.

Students may be conditionally admitted into the program pending completion of the prerequisite courses. Students must, at a minimum, submit completion and/or verification of enrollment in 1) Introductory Financial Accounting by the published CAPE document submission deadline. One way to fulfill the rest of the prerequisites is to enroll in the Certificate in Accounting Fundamentals at SJSU to complete courses 2-6 with an average of B in the summer preceding Fall enrollment in the MSA program.
2. Course Requirements
The 30 semester units of coursework include six courses required of all students and an elective MSA courses. Electives may be taken from offerings in the MST and/or MBA programs with approval from the MSA director. Students with an undergraduate degree in accounting may substitute electives for up to three of the required courses if an equivalent undergraduate course was completed with a grade of B or better within the last five years.

3. Internship
The courses in the MSA program are designed to prepare students for internships with public or corporate accounting firms. From January through March, students may enroll in an internship course, BUS220K. Students gain practical work experience, participate in firm training programs, and attend roundtable meetings to discuss topics such as professional ethics, working in the professional environment, communication effectiveness, marketing professional services and planning for professional growth.

4. Graduation Writing Assessment Requirement
The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

5. Comprehensive Project
A comprehensive project is incorporated into Bus 220N, Project Management, Organization & Strategy and into BUS220A, Financial Statement Analysis. The comprehensive project is a culminating experience integrating business functional and interdisciplinary areas. An individual written project report is required and an oral examination may be included. The project may take the form of a field study, business plan, research project or business simulation.

6. Maintenance of 3.0 GPA
Students must maintain a grade point average of 3.0 or better on all graduate-level course work. Students who receive grades of C-, D, F, or U in any business graduate course must repeat that course to achieve a grade of “C or better”. In addition, any student whose GPA falls below 3.0, or who receives two or more unsatisfactory grades (C-, D, F, or U) in graduate status, regardless of units completed, may be disqualified from the MSA program. It is the policy of the Donald and Sally Lucas Graduate School of Business not to readmit disqualified graduate students after a second disqualification.

7. Other University Requirements
Students must comply with all other graduate requirements contained in this catalog.
### Comprehensive Project

**COMPLETE ONE COURSE FROM:**
- BUS 220A. Financial Statement Analysis for Accountants...
- BUS 220N. Management of Organizations and Projects...

If both courses are taken, one is the comprehensive project and the other is an elective.

MS - Taxation (Special Session)

The Master of Science in Taxation (MST) Program is designed to provide individuals with the conceptual understanding and sound technical knowledge to compete successfully in the ever-changing tax world. It is appropriate for individuals already working in public accounting, a corporate tax department, a law practice or government service. College graduates with an accounting degree who wish to pursue a career in taxation and/or meet the 150 unit requirement to become a CPA will also benefit from the program. (State fee schedule does not apply.)

Requirements for Admission to Classified Standing

To be fully accepted into classified standing, an applicant must have:

1. Completed the following undergraduate courses (or equivalent) prior to admission. The SJSU course numbers for these courses are in parenthesis:
   - Financial Accounting (BUS1 020)
   - Managerial Accounting (BUS1 021)
   - Intermediate Accounting I and II (BUS1 121A/B)
   - Tax Factors of Business and Investment Decisions (BUS1 123A)

   These requirements may be fulfilled at a community college. If your undergraduate degree is in Accounting, you have satisfied the course prerequisites.

2. A four-year bachelor’s degree from an accredited college or university in the United States or from a recognized institution if the degree was earned outside of the United States.

3. A GPA of 3.0 or better (on a 4.0 scale) in your last 60 semester units or 90 quarter units of course work (Professional Development and Certificate Program course work cannot be included in this calculation).

4. A GMAT or GRE is required, with scores equal to or above the 50th percentile on both the verbal and quantitative sections of the exam. The LSAT score should be 145 or above. The testing requirement is waived if you have successfully passed the CPA exam in the United States or are an SJSU Sbona Honors student. Applicants who do not possess a bachelor’s degree from a postsecondary institution where English is the principal language of instruction must demonstrate English Language Proficiency. Either the TOEFL (Test of English as a Foreign Language), the IELTS (International English Language Testing) or the PTE (Pearsons) English language proficiency exam is required.

Program of Study Requirements for the Master of Science in Taxation

1. Core Taxation Courses

   Four core taxation courses (12 units) are required of all students. Of the 18 elective units, six must be from designated topic areas (entities and multijurisdictional; see below for details).

2. Elective Courses

   Students select a minimum of 18 units of taxation elective courses. At least one elective (3 units) must be a course on multijurisdictional taxation (international or state). At least one elective (3 units) must be an entities course.

3. Culminating Experience

   The culminating experience is a comprehensive project incorporated in the capstone course, BUS 223H, Tax Policy Capstone. An individual written project is required, and an oral examination may be included.

4. Maintenance of 3.0 GPA

   Students must maintain a grade point average of 3.0 or better on all graduate-level course work. Students who receive grades of “C-”, “D”, “F”, or “U” in any business graduate course must repeat that course to achieve a grade of “C” or better. In addition, any student whose CPA falls below 3.0, or who receives two or more unsatisfactory grades (“C-”, “D”, “F”, or “U”) in graduate status, regardless of units completed, may be disqualified from the MST program. It is the policy of the Lucas Graduate School of Business not to readmit disqualified graduate students after a second disqualification.

5. Graduation Writing Assessment Requirement

   The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. For the MST Program, the required writing course is BUS 223A.

6. Transfer Credit

   Subject to approval of the MST Program Director, students may transfer a maximum of nine semester units of business graduate course work from another accredited institution to be applied to advanced level course work requirements. Grades in the transfer courses must be “B” or better. MST courses taken via “Open University” are treated as transferred into the MST Program (and thus count toward the maximum of nine semester units of transferable course work).
7. Other University Requirements

Students must comply with all other graduate requirements contained in this catalog.

Special Session Program Information

Academic Programs offered through Special Session are operated by the College of International and Extended Studies (IES). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

**Total Units Required** 30
MS - Transportation Management (Special Session)

The Master of Science in Transportation Management (MSTM) is a fully accredited 30-unit program, taking little more than two years to complete. The curriculum includes six required courses, three electives and the culminating capstone course, MTM 290, "Strategic Management in Transportation."

The curriculum is led by nationally recognized instructors who are academic or industry experts. The Master’s program is fully accredited by the Association to Advance Collegiate Schools of Business (AACSB). The program is based on an accelerated format, enabling students to complete a Master of Science in Transportation Management degree in a little more than two years. Classes are held on weekday evenings, allowing students to work full time while earning their degrees. Students generally take one course at a time, one night per week for each 10-class session, for a total of four classes per year. The program is available statewide at designated Caltrans district offices and other participating transportation agencies. Classes are delivered by two-way video conferencing, supplemented by web courseware.

Admission Requirements
- Four year undergraduate degree from an accredited institution, with a minimum 3.0 GPA for the last 60 units.
- GMAT or GRE with balanced verbal and quantitative scores at the 50th percentile or above.
- For students who do not possess a bachelor’s degree from a postsecondary institution where English is the principal language of instruction, the Test of English as a Foreign Language (TOEFL) is required, with a paper score of 550 or better; a computer score of 213 or better; or an internet-based score of 80 or better.

Special Session Program Information
Academic Programs offered through Special Session are operated by the College of International and Extended Studies (IES). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Culminating Experience
The culminating experience is incorporated into MTM 290, Strategic Management in Transportation as an individual comprehensive project.

Maintenance of 3.0 GPA
Students must maintain a grade point average of 3.0 or better on all graduate level course work. Students who receive grades of “C-”, “D”, “F”, or “U” in any graduate course must repeat the course with a grade of “C” or better. In addition, any student whose GPA falls below 3.0 or receives two or more unsatisfactory grades (“C-”, “D”, “F”, or “U”) in graduate status, regardless of units completed, may be disqualified from the MSTM program. Disqualification requires students to complete a program of study for reinstatement with the graduate advisor and reapply for admission. It is the policy of the Donald and Sally Lucas Graduate School of Business not to readmit disqualified graduate students after a second disqualification.

Graduation Writing Assessment Requirement
The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Transfer Credit
Subject to approval of the Donald and Sally Lucas Graduate School of Business Program Coordinator and validation by the Associate Vice President for Graduate Studies and Research, students may transfer a maximum of six units of related graduate course work from another AACSB accredited institution to satisfy elective course requirements. Grades in the transfer courses must be “B” or better. Extension course work from other institutions is not acceptable.

Other University Requirements
Students must comply with all other graduate requirements contained in this catalog.
Chemistry Department
College of Science

Abraham Wolcott

Curricula
⦁ BA, Chemistry
⦁ BS, Chemistry
⦁ BS, Chemistry, Concentration in Biochemistry
⦁ Minor, Chemistry
⦁ MA, Chemistry
⦁ MS, Chemistry

Introduction
Chemistry plays an integral role in solving everyday problems in areas such as energy production, pollution control and disease prevention. Our graduates go on to gain advanced degrees in chemistry, medicine, pharmacy and dentistry or enter the job market directly, building careers in the pharmaceutical, biotechnological, biomedical, energy and green technology sectors. We provide broad access, high quality education in the molecular sciences at both the bachelor’s degree and master’s degree levels. Undergraduates may specialize in biochemistry. Graduate degree candidates focus on analytical chemistry, biochemistry, inorganic, organic or physical chemistry. Our curriculum, taught by experts in each of the subfields of chemistry, supplements traditional classroom courses with hands-on laboratory and research instruction. For teaching purposes, as well as to support the department’s research mission, we maintain a large collection of state-of-the-art instrumentation, including mass spectrometers, spectrophotometers and lasers.

Undergraduate Honors Program
Student must be nominated by their research advisor and is selected for department honors by the Chemistry Department faculty. To be nominated chemistry majors need at least a 3.5 GPA in all chemistry course work required for the major and a minimum of two semesters of research by the time of graduation. The student would also have to submit, in electronic form, a written research report to support the nomination.
Non-Compliance with Safety Rules
Failure to comply with proper procedures and prescribed safety cautions shall subject the student to removal from the laboratory and/or disciplinary action.
1. Any student who engages in unauthorized experimentation or who seriously disregards safety, thereby endangering self or others shall be withdrawn immediately from the class with a grade of “F”.
2. Any student who shows persistent disregard for safety may have his or her grade lowered, and may risk being withdrawn with a final grade of “F”.

Prerequisites
Courses prerequisite to all chemistry courses must be passed with a grade of “C” or better (“C-” not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description.
BA - Chemistry

This program provides a fundamental chemistry background, while affording ample electives for developing a second specialty. The degree is designed for those wishing to work in scientific laboratories, or in fields allied to chemistry such as medicine, environmental monitoring, electronics, food processing, sales, pharmaceuticals, safety, literature search, or in a supervisory capacity in businesses dealing with chemical products.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Prerequisite Requirements

Any course that is prerequisite to any Chemistry Course must be passed with a grade of “C or better” (C- not accepted).

### Physical Education

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

*A grade of "C or better" (C- not accepted) is required to meet graduation requirement.*

### University Electives

16

### Total Units Required

120
BS - Chemistry

This curriculum prepares students for graduate work in chemistry or for responsible positions in industrial or government laboratories. This degree meets all requirements for Certification by the American Chemical Society. It does not require a minor, although with judicious choice of electives, a minor may be obtained in biology, mathematics or physics.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Prerequisite Requirements

Any course that is prerequisite to any Chemistry Course must be passed with a grade of “C or better” (C- not accepted).

Graduate Admission Requirements

Admission to Classified Standing
In addition to the minimum requirements for admission to the Graduate Division outlined in this catalog, a minimum of 40 semester units in undergraduate chemistry is required. This should include two semesters of organic chemistry with lab (equivalent to CHEM 112A, CHEM 112B, CHEM 113A and CHEM 113B), one semester of quantitative analysis (equivalent to CHEM 55), and one semester of physical chemistry (equivalent to CHEM 160). A minimum chemistry GPA of 2.5 is required, but 3.0 is preferred. Those wishing to concentrate in biochemistry must also have completed two semesters of biochemistry lecture (equivalent to CHEM 130A and CHEM 130B) and lab (equivalent to CHEM 131A and CHEM 131B). Scores from the general GRE and two letters of recommendation are also required for admission.

Admission to Conditionally Classified Standing
Conditional classification may be granted to students who meet minimum requirements for admission to the Graduate Division but need additional course work to meet the minimum department entrance requirements outlined above, or for those with a chemistry GPA between 2.5 and 3.0. Transfer to classified standing is accomplished by petition after the deficiencies have been cleared.

Admission to Candidacy
Normally after about 20 units of course work are complete (including about 12 units of the 200-level chemistry lectures), the student can apply for Candidacy for the degree. In addition to the above, in order to apply for Candidacy the student must have Classified standing. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. The 30 unit proposed program is written by the Graduate Advisor in consultation with the student and describes completed course work and course work planned for the future. This must include a minimum of 18 units of graded course work. The program must be approved by student’s Research Advisor and Graduate Studies.

The student and the Graduate Advisor are notified in writing when the program is approved or denied. Students cannot enroll in CHEM 299 (Thesis) or apply for graduation until they officially are Candidates for a degree. Our department requires two units of CHEM 299 for Plan A. No excess 299 units are allowed.

Circumstances may arise that require a change in an approved program (e.g. the student wishes to substitute class for one on the approved program). Requests for such changes are made through the Graduate Advisor and must be approved by Graduate Studies.
MS - Chemistry
This degree is designed for persons who seek greater competency in chemical research, or for those who want an introduction to graduate work before starting a program for the PhD degree. Emphasis is placed upon, but not limited to, training in advanced laboratory techniques, operation of state-of-the-art instruments, data acquisition and interpretation, and strategies involved in designing and conducting research in chemistry.

Completing Requirements for the MS - Chemistry
The MS program will be designed to fit the individual vocational objectives of each student. The program shall include 30 semester units of work beyond the bachelor’s degree.

Thirty units of course work must be chosen so that a minimum of 21 units are in chemistry of which at least 12 are 200-level graduate lecture courses, and 18 units must be graded course work.

A. Required: CHEM 120S (1 unit), 285 (2-3 units), 298 (4-10 units), 299 (2 units), 200-level lecture courses (12 units).

B. Approved electives (3-9 units are required) chosen from the following:
1. Any 200-level chemical course. (See the Chemistry Department Graduate Handbook for guidelines on 200-level courses within the proposed program.)
2. Any of the following chemistry courses if appropriate for the area of concentration and if approved by Graduate Advisor: CHEM 101, 114, 118, 121S, 126, 127, 130A, 130B, 130C, 131A, 131B, 135, 145, 146, 155, 173.
3. Upper division and graduate courses from departments other than chemistry (courses must be approved by Graduate Advisor prior to enrollment in such courses).

C. Master’s Research Presentation (departmental seminar and final oral examination).
D. Submission of an M.S. Thesis approved by the student’s research committee, and by Graduate Studies.

The progress of each candidate will be reviewed periodically, and specific recommendations for further work will be made on the basis of such evaluations.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Academic Year
2016-2017

Departments & Degrees

v01
June 10, 2016

ALL DATES, FEES & INFORMATION
SUBJECT TO
CHANGE WITHOUT NOTICE

Courses that meet General Education/American Institution requirements are noted with area designation for required area.

For Legend please see page 2
MA - Chemistry
This degree is designed for persons who seek to augment and enhance their knowledge of chemistry beyond the bachelor’s level. It is intended only for those who are interested in high school or community college teaching, technical librarianship, scientific writing or those with significant research experience currently employed in the industrial sector. It is not recommended for those who wish to conduct or direct chemical research without prior industrial research experience.

Completing the Requirements for the MA - Chemistry
The program shall include 30 semester units beyond the bachelor’s degree.

The course and unit requirements for the MA are the same as those for the MS listed above, with the following exceptions:
1. A maximum of two units of CHEM 285 and/or CHEM 291C shall be applied toward the degree.
2. The four-unit CHEM 298 research project for the MS degree shall be replaced by an approved three-unit (CHEM 297) MA project.
3. The MA program shall include an advanced chemistry laboratory course (2-4 units).
4. Master’s Project Presentation (departmental seminar and final oral examination).
5. Submission of an M.A. Thesis approved by the student’s research committee and by Graduate Studies.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

⦁ Minor, Atypical Child Studies
⦁ Minor, Child and Adolescent Development
⦁ MA, Child and Adolescent Development

Introduction
Interested in K-8 teaching, in working in childcare or in agencies serving children, youth, and families? A degree in child and adolescent development is excellent training for careers involving children and families. Or perhaps you already possess entry-level credentials, already work with children and youth and want to advance your career. A wide range of professionals—from childcare administrators to parent educators to child/youth advocates to child and family counselors to pediatric nurses to healthcare workers—have gained the knowledge and expertise they needed to move ahead in the workplace through our bachelor’s and master’s degree programs. Our curriculum incorporates theory, research, policy and practice, providing students with a comprehensive understanding of children and adolescents. For hands-on training we offer numerous activities in community agencies and we operate a campus laboratory preschool. We graduate well-informed, responsible individuals, sensitive to the commonalities and diversities of the world and its people.

Child and Adolescent Development Honors Program
Students may apply for the departmental Honors Program in Child Development if they meet the following criteria: completion of 9 units of upper division child development course work with a minimum GPA of 3.5, and completion of CHAD 101 or STAT 95 (or equivalent) with a grade of “A-” or better. Students who meet the entrance criteria will be awarded departmental honors by showing evidence of distinguished scholarly work as indicated by completion of a BA honors thesis (CHAD 199: Honors Thesis) or work leading to a published paper or presentation at a professional meeting, and a minimum GPA of 3.5 in all upper division child development courses.
BA - Child and Adolescent Development

This program provides a strong foundation in child development and could be the basis for graduate study in child development and related fields. Students who have declared Child and Adolescent Development as their major should meet with the Department advisor for consultation and approval of the program. Assigned advisor information is posted inside and outside of SH 201 and is listed on the department website www.sjsu.edu/chad/advising/.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

University Graduation Requirements

University Electives or Minor

UNIVERSITY ELECTIVES MAY BE CHOSEN BY STUDENT, HOWEVER THE DEPARTMENT HIGHLY RECOMMENDS THE FOLLOWING COURSES. IF NOT TAKEN ABOVE.

- CHAD 104. Program Evaluation and Assessment in Community-Based Programs .................................................. 3
- CHAD 150. Development of Communicative Competence .......................................................................................... 3
- CHAD 151. Developing Literacy in a Diverse Society ................................................................................................. 3

Total Units Required

Note: The following Capstone courses, CHAD 160, CHAD 159 and CHAD 195 may be repeated only once.
BA - Child and Adolescent Development, Preparation for Teaching

This major is designed for students interested in teaching in elementary school or middle school. The following course work satisfies San José State University’s requirements for a BA in Child and Adolescent Development. The SJSU pattern of Preparation for Teaching course requirements is designed for students who begin their college careers in this major. New students in this BA track should see a department advisor during the first semester of their freshman year for a list of the required courses. Students who are transfers or who are changing into this major, in consultation with a department advisor, identify the course work appropriate for the individual. The Commission on Teacher Credentialing in the state of California (CCTC) no longer recognizes Teacher Prep degrees as verification of subject matter competence. In order to verify subject matter competence for Multiple Subject Teaching Credential (K-8) individuals must pass all portions of the appropriate Commission-approved subject matter examination (CSET for Multiple Subjects).

Maintaining a minimum grade point average (GPA) of at least 2.87 and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Note: The following Capstone courses, CHAD 159 and CHAD 195, may be repeated only once.
## Minor - Atypical Child Studies

Provides a solid foundation in both normative and atypical early childhood development. Particularly beneficial for students who plan to pursue careers in a number of branches of the social and life sciences, education, medicine and other human services professions focusing on atypical infants/children and their families.

**Total Units Required**

15

A minimum grade of “C or better” is required in the courses taken for the minor.
MA - Child and Adolescent Development

Requirements for Admission
1. An application for admission to the university and an application for admission to the Child and Adolescent Development Graduate Program are required. Students must be admitted to both the master’s degree program and the Graduate Division of the university. These require separate applications, and admission to one does not guarantee admission to the other. Contact the Office of Admissions and Records for information on application forms, procedures and deadlines for admission to the university.

Application forms for the master’s degree program are available in the Child Development Department office located in Sweeney Hall 201. The completed application form with accompanying materials should be sent to the Child and Adolescent Development Department Graduate Program Coordinator, San José State University, One Washington Square, San José, CA 95192-0075. Questions regarding MA programs may be directed to Dr. Maureen Smith, Graduate Advisor. The deadline generally is April 30 for admission to the fall semester.

2. A minimum 3.0 grade point average and a score on the Graduate Record Examination (GRE).
3. A score above 550 on TOEFL (international students only).
5. Three letters of recommendation from current or former professors and/or employers who can testify to the candidate’s ability to pursue successfully an advanced academic degree. Letters should be sent directly to the Child and Adolescent Development Department Graduate Program Coordinator.
6. Transcripts of record from all college level institutions attended.

Requirements for Admission to Classified Standing
Applicants must meet all university Graduate Division admission requirements as well as those of the College of Education. College of Education requirements include a grade point average of 3.0 or higher during the last two years of undergraduate study, including work in the major.

Requirements for Admission to Candidacy for the Master of Arts Degree
To be admitted to candidacy for the Master of Arts degree, a student must first meet the all-university requirements for the degree as stated in this catalog, including successful completion of the Graduation Writing Assessment Requirement. Applicants must also meet with a graduate advisor to plan a formal, 30-unit course of study, and successfully complete 9 units of course work in the department. The proposed graduate program must be approved by the Graduate Advisor and the Graduate Coordinator before the student may be considered a candidate for the MA degree.

Requirements for the MA - Child and Adolescent Development
With approval of an advisor, the minimum program for completing the 30-unit requirement is as follows:

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Requirements of the Masters

Culminating Experience

| Plan A (Thesis) | 3-6 |
| CHAD 299. Master’s Thesis | 3-6 |
| Plan B (Project) | 3-6 |
| CHAD 298. Special Studies in Child and Adolescent Development | 3-6 |

Electives

Nine units of upper division and graduate level courses are to be taken in consultation with an advisor.
Candidates for the MA - Child and Adolescent Development may elect Plan A (Thesis) or Plan B (Project).

Plan A (Thesis)
Plan A requires a thesis and an oral examination. Thesis proposals must be approved by the graduate committee. Two advisors will be assigned to work with the candidate on the thesis, and the thesis committee must be a committee of three. Students enroll in CHAD 299, MA Thesis, for 3 units. Completion of the degree also requires a 3.0 GPA in all courses taken to meet the degree program.

Plan B (Project)
Plan B requires satisfactory completion of a project or research paper. These students enroll in CHAD 298, Special Studies in Child Development, for 3 units. Completion of the degree also requires a 3.0 GPA in all courses taken to meet the degree program.

⦁ BS, Civil Engineering
⦁ MS, Civil Engineering

Introduction
Civil engineers plan, design and supervise the construction of water supply systems, communications networks and transportation systems. They construct buildings. Using modern technology, they solve pollution and planning problems and tackle other engineering challenges. The Department of Civil and Environmental Engineering offers both bachelor’s and master’s degree programs. The undergraduate program includes course work in construction, environmental, geotechnical, structural, transportation and water resources engineering. Classroom instruction, conducted by award-winning professors, is supplemented by hands-on laboratory experience, field trips and the opportunity to participate in student clubs, including the American Society of Civil Engineers, Associated General Contractors, Institute of Transportation Engineers, Water Environmental Federation and American Water Works Association. To accommodate graduate students who also work, graduate courses are scheduled in the late afternoon and evening. The BS Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org
BS - Civil Engineering

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

The following course in Preparation for the Major must be completed with a “C or better”: ENGL 001B

### Additional Courses

- Three courses from Civil Engineering electives approved by advisor.
- Two of the three elective courses must be approved design electives.

### Total Units Required

| Units | 120 |
### Requirements for Admission to Classified Standing

In addition to meeting requirements for admission to the Graduate Division outlined in the Admissions section of this catalog, an applicant must have:

1. A bachelor’s degree in civil engineering from a college or university offering a curriculum in civil engineering accredited by the Accreditation Board for Engineering and Technology (ABET); and
2. A 2.7 grade point average (basis 4.0) in engineering, mathematics and science coursework leading to the baccalaureate.

### Requirements for Admission to Conditionally Classified Standing

Applicants who do not qualify for classified standing in civil engineering but who meet university requirements for graduate admission and whose academic records or professional achievements and maturity give promise of satisfactory performance in graduate study in civil engineering may, upon approval of a committee of department faculty, be admitted, with specific conditions, as conditionally classified. The conditions must be fulfilled before the student can be admitted to candidacy for the degree. If the conditions are not fulfilled, the program reserves the right to dismiss the student from the program by notifying the Associate Dean for Graduate Studies. This process is known as administrative academic disqualification (see Section 41300.1, Title 5, California Code of Regulations). Applicants whose bachelor’s degrees are not in civil engineering will be required to take additional courses which cannot be counted in the graduate degree program for the MS - Civil Engineering. Details can be obtained from the department graduate coordinator.

### Requirements for Admission to Candidacy

Students must meet the general all-university requirements for candidacy as outlined in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [www.sjsu.edu/gape](http://www.sjsu.edu/gape).

### Completing Requirements for the MS - Civil Engineering

The curriculum for the MS - Civil Engineering requires completion of 30 semester hours of approved study, with a minimum of 15 units earned in 200-level civil engineering courses. Either Plan A (with thesis) or Plan B (without thesis) may be selected. Minimum requirements for each are:

#### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

#### Requirements of the Masters

**30**

</tr>
</tbody>
</table>
Total Units Required

Eligible major civil engineering areas are:
- Construction Management
- Environmental Engineering
- Geotechnical Engineering
- Structural Engineering
- Transportation Engineering
- Water Resources Engineering

Acceptable areas for minor and electives are chosen in consultation with an advisor. Approved courses may include graduate courses and upper division elective courses in civil engineering and graduate or upper division courses in other university departments.

The university requirement for a final master’s degree examination may be satisfied by a comprehensive examination or an independent study project (a minimum of 2 units of CE 298) with an oral examination. Details of these requirements may be obtained from the department. All students must complete the Graduation Writing Assessment Requirement.
College of Engineering

College of Engineering

ENGINEERING BUILDING 493

Introduction

College of Engineering Programs
The Charles W. Davidson College of Engineering offers undergraduate and graduate programs in Aerospace Engineering; Biomedical, Chemical and Materials Engineering; Civil and Environmental Engineering; Computer and Software Engineering; Electrical Engineering; General Engineering; Industrial and Systems Engineering; Mechanical Engineering; and Aviation. Each department offers a variety of major and minor programs which are identified in their respective parts of this catalog. General Engineering also offers interdisciplinary degrees in Engineering.

Preparation for Engineering Programs
To prepare for engineering, the high school student should take as much advanced math and science as possible, as well as high school engineering and technology courses that may be available at their school. Students with scores of 4 or above on the AP Calculus exams may be able to accelerate their degree program; students who are not calculus-ready on entrance may take a longer time to graduate. Students transferring from California community colleges will be given junior level standing in the Major if they have successfully completed the following course work:

- 12 semester units of calculus and differential equations
- 5-10 semester units of chemistry
- 8-13 semester units of physics which require calculus as a prerequisite
- 10-14 units of lower division engineering appropriate to their engineering major

Transfer students should use assist.org or this SJSU online catalog to determine the specific lower division requirements of their major. Graduation following two academic years of study is possible if the student completes all lower division units before transfer, satisfactorily completes the required upper division coursework and remains in good standing in the Major.

Preparation for Technology and Aviation Programs
To prepare for technology and aviation majors, the high school student should take industrial technology classes such as electronics, drafting, and manufacturing, or any engineering classes offered at their school, and should complete courses in physics, chemistry, and pre-calculus or calculus.

Community college students are urged to complete as many of the lower division requirements as possible in chemistry, physics, mathematics and technology or aviation at the community college.

Progress to Degree Requirements
All College of Engineering undergraduates are required to stay in good standing in their major by maintaining a Major GPA of 2.0 or above. The Major GPA includes all courses required for the major, including both lower and upper division math, science, engineering, technology, aviation or business courses required by their major. Some departments have additional grade requirements for individual courses, groups of courses or all courses taken in their department. See departmental sections for these requirements. Additional university GPA requirements are specified elsewhere in this catalog.

Incoming Engineering frosh, or other students seeking to change major into Engineering, must complete Math 30 (or 30P), Math 31 and Physics 50 within their first 60 units at SJSU. The Progress to Degree policy can be found on the College advising website.

General Education Requirements
Of the 51 units required by the university up to 27 units may be satisfied by specified major and support requirements. Engineering majors may satisfy the remaining units by taking AMS 1A-B (12 units), ENGL 1A-B (6 units), Oral Communication (3 units) and ENGR 100W (3 units). Transfer students may satisfy core GE through the IGETC or CSU breadth requirements. Consult advisors in the Engineering Student Success Center (Engr 344) for details.
Undergraduate Programs Offered

The College of Engineering offers BS degrees in:

- Aerospace Engineering
- Aviation
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical Engineering
- General Engineering
- Industrial and Systems Engineering
- Industrial Technology
- Materials Engineering
- Mechanical Engineering
- Software Engineering

Please see the Degrees or Departments listings in this catalog for information about each undergraduate major.
Graduate Programs Offered

The College of Engineering offers graduate work leading to Master of Science degrees in:

- Aerospace Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical Engineering
- Engineering (Interdisciplinary) Program
- Industrial and Systems Engineering
- Materials Engineering
- Mechanical Engineering
- Software Engineering

Graduate work offered by the College of Engineering reflects and supports the advanced scientific and technological endeavor which is typical of California industry, government and business.

Departmental curricula provide full- and part-time students the opportunity either to obtain master’s degrees or to take specialized courses to improve job capabilities.

The Master of Science in Engineering offered by the General Engineering Department has unique, interdisciplinary characteristics which may be particularly appealing to persons with a bachelor’s degree in engineering who are currently working in a technical management area and wish to extend their education.

The College of Engineering requires that all students whose native language is not English achieve a minimum score of 550 on the TOEFL examination. Students who meet this and the requirements for admission to the Graduate Division as outlined in this catalog should see individual department listings for requirements for admission to classified standing, conditionally classified standing and admission to candidacy for the specific degree in engineering.

In addition to departmental requirements, the University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Programs Evaluations website at www.sjsu.edu/gape. In addition, all graduates must complete an acceptable thesis, project or comprehensive examination.

⦁ MA, Communication Studies

Introduction
The Department of Communication Studies prepares competent and ethical communicators for meaningful participation in diverse local and global communities. The B.A. and M.A. programs focus on four primary areas or cornerstones: democracy, diversity, technology, and globalization. Democracy affirms the balance of individual freedom and socio-political consensus shaped through dialogue, argument, and persuasion between individuals and groups. Diversity explores the variety and complexity of communication efforts to shape beliefs, values, and perceptions in different communities and cultures. Technology interrogates the implications of human communication in a mediated world. Globalization recognizes the interconnectedness, integration, fragmentation, and conflict within human societies and cultures in global contexts. Our undergraduate and graduate degree programs prepare alumni for a wide range of careers in areas such as education, sales, marketing, public relations, human resource development, law, politics, and community service.
Communication Studies Honors Program

Students requesting departmental honors in Communication Studies will be evaluated against the following criteria: (1) a minimum GPA of 3.5 in all four unit upper division courses in the major (Foundations, Inquiry, Practice Courses, 101C and 199C); (2) have at least a 3.0 overall GPA; (3) satisfactorily complete one of the department’s four-unit graduate seminars; and (4) participate in a public honors colloquium to present a summary of the work produced in the selected graduate seminar. Contact the department office for details.
BA - Communication Studies

The department provides suggested programs and advice for students interested in emphasizing special areas of speech and communication, and for those wishing to combine courses in the major with relevant electives in other departments. Interdisciplinary interests are encouraged.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

COMM 101C is a prerequisite for COMM 198 and COMM 199C. No core GE classes may be double-counted in the major. Up to 6 units of SJSU Studies may be counted toward the major.

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 6 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

### Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

### Requirements of the Major
For the BA in Communication Studies only 6 units of CR/NC coursework will be accepted.

#### Core Courses
- COMM 101C. Junior Seminar: Theorizing Communication .................................................. 4
- COMM 198. Applied Activity in Communication ................................................................. 1-2
- COMM 199C. Senior Seminar: Synthesis & Application ..................................................... 4

#### Major Courses
- Foundations Courses ........................................................................................................... 8

### University Electives

A minor is encouraged but not required.

### Total Units Required

120
BA - Communication Studies, Preparation for Teaching

This major is designed for students interested in teaching English or speech communication in high school or middle school. The following course work satisfies San José State University’s requirements for a BA in Communication Studies.

A Minimum grade point average (CPA) and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

## Minor - Communication in the Information Age

This interdisciplinary minor Communication in the Information Age provides students the theoretical insights and practical skills necessary to thrive in the information age. The curriculum teaches the basic skills of information retrieval and evaluation; provides insight into contemporary media practices; and explores the intersection of technology, identity, and culture. Completion of this minor means that you can:

- Employ a broad range of resources and information technologies (including content development, visual design, and website construction) for the purposes of effective personal, artistic, and professional communication.
- Practice effective principles of information gathering, evaluation and synthesis while demonstrating awareness of legal, ethical, and practical issues relating to these practices.
- Develop reasoned and well articulated perspectives on contemporary questions related to rights and responsibilities in the information age, with particular awareness of issues related to equity, intellectual property, intellectual freedom, and the ethical responsibilities of media institutions.

MA - Communication Studies

Requirements for Admission to Classified Standing
An applicant must first meet the requirements for admission to the university as set forth in this catalog. Admission as a classified graduate student in communication studies requires that the applicant present the following additional materials to the Graduate Coordinator:

1. Two letters of recommendation attesting to the applicant’s readiness for advanced academic study.
2. Evidence of the applicant’s success in his or her undergraduate major. Normally, this would entail showing a 3.0 average (on a 4.0 scale) in upper division courses in the applicant’s major.
3. Evidence of readiness for advanced study in communication studies as shown by either a bachelor’s degree in the field or other appropriate course work.
4. A personal statement (approximately 1000 words) addressing the candidate’s reasons for wanting to pursue the MA in Communication Studies, her/his goals and expectations for graduate study, and her/his relevant professional and academic experience.
5. A writing sample of approximately 3,000 words (not to exceed 4,000 words) that showcases both writing and research skills. The topic need not relate directly to the study of communication.

Requirements for Admission to Conditionally Classified Standing
An applicant who does not meet all requirements for admission to classified standing may be admitted in a conditionally classified status. If the applicant’s grade point average in his or her undergraduate major is below 3.0, the graduate coordinator may require additional undergraduate work in communication studies. If the applicant lacks courses necessary for successful graduate work in the department, the graduate coordinator will specify upper division courses necessary for the study of communication. If the applicant does not score a minimum of 4 on the analytic section of the GRE, the graduate coordinator may require enrollment in the program’s writing workshop. Courses prescribed as preliminary to classified standing do not count as part of the 35 units required for the MA - Communication Studies.

Requirements for Admission to Candidacy
After completing a minimum of nine units of graduate work (with at least a “B” average), students may apply to candidacy for the MA - Communication Studies. Admission to candidacy requires:

1. An approved program of study consisting of 35 units, developed in consultation with the graduate coordinator and in conformity with university and departmental requirements.
2. Completion of the Graduation Writing Assessment Requirement. The graduate coordinator will indicate which of the options for satisfying this requirement are appropriate for the student.

Core Requirements for the MA - Speech Communication
All approved programs of study must include: COMM 200R, COMM 201, and COMM 297.
Students may select additional courses, subject to the following requirements, for completion of the MA degree:

- At least 35 units must be on the graduate (200) level.
- At least 26 units must be graded (i.e., “A”, “B”, “C”) work.
- At least 29 units must be taken in the Communication Studies Department.

Students will complete their total of 35 units of study (with a minimum average grade of “B”) through Plan B1 (comprehensive examination). After passing the comprehensive exam, students have the option of also completing Plan A (thesis) or Plan B2: (special project) with approval from the departmental graduate committee.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Requirements of the Masters 35
## Departments & Degrees

**Academic Year 2016-2017**

COMM 298. Master’s Project | 1-4

**Total Units Required** 35
Areas of Specialization within the Major
An MA - Communication Studies candidate may specialize in one or more areas of communication study.

- Communication and culture
- Communication and instruction
- Communication theory
- Computer mediated communication
- Group communication
- Intercultural communication
- Interpersonal communication
- Language and meaning
- Nonverbal communication
- Organizational communication
- Performance Studies
- Persuasion
- Public address and social movements
- Public deliberation and dialogue
- Reasoning and theory of argument
- Rhetorical theory and criticism

Many of the above areas overlap in content. While none of these is a formal concentration, each of these areas can be supported by several undergraduate and graduate courses in the curriculum and can help the student organize the plan of study.

Introduction
Located in the center of Silicon Valley, the Department of Computer Engineering provides local and national high-tech companies with high quality, practice-oriented computer graduates. Bachelor’s and master’s degree programs are offered in both computer engineering and software engineering. Course topics range from computer hardware design and embedded systems to software design and Construction of real-time systems, virtual systems, and enterprise software. Curriculum integrates concepts and hands-on practice using the latest developments in emerging technologies, design, verification, implementation, and computer systems applications to provide students with advanced hardware and software skills. High-tech companies seek out our graduates. Our alumni work in hardware/software analysis, design and verification, hardware/software co-design, systems software, domain applications and product testing at many Silicon Valley firms from start-ups to Fortune 100 companies. The BS Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.
## BS - Computer Engineering

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

### Major-Specific Graduation Requirements

All courses in the Preparation and Required in Major (all courses in preparation, core, and concentration) must be completed with a grade of “C- or better”. The following Preparation for the Major courses must be completed with a grade of “C or better”: ENGL 001B, MATH 30, MATH 31, PHYS 50 and PHYS 51.

### University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>
<th>6</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 39 units required by the university, 33 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a ‘C- or better’ to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

<table>

#### Approved Upper Division Electives

Selected in consultation with the student's advisor

#### Total Units Required

120
Certificate - Fundamentals of Cybersecurity

The Computer Engineering program offers an 18-unit certificate program to students seeking career opportunities in cyber security. The program aligns with the nationally defined knowledge areas and prepares the students with well-grounded fundamentals to become a professional in cyber security.

- CMPE 130. Advanced Algorithm Design ................................................................. 3
- CMPE 132. Information Security ................................................................................. 3
- CMPE 138. Database Systems I .................................................................................. 3
- CMPE 142. Operating Systems Design ...................................................................... 3
- CMPE 148. Computer Networks I ............................................................................... 3
- SE 158B. Computer Network Management .............................................................. 3

Total Units Required 18
Certificate - Cybersecurity Engineering

With the global threats of cyber-crime, our nation’s continued security and economic prosperity depend on the availability of increasing cyber security workforce. The Computer Engineering Department offers a 12-unit Cyber Security Engineering (CSE) Certificate program to students who seek career opportunities in cyber security and information assurance. The courses in the certificate program cover mobile-based software system, advanced topics, and project experience in information security.

<table>

Certificate - Secure Test Engineering

With the global threats of cyber-crime, our nation’s continued security and economic prosperity depend on the availability of increasing cyber security workforce. The Computer Engineering Department offers a 9-unit Secure Test Engineering (STE) Certificate program to students who seek career opportunities in cyber security and information assurance. The courses in the program cover the fundamentals in the design of secure software systems, including software systems engineering, quality assurance, and enterprise platforms.

- BUS 248. Cyber Risk Management ................................................................. 3
- CMPE 202. Software Systems Engineering ...................................................... 3
- CMPE 287. Software Quality Assurance and Testing ..................................... 3

Total Units Required 9
Certificate - Secure Software Engineering

With the global threats of cyber-crime, our nation’s continued security and economic prosperity depend on the availability of increasing cyber security workforce. The Computer Engineering Department offers a 9-unit Secure Software Engineering (SSE) Certificate program to students who seek career opportunities in cyber security and information assurance. The courses in the certificate program cover critical aspects in security domain, including network security, software security, and cyber risk management.

- CMPE 209. Network Security .........................................................3
- CMPE 272. Enterprise Software Platforms ....................................3
- CMPE 279. Software Security Technologies ....................................3

Total Units Required 9
MS - Computer Engineering

Requirements for Admission to Classified Standing
In addition to meeting requirements for admission to Graduate Division outlined in the Admissions section of this catalog, a student must possess a baccalaureate degree with a major in computer engineering and a grade point average of 3.0 (last 60 upper division technical units) or better from an ABET (Accreditation Board for Engineering and Technology) accredited computer engineering program.

Requirements for Admission to Conditionally Classified Standing
Applicants who do not have a baccalaureate degree in computer engineering but who meet university requirements for graduate admission and whose academic records or professional achievements give promise of satisfactory performance in graduate study in computer engineering may be admitted to conditionally classified standing. Applicants whose bachelor’s degrees are not in computer engineering will be required to take additional courses which will not be counted in the graduate degree program for the MS - Computer Engineering. GRE General Test is required for those who do not have a bachelor’s degree from an accredited university in the United States or Canada.

Completing Requirements for the MS - Computer Engineering
To meet the requirements for the MS - Computer Engineering, a student must complete 30 units of 200-level courses with a cumulative GPA of 3.0 or better. No undergraduate course counts towards the master's degree unless approved by the graduate advisor. At least 24 units must be 200-level computer engineering courses. Either Plan A (with thesis) or Plan B (without thesis) may be chosen. Minimum requirements for each are:

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Students may further strengthen their degree by adding internships (CMPE 298I) to their program of study.

University Requirements

In addition to the above requirements, each student must satisfy all university requirements and procedures as stated in this catalog.

Graduation Writing Assessment Requirement for Graduate Students

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.
# MS - Software Engineering

## Requirements for Admission to Classified Standing
In addition to meeting requirements for admission to Graduate Division outlined in the Admissions section of this catalog, a student should possess a computer-related baccalaureate degree and a grade point average of 3.0 (last 60 upper division technical units) or better from an ABET (Accreditation Board for Engineering and Technology) accredited program.

## Requirements for Admission to Conditionally Classified Standing
Applicants who do not have a computer-related baccalaureate degree, but who meet university requirements for graduate admission and whose academic records or professional achievements give promise of satisfactory performance in graduate study in software engineering may be admitted to conditionally classified standing. Applicants whose bachelor’s degrees are not computer related will be required to take additional courses which will not be counted in the graduate degree program for the MS - Software Engineering.

## Completing Requirements for the MS - Software Engineering
To meet the requirements for the MS - Software Engineering, a student must complete 30 units of 200-level courses with a cumulative GPA of 3.0 or better. No undergraduate course counts towards the master’s degree unless approved by the graduate advisor. At least 24 units must be 200-level software engineering courses. Students may further their degree by adding internships (CMPE 298I) to their program of study.

Four areas of specialization are defined in Software Engineering: Enterprise Software Technologies, Cloud Computing and Virtualization, Software Systems Engineering, and Networking Software. Details can be found on the department web site.

## University Requirements
In addition to the above requirements, each student must satisfy all university requirements and procedures as stated in this catalog.

### Graduation Writing Assessment Requirement for Graduate Students
The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [www.sjsu.edu/gape](http://www.sjsu.edu/gape).

### Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Curricula
⦁ BS, Computer Science
⦁ Minor, Computer Science
⦁ Certificate, Fundamentals of Cybersecurity
⦁ Certificate, Cybersecurity: Core Technologies
⦁ MS, Computer Science

Introduction
Computer science is all about algorithms: inventing, testing, debugging and improving algorithms that might control a robot’s brain, encrypt a stock trade—even simulate an ecosystem. Our bachelor’s degree, accredited by the Computing Accreditation Commission of ABET, http://www.abet.org, provides a solid foundation in the basic theories that underpin computer software technology. For those who wish to pursue more advanced studies, our master’s degree program offers convenient late afternoon and evening classes. Our prime Silicon Valley location fosters high-tech employment opportunities for our graduates, who currently make up a significant portion of the area’s programmers, software architects, system analysts and computer scientists.

Honors Program in Computer Science
The requirements for computer science majors to graduate with departmental honors are: (1) at least a 3.0 G.P.A. overall, (2) at least a 3.5 G.P.A. in the major, (3) Completion of CS 180H (Individual Studies for Honors).

Minimum Grade Requirement
A grade of “C- or better” is required for courses being used to meet any requirement in any minor or major offered by the Department of Computer Science, including support courses.
BS - Computer Science

This degree provides a solid background for a variety of careers in the computing profession. Entry level positions include jobs in programming, systems analysis, software engineering and customer support. Such positions are required by nearly every institution whether it is public or private. The Computer Science Program is accredited by the Computing Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD, 21202-4012, 410.347.7700. The program not only prepares students for graduate work in computer science, but also for advanced work in the related fields of management science and operations research.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

A grade of “C- or better” is required for courses being used to meet any requirement in any minor or major offered by the Department of Computer Science, including Preparation courses. The Preparation for the Major and Requirements in the Major sections must include at least 37 units of upper division mathematics and computer science course work, excluding CS 100W.

University Graduation Requirements

## Minor - Computer Science

At least 12 of units must be distinct from the student’s major. At least three units of upper division course work must be completed in the Computer Science Department at SJSU. Students are expected to have satisfied the prerequisites for any of the courses taken to fulfill the requirements for the Computer Science Minor.

A grade of “C- or better” is required for courses being used to meet any requirement in the minor.

### Major-Specific Graduation Requirements

A grade of “C- or better” is required for courses being used to meet any requirement in the minor.

## Total Units Required

18
Certificate - Cybersecurity: Core Technologies

The Computer Science Department offers a 9-unit advanced (graduate) certificate program to students to advance knowledge of cyber security. The program aligns with nationally defined knowledge areas and prepares students to become a professional in cyber security and information assurance.

- CS 158A. Computer Networks .................................................................3
- CS 265. Cryptography and Computer Security ........................................3
- CS 266. Topics in Information Security ...............................................3

With the permission, CS 158A may be substituted for one regular CS course that lists CS 158A as a prerequisite (including CS 158B, CS 258, and CS 268).

Total Units Required

9
MS - Computer Science

This degree provides greater depth in computer science for more advanced positions in industry or teaching at the community college level. Check the Department web site at http://www.sjsu.edu/cs/programs/mcs for details.

Transfer of Courses into the Major
At most nine credits may be transferred into the major from courses outside the Computer Science department at SJSU. Nine credits may be transferred into the program from coursework in the Computer Science department at SJSU. All transfer credits must fulfill the MS program requirements and be approved by the graduate coordinator.

Requirements for Admission to Classified Standing
To enter this program with classified standing a student must meet the minimum requirements for admission to the Graduate Division. In addition, entering students are expected to have a bachelor’s degree in computer science or its equivalent, i.e., at least the breadth and depth of the SJSU BSCS program. An applicant holding a recent Bachelor’s degree in computer science from an ABET accredited university will normally meet the course requirements for admission to the MS program.

Requirements for Admission to Conditionally Classified Standing
Students who meet the minimum requirements for admission to the Graduate Division can be conditionally classified if there is sufficient space in the program to accommodate them. Conditionally classified students will be required to complete undergraduate course work, as directed by the graduate coordinator.

Requirements for Admission to Candidacy for the MS - Computer Science
To be admitted to candidacy for the MS degree, a student must meet the all-university requirements as stated in the Academic Requirements section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Completing Requirements for the MS - Computer Science

Plan A (with Thesis)
After being admitted to candidacy, the student must obtain a thesis director from the computer science department who then becomes his or her advisor. A committee consisting of the thesis director, another professor from the computer science department, and a third member who is an expert in the field, selected by the thesis director with the approval of the department chairperson, must approve the thesis topic before work begins. Registration in CS 299 should be for the semester in which the candidate expects to complete the thesis. Upon completion of the thesis, the candidate must pass a comprehensive oral examination in the area of his or her thesis conducted by the thesis committee.

Plan B (with Culminating Experience)
After being admitted to candidacy, the student must obtain a project director from the computer science department who then becomes his or her advisor. A committee consisting of the project director, another professor from the computer science department, and a third member who is an expert in the field, selected by the project director with the approval of the department chairperson, must approve the project topic before work begins. Registration in CS 298 (Writing Project) should be for the semester in which the candidate expects to complete the project. Upon completion of the project, the candidate must pass an oral examination in the area of his or her project conducted by the project committee.

Electives
A list of permissible elective courses is published by the department. Courses which are not on this list must be approved by the graduate coordinator in advance. The elective units may include a maximum of 4 units of CS 180 and CS 280.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Requirements of the Masters

No more than 6 units may be taken from outside the Department of Computer Science.

Core Courses

Complete six courses from at least three subject areas. Option courses and their subject areas are as follows.
## Departments & Degrees

### Foundations
- CS 252. Advanced Programming Language Principles ......................................................... 3

⦁ Minor, Creative Arts

Introduction
Founded in 1956, the innovative Creative Arts Program is the only one of its kind in the CSU. The program offers a flexible, interdisciplinary curriculum that examines creativity across the arts domains and emphasizes both creative and critical thinking. Students take core courses in creative arts in combination with art, English, comparative literature, music, dance, radio, film, and theatre courses, individualizing their program of study. We offer a major and a minor in creative arts as well as a major in creative arts for teacher preparation. Key to the Program is an emphasis on creative thinking and the creative process. While our students' ability to complete projects and products is expected, we are equally concerned that students become critical and effective thinkers and problem-solvers. Our graduates have become successful visual and performing artists, teachers, arts administrators, software developers, software engineers, physicians, writers, sound recording engineers, costume designers, arts therapists, librarians, lawyers, and entrepreneurs.
Departments & Degrees

BA - Creative Arts

Advisor: Shannon Rose Riley. M.F.A., Ph.D.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

The following Required Major courses must be completed with a grade of “C or better”: CA 172, CA 173, CA 175, CA 176 and CA 178.

University Graduation Requirements

**Total Units Required**: 120
BA - Creative Arts, Preparation for Teaching

Advisor: Shannon Rose Riley, M.F.A., Ph.D.

This major is designed for students interested in teaching in elementary or middle school. The following course work satisfies San José State University’s requirements for a BA in Creative Arts Preparation for Teaching. The Commission on Teacher Credentialing in the state of California (CCTC) no longer recognizes Teacher Prep degrees as verification of subject matter competence. In order to verify subject matter competence for Multiple Subject Teaching Credential (K-8) individuals must pass all portions of the appropriate Commission-approved subject matter examination (CSET for Multiple Subjects).

Maintaining a minimum grade point average (GPA) of at least 2.87 and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

⦁ BFA, Graphic Design
⦁ BFA, Interior Design
⦁ Minor, Graphic Design
⦁ Minor, Interior Design

Introduction
California State University (CSU) has a unique mandate to provide professional design education in California, and San José State University is one of the few public universities the only public university in the state to offer education in animation and illustration, graphic, industrial and interior design within a single unit. Accredited by the National Association of Schools of Art and Design (NASAD), our department enjoys a reputation as one of the strongest centers of design education in California. We offer undergraduate degrees in animation and illustration, graphic design, interior design and industrial design as well as a BA in art with a concentration in design studies. Our comprehensive curriculum provides current, innovative training in the practice and theory of design in a broad spectrum of fields and specializations, preparing students conceptually and practically for a variety of careers. Our programs are also supported and enriched by end-of-the-year portfolio exhibitions.
BA - Art, Concentration in Design Studies

The BA Art in Design Studies is the entry program for all Design students entering SJSU. The program introduces students to a basic study of design principles, history, and theory. A portfolio review takes place at the end of the first semester for Transfer students and at the end of the first year for Native students. If passed, students declare their major in one of the BFA/BS degrees in the Design Department. Students pursuing this program may be admitted to the BFA in Interior or Graphic Design or the BS in Industrial Design on a space available basis after successfully completing required portfolio reviews in their first two years of study. Admission to the BFA in Animation and Illustration is determined at the time students apply for admission to the university. There is no internal transfer into the BFA in Animation and Illustration.

If not accepted into the BFA/BS degrees, students continue on in the BA Design Studies degree with a focus in one of the four areas described below.

- **Animation/Illustration:** Provides instruction in basic A/I foundation skills, supplemented by studies in the areas of Design; English; Photography; Physics; Radio, TV, Film; and Theater Arts. Students will receive basic preparation for entry-level jobs in the entertainment industry; optionally, they can later apply to a graduate program in Animation, Illustration, or other similar fields of study. Students who want to pursue a professional career in feature film animation or games (or any other career track requiring an advanced skill set in either animation, visual development, story, or modeling) will need to pass the mid-program portfolio review and work towards the BFA degree in Animation/Illustration.

- **Graphic Design:** Provides a basic understanding of the aesthetic as well as the technical skills needed for graphic design. Students who want to pursue a BFA in Graphic Design, which would encompass exposure to a wider range of design disciplines, will need to pass a mid-program portfolio review.

- **Industrial Design:** Provides introduction to and basic knowledge of 3D Design and Technology. With courses focused on 3D computer aided design, materials and manufacturing, prototyping, and team-based theory, students will have a basic preparation for jobs in computer aided design support and model-making, or be prepared to apply to a graduate program in Industrial Design or other areas. Students who wish to pursue the BS Industrial Design must pass the first year portfolio review.

- **Interior Design:** Provides a basic understanding of the aesthetic as well as the technical skills needed for interior design. Students who want to pursue a BFA in Interior Design, which would encompass exposure to a wider range of design disciplines, will need to pass a mid-program portfolio review.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Professional Design Programs

The Department of Design offers professional programs in Animation/Illustration, Graphic, Industrial, and Interior Design. The curricula of the four programs combine the aesthetic sensitivity and technical knowledge necessary to function creatively in design, business and industry. Internships in design offices are integral to all four programs.

Admission Requirements for Animation/Illustration, Graphic, Industrial, and Interior Design

1. Meet university admission requirements; attain upper division standing by completing 60 transferable semester units or 90 transferable quarter units prior to enrollment.

2. Design students declare BA, Art, Concentration in Design Studies. Passage through BFA Animation/Illustration, BFA Graphic Design, BFA Interior Design, and BS Industrial Design degrees is by portfolio review for enrolled students. Students will normally apply for direct admission into the BFA or BS program they wish to pursue. Admission to the BFA in Animation and Illustration is determined at the time students apply for admission to the university. There is no internal transfer into this program. Students admitted to the BA Art Concentration in Design Studies may be admitted to the BFA in Interior or Graphic Design or the BS in Industrial Design on a space available basis after successfully completing required portfolio reviews.

Portfolio reviews are held each semester for the following semester. Instructions are available in the Design department office. The following courses, or in some cases, their equivalent at another college via advisor approval, are required as preparation for the portfolio review.

- Animation/Illustration: ANI 12, 14, 24, 28, 50, 55, 112A, 112B, 113A
- Graphic Design: ART 024 or ANI 24, DSGD 063, 083, 099, 100, 104.
- Industrial Design: DSID 021, DSID 022, DSID 031, DSID 032, DSID 032A.
- Interior Design: ARTH 072, DSIT 005, 010, 015, 029, 033, 034, 083, 102, and 103.
### BFA - Art, Concentration in Animation/Illustration

The award-winning Animation/Illustration program is committed to providing a world-class education at an affordable price, preparing students for careers in feature film animation, games, television and any other media that uses animation and storytelling as a core communication tool. Industry professionals and peer educators rank SJSU Animation/Illustration among the best in the nation. The core curriculum combines both traditional and innovative educational strategies. Rigorous drawing classes and intensive study of color theory, design, perspective, and conventional and digital painting are required, as well as the study of the principles of both traditional and 3-D animation, physics of motion, modeling, storyboarding, character design, and visual development. Upper-division classes further define these disciplines offering students an opportunity to specialize in their area of choice. All students must pass a milestone portfolio review to remain in the BFA program. Students who do not pass the review will be changed to the BA Art with a Concentration in Design Studies.

The BFA in Animation/Illustration is a highly impacted major. This means that the number of applications from fully eligible students far exceeds the number of spaces available in the program. Students interested in an impacted major must apply for admission during the initial filing period for admission in fall 2017. Applications for admission to impacted majors are not accepted after the initial filing period.

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

### University Graduation Requirements

#### Core Lower Division General Education

Of the 39 units required by the university, 12 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

#### Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

### American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

#### COMPLETE ONE SEQUENCE FROM:

| African American Studies | AFAM 002A. African-Americans and the Development of America’s History and Government | D2 | 3 |
| African American Studies | AFAM 002B. African-Americans and the Development of America’s History and Government | M7 | 3 |
| Asian American Studies | AAS 033A. Asian Americans in U.S. History I | D2 | 3 |
| Asian American Studies | AAS 033B. Asian Americans in U.S. History II | M7 | 3 |
| U.S. History and Government | HIST 015A. Essentials of U.S. History | M12 | 3 |
| Mexican American Studies | MAS 010A. Mexican Americans and the Development of U.S. History and Government | D2 | 3 |
| Mexican American Studies | MAS 010B. Mexican Americans and the Development of U.S. History and Government | M7 | 3 |
### Physical Education

#### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

## BFA - Graphic Design

This program prepares students for intellectually and aesthetically challenging careers in Graphic Design by providing courses that emphasize theory and professional practice. The program concentrates on the organization and visual communication of information and includes typography, form and image, information architecture, user interface, interactive design, and motion graphics. Passage of a portfolio review is required for admission to the program. After admission, passage of portfolio reviews conducted at the end of each semester are required to continue to advance through the BFA GD program. All students are required to complete a professional internship. In addition to the regular curriculum, students have the opportunity to attend special classes and workshops led by studio professionals and faculty members.

Students must pass a milestone portfolio review to remain in the BFA program. Students who do not pass the review will be changed to the BA-Art with a concentration in Design Studies.

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

BS - Industrial Design

The BS Industrial Design program prepares students for a career in industrial design through a curriculum in design studio, theory and skill classes supported by courses and content in technology, business, science, the arts and humanities. Emphasis is placed on critical thinking, creative design process management, aesthetic theory, communication skills and awareness of business as well as humanistic dimensions of product development. The program draws upon extensive resources of local and internationally prominent design firms and alumni. It emphasizes exposure to professional practice. Studio projects provide experience with a diverse spectrum of products, user scenarios, and industries, leading to a comprehensive professional portfolio. The Industrial Design Program is on the list of schools approved by the Industrial Designers Society of America and is accredited by NASAD (National Association of Schools of Art & Design).

Students declare an Industrial Design major without submitting a portfolio. However, the BSID program is highly structured and requires passing of four annual portfolio courses (DSID 32A, DSID 123A, DSID 125A, DSID 128A) as a prerequisite for the next level of studio courses. Students are advised to closely follow the Roadmap in order to complete the requirements in a timely manner. (See your assigned Major Advisor for details).

Failure of the DSID 32A Portfolio Project I course will result in students changing their major to BA Design Studies or another major of choice.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

BFA - Interior Design

Students majoring in interior design draw upon a wide range of university and Bay Area community resources to prepare for professional careers in both the private and public sectors in areas such as corporate, hospitality, institutional, office and retail planning and design. Preparation involves both theoretical and practical study of interior architecture with emphasis on critical thinking, communication skills, design process, merging technologies, human factors, aesthetic sensibilities, laws, codes and regulations, and professional ethics. A portfolio review is required for this program. All students in the Interior Design Program are required to complete a 1 unit professional internship as part of their degree requirements.

San José State University is an accredited institutional member of the National Association of Schools of Art and Design (NASAD), which is recognized by both the California Council for Interior Design Certification (CCIDC) and the National Council for Interior Design Qualification (NCIDQ).

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Core Lower Division General Education

Of the 39 units required by the university, 18 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

### Physical Education

#### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

Curricula
- BA, Economics
- BS, Economics
- Minor, Economics
- MA, Economics
- MA, Economics, Concentration in Applied Economics

Introduction
Economics stresses the role of markets and institutions on business, political and socioeconomic outcomes. By emphasizing applied economics, the program encourages majors to hone their strategic thinking skills, learn to anticipate the unintended consequences of actions, and engage in consequential thinking about changes over time. By stressing oral and written communication and statistical analysis, the program encourages majors to acquire the skills necessary to communicate ideas. Economics graduates use economic tools to evaluate and pose reasoned solutions to multi-faceted, complex problems, as a result, they are in high demand in any field where decision making and reasoning are emphasized. Our bachelor’s degree is an excellent springboard to an MBA or law degree. Our master’s program prepares graduates for research and policy positions in government and business. Although we emphasize applied economics, we also provide students with the rigorous preparation necessary to pursue doctorates in economics.

Honors Program in Economics
To graduate with Economics Department honors student must have an overall GPA of 3.2; a GPA of 3.5 for all upper division economics courses; and must complete a supervised honors thesis. The prerequisite for enrollment in the honors thesis section of Econ 180 (Independent Studies) is completion of 100W. Thesis guidelines are available in the Economics Office.
**BA - Economics**

A general and flexible program to allow for a variety of student objectives.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

**Major-Specific Graduation Requirements**

All courses required in the major (Core, Area Courses, and major electives) must be completed with a minimum grade of “C-“.

Graduate Programs Admission

Requirements for Admission with Classified Standing
Applicants must first meet the requirements for admission to the university. Additionally applicants should possess an undergraduate grade point average of “B” or better. Bachelor degrees in fields other than economics are acceptable and welcomed. Admission to the program with classified standing, however, requires preparation in Intermediate Microeconomic and Intermediate Macroeconomic theory, one other upper division economics course, statistics, and proficiency in linear algebra and calculus. This coursework must be satisfactory (grades of “B” or better).

Requirements for Admission with Conditionally Classified Standing
Applicants who do not meet the Department’s requirements for admission with classified standing, may be admitted into the program with conditionally classified standing if he or she has demonstrated an interest in and an ability to master economic analysis. Conditional standing requires students to complete specific courses to correct the deficiencies as listed by the graduate advisor on the admission notification. Prerequisites can be completed at SJSU. Upon completing these requirements the student must then petition for a change in status to classified standing.

Requirements for Admission to Candidacy for the MA - Economics
To be admitted to candidacy for the Master of Arts degree, a student must first meet the university requirements for the degree as stated in the Academic Regulations section of this catalog. Also, a candidate:

1. Must have at least a 3.0 (“B”) average in nine semester hours of approved San José State University courses in economics at the 100- or 200-level.
2. Must obtain approval of a formal master’s degree program from the departmental graduate advisor and from the University Graduate Committee.
3. Must have successfully completed the Graduation Writing Assessment Requirement (GWAR). The University requires that all graduate students complete the GWAR as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Graduate Theory Grade Requirement
All master’s degree students must complete a microeconomic theory course and macroeconomic theory or monetary theory course (if required) with a grade of “B” or better. All 100-level courses must be completed with a “B” or better. Students must file for candidacy before taking the comprehensive examination. Policies concerning Probation and Disqualification are available online and in the Economics Office.

Comprehensive Examination
Most students complete a final written examination not a thesis. The comprehensive exam covers three subjects: microeconomic theory, macroeconomic/monetary theory or Econometrics, and applied economics. Students register once, for one unit of ECON 298E in the semester they plan to take the examination. Students can take the exam a total of three times. Policies concerning Probation and Disqualification for failure to complete the exam are available online and in the Economics Office.
MA - Economics

At an appropriate time the student chooses, with the assistance of the graduate advisor, a proposed Master’s degree program as outlined below.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

This requirement is satisfied by passing ECON 203A.

Curricula
⦁ BA, Communicative Disorders and Sciences
⦁ MA, Education, Concentration in Speech Pathology

Introduction
One of the first Communicative Disorders and Sciences programs in California, the department has prepared students for careers as speech-language pathologists and audiologists for more than 40 years. Speech-language pathologists identify, evaluate and treat children and adults with speech-language, cognitive-communicative, and/or swallowing disorders. Audiologists diagnose and treat individuals with hearing or balance disorders. Our academic and pre-clinical undergraduate curriculum provides the basis for further graduate study, required for a career in either field. Our Master’s Degree in Education with a concentration in Speech Pathology is accredited by the Council on Academic Accreditation of the American Speech-Language and Hearing Association. Both members of the SJSU community and the larger community receive speech-language and hearing services at the Kay Armstead Center for Communication Disorders (Sweeney Hall 118B).
### BA - Communicative Disorders and Sciences

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

120
MA - Education, Concentration in Speech Pathology

Advisors: Dr. Henriette W. Langdon, Dr. Michael Kimbarow, Dr. June McCullough, Dr. Jean Novak, Dr. Wendy Quach, and Dr. Peitzu Tsai

This program of study enables students to broaden their knowledge and to increase their competency in the area of speech-language pathology. The goal is to develop clinical competency and to permit further graduate study for advanced degrees.

This program is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association, the California Licensure Board of Medical Quality Assurance and the Commission on Teacher Credentialing of the State of California.

Programs may be individually planned to meet the student’s interest in speech-language pathology.

Basic Requirements Prior to Graduate Studies
1. Show a background equivalent to that of a baccalaureate major in speech pathology.
2. Demonstrate an acceptable standard of oral and written skills.
3. Have an overall grade point average of 3.0 or better in undergraduate education.
4. Demonstrate suitability to the field as judged by faculty.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

EDSP 277 is typically repeated up to 3 times to meet practicum requirements, see departmental advisor for details.

Total Units Required

A final master’s comprehensive examination will be taken when students have completed the graduate course work. Students who wish to complete a thesis will take an additional 3 units. Confer with advisor.

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [www.sjsu.edu/gape](http://www.sjsu.edu/gape).

All students receiving a master’s degree must accumulate a minimum of 375 clock hours in supervised clinical practicum in three distinctively different settings, and 25 hours of observation.

Curricula
⦁ MA, Education, Concentration in Counseling and Student Personnel
⦁ Credential, K-12 School Counseling Specialization
⦁ Credential, K-12 School Counseling Internship
⦁ Credential, School Child Welfare Attendance Specialization

Introduction
The Department of Counselor Education prepares individuals to assess and counsel students in culturally and economically diverse K-12 and postsecondary educational settings; and, those involved with community-based organizations. In addition to a Master's degree in Education with a concentration in Counseling and Student Personnel, we offer a Pupil Personnel Services (PPS) credential in school counseling and a child welfare attendance specialization credential which qualifies individuals to work as guidance counselors in K-12 schools. Additionally, our coursework prepares students to pursue licensure following graduation. Our faculty work closely with degree candidates to build effective assessment and counseling skills, nurture reflective thinking, develop cultural skills, and a commitment to social justice. Our graduates are prepared to facilitate students' personal and educational success and lifelong learning.
The credential options available to candidates includes the Pupil Personnel Services (PPS) credential and School Child Welfare Attendance (CWA) Specialization credential.

Curricula
⦁ EdD, Educational Leadership

Introduction
The Ed.D. in Educational Leadership at San José State University emphasizes human centered approaches to educational leadership. The program builds on the view that educational leaders serve in learner-centered systems in which inquiry, learning, and human care are central concerns. The expected role for educational leaders involves creating a learning community, one that promotes collaboration and shared decision making. This view implies moving towards more distributed models of leadership and creating a public will that is networked, dispersed and charged with successfully educating all students. The doctoral program begins with an intensive on campus five-week summer session that meets three days per week. The second summer requires a global component including a two-week educational and cultural experience outside of the United States. Fall and spring semester classes are scheduled for one evening per week and 3 weekends each semester.
Ed.D. Admission Requirements

Admission to Graduate Standing, Classified
Applicants who meet the admission requirements for the Graduate Division and in addition meet the further requirements of the area of specialization for the doctoral (Ed.D) degree are admitted to graduate standing. 3.0 GPA is required for entrance and exit.

The Ed.D. program requires the following of all applicants for admission to the doctoral program:

1. The applicant holds an acceptable baccalaureate degree and master's degree earned at a regionally accredited institution of higher education, or the applicant has completed equivalent academic preparation as determined by the Office of Graduate Studies & Research.
2. The applicant has attained a cumulative GPA of at least 3.0 in upper division and graduate study combined.
3. The applicant was in good standing at the last attended institution of higher education.
4. The applicant has demonstrated sufficient preparation for, experiences in, and potential for educational leadership, including successful experience in school, postsecondary, community, and/or policy leadership; academic excellence, problem-solving ability, and technology proficiency; and interest in critically assessing and improving current educational policies and practices.

Admission to Graduate Standing, Conditionally Classified
Applicants who meet the admission requirements for the Graduate Division but who fail to meet the requirements for classified standing in the area of specialization for the doctoral degree may be admitted to conditionally classified standing in the doctoral degree program. Individuals petitioning such admission should contact the chair for the specific prerequisites they must complete before receiving classified standing.

- MA, Educational Leadership, Higher Education Administration (Not Accepting Students)

Introduction
If schools are to meet the needs of an increasingly diverse student population, they must be led by women and men passionate about the importance of schooling and capable of managing significant school change. Graduates of the Department of Educational Leadership are trained to rise to that challenge in K-12 settings. We offer a master’s degree in educational administration and a preliminary administrative service credential (tier 1) that can be earned simultaneously. The fundamental goal of education, we believe, is the success of all students. To achieve that goal requires informed, courageous leadership.
Preliminary Administrative Services Credential

Basic Requirements to Earn Preliminary Credential

Applicants to the Preliminary Administrative Services credential must: possess a valid California teaching credential, Pupil Personnel, Health Services, Librarianship, or Clinical Rehabilitative credential; have at least three years of successful, full-time experience in the public schools, or in private schools of equivalent status; pass all parts of the CBEST exam; successfully complete the credential program; and two page writing sample, letter of recommendation from a supervisor attesting to probable success at the master’s level and potential for leadership, and complete the portfolio exit process.

Recommended Preliminary Credential Course Pattern

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Curricula
⦁ Minor, Education
⦁ Credential, Multiple Subject
⦁ Certificate, Teaching Certificate in Common Core Mathematics (K-8)
⦁ MA, Elementary Education, Concentration in Curriculum and Instruction

Introduction
California’s oldest public teacher preparatory program, the Department of Elementary Education also has a reputation for being among the finest in the state. We are committed to preparing the highest quality K-8 educators, with knowledge, skills, dispositions, and ethics to teach elementary students in our culturally diverse and technologically complex global communities. Despite challenging times, teaching continues to be a reliable, rewarding profession for those desiring to influence the lives of children and young adolescents. Our options include: Multiple Subject Teaching Credential preparation (to teach in grades K-8), combined Credential and Master of Arts Degree, and an undergraduate Minor in Education for students who wish to teach, work in the nonprofit sector or serve as child advocates. For established educators and individuals with a teaching credential, we offer a Master Degree in Curriculum and Instruction that will qualify them to receive a Reading and Language Arts Specialist Credential. We also offer an Advanced Teaching Certificate focusing on Common Core State Standards in Mathematics (K-8) through Special Sessions.
## Minor in Education

The minor in Education is available to students who are interested in education from a variety of perspectives. Students in a degree program who may want to work with children in capacities inside or outside the classroom may be interested in this minor. For example, students interested in the following career paths could benefit from this course of study: becoming a teacher, working in the non-profit sector (e.g., educational foundations) or in any type of child advocacy work such as law or social work or anyone working in a diverse environment where understanding how individuals learn and process information could benefit. Successful completion of the minor will enable students to earn 12 credits toward their multiple subject teaching credential.

Multiple Subject Credential Program

The multiple subject credential leads to a license to teach in California schools. It is intended primarily for those who plan to teach at the elementary, middle or junior high levels. At San José State University, students complete programs in order to qualify for the Multiple Subject Credential.

Admission Requirements for the Multiple Subject Credential Programs

Admission requirements include the following:

- Admission to Graduate Studies at San José State University
- Grade point average (GPA), for last 60 units, of approximately 2.87
- Passing score on California Basic Education Skills Test (CBEST)
- Completion of preprofessional experience in a public school setting.
- Passing scores on the California Subject Examinations for Teachers (CSET) test
- Bachelor’s degree
- Certificate of Clearance

Note: In exceptional cases, applicants will be admitted conditionally and allowed to meet remaining admission requirements during the first semester of study. Information is also available on the SJSU website, www.sjsu.edu/elementaryed/.

Professional Preparation Program Requirements for the Preliminary Multiple Subject Credential

Pre-professional course work leading to the Multiple Subject Credential meets requirements set by the California Commission on Teacher Credentialing. Course work for the Preliminary Credential includes theoretical foundations, studies supporting Cross-Cultural, Language and Academic Development with an optional bilingual authorization, and subject area authorization. Courses with 200 numbers may apply toward an MA degree (see an MA advisor before completing the credential program).

Options are available for pursuing special interests within the Multiple Subject credential program such as traditional, bilingual (Spanish) authorization, single-subject authorization, and earning a preliminary credential while working as an intern. You may discuss your interests for program planning with an advisor during the application process.

Multiple Subject with Bilingual and Single-Subject Authorization

Students interested in adding a bilingual authorization in Spanish or a foundational credential in certain single subjects (e.g. math, science, English) should contact the department office for an advising appointment and program availability.
Teaching Certificate in Common Core Mathematics (K-8)

The Advanced Teaching Certificate in Common Core Mathematics K-8 is designed for practicing teachers and mathematics coaches. Courses focus on developing the mathematical knowledge for teaching K-8 Common Core Standards and Mathematical Practices. Additional emphasis will be placed on pedagogical strategies that foster motivation, engagement, and the development of academic language in mathematics.

Requirements of the Certificate

**COMPLETE THREE COURSES FROM:**

- EDTE 230. Mathematics: Teaching Common Core (K-3) ................................................................. 3
- EDTE 231. Math Seminar: Common Core (grades K-3) ................................................................. 3
- EDTE 232. Mathematics: Teaching Common Core (4-8) ................................................................. 3
- EDTE 233. Math Seminar: Common Core (grades 4-8) ................................................................. 3

Total Units Required 9
MA - Education, Concentration in Curriculum and Instruction (CRA and LACES)

The MA - Education with a concentration in Curriculum and Instruction is designed for professional educators interested in advanced study that may lead to service as a curriculum supervisor, curriculum developer, educational researcher, mentor teacher, or similar educational position at elementary and middle school levels.

Requirements for Admission to the MA
1. An application for Admission to the university.
2. A Preliminary Teaching Credential for LACES candidates.
3. A departmental application for admission. Application forms are available in the Department of Elementary Education Office located in Sweeney Hall 305 or on www.sjsu.edu/elementaryed/programs/master_of_arts/.
5. Three letters of recommendation from current or former professors and/or employers who can testify to the candidate’s ability to pursue successfully an advanced academic degree.
6. A minimum 3.0 grade point average (GPA).
7. A score above 550 or TOEFL (foreign students only).
8. Transcripts of record from all college level institutions attended.
9. Personal interview. Interviews are scheduled after an initial evaluation of the application materials.

The statement, three letters of recommendation, and the completed MA application should be sent directly to the Department of Elementary Education Graduate Coordinator.

Requirements for Admission to Classified Standing
Applicants must meet all university Graduate Division admission requirements as well as those of the College of Education. College of Education requirements include a grade point average of 3.0 or higher during the last two years of undergraduate study, including work in the major.

Requirements for Admission to Candidacy for Master of Arts Degree
To be admitted to candidacy for the Master of Arts degree, a student must first meet all university requirements for the degree as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at http://www.sjsu.edu/gape.

Applicants must also:
- Complete successfully 9 units of graduate course work in the Department of Elementary Education;
- Demonstrate aptitude for advanced work in professional education as measured by instructor appraisals, evaluation of previous academic work, recommendation by qualified professionals or other assessments;
- Meet with a graduate advisor to plan a formal course of study. The MA degree approved programs are individually designed to meet specific student objectives.

The proposed graduate program must be approved by the graduate coordinator before the student may be considered a candidate for the MA degree.

Other Requirements
Contact the Department of Elementary Education for information on advisors for the MA - Curriculum and Instruction and the application process. Applications and information about the MA program is also available on the Elementary Education website at www.sjsu.edu/elementaryed/programs/master_of_arts/.

Multiple Subject Credential/MA Program (CRA/LACES)
If you are interested in pursuing a joint Multiple Subject Credential/MA program, you may want to consider the Critical Research Academy (CRA) program. The CRA program offers a dynamic experience for candidates who are interested in K-8 education for social justice, development of cultural literacy, education to promote democracy, and pedagogy for teaching in urban schools. The program incorporates requirements for both the Multiple Subject Teaching Credential and the Master of Arts in Education.

The Literacy Across the Curriculum for an Equitable Society (LACES) MA program offers a dynamic experience for K-8 teachers interested in advocacy for social justice and equitable literacy learning and teaching in urban schools. The program incorporates requirements for the Reading/Language Arts Specialist Credential. A teaching credential is required.
### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

### Advanced Teaching Certificate: Common Core Mathematics (K-8) 099-12

This Certificate is only offered through Special Session and contains approved 200-level courses designed for practicing teachers and mathematical coaches. Courses focus on developing the mathematical knowledge for [K-8] Common Core Standards and Mathematical Practices. Certificate coursework is separate from MA requirements, although 9 units can be used towards MA Elementary Education: Curriculum and Instruction.

Curricula
- Credential, Single Subject

Introduction
The Secondary Education department is the home of the Single Subject Credential Program. This credential is a license to teach in California middle or high schools. Prior to being admitted to the credential program, individuals must establish competency in a specific subject area by completing an approved undergraduate subject matter program or passing the state-approved CSET exam. Once admitted to the program, students must complete a minimum of 30 units of credential preparation coursework. Individuals with an interest in the Single Subject program should contact the Secondary Education Office (Sweeney Hall 301) for information concerning prerequisites and the application process. Applicants are accepted for summer, fall and spring semesters. Courses are available to individuals admitted to the credential program or with permission of the Department Chair.
Credential Program

Requirements for Admission

Admission to San José State University

Visit the program website at www.sjsu.edu/secondary for information on how to apply. Please note that the process of meeting application requirements can take several months to complete, so plan ahead.

⦁ Credential, Education Teaching Specialist Credential: Moderate/Severe Disabilities
⦁ MA, Education, Concentration in Special Education

Introduction
Graduates of the Department of Special Education are advocates for children. Our programs provide the knowledge and expertise necessary to teach students and young children with disabilities, to serve as change agents, and to help make lives the very best they can be. Our alumni are passionate about learning and education. We offer preparation for the Preliminary Education Specialist Teaching Credential in three areas (mild to moderate disabilities, moderate to severe disabilities, and early childhood special education) that can be completed as an Intern (or first year teacher) or as a traditional student. The Concurrent Option is the opportunity to earn the Education Specialist Mild to Moderate Disabilities Credential and the Multiple Subjects and/or Single Subjects Credential at the same time. We also have programs for the Added Authorizations in Early Childhood Special Education and Autism Spectrum Disorders, as well as the Certificate in Theory, Knowledge and Practice about Autism Spectrum Disorders. We offer a Master’s of Arts degree with a Special Education specialization.

The California Commission on Teacher Credentialing (CCTC) and the National Council on the Accreditation of Teacher Education Colleges (NCATE) accredit all teaching credential programs. CCTC identifies and defines the standards that all teachers must satisfy for the credential; students in the Department of Special Education programs meet these standards with completion of the program and then are recommended to CCTC for the Education Specialist credential.
Credential Programs Admission Requirements
1. Application for admission to SJSU.
2. Application and required documents for admission to the Department of Special Education.
3. Graduation from an accredited university or college.
4. Passing scores on the California Basic Education Skills Test (CBEST).
5. Grade Point Average (GPA) of at least 2.87.
6. Completion of pre-professional experience.
7. Passing scores on the California Subject Examination for Teachers (CSET).
8. Department interview with passing results.
9. Completion of 165 pre-service coursework hours for Interns.
11. It is recommended that any individual interested in applying for a program attend an orientation meeting and visit the website at www.sjsu.edu/specialed.

MA Program Admission Requirements
1. Application for admission to SJSU.
2. Application and required documents for admission to the Department of Special Education.
3. Graduation from an accredited university or college.
4. Grade Point Average (GPA) of 3.0.
5. Department interview with passing results.
6. A passing score on the Department of Special Education writing assessment.
7. Statistics Class
Minor - Atypical Child Studies

This interdisciplinary minor is offered under the Child and Adolescent Development Department and the Early Childhood Special Education Program in the Department of Special Education.

This degree is cross listed with the Child and Adolescent Development, Department of.

Courses that meet General Education/American Institution requirements are noted with area designation for required area.

For Legend please see page 2.
## Added Authorization in Special Education - Early Childhood Special Education

The Added Authorization in Early Childhood Special Education is available to individuals who hold a Clear Education Specialist Credential. Completion of this authorization extends special education teaching authorization to students with disabilities between the ages of birth and pre-Kinder.

MA - Education, Concentration in Special Education

Advisors: Dr. Ji-Mei Chang, Dr. Chris Hagie, Dr. Peg Hughes, Dr. Jennifer Madigan, Dr. Hyun-Sook Park and Dr. Angela Rickford, Dr. Lisa Simpson, Dr. Andrea Golloher

This Program is a 30 unit program designed to prepare students for leadership roles in Special Education through a core curriculum and elective course work in areas of specialization: early childhood special education, mild/moderate or moderate/severe disabilities, or a combination of areas of interest. Students interested in the MA and a teaching credential must apply for both options and attend an orientation to discuss possibilities.

Basic Requirements Prior to Acceptance
1. Admission to SJSU.
2. Grade Point Average (GPA) of 3.0 or better.
3. A passing score on the Department of Special Education writing assessment.
4. Basic Statistics Class

A teaching credential in special education is recommended.

Required Course Pattern

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Requirements of the Masters
A statistics course is required as part of this masters program.

Introduction
Top-ranked among national BS/MS programs by U.S News and World Report, the Electrical Engineering Department powers Silicon Valley. We provide more electrical engineering graduates to this region than are provided by any other college or university anywhere. At the forefront of technological research and innovation in multimedia computing, global communications, and high-speed integrated circuitry, electrical engineers push technology to the limits of physical and mathematical laws. There is no greater challenge for the creative mind. We prepare students for exciting careers in diverse areas of hi-tech engineering, including internet technologies, semiconductor electronics, analog and digital systems, wireless communications technologies, and power electronics and systems. Our accomplished faculty brings real-world experience to the classroom, and the department’s links with local industry ensure that our laboratories are among the area’s most advanced instructional facilities with up-to-date, state-of-the-art equipment. The BS Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.
BS - Electrical Engineering

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions
This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements
Students in this major must complete the following Preparation and Required for the Major courses with a “C or better”: ENGL 001B, EE 097, EE 098, EE 110, EE 112, EE 118, EE 122, EE 128, EE 198A, ENGR 100W, MATE 153. All other required courses in Engineering, Mathematics, and Physics require a “C- or better”.

| Total Units Required | 120 |
Requirements for Admission to Classified Standing
To be admitted to classified standing, a student must possess a baccalaureate degree with a major in electrical engineering and a grade point average of 3.0 or better in the last 60 units, from a U.S. University with an ABET accredited electrical engineering program.

Requirements for Admission to Conditionally Classified Standing
Some applicants who do not qualify for Classified standing may be admitted as Conditionally Classified Graduate Students. They must petition for admission to the Classified Status after completing the common core graduate courses. A maximum of 15 units earned before the student attains the Classified Status may be counted towards the MSEE degree requirements.

Student with a BSEE Degree from an Accredited University in the USA:
An applicant with a BSEE degree from an accredited university within the United States, whose GPA in the last 60 units is less than 3.0 but higher than 2.75 is required to submit his/her general GRE scores with the application. If accepted, student will be admitted as Conditionally Classified Graduate Student. Such a student may petition for admission to classified standing after successfully completing two (2) of the following three (3) courses: EE 210, EE 221, or EE 250 with “B” or better grade in each course.

Student with a BS degree in a field related to Electrical Engineering from an Accredited University in the USA:
An applicant who possesses a baccalaureate degree in a field related to Electrical Engineering, such as Physics, Mathematics, or another branch of Engineering with a minimum GPA of 3.0 in the last 60 units, is required to submit his/her general GRE score with the application. If accepted, the student will be admitted as a Conditionally Classified student. Such a student may be required to complete four undergraduate courses. The four undergraduate courses are specified in the admission letter and are selected from EE 118 (Digital Logic Circuit Design), EE 120 (Microprocessor Based System Design), and EE 130 (Network Analysis), EE 112 (Linear Systems), EE 122 (Electronic Design I), EE 124 (Electronic Design II) and EE 140 (Principles of Electromagnetic Fields). Following the undergraduate courses, student must successfully complete two (2) of the three (3) graduate core courses, EE 210, EE 221, or EE 250 with “B” or better grade in each course. He/ she may not enroll in more than two other graduate courses before completing these requirements. Units for the undergraduate courses are not counted for the MSEE degree unit requirements.

Students with Undergraduate Degrees from Foreign Universities
- A minimum score of 550 (or 213 if computer based, or 80 if Internet-based) in the TOEFL (Test of English as a Foreign Language).
- General GRE score. There are no hard cut-offs on the GRE scores but the scores will be used with applicants’ degree and GPA to rank the candidates for admission.
- A baccalaureate degree in Electrical Engineering with a minimum computed GPA (Grade Point Average) of 3.0 on a 0 to 4.0 scale in the last 60 semester units. The university from which the transcripts were submitted computes the GPA.

Applicants satisfying these requirements may be admitted as Conditionally Classified Graduate Students with the condition that they must complete two (2) of the three (3) core graduate courses EE 210, EE 221, or EE 250 with “B” or better grade in each before enrolling in any other graduate course.

Students from Other Graduate Programs within the University
A graduate student who has been admitted to another department in San José State University has to complete at least one semester of work in that department before asking for transfer to the Electrical Engineering Department. A minimum GPA of 3.0 in the last 60 semester units and general GRE score are required. There are no hard cut-offs on the GRE scores but the scores will be used with applicants’ degree and GPA to rank the candidates for admission.

A “Change of Major Form” has to be first approved by the other department and the file transferred to the Electrical Engineering Department before the student may be considered for transferring into the Electrical Engineering program.

Credit for Courses Completed as an Undergraduate Student
A student in senior standing in Electrical Engineering may request award of Graduate Credit for courses taken as an undergraduate if all of the following apply:
- fewer than 14 units are still needed to complete the BSEE degree at San José State University.
- none of the courses to be taken for graduate credit is required for the BSEE degree.
- the student has a GPA of at least 2.5 on all work completed in upper-division standing at San José State University.
- the student does not enroll in more than 15 units for the term in which this work is taken.
- the student has completed the graduation check (Registrar’s Office).
- the student agrees not to take letter-graded courses as CR/NC.
- the student agrees that not more than 9 units of graduate credit earned by this process be applied towards the Master’s degree program.
- the student submits a “Request for Award of Graduate Credit for Units Completed as an Undergraduate” form and the Graduate Studies Office approves it at the beginning of the term in which the units concerned will be earned.
Requirements for the MSEE Degree

To meet the requirements for the MS - Electrical Engineering, a student must complete 30 units with a cumulative GPA of 3.0 or better. The program provides two options: one taking MS project or thesis, and the other taking courses only followed by a comprehensive exam.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Graduation Writing Assessment Requirement

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Areas of Specialization

- Logic/Digital Systems Design
- ASIC/VLSI Circuits
- Analog/Mixed-Signal IC
- Communications/Digital Signal Processing
- Networking
- Power Electronics and Control

Students desiring to pursue an area of specialization not listed above should consult his/her area advisor.

A coherent plan of study must be approved on the prescribed form by the area advisor and the graduate advisor. Engineering or science courses outside of the area of specialization may be approved if they form coherent plan of study.
In special circumstances, a maximum of six units of approved courses taken outside the Electrical Engineering Department may be applied toward the MS - Electrical Engineering degree. Students that want to take courses outside of the Electrical Engineering Department must have pre-approval by the Graduate Advisor. Students opting for the courses-only option must also pass the required Comprehensive Exam (given once a semester) to earn the MSEE degree. In addition to the above requirements, students must satisfy all university requirements and procedures as stated in this catalog.

**Practical Training for MSEE Students**

Students may gain professional experiences by internship opportunities supported by local companies.

- Minor, Professional and Technical Writing
- Certificate, Professional and Technical Writing
- MA, English
- MFA, English, Creative Writing
Introduction
Study with award-winning teachers and professional writers. Develop editing and production skills by working on Reed Magazine, one of the oldest literary journals in the West. Prepare for a variety of careers in teaching, career and technical writing, or advanced study in English, law and medicine. The Department of English and Comparative Literature offers programs in English, American, world, and comparative literature, and creative and professional writing. Our MA prepares students for teaching careers or doctoral studies. Our MFA in creative writing trains professional writers in the history and craft of poetry, creative nonfiction, fiction, script- and screen-writing. Home to the Steinbeck Fellows and the Lurie Visiting Distinguished Author programs, the department also houses the Center for Literary Arts, which brings distinguished poets, fiction writers and creative nonfiction writers to campus to give public readings.

Undergraduate Honors Program
Upper-division students with a minimum grade point average of 3.0 overall and 3.5 in the major are eligible for Departmental Honors. Honors students complete an Honors Colloquium (ENGL 190). Application to the honors program should be made through the English Department Office.
BA - English

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

University Graduation Requirements

Core Lower Division General Education
Of the 39 units required by the university, 6 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education
Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions
Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

COMPLETE ONE SEQUENCE FROM:

African American Studies
AFAM 002A. African-Americans and the Development of America’s History and Government ................................................................. D2 3
AFAM 002B. African-Americans and the Development of America’s History and Government ...................................................... M7 3

BA - English, Preparation for Teaching (Single Subject)

The following course work satisfies San José State University’s requirements for a BA in English. The BA - English Preparation for Teaching is approved as subject matter preparation for a single subject credential by the California Commission on Teacher Credentialing (CCTC). Individuals who do not wish to complete one of the degree program, or individuals seeking a single subject credential in subject areas not listed must pass all portions of the appropriate Commission-approved subject matter examination(s).

Minimum grade point average (GPA) and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See "Teaching: How to Become a Teacher in California" (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Certificate Program in Professional and Technical Writing

The English Department offers an 18-unit program consisting of a six-unit core (ENGL 106, 107 ENGL 129) and nine units of advisor approved electives. One advisor approved elective must be in Technology. This program is designed for those seeking greater specialization, including postbaccalaureate students who hold or seek employment in technical or professional writing. Prerequisite: Passage of WST.

Graduate Program Admissions

Requirements for Admission to Classified Standing
In addition to meeting minimum requirements for admission to the Graduate Division outlined in this catalog, an applicant must have:
A minimum of 24 semester hours of acceptable undergraduate course work in English beyond freshman composition;
A 3.0 grade average in English courses;
Approval by the departmental graduate committee;
For an international student, the TOEFL score must meet or exceed 610 (Paper Based), 253 (Computer Based), or 102 (Internet Based).

Requirements for Admission to Conditionally Classified Standing
Students who do not qualify for classified standing but who meet university requirements for graduate admission and whose past performance gives promise of satisfactory completion of requirements for admission to classified standing may, with the approval of the departmental graduate committee, be admitted as conditionally classified in the MA - English program.

Requirements for Admission to Candidacy for the MA - English
Admission to candidacy for the Master's degree in English requires favorable action by the departmental graduate committee and by the University Graduate Committee. Applicants will observe the stipulations relative to such items as transfer credit, time limit, completion of the Graduation Writing Assessment Requirement and scholarship stated in this catalog. They should particularly note that fitness for advanced study and professional training, not merely high grades or the satisfaction of formal requirements, is a prime requisite for graduate work.
**MA - English**

All candidates for the Master of Arts degree in English, which is designed for students who have completed an undergraduate major in English or its equivalent, are required to:

- Complete an approved 30-unit program with a grade point average of 3.0 or better. At least 21 of these units must be graduate-level (i.e. 200-numbered) courses. Any undergraduate course work to be applied to the MA program must be approved in advance by the graduate advisor.
- Complete the Graduation Writing Assessment Requirement by satisfactorily completing English 201. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details.
- Demonstrate reading proficiency in a second language by passing a language examination given by the Department of World Languages or an approved equivalent. (This requirement is waived for students who have, within five years of achieving candidacy, earned a grade of at least "B" in the fourth semester of an acceptable foreign language course. It is also waived for students whose first language is not English.)
- Pass the MA comprehensive examinations.

### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

MFA - Creative Writing

Requirements for Admission to Classified Standing
In addition to meeting minimum requirements for admission to the Graduate Division outlined in this catalog, an applicant must have:
A minimum of 24 semester hours of acceptable undergraduate course work in the major beyond freshman composition;
A 3.0 grade point average in major courses;
Approval by the departmental MFA in Creative Writing Committee;
For an international student, TOEFL score of 610 or higher.

Requirements for Admission to Conditionally Classified Standing
Students who do not qualify for classified standing but who meet university requirements for graduate admission and whose past performance gives promise of satisfactory completion of requirements for admission to classified graduate standing may, with the approval of the departmental MFA in Creative Writing Committee, be admitted as conditionally classified in the MFA program.

Requirements for Admission to Candidacy for the MFA in English
Admission to candidacy for the Master of Fine Arts degree in English requires favorable action by the departmental MFA in Creative Writing Committee. Applicants will observe the stipulations relative to such items as transfer credit, time limit, completion of the core requirement, and scholarship stated in this catalog.
All candidates for the Master of Fine Arts degree in Creative Writing, are required to:
• Complete an approved 48-unit program with a grade point average of 3.0 or better. At least 36 of these units must be graduate-level (i.e. 200-numbered) courses. Any upper division courses to be applied to the MFA must be approved in advance by the Creative Writing Director.
• Demonstrate competency in the theory and practice of literary production and scholarship by passing ENGL 201C.
• Demonstrate reading proficiency in a second language by passing a language examination. (This requirement is waived for students whose first language is not English or who have, within five years of achieving candidacy, earned a grade of “B” or better in the fourth semester of an acceptable foreign language course).
• Write a substantial work, with critical introduction, in one of the four program emphases: Poetry, Fiction, Nonfiction, or Script Writing.
• Pass the MFA Comprehensive Examination.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

⦁ MS, Environmental Studies

Introduction
The mission of the Department of Environmental Studies is to provide students with rigorous interdisciplinary tools to study, manage and resolve environmental challenges. Among the first in the country, the Department of Environmental Studies at SJSU has been granting degrees and training environmental professionals since 1970. Today, our students experience hands-on learning through field courses, the Center for Development of Recycling, the Environmental Resource Center and off-campus internships. Alumni fill positions in fields including environmental impact assessment, habitat restoration, renewable energy, water policy, environmental education, sustainable agriculture, park management, environmental policy, integrated waste management, and recycling. The Department offers four BS degrees (general, Energy, Environmental Restoration and Environmental Impact Assessment), a general BA, and a specialized BA in preparation for teaching. We also offer a range of minors to students around campus. In addition, the Department offers one of the few research-based Master of Science degrees in Environmental Studies in the country.
Structure of the BS, BA and MS Degrees

The undergraduate Environmental Studies degrees are structured around four components: the preparation sequence, consisting of specific classes in economics, sciences, and math; the core classes in Environmental Studies, which provide a solid foundation in environmental issues integrating science, social science, and the humanities; advisor-approved minor or concentration focused on a specific career pathway; and electives. Electives may consist of classes both within and outside the department and must be approved in advance by an Environmental Studies faculty advisor. The Master of Science graduate degree is a thesis-based program that requires original research. Information on all aspects of these degrees is found on the advising sheets available in the department office in Washington Square Hall 118 and on the department website at http://www.sjsu.edu/evns/.
**BA - Environmental Studies**

The BA degree is designed to prepare students for career opportunities in coastal resource management, environmental communications, environmental product design and packaging, environmental regulation and policy, integrated and solid waste management, human ecology and environmental planning.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

BA - Environmental Studies, Preparation for Teaching

This major is designed for students interested in teaching in elementary school or middle school. Students who wish to pursue a high school teaching career should complete a BA or BS in Environmental Studies in consultation with the department’s undergraduate advisor for teaching. The following course work satisfies San José State University’s requirements for a BA in Environmental Studies. The Commission on Teacher Credentialing in the state of California (CCTC) no longer recognizes Teacher Prep degrees as verification of subject matter competence. In order to verify subject matter competence for Multiple Subject Teaching Credential (K-8) individuals must pass all portions of the appropriate Commission-approved subject matter examination (CSET for Multiple Subjects).

Maintaining a minimum grade point average (GPA) of at least 2.87 and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 30 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a ‘C- or better’ to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

BS - Environmental Studies

The BS degree is designed to prepare students for career opportunities in water resources management, biological resource protection, aquatic environments, conventional and sustainable agriculture, energy resources, environmental health and safety, environmental impact assessment, environmental restoration, and wilderness open space resource management.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

**Total Units Required**

120
BS - Environmental Studies, Concentration in Environmental Restoration and Resource Management

This concentration is designed to offer students a specialization in the growing field of environmental restoration and natural resource conservation.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

MS - Environmental Studies

Graduate Coordinator: Jason Douglas

Advisors: Katherine Cushing, Jason Douglas, Alex Gershenson, Gary Klee, Dustin Mulvaney, Rachel O’Malley, Will Russell, Lynne Trulio

Requirements for Admission to Classified Standing

Basic requirements for admission to the Graduate Division are outlined in the Admissions section of this catalog. Contact the department or see our admissions materials for specific application deadlines. For admission to classified standing the department requires the following:

1. An undergraduate degree in Environmental Studies or a related field from an accredited institution.
2. A 3.0 or (“B”) overall grade point average for the last 60 semester units of academic study.
3. The capability, in the opinion of the graduate committee, of successfully completing the degree requirements.
4. The removal of deficiencies if preparation differs markedly from the BS - Environmental Studies at San José State University (BA students may be required to complete general science background). Courses used to remove such deficiencies cannot be used to fulfill MS requirements. For further information see graduate coordinator.
5. A satisfactory score on the official Graduate Record Examination Aptitude Test (GRE). Please note that no specialty is required. The exam results are used as an advisory tool, not as the sole determinant of admittance (or rejection) into the program.
6. Two letters of recommendation from university faculty members.
7. A personal statement of purpose that describes your background and goals and objectives for seeking the MS - Environmental Studies at SJSU. This letter should also convey a sense of focus and direction for thesis research.
8. A minimum score of 580 on the TOEFL exam for foreign students.

Requirements for Admission to Conditionally Classified Standing

If not accepted into classified standing, the applicant may qualify for the conditionally classified status for which the following will be required: the ability, in the opinion of the departmental graduate committee, to remove deficiencies in a period not to exceed the equivalent of one full-time semester of course work.

Requirements for Admission to Candidacy for the Master’s Degree

The student may be admitted to candidacy for the MS - Environmental Studies by complying with requirements of the university, as outlined in this catalog.

Completing Requirements for the Master’s Degree

In consultation with the department graduate coordinator, the candidate will develop and pursue a program of study. The candidate must successfully complete all requirements of the selected plan including the course work specified in the Master’s Degree Approval Program. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

⦁ MS, Engineering, Concentration in Electronic Materials and Devices

Introduction
In addition to the traditional disciplinary majors, the College of Engineering offers an MS Engineering (MSE) with special concentrations, and a BS General Engineering. Both the BS and MS programs encompass interdisciplinary study. The College also offers various special Minors including Green Engineering.
BS - General Engineering

For selected high-performing students the General Engineering degree is an opportunity to develop a special interdisciplinary major. Students must meet with a General Engineering advisor early in their studies to determine if such a plan is right for them. Other students entering General Engineering are encouraged to explore the various traditional engineering fields and select a program which fits their interests by their second year of study at SJSU. All College of Engineering undergraduate majors are required to maintain a Major GPA of 2.0 or above. Major GPA includes all courses required for the major, including math, science and engineering.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

The following courses in Preparation for the Major must be completed with a “C or better”: ENGL 001B

<tr>
<td>Plus core courses as approved by advisor</td>
<td>35</td>
<td></td>
</tr>
</tbody>
</table>

### Additional Requirements

- Elective courses and senior design as approved by advisor.

### Total Units Required

- 120
### Minor - Green Engineering

Students must complete a minimum of 12 units as listed under the course requirements. All of these units must be outside the requirements for the students major, i.e., the same courses cannot be listed both on the minor and the major forms. ENGR 102 or ME 172 (3 units) and ENGR 103 (3 units) are required for all students taking this minor. Students also take one of the Environmental Studies or Business courses listed below. In consultation with the Green Engineering advisor, students must select one additional elective course. It is the student’s responsibility to make sure that the prerequisites for each course are met. Students in majors other than engineering will probably need to take additional courses to meet prerequisites for the courses required for this minor. This sequence of courses is the recommended pattern for engineering majors.

<table>

For Legend please see page 2
MS - Engineering

The MS Engineering degree is an interdisciplinary program with the primary objectives of offering the practicing engineer the opportunity to develop a wide range of knowledge and skills needed to function in today's complex industrial environment. The program is designed to provide flexibility for students who need coursework that is truly interdisciplinary and not available through the other engineering programs in the college. The MS-Engineering programs typically include courses from at least three different programs in the College of Engineering and may also use courses in the College of Science or the College of Business. There are some specialized programs offered off-campus, such as the accelerated joint degree MBA/MS Engineering, which is offered in coordination with the College of Business. Additional off-campus specialized engineering graduate programs have been established at local industry sites. The MS Engineering programs include participation with local industry professionals as committee members and sponsors of master’s projects and theses.

Requirements for Admission to Classified Standing

Students seeking admission to MS Engineering programs must meet the general university requirements for admission as outlined in this catalog. In addition, the applicant must possess a baccalaureate degree from an ABET-accredited engineering program with a grade point average of at least 3.0 in the last 60 semester hours of upper division work completed in all subjects and in technical subjects only. Students meeting these criteria may be admitted in classified standing; however, students may still be admitted conditionally if they need prerequisite courses for the selected specialization. An engineering technology degree does not satisfy the degree requirement for admission to this program.

Requirements for Admission to Conditionally Classified Standing

A graduate applicant whose undergraduate record indicates deficiencies in one or more technical areas and/or has a grade point average less than 3.0 in the last 60 semester hours of upper division work completed in all subjects and in technical subjects only may be admitted for graduate work on a conditionally classified basis. Such students will be expected to satisfactorily complete additional coursework before becoming classified. Students admitted in conditionally classified status may petition for classified status when coursework in deficient areas has been completed, when they have satisfied the Graduation Writing Assessment Requirement (GWAR), and when their records in classes at San José State University show sufficient promise of success in the master's degree program.

Requirements for Admission to Candidacy

Students seeking the MS Engineering degree must meet the general university requirements for candidacy as outlined in this catalog. The University requires that all graduate students complete the GWAR as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement - Graduate” for details. For graduate courses that satisfy the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, the applicant must demonstrate aptitude for advanced professional work in engineering as measured by instructor appraisals, analysis of previous academic work or other appropriate means. Admission to candidacy and approval of programs will be handled by a faculty committee and the student’s advisor.

Completing Requirements for the MS - Engineering

The normal course of study for the MS-Engineering degree consists of 30 semester hours of approved work in the following areas:

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Requirements of the Masters

<table>
<thead>
<tr>

</table>

Students have the option to complete the requirements for the MS by completing a thesis (Plan A) or a project (Plan B). The student must first complete ENGR 281 - Master’s Project/Thesis Preparation Seminar (1 unit) before beginning the thesis or project research.

The MBA/MS Engineering program and special off-campus programs are coordinated through the College of Engineering Graduate and Extended Studies (GES). Students interested in these programs should go to the Graduate and Extended Education section of the College of Engineering web site (www.ges.sjsu.edu).
MS - Engineering, concentration in Electronic Materials and Devices

The concentration in Electronic Materials and Devices provides students with an in-depth education in electronic materials processes and the design of semiconductor devices. This concentration includes elective emphases in the areas of Electronic Materials, Custom Analog VLSI and Custom Digital VLSI. Students may also choose to combine concentration electives to develop a custom emphasis, such as Mixed Signal VLSI.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

⦁ Minor, Geographic Information Science
⦁ MA, Geography

Introduction
We are the only Geography Department in the booming Silicon Valley. Our location in downtown San Jose provides the department a wonderful urban geography laboratory. We offer courses in all the academic sub-disciplines of geography including GIS and spatial analysis. We have long-standing relationships with government agencies, other universities, and the City of San Jose. We are developing research and educational partnerships with Facebook, Apple, Netflix, and Google as these, and other powerful technology companies are nearing the cusp of a locational analytics explosion. Geography is a rapidly growing field and our students gain the critical thinking, analytic and problem-solving abilities to prepare them to participate fully in rewarding careers. Prospective students are encouraged to consult the geography website (www.sjsu.edu/depts/geography/) as well as the informational brochures available in the department office (WSQ 118).

Departmental Geography Honors Program
Graduation with departmental honors in geography can be achieved by successful completion of any geography graduate seminar open to those seniors with a 3.5 GPA in geography, or completion of an Honors Thesis under supervision of a department faculty member. Students must have a 3.5 GPA in geography to qualify for Honors Thesis option.
### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### University Graduation Requirements

MA - Geography

Advisor: Kathrine Richardson

Admission to the graduate program is flexible, and potential students are evaluated on a case-by-case basis. A strong record based on either undergraduate performance or employment experience is expected. Graduate students without a geography degree can expect added course work in geographic literature and theory.

Requirements for Admission to Classified Standing

Basic requirements for admission to the Graduate Division are outlined in the Admissions section of this catalog. In addition, the department requires the following for admission to classified standing:

1. An undergraduate degree in geography or a reasonably related field from an accredited institution.
2. A 3.0 ("B") overall grade point average for the last 60 semester units of academic study.
3. The capability, in the opinion of the Department Graduate Committee, of successfully completing the degree requirements.
4. The removal of deficiencies if preparation differs markedly from the BA - Geography at San José State University.

Requirements for Admission to Conditionally Classified Standing

If not accepted into classified standing, the applicant may qualify for conditionally classified status for which the following will be required:

1. The ability, in the opinion of the Department Graduate Committee, to remove deficiencies which do not exceed the equivalent of one full-time semester of course work.
2. The qualifications to be accepted to classified standing within a reasonable length of time, and the background to conduct studies at the graduate level.

Requirements for Admission to Candidacy for the Master’s Degree

The student may be admitted to candidacy for the MA - Geography by complying with requirements of the university as outlined in the Academic Regulations section of this catalog. The University requires that all graduate students complete the graduation writing assessment requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, students must obtain their thesis advisor's approval for their thesis proposal.

Students will complete a course of study designed to prepare them for professional work in their chosen subfield. Accordingly, they will need to take specific courses to support research and project work in that field.

Completing Requirements for the Master’s Degree

In consultation with the department advisor, the candidate will develop and pursue a program of study outlined in Plan A or Plan B. The candidate must successfully complete all requirements of the selected plan including the course work specified in the Master's Degree Approved Program.

Plan A (with Thesis)

1. A minimum of eighteen units in geography.
2. The thesis, based on independent research, is to be conducted under the direction of a thesis advisor and must be acceptable to and approved by the Thesis Committee. The Committee consists of the thesis advisor (committee chair), an additional member from the university faculty, and an additional member who may be from outside the university. The thesis topic shall be developed within the departmental foci in consultation with the thesis advisor. The thesis must conform to the university standards of style and form.
3. Final Examination: The thesis must be successfully defended orally before the thesis committee.

Plan B (without Thesis)

1. A minimum of twenty-one units in geography, with at least 50% of the units in graduate level courses.
2. Project: The student shall present the results of a project in one of the areas of departmental focus. Appropriate projects include research completed for a geography graduate seminar or an independent study conducted under supervision of a faculty advisor. The results will be reported in a written paper and other materials submitted to the department, and will be presented formally to a geography faculty and student colloquium for acceptance.
## Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

⦁ BS, Geology
⦁ Minor, Geology
⦁ MS, Geology

Introduction
Rocks, soil, minerals, fossils, oceans, earthquakes, volcanoes, climate change—the Department of Geology specializes in increasing students’ understanding of the Earth and its geological features. We offer general education courses, K-12 teacher training and professional development, a rigorous, integrated undergraduate curriculum and graduate courses and research. Our bachelor’s degree program in geology prepares students for graduate study in the geosciences as well as for entry-level positions in geological and environmental consulting firms, regulatory agencies and other employment settings. Our bachelor’s program in earth science is designed to help students master the content needed for successful completion of the California Commission on Teaching Credentialing’s California Subject Examinations for Teachers, and provides a career path for students interested in becoming secondary school teachers. Our master’s degree program particularly emphasizes the study of applied geology, surface processes, and tectonics, enabling graduates to advance to Ph.D programs and to secure jobs as geologists, engineering geologists, hydrogeologists, geophysicists and environmental managers.

Geology and Earth Science Honors Program
Departmental honors in the BS Geology and Earth Science degree programs are awarded to those majors who have achieved a 3.5 grade point average in their required departmental courses and have completed an undergraduate research project. A proposal for undergraduate research, including an identified Geology faculty supervisor, must be approved by the Geology honors committee for acceptance into the honors program. Completion of two units of Geology 180 and both written and oral presentation of research results are required for completion of the program.
BA - Earth Science

This major provides broad background in the earth sciences. Students interested in teaching science in high school or middle school should take the specified elective courses (consult with the advisor as needed).

Completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions
This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

MS - Geology

Requirements for Admission to Classified Standing
A student who wishes to enroll for graduate study in this department must meet the general requirements for graduate standing in the university as outlined in this catalog. In addition, the student must be accepted for classified standing by the departmental graduate advisor.

Requirements for Admission to Candidacy
A student is eligible for admission to candidacy for the Master of Science degree in Geology after the student has fulfilled the general all-university requirements for qualifying for candidacy as outlined in the Academic Regulations section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, the student’s admission must be approved by the departmental graduate advisor.

Completing Requirements
An approved program for each candidate may be designed in consultation with the advisor on the basis of each individual’s objectives. The program shall include not less than 30 semester units earned beyond the bachelor’s degree in 200-level and 100-level courses approved for graduate credit. All candidates are required to submit a master’s thesis. All candidates must complete the equivalent of the requirements of the San José State University BS - Geology.

The oral examination for the Master of Science degree is scheduled with the student’s thesis advisor. The candidate must complete the Graduation Writing Assessment Requirement (GWAR). An oral presentation of thesis research is to be made before an open meeting of the Geology Department. The thesis must be approved by the student’s thesis committee and submitted in final form, as outlined in the Thesis Section of this catalog, to the Graduate Division of the university in accordance with the published deadlines.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Requirements of the Masters

- BA, Global Studies
- Minor, Global Studies
- Certificate, Global Citizenship

Introduction
Global Studies at SJSU is an interdisciplinary program that encourages students to look at the world holistically. The tremendous international migrations of people, movements of goods, technology transfers, and mixing of cultures makes it important to study the world as a human community in ways we haven’t considered in the past. The program is designed to train future leaders to grapple with some of the most pressing issues of our time, from a global perspective. The focus of our program on studying global issues from multiple perspectives provides students the intellectual foundation and the analytical and communication skills to prepare for careers in government, education, NGOs, international development agencies, international philanthropic organizations, law, consulting, global health organizations, writing, and graduate study. We are the only Global Studies program in the San Francisco Bay Area and one of the few in the CSU system that offers an interdisciplinary program that includes a suite of core courses in Global Studies. Global Studies is a relatively new field and our program is at the leading edge of shaping this field for the future.
## BA - Global Studies

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

**Language Requirement**

Global Studies majors must complete at least 2 semesters of coursework in a language other than their native language. This requirement may also be met by a proficiency exam. If proficiency exam is passed units should be directed towards electives from the approved Major Electives list.

**Major Upper Division Electives**

See a Global Studies Advisor for approved Upper Division Electives.

Certificate - Global Citizenship

Global Citizenship is an interdisciplinary certificate program intended to assist students and members of the non-student community in understanding the interconnectedness of peoples, genders, cultures, and societies and celebrating the richness of human diversity in a global context. The program complements SJSU’s goals of globalizing the campus and graduating students who are globally responsible citizens. Students will examine questions of meaning and value associated with citizenship in today's increasingly connected world. Students will also develop their own understanding of personal, social, and corporate responsibility to the global community. In a rapidly changing world, it is necessary for college students to acquire the knowledge, skills, values, and attitudes to adapt and thrive in the enlarged and evolving global context.

- MS, Recreation (Not Accepting Students)
- MS, Recreation, Concentration in International Tourism (Not Accepting Students)
- MPH, Public Health

Introduction
Department of Health Science and Recreation, prepares leaders and practitioners who promote health and improve the environments in which we live, work, and play. The undergraduate curriculum in health science examines the multiple dimensions of health (physical, emotional, social, environmental, spiritual) and the scientific basis for understanding health at the population level (epidemiology and biostatistics). Founded in 1970, the Master of Public Health program (MPH) is accredited by the Council on Education for Public Health (CEPH) and offered in two formats: on campus (regular session) and distance (through International and Extended Studies). All undergraduate students in recreation complete a well-rounded set of core courses that prepare them to apply for national and state certification and to obtain employment in a variety of non-profit, for-profit, government, and recreation therapy settings. Our department is involved in many innovative community-based programs, including Salud Familiar en McKinley, the SJSU Peer Health Education Program, Project SHINE, Smokefree SJSU, and several therapeutic and recreation management agencies in the S.F. Bay Area. Our special events throughout the year offer excellent networking and professional development opportunities.
BS - Health Science

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

All courses in Required for the Major Core must be completed with a grade of "C" or better to graduate. All other approved electives require a "C- or better" to graduate.

University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>

*up to 5 can be taken outside of Recreation - all must be approved by advisor*

#### Total Units Required

120
BS - Recreation, Concentration in Therapeutic Recreation

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

University Graduation Requirements

Core Lower Division General Education
Of the 39 units required by the university, 12 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C- or better" to meet the requirement. Consult with major advisor for details.

Upper Division General Education
Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions
Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

COMPLETE ONE SEQUENCE FROM:

African American Studies
AFAM 002A. African-Americans and the Development of America’s History and Government ......................................................... D2 ......................................................... 3
AFAM 002B. African-Americans and the Development of America’s History and Government ......................................................... M7 ......................................................... 3

Asian American Studies
AAS 033A. Asian Americans in U.S. History I ........................................ D2 ......................................................... 3
AAS 033B. Asian Americans in U.S. History II ........................................ M7 ......................................................... 3

U.S. History and Government
HIST 015A. Essentials of U.S. History .......................................................... M12 ..................................................... 3
Can be taken as POLS 015 A/B as well.

Mexican American Studies
MAS 010A. Mexican Americans and the Development of U.S. History and Government ......................................................... D2 ......................................................... 3
MAS 010B. Mexican Americans and the Development of U.S. History and Government ......................................................... M7 ......................................................... 3

Physical Education

Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.
A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

## Minor - Complementary and Alternative Health Practices

The Complementary and Alternative Health Practices Minor program is designed to provide a strong academic understanding of the theory, practice, and effectiveness of complementary and alternative medical (CAM) therapies. Emphasis is on critical thinking skills and using a scientific evidence-based eye while keeping an open mind. Classes will form the basis for evaluating CAM therapies commonly practiced by U.S. residents.

### Total Units Required

- 15 units
Master of Public Health Program
San José State University offers an MPH degree with a specialization in community health education in two formats; On Campus (regular session) and also online (through the College of International and Extended Studies). Both on campus and online students engage in the same rigorous course of study. The MPH degree on campus offers students the flexibility to complete their degree in two years or more, depending on personal circumstances. The MPH online option is offered through special session and is a fast-paced, 24-month program of study.

Graduate Admission
New students are admitted once a year, to begin course work during the fall semester in both online and campus formats. A detailed Admissions Information Packet is available at http://www.sjsu.edu/hsr/academicprograms/mph/onlineprogram/applyingtotheprogram.

Campus and online applications are accepted between February 1 and April 1. Applications received after April 1st will not be eligible for review. Applications received by February 1st are eligible for early review and admission. For online Applications Only: All applications received prior to April 1st will be reviewed. Applications received between April 1st and June 1st will be considered on a space available basis only. Applying to the MPH program, both campus and online, requires two parallel, but separate, application processes. All MPH applicants must:

1. Submit a complete university application through the CSU Mentor website.
2. Submit a complete application to the MPH program. Additional information and the Application Packet are available on the department website: http://www.sjsu.edu/hsr/academicprograms/mph/admissions/index.html

Successful applicants must be admitted to the university by the SJSU Graduate Admissions and Program Evaluations.
MPH - Master’s in Public Health

Special Session Program Information
Academic Programs offered through Special Session are operated by the College of International and Extended Studies (IES). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Culminating Experience

- Comprehensive Exam: 0

On Campus students have the option to choose a project or thesis which requires additional coursework (see below).

On-Campus Option- Additional Coursework

- HS 298. Graduate Project: 3
- HS 299. Master’s Thesis: 3

Required Practicum

- HS 291A. Fieldwork Seminar: 1
- HS 291B. Fieldwork Practicum: 1-2
- HS 291P. Professional Development: 1

Total Units Required

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Note: Masters Theses and graduate projects may only be undertaken by MPH campus students upon departmental approval and will require additional units.
Graduate Programs in Recreation (Currently Not Accepting Students)

Graduate Program Advisor: Dr. Anne Demers

General Requirements for Admission
Applicants to the graduate program must complete all sections of the CSU online application (www.csumentor.edu) including the personal statement which must address the applicant’s potential to develop expert knowledge and the advanced skills needed to succeed in the field and/or to continue study in a doctoral program. Criteria for admission include an overall grade point average of 2.5 and an upper division grade point average of 3.0. Additionally, applicants are requested to send a copy of their personal statement and their resume to the department graduate coordinator.

The department will not be admitting students into the Master of Science in Recreation in AY 2016-17. Please check with department for subsequent admission cycles.

Requirements for Admission to Candidacy for the MS - Recreation
In addition to university requirements for admission to candidacy for the Master of Science degree in Recreation, students must have completed the following requirements: all deficiencies must be completed with a grade point average of at least 3.0; the admission to candidacy form must be completed and approved by the graduate program advisor and the Associate Dean for Graduate Studies; and the Graduation Writing Assessment Requirement (GWAR) must be demonstrated at least one semester prior to submission of the admission to candidacy form. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Introduction
To understand the present and prepare for the future, we must understand the past. The Department of History offers both undergraduate and graduate programs that enable students to comprehend the forces that have shaped the United States and the world. Our graduates are teachers and historians, and history is a particularly appropriate major for students bound for law or medical school. Also, history majors appear in every business field. Outstanding student research papers are published in the journal Passports, and Phi Alpha Theta, the history honor society, sponsors academic and social activities for students. At the graduate level, our primary fields of study are American history, European history, and world history. Our faculty and students conduct research that draws on the special resources of the MLK Library as well as outstanding area research facilities, including the San José Historical Museum, the California History Center at DeAnza College and the Hoover Institution at Stanford University.
Honors Program in History
A student may qualify for admission to the History Department honors program provided he or she is a history major or minor or a Social Science major who has completed 15 upper division units in history. To apply to History Honors the student must have an overall GPA of 3.0, a GPA of 3.5 for all history upper division courses, or the permission of the chair. If accepted, the students must complete HIST 101 and 180H, each with a grade of “A” or “B” or the equivalents. HIST 101 and HIST 180H normally will be open only to qualified seniors.
BA - History

Courses offered under this program are planned for those who wish a general liberal education, for those who want a broad foundation for any one of the social sciences, for those who desire advanced degrees in the field of history, and for those who wish to secure the teaching credential.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

MA - History

Requirements for Admission to Classified Standing
Admission to classified standing for the MA - History requires that the undergraduate preparation of the applicant be comparable to that of a history major for the BA degree at San José State University. Included in this preparation must be one upper division or graduate course in historical method and a course in historiography may be required. The applicant who does not have this preparation must remove all deficiencies. Students who have a baccalaureate degree in a field other than history will be required to complete up to 16 units in upper division or graduate history courses. Units thus taken will not be counted toward the minimum 30 units required for the MA - History. Requirements and regulations change; thus, the department web site contains the most current information. Please reference it.

Requirements for Admission to Conditionally Classified Standing
A student who does not meet all requirements for admission in classified standing for the MA - History may be admitted in conditionally classified status. The graduate advisor will list on the admissions notification all deficiencies and courses that must be taken. Upon completing these requirements, the student must file a petition for a change of status to classified standing.

University Requirements
The applicant must also comply with all requirements of the university as outlined in this catalog and stated in subsequent policy changes (this refers both to admission and graduation procedures). The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape/index.htm.

Completing the Course Requirements for the MA - History
Following admission to the university and the department, the student should consult the history department website and speak with the graduate advisor regarding degree requirements and a proposed degree program. Candidates must complete 20 units of course work in one of the following fields of study: United States History, European History or World History. Eight units may be taken in any field of history. Two units will focus on professional development. Specialists in European History and U.S. History may apply one World History colloquium (HIST 220) to their primary field, and World History specialists may apply one U.S. History colloquium (HIST 210) or one European History colloquium (HIST 209 or HIST 211) to their primary field. Five courses and the 2 units of professional development-22 units-must be completed at the graduate level. All students must retain a 3.0 GPA average to remain in the program and either pass the comprehensive examination or complete a thesis to receive the degree.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Additional Graduate or Upper Division Courses

| Total Units Required | 30 |

**Thesis (Plan A) and Examination (Plan B) Options**

In addition to the course of study outlined above, graduate students must take and pass a culminating examination (Plan B). On the exam the student is expected to demonstrate considerable breadth and depth of knowledge, a familiarity with historiographical issues and follow acceptable rules of grammar, spelling and literary style in presentation. The examination will be scheduled toward the end of the fall and spring semesters and students must pass the examination within three attempts or no degree will be awarded.

In some exceptional cases, students may substitute a thesis (Plan A) for this test. A thesis option will be considered only upon the nomination of a professor, who agrees to serve as the first reader. The student must demonstrate to the nominating professor, in a written proposal, that he or she is capable of completing a thesis, both in terms of research skills and writing ability and that he or she has sufficient time to undertake a major research and writing project. In addition, the proposed project must have intrinsic historical value. Demonstrating these points still does not obligate a professor to nominate or to serve as a first reader, and no reason need be given to a student for declining to supervise a thesis. Permission to write a thesis is also contingent on finding two other professors willing to be second and third readers respectively; they also serve entirely at their own discretion. Finally, the department’s graduate studies committee must approve all thesis proposals. After all three readers have signed the thesis, the candidate must submit it to the University for final approval.

A thesis committee has the option of terminating the thesis option if, in the opinion of the three readers, the candidate has shown him- or herself incapable or unwilling to write an acceptable thesis in a reasonable amount of time. In that situation the student will be required to take the Plan B comprehensive examination.

**Language Requirement**

All candidates for the general MA degree in history must demonstrate competency in one foreign language. The sole exception are students whose primary field is U.S. History, who may, if they do not wish to meet the language requirement, take two history graduate level courses in substitution.

The language competency requirement may be met in four ways:

1. Through examination by a history faculty member with expertise in your language. The exam will be a translation of approximately 500 words to be completed in two hours with a dictionary allowed.

2. By taking two years of a foreign language at a university or community college. An average grade “C” must have been attained, and the course work completed within five years of admission to the university.

3. If your primary concentration is European History, you may also fulfill this requirement by taking one year of Greek and one year of Latin.

4. By taking and passing the Educational Testing Service Graduate Foreign Language Exam.

**Graduate Division Approval of Candidacy and Degree Program**

At least one semester before a candidate expects to graduate, the student must complete the Advancement to Candidacy Application delineating the entire degree program, that is, the courses that the student has completed or expects to complete toward the MA. The candidate must submit the form to the Graduate Advisor and then to Graduate Studies for final approval. Through this procedure, the student’s entire program will be examined to determine whether it complies with all departmental and university requirements for the degree, including the university requirement for completion of the Graduation Writing Assessment Requirement.
MA - History, Concentration in History Education

Advisors: Dr. Patricia Evridge Hill, Dr. Libra Hilde

The MA History, Concentration in History Education is designed for middle and secondary school social science teachers. The curriculum broadens the candidate’s knowledge of U.S. and World History. In addition, the program increases the candidate’s academic proficiency in history subjects and his/her professional competence in special areas of interest within the field of history and social science education. This is a terminal degree. Candidates who plan to pursue more advanced graduate training in history should apply to the regular Masters degree program outlined above.

Requirements for Admission to Classified Standing
Admission to classified standing for the MA History, Concentration in History Education requires that the student has completed a Single Subject Social Science Teaching Credential, has completed a BA in History or passed the Social Science CSET Examination.

Completing the Course Requirements for the MA - History, Concentration in History Education
Following admission to the university and to the department, the student should consult the history department website and speak with an advisor regarding degree requirements and a proposed degree program. Candidates must complete 20 units of course work in one of the following fields of study: United States History or World History. Eight units may be taken in any field of history. Two units will focus on professional development. U.S. History specialists may apply one World History colloquium (HIST 220) to their primary field, and World History specialists may apply one U.S. History colloquium (HIST 210) to their primary field. Five courses and the 2 units of professional development-22 units-must be completed at the graduate level. All students must retain a 3.0 average to remain in the program and pass the comprehensive examination to receive the degree (see above for explanation of the Plan B examination).

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

COMPLETION OF THE FINAL WRITTEN COMPREHENSIVE EXAMINATION
Procedures for approval for the MA in History, Concentration in History Education are the same as for the general Masters degree except that, for this concentration, no foreign language is required.

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape/index.htm.

⦁ Minor, Hotel and Restaurant Management

Introduction
Where better to study hospitality management than in the heart of Silicon Valley, San Jose, California and the Bay Area? Thanks to our world renowned high tech companies, and vibrant metropolitan location, we attract millions of national and international visitors each year. According to a recent CSU impact report, hospitality ranks as one of the state’s top growth industries, ensuring that the demand for hospitality professionals will only increase. Our innovative, technology-driven curriculum and faculty provide the theoretical, practical, and professional training students need to pursue successful and meaningful careers. Our Bachelor of Science degree in hospitality, tourism and event management pairs academic study with hands-on experience and internships. Our graduates find employment as hotel/resort general managers, restaurant managers, private club managers, controllers, sales and marketing managers, human resources managers, concierge, catering and corporate event coordinators/producers, and convention and tradeshow managers. Come join our team!
BS - Hospitality, Tourism and Event Management

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

COMPLETE ONE SEQUENCE FROM:

African American Studies

Introduction

Originally the Department of Humanities offered students an integrated perspective on Western civilization. But the world has changed, and so have we. Our department now provides a global perspective on developments in technology, cultures and communication. Who are we? Where did we come from? Where are we going? Our curriculum examines these fundamental human questions through courses that integrate history, literature, philosophy, religion, politics, music and art. Most importantly, we develop our students’ analytical and expressive skills and their ability to read, write and think clearly, promoting an appreciation of the arts and letters and their role in shaping modern society. Our programs cover human experience in aesthetic, creative, literary, religious and cultural traditions in America, Asia, Europe and the Middle East. Our students win writing awards and as graduates pursue careers in a variety of fields, including law, journalism, librarianship, teaching, public service, social work and public relations.

Advisors: Tamara Goldie, Scot Guenter, Christian Jochim, Todd Ormsbee, Cynthia Rostankowski, Jennifer Rycenga, Susan Verducci
**Humanities Honors Program**

The Humanities Honors Program 001A/B-002A/B is a four-semester survey course in the World Cultures and Societies-Honors (001A/001B) and Modern World Cultures-Honors (002A/002B) which provides students with 24 units of core General Education in a format that emphasizes the interrelationship of art, literature, philosophy and social institutions. Core General Education: Written Communication (6 units); Oral Communication (3 units); Arts and Letters (6 units); Comparative Systems (3 units); Social Issues (3 units); Critical Thinking (3 units). The program also satisfies graduation requirements in American Institutions (6 units).

The course is interdisciplinary, globally-focused, and team-taught, and is organized chronologically from the Ancient World through the Middle Ages, the Renaissance, the Early Modern and Contemporary periods. In the last two semesters the course focuses upon the emergence and development of American culture and institutions within the broader framework of European, African, indigenous American, and Asian history and cultures. The program develops students’ analytical and expressive skills, promotes an appreciation of the arts and letters, increases their understanding of the diverse peoples and societies which have shaped modern American social and cultural institutions. Entering students with a high school GPA of 3.0 and a verbal SAT score of 550 or above are automatically eligible.

**American Civilization Curriculum**

The American Civilization curriculum is a two-course, twelve-unit sequence which satisfies over one-fourth of all lower division general education requirements. American Studies 001A and 001B provide six units of general education credit in arts and letters (Area C), six units in comparative systems and social issues (Area D), and also satisfy the California Education Code American Institutions requirements in U.S. History, U.S. Constitution and California Government (Areas US1, US2, US3). The courses provide the opportunity to study America’s development and current conditions through themes such as the American dream, environmental issues, and ethnic and women’s studies.
BA - Creative Arts
This degree is cross listed with the Creative Arts Program.
BA - Creative Arts, Preparation for Teaching

This degree is cross listed with the Creative Arts Program.
### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### Major-Specific Graduation Requirements

Students in this major should consult their advisor regarding American Institutions requirement. Depending on sequence(s) a student chooses, 0-30 units of GE/AI can be met in the major.

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of “C or better” (C- not accepted) is required to meet graduation requirement.
Preparation for the Major (Recommended)

Recommended that native students complete one of the sequences below, in consultation with Advisor. Any student who completes the American Institutions requirement will have met this area.

COMPLETE ONE SEQUENCE FROM:

**American Civilization Sequence**
AMS 001A. American Civilization ................................................. M4 .................................................. 6

**University Electives**  
0-30

The Department highly recommends majors complete the following:

- One year of college level foreign language or equivalent related to chosen area: *0-10*

**Total Units Required**  
120
BA - Humanities, Concentration in Asian Studies

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C- or better" to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

## University Electives

A minor is strongly recommended

Total Units Required: 120
# BA - Humanities, Concentration in Liberal Arts

## University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

## University Graduation Requirements

### Core Lower Division General Education

<table>
<thead>
<tr>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 39 units required by the university, 6 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.</td>
<td>33</td>
</tr>
</tbody>
</table>

**NOTE:** STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

### Upper Division General Education

<table>
<thead>
<tr>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.</td>
<td>3</td>
</tr>
</tbody>
</table>

### American Institutions

<table>
<thead>
<tr>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.</td>
<td>6</td>
</tr>
</tbody>
</table>

Consult Major Advisor for department recommended coursework to meet GE requirement.

### African American Studies

<table>
<thead>
<tr>
<th>Description</th>
<th>Units</th>
</tr>

### University Electives

**THE DEPARTMENT RECOMMENDS MAJORS COMPLETE THE FOLLOWING:**

- One year of college level foreign language or equivalent related to chosen area: 0-10

### Total Units Required

| Total Units Required | 120 |
BA - Liberal Studies, Concentration in Cross-Cultural Studies in Mexican and American Education

Cross-Cultural Studies in Mexican and American Education (CCSE) is an interdisciplinary major. This concentration provides future education professionals and scholars with a multi-disciplinary and cross-cultural program of study in education and society. The concentration is designed to facilitate students' understanding of the impact of cultural, ethnic, linguistic, and economic backgrounds on schooling, both in Mexican and American contexts. It is designed to help students experience and understand a foreign culture, and to acquire the self-confidence, independence, and leadership qualities that result from studying abroad through the LA META Program in Querétaro, Mexico. Students majoring in CCSE may wish to work with youth in a variety of ways, including as a bilingual teacher.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

BA - Liberal Studies, Preparation for Teaching

This major is designed for students interested in teaching in elementary school or middle school. The following course work satisfies San José State University’s requirements for a BA in Liberal Studies. The Commission on Teacher Credentialing in the state of California (CCTC) no longer recognizes Teacher Prep degrees as verification of subject matter competence. In order to verify subject matter competence for Multiple Subject Teaching Credential (K-8) individuals must pass all portions of the appropriate Commission-approved subject matter examination (CSET for Multiple Subjects).

Maintaining a minimum grade point average (GPA) of at least 2.87 and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Core Lower Division General Education

Of the 39 units required by the university, 24 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C- or better" to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

CONSULT MAJOR ADVISOR FOR DEPARTMENT RECOMMENDED COURSEWORK TO MEET GE REQUIREMENT.

Physical Education

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

## Minor - American Studies

This interdisciplinary program offers students the opportunity to study American culture and society. In addition to the focus on a better understanding of American culture, there is emphasis upon analytic skills, close reasoning, and effective communication, providing useful preparation for graduate study, for elementary or secondary teaching, or for careers in law, public service or government.

### Total Units Required

18-21
Minor - Area Studies

The minor in Area Studies provides an opportunity for concentrated study in the history, politics, economics, geography, or culture one of four designated regions of the world.

With the consent of the advisor for the Area Studies minor, a student may select courses concerning aspects of one of the following regions - East and Southeast Asia, Africa and the Middle East, Latin America, or Europe (inclusive of Russia) - and courses from a general list. Programs of study for other coherent regions (e.g., Pacific Rim, Eastern Europe, etc.) may be worked out in consultation with the advisor. Courses taken to satisfy requirements of any major may not be counted toward the minor.

<table>

Total Units Required 15
Minor - Asian Studies

The Asian Studies minor will acquaint students with the histories, traditional cultures and contemporary conditions of Asian countries and societies. Courses may be selected from anthropology, art, business, foreign languages, geography, history, music philosophy, political science, and religious studies.

## Minor - Middle East Studies

This interdisciplinary minor provides background for students whose professional goals include the promotion of mutual understanding, tolerance and peace in the region. The Middle East Studies minor is especially recommended to students seeking a career in international law, business, economic development, health care, education or religious studies. Courses encompass the disciplines of art history, anthropology, business, foreign languages, history, humanities, political science, sociology and religious studies.

Minor - Religious Studies

This minor offers a basic understanding of religious beliefs and practices for those whose careers would benefit from familiarity with some religious traditions, such as those in teaching, business, journalism, social work, medicine, and law. The minor incorporates the study of religious traditions with reflection on what religion is and how we understand it.

Requirements of the Minor

HUM 101. Human Life: Let’s Think About It........................................................................................................3
plus 12 additional units of which 6 must be upper division and 9 in RELS courses.................................................. 12

- MS, Industrial and Systems Engineering
Introduction

Industrial and Systems Engineers figure out how to do things better by engineering processes and systems that improve quality and productivity. ISEs make significant contributions to their employers by saving money, increasing productivity, and making the workplace better for workers. Industrial and Systems Engineers focus on productivity improvement with respect for the human aspect of work. ISE bridges the gap between management and operations by applying six sigma principles, lean manufacturing processes, principles of organizational improvement, continuous improvement, and ergonomics. The undergraduate degree prepares engineers for challenges in manufacturing or service systems analysis and design. Students in our master’s program build on an aptitude already in evidence for advanced professional work in industrial engineering. Our alumni are employed in a variety of industries, businesses and institutions, from retail establishments to manufacturing plants to government agencies to hospitals. The BS Industrial and Systems Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org
BS - Industrial and Systems Engineering

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements
All Technical Electives Required in the Major must be completed with a “C or better”. The following courses in Preparation for the Major must also be completed with a “C or better”: ENGL 001B

<table>
<thead>
<tr>

University Graduation Requirements

Core Lower Division General Education
Of the 39 units required by the university, 33 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

Upper Division General Education
Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions
Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

Physical Education

Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

Six Sigma Certificates

The revolutions in lean manufacturing and quality have swept the world and broadened into the disciplines of lean enterprise and six sigma. Six Sigma’s emphasis is on improving existing capabilities. Six Sigma is a set of structured methodologies, problem-solving tools and advanced statistical methods for analyzing and improving processes, product designs and services on a broad range of metrics, especially cost, quality, time and variability. It moves beyond treating symptoms and short-term problems to the elimination of root causes, thereby emphasizing lasting improvement.

This certificate is available to ISE graduate students and local professionals.

Six Sigma Green Belt Certificate

Major-Specific Graduation Requirements

The following course in the minor requires a grade of “B or better”: ISE 250

<table>

Departments & Degrees

MS - Industrial and Systems Engineering

Requirements for Admission to Classified Standing
Applicants for classified standing will ordinarily be expected to have completed work for the BS degree in industrial engineering (or its equivalent) at San José State University or at another university with an accredited curriculum, with a grade point average of 3.0 ("B") or better in the upper division work (last 60 units).

Requirements for Admission to Conditionally Classified Standing
Applicants who do not have a baccalaureate degree in industrial engineering (or equivalent) but who meet university requirements for graduate admission and whose academic records or professional achievements give promise of satisfactory performance in graduate study in industrial engineering may be admitted to Conditionally Classified standing. Applicants whose bachelor’s degrees are not in industrial engineering will be required to take additional courses (prerequisites), which will not be counted in the graduate degree program for the MS - Industrial and Systems Engineering. The GRE General Test is not required.

Requirements for Admission to Candidacy
Students seeking MS degrees in the College of Engineering must meet the general university requirements for candidacy as outlined in the Academic Requirements section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, the applicant must demonstrate aptitude for advanced professional work in industrial engineering, as measured by instructor appraisals, analysis of previous academic work or other appropriate means. Admission to candidacy and approval of programs will be handled by a faculty committee and the student’s advisor.

Completing Requirements for the MS - Industrial and Systems Engineering
Students who have been admitted to candidacy for master’s degrees in engineering must thereafter maintain grade point averages of 3.0 ("B") or better in all work taken in the graduate program, and in the minimum 30 semester units of approved graduate work.

All students are required to complete a thesis, project, or pass a comprehensive examination covering either their graduate course work or major project.

The general requirements for the MS - Industrial and Systems Engineering include completion of at least 30 semester hours of approved work. The course requirements consist of at least two core courses, four courses in a specialty area, one elective and a thesis or comprehensive-exam/project. Five specialty areas are offered: Systems and Information Modeling, Production and Quality Assurance, Human Factors, Service Systems Engineering and Supply Chain Engineering. The minimum requirements are:

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html. Passing either ISE270 or ISE251 automatically satisfies this requirement.

Comprehensive Exam- Five hour exam consisting of questions on three core courses and two elective courses.

Total Units Required 30
## MS - Engineering Management

Engineering Management is a specialized form of management that is concerned with the application of engineering principles to business practice. Engineering management is a career that brings together the technological problem-solving savvy of engineering and the organizational, administrative, and planning abilities of management in order to oversee complex enterprises from conception to completion.

Engineering Management programs typically include instruction in the areas of accounting, economics, project management, finance, systems engineering, mathematical modeling and optimization, quality control and six sigma, operations research, human resource management, industrial psychology, safety and health. At SJSU, engineering management program emphasizes quality and six sigma, statistics, fundamentals of business accounting and finance, engineering economic analysis, business ethics, supply chain engineering, and systems engineering. Through technical electives, students become knowledgeable in other aspects of business management, such as project management, human resource management, and operations research.

### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

**Total Units Required**: 30
**MS - Human Factors/Ergonomics**

The ISE Department also administers the MS degree program in Human Factors/Ergonomics. This program is a cooperative program involving the Departments of Industrial and Systems Engineering, Psychology, Industrial Design and Kinesiology. Additional information can be found at [www.engr.sjsu.edu/hfe](http://www.engr.sjsu.edu/hfe).

**Human Factors/Ergonomics**

Human factors/ergonomics is the discipline concerned with the development and application of human-system interface technology to systems analysis, design and evaluation. This technology encompasses human-machine (hardware ergonomics), human-task (workplace ergonomics), human-environment (environmental ergonomics), human-software (cognitive ergonomics) and organizational-machine (macro-ergonomics) interfaces. Practitioners are engaged in developing design specifications, guidelines, methods and tools. They also apply human-system interface technology to ensure that work systems are compatible with the characteristics of the humans who operate, maintain or otherwise interact with them. Their efforts include improving the operability, maintainability, usability, comfort, safety and health characteristics of systems to improve human and system effectiveness and to reproduce the potential of injury and error (adapted from remarks published by H. Holbrook, 1995-96 President, Human Factors and Ergonomics Society, HFES Bulletin, January, 1996).

This program prepares students for practice in this emerging profession through an interdisciplinary course sequence that emphasizes theory, practical applications and research. HF/E students take a group of five core courses from several different SJSU departments and elective courses in topics of their choosing. A one semester weekly seminar is required of all students. The program culminates in a thesis or project.

**Requirements for Admission to Classified Standing**

Applicants for classified standing must have completed a BS or BA degree in Psychology, Industrial Engineering, Occupational Therapy, Industrial Design, Kinesiology, or other related field at an accredited institution. A grade point average of 3.0 (B) or better in the last two years of academic work is preferred. Applicants for classified standing will also be expected to have completed upper division courses in statistics, cognition, and perception.

Those who do not meet the requirements for classified standing may be admitted with specific conditions as conditionally classified; any conditions stated upon admission in this status must be fulfilled before the student can be admitted to candidacy for the degree. If the conditions are not fulfilled, the program reserves the right to dismiss the student from the program by a process known as administrative academic disqualification (see Section 41300.1, Title 5, California Code of Regulations).

See the program web site [www.engr.sjsu.edu/hfe](http://www.engr.sjsu.edu/hfe) or contact the program Director for details regarding application deadlines.

**Requirements for Admission to Candidacy for the MS - Human Factors/Ergonomics**

Students seeking the Master of Science degree in Human Factors/Ergonomics must meet the general all-university requirements for candidacy as outlined in the Academic Requirements section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [www.sjsu.edu/gape](http://www.sjsu.edu/gape). In addition, the applicant must demonstrate aptitude for advanced professional work in human factors/ergonomics, as measured by instructor appraisals, analysis of previous academic work or other appropriate means. Admission to candidacy and approval of programs will be handled by a faculty committee and the student’s program advisor.

**Course Requirements**

Students must maintain a GPA of 3.0 or above in all courses taken in fulfilling prerequisites and the 30 graduate units required for completion of the program. The general requirements for the course completion are as follows:

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

</table>

Culminating Experience

Complete four units from:

- ISE 298. Special Problems
- PSYC 298. Special Problems
- KIN 298. Special Studies
- ISE 299. Master’s Thesis
- PSYC 299. Master’s Thesis or Project
- KIN 299. Master’s Thesis or Project

Total Units Required

The decision as to whether to embark on the project (Option B) or Thesis (Option A) path for the culminating experience will be made by the student in consultation with the program’s assigned advisor based on the student’s current and long term interests and resource requirements.

Course descriptions can be found under the listings for the respective departments elsewhere in this catalog. Electives may be selected from a wide range of graduate courses offered on the SJSU campus in industrial engineering, psychology, kinesiology and other departments. The program develops and offers its own elective courses from time to time in topics such as usability testing, human-computer interaction, safety and others. Please see the program website for further details.

Curricula
⦁ Credential, California Library Media Teacher Services
⦁ Certificate, Big Data (Special Session Program)
⦁ Certificate, Strategic Management of Digital Assets and Services (Special Session Program)
⦁ Certificate, Post Master’s in Library and Information Science (Special Session Program)
⦁ MLIS, Library and Information Science (also offered in Special Session)
⦁ MARA, Archives and Records Administration (Special Session Program)

Introduction
The San Jose State University (SJSU) School of Information prepares individuals for careers as information professionals. Graduates work in diverse areas of the information profession, such as user experience design, digital asset management, information architecture, electronic records management, information governance, digital preservation, and librarianship. The SJSU School of Information is a recognized leader in online education and received the Online Learning Consortium’s Outstanding Online Program award. For more information: ischool.sjsu.edu
Credentials

To qualify for the California Library Media Teacher Services Credential with authorization as a library media teacher, the student must complete the credential course work outlined here in the university catalog.

Students must either already hold a valid California teaching credential or complete the requirements for a basic teaching credential (see College of Education section of this catalog for requirements for a teaching credential).
Post-Master’s Certificate in Library Information Sciences

The Post-Master’s Certificate program features seven career pathways focused on diverse specializations, such as digital curation, emerging technologies, web programming, and more! Certificate program students choose one career pathway and then select five courses from that career pathway, tailoring their in-depth learning experience to their career aspirations. In addition, all students begin the program with a one-unit guided learning experience that introduces our school’s interactive online learning environment. After completing 16 units of required coursework, certificate students demonstrate their mastery of the program’s learning outcomes.
Certificate - Big Data

In this data-intensive world, students need the skills that will enable them to tackle Big Data issues and understand from both an academic and applied perspective how these data sources can be managed, mined for new insights, and the resulting analysis presented to others in an understandable format. The School of Information offers a 9-unit interdisciplinary certificate program to students who seek career opportunities in Big Data analytics and management. The program aligns with the defined knowledge areas in both academia and practice and provides the students with an understanding of the fundamental concepts and emerging technologies needed in Big Data.

Certificate - Strategic Management of Digital Assets and Services

Handling and governance of digital information and data in organizational and networked contexts- including digital assets management, digital curation, information governance, information assurance, data analytics, marketing, community informatics, and demonstrating value. Students pick one career pathway and select 9 units from that pathway, [http://ischool.sjsu.edu/programs/advanced-certificate-strategic-management](http://ischool.sjsu.edu/programs/advanced-certificate-strategic-management)

**MLIS - Master of Library and Information Science (also offered in Special Session)**

**Completing the Requirements for MLIS**

Applicants who meet the following requirements will be considered for admission into the School of Information:

- A bachelor’s degree from any regionally accredited institution in any discipline with a GPA of at least 3.0 at the bachelor’s degree institution or in the last 60 semester or 90 quarter units.
- A general understanding of computers and technology. See [Technology Literacy Requirements](#).
- The School requires that all students have computer access from home. See [Home Computing Requirements](#).

In addition to the same requirements mentioned above, **International Applicants** must meet the following:

- TOEFL score of 600 (paper version) or 250 (computer version) or 100 (Internet-based) or
- IELTS score of 8.

**Completing Requirements for the MLIS**

The Master’s degree in Library and Information Science requires successful completion of 43 semester units. Of those 43 units, 16 are required of all students.

Beyond the five initial required courses, and the final required course, students build their individually-designed programs in concert with their faculty advisers. For detailed information on courses and seminar topics please see this page. For seminar topics please see this database.

Note: INFO 200, INFO 202, and INFO 204 must be passed with a grade of ‘B’ or better.

**Special Session Program Information**

Academic Programs offered through Special Session are operated by the College of International and Extended Studies (IES). Registration and enrollment in a Special Session must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

**Total Units Required** 43

**Other Areas**

Students can also transfer up to 9 units from other academic department subject to the School's transfer policies.

**Culminating Experience**

An e-portfolio or completion of a thesis is required of all students. The e-portfolio is incorporated into INFO 289, Advanced Topics in Library and Information Science. The thesis option requires advance arrangements with a thesis committee and successful completion of INFO 285, Research Methods in Library and Information Science, or its equivalent.
English Competency

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the CWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Prior to advancement to candidacy, all students will complete the university upper division writing requirement and will have passed with a grade of “B” or better or will have passed the equivalent university examination.
### Masters in Archive and Records Administration (Special Session)

The fully online Master of Archives and Records Administration (MARA) degree program at the San Jose State University School of Information prepares students for leadership positions in information governance and corporate archives.

With the convenient and fully online MARA program, students can live anywhere while they earn their graduate degrees. The master’s program is delivered exclusively online via interactive online learning technology. The multimedia format enlivens the learning experience while introducing students to the same types of tools they’ll use in their professional careers.

Formal admission is required for the program. You can apply for admission in the fall or spring semester.

#### Admission Requirement:
- A bachelor's degree from any regionally accredited institution in any discipline with a GPA of at least 3.0 at the bachelor's degree institution or in the last 60 semester or 90 quarter units.
- A general understanding of computers and technology
- Access to a computer with Internet connection
- International applicants must have a TOEFL score of 600 (paper version) or 250 (computer version) or 100 (Internet-based)

#### Special Session Program Information

Academic Programs offered through Special Session are operated by the College of International and Extended Studies (IES). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.

ADMINISTRATION BUILDING, ROOM 223B
408-924-2427
www.sjsu.edu/gape/forms

Curricula
⦁ MA, Interdisciplinary Studies
⦁ MS, Interdisciplinary Studies

Introduction
The interdisciplinary studies major for either an MA or MS degree provides an alternative for individuals whose desired study plans do not fit the degree offerings of any single existing graduate degree program on campus.

An interdisciplinary studies major consists of an individualized, interdisciplinary program of 30 units, half of which must be at the graduate level. The program may be either Plan A (thesis) or Plan C (creative project). All candidates for this major must register for departmental thesis units in (299). The candidate must comply with all applicable California Administrative Code requirements as well as university requirements outlined in this catalog for admission to the graduate program, admission to candidacy and award of the degree. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Studies website at www.sjsu.edu/gradstudies.

To be eligible for an interdisciplinary studies major, the student must have a minimum GPA of 3.0 (“B”) in the last 60 semester units of post-secondary academic work for admission to the Graduate Division. The student must also be eligible for classified admission to at least one of the departments in which he or she expects to take substantial course work for the interdisciplinary studies major.

Graduate students at San José State University who wish to undertake an interdisciplinary studies major should contact the Graduate Studies office to obtain a proposal for an interdisciplinary studies major and initial approval by the Associate Dean of Graduate Studies. A guide for interdisciplinary majors is located at www.sjsu.edu/gradstudies/forms.

After the proposal receives initial approval, the student forms a special advisory committee comprised of at least three full-time faculty members representing the student’s major fields of interest. The advisory committee, chaired by one member, must approve the proposed program before the Associate Dean of Graduate Studies gives final approval.

Introduction
In the Jewish Studies Program, students explore Jewish and Israeli culture, history, literature, religion, politics, philosophy, languages, and art. The curriculum fosters critical thinking within and across disciplines and, as is true with any good learning, seeks to enable students to make the leap from knowledge to commitment and action. An interdepartmental minor in Jewish studies includes courses offered by six departments within the College of Humanities and Arts and the College of Social Sciences: the Departments of History, Religious Studies, English and Comparative Literatures, Foreign Languages, Art History, Political Science, Geography and Global Studies. Scholarships are awarded each semester to outstanding students enrolled in the Jewish studies minor program.
Courses that meet General Education/American Institution requirements are noted with area designation for required area.

Introduction
Founded in 1936, the School of Journalism and Mass Communications is the largest school of its kind in Northern California. In 2012, the journalism program was ranked among the top two in California, and the top 50 in the U.S. It is also nationally accredited by the Accrediting Council on Education in Journalism and Mass Communications (ACEJMC). We offer undergraduate degrees in advertising, convergence journalism and public relations, and a master’s degree in mass communications. Timely, ethical and responsible visual storytelling utilizing new technologies is the focus in all our degree programs. We offer students access to scholarships, regional and global internships, and competitive prizes unavailable to students in non-accredited programs. Our faculty are experienced multimedia journalists, photographers, writers, graphics designers and advertising, public relations, and social media executives. Our graduates have won six Pulitzer Prizes and excelled in careers as online content producers, publishers, editors, news directors, and communication executives.

Students who wish to change their major at SJSU to one of those offered in the JMC School must fulfill department-specific coursework and GPA requirements as specified on the department website.
Honors Program

Majors with a 3.2 GPA overall and a 3.5 GPA in advertising, journalism, or public relations at the end of their junior year (at least 90 units completed of which 30 are in the major) are eligible to apply for the Honors Program in the School of Journalism and Mass Communications. Application must be made to the Director of the School no later than the first semester of the senior year. The School will limit those admitted to the Honors Program each year to no more than 10 percent of the number of its graduates in the previous academic year. Once admitted to the Honors Program, students must maintain at least a 3.2 GPA overall and at least a 3.5 GPA in their major. They must take a graduate-level seminar that has been approved by the graduate coordinator. To receive honors, students, as part of the seminar requirements, must complete and present a seminar paper and must receive a 3.0 or better grade in the course.
BS - Advertising

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Journalism and Mass Communication International Experience Requirement
To satisfy the Journalism and Mass Communication Department international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at http://www.sjsu.edu/casa/international-experience.

CATALOG CONTENTS

MS - Mass Communications

Admission Requirements
The school admits students in both fall and spring semesters. Applicants are responsible for obtaining information on admissions criteria and deadlines from the JMC School Graduate Coordinator or the main school office.

To be admitted to the program a student must:
1. Complete an application for admission to the university, submit required transcripts and pay the required application fees.
2. Complete a school application, including a 250-500 word essay on the applicant’s career objectives.
3. Obtain two letters of recommendation from current or former professors and/or employers who can testify to the candidate’s ability to pursue an advanced academic degree. At least one recommendation letter must be from a current or former professor unless the applicant has not taken any courses during the previous five years.
4. Foreign students must score at least 600 on the TOEFL and must demonstrate English proficiency in a written essay.
5. The Graduate Record Exam (GRE) is required of all applicants. The GRE score for the verbal, quantitative and analytical sections should be about 1050; the verbal score should be about 550.
6. Grade point averages are given considerable weight in evaluating applications, but are not the sole criterion. An applicant should have an average of 3.0 or better (3.3 for foreign students) in the last two years of undergraduate study and the undergraduate major. Exceptions may be made for applicants if the candidate has had significant professional experience in the mass media, offers strong letters of recommendation, strong GRE scores or other evidence indicating a potential for success in graduate study. In addition to the school application, letters of recommendation and GRE scores should be sent directly to the graduate coordinator. In addition to sending official transcripts to the university, send unofficial copies of the transcripts to the graduate coordinator.

Requirements for Admission to Classified Standing
Students must meet requirements for admission to the Graduate Division; however, no particular specialization in undergraduate work is required of a candidate.

Requirements for Admission to Conditionally Classified Standing
Applicants who have less than a 550 verbal GRE score but who otherwise have strong records may be admitted, contingent on the completion of three to six units of writing courses in the School as prerequisites to the MS program. Prerequisites (writing and/or statistics courses) will not be included in the 30-unit program.

Requirements for Admission to Candidacy
To be admitted to candidacy for the Master of Science degree, a student must first meet the all-university requirements for the degree as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

The applicant must demonstrate an aptitude for advanced work in communications, as measured by instructor appraisals, evaluation of previous academic work, recommendations by qualified professionals or other assessments.

The applicant will meet with the graduate coordinator to develop a formal course of study. The M.S. degree-approved program will be individually designed to meet the specific objectives of each student. It will take into consideration the nature of previous undergraduate work and post-graduate work completed, as well as any professional and related occupational experience. The proposed graduate program must be approved by the graduate coordinator before the student may be considered a candidate for the MS - Mass Communications.

Completing Requirements for the M.S. - Mass Communications

Plan A (with Thesis)
Plan A requires successful completion of an acceptable thesis and an oral presentation of the thesis to a faculty/student audience. The thesis proposal must be approved by the graduate committee which will assign three advisers to work with the candidate on the thesis.

Plan B (with Project)
Plan B requires a professionally-oriented project employing multiple media and an oral presentation to a faculty-student audience. Projects should reflect the values of journalism, advertising, or public relations. A project proposal must be approved by the graduate committee. When the proposal is approved, the graduate coordinator will assign two advisors to work with the candidate throughout the project. Presentation of the product must be in a form suitable for library storage.
Plan C (Comprehensive Papers)
This option requires taking an additional graduate elective in the School and completing three units of MCOM 298 by researching and writing two 30-40 page comprehensive exam papers: one in media communications and one in the candidate’s specialty area.
New prerequisites for program: MCOM 063 (New Media) or equivalent. Demonstrated proficiency in media writing.

### Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

⦁ Certificate, Collaborative Response to Family Violence (Special Session Program)
⦁ MS, Justice Studies

Introduction
Since 1930, the Department of Justice Studies has developed, promoted and fostered social justice and empowered communities. In an ever-changing social, political and economic environment, we remain committed to academic excellence, social activism and policy relevant research. We offer BS and MS degrees in justice studies, a BS in forensic science and minors in justice studies, forensic studies, legal studies and human rights. Among other topics, our widely regarded faculty conduct research in the areas of human rights, immigration, violence against women, sex offender behavior, family violence, DNA profiling and the effects of policing on Latino and African American neighborhoods. Student groups and clubs include Alpha Phi Sigma, Chi Pi Sigma and the Forensic Science Club. Our graduates work in a multitude of settings including probation and parole, corrections, law enforcement, crime labs, and nonprofit agencies, or they continue their education in law school or other graduate programs.
BS - Justice Studies

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

All courses in the Preparation and Required in the major (all courses in preparation, core, and concentration/specialization) must be completed with a grade of “C or better”.

Justice Studies International Experience Requirement

To satisfy the Justice Studies Department international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at http://www.sjsu.edu/casa/international-experience.

*When topic area is offered.*

### Area D: Local, Transnational, Historical Courses

Complete twelve units from:

- JS 121. Media and Justice
- JS 122. Terrorism, Intelligence, and Security
- JS 129. International Crime and Deviance
- JS 145. White Collar Crime
- JS 156. Gangs, Criminal Syndicates & Justice
- JS 161. Introduction to Cybercrime
- JS 172. Human Trafficking and Modern Day Slavery
- JS 185. Special Topics in Law and Justice

*When topic area is offered.*

**University Electives**

A minor is strongly recommended

**Total Units Required**

120
# BS - Forensic Science, Concentration in Biology

## University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### Prerequisite Requirements

Any course that is prerequisite to any Chemistry Course must be passed with a grade of "C or better" (C- not accepted).

### Justice Studies International Experience Requirement

To satisfy the Justice Studies Department international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at [http://www.sjsu.edu/casa/international-experience](http://www.sjsu.edu/casa/international-experience).

## University Graduation Requirements

### Core Lower Division General Education

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.</td>
<td>24</td>
</tr>
</tbody>
</table>

**NOTE:** STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS (EXCEPT FOR 1 COURSE IN GE AREA C AND 1 COURSE IN GE AREA D) AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP (WHICH INCLUDE THE MISSING GE IN AREA C AND D). MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

### Upper Division General Education

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.</td>
<td>9</td>
</tr>
</tbody>
</table>

### American Institutions

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.</td>
<td>6</td>
</tr>
</tbody>
</table>

**COMPLETE ONE SEQUENCE FROM:**

#### African American Studies

### Total Units Required

15
Minor - Human Rights

The Minor in Human Rights is meant to prepare students for careers in relation to international law, human rights advocacy/reporting/organizing, and human rights scholarship. The Minor can supplement the program of students who have interests in (for example) social problems, public policy, social movements and social change, international relations/studies, law and governance, issues of justice, and global cultures.

Certificate - Collaborative Response to Family Violence (Special Session Program)

The Certificate for Collaborative Response to Family Violence will be offered through the Justice Studies Department at San Jose State University and will be available to community professionals of all disciplines who wish to enhance their skills and effectiveness through continued study. It is a 12-14 unit certificate program which integrates knowledge in the areas of family violence and collaboration to inform and improve our response to family violence and enhance innovation and effectiveness. Certificate participants will develop a strong working knowledge and awareness of:

- Family violence
- Dynamics, impacts and meaning of violence across disciplines
- Critical systems involved in responding to family violence
- Skills for collaboration
- Critical analysis of stages and elements of effective collaboration

Departments & Degrees

MS - Justice Studies

Graduate Coordinator: Dr. Sang Kil(sang.kil@sjsu.edu)

Description
The Department of Justice Studies at San José State University, California, offers a full-time two-year or part-time three-year Master’s program drawing upon criminology, criminal justice, sociology, political science, psychology, law and history. Areas of teaching and research in the Department include criminal justice, criminology, policing, law & society, human rights, policy evaluation, juvenile justice, immigration, punishment & society, race theory, history, and forensic science. The Master’s program, with its emphasis on theory, history, policy evaluation, research and comparative analysis, prepares students for careers in criminal justice administration, public institutions, grassroots community organizations and nonprofit agencies, as well as for doctoral programs and research positions in public agencies.

Admission
To be considered for admission to the Justice Studies Department, applicants must have a minimum grade point average of 3.0 in the last 60 units of university course work. Admission decisions will be based on a weighted assessment of the applicant’s grade point average, course work and preparation, two letters of recommendation from academics, and a short essay on a justice-related topic chosen each year by the Justice Studies graduate committee (see JS website for further information). Admission to the graduate program may be through classified standing or conditionally classified standing.

1. Classified Standing
In addition to the admission requirements of the university, the Justice Studies Department has requirements for being admitted to classified standing:
Completed undergraduate prerequisites required by the department, including a research methods course (e.g., JS 114), and a statistics course (e.g., STAT 95). If a student’s baccalaureate degree is not in criminal justice, criminology, or justice studies, additional departmental courses are usually required to enhance the student’s knowledge in these areas (JS 151 and JS 189; or their equivalent).

2. Conditionally Classified Standing
Applicants meeting the university’s requirements for the Graduate Division but lacking either of the above requirements for classified standing may, at the department’s discretion, be considered for admission to conditionally classified standing. Applicants who have not met the above departmental prerequisites must satisfactorily complete the requirements in their first year.

International (Foreign) Students
Documentation of the applicant’s TOEFL score should accompany other admission material. For TOEFL Requirements see Policies and Procedures section, Graduate and Post baccalaureate information.

Candidacy
To be admitted to candidacy for the Master of Science degree in Justice Studies, students must meet the general university requirements for admission to candidacy outlined in the Academic Regulations section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, the following departmental requirements apply:
1. Completion of all course requirements with a grade point average of 3.0 (“B”) or better, and
2. Completion of 9 units of core or required courses with a grade point average of 3.0 (“B”) or better, and
3. Obtain an approved Master’s Degree Program from the Associate Dean for Graduate Studies done in consultation with the department’s graduate coordinator.
As soon as admitted to classified standing, completion of Graduation Writing Assessment Requirement and 12 units of graduate study, the student should meet with the department’s graduate coordinator to draft an approved program. This program must identify thirty-six (36) units of course work as outlined in the following list of course requirements.
Completing Requirements for the MS - Justice Studies

Plan A (with Thesis)
Plan A provides an advanced program of study for those who are primarily interested in conducting research, and pursuing advanced study toward the doctorate.

Plan B (without Thesis)
Plan B provides an advanced program of study for professionals and those who want to pursue careers in the justice studies field.

Course Requirements
Each student must take a core curriculum of 18 units (JS 201, 202, 203, 204, 207 and 211). The thesis option requires six thesis units, plus elective units; the non-thesis option requires completion of JS 297, plus 12 units of elective units. Elective courses must be 200-level courses in the department. Subject to graduate coordinator approval, two graduate courses in other departments on campus may be taken as electives, if the student demonstrates their relevance to the student’s program of study and/or career goals in Justice Studies. Undergraduate courses may not count toward the 36 units of required graduate course work. Students who are academically or administratively disqualified from the program, will generally not be readmitted.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

- Minor, Kinesiology
- MA, Kinesiology
- MA, Kinesiology, Concentration in Athletic Training
- MA, Kinesiology, Concentration in Exercise Physiology
- MA, Kinesiology, Concentration in Sport Management
- MA, Kinesiology, Concentration in Sport Studies

Introduction
Kinesiology majors study human movement, the physical activity involved in work and play. Many of our graduates work as athletic directors, athletic trainers, coaches, teachers, personal trainers and sports managers; others continue on to medical school or receive advanced degrees in physical therapy. A charter member of the American Kinesiology Association, our department is a recognized leader in the CSU system as well as in kinesiology education and other allied health professions throughout the country. We offer bachelor’s degrees in kinesiology, athletic training, and teaching, and a master’s degree in kinesiology that allows degree candidates to focus on athletic training, exercise physiology, sport management, sport studies, and other areas of specialization. We support several student organizations, including SPATO, the athletic training club; the Adapted Physical Activity Club, a student service organization that advocates for individuals with disabilities; the Pre-PT Club; and the Kinesiology Ambassadors’ Club, which seeks to spread information about the field of kinesiology.
BS - Kinesiology

Satisfactory completion of the requirements of the four-year major program in kinesiology leads to a BS degree. The program is based upon the discipline of kinesiology and stresses both theoretical and practical objectives. Four areas of specialization.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

Students in this major must complete all courses Required in the Major (All courses in Preparation, Core, Concentration/Specialization) with a “C- or better” to graduate. The following courses in Preparation of major must be passed with a “C or better”: KIN 100W.

Kinesiology International Experience Requirement

To satisfy the Department of Kinesiology international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at http://www.sjsu.edu/casa/international-experience.

BS - Kinesiology, Preparation for Teaching

This major is designed for students interested in teaching physical education in high school or middle school. The following course work satisfies San José State University’s requirements for a BS in Kinesiology. The BS - Kinesiology, Preparation for Teaching is approved as subject matter preparation for a single subject credential by the California Commission on Teacher Credentialing (CCTC). Individuals who do not wish to complete one of the degree programs, or individuals seeking a single subject credential in subject areas not listed must pass all portions of the appropriate Commission-approved subject matter examination(s).

Minimum grade point average (GPA) criteria may be required for verification of subject matter competency. Completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

Note: Students who wish to complete or have completed another major should consult with a Department of Kinesiology advisor who specializes in teacher preparation to determine requirements for single subject matter competency certification in physical education.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

University Graduation Requirements 41

Core Lower Division General Education 24

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

Upper Division General Education 9

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions 6

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

Department - Athletic Training

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

Students in this major must complete all courses Required in the Major (All courses in Preparation, Core, Concentration/Specialization) with a “C- or better” to graduate. The following courses in Preparation of major must be passed with a “C or better”: KIN 100W.

Kinesiology International Experience Requirement

To satisfy the Department of Kinesiology international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at http://www.sjsu.edu/casa/international-experience.

| Units Required | 120 |
Undergraduate Professional Athletic Training Program

This program must be satisfied concurrently with successful completion of the Bachelor of Science in Kinesiology at SJSU. It prepares students for entry-level careers in the care, prevention and management/rehabilitation of athletic injuries. The Athletic Training Program is Commission on Accreditation of Athletic Training Education (CAATE) accredited.

The mission of the Athletic Training major is to prepare qualified athletic trainers for the profession by establishing their eligibility to take the Board of Certification (BOC) examination. The education of AT majors is based on the development of current knowledge, skills, and abilities as determined by CAATE. The knowledge and skills identified in the competencies consist of 8 content areas: 1) evidence-based practice; 2) prevention and health promotion; 3) clinical examination and diagnosis; 4) acute care of injury and illness; 5) therapeutic interventions; 6) psycho-social strategies and referral; 7) healthcare administration; and 8) professional development and responsibility. Student education occurs in courses and in a variety of clinical experiences.

Athletic Training Program (ATP) Application

In addition to completing the degree requirements in the major, students who seek eligibility for this certification are required to have CPR/AED certifications and to complete a clinical practicum component. The clinical component provides hands-on experience in a variety of settings, including hospitals, sports medicine clinics, high schools, and colleges. Students enrolled in the Athletic Training major seeking BOC certification must submit evidence that the following requirements have been met.

Application materials for the Fall must be received by the second Friday in April.

Applications Requirements

The professional Athletic Training Program accept applications once a year, Fall semester. The deadline for completed applications is the second Friday of April.

Meeting the minimum ATP application eligibility requirements does not guarantee admission into ATP.

Admission requirements for the professional ATP.

1. Applicants must submit a completed California State University application to the Office of Admission and Records at San José State University.
2. Applicants must submit a separate Athletic Training Education Program application to the Department of Kinesiology in care of the Undergraduate Professional Athletic Training Program Director. The ATP application form can be downloaded from the following web-site: http://www.sjsu.edu/kinesiology/programs/undergradutes/athletic_training/application/
3. Minimum of 50 hours of athletic training observation.
4. Official transcript(s) for all collegiate level academic work.
5. A minimum overall GPA of 2.75 (on 4.0 scale) or above required.
6. Two letters of recommendation verifying ability to successfully complete the academic rigors of the program, interact effectively with athletes and other allied medical staff, and work as a professional in an allied health field.
7. Proof, or waiver, of hepatitis B vaccine.
8. Proof of a physical examination for the ergonomic tasks required to complete the CAATE competencies for athletic training knowledge and skill acquisition.
9. Proof of CPR/AED (American Red Cross or American Heart Association accepted, contact the Program Director for validation of other certifications.
11. Completed or concurrent enrollment in KIN 188/189: Prevention and Care of Athletic Injuries Lecture/Lab add at the end (BIOL 65 and BIOL 66 are required as prerequisites).
### Minor - Kinesiology

Through advisement, students can develop the electives that help to focus their minor program of study. Contact the department for academic advisement.

**Total Units Required** 18
Graduate Program in Kinesiology

Graduate Coordinator: Dr. Ted Butryn

Requirements for Admission to Classified Standing
The Department of Kinesiology requires the following of all applicants seeking admission to classified standing in the MA - Kinesiology in addition to meeting requirements for admission to the Graduate Division:

1. A baccalaureate degree with a major or a minor in Kinesiology or successful completion of a maximum of 12 units of foundation course work as assigned by the Graduate Coordinator or an assigned Academic Advisor.
2. A minimum grade point average of 3.0 in the last 60 semester units (or 90 quarter units) of work.
3. A fully completed CSU Mentor Application, including the Statement of Purpose on the application. Statement of purpose should include a thoughtful narrative about the applicant’s research interests, as the two core research methods courses necessitate that students think about their final culminating experiences upon acceptance into the program.
4. A GRE General Test score of at least 150 verbal and 141 quantitative.
5. Two (2) letters of recommendation mailed (or signed, scanned and emailed from a university or professional work account) directly to the Graduate Coordinator.

Requirements for Admission to Conditionally Classified Standing
The graduate coordinator, in consultation with faculty, may approve admission of a student who meets the requirements for admission to the Graduate Division who has neither a major nor a minor in Kinesiology; has a grade point average below 3.0 in the last 60 semester units (or 90 quarter units), or scores below 150 verbal or 141 quantitative on the GRE General Test. The student may become eligible for admission to classified standing upon: satisfactory completion of prescribed undergraduate course deficiencies (foundation coursework), and/or completion of six units of graduate course work with a minimum grade point average of 3.0 in each course.

Requirements for Admission to Candidacy for the MA Degree
General university requirements for admission to candidacy for the Master of Arts degree are outlined in detail in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. Following are additional requirements of the Department of Kinesiology for the Master of Arts degree.

Upon admission to the Graduate Division and prior to registration, each student should meet with a graduate academic advisor in the student’s chosen concentration area. If there are any deficiencies in a student’s undergraduate work, additional upper-division undergraduate foundation courses may be required. Foundation courses may not be counted for credit in the master’s program. If foundation units are required, additional upper-division KIN units will be assigned by the graduate advisor.

A proposed program for the graduate objective selected should be developed as early as possible with the assistance of a graduate academic advisor in the student’s concentration area.

The proposed program must be approved by the graduate advisor, the graduate coordinator, and the Office of Graduate Studies before the student is considered a candidate for the Master of Arts degree.

Completing Requirements for the MA - Kinesiology

Plan A (with Thesis)
The purpose of this plan is to provide concentrated study in one of the subdisciplinary areas of Kinesiology. It is crucial that students electing Plan A identify the focus of their concentration early so that an appropriate thesis topic may be developed and a thesis committee selected.

Required courses are KIN 250, KIN 251, and KIN 299 (6 units). Concentration and Elective classes (18 units) from the student’s selected concentration should be determined in consultation with a graduate academic advisor. A maximum of 9 units may be selected from outside the Department of Kinesiology.

Plan B (Non-Thesis)
This plan is for students interested in producing a research-based creative project in Kinesiology. The plan requires a special project in place of a thesis.

Required courses are KIN 250, KIN 251, and KIN 298 (3 units).

Concentration and Elective classes (21 units) from the student’s selected concentration should be determined in consultation with a graduate academic advisor. A maximum of 9 units may be selected from outside the Department of Kinesiology.

Note: The Graduate Athletic Training Education Program (GATEP) has a specific course structure and a separate application process.

Latin American Studies Program
College of Humanities and the Arts

CLARK HALL 420G
408-924-4626

Associate Professors
Damian Bacich, Coordinator

Curricula
⦁ Minor, Latin American Studies

Introduction
The interdepartmental minor in Latin American Studies is designed to complement a wide variety of academic majors by providing knowledge of Latin American affairs, culture and politics. Courses may be selected from art, world languages and literatures, history, Mexican American studies, philosophy, political science and theatre arts.
Minor - Latin American Studies

This degree is cross listed with the World Languages and Literatures.

⦁ Certificate, Undergraduate TESOL
⦁ Certificate, Graduate TESOL
⦁ MA, Linguistics
⦁ MA, Teaching English to Speakers of Other Languages

Introduction
Linguistics, the scientific study of human language, explores what language is, how it works and which features human languages have in common. Our curriculum focuses on understanding how the languages of the world work and addressing the English language needs of our culturally diverse society. Students in the Department of Linguistics and Language Development (LLD) are part of an ethnically and linguistically diverse student body, taught by nationally and internationally recognized faculty. We offer graduate and undergraduate degrees in linguistics, a certificate in computational linguistics, a master’s degree in TESOL (Teaching English to Speakers of Other Languages), and undergraduate and graduate certificates in TESOL. Our research infrastructure includes a state-of-the-art computer lab, a phonology lab, and access to language data. Approximately 25% of our students come from other countries and contribute greatly to our programs.
## BA - Linguistics

The BA-Linguistics undertakes the scientific study of nature, structure and function of language. Linguists study the origins of language, the meaning and history of words, what language tells us about the workings of the human mind, and the practical aspects of language, including intercultural communication, language learning and teaching, and language as a conveyor of information in profound human arenas, such as medicine and law. Linguistics is also a central discipline that is involved in communicating with machines using natural language (i.e., artificial intelligence and machine recognition and synthesis of speech). The program offers state-of-the-art equipment for the acoustic and perceptual study of speech. Students in the major acquire critical thinking and problem-solving skills and receive excellent preparation for advanced studies in linguistics as well as anthropology, communication, education, law, and speech hearing. Students with knowledge of more than one language have an excellent background for the study of linguistics.

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

THE DEPARTMENT RECOMMENDS LLD 100W (LLD 100W MAY BE USED AS A MAJOR ELECTIVE COURSE).

### Preparation for the Major

**0-10**

**MUST MEET ONE OF THE FOLLOWING CRITERIA:**

- One year of college level language other than student’s native language (10)
- Demonstrated equivalent competence (0)
- One year of college level American Sign Language (6)

For students for whom English is not the native language, one year of college level English study may fulfill this requirement.

### Requirements of the Major

**36**

GE Basic Skills requirements must be completed prior to taking courses in the major.

**Core Courses**

<table>
<thead>
<tr>

Certificate - Computational Linguistics

The Certificate in Computational Linguistics is an 18 unit program that provides a basic education and a certain amount of practical training in the interdisciplinary field of computational linguistics. It was designed to meet the needs of individuals who desire formal course preparation as language analysts in the environment of human language interfaces in software development. Please contact the computational linguistics coordinator for advising before beginning this certificate.

To receive the Certificate in Computational Linguistics, students must complete the following 18 units of course work and fulfill the programming requirement:

### Requirements of the Certificate 18

### Total Units Required 18

Programming requirement: Demonstrated competence with a programming language, such as PERL, Java script, C, or C++. This requirement may be fulfilled by completing a course at SJSU or a community college, or by providing work demonstrating knowledge of a programming language. NOTE: CS and MATH courses above have pre-requisites of their own, so the total number of units you must take for the certificate may vary depending on your choice of electives and your academic background.

Any matriculated upper division undergraduate or graduate student may pursue this certificate. Non-matriculated students may take the courses through Extended Studies Open University. Students must maintain a 3.0 average in these courses to be awarded the certificate.
Certificate - Undergraduate TESOL

The undergraduate certificate in TESOL is for students who have not yet completed the BA. Students complete courses related to the structure of English and teaching of English to speakers of other languages. For students whose major is not linguistics, the TESOL certificate can be combined with the minor in linguistics. To receive the undergraduate Certificate in TESOL, students must complete the following eighteen units of required course work:

Requirements of the Certificate

Any matriculated upper division student may pursue this certificate. Students must maintain a 3.0 average in these courses to be awarded the certificate.

Core Courses

Choose two courses with the approval of the TESOL Coordinator

Total Units Required

18
Certificate - Graduate TESOL

Any matriculated graduate student may pursue this certificate. The certificate is designed to meet the needs of individuals desiring formal course preparation and training as classroom teachers of English to speakers of other languages but not requiring an MA degree. While the certificate is approved by the university, it does not provide certification, accreditation, or credentialing approved by the Commission on Teacher Credentialing. Students must maintain a 3.0 average in these courses to be awarded the certificate. To receive the certificate students must complete the following 18 units.

Requirements of the Certificate

Any matriculated upper division student may pursue this certificate.

<table>

</tbody>
</table>

Total Units Required

Three units (of an equivalent course) are transferable into the program. Foreign students must have minimum score of 577, computer score of 233 or Internet-based score of 90 on the TOEFL or 7.0 on IELTS. Students must maintain a 3.0 minimum grade point average throughout the program.
Graduate Programs

Requirements for Admission to Conditionally Classified Standing
Students holding an accredited baccalaureate degree and who otherwise satisfy the graduate level admissions requirements of San José State University (in the case of students with baccalaureate degrees from a university where English is not the principal language of instruction the minimum score of 577, computer score of 233, or internet based score of 90 on the TOEFL or 7.0 on IELTS) are eligible for admission at conditionally classified students. Students must have a grade point average of at least 3.0 in the last 60 semester (90 quarter) units.

Requirements for Admission to Classified Standing
Students are eligible for admission as classified graduate students if they hold an accredited baccalaureate degree and otherwise satisfy the graduate level admissions requirements for San José State University (in the case of students with baccalaureate degrees from a university where English is not the principal language of instruction, this includes a minimum score of 577, 233 on the computerized version, or 90 on the Internet based version on the TOEFL or 7.0 on IELTS). In addition, students in the MA Linguistics program are eligible for admission as classified graduate students if they have completed at least nine semester units of acceptable work in linguistics equivalent to San José State University’s Introduction to Linguistics (LING 101), Introduction to Phonetics (LING 111), and Introduction to Syntax (LING 112) with a grade of “B” or better in each of these three classes. For students in the MA TESOL program, two courses are prerequisite for admission to classified standing: Introduction to Linguistics (LING 101), and Patterns of English (LING 107), which must be completed with a grade of “B” or better in each.

Requirements for Admission to Candidacy
The requirements for admission to candidacy for the Master of Arts degree in Linguistics or TESOL are those established by the university and the department. For the MA - Linguistics this includes demonstrated proficiency in any language, including English, other than the native language. This requirement may be met by successful completion of the second year of college level courses (or their equivalent) of an Indo-European language or the first year of a non-Indo-European language. For the MA - TESOL this includes demonstrated proficiency in any language, including English, other than the native language. This requirement may be met by successful completion of the first year of college level courses (or their equivalent e.g., ACTFL opi level novice high) in a foreign language. For information see the Academic Requirements section of this catalog.

University English Competency Requirement
The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluation website at www.sjsu.edu/gape/index.html.
MA - Linguistics

The MA - Linguistics provides students with an interdisciplinary education in the scientific study of language. Courses in general and computational linguistics serve students interested in cognitive linguistics, speech synthesis, machine speech recognition, and language variation and change. Graduates in linguistics offer a set of highly specialized skills to computer companies working in speech technology and artificial intelligence. Many pursue careers with companies specializing in these areas. A small but significant number of linguistics graduates enter PhD programs for more advanced study. Other graduates pursue teaching careers in language and linguistics in domestic and overseas institutions.

Requirements for the MA - Linguistics include those established by the department. For information concerning university requirements, see the Academic Requirements section of this catalog.

Students have the option of completing the MA - Linguistics under one of two plans:

Plan A (with Thesis)
Completion of 30 units; approved thesis proposal and thesis. The thesis option allows a student to pursue research in an area of common interest to the student and a faculty member. A thesis proposal may grow out of a course or be developed in LING 298, and must be approved by the student’s advisor and thesis committee members. For Master’s Thesis requirements please visit www.sjsu.edu/gradstudies/thesis/index.html.

Plan B (without Thesis)
Completion of 30 units; passing of a comprehensive examination.

Students should consult with the advisor for elective course work selection.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Language Requirement
Two years of an Indo-European language or one year of a non-Indo-European language, other than student’s native language, taken at the college level or demonstrated equivalent competence, or one year of college level American Sign Language (6). For students for whom English is not the native language, two years of college level study may fulfill this requirement.

Requirements of the Masters

Total Units Required 30

Core Courses 18
LING 113. Introduction to Phonology ............................................................ 3
LING 114. Introduction to Semantics and Discourse ..................................... 3

LING 299. Master’s Thesis or Project ........................................................ 1-6
Two Electives ......................................................................................... 6

Plan B (without Thesis) ........................................................................... 12
Four electives ......................................................................................... 12

Total Units Required 30
MA - Teaching English to Speakers of Other Languages (TESOL)

The MA- TESOL prepares students to assess and systematically build the listening, speaking, reading and writing skills of students from other language backgrounds who wish to learn English or to improve their skills in English. The department strikes a balance between theory and practice. Graduates from the MA- TESOL program staff many of the area’s English as a Second Language programs at the community college, adult school and private program level. In addition, a number of TESOL graduates have chosen careers in international settings, teaching English as a Foreign Language in universities, schools and companies in Taiwan, Korea, Japan, Hungary, Mexico and other countries. MA- TESOL graduates are also eligible to teach abroad through the U.S. government sponsored Fulbright and English Teaching Fellow programs. Any undergraduate major is appropriate preparation for this degree.

Plan A (with Thesis)
Completion of 30 units; approved thesis proposal and thesis. The thesis option allows a student to pursue research in an area of common interest to the student and a faculty member. A thesis proposal may grow out of a course or be developed in LLD 298, and must be approved by the student’s advisor and thesis committee members. For Master’s Thesis requirements please visit www.sjsu.edu/gradstudies/thesis/index.html.

Plan B (without Thesis)
Students are required to complete a total of 30 units (24 required; 6 electives); in addition, students must pass a comprehensive examination.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Language Requirement
The first-year, college level courses in a language other than the student’s native language or a demonstrated equivalent language background satisfy the language requirement. It is recommended that students who are planning to teach abroad complete their language requirements in the language of the country they plan to work in.

Introduction
One of the oldest intellectual disciplines, mathematics plays a key role in many fields: cryptography, computer graphics, operations research, engineering and science. Students majoring in mathematics learn to communicate mathematical ideas effectively and to use basic computational skills, mathematical models and technology to solve practical problems. The Department of Mathematics and Statistics offers both undergraduate and graduate programs that prepare our alumni to work in industry and to teach in secondary schools or community colleges. In addition to a BA in mathematics, we offer a BS in applied mathematics that trains students for more technical careers and incorporates student research projects at the Center for Applied Mathematics, Computation and Statistics (CAMCOS). We also offer four master's degrees: an MS and an MA in mathematics, an MA that concentrates on mathematics education and an MS in Statistics.

Honors Program in Mathematics
The requirements for mathematics majors to graduate with departmental honors are: (1) at least a 3.0 G.P.A. overall, (2) at least a 3.5 G.P.A. in the major, (3) Completion of MATH 180H (Individual Studies for Honors).

Restriction on Enrollment for Credit
Enrollment for credit in MATH 008, 010, 012, 070, 071, 101, 105, 106, 107A, and 107B will not be allowed for students who have received credit in MATH 019, 030, 031, 030P, 032, unless the particular course in question is required for the student’s major, minor or credential requirements.

Calculus Placement Examination
Many students who wish to enroll in MATH 030, MATH 030P, MATH 060 or MATH 071 are required to take the Calculus Placement Examination. Information and forms are available in the Mathematics and Statistics Department Office, MH 308, or online at the Mathematics and Statistics Department website: www.sjsu.edu/math.
**BA - Mathematics**

The BA - Mathematics is recommended for students who enjoy problem solving and would like to apply problem solving skills along with communication and analyzing skills in a future career. This degree also provides an excellent background for graduate work in mathematics and other disciplines including law and medicine as well as engineering and science.

33 upper division units of mathematics and computer science are required for this degree. If upper division requirements are satisfied using transferred lower division courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

**Major-Specific Graduation Requirements**

All courses in the Preparation and Required in the Major must be completed with a grade of "C- or better", and the following Preparation for the Major course with a grade of "C or better". MATH 100W

### Physical Education

#### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

### University Electives

**9-15**

### Total Units Required

**120**
BA - Mathematics, Preparation for Teaching

This major is designed for students interested in teaching mathematics in high school or middle school. The following course work satisfies San José State University's requirements for a BA in Mathematics. The BA - Mathematics Preparation for Teaching is approved as subject matter preparation for a single subject credential by the California Commission on Teacher Credentialing (CCTC). Individuals who do not wish to complete one of the degree programs, or individuals seeking a single subject credential in subject areas not listed must pass all portions of the appropriate Commission-approved subject matter examination(s).

Minimum grade point average (GPA) criteria is required for verification of subject matter competency. Completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

33 upper division units of mathematics are required for this degree. If upper division requirements are satisfied using transferred lower division courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

All courses in the Preparation and Required in the Major must be completed with a grade of "C- or better", and the following Preparation for the Major course with a grade of "C or better". MATH 100W

University Graduation Requirements 47

Core Lower Division General Education 30

Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C- or better" to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education 9

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions 6

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

COMPLETE ONE SEQUENCE FROM:

African American Studies ............................................................................................................................................................................................................ 6
AFAM 002A. African-Americans and the Development of America’s History and Government .............................................................................. D2 ......................................................... 3

Note: MATH 102 is required in order to meet the subject matter requirement for a teaching credential.
BS - Applied Mathematics, Concentration in Applied and Computational Mathematics

This degree is recommended for students who wish to work in the research and development area of industry. This program also prepares a student for graduate study in applied mathematics, numerical analysis, or operations research.

The concentration in applied and computational mathematics provides a solid foundation in classical applied mathematics as well as computational mathematics, which could be informally described as “how to employ mathematics on computers wisely.” A graduate could seek direct employment assisting a group of scientists with the formulation and solution of problems. There is a great need in local and national technical industries for people with sufficiently strong mathematical knowledge to participate on such teams. For example, modern techniques for solving partial differential equations are very sophisticated; the best method in a given situation depends on the properties of the model. Once a numerical approximation has been formulated, the techniques to solve that, and the commercial software available to do it, again require informed decisions.

30 upper division units of mathematics are required for this degree. If upper division requirements are fulfilled using transferred lower division courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

## BS - Applied Mathematics, Concentration in Economics and Actuarial Science

This program is designed for students who want to become actuaries and for students who want a program that integrates business, economics, and mathematics. Actuaries are trained to analyze risk and are typically employed by insurance companies, banks, the government, and companies that handle retirement funds.

33 upper division units of mathematics are required for this degree. If upper division requirements are fulfilled using transferred lower division courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

#### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### Major-Specific Graduation Requirements

All courses in the Preparation and Required in the Major must be completed with a grade of "C- or better", and the following Preparation for the Major course with a grade of "C or better": MATH 100W

<table>

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

**Total Units Required**: 120
**BS - Applied Mathematics, Concentration in Statistics**

This degree program is recommended for students who wish to pursue a career in statistics. This program also prepares a student for graduate study in probability and statistics.

The concentration in statistics is appropriate for students pursuing a career involving the collection and analysis of numerical data, the use of statistical techniques to predict population growth or economic conditions, the use of statistics to analyze medical, environmental, legal and social problems, or to help business managers make decisions and carry out quality control. The statistics concentration also provides a solid foundation for students who plan to become actuaries.

36 upper division units of mathematics are required for this degree. If upper division requirements are fulfilled using transferred lower division courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

**Major-Specific Graduation Requirements**

All courses in the Preparation and Required in the Major must be completed with a grade of "C- or better", and the following Preparation for the Major course with a grade of "C or better": MATH 100W

<th>Total Units Required</th>
<th>18</th>
</tr>
</thead>
</table>
MS - Mathematics

This degree is appropriate for students who seek to deepen their knowledge of mathematics and its applications for work in the research and development area of industry.

Requirements for Admission to Classified Standing

To enter this program with classified standing, a student must meet the minimum requirements for admission to the Graduate Division; have completed 18 semester units of upper-division mathematics with a grade point average of at least 3.0, and have 1-3 letters of recommendation submitted on his or her behalf. The coursework must be acceptable toward a bachelor’s degree in mathematics and may not be counted toward the MS degree.

Requirements for Admission to Conditionally Classified Standing

A student who meets the minimum requirements for admission to the Graduate Division but does not satisfy the mathematics coursework requirements stated above may be admitted as a Conditionally Classified student. Eligibility is determined on a case-by-case basis. After arrival at SJSU, such a student must complete additional coursework to make up the unit deficiency in order to achieve Classified status. These makeup units will not be included in the MS degree unit requirement total.

Requirements for Admission to Candidacy for the MS - Mathematics

To be admitted to candidacy for the MS degree, a student must meet the all-university candidacy admission requirements as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations (CAPE) website at www.sjsu.edu/gape.

Per University regulations, Thesis/Writing Project students must have their thesis/project committees (see below) in place before filing for candidacy.

The student must complete the Petition for Advancement to Graduate Candidacy form. This form lists, among other things, all the coursework to be counted toward the master’s degree. After the form has been signed by the student’s thesis or writing project director (if applicable) and the Graduate Coordinator, it is forwarded to the Associate Vice President for Graduate Studies and Research for final approval. Any subsequent changes to the student’s program require approval from CAPE.

Completing Requirements for the MS - Mathematics

Culminating Experience

Students choose either the Comprehensive Examination option or the Thesis/Writing Project option.

1. Comprehensive Examination Option:

   Students who elect this option must pass two written comprehensive examinations. One examination will be in either Numerical Analysis (243A and 243B/M) or Differential Equations/Dynamical Systems (233A/B and 234) or Graph Theory (279A/B). The second exam will be in one of Numerical Analysis, Differential Equations/Dynamical Systems, Graph Theory, or Complex Analysis (238).
   a) Specific exam options to be chosen by the student.
   b) Students must enroll in MATH 298E in conjunction with taking the exams. Students receive credit when both exams are passed. Students who do not pass both exams during the semester they are enrolled in MATH 298E will receive a grade of “RP” for that course. If all other degree requirements have been completed, students must subsequently sign up for MATH 1290R in compliance with University regulations until both exams have been passed.

2. Thesis or Writing Project Option:

   A student who elects this option must find a willing thesis/writing project advisor and complete a thesis or writing project under that advisor’s supervision. The thesis or writing project must be reviewed and approved by a Thesis/Writing Project Committee composed of the advisor and two other faculty members chosen by the student in consultation with the advisor. The student must give a public presentation on the thesis or writing project, which is followed by an oral examination (thesis/writing project defense) conducted by the committee. Theses must be filed with the Associate Vice President for Graduate Studies and Research, subject to the rules and deadlines established by GS&R.
   a) Thesis students must enroll in MATH 299: Master’s Thesis; Writing Project students must enroll in MATH 298: Special Study. The student receives credit when the thesis/writing project is completed, successfully defended and all committee members have signed off on the thesis/project. Students who do not complete their theses during the semester they are enrolled in MATH 299 (MATH 298 for writing projects) will receive a grade of “RP” for that course. If all other degree requirements have been completed, students must subsequently sign up for MATH 1290R in compliance with University regulations until the thesis/writing project is completed and defended.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

MA - Mathematics

This degree is recommended for future community college teachers and for students who plan to continue toward the PhD in mathematics.

Requirements for Admission to Classified Standing

To enter this program with classified standing, a student must meet the minimum requirements for admission to the Graduate Division; have completed 18 semester units of upper-division mathematics with a grade point average of at least 3.0, and have 1-3 letters of recommendation submitted on his or her behalf. The coursework must be acceptable toward a bachelor's degree in mathematics and may not be counted toward the MA degree.

Requirements for Admission to Conditionally Classified Standing

A student who meets the minimum requirements for admission to the Graduate Division but does not satisfy the mathematics coursework requirements stated above may be admitted as a Conditionally Classified student. Eligibility is determined on a case-by-case basis. After arrival at SJSU, such a student must complete additional coursework to make up the unit deficiency in order to achieve Classified status. These makeup units will not be included in the MA degree unit requirement total.

Requirements for Admission to Candidacy for the MA - Mathematics

To be admitted to candidacy for the MA degree, a student must meet the all-university candidacy admission requirements as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations (CAPE) website at www.sjsu.edu/gape.

Per University regulations, Thesis/Writing Project students must have their thesis/project committees (see below) in place before filing for candidacy. The student must complete the Petition for Advancement to Graduate Candidacy form. This form lists, among other things, all the coursework to be counted toward the master’s degree. After the form has been signed by the student’s thesis or writing project director (if applicable) and the Graduate Coordinator, it is forwarded to the Associate Vice President for Graduate Studies and Research for final approval. Any subsequent changes to the student’s program require approval from CAPE.

Completing Requirements for the MA - Mathematics

Culminating Experience

Students choose either the Comprehensive Examination option or the Thesis/Writing Project option.

1. Comprehensive Examination Option:

Students who elect this option must pass two written comprehensive examinations. One examination will be in either Algebra (221A/B) or Analysis (131A, 231A/B). The second exam will be in one of Algebra (221A/B); Analysis (131A, 231A/B); Number Theory (226); Linear Algebra (229); Complex Analysis (238); Topology (275A); or Graph Theory (279A).

a) Specific exam options to be chosen by the student.

b) Students must enroll in MATH 298E in conjunction with taking the exams. Student receives credit when both exams are passed. Students who do not pass both exams during the semester they are enrolled in MATH 298E will receive a grade of “RP” for that course. If all other degree requirements have been completed, students must subsequently sign up for MATH 1290R in compliance with University regulations until both exams have been passed.

2. Thesis or Writing Project Option:

A student who elects this option must find a willing thesis/writing project advisor and complete a thesis or writing project under that advisor’s supervision. The thesis or writing project must be reviewed and approved by a Thesis/Writing Project Committee composed of the advisor and two other faculty members chosen by the student in consultation with the advisor. The student must give a public presentation on the thesis or writing project, which is followed by an oral examination (thesis/writing project defense) conducted by the committee. Theses must be filed with the Associate Dean of Graduate Studies, subject to the rules and deadlines established by the Office of Graduate and Undergraduate Programs.

a) Thesis students must enroll in MATH 299: Master’s Thesis; Writing Project students must enroll in MATH 298: Special Study. The student receives credit when the thesis/writing project is completed, successfully defended and all committee members have signed off on the thesis/project. Students who do not complete their theses during the semester they are enrolled in MATH 299 (MATH 298 for writing projects) will receive a grade of “RP” for that course. If all other degree requirements have been completed, students must subsequently sign up for MATH 1290R in compliance with University regulations until the thesis/writing project is completed and defended.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Requirements of the Masters
### Required Core Courses

- MATH 221A. Higher Algebra I .............................................. 3
- MATH 221B. Higher Algebra II ........................................... 3
- MATH 231A. Real Analysis .................................................. 3
- MATH 231B. Functional Analysis .......................................... 3

### Other Required Courses

**COMPLETE TWO COURSES FROM:**
- MATH 229. Advanced Matrix Theory ........................................ 3
- MATH 238. Advanced Complex Variables ................................ 3
- MATH 275A. Topology .......................................................... 3
- MATH 279A. Graph Theory ................................................... 3

### 200-Level Electives

**COMPLETE TWO COURSES FROM:**
- MATH 211A. Geometry of Projective Spaces ................................ 3
- MATH 213A. Introduction to Smooth Manifolds .......................... 3
- MATH 213B. Introduction to Riemannian Geometry ..................... 3
- MATH 226. Theory of Numbers .............................................. 3
- MATH 229. Advanced Matrix Theory ....................................... 3
- MATH 231A. Real Analysis .................................................... 3
- MATH 231B. Functional Analysis ............................................ 3
- MATH 233A. Applied Mathematics I ......................................... 3
- MATH 233B. Applied Mathematics II ....................................... 3
- MATH 234. Advanced Dynamical Systems ................................. 3
- MATH 235. Wavelets and their Applications .............................. 3
- MATH 238. Advanced Complex Variables ................................. 3
- MATH 243A. Advanced Numerical Analysis .............................. 3
- MATH 243B. Advanced Topics in Numerical Analysis .................. 3
- MATH 243M. Numerical Linear Algebra ................................... 3
- MATH 261A. Regression Theory and Methods ............................ 3
- MATH 263. Stochastic Processes ............................................ 3
- MATH 271A. Mathematical Logic ............................................. 3
- MATH 275A. Topology .......................................................... 3
- MATH 275B. Advanced Topics in Topology ............................... 3
- MATH 279A. Graph Theory ................................................... 3
- MATH 279B. Advanced Graph Theory ..................................... 3
- MATH 285. Advanced Topics in Mathematics ............................. 3

### Pre-approved 100- or 200-Level Mathematics Electives

**COMPLETE TWO COURSES FROM THE PRE-APPROVED 100- OR 200-LEVEL MATHEMATICS ELECTIVES:**
- MATH 100W, MATH 101, MATH 102, MATH 105, MATH 106, MATH 107A, MATH 107B, MATH 110L, MATH 123, MATH 129A, MATH 133A, MATH 160, MATH 201A, MATH 201B, MATH 297.

The elective units may include a maximum of 3 units of MATH 180 and/or MATH 298.

### Culminating Experience

**Plan A- Thesis Option**
- MATH 299. Master’s Thesis ................................................ 3

**Plan B- Writing Project Option**
- MATH 298. Special Study ................................................... 3

**Plan B- Comprehensive Exam Option**
- MATH 298E. Mathematics Comprehensive Exam Preparation ........... 3

### Total Units Required

33
MA - Mathematics, Concentration in Mathematics Education

This degree is recommended for secondary school mathematics teachers who want to increase their mathematical competence and their knowledge of the teaching and learning of mathematics.

Requirements for Admission to Classified Standing
Admission requirements to classified standing for this program are the same as for the MA - Mathematics program, except the 18 semester unit requirement is replaced by 21 semester units.

Requirements for Admission to Conditionally Classified Standing
Admission requirements to conditionally classified standing are the same as for the MA - Mathematics program.

Requirements for Admission to Candidacy for the MA - Mathematics, Concentration in Mathematics Education
Requirements are the same as for the MA - Mathematics except that requirement 2 is replaced by: The Qualifying Examination is an individualized written exam on fundamental ideas related to the concentration in Mathematics Education. These ideas are normally covered in MATH 201A, MATH 201B, and MTED 209.

Completing Requirements for the MA - Mathematics, Concentration in Mathematics Education
Both Plan A (with Thesis) and Plan B (with Writing Project) requirements are the same as in the MA Mathematics except the thesis or writing project must be in the field of mathematics education.

Electives
The rules for elective units are the same as those for MA - Mathematics

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

MS - Statistics

This degree is recommended for students interested in a career as a statistician or in a variety of careers in business, government and industry that require the use and understanding of statistical methods. Such positions typically require a master’s degree. The MS in Statistics will prepare students in the use of statistical techniques for data analysis and decision making in their chosen fields. Candidates for the program should have obtained a bachelor’s degree and have an adequate mathematical and statistical background.

Requirements for Admission to Classified Standing

To enter this program with classified standing, an applicant must meet the minimum requirements for admission to the Graduate Division; have completed a calculus series through multiple integration and partial differentiation (as might be completed at SJSU through having taken MATH 30, 31 and 32); have completed a course in linear algebra equivalent to MATH 129A at SJSU; and have completed a course in introductory calculus-based probability and statistics equivalent to MATH 161A at SJSU. The applicant must have achieved at least a grade of B in each of these courses. This coursework may not be counted toward the MS degree. The applicant must have two letters of recommendation submitted on his or her behalf directly to the Statistics Coordinator, Mathematics and Statistics Department. For general information on graduate admission and requirements at SJSU please see www.sjsu.edu/gape.

Requirements for Admission to Conditionally Classified Standing

An applicant who meets the minimum requirements for admission to the Graduate Division but does not satisfy the mathematics and statistics coursework requirements stated above may be admitted as Conditionally Classified. After arrival at SJSU, the student must complete additional coursework to make up the deficiency in order to obtain classified status. The units earned from this additional coursework may not be counted towards the total number of units required for the MS degree.

Requirements for Admission to Candidacy for the MS - Statistics

To be admitted to candidacy for the MS degree:

1. A student must meet the all-university-candidacy requirements as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

2. Complete MATH 163 and 164, each with a grade of at least B.

3. Complete at least 18 units towards the degree with at least a 3.0 average.

4. Complete the Request for Candidacy and Graduate Degree Program form for the Master of Science degree. This form lists, among other things, all the coursework to be counted toward the master’s degree. After the form has been signed by the Graduate Coordinator, it is forwarded to the Associate Dean for Graduate Studies for final approval. Any subsequent changes to the student’s program require approval from Graduate Studies.

Completing Requirements for the MS - Statistics

All electives must be pre-approved by the Statistics Coordinator on an individual basis. A list of potential elective courses is published by the department. The elective units may include a maximum of 3 units of MATH 180 and a maximum of three units of MATH 203 or MATH 298 beyond those required for the degree. The electives should form a coherent set of courses associated with the student’s career goals.

At least 50% of all course work counted towards the degree must be numbered 200 or higher

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

⦁ BS, Mechanical Engineering
⦁ MS, Mechanical Engineering

Introduction
Do you like to design and innovate? Are you good at math and science? Would you like to help solve problems facing our society? Consider a BS or MS in Mechanical Engineering. These programs are part of the Charles W. Davidson College of Engineering, which is ranked #2 in the nation among public universities that do not offer a doctorate. We place hands-on labs and projects as a priority, and interaction with faculty is substantial. Mechanical engineering students focus on mechanical design, mechatronics, thermal-fluids engineering, or a combination of those areas. Our BS and MS graduates work in industries including product design, sustainable energy, transportation solutions, biomedical devices, aerospace systems, sensor technology, and semiconductor manufacturing. Please visit our website at www.sjsu.edu/me for more information. The BS Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.
BS - Mechanical Engineering

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions
This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements
The following course in Preparation for the Major must be completed with a “C or better”: ENGL 001B

### Technical Electives

Technical electives can be chosen from designated courses for breadth or focus in one of the three areas of mechanical design, mechatronics, or thermal/fluids, with advisor approval.

### Total Units Required

| Units Required | 120 |
MS - Mechanical Engineering

The Mechanical Engineering Graduate Program is designed to afford ample opportunity for working engineers to continue their education. Courses and scholarly activities in such areas as fluid dynamics, thermodynamics, heat transfer, rigid-body dynamics, vibrations, modal analysis, finite element methods, computer-aided mechanical engineering design and optimization, controls and manufacturing engineering and mechatronic systems engineering can lead to a degree of Master of Science in Mechanical Engineering (MSME).

Educational Objectives for Graduate Program
1. A strong foundation beyond the undergraduate level in their chosen focus area as well as in mathematics, basic science and engineering fundamentals, to successfully compete for technical engineering positions in the local, national and global engineering market, advance in their current position or pursue doctoral studies.
2. Professional and lifelong learning skills to be able to apply and extend theory to solve practical contemporary engineering problems.
3. The expertise necessary to design mechanical engineering systems with possible specialization in areas such as: Energy Systems, Thermal Management of Electronic Systems, Electronics Packaging & Reliability, Finite Element Analysis & CAD, Mechatronics & MEMS, Product Design, Robotics, Automation & Manufacturing.
4. Strong verbal and written communication skills, including the ability to read, write and comprehend technical documents.
5. Think and work independently to perform design and in-depth analysis in solving open-ended mechanical engineering problems.

General Admission Requirements
Students desiring to pursue a Master of Science degree in Mechanical Engineering must satisfy each of the following requirements:
1. Must hold a Bachelor of Science degree from an engineering department accredited by the Accreditation Board of Engineering and Technology (ABET) or equivalent. Special programs can be developed for those with degrees from other related disciplines. These programs must be approved by the Graduate Program Coordinator.
2. A minimum grade point average (GPA) of 3.0 on a 4.0 scale over the last 60 semester units completed in engineering and/or science.
3. Student from non-ABET accredited Mechanical Engineering programs must have obtained a minimum score of 1100 in quantitative and verbal and a minimum score of 3.5 in Analytical Writing on the Graduate Record Examination (GRE). Scores for each section must also be 400 or greater.
4. Students from non-English speaking countries must achieve a minimum TOEFL score of 550. This requirement is waived if the language of instruction in the home country is documented to be in English.

Requirements for Admission to Conditionally Classified Standing
Students whose records show certain deficiencies, such as GPA and/or Non-ME undergraduate major, etc., may be admitted to conditionally classified standing. They may later initiate petitions to be given classified standing in the program when such deficiencies have been removed and their records show promise of success in the degree program.

Candidacy for MS - Mechanical Engineering
Prior to registering for the first time (or upon reentering), a student should consult with the Mechanical Engineering Graduate Program Coordinator. A schedule of courses will be developed at this time. Students admitted as conditional must satisfy the requirements listed on their letter of acceptance and then apply to the Graduate Studies Office for the change of classification. Students who have completed matriculation and received classified standing in a master’s degree curriculum must next be admitted to candidacy for the degree. A student may be admitted to candidacy after completing a minimum of nine units of graded work as a graduate student in 100- or 200-level courses which are acceptable to the department in which the degree is sought.

If a student’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, it will be necessary to take the preparatory courses to meet these requirements. Such courses will not be counted as part of the master’s degree program requirements.

Requirements for MS - Mechanical Engineering
The department offers courses designed to provide mechanical engineers with advanced level of knowledge and skills in three areas of specialization: mechanical design; thermal/fluid systems; and mechatronics. The program consists of thirty (30) semester units of approved work, with at least eighteen (18) of which must be 200-level courses in mechanical engineering. The student has the choice of Plan A (thesis), Plan B (project) or Plan C (Comprehensive Examination). All students are recommended, but not required, to concentrate their studies in one of the areas of specialization, with the Graduate Program Coordinator’s approval. Each area of specialization requires:

- 6 units of required courses for the degree.
- 12 units of elective courses.
- 6 units of electives recommended for the area of specialization. The student may take up to 6 units of course work from the undergraduate program of the Department, or graduate courses from other departments, colleges/universities, or open university units.
- 6 units of Project/Thesis or 6 additional units of elective courses and the Comprehensive Examination.

Educational Objectives for Graduate Program
1. A strong foundation beyond the undergraduate level in their chosen focus area as well as in mathematics, basic science and engineering fundamentals, to successfully compete for technical engineering positions in the local, national and global engineering market, advance in their current position or pursue doctoral studies.
2. Professional and lifelong learning skills to be able to apply and extend theory to solve practical contemporary engineering problems.
3. The expertise necessary to design mechanical engineering systems with possible specialization in areas such as: Energy Systems, Thermal Management of Electronic Systems, Electronics Packaging & Reliability, Finite Element Analysis & CAD, Mechatronics & MEMS, Product Design, Robotics, Automation & Manufacturing.
4. Strong verbal and written communication skills, including the ability to read, write and comprehend technical documents.
5. Think and work independently to perform design and in-depth analysis in solving open-ended mechanical engineering problems.

General Admission Requirements
Students desiring to pursue a Master of Science degree in Mechanical Engineering must satisfy each of the following requirements:
1. Must hold a Bachelor of Science degree from an engineering department accredited by the Accreditation Board of Engineering and Technology (ABET) or equivalent. Special programs can be developed for those with degrees from other related disciplines. These programs must be approved by the Graduate Program Coordinator.
2. A minimum grade point average (GPA) of 3.0 on a 4.0 scale over the last 60 semester units completed in engineering and/or science.
3. Student from non-ABET accredited Mechanical Engineering programs must have obtained a minimum score of 1100 in quantitative and verbal and a minimum score of 3.5 in Analytical Writing on the Graduate Record Examination (GRE). Scores for each section must also be 400 or greater.
4. Students from non-English speaking countries must achieve a minimum TOEFL score of 550. This requirement is waived if the language of instruction in the home country is documented to be in English.

Requirements for Admission to Conditionally Classified Standing
Students whose records show certain deficiencies, such as GPA and/or Non-ME undergraduate major, etc., may be admitted to conditionally classified standing. They may later initiate petitions to be given classified standing in the program when such deficiencies have been removed and their records show promise of success in the degree program.

Candidacy for MS - Mechanical Engineering
Prior to registering for the first time (or upon reentering), a student should consult with the Mechanical Engineering Graduate Program Coordinator. A schedule of courses will be developed at this time. Students admitted as conditional must satisfy the requirements listed on their letter of acceptance and then apply to the Graduate Studies Office for the change of classification. Students who have completed matriculation and received classified standing in a master’s degree curriculum must next be admitted to candidacy for the degree. A student may be admitted to candidacy after completing a minimum of nine units of graded work as a graduate student in 100- or 200-level courses which are acceptable to the department in which the degree is sought.

If a student’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, it will be necessary to take the preparatory courses to meet these requirements. Such courses will not be counted as part of the master’s degree program requirements.

Requirements for MS - Mechanical Engineering
The department offers courses designed to provide mechanical engineers with advanced level of knowledge and skills in three areas of specialization: mechanical design; thermal/fluid systems; and mechatronics. The program consists of thirty (30) semester units of approved work, with at least eighteen (18) of which must be 200-level courses in mechanical engineering. The student has the choice of Plan A (thesis), Plan B (project) or Plan C (Comprehensive Examination). All students are recommended, but not required, to concentrate their studies in one of the areas of specialization, with the Graduate Program Coordinator’s approval. Each area of specialization requires:

- 6 units of required courses for the degree.
- 12 units of elective courses.
- 6 units of electives recommended for the area of specialization. The student may take up to 6 units of course work from the undergraduate program of the Department, or graduate courses from other departments, colleges/universities, or open university units.
- 6 units of Project/Thesis or 6 additional units of elective courses and the Comprehensive Examination.
With Plan A, six (6) units of thesis credits, ME 299, may be applied. With Plan B, six (6) units of ME 295 or six (6) units of additional elective courses are required. Both Plan A and Plan B require an open examination (oral defense) to be conducted by the student’s project/thesis committee.

Both the university GPA and the Department GPA must be at least 3.0. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details.

### Required Courses for MS - Mechanical Engineering

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Curricula
- MS, Medical Product Development Management

Introduction
The Masters of Science degree in Medical Product Development Management (MPDM) is offered by SJSU’s College of Science, in collaboration with the College of International and Extended Studies and the Lucas Graduate School of Business. The MPDM M.S. program combines clinical research, regulatory affairs, bioinformatics and customized technical classes with MBA-level business and management courses. The industry-relevant curriculum was designed in collaboration with experts from biomedical companies in the greater San Francisco Bay area to prepare students for careers in the biopharmaceutical, medical devices and in-vitro diagnostics industries. To accommodate students who work full-time, courses are offered during evenings or weekends, and several classes are offered online for scheduling flexibility.
MS - Medical Product Development Management

MPDM Program Mission
The graduates from this degree program will be proficient in applying leadership, management, and decision making skills in a regulated environment; understanding and conversing with others in a multi-disciplinary field; understanding ethical, business, financial, global, and strategic implications in medical product development; and enriching the community with ethical and socially responsible graduates in a field in which the highest levels of integrity are a fundamental necessity.

Requirements for Admission to Classified Standing
To be fully accepted into classified standing an applicant must
1) Be a baccalaureate graduate of an accredited four-year college or university;
2) Have a grade point average (GPA) of at least 2.5 (>3.0 preferred) in the last 60 semester/90 quarter units of coursework;
3) An English-language proficiency exam is required for all students who graduated from a higher education institution in a country in which the primary language is not English. Applicants must take and pass one of the SJSU-recommended tests of English proficiency.
Applicants should note that a high degree of proficiency in both written and oral communications in English is a fundamental skill required both to complete the degree program and for success in the field.
4) Satisfactory completion of a 3-unit undergraduate course in introductory statistics and probability from an accredited college or university.
Applicants may come from a wide variety of undergraduate (or post graduate) areas of study including but not limited to nursing, pre-med, biology, chemistry, mathematics, science education, pharmacy, engineering, business, computer science, psychology, social sciences, and pre-law.

Special Session Program Information
Academic Programs offered through Special Session are operated by the College of International and Extended Studies (IES). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Introduction
The only one of its kind in the CSU system, the Department of Meteorology and Climate Science provides students with an in-depth knowledge of the atmosphere, preparing them for careers in the atmospheric sciences. Meteorology focuses on day-to-day weather; in climate science the focus is on the evolution of Earth's climate. We train students to measure, analyze, model and predict the state of the atmosphere into the next week and on into the next century, offering undergraduate and graduate programs that are strong in both theoretical and applied courses. Among our alumni are weather forecasters, air pollution specialists, environmental consultants, science teachers, university professors, science writers and top scientists in the National Atmospheric and Oceanographic Administration (NOAA), the U.S. Air Force, the U.S. Navy and NASA. We are one of the most research-active departments on campus, enabling students at all levels to participate and benefit from supervised research activities.
Departments & Degrees

BS - Meteorology

The BS Meteorology degree program is designed to develop meteorologists who, upon graduation, are ready to begin professional practice in the private sector or in government, or are ready to enter graduate programs in atmospheric science.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All Preparation and Required in the Major courses must be completed with a “C- or better”.

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of “C or better” (C- not accepted) is required to meet graduation requirement.

Preparation for the Major

A minimum grade of “C-” must be attained in all major and preparation courses.

BS - Meteorology, Concentration in Climate Science

The BS Meteorology, concentration in Climate Science program is designed to prepare students for careers in emerging fields of climate change studies and mitigation, and related fields including energy and carbon management. Graduating students will be ready to begin careers in the private sector or in government, or will be ready to enter graduate programs in the atmospheric/climate sciences.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

MS - Meteorology

Requirements for Admission to Classified Standing

Students wishing to pursue an MS in Meteorology must satisfy each of the following requirements:

• The student should have the equivalent of an SJSU BS degree in Meteorology or, with the approval of the department graduate committee, a degree in a physical science or in mathematics. Students entering with degrees in other areas may be admitted to conditionally classified standing, and will be required to make up deficiencies (e.g., in meteorology and math) before enrolling in the core graduate classes.
• The student should have a minimum GPA in their BS degree of 2.75 (on a scale of 0-4).
• The student must submit their Graduate Record Examination (GRE) scores.
• Applicants from non-English speaking countries must meet the university minimum TOEFL requirement (i.e., 550 or better, as outlined in the Graduate Admissions section of the catalog).

Admission to Conditionally Classified Standing

Those students who meet minimum requirements for admission to the Graduate Division, but do not meet departmental requirements, may be admitted to conditionally classified standing, on the approval of the department graduate committee. Deficiencies usually involve undergraduate meteorology courses, as well as some math courses. Upon completion of the necessary courses, the student advances from conditional to classified standing via petition to Graduate Studies.

Requirements for Admission to Candidacy

In addition to the general requirements for admission, the student must possess an adequate background in meteorology. Competence in the general areas covered by METR 121A (Dynamic Meteorology I), METR 125 (Physical Meteorology), either METR 060 or METR 171A (Synoptic Meteorology, to be decided in consultation with the department graduate committee), and METR 100W or METR 202 (Technical Writing), must be demonstrated to the Department Graduate Committee prior to admission to candidacy. This can be done by: satisfactory completion of these courses (or their equivalent) with a minimum grade of "B" in each; or passage of a comprehensive written examination. Students should consult with the graduate advisor concerning these alternatives.

A student with classified standing may be admitted to candidacy after completion of at least nine units of graded work as a graduate student in 100- or 200-level courses which are acceptable to the department in which the degree is sought. Note that students initially admitted with conditionally classified standing may, for example, be required to take METR 121A (Dynamic Meteorology I) to make up a deficiency (credits do NOT count toward the MS degree), and may then choose to take METR 121B (Dynamic Meteorology II), where credits DO count toward the MS degree.

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) prior to advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. MS Meteorology students are currently required to take METR 202 to satisfy this University requirement.

Completing Requirements for the MS - Meteorology

Courses taken to meet the requirements for admission to candidacy will not be counted as part of the MS program. All students must complete the Graduation Writing Assessment Requirement.

Plan A (with Thesis)

An acceptable written research thesis and a successful oral presentation of the thesis are required.

Plan B (without Thesis)

This plan is open to students who can demonstrate to the Departmental Graduate Committee that they possess adequate professional meteorological experience. Requirements are identical to those for Plan A, except that a thesis and METR 299 are not required. Three additional units of 200-level meteorology courses (other than 285 or 298) must substituted. In addition, a suitable topic in meteorology will be selected by the student in consultation with his or her advisor on which to prepare a carefully documented written report (for two or more units of METR 298).

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

⦁ MA, Mexican American Studies

Introduction
Created in 1969, the Department of Mexican American Studies is the oldest graduate program in Chicana/o studies in the country and only one of five Chicana/o studies programs in California today. Rooted in social justice principles, our interdisciplinary program prepares students to critically examine and address intellectual traditions and contemporary issues resulting from intersections in race, ethnicity, class, and gender in Chicana/o-Latina/o communities. We offer an MA degree with three areas of emphasis: education, policy and comparative ethnic studies. We also offer a unique, interdisciplinary minor that supplements any undergraduate major by providing a well-rounded introduction to the Chicana/o-Latina/o community, including the community’s history, politics, culture and social, political and economic contexts. Our graduates become leaders in the fields of teaching, social services, policy, health care, government and community service, and pursue doctorates in Chicana/o studies, ethnic studies and other academic fields.

Departments & Degrees

Requirements for Admission to Classified Standing
Minimum university requirements for admission to the Graduate Division are listed in the Admissions section of this catalog. Applicants for admission to classified standing for the MA - Mexican American Studies must have:

1. Completed an undergraduate program in an accredited institution leading to an earned baccalaureate degree.
2. Attained a grade point average of at least 2.5 (A = 4.0) in the last 60 semester (90 quarter) units attempted. An applicant in doubt about the suitability of his/her academic background should consult with the department graduate advisor.
3. In addition to the regular application for admission to the university, each applicant must submit directly to the graduate advisor of the Mexican American Studies Program two letters of recommendation, a statement of purpose, and a writing sample (not to exceed 10 pages).
4. Those students who do not meet the standards for classified status may be admitted with specific conditions as conditionally classified; the conditions must be fulfilled before the student will be admitted to candidacy for the degree in Mexican American studies. If the conditions are not fulfilled, the program reserves the right to dismiss the student from the program by notifying the Associate Dean for Graduate Studies.

Requirements for Admission to Conditionally Classified Standing
1. Completed an undergraduate program in an accredited institution leading to an earned baccalaureate degree; and
2. Attained an earned grade point average satisfactory to the minimum university admission requirements.

Requirements for Admission to Candidacy
The student may be admitted to candidacy for the MA - Mexican American Studies by complying with the requirements of the university, as outlined in the Academic Requirements section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR for MAS, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, the students must have earned a 3.0 grade point average in all course work completed in graduate standing on or off campus.

With the counsel of one or more members of the department and graduate advisor, the applicant will develop an official master’s degree program using the university Candidacy Form, which is submitted along with an explanatory memo to the graduate advisor and the faculty for approval. After departmental approval, this program must be approved by the Associate Dean for Graduate Studies.

MA - Mexican American Studies, specialization in Policy Studies
The Policy Studies specialization is designed to provide students with a strong background in policy analysis and development as they relate to the Chicana/o and Latina/o community. The intent of this specialization is to prepare students to apply a Chicana/o and Latina/o perspective to the development and implementation of contemporary policies that address the needs of this and other communities.

MA - Mexican American Studies, specialization in Comparative Ethnic Studies
The Comparative Ethnic Studies Emphasis is designed to prepare students for doctoral study in Chicana/o Studies, Ethnic Studies and other academic fields. In addition to courses in Mexican American Studies, students may take courses from other areas of Ethnic Studies, such as African American Studies and Asian American Studies, so as to develop strengths in several areas of Ethnic Studies.

MA - Mexican American Studies, specialization in Education
The Education specialization is intended to prepare students for effective work in a number of fields requiring expertise in issues relevant to Chicana/o and Latina/o education. Among the most critical areas within this specialization is the analysis of the K-12 educational system and the development of methods for training competent professionals to work with these communities.

Degree Requirements for the MA - Mexican American Studies

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Curricula
⦁ BA, Humanities, Concentration in Middle East Studies
⦁ Minor, Middle East Studies

Introduction
The Middle East Studies Program is committed to helping students gain a better knowledge and understanding of the peoples, cultures, religions and conflicts of this strategic part of the world. The Middle East, as the historical home of the three Western monotheistic religious traditions - and the earlier goddess religions - leads the student to appreciate the origins, development and contemporary practice of Judaism, Christianity and Islam. Study of the region is critical to the understanding of U.S. foreign policy and global political economy. The program provides a forum for dialogue on contemporary and historical issues of concern to the peoples and cultures of the Middle East. The program also provides background for students whose professional goals include the promotion of mutual understanding, tolerance and peace in the region. All students are encouraged to seek both an interdisciplinary and a multicultural understanding of the region.

Curricula
- Minor, Military Science

Introduction
Military Science offers an interdepartmental minor which consists of courses taught by active duty Army personnel. The purpose of the minor is to acquaint the university student with the fundamental principles of national security and military history, to introduce the techniques and principles of modern warfare, and to develop character and leadership skills. All undergraduate students are eligible for a minor in Military Science. Those wishing a career as an Army Officer after graduation should contact the Department of Military Science.

Basic Course
Fundamentals of Leadership and Management. The term Basic Course refers to first and second year courses (MILS 001A-B, and 002A-C), which are designed for beginning students who want to qualify for entry into the Advanced Course and for those students who may want to try Military Science without obligations. A number of popular or challenging extracurricular activities are associated with these courses. A student can also qualify for entry into the Advanced Course by completing only the summer encampment, Leader’s Training Course (LTC)(MILS 002C). Outstanding students in this course may receive a two-year scholarship.

Advanced Course
Advanced Leadership and Management. The Advanced Course consists of the courses MILS 13OA-C, and 14OA-B. It is open to students who have completed the Basic Course or earned placement credit for it (various methods). The Advanced Course qualifies a student for a commission as an officer in the United States Army. Students must complete MILS 130C, a five week leadership evaluation camp during the summer, in sequence unless otherwise approved by the Professor of Military Science. Students receive a monthly stipend during the school year. Students who do not desire to compete for a commission as an officer in the Army may take these courses for academic credit with approval by the Professor of Military Science.

Labs and Field Exercises
During each semester of class work, weekly leadership lab participation is required. Two off-campus exercises involving adventure training, rappelling, rifle marksmanship, leadership training and survival skills are optional for non-scholarship basic course students. Two off-campus exercises for Advanced course students are mandatory with the focus on leadership and military skills.

**Introduction**

The second oldest marine lab on Monterey Bay, Moss Landing Marine Laboratories, (MLML), established in 1966, has an international reputation for excellence in marine science research and education. MLML administers the interdisciplinary master’s of science degree in marine science for seven California State University (CSU) campuses: East Bay, Fresno, Monterey Bay, Sacramento, San Francisco, San José and Stanislaus. MLML’s hands-on, field-oriented approach places students, faculty, research and staff where discoveries are made: at the frontiers of marine science worldwide. The wealth of nearby marine resources, excellent marine facilities and operations, renowned faculty and research-based curriculum combine to make the MLML program one of the best graduate programs of its kind in the United States. MLML provides students with a cutting-edge education that prepares them for careers in science, education and outreach, conservation, policy and management, and for doctoral studies.
MS - Marine Science

For graduate information contact the graduate program coordinator at MLML.

Admission to the Program

Application and admission requirements are available at http://gradprog.mlml.calstate.edu

Degree Requirements

Graduate students shall successfully complete 30 units of course work with a grade of "B" or better in each course, a thesis project, and an oral research defense to qualify for the M.S. degree in Marine Science at Moss Landing Marine Laboratories. MLML’s program requirements are the same regardless of the student’s home campus affiliation; however, admission, graduation and department requirements may vary from campus to campus.

Degree requirements for the M.S. degree in Marine Science are:

- Three of the following five core courses: MS 103: Marine Ecology, MS 141: Geological Oceanography, MS 142: Physical Oceanography, MS 143: Chemical Oceanography and MS 144: Biological Oceanography (these courses may be transferred with approval from MLML faculty)
- MS 104: Quantitative Marine Science with a grade of "B" or better, or transfer in with equivalent mathematical background. MS 104 course cannot be counted toward the 30-unit degree requirement.
- A minimum of fifteen upper division units (200 level) including MS 285: Graduate Seminar (2 unit minimum and 4 unit maximum) and 4 units of MS 299: Master’s Thesis.
- The remaining units may be electives from either 100-level or 200-level courses. No more than 15 units of 100-level course work may be used toward the 30-unit requirement.
- Fulfillment of Classification, Graduation Writing Assessment Requirement and Advancement to Candidacy.
- A thesis approved by the student’s thesis committee. The thesis must conform to the rules set forth by the home campus graduate office and meet the academic standards of the MLML graduate program.
- An oral thesis defense in the form of a seminar open to the general public. The student’s thesis committee must be present, may require further oral questioning after the seminar, and will evaluate the success of the presentation.

All students shall maintain continuous enrollment in the MLML graduate program until all degree requirements are met. All students shall complete core courses by their third semester to qualify for Classified standing. If a student receives lower than a “B” in a core course, the student may either retake this course or take another core course to fulfill the Classification requirement. If a student receives lower than a “B” in a non-core class they may either retake the course or take another course to use towards their 30-unit requirement. Students may enroll in MS 298: Research in Marine Science, while they are conducting their research, or to maintain enrollment with their home campus. Students are eligible to use 2-units of MS 298 toward their 30-unit requirement in addition to the 4-unit MS 299: Master’s Thesis. Students are encouraged to complete their degree requirements within three years.

Graduation Writing Assessment Requirement

CSU policy requires that English competency shall be a requirement of classified graduate students as a condition necessary for advancement to candidacy for the award of a master’s degree.

MLML students satisfy this requirement by successfully completing a Thesis Proposal before they advance to candidacy. The student’s thesis committee determines successful completion of this requirement.

Please refer to the MLML Graduate Student Handbook for additional degree requirements at http://gradprog.mlml.calstate.edu.

Preparation for the Masters

MS 104: Quantitative Marine Science

Must be passed with a "B" or better, or transfer in with equivalent mathematical background

Introduction
Located in the heart of Silicon Valley, the School of Music and Dance offers access to both the area’s industry and to an important cultural region. Accredited by the National Association of Schools of Music (NASM), the National Association of Schools of Dance (NASD), the National Council of Accreditation of Teacher Education (NCATE) and the California Commission on Teacher Credentialing (CCTC), the school is a recognized leader within the arts community. Our curriculum includes courses in performance, music systems (theory), choreography (for dancers), technology and improvisation. Student-performing organizations include, among others, the Wind Ensemble, the Opera Theatre and the Spartan Marching Band. Our dance program sponsors two performing companies, the University Dance Theatre and Company One. Our choral ensembles consistently win top honors at national and international music festivals. Graduates enjoy careers in performance, composition, jazz studies, and music education. Our certified music teacher graduates are in particularly high demand.
Music Honors Program

The Music Honors Program is designed for the superior student who has outstanding talent and scholastic ability and is open to senior music majors with a 3.5 average in the major and an overall university grade point average of 3.0. Approval by the student’s major advisor and the director is required prior to registering for honors courses. The proposed program may follow one of three general plans: a senior recital with an accompanying project paper (an historical-programmatic essay on the recital content); a major written project on some aspect of history, literature, or music education; or a major project in the field of music composition. Following official school approval, the student will register for three units of directed study in MUSC 190A (1 unit) and 190B (2 units) under a designated faculty member. The student must maintain a grade point average of 3.5 in the school and a 3.0 overall university grade point average throughout the senior year, and complete 190A and 190B to receive departmental honors at the awarding of the baccalaureate degree.
**BA - Dance**

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](https://www.sjsu.edu/catalog/graduation_requirements/) of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

**Major-Specific Graduation Requirements**

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of "C- or better".

BA - Music

This is a flexible program of general studies with minimum performance requirements that allows students to combine studies in music with other fields of interest. An entrance audition is required. All students must complete the core classes and then select electives from at least three categories, in consultation with the Music Advisor, and directed toward a specific Capstone. Ensemble participation is a co-requisite of applied lessons at all times.

The Bachelor of Arts in Music is designed for the student who seeks a liberal arts education with a major in music. The degree can be tailored to each student. A senior project is required.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of "C- or better".

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

- MUSC 148A: Improvisational Traditions of the World - Africa and Diaspora | 2
- MUSC 148B: Improvisational Traditions of the World - Asia | 2
### Capstone Project

One of the following: undergraduate thesis, lecture/demonstration, or an appropriate project approved by the Director and area coordinator.

MUSC 182. Senior Project

### Additional Courses in Music

Take 15 units from at least two of the following categories. Five units must be upper division. Select courses in consultation with an advisor directed towards one of the capstone projects described below. All students must complete the capstone project under MUSC 182, listed above. Please see advisor for information on a Music Technology specialization (note: specializations are a cluster of courses used as an advising tool for departments, it will not appear on transcript or diploma.)

BM - Bachelor of Music, Concentration in Composition

Private composition lessons are at the heart of this degree program, with many opportunities for students to hear their own works performed by other students and faculty members. Composition students also meet regularly as a group with the faculty coordinator to hear and discuss their compositions. Students in this program must complete both junior and senior projects in addition to the regular course of study.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of “C- or better”.

<table>
<thead>
<tr>

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

### Preparation for the Major

BM - Music, Concentration in Jazz Studies

The B.M. concentration in Jazz Studies is a degree tailored for the student intent on pursuing an active career as a professional jazz musician. Emphasis is placed on jazz improvisation, jazz performance styles, jazz arranging/composition, and jazz pedagogy. Students receive in-depth private instruction, and there are numerous opportunities for live performances. Students are expected to complete a senior project in addition to the regular course of study.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of “C- or better”.

Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).
Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).
A grade of “C or better” (C- not accepted) is required to meet graduation requirement.

University Electives: 2-5 units

Total Units Required: 120 units
BM - Bachelor of Music, Concentration in Music Education

Students in the Music Education program complete the subject matter preparation for the California Teaching Credential in Music, K-12.

The BM-Bachelor of Music in Music Education is approved as subject matter preparation for a single subject credential by the California Commission on Teacher Credentialing (CCTC). Individuals who do not wish to complete one of the degree program, or individuals seeking a single subject credential in subject areas not listed must pass all portions of the appropriate Commission-approved subject matter examination(s).

Students receive 30-minute weekly lessons every semester in their area of specialty and must participate in the major ensemble of their respective applied area. In the final semester of applied study, a solo recital of a minimum of 30 minutes of music is required.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of “C- or better”.

University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>
<th>24</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Upper Division General Education</th>
<th>6</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

*A grade of "C or better" (C- not accepted) is required to meet graduation requirement.*

**Preparation for the Major**

<table>
<thead>
<tr>

BM - Bachelor of Music, Concentration in Performance

The Bachelor of Music in Performance program is designed for the student with a career goal as a professional singer or instrumentalist and teacher. In addition to the core courses, specific courses include weekly private lessons with outstanding professors, participation in choral ensembles, opera theater, symphonic band, symphony orchestra along with small ensemble and solo performance opportunities. Students are expected to present both a junior and senior recital.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of “C- or better”.

Departments & Degrees

MM - Music

Advisor: Gordon Haramaki

The graduate program in the School of Music and Dance offers training for careers in performance, conducting, composition, research, and teaching. We also provide preparation for further advanced study in ten distinct areas:

- Composition
- Choral conducting
- Instrumental conducting
- Instrumental performance
- Jazz studies
- Keyboard studies
- Music education
- Music history
- Music systems/theory
- Vocal performance

Our master’s program is a 30-unit course of study, typically taken in four semesters over two years, and consists of graduate seminars, one-on-one private lessons, performance ensembles, and area specialization coursework. The master’s culminates with the master’s exam and the completion of a graduate recital, project, thesis, or music composition.

Requirements for Admission

Prospective students apply online to San José State University and the School of Music and Dance through CSU Mentor. Please state your proposed area emphasis, and complete the personal statement. The School of Music and Dance graduate program requires applicants to have a bachelor’s degree in Music from a regionally accredited institution and to be in good academic standing at the last college or university attended. In rare circumstances, students with degrees in non-music areas who demonstrate artistic potential for graduate study in Music may be admitted to the program.

The School of Music and Dance requires a minimum GPA of 3.00 in the last 60 units of undergraduate coursework. All required transcripts and supporting documents should be sent directly to the university.

Students from a country where the official language was not English are required to submit a TOEFL (Test of English as a Foreign Language), PTE (Pearson Test of English), or International English Language Testing System (IELTS) score. The minimum entrance score for the TOEFL is 590 (paper based), 243 (computer based), or 96 (internet based), with a score of 5 in the Writing Section. The minimum score for the PTE is 68; for and the IELTS, the minimum score is 7.0. All test scores must be fewer than 2 years old. Test scores must be sent directly from the Educational Testing Service office (institution code 4687), Pearson Office, or IELTS office directly to SJSU.

The School of Music and Dance does not require the GRE (Graduate Record Exam).

Audition, Portfolio, Interview

Conducting and Performance: a live (preferred) or unedited recorded audition is required for conducting and performance specializations. Please see the School of Music and Dance website for specific requirements of individual performance areas.

Composition, Education, History, Systems/Theory: the submission of a portfolio of work is required for all academic specializations. Please see the School of Music and Dance website for specific requirements of individual academic areas.

Individual areas may also require an interview.

Letters of Recommendation

The School of Music and Dance requires three letters of recommendation addressing the applicant’s potential for graduate-level work in music to be sent to the appropriate area advisor.
Conditionally Classified Standing

Graduate students admitted to the School of Music and Dance are usually admitted into a "conditionally classified" status. This status is normal for all entering graduate students, who must demonstrate a bachelor's level competence in music history and music theory by passing the Graduate Entrance Evaluations given during Pre-Instruction before the start of the fall semester. Students who pass their Entrance Evaluations may then become "graduate classified" and are eligible to take all 200-level graduate seminars after completing MUSC 200. Students who fail portions of the Evaluation will remain conditionally classified and will be required to remediate with the appropriate coursework before taking graduate seminars beyond MUSC 200. Coursework taken as remediation is not applied to the Master's degree requirement units. Students who fail the entire Entrance Evaluation may not be admitted into the program. Please see the School of Music and Dance’s “Graduate Program Test Requirements” for more information.

Master's students must pass MUSC 200 to fulfill the Graduation Writing Assessment Requirement (GWAR). Satisfaction of GWAR completion at a 3.0 minimum GPA of 9 units of letter graded coursework), to graduate classified status are need to advance to candidacy, and perform the master's recital.

Course Requirements for the Master's Degree

The Music master's degree is based on 12 units of four “core” graduate seminars, beginning with MUSC 200: Methods of Music Research & Writing, and 12 units of area courses and ensembles. Students with the academic specializations (Plan A), 6 units of thesis/composition supervision are taken in preparation for completing a thesis or composition. Students in performance specializations (Plan B), 6 units of private lessons with an individual teacher are taken in preparation for their master's recital or project. All required prerequisite course work must be passed with a grade of “B” or better and a minimum 3.0 GPA must be maintained in order to continue with the graduate program. To complete the program, students take their Written Culminating Exams (WCE) in their final semester.

Plan A (Thesis or Composition)

In Plan A, six units are devoted to the preparation and writing of either an advisor-approved thesis or a music composition approved by the candidate's major professor. After final approval by the advisor and thesis committee, the thesis or composition is submitted to Graduate Studies.

Plan B (Recital or Project)

In Plan B, six units are devoted to the preparation and performance of one or more master’s recitals, or the preparation and production of a written project. Performance candidates will perform 1-2 recitals (by advisement) of repertoire approved by the candidate’s advisor. These performances are recorded, and the recording and a hard copy of the recital program are submitted to the School of Music Library. Students must be in “graduate classified” status to perform their recital.

Written Culminating Exams (WCE)

At the end of their studies, students demonstrate their thorough grasp of music history, music systems/theory, and their field of specialization through the Written Culminating Exams (WCE). Students must pass all sections of the examination to be awarded their master’s degree.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Nuclear Science Program
College of Science

DUNCAN HALL 180
408-924-4954

Professors
Victor Maraschino, Radiation Safety Officer

Introduction
The Nuclear Science Facility of San José State University is the unique focus of all related teaching and research activity on campus. Undergraduate students have an opportunity to work in the facility as part of their general education classes in chemistry and physics. Students majoring in chemistry, physics, and biology come to the facility for some of their classes or for undergraduate research projects. The Department of Physics offers its major with a concentration in Nuclear Science. Consult the department listings for degree requirements and course descriptions.

SJSU also offers MS degrees in Chemistry and Physics. The course of study could emphasize nuclear chemistry or nuclear physics depending on the student’s particular interest. Consult the chemistry or physics listings respectively for degree requirements and course descriptions.

Resources
The university’s Nuclear Science Facility is a unique physical plant specifically designed and built for classroom, laboratory and research work in nuclear science and technology. The Nuclear Science Facility is a freestanding 10,000 square foot, three-story building contiguous to the university’s other science and classroom facilities. It is comprised of a briefing room, administrative and faculty offices, four undergraduate wet labs, two undergraduate counting rooms, five graduate wet labs, a high activity storage room, plant and animal experiment rooms, a waste water collection and sampling system, an ambient air sampling system and storerooms. The facility is staffed full-time by a director, an office manager, senior technologists and a radiation safety officer.

The reference library within the facility is comprised of approximately 300 volumes of standard science reference works and texts covering basic and advanced nuclear physics science and technology, radiobiology, health physics and standards and procedures. This collection supplements the university library, comprised of 900,000 volumes and more than 2,100 science and engineering periodicals.

Research
Research in the Nuclear Science Facility is sponsored through grants from DOE, NASA, NSF, and others. Most research is done in collaboration with other universities and national laboratories.

Curricula
- BS, Nursing
- BS, Nursing, Concentration RN to BSN
- MS, Nursing
- Certificate, Post Master’s Nurse Educator
- DNP, Doctor of Nursing Practice

Introduction
The Valley Foundation School of Nursing offers an innovative curriculum and varied experiential opportunities for students. Accredited by the Commission on Collegiate Nursing Education, our undergraduate and graduate degree programs prepare nursing professionals to be socially and ethically responsible clinicians and scholars who are able to meet the changing healthcare needs of a diverse global community. Under faculty supervision, baccalaureate nursing students participate in clinical experiences in both hospital and community agencies. Our nurse-managed centers, located in Santa Clara and Santa Cruz counties, offer students the opportunity to provide health services and illness prevention services to populations in need. Nurses returning for their master’s will gain additional knowledge and skills needed for advanced practice in education and administration. California State University, Fresno and San Jose State University offer a joint post-master’s Doctor of Nursing Practice Program. The Doctor of Nursing Practice program prepares professional nurses to assume leadership positions in clinical, administrative, and academic settings.
Undergraduate BSN Application and Admission Procedures

The application to the Undergraduate Nursing major is a 2-step application process.

Students interested in the nursing major should attend a 2 hour group advising session (usually offered monthly). Submit a University application to www.csumentor.edu and official transcripts of all previous college work to the Office of Admissions and Records by the posted University deadlines. As of Fall 2010, the University has designated “undeclared pre-nursing” as an impacted major. Impaction criteria for the undeclared prenursing major are posted on the University web pages under info.sjsu.edu. Students are admitted as “cohort groups” once they have been formally admitted to the nursing major. (Note: the nursing major application process has supplemental impaction criteria in place.) Students must file a separate application to the nursing major (www.sjsu.edu/nursing).

Prior to applying to the University, students should refer to The Valley Foundation School of Nursing website for information regarding advisement for entry into the major. Advising is available through individual or monthly group sessions. Refer to the nursing web site at www.sjsu.edu/nursing for more detail, dates, times, and rooms for monthly group advising sessions. Application process for The Valley Foundation School of Nursing will be posted on the nursing website. All online applications include proof of admission to SJSU, a passing score on the Writing Skills Test, and a score from the entrance examination, the TEAS test.

Nursing has been an impacted major since Spring 2005. Impaction imposes supplemental criteria that all students must meet. Pre-nursing students apply to the “undeclared pre-nursing” major, for consideration in the applicant pool. Students may apply to the nursing major twice maximum.

The Valley Foundation School of Nursing has biannual admission application periods - Spring and Fall. Supplemental criteria for eligibility for the applicant cohort pool include:

1. Composite GPA of 3.0 in 5 prerequisite courses (BIOL 065, BIOL 066, MICRO 020, ENGL 001A, and STAT 095). All courses must be passed with a "C or better".
2. BIOL 065, BIOL 066, and MICRO 020 must be completed within 5 years of establishing eligibility and passed with a grade of “C” or better. If the course does not meet the 5-yr. recency requirement the student will need to retake that course. The grade for any of these 3 courses taken within the 5 years will be used for calculation purposes. Courses may not be repeated, except for "academic grade forgiveness" and this designation must appear on official transcripts. (“V” and “WB” grades are excluded).
3. A minimum TEAS score of 75; version 5 is the only acceptable version of the TEAS. This exam may only be taken two times. (www.sjsu.edu/nursing)
4. Composite GPA of 3.0 in CHEM 030A, COMM 020, and an Area A3 (critical thinking) course. All courses must be passed with a "C or better". Options for acceptable area A3 courses are listed on the University’s web site.
5. A passing score on the Writing Skills Test (WST).

Impaction Scoring

Students meeting the above minimum criteria will be ranked according to an impaction score, calculated and weighted from the following two areas:

1. GPA in composite of 5 prerequisite courses (BIOL 065, BIOL 066, MICRO 020, ENGL 001A, and STAT 095). None of these courses may be repeated, and only the first grade will be included in the calculation. Exceptions: The second attempt was for “Grade Forgiveness” (also known as Academic Renewal) or meet the 5 year recency for BIOL 065, BIOL 066, and MICRO 020.
2. A minimum score on the Test of Essential Academic Skills (TEAS) Test (www.sjsu.edu/nursing). The TEAS is a test of English, reading comprehension, mathematics, and basic science. It is available through the SJSU Testing Center. Refer to The Valley Foundation School of Nursing’s home page and the BS information packet (under prospective students) for further information. There is a fee. A Study and Review Guide is available for purchase online at www.atesting.com to assist in preparation for the TEAS exam. Test administration dates (usually offered every 2 months) are posted under the University testing website. Check the testing website frequently for updates.

In order to join the applicant pool for The Valley Foundation School of Nursing, students must:

1. Declare “undeclared pre-nursing” as a major (this designation has supplemental entry criteria; see www.sjsu.edu/nursing). Change of major forms are done through the main university advising office in the Student Success Center on 10th street.
2. Complete the 8 required prerequisites courses with a grade of “C” or better. See minimum GPA under “impaction criteria.”
3. Pass the Writing Skills Test (WST) or approved equivalent (check the testing office website at http://testing.sjsu.edu/ for test dates, deadlines, and fees). Allow several months to do this, prior to applying to nursing.
4. Pass the TEAS test, version 5, within 2 attempts and submit the score(s) to SJSU The Valley Foundation School of Nursing (NOTE: a minimum TEAS score of 75 is required for eligibility).
5. United States citizenship or Green Card Permanent Resident (documentation required). “Dream Act” students need certain documentation. A California Drivers License (or picture ID from Drivers License bureau) is also required.
6. Complete a required background check and drug clearance, using the School’s vendor. Once the student is provisionally accepted into the nursing major, a clear background check and drug screen are required for admittance. More information on this content is on the School’s web site under “news and information”.
7. Submit an application with documentation of 1 through 5 above. Documentation of completion of prerequisites is submitted during the online application process.
8. Application to nursing and documentation deadlines for entry in Fall semester is Feb. 15. Application and documentation deadlines for entry in Spring semester is September 15. Specific clinical documentation will be required of all nursing students on admission to the major. Students may apply up to one month prior to these deadlines.
Please note that application requirements and prerequisite courses are subject to change. Interested students should check the nursing web site frequently for updates and changes. Monthly 2-hour group advising session does not require an appointment.

Co-requisite courses: There are 3 courses that must either be completed prior to entering nursing or within 1 year of entering the major. CHAD 070, PSYC 1; and HPRF/NURS 100W.

A student may only apply a maximum of two times to this program. If not admitted by then, the student should seek general University advising to change majors.
BS - Nursing

Undergraduate Coordinator and Advisor: Dr. Sue Malloy

Programs at SJSU prepare you for professional careers with a baccalaureate degree in Nursing.

The following courses (or their equivalents) are to be completed for the baccalaureate degree. Extended campus facilities include public health departments, home health agencies, sub-acute facilities, skilled nursing facilities, ambulatory care clinics, acute care hospitals, Nurse-Managed Centers and a wide variety of community-based agencies for clinical experience. Students must provide their own transportation to extended campus facilities. Some community agencies require home visits, therefore students must have individual use of an automobile.

Overall requirements: Students must maintain a minimum grade of “C” or better or “Credit” in each nursing course and in all prerequisites and corequisite courses for the nursing major (see admission impacton supplemental criteria for exceptions). In addition, students must pass background and drug clearances. Policies are posted on The Valley Foundation School of Nursing website at www.sjsu.edu/nursing.

All students must meet all health requirements and obtain personal professional liability insurance through the School’s designated vendor.

Students should be aware that the application requirements and prerequisite courses are subject to change. Interested students should check the nursing web site frequently for updates and changes.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

5-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All courses required in the major (preparation, major, and electives) require a grade of “C” or better or “Credit” (see admission impacton supplemental criteria for exceptions). In addition, students must pass background and drug clearances. Policies are posted on The Valley Foundation School of Nursing website.

CATALOG CONTENTS
# RN to BS - Nursing

**Advanced Placement Coordinator and Advisor:** Dr. Deepika Goyal  
Admittance into this degree requires an Associate in Science degree in Nursing and passage of the NCLEX (National Council Licensure Examination) the licensing examination for nurses in the United States. Admission occurs once a year in the Fall Semester. The RN to BSN program can be completed in 3 semesters of full-time study.

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html). 

A grade of “C or better” (“C- not accepted) is required to meet graduation requirement.

HPRF 100W, Writing Workshop ......................................................... Z ......................................................................... 3

### Preparation for the Major

### Community College Lower Division Coursework necessary for Associate Degree in Nursing (ADN)

### External Exam Credit

**NCLEX - RN examination**

Students admitted to this program will receive 20 units of credit for passage of the National Council Licensure Examination (NCLEX) for Registered Nurses prior to arriving at SJSU. NCLEX exam demonstrates competency in Upper Division Nursing course work to meet CSU Upper Division requirements for graduation.

MS - Nursing

Graduate Coordinator and Advisor: Dr. Daryl Canham

Graduate Options

The MS - Nursing has specializations* in:

- Nurse Administrator
- Nurse Educator

*Note: Specializations are a cluster of courses used by departments for advising purposes. Specializations will not appear on transcripts or diplomas. Please see advisor for more details.

Post-Masters Certificate/Credential Preparation:

- Nurse Educator

All options are offered only if student enrollment is adequate. Currently there is one program, the Nurse Educator post-masters program, offered through Special Session Programs. The Post Masters Nurse Educator program requires a master’s degree in nursing prior to admission. Please check the School website for current information on the status of our graduate programs and courses being offered.

After earning a baccalaureate degree in Nursing from an accredited program and obtaining San José State University admission, you may enter the master’s program with a major in Nursing. If you have graduated from a non-accredited baccalaureate program, prior course work will be assessed to determine requisite content and equivalency to baccalaureate degree requirements. Programs of study for the MS degree with a major in nursing are based on this assessment. Registered nurses with baccalaureate degrees in disciplines other than nursing are accepted conditionally to provide a specialized course of study prior to taking Master’s in Nursing courses. There are a minimum of four undergraduate courses which need to be completed with a grade of “B” or better.

Requirements for Admission to Classified Standing

General university requirements for consideration of admission to classified standing for the master’s degree are outlined in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, the following School requirements apply:

1. Completion of an accredited baccalaureate program in nursing with an upper division major comparable to that offered at San José State University. Applicants who have completed other curricula or who have deficiencies will be considered individually and may be required to enroll in designated courses.
2. Applicants must present a grade point average of at least 3.0 in the last 60 units of the undergraduate nursing major.
3. Completion of an introductory statistics course which includes an introduction to descriptive, probability and inferential statistics within three years of admission.
4. Completion of an introductory research course.
5. Completion of an economics course equivalent to ECON 1A effective Spring 2007.
6. Evidence of licensure as a Registered Nurse (RN) in the State of California.
7. Satisfactory completion of the CSU baccalaureate graduation requirement in written English; or satisfactory completion, as a graduate student, of the SJSU undergraduate upper division writing requirement by passing the Writing Skills Test (WST) with a grade which allows a waiver; or satisfactorily completing the writing course HPRF 100W.
8. Completion of The Valley Foundation School of Nursing application with all attachments.
9. A statement of purpose which outlines applicant’s goals and objectives in seeking degree/credential.
10. Evidence of having met health requirements of the school.
12. Evidence of knowledge and skills in the following areas: physical and psychosocial assessment skills developed to the level that the applicant can perform a complete history and physical exam on a well adult of either gender within one hour. Work completed to make up any of the above deficiencies will not be counted as part of the required units for the MS - Nursing.
13. The Valley Foundation School of Nursing (TVFSON) at SJSU has applied for reactivation of the Family Nurse Practitioner (FNP) program. The program is currently under review. Pending approval and funding availability, updated information will be posted on the TVFSON website.
Requirements for Admission to Conditionally Classified Standing

Students whose records show certain deficiencies, but whose professional achievements indicate a promise of success, may be admitted on a conditional basis. To qualify for classified standing, conditions must be met. The appropriate form will be completed by the Graduate Coordinator upon receipt of documentation and sent to the Associate Dean of Graduate Studies for review.

Requirements for Admission to Candidacy for the MS - Nursing

Admission to candidacy for the MS - Nursing requires that the applicant has been granted classified standing and has removed any deficiencies involved. In addition, the candidate must have:

1. Earned at least a “B” (3.0) average in a minimum of nine graded semester units of 100- and/or 200-level work completed in graduate standing at San José State University and in any course work completed in graduate standing at other institutions before enrollment here.

2. Have classified status.

3. Have planned a proposed program of study approved by the School Graduate Coordinator and by the Associate Dean for Graduate Studies.

Completing Requirements for the MS - Nursing

With approval of an advisor, the minimum program for completing the 36-unit requirement for a MS - Nursing is as follows:

Classified standing in nursing or permission of instructor is prerequisite to all nursing courses listed.

Students have the option to complete a post master’s Nurse Educator Certificate.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

**Doctor of Nursing Practice Program**

California State University, Fresno (Fresno State) and San José State University offer a joint post-master’s Doctor of Nursing Practice program. The DNP is a practice degree designed to prepare nurse leaders and advanced practice nurses for evidence-based practice in patient care, leadership, and educational roles. The culminating experience for this program is a doctoral project, rather than a dissertation.

The purpose of the Doctor of Nursing Practice (DNP) Program is to prepare experts in specialized advanced nursing practice. The DNP program prepares graduates for leadership and clinical roles and to engage in evidence-based inquiry. Graduates may also serve as clinical faculty in postsecondary nursing education programs. The curriculum is based on the American Association of Colleges of Nursing’s The Essentials of Doctoral Education for Advanced Nursing Practice (2006) and meets all requirements for national accreditation.

Designed for working professionals, coursework primarily offered in an online format with occasional intensive sessions held alternately on the Fresno State and San José campuses.

Admission occurs once a year in the Fall. Applications are available the previous Fall. The program follows the cohort model, and there is no part-time option. This is a 5 semester, 37 unit program that can be completed in 21 months of full-time study. See [www.calstate.edu/dnp](http://www.calstate.edu/dnp) for more information.

⦁ Minor, Nutritional Science and Food Science
⦁ Minor, Nutrition for Physical Performance
⦁ Minor, Packaging
⦁ MS, Nutritional Science

Introduction
Nutritionists, food scientists, dietitians, foodservice and packaging professionals. The Department of Nutrition, Food Science and Packaging trains graduates for rewarding careers in settings as diverse as community organizations, educational institutions, hospitals, nutrition and research laboratories, corporations and government agencies. The first nutrition department in the CSU system, our department traces its roots to 1911. We currently offer a master’s degree in nutritional science and two undergraduate degrees in the field: a general BS degree and a BS degree with the option of concentrations in dietetics and packaging. Our dietetics program is accredited by the Academy of Nutrition and Dietetics (AND) and the Accreditation Council for Education in Nutrition and Dietetics (ACEND) qualifying our students to apply for ACEND accredited internships and to work toward becoming registered dietitians.
BS - Nutritional Science

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

See department for advising. A minor is strongly recommended for each area of specialization.
### BS - Nutritional Science, Concentration in Dietetics

#### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

#### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

*A grade of "C or better" (C- not accepted) is required to meet graduation requirement.*

**MS - Nutritional Science**

Our Master of Science (MS) program is designed to meet the needs of the student who has a baccalaureate degree and who wishes advanced preparation in nutrition science, nutrition education, geriatric nutrition, foodservice/restaurant management and packaging. The program is intended to prepare candidates to assume leadership roles in their profession and community and to provide the opportunity to acquire a foundation for doctoral study. Our MS graduates have earned doctorates, become college or university faculty, been employed in private, federal and state research institutions, or have established their own private practice or consulting business. In the process of fulfilling requirements for the MS degree, it is possible to complete the academic requirements of the Academy of Nutrition and Dietetics (AND) and the Accreditation Council for Education in Nutrition and Dietetics (ACEND) toward becoming a registered dietitian. Courses are scheduled to accommodate the time needs of working graduate students.

**Admission Requirements**

General university requirements for consideration for admission to classified standing for the master’s degree are outlined in this catalog.

**Requirements for Admission to Classified Standing**

Students seeking admission to classified standing in the Nutrition, Food Science and Packaging Department must first comply with university requirements for admission as outlined in this catalog. In addition, applicants must contact the department for materials to be used by the department’s Graduate Committee in selecting students for admission to classified standing. All prospective students must submit a letter of intent, three letters of recommendation, and transcripts from all of the institutions attended. A selection committee will determine eligibility on the basis of information made available. Criteria include:

1. a BA or BS degree in Nutritional Science, Food Science, Foodservice Management, or equivalent.
2. a grade point average of 3.0 in upper division courses.
3. evidence of potential ability to do professional work.

**Requirements for Admission to Conditionally Classified Standing**

Students seeking an MS degree in Nutritional Science who meet requirements for admission to the Graduate Division, but lack an undergraduate degree in Nutritional Science, Food Science, Foodservice Management, or equivalent and have little or no professional experience, may apply for conditionally classified standing in the department. Applicants must contact the department for materials to be used by the department’s Graduate Committee in determining eligibility for the program. All prospective students must submit a letter of intent, three letters of recommendation from individuals who can testify to the prospective student’s potential for success in nutritional science and to the individual’s scholastic ability, and transcripts from all of the institutions attended. The decision to accept the student for study in this program will be made by a selection committee. Criteria include:

1. a BA or BS degree.
2. a grade point average of 3.0 in upper division courses.
3. graduate approval upon the completion of courses to correct deficiencies in undergraduate courses.

**Requirements for Admission to Candidacy for the MS - Nutritional Science**

Admission to candidacy for the Master’s degree in Nutritional Science requires favorable action of the Graduate Committee of the Department of Nutrition, Food Science and Packaging and of the university’s Office of Graduate Admissions & Program Evaluations. In general, students will be recommended for candidacy when:

1. they attain classified graduate standing.
2. they demonstrate aptitude for professional work in an area of specialization as measured by academic performance and appraisals by instructors and other appropriate means.
3. they show a satisfactory background in the profession of nutrition and food science by having completed the program requirements.
4. they have a minimum 3.0 grade point average in all post-graduate work.
5. they have selected a graduate advisor, identified the graduate program objective, and have an approved program signed by the faculty advisor, departmental graduate coordinator, and the university’s Office of Graduate & Program Evaluations.
6. they have met the Graduation Writing Assessment Requirement (GWAR). The university requires that all graduate students complete the GWAR as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement - Graduate” for details. For graduate courses that satisfy the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [www.sjsu.edu/gape](http://www.sjsu.edu/gape).

**Degree Requirements**

Maintenance of a 3.0 GPA is necessary. A comprehensive final oral examination is required and will be of such scope and manner as determined by the student’s graduate committee.
Plan A (with Thesis)
If this plan is chosen by the student, he or she is required to complete the 10 units of core courses. Fifteen or more units must be approved 200-level courses and must include NUFS 299 Master’s Thesis. A maximum of 3 units Special Studies (NUFS 298) is allowed. See thesis information for steps in completing a thesis. A bound copy of the thesis must be submitted to the Nutrition, Food Science and Packaging Department and to the student’s thesis advisor.

Plan B (with Project)
For this plan, the student is required to complete the 10 units of core courses. Fifteen or more units must be approved 200-level courses. A written project (NUFS 298) to be submitted in publication format is required. The purpose of Plan B is to provide breadth rather than specialization.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Curricula
- MS, Occupational Therapy

Introduction
Occupational therapists help people of all ages whose daily lives are disrupted by illness, injury, or other conditions to improve their health, independence and participation through the therapeutic use of everyday activities (occupations). One of the fastest growing of the health care professions, the demand for occupational therapists will grow by almost 30 percent by 2020, the U.S. Bureau of Labor Statistics reports.

The SJSU OT department is the oldest accredited OT program in the CSU system. Founded in 1943, it is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery, Suite 200, Bethesda, MD 20814-3449. ACOTE’s telephone number, c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org. NBCOT School Program Performance Data is also available.

Courses are taught by nationally recognized faculty who have clinical, research and teaching expertise across a broad range of traditional and emerging practice areas. The Student Occupational Therapy Association (SOTA) provides a myriad of social, educational and leadership opportunities. Always in high demand, our graduates are hired by private and public health care institutions and agencies.
MS - Occupational Therapy

The SJSU OT department is the oldest accredited OT program in the CSU system. Founded in 1943, it is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery, Suite 200, Bethesda, MD 20814-3449. ACOTE's telephone number, c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org; NBCOT School Program Performance Data is also available.

Admission Procedures

The MS curriculum in occupational therapy is designed for those who have already earned a baccalaureate degree in another field. The program of study enables students to obtain the education and degree necessary to be eligible to practice as an occupational therapist. Once the MS degree in Occupational Therapy is completed, the student is eligible to sit for the national certification examination. Successful completion of the examination qualifies the candidate to apply for national certification and state licensure. Applications are accepted beginning October 1 for the subsequent Fall semester. It is important that students apply as early as possible.

Admission to Classified Graduate Standing

The following prerequisites must be met:

1. Cumulative GPA of 3.0 (on 4.0 scale) in upper division courses and prerequisite courses.
2. Minimum of 80 hours volunteer experience or equivalent paid work experience in 2 different types of therapeutic settings; 60 of the hours must be completed under the supervision of an occupational therapist. Hours must be verified by supervisor on Evaluation Form for Volunteer Experience available from the Department of Occupational Therapy and submitted at the time of application.
3. Completion of Student Information Form available on the OTCAS and submit the first page of the OTCAS application form and the general essay from the OTCAS application directly to the Occupational Therapy department.
4. Human Anatomy with human cadaver laboratory (virtual laboratory acceptable), 3 semester units or 4 quarter units.
5. Physiology with laboratory, 3 semester units or 4 quarter units.
6. Introductory psychology course or acceptable upper division psychology course as substitute, 3 semester or 4 quarter units.
7. Introductory Sociology or Cultural Anthropology course, 3 semester or 4 quarter units.
8. Abnormal Psychology course, 3 semester or 4 quarter units.
9. One college level skills course may be taken through adult education. The purpose of the course is to have students work with an artistic medium. Acceptable courses include: Ceramics, painting, weaving, graphic arts or woodworking. Previous work may be accepted as fulfilling this requirement, at the discretion of the Admissions Committee.
10. Statistics course, either an upper division course offered by the departments of education, social sciences, psychology or division of health professions or a lower division statistics course that covers correlations and analysis of variance, 3 semester or 4 quarter units.
11. Neuroanatomy/Neuroscience - May be taken on SJSU campus or online. Courses from other institutions may also be acceptable at the discretion of the Admissions Committee. 3 semester units or 4 quarter units.
12. Evidence of understanding of occupational therapy and defined career goals in relation to that profession as stated on the Student Information Form and/or accompanying personal written statements (see #3 above).
13. Ability to write as demonstrated in the student information form (#3 above), transcripts of all previous work submitted and any correspondence.
14. A GRE (Graduate Record Examination) combined minimum Quantitative and Verbal score of 297 is required. A minimum GRE verbal score of 153 is required and a minimum Analytical Writing score of 4.0 are required; a score of 4.5 or higher in Analytical writing is desired. Note: Scores must be sent to both the Department of Occupational Therapy, and the University.
15. Three letters of recommendation from former instructors, employers, supervisors, or other individuals knowledgeable about the candidate's academic abilities, capacity for goal-directed behavior, and the ability to integrate and synthesize ideas.
16. Personal interview by Graduate Committee may be requested. If so, the student will be notified. If transportation, cost, and time are prohibitive a phone or online interview can be arranged.

All prerequisite courses must be completed before acceptance into the program. All transcripts must be sent to OTCAS, in addition to the University. For current admission procedures, please visit http://www.sjsu.edu/occupationaltherapy/.

These requirements exist for all students holding baccalaureate degrees in other disciplines. The department reviews completed files and makes recommendations for acceptance or denial to the SJSU Admissions Office.

The purpose of OCTH 295 is to provide inquiry in advanced topics in occupational therapy practice, including theoretical and clinical problems. The Comprehensive Master’s project requires critical analysis and synthesis of information gathered, crafted into a publishable paper or poster and oral presentation.
The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [http://www.sjsu.edu/gape](http://www.sjsu.edu/gape). Students must maintain a 3.0 GPA to remain in the MS program.

### Occupational Therapy Internship Experience Requirement

To satisfy the Occupational Therapy Department international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at [http://www.sjsu.edu/casa/international-experience](http://www.sjsu.edu/casa/international-experience).

### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Curricula
⦁ BA, Philosophy
⦁ Minor, Philosophy
⦁ MA, Philosophy

Introduction
Philosophy majors read and discuss ideas generated by some of the greatest thinkers in history and learn to examine contemporary theoretical problems from a philosophical perspective. Noted for its treatment of philosophy in a global context as well as its engagement with issues reflecting its Silicon Valley setting, the Department of Philosophy offers classes taught by faculty recognized and highly regarded for both teaching and scholarship. Our curriculum is equally strong in traditional and innovative areas of philosophy, such as feminist and applied philosophy, and we offer both undergraduate and graduate degree programs. Because the study of philosophy develops a student’s ability to analyze ideas and arguments, to think critically and to write well, a major in philosophy provides pre-professional training in a number of fields, including the fields of law, medicine, psychology and theology.
### BA - Philosophy

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### Total Units Required

18
MA - Philosophy

Advisors: Dr. Carlos A. Sanchez

Requirements for Admission to Classified Standing
Candidates must meet all university requirements for admission. In addition, a student will be admitted to classified status only if:
1. At least 18 units in philosophy have been taken including at least 6 units in upper division work, at least 6 units in the history of philosophy, at least 3 units in ethics, and at least 3 units of symbolic logic (Phil 9 or its equivalent). Exceptions based on comparable studies and experience may be made with graduate committee approval.
2. The average grade received in the 18 units is at least a “B”.
3. Three letters of recommendation have been submitted.

Admission to Conditionally Classified Standing
Applicants who meet requirements for admission to the Graduate Division but who do not meet all the requirements for classified standing will be admitted as conditionally classified.

Requirements for Admission to Candidacy for the MA - Philosophy
The basic requirements for admission to candidacy for the MA - Philosophy are outlined in detail in the Academic Requirements section of this catalog. The University requires that all graduate students satisfy the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions & Program Evaluations website at www.sjsu.edu/gape.

Completing Requirements

Plan A - Thesis
Designed for students who wish to do a thesis.

Plan B - Option 1: Reading Intensive
Designed for students who wish to do a guided, individualized reading project.

Plan B - Option 2: Applied Philosophy Project
Designed for students who wish to do a project.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Curricula
⦁ BA, Physics
⦁ BA, Physics, Preparation for Teaching
⦁ BS, Physics
⦁ Minor, Physics
⦁ Minor, Astronomy
⦁ MS, Physics
⦁ MS, Physics, Concentration in Computational Physics
⦁ MS, Physics, Concentration in Modern Optics

Introduction
At the core of all science, physics helps us understand chemical reactions, cell transport, the Earth’s interior and the life cycle of stars. Among much else, physicists invented the semiconductor, the laser and the electron microscope. They play key roles in the design and operation of spacecraft and in the development of electronic and optical instrumentation. The Department of Physics and Astronomy offers an MS degree in physics and three undergraduate degrees: a BS that prepares students for professional careers in applied physics or graduate study, a BA that combines a strong foundation in physics with a second area of concentration, such as computer science or math, and a BA Preparation for Teaching, for students planning a careers in education. Undergraduates also have the opportunity to minor in physics or astronomy. Our faculty, experts in lasers and optics, computational physics, condensed matter, astronomy and physics education, receive on average $1.8 million annually in external funding for sponsored research.
BA - Physics

This 120-unit program provides a strong foundation in physics while allowing sufficient electives for the student to pursue a second program of study in another field (e.g., science education, business, math, engineering or a second science; transfer students must take at least 12 units of upper division physics major courses at SJSU with a GPA of 2.0 or better in these courses).

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

University Graduation Requirements

Core Lower Division General Education

BA - Physics, Preparation for Teaching

This major is designed for students interested in teaching science in high school or middle school. The following course work satisfies San José State University’s requirements for a BA in Physics. A Minimum grade point average (GPA) criteria may be required for verification of subject matter competency. Completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the CWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of “C or better” (C- not accepted) is required to meet graduation requirement.

BS - Physics

This 120-unit program prepares students for professional positions in applied physics and research or for graduate study at the PhD level (transfer students must take at least 12 units of upper division physics major courses at SJSU with a GPA of 2.0 or better in these courses).

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

Graduate Programs in Physics

Requirements for Admission to Classified Standing
Minimum requirements for admission to the Graduate Division are outlined in the Admissions section of this catalog. The student must also have completed at least 24 semester units of upper division physics, or courses in related fields approved by the Physics Department graduate advisor.

Requirements for Admission to Conditionally Classified Standing
Students who meet minimum requirements for admission to the Graduate Division but who lack adequate preparation in physics may be admitted to conditionally classified standing. Students in conditionally classified standing will normally concentrate on undergraduate physics, but may enroll in any graduate course in physics for which they have the prerequisites.

Requirements for Admission to Candidacy for the Master’s Degree
Students seeking admission to candidacy must meet the all-university requirements outlined in the Academic Requirements section of this catalog. In addition, students should also achieve a minimum score of 550 on the physics portion of the Graduate Record Exam (GRE).

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluation website at www.sjsu.edu/gape. The GWAR can also be demonstrated by passing either a 100W course or the waiver exam.
# MS - Physics

**Graduate Advisor:** Dr. Peter Beyersdorf

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

## Requirements of the Masters

### Choose a Plan

#### Plan A (with Thesis)

MS - Physics, Concentration in Modern Optics

The students in this concentration receive instruction in fundamental areas of physics and gain experience and knowledge in a wide range of subjects related to Modern Optics. All candidates are required to complete a thesis including the defense (Plan A) or take an oral comprehensive examination as culminating experience (Plan B).

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Introduction
Political science majors tackle the public issues of the day as well as the timeless issues of government, public policy and the political process. The Department of Political Science offers a BA in political science and a master’s degree in public administration (MPA). Our courses cover U.S. politics and public administration, public law, comparative politics, international relations and political theory. Our extensive internship program includes funded internships in Sacramento and Washington, D.C., and our students have the opportunity to participate in a Model United Nations and the honor society Pi Sigma Alpha. We arrange annual trips to the state capital and state supreme court and campus presentations by guest speakers who range from Holocaust survivors to U.S. Senators. We prepare our graduates for advanced graduate study as well as careers in law, teaching, government service, legislative staffing, political consulting, interest group representation, international relations and other fields. Contact us at 408-924-5550 or visit us at http://www.sjsu.edu/polisci/.
BA - Political Science

The BA - Political Science provides students with an understanding of politics and the political process and prepares them for their lifelong responsibilities as citizens, as well as furthering their skills in critical analysis and communication. The major in political science may lead to a wide variety of careers, including teaching, the law, business and public service.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C- or better" to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the CWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.
### Requirements of the Major

**Additional Upper Division Core Courses**

Complete 15 units from the following. One course from each of the four fields is required.

**U.S. Government and Politics**

COMPLETE ONE COURSE FROM:

- POLS 102. State Government and Politics
- POLS 103. Local Government and Politics
- POLS 105. The Legislative Process
- POLS 106. The United States Presidency
- POLS 107. Politics and Public Opinion
- POLS 108. Political Participation
- POLS 114. Introduction to Public Administration
- POLS 122. Judicial Politics
- POLS 130. American Public Policy

**Comparative Politics**

COMPLETE ONE COURSE FROM:

- POLS 140. European Union
- POLS 141. Eurasian Politics
- POLS 142. African Politics
- POLS 144. Middle Eastern Politics
- POLS 145. Asian Politics
- POLS 146. Latin American Politics
- POLS 147. Globalization
- POLS 148. Nationalism and Comparative Political Cultures
- POLS 149. Comparative Public Policy and Administration

**International Relations**

COMPLETE ONE COURSE FROM:

- POLS 152A. International Organizations and NGOs
- POLS 154. U.S. Foreign Policy: Formulation and Administration
- POLS 155. The Wealth of Nations

**Political Thought**

COMPLETE ONE COURSE FROM:

- POLS 160A. Classical Political Thought
- POLS 160B. Modern Political Thought
- POLS 160C. Recent Political Thought
- POLS 163. American Political Thought
### Additional Upper Division Courses

Honors Program

The achievements of political science majors with an overall GPA of 3.20 and a 3.50 GPA in political science are recognized by the department honors program. These outstanding students are eligible to enroll in POLS 190H, an honors thesis. Students who attain the required GPA and complete the honors thesis graduate with Honors in Political Science. Interested students should consult the department chairperson.
**Minor - Applied Research Methods**

The interdisciplinary Minor in Applied Research Methods (ARM) is designed to prepare students for careers involving social research and data analysis. The ARM Minor provides students with a broad understanding of research methods, including both quantitative and qualitative approaches and techniques such as surveys, experiments, interviews, focus groups, ethnography, and content analysis. Students in the ARM Minor will learn to apply these research skills to socially relevant issues, combining theoretical background with hands-on skills practice. The ARM Minor provides an ideal complement to the programs of students from a variety of social sciences, business, and applied sciences and arts disciplines.

**Total Units Required 15-19**
## Minor - Political Science

Students majoring in a wide variety of fields find a minor in political science interesting and useful, providing knowledge and skills that enhance their careers, improve their citizenship and cultivate their minds. The minor appeals especially to students in the other social sciences or in business, journalism or administration of justice, although many others also use the minor to broaden their education. A special department minor advisor helps students customize their programs to support their special interests. A minimum of six units must be completed in residence to satisfy the requirements for a political science minor. The minimum requirements are:

<table>
<thead>
<tr>

### Total Units Required

19
MPA - Master of Public Administration

MPA Director: Frances Edwards

The program leads to the professional degree of Master of Public Administration. It provides pre-service students with the knowledge and skills necessary for effective administration of local, state and federal government agencies and of nonprofit organizations. It also offers mid-career administrators and professionals in public service an opportunity to improve their management skills and qualifications. For the convenience of students who are employed full-time, all courses are offered in the evening or on weekends. Alumni assist with orientation and mentoring activities.

The MPA program provides each student with a basic understanding of the environment of public policy and the ability to deal with:

- Political and legal institutions and processes
- Economic and social institutions and processes
- Organization and management concepts, and human behavior resource administration
- Concepts and techniques of budgeting and financial administration
- Application of quantitative and qualitative techniques of analysis in policy and program formulation, implementation and evaluation, and decision making and problem solving

Students also develop the ability to:

- Define and diagnose decision situations, collect relevant data, perform logical analyses, develop alternatives, implement an effective and ethical course of action, and evaluate results
- Organize and communicate information clearly to a variety of audiences through formats including oral presentations, written memoranda and technical reports, and statistical charts, graphs, and tables
- Apply computers to public administration problems

The MPA offers two program tracks. The general management track is for persons interested in preparing themselves for leadership roles and senior management positions in public sector agencies and not-for-profit organizations. The second program track is a concentration in emergency management.

Requirements for Admission to Classified Standing

Minimum requirements for admission to the Graduate Division are outlined in this catalog. Students will be granted classified graduate standing in public administration upon the fulfillment of the following requirements:

Preparation

A bachelor’s degree or its equivalent, from an accredited college or university is required. No specific undergraduate major is necessary. Preparation must include introductory courses in American government, economics and statistics from an accredited institution and competency in spreadsheet use. Deficiencies in preparation must be removed before admission to candidacy and before completion of 12 hours of MPA courses, typically four courses. Transcripts for the baccalaureate and for all prerequisites must be sent directly to Graduate Admissions, not to the department.

Grades

Applicants applying directly after graduating from an undergraduate school, need an overall grade point average of 3.0 in all courses, or in the last 60 units as an undergraduate, or in the major. Applicants applying three or more years after completing the BA degree, need a grade point average of 2.75 overall, or in the last 60 units of undergraduate courses, or in the major. In addition, applicants should submit evidence of professional development.

Resumé and Essay

A resumé must be submitted that demonstrates professional experience and career growth.

In addition to a resume, a career interest essay providing biographical and career interest information should be sent to: MPA Director c/o Political Science Department; One Washington Square, San José, CA 95192-0119

TOEFL Examination

Foreign students must submit scores from the Test of English as a Foreign Language. A minimum score of 575 is required.

Requirements for Admission to Conditionally Classified Standing

In unusual cases, applicants who are otherwise qualified, but who lack some prerequisites, will be admitted to conditionally classified standing. Conditionally classified students need to fulfill the conditions for classified standing before they complete twelve units of work in the MPA program.
Requirements for Admission to Candidacy

Students must apply for admission to candidacy before the last semester of their graduate program. In addition to meeting the university-wide requirements for admission to candidacy as outlined in this catalog, applicants must have submitted an approved program for the degree. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. Within the program, PADM 210 meets the GWAR.

Completing Requirements for the Master of Public Administration Degree

As soon as students are admitted to classified standing, they should meet with an advisor to draft an interim program itemizing 36 units of course work as specified below. This plan will be submitted to Graduate Admissions and Program Evaluations (GAPE) using the Candidacy Form.

Plan A (with Thesis)

A thesis demonstrating the student’s competence in original research and acceptable to the department must be submitted to the department at least eight weeks prior to the date on which the degree is to be awarded. This thesis must conform to university standards and be approved by the Associate Dean for Graduate Studies.

Plan B (with Project)

In lieu of a thesis, a student may complete a thesis quality research project by enrolling in PADM 298, Special Problems. In PADM 298 the student will complete the substantial paper under faculty supervision to complete the project component of Plan B.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Requirements of the Masters

36

Core Courses

The courses form a base of knowledge and skills that prepare students for advanced seminars. Students must complete these courses before taking PADM 298.

COMPLETE FIFTEEN UNITS FROM:

<table>
<thead>

</tbody>
</table>

Electives

0-9

Depending on thesis or project arrangements, electives may include additional MPA courses, the PADM 281, Internship, or approved 100- or 200-level courses in political science or other departments, up to a maximum of 9 units.

Culminating Experience

3

Plan A (with Thesis)

PADM 299. Master’s Thesis

PADM 299. Master’s Thesis
Plan B (with Project) ..................................................................................................................................................................................................................... 3

PADM 298. Special Problems ................................................................................................................................................................................................................. 3

Total Units Required

No more than six hours of 100-level course work may be applied towards the MPA degree.

Students who do not have substantial management work experience related to the curriculum are required to complete an appropriate internship and register for PADM 281 as an elective.

Evidence of completion of Graduation Writing Assessment Requirement is necessary to qualify for the master’s degree.

Within the program, PADM 210 meets this requirement.

- Minor, Human Systems Integration
- Minor, Psychology
- MA, Psychology, Concentration in Research and Experimental Psychology
- MS, Psychology, Concentration in Clinical Psychology
- MS, Psychology, Concentration in Industrial/Organizational Psychology
Introduction
The Department of Psychology seeks to develop skilled critical thinkers who use their knowledge of the principles of human behavior, cognition, and emotion to work and live effectively and fully in a multicultural global society. Our curriculum covers the major areas in the field of psychology to help students understand the complexities of human thought and behavior in a sociocultural context. In addition, the Department provides students with training in research methods, statistics, and scientific writing. Psychology students have opportunities to gain practical experience by working with our faculty in research labs, community outreach projects, Silicon Valley companies, and so on. The Department offers a BA and BS in Psychology, a minor in Human Systems Integration and a minor in Psychology, an MA in Research and Experimental Psychology, an MS in Clinical Psychology, and an MS in Industrial and Organizational Psychology. Detailed information about our faculty, students, and programs may be found on our website at www.sjsu.edu/psych.

Psychology Honors Program
Students requesting departmental honors in psychology will be evaluated against the following criteria: (1) a minimum aggregate GPA of 3.5 across all psychology coursework; (2) completion of PSYC 117, PSYC 120, PSYC 121(A, B, C or E), STAT 95, and STAT 115 with a GPA of at least 3.5; and (3) evidence of distinguished scholarly work, as indicated by the completion of a BA thesis (PSYC 199), the honors seminar (PSYC 195), or work leading to a published paper or presentation at a professional meeting. Contact the department office for details.
### BA - Psychology

The undergraduate degree assures a broad coverage of the major areas of content and methods in psychology identified by the American Psychological Association as the backbone of a strong degree program. The goal of the breadth part of the degree requirements is to provide a strong background in general psychology. In addition, sufficient flexibility is offered through choices in fulfilling these requirements and through the electives so that students, in consultation with their advisors, can design a program of study which focuses on each student’s particular area of interest.

A carefully prepared multi-year program of study will ensure an appropriate sequencing of required courses (e.g., STAT 95 is a prerequisite for PSYC 100W, PSYC 100W is a prerequisite for PSYC 120, PSYC 120 is a pre- or co-prerequisite for 190/195). Use the advisor’s expertise for GE, SJSU Studies, and American Institutions course selection and to ensure a strong foundation for future course work. Seeking advising is especially important to those at risk for probation, those in the honors program, and those planning to go on to graduate school in psychology. The two and four year planners give additional guidance in designing a particular program of study including suggestions about the order in which to take classes even if they are not governed by official prerequisite requirements. All of these materials as well as the extra coursework and other requirements for Departmental Honors are available on the department website [www.sjsu.edu/psych](http://www.sjsu.edu/psych) or the department office.

Once declared as a psychology major, there are no minimum grade requirements for the major other than an overall 2.0 average across the courses in the major (i.e., a D- can “count” towards meeting psychology requirements).

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](http://www.sjsu.edu/psych) of the Policies and Procedures.

#### 4-Year Program Roadmap

Students may find a roadmap for this program [here](http://www.sjsu.edu/psych). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

## Total Units Required

120
**BS - Psychology**

The BS degree is a regimented degree plan for students who wish to develop a focused set of skills in pre-selected areas so they can apply these skills in a technical setting or seek research-focused training. The BS degree program has more course requirements than the BA (i.e., fewer electives). The degree plan emphasizes research focused scientific and methodological training, as well as breadth in pre-selected areas of psychology and other fields (biology, chemistry, philosophy). Students should seek early and frequent advice from departmental advisors.

A carefully prepared multi-year program of study will ensure an appropriate sequencing of required courses (e.g., STAT 95 is a prerequisite for PSYC 100W, PSYC 117, and STAT 115; PSYC 100W is a prerequisite for PSYC 120, PSYC 120 is a pre- or co-prerequisite for PSYC 121a-e and PSYC 190/195). Use the advisor’s expertise for GE, SJSU Studies, and American Institutions course selection and to ensure a strong foundation for future course work. Seeking advising is especially important for those in the honors program or those planning to go on to graduate school in psychology. The two and four-year planners give additional guidance in designing a particular program of study including suggestions about the order in which to take classes even if they are not governed by official prerequisite requirements. All these materials as well as the requirements for Departmental Honors (BA or BS Psychology) are available from www.sjsu.edu/psych or the department office.

There are no minimum grade requirements for the major other than an overall 2.0 average across the courses in the major (i.e., a D- can “count” towards meeting psychology requirements).

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of "C or better" (C- not accepted) is required to meet graduation requirement.

## Minor - Psychology

A minor in Psychology has a minimum of 18 units of PSYC and/or STAT. At least 12 of the 18 units must be upper division (i.e., courses numbered 100+ at SJSU). At least 12 units must be separate and distinct from the units used for the major program of the student. See a departmental advisor for approval of courses. Visit the [Psychology Department Advising website](#) for more information.

Minor - Human Systems Integration

The Human Systems Integration (HSI) minor: (1) studies the cognitive, perceptual, and performance capabilities and limitations of people as they interact with sociotechnical systems and devices (e.g., energy and transportation systems, computers, mobile devices, workplaces); and (2) seeks to apply evidence-based principles in the development of human-centered systems and devices. The HSI minor aims to provide students with interdisciplinary training to prepare them to work in cross-functional teams to optimize human capabilities, increase system efficiency, reliability, and safety, and minimize error.

MA - Psychology, Concentration in Research and Experimental Psychology

The Master of Arts Program in Psychology affords its candidates an opportunity for advanced study of psychological theory and research techniques with the following objectives in mind:

- **To ultimately earn a doctorate in psychology** - the course work and experience obtained in the Psychology Program is designed to enhance students’ credentials when applying to highly competitive doctoral programs.
- **To succeed in business, industry and or a research setting** - our program’s emphasis on the mastery of statistical and methodological procedures, research experience, and critical thinking produces graduates that are well suited for many careers in business, government, and/or an array of research settings.

Admission Requirements

To be eligible for admission into our program, you must:

1. Meet all of the University’s graduate admissions requirements
2. Have the equivalent of a U.S. baccalaureate degree
3. Have completed a minimum of 30 semester units in undergraduate psychology
4. Have a minimum GPA of 3.0 in the last 60 semester units (90 quarter units) of all college and/or university course work
5. Have a minimum GPA of 3.0 in all college and/or university psychology courses taken
6. Have taken the CRE Exam (General Test only), although we do not require a minimum score for your application to be considered.

Degree Requirements

General university requirements and procedures for completing the Master of Arts degree are described in the Academic Regulations section of this catalog. In addition to these, the following departmental requirements must be fulfilled.

**General Program requirements**

1. The student’s combined total of approved undergraduate and graduate work in psychology must be at least 60 semester units, including 30 units for the MA Degree Program.
2. The student must complete at least 30 approved graduate units. At least 27 of these 30 units must be psychology or statistics units; of the 27, at least 24 must be 200-level courses, i.e., up to six units may be from 100-level courses with the program coordinator’s approval.
3. The candidate must complete an acceptable thesis. This thesis will be a quantitative investigation of some degree of originality and of publication caliber.
4. Satisfactory performance on a final examination is required. This examination may be written, oral or both, as determined by the student’s thesis advisory committee. This is typically satisfied through the oral defense of the student’s thesis research.
5. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Evaluations website at [http://www.sjsu.edu/gape](http://www.sjsu.edu/gape).

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

### Thesis Requirement

The thesis serves as the culmination of a student’s course work, research experience, and growth as a scholar and scientist. This process is guided closely by a thesis advisor, a tenured or tenure-track faculty member of the Department of Psychology. As the student’s ideas develop into a full thesis proposal, a thesis advisory committee is formed in order to provide further guidance and expertise. Collection of the thesis data begins once the proposal has been approved by the committee and the proper animal care/human subjects’ approval has been obtained. The introduction, analysis, and interpretations of these data will form the core of the student’s written master’s thesis. These efforts all culminate in an oral presentation and defense before the thesis committee. A detailed statement of thesis policies is available in the Psychology Department Office and on the departmental website [www.sjsu.edu/psych](http://www.sjsu.edu/psych).
MS - Psychology, Concentration in Clinical Psychology

The Master of Science (MS) degree in Clinical Psychology is designed to provide the student with both theoretical and practical training in the assessment, diagnosis, and treatment of a wide variety of individual (adult and children), couples', and family mental health problems, and to prepare the student to work in private or public service agencies, independent practice, community mental health centers, or hospitals. The required academic course work and supervised fieldwork of 60 semester units meets the course work requirements for the California State Marriage and Family Therapist (MFT) license and most of the requirements for the Licensed Professional Clinical Counselor (LPCC) license (see [www.bbs.ca.gov](http://www.bbs.ca.gov) for requirements). An additional 2500-3000 hours of acceptable supervised experience is required for admission to the state MFT or LPCC licensing examination.

Admission Requirements

To be eligible for admission into the Clinical Psychology program, you must:

1. Meet all of the University graduate admissions requirements
2. Have a baccalaureate degree (BA or BS) in Psychology OR any baccalaureate degree (BA or BS) and a minimum of 30 semester units (45 quarter units) in Psychology
3. Have taken the REQUIRED six courses in psychology from the list provided below. These are to be included in the minimum 30 semester units (10 semester courses).
4. Have a minimum GPA of 3.0 in all Psychology coursework AND a minimum of 3.0 the last 2 years of academic work attempted (60 semester or 90 quarter units).
5. Provide evidence of a minimum of 100 hours of paid or volunteer applied clinical experience working with persons in a counseling/helping capacity (e.g., volunteer in home for emotionally disturbed children, juvenile hall, suicide and crisis telephone hotline).
6. Provide three letters of recommendation. One reference MUST be from a clinical supervisor. Additional references may come from former instructors and from supervisors of previous work in volunteer placements in the clinical field.

Undergraduate Courses in Psychology Required for Admission

1. General or Introduction to Psychology (SJSU code PSYC 1)
2. Elementary Statistics (SJSU code STAT 95)
3. Introduction to Research Methods (SJSU code PSYC 18 or PSYC 120)
4. Psychobiology or equivalent (SJSU code PSYC 30)

Each of the above four (1-4) may be taken at the community college or university level and may be lower division courses.

5. Upper division course in Abnormal Psychology (SJSU code PSYC 110)
6. Upper division course in Theory and Methods of Counseling, or Clinical Psychology (SJSU code PSYC 160, or PSYC 165)

Degree Requirements

General university requirements and procedures for completing the Master of Science degree are described in the Academic Regulations section of this catalog. In addition to these, the following departmental requirements must be fulfilled.

1. The student must complete a total of 60 units in clinical psychology as specified in the table below.
2. Candidates must demonstrate satisfactory performance on one or more final comprehensive examinations. These examinations are both written and oral.
3. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [http://www.sjsu.edu/gape](http://www.sjsu.edu/gape).
#### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

MS - Psychology, Concentration in Industrial/Organizational Psychology

The Master of Science (MS) degree in Industrial/Organizational (I/O) Psychology program is designed to provide students with a fundamental grounding in theory, research, and application in the field of I/O Psychology and to prepare them to work in a wide range of settings including medium-to-large sized organizations, government agencies, human resources or management consulting firms, and large research organizations. The program places particular emphasis on the science-practitioner approach in which students understand and appreciate theory and research as they apply their knowledge and skills to the needs and challenges of organizations.

Admission Requirements
To be eligible for admission into the industrial/organizational Psychology program, you must:
1. Meet all of the University graduate admissions requirements
2. Have completed either a baccalaureate degree [BA/BS] in psychology or any baccalaureate degree and a minimum of 30 semester (45 quarter) units in psychology
3. Have a minimum GPA of 3.0 in the last 60 semester units (90 quarter units) of all college and/or university course work
4. Have a minimum GPA of 3.0 in all college and/or university psychology courses taken
5. Have taken the GRE Exam (General Test only), although we do not require a minimum score for your application to be considered.

Degree Requirements
General university requirements and procedures for completing the Master of Science degree are described in the Academic Regulations section of this catalog. In addition to these, the following departmental requirements must be fulfilled.
1. The student must complete a total of not less than 30 semester units for the industrial/organizational concentration as specified in the degree below.
2. Candidates in the MS Industrial/Organizational program must complete a thesis as part of their 30 semester unit degree requirement. The nature of the thesis is to be determined in consultation with a committee of at least three faculty members. The thesis ordinarily consists of a quantitative investigation or program design, trial and evaluation of some degree of originality. The topic should be relevant to the field of study in which the candidate plans to work. The thesis will generally constitute the final comprehensive examination.
3. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at http://www.sjsu.edu/gape.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Science Education Program

College of Science

Professors
Elizabeth McGee
Paula Messina
Ellen P. Metzger, Chair

Associate Professors
Resa Kelly

Assistant Professors
Cassandra Paul
Elizabeth Walsh

Curricula
⦁ BA, Earth Science
⦁ BA, Physics, Preparation for Teaching
⦁ Minor, Science Education
⦁ Minor, Science Content for Teaching
⦁ MA, Science Education

Introduction
In concert with the College of Science, the Science Education program offers professional development opportunities for science teachers at all levels. We design and coordinate courses that support the preparation of science teachers in the areas of biology, chemistry, earth science, and physics. In cooperation with the College of Education and the Secondary Education Program, we oversee the single subject teacher credential program in science through advising, coursework offerings and student teacher supervision. In addition, we offer a master’s degree in Science Education and oversee the Science Education Resource Center (SERC), a unique resource center that houses science education materials available for checkout by our local teachers.
BA - Earth Science
This degree is cross listed with the Geology Department.
BA - Physics, Preparation for Teaching
This degree is cross listed with the Physics and Astronomy Department.
Minor - Science Education

Requirements of the Minor 14-15

Students interested in teaching high school science should take SCED 173 and EDSC 173 (open to seniors and post-baccalaureate students only; department consent is required).

Students interested in teaching elementary or middle school science should take EDEL 108B and EDEL 102 (open to seniors and post-baccalaureate students only; department consent is required).

EDTE 190. Health Education for the Classroom Teacher ..............................................................3
EDSE 192A. Including and Supporting Students .............................................................................3

COMPLETE ONE COURSE FROM:
SCED 173. Secondary School Science ........................................................................................3
EDEL 108B. Curriculum: Science ................................................................................................1-3

COMPLETE ONE COURSE FROM:
SCED 175. Classroom Experiences in Science Teaching ........................................................1
 Must take SCED175 twice to meet requirement
SCED 174. Training to Teach ..................................................................................................3

COMPLETE ONE COURSE FROM:
EDSC 173. Psychological Foundations of Secondary Teacher Education ..................................3
EDEL 102. Psychological Foundations of Education ....................................................................3

Total Units Required 14-15
### Minor - Science Content for Teaching

The science education minor is designed as a program of study that will allow students who are interested in becoming elementary and middle school teachers to satisfy the Introductory Science Authorization course work requirements of the California Commission on Teacher Credentialing.

### Requirements of the Minor 32-36

*Must take both BIOL 20 and 21 to meet requirement*
MA - Science Education

The MA in Science Education is a flexible program designed for K-12 teachers involved or interested in science education, and for science educators and specialists working in informal or outdoor education. The curriculum is designed to augment and broaden the candidate’s background in science content as well as increase academic proficiency and professional competence in science education pedagogy.

Beginning Fall 2011, qualified students who have earned a multiple- or single-subject credential at San Jose State University may apply up to 9 units of approved credential coursework from the College of Education and 3 units of approved credential coursework from the College of Science to the MA Science Education degree.

Requirements for Admission to Classified Standing

Minimum requirements for admission to the Graduate Division are outlined in this catalog. In addition, classified standing requires:

An undergraduate major with a grade point average of 2.75;

Demonstrated subject-matter competency in science, either through a baccalaureate degree in science, or by passing the Science Subtests I and II (test codes 118 and 119) of the California Subject Examinations for Teachers (CSET); and one Specialized Science CSET in either biology (120 or 124), chemistry (121 or 125), geoscience (122 or 126) or physics (123 or 127).

Evidence of appropriate goal(s) and commitment to graduate-level study as demonstrated by a letter of intent written by the applicant and letters of recommendation from two or more persons qualified to judge the applicant’s potential as a graduate student;

Approval of the graduate advisor and/or graduate committee.

Requirements for Admission to Conditionally Classified Standing

A student who meets all requirements for admission to classified standing except for some undergraduate prerequisites may be admitted to conditionally classified standing. Classified standing may be achieved by demonstration of subject matter competency, as evidenced by an undergraduate degree in a science discipline or through successful completion of the Science Subtests I and II (test codes 118 and 119) of the California Subject Examinations for Teachers (CSET) and one Specialized Science CSET in either biology (120 or 124), chemistry (121 or 125), geoscience (122 or 126) or physics (123 or 127). Lower division and/or general education coursework used to achieve subject matter competency may not be used for credit toward the Master’s degree.

Requirements for Admission to Candidacy for the MA - Science Education

The student must satisfy general university requirements for candidacy as outlined in detail in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [www.sjsu.edu/gape](http://www.sjsu.edu/gape).

Plan A (with Thesis)

This option requires a thesis in science education approved by a Master’s committee of no fewer than three members. The thesis is credited under SCI 299 units. At the end of the program, the candidate must successfully deliver an oral seminar and defense of the thesis also known as a culminating experience. The written thesis must be submitted to the Master’s advisor and Master’s committee, and it may be submitted to the Associate Dean for Graduate Studies.

Plan B (with Project)

This option requires a project related to science education approved by a Master’s committee of no fewer than three members. The project is credited under SCI 298 units. At the end of the program, the candidate must successfully deliver an oral seminar and defense of the project, also known as a culminating experience. The written report of the project must be submitted to the Master’s advisor and Master’s committee.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Curricula
⦁ BA, Social Work
⦁ Minor, Social Work
⦁ MSW, Master of Social Work (also online via Special Session)

Introduction
Social work is a dynamic and challenging profession that presents exceptional opportunities for personal job satisfaction. A professional social worker helps people cope with interpersonal and social problems and obtain the resources they need to live with dignity. Additionally, social workers help communities mobilize and deliver the services and support their citizens require. The School of Social Work is committed to the core values of service, social justice, the dignity and worth of individuals, human rights, competence, integrity and scientific inquiry. We honor diversity. Employing a transcultural perspective, we train our students to practice professionally in a broad range of groups, including Latinos, Asian and Pacific Islanders, African Americans, the disenfranchised and the marginalized. We offer undergraduate and graduate degrees. Accredited by the Council of Social Work Education, our MSW program may be completed in two or three years.
BA - Social Work

The BASW program, which has been fully accredited by the Council on Social Work Education since 1976, educates generalist social work practitioners with a liberal arts foundation for practice from a transcultural perspective with individuals, families, and groups within organizations and in the context of broader communities in which they are embedded. To develop the necessary professional generalist skills in their work with individuals, families, groups, and communities, the BASW program curriculum and field practicum experiences provide students with learning opportunities to develop: 1) a selected body of knowledge about social institutions, and methods of problem-solving in social relationships; 2) the skills for integrating knowledge, thought, and feeling into an effective and efficient program of doing; and, 3) a personal and professional value system which incorporates a growing self-awareness necessary for the sensitive and disciplined use of self in helping roles.

In addition to the core social work curriculum, which includes human behavior in the social environment, social policy and programs, practice, social research, and field education, electives are offered to expand a student’s interest in the areas of social work with families; social services to children and youth; alcoholism and substance abuse and the family.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

Major-Specific Graduation Requirements

The following courses Required in the Major must be completed with a grade of “C or better”**: SCWK 110, SCWK 120, and SCWK 130.

University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>

# Minor - Social Work

The minor in Social Work consists of 18 units and is designed to enrich the student's major area of study by providing an understanding of the values and structures of current human service programs within a historical and developmental framework. Admission into the minor program is based on the availability of space.

Credentials for Master of Social Work Program

A Credential in Spanish Language Counseling is available to students who, through course work or examination, show evidence of competency to conduct counseling/therapy in Spanish.

Post Master’s School Social Work Credential, prepares individuals with an MSW to qualify to be credentialed by the State of California as school social workers.

The Pupil Personnel Services Credential (PPSC) may be obtained by MSW graduates who pass the CBEST and who meet the PPSC program requirements. The PPSC is obtained in School Social Work and Child Welfare and Attendance. Students must accept placement in an approved PPSC program school setting for their second year practicum.
MSW - Master of Social Work

The MSW Program offers graduate professional education in advanced social work practice from a transcultural multi-systems perspective, with a particular focus in a field of practice. The curriculum has been developed to emphasize application of skills in those areas of practice where the need for social workers in the next decade will be the greatest in the state of California. The program prepares graduates for advanced practice and leadership in the following fields of practice: aging, children, youth, and families; and health/mental health. The graduate program has been fully accredited by the national Commission on Accreditation of the Council on Social Work Education since 1973.

Requirements for Admission to Classified Standing

In addition to the general requirements established by the university as set forth in the Admissions section of this catalog, applicants for admission to classified standing for the Master of Social Work degree must have demonstrated a commitment to social work goals either by having completed undergraduate social work education, or hold a BA in a related field and have significant experience and/or personal involvement with minority groups and communities on social issues.

To be admitted to the program a student must:

1. Complete a separate application for admission to the University, submit required transcripts and pay the required application fees (University and MSW program fees).
2. Complete a separate application to the MSW program which includes:
   a. An autobiographical statement describing the development of the candidate’s interest in the field and professional goals.
   b. Three letters of recommendation from professionals in the field or former professors who can testify to the candidate’s ability to meet the challenges of the profession.
3. Foreign students must score at least 550 on the TOEFL and must demonstrate English proficiency in a written essay.
4. The application to the MSW program with the supporting material must be sent directly to the Director of Admissions of the MSW program for review and recommendation by the MSW program admissions committee.

Requirements for Admission to Conditionally Classified Standing

Students who do not meet the minimum GPA requirement of 2.5 may apply for conditionally classified status. The MSW Admission Committee may consider applicants who possess strong or considerable work experience and who can remedy minor academic deficiencies by additional preparation.

Requirements for Admission to Candidacy

To be admitted to candidacy for the Master of Social Work degree, students must meet the general requirements of the university as set forth in the Academic Regulations section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at http://www.sjsu.edu/gape.

The applicant must demonstrate aptitude for advanced study in social work, as measured by successful completion of the first year of study, instructor appraisals, evaluation of previous academic work, recommendations by qualified professionals, or other assessments.

The applicant must meet with the MSW graduate advisor to complete an application for candidacy. The application includes an official program of study listing all courses needed to complete the requirements for the degree. The program of study must be approved by the MSW graduate advisor and then by the Associate Dean for Graduate Studies, who notifies the student of acceptance into candidacy.

Completing Requirements for the Master of Social Work Degree

The MSW program offers both a full-time and a 3-year plan of study. Full-time study requires a two-year commitment to the program, while the 3-year plan may be completed in a three year structured plan of study. With either plan, the course requirements for completing the degree are identical.

The student must complete a total of not less than 60 semester units of study in social work with a minimum grade point average of 3.0 overall. This includes two years (1200 hours) of field internship in a social agency or community setting selected and approved by the MSW field education committee.

Candidates for the degree have the option of either completing a thesis (Plan A) or a project (Plan B) and to defend their study before a thesis/project committee as part of their 60 semester unit degree requirement. Students choosing to complete a thesis must meet program prerequisites and receive approval of the research committee. The topic must relate to the candidate’s area of practice and to the mission of the MSW program. The thesis must meet all university requirements in content and format. The special project must be a professionally written study based on the student’s field placement.

As deemed appropriate by the faculty of the social work program, satisfactory performance in final examinations in the core areas of social work practice may be required. These examinations may be written, oral or both.

Students are required to complete their Graduation Writing Assessment Requirement (GWAR) to be advanced to candidacy for the master’s degree by meeting the University GWAR and MSW requirements.
The Curriculum (60 Semester Units Total)

The First Year Curriculum (32 Semester Units)
In the first year students develop a solid foundation in generalist social work practice with the goal of effective performance under the guidance and supervision of a professional social worker. The primary skills and competencies that are taught consist of the ability to assess, plan, implement and evaluate practice with systems of varying size from a transcultural perspective.

The Second Year Curriculum (28 Semester Units)
The second year of the MSW program sequentially builds upon foundation content attained in the first year to prepare students for advanced practice from a transcultural and multi-systems perspective. As students progress through the program they are expected to increase their levels of independence, initiative and leadership, utilizing greater discretion and judgment for self-direction and professionally autonomous practice, with systems of varying size.

In addition, content is included on the fields of practice which are particularly connected to the mission of the program and the practice needs of the region: aging; children, youth, and families; and health/mental health, particularly those who are Latino, African American, Asian American and Native American, and are communities, groups, families and individuals who are disenfranchised, oppressed and/or marginalized.

Special Session Program Information
Academic Programs offered through Special Session are operated by the College of International and Extended Studies (IES). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

- SCWK 280. Policy Practice in Health/Mental Health .............................................................................................................. 3

### Total Units Required

Once the field of practice is selected, students must continue with the required courses in that respective curriculum plan.

**60**

---

#### The 3-year Program

The MSW Program offers a 3-year program designed for working professionals and includes course work in the evenings and on weekends. The 3-year program requires three years of academic work combined with two years of field practicum. Depending on the courses offered during the summer term, this time period for 3-year students may be accelerated.

3-year students complete the first year curriculum requirements in two years. In the second year, 3-year students enter the field practicum and concurrently enrolled in social work practice courses. Field instruction in the 3-year MSW Program meets the same administrative and educational requirements as the full-time program.

#### Year Round Operations

To assist “matriculated students” in progressing more rapidly toward earning their MSW degree, and to increase accessibility year around to the course curriculum for both full-time and 3-year students, the MSW Program offers a limited number of “regular” graduate level courses during the summer term. The range of classes (number and type) offered by MSW Program will depend on student interest and faculty resources.

⦁ BA, Social Science, Preparation for Teaching (Multiple Subject)
⦁ Minor, Asian American Studies
⦁ Minor, Sociology
⦁ Minor, Sociology of Education
⦁ Minor, Women, Gender and Sexuality Studies
⦁ MA, Sociology
Introduction
The Department of Sociology and Interdisciplinary Social Sciences educates students about the social processes that create, maintain, and transform our society. The major uses sociological foundations and applications as well as interdisciplinary approaches to the study of society and in teacher education training. Sociologists analyze how social institutions and social structures such as the economy, politics, education, the family, mass media, and the criminal justice system affect individuals in society. The major provides students with the skills and knowledge to navigate the social, political, economic, historical and cultural issues that build and sustain effective leadership in our complex global society. The teacher preparation program is designed to ensure that teachers will excel in classrooms that are increasingly heterogeneous in terms of race and ethnicity.

We have two major degree program tracks: Sociology, Sociology with Concentrations (Community Change; Race and Ethnic Studies; Social Interaction; Women, Gender and Sexuality Studies); Social Science Teacher Preparation (Multiple and Single Subject). The department offers several minor courses of study: Asian American Studies, Sociology, Sociology of Education and Women, Gender and Sexuality Studies. These degree programs lead to careers in education, government and public policy, criminal justice, nonprofit organizations, marketing research, human resource management, social work, and other areas.
### BA - Sociology

The BA in sociology educates students about social processes that create, maintain, and transform social institutions and social identities. Sociology provides a framework for understanding social behavior in groups, social change and inequality in society, and solutions to social problems. Analytical and research skills speak to the needs of a changing world. The degree offers students the widest flexibility in terms of future career choices.

#### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

#### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

## BA - Sociology, Concentration in Social Interaction

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements section](#) of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). These roadmaps are an advising tool that outlines a path of courses a student can take to complete requirements for graduation. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example course grade minimums).

### University Graduation Requirements

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Core Lower Division General Education</strong></td>
<td>27</td>
</tr>
<tr>
<td>Of the 39 units required by the university, 12 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

**NOTE:** STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Upper Division General Education</strong></td>
<td>6</td>
</tr>
<tr>
<td>Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

### American Institutions

Coursework shown below for the 6 units required by the university are double counted within GE. Other courses do meet the American Institutions requirement, but may not include additional GE areas. Consult with major advisor for details.

**COMPLETE ONE SEQUENCE FROM:**

#### African American Studies

<table>
<thead>
<tr>
<th>Course</th>
<th>GE Area</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>AFAM 002A. African-Americans and the Development of America's History and Government</td>
<td>D2</td>
<td>3</td>
</tr>
<tr>
<td>AFAM 002B. African-Americans and the Development of America's History and Government</td>
<td>M7</td>
<td>3</td>
</tr>
</tbody>
</table>

#### Asian American Studies

<table>
<thead>
<tr>
<th>Course</th>
<th>GE Area</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>AAS 033A. Asian Americans in U.S. History I</td>
<td>D2</td>
<td>3</td>
</tr>
<tr>
<td>AAS 033B. Asian Americans in U.S. History II</td>
<td>M7</td>
<td>3</td>
</tr>
</tbody>
</table>

#### U.S. History and Government

<table>
<thead>
<tr>
<th>Course</th>
<th>GE Area</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 015A. Essentials of U.S. History</td>
<td>M12</td>
<td>3</td>
</tr>
</tbody>
</table>

*Can be taken as POLS 015 A/B as well.*

#### Mexican American Studies

<table>
<thead>
<tr>
<th>Course</th>
<th>GE Area</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAS 010A. Mexican Americans and the Development of U.S. History and Government</td>
