Analysis and design of MOS based combinational sequential digital integrated circuits. Industry standard CAD tools (Cadence) will be used extensively in homework and a group final project.
Prerequisite: EE 128. Allowed Declared Major: Electrical Engineering.
Normal Grade Rules
3 units

**EE 168. Microfluid Fabrication and Design**
See ME 168.
Normal Grade Rules
1 unit

**EE 169. Microelectromechanical Systems Fabrication and Design**
See ME 169.
Normal Grade Rules
1 unit

**EE 172. Introduction to Microwave Engineering**
Topics in Microwave Engineering: Standard RF measurements, waveguide resonator and antenna. Transmission line theory, impedance matching, and design approach of selected microwave components. Emphasis will be on the fundamental principles and industrial practice of the designs. Commercial CAD tools.
Prerequisites: EE 98, Phys 52, Math 333A or Math 232 (all with a C or better).
Corequisite: EE 140.
Normal Grade Rules
3 units

**EE 174. Analog Peripheral for Embedded Systems**
Introduction to analog peripherals for embedded systems such as ADC/DAC, DC-DC Converters, Energy harvesting and solar cells, near field communication, RFID, phase lock loops, clock generators, displays and touch screens. Industry based projects and applications are integral to the course.
Prerequisite: EE110 and EE112 with C grade or better. Allowed Declared Major: Electrical Engineering.
Normal Grade Rules
3 units

**EE 176. Computer Organization**
Design of instruction sets, addressing modes and memory management. Data and control paths of the CPU. Microprogramming. Arithmetic units and I/O organization.
Prerequisite: EE 120.
Normal Grade Rules
3 units

**EE 178. Digital Design with FPGAs**
Advanced Digital Design Technologies as they relate to synchronous digital systems. Requires student design projects that deal with the use of CAD tools for the Design, Simulation, and Implementation of Systems with FPGAs.
Prerequisite: EE 118.
Normal Grade Rules
3 units

**EE 180. Individual Studies**
Individual work on special topics arranged by the student and faculty mentor. Enrollment is handled by the EE department office. A completed and approved application is required.
Prerequisite: BS in Electrical Engineering Senior in good standing. Allowed Declared Major: Electrical Engineering. Not available to Open University Students.
Repeatable for credit.
Credit / No Credit
1-3 units

**EE 181. Fundamentals of Internetworking**
Data communication concepts, protocols, algorithms; 7-layer OSI reference model and implementations; physical media (fiber, wire); switching systems; LAN architectures and components, Ethernet, FDDI, TCP/IP, and related standards.
Prerequisite: EE 118.
Normal Grade Rules
3 units

**EE 189. Special Topics in Electrical Engineering**
Advanced topics in Electrical Engineering. Content varies from semester to semester.
Prerequisite: Instructor consent/senior standing.
Repeatable for credit.
Normal Grade Rules
3 units

**EE 197. Cooperative Education Project**
See ENGR 197.
Normal Grade Rules
3 units

**EE 198A. Senior Design Project I**
Team design project proposal, business plan, oral design presentations of the initial phases of the design project, a written and oral defense of the proposed design project. Global and social issues in engineering. Individual written reports on professional development plans. CE Area: S when taken as part of EE major sequence.
Prerequisite: EE Senior in good standing in Major, ENGR 100W (with grade of “C” or better), EE120, EE122, and EE128 (with grades of “C-” or better).
Corequisite: ENGR 195A
Misc/Lab: Lab 3 hours
Note: Meets CE Areas S and V when course is taken in combination with: EE 198B, ENGR 195A and ENGR 195B
Normal Grade Rules
CE: S
1 unit

**EE 198B. Senior Design Project II**
Implementation of group design projects initiated in EE 198A. Group oral and written reports. Integrate global and social issues in engineering, CE Area: V when taken as part of the EE Major sequence
Prerequisite: EE 198A (with grade of “C” or better), Senior EE student in good standing.
Corequisite: ENGR 195B
Misc/Lab: Lab 9 hours.
Note: Meets CE Areas S and V when course is taken in combination with: EE 198A, ENGR 195A and ENGR 195B
Normal Grade Rules
CE: V
3 units

**EE 209. Network Security**
See CMPE 209.
Normal Grade Rules
3 units

**EE 210. Linear System Theory**
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
EE 220. Radio Frequency Integrated Circuit Design I (RFIC Design I)
Study of transmitter and receiver architectures and their building blocks for modern wireless communication standards, high frequency modeling of passive and active circuit components realized in CMOS and BICMOS technologies, networks theory, wideband matching, nonlinearity and noise link budgets.
Prerequisite: EE 124 or instructor consent.
Normal Grade Rules 3 units

EE 221. Semiconductor Devices I
Study of semiconductors in equilibrium and nonequilibrium conditions; principles of semiconductor device fabrication, p-n junctions, and junction transistors; device modeling for circuit analysis.
Prerequisite: Graduate standing.
Normal Grade Rules 3 units

EE 222. Semiconductor Devices II
Continuation of EE 221. MOS devices; short channel effects; device scaling; NMOS, CMOS and BICMOS technologies; device modeling and simulation, memory cell design. Optoelectronic and microwave devices.
Normal Grade Rules 3 units

EE 223. Analog Integrated Circuits
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules 3 units

EE 224. High Speed CMOS Circuits
Analysis and design of digital integrated circuits; bipolar and MOS inverters and logic gates; semiconductor memories; gate arrays; standard cells; programmable logic array; computer-aided design; SPICE program is used extensively.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules 3 units

EE 224B. Advanced High Speed CMOS Circuits
EE224B covers advanced high speed CMOS design circuit design and challenges. The course will focus on design of advanced circuits such as arithmetic circuits, memory. Overall concepts will be tied together by a design project. Team work will be stressed.
Prerequisite: EE 224
Normal Grade Rules 3 units

EE 225. Introduction to Quantum Computing
Hardware implementation and algorithms for quantum computing. Essential quantum mechanics including Bra-Ket notation, spins, Hilbert Space, Simple Harmonic Oscillator, Bloch Sphere, Tensor Product, Density Operator. Implementation of Qubits including electron spins in quantum dots and Josephson junction. Qubits such as topological insulator, trapped ion and defect centers. Quantum gates, logics, circuits, and representative quantum computing algorithms (Deutsch’s, Grove’s and Shor’s) Error correction. Quantum computing simulation and experiment through IBM Q Experience.
Prerequisite: EE 221 or instructor consent
Normal Grade Rules 3 units

EE 227. Signal Integrity in AMS IC
This course studies essential blocks for wire-line communication integrated circuits such as analog equalizer circuits, Decision-Feedback Equalization (DFE), Phase Locked Loop (PLL) and Clock and Data Recovery (CDR) circuits. True understanding of system level modeling and behavioral of the PLL will be discussed. Matlab/Simulink Modeling techniques will be introduced as new vehicle for system level design and simulation. Performance metrics, such as random jitter, BER, jitter transfer, jitter tolerance, phase noise, will be introduced. Integrated circuit design consideration for the key essential blocks for PLL and equalizer block will be covered.
Prerequisite: EE 221.
Normal Grade Rules 3 units

EE 230. Radio Frequency Integrated Circuit Design II
Low noise amplifiers, mixers, power amplifiers, LC voltage controlled oscillators, phase shifters, patch antennas and advanced layout to improve noise, stability, efficiency and bandwidth performance of nanoscale CMOS integrated circuits.
Prerequisite: EE 220 or instructor consent.
Normal Grade Rules 3 units

EE 231. Automatic Control Theory
Fundamentals of state space techniques in the analysis and synthesis of dynamic control systems; relationship to classical control theory via the Laplace transform; controllability, observability, performance indices discrete systems; introduction to optimal control and Kalman filtering.
Prerequisite: EE 132.
Normal Grade Rules 3 units

EE 232. Digital Signal Processing
Prerequisite: EE 231
Normal Grade Rules 3 units

EE 233. Advanced Control Systems Design
Prerequisite: EE 231
Normal Grade Rules 3 units

EE 234. Analysis and Design of Analog Integrated Circuits
Prerequisite: EE 231
Normal Grade Rules 3 units

EE 235. Power Electronics and MG Systems
Prerequisite: EE 231
Normal Grade Rules 3 units

EE 236. Microcontrollers and Embedded Systems
Prerequisite: EE 231
Normal Grade Rules 3 units

EE 237. Vector Control of AC Machines
This course introduces modeling and control of electrical drive for AC motors and generators including induction, permanent magnet, and synchronous machines. The dynamic model, control methods, current regulation, and space vector modulation are discussed by both analysis and computer simulation.
Prerequisites: EE 210
Normal Grade Rules 3 units

EE 238. Advanced Power Electronics
Adv. study of switching regulators in power management, including energy conversion topologies, state space averaging techniques, assessing voltage mode/current mode control to embedded hardware. Applications include photo-voltaic /solar grid-tied inverters, active power factor correction, analysis, computer simulation.
Prerequisite: Graduate Standing
Normal Grade Rules 3 units

EE 239. Selected Topics in Systems and Control
Critical analysis of current literature pertinent to control systems.
Prerequisite: EE 231 and instructor consent.
Normal Grade Rules 3 units

EE 241. Fundamental of Signal Integrity
EE 241 aims to introduce the essential knowledge on signal integrity. The course covers transmission line theory, channel loss, coupling, signal lunch and termination, timing issues on clock distribution and EDA tools usage for modeling and analysis of signal integrity in a system.
Normal Grade Rules 3 units

EE 242. Embedded Hardware Design
See CMPE 242.
Normal Grade Rules 3 units

EE 249. Integrated Circuits for Biomedical Application
EE 249 aims to introduce the essential knowledge and techniques for designing integrated circuits for biomedical applications. An introduction to the deep-submicron effects and noise in transistors, the principles for designing low-power, low-noise electronics and RF/inductive coupling links will be discussed.
Prerequisite: EE 223
Normal Grade Rules 3 units

EE 250. Probabilities, Random Variables and Stochastic Processes
Random variables, random processes, power spectral density, optimum linear systems, queuing theory.
Prerequisite: Graduate standing.
Normal Grade Rules 3 units
EE 251. Digital Communication Systems
Prerequisite: EE 250.
Normal Grade Rules
3 units

EE 252. Advanced Communication Systems
Digital modulation techniques for power and bandwidth limited communication systems. Offset QPSK, CMSK, noncoherent modulation and detection. Multipath fading channels, diversity and combining methods.
Prerequisite: EE 250
Normal Grade Rules
3 units

EE 253. Digital Signal Processing
Prerequisite: Graduate standing or instructor consent
Normal Grade Rules
3 units

EE 254. Adaptive Signal Processing
Prerequisite: EE 250 and EE 253
Normal Grade Rules
3 units

EE 255. Wireless/Mobile Communications
Cellular mobile radio systems, propagation models, multipath propagation effects, diversity and combining noise, and interference are discussed. Analog and digital modulation techniques and their performance measures multiple access techniques such as FDMA, TDMA and CDMA are discussed.
Prerequisite: Instructor Consent
Normal Grade Rules
3 units

EE 256. Programmable DSP Architectures and Applications
Implementations of DSP algorithms using programmable DSP architectures. Internal architectural requirements for a DSP device, system level hardware/software design and applications of programmable DSP architectures.
Prerequisite: EE 210
Normal Grade Rules
3 units

EE 257. Machine Learning for Electrical Engineers
Introduction to machine learning for electrical engineers. Course covers statistical models for data analysis, inference, and prediction. Case studies and projects related to applications in Electrical Engineering.
Normal Grade Rules
3 units

EE 258. Neural Networks
Prerequisite: Graduate standing or instructor consent.
Allowed Declared Major: Electrical Engineering
Normal Grade Rules
3 units

EE 259. Selected Topics in Signal Processing
Advanced topics in signal processing. Content varies from semester to semester.
Prerequisite: Instructor consent
Normal Grade Rules
3 units

EE 260. RFID Systems
This course gives an introduction to RFID systems. Emphasis is on RFID technology applications in biomedical devices, object tracking and identification. Complemented with practical laboratory experiments.
A final project (written report and oral presentation) covers RFID applications in a topic of interest to the student.
Prerequisite: EE 251 or instructor consent.
Normal Grade Rules
3 units

EE 261. Acquisition & Analysis of Biomedical Imaging
Study of the image acquisition physics and analysis concepts of biomedical imaging systems like X-Ray, MRI, Ultrasound etc. currently used for patient care in diagnosing various disease conditions.
Prerequisites: EE 210 or equivalent.
Normal Grade Rules
3 units

EE 262. Digital Image Processing
Fundamental principles and algorithms for digital image processing. Topics include image formation, modeling, transforms, enhancement, compression, segmentation, representation, feature extraction, and object recognition. Introduction to imaging system hardware components and architectures.
Prerequisite: EE 210.
Normal Grade Rules
3 units

EE 263. Logic Verification with UVM
EE273 covers non-design System Verilog and Universal Verification Methodology (UVM). It introduces logic verification methodologies and techniques. No prior object oriented programming is assumed. UVM is practiced on sample designs in lab projects with industrial simulation tools.
Normal Grade Rules
3 units

EE 265. Software-Defined Radio Communications
Experimental approach to designing and building wireless communications. Topics include analog/digital transmission, ADC/DAC, and wireless channel modeling. Students are exposed to MATLAB, software defined radios (USRP boards), GNU Radio, GRC (GNU Radio Companion) in homework assignments and projects.
Prerequisite: EE 210 or instructor consent.
Normal Grade Rules
3 units

EE 270. Advanced Logic Design
Logic design theory, advanced logic minimization, design and analysis of sequential circuits, asynchronous circuit design, logic circuit testing and design for testability. Review Verilog/VHDL CAD tools are used for design, modeling and simulation.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

EE 271. Digital System Design and Synthesis
In depth study of concepts and practices in modern digital system design, such as high-speed arithmetic, cache memory design, advanced pipelining and processor design. Verilog or VHDL is used for simulation and synthesis.
Prerequisite: EE 270.
Normal Grade Rules
3 units

EE 272. SoC Design & Verifi. with System Verilog
The course covers topics in System-on-Chip design and verification with SystemVerilog. Major topics include top-down SoC design; design metrics, techniques, and system-level synthesis; IP integration and system-level verification; SystemVerilog design hierarchy, data types, assertions, interfaces, verification constructs, and testbench structures.
Prerequisite: EE 271 or instructor consent.
Normal Grade Rules
3 units
**EE 275. Advanced Computer Architectures**
Performance metrics, instruction set architectures, instruction pipelining and pipeline hazards, instruction-level parallelism, multithreading, cache and virtual memory, I/O performance and advanced topics in storage systems, topologies and hardware/software issues of interconnection networks.
Prerequisite: EE 270 or EE271.
Normal Grade Rules
3 units

**EE 276. Parallel Computer Systems**
Advanced concepts in parallel computer architectures and algorithms. Cache memory for multiprocessor systems, multistage networks, pipelined vector processors, massive parallel processors, systolic arrays and array processors, parallel processing algorithms and time complexity analyses. Design project.
Prerequisite: EE 270.
Normal Grade Rules
3 units

**EE 276B. Multi-core Architectures**
Topics cover various areas of parallel computation including performance metrics, shared memory computer, snoopy-based multiprocessor design, directory-based cache coherence, multiple level cache, multi-core architecture symmetric and asymmetric. The commercial multi-core architectures and multi-core programming will also be addressed in this course. There will be a term project be developed and presented by students on selected topics.
Prerequisites: EE275 or Lecturer Consent.
Normal Grade Rules
3 units

**EE 277A. Embedded SoC Design**
Embedded system design challenge and metrics. Processor and compiler technologies. Software and hardware architectures for embedded system design. The design of co-processors, parallel processors, graphics processors and MPSoC processors. Basic concept of high performance computing (HPC)
Prerequisite: EE 210
Normal Grade Rules
3 units

**EE 278. Digital Design for AI and DSP**
Digital design and FPGA/ASIC/VLSI-based implementation of high-performance DSP/Al/Machine Learning systems. FPGA and CPU architectures, various deep neural network design examples of video/imaging and speech and AI/machine learning include applications to object recognition for autonomous vehicles and speech recognition.
Prerequisite: EE 270 or EE 271
Normal Grade Rules
3 units

**EE 279. Special Topics in Digital Systems**
Advanced topics in digital systems. Content varies from semester to semester.
Prerequisite: Instructor consent
Repeatable for credit
Normal Grade Rules
3 units

**EE 281. Internetworking**
Prerequisite: EE 250 or equivalent. Allowed Declared Major: Electrical Engineering.
Normal Grade Rules
3 units

**EE 283. Broadband Communication Networking**
Broadband Networks Overview, Tunneling, VPs, and Multi-Protocol Label Switching (MPLS). All-Optical Networks, Architecture of High-Speed Switches and Routers, Data Center Networks, Network Virtualization, Software-Defined Networking (SDN), Packet Delay and Network Queueing Models, and Quality of Service.
Prerequisite: EE 281 or equivalent
Normal Grade Rules
3 units

**EE 284. VolP and Multimedia Networks**
Prerequisite: EE 281 or equivalent
Normal Grade Rules
3 units

**EE 286. Mobile and Wireless Networking**
This course covers recent and upcoming networking topics on mobile and wireless scenarios and applications. The course focuses on mobile and wireless network standards including cellular (LTE), Wi-Fi, Bluetooth, and routing algorithms including DSDV, DSR, TORA, and AODV.
Prerequisite: EE 250
Normal Grade Rules
3 units

**EE 287. ASIC CMOS Design**
CMOS ASIC design principles. Topics include ASIC architectures, cell libraries, synthesis issues, latches, clocking, multiple clock synchronizers, delay calculation, timing closure, I/O specification, and testing.
Prerequisite: EE 271 or Instructor consent
Normal Grade Rules
3 units

**EE 288. Data Conversions/Analog Mixed Signal ICs**
Study of different architectures for analog to digital converters and digital to analog converters. System level modeling & simulation. Design considerations and techniques for circuit implementation. Data conversion testing methods.
Prerequisites: EE 221
Normal Grade Rules
3 units

**EE 289. Special Topics in Networking**
Advanced topics in networking that are currently of high interest to both industry and academia. Content varies from semester to semester, and may include, but not limited to, network security, virtual private network, network availability and reliability, network management. Repeatable for credit
Normal Grade Rules
3 units

**EE 295. Technical Writing - Engineering Ethics**
Students learn to analyze and write about issues in engineering ethics. Three types of ethics are explored: ethics of the person, the process, and the product.
Prerequisite: Graduate standing.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE: GWAR
3 units

**EE 296A. ES-level and Physical-level Design**
Electronic System Level (ESL) Description of Systems using SystemC/OpenCL, High Level Synthesis from ESL Languages, Physical design and verification, Floorplanning, Placement, Routing, Power Analysis, Signal Integrity, ESL simulations and automatic physical design tasks.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

**EE 297A. MSEE Project Proposal**
Written project proposal development for MSEE research/design project, subsequently culminating in EE 297B or EE 299B. An approved application for EE 297A registration including project title and abstract and graduate seminar participation required.
Prerequisites: Classified Standing, GPA of at least 3. 3 or GPA of at least 3. 0 and graduate coordinator consent, satisfied GWAR requirement or EE295 may be taken concurrently. Misc/Lab: 9 hours lab
Credit / No Credit
3 units

**EE 297A. MSEE Project Proposal**
Written project proposal development for MSEE research/design project, subsequently culminating in EE 297B or EE 299B. An approved application for EE 297A registration including project title and abstract and graduate seminar participation required.
Prerequisites: Classified Standing, GPA of at least 3. 3 or GPA of at least 3. 0 and graduate coordinator consent, satisfied GWAR requirement or EE295 may be taken concurrently. Misc/Lab: 9 hours lab
Credit / No Credit
3 units
**Academic Year 2019-2020**

**Course Descriptions**

v1
July 1, 2019

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE

---

**EE 297B. MSEE Project**
Implementation of the research/design project, culminating the MSEE work proposed in EE 297A or EE 299A. Formal Master’s project report and its formal defense required.
Prerequisites: EE 297A or EE 299A with grade of RP or CR and satisfied GWAR requirement
Normal Grade Rules
3 units

**EE 298. Special Problems**
Advanced individual work in electrical engineering.
Prerequisite: Graduate standing. Not available to Open University Students
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

**EE 298I. Electrical Engineering Internship Experience**
For this course a student is employed in industry as an electrical engineering intern or in an equivalent position. The course supplements and supports student’s plan of study.
Prerequisite: Graduate standing.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

**EE 299A. MSEE Thesis Proposal**
Written Thesis proposal development for research/design, subsequently culminating the MSEE work in EE 299B or EE 297B. An approved application for EE 299A registration, including project title and abstract and graduate seminar participation required.
Prerequisites: Classified, GPA of at least 3.3 or above (GPA GPA of at least 3.0 and graduate coordinator consent) consent, satisfied GWAR requirement or EE295 may be taken concurrently.
Credit / No Credit
3 units

**EE 299B. MSEE Thesis**
Implementation of the research/design, culminating the MSEE work proposed in EE 299A or EE 297A. Formal Master’s Thesis report and its formal defense required.
Prerequisites: EE 297A or EE 299A with grade of CR and satisfied GWAR requirement
Mandatory CR/NC/RP
3 units

---

**UPPER DIVISION**

**EE 1290R. Culminating Experience Supervision**
Continued work on thesis or project beyond minimum required units, for cases in which final deliverables are still in progress.
Prerequisite: RP grade in a preceding thesis or project semester
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit
English and Comparative Literature Courses

COMPARATIVE LITERATURE

UPPER DIVISION

COLT 121. Introduction to Comparative Literature
Critical approaches, reference sources, problems of translation.
Prerequisite: One year of college level foreign language or instructor consent.
Normal Grade Rules
4 units

COLT 122. Topics in Comparative World Literature
An exemplary theme as treated in various literatures in different languages, e.g., war, love, freedom, religious experience. May be repeated when course content changes.
Prerequisite: One year of college level foreign language or instructor consent.
Normal Grade Rules
4 units

COLT 124. Literature and Religious Experience
See RELS 124
Repeatable for credit
Normal Grade Rules
3 units

ENGLISH

LOWER DIVISION

ENGL 001A. First-Year Writing: Stretch English I
Stretch I is the first semester of a year-long ENGL 1A that prepares students to join scholarly conversations across the university. Students develop reading skills, rhetorical sophistication, and writing styles that give form and coherence to complex ideas for various audiences, using various genres.
Prerequisite: Completion of Reflection on College Writing.
Credit / No Credit
3 units

ENGL 001A.F. First-Year Writing: Stretch English I
Stretch I is the first semester of a year-long ENGL 1A that prepares students to join scholarly conversations across the university. Students develop reading skills, rhetorical sophistication, and writing styles that give form and coherence to complex ideas for various audiences, using various genres.
Prerequisite: Completion of Reflection on College Writing.
Credit / No Credit
3 units

ENGL 001AS. First-Year Writing: Stretch English I
Stretch I is the first semester of a year-long ENGL 1A that prepares students to join scholarly conversations across the university. Students develop reading skills, rhetorical sophistication, and writing styles that give form and coherence to complex ideas for various audiences, using various genres.
Prerequisite: ENGL 1AF Stretch English I (formerly HA 96F (FYC Stretch I))
Normal Grade Rules
GE: A2
3 units

ENGL 001B. Argument and Analysis
English 1B is a writing course that focuses on argumentation and analysis. Through the study of literary, rhetorical, and professional texts, students will develop the habits of mind required to write argumentative and critical essays. Particular emphasis is placed on writing and reading processes. Students will have repeated practice in prewriting, drafting, revising, and editing, and repeated practice in reading closely in a variety of forms, styles, structures, and modes.
GE Area: C2
Normal Grade Rules
GE: A2
3 units

ENGL 020. The Graphic Novel
Approaching the graphic novel as a form of popular literature, students examine the narrative and textual aspects of the form including the function of the text, its integration with the graphics, and formal aspects of narrative such as plot, character, theme, and symbol.
GE Area: C2
Normal Grade Rules
GE: C2
3 units

ENGL 021. Mystery and Detective Fiction
Examines mystery or detective fiction from its inception in the 19th century and follow it across the globe as the genre has been taken on and developed by a variety of cultures.
GE Area: C2
Normal Grade Rules
GE: C2
3 units

ENGL 022. Fantasy and Science Fiction
Students will examine works of literary fantasy and science fiction to understand them as expressions of human intellect and imagination; to comprehend their historical and cultural contexts; and to recognize their diverse cultural traditions. Both contemporary and historical works will be studied.
GE Area: C2
Normal Grade Rules
GE: C2
3 units

ENGL 040. Contemporary World Fiction
A study of selected works of fiction in English and in English translation written since 1975. The course both focuses on international texts that address significant themes of our time and explores ways of reading and understanding literature.
GE Area: C2
Normal Grade Rules
GE: C2
3 units
ENGL 050. Beginnings to the “American” Experiment
3 units
Exploration of Anglo-Saxon, Medieval, Renaissance, and Early Colonial Writings in Britain and America. Class engages literary text, literary history, and historical events that shape the literature of the period.
Prerequisite: ENGL 1A
Normal Grade Rules

ENGL 060. The Emergence of “British” and “American” Literatures (1680 to 1860)
3 units
Exploration of Restoration, Early American, Romantic, American Romantic, and Victorian writings in Britain and America. Class engages literary text, literary history, and historical events that shape the literature of the period.
Prerequisite: ENGL 1A
Normal Grade Rules

ENGL 071. Creative Writing
3 units
Examinations of works of poetry, creative nonfiction, and short fiction as expression of human intellect and imagination, to comprehend the historic and cultural contexts, and recognize issues related to writing by men and women of diverse cultural traditions. Students will also write poetry, creative nonfiction, and a short fiction.
GE Area: C2
Normal Grade Rules

ENGL 078. Introduction to Shakespeare’s Drama
3 units
Reading of five or six representative plays. The Elizabethan era, dynamics of performance and close analysis of the plays. GE Area: C2
Notes: No credit in the English major.
Normal Grade Rules

ENGL 096RWS. Integrating Reading and Writing
3 units
Co-requisite course offered in conjunction with a primary content-area course in which students engage reading and writing activities to learn disciplinary content. Activities support students to learn about their own learning processes as they build content knowledge in a discipline.
Co-requisite: Early Start or GE course
Repeatable for credit
Credit / No Credit

UPPER DIVISION

ENGL 100A. Writing Competency Through Genres
4 units
Satisfies the WST requirement if passed with a C or better (C- or lower will not satisfy the WST). Prepares students for 100W through drafting, feedback, and revision to demonstrate writing competency. Develops ability to analyze written genres used in the students’ chosen disciplines as well as write analytical and reflective essays.
Prerequisite: Must have failed the WST.
Note: A CR/NC option may not be used to satisfy the WST requirement.
Normal Grade Rules

ENGL 100W. Writing Workshop
3 units
Advanced workshops in Reading and Composition. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Notes: Required of all English majors before they achieve senior standing. All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules

ENGL 100WB. Written Communication: Business
3 units
Written communications for business majors; includes minimum of 8,000 words of writing spaced throughout the semester. GE Area: Z
Prerequisites: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules

ENGL 106. Editing for Writers
4 units
Copy editing, substantive editing and reorganization of technical documents. Review of grammar and punctuation to ensure technical mastery and ability to justify editing decisions. Graphics editing, access aids and professional skills of an editor.
Prerequisite: ENGL 2 or A3 equivalent
Normal Grade Rules

ENGL 107. Professional Technical Writing
4 units
Survey of technical and professional writing. Students learn how to write and design persuasive documents that get real things done in the real world. Projects include resumes, instructions (video and print), presentations, user manuals, and augmented reality apps. Includes learning digital tools used to author and publish writing in the current tech landscape such as DITA, Augmented Reality (AR), SnagIt, Adobe Premiere, and Madcap Flare.
Prerequisite: ENGL 2 or A3 equivalent
Normal Grade Rules

ENGL 108. Gaming and Narrative
4 units
Study of the relationship between literary narrative theory (narratology) and interactive fiction (books and games designed to produce different stories for different readers or players). Course focuses on whether interactive fiction has changed or reinvented the possible spaces of narrative.
Pre-Requisite: Upper Division Standing
Normal Grade Rules
ENGL 109. Writing and the Young Writer
Emphasis on workshop approach to improve creative and expository writing skills and to transfer knowledge gained as a writer into practice as a prospective teacher of writing.
Normal Grade Rules
4 units

ENGL 110. Visual Rhetoric and Digital Document Design for Writers
Combines visual rhetorical theory with design techniques to teach writers about the visual aspects of written and digital communication. In this hands-on course, students will design documents, including a poster, a book chapter, and promotional materials for local nonprofits.
Prerequisite: ENGL 100W
Normal Grade Rules
4 units

ENGL 112A. Children's Literature
Study of literature for elementary and intermediate grades, representing a variety of cultures. Evaluation and selection of texts.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ENGL 112B. Literature for Young Adults
Study of selected literary material, representing a variety of cultures, chosen to motivate secondary school readers.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

ENGL 113. Gothic Novel and Horror Fiction
Study of the gothic novel in Britain and America 1795-1900. Current trends in horror fiction and films will be traced to these gothic predecessors.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

ENGL 115. The Bible as Literature
Study of the Bible from the perspective of literature, examining key portions of the Bible, its subjects, themes, literary styles and genres, and contributions to Western Literature.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

Environmental Studies,
Department of Courses

ENVIRONMENTAL STUDIES

LOWER DIVISION

ENVS 001. Introduction to Environmental Issues
What effects are human activities having on the natural environment and our quality of life? Discover the technical and social causes of environmental degradation; learn how your personal and career choices can protect the environment for current and future generations. GE Area: D1
Normal Grade Rules
 GE D1
3 units
ENVS 010. Life on a Changing Planet
An introduction to basic knowledge and theory in the life sciences, focusing on the theme of environmental change. Examines challenging issues in biology and methods for evaluating conflicting data and claims. Develops students' analytical and writing skills. GE Area: B2
Prerequisite: As required for Core GE courses in B2.
Normal Grade Rules
 GE B2
3 units

UPPER DIVISION

ENVS 100W. Environmental Research and Writing
Advanced research and writing skills for future environmental professionals. Focus on issues, literature and challenges associated with environmental writing. Emphasis on writing for technical and general audiences. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. Declared major in environmental studies.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
 GE Z
3 units
ENVS 105. Environmental Change and Problems, San Francisco Bay Area
Systematic inquiry into physical environments of the San Francisco Bay Area, with emphasis on impacts and changes to those systems by human action. Analysis of public action and policies regarding regional environmental issues.
Prerequisite: ENVS 1 and ENVS 100W.
Notes: Offered only occasionally.
Normal Grade Rules
3 units
ENVS 106. Exploring Ocean Environments
Understand human interactions with marine environments by exploring the ocean as a place of socio-ecological encounter. Students learn and employ interdisciplinary approaches to conceptualizing, knowing, exploiting, and managing ocean environment.
Normal Grade Rules
3 units
ENVS 107. Introduction to Environmental Economics and Policy
Analysis of basic economic and political factors related to the environmental crisis. Surveys policy approaches to the problem: regulation, taxes, subsidies, cost benefit analysis.
Prerequisite: ECON 1B or instructor consent.
Normal Grade Rules
3 units
ENVS 108. Cost-Benefit Analysis
See ECON 108.
Normal Grade Rules
4 units
ENVS 110. Resource Analysis
Quantitative analysis of Earth's natural resources. Topics typically include the status and trends of resources such as topsoil, agriculture, water, energy, wildlife and the impacts of human population growth on these resources. Emphasis is on problem solving and computational methods applied to resource management problems.
Prerequisite: ENVS 001, ENVS 010, STAT 095.
Misc/Lab: Lecture 4 hours/lab 3 hours.
Normal Grade Rules
4 units
ENVS 111. Geology and the Environment
See GEOL 111.
Normal Grade Rules
 GE R
3 units
ENVS 112. Hazardous Waste
Familiarization with major environmental problems through study of federal, state and regional regulation of hazardous waste management. Methods of treatment, disposal and destruction.
Prerequisite: Junior standing, two semesters chemistry and biological science or instructor consent.
Normal Grade Rules
3 units
ENVS 113. Atmospheric Pollution
See METR 113.
Normal Grade Rules
 GE R
3 units
ENVS 116. Solar Energy Analysis
Provides a comprehensive overview of sustainable solar energy resources, economics, and policy. Includes a review of basic solar energy physics and interdisciplinary analysis of economic, social justice and environmental strategies for a solar powered civilization.
Prerequisite: ENVS 119, PHYS 002A, and PHYS 002B or instructor consent.
Normal Grade Rules
3 units
ENVS 117. Human Ecology
Diversity and similarity of human adaptation, cultural evolution, cultural change and environmental modification in African, Asiatic, Oceanic and Latin American cultural groups. Emphasis: traditional non-Western conservation practices and their lessons for the modern-day resource manager.
Prerequisite: ENVS 1, ENVS 10 and ENVS 100W, or instructor consent.
Normal Grade Rules
3 units
ENVS 118. Sustainable Home Gardens
Techniques for designing landscape gardens which are sustainable in the various biomes of California. Students first research, explore, and photograph California native plant communities. Then, they design a California native home garden based on their field investigations and principles of ecology.
Prerequisite: ENVS 001 or instructor consent.
Misc/Lab: Lecture 3 hours / Activity 2 hours
Repeatable for credit
Normal Grade Rules
4 units
ENVS 119. Energy and the Environment
Introduces students to the sources of energy that fuel industrial civilization and the environmental impacts of energy extraction, distribution, and consumption. Explores a range of approaches to moving society toward a more sustainable energy future. GE Area: R
Prerequisite: Upper Division Standing. Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
 GE R

Academic Year 2019-2020
Course Descriptions

RETURN TO LAST PAGE
DESCRIPTION CONTENTS
ENVS 121. Population and Global Change
See GEOG 121.
  Normal Grade Rules
3 units

ENVS 124. Introduction to Environmental Law
Development, interpretation, application and enforcement of environmental laws, regulations and legal policies by legislatures, courts, administrative agencies and citizens. Examination of air and water quality, hazardous materials, workplace, land use and wetlands regulation, international, ethical and efficacy issues.
Prerequisite: ENVS 1 or Instructor Consent
  Normal Grade Rules
3 units

ENVS 125. Advanced Environmental Law
Detailed evaluation of practical environmental law problems. Students use an interdisciplinary approach, combining evaluation of technical data with review and application of law and policy. Extensive legal analysis and writing.
Prerequisite: ENVS 1 and ENVS 124
  Normal Grade Rules
3 units

ENVS 126. Environmental Ethics and Philosophy
See PHIL 126
  Normal Grade Rules
3 units

ENVS 127. Community-Based Participatory Research
This course integrates interdisciplinary theory and practice in developing a situated understanding of community-based participatory research (CBPR) toward redressing environmental inequities. Students will apply these theories and practices in their own environmental research and advocacy projects regarding local environmental issues.
Prerequisite: Upper Division Standing
  Normal Grade Rules
3 units

ENVS 128. Water Resource Management
Water uses and supplies; water resource measurement methods; hydrology, erosion processes; sediment production and transport particularly on Northern California coastal watershed; flood hazards and methods of control; groundwater and groundwater aquifers; water quality.
Prerequisite: ENVS 129 and STAT 095 or appropriate math course; or instructor consent.
  Normal Grade Rules
3 units

ENVS 129. Water Policy in the Western U.S.
Water resource development, federal reclamation policy, water law and water rights; interbasin transfers; Colorado River, Central Valley Project and State Water Project; groundwater overdrafting; agricultural water and water pricing.
Prerequisite: ENVS 001 or Instructor Consent
  Normal Grade Rules
3 units

ENVS 130. Energy Policy Analysis
Energy policy questions and examination of choices including energy pricing, options for controlling oil imports, incentives for reducing consumption, allocation and end use controls, synthetic fuel production, offshore oil development.
Prerequisite: Upper division standing.
  Normal Grade Rules
3 units

ENVS 131. Air Pollution Meteorology
See METR 131.
  Normal Grade Rules
3 units

ENVS 132. Solar Home Design
Techniques for designing environmentally-sensitive, healthy, passive solar homes via site selection, energy conservation, lighting, non-hazardous natural building materials. Residential passive solar heating and cooling approaches for retrofits and new construction. For homeowners, teachers, professional designers and architects.
Prerequisite: ENVS 001 or instructor consent.
  Normal Grade Rules
3 units

ENVS 133. Sustainable Energy Strategies
Challenges and opportunities facing sustainable energy pathways for heat, fuel, and electricity with a focus on energy efficiency, solar, wind, geothermal, bioenergy, alternative modes of transportation and other energy consuming infrastructures.
Prerequisite: ENVS 119, PHYS 002A, and PHYS 002B or instructor consent.
  Normal Grade Rules
3 units

ENVS 134. California Wetland Controversies
Impact of agriculture, urbanization and other human land uses upon the California coastal wetlands with emphasis on current environmental problems and controversies. State public agencies concerned with vital environmental problems and analysis of current environmental legislation. May be repeated for a maximum of 8 units.
Prerequisite: ENVS 1 or instructor consent. MISC/Lab: Lecture 4 hours/lab 4 hours.
  Normal Grade Rules
4 units

ENVS 135. U.S. Environmental Policy
See POLS 135.
  Normal Grade Rules
3 units

ENVS 136. Intro to Land Use and Urban Planning
See URBP 136.
  Normal Grade Rules
4 units

ENVS 137. Green Building Design Issues
Provides an overview of green building design strategies based on renewable energy, water conservation, healthy interior design, beneficial building orientation, native landscaping, sustainable building materials, includes economics, policy, and green building auditing and certifications.
Prerequisite: Upper division standing.
  Normal Grade Rules
3 units

ENVS 140. Politics and the Environment
Application of different political strategies to local issues examined through examples from specific environmental challenges facing the Bay Area. Considers relative contributions of the public, elected officials, government employees and interest groups in environmental decision-making.
Prerequisite: ENVS 1, ENVS 107 and ENVS 124 or instructor consent.
  Normal Grade Rules
3 units

ENVS 142. Introduction to Environmental Planning
See URBP 142.
  Normal Grade Rules
4 units

ENVS 144. California Wetland Controversies
Impact of agriculture, urbanization and other human land uses upon the California coastal wetlands with emphasis on current environmental problems and controversies. State public agencies concerned with vital environmental problems and analysis of current environmental legislation. May be repeated for a maximum of 8 units.
Prerequisite: ENVS 1 or instructor consent. MISC/Lab: Lecture 4 hours/lab 4 hours.
  Normal Grade Rules
4 units

ENVS 146F. Communication and the Environment
See COMM 146F.
  Normal Grade Rules
4 units

ENVS 148. Sustainable Materials Management
Focuses on practical understanding and approaches to managing discarded materials for sustainability. An interdisciplinary perspective that includes politics, business, economics, marketing, science, and environmental principles. Provides direct experience through field trips and service learning.
Prerequisite: ENVS 1 or instructor consent. MISC/Lab: 3 hours lecture/ 2 hours lab
  Normal Grade Rules
4 units
ENVS 150. Introduction to Environmental Thought
An introduction to significant works in the field of environmental studies. Topics covered include preservation, conservation, biocentrism, environmental justice, eco-feminism, deep ecology, and environmental activism. GE Area: S
Prerequisites: Pass the WST before enrollment. Upper division standing or instructor consent.
Normal Grade Rules
GE S
4 units

ENVS 151. Race, Class and the Environment
See AFAM 151
Normal Grade Rules
3 units

ENVS 152. Globalization and the Environment
Scientific approach to goods distribution worldwide, and environmental consequences of shipping materials and packaging, which when discarded become waste. Mutually exclusive with ENVS 102 and ENVS 174. Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing or instructor consent. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE R
3 units

ENVS 154. Sustainable Agriculture
Analysis of and practicum in environmentally sustainable methods of food production, emphasizing biological diversity, water conservation, air quality, social equity and economic justice. Special focus on primary research in natural and social sciences for sustainable agriculture. Field trips and labs. Prerequisite: ENVS 001 and GE B2 course, or instructor consent.
Misc/Lab: Lecture 3 hours/lab 2 hours.
Normal Grade Rules
4 units

ENVS 156. Introduction to Local Transportation Planning
See URBP 156.
Normal Grade Rules
4 units

ENVS 158. Environmental Education
Education of individuals can make a difference in protecting the environment. Comprehensive overview from the perspective of schools, American culture and law. Interdisciplinary approaches for correcting conditions created by modern living, energy and environmental demands. Prerequisite: ENGL 1A and ENGL 2; upper division standing or instructor consent.
Normal Grade Rules
3 units

ENVS 159. Nature and World Cultures
See AMS 159:
Normal Grade Rules
GE V
3 units

ENVS 160. Topics in Environmental Planning
See URBP 160:
Repeatable for credit
Normal Grade Rules
4 units

ENVS 161. California Wildlands
Discussion and field analysis of California’s wildlands, including the range of biodiversity, associated agencies, environmental issues, policy choices and management approaches to protect different types of open space. Prerequisite: ENVS 001 and ENVS 100W
Misc/Lab: 3 hours lecture/ 2 hours lab
Normal Grade Rules
4 units

ENVS 165. National Parks
See GEOG 165:
Normal Grade Rules
3 units

ENVS 166. Nature and Conservation Photography
Still photography of nature and illustrative conservation subjects in both color and black and white. Theory critique sessions supplemented with field experience. May be repeated for a maximum of 8 units.
Prerequisite: Photo experience or instructor consent.
Misc/Lab: Lecture 2 hours/activity 4 hours.
Repeatable for credit
Normal Grade Rules
4 units

ENVS 167. Managing Environmental Issues
See BUSS 167:
Normal Grade Rules
3 units

ENVS 168A. Global Climate Change I
See COMM 168A:
Normal Grade Rules
6 units

ENVS 168B. Global Climate Change II
See COMM 168B:
Normal Grade Rules
GE RSV
3 units

ENVS 169. Introduction to Social Media in Planning
See URBP 169:
Normal Grade Rules
1-4 units

ENVS 170. Introduction to Environmental Health and Safety
An overview of environmental health and safety issues that affect industry and government, including regulatory framework and basic technical elements; course covers historical and legislative background, risk management and training required in the field.
Prerequisite: ENVS 100W.
Normal Grade Rules
3 units

ENVS 173. Forest Ecology and Conservation
A field based course designed to provide students with the conceptual framework and practical tools necessary for understanding the ecology and conservation of local forest ecosystems. Topics covered include forest restoration, succession, wildlife, diversity, natural and human disturbance, and the history of forest management.
Prerequisite: ENVS 01, ENVS 10, or upper division standing.
Misc/Lab: Lecture 3 hours/lecture 2 hour/lab.
Normal Grade Rules
4 units

ENVS 178. Intro to Regional Transport Planning
See URBP 178:
Normal Grade Rules
4 units

ENVS 179A. Fundamentals of GIS for Urban Planning
See URBP 179A:
Normal Grade Rules
4 units

ENVS 181. Environmental Resource Center
Supervised projects that support the Environmental Resource Center, a source of sustainability information and activities for the campus and community; projects help students take personal action toward achieving a sustainable lifestyle.
Prerequisite: ENVS 001 or instructor consent.
Misc/Lab: Activity 2-6 hours.
Repeatable for credit
Credit / No Credit
Repeatable for credit
Credit / No Credit
1-3 units
ENVS 184. Directed Reading
Directed reading in an environmental subject to gain broader knowledge.
Prerequisite: Specific proposal to or need defined by department, with consent of faculty.
Credit / No Credit 1-4 units

ENVS 185. Environmental Impact Analysis
Current environmental impact reports subjected to critical review; determination of alternative procedures and mitigating opportunities; extensive field analysis and practice.
Prerequisite: ENVS 001, ENVS 124 or instructor consent.
Misc/Lab: Lecture 3 hours/lab 2 hours.
Normal Grade Rules 4 units

ENVS 187. Environmental Restoration
Interdisciplinary art and science of restoring destroyed or degraded habitats. Emphasis on the interplay of ecological principles, policy, public involvement and economics in the planning, implementation and monitoring of restoration plans. Field work and independent research required.
Prerequisite: ENVS 001, CE B2 course or any 100W, or instructor consent.
Misc/Lab: Lecture 3 hours/lab 2 hours.
Normal Grade Rules 4 units

ENVS 189. Coastal Field Studies
Introduction to coastal processes, resources, policy, and conservation. Course emphasizes environmental issues, human impact, and protection efforts focusing on adapting to coastal change. Students conduct research and participate in local field trips along the California coast.
Prerequisite: ENVS 1.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 4 units

ENVS 190. Advanced Environmental Impact Assessment
Advanced work in the field of environmental impact assessment. Analysis of EIA documents for regulatory adequacy, consistency with local planning documents and technical accuracy.
Prerequisite: ENVS 185 or instructor consent.
Misc/Lab: Lecture 3 hours/lab 2 hours.
Normal Grade Rules 4 units

ENVS 191. Advanced Environmental Restoration
Advanced restoration research and applications. Emphasis on independent literature research and field data collection. Participation in on-going restoration project. Fieldwork and grasp of restoration principles required.
Prerequisite: ENVS 187.
Misc/Lab: Lecture 3 hours/lab 2 hours.
Notes: Offered only occasionally.
Normal Grade Rules 4 units

ENVS 193. Supervised Projects and Research
Projects and/or research to build practical environmental skills. Work on or off campus on projects with direct social value.
Prerequisite: Upper division standing.
Repeatable for credit Normal Grade Rules 1-15 units

ENVS 194. Environmental Internship
Service in a local, city, county, state or federal environmental/sustainability agency, school or in environmental/sustainability industry, or with a worthwhile environmental education or protection organization or center.
Prerequisite: Senior standing in Environmental Studies.
Repeatable for credit Credit / No Credit 1-9 units

ENVS 195. Instructor Assistant in Environmental Studies
Experience as a tutor assistant in classroom demonstrations, field techniques and discussion. May be repeated for a 4 unit maximum, but not for same course or instructor.
Prerequisite: Senior standing, ENGL 1A, instructor consent and appropriate academic background.
Repeatable for credit Credit / No Credit 1-3 units

ENVS 198. Senior Seminar
Culmination of interdisciplinary curriculum in environmental studies through integration and critical assessment of the field. Goal is transition from undergraduate experience to full professionalism.
Prerequisite: Filed for graduation, completion of Environmental Studies core, including ENVS 100W.
Normal Grade Rules 3 units

ENVS 199. Senior Thesis
Thesis demonstrating grasp of environmental subjects and principles, ability to research in depth particular environmental problems and facility at recommending practical solutions.
Prerequisite: Senior standing in Environmental Studies, completion of all Environmental Studies core requirements and university 100W writing requirement.
Credit / No Credit 3 units
ENVS 260. Computer Applications in Environmental Analysis
Overview of environmental simulation software used by professionals to investigate design alternatives and decision-making in the social and life sciences. Application of model designs to individual projects. Prerequisite: Graduate standing in Environmental Studies or instructor consent. Misc/Lab: Lecture 3 hours/lab 3 hours. Repeatable for credit Normal Grade Rules 3 units

An intensive field investigation of water resource agencies and projects to acquaint resource managers, environmental quality specialists and other interested students with projects and philosophies unique to particular geographic areas. Prerequisite: Upper division standing and ENVS 128 or ENVS 129, or instructor consent. Misc/Lab: Lecture 4 hours/lab 2 hours. Normal Grade Rules 4 units

ENVS 284. Directed Reading for Graduate Students
Directed reading on an environmental subject to assist graduate-level research thesis development. Analysis of peer-reviewed and grey literature; development of a literature review. Prerequisite: Graduate student standing or instructor consent. Repeatable for credit Credit / No Credit 3 units

ENVS 285. Graduate Internship
Advanced service in a local, city, county, state agency, federal agency or environmental industry. Prerequisite: Graduate standing in Environmental Studies or instructor consent. Repeatable for credit Credit / No Credit 3-9 units

ENVS 291. Advanced Topics in Environmental Restoration
High-level restoration research and applications for advanced students. Emphasis on independent literature research and field data collection/analysis. Participation in ongoing restoration project and/or thesis research. Fieldwork and grasp of restoration principles required. Repeatable for up to 8 units of credit Prerequisite: Graduate standing and ENVS 187 or equivalent, or instructor consent. Misc/Lab: Lecture 4 hours/Activity 2 hours. Repeatable for credit Normal Grade Rules 4 units

ENVS 295. Graduate Teaching Assistant
Teaching experience in environmental studies at the college level. Does not meet requirements for California Certification in Elementary or Secondary Education. May be repeated for maximum of 6 units, but not for same course or instructor. Prerequisite: Graduate standing in Environmental Studies or instructor consent. Repeatable for credit Credit / No Credit 3 units

ENVS 297. Research and Proposal Development
Students develop their thesis topic through extensive literature research. The product will be a draft thesis proposal to be circulated among potential committee members. Prerequisite: Graduate Standing in Environmental Studies or consent of instructor. Note: This course satisfies graduate-level GWAR in this master’s program. Repeatable for credit Normal Grade Rules CE: GWAR 3 units

ENVS 298. Special Study
Advanced individual research and projects. Prerequisite: Graduate standing in Environmental Studies or instructor consent. Repeatable for credit Mandatory CR/NC/RP 1-4 units

ENVS 299. Master’s Thesis or Project
Masters thesis research. Prerequisite: Graduate standing in Environmental Studies or instructor consent. Repeatable for credit Mandatory CR/NC/RP 1-6 units

ENVS 1290R. Culminating Experience Supervision
Continued work on dissertation, thesis, or project or in preparation for comprehensive exams beyond the minimum required units for cases in which final deliverables are still in progress and all other degree requirements except the culminating experience have been fulfilled. Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class Note: No Degree Credit. No Degree Credit 1 unit

GLOBAL STUDIES
LOWER DIVISION
GLST 001A. Introduction to Global Studies
Introduces students to the scope of global studies as seen from the social and cultural perspectives. Readings based on the best critical studies of globalization and its outcomes. Occasionally, visiting professors will give new academic approaches to this field. Normal Grade Rules 3 units

GLST 001B. Introduction to Global Studies
Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class. Note: This course satisfies graduate-level GWAR in this master’s program. Repeatable for credit Normal Grade Rules CE: GWAR 3 units

UPPER DIVISION
GLST 100W. Writing Workshop
See GEC 100W. Normal Grade Rules CE: T 3 units

GLST 143. Gender, Power, Intl Dev
Explore issues of poverty, gender, economic transformations, inequality while examining the history of development. Consider various meanings given to development by women and men, primarily as residents of particular regions, but also as aid workers, policy makers, and government officials. Explore the underlying political, economic, social, and gender dynamics that make “development” an ongoing problem world-wide. GE Area: V Prerequisite: Upper Division. Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended. Corequisite: Any 100W Normal Grade Rules GE: V 3 units

GLST 156. Technology of the Modern World
Analysis of development and global diffusion of technology in the 20th and 21st centuries. Interrogates historical narratives of modern technology, reflecting on broader ethical, political, human significance of modern technology. Ecological impacts of technologies. Power, problems, promise of technology. Normal Grade Rules 3 units
GLST 162. Contemporary Global Issues
Interdisciplinary approach to contemporary global issues. Understanding and analyzing global issues are the focus of the course. Students will explore, analyze, and articulate the unique challenges each of the issues pose to the global community in ways that will foster student’s ability to understand and evaluate causes, consequences, and responses to global challenges.
Pre-requisite: Upper Division standing or Instructor Consent
Normal Grade Rules
3 units

GLST 164. Advanced Seminar in Global Citizenship
Designed to encourage and inspire students to develop their own understanding of the concept of global citizenship and to develop informed perspectives related to concerns of the global community. Students will be asked to consider the impact they may have, as well as their individual and collective responsibilities, as global citizens, within their local, national, and global communities.
Pre-requisite: Upper Division Standing or Instructor Consent
Normal Grade Rules
3 units

GLST 167. Changing Ecologies of Globalization
Environmental and human issues and challenges 1492 to present. Global environmental shifts & relationship to social, demographic, cultural, political change. Human interaction with natural environment. GE Area: R
Prerequisite: Passage of WST; completion of Core GE; Upper division standing
Corequisite: GEOG 100W (if not already completed)
Normal Grade Rules
GE: R
3 units

GLST 179. Capstone Seminar in Global Studies
Course is designed for majors to help them to gain coherence in their theoretical knowledge, factual grounding, international living, personal aptitudes, and career aspirations. It will also give them experience in interdisciplinary research through preparation of a major scholarly paper. The format includes discussion, group analysis, visiting professors, and individual work.
Prerequisite: Completion of GLST 1A, senior standing.
Normal Grade Rules
3 units

GLST 187. Special Topics
Selected topics in Global Studies. Topics vary and will be announced each semester.
Prerequisite: Upper division standing
Repeatable for credit
Normal Grade Rules
3 units

GLST 188. Special Topics in International Experiences
Study of modern history, government, immigration and impacts on development of diverse communities. Study of effects of immigration, economics, biases, and other factors on community development, as well as comparing and contrasting US and other cultural perspectives.
Course offered as FLP in countries outside the U.S. GE Area: V
Prerequisites: Passage of the Writing Skills Test (WST) or ENGL/LID 100A with a C or better (C- not accepted); completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Repeatable for credit
Normal Grade Rules
GE: V
3 units

GLST 189. Global Experience
Required for Global Studies majors. Completion of Global Studies sponsored faculty-led international educational study, semester-long residence abroad, for formal study, research, service learning, or internship. Students will develop their programs with the advice and approval of the GLST advisor and the International Programs and Service office. Students may transfer in additional credits from approved study, with prior approval of the GLST advisor.
Prerequisite: Completion of GLST 1A, junior standing.
Repeatable for credit
Credit / No Credit
1-3 units
Film and Theatre, Department of Courses

RADIO-TELEVISION-FILM

LOWER DIVISION

RTVF 010. The Art of Film
Study of the formal, aesthetic, historical, and cultural contexts of film as an art form. GE Area A1.
Normal Grade Rules
GE: C
1-3 units

RTVF 020. Introduction to Audio for Film & Television
Fundamentals of audio production in film and television settings. Prerequisite: Instructor Consent. Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

RTVF 021. KSJS On-Air Operations
On-Air operation of campus radio station KSJS-FM, FCC, equipment, D.J. interview, sports; all activities and processes required for live broadcasting, music, public service and community service programming. Misc/Lab: Lecture 1 hour /Activity 4 hours.
Normal Grade Rules
3 units

RTVF 030. Introduction to Film & Television Production
Fundamentals of film and television production. Prerequisite: Instructor Consent
Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

RTVF 031. Film and Television Aesthetics
Theory of applied aesthetics in video, film, and new media based on an examination of fundamental image and sound production. Prerequisite: Instructor Consent
Normal Grade Rules
3 units

RTVF 080. Introduction to Media
Analysis of the history and evolution of radio (audio) and television (video) in the U.S. Examination of programming, government regulation, advertising, networking, development of electronic media technologies and world media systems.
Normal Grade Rules
3 units

RTVF 082. Introduction to Film History
The history and evolution of the motion picture from 1895 to 1945. Viewing of representative films, study and discussion of major world film movements, important directors, and key genres.
Normal Grade Rules
3 units

UPPER DIVISION

RTVF 110. Media and Culture
Critical survey of roles played by electronic media in shaping culture. Media institutions are examined regarding information they distribute, entertainment they provide and influence they bring. Analysis of media sources, messages and audiences. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

RTVF 111. Alternative Cinema
Uses films from previously marginalized national cinemas from around the world as primary sources to teach students to appreciate, understand and compare diverse cultures. Introduces students to alternative modes of filmmaking and analysis. GE Area: V. Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Repeatable for credit
Normal Grade Rules
GE: V
3 units

RTVF 120. Intermediate Audio for Film & Television
Techniques of audio production and post production for film and television settings. Prerequisites: RTVF 020, RTVF 030 and RTVF 031, upper division standing or instructor consent. No concurrent enrollment with prerequisites. Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

RTVF 121. KSJS-FM Radio Activity
Student participation in radio with KSJS-FM. Activities supervised by area faculty. Repeatable, but only 6 units may be used for graduation. Open to all students whether lower division or upper-division standing.
Repeatable for credit
Credit / No Credit
1-3 units

RTVF 122. KSJS Station Operation & Mgmt
Structure and operation of non-commercial radio station KSJS-FM. Theory and practice of radio management, engineering, sales and programming. Repeatable, but only 6 units may be used for graduation.
Prerequisite: Appointment to KSJS management staff or instructor consent.
Misc/Lab: Lecture 1 hour/Activity 4 hours
Repeatable for credit
Normal Grade Rules
3 units

RTVF 130. Intermediate Film & Television Production
Techniques of film and television production. Prerequisites: RTVF 020, RTVF 030 and RTVF 031, upper division standing or instructor consent. No concurrent enrollment with prerequisites. Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

RTVF 131A. Post Production: Color Correction
Post production course with emphasis on color grading and correction of film and television production projects. Prerequisites: RTVF 130 or instructor consent.
Misc/Lab: Lecture 2 hours/Activity 2 hours
Normal Grade Rules
3 units

RTVF 131B. Post Production Editing & Delivery
Editing, post production and delivery techniques for film and television projects. Prerequisite: RTVF 130 or instructor consent.
Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

RTVF 132A. Introduction to Cinematography
First in-depth course in cinematography. Principles of motion picture photography explored through lecture, discussions, projects and screenings. Skills of the cinematographer developed by shooting exercises during and outside of class. Appreciation of the art and technology of cinematography.
Prerequisite: RTVF 030 or Instructor consent.
Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

RTVF 132B. Advanced Cinematography
Advanced, in-depth course in cinematography consisting of mostly hands-on practicum, with lectures as needed. Dramatic scenes are filmed in realistic production shooting situations, both in the studio and on location. Scripts to be photographed are selected by the professor and the students based on the challenges they present.
Prerequisite: RTVF 131A or Instructor consent. No concurrent enrollment with prerequisites. Misc/Lab: Lecture 2 hours/Activity 2 hours
Normal Grade Rules
3 units
RTVF 133. Film & TV Production Management
Analysis of film and television organization and programming concepts, including production management, decision-making processes, technical script breakdown, and its relation to budgeting and finance.
Normal Grade Rules
3 units

RTVF 135. RTVF Production: Special Projects
Principles, procedures and techniques used to produce an advanced-level radio, audio, television or film project. See department office for specific project information.
Prerequisite: RTVF 020, RTVF 030, upper division standing or instructor consent.
Misc/Lab: Lecture 2 hours/Activity 2 hours.
Repeatable for credit
Normal Grade Rules
3 units

RTVF 136. Advanced Film & Television Production
Creation, production and direction of senior-level project utilizing cinematic language, advanced technical skills, directing talent, and narrative storytelling.
Prerequisite: RTVF 120, RTVF 130, Upper division standing or instructor consent.
Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

RTVF 160. Introduction to Screenwriting
Basic principles and practices in writing scripts for film and/or television.
Prerequisite: RTVF 020, RTVF 030 and TA 100W, upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

RTVF 161. Advanced Screenwriting
Each student develops an original screenplay through several drafts in this workshop. Drawing on constructive feedback from classmates and instructor. The course focuses on dramatic structure, character and plot development as well as visual language of the screen.
Prerequisite: RTVF 160.
Normal Grade Rules
3 units

RTVF 180S. Individual Studies
Directed study (special production or research projects) in specified fields not covered by offered courses.
Prerequisite: Instructor Consent
Repeatable for credit
Normal Grade Rules
1-3 units

RTVF 181. Modern Film History
The history and evolution of the motion picture after 1945. Viewing of representative films, study and discussion of major world film movements, important directors, and key genres. Prerequisites: RTVF 082, upper division standing or instructor consent.
Normal Grade Rules
3 units

RTVF 183. Critical Studies & Research in RTVF
Critical and scholarly inquiry into established and emerging areas of criticism, theory and research in RTVF studies. Production of scholarly criticism and research. Prerequisite: RTVF 010, RTVF 080, Upper Division standing or instructor consent.
Normal Grade Rules
3 units

RTVF 185. Special Topics in RTVF
Special topics in radio, television and film. Contact department office for specific topic information. Open to all students whether lower division or upper-division standing. Repeatable for up to 6 units when topic changes.
Repeatable for credit
Normal Grade Rules
3 units

RTVF 198. RTVF Internships, Portfolio, Career Prep
Supervised internships with approved radio, television, film or media organizations. Written evaluation submitted by sponsor and student after field work. Repeatable for credit up to 6 units.
Misc/Lab: Lecture 3 hours/Activity 9 hours.
Repeatable for credit
Normal Grade Rules
3 units

RTVF 199H. Honors Program
See TA 199H.
Repeatable for credit
Credit / No Credit
2-3 units

THEATRE ARTS

LOWER DIVISION

TA 005. Acting
Basic acting class for non-theatre arts majors. Exploration of inner and external resources for performance, analysis of text and character, guidelines for successful rehearsal and performance. Learning to be seen, heard, understood and believed. GE Area: C1
Normal Grade Rules
GE: C1
3 units

TA 010. Theatre Appreciation
Study of the historical and cultural contexts of theatre around the world. Seeing and critical writing about plays: Hands-on experiences in the arts and crafts of live theatre. GE Area: C1
Normal Grade Rules
GE: C1
3 units

TA 011. Script Analysis
Detailed analysis of dramatic and screenplay scripts related to performance and production.
Normal Grade Rules
3 units

TA 013. Great Comedies for Theatre
This course is designed to introduce students to comedic dramatic literature and the performance techniques to stimulate the proper audience response. GE Area: C2
Normal Grade Rules
GE: C2
3 units

TA 015. Voice and Diction
Voice production and articulation for the performer. Voice and speech improvement through guided exercises in posture/relaxation, respiration, phonation, resonance and articulation. Standard American diction taught through use of the International Phonetic Alphabet.
Normal Grade Rules
3 units

TA 017. Intermediate Acting
Scene Study class based on Stanislavsky Method. Students rehearse and memorize contemporary scenes performed for critique by the instructor. Acting techniques will focus on analysis, internal methods and characterization for playing scenes. Lab exercises additionally will include disciplined stage movement and improvisation techniques.
Prerequisite: TA 5 and Co/Prerequisite: TA 11
Normal Grade Rules
3 units

TA 048. Voice & Movement for the Actor
Course focuses on using voice & movement to understand different stages of human life, in its biological and cultural configurations we bring to the stage. Voice and movement shapes, units and differentiates our communications and expressions as performers. GE Area: E
Normal Grade Rules
GE: EE
3 units
**TA 051A. Scenery and Props for the Performing Arts**  
Introduction to facilities, materials and tools; safety guidelines for production shop and stage. Standard construction techniques and production vocabulary.  
Note: Lec and Misc/Lab  
Normal Grade Rules  
1 unit

**TA 051B. Costume for the Performing Arts**  
Costume construction laboratory introducing costume construction techniques and materials, basic alteration techniques, costume craft techniques; costume shop organization, management, personnel and equipment.  
Misc/Lab: Activity 2 hours.  
Normal Grade Rules  
1 unit

**TA 051C. Lighting & Sound for the Performing Arts**  
Supervised hands-on activity with individual instruction in basic techniques and tools used in lighting and sound for the stage.  
Misc/Lab: Activity 2 hours.  
Normal Grade Rules  
1 unit

**TA 055. Intro to Design for Theatre**  
An introduction to the expansive field of visual and audio design for the performing arts, including scenic design, costume design, lighting design, sound design, and video/projection design. In exploring the practice of these rapidly evolving forms, students will exercise strategies for applying creative, fine-arts based solutions to a variety of challenges. Students will learn how theatrical designers collaborate and respond to literary prompts, such as play scripts, with art and technology to create physiological environments that impart psychological and social meanings.  
Students will also have opportunities to participate directly in university productions through a hands-on practicum (lab) component.  
Misc/Lab: 2 hours of Activity  
Normal Grade Rules  
3 units

**TA 064. Make-up for Performing Arts**  
Makeup techniques for stage, television, film and print. Course covers makeup design, makeup materials and two dimensional application techniques. Laboratory work on actual stage productions, video and film shoots.  
Misc/Lab: Lecture/demonstration 2 hours/lab 2 hours.  
Normal Grade Rules  
3 units

**TA 091. Scenic Painting & Props**  
Supervised hands-on activity with individual instruction in basic techniques and tools essential to successful stage production in scene painting for the theatre, as well as the many facets of being a property master for theatrical productions. Repeatable for credit up to 6 units.  
Misc/Lab: Lecture 2 hours/lab 2 hours.  
Repeatable for credit  
Credit / No Credit  
1-3 units

---

**UPPER DIVISION**

**TA 100W. Writing Workshop: Theatre Arts**  
Development of skills appropriate to the theatre profession: criticism, research, publicity and promotion materials, and cover letter and resume composition.  
CE Area: Z  
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core CE, satisfaction of Writing Skills Test and upper division standing. Allowed Declared Majors:  
Radio/Television/Film, Theatre Arts, Dance, Animation/Illustration, Special Majors (BA).  
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).  
Normal Grade Rules  
CE: Z  
3 units

**TA 103. Musical Theatre**  
The repertoire of musical theatre with intensive training in appropriate acting, singing and dance techniques.  
Prerequisite: Upper division standing.  
Misc/Lab: Lecture 2 hours/lab 3 hours.  
Repeatable for credit  
Normal Grade Rules  
3 units

**TA 109. Stage Acting**  
Preparation, analysis and presentation of styles ranging from Chekhov to Shakespeare are the basis of this advanced scene-study course. Exploration of roles to develop authority, characterization, range and clarity are at the core of this class. Repeatable once for credit.  
Prerequisite: TA 11, TA 17 and instructor consent.  
Misc/Lab: Lecture 2 hours/lab 3 hours  
Repeatable for credit  
Normal Grade Rules  
3 units

**TA 110. Advanced Acting**  
Analysis and production of a dramatic work that presents unusual problems of background, interpretation, style or meaning. Lectures, discussions, readings; rehearsal of play and participation in other aspects of the final production.  
Prerequisite: TA 15, TA 5, TA 17 or instructor consent.  
Misc/Lab: Lab hours required.  
Repeatable for credit  
Normal Grade Rules  
3 units

**TA 112. Rehearsal and Performance**  
Study and discussion of and practice in the fundamental principles of play direction; stage composition, movement, business, tempo; directing procedures, play selection and interpretation; problems in styles, casting and rehearsal and performance.  
Prerequisite: TA 11, TA 5 or TA 17, TA 105.  
Misc/Lab: Lecture 2 hours/activity 2 hours.  
Normal Grade Rules  
3 units

**TA 117. Practice in Acting or Directing**  
Director analyzes, casts, rehearses scenes. The actor performs in a variety of roles. Repeatable for credit when content changes.  
Prerequisite: TA 17 or TA 16 and instructor consent.  
Misc/Lab: Activity 6 hours  
Repeatable for credit  
Normal Grade Rules  
1 unit

**TA 111. Practice in Acting or Directing**  
Director analyzes, casts, rehearses scenes. The actor performs in a variety of roles. Repeatable for credit when content changes.  
Prerequisite: TA 17 or TA 16 and instructor consent.  
Misc/Lab: Activity 6 hours  
Repeatable for credit  
Normal Grade Rules  
1 unit

**TA 120. Theatre History**  
Examines the historical roots, many manifestations, and diversity of theatrical performances with particular attention to theatre's role within and between cultures.  
Prerequisite: TA 011 or instructor consent.  
Normal Grade Rules  
3 units
TA 121. Topics in Performance History
Examines relations between performance and unique historical/cultural conditions that motivate change or continuity in a specific area of performing arts. Not a historical survey, but a problem-centered course that focuses on developing the power to think historically about performance.
Prerequisite: TA 011 or instructor consent.
Normal Grade Rules
3 units

TA 127. Contemporary Theatre
European and American playwrights from 1950 to the present and important theatre practices for this period. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100B is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE V
3 units

TA 128. Scriptwriting
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

TA 129. Advanced Scriptwriting
Writing in dramatic form—plays, film scripts, television scripts. Study and discussion of models. Criticism of student writing.
Prerequisite: TA 128 or RTVF 1 (or equivalent) and instructor consent. Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

TA 131. Storytelling
Course focuses on Storytelling and Creative Dramatics to teach Multiple Subject Credential Students theatre techniques.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

TA 144. Shakespeare I
See ENGL 144.
Normal Grade Rules
4 units

TA 145. Shakespeare and Performance
See ENGL 145.
Normal Grade Rules
4 units

TA 151. Lighting Design for Performing Arts
Theory and practice of designing lighting for the performing arts. Presents broad-based understanding of the design process and responsibilities; the importance of collaboration and communication in the theatre; and the skill of articulately presenting design ideas visually and orally.
Prerequisite: Upper division standing, TA 51C or instructor consent.
Normal Grade Rules
3 units

TA 152. Studies in British Drama before 1800
See ENGL 152.
Normal Grade Rules
4 units

TA 153. Costume Design for Performing Arts
Theory and practice of designing costumes for the performing arts. Presents broad-based understanding of the design process and responsibilities; the importance of collaboration and communication in theatre; and the skill of articulately presenting design ideas visually and orally.
Prerequisite: TA 51B or instructor consent.
Normal Grade Rules
3 units

TA 154. Scenic Design for Performing Arts
Theory and practice of designing scenery for the performing arts. Presents broad-based understanding of the design process and responsibilities; the importance of collaboration and communication in theatre; and the skill of articulately presenting design ideas visually and orally.
Prerequisite: TA 51A or instructor consent.
Normal Grade Rules
3 units

TA 155. Writing in Dramatic Form
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

TA 161. Theatre Design Topics
Discussion of theatre design including scenic, property, costume, makeup, lighting, sound and facility design. Subject matter varies depending on specialty of faculty.
Prerequisite: TA 105 and upper division standing.
Normal Grade Rules
3 units

TA 167. Theatre in Education
Materials, problems and techniques of producing formal drama with and for children at the school, community and professional levels.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

TA 168. Stage Management
Planning, communication, organizational structure and stage management practices including responsibility, communication, audition and rehearsal supervision, audience services coordination and working relationship with performance and production staff. Health and safety issues for performers and technical staff. Repeatable for credit up to 6 units.
Normal Grade Rules
3 units

TA 170A. Acting and Directing for the Camera
Acting techniques, voice and microphone use, movement for camera, gesture and the frame, role analysis for non-sequence performance, concentration, relaxation. Preparation, performance and critique of taped scenes.
Prerequisite: RTVF 130 or TA 017.
Misc./Lab: Lecture 2 hours/activity 2 hours.
Repeatable for credit
Normal Grade Rules
3 units

TA 170B. Advanced Acting and Directing for the Camera
Using the grammar of film and narrative storytelling to direct, produce and write contemporary film and television scenes. Use of single- and multi-camera techniques.
Prerequisite: TA 170A or RTVF 132.
Misc./Lab: Lecture 2 hours/activity 2 hours.
Repeatable for credit
Normal Grade Rules
3 units

TA 172. The Arts in U.S. Society
See CA 172.
Normal Grade Rules
GE S
3 units
TA 173. Thinking About Contemporary World Arts
See CA 173.
Normal Grade Rules
GE: V
3 units

TA 180. Individual Studies
Directed study in specified fields not covered by offered courses.
Prerequisite: Department chair consent.
Repeatable for credit
Credit / No Credit
1-3 units

TA 191. Activity Projects in Theatre Production
Supervised activity with individual instruction in scenic construction, lighting, sound, painting, properties, costuming and makeup for regularly-scheduled production of plays. Repeatable for credit.
Co/Prerequisite: TA 51A, TA 51B, & TA 51C or instructors consent.
Activity 6 hours
Repeatable for credit
Normal Grade Rules
1-3 units

TA 198. Internship
Supervised internships with approved radio, television or theatre organizations. Written evaluation submitted by sponsor and student after field work. Repeatable for credit up to 6 units.
Prerequisite: Junior or senior standing and instructor consent.
Misc/Lab: Lecture 3 hours/Activity 6 hours
Repeatable for credit
Normal Grade Rules
3 units

TA 199H. Honors Program
Demanding project demonstrating student's ability to do independent action and research. Written thesis or, in the case of the creative project, analysis and evaluation of the aesthetic problem; thesis to be defended orally by the student before a theatre arts staff committee. May be repeated once for credit.
Prerequisite: Senior standing/3.0 GPA; by invitation only.
Repeatable for credit
Credit / No Credit
2-3 units

TA 225. Seminar in Shakespeare
See ENGL 225.
Repeatable for credit
Normal Grade Rules
GE: GWAR
4 units

TA 231R. Performing Presentational Aesthetics
See COMM 231R.
Normal Grade Rules
4 units
General Engineering Courses

GENERAL ENGINEERING

LOWER DIVISION

ENGR 005. Science of High Technology
Scientific principles underlying commonly used high technology devices and systems such as the computer, cell phone, IPODS, cameras, and the Internet. Emphasizes practical applications of scientific principles to contemporary engineering products and services. GE Area: B1
Normal Grade Rules
GE B1
3 units

ENGR 008Q. Engineering Success
Combination of workshop and lab exercises emphasizing group interaction, communications skills and problem solving for incoming students. May be repeated for a total of 2 units.
Misc/Lab: Activity 2 hours.
Repeatable for credit
Credit / No Credit
1 unit

ENGR 010. Introduction to Engineering
Introduction to engineering through hands-on design projects, case studies, and problem-solving using computers. Students also acquire non-technical skills, such as team skills and the ability to deal with ethical dilemmas. GE Area: E
Prerequisite: Eligible for MATH 019 and Writing Enrollment Category W-I or W-II, or ENGL 1AF with a grade of CR, or ENGL 1A with a grade of C- or better.
Engineering Majors Only
Misc/Lab: Lecture 2 hour/lab 3 hours.
Normal Grade Rules
GE EE
3 units

ENGR 011. Intro to Engineering; Transfer Students
Ethical issues related to engineering. Information literacy and communication skills in engineering. Working on multidisciplinary teams on collaborative engineering projects.
Prerequisite: Upper division transfer student in engineering
Normal Grade Rules
1 unit

ENGR 025. The Digital World and Society
The secure, effective and ethical use of information technology. The effect of such technology on people and institutions. Technology-related challenges to society and policy. Frameworks for the analysis of information technology with respect to its cultural, historical, environmental, and spatial contexts. GE Area: D1
Normal Grade Rules
GE D1
3 units

ENGR 060SL. Engineering Projects in Community Service
EPICS is a service-learning course where engineering students work in multidisciplinary teams to undertake community-identified engineering projects. Students will gain insight into design and development processes and perform and report upon tasks consistent with their level of discipline expertise.
Prerequisite: Engineering major; non-remedial
Repeatable for credit
Normal Grade Rules
1 unit

ENGR 090W. Technical Writing Workshop
Weekly writing and speaking practice to develop technical communication skills. Repeatable not for graduation credit.
Prerequisite: Referral by engineering faculty.
Repeatable for credit
Credit / No Credit
2 units

ENGR 100W. Engineering Reports
Regular technical writing assignments and company-focused oral presentations while integrating effects of environmental factors as they relate to products, systems and engineering processes. GE Area: R and Z
Prerequisite: ENGL 18 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. Allowed Declared Majors: All Engineering, Aviation, Industrial Technology, Mathematics and Applied Mathematics.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE ZR
3 units

ENGR 120. Programming Concepts for Behavioral and Social Science Applications
Use R programming language to collect, analyze, and present data sets from behavioral and social science applications. Use R programming language to collect, analyze, and present data sets from behavioral and social science applications. GE Area: R
Prerequisite: STAT 095, or MATH 30, or MATH 71
Normal Grade Rules
3 units

ENGR 122. Data Technology for Behavioral and Social Science Applications
Use R programming language to collect, analyze, and present data sets from behavioral and social science applications. Use R programming language to collect, analyze, and present data sets from behavioral and social science applications.
Prerequisite: ENGR 120
Normal Grade Rules
3 units

ENGR 108. Green Electronics
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE R
3 units

ENGR 119. Energy and the Environment
See ENVS 119
Normal Grade Rules
GE R
3 units

ENGR 121. Data Structures and Algorithms for Behavioral and Social Science Applications
Represent and analyze behavioral and social science data using Python and data structures such as classes, trees, and graphs; use related algorithms to solve behavioral and social science problems.
Prerequisite: ENGR 120 with C- or instructor consent
Normal Grade Rules
3 units

ENGR 157SL. Community Action/Community Service
See COMM 157SL
Normal Grade Rules
GE S
3 units
ENGR 160SL. Engineering Projects in Community Service UD
EPICS UD is a service-learning course where upper division engineering students work in multidisciplinary teams to undertake community-identified engineering projects. Students will gain insight into design and development processes and perform and report upon tasks consistent with their level of discipline expertise.
Prerequisite: Engineering major, upper division standing
Repeatable for credit
Normal Grade Rules
1 unit

ENGR 180. Individual Studies
Individual work on special topics, by arrangement.
Prerequisite: Upper division standing and instructor consent
Allowed Declared Majors: Engineering. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-3 units

ENGR 184. Business Strategy in Practice in Technology Enterprise
This course provides students with the practical tools and assessment for applying their business acumen. The first half introduces the students to standard business assessment tools that feed business strategies, such as marketing, business development and M & A. The second half of the course is comprised of developing the basic elements of a formal Business Plan and providing both comprehension and application levels of learning of business strategy.
Prerequisite: BUS 193 or ENGR 193 and BUS 181.
Normal Grade Rules
3 units

ENGR 194. Business Organization and Management of Technology Enterprise
This course provides a “top down” overview of how commercial business works, including the business components: Corporate Environments, Human Resources, Legal, Marketing, Customer Insights, Management/Leadership. Communication and business soft skills will be covered providing a foundation for a solid business acumen. All class sessions focus on local and global perspectives.
Prerequisite: BUS 193 or ENGR 193.
Normal Grade Rules
3 units

ENGR 195A. Global and Social Issues in Engineering
Interdisciplinary seminar treating social and global impacts of technology and engineering. This integrated GE experience requires students to apply these concepts in their senior project classes. Students must enroll concurrently in their department senior project course Part A. GE Area: S when taken as part of Engineering Major sequence.
Prerequisite: ENGR 100W with a C or better. Engineering Majors only. Completion of Core General Education and upper division standing are prerequisites to all SJSU Studios courses.
Corequisite: Enrollment in major capstone course or equivalent.
Note: Meets GE Areas S and V when course is taken in combination with ENGR 195B and Engineering major specific sequence. Must be passed with a C or better to earn S and V
Repeatable for credit
Normal Grade Rules
GE: S
1 unit

ENGR 195B. Global and Social Issues in Engineering
Second course in a two-course sequence to support the integration of General Education Area S and Area V into the engineering major. Case study approach to the relationship of engineering to social, ethical and cultural aspects of the broader community both in the U. S. and worldwide. GE Area: V when taken as part of Engineering Major Sequence.
Prerequisite: ENGR 195A (with a grade of “C” or better). Engineering Majors Only Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a “C” or better” (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Corequisite: Enrollment in major capstone course or equivalent.
Note: To receive credit for GE Areas S and V, students must complete both ENGR 195A and ENGR 195B, each with a grade of C or better. They must also complete their senior project course sequence and earn a grade of C or better in each course.
Repeatable for credit
Normal Grade Rules
GE: V
1 unit

ENGR 195C. Interdisciplinary Senior Project I
Interdisciplinary team senior design projects. Proposal preparation with feasibility plans and specifications; oral and written reports; professional seminars. GE Area: S when taken as part of an engineering major sequence. Prerequisites: ENGR 100W, eligible for senior project course in major.
Note: Meets GE Areas S and V when course is taken in combination with: ENGR 195D, ENGR 195A and ENGR 195B
Normal Grade Rules
GE: S
3 units

ENGR 195D. Interdisciplinary Senior Project II
Construction, testing, and evaluation of the design from ENGR 195C culminating in demonstrations and written and oral presentations to faculty, industry mentors and peers. GE Area: V when taken as part of an engineering major sequence.
Prerequisites: ENGR 195C with a grade of “C” or better.
Note: Meets GE Areas S and V when course is taken in combination with: ENGR 195C, ENGR 195A and ENGR 195B
Normal Grade Rules
GE: V
3 units

ENGR 195E. Interdisciplinary Computing Project
Culminating project experience for students to apply computing knowledge and skills to solving problems or generating insights in their chosen area of study such as behavioral and social sciences.
Prerequisite: ENGR 120 or Instructor Consent
Normal Grade Rules
3 units

ENGR 197. Cooperative Education Project
Part or full-time on-site paid work experience based on a pre-approved project assignment in area of student’s career objective. Oral presentations, written final report and evaluation by project supervisor. Approved technical elective.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

ENGR 198. Technology and Civilization
See TECH 198
Normal Grade Rules
GE: V
3 units
ENGR 200W. Engineering Reports and Graduate Research
Graduate level technical writing workshop designed to develop advanced communication skills that will readily transfer to the engineer’s professional needs, along with research methodologies, copyright issues, and proper documentation for the master’s thesis project.
Prerequisite: Graduate standing and completion of an undergraduate writing course.
Note: This course satisfies graduate-level GWAR in this master’s program.
ABC/No Credit
GE: GWAR
3 units

ENGR 201. Engineering Analysis
Mathematical techniques for solving engineering problems. Topics include linear systems analysis, probability and statistics, and differential equations. Applications include modeling and simulation, optimization, projection, experimental design. Several computer projects are required.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

ENGR 202. Systems Engineering
Large scale system design and development. Integrated approach including mission statement, synthesis of design concepts, tradeoff studies, risk assessment and interactions encountered in the optimal design, development, manufacture and test of systems.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

ENGR 203. Engineering Management
Students will develop contemporary expertise in the principles of engineering finance, management, IP, operations management, performance metrics, and their application to design, development, and commercialization of new products and services in dynamic environments.
Prerequisite: Graduate standing and instructor consent.
Normal Grade Rules
3 units

ENGR 206. Renewable Energy Systems
Advanced knowledge in renewable energy resources such as solar, wind, geothermal, biomass, waves and tidal energy. Solar resources and technologies, Integrated Resource Planning and System Operations, Enabling technologies and new energy use trends: Smart Grid, Demand Response, Energy Storage, and Electric Vehicles.
Prerequisite: Instructor consent
Normal Grade Rules
3 units

ENGR 212. Engineering Management in a Global Economy
Application of engineering methodologies and practices to manage projects and organizations in a global digital economy. Topics include shifting from a manufacturing, production, marketing, and supply chain to a service economy, premium manufacturing, ethics, and competitive soft skills.
Prerequisites: ENGR 203 or Instructor Consent.
Normal Grade Rules
3 units

ENGR 231. Fundamentals of Facility Management
Overview of facility managers’ financial and business responsibilities. Principles of real estate and property management, facility operations, maintenance activities, and human resource management. Includes sustainable development, environmental management, and corporate social responsibility.
Repeatable for credit
Normal Grade Rules
3 units

ENGR 232. Technology for Facility Management
Overview of current and emerging facility management technologies and how and when to apply them. Includes facility management automation, transactional and human-centric processes, building automation and control systems, BIM technologies, and GIS analysis.
Repeatable for credit
Normal Grade Rules
3 units

ENGR 233. Managing Facility Assets for Cost and Compliance
Fundamental skills for assessing condition indices of assets in high-tech factories/laboratories, large office buildings, and other modern facilities; quantifying costs and financial impacts, and providing decision support for asset replacement or maintenance and for lease negotiation. Includes ISO 55000 standards for facility management.
Repeatable for credit
Normal Grade Rules
3 units

ENGR 234. Facility Operations and Maintenance
Fundamental skills and management and assessment tools for facility maintenance and operations. Includes predictive facility maintenance management, facility maintenance methods and strategies, analysis of service providers, and analysis of facility systems, equipment, and grounds. Prerequisite: ENGR 231
Repeatable for credit
Normal Grade Rules
3 units

ENGR 236. Design for Manufacturability
Knowledge-based design, value engineering, DFM methodologies, robust design, process and materials selection, design constraints, design for assembly. Techniques of quality engineering, CAD/CAM integration and simultaneous engineering, cost estimating, activity-based costing, case studies, team projects.
Prerequisite: Principles of Design and Manufacturing Processes.
Normal Grade Rules
3 units

ENGR 240. Control Systems Design and Applications
Introduction to control system analysis, feedback control theory, control law design and implementation. Topics include system modeling and identification, computer simulation, frequency domain and state space design approaches, control law implementation, and commonly used sensors and actuators for control systems. CAD tools for control systems analysis, design and simulation are used throughout this course.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

ENGR 261. Battery Technologies I
ENGR 261 teaches fundamentals of battery technologies. Concepts and understanding of electrochemical interactions, kinetics and thermodynamics in batteries will be covered. Basic concepts, material development and modeling of lithium-ion batteries will be discussed as well as understanding of flow batteries. Advanced and future technologies for next generation batteries will be introduced.
Normal Grade Rules
3 units

ENGR 262. Battery Technologies II
This follow-up course will provide an in-depth look at batteries with a focus on cutting-edge research and development. Topics such as material synthesis techniques, science of electrode fabrication, advanced characterization techniques, battery life degradation mechanisms, design of battery electrodes, thermal management, and state-of-charge and state-of-health measurements will be covered.
Normal Grade Rules
3 units

ENGR 263. Battery Electrochemistry
This course will cover the basics of electrochemistry, including thermodynamics, kinetics, mass transfer effects, reference electrodes, porous electrodes, dilute and concentrated solution theory, and electro-analytical methods, including voltammetry, coulometry and impedance spectroscopy.
Normal Grade Rules
3 units
ENGR 264. Battery Manufacturing
Lectures will cover the manufacturing of Li-ion cells and battery packs in detail and the basics steps in manufacturing, equipment, cost considerations, and quality issues related to manufacturing.
- Normal Grade Rules
  - 3 units

ENGR 265. Battery Control Systems
Learn how to design, analyze, and perform experiments for model and system validation work on battery control systems in electric vehicles, solar and/or wind renewable energy storage, and retrieval systems for the electric grid.
- Normal Grade Rules
  - GE: GWAR
  - 3 units

ENGR 271. Passive Optical Sensing
An introduction to passive optical sensing systems, including application areas, phenomenology and component/technology performance analysis. Detector types, principles, noise and sensor cooling issues will be addressed. Case studies and system analysis of complete passive optical sensing systems included.
- Prerequisite: Instructor consent
- Normal Grade Rules
  - 3 units

ENGR 281. Master’s Project/Thesis Preparation Seminar
Preparation for project or thesis research, including development of scope, assembly of committee, preparation of schedule, completion of literature survey, completion of introductory chapter for final report, and research proposal examination at the end of the course.
- Prerequisite: Complete common and option core courses, a grade of "B" or better in ENGR 200W or any CS&R approved course that satisfies the Graduate Writing Competency Requirement and approved candidacy form on file.
  - Misc/Lab: Lab 3 hours.
  - Mandatory CR/NC/RP
  - 1 unit

ENGR 282A. Engineering for Teachers: Introduction to Engineering Design
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education. Design process, research and analysis, teamwork, communication methods, global and human impacts, engineering standards, and technical documentation.
- Prerequisites: Instructor consent
  - Mandatory CR/NC/RP
  - 3 units

ENGR 282B. Engineering for Teachers: Principles of Engineering
A thematic approach to the study of relevant topics and concepts in engineering. Communication, presentation skills and teamwork, visualization and sketching techniques, introduction to mechanical system, and mechanisms, basic thermodynamics, fluid control and hydraulic systems, control systems and feedback, robotics, engineering units, instruments, tools and measurements, statics, material properties and strength of materials.
- Prerequisites: Instructor consent
  - Mandatory CR/NC/RP
  - 3 units

ENGR 282C. Engineering for Teachers: Digital Electronics
A thematic approach to the study of relevant topics and concepts in electronics engineering. Introduction to process and control of digital signals, design process for combinational and sequential logic design, teamworking, communication methods, engineering standards, and technical documentation.
- Prerequisites: Instructor consent
  - Mandatory CR/NC/RP
  - 3 units

ENGR 282D. Engineering for Teachers: Gateway to Technology Foundations
A project-based curricular approach to the teaching of technology, designed to challenge and engage the natural curiosity and imagination of middle school students. Introduction to mechanical and computer control systems, robotics and animation, and explorations of the importance of energy, including innovative ways to reduce, conserve and produce it using solar, thermal and wind power.
- Prerequisites: Instructor consent
  - Mandatory CR/NC/RP
  - 3 units

ENGR 282E. Engineering for Teachers: Gateway to Technology Specializations
A project-based curricular approach to the teaching of technology, designed to challenge and engage the natural curiosity and imagination of middle school students. Includes units on the impact of energy on our lives and the environment; the science behind aeronautics; design, build and test an airfoil; the science of electricity, behavior and parts of atoms, and sensing devices; knowledge and skills in basic circuitry design and examine the impact of electricity on our lives.
- Prerequisites: Instructor consent
  - Mandatory CR/NC/RP
  - 3 units

ENGR 282F. Engineering for Teachers: Civil Engineering and Architecture
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education. History of and careers in civil engineering and architecture including residential and commercial design, aesthetics and building safety codes.
- Prerequisites: Instructor consent
  - Mandatory CR/NC/RP
  - 3 units

ENGR 282G. Engineering for Teachers: Aerospace Engineering
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education. Introduction to the study of relevant topics and concepts in aerospace engineering, including the history and physics of flight, flight navigation, aerospace design, materials and structures, propulsion, flight physiology, space travel and aerospace careers.
- Prerequisites: Instructor consent
  - Mandatory CR/NC/RP
  - 3 units

ENGR 282H. Engineering for Teachers: Biotechnical Engineering
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education and careers. Topics include biotechnical history and industry, impact of technology on human health and safety, forensics, biomedical, environmental and agricultural applications.
- Prerequisites: Instructor consent
  - Mandatory CR/NC/RP
  - 3 units

ENGR 282I. Engineering for Teachers: Computer Integrated Manufacturing
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education and careers. Topics include history of manufacturing, control systems, design for manufacturability, cost estimating, and elements of automation.
- Prerequisites: Instructor consent
  - Mandatory CR/NC/RP
  - 3 units

ENGR 282J. Engineering for Teachers: Engineering Design and Development
A thematic approach to the study of relevant topics and concepts in engineering. Development of inquiry-based, hands-on classroom activities in engineering education and careers. Topics include project management, research and development of problem solutions, prototyping and testing, product and process evaluation, documentation and presentation.
- Prerequisites: Instructor consent
  - Mandatory CR/NC/RP
  - 3 units

Geography Courses

GEOGRAPHY

LOWER DIVISION

GEOG 001. Geography of Natural Environments
Atmospheric, biologic and geologic processes that create the natural environments of the world. Discovery of local, regional and global patterns in the location and distribution of environmental phenomena, and the human modifications of natural environments. GE Area: B1
Normal Grade Rules
GE B1
3 units

GEOG 010. Cultural Geography
The human population studied through the perspective of cultural groups, their institutions and geographic distributions, how different people occupy, use, and modify their environment, and the interaction of individuals from one group with those of another. GE Area: D1
Normal Grade Rules
GE D1
3 units

GEOG 012. Global Geography
Comparative geography of our world: regions and countries, natural environments and resources, settlements and land use, cultural diversity, economic and political patterns. GE Area: D2
Normal Grade Rules
GE D2
3 units

UPPER DIVISION

GEOG 100W. Writing Workshop
Development of skills required for geographical research and writing. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE Z
3 units

GEOG 105. Urban Geography
Spatial patterns in the urban environment: City function and morphology; population patterns and functional zonation; analysis of recent changes.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 107. Mapping the World
Finding, preparing, and using maps, satellite and aerial images, and spatial data to create effective presentations. Includes a basic introduction to geographic visualization through cartography, geographic information systems, and remote sensing for professionals outside geography.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 110. Urbanization in the Global South
This course explores issues and debates that relate to urbanization in the developing world. Students will gain a general understanding of the concept of urbanization in the developing world, and what are some of the issues, challenges, and policy responses found in these urban environments.
Prerequisite: Completion of the WST and core GE. Upper division standing
Pre/co-requisite: 100w
Normal Grade Rules
3 units

GEOG 112. Nations, Cultures, and Territorial Disputes
In a world with rapidly diminishing resources new conflicts are emerging based on factors such as ethnicity, economic opportunity, religion, and nationalism. Explore global circumstances leading to conflict. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

GEOG 117. Advanced Economic Geography
This is an advanced course in Economic Geography that explores the contemporary insights provided by geographers researching various dimensions of economy and space.
Prerequisite: Junior or Senior Standing
Normal Grade Rules
3 units

GEOG 120. Food Supply and Agricultural Systems
Geography of world agriculture and nutritional needs of a growing world population. Comparison of traditional and modern agricultural systems in their use of resources and technologies. Effectiveness in meeting demands and sustainability.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 121. Population and Global Change
Impact of population changes on countries, regions, and their environments. Demographic comparisons of developed and developing societies from perspectives of land use, economics and politics.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GEOG 123. Geography for K-12 Teachers
Geography for future K-12 teachers. Topics include mapping, places, and regions, and themes of human, physical and historical geography. Overview of geography in the California K-12 Frameworks as well as the geography in the California teacher credential examinations.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 124. Topics in Physical Geography
Interactions between humans and environment from a geographical perspective.
Prerequisite: GEOG 1 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

GEOG 125. Selected Topics in Human Geography
Changing topics in human geography.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units
GEOG 130. Natural Resources
Geography of economic, environmental, political and technological factors that define natural resources and affect their availability and use. Focus on water, food-producing and energy resources.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 132. Creating Built Worlds
See ANTH 132.
Normal Grade Rules
3 units

GEOG 135. Qualitative Methods in Geographical Research
Development of skills required for geographical research and writing. Library research, oral presentations, variety of writing assignments dealing with diverse geographic problems.
Prerequisite: ENGL 2.
Normal Grade Rules
3 units

GEOG 140. The United States
Geography of the U.S. emphasizing the continuing changes of America’s places and regions. Themes include environmental, culture, economic, and social geographies at community, regional and national scales.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 145. California
Origins and patterns of California’s diverse landscapes, including the geography of natural environments and resources, economic regions, land use, cultural patterns, political trends and the future.
Normal Grade Rules
3 units

GEOG 150. Central and South America and the Caribbean
Geography of Mexico, Central America, Caribbean, and South America. Themes include environmental, historical, political, and economic geographies at the scales of the region, its countries, and selected cities.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 155. Europe
Geography of Western and Central Europe. Themes include environmental, historical, political, and economic geographies at the scales of the region, its countries, and selected cities. Particular emphasis is given to the increasing economic and political unity through the European Union.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 160. East and South Asia
Geography of Eastern, Southeastern, and Southern Asia. Themes include environmental, historical, political, and economic geographies at the scales of the region, its countries, and selected cities. Particular emphasis is given to comparing and analyzing the variable rates of economic progress across the region.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 161. City Life
See SOCI 161.
Normal Grade Rules
3 units

GEOG 165. National Parks
An exploration of the history, philosophy, and science of park and wilderness preservation. Includes site visits to selected parks and wilderness areas.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

GEOG 168. Sub-Saharan Africa
Regional study of environments, as well as cultural, economic and political geography of Africa south of the Sahara. Special attention given to geographic factors in the progress of less developed countries.
Normal Grade Rules
3 units

GEOG 170. Introduction to Mapping and Geographic Information Systems
Foundations of the mapping sciences and geographic information systems. Basics of earth measurement, location and mapping. Thematic map display and analysis. Application through a variety of laboratory experiences.
Prerequisite: Geog 1 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

GEOG 171. Advanced Geographic Information Systems
Maps as tools of geographic expression and research. Introduction to spatial analysis through geographic information systems. Data collection and description, measuring absolute and relative location, patterns, interaction and association.
Prerequisite: GEOG 1, GEOG 170 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

GEOG 172. Cartography: Compilation and Presentation
Techniques of compilation, design, construction and production. Lab projects applying computer graphics and geographic information systems to the effective presentation of geographic themes and information.
Prerequisite: GEOG 1 and GEOG 170 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

GEOG 173. Cartography: Dynamic and Interactive Mapping
Design and implementation of dynamic and interactive presentations for visualizing geographic information. Lab projects creating animated and multimedia presentations. Designing user-interfaces for interactive mapping systems.
Prerequisite: GEOG 170, GEOG 172 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

GEOG 175. Geographic Information Systems: Project Development
Creation of geographic information system databases and application software to solve specific problems in such areas as resource and facilities management, demographic analysis and planning.
Prerequisite: Geog 170 or instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

GEOG 178. Geographic Information Systems Project
Develop geographic database, web mapping, interactive mapping, and/or remote sensing solutions to a GIS problem. Identification of appropriate methods, and design, implementation, testing, and documentation of solution.
Prerequisites: GEOG 170 and GEOG 173, 3 units from GEOG 173, GEOG 175, GEOG 181, or GEOG 182, or instructor consent.
Misc/Lab: Lecture 3 hours/lab 4 hours.
Normal Grade Rules
3 units
GEOG 180. Individual Studies
Student-initiated in-depth study of a mutually agreeable topic conducted under faculty guidance. Prerequisite: Supervisor and department chair approval. Repeatable for credit. Normal Grade Rules. 1-4 units

GEOG 181. Remote Sensing: Basic Theory and Image Interpretation
Acquisition, interpretation and applications of imagery obtained from both airborne and satellite platforms. Includes visual interpretation and analysis of airphotos and non-photographic images, such as radar and thermal infrared. Remotely-sensed imagery as a source for mapping and geographic information systems. Prerequisite: GEOG 170 or instructor consent. Normal Grade Rules. 3 units

GEOG 182. Remote Sensing: Digital Analysis
Digital image systems and application to earth resource problems. Emphasis on non-photographic sensors, including digital manipulation and image enhancement. Integration of digital imagery with geographic information systems. Prerequisite: GEOG 170 or instructor consent. Normal Grade Rules. 3 units

GEOG 183. Field Study in Physical Geography
Field research methods in physical geography, including biogeography, hydrology, soils, geomorphology, and human-environment studies. Mapping, GPS, landscape remote sensing, and field measurements. Local field trips and projects tailored to class interests. Prerequisite: 6 units of upper division geography courses. Normal Grade Rules. 3 units

GEOG 184. Field Study in Human and Historical Geography
Introduction to field methods in human and historical geography. Field trips, archival research, and student projects provide practical and applied skills and an informed view of the relationships between people and their environments. Prerequisite: 6 units of upper division geography courses. Normal Grade Rules. 3 units

GEOG 185. Spatial Analysis
Quantitative analysis of geographic information, including spatial statistics and analytical mapping; application of descriptive and inferential statistics to geographic problems. Prerequisite: GEOG 170 and GEOG 171 or instructor consent. Normal Grade Rules. 3 units

GEOG 197. Geography Internship
Work/activity with professional application in off-campus establishment or agency. Course requirements and units determined in consultation with faculty advisor and work/activity supervisor. Prerequisite: 12 units of geography. Repeatable for credit. Normal Grade Rules. 1-6 units

GEOG 199. Senior Seminar
Capstone course examining the history of geographic thought and themes with emphasis on critical assessment of issues affecting current trends; objective of placing undergraduate experience in a professional context. Prerequisite: Senior standing in geography. Normal Grade Rules. 3 units

GRADUATE

GEOG 210. Geographic Thought and Theory
Critical inquiry into the historical and philosophical development of modern geographical concepts and theories. Normal Grade Rules. 3 units

GEOG 239. Geographic Information Technology
Research in application of technology to the design and implementation of computer mapping, remote sensing, and geographic information systems. Includes spatial database design issues, spatial processing algorithms, and cartographic visualization. Research project and paper. May be repeated for credit when offered as a different technology. Prerequisite: Instructor consent. Note: This course satisfies graduate-level GWAR in this master's program. Repeatable for credit. Normal Grade Rules. 3 units

GEOG 240. Qualitative Research Methods
Rigorous analysis of methods used by social scientists in assessing notions of human and physical geography. Application of determined qualitative techniques including participant observation, semi-structured interviews, focus groups, participatory action, oral histories, textual analysis, social survey. Project development and evaluation. Prerequisite: Graduate level or instructor permission. Normal Grade Rules. 3 units

GEOG 279. Geographic Information Science Applications
Research in applications of geographic information science in such areas as urban spatial analysis, environmental analysis, geo-demographic analysis, regional analysis, facilities management, and geographic education. Research project and paper. May be repeated for credit when offered as a different technology. Prerequisite: Instructor consent. Repeatable for credit. Normal Grade Rules. GE: GWAR. 3 units

GEOG 280. Advanced Geographic Techniques
Specific topics in display and analysis of geographic information. Possible topics include advanced spatial analysis, cartographic representation, user-interface design, internet map server technology. May be repeated for credit when offered as a different technique. Prerequisite: GEOG 170 or instructor consent. Note: This course satisfies graduate-level GWAR in this master’s program. Repeatable for credit. Normal Grade Rules. 3 units

GEOG 286. Geographic Information Systems: Project Management
Principles of project management applied to geographic information systems projects. Requirements assessment, estimating, scheduling, system design, and acceptance testing. Students will negotiate, plan and execute projects for outside agencies. May be repeated when course content changes. Prerequisite: GEOG 175 or instructor consent. Repeatable for credit. Normal Grade Rules. 3 units

GEOG 290. Seminar in Research Design for Geographic Information Science
Introduction to research in geographic information science. Includes definition of research problems, design of research project, identification of appropriate methodologies for acquiring, organizing and analyzing data, and presentation of research results. Research paper. Prerequisite: Instructor consent. Normal Grade Rules. 3 units

GEOG 298. Special Study
Advanced individual research and projects unavailable in other department offerings conducted under the supervision of a faculty member. Prerequisite: Approval of supervising faculty member and department chair. Repeatable for credit. Mandatory CR/NC/RP. 1-4 units
GEOG 299. Master’s Thesis or Project
Prerequisite: Approved master’s degree candidate.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
Geology Department Courses

GEOL 001. General Geology
Examination of geologic processes and materials, including volcanoes, earthquakes, rock formation, oceans, streams, and plate tectonics and their importance to society. GE Area: B1 and B3
Misc/Lab: Lecture 3 hours/Lab 3 hours and field trips.
Normal Grade Rules
GE: B1B3
4 units

GEOL 001L. General Geology Laboratory
Supplement to general lecture courses in Earth science or geology.
Pre/Corequisite: GEOL 2, GEOL 1, GEOL 6 or GEOL 111.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
1 unit

GEOL 002. Geology for Engineers
This course provides a foundational introduction to geology as applied to civil engineering. The course focuses on learning and applying knowledge of geologic processes to civil engineering works, decision making, and evaluating the suitability of areas for urban infrastructure based upon geologic evidence and reasoning. Fieldtrips are required and may include weekends.
Prerequisite: Enrolled as Civil Engineering Major
Normal Grade Rules
3 units

GEOL 003. Planet Earth
Origins and processes of Earth's interconnected physical and chemical systems, including aspects of astronomy, geology, meteorology, and oceanography. Impacts of these systems on humans, and of humans on the systems.
GE Area: B1
Normal Grade Rules
GE: B1
3 units

GEOL 004L. Earth Systems Lab
Hands-on investigations, measurements, and analysis of Earth's materials, processes, and hazards. Supplements general lecture courses in Geology. GE Area: B3
Misc/Lab: Lab 3 hours.
Normal Grade Rules
GE: B3
1 unit

GEOL 005. Human Development and the Natural World
Introductory course examining the role of the natural world on the physiological, social, and psychological development of human beings within the context of the environmental, social, and academic community system.
GE Area: E
Normal Grade Rules
GE: EE
3 units

GEOL 006. Geology of California
California's geology, illustrating physical processes, landscapes, geologic history and resources. California's seismic, volcanic, landslide and flooding hazards, and their impact on society. GE Area: B1
Misc/Lab: Lecture 3 hours/field trips.
Normal Grade Rules
GE: B1
3 units

GEOL 007. Earth, Time and Life
Earth's geosphere: processes that act on it and materials that comprise it; how rocks and fossils are used to interpret the history of Earth's geosphere, atmosphere, oceans, and life forms. GE Area: B1 and B3
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE: B1B3
4 units

GEOL 008. The Age of the Dinosaurs
Scientific overview of the Mesozoic Era, or "age of dinosaurs." The course will focus on the evolution of dinosaurs and other contemporaneous life forms, as well as the mass extinction events that mark the beginning and end of the Mesozoic. GE Area: B2
Normal Grade Rules
GE: B2
3 units

GEOL 009. Earth Disasters
Exploration of natural disasters related to earth processes, including earthquakes, volcanoes, landslides, tsunamis, flooding, and climate change, and their impacts on society.
GE Area: B1 and B3
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
GE: B1B3
4 units

GEOL 028. Geology Outdoors
Hands-on introduction to geology in a variety of field settings. Develop your observational skills at several of California's spectacular geologic attractions. Includes one-day field trips, a multi-day field trip, and short written reports.
Prerequisite: Completion of or co-enrollment in GEOL 3, GEOL 4L, and GEOL 7.
Credit / No Credit
1 unit

GEOL 029. Earth Science Teacher Enhancement
Education of hands-on classroom activities. Normally offered through University Continuing Education. Field trips.
Prerequisite: Teaching credential and instructor consent.
Repeatable for credit
Credit / No Credit
0.5-3 units

GEOL 100W. Writing Workshop
Advanced writing, including planning and preparation of scientific reports. Improvement of skills needed for writing scientific reports, project proposals and resumes through practice and evaluation. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. Completion of or co-enrollment in GEOL 125, or instructor consent.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE: Z
3 units

GEOL 103. Earth Systems and the Environment
Fundamental earth/space science concepts. Emphasizes on active learning and guided inquiry. Recommended for students preparing for multiple subject credential. GE Area: R
Prerequisite: PHYS 001 or CHEM 030A, Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: Departmental consent required. All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: R
3 units

GEOL 104. Earth Science Teacher Enhancement
A thematic approach to the study of regionally significant topics, including earthquakes, landslides and volcanoes. Development of hands-on classroom activities. Normally offered through University Continuing Education. Field trips.
Prerequisite: Teaching credential and instructor consent.
Repeatable for credit
Credit / No Credit
0.5-3 units

GEOL 105. General Oceanography
Scientific examination of the impact of oceans on global society, and human impacts on the oceans, through classroom discussions, computer exercises and field trips. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Misc/Lab: Lecture 3 hours/field trips.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: R
3 units
Course Descriptions

GEOL 107. Prehistoric Life
Integrated interdisciplinary examination of the fossil record, including information from the fields of paleontology, genetics and cosmology that aids in the understanding of organic evolution and periodic massive extinctions. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: R
3 units

GEOL 108. Water, Ecosystems and Society
Interdisciplinary investigation of hydrologic systems and their interactions with biologic communities and with society. Streams, lakes, estuaries, groundwater and the safety and protection of water resources.
Prerequisite: Upper division standing.
Misc/Lab: Lecture 3 hours/field trips.
Normal Grade Rules
3 units

GEOL 111. Geology and the Environment
The effect of Earth processes on humans and their structures. Environmental problems related to earthquakes, landslides, minerals, energy, water and urban growth. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Misc/Lab: Lecture 3 hours/field trips.
Normal Grade Rules
GE: R
3 units

GEOL 112. Hazards, Risks of Earthquakes and Volcanoes
How, where and why earthquakes and volcanic eruptions occur: Analysis of hazards posed by earthquakes and volcanoes. Risks incurred by humankind due to these hazards. Minimizing risk; economic, social and political problems associated with earthquakes. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: R
3 units

GEOL 120. Fundamentals of Mineralogy
Laboratory course designed to give students basic skills for identifying minerals and basic understanding of geologic processes that form minerals. Emphasis is on hand specimen and microscope identification.
Prerequisite: GEOL 001 and GEOL 007.
Misc/Lab: Lecture 2 hours / Lab 3 hours
Normal Grade Rules
3 units

GEOL 122. Petrology
Identification of minerals and rocks in hand sample and under the microscope. Processes of formation, description, and classification of igneous, sedimentary and metamorphic rocks.
Prerequisite: GEOL 120; completion of or co-enrollment in CHEM 1A.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

GEOL 124. Sedimentology and Stratigraphy
Study of the origin and description of sediment and sedimentary rocks; study of the formation, sequence, and correlation of stratified rocks. GE Area: R
Prerequisite: GEOL 001 and GEOL 007.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
GE: R
3 units

GEOL 125. Structural Geology
Recognition, interpretation and representation of structures of the Earth’s crust. Analysis of basic principles of rock deformation.
Prerequisite: Math 19, Geol 1, Geol 7, Geol 28
Misc/Lab: Lecture 3 hours/lab and field 3 hours.
Normal Grade Rules
4 units

GEOL 127. Tectonics
Description of large-scale features of the Earth’s crust and upper mantle and the processes which formed them. Emphasis on plate tectonics and its implications for the evolution of North America.
Prerequisite: GEOL 100W, GEOL 122, GEOL 124, GEOL 125.
Normal Grade Rules
3 units

GEOL 129A. Introductory Field Geology
Introductory level field methods, field mapping and interpretation of geologic and tectonic history. Students stay at camp sites that vary from year to year. Field Trip Fees Required.
Prerequisite: Geol 120, 122, 124 and 125 or permission of instructor
Normal Grade Rules
2 units

GEOL 129B. Advanced Field Geology
Geologic field mapping and interpretation of geologic and tectonic history. Students stay at camp sites that vary from year to year.
Prerequisite: Geol 122, 124, 125, or Permission of Instructor
Misc/Lab: Lab 6-12 hours.
Repeatable credit
Normal Grade Rules
4 units

GEOL 129C. Intermediate Field Geology
Intermediate level field methods, field mapping and interpretation of geologic and tectonic history. Students stay at camp sites that vary from year to year.
Prerequisite: Geol 120, 122, 124 and 125 or permission of instructor
Normal Grade Rules
2 units

GEOL 130. Marine Geology
Introduction to the geology of continental margins and ocean basins. Discussions focus on crustal structures and the effect of plate tectonics and oceanographic processes on modern marine sedimentation.
Prerequisite: GEOL 001 or GEOL 007, GEOL 3 with instructor approval.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

GEOL 134. Geomorphology
Earth’s surficial processes and landforms; effects of tectonics, climate and geology; landscape evolution. Landform interpretation using maps; surface water hydrology; applications.
Prerequisite: GEOL 001 and GEOL 007, or instructor consent; 1 year of college calculus and physics recommended.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units
GEOL 135. Geochemistry
Application of geochemical and thermodynamic principles to solution of geologic problems. Topics include: equilibrium-disequilibrium reactions, major and trace element behavior, isotope systematics and modern analytical methods.
Prerequisite: GEOL 122 and CHEM 1B (or equivalent).
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

GEOL 137. Introduction to GPS/GIS for Geologic Applications
Introduction to digital geologic mapping and analysis using Trimble GPS and ArcView GIS.
Prerequisite: GEOL 1 and GEOL 7, or instructor consent.
Computer literacy assumed.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
4 units

GEOL 138. Hydrogeology
Geological principles of the occurrence, accumulation and migration of water; groundwater as a manageable resource; groundwater geochemistry and contaminant transport.
Prerequisite: GEOL 125 or instructor consent.
Recommend: MATH 32 and GEOL 135.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

GEOL 140. Principles of Engineering Geology
Qualitative and quantitative analysis of geologic factors influencing site selection, development and use; methods of data collection, interpretation and presentations.
Prerequisite: GEOL 125.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

GEOL 142. Paleontology
Study of the major groups of invertebrate fossils and their use in geological studies; principles of stratigraphy, including seismic stratigraphy.
Prerequisite: GEOL 001 and GEOL 007.
Misc/Lab: Lecture 2 hours/lab and field trips 3 hours.
Normal Grade Rules
4 units

GEOL 143. Active Tectonics
This course will introduce students to the interdisciplinary field of Active Tectonics. The aim of the course is to provide students with a comprehensive and quantitative understanding of the tectonic and surficial processes that shape the Earth’s surface.
Prerequisites: Geol 1, 7, and 28. Geol 137 recommended.
Misc/Lab: Lecture 4 hours/Lab 3 hours
Normal Grade Rules
4 units

GEOL 145. Earth System Science
Exploration of the interconnected systems and processes that have driven Earth’s evolution over time and continue to function today: Capstone course that includes course projects and labs.
Prerequisite: GEOL 001, GEOL 007 or instructor consent
Co-requisite: One semester of Chemistry
Normal Grade Rules
4 units

GEOL 147. Introduction to Applied Geophysics
Introduction to modern geophysical techniques with emphasis and environmental applications. Field techniques and case histories.
Prerequisite: PHYS 2A and PHYS 2B (or equivalent).
GEOL100W: GEOL 1, GEOL 7
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
4 units

GEOL 150. Field Studies in Natural History
See BIOL 150
Repeatable for credit
Normal Grade Rules
4 units

GEOL 168A. Global Climate Change I
See COMM 168A
Normal Grade Rules
6 units

GEOL 168B. Global Climate Change II
See COMM 168B
Normal Grade Rules
6 units

GEOL 174. Hazardous Materials
See CHE 174
Normal Grade Rules
3 units

GEOL 176. Geologic Applications
Prerequisite: GEOL 121 (or equivalent).
Normal Grade Rules
4 units

GEOL 180. Individual Studies
Advanced lab or field work.
Prerequisite: Instructor consent. Not available to Open University Students
Repeatable for credit
Credit / No Credit
1-3 units

GEOL 184. Directed Reading
Reading of books, journals and papers chosen to fill gaps in training. Evaluation through weekly reports and conference.
Prerequisites: Not available to Open University Students
Repeatable for credit
Credit / No Credit
1-3 units

GEOL 231. Advanced Structural Geology
Analysis of deformed rocks with emphasis on deformation mechanisms, small-scale structures, shear zones, faults and folds. Techniques of strain analysis and analyzing structure on maps are emphasized in the laboratory.
Prerequisite: GEOL 125.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
4 units

GEOL 204. Earth Systems Science for Teachers
Peer teaching and leadership instruction in earth science. Demonstrations, classroom activities, field projects and teaching strategies for K-12 teacher groups.
Prerequisite: Teaching credential and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

GEOL 213. Advanced Igneous and Metamorphic Petrology
Igneous and metamorphic processes and the evolution of the lithosphere. Application of field, petrographic and chemical data to models of petrogenesis. Laboratory emphasizes microscope studies and computer modeling.
Prerequisite: GEOL 121 (or equivalent).
Misc/Lab: Lecture 3 hours/lab 3 hours; field trips.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
4 units

GEOL 216. Sedimentary Petrology and Petrography
Petrographic study of sedimentary rocks with application of petrographic information to reconstructions of source terranes, depositional conditions and diagenesis. Discussion of nature and origin of carbonate and terrigenous components is emphasized.
Prerequisite: GEOL 124 and GEOL 213 or instructor consent.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

GEOL 222. Advanced Sedimentary Geology
Analysis of sedimentary facies, patterns of facies architecture and major controls on evolution of sedimentary basins.
Prerequisite: GEOL 123 and GEOL 127.
Misc/Lab: Lecture 3 hours/lab 3 hours; field trips.
Normal Grade Rules
4 units
GEOL 234. Advanced Geomorphology
We will investigate the role of geomorphology in affecting large-scale processes such as mountain uplift and the global climate. Coursework will include the manipulation of data sets from the Himalayas, topographic analysis of the Sierra Nevada, and modeling with Matlab.
Prerequisite: GEOL 134 or equivalent
Misc/Lab: Lecture 3 hours/lab 3 hours; 3-day field trip required.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE; GWAR
4 units

GEOL 237. Advanced GIS/GPS Mapping
Advanced methods of ArcGIS mapping and analysis using published digital datasets and/or student-generated Differential GPS files. Topics vary, depending on student interest, but are generally limited to natural sciences.
Prerequisite: GEOL 137 or instructor consent.
Misc/Lab: Lecture 4 hour/Lab 3 hours
Normal Grade Rules
4 units

GEOL 238. Advanced Hydrogeology
Numerical methods in groundwater modeling, vadose zone monitoring and transport and geochemistry of natural and contaminated waters.
Prerequisite: GEOL 138 or instructor consent.
Misc/Lab: Lecture 3 hours/lab 3 hours; field trips.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE; GWAR
4 units

GEOL 242. Advanced Paleontology
The lecture portion of this course will be conducted as a seminar; students will read and discuss classic and important newer papers on macroevolutionary theory and paleobiology. In the lab portion of this course, students will use fossil samples to develop and test scientific hypotheses that will be part of a semester-long project.
Prerequisites: Suitable background in geology or evolutionary biology.
Misc/Lab: Lecture 4 hours/Lab 3 hours.
Normal Grade Rules
4 units

GEOL 255. Advanced Geology
Selected topics in geology. Topics change with each offering.
Prerequisite: Suitable background in geology.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Repeatable for credit
Normal Grade Rules
4 units

GEOL 285. Seminar
Fundamental problems in geology. Topics change with each offering. May be repeated when content changes.
Prerequisite: Instructor consent.
Misc/Lab: Discussion 2 hours.
Repeatable for credit
Normal Grade Rules
2 units

GEOL 298. Research
Advanced individual study in geology.
Prerequisite: Admission to candidacy for the master’s degree. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

GEOL 299. Master’s Thesis
Prerequisite: Admission to candidacy for the master’s degree. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

UPPER DIVISION

GEOL 1290R. Culminating Experience Supervision
Continued work on thesis.
Prerequisite: Outstanding RP grade in a preceding semester in a thesis class
No Degree Credit
1 unit
Global Studies Courses

GLOBAL STUDIES

LOWER DIVISION

GLST 001A. Introduction to Global Studies
Introduces students to the scope of global studies as seen from the social and cultural perspectives. Readings based on the best critical studies of globalization and its outcomes. Occasionally, visiting professors will give new academic approaches to this field.
Normal Grade Rules
3 units

GLST 001B. Introduction to Global Studies
Presents scientific ways for understanding global phenomena and for developing policy to achieve positive outcomes of globalization. Interdisciplinary approaches require new analytical models. Visiting professors will collaborate with instructor. GE Area: B2
Normal Grade Rules
GE: B2
3 units

UPPER DIVISION

GLST 100W. Writing Workshop
See GEOG 100W
Normal Grade Rules
GE: Z
3 units

GLST 143. Gender, Power, Intl Dev
Explore issues of poverty, gender, economic transformations, inequality while examining the history of development. Consider various meanings given to development by women and men, primarily as residents of particular regions, but also as aid workers, policymakers, and government officials. Explore the underlying political, economic, social, and gender dynamics that make "development" an ongoing problem world-wide. GE Area: V
Prerequisite: Upper Division. Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Students will be asked to consider the impact they may have, as well as their individual and collective responsibilities, as global citizens, within their local, national, and global communities.
Pre-requisite: Upper Division Standing or Instructor Consent
Normal Grade Rules
3 units

GLST 156. Technology of the Modern World
Normal Grade Rules
3 units

GLST 162. Contemporary Global Issues
Interdisciplinary approach to contemporary global issues. Understanding and analyzing global issues are the focus of the course. Students will explore, analyze, and articulate the unique challenges each of the issues pose to the global community in ways that will foster student's ability to understand and evaluate causes, consequences, and responses to global challenges.
Pre-requisite: Upper Division standing or Instructor Consent
Normal Grade Rules
3 units

GLST 164. Advanced Seminar in Global Citizenship
Designed to encourage and inspire students to develop their own understanding of the concept of global citizenship and to develop informed perspectives related to concerns of the global community. Students will be asked to consider the impact they may have, as well as their individual and collective responsibilities, as global citizens, within their local, national, and global communities.
Pre-requisite: Upper Division Standing or Instructor Consent
Normal Grade Rules
3 units

GLST 166. Changing Ecologies of Globalization
Environmental and human issues and challenges 1492 to present. Global environmental shifts & relationship to social, demographic, cultural, political change. Human interaction with natural environment. GE Area: R
Prerequisite: Passage of WST; completion of Core GE, Upper division standing
Corequisite: GEOG 100W (if not already completed)
Normal Grade Rules
GE: R
3 units

GLST 179. Capstone Seminar in Global Studies
Course is designed for majors to help them to gain coherence in their theoretical knowledge, factual grounding, international living, personal aptitudes, and career aspirations. It will also give them experience in interdisciplinary research through preparation of a major scholarly paper. The format includes discussion, group analysis, visiting professors, and individual work.
Prerequisite: Completion of GLST 1A, senior standing.
Normal Grade Rules
3 units

GLST 187. Special Topics
Selected topics in Global Studies. Topics vary and will be announced each semester.
Prerequisite: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

GLST 188. Special Topics in International Experiences
Study of modern history, government, immigration and impacts on development of diverse communities. Study of effects of immigration, economics, biases, and other factors on community development, as well as comparing and contrasting US and other cultural perspectives.
Course offered as FLIP in countries outside the U.S. GE Area: V
Prerequisites: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Repeatable for credit
Normal Grade Rules
GE: V
3 units

GLST 189. Global Experience
Required for Global Studies majors. Completion of Global Studies sponsored faculty-led international educational study, semester-long residence abroad, for formal study, research, service learning, or internship.
Students will develop their programs with the advice and approval of the GLST advisor.
Students may transfer in additional credits from approved study, with prior approval of the GLST advisor.
Prerequisite: Completion of GLST 1A, junior standing.
Repeatable for credit
Credit / No Credit
1-3 units
Health Science and Recreation Department Courses

HEALTH PROFESSIONS

UPPER DIVISION

HPRF 134. Complementary and Alternative Health Practices
Philosophical, historical, clinical, and scholarly aspects of complementary and alternative medicine and associated health practices used in the US, with emphasis on scientific clinical investigation and evidence based efficacy.
Prerequisite: Completion of Core GE or instructor consent.
Normal Grade Rules
3 units

HPRF 135ITL. Health issues in a multicultural society-international experience
See HS 135ITL.
Normal Grade Rules
3 units

HPRF 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Upper division standing, instructor consent and division director approval.
Repeatable for credit
Credit / No Credit
1-5 units

HS 015. Human Life Span
Emphasizes growth and development of the individual from conception to death - perspective on biological, cultural, sociological and psychological changes and continuities during the human life span. Special attention will be given to socioeconomic status, gender and ethnic variations. GE Area: D1
Normal Grade Rules
GE: D1
3 units

HS 025. Health Team Building
Develops skills to work effectively on a health team. Learning to plan, implement and evaluate health programs; understanding the dynamic forces operating in groups; integrating and applying theory and practice.
Normal Grade Rules
3 units

HS 067. Introductory Health Statistics
A practical introduction to the statistical methods used in health, health care, biomedical, and public health settings. Concepts are illustrated with concrete examples that demonstrate how principles operate and are applied to common health problems. GE Area: B4
Prerequisite: Math Enrollment Category M-I or M-II, or completion of a GE Area B4 course with a grade of C- or better.
Normal Grade Rules
GE: B4
3 units

HS 074. Healthy Communities
Transdisciplinary introduction to community health. Strategic analysis of local communities, evidence-based interventions, impact of environmental changes at individual, family, neighborhood, and community levels. Focus on healthy policies, built environment, leisure, equity, and integration of recreation and population health approaches.
Pre-requisites: Successful Completion of HS 001 or RECL 10
Normal Grade Rules
3 units

GRADUATE

HPRF 260. Multidisciplinary Health Promotion in Later Life
See NUFS 260.
Normal Grade Rules
3 units

HS 101B. Computer Applications for Professionals
See NUFS 301B.
Normal Grade Rules
3 units

HS 103. Introduction to Health Policy
Examination of historical and current policies related to public health, stakeholders in health policy making and advocacy, and health policy frameworks for conducting policy analysis and policy making.
Co-requisites: Any 100W, HS/HPRF 100W preferred.
Normal Grade Rules
3 units

HS 104. Community Health Promotion
Examination of community health issues, needs and assets, core determinants, enabling factors, and levels of intervention. Introduction to community approaches to disease prevention and health promotion, risk and resilience, social capital, and social change to promote community health.
Prerequisite: HS1, HS15, HS67, HS74.
Corequisite: HS 114
Normal Grade Rules
3 units

HS 105. Current Issues in Nutrition
See NUFS 105.
Normal Grade Rules
3 units

HS 106. Concepts in Peer Health Education
Exploration of peer and lay health education as an effective health promotion strategy. Emphasis on college health and the skills and knowledge to be a successful peer health educator in a university setting. Interactive, skills-based seminar includes service-learning at SJSU.
Normal Grade Rules
3 units

HS 107. Aging and Society
See CERO 107.
Normal Grade Rules
GE: S
3 units

HS 108. Health in Later Life
See CERO 108.
Normal Grade Rules
3 units

HS 111. Medical Ethics
See PHIL 111.
Normal Grade Rules
3 units

DEPARTMENT CONTENTS
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>HS 114</td>
<td>Applications in Community Health Promotion</td>
<td>Application of community health promotion and disease prevention through service learning. Collaborate with community-based partners to improve health and reduce disparities. Prerequisite: HS 74. Upper Division Standing, Major/Minors Only. Corequisite: HS 104.</td>
<td>3</td>
</tr>
<tr>
<td>HS 117</td>
<td>Social Policy and Services in Aging</td>
<td>See GERO 117.</td>
<td>3</td>
</tr>
<tr>
<td>HS 118</td>
<td>Long Term Care Services</td>
<td>See GERO 118.</td>
<td>3</td>
</tr>
<tr>
<td>HS 122</td>
<td>Women in the Second Half of Life</td>
<td>See GERO 122.</td>
<td>3</td>
</tr>
<tr>
<td>HS 126</td>
<td>Drugs, Brain and Behavior</td>
<td>See PSYC 126.</td>
<td>3</td>
</tr>
<tr>
<td>HS 135</td>
<td>Health Issues in a Multicultural Society</td>
<td>Multidisciplinary interpretation and evaluation of consumer health issues. Impact of cultural variables (including communication methods, socioeconomic status and traditional beliefs) on health and illness. Interaction of individuals in families and other groups. GE Area S. Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended. Note: All SJSU Studies courses require completion of the WST and upper division standing. Normal Grade Rules GE S 3 units</td>
<td></td>
</tr>
<tr>
<td>HS 137</td>
<td>Families, Aging, and Diversity</td>
<td>See GERO 137.</td>
<td>3</td>
</tr>
<tr>
<td>HS 140</td>
<td>Human Sexuality</td>
<td>See ANTH 140.</td>
<td>3</td>
</tr>
<tr>
<td>HS 145</td>
<td>Community Mental Health</td>
<td>Comprehensive analysis of community mental health using a socio-ecological framework. Intersection of race, socioeconomic status, gender, sexual orientation, and mental health is examined. Emphasis is on prevention and recovery. Prerequisite: Any 100W or instructor consent. Normal Grade Rules 3 units</td>
<td></td>
</tr>
<tr>
<td>HS 158</td>
<td>Health Communications</td>
<td>Introduction to, and application of, health communication concepts, theories, and principles to specific health topics. Students will gain a broad understanding of the role of communication and its complexity as it relates to disease prevention and health promotion. Prerequisite: HS 1, HS 15, and HS 67 with a grade of C or better in each. Health Science Majors/Minors only. Misc/Lab: Lecture 3 hours/lecture 3 hours. Normal Grade Rules 3 units</td>
<td></td>
</tr>
<tr>
<td>HS 159</td>
<td>Health Program Planning</td>
<td>Students develop a community health plan that is based on an assessment of needs and community assets. The plan includes interventions that reflect &quot;Best Practices&quot; and recognize the value of partnerships, media advocacy and policy advocacy. Prerequisite: Upper division standing. Any 100W, (HS/HPRF 100W preferred), HS 104 and HS 161 with a grade of C or better in each. Misc/Lab: Lecture 3 hours/lecture 3 hours. Normal Grade Rules 3 units</td>
<td></td>
</tr>
<tr>
<td>HS 160</td>
<td>Epidemiology</td>
<td>The study of population-based risks of infectious and noninfectious diseases and how these risks relate to cause, treatment and prevention. Restricted to Majors and minors. Prerequisite: Completion of HS 1, HS 15, and HS 67 with a grade of C or better. Upper division standing. Public Health Majors and Minors only or instructor consent. Misc/Lab: Lecture 3 hours/lecture 3 hours. Normal Grade Rules 3 units</td>
<td></td>
</tr>
<tr>
<td>HS 162</td>
<td>Health Care Organization and Admin</td>
<td>Exploration of health economics, financing, insurance theory and contemporary trends in health care organization, management and administration. Co-requisite: HS/HPRF 100W or other 100W course. Restricted to Public Health Majors and Minors only or instructor consent. Normal Grade Rules 3 units</td>
<td></td>
</tr>
<tr>
<td>HS 164</td>
<td>Health Services and Social Marketing</td>
<td>Introduction to marketing principles and concepts as applied in community health education and health services settings. Examination of difference between strategic business marketing and social marketing for health, through examples of successful health education and health services programs. Restricted to Public Health Majors or instructor consent. Prerequisite: HS 158 with a grade of C or better. Public Health Majors only. Misc/Lab: Lecture 3 hours/lecture 3 hours. Normal Grade Rules 3 units</td>
<td></td>
</tr>
<tr>
<td>HS 165</td>
<td>The Health Professional</td>
<td>Preparation for entry into community health professions with an emphasis in four areas; (1) settings and roles, (2) skills for practice, (3) ethics, and (4) leadership and professional associations. Prerequisite: senior standing, HS majors in Final Semester and minors only. Misc/Lab: Lecture 3 hours/lecture 3 hours. Normal Grade Rules 3 units</td>
<td></td>
</tr>
<tr>
<td>HS 166A</td>
<td>Field Experience Seminar</td>
<td>Theory and practice in a community health agency, health care facility or industry. Prerequisite: Senior standing, Public Health majors and minors in their final semester only. Corequisite: HS 166B Credit / No Credit 3 units</td>
<td></td>
</tr>
<tr>
<td>HS 166B</td>
<td>Fieldwork Experience</td>
<td>Supervised work experience in an official or voluntary health agency, health care facility or industrial setting: short-term projects, observation of agency or facility dynamics and individual skills development. Prerequisite: Senior standing, Public Health Majors and Minors in their final semester only. Corequisite: HS 166A Credit / No Credit 3 units</td>
<td></td>
</tr>
</tbody>
</table>
HS 167. Biostatistics
Statistical analysis of health and biological data covering measurement scales, random sampling, data quality, data storage descriptive and exploratory techniques, probability distributions, estimation and hypothesis testing, includes an integrated lab activity. 
Prerequisite: HS 67 with a minimum grade of C. HS Majors only.
Miss/Lab: Lecture 2 hours/activity 2 hours
Normal Grade Rules
3 units

HS 168. Health Education Theory and Methods
Explores the foundations and applications of health education theory. Students will study models of individual, interpersonal and community health behavior. They also will learn methods for applying theory in research and health education practice. 
Prerequisite: HS 104.
Normal Grade Rules
3 units

HS 169. Diversity, Stress and Health
See KIN 169.
Normal Grade Rules
GE S
3 units

HS 170. Health Care Economics
Study of the economics of health care and understanding cost-benefit, cost-effectiveness ratio and decision tree analysis for health care. 
Prerequisite: HS 162 with a minimum grade of C.
Normal Grade Rules
3 units

HS 171. Managed Health Care
Study of managed health care and its growth and impact on the organization and delivery of health services in the United States. 
Prerequisite: HS 162 with a grade of C or better.
Normal Grade Rules
3 units

HS 172. Contemporary Environmental Health Issues
Examines the complex and interdependent relationship between environment and health outcomes. Advances scientific understanding of evolution and biodiversity, ecosystems, population dynamics, sustainability of earth’s resources, pest management, solid and hazardous waste, water and air pollution, climate change, and environmental/occupational exposures. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LID 100A with a C or better (C- not accepted); completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE R
3 units

HS 173. Comparative Healthcare Systems
A comprehensive examination of the structure of healthcare systems in selected countries worldwide. Specific attention is paid to the developmental history of the national healthcare systems, financing, and delivery infrastructure. The impact of international relations is also examined. 
Prerequisite: HS 162 with grade of ‘C’ or higher.
Note: HS 173 required for students completing the Health Science, Option 4, Health Services Administration Concentration.
Normal Grade Rules
3 units

HS 174. Fundamentals of Health Information Tech
Introduction to the principles and practices of health information technology to administer healthcare systems and promote public health. Focus on best practices, case-based learning, and global comparisons of innovative systems.
Prerequisite: HS 162 with a grade of C or better.
Normal Grade Rules
3 units

HS 175. Legal/Ethical Aspects, Healthcare Admin
Exploration of legal and ethical issues facing the health care industry, government regulation, patient rights, and corporate/administrative responsibility. 
Prerequisite: HS 162
Note: HS 175 required for students completing the Health Science, Option 4, Health Services Administration Concentration. To register, students must have completed HS 162 with grade of ‘C’ or higher.
Normal Grade Rules
3 units

HS 176. Introduction to Global Health
Prerequisite: Upper Division Standing.
Normal Grade Rules
3 units

HS 180. Individual Studies
Individual work on special topics by arrangement. 
Prerequisite: Upper division standing, instructor consent and department chair approval. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-4 units

HS 184. Directed Reading
Directed reading in journals and books of authorities in the field of health.
Prerequisite: Upper division standing and department chair consent. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-4 units

GRADUATE

HS 200. Contemporary Practice in Public Health
Introduction to the philosophy, ethics, historical roots, and approaches of contemporary public health education and health promotion. Emphasis is on frameworks and strategies used in practice.
Repeatable for credit
Normal Grade Rules
2 units

HS 201. Groups and Training: Theory and Practice
Addresses the study of group theories, dynamics, and processes in professional context of public health. Students will experience and evaluate team processes such as stages of group development, facilitation, successful communication, conflict, power and influence, problem-solving, and decision-making.
Normal Grade Rules
2 units

HS 205A. Quantitative Methods for Public Health Practice I
Integrated approach to the disciplines of Biostatistics and Epidemiology. Develops quantitative skills to evaluate data and make evidence-based decisions. Covers conduct and design of epidemiologic studies, basic biostatistical analyses, biostatistical software, and foundational knowledge of exposure and outcome assessment.
Normal Grade Rules
3 units

HS 215. Qualitative Methods for Public Health Practice
Introduction to qualitative methods, with focus on theory, data collection, and analysis. Students will collect qualitative data and analyze that data using software. Additional topics include research ethics, study design, and community-based participatory research.
Normal Grade Rules
3 units

HS 261. Principles of Epidemiology
Introduction to epidemiologic concepts and methods with applications to public health practice for students intending to engage in, collaborate in, or interpret the results of epidemiologic studies in the scientific appraisal of community health.
Prerequisite: HS 167 or equivalent.
Normal Grade Rules
3 units
HS 262. Health Policy and Organization
Health policy and the organization of health services, with a focus on the United States. Health policy analysis, the policy-making process, health care economics, insurance theory, comparative health systems, and health care quality.
Normal Grade Rules
3 units

HS 263. Principles and Skills of Health Administration
Application of administrative concepts and skills in health systems agencies. Includes decision-making, communication, funding, budgeting, marketing, personnel management, labor relations, planning, evaluation and health promotion.
Normal Grade Rules
2 units

HS 265. Environmental Health
Investigation of environmental health issues: risk evaluation, risk management, hazardous materials, occupational health and safety, plus air, water and noise pollution. Learning fundamentals of managing environmental health problems.
Repeatable for credit
Normal Grade Rules
3 units

HS 267. Computational Public Health Statistics
Methods of public health and biostatistical data collection, management, analysis and reporting using microcomputers, including the detection and control of confounding factors.
Prerequisite: HS 167 or instructor consent.
Normal Grade Rules
3 units

HS 269. Applied Data Analysis
Overview of quantitative and qualitative data analysis and reporting. Application of basic quantitative analysis concepts introduced in computational statistics and research courses. Specific emphasis of interpretation of qualitative data including data reduction, text management, coding, content analysis, and data trustworthiness.
Prerequisites: HS 295
Pre/Corequisites: HS 267
Repeatable for credit
Normal Grade Rules
3 units

HS 271. Theoretical Foundations of Public Health
Role of theory in shaping practice, research and evaluation that facilitates social change and promotes health across the spectrum of prevention, including individual, community, organization, and policy levels.
Normal Grade Rules
3 units

HS 272. Health Promotion Planning and Evaluation
Theory and practice of developing community health programs. Focus on program planning within the context of strategic planning, problem/needs assessment, setting of program goals and objectives, approaches to program evaluation and grant writing.
Prerequisite: HS 271.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

HS 276. Community Organization and Health Promotion
Advanced study of the principles, practices and ethical considerations underlying community organization, health promotion, empowerment and advocacy. Includes examination of the change process and introduction to the skills and tools of effective public health organizing.
Normal Grade Rules
3 units

HS 277. Multicultural Communication for Health Professionals
Theories and skills of multicultural communication necessary for effective professional practice with diverse clients, communities, staff and colleagues. Examination of concepts and indicators of cultural competence begins with intensive self-study and concludes with community examples.
Normal Grade Rules
3 units

HS 278. Graduate Project
Preparation for fieldwork placement, with emphasis on (1) self-assessment of strengths, competencies, professional objectives, and fieldwork priorities; (2) identification of fieldwork site and negotiation of Memorandum of Understanding; and (3) planning for professional development.
Prerequisite: HS 200, HS 201, HS 271, HS 272 or instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

HS 291A. Fieldwork Seminar
Preparation for fieldwork placement, with emphasis on (1) self-assessment of strengths, competencies, professional objectives, and fieldwork priorities; (2) identification of fieldwork site and negotiation of Memorandum of Understanding; and (3) planning for professional development.
Prerequisite: HS 200, HS 201, HS 271, HS 272 or instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

HS 291B. Fieldwork Practicum
Application of theory and skills to health education practice, research, and/or policy under the supervision of a preceptor.
Prerequisite: HS 200, HS 201, HS 271, HS 272, HS 291A or instructor consent. Not available to Open University Students.
Corequisite: HS 291P
Repeatable for credit
Credit / No Credit
1-2 units

HS 291D. Work Experience Practicum
Supervised work experience in community, health care organization, or worksite settings.
Prerequisites: HS 200, HS 201, HS 271, HS 272, HS 291A.
Mandatory CR/NC/RP
2 units

HS 291P. Professional Development
Strategically selected professional development activities to supplement experiences during fieldwork and advance public health career objectives.
Prerequisite: HS 291A
Credit / No Credit
1 unit

HS 293. Public Health Leadership
Preparation for leadership in public health. Emphasis is on: policy and politics of health advocacy, ethics in public health education, and final self-assessment of skills for practice and continuing education priorities.
Prerequisite: HS 291A and HS 291B or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

HS 295. Research Methodology
This course provides basic principles of research, both quantitative and qualitative. Novice researchers are familiarized with research methodology. Candidates engage in evaluating public research, and develop and write a feasible proposal ready for implementation as a research project.
Prerequisite: STAT 095 (or equivalent).
Normal Grade Rules
3 units

HS 298. Graduate Project
Development and analysis of independent activity in the field of community health education, health administration or school health.
Prerequisite: Approved graduate project proposal and instructor consent. Not available to Open University Students.
Notes: More than one semester may be required to complete activity.
Repeatable for credit
Mandatory CR/NC/RP
3 units

HS 299. Master’s Thesis
Supervised original research in the field of community health education.
Prerequisite: Approved master’s thesis proposal and instructor consent. Not available to Open University Students.
Notes: One to two semesters and 3 to 6 units required.
Repeatable for credit
Mandatory CR/NC/RP
3 units
UPPER DIVISION

HS 1290R. Culminating Experience Supervision
Continued work on dissertation, thesis, or project or in preparation for comprehensive exams beyond the minimum required units for cases in which final deliverables are still in progress and all other degree requirements except the culminating experience have been fulfilled.
Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class, or RP in progress.
No Degree Credit
1-3 units

RECL 100W. Writing Workshop
Developing and enhancing written communication skills in the recreation and leisure profession in the following areas: scientific/technical writing, administrative writing, public-relations-related writing and funding proposals.
GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).
Normal Grade Rules
GE: Z
3 units

RECL 106. Leisure, Life and Contemporary Society
Explore conceptual foundations of play, recreation and leisure and their importance in physical, social, psychological and spiritual development across the lifespan. Assess the roles of existing services in enhancing quality of life across social, cultural, economic and environmental realms.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

LOWER DIVISION

RECL 010. Creating a Meaningful Life
Study how a meaningful life relates to the freedom to pursue happiness. Examines personal, social, and cultural bases for a creative and successful lifestyle. Learn to recognize and foster creative potential for lifelong personal growth, meaningful rewards, and leisure enjoyment. GE Area: E
Normal Grade Rules
GE: EE
3 units

RECL 015. Human Life Span
See HS 015.
Normal Grade Rules
GE: D1
3 units

RECL 090. Foundations of Recreation Parks & Tourism
Field of parks and recreation; history of development of the recreation profession; survey of recreation and leisure services.
Normal Grade Rules
3 units

RECL 094. The Outdoor Recreation Experience
Students will explore, understand, and experience firsthand the value, meaning, and benefits of a variety of outdoor recreation activities. Socio-cultural and ecological systems will be examined as they relate to the delivery of outdoor recreation experiences in both the public and private sector.
Normal Grade Rules
3 units

RECL 097. Event Planning
Principles of event planning with emphasis on development and integration of operational strategies in recreation and hospitality management. Application of programming techniques and exploration of career opportunities in event management.
Misc/Lab: Lecture 2 hours/activity 3 hours.
Normal Grade Rules
3 units

RECL 110. Leisure, Life and Contemporary Society
Explore conceptual foundations of play, recreation and leisure and their importance in physical, social, psychological and spiritual development across the lifespan. Assess the roles of existing services in enhancing quality of life across social, cultural, economic and environmental realms.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 111. Leisure, Culture, and Identity
Perspectives of leisure as a source of self-expression and social control related to cultural beliefs, values, and practices and institutionalized social systems. Observation, analysis and critique of history and social structures, leisure and culture, and personal opportunities for change. GE Area: S
Prerequisite: Completion of core GE, successful completion of Writing Skills Test, upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

RECL 112. Foundations of Recreation Therapy
Fundamentals of the profession; history, delivery models, theory and practice of Recreation Therapy as a treatment modality for persons whose functional abilities are impaired. Exposure to ADA facility assessment, inclusion, and impact of social attitudes through didactic and experiential learning.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 113. Leisure: Philosophy and Education
Examination of philosophical, historical, psychological, and wellness foundations for education for leisure. Learning systems to facilitate the process of change through leisure opportunities for wellness.
Prerequisites: Upper division standing.
Normal Grade Rules
3 units

RECL 130. Event Marketing in Recreation Enterprises
Develop competence in event promotion and marketing. Explore marketing fundamentals, such as targeting an audience, creating promotional materials and pricing to cover event costs as well as event sponsorship. The role of social media in special themed events will be surveyed.
Prerequisite: RECL 097
Normal Grade Rules
3 units

RECL 132. Recreation Program Planning
Learn to plan and implement programs and events for diverse individual, group and community recreation experiences using contemporary needs assessment, outcomes oriented goal setting, program/event selection, leadership techniques and evaluation tools.
Normal Grade Rules
3 units

RECL 133. Principles of Recreation Leadership
In-service training workshops to develop skills in planning, implementation and evaluation processes. Self-awareness, communication and group process.
Prerequisite: Upper division standing.
Misc/Lab: Lecture 4 hours/Activity 2 hours.
Normal Grade Rules
4 units

RECL 135. Planning and Managing Rec Areas & Facilities
Content includes legal principles and risk management, as well as fundamentals of facility design and preventive maintenance in recreation, park, and tourism settings. This is a problem-based learning course, including case study, problem solving, project applications, and working with stakeholders.
Normal Grade Rules
3 units

RECL 136. Principles of Recreation and Park Administration
In the context of leadership roles and responsibilities in the field of recreation and park administration, course examines issues related to the organization and administration of human resources, finances, areas and facilities, programs, risk management, and liability.
Prerequisites: Upper Division Standing
Normal Grade Rules
3 units
Academic Year 2019-2020
Course Descriptions

RECL 140A. Spec Interventions in RT: Aquatic Therapy
Develop in-depth knowledge and skills related to the facilitation and supervision of a complex Recreation Therapy intervention. Includes equipment use, clinical application of each aspect of the activity or equipment, contraindications, safety, facilitation techniques, costs, industry standards, and evidence-based practices.
Repeatable for credit
Normal Grade Rules
1 unit

RECL 140B. Spec Inter in RT: Behavior Interventions
Theory and practice of interventions that positively affect healthy behaviors. Implementing prevention strategies including activity modification, assessment of harmful or disruptive behaviors, and identifying cause and effect relationships. Learn and practice teaching appropriate behaviors, increasing appropriate behaviors, decreasing inappropriate behaviors.
Repeatable for credit
Normal Grade Rules
1 unit

RECL 140C. Spec Inter in RT: Adventure Tx
Theoretical, hard, and soft skills related to adventure therapy interventions. Demonstrate skill development through facilitation. Learn diverse interventions and clinical application, modification, contraindications, and safety precautions for each based on psychiatric diagnosis served.
Repeatable for credit
Normal Grade Rules
1 unit

RECL 143. Festivals and Community Special Events
Principles and applications for effective management of festivals, fairs and community special events; including planning, marketing, financing, evaluating, logistics, consumer behavior, corporate sponsorship, licensing agreements, risk management, and sustainable practices.
Normal Grade Rules
3 units

RECL 144. Natural and Cultural Resource Interpretation in Recreation and Parks
Explore the interpretive approach to communicating value and vision of nature, outdoor recreation and tourism sites. Gain skills to develop and conduct activities such as guided walks, interpretive programs and fireside chats. Learn fundamentals of creating interpretive media such as brochures, displays, and exhibits as well as e-media.
Normal Grade Rules
3 units

RECL 148. Biofeedback Principles and Practices
Conceptual and historical review of Biofeedback theory and practice. Experiential engagement with software, instrumentation, data interpretation and personal reflection. Assessment, treatment, evaluation, and case studies applied to medical and non-medical practices.
Normal Grade Rules
3 units

RECL 150. For-Profit Enterprises in Recreation
Development of knowledge and skills relating to the variety and types of for-profit recreation enterprises, including planning for and management of commercial ventures; development of corporate identity and market niche, and forecasting of trends and shifts in consumer culture.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 151. Planning and Development of Tourism and Event Enterprises
Practices utilized in private profit, nonprofit and commercial sectors for planning, developing and operating leisure, tourism, and event enterprises. Management functions and consumer behavior related to products and services.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 152. Non-Profit Leadership & Management
Introduction to the historical and philosophical foundations of the Non-Profit sector. Provides a basic understanding of key issues in managing contemporary nonprofit organizations including: organizational behavior; board development; fund-raising; boundary-spanning skills; and developing leadership skills for social innovation and entrepreneurship.
Prerequisite: Upper Division Standing.
Normal Grade Rules
3 units

RECL 153. Youth Development and Services
Surveys the field of youth development, its historical roots, sociocultural and psychological development, and contemporary innovations. Develop knowledge of the institutional and programmatic factors that lead to positive developmental outcomes for youth in leisure and human service organizations.
Prerequisite: Upper Division Standing.
Normal Grade Rules
3 units

RECL 155. Outdoor Recreation Systems
Overview of outdoor recreation in the United States. Study of the historic, social, economic and political factors influencing natural resource protection. Includes a survey of organizations that manage visitors and protected areas to provide quality outdoor recreation experiences.
Prerequisite: Upper Division Standing.
Normal Grade Rules
3 units

RECL 156. Principles of Sustainable Travel and Tourism
Examination of travel and tourism as it relates to tourist motivations, hospitality and destination management. The impact of tourism on the physical, cultural and economic environment.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 157. Sustainable Recreation & Ecotourism
Course examines cultural, ethical, environmental and social science issues, and uses applied research methods to achieve competence in making programmatic and resource management decisions for recreational and tourism purposes.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 158. Cultural and Heritage Tourism
Heritage experiences leading to deeper cultural understanding are essential in the tourism segment of recreation. Exploration of culture and heritage using the lens of growth, popularity or compression will be examined. Discussion on practices and concerns associated with cultural heritage-based tourism.
Normal Grade Rules
3 units

RECL 160. Evaluation and Research in Recreation
Students will learn about the systematic process for evaluation or research. The course focuses on three main areas: Criteria and research questions, evidence and data (data collection and data analysis), and judgment and interpretation. The course is for students interested in basic information about systematic inquiry using evaluation and research design, data collection and analysis, and data reporting.
Prerequisite: RECL 090, RECL 100W, RECL 110
Corequisite: RECL 136.
Normal Grade Rules
3 units
RECL 165. Senior Seminar in Recreation
A capstone experience designed to help students synthesize and further develop skills acquired in program planning and development, implementation, and evaluation. Emphasis placed on negotiation of all phases of designing and facilitating meaningful recreation experiences in a variety of agencies and communities. Prerequisite: Completion of 36 units of RECL coursework including RECL 90, RECL 97, RECL 110 and RECL 113. Major form completed and signed by HSR advisor and chair. Senior standing. Normal Grade Rules 3 units

RECL 169. Practicum in Recreation Therapy
Supervised 100 hour competency-based field learning in approved health agency (e.g., hospital, community health, municipal). Learning exposes the learner to different populations, interventions, terminology, resources. Learner will observe job task skills, apply knowledge, and gain abilities of Recreation Therapy practice. Pre-requisites: RECL 90
Credit / No Credit 1 unit

RECL 170A. Pre-Intern Workshop
Introduces and prepares upper division majors for senior internship. Includes career goal clarification, resume development and interviewing through both workshops and online delivery. Prerequisites: RECL 090, RECL 100W, RECL 110. Co-requisites: RECL 136, RECL 137
Credit / No Credit 1 unit

RECL 170B. Internship in Recreation
Supervised 40-hour per week internship (minimum of 12 weeks) in one of a variety of approved agencies (leisure services, park and recreation, or tourism/commercial recreation). Prerequisites: Upper division standing; RECL 136, RECL 160, RECL 170A.
Credit / No Credit 10 units

RECL 170C. Internship in Recreation Therapy
Supervised 40-hour per week internship (minimum 15 weeks, 600 hours) occurring in approved health agencies. Supervisor must have a valid CTRS credential. Student will develop competencies as identified in the NCTARC Job Task Analysis and ATRA Standards of Practice. Credit / No Credit 10 units

RECL 180. Individual Studies
Individual work investigating special topics/problems through research, applied projects, and/or field experiences. Assessment by project(s) and/or paper(s). Prerequisites: Upper division standing, supervising instructor approval, and department chair consent. Repeatable for credit Credit / No Credit 1-4 units

RECL 184. Directed Reading
Directed reading in journals and books by authorities in Hospitality, Recreation, Tourism and related fields. Assessment by project(s) and/or paper(s). Prerequisite: Upper division standing, supervising instructor approval, and department chair consent. Repeatable for credit Credit / No Credit 1-4 units

RECL 185. Leisure, Recreation and Aging
Theory and practice related to the role of leisure services in maximizing the quality of life for older adults. Interrelationship of leisure and other supportive services for older adults in community and institutional settings. Prerequisite: Upper division standing. Normal Grade Rules 3 units

RECL 187. Leisure Education in Recreation Therapy
Overview of leisure education as it is used both in medical and non-medical settings to improve functioning and wellbeing among diverse clientele. Students will learn historical, philosophical, and contemporary conceptual foundations, evidence-based and practical applications to service delivery. Normal Grade Rules 3 units

RECL 193. RT Interventions for People with Physical Conditions
Theoretical foundations, research, and evidenced based Recreation Therapy interventions for persons with physical, intellectual, and developmental disabilities and other chronic conditions. Focuses on rehabilitation, community reintegration, day programs, and inclusion. Prerequisite: Upper division standing
Normal Grade Rules 3 units

RECL 197. Recreation Therapy in Mental Health
Application of theory, models, concepts and facilitation processes used in Recreation Therapy and related professions for people with mental health conditions. Experiential learning and facilitation of leisure education, clinical interventions, and behavioral change processes used in medical and non-medical settings. Prerequisite: Upper division status, RECL 112 and RECL 113
Misc/Lab: Lecture 2 hours/activity 2 hours. Normal Grade Rules 3 units

RECL 198. Rec Therapy Assessment and Documentation
Clinical procedures utilized in Recreation Therapy whereby habilitation/rehabilitation is the primary goal, client assessment, development of behavioral objectives and treatment plans, evaluation, documentation, medical terminology, and charting procedures are covered. Extensive skill development regarding critique and development of assessment tools.
Normal Grade Rules 3 units

RECL 199. Advanced Practices in Recreation Therapy
The application and examination of concepts, techniques, research, and legal issues utilized by advanced practitioners and managers. Includes trends and issues related to clinical supervision, reimbursement, quality improvement, legislation, comprehensive program design, and applied research that produces evidenced based practice.
Prerequisite: RECL 112
Normal Grade Rules 3 units

RECL 200. Foundations of Recreation and Tourism
Basic philosophical, historical, and scientific foundations and developments in leisure, recreation and tourism; analyses of the significance of leisure in modern societies; critical review of major and classical writings in the field with special attention to academic writing.
Corequisite: RECL 110
Normal Grade Rules 3 units

RECL 202. Evaluation and Assessment in Recreation and Tourism
Acquires knowledge and principles of evaluating selected areas in recreation and tourism services. Through use of analytical tools and processes, students learn how to write evaluation report to meet stakeholders’ information and decision-making needs.
Prerequisite: RECL 200
Normal Grade Rules 3 units

RECL 203. Seminar in Recreation-Park Administration
A discussion of selected problems and their possible solutions dealing with personnel administration, planning of recreation and park areas and facilities, program organization, public relations, financial procedure, legal aspects of recreation, etc.
Normal Grade Rules 3 units
RECL 204. Research Methods in Recreation and Tourism
A critical examination of the various approaches and methods used in research; a survey of research design, data collection, data coding, and analysis in the recreation, tourism, and related fields.
Prerequisite: RECL 202 or instructor consent.
Normal Grade Rules
3 units

RECL 205. Finance in Recreation
Examination of bases, sources and strategies for financing and marketing of recreation programs and services. Includes public, private-for-profit, nonprofit and commercial leisure service agencies.
Normal Grade Rules
3 units

RECL 210. Contemporary Theories in Recreation and Tourism
Reviews theoretical and empirical social science literature in recreation and tourism. Review, interpretation and evaluation of contemporary research in recreation, leisure, tourism, and related fields.
Prerequisite: RECL 200.
Normal Grade Rules
3 units

RECL 211. Therapeutic Recreation Practices
Development and analysis of individualized program plans based upon selected theoretical foundations; emphasis on assessment, program design, follow-up services. Major service delivery systems studied in depth with regard to implications for leisure service delivery affecting disabled or ill individuals.
Normal Grade Rules
3 units

RECL 212. Facilitation and Intervention in Therapeutic Recreation
Theories of intervention and facilitation integrated with methodology to recognize the interdependence of the individual and the environment. Direct and enabling technique application to the therapeutic recreation profession analyzed for situational effectiveness.
Normal Grade Rules
3 units

RECL 213. Advanced Professional Therapeutic Recreation Practices
Professional practices, including in-service and pre-service training, consultation and group facilitation; processes for addressing professional trends and issues, including credentialing, legislative processes, interdisciplinary service delivery and networking.
Prerequisite: RECL 211 and RECL 212.
Normal Grade Rules
3 units

RECL 214. Study of Tourism Issues
Study of contemporary and emerging tourism issues. Includes governmental and international tourism policies, trends, and practices. Includes application and development of tourism research.
Normal Grade Rules
3 units

RECL 215. International Tourism Trends and Issues
Analyzes international tourism concepts, trends, and issues associated with development. Study goals and procedures for basic and applied tourism research and introduces varied information sources for independent research. Adopt a culturally sensitive perspective for interpreting information related to different cultures.
Normal Grade Rules
3 units

RECL 216. Marketing for Tourism and Recreation
Study of characteristics which define cultural groups around the world. Learn to adjust marketing approaches, materials, and technology to accommodate the different ways people communicate to attract specific markets. Includes field-based market research.
Normal Grade Rules
3 units

RECL 217. Information Technology and Tourism
Analysis of concepts, trends, and issues associated with technology and tourism development. History and applications of various information technologies in tourism businesses. Trends in technology and the impact on the travel industry.
Normal Grade Rules
3 units

RECL 218. Tourism Planning and Development
Review, analysis, and application of concepts, strategies, techniques, and approaches associated with destination tourism planning, development, and management. Emphasis is on integrated and sustainable tourism planning and development models at global, national, regional, and local/community levels.
Normal Grade Rules
3 units

RECL 219. Cultural and Heritage Tourism
Introduction to the concerns and issues involved in studies of heritage, tradition, historic preservation, public archaeology, and heritage tourism.
Normal Grade Rules
3 units

RECL 265. Graduate Research Seminar
Presentation, discussion, and evaluation of leisure research.
Prerequisite: RECL 200, RECL 202, or instructor consent.
Normal Grade Rules
3 units

RECL 270. Graduate Internship in Recreation and Tourism
A 12-week, 15 hours per week of applied management experience in a leisure service or tourism organization under the joint supervision of a faculty advisor and an organizational representative.
Prerequisite: RECL 200, RECL 202, RECL 204.
Normal Grade Rules
3 units

RECL 298. Special Studies
Individual work investigating special topics/problems through research and/or applied projects.
Prerequisite: RECL 202
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

RECL 299. Master’s Thesis
Supervised thesis in the field of recreation or tourism.
Prerequisite: Admission to candidacy for the master’s degree; RECL 202
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
History Department Courses
HISTORY

LOWER DIVISION

HIST 001A. World History to 1500
Introduces students to the world's regions and civilizations as interconnected entities. HIST 1A examines the growth and development of traditional civilizations to 1500. HIST 1B surveys the transformation of civilizations since 1500.
Normal Grade Rules
3 units

HIST 001B. World History from 1500
Introduces students to the world’s regions and civilizations as interconnected entities. HIST 1A examines the growth and development of traditional civilizations to 1500. HIST 1B surveys the transformation of civilizations since 1500.
Normal Grade Rules
3 units

HIST 010A. Western Civilization
History and culture of Europe; social and political structures; roles of individuals and groups; relationships among ideas, institutions, society and culture, to 1648.
GE Area: D2
Normal Grade Rules
GE: D2
3 units

HIST 010B. Western Civilization
History and culture of Europe; social and political structures; roles of individuals and groups; relationships among ideas, institutions, society and culture, to 1648.
GE Area: D2
Normal Grade Rules
Normal Grade Rules
3 units

HIST 015. Essentials of U.S. History
Treatment of essentials of U.S. history. Satisfies the American Institutions requirement in U.S. history (US1) and the Core GE requirement in Social Sciences: Comparative Systems, Cultures, and Environments (D2).
GE Area: D2 and American Institution Requirement: US1
Normal Grade Rules
GE: M12
3 units

HIST 020A. History of the American People
Survey of continuity and change in society, culture, institutions and environment. Origins through slavery conflict. American Institutions: US1
Normal Grade Rules
GE: US1
3 units

HIST 020B. History of the American People
Survey of continuity and change in society, culture, institutions and environment. Emergence of modern society and world power status. American Institutions: US2
Normal Grade Rules
GE: US1
3 units

HIST 050. Historical Process: Understanding Historical Reasoning
Modes and skills of practical logic and reasoning through study of historical method. Historical problems examined to that end. GE Area: A3
Normal Grade Rules
GE: A3
3 units

HIST 099. History Fundamentals
An introduction to the skills, technology and technique of history reading, writing and research. It is a prerequisite to History 100W. Sophomores and transferring juniors are required to take this course.
Prerequisite: Open to History and Social Science Teacher Preparation majors only; lower or upper division standing.
Normal Grade Rules
3 units

UPPER DIVISION

HIST 100W. History Writers’ Workshop
Development of skills required for the art and practice of historical research and writing. Library research, oral reports and written exercises dealing with a variety of historical problems. GE Area: Z
Prerequisite: HIST 099 required or Department permission. History majors only. A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Normal Grade Rules
GE: Z
3 units

HIST 102. Historiography
Critical study of the writings of great historians.
Prerequisite: HIST 099 and HIST 100W.
Normal Grade Rules
4 units

HIST 104. Advanced Topics in Ancient History
An investigation in depth of selected periods or topics in Ancient history. Repeatable for credit when topic changes up to 8 units.
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units

HIST 109A. History of China
Traditional society from earliest times to 1800.
Prerequisite: Upper Division Standing
Normal Grade Rules
4 units

HIST 109B. History of China
China's revolutions and ongoing modernization.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

HIST 110A. History of Japan
Development of state and society from prehistoric times to 1750. Major topics include the controversy over the origins of the Japanese people; the adaptation of Chinese cultural, religious, and political models; the role of the emperor in state formation; the classical era of Japanese culture during the Heian period; the rise of the samurai elites; and the development of military rule under the shoguns.
Prerequisite: Upper division standing or consent of instructor.
Normal Grade Rules
4 units

HIST 110B. History of Japan
Since 1750 emphasizing the process of modernization.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

HIST 111. Special Topics in Jewish Studies
See JWSS 111
Repeatable for credit
Normal Grade Rules
3 units
HIST 112. Ancient West to 500 BCE
Political, social, and cultural history of the Ancient West (Europe, the Middle East, and North Africa), from ca. 15,000 BCE to 500 BCE.
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 113A. Economic History of the United States
See ECON 113A
Normal Grade Rules
4 units

HIST 113B. Economic History of Europe
See ECON 113B
Normal Grade Rules
4 units

HIST 114. The Ancient West, 500 BCE-400 CE
Political, social, and cultural history of the Ancient West (Europe, the Middle East, and North Africa), from ca. 500 BCE to 400 CE.
Prerequisites: Upper division standing or instructor consent
Normal Grade Rules
4 units

HIST 121A. Medieval Worlds, 400-1000
This course surveys European Medieval History from the late fourth century through the first millennium. It examines the political, economic, social, cultural, and religious changes that constituted the transformation of the antique world into a unique "European" civilization.
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 121B. Medieval Worlds, 1000-1500
From 1000 - 1500 emphasizing growth of papal power, commercial revolution and revival of urban life, twelfth century Renaissance, interactions between the European, Byzantine, and Islamic worlds, and late medieval transformations leading to modernity
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 122. The Renaissance and Reformation
The European world in transition from 1400-1600
Prerequisite: Upper Division Standing
Normal Grade Rules
4 units

HIST 124. Early Modern Europe
The European world in transition from 1580 to 1750. A continuation of History 122, exploring the central place of the princely court in the transformation of politics, religion, art, culture, science, technology and philosophy. Introduction to the Enlightenment.
Prerequisite: Upper Division Standing
Normal Grade Rules
4 units

HIST 126. Advanced Topics in Medieval History
An investigation in depth of selected periods or topics in Medieval history. Repeatable for credit when topic changes for up to 12 units.
Prerequisites: Upper division standing or instructor consent
Repeatable for credit
Normal Grade Rules
4 units

HIST 132. Advanced Topics in World History
Aspects of world history under various topics. Repeatable for credit when topic changes for up to 12 units.
Prerequisites: Upper division standing or instructor consent
Repeatable for credit
Normal Grade Rules
4 units

HIST 143. Europe, 1750-1900
Major political, economic, social and cultural themes of European history from the Enlightenment to 1900.
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 144. Europe, 1900-1945
A history of political, economic, social and cultural developments in Europe during the era of the two world wars.
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 145. Europe and the World Since 1945
Political, economic and social developments since World War II, with emphasis on Europe
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 146. Advanced Topics in European History
An investigation in depth of selected periods or topics in European history. Repeatable for credit when topic changes up to 12 units.
Prerequisites: Upper division standing
Repeatable for credit
Normal Grade Rules
4 units

HIST 153. History of Women in Europe
Changes in women's private and public roles in diverse national, class, religious, ethnic and racial contexts from Ancient Greece to Modern Europe. GE Area: V
Prerequisite: Completion of Core GE, satisfaction of Writing Skills Test and upper division standing.
Students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

HIST 155. 20th Century World
Global perspectives on a century of scientific progress that also saw the violent deaths of millions, with emphasis on the decline of traditional imperialism and the ideological contention that led to World War II and the Cold War. GE Area: V
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

HIST 162. Colonial Latin America
The course covers the colonial administration and society of the Spanish and Portuguese colonies in the New World. I also look at social, economic, and political conditions of the Iberian Peninsula and of the Amerindian empires on the eve of the conquest. The course concludes with an overview of the independence movements in Hispanic America and Brazil.
Pre-requisites: Upper division standing or instructor consent
Normal Grade Rules
4 units

HIST 163. Modern Latin America, 1800-Present
Latin America since 1800. Focus on major political changes, such as independence, wars, popular uprisings, and systems of government. Also economic and cultural affairs, especially when they disrupt existing societies, and outstanding leaders who charted their nations’ destinies.
Prerequisites: Upper division standing or instructor consent
Normal Grade Rules
4 units

HIST 165. Advanced Topics in Latin American History
An investigation in depth of selected periods or topics in Latin American history. Repeatable for credit when topic changes up to 12 units.
Prerequisites: Upper division standing or instructor consent
Repeatable for credit
Normal Grade Rules
4 units
HIST 170. Topics in American History
An investigation in depth of selected periods or problems. Repeatable for credit when topic changes. American Institutions Requirement: US1
Prerequisite: Upper division standing.
Note: No credit for history majors or minors.
Repeatable for credit
Normal Grade Rules
GE: US1
3 units

HIST 170S. Topics in American History: American Identities and Institutions
An investigation in depth of selected periods or problems. This topic focuses on historical relationships between social groups and the political, social, economic and cultural institutions they created. GE Area: S and American Institutions Requirement: US1
Prerequisites: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: US1
3 units

HIST 171. U.S. Constitutional & Legal History
Origins and evolution of the United States Constitution and federal system from the American Revolution to the present. Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

HIST 173. New World Encounters, 1400-1750
Examines the first wave of European expansion, from 1400-1750, through the prism of cultural and religious interactions. Explores how Europeans, Africans, and Indians understood each other during European exploration, conquest, and colonization of the “New World”.
Prerequisite: Upper division standing or instructor consent.
Notes: Offered only occasionally.
Normal Grade Rules
4 units

HIST 174. Colonial & Revolutionary America
Investigates the socioeconomic development of British North America from the 1600s to the era of the American Revolution. Examines how mentalities, voluntary and involuntary immigration, demographic catastrophes, rebellions, and religious revivals shaped the British Atlantic.
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 175. Inventing America, 1800-1860
The history of the United States from 1800-1860. Topics include the rise of democratic political culture, industrialization, the emergence of a market economy, pivotal changes in institutions such as the family and church and the redefinition of key American values.
Prerequisites: Upper division standing
Normal Grade Rules
4 units

HIST 176. The Civil War and Reconstruction
Course takes a topical approach, examining the political, social, economic, military, and ideological dimensions of the Civil War and Reconstruction. Focus will be on the war and its aftermath as a revolutionary experience rather than solely as a military struggle.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

HIST 177. Industrial America, 1877-1920
Economic, social, and political history from the end of Reconstruction to the achievement of women’s suffrage. Topics include the triumph of industrial capitalism, labor conflict, women’s suffrage, Populism/Progressivism, race/ethnicity, and World War I.
Prerequisites: Upper division standing or instructor consent.
Normal Grade Rules
4 units

HIST 178. Crash, Depression and War, 1920-1950
The United States from the “Roaring Twenties” through the Great Crash, the Great Depression, the New Deal, World War II, the home front, the Atomic Age, and the beginning of the Cold War.
Prerequisites: Upper division standing or instructor consent.
Normal Grade Rules
4 units

HIST 179. Cold War America, 1950-Present
Modern history of the United States since 1950 including the Cold War, the Korean and Vietnam wars, the Civil Rights Movement, postwar society, culture, economics and politics.
Prerequisites: Upper division standing or instructor consent.
Normal Grade Rules
4 units

HIST 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: History majors or minors.
Repeatable for credit
Credit / No Credit
1-4 units

HIST 181. Advanced Topics in American History
An investigation in depth of selected periods or topics in American history. Repeatable for credit when topic changes up to 12 units.
Prerequisites: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units

HIST 184. Directed Reading
Directed reading on a specific topic in history.
Prerequisite: History major/minor and instructor and department chair consent.
Repeatable for credit
Credit / No Credit
1-4 units

HIST 188. History of Women in the United States
A multi-faceted history of women in the United States from colonial times to the present. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Repeatable for credit
Normal Grade Rules
GE: S
3 units

HIST 189A. California History to 1900
Topics include Native American civilizations, Spanish discovery and missions, the Mexican era, the American conquest, the Gold Rush, Chinese immigration, the railroad, growth, development, politics and class conflict. American Institutions Requirement: US3
Prerequisite: Upper division standing or instructor consent.
Notes: Satisfies American Institutions requirement in California government.
Normal Grade Rules
GE: US3
4 units

HIST 189B. California History Since 1900
Social, political, and economic history of California since 1900. American Institutions Requirement: US3
Prerequisite: Upper division standing or instructor consent.
Notes: Satisfies American Institutions requirement in California government.
Normal Grade Rules
GE: US3
4 units
HIST 197. Introduction to Public History
Introduction to preservation and presentation of history to the community and to roles historians play in public agencies. Exploration of archives, museums and historic sites. Required for admission to Public History internship. Prerequisite: Upper division standing or consent of instructor. Normal Grade Rules 4 units

HIST 199. Public History Internship
Supervised placement in historical organizations, public institutions and community agencies concerned with preservation of history. May be repeated for 6 unit maximum. Prerequisite: Instructor consent. Repeatable for credit Credit/No Credit 3 units

GRADUATE

HIST 200. Graduate Methodology, Research and Writing
An orientation to history graduate study focusing on the critical advanced writing, library, research and historiographical skills needed for success as a graduate student and professional historian. Includes an overview of current methodologies and trends in the field. Normal Grade Rules 4 units

HIST 209. Colloquium in Ancient and Medieval Europe
Intensive readings, discussions and reports on Ancient and Medieval Europe. For areas and field of emphasis see the schedule of classes. May be repeated when content changes. Prerequisites: Graduate standing or instructor consent Note: This course satisfies graduate-level GWAR in this master’s program. Repeatable for credit Normal Grade Rules GE: GWAR 4 units

HIST 210A. Advanced Colloquium United States History
Intensive readings, discussions, and reports on American history in the seventeenth and eighteenth centuries. Repeatable for credit once with different instructor. Prerequisites: Graduate standing Repeatable for credit Normal Grade Rules GE: GWAR 4 units

HIST 210B. Advanced Colloquium United States History
Intensive readings, discussions, and reports on American history in the nineteenth century. Repeatable for credit once with different instructor. Prerequisites: Graduate standing Note: This course satisfies graduate-level GWAR in this master’s program. Repeatable for credit Normal Grade Rules GE: GWAR 4 units

HIST 210C. Advanced Colloquium United States History
Intensive readings, discussions, and reports on American history in the twentieth century. Repeatable for credit once with different instructor. Prerequisites: Graduate standing Note: This course satisfies graduate-level GWAR in this master’s program. Repeatable for credit Normal Grade Rules GE: GWAR 4 units

HIST 211. Advanced Colloquium in Modern Europe
An intensive study of some area, problem or period in Medieval Europe. Individual research with oral and written reports. Topics have included the Cold War, European diplomacy and international security. Prerequisite: Graduate standing Note: This course satisfies graduate-level GWAR in this master’s program. Normal Grade Rules GE: GWAR 4 units

HIST 212. Seminar in Ancient and Medieval Europe
An intensive study of some area, problem or period in Ancient or Medieval Europe. Individual research with oral and written reports. May be repeated for up to 8 units with different instructor or topic. Prerequisite: Graduate standing Note: This course satisfies graduate-level GWAR in this master’s program. Repeatable for credit Normal Grade Rules GE: GWAR 4 units

HIST 213. Seminar in Pre-Twentieth Century Europe
An intensive study of some area, problem or period in European history before 1900. Topics have included economic, social and gender differences in Industrial Europe and social theories of Max Weber. May be repeated when content changes. Prerequisite: Instructor consent. Note: This course satisfies graduate-level GWAR in this master’s program. Repeatable for credit Credit/No Credit 3 units

HIST 214. Seminar in Twentieth Century Europe
An intensive study of some area or problem. Individual research with oral and written reports. Topics have included the Cold War, European diplomacy and international security. Prerequisite: Graduate standing Note: This course satisfies graduate-level GWAR in this master’s program. Normal Grade Rules GE: GWAR 4 units

HIST 215. Seminar in American Diplomatic History
An intensive analysis of some chronological period, area or major problem in American diplomatic history. Individual research with oral and written reports. Prerequisite: Graduate standing Note: This course satisfies graduate-level GWAR in this master’s program. Repeatable for credit Normal Grade Rules GE: GWAR 4 units
HIST 274. Seminar in US Social & Cultural History
An intensive study of some phase of American social, cultural, and/or intellectual history. Individual research with oral and written reports. Topics have included class, race, ethnic, and gender differences. May be repeated when content changes. Repeatable for up to 8 units when topic changes.
Prerequisite: Graduate standing or instructor consent.
Repeateable for credit
Normal Grade Rules
4 units

HIST 276. Seminar in Early American History
An intensive study of some phase in, or problem of, American history from colonial period through the Civil War. Topics have included American independence from British control, the development of the industrial North and the colonization of the West. May be repeated when content changes.
Prerequisite: Instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
4 units

HIST 280. Seminar in Recent American History
An intensive study of some phase or problem in the period from the Civil War to the present. Individual research with oral and written reports. May be repeated when content changes.
Prerequisite: Graduate standing or instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
4 units

HIST 283. Seminar in California and Western History
An intensive study of an area, phase or period of history associated with California or the West. Individual research with oral and written reports. May be repeated for credit when course content changes.
Prerequisite: Graduate standing and instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
4 units

HIST 288. Seminar in the History of Women in the United States
An intensive study of some phase of the history of women in the United States. Individual research with oral and written reports.
Prerequisite: Graduate Standing
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
4 units

HIST 298. Special Study
Advanced individual research.
Prerequisite: Instructor consent and approval by graduate advisor.
Notes: More than 3 units only in areas where graduate courses not normally offered.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

HIST 299. Master’s Thesis or Project
Open only to approved master’s candidates in history. Reserved for students under Plan A.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units

UPPER DIVISION

HIST 1290R. Culminating Experience Supervision
This course is offered in special sessions for 1 unit. It is repeatable up to 32 times. It is required of, and limited to, graduate students who have an outstanding RP grade in a preceding semester in a project or thesis class. If one has an outstanding RP, this course must be taken unless the student is enrolled in any other course. By outstanding, it is meant that the RP grade has not been changed to any other grade, including a CR or NC. The RP grade in the project or thesis course remains on the official record until a culminating memo has been submitted by the graduate advisor to the Office of Graduate Admissions & Program Evaluations and the course instructor of the class in which an RP was received has petitioned for a grade change to CR. This course receives no degree credit and therefore cannot be used on the candidacy form or to fulfill graduation requirements.
Prerequisite: HIST 299
Note: No Degree Credit
Repeatable for credit

Hospitality, Tourism, and Event Management Courses

HOSPITALITY MANAGEMENT

LOWER DIVISION

HSPM 001. Introduction to Hospitality Management
Overview of structure and financial performances of hospitality industry; food and lodging, resorts, tourism enterprises, attractions and related operations. Focus on orientation to customer service, cultural/economic trends and career opportunities.

Prerequisites: HSPM 001, HSPM 065.
Corequisite: HSPM 001
Normal Grade Rules
3 units

HSPM 011. Restaurant Management
Overview of food and beverage with emphasis on food quality.

Prerequisites: HSPM 001, HSPM 065.
Corequisite: HSPM 001
Normal Grade Rules
3 units

HSPM 012. Cost Control in Hospitality
Food, beverage and payroll systems, including standards determination; variable, semi-variable and fixed costs; the operating budget; income and cost control and menu pricing. Cost control simulation exercises implemented through software programs.

Prerequisites: HSPM 001, BUSI 020N.
Corequisite: HSPM 11 and HSPM 65
Normal Grade Rules
3 units

HSPM 020. Sanitation and Environmental Issues in the Hospitality Industry
See NUFS 020.

Normal Grade Rules
2 units

HSPM 022. Catering and Beverage Management
See NUFS 022.

Normal Grade Rules
2 units

HSPM 023. Culinary Concepts
Food and beverage production techniques; preparation of food and beverage with emphasis on quality standards.

Normal Grade Rules
3 units

HSPM 065. Professional Seminar in Hospitality Mgmt
Designed for students who have declared a major in the Hospitality, Tourism and Event Management degree. The topics selected will facilitate the student’s entry into the academic program and the profession of hospitality management.

Corequisite: HSPM 001.
Normal Grade Rules
1 unit

HSPM 086. Special Events Management in Hospitality
Hands-on experience in the operation, coordination, and management of special events as they relate to hospitality and tourism. Students develop management skills and experience in planning and execution of a major event.

Repeatable for credit
Normal Grade Rules
3 units

UPPER DIVISION

HSPM 100W. Writing Workshop
Developing and enhancing written communication skills in the hospitality, recreation and tourism professions in the following areas: scientific/technical writing, administrative writing, public-relations-related writing and funding proposals. GE Area: Z

Prerequisites: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.

Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).

Normal Grade Rules
GE Z
3 units

HSPM 101. Multicultural & Intl Issues in Hospitality
Multicultural/international issues in the hospitality industry; historical, socioeconomic, cultural and linguistic variables presented in relationship to these issues.

Prerequisite: HSPM 001.
Normal Grade Rules
3 units

HSPM 103. Facility Planning and Design in Hospitality
Project development sequencing, space and building operations planning, financing, asset management, industry practices, renovation, environmental impact and public relations.

Prerequisite: Upper division standing
Normal Grade Rules
3 units

HSPM 104. Hospitality Marketing
Applying marketing principles, theories, and concepts in developing marketing strategies for hospitality, recreation and tourism organizations in a dynamic business environment. Emphasis is placed on marketing mix, market segmentation and analysis, sales planning, and public relations.

Prerequisites: HSPM 001, HSPM 065, BUS 20 or BUS 20N
Normal Grade Rules
3 units

HSPM 105. Finance in Hospitality
This course provides an introduction to the fundamentals of hotel and restaurant finance and develops an understanding of the strategic roles and financial analysis and finance play in internal management decision-making.

Prerequisites: HSPM 001, HSPM 65, BUSI 020 or BUSI 020N, HSPM 102
Normal Grade Rules
3 units

HSPM 106. Legal Aspects of Hospitality Management
Introduction to fundamental legal issues and concepts related to the fields of hospitality, recreation and tourism. Content will include legal process, source of law, organization structure, and a survey of selected legal principles from the areas of employment, public health and safety, contract, negligence, premise liability, personal property, environmental and constitutional law.

Prerequisite: HSPM 011, HSPM 65, BUSI 020 or BUSI 020N
Normal Grade Rules
3 units

HSPM 107. Hospitality Information Systems
Focuses on the application of various information systems to the management of facilities, programs, services, finances and accounting, products, marketing and sales, human resources and other major functions of hospitality, recreation, and tourism organizations/ agencies.

Prerequisite: HSPM 1, HSPM 65, BUS 20 or BUS 20N, HSPM 102
Normal Grade Rules
3 units
HSPM 111. Customs and Courtesies in Hospitality
An exploration of a variety of customs and courtesies that demonstrate the influences of history, traditions, social customs, religious beliefs, language, and other cultural elements on hospitality service etiquette and manners in different cultures and countries.
Normal Grade Rules
3 units

HSPM 121. Hospitality Leadership and Management
This course acquaints students with the theory and practice of management and leadership principles in a hospitality operation. Topics include: manager's roles, leadership principles, goal setting, power and empowerment, communication skills, coaching and team building, diversity, career planning, and organizational development.
Prerequisite: HSPM 001, HSPM 065
Normal Grade Rules
3 units

HSPM 130. Hospitality Event Production
Planning and execution of a hospitality event. Topics include strategic planning, event design, event project management, event related technology, financial management, human resources, event marketing, and on-site management.
Normal Grade Rules
3 units

HSPM 134. Human Resource Management
Explores HR functions in business settings with a focus on development of knowledge and skills needed by managers. Supervisor’s role within organizations with emphasis on recruitment, selection, staff training and development, legal issues, performance appraisal, motivational strategies, public relations, and maintenance of effective environments.
Prerequisite: HSPM 001, HSPM 065, BUS1 20 or BUS1 20N
Normal Grade Rules
3 units

HSPM 140. Meeting, Convention and Event Industry
Leisure service system planning through explanation of the scope and segmentation of the conference, convention and event market. Strategies in planning, developing and implementing meeting and convention services.
Prerequisite: HSPM 001, HSPM 065, BUS1 020 or BUS1 020N
Normal Grade Rules
3 units

HSPM 141. Resort and Club Management
Management and operation of resort and private club properties from their historical development to their economic and environmental impact; marketing and managing of services provided by these facilities within the leisure industry.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

HSPM 142. Tradeshows Event & Meeting Mgmt
Management and operations of tradeshows from business, economic and hospitality service perspectives; understanding the marketing, fiscal, and evaluative processes necessary to provide large scale meetings including hotel negotiations, food service, contract negotiation, and onsite management.
Prerequisites: HSPM 140 or instructor consent.
Normal Grade Rules
3 units

HSPM 143. Tourism Destination Marketing and Management
Principles of destination marketing and management in formulating strategies to promote tourism in a variety of locations. Appraising a destination’s potential and developing a destination’s products/services and marketing campaign to attract both business and leisure travelers.
Prerequisite: HSPM 1, HSPM 11, HSPM 102, HSPM 130
Normal Grade Rules
3 units

HSPM 148. Wine Appreciation
Introduces the student to the significance of wine in the dining experience. The class will study the wine-making process, wine grape varieties, health and legal issues of wine and include in-class evaluation of wine.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

HSPM 149. Beer Appreciation
Examining the history, business and economic impact of beer from its international brewery markets to the small craft beer distributors. Explore beer styles, regions, brewing processes and food pairings through weekly tastings and sensory applications of the principles of beer making.
Normal Grade Rules
3 units

HSPM 152. Hotel Catering and Banquet Management
Overview of hotel group sales, convention services, catering sales and banquet operations. Learn tools and applications necessary to be successful in providing catering and banquet operations for hotel, restaurant, or corporate events.
Prerequisites: HSPM 001, HSPM 11, HSPM 12, HSPM 065, HSPM 102
Normal Grade Rules
3 units

HSPM 154. Revenue Management
Formulating tactical pricing decisions to maximize revenues for hospitality organizations. Topics include: history of revenue management, reservation systems, forecasting demand, inventory control, cost analysis, pricing strategy, channel management, revenue management tactics, and applications.
Prerequisites: HSPM 001, HSPM 065, BUS1 020 or BUS1 020N, HSPM 102
Normal Grade Rules
3 units

HSPM 161. Cruise Operations and Management
This course examines the major aspects of cruise operations and management including history, global cruise market, economic significance, geography of cruising, itinerary design, anatomy of a cruise ship, operations, sales and marketing procedures, passenger services, event planning and management, and career opportunities.
Prerequisite: HSPM 1, 135, 138, 145
Normal Grade Rules
3 units

HSPM 165. Gaming Management
Introduction to the casino’s external environments and the casino’s impact on the consumer and the local economy. Topics cover the history of gaming and gaming development, casino organization and operation, the mathematics of casino games, and casino management.
Prerequisite: HSPM 1 or instructor consent
Normal Grade Rules
3 units

HSPM 168. Entrepreneurship in Hospitality
Explores the entrepreneurial opportunities available in the public, non-profit, and private sectors by examining the process of creating, planning, and managing hospitality, recreation, and tourism ventures, programs, and services.
Prerequisite: HSPM 001, HSPM 065, BUS1 020 or BUS1 020N, Senior Standing.
Normal Grade Rules
3 units

HSPM 177. Hospitality Service Management
Develop skills in setting formal service standards and procedures to deliver customer experience and evaluate service quality for hospitality businesses. Topics include service experience design, psychological/social characteristics of customer satisfaction, service delivery processes, consumer/server encounters, service quality, and service recovery.
Prerequisite: HSPM 001, HSPM 011, HSPM 065, HSPM 102, HSPM 130, Senior Standing.
Normal Grade Rules
3 units
**HSPM 180. Individual Studies**
Investigation of special problems, including research project and/or field experience.
Prerequisite: Instructor consent. Not available to Open University Students.
Credit / No Credit
1-3 units

**HSPM 184. Directed Reading**
Directed reading in journals and books by authorities in Hospitality, Recreation, Tourism and related fields. Assessment by project(s) and/or paper(s).
Prerequisite: Upper division standing, supervising instructor approval, and department chair consent. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-4 units

**HSPM 186. Strategic Management**
A capstone course focuses on the development and evaluation of management strategies with special emphasis on hospitality, recreation and tourism fields.
Prerequisite: HSPM 001, HSPM 065, BUS 1020 or BUS 1020N, Senior Standing.
Normal Grade Rules
3 units

**HSPM 191A. Internship Level 1**
Supervised professional broad-based work experience in hospitality management industry for a total of 200 hours.
Prerequisite: HSPM 001, HSPM 065, HSPM Major only. Not available to Open University Students.
Mandatory CR/NC/RP
2 units

**HSPM 191B. Internship Level 2**
Supervised professional in-depth work experience in hospitality management industry for total of 300 hours.
Prerequisites: HSPM 001, HSPM 065, BUS 1020 or BUS 1020N, HSPM Major only. Not available to Open University Students.
Credit / No Credit
3 units

**HTEM 201. Contemporary Issues**
Current trends and issues within major sectors of tourism industry. Includes transportation, lodging, food and beverage services, event management, and destination management. Focus on challenges faced by hospitality, tourism and event management organizations.
Normal Grade Rules
3 units

**HTEM 202. Marketing Research in HTEM**
Fundamental principles, processes, and roles of marketing research. Research design, research ethics, and qualitative and quantitative research methods. Research proposal development.
Normal Grade Rules
3 units

**HTEM 212. Strategic Use of IT**
Strategic application of information technologies for competitive advantage in hospitality, tourism and event management. Analysis, assessment, and ethics of IT.
Normal Grade Rules
3 units

**HTEM 213. Sustainable Operations**
Concepts and principles of sustainable operations as applied to hospitality and tourism organizations. Socio-cultural, economic and environmental dimensions of sustainable development, positive and negative impacts of development, corporate social responsibility, and current trends and issues.
Normal Grade Rules
3 units

**HTEM 215. International Luxury Hospitality Mgmt**
Overview of the power of luxury brands. Strategies and skills for managing international luxury brands. Historical trends and marketing practices.
Normal Grade Rules
3 units
Humanities Department Courses

AMERICAN STUDIES

LOWER DIVISION
AMS 001A. American Cultures to 1877
American culture examined through political, literary, artistic, economic and social development. American values, ideas and institutions from popular culture as well as traditional sources. GE Area: C1 and D2, meets additional GE Areas when taken as sequence. Note: Entire sequence satisfies GE Areas C1,2; D2,3; U.S. History, U.S. Constitution and California Government US1,2,3.
Misc/Lab: Lecture 3 hours/lecture 3 hours
Normal Grade Rules
GE: M4
6 units

AMS 001B. American Cultures 1877 to present
American culture examined through political, literary, artistic, economic and social development. American values, ideas and institutions from popular culture as well as traditional sources. GE Area: C2 and D3, meets additional GE when taken in sequence. Prerequisite: AMS 1A.
Note: Entire sequence satisfies GE Areas C1,2; D2,3; U.S. History, U.S. Constitution and California Government US1,2,3.
Misc/Lab: Lecture 3 hours/lecture 3 hours
Normal Grade Rules
GE: M5
6 units

AMS 159. Nature and World Cultures
The influence of industrialization and globalization on earth and the environment as seen through culture. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules

3 units

CA 173. Thinking About Contemporary World Arts
An interdisciplinary course on contemporary arts and culture which investigates connections between arts disciplines and world cultures. The course uses critical and creative thinking as the lens to focus on issues in the arts, especially personal and cultural identities. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

CA 174. Special Topics Seminar
In-depth study of historical and/or contemporary topics in the interdisciplinary creative arts. Content changes each semester.
Course repeatable when content changes
Prerequisite: Upper division standing
Repeatable for credit
Normal Grade Rules
3 units
CA 175. Seminar in Creative Process  
An exploration of the creative process across the creative  
domains and of the use of practice-based research in the  
humanities and creativity studies.  
Prerequisite: CA60 or upper division standing  
Repeateable for credit  
Normal Grade Rules  
3 units

CA 176. Creativity and Creative Leadership  
A course focusing on mastering current theories about  
creativity, adapting theoretical knowledge for an  
individual/personal strategy, and embodying both the  
knowledge and strategy in a collaborative project.  
Prerequisite: Instructor consent.  
Normal Grade Rules  
3 units

CA 177. Interdisciplinary Arts for Teaching  
Creativity in teaching and learning-a course designed for  
prospective teachers; connections between the various  
arts disciplines, integrating other core subjects taught in  
California's classrooms.  
Normal Grade Rules  
3 units

CA 178. Senior Seminar in Creative Arts  
A capstone seminar in two sections. First, students  
present and facilitate discussion of a major book or topic  
in creative arts or, when appropriate, humanities. Second,  
students devote themselves to senior projects (a written  
thesis or work in other media).  
Prerequisite: CA 172 or CA 173.  
Normal Grade Rules  
3 units

CA 180. Individual Studies  
Individual work on special topics, by arrangement.  
Prerequisite: Coordinator approval.  
Notes: Mixed grading.  
Repeatable for credit  
Credit / No Credit  
1-4 units

CA 190. Field Work/Internship  
Pre-professional experience in arts management/program  
design/implementation in a public setting.  
Prerequisite: Coordinator approval.  
Repeatable for credit  
Credit / No Credit  
1-3 units

CA 194. Community Building through Arts Orgs  
In-depth study of strategies and methods for building  
community through creative arts organizations, both  
for-profit and non-profit.  
Prerequisite: Upper Division Standing  
Normal Grade Rules  
3 units

CA 195. Seminar in Creative Process  
An exploration of the creative process across the creative  
domains and of the use of practice-based research in the  
humanities and creativity studies.  
Prerequisite: CA60 or upper division standing  
Repeateable for credit  
Normal Grade Rules  
3 units

CA 196. Creativity and Creative Leadership  
A course focusing on mastering current theories about  
creativity, adapting theoretical knowledge for an  
individual/personal strategy, and embodying both the  
knowledge and strategy in a collaborative project.  
Prerequisite: Instructor consent.  
Normal Grade Rules  
3 units

CA 197. Interdisciplinary Arts for Teaching  
Creativity in teaching and learning-a course designed for  
prospective teachers; connections between the various  
arts disciplines, integrating other core subjects taught in  
California's classrooms.  
Normal Grade Rules  
3 units

CA 198. Senior Seminar in Creative Arts  
A capstone seminar in two sections. First, students  
present and facilitate discussion of a major book or topic  
in creative arts or, when appropriate, humanities. Second,  
students devote themselves to senior projects (a written  
thesis or work in other media).  
Prerequisite: CA 172 or CA 173.

UPPER DIVISION

HUM 100W. Writing in the Humanities  
Advanced workshop in composition and reading for the  
critical and comparative study of the humanities and  
interdisciplinary arts. Students explore and practice the  
thinking and writing skills that help us communicate  
insight, critique, interpretation, description, and  
analysis of arts, literature, history, and culture, including  
expository writing and library research. Readings and  
objects of study include a range of topics and at least  
two different art forms. GE Area: Z  
Prerequisite: A3 or equivalent second semester  
composition course (with a grade of C- or better);  
Completion of core GE, satisfaction of Writing Skills Test  
and upper division standing  
Note: Must be passed with C or better to satisfy the CSU  
Graduation Writing Assessment requirement (GWAR).  
Normal Grade Rules  
CE: Z  
3 units
HUM 101. Human Life: Let’s Think About It
Introduction to interdisciplinary comparative and creative studies. A range of methodologies will be explored through two contrasting subjects. Students learn and synthesize approaches - geography, history, literature, arts, and social science - to achieve a holistic understanding of the topics.
Prerequisites: Upper Division Standing.
Normal Grade Rules
3 units

HUM 111. Special Topics in Jewish Studies
See JWSS 111.
Repeatable for credit
Normal Grade Rules

LIBERAL STUDIES TEACHER PREP

LSTP 085A. Fieldwork in Humanities A
Part of a 3-course series (HUM 85A, B, C) that provides prospective K-8 teachers to California’s public school classrooms with initial exposure to the elementary classroom setting. HUM 85A combines readings and field experience to familiarize students with the duties and responsibilities that elementary teaching entails. Coursework involves 10 hours of volunteering in a public-school classroom with a credentialed teacher and online assignments.
Normal Grade Rules
1 unit

LSTP 085B. Fieldwork in Humanities B
Part of a 3-course series (HUM 85A, B, C) that provides prospective K-8 teachers to California’s public school classrooms with initial exposure to the elementary classroom setting. HUM 85B provides a dual focus on diversity in the classroom and the development of a teaching philosophy. Readings and field experience familiarize students with the various manifestations of diversity (cultural, linguistic, ability) in the classroom and prepare students to create a teaching philosophy that is responsive to the realities of today’s diverse classrooms. Coursework involves 10 hours of volunteering in a public-school classroom with a credentialed teacher and online assignments.
Normal Grade Rules
1 unit

LSTP 085C. Fieldwork in Humanities C
Part of a 3-course series (HUM 85A, B, C) that provides prospective K-8 teachers to California’s public school classrooms with initial exposure to the elementary classroom setting. HUM 85C focuses on ethnography as a means of gaining a deeper understanding of classroom observations and classroom dynamics. It combines readings on conducting classroom ethnographies with field experience to produce “Ethnographic Snapshots”. Coursework involves 10 hours of volunteering in a public-school classroom with a credentialed teacher and online assignments.
Normal Grade Rules
1 unit

LSTP 139. Education and (In)Equality
Education and (In)Equality explores the ways in which education cultivates free and empowered individuals that shape democratic egalitarian societies. It also explores the ways education can be used to oppress, dominate, and perpetuate social, economic and political inequalities.

RELIGIOUS STUDIES

LOWER DIVISION

RELS 010A. Elementary Hebrew
See HEBR 010A.
Normal Grade Rules
3 units

RELS 010B. Elementary Hebrew
See HEBR 010B.
Normal Grade Rules
3 units

RELS 015A. Intermediate Hebrew
See HEBR 015A.
Normal Grade Rules
3 units

RELS 015B. Intermediate Hebrew
See HEBR 015B.
Normal Grade Rules
3 units

RELS 070. Gods, Guns, Gurus, Grails-World Religion
Survey of major world religions, east and west, past and present. Structure and patterns of faith manifest in sacred texts, institutions, rituals, central figures and movements.
Normal Grade Rules
GE: C2
3 units

RELS 090. Bible History and Literature
The Bible in context of its history, literary sources and as a reflection of Jewish and Christian traditions. Motifs and themes in light of their original audience, historic usage and contemporary development. GE Area: C2
Normal Grade Rules
GE: C2
3 units

RELS 099. Death, Dying and Religions
Is death the end or the beginning? Learn how people integrate the physical, emotional, psychological, and spiritual dimensions of living and dying. Examine religious teachings and practices for making death personally meaningful, socially significant, or even politically powerful. GE Area: E
Normal Grade Rules
GE: EE
3 units

UPPER DIVISION

RELS 100W. Writing in the Humanities
See HUM 100W.
Normal Grade Rules

RELS 114. Legacy of Asia
See HUM 114.
Normal Grade Rules
GE: V
3 units

RELS 120. Censors and Icons: Arts and Religion
Study of interactions between arts and world religions, using paradigmatic examples (e.g. Eastern Orthodox icons, Muslim architecture, Zen Buddhist calligraphy, Hindu Vedic chant, Biblical poetry) and contemporary developments (e.g. Evangelical Christian films, New Age music, religious themes in literature).
Normal Grade Rules
3 units

RELS 122. Magic, Science and Religion
Exploring the ways in which people have attempted to gain mastery over the natural and supernatural worlds beginning with prehistoric times and concluding with modern day society and the contemporary world. GE Area: V
Prerequisite: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

RELS 124. Literature and Religious Experience
How authors and poets represent spiritual ideals and human dilemmas in a variety of literary genres such as the epic, the novel, the essay, love poetry and the haiku; and writers such as Plato, Emerson, Emily Dickinson, Thomas Merton, Shakespeare, Basho, Hanshan, Rumi and Sufi poets, Kabir, Indian Virashaiva poets, and authors of The Book of Odes and The Mahabharata. Course is repeatable as readings and themes change.
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

RELS 131. Gender, Sexuality, and Religion
Women’s roles and gendered categories within diverse religions. Feminist critiques, reforms, creatives and creations of religious institutions. The political and feminist dimensions of women’s religious experience. Understanding the roles of sexuality in religion.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

RELS 134. Religion Film & Media
Depictions of religion, religions, religious behavior, and religious propaganda in film and media. Exploring these from several perspectives, (e.g. emic and etic, cross-national, aesthetic) and examining the murky problem of "the truth" in the depiction of religious and spiritual experience.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

RELS 137. Religion in the Black Community
See AFAM 137.
Normal Grade Rules
3 units
RELS 142. Contemporary Buddhism and its Roots
Teachings of Gautama, the Buddha and ways in which those teachings were modified in forms of Buddhism that followed: Theravada in southeast Asia and Mahayana in east Asia.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

RELS 144. Chinese Traditions
Religious thought and practice of China’s three Great Traditions (Buddhism, Taoism and Confucianism) as well as China’s Little Tradition (Chinese folk religion). The role of these traditions within traditional Chinese culture and their relevance to the modern world, including China.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

RELS 145. Middle Eastern Traditions
Introduction to the peoples and cultures of the Middle East through exploration of the cooperation, competition, conflict and dialogues between the ethnic, national, and religious communities of contemporary Middle Eastern countries. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

RELS 148. Religion and Anthropology
See ANTH 148.
Normal Grade Rules
3 units

RELS 155. Pagan Traditions
Thematic and historical examination of localized religious traditions; e.g., Shamanic, Animistic, Polytheistic, Pantheistic. These traditions will be studied through their arts, music, myths, life patterns, cosmologies and contact between indigenous and universalizing religions.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

RELS 156. Islam, Politics and the West
An in-depth look at the roots of Islamic tradition, law, politics, culture, and society. Emphasis on Islam’s growing global prominence; relations with the West; stereotypes and misconception, as well as the nature of the Islamic state.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

RELS 161. Varieties of Spiritual Experience
Comparative analysis of mystical experience, emphasizing the writings and creative works of the mystics themselves. Perspectives include comparative religions, theology, psychology, anthropology, philosophy, music and literature. Focus on ultimate transformation of self and the world.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

RELS 162. Religion and Political Controversy in the US
Contemporary problems (e.g., ecology, abortion, war, gender, sexuality and race) as interpreted by a diverse range of American ethno-religious groups. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

RELS 180. Individual Studies
A project.
Prerequisite: Religious studies upper division major or minor and coordinator consent.
Repeatable for credit
Credit / No Credit
1-4 units

RELS 184. Directed Reading
Prerequisite: Religious studies upper division major or minor and coordinator consent.
Repeatable for credit
Credit / No Credit
1-4 units

RELS 190. Senior Seminar in Humanities
See HUM 190.
Normal Grade Rules
3 units

RELS 191. Religion in America
History of social and intellectual influence of religious groups, stressing their African-, Asian-, European-, Latin- and Native-American roots. Highlights contact between groups; immigration, religious diversity and syncretism.
GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units
Academic Year 2019-2020

Course Descriptions

July 1, 2019

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE
ISE 160. Healthcare Delivery Systems
Overview and analysis of health care delivery systems in the US with emphasis on the assessment, analysis, and improvement of operational quality, efficiency, and effectiveness. Impact on primary components of health care systems: facilties, approaches to care and treatment modalities, and personnel. Quantitative and qualitative techniques and applications to improve health care systems; performance measures used to evaluate access and quality of care. Impact of healthcare policies, laws, economics, and current US health care culture on organizational performance and patient outcomes.
Prerequisite: Junior Standing
Normal Grade Rules
3 units

ISE 161. Medical Errors Reduction and Patients Safety Engineering
Standardization of national reporting of medical errors; patient safety and high risks processes performance analysis; Safety improvements utilizing human factors techniques; information technology applications to reduce medication errors and improve patient safety; structured teams and systems to reduce clinical errors.
Prerequisite: Junior Standing
Normal Grade Rules
3 units

ISE 162. Engineering Statistics and Analysis
See CHE 162.
Normal Grade Rules
2 units

ISE 163. Healthcare Information Systems
Prerequisite: Junior Standing
Normal Grade Rules
3 units

ISE 164. Computer and Human Interaction
Introduction to human/computer interaction, paradigms for interaction, human performance capabilities, computer input/output device analysis and design, pattern recognition 3D audio, 3D visualization, application to virtual reality and multimedia.
Prerequisite: Junior standing
Normal Grade Rules
3 units

Healthcare activity costing and life-cycle, methodologies of modeling financial decisions, dynamic pricing techniques, and integrated financial analysis that spans clinical, access, and revenue functions. Financial risks assessment using statistical and stochastic methods as applied to pricing of alternative providers' settings.
Prerequisite: Junior Standing
Normal Grade Rules
3 units

ISE 167. System Simulation
Introduction to simulation. Monte Carlo techniques. Design and use of discrete-event computer simulation modeling techniques; theoretical and practical treatment of input to models, model validation methods and output analysis. Synchronized sampling, model comparisons.
Prerequisite: CMPE 30 or equivalent; ISE 130 (with grade of "C-" or better). Allowed Declared Majors: Any Engineering and graduate students.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ISE 170. Operation Research
Development and application of mathematical models to industrial problems. Linear programming, network analysis, Markov models, game theory, queuing theory and decision analysis.
Prerequisite: ISE 130 (with grade of "C-" or better). Allowed Declared Majors: Any Engineering.
Pre/corequisite: MATH 123.
Normal Grade Rules
3 units

ISE 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Upper division standing and instructor consent. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-3 units

ISE 194. Analytics Workshop
Application of common analytics programming languages to problems in industrial engineering.
Prerequisite: CMPE 30; ISE 135, and Senior Standing.
Credit / No Credit
1 unit

ISE 195A. Senior Industrial Engineering Design I
Individual or group design projects. Proposal preparation with plans and specifications. Oral and written reports. Professional seminars; global and social issues in engineering.
Prerequisite: ISE 105, ISE 120, ENGR 100W, major form on file and good standing in the major.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
1 unit

ISE 195B. Senior Industrial Engineering Design II
Design of industrial system: Quality function deployment, technology trends, financial analysis, functional specifications, process design, production capability, quality management, manufacturing resource planning, equipment requirements, human resource management, MIS, facility design, and project management. Integrated global and social issues in engineering.
Prerequisite: ISE 140 and ISE 195A (with grade of "C-" or better). ISE majors only.
Misc/Lab: Lab 9 hours.
Normal Grade Rules
3 units

ISE 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

GRADUATE

ISE 200. Financial Methods for Engineers
Systematic approach and methods for engineering decision making where economic outcomes are principal criteria. Accounting analysis and decision making topics that aid in understanding the relationships between various functional areas of business and the decision making processes of engineering managers.
Normal Grade Rules
3 units

ISE 201. Engineering Statistics
Statistical concepts, techniques relevant to engineering, motivation by real world examples. Probability, statistics including set theory, combinatorics, random variables, distributions, estimation, confidence interval, hypothesis testing, regression and ANOVA.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

ISE 202. Design and Analysis of Engineering Experiments
Prerequisite: ISE 130.
Normal Grade Rules
3 units
ISE 203. Agile Systems Engineering
Exploration of Lean, Agile, Scrum, Kanban, Large-Scale Scrum, and Scaled Agile Frameworks. Real examples leverage the immersion understanding of Agile. Students acquire Agile knowledge and skills that can be applied to any type of project in any industry.
Prerequisite: ISE 213
Normal Grade Rules
3 units

ISE 210. Human Factors/Ergonomics
Analysis and evaluation of work systems in terms of the capabilities and limitations of human participants. Person as a system component. Emphasis is on evaluation of how work affects people and how people affect the work.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

ISE 211. Experiment Design for Human Factors Engr
Hypotheses testing, linear regression, analysis of variance, factorial experiments, fractional factorial designs, Construction/analysis of complete/incomplete block designs, non-parametric statistical methods including alternatives to ANOVA, multiple comparisons, power and sample size determination, and factor analysis.
Prerequisite: STAT 115 or ISE 130 or ISE 201 or equivalent (with a grade of B or better)
Normal Grade Rules
3 units

ISE 212. Human Factors Experiments
Research and experimentation on specific aspects of the person as a system or in systems. Particular emphasis is placed on in-depth studies of unique human factors.
Prerequisite: ISE 210 or instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

Prerequisites: Graduate Standing
Repeatability for credit
Normal Grade Rules
3 units

ISE 214. Enterprise Engineering
The body of knowledge, principles, and disciplines related to the analysis, design, implementation, and operation of all elements associated with an enterprise which is explained through a set of conceptual models and the understanding of an enterprise from engineering perspective.
Prerequisite: ISE 213
Normal Grade Rules
3 units

ISE 215. Usability Evaluation and Testing
Seminar is designed to provide students with a comprehensive overview of usability testing methods, as applied to systems products and software-web applications. Course will address testing methods, processes and marketing justification for usability testing.
Prerequisite: ISE 210
Normal Grade Rules
3 units

ISE 217. Human Computer Interaction
Human performance characteristics, computational tools, and HCI applications. How to access/evaluate HCI requirements, to design HCI requirements, to assess the impact of design on performance, and to generalize the design implication to system function.
Normal Grade Rules
3 units

ISE 218. Interaction Design I
Theory, science and application of user experience interaction design. Latest tools and techniques. Relationship between software interaction design patterns, usability, learnability and human performance in man-machine systems.
Pre-requisite: Graduate Standing
Normal Grade Rules
3 units

ISE 219. HCl for Cyber Security
The course covers HCI in cyber security that include: authentication and access control, trust, user privacy and data protections, cyber security in social networking, data protection and security in healthcare , cyber security in eCommerce, mobile, computing & cloud computing, compliance and regulation, visualization tools and techniques in cyber security and privacy.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

ISE 220. Interaction Design II
Advanced topics for design of product and service experiences focused on methods that motivate, delight and influence human behavior during engagement with applications and information in multiple media and across devices ranging from wearables to mobile and Web.
Prerequisite: ISE 218
Normal Grade Rules
3 units

ISE 222. Adv Sys Engr
Systems engineering and analysis concepts, methodologies, models, and tools needed to understand and implement total life-cycle approach to systems. Model Based Systems Engineering for domain-specific models. System analysis models for economic evaluation, optimization and control. Systems design for reliability, maintainability, usability, producibility, logistics, disposability and sustainability.
Prerequisite: ISE 201 or equivalent.
Normal Grade Rules
3 units

ISE 223. Dig Model Sus Dev
Planning and decision models for resource management toward achieving economic, environmental, and social objectives in public and private organizations. Key modeling approaches include life cycle assessment, capital project evaluation, multi-criteria decision making under uncertainty, and machine learning. Exploration of business models for service economy, extended producer responsibility, and sustainable development.
Prerequisite: ISE 130 or equivalent
Normal Grade Rules
3 units

ISE 230. Advanced Operations Research
Advanced operations research techniques and topics. Practical consideration in understanding and utilizing operations research methods. Critical analysis of case studies.
Prerequisite: ISE 130.
Normal Grade Rules
3 units

ISE 231. Operational Data Analysis for Industrial Systems
Analysis of how data can be used to improve industrial operations. IoT. Data collection, storage, and communication technologies and approaches. Maintenance, operational performance, and quality applications of operational data analysis and machine learning.
Prerequisite: ISE 201 and ISE 140 or instructor consent
Normal Grade Rules
3 units

ISE 232. Quality Assurance and Reliability
Selection of adequate variables to monitor a manufacturing/service process; quality improvement through process design, vendor management, customer feedback and product development; use of statistical control charts, the Pareto principle, PDCA, process capability, design for reliability, statistical techniques for analysis of reliability and reliability growth.
Prerequisite: ISE 130 (or equivalent). Allowed Declared Majors: Any Engineering.
Normal Grade Rules
3 units
ISE 240. Analytics for Systems Engineering
Application of data analysis, predictive and prescriptive (optimization) modeling techniques to analyze, model, and optimize real-world industrial and systems engineering problems using computer programming languages.
Prerequisite: ISE 170 or equivalent, ISE 130 or equivalent
Classified graduate standing or instructor consent
Normal Grade Rules
3 units

ISE 241. Advanced Operations Planning and Control
Design, implementation and evaluation of production and service systems; manufacturing strategy, choice of processes, resources planning, production and procurement control, forecasting methods, scheduling considerations and decision-making techniques.
Prerequisite: ISE 140 or instructor consent.
Normal Grade Rules
3 units

ISE 242. Advanced Service Systems Engineering and Management
Advanced studies of operational productivity, operational quality, strategy and information technology applications in the service sector through the use of tools, techniques and case studies. Current literature review of issues related to service sector productivity, quality and value.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

ISE 243. Advanced Supply Chain Analytics
Machine Learning and Artificial Intelligence methodologies and their applications in supply chain applications.
Prerequisite: ISE 240, ISE 245 or equivalent.
Normal Grade Rules
3 units

ISE 245. Advanced Supply Chain Engineering
Supply chain concepts, strategies; emphasis on analytical tools to solve supply chain problems. Fundamentals of supply chain modeling of inventory, transportation, location, facility planning problems. Information sharing, risk pooling. Mechanisms for increasing profits.
Prerequisite: ISE 140.
Normal Grade Rules
3 units

ISE 247. Logistics for Supply Chain
An exploration of logistics for entire supply chain system from inbound movement through material management to physical distribution to customers. Topics include: packaging and handling, material management, transportation and traffic management, facility location and global logistics.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

ISE 250. Leading the Six Sigma Improvement Project
Improvement projects are critical. Covers Six Sigma methodology, problem-solving tools to improve cost, quality, time and variability. Management of projects, teams, change, and benchmarking; root cause problem solving, and implementation effectiveness. Practical experience through course project.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

ISE 251. Managing the Lean Enterprise Improvement Program
The elements of an effective organizational improvement program composed of multiple projects. Covers capabilities-based strategy, dimensions of performance such as cost, quality and time; when to use Six Sigma, Lean, Theory of Constraints and Reengineering.
Prerequisite: Instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE: GWAR
3 units

ISE 260. Healthcare Delivery Systems
Overview and analysis of health care delivery systems in the US with emphasis on the assessment, analysis, and improvement of operational quality, efficiency, and effectiveness. Impact on primary components of health care systems: facilities, approaches to care and treatment modalities, and personnel. Quantitative and qualitative techniques and applications to improve health care systems; performance measures used to evaluate access and quality of care. Impact of healthcare policies, laws, economics, and current US health care culture on organizational performance and patient outcomes
Prerequisite: Graduate Standing.
Normal Grade Rules
3 units

ISE 261. Medical Errors Reduction and Patients Safety Engineering
Standardization of national reporting of medical errors; patient safety and high risks processes performance analysis; Safety improvements utilizing human factors techniques; information technology applications to reduce medication errors and improve patient safety; structured teams and systems to reduce clinical errors.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

Evaluation of healthcare systems underlying health economics principles with emphasis on financial strategy planning and capital formation; integrated analysis that spans clinical, access and revenue financial functions; new approaches to reimbursement methods and pricing of alternatives health care providers.
Prerequisite: Graduate Standing.
Normal Grade Rules
3 units

ISE 263. Healthcare Information Systems
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

ISE 265. Advanced System Simulation
Use of computerized simulation and modeling techniques to conduct experiments, evaluate the costs of a process, evaluate alternative inspection policies and determine effects of JIT management models for shop setting.
Prerequisite: ISE 167 or instructor consent.
Normal Grade Rules
3 units

ISE 270. Information Engineering
Technologies, strategies and systems for planning, analyzing, designing and implementing data resources in order to ensure and continuously improve processes in the enterprise; object-oriented development, Computer-Aided Software/Systems Engineering (CASE); information superhighway, client/server computing and distributed database management systems.
Prerequisite: CMPE 46 or instructor consent. Allowed Declared Majors: Any Engineering.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE: GWAR
3 units

ISE 290. Human Factors & Ergonomics Professional Seminar
Real world skills necessary to start your professional HR/Erpo career, i.e. public presentation, terminology, field evaluations, current research and industry issues in human factors and ergonomics.
Prerequisite: Graduate standing.
Credit / No Credit
2 units
**ISE 297. Special Topics in Industrial Engineering**  
Special topics to augment regularly-scheduled courses.  
Prerequisite: Graduate standing in industrial engineering.  
Repeatable for credit  
Normal Grade Rules  
1-4 units

**ISE 298. Special Problems**  
Advanced individual work in industrial engineering.  
Repeatable for up to 18 units when project changes.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-4 units

**ISE 299. Master’s Thesis**  
Prerequisite: Consent of thesis advisor. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-4 units

**UPPER DIVISION**

**ISE 1290R. Culminating Experience Supervision**  
Continued work on thesis or project.  
Prerequisite: Outstanding RP grade in a preceding semester in a thesis or project class  
Note: No Degree Credit.  
Repeatable for credit  
No Degree Credit  
1 unit
Information School Courses

INFORMATICS

GRADUATE

INFM 200. Informatics: Fundamentals
A broad perspective and understanding of informatics as a technical skill set that focuses on user-centered systems and balances legal and ethical considerations and measures. Examines informatics applications in specific and interprofessional contexts.

Note: This course satisfies graduate-level GWAR in this master’s program.

Normal Grade Rules

GE: GWAR

3 units

INFM 201. Informatics: Technology Foundations
Analyze and implement web applications using APIs, web frameworks and infrastructure-as-a-service to support web services and web resources.

Normal Grade Rules

2 units

INFM 202. Informatics: Security Overview
Fundamentals of network security, compliance and operational security; threats and vulnerabilities; application, data, and host security; access control and identity management; and cryptography: Students are provided with an opportunity to gain hands-on experience using typical cybersecurity solutions.

Normal Grade Rules

1 unit

INFM 203. Big Data analytics and Management
Overview and use of Important big data technologies, trends, infrastructure, and management issues that enable users to make informed and strategic decisions with the presence of large-scale data sets.

Normal Grade Rules

2 units

INFM 204. Human Centered Design
Designing and developing user-centered knowledge structures for the Web environment. Core topics are: problems addressed by effective human-computer interaction; how to design for findability, design thinking concepts and tools, prototyping, and informing stakeholders about a content-rich product.

Normal Grade Rules

2 units

INFM 205. Informatics: Project Management
Introduces essential strategies and techniques for project management. Topics include: management styles, institutional constraints, project life cycles, stakeholder management, scope definition, risk assessment, project planning tools, and team management.

Normal Grade Rules

2 units

INFM 206. Electronic Records: Foundations
Principles and methods of managing records and information as operational, legal and historical evidence in electronic environments. Examines the ways in which new information technologies challenge organizations’ capacities to define, identify, control, manage, and preserve electronic records and information.

Normal Grade Rules

3 units

INFM 207. DAM: Digital Assets Management
Concepts, terminology, practice and application of DAM in the private and public sector. Addresses metadata, workflow, taxonomy, data security, governance, and preservation of digital data.

Normal Grade Rules

2 units

INFM 208. Information Security: Info Assurance
Overview of Information Assurance and Risk Management theories, principles, and techniques. This course examines the information assurance frameworks and risk management planning structures used to ensure that an organization’s information resources and assets are protected.

Normal Grade Rules

1 unit

INFM 210. Health Informatics
Health data and standards, electronic health records (EHR) and other healthcare information, data management concerns and technology governance in the health care environment.

Normal Grade Rules

3 units

INFM 211. Organizational Consulting Project (OCP)
Application of knowledge and skills developed in the Informatics program to address a specific problem in a specific domain (such as health or sports).

Mandatory CR/NC/RP

3 units

INFM 213. Epidemiological Methods
Introduction to the principles and methods of epidemiologic research. Students are enabled to design, conduct, analyze, and interpret epidemiologic research.

Normal Grade Rules

3 units

INFM 214. Health Data and Analytics
Exploration of healthcare informatics and its relation to health information technology. Students will apply basic knowledge and skills from healthcare data mining, data science, data management and professional project management to address practical healthcare business and clinical intelligence issues.

Normal Grade Rules

3 units

INFM 215. Network Security
Technical and administrative aspects of information security and assurance. Includes compliance and operational security, Web application attacks, penetration testing, data loss prevention, cloud computing security, psychological and behavioral traits of users vulnerable to cyber and social engineering attacks, and application programming development security.

Prerequisite: Graduate Standing or Instructor Consent

Normal Grade Rules

3 units

INFM 216. Computer Digital Forensics
Digital forensic investigation activities. Data acquisition, forensic imaging, use of Forensic Tool Kit (FTK) suite of applications (using Access Data virtual labs), locking mechanisms, search and seizure procedures, and report writing.

Prerequisite: Graduate Standing or Instructor Consent

Normal Grade Rules

3 units

INFM 218. Sports Analytics
Analytical techniques and quantitative methods used to inform decisions in the sport industry. Theory, development, and application of analytics in sports to support player performance, in-game strategy, team management, sports operations, and fantasy competitions.

Prerequisite: Graduate Standing or Instructor Consent

Normal Grade Rules

3 units

INFORMATION SCHOOL

LOWER DIVISION

INFO 020. Introduction to Computing for Personal Information Management
Introduction to computing for personal information access, use and management including basic computer operations, access to geographically distributed information on the global Internet, electronic communication, word processing and document design, data modeling with spreadsheets, database design and maintenance for information storage and retrieval and information presentation.

Normal Grade Rules

3 units
### GRADUATE

</tr>
<tr>
<td>INFO 220</td>
<td>Resources and Information Services in Professions and Disciplines</td>
<td>Examination of the nature of resources for, and services to, professions and disciplines. Possible disciplines for study may be law, business and economics, life and/or physical sciences, medical sciences, engineering and computer science, maps, and visual and performing arts. Course is repeatable in the same semester for a maximum of nine units when content changes.</td>
<td>3 units</td>
</tr>
</tbody>
</table>

### INFO 221. Government Information Sources
Study in government publications and databases, their bibliographic organization, use in all types of libraries and information centers, methods of acquiring information from federal, state and local sources, problems of depository and non-depository collections. | 3 units |

### INFO 228. Advanced Information Resources and Services
In-depth survey of information needs, uses, and sources across different user groups; current methods of providing reference services and instruction in different information seeking contexts; and techniques for evaluating reference sources and services. | 3 units |

### INFO 229. Practicum/Seminar in Information Services
Opportunity to work in a setting delivering information services. Discussion of encountered problems, current trends and contemporary approaches to information service delivery. | 3 units |

### INFO 230. Issues in Academic Libraries
Investigate current issues that impact the functioning of the academic library. Topics include issues related to social and political environments, clientele, services, collections, physical settings, financing, staffing and future trends in the academic library sector. | 3 units |

### INFO 231. Issues in Special Libraries and Information Centers
This course will investigate current issues that impact the functioning of special libraries/information centers. Topics covered will include issues related to social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special library/information center sector. | 3 units |

### INFO 232. Issues in Public Libraries
This course will investigate current issues that impact the functioning of the public library. Topics covered will include issues related to social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the public library sector. | 3 units |
INFO 233. School Library Media Centers
The role of the school library media teacher and the school library media program in the educational community. Emphasis on creation of effective learning environments, involvement in the curriculum and teaching process as well as philosophies of service and management.
Prerequisites: INFO 204 and INFO 250. Normal Grade Rules 3 units

INFO 234. Intellectual Freedom Seminar
Focuses on current intellectual freedom issues and the centrality of intellectual freedom to librarianship.
Prerequisite: INFO 200, INFO 204. Normal Grade Rules 3 units

INFO 237. School Library Media Materials
Survey of materials in a variety of formats that meet the needs of K-12 students. Materials will be examined that support state and national curriculum standards as well as material that support independent reading and learning. Course can be repeated one time.
Prerequisites: INFO 200, INFO 202, INFO 203, INFO 204 Repeatable for credit Normal Grade Rules 3 units

INFO 240. Information Technology Tools and Applications - Advanced
Focuses on building practical skills in a variety of networked computer applications. Topics will vary, but will typically include web coding languages and designing web sites.
Prerequisite: INFO 202. Normal Grade Rules 3 units

INFO 241. Automated Library Systems
Review of major systems for library automation. Problems associated with the planning, implementation and use of the systems, negotiation of systems acquisition and trends in the field.
Prerequisite: INFO 200, INFO 202 and INFO 204. Not available to Open University Students. Repeatable for credit Normal Grade Rules 1-3 units

INFO 242. Database Design and Management
Design and implementation of relational databases. Learn about database management systems (such as Oracle), database administration, and database querying with SQL.
Prerequisite: INFO 202. Not available to Open University Students. Normal Grade Rules 3 units

INFO 243. Systems Analysis
Study of systems as applied to libraries and information centers. Application of methods for studying the means by which libraries deliver information services to users.
Prerequisite: INFO 200, INFO 202 and INFO 204. Not available to Open University Students. Normal Grade Rules 3 units

INFO 244. Online Searching
Techniques and concepts for searching online, including strategies, database content, search options, and understanding the information environment. The course includes extensive hands-on experience with subscription search engines.
Prerequisite: INFO 202. Normal Grade Rules 3 units

INFO 245. Advanced Online Searching
Emphasis is on on-line techniques for developing current awareness services.
Prerequisite: INFO 244. Normal Grade Rules 3 units

INFO 246. Information Technology Tools and Applications - Advanced
Designing advanced Web applications using technology such as dynamic HTML and XML and Web programming languages such as XSLT, JavaScript, JSP, Perl, PHP, MYSQL, and ASP. May be repeated for up to 12 units when content changes.
Prerequisite: INFO 202. Repeatable for credit Normal Grade Rules 3 units

INFO 247. Vocabulary Design
Survey of principles and practices used to index information-bearing objects such as documents or images. Includes term assignment, review of existing vocabularies, thesaurus design, metadata structures and automatic and natural language processes.
Prerequisite: INFO 202. Normal Grade Rules 3 units

INFO 248. Beginning Cataloging and Classification
Theory and practice of bibliographic control including the study of representative cataloging using AACR2, machine-based representation using MARC formats and other standards, subject analysis and classification using LCSH, Dewey, and LCC with application to books, non-book materials and serials.
Prerequisite: INFO 202. Normal Grade Rules 3 units

INFO 249. Advanced Cataloging and Classification
Application of cataloging and organization of information principles to multi- and hyper-media resources. Complex serial publications, evolving standards for representation of non-traditional networked information, and cataloging policy development. Specific focus of the course may vary each time taught.
Prerequisite: INFO 202, INFO 248. Normal Grade Rules 3 units

INFO 250. Design and Implementation of Instructional Strategies for Information Professionals
Examination of concepts of instruction in the use of information technologies, information services and sources. Includes investigation of learning theory and instructional design. Emphasis on application of theory through development of instruction and instructional resources in various media for use in a broad array of institutional environments.
Prerequisite: INFO 200. Not available to Open University Students. Repeatable for credit Normal Grade Rules 3 units

INFO 251. Web Usability
Through examination of theory, methodologies, and real-life cases, Info 251 offers a user experience (UX) framework for developing information systems. Students learn the principles of user-centric design and style for particular circumstances and populations.
Prerequisite: INFO 202. Normal Grade Rules 3 units

INFO 252A. Information Processing and Management I
An introduction to programming in the Java programming language. Emphasis on techniques necessary for manipulating character strings, sorting and searching algorithms frequently used for information storage and retrieval problems, and fundamental concepts of modern software engineering.
Prerequisite: Computer Literacy. Normal Grade Rules 3 units

INFO 252B. Information Processing and Management II
Introduction to Object-Oriented Programming (OOP) and Object-Oriented Database Design (OODB) in the Java programming language. Emphasis is on how to apply these concepts and techniques to problem solving in the field of information storage and retrieval.
Prerequisite: INFO 252A or instructor consent. Normal Grade Rules 3 units
INFO 253. Natural Language Processing and Automatic Indexing/Abstracting
Introduction to natural language processing and automatic indexing/abstracting with emphasis on text processing. Topics include: semantic dictionary, lexical analysis, word frequency analysis and automatic selection of indexing tokens, term weighting, the vector space model and document representation.
Prerequisite: INFO 252B or instructor consent.
Normal Grade Rules
3 units

INFO 254. Information Literacy and Learning
Provides theory and practice for teaching information literacy in an LIS setting. The course emphasizes learning theory as well as the practical aspects of teaching. Students learn methods and tools for teaching in both synchronous and asynchronous settings.
Prerequisite: INFO 200
Normal Grade Rules
3 units

INFO 256. Archives and Manuscripts
An introduction to the theory and practice of managing archival documents, such as personal papers, institutional records, photographs, electronic records and other unpublished material. Topics covered include manuscript and records acquisition and appraisal, arrangement and description, conservation and preservation, reference and access.
Prerequisite: INFO 200, INFO 202, INFO 204.
Normal Grade Rules
3 units

INFO 257. Records Management
An introduction to the theories, methodologies and technologies used in managing institutional information and records. Topics include the history of records management, the records’ life cycle, record inventory and analysis, classification and filing, retention scheduling and equipment.
Prerequisite: INFO 200, INFO 202, INFO 204.
Normal Grade Rules
3 units

INFO 259. Preservation Management
An introduction to the philosophies and techniques used to preserve manuscript, printed and digital materials. Examination of the evolution of preservation practice, with emphasis on emerging theories, models and technologies in digital preservation.
Prerequisite: INFO 200, INFO 202, INFO 204.
Normal Grade Rules
3 units

INFO 260. Resources for Children, Ages 0–6
Survey of children’s materials for infants to age six, with emphasis on books for beginning readers, integration of this material into library and school programs, planning and implementation of public relations. Repeatable for credit when content changes.
Repeatable for credit
Normal Grade Rules
3 units

INFO 260A. Programming and Services for Children Ages 0–8
This course examines the importance of programming for children, including parent education programs, story hours, outreach techniques, services with schools, summer reading programs, and program series such as weekly or monthly programs on manga, knitting, book discussions, or homework help.
Prerequisite: INFO 200
Normal Grade Rules
3 units

INFO 261. Resources for Children, Ages 6-12
A survey of the books and media available for children 6-12, and of the evaluation, selection, and use of these materials in the contexts of collection development, children’s reading interests, informational needs, school curricula, and multicultural library service. Repeatable for credit when content changes.
Repeatable for credit
Normal Grade Rules
3 units

INFO 261A. Programming and Services for Young Adults Ages 9–18
Administration and delivery of professional library and information services with multi-cultural young adult populations: features critical youth studies cultural/historical research, resources, policy, threats, tools, methods, service philosophies and management skills necessary for a comprehensive profile of YA library services.
Prerequisite: INFO 200
Normal Grade Rules
3 units

INFO 262. Resources for Young Adults
Materials for adolescents and pre-adolescents and methods for incorporating these materials into library planning. Collection development, needs assessment and programming will be featured. Information services for young adults in a variety of settings will also be addressed. Repeatable for credit when content changes.
Repeatable for credit
Normal Grade Rules
3 units

INFO 263. Materials for Children
Survey of materials in a variety of formats including nonfiction, beginning chapter books, fictional genres, paperback series and electronic resources, and how they can meet developmental needs. Collection development tools and techniques for this material will also be included.
Prerequisite: INFO 200, and either INFO 260A or INFO 261A.
Normal Grade Rules
3 units

INFO 264. Materials for Tweens
Survey of materials in various formats including fiction, nonfiction, movies, CDs, computer games and other materials, and how they can meet the developmental needs of this age group. Collection development tools and techniques for this material will also be included.
Prerequisite: INFO 200, and either INFO 260A or INFO 261A.
Normal Grade Rules
3 units

INFO 265. Materials for Young Adults Ages 19–26
This course will allow students to take an in-depth look at materials in a variety of formats for teens, including fiction, popular nonfiction, graphic novels, movies, computer games, websites, other media, and determine how they can meet developmental needs.
Prerequisite: INFO 200, and either INFO 260A or INFO 261A.
Normal Grade Rules
3 units

INFO 266. Collection Management
Study of collection management in all types of libraries and information centers. Includes analysis of information needs, criteria for selection, collection use evaluation and resources for collection development.
Prerequisite: INFO 202, INFO 204.
Normal Grade Rules
3 units
INFO 267. Services to Youth
Seminar in planning, developing and evaluating youth services in public libraries. Special needs of children and young adults in the public library, liaison with schools, reference services, and collection planning will be featured. Repeatable for credit when content changes.
Prerequisite: INFO 200, and either INFO 260A or INFO 261A
Repeatable for credit, for up to 9 units.
    Repeatable for credit
    Normal Grade Rules
    1-9 units

INFO 268. History of Youth Literature
The history of literature for children and teens from its earliest examples to today’s current trends, including how childhood has changed over the years, the influence of culture on those changes, and on the materials created for children and teens.
Prerequisite: INFO 200
    Normal Grade Rules
    3 units

INFO 269. Early Childhood Literacy
Covers a wide variety of topics important for an understanding of early childhood multi-literacies in library and non-library environments, including current research, best practices and practical examples that can be implemented in various work environments with children.
Prerequisite: INFO 200
    Normal Grade Rules
    3 units

INFO 270. Intellectual Freedom and Youth
This course will focus on intellectual freedom issues with youth, the value of youth literature to enhance individuals’ lives, the ethics of intellectual freedom, the psychology of censorship and how to combat it, and how to defend materials for youth.
Normal Grade Rules
    3 units

INFO 271A. Genres and Topics in Youth Literature
Various topics and genres in literature for children or teens will be examined in depth, such as graphic novels, poetry, fantasy, science fiction, publishing and writing trends, reading motivation techniques, literature in the classroom, and the art of picture books. Repeatable for up to 9 units.
Prerequisite: INFO 200, and either INFO 260A or INFO 261A
Repeatable for credit
    Normal Grade Rules
    1-9 units

INFO 272. Authors and Illustrators in Youth Literature
This course will look at selected authors and/or illustrators of youth literature, examining their work, their lives, their motivations, their criticism, and the usefulness of their work.
Repeatable for credit
    Normal Grade Rules
    3 units

INFO 275. Library Services for Racially and Ethnically Diverse Communities
This course focuses on developing skills for planning, implementing and evaluating programs for addressing the information needs of racially, ethnically and linguistically diverse communities. Reviews the major national, state and local studies.
Prerequisites: INFO 200 and INFO 204. Not available to Open University Students.
    Normal Grade Rules
    3 units

INFO 280. History of Books and Libraries
This class traces the development of the book through its many stages and explores how the creation, use, and storage of information are affected by social and technological change. The development of libraries and librarianship and how they have accommodated themselves to the changing form of the book will also be considered.
Prerequisite: INFO 200
    Normal Grade Rules
    3 units

INFO 281. Seminar in Contemporary Issues
Investigation of major contemporary issues within the information profession. Topics range from censorship to the need for a national information policy and change each time the course is offered. A maximum of nine units may be repeated in the same semester when content changes.
Prerequisite: INFO 200, INFO 202, INFO 204
Repeatable for credit
    Normal Grade Rules
    1-3 units

INFO 282. Seminar in Library Management
Application of management theory to specific problems. Readings and discussions of the development of effective strategies for planning and implementing organizational change. Content changes each time offered. A maximum of nine units may be repeated in the same semester when content changes.
Prerequisite: INFO 200 and INFO 204. Not available to Open University Students.
Repeatable for credit
    Normal Grade Rules
    1-3 units

INFO 283. Marketing of Information Products and Services
Applications of marketing concepts to library and information services. Market analysis, use surveys, market targeting and introduction of services.
Prerequisites: INFO 200 and INFO 204. Not available to Open University Students.
    Normal Grade Rules
    1-3 units

INFO 284. Seminar in Archives and Records Management
In-depth study of current issues and practices in archives and records management. The course addresses new areas of research and application such as oral history, sound and visual archives, digitization, archival automation, archival security, genealogy, and more. Course is repeatable for credit for up to 12 units.
Prerequisite: INFO 200, INFO 202, INFO 204
Repeatable for credit
    Normal Grade Rules
    1-3 units

INFO 285. Applied Research Methods
Selection, formulation and development of problems in library and information science research. Evaluation of published research and in the field.
Prerequisites: INFO 200, INFO 202, INFO 204
Repeatable for credit
    Normal Grade Rules
    1-4 units

INFO 286. Interpersonal Communication Skills for Librarians
The principles and practice of interpersonal communication; small group and peer relationships.
Prerequisites: INFO 200 and INFO 204. Not available to Open University Students.
Repeatable for credit
    Normal Grade Rules
    1-3 units

INFO 287. Seminar in Information Science
Current issues and problems in information retrieval as related to concepts and theories of information science. A maximum of nine units may be repeated with different content.
Prerequisite: INFO 200. Not available to Open University Students.
Repeatable for credit
    Normal Grade Rules
    1-3 units

INFO 289. Advanced Topics in Library and Information Science
Advanced independent examination of selected issues and problems in library and information science with a focus on the integration of theory and practice. Issues and problems addressed will vary each semester.
    Mandatory CR/NC/RP
    3 units
### Academic Year 2019-2020

#### Course Descriptions

**INFO 292. Professional Experience: Projects**
Gives students the opportunity to complete a professional project related to the theory and method of Library & Information Science in an information organization or institution, and to gain practical experience in one or more areas of LIS.
Prerequisites: INFO 200, 202, 204, plus six advanced courses.
Credit / No Credit
3 units

**INFO 293. Introduction to Data Networking**
An introduction to computer networking in both Lan and Wan environments with an emphasis on hands-on projects.
Prerequisite: INFO 200, INFO 202, INFO 204. INFO 240 desirable.
Repeatable for credit
Normal Grade Rules
3 units

**INFO 294. Professional Experiences: Internships**
Supervised professional experience in an approved public, academic, or special library or other information-based organization.
Prerequisite: INFO 200, INFO 202, INFO 204, and three advanced courses.
Repeatable for credit
Credit / No Credit
2-4 units

**INFO 295. School Library Field Work**
A supervised professional experience of school librarianship at the levels of both elementary and secondary (middle or high) schools. Emphasis is on observation and guided practice with a credentialed school librarian (library media teacher).
Prerequisite: INFO 200, INFO 202, INFO 204.
Credit / No Credit
3 units

**INFO 297. Practicum in Instruction for Information Literacy**
Experience with instruction in the computer, network and media aspects of information literacy. Course may be repeated in different semester.
Repeatable for credit
Credit / No Credit
3 units

**INFO 298. Special Studies**
Advanced individual research and projects related to libraries and information systems. Available only to those students who have completed the major portion of the degree coursework. May be repeated for a maximum of six units of credit.
Prerequisite: INFO 200, INFO 202, INFO 204, instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

**INFO 299. Thesis**
Approved thesis proposal and consent of a faculty advisor required. May be repeated for a maximum of six units of credit.
Prerequisite: INFO 200, INFO 202, INFO 204, INFO 285.
Repeatable for credit
Mandatory CR/NC/RP
3 units

**UPPER DIVISION**

**INFO 1290R. Culminating Experience Supervision**
Continued work on thesis.
Prerequisite: Outstanding RP grade in a preceding semester in a thesis class
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit

**Masters of Archives and Records Administration**

**GRADUATE**

**MARA 200. Record and Recordkeeping Professions**
The role of records and recordkeeping in society; history, definitions and important concepts related to records and recordkeeping; contexts and critiques of records and recordkeeping; significant scholars and recordkeepers throughout history. Not repeatable.
Prerequisite: Demonstrated computer literacy through completion of required new student online technology workshop.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE: GWAR
3 units

**MARA 204. Management of Records and Archival Institutions**
Application of management principles to the administration of records and archives centers; management functions, theories and concepts; decision making; goals and objectives; organizational structures; human resources; financial considerations; marketing; legal considerations; ethical considerations; global concerns.
Prerequisite: Demonstrated computer literacy through completion of required new student online technology workshop.
Normal Grade Rules
3 units

**MARA 210. Records Creation, Appraisal and Retention**
Overview of records creation processes; management and documentation of those processes, including forms, mail, reports, reprographics management, document control, legal compliance; basic appraisal concepts; records inventories and retention scheduling; vital records; contingency planning; records disposition; and archives.
Prerequisite: MARA 200, MARA 202.
Normal Grade Rules
3 units

**MARA 211. Records Access, Storage and Retrieval**
Examination of records systems, storage, retrieval; filing systems; fundamentals of information retrieval; active file systems and operation; records center operations; special storage; archival reference and access concepts; legal and ethical considerations; privacy and copyright; user communities. Not repeatable.
Prerequisite: MARA 200, MARA 202, and MARA 204.
Normal Grade Rules
3 units

**MARA 249. Electronic Recordkeeping Systems and Issues in Electronic Recordkeeping**
Application of recordkeeping and archival principles to management and preservation of electronic records, multi- and hyper-media resources and email; standards for representation and preservation of nontraditional networked information; electronic records/document management systems and derivations; policy development. Not repeatable.
Prerequisite: MARA 200, MARA 202, and MARA 204.
Normal Grade Rules
3 units

**MARA 256. 21st Century Archival Methods**
Archival science and archival methods as presently practiced in archival repositories. Types of archival repositories. Influence of other disciplines on archives and vice versa. Focus on technological changes and their effects on traditional archival records, systems, methodologies. Not repeatable.
Prerequisite: MARA 200, MARA 202.
Normal Grade Rules
3 units

**MARA 283. Enterprise Content Management and Digital Preservation**
Presents theoretical principles and practical aspects of digital content management and preservation. Explores challenges related to multiple file formats, standards, and retention requirements. Provides hands-on experience using both a digital content management system and a trusted digital repository.
Prerequisite: MARA 210, or MARA 211, or MARA 249
Normal Grade Rules
3 units
MARA 284. Seminar in Archives and Records Management
This course explores current issues and practices in archives and records management such as Protecting Conflicting Rights in the Digital Environment; Archivist: Meet Web 2.0, Ethics and Computer Forensics, and Implications of Cloud Computing on Records Management.
Prerequisite: MARA 200, 202, and 204.
Repeatable for credit
Normal Grade Rules
1-3 units

MARA 285. Research Methods in Records Management and Archival Science
Overview of research methods in the social sciences and their application to research about and within archives and records centers. Research design, human subjects, quantitative and qualitative methods, model studies, methodological critique and evaluation, data analysis and presentation. Not repeatable.
Normal Grade Rules
3 units

MARA 289. Advanced Topics in Archives and Records Administration (ePortfolio)
Completion of the ePortfolio, integrating theory and practice, to satisfy the Culminating Experience, with the portfolio based on core competencies for archives and records administration professionals as outlined in the MARA 289 Handbook. Completed in final semester. Not repeatable.
Prerequisite: See information about eligibility by looking at the current MARA 289 Handbook and revising the section on "Eligibility".
Repeatable for credit
Credit / No Credit
1-3 units

MARA 292. Professional Certification
Through consultation with advisor: preparation exercises, mock exams, information, work experience and registration guidance toward application, submission and completion (completion not required) of ICRM and/or ACA exams for professional certification(s) in archives and records administration. Not repeatable.
Prerequisite: MARA 200, MARA 202, MARA 204, plus six advanced courses.
Credit / No Credit
3 units

MARA 293. Professional Experience: Projects
Professional projects submitted by an individual or organization, supervised by a professional archivist or records manager, which can be completed during one semester.
Prerequisite: MARA 200, MARA 204
Credit / No Credit
3 units

MARA 294. Professional Experience - Internships
Internship under professional supervision in a selected archives or records center. The internship site must meet criteria outlined in the MARA internship guidelines and be approved by the internship coordinator. Repeatable for up to 6 units of credit.
Prerequisite: MARA 200, MARA 204
Repeatable for credit
Credit / No Credit
3 units

MARA 295. Organizational Consulting Project (OCP)
Organizational Consulting Projects are submitted by an individual or organization, supervised by a professional archivist or records manager, and requires the application of the knowledge and skills developed throughout the program.
Repeatable for up to 6 units.
Prerequisites: MARA 200, MARA 204
Repeatable for credit
Credit / No Credit
3 units

Course Descriptions

v1
July 1, 2019

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE

Journalism and Mass Communications Courses

ADVERTISING

LOWER DIVISION

ADV 091. Introduction to Advertising
Comprehensive survey of the basic principles of advertising. Topics include strategic planning, integrated communications, audience targeting, creative strategy, advertising media, social responsibility, advertising ethics, international advertising and current issues in advertising.
Normal Grade Rules
3 units

ADV 092. Int’l Program Studies
Repeatable for credit
Mixed Grading
1-12 units

ADV 093. Design Fundamentals for Advertising 1
Introduces students to the ideation and design process as it relates to advertising. Students learn design thinking, ideation techniques, print design, screen design, advertising formats and storytelling across media platforms.
Normal Grade Rules
3 units

ADV 094. Design Fundamentals for Advertising 2
Introduction to digital video production and editing. Focus on learning how to tell a story by combining video and audio, story boarding, script writing, framing, creating a shot sequence, video editing and special effects using industry-standard software.
Prerequisite: ADV 093 and ADV 091
Normal Grade Rules
3 units

ADV 095. Working With Type
Theory and practice of typography as they apply to graphics, advertising and other areas of visual communication. Through a series of projects students develop a greater sensitivity to typographic details to create successful typographic messages.
Normal Grade Rules
3 units

ADV 096. Working With Image
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 097. Working With Audio
Principles of design applied to printing, printing production theory and practical application. Preparation of layouts and mechanicals utilizing latest computer applications. Instruction in use of type, printing processes, types of paper, uses of color.
Prerequisite: ADV 091
Normal Grade Rules
3 units

ADV 098. Working With Video
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 099. Working With Online
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 100. Working With Media
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 101. Working With Interactive
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 102. Working With Outdoor
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 103. Working With Radio
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 104. Working With Television
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 105. Working With Print
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 106. Working With Promotion
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 107. Working With Public Relations
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 108. Working With Direct Marketing
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 109. Working With Sales Promotion
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 110. Working With Guerilla Marketing
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 111. Working With Program Advertising
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 112. Working With Promotional Marketing
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 113. Working With Test Marketing
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 114. Working With Event Marketing
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 115. Working With Video Production
Prerequisite: ADV 091, MCOM 100W and ENGL 071
Normal Grade Rules
3 units

ADV 116. Spartan Daily Advertising Staff
This class constitutes the paid advertising staff of the online and print editions of the Spartan Daily. Students work with clients and handle the newspaper’s advertising sales and production.
Prerequisite: ADV 91 or instructor consent.
Misc/Lab: Daily lecture and production.
Repeatable for credit
Normal Grade Rules
3 units

ADV 117. Strategic Planning/Communications
Tools and frameworks for marketing management and strategic communications, including addressing communication issues such as budgets, coordinating agency functions, and delivering an effective marketing and communications plan.
Repeatable for credit
Normal Grade Rules
3 units

ADV 121. Business-to-Business Advertising
Principles and practices of developing marketing communications programs and collateral materials for business-to-business products and services; translating technical information into persuasive communications; direct marketing, and other forms of sales support communications.
Repeatable for credit
Normal Grade Rules
3 units

ADV 122. Broadcast and New Media Advertising
History, development, and current applications of traditional broadcast advertising, the Internet as an advertising medium, and the implications of emerging new media. Focus is on creative strategy and media strategy.
Prerequisite: ADV 091.
Normal Grade Rules
3 units

ADV 123. Broadcast and New Media Advertising
Apply fundamentals of design thinking, teamwork, and various media methods to creating a body of advertising work in the form of a portfolio. Students work on a series of projects and award show briefs in creative teams.
Prerequisite: ADV 091, ADV 093, and ADV 094
Normal Grade Rules
3 units

ADV 124. Copywriting
Prerequisite: ADV 091, MCOM 100W and ENGL 071.
Normal Grade Rules
3 units

ADV 125. Advertising Layout and Production
Principles of design applied to printing, printing production theory and practical application. Preparation of layouts and mechanicals utilizing latest computer applications. Instruction in use of type, printing processes, types of paper, uses of color.
Prerequisite: ADV 91.
Normal Grade Rules
3 units

ADV 126. Media Planning and Buying
Theory, evaluation and selection of advertising media for a variety of target audiences; demographics and psychographics. Students plan, buy and measure the success of a real media plan.
Prerequisite: ADV 091 and BUS2 130.
Normal Grade Rules
3 units

ADV 127. Integrated Marketing Communications (IMC)
Learn how advertising, public relations, promotions, and marketing all work together to achieve campaign objectives. Strategic planning, budgeting, research, tactics, evaluation, presentation skills and team building.
Prerequisite: Three ADV courses and BUS2 130.
Normal Grade Rules
3 units

ADV 128. Advertising Campaign Planning and Management
Capstone course in which students engage hands-on in the process and methods employed to develop a fully integrated advertising campaign based on the marketing objectives established by a real-world client.
Prerequisite: MCOM 111 or ADV 116.
Normal Grade Rules
3 units

ADV 129. Advertising Portfolio 1
Apply fundamentals of design thinking, teamwork, and various media methods to creating a body of advertising work in the form of a portfolio. Students work on a series of projects and award show briefs in creative teams.
Prerequisite: ADV 091, ADV 093, and ADV 094
Normal Grade Rules
3 units

ADV 130. Advertising Portfolio 2
Students enhance portfolios developed in Advertising Portfolio 1 with more award show work and live client projects. Each brief requires development of technical skills across media platforms and production of professional work.
Prerequisite: ADV 091, ADV 093, ADV 094, ADV 130
Normal Grade Rules
3 units

ADV 131. Advertising Portfolio 3
Students enhance portfolios developed in Advertising Portfolio 1 with more award show work and live client projects. Each brief requires development of technical skills across media platforms and production of professional work.
Prerequisite: ADV 091, ADV 093, ADV 094, ADV 130
Normal Grade Rules
3 units

ADV 132. UX/UI Design for Advertising
Human centered design process as it pertains to user interaction (UI) and user experience (UX) design. Students conduct basic user research to create personas that guide the development of content strategy, information architecture, feature sets, wireframes and annotations as they pertain to (1) large scale web development and (2) integrated campaign assignments that cover a wide range of interactive platforms.
Prerequisite: ADV 091, ADV 093, and ADV 094
Normal Grade Rules
3 units
JOURNALISM

LOWER DIVISION

JOUR 050. Navigating the News
Introduction to different forms of news media we consume to become informed and engaged citizens, and how media shape our world. Development of skills to critically evaluate the credibility of news sources, distinguish between real and fake news, and examine contemporary news events and news media coverage in cultural, historical, environmental, and spatial contexts. Normal Grade Rules
GE: D1
3 units

JOUR 061. Writing for Print, Electronic and Online Media
Introduction to writing for media--newspapers, magazines, electronic and the Internet--as well as producing content for multi-media distribution in a converged media environment. Emphasis on how different media require different writing styles and content. Prerequisite: ENGL 1A, ENGL 2.
Normal Grade Rules
3 units

JOUR 095. Beginning Digital News Photography
Basic introduction to news photography and photojournalism field. Includes camera use -- composition, aperture, shutter speed and lens selection -- and processing for print or electronic media using PhotoShop. Emphasis on technical aspects of digital news photography and storytelling with photographs. Prerequisites: Writing Enrollment Category W-I or W-II or completion of ENGL 1AF with grade of CR.
Normal Grade Rules
3 units

JOUR 130. Student Media Apprentice
A deep dive into a pool of multimedia concepts, techniques and skills, while working as a student media apprentice reporter. Includes fundamentals of reporting, writing, shooting and editing, as well as storytelling in video, audio and text with photo. Prerequisite: JOUR 61
Normal Grade Rules
3 units

JOUR 132. Magazine Reporting, Print and Online
Reporting and writing of feature stories for magazines, print and online. Develops expertise in reaching a targeted audience with words and images. While the prerequisite, JOUR 61, teaches breaking news writing, this course explores longer, deeper forms. Prerequisite: JOUR 61
Normal Grade Rules
3 units

JOUR 133. Editing and News Management
Media Lab for the editor serving as wordsmith and coach, a hands-on approach to copy editing and headline writing for online and print media. Students work as editors for media lab publications. Prerequisite: JOUR 61 or instructor consent.
Normal Grade Rules
3 units

JOUR 134. In-Depth Online Reporting
Media Lab. Designed for experienced writers who want to report for online media. Includes feature and in-depth reporting as well as Web design for a team project. Prerequisite: JOUR 61 or instructor consent.
Normal Grade Rules
3 units

JOUR 136. Newspaper and Magazine Design
Principles of newspaper and magazine design--news judgment, story and headline hierarchy, typography and meaningful visual storytelling through use of photos/art. Practice in creating newspaper pages and magazine layouts and cover designs. Prerequisite: JOUR 061, JOUR 133 or instructor consent.
Normal Grade Rules
3 units

JOUR 137. Reviewing the Arts
Students explore the arts while learning to forge their opinions into reasoned critical journalistic reviews. Students will attend performances and exhibits, meet and interview artists and professional critics, read selected writings in criticism and aesthetics, and learn to support their insightful opinions with evidence. Prerequisite: JOUR 061
Normal Grade Rules
3 units

JOUR 138. Sports Journalism Investigation
Course prepares sports journalists to develop their investigative and technical skills in audio, video, photography, and sports writing across traditional and new media platforms. Students report, write, shoot, edit, anchor and produce sports features weekly. Diversity/inclusion emphasized. Co-requirements: JOUR 61 or consent of instructor
Normal Grade Rules
3 units

JOUR 139. Editing and News Management Media Lab
Prerequisite: JOUR 133 or instructor consent
Normal Grade Rules
1-3 units

JOUR 140. Student Media Production: Update News
Students report, write, shoot, edit, anchor and produce Update News. Course is run as a working newsroom where accuracy, quality and deadlines are paramount. Various student media work in collaboration. May be repeated with instructor consent. Prerequisite: JOUR 61
Repeatable for credit
Normal Grade Rules
1-3 units

JOUR 140A. Student Media Production: Update News
A team of reporters, photographers and editors produce student media content in the Spartan Daily. Course is run as a working newsroom where accuracy, quality and deadlines are paramount. Various student media work in collaboration. This course may be repeated with instructor consent.
Prerequisite: JOUR 61
Repeatable for credit
Normal Grade Rules
3 units

JOUR 140C. Student Media Production: The Spear
Students report, write, shoot, edit, anchor and produce the sports program and/or magazine, The Spear. Course is run as a working newsroom where accuracy, quality and deadlines are paramount. Various student media work in collaboration. May be repeated for credit with instructor consent.
Prerequisite: JOUR 61
Repeatable for credit
Normal Grade Rules
3 units

JOUR 140D. Student Media Production: Magazine
A team of reporters, photographers and editors produce a magazine in conjunction with supervising editors in JOUR 150. Course is run as a working magazine office where accuracy, quality and deadlines are paramount. Various student media work in collaboration. May be repeated with instructor consent for 1, 2, or 3 units.
Prerequisite: JOUR 61, JOUR 132
Misc/Notes: 9 hrs/Activity
Normal Grade Rules
3 units

JOUR 142. Beginning Visual Journalism for Print/Electronic Media
Media Lab. Introduction to basic principles and practices of photojournalism for online media, newspapers, magazines and corporate publications, using still photographs to tell the story.
Prerequisite: JOUR 95, PHOT 040, or instructor consent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

JOUR 144. Picture Editing for Print/Electronic Media
Presentation and picture editing for online media, newspapers, magazines and other publications; visual tactics to bring readers to a page, picture selection, graphics, layout, design and ethical considerations using illustrative art and photography.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units
Academic Year 2019-2020
Course Descriptions

RETURN TO LAST PAGE
DESCRIPTION CONTENTS

JOUR 150. News Media Management
Capstone course in which students manage media, by overseeing the operation of publications, broadcasts and digital platforms. Students apply for management positions. Repeatable for credit.
Prerequisite: JOUR 61 and JOUR 140A, or 140B, or JOUR 140C, or JOUR 140D.
Repeatable for credit
Normal Grade Rules
3 units

JOUR 153. Magazine Writing & Editing
Overview of magazine field, focusing on reporting, writing and editing. Students learn how an idea progresses from manuscript through art meetings to the printed or online page. Prepares students to produce San Jose State’s student magazine, Access, in JOUR 155.
Prerequisite: JOUR 132C.
Normal Grade Rules
3 units

JOUR 155. Magazine Editing and Production
Media Lab. Editing/producing print and online versions of award-winning Access and Etc. magazines. Staff edits articles, art and photography submitted by media lab students and other SJSU freelancers.
Prerequisite: JOUR 132C, JOUR 153.
Misc/Lab: Lecture 2 hours/activity 2 hours
Repeatable for credit
Normal Grade Rules
3 units

JOUR 164. Electronic News Gathering for Television
Media Lab. Principles and techniques of covering news for electronic media. Instruction in all aspects of television news gathering, presentation and production including writing, shooting, editing, producing and anchoring. Includes both field and studio work.
Prerequisite: JOUR 61 or instructor consent.
Misc/Lab: Lecture 2 hours/activity 2 hours
Normal Grade Rules
3 units

JOUR 167. Television News Magazine
This is a course dedicated to quality, long-form visual reporting, told through the half-hour show, Equal Time. Each episode focuses on a specific topic in depth. The stories center around news important to Californians, and they air on the PBS-TV station, KQED Silicon Valley. The show contains taped packages and live-to-tape roundtable discussions. Students are responsible for several aspects of show creation, including reporting, writing, shooting, editing and producing. Repeatable for up to 6 units of credit when topic changes.
Prerequisite: JOUR 61, JOUR 165 or Instructor Approval.
Repeatable for credit
Normal Grade Rules
3 units

JOUR 176A. Documentary Unit I - Short Form Feature Production
Explores the history and methods of producing a short-form non-fiction visual documentary. Students learn basic camera production techniques to execute their proposals. Students will be introduced to studio lighting, sound and post production skills. Diversity themes emphasized.
Prerequisite: Instructor Consent
Normal Grade Rules
3 units

JOUR 176B. Documentary Unit II - Long Form/ Series Production
Focuses on the making of a long form documentary production or a documentary feature series (consisting of 2 or more short segments). Students are introduced to field techniques and formats for extended documentary production. Diversity themes emphasized.
Prerequisite: Instructor Consent
Normal Grade Rules
3 units

MASS COMMUNICATIONS

LOWER DIVISION

MCOM 063. New Media
Hands on instruction in multimedia and emerging new media technologies. Print and web page design, blogging, podcasting, videocasting, RSS and creation of multimedia presentations by combining still photos, graphics, and video with music and/or audio.
Normal Grade Rules
3 units

MCOM 070. Visual Communication for Modern Media
Design for television, newspapers, advertising, public relations, magazines, film and video. Modules include design and impact of visual imagery and how to apply sound ethical principles.
Normal Grade Rules
3 units

MCOM 072. Mass Communication and Society
Mass communication and its relationship to society. Basic theories in mass communication, contemporary issues and milestones in our understanding of media effects.
CE Area: D3
Prerequisite: Not repeatable for credit if equivalent course has been taken elsewhere.
Normal Grade Rules
3 units

MCOM 092. Int'l Program Studies
Repeatable for credit
Mixed Grading
1-12 units

UPPER DIVISION

MCOM 100W. Writing Workshop: Mass Communications
Advanced writing across the media — advertising, journalism and public relations. Writing and research for an increasingly convergent media with multiple media formats from the Web to print and broadcast, including writing to accompany audio and visual images. CE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core CE, satisfaction of Writing Skills Test and upper division standing. Should be taken junior year; required of all advertising, journalism and public relations majors before they reach senior standing. The course will be waived for students receiving a waiver score on the Writing Skills Test.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE: Z
3 units

MCOM 101. Media Law and Ethics
Principles and case studies of mass communications law and ethics. Constitutional guarantees, libel, privacy, contempt, privilege, copyright, Internet law, FCC and FTC regulatory law.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MCOM 103. History of American Media
Development of mass communications in the United States from colonial times to the present. Social, economic and political factors that shaped modern media and the impact of mass media on the society.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MCOM 104. Introduction to Mass Communications Research
Introduction to social science research in mass communications; emphasis on public opinion research, including sampling, survey research design, measurement; also precision journalism, content analysis and external databases; may include class project.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

MCOM 105. Lifestyles, Diversity and the Media
Identifies and evaluates the impact of ethnicity/culture, alternative lifestyles and gender issues on advertising, television, radio, newspapers, magazines and public relations. Examines attitudes, trends and perceptions that help shape mass communication messages.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units
MCOM 106. Global Mass Communication  
Societal factors behind gathering and disseminating information and entertainment content among mass communication systems of the world. Basic theoretical concepts about international communication and international relations. Impact on economy, politics, culture and governmental communication policies. 
Prerequisite: Upper division standing. 
Normal Grade Rules 
3 units

MCOM 107. Audio Podcasting, Aesthetics and Invention  
Explores philosophies, methods, and perceptions of sound aesthetics, archiving, and techniques that comprise audio podcasting (and related documentary production) to develop "aural" skills collaboratively across traditional and new media technologies as innovators of sound practice. 
Normal Grade Rules 
3 units

MCOM 108. Virtual Worlds, Virtual Reality and Mass Media  
Explores how virtual reality is shaping our media experiences and expectations, from work, socialization and news reporting. Students learn to investigate, experiment, and interact with virtual and augmented technologies, structures and people within those media platforms. 
Normal Grade Rules 
3 units

MCOM 111. Internship  
Field work for advertising, journalism and public relations majors near end of junior or beginning of senior year, including summer term. 
Prerequisite: At least 9 units of major course work in the department (including specified foundation courses) and advisor consent. 
Credit/No Credit 
3 units

MCOM 139. Specialized Writing  
Writing for mass communication with focus on specific topic during the semester. Topics may include specialized writing in public relations, advertising, broadcast and print media. 
Prerequisite: JOUR 61, upper division standing or instructor consent. 
Notes: Offered only occasionally. 
Repeatable for credit 
Normal Grade Rules 
3 units

MCOM 163. Advanced New Media Technologies  
Hands on instruction in multimedia and emerging new media technologies. Print and web page design, blogging, podcasting, RSS and creation of interactive multimedia presentations by combining still photos, graphics, and video with music and/or other audio. 
Prerequisites: MCOM 63 or Instructor Consent 
Normal Grade Rules 
3 units

MCOM 170. Strategic Social Media & Digital Marketing  
Integration of content and social media within the broader digital marketing ecosystem to include paid social, paid search, search engine optimization, influencer marketing & brand storytelling. 
Prerequisite: MCOM 100W 
Normal Grade Rules 
3 units

MCOM 175. Social Media and Web Analytics  
Fundamentals of social media and web analytics. How to transform data to actionable insights and develop campaign strategies. Data analytics tools, deriving insights from social metrics, and suggesting data informed decisions to intended audiences. 
Prerequisite: ADV 91 or PR 99; upper division standing 
Normal Grade Rules 
3 units

MCOM 180. Independent Study  
Independent study projects and activities supervised by a Journalism and Mass Communications faculty member. Projects must be directly related to fields within the Journalism and Mass Communications School. All undergraduate Advertising, Journalism, Public Relations and graduate Mass Communications students may enroll. 
Repeatable for credit 
Credit/No Credit 
1-6 units

MCOM 180ITL. JMC International Experience  
Through international study students will examine geographic models to gain a global perspective on geopolitical and economic issues, media and integrated strategic communications, explore the concepts of global citizenship and global corporate citizenship, and learn how to analyze cultural differences. 
Prerequisite: SJSU upper division undergraduate or graduate student, or by instructor's permission. 
Repeatable for credit 
Credit/No Credit 
1-6 units

MCOM 199A. Advertising & Public Relations Agency I  
The first of a two-semester capstone course where seniors will work in teams in a School-sponsored Advertising and Public Relations Agency to plan and execute real-world integrated strategic campaigns as well as to prepare entries for national competitions. Enrollment by permission only. 
Prerequisite: PR Majors: PR 099, PR 190 or PR 192; PR 191; ADV Majors: ADV 091. 
Normal Grade Rules 
3 units

MCOM 199B. Advertising & Public Relations Agency II  
The second of a two-semester capstone course where seniors will work in teams in a School-sponsored Advertising and Public Relations Agency to plan and execute real-world integrated strategic campaigns as well as to prepare entries for national competitions. Enrollment by permission only. 
Prerequisite: MCOM 199A. 
Normal Grade Rules 
3 units

MCOM 210. Media and Social Issues  
Selected readings and group discussions of significant published works dealing with mass communications: history, biography and appraisals; law and ethics of the print and broadcast media, advertising and public relations; public opinion and propaganda. 
Note: This course satisfies graduate-level GWAR in this master’s program. 
Normal Grade Rules 
GE: GWAR 
3 units

MCOM 215. New Media Visionaries  
Class lecture series by visiting Silicon Valley leaders on the development of new media products, including such topics as idea generation, intellectual property, funding, design, development and integrated communication strategies. 
Prerequisites: Admission to Graduate program. 
Normal Grade Rules 
3 units

MCOM 260. Integrated Strategic Communications  
Investigates the theory and practice of integrated communications to include promotion, advertising, public relations, direct marketing and branding. It explains how to integrate these processes of communication and how to develop a comprehensive integrated marketing communications plan. 
Prerequisite: Intro course in advertising, public relations or marketing, or instructor consent. 
Normal Grade Rules 
3 units
MCOM 270. Communication Law and Public Policy
A case history approach to the law of communications, including libel, privacy and regulation of broadcasting. Major development and landmark decisions, with emphasis on contemporary ethical and social issues such as free-press/Fair trial and new technology.
Normal Grade Rules
3 units

MCOM 280. Communication Management
Explores the practice and theory of media management as it applies to online media, newspapers, magazines, radio stations, television stations, advertising agencies, public relations firms, corporate communications and marketing communications. It incorporates leadership, media economics and conflict resolution.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

MCOM 284. Advanced User Experience
Students work in teams to create, develop and implement hypothetical Web and mobile applications while living the role of the interactive project manager, design manager and development manager. Class focuses on the rapidly changing creative and technological base of interactive Web and mobile application development. Admission to graduate program.
Normal Grade Rules
3 units

MCOM 285. Web Design and Development
Introduction to website design, creation, and maintenance. Popular web design and graphics programs including content management systems (WordPress), and Adobe XD.
Normal Grade Rules
3 units

MCOM 290. Theory of Mass Communications
Basic theories of communications systems. Functional comparisons of various communications systems in relation to political structure. Communications theories in related disciplines of psychology, sociology, anthropology, economics and political science.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE: GWAR
3 units

MCOM 295. Mass Communications Research
Methodologies of research in mass communications: historical, descriptive and empirical with emphasis on statistical aspects of data processing and interpretation.
Prerequisite: MCOM 210 and MCOM 290 or instructor consent.
Normal Grade Rules
3 units

MCOM 298A. Master’s Project I
Development of master’s project literature review and proposal. Identify and work with professional mentors. Collaborative teamwork as appropriate to project goals.
Prerequisite: Advancement to Candidacy
Mandatory CR/NC/RP
3 units

MCOM 298B. Master’s Project II
Completion of master’s project meeting professional standards in Advertising, Journalism, or Public Relations. Presentation and constructive feedback to peers.
Prerequisite: MCOM 298A
Credit / No Credit
3 units

MCOM 299. Master’s Thesis
Supervised thesis in the field of mass communications. May be repeated for credit (not in same semester).
Prerequisite: Admission to candidacy for the master’s degree and approval of thesis proposal.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units

PUBLIC RELATIONS

LOWER DIVISION

PR 099. Introduction to Public Relations
Principles, evolution, and professional practice of modern public relations. Concepts of planning and executing effective communication strategies, including message design and distribution, for any organization.
Normal Grade Rules
3 units

UPPER DIVISION

PR 190. Media and Influencer Relations
How to promote an organizations brand by developing relationships with traditional and digital news organizations and social media influencers to earn credible third-party content that is ultimately discovered, shared, and drives a desired action.
Prerequisite: JOUR 061
Normal Grade Rules
3 units

PR 191. Strategic Content Creation
Basics of creating and implementing a strategic content marketing plan, introducing students to tools and techniques for delivering valuable, relevant, and measurably effective content on behalf of organizations, guiding students through production of various marketing communication assets.
Prerequisite: JOUR 061
Normal Grade Rules
3 units
FORENSIC SCIENCE

LOWER DIVISION

FS 011. Survey of Forensic Science
This survey course introduces students to the profession of forensic science. Topics include the field's history and sub-disciplines, the CSI Effect, the application of the scientific method to physical evidence analysis. Virtual labs may be used to augment readings.
Normal Grade Rules
3 units

FS 162. Forensic Science Applications
Scientific analysis and interpretation of physical evidence using identification and comparison techniques. Practical lab exercises in human identification, questioned documents, bite marks, trace evidence, presumptive testing and glass analysis. Additional topics include court testimony, quality assurance and ethics.
Prerequisites: FS 11, JS or FS Major/Minor, Upper Division Standing. JS students may substitute JS 10 for FS 11.
Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

FS 163. Fingerprint Science
History and use of fingerprints in criminal identification. Topics include the scientific basis for fingerprint ID, anatomy of friction ridge skin, pattern classification, minutiae marking, the Henry System, AFIS and ACE-V, and court presentation of fingerprint evidence.
Prerequisites: FS 11, JS or FS Major/Minor, Upper Division Standing. JS students may substitute JS 10 for FS 11.
Misc/Lab: Lecture 3 hours/Activity 3 hours.
Normal Grade Rules
3 units

FS 164. Crime Scene and Evidence Photography
Practical use of photography in documenting crime scenes and evidence. Topics will include 35mm camera operation, lenses, focus, exposure, depth of field, lighting, composition, flash, injury documentation, digital cameras and video, and court presentation of photographic evidence.
Prerequisites: FS 11, JS or FS Major/Minor, Upper Division Standing. JS students may substitute JS 10 for FS 11.
Misc/Lab: Lecture 3 hours/Activity 3 hours.
Normal Grade Rules
3 units

FS 165. Forensic Biometrics
A survey of scientific and biometric tools and applications used to establish human identity. Topics include identification of missing persons; casualties of mass disasters; victims of war crimes; and the ethical, legal and social implications of such technology.
Prerequisites: FS 11, JS 10, JS 25, or ANTH 12; upper division standing.
Normal Grade Rules
3 units

FS 166. Forensic Chemistry
An exploration of scientific concepts, methods, practices, instrumentation, interpretation, statistics and court issues of chemistry as applied in forensic science including special topics: drug analysis, toxicology, arson and trace analysis emphasizing the instrumentation that allows chemical examination of evidence.
Prerequisites: CHEM 001A, CHEM 001B, FS 11
Normal Grade Rules
3 units

FS 167. Forensic Molecular Biology
History, scientific concepts, methods, practices, instrumentation, interpretation, statistics and court issues of forensic DNA analysis via lectures, hands-on activities/ laboratories, and videos. Collection, documentation and preservation of biological evidence, bioethics, QA, validation, admissibility and training will also be covered.
Prerequisites: BIOL 031, CHEM 001A, and CHEM 001B
Misc/Lab: Lecture 4 hours/lab 2 hours.
Normal Grade Rules
5 units

FS 168. Fluorescent Applications in Molecular Biology and Forensic Science
This course covers scientific concepts, methods, practices, instrumentation, interpretation, statistics and court issues of fluorescent applications in molecular biology and forensic science. Topics include, atomic and molecular basis of fluorescence, emission, photophysical processes, energy transfer, QA, validation, accreditation, and admissibility.
Prerequisites: BIOL 030, BIOL 031, CHEM 001A, CHEM 001B, FS 162 all with grades of ‘C’ or better.
Misc/Lab: Lecture 4 hours/lab 6 hours.
Normal Grade Rules
3 units

FS 169. FS Senior Sem : Studies in Contemporary FS Issues
Identification, discussion and analysis of selected problems in forensic science. A major term paper, presentation on a selected topic and participation on written as well as in-class assignments and activities are required.
Prerequisites: Justice Studies Majors: Senior standing, JS 100W and JS 114 or instructor consent, graduation application filed and you must have already filled out and have a signed major form. Note: JS 114 is waived as a prerequisite for forensic science majors.
For Forensic Science Majors: Senior standing, JS 100W, FS 161, FS 162, Biology 30, CHEM 1A and CHEM 1B or by instructor consent, graduation application filed and you must have already filled out and have a signed major form.
Normal Grade Rules
3 units

FS 170. Forensic Science in Human Rights Investigations
Role of forensic science in pursuing justice for human rights victims, using documentation, collection, processing and interpretation of evidence in violations of human rights and international humanitarian law and interfaces of law, society, culture, politics, history, ethics and forensic science.
Prerequisites: JS 10, JS 25 or FS 11
Normal Grade Rules
3 units
FS 171. Forensic Criminology
Contextualizes mental processes, intentions, motivations, and reactions of criminals, police, victims, and the courts systems. Critically examines the psychology of deviant behavior, the evidentiary processes in justice systems, and the validity and reliability that come with testimony and criminal defenses.
Prerequisites: JS 100W
Repeatable for credit
Normal Grade Rules
3 units

JUSTICE STUDIES

LOWER DIVISION
JS 010. Introduction to Justice Studies
Historical and philosophical development of the justice system. Description, analysis and evaluation of criminal justice agencies. Relationship between theory and practice.
Normal Grade Rules
3 units

JS 012. Introduction to Legal Studies
The course presents historical and modern perspectives of the theories and structures of law, and provides an overview of the economic and sociological challenges to law making. This course also examines the nexus between law, social change, and dispute resolution.
Normal Grade Rules
3 units

JS 015. Introductory Statistics in Justice Studies
Introduction to measures of central tendency, variation, correlation and regression, probability, estimation and hypothesis testing as used in Justice Studies. GE Area: B4
Prerequisite: Math Enrollment Category M-I or M-II, or completion of a GE Area B4 course with a grade of C- or better.
Normal Grade Rules
GE B4
3 units

JS 025. Introduction to Human Rights and Justice
This course is a lower division introduction to the history of human rights as a concept and body of international law, and to the complicated role of human rights in contemporary social justice campaigns. GE Area: D3
Normal Grade Rules
GE D3
3 units

UPPER DIVISION
JS 100W. Writing Workshop
Development of advanced communication skills, both written and oral. Emphasis on writing formats used by criminal justice professionals. A scholarly paper, written in APA format and informed by research, will be required.
GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. Allowed Declared Major: Justice Studies.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE Z
3 units

JS 101. Critical Issues and Ideas in Justice
Interdisciplinary, historical and comparative examination of justice concepts and controversies, including the state’s role in promoting justice and perpetuating injustice, legitimate versus illegitimate violence, human rights, stateless persons, and the international community; the relationship between social justice and criminal justice. Note: A grade of “C” or better is required for Justice Studies majors.
Prerequisites: Upper Division Standing; JS 10, 12, 25 or FS 11
Co-requisite: JS 100W; Justice Studies Minors: Any 100W
Repeatable for credit
Normal Grade Rules
3 units

JS 102. Police and Society
A multidisciplinary study of law enforcement from the early 1800’s to the present. Focus on significant studies in relation to the role of police and analysis of current models and practices. Pre/Corequisites: Any 100W. Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 103. Courts and Society
Structure and functions of the court system. Emphasizes attorneys’ and judges’ roles and the court process. Examination of federal and state legislative, executive and judicial branch actions, including Supreme Court decisions in civil and criminal cases.
Prerequisite: Upper division standing.
Note: A grade of “C” or better is required for graduation.
Normal Grade Rules
3 units

JS 104. Penal Politics & Institutions
Interdisciplinary examination of issues of race, class, gender, ethnicity, economy, and culture as it relates to punishment, the penal process, and social control.
Prerequisite: Upper division standing
Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 107. Justice Management and Ethics
The theory and practice of managing justice system agencies, including organizational change and contemporary issues. In-depth examination of ethical challenges in managing justice agencies, and strategies for ensuring ethical practices.
Prerequisite: Upper division standing.
Note: A grade of “C” or better is required for graduation.
Normal Grade Rules
3 units

JS 114. Research Methods in Justice Studies
Introduction to quantitative research methods used in Justice Studies. Includes relationship of theory to empirical evidence, logic underlying methods of inquiry, ethics in conducting empirical research, and methodological design, operationalization, and data analysis.
Prerequisite: JS 10, JS 12, JS 25, or FS 11 with a grade of “C” or better; JS 15 or Stat 95 or equivalent with a grade of “C” or better; JS 100W with a grade of “C” or better, Justice Studies Minor: Any 100W; Upper Division Standing; Restricted to JS majors and minors.
Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 117. Qualitative Research Methods
Introduction to qualitative research methods used in Justice Studies. Includes relationship of empirical evidence to theory, ethics in conducting empirical research, methodological design, interviewing techniques, field methods, participant observation, and content analysis.
Prerequisites: Upper division standing
Pre/Corequisite: Any 100W
Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units
JS 121. Media and Justice
This course is an interdisciplinary and comparative media examination of justice concepts and controversies, including forms of violence, human rights, undocumented persons, the state’s role in promoting criminalization and social inequality, and the need for social justice and media reform.
Pre/co-requisites: Any 100W
Note: Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 122. Drugs and Society
Examines the physiological effects of psychoactive drugs; history of legal and illegal drug use; causes and rates of use and addiction; drugs in the media; drug-related crime and violence; criminalization, decriminalization, legalization, harm reduction; drug courts; drug treatment.
Pre/Co-requisite: Any 100W
Note: Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 123. Terrorism, Intelligence, and Security
Examination of terrorist organizations and activities, definitions of terrorism, and social and political consequences of terrorism. Includes policy responses to terrorism, including roles of intelligence and security agencies, and impacts on laws, rights and liberties.
Prerequisite: Upper division standing.
Note: A grade of "C" or better is required for Justice Studies majors.
Normal Grade Rules
3 units

JS 127. Immigration and Justice
Interdisciplinary analysis of cultural, social and political implications of transnational migrations and their historical and present influences on US culture. Emphasis on issues of social justice and human rights related to contemporary migratory movements.
Pre/co-requisite: Any 100W;
Note: Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 128. Punishment, Culture and Society
Critical analysis of the cultural, political and economic dimensions of penal politics in contemporary American society, with particular reference to the relationships between criminal justice and social justice. Emphasis on issues of racial, economic, and gender inequality.
Pre/co-requisite: Any 100W;
Note: Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 129. International Crime and Deviance
This course offers an international perspective on violence. This course analyzes transnational crime and deviance trends, their causes, as well as organizational responses. Topics discussed in this class include international drug markets, sexual commerce, child soldiers, and terrorism.
Pre/Co-requisite: Any 100W
Note: Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 130. Sexuality & Justice
JS130 surveys the relationship between sexuality and social and criminal justice. Students explore the nature and extent of sexual offenses against adults and children. A critical examination of recent public policies aimed at managing sexual aggression is included.
Pre/Co-requisite: Any 100W
Note: Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 131. Crisis Intervention, Mediation and Restorative Justice
Review of theory, research and practical skill development in communication and problem resolution strategies using techniques of crisis intervention, mediation and restorative justice in community policing, family court, dependency court and juvenile justice settings.
Pre/Co-requisite: Any 100W.
Note: Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 132. Race, Gender, Inequality and the Law
History of legal issues and individual and institutional discrimination of women, ethnic/cultural and religious minorities, gays and lesbians and the disabled in education, employment, criminal justice and the family. Solutions for structured inequality in the U.S. GE Area: S Prerequisites: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU courses. Completion of, or co-registration in, 100W is strongly recommended.
Normal Grade Rules
3 units

JS 133. Family Violence
Examines abusive relationships and responsive community and justice system policy and preventive interventions. Topics include child abuse, neglect, gang and hate crimes, rape, marital violence and elder abuse. GE Area: S Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Repeatable for credit
Normal Grade Rules
GE: S
3 units

JS 134. Criminal Justice Research
This course provides an introduction to the methods and techniques of criminal justice research, with a focus on methodological issues and critical thinking. Topics include research design, data collection, statistical analysis, and the interpretation of research findings in the context of criminal justice policy and practice.
Pre/co-requisite: Any 100W
Note: Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 135. Record Clearance Project
RCP teaches students to give community education presentations and advise clients regarding court procedures to clear criminal convictions. Students learn legal interviewing, counseling, ethics, reading rap sheets, performing legal research and writing, court interpreting and related skills.
Prerequisites: JS 100W.
Normal Grade Rules
3 units

JS 136. Community Involvement
Community Involvement involves mentoring RCP students in client interviews, coordinating project tasks and events, collecting data from former clients and students, helping with RCP community involvement, and assisting in other tasks.
Prerequisites: JS 140 or instructor consent.
Credit / No Credit
3 units

JS 137. Collaborative Response to Family Violence
Employs an ecological framework to explore the scope, effects and response to family violence by diverse services and systems. Students are introduced to theory and practice of interdisciplinary collaboration and how it applies to respond more effectively to family violence.
Prerequisite: 100W, upper division standing or instructor permission
Corequisite: JS 136 or instructor permission
Normal Grade Rules
3 units

JS 140. Record Clearance Project
RCP teaches students to give community education presentations and advise clients regarding court procedures to clear criminal convictions. Students learn legal interviewing, counseling, ethics, reading rap sheets, performing legal research and writing, court interpreting and related skills.
Prerequisites: JS 100W.
Normal Grade Rules
3 units

JS 141. Record Clearance Project Representation
Record Clearance Project Representation teaches students to assist clients in preparing and filing petitions to clear criminal convictions in court, and related tasks. Under attorney supervision, students represent between two to four clients.
Prerequisites: JS 140 or instructor consent.
Credit / No Credit
3 units

JS 142. RCP – Advanced Study and Community Involvement
Record Clearance Project - Advanced Study and Community Involvement involves mentoring RCP students in client interviews, coordinating project tasks and events, collecting data from former clients and students, helping with RCP community involvement, and assisting in other tasks.
Prerequisites: JS 140 or instructor consent.
Credit / No Credit
3 units
JS 143. Criminal Evidence and Procedure
Origin, development, philosophy and constitutional basis of evidence; administrative and judicial rules and procedures that govern admissibility; examination of judicial decisions interpreting individual rights; exploration of process by which attorneys introduce evidence as proof or exculpation of crime.
Pre/corequisite: Any 100W
Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 144. Criminal Law
Historical development of philosophy of law and constitutional provisions, legal definitions, classifications of crime, case law, methodology and concepts of criminal law as a social force.
Pre/corequisite: Any 100W
Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 145. White Collar Crime
Growth and development of white collar crime in the United States: crimes at the workplace, computer fraud, swindles, embezzlement, bribery and graft at the corporate and governmental levels.
Pre/corequisite: Upper division standing.
Note: A grade of "C" or better is required for Justice Studies majors.
Normal Grade Rules
3 units

JS 150. Gender and Crime
Analysis of gender and its influence upon criminal participation and victimization, treatment in the criminal justice system, and those working in the criminal justice fields. Emphasis on women’s experiences.
Pre/corequisite: Any 100W
Note: Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 151. Criminological Theory
Analysis of the nature and extent of crime, including causation and prevention. Descriptions of offenses, criminal typologies and victim surveys. Evaluation of various control and prevention strategies.
Prerequisite: JS 10, JS 22, JS 25 or FS 11 Pre/corequisite: JS 100W, Justice Studies Minors: Any 100W. Note: Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 152. Juvenile Delinquency & Justice
History, theory and functions of the juvenile justice system. The legal processes for delinquent minors, status offenders and dependent children, including intake, determination of adjudication and disposition. Current legal issues and debate.
Prerequisites: Upper Division Standing
Note: Must achieve a grade of "C" or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 153. Crime and Justice Across the Life Course
Explores how crime and justice are experienced by individuals over time. The nature and extent of offending and victimization at various ages across the life course is examined. A critical consideration of the criminal career paradigm is also provided.
Pre/corequisites: Any 100W
Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 155. Victimization
Examination of the relationship between victim and offender; the behavior and attitudes of family, society and justice system toward the victim; nature and extent of loss, injury and damage to the victim.
Pre/corequisite: Any 100W
Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 156. Gangs, Criminal Syndicates & Justice
A sociohistorical examination of the emergence, evolution, persistence, activities and social structure of gangs and mobs, the effects of social factors, e.g., politics, law, technology and the economy, and consequences for communities and social institutions.
Pre/corequisite: Any 100W
Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 157. Deviance and Justice
This course examines various areas of norm violations and rule-breaking behaviors including, alcohol and drug use/abuse, criminal violence, corporate deviance, gang violence, and sexual deviance, child abuse, hate crime, mental illness, computer piracy and evaluates justice policies.
Pre/corequisite: Any 100W
Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 158. The Prison Community
Analysis of formal and informal systems of organization and interaction among inmates and staff. Effects of the social structure and external system on the organization of the prison community.
Pre/corequisite: Any 100W
Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units

JS 161. Introduction to Cybercrime
Introduces students to the growing legal, technical, and social issues surrounding crimes committed in cyberspace or assisted by computers. Discusses the nature of cybercrime from an international perspective and how the borderless nature of cybercrime impacts regulation and enforcement.
Prerequisite: Any 100W
Corequisite: Any 100W
Normal Grade Rules
3 units

JS 171. Human Rights and Justice
Interdisciplinary exploration of human rights instruments, institutions, and notable human rights campaigns. The historical development of human rights and contemporary threats to the realization of fundamental dignity for humans and non-humans will also be explored.
GER Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GER: V
3 units

JS 172. Human Trafficking and Modern Day Slavery
This course examines the social, cultural, and historical dimensions of global human trafficking and modern-day slavery, with special attention to the efficacy, effectiveness, and unintended consequences of various anti-trafficking policies from around the world, including the United States.
Pre/corequisite: Any 100W
Note: Must achieve a grade of “C” or better to fulfill Justice Studies major requirements.
Normal Grade Rules
3 units
JS 173. Borders and Conflict
Exploring border conflicts, including their history and evolution over time as they relate to states, institutions, practices, politics, and impact on communities. Issues include militarism, human rights/civil rights, environmental impact, and prospects for peace.
Co-requisite: Any100W
Note: A grade of “C” or better is required to meet Justice Studies major requirements.
Normal Grade Rules
3 units

JS 179. Human Rights Practicum and Seminar
Complete field experience in human rights advocacy/reporting/organizing while surveying recent human rights scholarship in seminar format.
Prerequisites: JS 025, any 100W
Normal Grade Rules
3 units

JS 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Upper division standing. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-3 units

JS 181. Internship: Justice Studies
The internship is designed to provide broad exposure to the operations of a variety of agencies and organizations that range from a criminal justice to social justice focus, including courts, law enforcement agencies, law offices, nonprofit organizations and community based programs.
Prerequisite: Upper division standing; Justice Studies or Forensic Science major; JS 100W with a C or better; 2.0 GPA; Department Consent, No Open University
Note: Students can take up to 3 additional units as JS electives.
Repeatable for credit
Credit / No Credit
1-3 units

JS 183. Ethics in Criminal Justice
In-depth examination of ethical issues in policing, forensic science, and the judicial system. Rhetorical and critical analyses of opposing arguments in justice studies from a variety of ethical perspectives.
Prerequisite: JS 10, JS 25, or FS 11; JS 100W or approved substitute
Normal Grade Rules
3 units

JS 184. Directed Reading
Designed to meet individual needs and interests.
Prerequisite: Upper division standing. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-3 units

JS 185. Special Topics in Law and Justice
Range of law and justice issues and topics may be addressed. Content varies by semester. Topics may include international law and globalization, the struggle for justice, human rights, law, inequality and injustice, and others. May be repeated for credit when content changes for a maximum of 9 units.
Prerequisites: Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

JS 185ITL. Justice Studies International Experience
The goal of this course is to gain insight into systems of criminal and social justice outside of the U.S. Issues of justice are explored, and the role of the student as a global citizen is emphasized. Includes international experiential component through study abroad.
Repeatable for credit
Normal Grade Rules
1-9 units

JS 189. Senior Seminar: Contemporary Problems
Identification, discussion and analysis of selected problems in justice studies. A major term paper on a selected topic is required.
Prerequisite: Senior standing in final semester; Justice Studies or Forensic Science major; JS 100W and JS 114 with a “C” or better”; Department Consent
Note: A grade of “C” or better is required for Justice Studies majors.
Normal Grade Rules
3 units

JS 196. Guns and the Law
Socio-historical examination of the legal regulation of guns in the United States. Topics include prevalence of gun ownership, gun use, and gun-related violence; Constitutional foundations of gun ownership; and policy debates surrounding gun rights and gun control.
Normal Grade Rules
3 units

JS 201. Justice and Social Theory
Examines classic and contemporary theories of justice, including legal, social, economic and criminal justice and their application to current social issues.
Prerequisite: Graduate standing.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

JS 202. Survey of Research Methods
Examination of research methods applied to solving problems and resolving issues in justice-related agencies, organizations and processes. Focuses on the application of the scientific method to problem-solving and program evaluation.
Prerequisite: STAT 95 or equivalent, JS 114 or equivalent, and graduate standing.
Normal Grade Rules
3 units

JS 203. Seminar in Applied Statistics in Justice
An evaluation of specific statistical methods for quantitative and nonquantitative analyses, concentrating on applications and interpretations in justice related settings.
Prerequisite: STAT 95 or equivalent, JS 114 or equivalent, and graduate standing.
Normal Grade Rules
3 units

JS 204. Justice Organizations, Ethics & Change
An examination of significant organization and management theories, behavioral processes, and organizational change and development.
Prerequisite: JS 203 and graduate standing
Normal Grade Rules
3 units

JS 205. Seminar in Law and Courts
Roles of the law in society. Analysis and critique of courts, attorneys, judges and juries; dispute resolution; race, class, sex inequality; law’s symbolic functions and unintended consequences; new socio-legal research; and comparative perspectives.
Normal Grade Rules
3 units

JS 206. Seminar in Juvenile Justice
Analysis of philosophy, theories, relevant law, research, constitutional issues related to juvenile justice. Structure and purpose of juvenile court proceedings. Minors in criminal and civil court, juvenile corrections, death penalty for juveniles, transfers to adult court, child victims, fetal abuse.
Normal Grade Rules
3 units

JS 207. Seminar in Qualitative Research Methods
Qualitative research methods used in Justice Studies. Includes relationship of empirical evidence to theory, ethics in conducting empirical research, methodological design, interviewing techniques, field methods, participant observation, and content analysis.
Prerequisites: Graduate standing, or instructor permission.
Normal Grade Rules
3 units
JS 208. Seminar: Punishment & Society
Examination of a range of penal ideas and practices; includes historical analysis of punishment, overview of theoretical perspectives and empirical social science research on punishment and alternative sanctions and implications for contemporary penal policy.
Normal Grade Rules
3 units

JS 209. Seminar in Police and Social Control
Critical examination of democratic policing, including internal and external strategies for control and reform. Emphasis on police role in democracy, policy, culture, performance measures for individuals and organizations, and alternative policing methods and policies.
Normal Grade Rules
3 units

JS 211. Historical Issues in Justice Studies
Equips students to do historical research, understand the significance of historical perspectives for contemporary issues, and explore the place of historical obligations and entitlements in theories of justice.
Prerequisite: JS 201 and graduate standing
Normal Grade Rules
3 units

JS 212. Local & Global Perspectives on Human Rights
This course is a graduate level exploration of contemporary human rights scholarship and praxis in the United States and in relation to U.S. domestic and foreign policy.
Normal Grade Rules
3 units

JS 214. Seminar: Social Movement, Community Organizing, and Social Justice
This course is an exploration of social movement praxis. The class investigates community organizing broadly and discusses the idea of social justice, specifically how it relates to establishing human rights in our communities through the active participation of informed citizens.
Normal Grade Rules
3 units

JS 218. Seminar: Immigration, Law & Justice
Graduate level interdisciplinary analysis of the cultural, political and socioeconomic implications of contemporary migratory movements and immigration control policies in the United States, with particular emphasis on notions of international human rights and global justice.
Normal Grade Rules
3 units

JS 220. Seminar: Criminological Theory
A critical review of classical and contemporary theories and research in criminology. Evaluation of contemporary criminal justice and its relationship to theories of criminal behavior.
Normal Grade Rules
3 units

JS 221. Seminar: Deviance & Social Control
This course examines various areas of norm violations and rule-breaking behaviors including, alcohol and drug use/abuse, criminal violence, corporate deviance, gang violence, and sexual deviance, child abuse, hate crime, mental illness, computer piracy and evaluates justice policies.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

JS 222. Seminar: Penal Policies and Justice
A critical review of historical and contemporary theoretical models. Evaluation of current research on treatment, rehabilitation/punishment models and their use in adult and juvenile institutions and community settings.
Normal Grade Rules
3 units

JS 223. Seminar: Comparative Criminology & Criminal Justice
This course provides a comparative perspective on crime, violence and punishment in contemporary global societies. The course analyzes transnational trends in crime, as well as organizational responses to criminality. Topics include international drug markets, sexual commerce, child soldiers, and terrorism.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

JS 243. Collaborative Dialogues Seminar
This course will engage students in facilitated dialogues on cultural and professional perspectives on family violence. Students will learn the philosophy and process of dialogue and how dialogue enriches and sustains collaborative capacities at individual, relationship and organizational levels.
Prerequisite: JS 136 and JS 137
Normal Grade Rules
1 unit

JS 244. Collaborative Projects Seminar
This course will facilitate the design and implementation of student projects designed to enhance services and service delivery through interdisciplinary collaboration.
Prerequisite: JS 136 and JS 137
Corequisite: Research Methods course (if needed)
Normal Grade Rules
1 unit

JS 245. Collaborative Field Experience Seminar
This seminar will facilitate integration of concepts of collaboration in the field of family violence using the students’ current experience in the field. Topics covered in the seminar will include: elements of effective collaboration, trauma-informed practice, cultural competence and ethical considerations.
Prerequisite: JS 136 and JS 137
Normal Grade Rules
1 unit

JS 246. Research Methods in Family Violence
This course will prepare students to interpret, critique, plan and conduct applied research in the field of domestic violence by providing a fundamental understanding of the types and purposes of research and the logic involved in the scientific method and research design.
Normal Grade Rules
1 unit

JS 247. Family Violence in Special Populations
This course covers special populations in family violence, contributing to a broader understanding of this complex social issue. The course chooses one group for study, such as LGBT or military families, and explores the unique correlates, effects and intervention strategies.
Repeatable for credit
Normal Grade Rules
1 unit

JS 248. Community Justice
Collaborative justice efforts as they relate to family violence in the American justice system. Emphasis on the role of the community and how citizens can be involved in collaborative justice.
Normal Grade Rules
1 unit

JS 249. Neurobiology Response to Family Violence
In this course, we explore current research, models, and theories introduced through the field of Interpersonal Neurobiology to better understand trauma, collaboration, and violence. Using IPNB concepts, students work to improve sustainable impact in reducing family violence and its effects.
Normal Grade Rules
1 unit

JS 250. Independent Study ICR Field Placement
This independent study is designed for students unable to meet the program’s field experience requirement through their current employment or internship. Students and community professionals taking the Independent Study: Collaborative field placement internship will be placed in ICR approved placements. Students are required to complete a minimum of 60 hours in their field placement during the course.
Prerequisite: JS 136, JS 137
Corequisite: JS 245
Credit/No Credit
1 unit

JS 256. Comparative Criminal Justice Systems
Theory-based comparative analysis of US criminal justice system with criminal justice systems around the world. Course focuses on legal traditions, policing, courts and corrections, with emphasis on the role of geographical, historical and cultural traditions in shaping criminal justice.
Normal Grade Rules
GE: GWR
3 units
JS 266. Applied Research Methods and Statistics
This course introduces research concepts, methodology, design, qualitative and quantitative data analysis, interpretation, and SPSS use for understanding crime and evaluating criminal justice issues, policies, and agency practices.
Prerequisite: JS 114 or equivalent
Normal Grade Rules
3 units

JS 267. Crime and Gender Around the World
This course is designed to examine the growing body of literature that deals with women’s experiences about crime and justice to understand the impact of gender on criminal behavior and justice outcomes.
Normal Grade Rules
3 units

JS 268. Immigration and International Law
This online course provides an overview of the United States legislation and policy relating to immigration and explores the opportunities and challenges facing policymakers in the context of domestic law and policy, as well as global norms and regimes.
Normal Grade Rules
3 units

JS 269. Cyber Forensics
This online course teaches procedures for identification, preservation and extraction of electronic evidence. Public and private sector responses to cyber security issues in national and international contexts are discussed.
Normal Grade Rules
3 units

JS 270A. Global Terrorism
This online course examines terrorism and the role it plays in today’s complex world as well as the theory and practice of international terrorism.
Normal Grade Rules
3 units

JS 271. International Human Rights
This online course focuses on the politics and history of the conception, protection, and violation of human rights in global perspectives as well as the examination of the practical applications of the theory.
Normal Grade Rules
3 units

JS 272. Policing in Global Contexts
This online course examines policing from a global perspective. The objective of this course is to orient students as to how police organizations operate in different parts of the world in terms organization, crime control, and crime prevention.
Normal Grade Rules
3 units

JS 273. International Criminology and Juvenile Delinquency
This online course will examine: (1) issues fundamental to criminological and juvenile delinquency research and practical applications; (2) the current and emerging national/international crime and delinquency issues; and (3) criminal and juvenile justice policies adopted by different countries.
Normal Grade Rules
3 units

JS 274. Applied Project
For this project, a substantial paper of a justice agency program, justice policy, and/or organizational issue is required. The contents will be determined by the student in consultation with the instructor, with whom the student meets regularly for supervision.
Credit / No Credit
3 units

JS 278. Seminar in Special Topics
In-depth exploration and analysis of selected justice-related topic. Course will consider relevant theories, issues, and research on the selected topic.
Prerequisite: Graduate standing or instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

JS 281. Justice Practicum
Supervised placement in a justice organization or agency in a position emphasizing analytical and research skills and/or managerial responsibilities. Culminating research or policy paper required.
Prerequisite: Graduate standing and graduate coordinator consent.
Repeatable for credit
Credit / No Credit
1-3 units

JS 287. Program Evaluation Project
A substantial paper/mock evaluation of a justice agency program, justice policy, or organizational issue.
Prerequisite: Completion of JS 201, JS 202, JS 203, JS 204, and JS 274
Repeatable for credit
Mandatory CR/NC/RP
3 units

JS 288. Seminar in Special Topics
Continued work on thesis or project.
Pre-requisite: Outstanding RP grade in a preceding semester in a project or thesis class
Repeatable for credit
Mandatory CR/NC/RP
1 unit

JS 297. Program Evaluation Project
A substantial paper/mock evaluation of a justice agency program, justice policy, or organizational issue.
Prerequisite: Completion of JS 201, JS 202, JS 203, JS 204, and JS 274
Repeatable for credit
Mandatory CR/NC/RP
3 units

JS 298. Special Study
Advanced individual research not covered in a regular course and not related to the project or the thesis topic.
Prerequisite: Instructor and Grad Coordinator permission.
Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

JS 299. Master’s Thesis
Six units are required to complete the thesis and oral defense of the thesis. Required for Plan A. Must be repeated for a total of 6 semester units.
Prerequisite: Admission to candidacy for the MS degree and thesis chair consent. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units
Kinesiology Department Courses

KINESIOLOGY

LOWER DIVISION

KIN 001. Adapted Physical Activities
Structured individualized physical activities to enhance physical/motor fitness and develop an active, health-oriented lifestyle for students unable to participate in the general activity program.
Repeatability: Credit
Normal Grade Rules
GE: PE
1 unit

KIN 002A. Beginning Swimming
This course is designed for the non-swimmer and beginning swimmer. It is assumed that all students enrolled in the class have had little or no experience in learning the basic skills of swimming. The course is designed to instruct the student in the basic skills necessary to enable him/her to swim safely in deep water.
There are no prerequisites for the course.
Normal Grade Rules
GE: PE
1 unit

KIN 002B. Intermediate Swimming
This course is designed to meet the needs of students who have satisfactorily completed the skills involved in beginning swimming.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
GE: PE
1 unit

KIN 002C. Advanced Swimming
This course is designed to refine and extend the development of advanced skills in swimming.
Prerequisite: Intermediate level or its equivalent.
Normal Grade Rules
GE: PE
1 unit

KIN 003. Water Polo
Fundamental skills, techniques, strategies, rules, and knowledge necessary to safely and correctly play water polo.
Prerequisite: Beginning level swimming proficiency
Normal Grade Rules
1 unit

KIN 007. Mexican Folklorico Dance
See CCS 007
Repeatable for credit
Normal Grade Rules
GE: PE
1 unit

KIN 008. Skin and SCUBA Diving
Both skin and SCUBA diving skills for enjoyment and to understand dangers connected with the sport. Only one unit can be applied for the physical education graduation requirement.
Prerequisite: KIN 2C (or equivalent).
Mac/Insp Lab: 1 hour/activity 3 hours.
Normal Grade Rules
GE: PE
2 units

KIN 009A. Beginning Sailing
Basic skills and safety knowledge in small boats for those with little or no sailing experience.
Prerequisite: Student must be able to swim 100 yards without stopping, tread water for 5 minutes, and exit from an overturned dinghy. Students will be tested for this in the SPX pool.
Normal Grade Rules
GE: PE
1 unit

KIN 010A. Beginning Kayaking
Beginning skills and knowledge for those with little or no experience of flat water kayaking. The emphasis will be on safe operation at all times.
Prerequisite: Students must be able to swim 100 yards without stopping, tread water for 5 minutes, and exit from an overturned kayak. Students will be tested for this in the SPX pool.
Normal Grade Rules
GE: PE
1 unit

KIN 011A. Beginning Rowing
Basic skills and knowledge for those with little or no experience of sweep rowing or sculling. Initial classes will be on indoor rowing machines, then eight-oared boats will be used. Students will learn both how to row and how tocox, improvement of strength / fitness is central.
Prerequisite: Swin 100 yards without stopping, tread water for 5 minutes; don lifejacket in the water. Tested in pool.
Normal Grade Rules
GE: PE
1 unit

KIN 012A. Beginning Soccer
This course provides the intermediate student with the opportunity to refine and perfect the basic soccer skills and to master individual positions when using the 6-2 offense and the defense against the 6-6 offense.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
GE: PE
1 unit

KIN 013A. Beginning Rugby
This course is designed to familiarize the student with the rules, skills and basic concepts of modern Rugby Union Football. The class will equip the student to be an informed rugby spectator and/or participant.
Normal Grade Rules
GE: PE
1 unit

KIN 014A. Beginning Volleyball
This course provides the student with the opportunity to learn and develop the basic rules and skills of volleyball, the 6-6 offense and the defense against the 6-6 offense.
Normal Grade Rules
GE: PE
1 unit

KIN 014B. Intermediate Volleyball
This course provides the intermediate student with the opportunity to refine and perfect the basic volleyball skills and to master individual positions when using the 6-2 offense and the defense against the offense.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
GE: PE
1 unit

KIN 014C. Advanced Volleyball
This course is designed to teach advanced skills, principles and techniques necessary and fundamental to understanding and playing volleyball.
Prerequisite: Intermediate level or its equivalent.
Normal Grade Rules
GE: PE
1 unit

KIN 015A. Beginning Basketball
This course is designed to assist students in the development of fundamental skills necessary for effective involvement in playing the game of basketball.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
GE: PE
1 unit

KIN 015B. Intermediate Basketball
This course provides the intermediate student with the opportunity to refine and perfect basic basketball skills.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
GE: PE
1 unit

KIN 016A. Beginning Handball
This course is focused on the development of fundamental handball skills, basic tactics, simple strategies, etiquette and sportsmanship, rules, and their application in beginning games.
Normal Grade Rules
GE: PE
1 unit

KIN 016B. Intermediate Handball
Course focuses on improving the quality of fundamental handball skills, learning intermediate handball skills/drill and application, developing intermediate handball tactics and strategies, good sportsmanship, and playing more effective single and double games in different formats.
Normal Grade Rules
1 unit

KIN 019A. Beginning Football
This course is designed to introduce students to the game of soccer, and to provide students with the fundamental ability and knowledge needed to enjoy this game as players and as spectators.
Normal Grade Rules
GE: PE
1 unit
### KIN 019B. Intermediate Soccer
This course is designed for students with previous soccer experience to refine technical skills, enhance offensive and defensive tactical awareness, learn various strategy and game philosophies, and improve conditioning. Develop a greater understanding of the rules of the game with an emphasis on the application of skills and strategy in game play
Prerequisite: KIN 19A (or equivalent) or Instructor Consent
Normal Grade Rules
GE: PE
1 unit

### KIN 020A. Beginning Badminton
This course is focused on the development of fundamental badminton skills, basic tactics, simple strategies, etiquette, rules, and their application in single and double games
Normal Grade Rules
GE: PE
1 unit

### KIN 020B. Intermediate Badminton
This course is focused on improving the quality of fundamental badminton skills, learning intermediate badminton skills and their application, developing intermediate badminton tactics and strategies, good sportsmanship, and playing more effective single and double games in elimination, round robin, and team competitions.
Prerequisite: Completed SJSU beginning badminton class or have equivalent skills/knowledge
Normal Grade Rules
GE: PE
1 unit

### KIN 020C. Advanced Badminton
This course is focused on improving the quality of fundamental and intermediate badminton skills, learning advanced skills and their application, developing intermediate badminton tactics and strategies, good sportsmanship, and playing high level games.
Prerequisite: Completed SJSU intermediate class or have equivalent skills/knowledge
Normal Grade Rules
GE: PE
1 unit

### KIN 021A. Beginning Tennis
This course is designed to give students a basic understanding of the game of tennis. Students will be given a chance to learn through lecture, demonstration, drilling and match play.
Normal Grade Rules
GE: PE
1 unit

### KIN 021B. Intermediate Tennis
This course is focused on improving the quality of fundamental tennis skills, learning intermediate tennis skills and drills application, developing intermediate tennis tactics and strategies, establishing proper manners, and playing more effective single and double games in elimination, round robin, and team competitions.
Prerequisite: Completed SJSU beginning class or have equivalent skills/knowledge
Normal Grade Rules
GE: PE
1 unit

### KIN 021C. Advanced Tennis
This course is focused on improving the quality (power, speed, control, and placement) of basic and intermediate tennis skills, learning advanced skills and their application, developing advanced tennis tactics and strategies, good sportsmanship, and playing high level games.
Prerequisite: Completed SJSU intermediate class or have equivalent skills/knowledge
Normal Grade Rules
GE: PE
1 unit

### KIN 022A. Beginning Racquetball
This course is focused on the development of fundamental racquetball skills, basic tactics, simple strategies, etiquette, rules, and their application in single and double games.
Normal Grade Rules
GE: PE
1 unit

### KIN 022B. Intermediate Racquetball
This course is focused on improving the quality of fundamental racquetball skills, learning intermediate racquetball skills/drills and application, developing intermediate racquetball tactics and strategies, good sportsmanship, and playing more effective single and double games in different formats.
Prerequisite: Completed SJSU beginning class or have equivalent skills/knowledge
Normal Grade Rules
GE: PE
1 unit

### KIN 023A. Beginning Archery
This course is designed to introduce the student to the basic skills and concepts, provides the opportunity to learn, practice and analyze correct shooting form and to participate in a variety of archery tournaments.
Normal Grade Rules
GE: PE
1 unit

### KIN 023B. Intermediate Archery
This course builds upon beginning level skills and knowledge and provides the opportunity to shoot a variety of different archery rounds.
Prerequisite: Beginning level or its equivalent
Normal Grade Rules
GE: PE
1 unit

### KIN 024A. Beginning Bowling
This course is designed to give students an understanding of the sport of bowling and develop fundamental bowling skills.
Normal Grade Rules
GE: PE
1 unit

### KIN 024B. Intermediate Bowling
This course is designed to meet the needs of students who have satisfactorily completed the skills in beginning bowling. The course will add more advanced theory and techniques.
Prerequisite: Beginning level or its equivalent
Normal Grade Rules
GE: PE
1 unit

### KIN 024C. Advanced Bowling
Designed for students who are skilled bowlers. A brief review of bowling fundamentals and principles will be followed by in depth lectures on application of principles. Drills will be used to improve skills.
Prerequisite: KIN 24B and a bowling average of 150 or better; alternative would be “scratch” league or a low handicap league plus instructor consent.
Normal Grade Rules
GE: PE
1 unit

### KIN 025A. Beginning Golf
Designed for those who have never played golf or who have played very little and have had no basic formal instruction. Provides the student with a sound set of fundamentals to prepare for further instruction, if desired.
Normal Grade Rules
GE: PE
1 unit

### KIN 025B. Intermediate Golf
Development of intermediate golf skills and knowledge with a focus on technique that facilitates the acquisition of consistent intermediate level performance.
Prerequisite: KIN 25A or equivalent.
Normal Grade Rules
GE: PE
1 unit

### KIN 025C. Advanced Golf
This course is designed for people who might score from the high seventies to the high eighties on a regular basis.
Prerequisite: Intermediate level or its equivalent.
Normal Grade Rules
GE: PE
1 unit

### KIN 027A. Beginning Table Tennis
This course is focused on the development of fundamental table tennis skills, basic tactics, simple strategies, etiquette, rules, and their application in single and double games.
Normal Grade Rules
GE: PE
1 unit
KIN 027B. Intermediate Table Tennis
This course is focused on the development of fundamental table tennis skills, learning intermediate table tennis skills and drills and their application, developing intermediate tactics and strategies, good sportsmanship, and playing more effective single and double games in elimination, round robin, and team competitions.
Prerequisite: Completed SJSU beginning class or have equivalent skills/knowledge
Normal Grade Rules
GE: PE
1 unit

KIN 028A. Beginning Gymnastics
This course is designed to develop the student’s awareness and performance of basic skills in gymnastics.
Normal Grade Rules
GE: PE
1 unit

KIN 029. Cardio Kickboxing
Cardio Kickboxing is a non-contact aerobic conditioning activity combining punches, kicks, traditional aerobic skills, and fitness activities. The course is designed to enhance cardiovascular endurance, muscular strength, and muscular endurance.
Normal Grade Rules
GE: PE
1 unit

KIN 030. Pilates
Pilates employs an established exercise protocol designed to develop core strength, flexibility, posture, and range of motion. The course covers the fundamentals of a Pilates workout with an emphasis on breathing, alignment, neutral spine, and core stability.
Normal Grade Rules
GE: PE
1 unit

KIN 031. Body Sculpting
Body sculpting employs exercise augmented with moderate weights to enhance fitness. The course is designed to improve muscle tone and endurance, flexibility, balance, and core stability.
Normal Grade Rules
GE: PE
1 unit

KIN 032. Aerobics
Aerobics incorporates exercise and music, using large, continuous, rhythmic movements to elevate the heart rate and produce a training effect. The course is designed to improve muscle tone and enhance cardiorespiratory endurance.
Normal Grade Rules
GE: PE
1 unit

KIN 033. Advanced Aerobic Activities
Aerobic activities incorporating high intensity interval training, circuit training, cardio kickboxing, power step, and resistance training. This course is designed to enhance cardiorespiratory endurance, muscular strength and muscular endurance.
Prerequisite: KIN 032 or KIN 034 or instructor consent.
Normal Grade Rules
GE: PE
1 unit

KIN 034. Step Training
Step training is a low-impact aerobic conditioning activity designed to enhance cardiorespiratory endurance, muscular strength, and muscular endurance.
Normal Grade Rules
GE: PE
1 unit

KIN 035A. Beginning Weight Training
This course is designed to teach the basic concepts of weight training for muscular strength and endurance. Its goal is to provide students with knowledge about the principles involved in weight training and the health-related components of fitness through a variety of exercises.
Normal Grade Rules
GE: PE
1 unit

KIN 035B. Intermediate Weight Training
This course is designed for individuals with prior training experience and involves higher level exercises. Students will be exposed to a wide variety of machine as well as free weight exercises and will then design a program based on individual needs.
Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
GE: PE
1 unit

KIN 035C. Advanced Weight Training
This course is designed for students who have had prior class experience in resistive exercise training. Students who have not taken these classes must demonstrate adequate knowledge of lifting technique, terminology and weight room etiquette.
Prerequisite: Intermediate level or its equivalent.
Normal Grade Rules
GE: PE
1 unit

KIN 037. Fitness Walking
Fitness walking is a low-impact conditioning activity designed to develop cardiovascular fitness.
Normal Grade Rules
GE: PE
1 unit

KIN 038. Beginning Jogging
Jogging is a moderate-impact activity designed to improve cardiovascular fitness.
Normal Grade Rules
GE: PE
1 unit

KIN 040A. Topics in Modern Dance I
See DANC 041A.
Repeatable for credit
Normal Grade Rules
GE: PE
2 units

KIN 041A. Topics in Ballet I
See DANC 041A.
Repeatable for credit
Normal Grade Rules
GE: PE
2 units

KIN 042A. Topics in Jazz Dance I
See DANC 042A.
Repeatable for credit
Normal Grade Rules
GE: PE
2 units

KIN 045A. Beginning Lindy Hop and Night Club Swing
This course is focused on the development of fundamental Swing dance skills and knowledge. Steps, technique, and styling will be drawn from Lindy Hop, Jitterbug, Street Swing, Jive and Triple-Time Swing dances.
Normal Grade Rules
GE: PE
1 unit

KIN 046A. Beginning Social Dance
This course is focused on the development of fundamental social dance skills and knowledge. Dances will be selected from the American Smooth (e.g. Waltz, Tango), American Rhythm (e.g. Rumba, Cha Cha) and night club (e.g. Hustle, West Coast Swing) dance categories.
Normal Grade Rules
GE: PE
1 unit

KIN 046B. Intermediate Social Dance
This course is focused on the development of intermediate level social dance skills and knowledge. Dances will be selected from the American Smooth (e.g. Waltz, Tango), American Rhythm (e.g. Rumba, Cha Cha) and night club (e.g. Hustle, West Coast Swing) dance categories.
Normal Grade Rules
GE: PE
1 unit

KIN 047A. Beginning West Coast Swing
Designed to improve students’ understanding of West Coast Swing dancing and to improve fundamental dance skills common to the dance.
Normal Grade Rules
GE: PE
1 unit
KIN 048A. Beginning Latin Dance
This course is focused on the development of fundamental Latin dance skills and knowledge. Dances will be selected from the International Latin, American Rhythm (e.g. Rumba, Cha Cha) and night club (e.g. Salsa) dance categories.

Normal Grade Rules
GE: PE
1 unit

KIN 048B. Intermediate Latin Dance
This course is focused on the development of intermediate level latin dance skills and knowledge. Dances will be selected from the International Latin, American Rhythm (e.g. Rumba, Cha Cha) and night club (e.g. Salsa) dance categories.

Prerequisite: KIN 046A or KIN 048A, or equivalent dance experience.

Normal Grade Rules
GE: PE
1 unit

KIN 049A. Topics in Tap Dance I
See DANC 049A.
Repeatable for credit
Normal Grade Rules
1 unit

KIN 049B. Topics in Tap Dance II
See DANC 049B.
Repeatable for credit
Normal Grade Rules
1 unit

KIN 050. Tai Chi (Non-Combative)
Emphasis on knowledge and skill, development of the standard Simplified Tai Chi Form and applications of Tai Chi for life. It is assumed that students enrolled in the class have had little or no experience in Tai Chi.

Normal Grade Rules
GE: PE
1 unit

KIN 051A. Beginning Aikido
This course is focused on the philosophy, history, and basic skills related to the Japanese-derived martial art of Aikido.

Normal Grade Rules
GE: PE
1 unit

KIN 051B. Intermediate Aikido
This course is focused on the development of intermediate level skills and knowledge related to the Japanese-derived martial art of Aikido. It builds upon the basic movement patterns and falling skills introduced in the beginning class.

Prerequisite: KIN 51A or equivalent Aikido skills and experience.

Normal Grade Rules
GE: PE
1 unit

KIN 052A. Beginning Judo
This course is focused on development the fundamental skills and knowledge related to Judo. Included are basic groundwork and throwing techniques.

Normal Grade Rules
GE: PE
1 unit

KIN 052B. Intermediate Judo
This course is focused on development of intermediate level ground and throwing skills and learning in-depth strategies, philosophy, and culture related to Judo. It builds upon the basic ukemi, newaza, and tachiwaza techniques learned in the beginning class.

Prerequisite: KIN 052A or equivalent judo skills and experience.

Normal Grade Rules
GE: PE
1 unit

KIN 052C. Competitive Judo
Prepares students to use Judo techniques in competitive tournaments. The course will offer intermediate and advanced skills (standing, mat and falling techniques) and strategies to improve competitiveness.

Repeatable for credit
Normal Grade Rules
1 unit

KIN 053A. Beginning Karate
This course is focused on development of fundamental skills and knowledge related to Karate. Included are basic kicking, punching, and blocking techniques.

Normal Grade Rules
GE: PE
1 unit

KIN 053B. Intermediate Karate
This course is focused on development of intermediate level skills and knowledge related to Karate. It builds upon the fundamental skills and techniques developed in the beginning class.

Prerequisite: KIN 53A or equivalent karate skills and experience.

Normal Grade Rules
GE: PE
1 unit

KIN 054A. Beginning Tae Kwon Do
This course is focused on development of fundamental skills and knowledge related to Tae Kwon Do. Included are basic patterns (poomse), kicking and one-step defenses.

Normal Grade Rules
GE: PE
1 unit

KIN 054B. Intermediate Tae Kwon Do
This course is focused on development of intermediate level skills and knowledge related to Tae Kwon Do. It builds upon the fundamental skills and techniques developed in the beginning Tae Kwon Do class.

Prerequisite: KIN 54A or equivalent Tae Kwon Do skills and experience.

Normal Grade Rules
GE: PE
1 unit

KIN 055A. Beginning Self-Defense
This course is focused on development of fundamental skills and knowledge related to self defense. Included are mental and physical self-defense skills and techniques applicable under a variety of conditions.

Normal Grade Rules
GE: PE
1 unit

KIN 058A. Introductory Brazilian Jiu-Jitsu
Development of the essential skills and principles of Brazilian jiu-jitsu practice. Included are the basic escapes, sweeps, and submissions from the most common positions.

Normal Grade Rules
1 unit

KIN 061A. Beginning Hatha Yoga
In this course the student will learn the correct movements, postures and sequence used in traditional Hatha Yoga.

Normal Grade Rules
GE: PE
1 unit

KIN 061B. Intermediate Hatha Yoga
Further exploration of the theories and practices of Hatha Yoga encompassing the second level series of traditional intermediate Hatha Yoga postures, breathing exercises, and relaxation techniques.

Prerequisite: Beginning level or its equivalent.
Normal Grade Rules
GE: PE
1 unit

KIN 062A. Beginning Ice Skating
A beginning ice skating course that covers the skills identified by the International Ice Skating Association (IISA).

Normal Grade Rules
GE: PE
1 unit

KIN 063A. Beginning Hiking and Backpacking
An introductory course designed to impact skills such as topographical map reading, navigation and hiking. The emphasis is on logistics and operations of adventure excursions and fitness in various wilderness environments.

Normal Grade Rules
GE: PE
1 unit
KIN 063B. Intermediate Hiking and Backpacking
Intermediate course designed for the student with previous hiking or outdoor adventure experience. Students are responsible for planning, packing and leading at intervals, the entire group on a 3-day overnight hiking and backpacking excursion. Students will learn topographical map, compass reading, fundamental hiking and trip planning.
Prerequisite: KIN 063A or instructor approval
Normal Grade Rules
GE: PE
1 unit

KIN 064A. Beginning Mountaineering
Fundamental mountain climbing techniques for a beginning level climber which includes face climbing, chimney climbing, traversing and rappelling.
Normal Grade Rules
GE: PE
1 unit

KIN 065A. Beginning Ice Hockey
Basic skills, techniques, strategies and rules of ice hockey. No previous skating is required but the ability to skate is highly recommended.
Normal Grade Rules
GE: PE
1 unit

KIN 066. Fit for Life!
Concepts of fitness and wellness, focusing on the importance of regular physical activity for health and well-being throughout the lifespan.
Co-Req: Enrollment in a college level physical education activity course for academic credit at a CCC or CSU.
Pre-requisite: Course is only open to students in approved high unit majors that have received a waiver for the physical education graduation requirement.
Normal Grade Rules
2 units

KIN 068. Visual Representations of Sport in Popular Culture
Critical examination of visual representations of sport in popular culture. Facilitate a deeper understanding and appreciation of the artistic qualities that exemplify works of human creativity as related to sport. GE Area: C1
Normal Grade Rules
GE: C1
3 units

KIN 069. Stress Management: A Multidisciplinary Perspective
The stress process and its relation to health, disease, lifestyle, and the sociocultural environment. Physiological, psychological, sociological, and environmental parameters of stress across the lifespan, emphasizing university resources and stress management strategies to enhance academic, personal, and social development.
GE Area: E
Normal Grade Rules
GE: EE
3 units

KIN 070. Introduction to Kinesiology
Explores the broad spectrum of kinesiology as an academic discipline, fundamental concepts and meaning of movement/physical activity, diversity of humans as moving beings, professional/career options, current issues, personal characteristics/professional responsibilities, Kinesiology at SJSU, initiates professional portfolio.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Notes: Required for KIN majors and minors only.
Normal Grade Rules
3 units

KIN 080. Individual Movement Studies
Individual work related to motor performance and activity made by special arrangement.
Misc/Lab: Activity 2 hours.
Repeatable for credit
Credit / No Credit
1 unit

UPPER DIVISION

KIN 100W. Writing Workshop
Advanced skills in writing. Development of writing style and creation of organized, persuasive and analytical prose. Generalized and specialized forms of writing. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. KIN 100 for major/minors only on instructor consent. Allowed Declared Major Kinesiology.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE: Z
3 units

KIN 101. Sport in America
The role of sport (recreational and professional) as a social, political and economic institution in American society. Critical examination of contemporary issues affecting sport and sport involvement by diverse cultural groups within American society. GE Area: S
Prerequisite: Passage of WST or ENGL/LLD 100A with a C or better, upper division standing.
Normal Grade Rules
GE: V
3 units

KIN 105. Water Safety Instructor’s Course
Designed to teach the basic concepts, skills and knowledge for successful teaching in the American Red Cross aquatics program. The content and requirements are in accordance with the American Red Cross and the criterion set forth by the organization.
Prerequisite: Minimum age of 18
Misc/Lab: Lecture 1 hour/activity 2 hours.
Normal Grade Rules
2 units

KIN 106. Advanced SCUBA and Aquatic Technology
Underwater navigation, light salvage, searches, biological sampling, communications, weightless simulations, construction problem solving and lighting.
Prerequisite: NAUI SCUBA certification (or equivalent).
Misc/Lab: Lecture 1 hour/activity 4 hours.
Normal Grade Rules
GE: PE
3 units

KIN 107. Adapted Aquatics
Theories, techniques and practices in the instruction of persons with disabilities as they function in the aquatic environment.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Misc/Lab: Activity 2 hours.
Normal Grade Rules
1 unit

KIN 111. Sport & Movement in a Global Context
Human expression through sport, games, and movement in cultures outside the US, and how those expressions have changed over time. Exploration of how sporting traditions in cultures outside the US have influenced US culture and society. GE Area: V
Prerequisite: Passage of WST or ENGL/LLD 100A with a C or better, upper division standing, completion of CORE GE.
Normal Grade Rules
GE: V
3 units

KIN 111JTL. Sport & Movement in a Global Context: International Experience
Human expression through sport, games, and movement in cultures outside the US and how those expressions have changed over time. Exploration of how sporting traditions outside the U.S. have influenced US culture and society. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Normal Grade Rules
GE: V
3 units
KIN 145A. Physical Activity for Older Adults
Analyses of development and implementation processes of exercise programs for older adults.
Prerequisite: KIN 070 or instructor consent
Misc/Lab: Lecture 3 hours/Lab 3 hours
Normal Grade Rules
3 units

KIN 145B. Physical Activity for Older Adults
Analyses of development and implementation processes of exercise programs for older adults.
Prerequisite: KIN 70 or instructor consent
Misc/Lab: Lecture 3 hours/Lab 3 hours
Normal Grade Rules
3 units

KIN 147. Biomechanical Assessment of Movement
This class is designed to assist the student in becoming familiar and proficient with the Biomechanical methods and equipment for assessing human movement performance characteristics with the following goals: improving movement effectiveness, preventing injuries, and assessing rehabilitation progress.
Prerequisite: KIN 158
Misc/Lab: Lecture 3 hours/Lab 9 hours
Normal Grade Rules
3 units

KIN 149. Child Health and Physical Activity
See CHAD 149.
Normal Grade Rules
3 units

KIN 151. Sports and Fitness Marketing
Course is designed to apply marketing principles and processes to the sport and fitness industry. Content will focus on the sport and fitness product, consumer behavior, consumer satisfaction/dissatisfaction, and the customer experience in sport and fitness organizations.
Prerequisite: KIN 070
Normal Grade Rules
3 units

KIN 152. Theory of Sport and Fitness Management
Basic theory of sport management. Topics include sport management and organizational skills, sport marketing and sales; sport communication; sport finance, economics, law and governance.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units

KIN 153. Sport Facility and Event Management
Provide students with the skills necessary to effectively manage sport and fitness facilities and events.
Prerequisite: KIN 070; and KIN 152 for sports management emphasis. Open only to declared KIN majors/minors, or instructor consent.
Normal Grade Rules
3 units

KIN 154A. Instrumentation in Exercise Physiology and Biomechanics
Familiarity and proficiency with methods and instruments of assessing physiological and biomechanical characteristics of human performance.
Prerequisite: KIN 070 (or equivalent) for majors/minors only or instructor consent; KIN 070; KIN 155 with grades of ‘C-’ or better in each.
Misc/Lab: Lecture 1 hour/activity 4 hours.
Normal Grade Rules
3 units

KIN 154B. ECG Interpretations and Graded Exercise Testing
Theoretical background and practical proficiency in the methods and instruments of electrocardiogram interpretations and graded exercise testing.
Prerequisite: KIN 070 (or equivalent) for majors/minors only or instructor consent; KIN 070, KIN 155 with grades of ‘C-’ or better in each.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 155. Exercise Physiology
Physiological responses and adaptations of the human organism to physical activity.
Prerequisite: KIN 070; BIOL 066 and CHEM 030A with a grade of ‘C-’ or better in each; approved GE Math Concept course. Open only to declared KIN majors/minors, or instructor consent.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 156. Introduction to Adapted Physical Activity
Focus on attitude change as well as knowledge, comprehension and application of human movement principles related to individuals with disabling conditions.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units

KIN 157. Physiological Assessment
Use of exercise physiology instrumentation to assess physiological characteristics of human performance, interpret results, and implement corrective strategies, when appropriate.
Prerequisite: Chem 30A, GE Math, Biol 66, KIN 70 (C- or better grade), KIN 155 (C- or better grade)
Misc/Lab: Lecture 3 hours/Lab 3 hours
Normal Grade Rules
3 units

KIN 158. Biomechanics
Relationship of structural and mechanical principles of the musculoskeletal system to the analysis of human performance.
Prerequisite: KIN 070; BIOL 065 with a grade of ‘C-’ or better; approved GE Math Concept Course. Open only to declared KIN majors/minors, or instructor consent.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 159. Sport and Adapted Activities
Principles of kinesiology for adapting sport and activity for individuals with disabling conditions.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 160. History of Sport and Physical Education
Historical survey of physical education and sport from primitive societies through classical and medieval periods to the nineteenth and twentieth centuries. Development of sport, physical education and recreation in the U.S. and factors affecting their growth.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units

KIN 161. Philosophical Perspectives of Sport
Emphasis on systems of philosophy, aesthetic and moral considerations, metaphysical fitness and contemporary issues. Review of leading human movement theorists.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units

KIN 162. Advanced Fitness Assessment and Exercise Prescription
In-depth study and analysis of the principles and techniques used in the assessment of physical fitness and health as well as the design of conditioning programs and physical activities.
Prerequisite: KIN 070 (or equivalent) for majors/minors only and KIN 155, or instructor consent. Grade of ‘C-’ or better in KIN 070 and KIN 155.
Misc/Lab: Lecture 2 hours/Activity 2 hours.
Normal Grade Rules
3 units

KIN 163. Physical Fitness and Nutrition
See NUFS 163.
Normal Grade Rules
GE. R
3 units
KIN 164. Sociocultural Perspectives
Sociocultural processes of sport and play in contemporary society. The study of phenomena arising out of group relations within the realm of kinesiology.
Prerequisite: KIN 070 for majors/minors only or instructor consent or lower division social science core GE.
Repeatable for credit
Normal Grade Rules
3 units

KIN 165. Motor Development
Motor development of the individual from birth to maturity. Emphasis upon motor behavior, needs, capacities and interests.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units

KIN 166. Motor Learning
Concepts, principles and theories of motor learning with application to physical activities.
Prerequisite: KIN 070 for majors/minors only or instructor consent; BIOL 066 with a grade of ‘C-’ or better.
Misc/Lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

KIN 167. Sports Psychology
Psychological aspects of sports, including the value of sports, psychological factors involved in competitive as well as non-competitive athletic activities and the role of sports psychologists.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

KIN 168. Psychology of Coaching
Social, clinical, child, measuring, industrial, personality and organizational psychology and the practical application of the material to coaching.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Normal Grade Rules
3 units

KIN 169. Diversity, Stress and Health
Impact of structured inequalities on stress and health of diverse populations. Analysis of physiological/psychosocial health factors related to diversity, as well as behavioral interventions and social actions that mediate stress and optimize health and social justice. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU Studies courses. Completion of, or co-registration in, 300W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

KIN 170B. Field Experience-Teaching
Practical experiences to satisfy certification requirement in off-campus or field-based programs. May be repeated for a maximum of 4 units.
Prerequisite: KIN 070 for majors/minors only or instructor consent. Concurrent enrollment in KIN 172, KIN 173, KIN 178, or KIN 179.
Repeatable for credit
Credit / No Credit
1 unit

KIN 170C. Fieldwork in Adapted Physical Activity
Supervised experiences in adapted physical activity at selected public and private agencies.
Prerequisite: KIN 070 for majors/minors only or instructor consent; KIN 156. Concurrent enrollment in KIN 172 or KIN 178 or KIN 179.
Repeatable for credit
Credit / No Credit
1-3 units

KIN 170D. Fieldwork in Sport Management
Practical experience in a professional work setting while working and observing 100 hours under direct supervision of qualified sport management professionals. Interns assigned a variety of duties and experiences.
Prerequisite: KIN 070, KIN 152, and upper division standing.
Repeatable for credit
Credit / No Credit
1-3 units

KIN 170E. Field Experience Coaching on Campus
Practical experience in on-campus programs for coaching minors. May be repeated once for credit.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Repeatable for credit
Credit / No Credit
2 units

KIN 170F. Field Experience Coaching off Campus
Practical experience in off-campus programs for coaching minors. May be repeated once for credit.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Repeatable for credit
Credit / No Credit
2 units

KIN 170G. Field Experience Activity Programs on Campus
Practical experience in on-campus activity programs. Appropriate only for non-teaching concentration areas. Maximum of 3 units may be repeated.
Prerequisite: KIN 070 for majors/minors only or instructor consent.
Repeatable for credit
Credit / No Credit
1 unit

KIN 170H. Field Experience Skin and SCUBA Diving on Campus
Practical experience in skin and SCUBA diving situations. Appropriate for certified SCUBA divers to satisfy certification requirements in on-campus program. Maximum of 4 units may be repeated.
Prerequisite: SCUBA Diver Certificate, Life-Saving, first-aid and CPR certification.
Repeatable for credit
Credit / No Credit
1 unit

KIN 171A. Non Traditional Game and Sport Activities
Non traditional and global game and sport activities appropriate for preadolescents and adolescents in instructional settings.
Prerequisite: KIN 070 for majors/minors only or instructor consent, upper division standing.
Misc/Lab: Lecture/activity 4 hours
Normal Grade Rules
3 units

KIN 171B. Elementary School Programs, K-6
Philosophy, principles and activities of physical education appropriate for children.
Prerequisite: KIN 070, KIN 165 or KIN 173. Open only to declared KIN majors/minors or instructor consent.
Co-requisites: KIN 170B or KIN 170C.
Misc/Lab: Lecture/activity 4 hours.
Normal Grade Rules
3 units
KIN 173. Intro to Teaching PE & Non-trad Sports
This course will introduce future physical educators to profession of teaching and will include philosophies, ethics, and standards for teaching, legal and current issues, learning-communities, inclusion of non-traditional and global games and sport activities, and observations of effective teaching.
Prerequisite: KIN 070 for majors/minors only or instructor consent or concurrent enrollment; KIN 171A.
Co-requisite: KIN 170B.
Misc/Lab: Lecture 3 hour/Lab 3 hours.
   Normal Grade Rules
   3 units

KIN 174. Assessment of Psychomotor Function
Basic procedural elements of informal observation, formal performance testing and direct measures of psychomotor function of individuals with disabling conditions.
Prerequisite: KIN 070; Open only to declared KIN majors/minors or instructor consent.
   Normal Grade Rules
   3 units

KIN 175. Measurement and Evaluation in Kinesiology
Designed to develop an understanding of measurement and evaluation concepts and application relevant to assessment in the psychomotor, cognitive and affective domains. Activities include collection and computer analysis of data.
Prerequisite: KIN 070 for majors/minors only or instructor consent; approved GE Math Concept Course.
Misc/Lab: Lecture/activity 4 hours.
   Normal Grade Rules
   3 units

KIN 176. Exercise Psychology
Examines the psychological determinants and consequences of exercise and physical activity. Analysis and critique of research and theory relevant to exercise adherence, motivation, self-efficacy, and attributional style. Practical applications of theoretical concepts.
Prerequisite: PSYC 001.
   Normal Grade Rules
   3 units

KIN 177. Movement Experiences for Children
Physical Education K-6 curricular philosophy and activities appropriate for elementary school personnel; emphasizes the social, emotional, physical and skill development of children in the elementary school setting.
Prerequisite: CHAD 060 or CHAD 067.
Misc/Lab: Lecture 2 hours/activity 2 hours.
   Normal Grade Rules
   3 units

KIN 178. Management Practices for Physical Education Teachers
Examines current practices for managing student behaviors, instructional technology, legal regulations, and physical fitness needs as well as exploring adolescent development.
Prerequisite: KIN 070 for majors/minors only or instructor consent; KIN 172, KIN 171A or concurrent enrollment and upper division standing.
Co-requisite: KIN 170B or KIN 170C.
Misc/Lab: Lecture 2 hours/lab 2 hours.
   Normal Grade Rules
   3 units

KIN 179. Design and Assessment of Movement Experiences
Integrate concepts from kinesiology, motor learning, motor development to address sequential movement experiences, including qualitative analysis and interactions with performer.
Prerequisite: KIN 070 for majors/minors only or instructor consent; KIN 158, KIN 166 and KIN 178.
Co-requisite: KIN 170B or KIN 170C.
Misc/Lab: Lecture/activity 4 hours
   Normal Grade Rules
   3 units

KIN 180. Independent Study
Independent study through projects or directed reading related to the field of Kinesiology. Repeatable for a total of 6 units.
Prerequisite: CPA overall of 2.0, KIN 70 or instructor consent
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

KIN 180C. Individual Studies: Coaching
Individual education in selected coaching situations.
Prerequisite: KIN 070, upper division coaching minor, appropriate concepts and performance course, intermediate level competency or instructor consent.
Repeatable for credit
   Credit / No Credit
   2 units

KIN 184. Directed Reading
Assigned reading of selected books, journals and papers; conferences with instructor, seminars, reports (oral and written). May be repeated for a total of 4 units.
Prerequisite: KIN 070 for majors/minors only for instructor and department chair consent.
Repeatable for credit
   Credit / No Credit
   1-4 units

KIN 185. Senior Seminar
Active learning capstone course designed to synthesize students’ undergraduate preparation, including internship experiences.
Capstone course designed to integrate and synthesize students’ knowledge and skills gained in their undergraduate preparation through active participation in the class and reflection on the internship experience; requires completion of a professional portfolio and a movement project.
Prerequisite: KIN 70, Kin Majors ONLY, KIN Minors
   Normal Grade Rules
   1 unit

KIN 185H. Senior Seminar – Honors
Examination of a topic of current interest in human performance. Summarized paper to be presented at student seminar.
Prerequisite: KIN 070 for majors/minors only or instructor consent; senior standing, 3.2 or better GPA and 3.5 or better average in major.
   Normal Grade Rules
   3 units

KIN 186. Pharmacology in Sports Medicine
Focuses on the basic pharmacology principles including legislation, administration, pharmacotherapeutics, drug classifications, and drug therapy and testing. Primary emphasis is placed upon pharmacology in the sports medicine arena. This course is accessible only on-line.
Prerequisite: A basic prevention and care of athletic injuries course is highly recommended.
   Normal Grade Rules
   3 units

KIN 187. Clinical Exercise Physiology
Physiological principles applied to the prevention, management, and treatment of chronic health conditions. Focus on the pathophysiology, acute response to exercise, chronic training effects, and development of appropriate conditioning and training programs for chronic conditions.
Prerequisite: KIN 070 (or equivalent) for majors/minors only or instructor consent; KIN 155, with grades of ‘C-’ or better in each.
   Normal Grade Rules
   3 units

KIN 188. Prevention and Care of Athletic Injuries
Prevention through safe equipment, facilities and protective strapping. Methods used to aid recovery.
Prerequisite: KIN 070, BIOL 065 with a grade of ‘C-’ or better, or instructor consent.
Misc/Lab: Lecture/activity 4 hours.
   Normal Grade Rules
   2 units
KIN 189. Prevention and Care of Athletic Injuries Laboratory
The laboratory course is designed to provide hands-on experience in the prevention and care of athletic injuries, including preventive and supportive taping techniques, emergency management, and various hands-on experiences related to the prevention of activity related injuries.
Prerequisite: KIN 070, KIN 188 (concurrent enrollment acceptable).
Normal Grade Rules
1 unit

KIN 191A. Advanced Assessment of Lower Extremity Injuries
An advanced course designed to develop knowledge and skills in recognition, assessment, and medical referral of athletic injuries to the lower extremity, thoracolumbar spine, posture and gait. Activity sessions are designed to assist in the development of clinical assessment skills.
Prerequisite: KIN 070, KIN 188, KIN 189. Open only to declared KIN majors/minors or instructor consent.
Misc/Lab: Lecture 3 hour/lab 3 hours.
Normal Grade Rules
3 units

KIN 191B. Advanced Assessment of Upper Extremity Injuries
An advanced course designed to develop knowledge and skills in recognition, assessment, and medical referral of athletic injuries to the upper extremity, abdomen, thorax, cervical spine, head, and general medical conditions. Activity sessions are designed to develop clinical assessment skills.
Prerequisite: KIN 070; KIN 191A.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

KIN 193. Organization & Administration in Athletic Training
Theoretical and practical information concerning organization and administration of a modern athletic training program, including managerial styles, personnel, facilities/equipment management, budget, medical records, insurance issues, legal aspects, public relations, and other current topics in athletic training.
Prerequisite: KIN 070 for majors/minors only or instructor consent; KIN 188.
Normal Grade Rules
2 units

KIN 194. Therapeutic Exercise
Theoretical and clinical bases for the use of therapeutic exercise in rehabilitation settings, basic biomechanics, indications, contraindications, and proper application procedures of therapeutic exercise in athletic injury rehabilitation.
Pre/Corequisite: KIN 191A and KIN 191B.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 195. Therapeutic Modalities
Theoretical and clinical aspects of therapeutic modalities in athletic rehabilitation. Includes the physics and physiological effects, indications and contra-indications, as well as application procedures of various therapeutic modalities.
Prerequisite: KIN 070 for majors/minors only or instructor consent; KIN 188 and upper division standing.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

KIN 197A. Practicum in Athletic Training I
Introductory level supervised practical experiences at selected athletic training clinical settings.
Prerequisite: BIOL 065 and BIOL 066 with a grade of ‘C’ in each, KIN 188, KIN 189 and 50 hours of observation.
Open only to KIN majors.
Repeatable for credit
Credit / No Credit
1 unit

KIN 197B. Practicum in Athletic Training II
Observations and experiences within the profession of athletic training to assist in developing required National Athletic Trainers’ Association competencies. Interns supervised on a daily basis by a NATA-certified athletic trainer.
Prerequisite: KIN 197A. Open only to KIN majors.
Repeatable for credit
Credit / No Credit
1 unit

KIN 197C. Practicum in Athletic Training III
Clinical internship in allied health-related situations, e.g., physician’s offices, physical therapy sports medicine clinics, etc. Typically off-campus assignment.
Prerequisite: KIN 191A and KIN 191B (concurrent enrollment in KIN 191B is allowed), KIN 197B and professional insurance recommended.
Repeatable for credit
Credit / No Credit
1 unit

KIN 197D. Practicum in Athletic Training IV
Course is designed to provide the student with advanced, diverse, supervised, and practical experiences in the athletic training profession. Selected on-an-off campus clinical settings will be used to assist the student in the development of professional competencies and proficiencies.
Prerequisite: KIN 195, KIN 197C.
Credit / No Credit
1 unit

KIN 198. Internship in Kinesiology
Practical professional experiences related to the field of Kinesiology. Experiences are varied and can include exercise testing, prescription and evaluation; program leadership, design, and/or administration; coaching, and sport medicine internships. May be repeated for a total of 6 units.
Prerequisite: Upper division status; GPA overall of 2.0, KIN 70 or instructor consent
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

GRADUATE

KIN 250. Fundamentals of Quantitative Research
Design, analysis and interpretation of quantitative research. Course focuses on the research process from the formulation of a research problem through the analysis of data. Topics include: ethics in research, research design and analysis issues and techniques, psychometrics, descriptive statistics, parametric and non-parametric inferential statistics, critiquing research. Prerequisite: KIN 175 (or equivalent).
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE: GWAR
3 units

KIN 251. Fundamentals of Qualitative Research
Design, analysis and interpretation of qualitative research. Course focuses on the research process from the formulation of a research problem through the analysis of data. Topics include: ethics in research, research design and analysis issues and techniques, data representation, critiquing research. Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE: GWAR
3 units

KIN 255. Advanced Exercise Physiology
Survey and critical evaluation of current concepts and literature regarding physiological regulatory mechanisms of the oxygen transport system and muscle metabolism. Acute and chronic effects of exercise with emphasis placed on physiological limitations.
Prerequisite: KIN 155 (or equivalent).
Normal Grade Rules
3 units
KIN 256. Environmental Exercise Physiology
Survey and critical evaluation of current concepts and literature regarding various and environmental (heat, cold, altitude, etc.) conditions as they affect the typical responses to exercise. Acute effects and chronic adaptations examined.
Prerequisite: KIN 155 (or equivalent).
Normal Grade Rules
3 units

KIN 257. Biomechanics
Principles and laws of physics and mechanics as applied to analysis of human movement activities. Critical evaluation of current research findings in sport biomechanics.
Prerequisite: KIN 158 (or equivalent).
Normal Grade Rules
3 units

KIN 259. Advanced Internship in Adapted Physical Activity
Advanced, supervised practicum for the development of direct service, administration/supervision, in-service training and advocacy/leadership competencies in adapted physical activity.
Prerequisite: BS degree with emphasis in adapted physical education and/or satisfactory completion of specified didactic curriculum.
Repeatable for credit
Credit / No Credit
1-3 units

KIN 260. Philosophy of Sport and Embodiment
Development of a consistent set of basic professional values compatible with individual differences which may serve as a frame of reference for professional behavior.
Prerequisite: KIN 161 (or equivalent).
Normal Grade Rules
3 units

KIN 264. Sport Sociology
An in-depth study of the relationship between sport and society. Focus will be on social and cultural factors that affect how Americans play and view sport.
Prerequisite: KIN 164 (or equivalent).
Normal Grade Rules
3 units

KIN 265. Advanced Motor Development
Examination of specific theory and research related to the movement changes that occur across the lifespan. Interpretation of recent related research and individually guided investigation of a specific area of concern in motor development.
Prerequisite: KIN 165 (or equivalent).
Normal Grade Rules
3 units

KIN 266. Principles and Concepts of Perceptual Motor Learning
Motor behavior and the learning patterns developed in acquiring skill in a motor activity.
Prerequisite: KIN 166 (or equivalent).
Normal Grade Rules
3 units

KIN 267. Advanced Sport Psychology
Sport psychology research and its use in field settings. Major theoretical areas (anxiety, motivation, cohesion, etc.) and their application in sport.
Prerequisite: KIN 167 and KIN 168 (or equivalent).
Normal Grade Rules
3 units

KIN 268. Evidence Based Research and Practice in Management and Assessment of Injuries to Lower Extremities
Multidisciplinary approach for recognition, initial care, treatment, and rehabilitation used to return athletes to lower extremity pre-injury fitness levels. (First course in two-course series.)
Prerequisite: BIOL 065, BIOL 066, KIN 155, KIN 158 and KIN 188.
Normal Grade Rules
2 units

KIN 269. Evidence Based Research and Practice in the Mgmt and Assessment of Injuries to the Upper Extremity
Multidisciplinary approach for recognition, initial care, treatment and rehabilitation used to return an athlete to upper extremity pre-injury fitness levels (second course in two-course series.)
Prerequisite: KIN 268.
Normal Grade Rules
2 units

KIN 271. Advanced Topics in Athletic Training
This course is designed to improve the basic knowledge of athletic training students. Topics include outcome research and practical applications for mild traumatic brain injury, alteration evaluation skills for athletic injuries, and research design in the field of athletic training.
Normal Grade Rules
3 units

KIN 272. Evidence Based Research in the Practice of Therapeutic Exercise
Investigation of the scientific and philosophical bases of therapeutic exercise and therapeutic modalities with reference to the rehabilitation process, and to acquire skills necessary for prudent application of current modalities and techniques.
Prerequisite: KIN 155, KIN 158 and KIN 188 (or equivalent).
Normal Grade Rules
3 units

KIN 273. Evidence Based Research in the Practice of Therapeutic Modalities
An advanced course designed to critically evaluate the scientific and philosophical bases of therapeutic modality use. The course is intended to provide the student with the information necessary to perform prudent clinical applications of therapeutic modalities on orthopedic injuries.
Normal Grade Rules
2 units

KIN 280. Advanced Fieldwork in Sport Management
Advanced practical experience in a professional work setting under the direct supervision of qualified sport management professionals. Interns assigned a variety of duties and experiences.
Prerequisite: Graduate standing or instructor consent.
Credit / No Credit
1-3 units

KIN 281. Legal and Ethical Aspects of Sport
Topics include sport and its relationship to the common law of contracts and torts, the statutory law of labor and antitrust, constitutional and civil rights law, communications law and ethics.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

KIN 282. Marketing and Social Aspects of Sport
Sport and its relationship to market research designs, strategies, plans, fundraising, consumer behavior, political, sociological and historical parameters.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

KIN 283. Management, Leadership and Communication in Sport
Management, administration, organizational behavior and communication theories, problems and issues in leadership in sport.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

KIN 284. Financial Aspects of Sport
Examines traditional and innovative methods of revenue acquisition available to sport organizations. Current financial challenges, innovative concepts and strategies used in financing sport operations.
Prerequisite: Graduate standing or approval of the instructor.
Normal Grade Rules
3 units
KIN 285. Internship in Kinesiology
Advanced practical experience in a professional work setting under direct supervision of qualified professionals. Interns assigned various duties and experiences related to areas of specialization.
Prerequisite: Graduate standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

KIN 286. Independent Study
Independent study through research projects, creative intellectual productions or directed reading/literature review related to the field of Kinesiology. May be repeated for a total of 6 units.
Prerequisite: Graduate Standing
Repeatable for credit
Credit / No Credit
1-3 units

KIN 287. Advanced Clinical Exercise Physiology
Pathophysiology and recent advances in the diagnosis and treatment of cardiovascular, metabolic, neurologic, and musculoskeletal diseases and disorders, including innovative biotechnological approaches. Content will include physiological mechanisms of these clinical conditions that affect responses to acute exercise and chronic adaptations to exercise training.
Prerequisite: KIN 187
Normal Grade Rules
3 units

KIN 289. Master of Arts Seminar in Kinesiology
The purpose of this seminar course is to offer an intensive, comprehensive focus of a specific topic, and/or theme as it relates to the study of kinesiology.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

KIN 292A. Leadership and Administration in Athletic Training
Current problems and issues related to the athletic training profession. Topics include professional ethics and competency, medicolegal issues, administration of athletic training programs, stress management and drug testing.
Normal Grade Rules
1 unit

KIN 292B. Seminar in Sports Medicine II
Current issues related to the athletic training profession. Topics include eating disorders, injury rehabilitation and management. Related topics of medical and scientific nature will be discussed with guest lecturers.
Misc/Lab: Lecture 2 hours/Supervision 1.5 hours
Normal Grade Rules
2 units

KIN 293A. Fieldwork in Athletic Training I
Advanced practical experience in athletic training under the direct supervision of qualified sports medicine professionals.
Misc/Lab: Lecture 3 hours/Supervision 1.5 hours.
Credit / No Credit
2 units

KIN 293B. Fieldwork in Athletic Training II
Advanced practical experience in athletic training under the direct supervision of qualified sports medicine professionals.
Prerequisite: KIN 293A.
Misc/Lab: Lecture 3 hours/Supervision 1.5 hours.
Credit / No Credit
2 units

KIN 293C. Fieldwork in Athletic Training III
Advanced practical experience in athletic training under the direct supervision of qualified sports medicine professionals.
Prerequisite: KIN 293A, KIN 293B.
Misc/Lab: Lecture 3 hours/Supervision 1.5 hours.
Credit / No Credit
2 units

KIN 293D. Fieldwork in Athletic Training IV
Advanced practical experience in athletic training under the direct supervision of qualified sports medicine professionals.
Prerequisite: KIN 293A, KIN 293B and KIN 293C.
Misc/Lab: Lecture 3 hours/Supervision 1.5 hours.
Credit / No Credit
2 units

KIN 296A. Advanced Topics in Athletic Training
This course covers current topics in the field of athletic training education. Topics may include but are not limited to: outcome research and practical applications for concussion management, movement patterns, and shoulder orientation and scapular adaptation for overhead athletes.
Normal Grade Rules
3 units

KIN 298. Special Studies
Advanced individual research and projects.
Prerequisite: KIN 250.
Repeatable for credit
Mandatory CR/NC/RP
3 units

KIN 299. Master’s Thesis or Project
Prerequisite: KIN 250 and admission to candidacy for the master’s degree.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

KINESIOLOGY TEACHER EDUCATION

UPPER DIVISION

KNED 184I. Student Teaching for Kinesiology Individualized Interns
Supervised student teaching in Kinesiology class(es) in the public school where the student is employed as an individualized intern.
Prerequisite: Admission to Single Subject Credential Program, kinesiology advisor and Single Subject Coordinator consent
Repeatable for credit
Credit / No Credit
2-4 units

KNED 184Y. Student Teaching II: Classroom Teaching
Minimum 80-120 class periods of classroom, teaching laboratory or field teaching in appropriate single subjects, grades K-12 and related teaching activities and seminar.
Prerequisite: Joint approval of major and Education departments.
Repeatable for credit
Credit / No Credit
4-6 units

KNED 184Z. Student Teaching III - Classroom Teaching
Notes: May be in different subject/school and will be at a different grade level.
See KNED 184Y.
Repeatable for credit
Credit / No Credit
4-6 units

KNED 339. Instructional Materials and Procedures in Physical Education
Application of theories of learning and principles of teaching to the selection of instructional procedures to be used in physical education. Practical experience provided.
Prerequisite: KIN 170B, KIN 172 and KIN 179 and department teacher education approval.
Notes: Physical education majors and minors only.
Misc/Lab: Lecture/activity 4 hours.
Normal Grade Rules
3 units
## Academic Year 2019-2020
### Course Descriptions

### Linguistics and Language Development Department Courses

#### LOWER DIVISION

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Prerequisites</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 020</td>
<td>Nature of Language</td>
<td>Introduction to the nature of language as a social institution and practice in observing language structure and use in local speech communities. GE Area: D1</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Normal Grade Rules</td>
<td></td>
</tr>
<tr>
<td>LING 021</td>
<td>Language and Thinking</td>
<td>Exploring systems of language and logic in oral and written discourse, with a focus on the role of shared cultural assumptions, language style and the media of presentation in shaping the form and content of argumentation. GE Area: A3</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Normal Grade Rules</td>
<td></td>
</tr>
<tr>
<td>LING 022</td>
<td>Language across the Lifespan</td>
<td>Introduction to what is known about how people successfully learn second languages, with a focus on physiological, psychological, social-cultural and linguistic factors that affect second language acquisition, and on skills and strategies that promote language learning across the lifespan. GE Area: E</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Normal Grade Rules</td>
<td></td>
</tr>
<tr>
<td>LING 024</td>
<td>Language Variation in Space, Time, &amp; Culture</td>
<td>Exploring the diverse structural patterns and social functions found in English; analyzing the social, cultural, political, historical, and technological factors underlying language change, developing critical thinking and effective argumentation in writing. GE Area: A3 or D1</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Normal Grade Rules</td>
<td></td>
</tr>
<tr>
<td>LING 025</td>
<td>Languages of the World</td>
<td>Explore the diversity of the world’s languages through studying major language families, including basic language structure, language change and historical relationships, the sociocultural aspects of language, typological patterns and universals, writing systems and language vitality and endangerment. GE Area: D1</td>
<td>3</td>

<tr>
<td>LING 101</td>
<td>Introduction to Linguistics</td>
<td>Scientific study of language. Phonetics, phonology, morphology, syntax, semantics, pragmatics, sociolinguistics, psycholinguistics, historical linguistics, language universals and typology. Prerequisite: Upper division standing. Normal Grade Rules</td>
<td>3</td>
</tr>
<tr>
<td>LING 107</td>
<td>Patterns of English</td>
<td>Description of the sound, word-formation, sentence, semantic and discourse patterns of English. Analysis of contemporary examples of spoken and written English. Prerequisite: Written Communication I (or equivalent). Normal Grade Rules</td>
<td>3</td>
</tr>
<tr>
<td>LING 108</td>
<td>Introduction to Second Language Development, Teaching, and Assessment</td>
<td>Theoretical and practical approaches to how people learn first, second, and foreign languages in bilingual and multilingual educational settings. Methods, materials, and assessment of language development for English language learners K-16. Prerequisite: LING 101 or ENGL 103 or LLD 107. Normal Grade Rules</td>
<td>3</td>
</tr>
<tr>
<td>LING 110</td>
<td>Corpus Linguistics</td>
<td>Introduction to the use of large collections of computer-readable text (“corpora”) in linguistics. Focus on text processing techniques and quantitative data analysis. Other topics: philosophical foundations; lexical resources; the WWW as corpus; applications to stylistics, language teaching, and sociolinguistics. Prerequisite: LING 101 and CS 022A, or instructor consent. Normal Grade Rules</td>
<td>3</td>
</tr>
<tr>
<td>LING 111</td>
<td>English as a World Language</td>
<td>A survey of the ways and the purposes which English is used in diverse societies and cultures around the world, including the United States; implications for international and cross-cultural communication. GE Area: V</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended. Note: All SJSU Studies courses require completion of the WST and upper division standing. Normal Grade Rules</td>
<td></td>
</tr>
<tr>
<td>LING 114</td>
<td>Introduction to Semantics and Discourse</td>
<td>Approaches to meaning, truth conditional semantics, relation of semantics to pragmatics and speech act theory (e.g., presupposition, deixis, adjacency pairs) and text structure (cohesion). Prerequisite: LING 101 or instructor consent. Normal Grade Rules</td>
<td>3</td>
</tr>
<tr>
<td>LING 115</td>
<td>Sound and Communication</td>
<td>Basic acoustics and nature of sound as applied to the study of vocal communication by humans and other animals. Voice communication as transmission of a speech code via sound. GE Area: R</td>

<td></td>
</tr>
<tr>
<td>LING 116</td>
<td>Introduction to Speech Technology</td>
<td>Strategies in man-machine communication, with a focus on speech recognition and speech synthesis. Computer modeling of speech production and perception. Prerequisite: LING 101, LING 111 or instructor consent. Normal Grade Rules</td>
<td>3</td>
</tr>
</tbody>
</table>
LING 125. Introduction to Historical and Comparative Linguistics
Why and how languages change; how linguists go about studying, documenting and explaining such change. Social and phonetic motivations for change. Language families and proto-languages.
Prerequisite: LING 101, LING 111 or instructor consent.
Normal Grade Rules
3 units

LING 129. Culture, Language and Ethnicity in the U.S.
The role of language in the formation of culture and ethnicity in the U.S. Language and culture contact between indigenous, colonial and immigrant peoples. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
3 units

LING 161. Psycholinguistics
Psychology of language. Child language acquisition, language disorders, representation of language in the brain, cognitive aspects of linguistic communication, theories of language in linguistics and psychology.
Prerequisite: LING 101.
Normal Grade Rules
3 units

LING 162. Introduction to Morphology
Examination of the morphological structure of words; morphological typology; morphemes, morphs and allomorphs; issues in inflectional and derivational morphology; morphophonemics; word syntax; productivity, markedness, iconicity.
Prerequisite: LING 101 or instructor consent.
Normal Grade Rules
3 units

LING 165. Introduction to Natural Language Processing
Computer processing of text using data-driven (statistical) and knowledge-driven (rule-based) methods. Applications including spelling correction, information retrieval, question answering, and machine translation.
Prerequisite: LING 101 and LING 115, or instructor consent.
Normal Grade Rules
3 units

LING 166. Sociolinguistics: Cross-Cultural Communication
Relationship between language and society; inter- and intracultural communication; non-verbal communication; language and cognition, language planning.
Prerequisite: LING 101 or Instructor Consent
Normal Grade Rules
3 units

LING 180. Individual Studies
Individual work by arrangement.
Prerequisite: Instructor consent and department chair approval.
Repeatable for credit
Credit / No Credit
1-3 units

GRADUATE

LING 201. Phonology: Theory and Applications
Survey of the theoretical issues in phonology; language universals; notions of markedness and natural rules; psychological reality of phonological constructs. Applications to language teaching, speech synthesis and automatic speech recognition.
Prerequisite: LING 101, LING 111 and LING 113.
Normal Grade Rules
3 units

LING 202A. Syntactic Theory
Aspects of syntax and grammatical theory.
Prerequisite: LING 101 and LING 112.
Normal Grade Rules
3 units

LING 203. Semantic Structures
Aspects of meaning and semantic theory.
Prerequisite: LING 101 and LING 114, or instructor consent.
Normal Grade Rules
3 units

LING 213. Linguistic Field Methods
Methods in phonological, morphological and syntactic analysis of linguistic data obtained from native-speaker informants.
Prerequisite: LING 101, LING 111, LING 112 and LING 113 (or equivalents).
Normal Grade Rules
3 units

LING 298. Individual Studies
Advanced individual research.
Prerequisite: Instructor consent
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

LING 299. Master's Thesis or Project
Thesis or project research.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

UPPER DIVISION

LING 1290R. Culminating Experience Supervision
Continued work on thesis or project.
Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class.
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit

LINGUISTICS AND LANGUAGE DEVELOPMENT

UPPER DIVISION

LLD 100A. Writing Competency through Genres
Satisfies the WST requirement if passed with a C or better. Prepares students for 100W through drafting feedback and revision to demonstrate competency. Develops the ability to analyze written genres used in the students’ chosen disciplines and to write analytical and reflective essays.
Prerequisite: Must have failed the WST.
Note: A CR/NC option may not be used to satisfy the WST requirement.
Normal Grade Rules
3 units

LLD 100W. Writing Workshop
Advanced composition. Instruction and practice in reading, discussing and writing about issues germane to the student’s major field of study. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better). Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
3 units

LLD 100R. Writing Workshop
Advanced composition. Instruction and practice in reading, discussing and writing about issues germane to the student’s minor field of study. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better). Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
3 units
LLD 100WB. Writing Workshop for Business Students
Instruction and practice in reading, oral interaction and writing activities germane to the genres of the business world. GE Area: Z
Prerequisite: Completion of Core GE, ENGL 2 or any Area A3 Course (Critical Thinking and Writing) with a grade of C- or better, Passage of a Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), and Upper division standing (60 units).
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).

Normal Grade Rules
GE: Z
3 units

LLD 182. Tutorial Practicum
Directed practical experience in tutoring academic English at the college level.
Prerequisite: LING 101, LLD 107 or ENGL 103.
Repeatable for credit
Credit / No Credit
1 unit

GRADUATE

LLD 250W. Becoming a Professional in Linguistics/TESOL
Course focuses on the research and communication skills needed to become an active and effective member of the professional community in linguistics or TESOL.
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
3 units

LLD 260. English Structures for Teaching I
The phonological, morphological and syntactic structures of English for pedagogical purposes.
Prerequisite: LING 101 and LLD 107.
Normal Grade Rules
3 units

LLD 261. English Structures for Teaching II
The semantic, pragmatic and discourse structure of English for pedagogical purposes.
Prerequisite: LLD 260 or Instructor Consent
Normal Grade Rules
3 units

LLD 270. Second Language Acquisition
Products and processes of child and adult second language acquisition: classroom instruction versus untutored settings; psychological variables; individual differences, interlanguage hypothesis; input and interaction in language development; organization of language systems of bilinguals.
Prerequisite: LING 101
Normal Grade Rules
3 units

LLD 271. Intercultural Communication and Second Language Acquisition
The social and cultural factors that affect first and second language acquisition and use. Understanding how to function in intercultural settings.
Prerequisite: LING 101.
Normal Grade Rules
GE: GWAR
3 units

LLD 278. Practicum in Teaching English to Speakers of Other Languages
Directed practical experience in teaching English to speakers of other languages.
Prerequisite: LLD 280.
Credit / No Credit
3 units

LLD 282. Practicum in Teaching English to Speakers of Other Languages
Directed practical experience in teaching English to speakers of other languages.
Prerequisite: LLD 280.
Credit / No Credit
3 units

LLD 283. Curriculum and Assessment in TESOL
Theories and practices of needs analysis, curriculum design and assessment. Hands-on experience in identifying learner needs, determining instructional objectives, designing curricula/syllabi and constructing appropriate assessment instruments.
Prerequisite: LLD 280 or (equivalent).
Normal Grade Rules
3 units

LLD 293. Teaching College-level Reading and Writing
Theoretical foundations of literacies; strategies and approaches for teaching academic reading and writing to culturally and linguistically diverse classes in college and other post-secondary contexts.
Prerequisite: LING 101, LING 107, or ENGL 103
Normal Grade Rules
3 units

LLD 298. Individual Studies
Advanced individual research.
Prerequisite: Instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

LLD 299. Master’s Thesis or Project
Thesis or project research.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
Mathematics and Statistics Department Courses

MATHEMATICS

LOWER DIVISION

MATH 001. Mathematical Reasoning
Focus on foundational mathematical skills and knowledge in the context of contemporary society. GE Area: B4.
Corequisite: MATH 1001S required for Math Enrollment Categories M-III and M-IV.
Normal Grade Rules
GE: B4
3 units

MATH 010. Mathematics for General Education
Topics include methods of proof, problem solving, trigonometry, probability, statistics, applications to scheduling and apportionment, population studies, consumer math, theory of games, polyhedra, networks, graph theory, linear programming. GE Area: B4.
Prerequisite: Math Enrollment Category M-I or M-II, or MATH 001 with a grade of C- or better.
Normal Grade Rules
GE: B4
3 units

MATH 010A. Mathematics in Art, Music, and Politics
An accessible look into some beautiful ideas of mathematics in art, music, and politics. Topics include Plane Symmetries, Tilings, Perspective Drawing, Musical Functions, Statistical Measures of Inequality, Voting Systems, Apportionment. GE Area: B4.
Corequisite: MATH 1001AS required for Math Enrollment Categories M-III and M-IV.
Normal Grade Rules
GE: B4
3 units

MATH 012. Number Systems
Structure of the real number system, numeration systems, elementary number theory, and problem-solving techniques; technology integrated throughout the course. GE Area: B4. This course is intended for future elementary teachers. The sequence of Math 12, 105, and 106 satisfies subject matter competence in K-8 mathematics.
Prerequisite: Two years of high school algebra, one year of high school geometry, Math Enrollment Category M-I or M-II, or MATH 001 with a grade of C- or better.
Normal Grade Rules
GE: B4
3 units

MATH 015F. Statway Part A: Statistics-Concepts & Methods
See UNVS 015F.
Normal Grade Rules
3 units

MATH 015S. Statway Part B: Statistics-Concepts & Methods
See UNVS 015S.
Normal Grade Rules
GE: B4
3 units

MATH 018A. College Algebra
Review of basic algebra. Complex numbers, functions, graphs, polynomials, inverse functions, exponential and logarithmic functions.
Prerequisite: Math Enrollment Category M-I, M-II, or M-III; or MATH 001 with a grade of C- or better.
MATH 1018AS required as a corequisite for Enrollment Categories M-III and M-IV, and recommended for Enrollment Category M-II.
Corequisite: MATH 018AW recommended.
Normal Grade Rules
GE: B4
3 units

MATH 018AW. College Algebra Workshop
Students work in groups on college algebra material to help them understand college algebra concepts more thoroughly since it is the groundwork for success in future math courses.
Corequisite: MATH 018A.
Misc/Lab: Activity 2 hours.
Repeatable for credit
Credit / No Credit
1 unit

MATH 018B. Trigonometry
Trigonometric functions: Unit circle, right triangle, analytic; trigonometric identities. Analytic geometry (conic sections). Other topics chosen from: polar coordinates and complex numbers; vectors in two and three dimensions. With MATH 18A, preparation for MATH 30/30P/30PL.
Prerequisite: MATH 18A with a grade of "C-" or better.
Normal Grade Rules
GE: B4
3 units

MATH 019. Precalculus
Preparation for calculus: polynomial, rational, exponential, logarithmic and trigonometric functions; analytic geometry. GE Area: B4.
Prerequisite: Math Enrollment Category M-I, M-II, or M-III; or MATH 001 with a grade of C- or better.
Corequisite: MATH 019W, to opt out of MATH 019W, contact the Math Department office. MATH 3019S required as a corequisite for Enrollment Category M-III, and recommended for Enrollment Category M-II.
ABC/No Credit
GE: B4
5 units

MATH 019W. Precalculus Workshop
Designed to help all students excel in MATH 019. Students work in groups on challenging problems to help them understand precalculus concepts more deeply and lay the groundwork for success in future math courses.
Corequisite: enrollment in MATH 019 is required.
Repeatable for credit
Credit / No Credit
1 unit

MATH 030. Calculus I
Introduction to calculus including limits, continuity, differentiation, applications and introduction to integration. Graphical, algebraic and numerical methods of solving problems.
Prerequisite: Math Enrollment Category M-I or M-II and satisfactory score on the Calculus Placement Exam; MATH 019 with a grade of B or better to waive the placement exam; or MATH 018A and MATH 018B with a grade of B or better in each to waive the placement exam.
Normal Grade Rules
GE: B4
3 units

MATH 030P. Calculus I with Precalculus
Selected topics in precalculus. Introduction to calculus including limits, continuity, differentiation, applications, and introduction to integration. Graphical, algebraic and numerical methods of solving problems. Prerequisite: Math Enrollment Category M-I or M-II and satisfactory score on the Calculus Placement Exam; MATH 019 with a grade of C- or better to waive the placement exam; or MATH 018A and MATH 018B with a grade of C- or better in each to waive the placement exam.
Normal Grade Rules
GE: B4
5 units

MATH 030PL. Calculus I with Precalculus
Selected topics in precalculus. Introduction to calculus including limits, continuity, differentiation, applications, and introduction to integration. Graphical, algebraic and numerical methods of solving problems. GE Area: B4.
Prerequisite: Math Enrollment Category M-I or M-II and satisfactory score on the Calculus Placement Exam; MATH 019 with a grade of C- or better to waive the placement exam; or MATH 018A and MATH 018B with a grade of C- or better in each to waive the placement exam. Note: MATH 030PL is treated as a repeat for students who have taken MATH 030 or MATH 030P.
Misc/Lab: Lecture 5 hours/Activity 3 hours.
Normal Grade Rules
GE: B4
6 units

</table>
MATH 104. History of Mathematics
Mathematical development from earliest times to the twentieth century.
Prerequisite: MATH 42 and MATH 115 (with a grade of "C-" or better in each), or instructor consent.
Normal Grade Rules
3 units

MATH 105. Concepts in Mathematics, Probability, Statistics
Introduction to functions and algebraic reasoning, introduction to probability, data, graphs, statistics, problem solving; technology integrated throughout the course. This course is intended for future elementary teachers. The sequence of Math 12, 105, and 106 satisfies subject matter competence in K-8 mathematics.
Prerequisite: Two years of high school algebra, one year of high school geometry, MATH 12 with a "C-" or better.
Normal Grade Rules
3 units

MATH 106. Intuitive Geometry
Introductory geometry, measurement, inductive and deductive reasoning, introduction to transformations, and problem-solving techniques; technology integrated throughout the course. This course is intended for future elementary teachers. The sequence of Math 12, 105, and 106 satisfies subject matter competence in K-8 mathematics.
Prerequisite: MATH 012 and MATH 105 with grades of "C-" or better
Normal Grade Rules
3 units

MATH 107A. Explorations in Algebra
Comprehensive view of school algebra primarily for the mathematical preparation of teachers. The computer will be used to generate examples, investigate relationships, explore algorithms and solve problems. Functions and relations used as a unifying theme throughout.
Prerequisite: MATH 106 (with a grade of "C-" or better), or instructor consent.
Normal Grade Rules
3 units

MATH 107B. Explorations in Geometry
Comprehensive view of elementary geometry primarily for the mathematical preparation of teachers. The computer will be used to investigate two- and three-dimensional patterns, measurement and parallelism. Transformational approach to congruence and similarity. Nature of inductive reasoning and deductive proof.
Prerequisite: MATH 106 (with a grade of "C-" or better), or instructor consent.
Normal Grade Rules
3 units

MATH 108. Introduction to Abstract Mathematics and Proofs
The purpose of this course is to develop students’ mathematical maturity and skill with proofs. Material covered will include logic, set theory including functions, relations, and cardinality; the real number system, including the completeness axiom, and selected topics.
Prerequisite: MATH 31 and MATH 42 (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

MATH 112. Vector Calculus
Vector fields, line and surface integrals, Green’s Theorem, Stokes’ Theorem, Divergence Theorem and advanced topics such as differential forms or applications to mechanics, fluid mechanics, or electromagnetism.
Prerequisite: MATH 32 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 113. Differential Geometry
Properties of curves and surfaces, Frenet-Serret formulas and the fundamental forms. Study of curves and surfaces in the small by means of differential calculus.
Prerequisite: MATH 32 and MATH 129A (with a grade of "C-" or better in each) or instructor consent.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

MATH 115. Modern Geometry and Transformations
Synthetic and analytic theory of projective transformations, similarities, Euclidian motions, inverese geometry and an introduction to non-Euclidean geometry.
Prerequisite: MATH 31 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 120. Algebra Workshop
A course designed to help all students excel in Linear Algebra and Ordinary Differential Equations (ODE’s). Students work in groups on challenging problems to help them understand the concepts of Linear Algebra and ODE’s more deeply and lay the groundwork for success in future courses.
Prerequisite: MATH 32 (with a grade of C- or better)
Corequisite: Math 121
Repeatable for credit
Credit / No Credit
1 unit

MATH 126. Theory of Numbers
Divisibility, prime numbers, congruences of first and higher degrees, theorems of Fermat, Euler and Wilson. Quadratic residues.
Prerequisite: MATH 31 and MATH 42 (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

MATH 127. Applied and Industrial Algebra
Fundamental topics of abstract algebra (groups, rings, fields) from the viewpoint of real-world application, such as coding theory, robotics, algorithm design, cryptography, integrated circuit design, and signal processing.
Prerequisite: MATH 42 and MATH 129A with a C- or better in each (or instructor consent)
Normal Grade Rules
3 units

MATH 128A. Abstract Algebra I
Group theory: permutation groups, abelian groups, morphism theorems, finite groups. Introduction to rings and fields.
Prerequisite: MATH 108 and MATH 129A (with a grade of "C-" or better in each) or instructor consent.
Normal Grade Rules
3 units

MATH 128B. Abstract Algebra II
Emphasis on rings, integral domains, fields, field extensions, Galois theory.
Prerequisite: MATH 128A (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 129A. Linear Algebra I
Matrices, systems of linear equations, vector geometry, matrix transformations, determinants, eigenvectors and eigenvalues, orthogonality, diagonalization, applications, computer exercises. Theory in Rn emphasized; general real vector spaces and linear transformations introduced.
Prerequisite: MATH 31 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

<td>Introduction to Real Variables</td>
<td>The theory of the Riemann integral, sequences and series of functions, spaces of functions.</td>
<td>The theory of the Riemann integral, sequences and series of functions, spaces of functions. Prerequisite: Math 131A (with a grade of &quot;C-&quot; or better) or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 132</td>
<td>Advanced Calculus</td>
<td>Calculus of several variables; Jacobian, inverse and implicit function theorems, contracting mapping theorem, change of variables in integration and applications.</td>
<td>Calculus of several variables; Jacobian, inverse and implicit function theorems, contracting mapping theorem, change of variables in integration and applications. Prerequisite: MATH 32 and MATH 129A (with a grade of &quot;C-&quot; or better in each), or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 133A</td>
<td>Ordinary Differential Equations</td>
<td>First order differential equations, first order linear systems, second order linear equations, applications, Laplace transforms, series solutions. Additional topics.</td>
<td>First order differential equations, first order linear systems, second order linear equations, applications, Laplace transforms, series solutions. Additional topics. Prerequisite: MATH 32 or MATH 32H (with a grade of &quot;C-&quot; or better) or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 133B</td>
<td>Partial Differential Equations</td>
<td>Partial differential equations of physics and engineering, Fourier series, Legendre polynomials, Bessel functions, orthogonal functions, the Sturm-Liouville equation.</td>
<td>Partial differential equations of physics and engineering, Fourier series, Legendre polynomials, Bessel functions, orthogonal functions, the Sturm-Liouville equation. Prerequisite: Math 133A or Math 134 (with a grade of &quot;C-&quot; or better) or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 133W</td>
<td>Ordinary Differential Equations Workshop</td>
<td>A course designed to help all students excel in Ordinary Differential Equations (ODE’s). Students work in groups on challenging problems to help them understand the concepts in ODE’s more deeply and lay the groundwork for success in future courses.</td>
<td>A course designed to help all students excel in Ordinary Differential Equations (ODE’s). Students work in groups on challenging problems to help them understand the concepts in ODE’s more deeply and lay the groundwork for success in future courses. Prerequisite: Math 32 (with a grade of C- or better) Corequisite: Math 133A Credit / No Credit 1 unit</td>
</tr>
<tr>
<td>MATH 138</td>
<td>Complex Variables</td>
<td>Analytic functions, complex integration, residues and power series.</td>
<td>Analytic functions, complex integration, residues and power series. Prerequisite: Math 32 (with a grade of &quot;C-&quot; or better) or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Introduction to Combinatorics</td>
<td>Sets, permutations, combinations, probability, mathematical induction, counting techniques, generating functions, partitions, recurrence relations, inclusion-exclusion. Polya’s theorem and applications to computer science, mathematics, engineering and physical sciences.</td>
<td>Sets, permutations, combinations, probability, mathematical induction, counting techniques, generating functions, partitions, recurrence relations, inclusion-exclusion. Polya’s theorem and applications to computer science, mathematics, engineering and physical sciences. Prerequisite: MATH 31 and MATH 42 (with a grade of &quot;C-&quot; or better in each) or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 143C</td>
<td>Numerical Analysis and Scientific Computing</td>
<td>Development and comparison of important algorithms for scientific computing in terms of efficiency, accuracy and reliability. Topics include nonlinear equations, interpolation, approximation theory, differentiation, integration, differential equations, numerical stability and error analysis. Substantial assignments using contemporary software packages and professional subprogram libraries.</td>
<td>Development and comparison of important algorithms for scientific computing in terms of efficiency, accuracy and reliability. Topics include nonlinear equations, interpolation, approximation theory, differentiation, integration, differential equations, numerical stability and error analysis. Substantial assignments using contemporary software packages and professional subprogram libraries. Prerequisite: MATH 032; one of CS 022A, Math 50, CS 046A or CS 049 (with a grade of &quot;C-&quot; or better in each) or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 143M</td>
<td>Numerical Analysis and Scientific Computing</td>
<td>Development and comparison of important algorithms for scientific computing in terms of efficiency, accuracy and reliability. Topics include systems of linear equations-direct and iterative methods, least squares problems, eigenvalues and eigenvectors, numerical stability and error analysis. Substantial assignments using contemporary software packages and professional subprogram libraries.</td>
<td>Development and comparison of important algorithms for scientific computing in terms of efficiency, accuracy and reliability. Topics include systems of linear equations-direct and iterative methods, least squares problems, eigenvalues and eigenvectors, numerical stability and error analysis. Substantial assignments using contemporary software packages and professional subprogram libraries. Prerequisite: MATH 129A; one of CS 22A, Math 50, CS 46A or CS 49 (with a grade of &quot;C-&quot; or better in each) or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 146</td>
<td>An Introduction to Mathematical Cryptography</td>
<td>Introduction to mathematics that has been useful in cryptography with a focus on the underlying mathematics (abstract algebra, number theory, probability, and combinatorics), and supporting applications (encryption, hash functions, blockchain). Additional topics may be covered.</td>
<td>Introduction to mathematics that has been useful in cryptography with a focus on the underlying mathematics (abstract algebra, number theory, probability, and combinatorics), and supporting applications (encryption, hash functions, blockchain). Additional topics may be covered. Prerequisite: MATH 42 and MATH 129A with C- or better, or instructor consent Note: Recommended (but not required) one of MATH 108, MATH 163, MATH 126, MATH 127, MATH 142. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 150</td>
<td>Theory of Interest</td>
<td>Measurement of interest; time value of money; present and future values of cash flows; applications to annuities, loans, sinking funds, bonds, and portfolios; duration and immunization.</td>
<td>Measurement of interest; time value of money; present and future values of cash flows; applications to annuities, loans, sinking funds, bonds, and portfolios; duration and immunization. Prerequisite: Math 161A or ISE 130, or instructor consent Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 161A</td>
<td>Applied Probability and Statistics I</td>
<td>Descriptive and inferential statistics. Collection and analysis of data, discrete and continuous probability models, random variables, Central Limit Theorem, confidence intervals, hypothesis testing.</td>
<td>Descriptive and inferential statistics. Collection and analysis of data, discrete and continuous probability models, random variables, Central Limit Theorem, confidence intervals, hypothesis testing. Prerequisite: MATH 31 (with a grade of &quot;C-&quot; or better) or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 161B</td>
<td>Applied Probability and Statistics II</td>
<td>A continuation of Math 161A. Two sample confidence intervals and hypothesis tests, analysis of variance, simple and multiple regression, chi-square tests of homogeneity and goodness-of-fit, other topics as time permits. Use of statistical software is integral to the course. Student project required.</td>
<td>A continuation of Math 161A. Two sample confidence intervals and hypothesis tests, analysis of variance, simple and multiple regression, chi-square tests of homogeneity and goodness-of-fit, other topics as time permits. Use of statistical software is integral to the course. Student project required. Prerequisite: MATH 161A (with a grade of &quot;C-&quot; or better), or instructor consent. Normal Grade Rules 3 units</td>
</tr>
</tbody>
</table>
MATH 162. Statistics for Bioinformatics
Introduction to the theory and applications of statistical methodology in the biological sciences. Topics include inference, stochastic processes, Markov chains, hidden Markov models, clustering, and gene expression analysis. Applications to current molecular biology and genetics problems. No biology background required.
Prerequisite: MATH 161A (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 163. Probability Theory
Probability axioms; random variables; marginal and conditional density and distribution functions; binomial, geometric, Poisson, gamma and normal probability laws; mathematical expectations, moment generating functions; limit theorems; sampling distributions.
Prerequisite: MATH 32 and MATH 161A (each with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 163W. Probability Workshop
Corequisite workshop designed to help all students succeed in Math 163. Students work in groups on probability problems and review material from Math 161A and Math 32 as necessary.
Repeatable for credit
Credit / No Credit
1 unit

MATH 164. Mathematical Statistics
Sampling distributions, confidence intervals, order statistics, sufficient statistics, the Rao-Blackwell Theorem, completeness, uniqueness, point estimation, maximum likelihood, Bayes’ methods, testing hypotheses, likelihood ratio tests, categorical data analysis, nonparametric tests.
Prerequisite: MATH 163 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

MATH 167. Programming in SAS
Programming and applying the computer language SAS to perform statistical computations and to analyze large amounts of data. Data preparation and transformations, creating and managing data files, macros, data reporting techniques, basic statistical methods.
MATH 161A (with grade of "C-" or better), or instructor consent.
Normal Grade Rules
3 units

MATH 167PS. Introduction to Python Programming and SQL
Introduction to Python. Data types, control flow, object-oriented programming, and graphical user interface-driven applications. The class will include designing relational schemas, writing SQL queries, accessing and designing a database, performing database administration. The students will also learn how to perform intermediate data base operations.
Prerequisite: Math 129A, Math 161A, and Math 167R, or instructor consent.
Normal Grade Rules
3 units

MATH 167R. Statistical Programming with R
Introduction to the R programming language. Topics include data structures, reading and writing data, databases, data visualization, accessing and creating packages, programming structures and functions.
Prerequisite: MATH 161A with a grade of "C-" or better
Normal Grade Rules
3 units

MATH 170. Mathematical Modeling for the Life Sciences
Mathematical models used in Biology and other life sciences, discrete and continuous processes, mathematical methods for analyzing solutions to the above models, interpretation of mathematical results.
Prerequisite: Math 123, 129A, 133A, or 134 with a grade of "C-" or better or instructor consent.
Normal Grade Rules
3 units

MATH 177. Linear and Non-Linear Optimization
Linear inequalities, the simplex method and other algorithms, duality, integer optimization, convex optimization, quadratic optimization, game theory.
Prerequisite: MATH 070 and MATH 071 (with a grade of "C-" or better in each), or MATH 129A (with a grade of "C-" or better); or instructor consent.
Normal Grade Rules
3 units

MATH 178. Mathematical Modeling
Basic modeling techniques including graphing, proportion, curve fitting and interpolation, optimization, probability and computer simulation, derivatives and differences. Technology will be incorporated to model applied problems from business/economics, physical/life/social sciences and engineering.
Prerequisite: MATH 129A (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 190</td>
<td>Introduction to MS Level Statistics</td>
<td>Intensive review of mathematical methods. Selected topics from multivariate calculus, linear algebra, probability theory and elementary statistics. Introduction to statistical software including graphics and programming using R. Course will cover indispensable tools necessary for success in the MS statistics program. Prerequisite: Admission to the MS Statistics Program Credit / No Credit 1 unit</td>
</tr>
<tr>
<td>MATH 201A</td>
<td>Mathematics for Secondary Teachers</td>
<td>Secondary school mathematics from an advanced viewpoint, plus topics from higher mathematics. Emphasizes inductive reasoning in problem solving. Applications useful to junior and senior high school teachers. Prerequisite: Equivalent of mathematics minor or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 208</td>
<td>Mathematics for Secondary Teachers</td>
<td>Secondary school mathematics from an advanced viewpoint, plus topics from higher mathematics. Emphasizes deductive reasoning in problem solving. Applications useful to junior and senior high school teachers. Prerequisite: Equivalent of mathematics minor or instructor consent. Notes: MATH 201A is not a prerequisite. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 203</td>
<td>Applied Mathematics, Computation, and Statistics Projects</td>
<td>Supervised teamwork to solve a substantial problem in mathematics or computer science usually supplied by an outside agency such as a local company. The number of different projects offered and the topics will vary widely. A project usually continues for two consecutive semesters. Prerequisite: Instructor consent. Repeatable for credit Credit / No Credit 3 units</td>
</tr>
<tr>
<td>MATH 211A</td>
<td>Geometry of Projective Spaces</td>
<td>Structure of projective planes; finite planes and combinatorics; automorphism groups; configuration theorems and coordinatizations; conics; introduction to projective n-space over a field; topological properties; subgeometries. Prerequisite: MATH 112 or MATH 115 or instructor consent. Notes: Alternate years. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 213A</td>
<td>Introduction to Smooth Manifolds</td>
<td>Smooth manifolds and maps. Tangent bundle. Sard's theorem, transversality, Whitney embedding theorem. Vector fields and flows on manifolds, Lie derivative, Lie groups and Lie algebras. Frobenius theorem, differential forms, Stokes' theorem. Basic Morse theory. Additional topics chosen by the instructor. Prerequisites: MATH 113 or MATH 175 or MATH 132, or instructor consent. Notes: Alternate years. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 213B</td>
<td>Introduction to Riemannian Geometry</td>
<td>Riemannian metric and Levi-Civita connection. Geodesics, completeness and Hopf-Rinow theorem. Curvature. First and second variations of arc-length. Spaces of constant curvature. Additional topics selected by the instructor such as theorems of Myers, Hadamard, Synge, and Gauss-Bonnet. Prerequisites: MATH 213A or instructor consent. Notes: Alternate years. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 221A</td>
<td>Higher Algebra I</td>
<td>Topics from groups, rings, integral domains, modules, fields, vector spaces. Prerequisite: MATH 128B or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 221B</td>
<td>Higher Algebra II</td>
<td>Continuation of Math 221A with additional advanced topics in algebra selected by instructor. Prerequisite: MATH 221A or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 226</td>
<td>Theory of Numbers</td>
<td>Advanced topics in number theory selected by the instructor. Emphasis may be in algebraic number theory (e.g. Diophantine equations), analytic number theory (e.g. the prime number theorem), and/or computational number theory (e.g. cryptography). Prerequisite: MATH 126 and MATH 128A or instructor consent. Notes: Alternate years. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 229</td>
<td>Advanced Matrix Theory</td>
<td>Eigenvalues, unitary equivalence and Schur’s theorem. Normal, Hermitian and symmetric real matrices. Positive definite matrices, polar and singular value factorizations, and selected topics at the discretion of the instructor. Prerequisite: MATH 129B or instructor consent. Notes: Alternate years. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 231A</td>
<td>Real Analysis</td>
<td>Sigma algebras, construction of measures, differentiation, product measures, integration theory, the spaces $L^1$ and $C$. Prerequisite: MATH 131B or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 231B</td>
<td>Functional Analysis</td>
<td>Function spaces and their duals, operators on function spaces, applications to analysis (classical and functional) and topics selected at the discretion of the instructor. Prerequisite: MATH 231A or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 234</td>
<td>Advanced Dynamical Systems</td>
<td>Continuous and discrete dynamical systems with applications. Topics include stability of equilibrium and closed orbits, structural stability, applications in classical mechanics, biology and engineering, including control systems. Prerequisite: MATH 134 or instructor consent. Notes: Alternate years. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 235</td>
<td>Wavelets and their Applications</td>
<td>Wavelets with particular emphasis on their use in the representation of digital signals and image analysis. Theory of filters, filter banks and wavelets with applications selected from image and video compression, speech, audio and ECG compression, and communication applications. Prerequisites: MATH 129A and MATH 134, or instructor consent. Notes: Alternate years. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>MATH 238</td>
<td>Advanced Complex Variables</td>
<td>A course specializing in one or more of the advanced branches of the theory of complex functions. Prerequisite: MATH 138 or instructor consent. Notes: Alternate years. Normal Grade Rules 3 units</td>
</tr>
</tbody>
</table>
MATH 243A. Advanced Numerical Analysis
Finite difference methods applied to parabolic, elliptic and hyperbolic equations including numerical methods for solving the discretized problem, convergence, stability, error control, and applications.
Prerequisites: MATH 143C or MATH 143M or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 243B. Advanced Topics in Numerical Analysis
Advanced topics in numerical methods.
Prerequisite: MATH 143C or MATH 143M, and instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 243M. Numerical Linear Algebra
Advanced topics in numerical linear algebra.
Prerequisite: Math 143C or Math 143M, and instructor consent.
Normal Grade Rules
3 units

MATH 251. Classification
Dimensionality reduction, instance-based classification, discriminant analysis, logistic regression, support vector machine, kernel methods, ensemble learning, neural networks and deep learning, classification of nonnumeric data.
Prerequisite: Math 32 and Math 129A (each with a grade of B or better)
Co/Pre-requisite: Math 164, Math 267A or CS122 or instructor consent.
Normal Grade Rules
3 units

MATH 252. Cluster Analysis
Prerequisite: Math 32, Math 129A (each with a grade of B or better), Math 163, and Math 267A or CS122 or instructor consent.
Normal Grade Rules
3 units

MATH 253. Mathematical Methods for Data Visualization
MATLAB programming basics. 2D and 3D data plotting and graphing, advanced linear algebra, dimensionality reduction, visualization of high dimensional data, and applications to clustering and classification.
Prerequisite: MATH 32, MATH 129A and MATH 163 (each with a grade of B or better), or instructor consent.
Normal Grade Rules
3 units

MATH 257. Multivariate Data Analysis
Multivariate normal distribution, Hotelling’s T-squared distribution, data reduction techniques including principal component and factor analysis, canonical correlation analysis, discrimination and classification techniques. Intensive use of computer analysis and real data sets. As time permits, advanced topics chosen by instructor. Possible topics include basis functions, derivative estimation, functional principal components, functional linear model.
Prerequisites: MATH 163 and MATH 261A (each with a grade of “B” or better), or instructor consent.
Normal Grade Rules
3 units

MATH 258. Categorical Data Analysis
Distributions for categorical data, descriptive and inferential methods for contingency tables, introduction to generalized linear models, logit models for binary data, and loglinear models for count data.
Prerequisite: MATH 261A with a grade of “B” or better
Normal Grade Rules
3 units

MATH 261A. Regression Theory and Methods
Simple linear regression, multiple regression, indicator variables, influence diagnostics, transformations, assumption analysis, generalized linear models, nonlinear regression, CART, hypothesis testing, confidence and prediction intervals, variable selection and model building.
Prerequisites: Math 129A, and either Math 161A or Math 164 (each with grade “B” or better), Math 163, Math 267A. Math 263 and/or Math 267A may be taken concurrently.
Normal Grade Rules
3 units

MATH 261B. Design and Analysis of Experiments
Inferential methods for contingency tables, introduction to generalized linear models, logit models for binary data, and loglinear models for count data.
Prerequisites: Math 129A, Math 163, MATH 167R, and MATH 261A
Normal Grade Rules
3 units

MATH 264. Bayesian Data Analysis
Prerequisite: MATH 164 with a “B” or better
Normal Grade Rules
3 units

MATH 265. Time Series Theory and Methods
Analysis of correlated data in time, trends, seasonal patterns, periodicity, autocorrelation, spectral/frequency analysis, filtering, ARIMA models, state-space models, forecasting. Applications from various fields including economics, signal processing, finance, atmospheric science.
Prerequisite: MATH 261A with a grade of “B” or better
Normal Grade Rules
3 units

MATH 266. Survival Analysis
Statistical methods for analysis of time-to-event censored data. Survival distributions and hazard rates; Kaplan-Meier estimator; proportional hazards; partial likelihood, diagnostics. Applications from clinical trials, toxicology and tumorigenicity studies, epidemiological studies, and engineering reliability.
Prerequisite: Math 261A
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 267. Computational Statistics
Simulation and Monte Carlo methods, Markov chain Monte Carlo, bootstrap and resampling, optimization, and special topics.
Prerequisite: MATH 163, MATH 167R, and MATH 261A each with a grade of “B” or better
Normal Grade Rules
3 units

MATH 268. Stochastic Processes
Introductory course in stochastic processes and their applications. The course will cover random walks, discrete time Markov chains, the Poisson process, continuous time Markov processes, renewal theory and queueing theory.
Prerequisite: Math 129A and Math 163 (each with a grade of “B” or better).
Normal Grade Rules
3 units

MATH 275. Survival Analysis
Analysis of correlated data in time, trends, seasonal patterns, periodicity, autocorrelation, spectral/frequency analysis, filtering, ARIMA models, state-space models, forecasting. Applications from various fields including economics, signal processing, finance, atmospheric science.
Prerequisite: MATH 261A with a grade of “B” or better
Normal Grade Rules
3 units

MATH 278. Data Science
Data structures, reading and writing data, databases, data visualization, accessing packages, programming structures and functions.
Prerequisite: MATH 161A with a grade of C- or better
Normal Grade Rules
3 units
MATH 269. Statistical Consulting
Theoretical and practical aspects of statistical consulting. Development through classwork, group discussion, role-playing and real consulting activities, of tools necessary to conduct effective consulting sessions, present oral arguments and written reports, and work collaboratively to solve problems.
Prerequisite: Math 163, Math 164, Math 261A, Math 261B (each with a grade of "B" or better), and instructor consent.
Note: this course is normally taken in the last semester of the MS Statistics program.
Credit / No Credit
3 units

MATH 275A. Topology
Topological spaces and associated concepts (e.g., subspaces, product spaces, quotient spaces); continuous functions, compactness, connectedness (including path connectedness) and their local versions; countability and separation axioms; compactifications and Tychonoff’s Theorem; paracompactness and metrization theorems.
Prerequisite: Math 131A with a grade of “B” or better; or instructor consent
Normal Grade Rules
3 units

MATH 275B. Advanced Topics in Topology
A course specializing in one or more topics from advanced topology such as homotopy and the fundamental group, homology groups of spaces, continuum theory, function spaces, metrization, dimension theory, manifolds, topological groups.
Prerequisite: Math 275A or instructor consent
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 279A. Graph Theory
Advanced course in graph theory covering graphs, digraphs, trees, networks, connectedness, eulerian circuits, hamiltonian cycles, graph embeddings, matchings, factorizations, graph coloring and Ramsey theory.
Prerequisite: MATH 179, or both MATH 142 and an upper division algebra class, or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

MATH 279B. Advanced Graph Theory
Advanced topics in modern graph theory selected by instructor. Possible topics are algebraic graph theory, random graph theory, matroid theory, ramsey theory, expander graphs, and others.
Prerequisite: MATH 279A or instructor consent.
Normal Grade Rules
3 units

MATH 280. Graduate Individual Studies
Individual study in a specific field.
Prerequisite: Department chair consent. Not available to Open University Students
Credit / No Credit
1-3 units

MATH 281. Research Seminar
Weekly participation in the department research seminar. Topics will focus on recent developments in mathematics and emphasis will be placed on written and oral presentations.
Prerequisite: Instructor Consent
Normal Grade Rules
1-3 units

MATH 285. Advanced Topics in Mathematics
Selected topics in Mathematics. Topics vary each semester. A maximum of 12 units may be repeated.
Prerequisite: Suitable upper division background in mathematics set by instructor.
Repeatable for credit
Normal Grade Rules
3 units

MATH 285A. Advanced Topics in Applied Mathematics
Selected topics in Applied Mathematics. Topics vary each semester. Prerequisite: Upper-division coursework in applied mathematics or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

MATH 285M. Advanced Topics in Pure Mathematics
Selected topics in Pure Mathematics. Topics vary each semester. Prerequisite: Upper-division coursework in mathematics or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

MATH 285S. Advanced Topics in Statistics
Selected topics in Statistics. Topics vary each semester. Prerequisite: Upper-division coursework in statistics or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

MATH 287. Professional Development in College Teaching
Required for all teaching assistants in the master’s program. Practical and technical aspects of college teaching; current pedagogical techniques and educational issues.
Corequisite: TA position in the Mathematics and Statistics Department
Repeatable for credit
Credit / No Credit
1 unit

MATH 288I. Internships
Professional work experience under the supervision of a mathematician.
Prerequisite: Graduate standing and MS Statistics Project Coordinator consent.
Mandatory CR/NC/RP
3 units

MATH 288J. Applied Mathematics Internship
Professional work experience under the supervision of an applied mathematician.
Prerequisite: Graduate standing in the MS Math program and instructor consent.
Mandatory CR/NC/ RP
3 units

MATH 289E. Mathematics Comprehensive Exam Preparation
Preparation for Mathematics Master’s Comprehensive Examination. Review of topics and representative problems covered by the various parts of the Exam. CR grade assigned when student has passed both parts of the Comprehensive Exam. Successful completion satisfies graduate Culminating Experience requirement.
Prerequisite: Approval of Mathematics Graduate Advisor is required. Students must file for Advancement to Candidacy before enrolling. Not open to students electing Thesis/Writing Project option.
Mandatory CR/NC/ RP
3 units

MATH 297A. Preparation for Writing Project, Research Project or Thesis
Supervised individual research and project work to prepare for a master’s writing project, research project or thesis.
Prerequisite: Fully classified standing in the MS/MA Math or MS Statistics program, department chair consent.
Corequisite: GWAR
Repeatable for credit
Credit / No Credit
3 units

MATH 297B. Special Study
Advanced individual research and writing projects.
Prerequisite: Admission to candidacy for the MA or MS degree, Math 297 and Department Chair consent. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/ RP
1-4 units

MATH 297C. Seminar
Open University Students
Normal Grade Rules
Repeatable for credit
Mandatory CR/NC/ RP
1-4 units
Academic Year 2019-2020

DESCRIPTION CONTENTS

UPPER DIVISION

MATH 1001S. Supported Instruction for MATH 001
Reviews relevant background material prior to the corresponding content for MATH 001. Required corequisite for enrollment category M-III and M-IV students in MATH 001.
Notes: No Degree Credit.
Misc/Lab: Activity 2 hours.
No Degree Credit
1 unit

MATH 1010AS. Support Course for Math 10A
Support course that reviews relevant background material prior to the corresponding content for Math 10A. Required for MATH 10A students in Enrollment Category M-III and M-IV.
No Degree Credit
1 unit

MATH 1015D. Statway Algebra Review Activity
See UNVS 1015D.
No Degree Credit
1 unit

MATH 1015W. Statway Supplemental Activity
See UNVS 1015W.
No Degree Credit
1 unit

MATH 1018AS. Support Course for MATH 18A
Support course that reviews relevant background material prior to the corresponding content for MATH 18A. Required for Category M-III and Category M-IV students in MATH 18A.
Note: Credit/No credit, No Degree Credit.
Misc/Lab: Activity 2 hours.
No Degree Credit
1 unit

MATH 1019S. Supported Instruction for MATH 019
Reviews relevant background material prior to the corresponding content for MATH 019. Required corequisite for enrollment category M-III and M-IV students in MATH 019. Note: No Degree Credit.
Misc/Lab: Activity 2 hours.
No Degree Credit
1 unit

MATH 1290R. Culminating Experience Supervision
Continued work on thesis or project. Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class.
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit

MATHEMATICS EDUCATION

UPPER DIVISION

MTED 184S. Math Education Phase II Seminar
This seminar will support the student teaching field experience. Students will be asked to extend their pedagogical content knowledge in light of their phase II experiences and will be supported in the preparation of their Performance Assessment for California Teachers.
Prerequisites: EDSC 184X and good standing in the Secondary Education Credential program
Corequisite: MTED 184Y and/or MTED 184Z
Credit / No Credit
1 unit

MTED 184X. Student Teaching Phase I
Student teaching in Mathematics Education (Phase I) is designed to provide students with the experiences they need to be successful in Phase II. During the Phase I semester, student teachers work with their mentor teacher in a mathematics classroom one period each day, with additional times set aside each week to confer, debrief, and plan.
Prerequisite: MTED 394
Credit / No Credit
4 units

MTED 184Y. Student Teaching II - Classroom Teaching
Minimum 80-120 class periods of classroom teaching, laboratory or field teaching in appropriate single subjects, grades K-12 and related teaching activities. Attendance at a weekly seminar is required.
Prerequisite: MTED 394 and joint approval of Mathematics and Education departments.
Repeatable for credit
Credit / No Credit
4-6 units

MTED 184Z. Student Teaching III - Classroom Teaching
Same as MTED 184Y, including the seminar, but in a different course. May be in a different school.
Prerequisite: MTED 394 and joint approval of the Mathematics and Teacher Education Departments.
Repeatable for credit
Credit / No Credit
4-6 units

MTED 394. Secondary School Mathematics
The place and function of mathematics in secondary education, improvement and evaluation of instruction. Teaching the subject matter of secondary mathematics.
Prerequisite: MATH 201A or MATH 201B and, either passing score on the CSET exams or be within 3 courses of completing the subject matter preparation program, or instructor consent.
Normal Grade Rules
3 units

MTED 394F. Middle School Mathematics Methods
The place and function of mathematics in middle grades education, improvement and evaluation of instruction. Teaching the subject matter of middle grades mathematics.
Prerequisite: EDEL 108D, Passing scores on CSET I and II or Instructor consent.
Normal Grade Rules
3 units
Mechanical Engineering Department Courses

MECHANICAL ENGINEERING

LOWER DIVISION

ME 020. Design and Graphics
Introduction to design and graphical solutions to three-dimensional design problems involving points, lines, surfaces and solids. Development of visualization and technical sketching skills in conjunction with orthographic and pictorial projections. Focus on computer-aided design and graphical analytical methods. Corequisites: Engineering majors: ENGR 10, Technology majors: none
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

ME 030. Computer Applications
Using a computer to solve engineering problems through programming and the use of engineering application procedures. Use of procedural and informational problem solving methods and practices applied to software design, application, programming and testing.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

ME 041. Machine Shop Safety
See TECH 041.
Repeatable for credit
Normal Grade Rules
1 unit

ME 042. Manufacturing and Machine Shop Projects and Practices
See TECH 042.
Repeatable for credit
Credit / No Credit
1 unit

ME 106. Fundamentals of Mechatronics Engineering
Foundational concepts in mechatronics including analog and digital electronics, sensors, actuators, microprocessors and microprocessor interfacing to electromechanical systems. Hands-on laboratory experiments with components and measurement equipment used in the design of mechatronic products.
Prerequisites: EE 098 and ME 030 (with a grade of 'C-' or better in each). For IT majors: TECH 060, MATH 071, CMPE 046 (with a grade of 'C-' or better in each).
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ME 109. Heat Transfer in Electronics
See CHE 109.
Normal Grade Rules
3 units

ME 110. Manufacturing Processes
Fundamentals of manufacturing processes such as machining, forming, casting, molding and welding.
Prerequisites: ME 020 with a grade of “C-” or better.
Pre/Corequisites: MATE 025.
Normal Grade Rules
3 units

ME 111. Fluid Mechanics
Fluid properties, statics, dynamics of fluids; continuity, linear and angular momentum and energy principles.
Prerequisites: CE 095 or 099 and MATH 032 (with a grade of "C-" or better in each).
Normal Grade Rules
3 units

ME 113. Thermodynamics
Prerequisites: PHYS 070 or PHYS 052, and MATH 032 (with a grade of ‘C-’ or better in each).
Normal Grade Rules
4 units

ME 114. Heat Transfer
Conduction, convection and radiation heat transfer with applications. Analytical, experimental, and computational methods of analyzing heat transfer behavior.
Prerequisites: MATH 133A or MATH 123, and ME 113 (with a grade of ‘C-’ or better in each).
Normal Grade Rules
3 units

ME 115. Thermal Engineering Laboratory
Thermodynamics and heat transfer experiments. Temperature, pressure, and flow rate measurements. Technical reports and presentations.
Pre/Corequisite: ME 114.
Misc/Lab: 3 hour Lab.
Normal Grade Rules
1 unit

ME 120. Experimental Methods
Theory and practice of experimental methods and sensors for mechanical measurements; statistical and uncertainty analysis; computer-hosted data acquisition, processing and analysis; formal report writing and presentations.
Prerequisite: CE 112 and ENGR 100W (with a grade of ‘C-’ or better in each).
Corequisite: ME 130. AE majors may use AE 162 and AE 368 to satisfy corequisite requirements.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

ME 10. Mechanical Engineering Career Development
Further intellectual, personal, and professional growth in Mechanical Engineering. Directed discussions and activities focused on building professional presence and communication strategies for a professional career involving the internship and ending with employment post-graduation.
Prerequisite: ENGL 1B or second semester Composition Course, Mechanical Engineering Majors Only.
Credit / No Credit
1 unit

ME 101. Dynamics
Vector mechanics. Two and three dimensional motion of particles and rigid bodies. Force, energy and momentum principles.
Prerequisite: CE 095 or 099 and MATH 032 (with a grade of “C-” or better in each). Sophomore or upper division standing. Allowed Declared Majors: Any Engineering.
Normal Grade Rules
3 units

ME 104H. Honors Dynamics
Demonstrations and physical examples.
Prerequisite: Math 32 and either CE 95 or CE 99 (with a grade of B or better in each)
Normal Grade Rules
3 units

ME 106. Fundamentals of Mechatronics Engineering
Foundational concepts in mechatronics including analog and digital electronics, sensors, actuators, microprocessors and microprocessor interfacing to electromechanical systems. Hands-on laboratory experiments with components and measurement equipment used in the design of mechatronic products.
Prerequisites: EE 098 and ME 030 (with a grade of ‘C-’ or better in each). For IT majors: TECH 060, MATH 071, CMPE 046 (with a grade of ‘C-’ or better in each).
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

ME 109. Heat Transfer in Electronics
See CHE 109.
Normal Grade Rules
3 units

ME 110. Manufacturing Processes
Fundamentals of manufacturing processes such as machining, forming, casting, molding and welding.
Prerequisites: MATH 133A or MATH 123, and ME 113 (with a grade of ‘C-’ or better in each).
Normal Grade Rules
3 units

ME 111. Fluid Mechanics
Fluid properties, statics, dynamics of fluids; continuity, linear and angular momentum and energy principles.
Prerequisites: CE 095 or 099 and MATH 032 (with a grade of “C-” or better in each).
Normal Grade Rules
3 units

ME 113. Thermodynamics
Prerequisites: PHYS 070 or PHYS 052, and MATH 032 (with a grade of ‘C-’ or better in each).
Normal Grade Rules
4 units

ME 114. Heat Transfer
Conduction, convection and radiation heat transfer with applications. Analytical, experimental, and computational methods of analyzing heat transfer behavior.
Prerequisites: MATH 133A or MATH 123, and ME 113 (with a grade of ‘C-’ or better in each).
Normal Grade Rules
3 units

ME 115. Thermal Engineering Laboratory
Thermodynamics and heat transfer experiments. Temperature, pressure, and flow rate measurements. Technical reports and presentations.
Pre/Corequisite: ME 114.
Misc/Lab: 3 hour Lab.
Normal Grade Rules
1 unit

ME 120. Experimental Methods
Theory and practice of experimental methods and sensors for mechanical measurements; statistical and uncertainty analysis; computer-hosted data acquisition, processing and analysis; formal report writing and presentations.
Prerequisite: CE 112 and ENGR 100W (with a grade of ‘C-’ or better in each).
Corequisite: ME 130. AE majors may use AE 162 and AE 368 to satisfy corequisite requirements.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

ME 10. Mechanical Engineering Career Development
Further intellectual, personal, and professional growth in Mechanical Engineering. Directed discussions and activities focused on building professional presence and communication strategies for a professional career involving the internship and ending with employment post-graduation.
Prerequisite: ENGL 1B or second semester Composition Course, Mechanical Engineering Majors Only.
Credit / No Credit
1 unit
ME 130. Applied Engineering Analysis  
Analytic models for physical systems in mechanical engineering. Practical interpretations of analytical solutions. Introduction to linear algebra and statistics.  
Prerequisite: MATH 133A and ME 101 (with a grade of ‘C-’ or better in both). Allowed Declared Majors: Mechanical Engineering.  
Pre/Corequisite: ME 113  
Normal Grade Rules  
3 units

ME 135. Introduction to Composite Materials  
See MATE 135.  
Normal Grade Rules  
3 units

ME 136. Design for Manufacturability  
Principles and practice of design and manufacturability, design parameters; manufacturing techniques; reliability; design for quality, assembly and environmental considerations; case study projects and laboratory activities.  
Prerequisite: ME 110 and either ME 154 or AE 114, all with C- or better.  
Normal Grade Rules  
3 units

ME 140. Green & Sustainable Product Design  
See TECH 140.  
Repeatable for credit  
Normal Grade Rules  
3 units

ME 147. Dynamic Systems Vibration and Control  
Prerequisite: ME 130 (with a grade of ‘C-’ or better).  
Normal Grade Rules  
3 units

ME 149. Engineering Acoustics  
Generation, transmission and absorption of sound. Noise measurement. Applications to architectural design, control and reduction of noise.  
Prerequisite: ME 130. Upper division standing.  
Normal Grade Rules  
3 units

ME 154. Mechanical Engineering Design  
Prerequisite: ME101, ME20, CE112, Mat 25, all with C- or better. Junior or senior only. Allowed Declared Majors: Any Engineering.  
Corequisite: TECH/ME 041  
Normal Grade Rules  
4 units

ME 157. Mechanical System Design  
Introduction to the mechanical design process. Design and selection of specific machine components including springs, bearings, brakes, clutches and gears. Introduction to fatigue design using fracture mechanics. Application of plastics, composite materials and finite element methods in design. Group design project. Computer applications in the design process and in design optimization.  
Prerequisite: ME 154, ME 130 with a grade of ‘C-’ or better.  
Corequisites: ME 110  
Normal Grade Rules  
3 units

ME 160. Introduction to Finite Element Method  
Matrix algebra, interpolation functions. Deformation and stress analysis, using truss, beam, plate and axisymmetric elements.  
Prerequisite: ME 20, CE 112, and either ME 130 or Math 129A, with a grade of C- or better in each  
Normal Grade Rules  
3 units

ME 165. Computer-Aided Design in Mechanical Engineering  
Theory and application of CAD. 2-dimensional and 3-dimensional modeling, commercial CAD software. Application to finite element analysis.  
Prerequisite: ME 020, CE 112, and either ME 130 or MATH 129A, with a grade of C- or better in each.  
Allowed Declared Majors: Aerospace Engineering, Mechanical Engineering  
Normal Grade Rules  
3 units

ME 167. Introduction to Engineering Biomechanics  
Introduction to the mechanical behavior of biological systems: mechanics of cells, mechanics of biological fluids (blood circulation), mechanics of blood vessels, biomechanics of the muscular-skeletal system. Kinematics and dynamics of motion. Application of engineering fundamentals to the human body structure and functional relationships.  
Prerequisites: Mat 25 and either CE 095 or CE 099.  
Normal Grade Rules  
3 units

ME 168. Microfluid Fabrication and Design  
Hands-on design, fabrication, and testing of microfluidic devices. Processes including photolithography, soft lithography, and metal deposition applied to MEMS. Design problems for MEMS transducer components. Introduction to microfluidics simulation.  
Prerequisite: MATE 025 or MATE 153 or MATE/EE 129  
Normal Grade Rules  
1 unit

ME 169. Microelectromechanical Systems Fabrication and Design  
Hands-on design, fabrication, and testing of micro electro-mechanical systems (MEMS). Processes including photolithography, etching, and metal deposition applied to MEMS. Design problems for MEMS transducer components. Introduction to MEMS simulation.  
Prerequisite: MATE 25 or MATE 153 or MATE/EE 129.  
Misc/Lab: Lab 3 hours.  
Normal Grade Rules  
1 unit

ME 170. Solar Energy Engineering  
Fundamentals of solar energy engineering, basic principles, design and operation of solar systems. Solar energy generation, storage and system efficiency.  
Prerequisites: EE 98 and ME 109, ME 114 or CHE 190 (with a grade of ‘C-’ or better in each)  
Normal Grade Rules  
3 units

ME 172. Alternative and Renewable Energy Resources  
An introduction to alternative energy sources such as solar, wind, nuclear, geothermal, hydroelectric, biomass and fuel cell. Stationary power generation and storage.  
Prerequisite: ME 114 or CHE/ME 109 or CHE 190.  
Normal Grade Rules  
3 units

ME 180. Individual Studies  
Individual work on special topics. By arrangement.  
Prerequisite: Upper division standing and instructor consent. Allowed Declared Majors: Aerospace Engineering, Mechanical Engineering. Not available to Open University Students.  
Repeatable for credit  
Credit / No Credit  
1-3 units
ME 181. Fundamentals of Biosensors
Operating principles, design and applications of the most commonly used biosensors: Electrochemical (Potentiometric, Amperometric, Voltammetric), Optical-based (Fluorescence, Electrophoresis, and Fiber Optic), Piezoelectric-based (Mechano, QCM Enzyme/Cell, Acoustic), and AFM (Atomic Force Microscopy) biosensors/transducers. Immunosensors and biosensors for virus detection. Biosensor signal processing and electronics. Biosensor design, materials, and applications. Case studies to explore state-of-the-art biosensor products. Invited speakers to share their first-hand experience in biosensor design and manufacturing. Term projects to design practical and functional biosensors.
Prerequisite: EE 98 with a C- or better
Normal Grade Rules
3 units

ME 182. Thermal Systems Design
Integration of thermodynamics, fluid mechanics, heat transfer and economics in the design of energy conversion and transfer systems, e.g., power generation, electronics and human thermal control. Prerequisite: ME 114, and either ME 111 or AE 160 (with a grade of ‘C-’ or better in each).
Normal Grade Rules
3 units

ME 183. HVAC Systems Design
Normal Grade Rules
3 units

ME 184. Fundamentals of Microwaves and Microwave Circuits
Overview of the key principles and design of microwave circuits and systems, including transistor models and circuit theory. Analysis of microwave circuits and systems using modern tools. Prerequisite: ME 130, ME 154, and ENGR 100W (with a grade of C- or better in each).
Normal Grade Rules
3 units

ME 185. Hybrid and Electric Vehicle Fundamentals
This course covers the key technical fundamentals of hybrid and electric vehicles including propulsion system design, controls, batteries and storage management, electric machines and power electronics. Review of critical technologies and components used in modern hybrid and electric vehicles. Hands-on experience through demonstrations, laboratory activities, and a term project. Guest speakers will present technical seminars on selected topics.
Prerequisite: EE 98 and ME 130, both with a C- or better
Normal Grade Rules
3 units

ME 186. Automotive Engineering
Overview of automotive engineering including aerodynamics, structures, suspension, steering, brakes and drive-train. Application of engineering principles in automotive design and analysis. Use of vehicle dynamic simulation software for performance analysis. Prerequisite: ME 114, ME 130, ME 154 with a grade of C- or better in each.
Normal Grade Rules
3 units

ME 187. Automatic Control Systems Design
Analysis of dynamic systems in time and frequency domain. Design of automatic control systems. Analog and digital control systems design. Computer aided control system design and performance evaluation. Prerequisite: ME 147 with a grade of C- or better. Junior or senior only. Allowed Declared Majors: Aerospace Engineering, Mechanical Engineering.
Normal Grade Rules
3 units

ME 189. Design and Manufacture of Microsystems
Overview of design and manufacture of microdevices and systems including MEMS. Engineering physics and mechanics; scaling laws for miniaturization, microfabrication technique, material selection, microsystems design methodologies, microsystems packaging design. Prerequisite: ME 106, ME 154.
Normal Grade Rules
3 units

ME 190. Mechatronics System Design
Normal Grade Rules
3 units

ME 191. Industrial Robotics
Scientific and engineering principles of robotics in the area of mechanical manipulation, dynamics, sensing, actuation, control, computer vision and manufacturing automation application. Motor, motion control, digital control devices application and integration. Prerequisite: ME 106 and ME 130 (with a grade of ‘C-’ or better in each).
Normal Grade Rules
3 units

ME 192. Robotics and Manufacturing Systems
Scientific and engineering principles of robotics in the area of mechanical manipulation, dynamics, sensing, actuation, control, computer vision and manufacturing automation application. Motor, motion control, digital control devices application and integration. Prerequisite: ME 106 and ME 130 (with a grade of ‘C-’ or better in each).
Normal Grade Rules
3 units

ME 193. Design and Manufacture of Microsystems
Overview of design and manufacture of microdevices and systems including MEMS. Engineering physics and mechanics; scaling laws for miniaturization, microfabrication technique, material selection, microsystems design methodologies, microsystems packaging design. Prerequisite: ME 106, ME 154.
Normal Grade Rules
3 units

ME 194. Thermodynamics
Analysis of energy conversion, thermodynamics, fluid mechanics, heat transfer and economics in the design of energy conversion and transfer systems, e.g., power generation, electronics and human thermal control. Prerequisite: ME 114, and either ME 111 or AE 160 (with a grade of ‘C-’ or better in each).
Normal Grade Rules
3 units

ME 195A. Senior Design Project I
First half of a one-year team project carried out under faculty supervision. Project proceeds from problem definition to analysis, design and validation, experimentation including possible construction and testing. GE Area S when taken as part of the ME major sequence.
Prerequisite: ME 114, ME 154 and ENGR 100W (with a grade of ‘C-’ or better in each).
Pre/Corequisite: ME 120, good standing in the program with an approved major form.
Note: ME 195A and B sequence must be completed in the same academic year. Meets SJSU Studies Area S and V when course is taken in combination with: ME 195B, ENGR 195A and ENGR 195B. All SJSU Studies courses require completion of the WST and Upper Division Standing.
Normal Grade Rules
3 units

ME 195B. Senior Design Project II
Continuation of ME 195A. Culmination of project requiring a formal report consisting of documentation of project results and oral presentation. GE Area: V when taken with ME Major sequence.
Prerequisite: ME 195A with a C- or better.
Note: Note: ME 195A and B sequence must be completed in the same academic year. Meets SJSU Studies Area S and V when course is taken in combination with: ME 195B, ENGR 195A and ENGR 195B. All SJSU Studies courses require completion of the WST and Upper Division Standing.
Normal Grade Rules
3 units

ME 196. Mechatronics System Design
Process modeling from test data. Computer-aided dynamic system control analysis and design. Application and integration of micro-controller for digital process and servo control. Development of smart and intelligent products with micro-controller. Prerequisite: ME 106 (with a grade of ‘C-’ or better).
Normal Grade Rules
3 units

ME 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

ME 198. Technology and Civilization
See TECH 198.
Normal Grade Rules
3 units

ME 199. Special Topics in Mechanical Engineering
Special Topics in Mechanical Engineering. Content varies from semester to semester. A total of six units may be repeated.
Prerequisite: Instructor Consent.
Repeatable for credit.
Normal Grade Rules
3 units
ME 201. Project Planning
Preparation for independent projects, research investigations, and professional engineering proposals. Review of scholarly literature. Development of formal objective statements and research hypotheses. Planning and articulation of tangible deliverables, resources, tasks, and milestones.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

ME 202. Thermodynamics
Application of the first and second laws of thermodynamics to the analysis of engineering systems. Equations of state and thermodynamic property relations. Chemical equilibrium and combustion.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 203. Advanced Heat Transfer
Conduction, convection and radiation heat transfer, including conjugate problems. Numerical methods and use of the computer to solve heat transfer problems.
Prerequisite: ME 114 or equivalent.
Normal Grade Rules
3 units

ME 204. Advanced Mechanical Engineering Analysis
Designed to supplement and enrich students with advanced mathematical methods in treating problems selected from various areas of mechanical engineering. Topics discussed will include Fourier series, special functions, solutions to partial differential equations and numerical methods.
Prerequisite: BSME or BSAE or Instructor Consent.
Normal Grade Rules
3 units

ME 240. Rigid Body Dynamics
Introduction to Euler’s method, Lagrange’s equations of motion and Hamilton’s principle. Three-dimensional dynamics in vector and tensor notation. Multi-body dynamics. Application to engineering problems including numerical solutions.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 243. Vibration of Mechanical Systems
Prerequisite: BSME degree or instructor consent.
Normal Grade Rules
3 units

ME 250. Precision Machine Design
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 251. Product Design and Development
Introduction to the product development process as followed in the industry, latest developments in identifying product opportunities, understanding customer requirements, converting them to technical requirements, functional modeling, concept generation, selection and evaluation, latest trends in product design, patenting and intellectual property rights, group design project.
Prerequisite: Graduate standing with solid modelling knowledge.
Normal Grade Rules
3 units

ME 260. Applied Stress Analysis
Introduction to stress analysis techniques, including advanced strength of materials, energy methods and theory of elasticity. Elastic-plastic stresses, creep, fatigue, fracture mechanics, failure analysis.
Prerequisite: BSME or Instructor Consent. Allowed Declared Majors: Aerospace Engineering, Mechanical Engineering.
Normal Grade Rules
3 units

ME 263. Finite Element Methods in Engineering
Introduction into various finite element methods for developing stiffness equation. Truss, beam, 2-D, 3-D and axisymmetric elements. Applications and case studies.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 264. Rigid Body Dynamics
Introduction to Euler’s method, Lagrange’s equations of motion and Hamilton’s principle. Three-dimensional dynamics in vector and tensor notation. Multi-body dynamics. Application to engineering problems including numerical solutions.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 265. Computer-Aided Mechanical Engineering Design
Integrated approach to CAD including: overview of CAD, numerical techniques for CAD, computer graphics and design, principles and management of design database systems, finite element analysis and CAD, design optimization, computer-aided linkage design and integrated CAD systems.
Prerequisite: BSME or Instructor Consent. Allowed Declared Majors: Aerospace Engineering, Mechanical Engineering.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

ME 267. Engineering Biomechanics
Application of engineering mechanics to human body structure and function, involving 3-D kinematics, deformable bodies, viscoelastic behavior, and non-Newtonian fluids. Modeling of hard and soft tissues and analysis of response to loading conditions. Design considerations for biomedical and orthopedic devices.
Prerequisite: Graduate standing and CE 112 or equivalent.
Normal Grade Rules
3 units

ME 271. Computational Fluid Dynamics for ME
Introduction to methods and techniques for computational solutions of fluid mechanics and heat transfer problems. Model problems from mechanical engineering are used to study the interaction of physical processes and numerical techniques. A commercial CFD package is used for analysis.
Prerequisite: BSME or instructor’s consent.
Normal Grade Rules
3 units

ME 273. Finite Element Methods in Engineering
Introduction into various finite element methods for developing stiffness equation. Truss, beam, 2-D, 3-D and axisymmetric elements. Applications and case studies.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units
ME 274. Advanced Finite Element Methods in Engineering
Advanced concepts in finite element analysis, assembly modeling, contact and welded joints, anisotropy and composites, structural dynamics, nonlinear modeling, linear and nonlinear multiphysics coupled heat transfer and fluid flow, thermal stress analysis, and electromechanical coupling.
Prerequisites: ME 160 or ME 273, or instructor consent.
Normal Grade Rules
3 units

ME 280. Automatic Control Engineering
Prerequisite: BSME or Instructor Consent. Allowed Declared Majors: Aerospace Engineering, Mechanical Engineering.
Normal Grade Rules
3 units

ME 281. Advanced Control System Design
Establishment of design criteria. Digital control system design based on conventional and modern approaches. Intelligent control system design. Digital control system hardware and software. Case studies. Microprocessor implementation of control systems.
Prerequisite: ME 280 or equivalent.
Normal Grade Rules
3 units

ME 283. Automatic Control of Manufacturing Processes
Develops general concepts for control of manufacturing processes. The concepts of and tools for process modeling, process optimization and process control. Emphasizes the integrated approach combining statistical process control (SPC) and automatic process control.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 284. Sensor Technology and Principles
Sensors and principles, including mechanical and magnetic sensors, optical sensors, chemical sensors, and bio sensors; Sensor circuitry, signal characterization and processing, Sensor design, fabrication and applications.
Prerequisite: BSME or Instructor Consent.
Normal Grade Rules
3 units

ME 285. Mechatronic Systems Engineering
Introduction of mechatronic systems. Combine hardware, software and system integration. Subjects include basic circuits, logic gates, OpAmps, encoder/decoder, DC and stepper motor, A/D and D/A, C-language, interfacing and control. Hands-on lab practices.
Prerequisite: BSME or Instructor Consent.
Misc/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

ME 286. Autonomous and Connected Vehicles
Application of fundamentals of robotics, computer vision, and mechanical engineering in a vehicle-to-vehicle and vehicle-to-infrastructure connected environment for safe driving and reducing traffic congestion. Defining levels of autonomy in relation to driver-assist and self-driving technologies. Occupant monitoring, distracted driving, and government regulations.
Prerequisite: Graduate Standing or Instructor Consent.
Normal Grade Rules
3 units

ME 295A. Mechanical Engineering Project I
Advanced individual work in mechanical engineering, including but not limited to research, design, development, and simulation studies.
Prerequisite: Admission to Candidacy for Master’s Degree in Mechanical Engineering; written proposal approved by instructor and graduate advisor. Not available to Open University Students.
Normal Grade Rules
3 units

ME 295B. Mechanical Engineering Project II
Continuation of ME 295A. Students complete the in-depth project, write a detailed engineering report and make a comprehensive presentation.
Prerequisite: ME 295A. Not available to Open University Students.
Normal Grade Rules
3 units

ME 295C. Special Topics in Mechanical Engineering
Special topics in Mechanical Engineering. Content varies from semester to semester.
Prerequisite: Instructor Consent.
Repeatable for credit
Normal Grade Rules
3 units

ME 297. Special Topics in Mechanical Engineering
Special topics in Mechanical Engineering. Content varies from semester to semester.
Prerequisite: Instructor Consent.
Repeatable for credit
Normal Grade Rules
3 units

ME 298. Special Project in Mechanical Engineering
Advanced individual work in mechanical engineering. Prerequisite: Consent of project advisor. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

ME 299. Master’s Thesis
Advanced individual work in mechanical engineering for Plan A.
Prerequisite: Consent of thesis advisors. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
3 units
Medical Product Development Management Courses

SCIENCE MEDICAL PRODUCT DEVELOPMENT

GRADUATE

SMPD 202T. MPDM Seminars: Biomedical Business
Special Topics seminar in the management principles and practices of medical product development. Repeatable for credit when topic changes.
Prerequisite: Graduate Standing
Repeatable for credit
Normal Grade Rules
3 units

SMPD 281A. Clinical Development Seminar I
Provides a comprehensive overview of the regulated medical product development process. Topics include initial drug development/device invention to drug/device approval and post-market surveillance. Discussions include non-clinical and clinical studies, regulations, clinical indication determination, research methodology and ethical conduct. Fulfills GWAR requirement.
Prerequisite: Admission to MPDM program or certificate
Note: This course satisfies graduate-level GWAR in this master's program.
Normal Grade Rules
GE: GWAR
3 units

SMPD 281B. Clinical Development Seminar II
Current practices for medical product development and the clinical and regulatory pathways required for approval in the USA; including non-clinical study design and GMP process. Emphasis on oral and written communication. Presentations from experts in the field.
Prerequisite: Admission to the Medical Product Development Management program and completion of SMPD 281A.
Misc/Lab: Lecture 2 hour/Activity 4 hours.
Normal Grade Rules
2 units

SMPD 283A. Regulatory Affairs I, Biopharmaceutical
Provide foundational knowledge of the pharmaceutical, biotechnology and biomedical industries with focus on company organization, product development and commercialization-associated activities such as chemical synthesis, device prototyping, quality assurance, regulatory affairs, manufacturing, control, marketing, and post-marketing surveillance.
Normal Grade Rules
3 units

SMPD 283B. Regulatory Affairs II Device-Diagnostics
Overview of laws and regulations enforced by the US Food and Drug Administration (FDA) and other Regulatory Agencies as they relate to biotechnology, medical device and diagnostic industries.
Prerequisite: Admission to the MPDM program.
Normal Grade Rules
3 units

SMPD 285. MPDM Research / Practicum
Independent research project / practicum to explore deeper understanding or breadth of experience in medical product development management.
Prerequisite: Admission to MPDM program.
Repeatable for credit
Credit / No Credit
1 unit

SMPD 286. Statistical Methods in Clinical Trials
Overview of statistical methods used in the design and interpretation of clinical trials of drugs and medical devices.
Prerequisite: Admission to the MPDM program.
Normal Grade Rules
3 units

SMPD 287. Informatics in Drug and Device Development
Provides business and regulatory perspectives on electronic information technologies, processes and standards in the conduct of clinical trials. Special emphasis: data collection, clinical trial & data management randomization and drug supply, statistical processes, safety databases and electronic regulatory submission, electronic records and signatures, sys validation processes, and data standards.
Prerequisite: Admission to the MPDM program and completion of SMPD 286.
Normal Grade Rules
3 units

SMPD 289A. Special Topics in Clinical Trials Management I
Seminar focusing on critical issues in clinical development. This programmatic capstone series of seminars challenges the students to demonstrate a mature, professional manner and technical proficiency in the field. Emphasis on oral and written communications. Course includes numerous presentations by industry experts.
Prerequisite: Admission to MPDM program and completion of SMPD 285.
Misc/Lab: Lecture 2 hour/Activity 4 hours
Normal Grade Rules
2 units

SMPD 289B. Clinical Trials Seminar II
Capstone course of the MPDM program
Prerequisite: Admission to MPDM program.
Normal Grade Rules
3 units
Meteorology and Climate Science Department Courses

METEOROLOGY AND CLIMATE SCIENCE

LOWER DIVISION

Metr 010. Weather and Climate
A descriptive introduction to the atmosphere, with emphasis on weather phenomena, climate, climate change, forecasting and air pollution. GE Area: B1
Normal Grade Rules
GE: B1
3 units

Metr 012. Global Warming: Science and Solutions
Examination of past, present and future climates. Examination of global warming and mitigation strategies. GE Area: B1
Normal Grade Rules
GE: B1
3 units

Metr 040. Weather Seminar
Meteorology program planning; careers in Meteorology; a survey of major problems in the atmosphere; faculty research programs; department, college and university resources, survival in the university; strategies for success. Repeatable for credit Credit / No Credit
1 unit

Metr 050. Scientific Computing I
Computer systems and structured programming, emphasizing solutions of problems in the atmospheric sciences using Python programming. Includes the UNIX operating system, mass data handling and data visualization. Prerequisite: MATH 030
Corequisite: For Metr majors: MATH 31, Metr 60, PHYS 50. For Climate Science majors: Metr 60 and CHEM 1A.
Misc/Lab Lecture 1 hour/Lab 3 hours.
Normal Grade Rules
2 units

Metr 051. Scientific Computing II
Computer systems and advanced programming in Python emphasizing solutions of problems in the atmospheric sciences. Other related topics include UNIX scripting, advanced data visualization and basic HTML techniques. Introduction to Fortran. Prerequisite: Metr 050 (or equivalent)
Corequisite: For Metr majors: Metr 61. For Climate Science majors: Metr 61 or 71.
Misc/Lab Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

Metr 060. Meteorology I
A quantitative introduction to Atmospheric Science for Meteorology majors. Prerequisite(s): MATH 030 or MATH 030P (and PHYS 002B for Climate Science Concentration).
Corequisite(s): MATH 031, PHYS 050, Metr 050 (or CHEM 001A and Metr 050 for Climate Science Concentration).
Misc/Lab Lecture 2 hours/Lab 3 hours
Normal Grade Rules
3 units

Metr 061. Meteorology II
A continuation of Metr 060, introducing Meteorology majors to quantitative aspects of the science. Prerequisite: Metr 060, CHEM 001A.
Corequisite: Metr 051, MATH 032, PHYS 052, Metr 163.
Normal Grade Rules
2 units

Metr 071. Introduction to Climate Science
Continuation of Metr 060, but with an emphasis on Climate Science. Prerequisite: Metr 060.
Corequisite(s): Metr 051, BIOL 031.
Misc/Lab: Lecture 2 hour/Lab 3 hours
Normal Grade Rules
2 units

UPPER DIVISION

Metr 100W. Writing Workshop: Meteorological Reports
Introduction to scientific writing, research methods and preparation of technical reports in the meteorology field. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Corequisite(s): Metr 121A or Metr 135, or instructor consent.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).
Normal Grade Rules
GE: Z
3 units

Metr 110. Global Climate Changes
Formation and evolution of the atmosphere. Climate changes in the Earth's past. Interactions between climate and life. Anthropogenic climate change. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: R
3 units

Metr 113. Atmospheric Pollution
Descriptive discussion of the sources, effects and fates of pollutants in the atmosphere. Interaction of pollutants and weather systems, including acid precipitation, ozone destruction; air pollution policy and regulations. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: R
3 units

Metr 115. Wildfire in the Earth System
Introduces students to the science of wildland fire on earth and in various ecosystems. Topics include extreme fire behavior in a changing climate, fire weather, fire danger, and national policies on fire suppression strategies and prescribed fire use in land management. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: R
3 units

Metr 121A. Dynamic Meteorology
Theoretical examination of the motion and behavior of the atmosphere. Governing equations and applications, vorticity, waves, numerical prediction, baroclinic instability. Prerequisite: Metr 051, Metr 061
Corequisite: MATH 133A
Notes: Year course.
Normal Grade Rules
4 units

</tbody>
</table>
METR 171B. Synoptic Weather Analysis and Forecasting
Structure and behavior of atmospheric circulation systems, practical weather analysis and forecasting techniques. Acquisition, manipulation and display of real-time data sets, verbal presentations of weather analyses and forecasts.
Prerequisite: METR 171A.
Misc/Lab: Lecture 1 hour/lab 6 hours each semester.
Normal Grade Rules
3 units

METR 172. Mesoscale Meteorology
Structure and behavior of mesoscale atmospheric circulations, practical weather forecasting techniques.
Prerequisite: METR 171A.
Normal Grade Rules
3 units

METR 173. Global Climate Modeling
Senior level course focused on climate modeling using the CMIP 3 intercomparison (models used for the IPCC 2007) as the primary study area.
Prerequisites: METR 051, METR 071, METR 100W, METR 136.
Misc/Lab: Lecture 3 hour/Lab 3 hours
Normal Grade Rules
3 units

METR 174. Climate Change Solutions
Senior level capstone course in which students will define and conduct a project which is both climate change related and of a practical nature.
Prerequisite(s): METR 173, METR 100W.
Normal Grade Rules
3 units

METR 179. Topics in Senior Thesis
Supervised research and the preparation of a senior thesis.
Prerequisite: METR 100W. Not available to Open University Students.
Pre/Corequisite: METR 171A (first semester) METR 171B (second semester).
Repeatable for credit
Credit / No Credit
1-2 units

METR 180. Individual Studies
Independent work on topics by special arrangement. A maximum of four units may be repeated.
Prerequisite: Meteorology major or minor. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-4 units

METR 182. Tutor Assistant in Meteorology
Supervised instructional experience as a tutor assistant. A maximum of four units may be repeated.
Prerequisite: Upper division standing and instructor consent. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1 unit

METR 185. Special Topics
Selected topics in meteorology. Topics vary and are announced each semester.
Prerequisite: METR 121B.
Repeatable for credit
Normal Grade Rules
1-3 units

GRADUATE

METR 202. Research Methods in Meteorology
The nature of research in meteorology with particular reference to formulation of the problem, methods of attack and presentation of results. Proposal writing and selection of MS thesis topic.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

METR 205. Advanced Atmospheric and Climate Dynamics
Dynamics of larger-scale atmospheric flows over short and climate timescales. Quasi-geostrophic theory and applications; atmospheric waves; baroclinic instability; energetics of atmospheric and climate systems; dynamics of the general circulation; dynamics of the climate system; dynamics of climate change.
Prerequisite: METR 121B or equivalent
Normal Grade Rules
GE: GWAR
3 units

METR 206. Advanced Synoptic Meteorology
Structure and theory of the observed features of atmospheric circulation regimes. Dynamical and thermodynamical interpretation of various scales of disturbances; application of numerical weather analysis and prediction methods; use of satellite data.
Prerequisite: METR 171B (or equivalent).
Normal Grade Rules
2 units

METR 209. Adv Fire Behavior
Advanced topics in meteorology of extreme fire behavior. Includes fire-atmosphere interactions, microscale turbulence, flame properties, combustion physics, fuel dynamics, and extreme fire behavior such as fire whirls.
Offered every fourth year. Prerequisite: METR 124 or instructor consent.
Normal Grade Rules
3 units

METR 215. Advanced Physical Meteorology
Thermodynamics of moist air, nucleation processes; particulates in air, microphysics and cloud dynamics; sampling techniques.
Prerequisite: METR 125 (or equivalent).
Normal Grade Rules
3 units

METR 225. Topics in Advanced Atmosphere Dynamics
Gravity wave theory and observation; atmospheric tides; chaos theory; climate change dynamics; teleconnections; the MJO.
Prerequisite: METR 205 or equivalent.
Normal Grade Rules
3 units

METR 240. Numerical Modeling
Numerical analysis and prediction in meteorology. Numerical methods and their errors; finite-difference and spectral methods; atmospheric models.
Prerequisite: METR 050 (or equivalent); METR 205A or instructor consent.
Normal Grade Rules
3 units

METR 241. Parameterization in NWP
Studies of parameterization schemes for sub-gridscale physics in numerical models. Included are schemes for surface fluxes, soil-vegetation models, convection, clouds, and radiative transfer. Why these are needed, and how they are developed and implemented.
Prerequisite: METR 240
Normal Grade Rules
3 units

METR 245. Mesoscale Modeling
Formulation and solution techniques for numerical models of the polluted atmospheric boundary layer, including meso-circulations such as sea breezes.
Prerequisite: METR 130 and METR 240
Normal Grade Rules
3 units

METR 245L. Mesoscale Modeling Lab
Experience porting, compiling, initializing and running mesoscale models, data analysis and visualization.
Prerequisite: METR 245
Normal Grade Rules
1 unit
METR 280. Recent Developments in Meteorology
Intensive study of a particular topic in the atmospheric sciences with special emphasis on recent research results, such as instrumentation or modeling techniques. Topics vary and are announced each semester.
Prerequisite: Instructor consent.
Repeatability: Repeatable for credit
Normal Grade Rules
1-3 units

METR 285. Colloquium
Advanced studies in special fields, including original work by faculty, guest speakers and graduate students. One presentation required of each enrolled student and attendance required for all graduate students.
Prerequisite: Instructor consent.
Repeatability: Repeatable for credit
Mandatory CR/NC/RP
1 unit

METR 298. Research
Supervised individual laboratory or field work.
Prerequisite: Instructor consent. Not available to Open University Students.
Repeatability: Repeatable for credit
Mandatory CR/NC/RP
1-4 units

METR 299. Master's Thesis or Project
Prerequisite: Admission to candidacy for the MS degree and approval of topic by thesis advisor.
Prerequisites: Not available to Open University Students.
Repeatability: Repeatable for credit
Mandatory CR/NC/RP
1-6 units
Military Science Department  
(Army ROTC) Courses

MILITARY SCIENCE

LOWER DIVISION

MILS 001A. Leadership & Personal Development  
Introduction to the personal challenges and competencies that are critical for effective leadership.  
The focus is on developing basic knowledge and comprehension of Army leadership dimensions while gaining a big picture understanding of the ROTC program.  
Normal Grade Rules  
2 units

MILS 001B. Introduction to Tactical Leadership  
Overviews leadership fundamentals such as setting direction, problem-solving, listening, presenting briefs, providing feedback, and using effective writing skills. Students explore leadership attributes and core leader competencies in the context of practical, hands-on, and interactive exercises.  
Normal Grade Rules  
2 units

MILS 002A. Innovative Team Leadership  
Explores creative and innovative tactical leadership strategies and styles by examining team dynamics and trait and behavior theories. Students practice aspects of personal motivation and team building during planning, executing, and assessment of team exercises and participation in leadership labs.  
Normal Grade Rules  
2 units

MILS 002B. Foundations of Tactical Leadership  
Examines the challenges of leading tactical teams in today's complex world. The course highlights dimensions of terrain analysis, patrolling, and orders. Students develop greater awareness as they assess their own leadership styles and practice communication and team building skills.  
Normal Grade Rules  
2 units

UPPER DIVISION

MILS 130A. Adaptive Team Leadership  
Challenges students to study, practice, and evaluate adaptive leadership skills as they overcome challenging squad tactical operations scenarios. Cadets hone their leadership and critical thinking while they prepare for success at ROTC’s summer Leadership Development and Assessment Course (LDAC).  
Normal Grade Rules  
4 units

MILS 130B. Applied Team Leadership  
Uses situational team leadership challenges to build awareness and skills in leading small units. Students review aspects of full spectrum operations, and conduct military briefings to develop proficiency giving operation orders. This is the final course before students attend LDAC.  
Normal Grade Rules  
4 units

MILS 140A. Adaptive Leadership  
Students learn how to train, mentor and evaluate underclassmen. They will learn the duties and responsibilities of an Army staff officer and apply those lessons during weekly training meetings to plan, execute and assess battalion training events.  
Normal Grade Rules  
4 units

MILS 140B. Leadership in a Complex World  
Explores the realities of leading in the Contemporary Operating Environment (COE). Students learn to adapt to operations in unfamiliar lands and international terrorism. The course places significant emphasis on preparing cadets for their first assignment in the US Army.  
Normal Grade Rules  
4 units

MILS 180. Individual Studies  
Individual work on special topics by arrangement.  
Prerequisite: Instructor consent and Military Science Chair approval.  
Repeatable for credit  
Credit / No Credit  
1-4 units

MILS 199. American Military History  
A survey of diplomatic, international, military and economic aspects of American involvement in conflicts from the Anglo-Indian Wars to present time. Study of leadership, weapons technology, politics, humanitarian operations and critical thinking.  
Prerequisite: Upper division standing  
Normal Grade Rules  
3 units
MARINE SCIENCE

UPPER DIVISION

MS 103. Marine Ecology
Field-oriented introduction to interrelationship between marine and estuarine organisms and their environment. Emphasis on quantitative data collection and analysis. Prerequisite: Ecology, statistics, or concurrent registration in MS 104, or instructor consent. Misc/Lab: Lecture 2 hours, lab/field 6 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

MS 104. Quantitative Marine Science
Mathematical methods for analysis of biological, chemical and physical from the marine environment; experimental design, parametric and non-parametric statistics. Prerequisite: College mathematics. Notes: Course cannot be used to meet 30-unit degree requirement. Offered fall semester. Misc/Lab: Lecture 3 hours/lab 3 hours. Normal Grade Rules 4 units

MS 105. Marine Science Diving
Skin and SCUBA diving course; pool-training culminates in ten ocean dives. Topics covered include diving physics, physiology, diving environments night diving and research diving. Successful completion gives NAUI and MLML certification. Prerequisite: Certified SCUBA diver (or equivalency as determined by instructor). Upper division science major status, thorough physical examination, ability to pass swimming test. Notes: Course cannot be used to meet 30-unit degree requirement. Offered fall & summer. Misc/Lab: Lecture 1 hour, lab/field 6 hours. Normal Grade Rules 3 units

MS 112. Marine Birds and Mammals
Systematics, morphology, ecology and biology of marine turtles, birds, and mammals. Prerequisite: Upper division college vertebrate zoology, instructor’s consent; MS 103 recommended. Misc/Lab: Lecture 2 hours lab/field 6 hours. Notes: Course is generally offered alternate fall semesters during the odd years. Normal Grade Rules 4 units

MS 113. Marine Ichthyology
A description of the taxonomy, morphology and ecology of marine fishes. Both field and laboratory work concentrate on the structure, function and habits of marine fishes and the ecological interactions of these fishes with their biotic and abiotic surroundings. Prerequisite: College zoology (or equivalent) or instructor’s consent. MS 103 recommended. Misc/Lab: Lecture 2 hours lab/field 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units

MS 114. Physiological Ecology of Marine Animals
Examines the adaptations animals have evolved to live in marine environments to deal with gradients in water, temperature, salinity, oxygen, exercise, nutrients as well as short-term physiological responses to environmental changes. Topics include metabolism, sensory systems, respiration, circulation, thermoregulation, osmoregulation. Prerequisite: Upper division vertebrate biology (physiology) Misc/Lab: 2 hours lecture/ 6 hours lab. Normal Grade Rules 4 units

MS 124. Marine Invertebrate Zoology I
A field-oriented introduction to the structure, systematics, evolution and life histories of the major marine phyla. Prerequisite: College zoology or instructor consent; MS 103 recommended. Misc/Lab: Lecture 2 hours lab/field 6 hours. Notes: Course is generally offered alternate fall semesters during the odd years. Normal Grade Rules 4 units

MS 130. Marine Botany
Introduction to the plants of the sea, marshes and dunes, with emphasis on the morphology, taxonomy and natural history of seaweeds and vascular plants. Prerequisite: MS 103 recommended, or instructor consent. Misc/Lab: Lecture 2 hours/lab 6 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

MS 131. Marine Ichthyology
A description of the taxonomy, morphology and ecology of marine fishes. Both field and laboratory work concentrate on the structure, function and habits of marine fishes and the ecological interactions of these fishes with their biotic and abiotic surroundings. Prerequisite: College zoology (or equivalent) or instructor’s consent. MS 103 recommended. Misc/Lab: Lecture 2 hours lab/field 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units

MS 135. Physiological Ecology of Marine Algae
Understanding the adaptations of marine algae to their environment, including respiration, enzyme activity, and biochemical composition. Hands-on experience in basic electronic instrumentation, chemical separations, optical measurements, culturing methods and radiotracer techniques. Designed for students interested in the biology of seaweeds and phytoplankton. Prerequisite: MS 103, 131, 144 or instructor consent. Misc/Lab: Lecture 2 hours/lab and field 6 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

MS 141. Geological Oceanography
A study of the structures, physiography and sediments of the sea bottom and shoreline. Prerequisite: Instructor consent. Misc/Lab: Lecture 2 hours/lab 6 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

MS 142. Physical Oceanography
An introduction to the nature and causes of various oceanic motions including currents, waves, tides and mixing, and the physical properties of seawater including transmission of sound and light. Limited use of calculus. Prerequisite: College algebra, college physics recommended, or instructor consent. Misc/Lab: Lecture 2 hours/lab 4 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

MS 143. Chemical Oceanography
An introduction to the theoretical and practical aspects of the chemistry of the oceans, including major salts, dissolved gases, nutrient ions, carbonate system, transient tracers and shipboard sampling techniques. Prerequisite: One year of college chemistry. Misc/Lab: Lecture 2 hours/lab 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units

MS 144. Biological Oceanography
The ocean as an ecological system. Emphasis on the complexity of environmental influences on plankton, the transfer of organic matter within trophic levels and nutrient cycles. Laboratory sessions will include methods in sampling, shipboard techniques, identification of the plankton, and current analytical techniques. Prerequisite: General biology, general chemistry, or instructor consent. Misc/Lab: Lecture 2 hours/lab 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units

July 1, 2019

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE

GRADUATE

MS 175B. Topics in Marine Sciences (Lab)
Study of selected area of marine sciences. Subjects vary depending upon demand and availability of instructors. May be repeated once for credit when topic changes.
Prerequisite: Instructor consent.
Misc/Lab: Lab 3-12 hours.
Repeatable for credit
Credit / No Credit
1-4 units

MS 180. Independent Studies
Faculty-directed study of selected problems, open to undergraduate students with adequate preparation. Offered every semester. May be repeated once for credit.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
1-4 units

MS 204. Sampling and Experimental Design
Basic design of experiments and field sampling. Biases and problems of sampling marine biota.
Prerequisite: Graduate standing; MS 103 and MS 104.
Notes: Offered spring semester.
Normal Grade Rules
4 units

MS 206. Molecular Biological Techniques
Laboratory-based overview of concepts and techniques for the isolation, characterization, and analysis of DNA and RNA. Covers standard methods (amplification, cloning, and sequencing), and selected specialized techniques (analysis of gene expression), emphasizing marine science applications.
Prerequisite: Graduate standing; college level genetics, molecular biology, or instructor consent.
Misc/Lab: Lecture 2 hours/Lab 6 hours.
Notes: Offered spring semester.
Normal Grade Rules
4 units

MS 208. Scientific Methods
Course is designed to help students develop an understanding of strengths and limitations of various types of scientific reasoning, methodology, and analysis as they relate to scientific progress. Course centers on: round-table discussions of papers and techniques; interactive computer, laboratory, and field learning experiences; and development of critical thinking and writing skills.
Prerequisite: Graduate standing; instructor consent and approved thesis proposal.
Misc/Lab: Lecture 3 hours/Lab 2 hours.
Notes: Offered spring semester.
Normal Grade Rules
4 units

MS 210. Advanced Marine Mammals, Birds & Turtles
This course examines the biology of marine mammals, birds and turtles. Topics include systematic and evolution, adaptations to the marine environment, diving physiology and behavior, communication and echolocation, ecology, and conservation. This class consists of lectures, discussions of recent literature, and laboratory exercises.
Prerequisite: Introductory Biology, upper division vertebrate biology (physiology, ecology or similar)
Misc/Lab: 2 hours lecture/ 6 hours lab
Normal Grade Rules
4 units

MS 211. Ecology of Marine turtles, Birds, and Mammals
Community approach to the ecology of marine birds and mammals using experimental and sampling methodology. The class will examine the distribution, abundance, trophic ecology, and behavior of birds and mammals in Elkhorn Slough and Monterey Bay.
Prerequisite: Graduate standing; MS 103, MS 104 and MS 112 and instructor consent.
Misc/Lab: Lecture/discussion 2 hours, lab and field 6 hours.
Notes: Generally offered alternate fall semesters during every years.
Normal Grade Rules
4 units

MS 212. Advanced Topics in Marine Vertebrates
Advanced consideration of the ecology, physiology and phylogeny of fishes, birds, reptiles or mammals, emphasizing current literature and research. Topics and emphasis will vary with term and instructor. May be repeated once for credit.
Prerequisite: Graduate standing; MS 112 or MS 113 and instructor consent.
Misc/Lab: Lecture, lab and field work variable.
Repeatable for credit
Normal Grade Rules
1-4 units

MS 213. Advanced Marine Ichthyology
This course covers taxonomy and systematics, functional morphology, physiology, biogeography, and ecology of marine fishes at an advanced level. Accompanying laboratory and field sessions focus on taxonomic identification, morphological structure and function, and habits of marine fishes, and the ecological interactions of these fishes with their biotic and abiotic surroundings.
Prerequisite: College zoology or equivalent or consent of instructor; MS 103 recommended.
Misc/Lab: Lecture 4 hours/Lab 12 hours
Normal Grade Rules
4 units

MS 214. Physiological Ecology of Marine Animals
Examines the adaptations animals have evolved to live in marine environments to deal with gradients in water, temperature, salinity, oxygen, exercise, nutrients as well as short-term physiological responses to environmental changes. Topics include metabolism, sensory systems, respiration, circulation, thermoregulation, osmoregulation.
Prerequisite: upper division vertebrate biology (physiology)
Misc/Lab: 2 hours lecture/ 6 hours lab
Normal Grade Rules
4 units

RETURN TO LAST PAGE
DESCRIPTION CONTENTS
### MS 221. Advanced Topics in Marine Invertebrates
Advanced consideration of the ecology, physiology and phylogeny of the various invertebrate phyla emphasizing current literature and research. Topics and emphasis will vary from term to term. May be repeated once for credit when topics change. 
Prerequisite: MS 124 and instructor consent. 
Misc/Lab: Lecture, laboratory and field work variable. Repeatable for credit Normal Grade Rules 1-4 units

### MS 231. Biology of Seaweeds
Discussions on on marine macroalgal biology with extensive reading of original literature. Ecologically-oriented research projects involving laboratory culture and field experimentation. 
Prerequisite: Graduate standing; MS 131 or instructor consent. 
Misc/Lab: Lecture 2 hours, lab/field work 6 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

### MS 233. Advanced Topics in Marine Ecology
Selected topics and current issues in marine ecology. Subjects vary depending on student demand and availability of instructors. May be repeated once for credit when topics change. 
Prerequisite: Graduate standing; MS 103 and instructor consent. 
Misc/Lab: Lecture, lab/field work variable. Repeatable for credit Normal Grade Rules 1-4 units

### MS 234. Advanced Biological Oceanography
Experimental techniques in biological oceanography with emphasis on problems important in plankton ecology. An individual research project involving the use of one or more modern analytical tools will be required. 
Prerequisite: Graduate standing; MS 144 or instructor consent. 
Misc/Lab: Lecture 2 hours, lab/field work 6 hours. Notes: Offered fall semester. Normal Grade Rules 4 units

### MS 248. Marine Benthic Habitat Techniques
Collection and interpretation of geophysical data used to characterize marine benthic habitats. Basic geophysical principals will be reviewed. Application of techniques to identify and characterize marine benthic habitats, including echosounders, multibeam bathymetry and backscatter, sidescan sonar, seismic profiling, and GIS. 
Prerequisite: Graduate standing; MS 341 or instructor consent. 
Misc/Lab: Lecture 2 hours, lab/field work 6 hours. Notes: Offered alternate spring semesters during odd years. Normal Grade Rules 4 units

### MS 261. Mixing, Estuarine and Sediment Transport
The mathematical description of the distribution of properties (density, dissolved oxygen, etc.) in the oceans relating to physical and biochemical processes. Equations of motion, geotrophic method, and theory of distribution of variables. 
Prerequisite: Graduate standing; MS 342 and college physics strongly recommended, or instructor consent. 
Misc/Lab: Lecture 3 hours, lab/field work 3 hours. Notes: Offered alternate spring semesters during odd years. Normal Grade Rules 4 units

### MS 263. Data Analysis in Marine Science
Introduction to using observational oceanographic data, with hands on practice in scientific programming for data analysis. Lecture, discussion, and practical experience including the use of existing programs and subroutine libraries. Semester project required. 
Prerequisite: Graduate standing; MS 104, college math and instructor consent. 
Misc/Lab: Lecture 2 hours/lab 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units

### MS 272. Subtidal Ecology
The ecology of nearshore rocky subtidal populations and communities with emphasis on kelp forests. Lectures and discussions of original literature. Field work with SCUBA including group projects on underwater research techniques and community analysis. Individual research on ecological questions chosen by the student. Knowledge of marine algae, invertebrates and statistics recommended. 
Prerequisite: Graduate standing; MS 103; MLML diver certification and marine ecology. 
Misc/Lab: Lecture 2 hours; lab/field work 6 hours. Notes: Offered alternate spring semesters during odd years. Normal Grade Rules 4 units

### MS 273. Marine Environmental Studies of the Gulf of California
An analysis of Gulf of California marine environments. Lectures, readings, intensive field work, and written scientific paper based on original research. Topics vary. Taught with Mexican faculty and students from La Paz, Mexico. Must be able to participate in 2 weeks of field work. 
Prerequisite: Graduate standing; instructor consent. 
Misc/Lab: Lecture 2 hours/lab 6 hours. Notes: Offered spring semester. Normal Grade Rules 4 units

### MS 274. Advanced Topics in Oceanography
Study of selected area in oceanography. Subjects vary depending on student demand and availability of instructors. May be repeated once for credit when topic changes. 
Prerequisite: Graduate standing and instructor consent. 
Misc/Lab: Lecture, lab/field work variable. Repeatable for credit Normal Grade Rules 1-4 units

### MS 280. Scientific Writing
Techniques and strategies of scientific writing used for proposals, journal submissions and abstracts of meetings. Emphasis to develop writing skills by preparing, editing, and rewriting manuscripts. 
Prerequisite: Graduate standing and instructor consent. 
Notes: Offered spring semester. Normal Grade Rules 3 units

### MS 281. Coastal Dynamics
Oceanographic dynamics of coastal environments, with an emphasis on eastern boundary current systems influenced by coastal upwelling. Interactions of physical and geological oceanography and how both affect coastal ecosystem dynamics. 
Prerequisite: Graduate standing and MS 142 or MS 141. 
Notes: Offered spring semester. Misc/Lab: Lecture 4 hour/Lab 12 hours. Normal Grade Rules 4 units

### MS 285. Graduate Seminar in Marine Science
Seminar will be held on topics changing each semester. Each student will be required to give at least one seminar. 
Prerequisite: Graduate standing and instructor consent. 
Notes: Offered fall and spring semesters. Repeatable for credit Normal Grade Rules 2 units
MS 298. Research in the Marine Science
Independent investigations of an advanced character for
the graduate student with adequate preparation.
Prerequisite: Graduate standing and instructor consent.
   Repeateable for credit
   Mandatory CR/NC/RP
   1-4 units

MS 299. Master's Thesis
Offered spring and fall semesters. Available only to
MLML Masters’ students in good standing with the
approval of their major advisor.
Prerequisites: classified graduate standing, advancement
to candidacy.
   Repeateable for credit
   Mandatory CR/NC/RP
   1-4 units

UPPER DIVISION
MS 1290R. Culminating Experience Supervision
Continued work on thesis.
Prerequisite: Outstanding RP grade in a preceding
semester in MS 299
Note: No Degree Credit.
   Repeateable for credit
   No Degree Credit
   1 unit
Music and Dance, School of Courses

LOWER DIVISION

DANC 010. Dance Appreciation
A survey of dance as an art in the Western world. The course examines the diversity of people, cultures and events that led to the development of Ballet, Modern, Jazz, Tap and Musical Theatre Dance. GE Area: C1
Normal Grade Rules
CE/PE
1 unit
DANC 012. Ensemble Dance Rehearsal and Performance
ENS: Training and performance experience in the field of dance. Fully-staged productions of original professional choreographic works.
Pre-requisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
2 units
DANC 040A. Topics in Modern Dance I
Training experience in the field of beginning modern dance with varied topics. Can be repeated when topic changes.
Misc/Lab: Activity 4 hours.
Repeatable for credit
Normal Grade Rules
CE/PE
2 units
DANC 041A. Topics in Ballet I
Training experience in the field of beginning ballet dance with varied topics. Can be repeated when topic changes.
Misc/Lab: Activity 4 hours.
Repeatable for credit
Normal Grade Rules
CE/PE
2 units
DANC 042A. Topics in Jazz Dance I
Training experience in the field of beginning Jazz dance with varied topics. Can be repeated when topic changes.
Misc/Lab: Activity 4 hours.
Repeatable for credit
Normal Grade Rules
CE/PE
2 units
DANC 043. Dance Improvisation
Introduction to dance improvisation, developing skills in creativity in preparation for DANC 145A.
Prerequisite: Intermediate technique standing and permission of instructor.
Normal Grade Rules
1 unit
DANC 045A. Beginning Lindy Hop and Night Club Swing
See KIN 045A.
Normal Grade Rules
CE/PE
1 unit
DANC 046A. Beginning Social Dance
See KIN 046A.
Normal Grade Rules
CE/PE
1 unit
DANC 046B. Intermediate Social Dance
See KIN 046B.
Normal Grade Rules
CE/PE
1 unit
DANC 048A. Beginning Latin Dance
See KIN 048A.
Normal Grade Rules
CE/PE
1 unit
DANC 048B. Intermediate Latin Dance
See KIN 048B.
Normal Grade Rules
CE/PE
1 unit
DANC 049A. Topics in Tap Dance I
Training and experience in the field of beginning tap dance with varied topics. Can be repeated when topic changes.
Misc/Lab: Activity 3 hours.
Repeatable for credit
Normal Grade Rules
1 unit
DANC 049B. Topics in Tap Dance II
Training and experience in the field of intermediate tap dance with varied topics. Can be repeated for up to 2 units of credit when topic changes.
Prerequisite: DANC 49A (or equivalent).
Misc/Lab: Activity 3 hours.
Repeatable for credit
Normal Grade Rules
1 unit
DANC 051A. Dance Production
Practical experience in technical aspects of producing a dance concert.
Prerequisite: Instructor consent.
Misc/Lab: Lecture 1 hour/activity 3 hours.
Repeatable for credit
Normal Grade Rules
3 units
DANC 051B. Topics in Dance Crewing
The purpose of this course is to apply practical application of skills in dance production.
Repeatable for credit
Credit/No Credit
0.5 units
DANC 053. Techniques in World Dance
Traditional or theatrical dance forms selected from one or at the most two specific cultures. Classical ballet, modern, jazz, and tap dance are excluded.
Prerequisite: Level II technique standing.
Misc/Lab: Activity 3 hours.
Repeatable for credit
Normal Grade Rules
1 unit
DANC 054. Topics in Dance Technique II
Beginning/Intermediate Dance with varied topics.
Prerequisite: Audition or Instructor Consent
Repeatable for credit
Normal Grade Rules
CE/PE
3 units
DANC 075. Rhythm and Dynamics in Dance
Basic music theory and the relationship of dance and music.
Misc/Lab: Activity 2 hours.
Normal Grade Rules
1 unit

UPPER DIVISION

DANC 102. Dance in World Cultures
Survey of dance in selected world cultures; the role of dance in society, consideration of style, historical background and religious/cultural influences. Included are: Caribbean, West African, Mexican, Balkan, European, Asian and American cultures. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
CE: V
3 units
DANC 112. ENS: Dance Rehearsal and Performance
ENS: Training and performance experience in the field of dance. Fully-staged productions of original professional choreographic works of varying styles.
Prerequisite: Audition and instructor consent
Misc/Lab: Lab hours required.
Repeatable for credit
Credit/No Credit
2 units
DANC 140B. Topics in Modern Dance IV
Training experience in the field of advanced modern dance with varied topics. Can be repeated for credit when topic changes.
Prerequisite: DANC 140A and permission of instructor.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
2 units

DANC 141B. Topics in Ballet IV
Training experience in the field of advanced ballet with varied topics. Can be repeated for credit when topic changes.
Prerequisite: DANC 141A and permission of instructor.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
2 units

DANC 142B. Topics in Jazz Dance IV
Training experience in the field of advanced Jazz dance with varied topics. Can be repeated for credit when topic changes.
Prerequisite: DANC 142A and permission of instructor.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
2 units

DANC 144A. Dance History and Repertory
History of dance and dances from ancient time to the court of King Louis XIV. Selected repertory works. Prerequisite: Upper division standing.
Misc/Lab: Lecture 2 hours/activity 3 hours.
Normal Grade Rules
3 units

DANC 144B. Dance History and Repertory
History of dance and dances from the court of King Louis XIV through the twentieth century. Selected repertory works. Prerequisite: Upper division standing.
Misc/Lab: Lecture 2 hours/activity 3 hours.
Normal Grade Rules
3 units

DANC 145A. Choreography I
Presentation and criticism of solo choreography; introduction to improvisational techniques. Prerequisite: DANC 043 and Audition.
Misc/Lab: Activity 4 hours.
Normal Grade Rules
3 units

DANC 145B. Choreography II
Styles; forms; use of improvisation; presentation and criticism of small group dance. Prerequisite: DANC 145A and Audition.
Misc/Lab: Activity 4 hours.
Normal Grade Rules
3 units

DANC 145C. Choreography III
Practical application of external style in relationship with art from tribal to contemporary times. Concepts, styles and forms of modern dance in the twentieth century. Prerequisite: DANC 145B and Audition.
Misc/Lab: Activity 4 hours.
Repeatable for credit
Normal Grade Rules
3 units

DANC 147A. Dance Seminar
Course geared toward the understanding of a broader perspective of the Art of Dance with emphasis on current trends, development of personal artistic statement and introductory teaching techniques. Prerequisite: Senior standing and completion or concurrent enrollment in DANC 144A and/or DANC 144B.
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

DANC 148. Children’s Dance
Study of dance for children as personal expression through movement. Use of creative dance as a tool for the enrichment of learning. Experiencing dance in a variety of cultures. Prerequisite: Upper division standing.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

DANC 150A. Kinesiology I
This course is designed to help provide the dancer with essential information about structure and function of the human body and the achievement of optimal performance through the science of human motion. Prerequisite: Audition or Instructor Approval
Misc/Lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

DANC 150B. Kinesiology II
This course is designed to help provide the dancer with essential information about injury prevention and introduce active somatic techniques to increase muscular efficiency, balance and overall awareness of the body. Prerequisite: Danc 54 and instructor approval.
Misc/Lab: 1 hour lecture/ 2 hours activity
Normal Grade Rules
2 units

DANC 154A. Topics in Dance Technique III
Intermediate/advanced dance with varied topics. Prerequisite: Audition or Instructor Approval
Repeatable for credit
Normal Grade Rules
GE: PE
3 units

DANC 154B. Topics in Dance Technique IV
Advanced Dance with varied topics. Prerequisite: Audition or Instructor Approval
Repeatable for credit
Normal Grade Rules
GE: PE
3 units

DANC 186. Choreographing the Musical
Study and practice of staging and choreographing musical comedy. Analysis of scripts and choreographic techniques. Prerequisite: DANC 75, DANC 145A and permission of instructor.
Misc/Lab: Lecture/activity 3 hours.
Normal Grade Rules
3 units

DANC 194. Dance Repertory Activity
Training and performance experience in the field of dance. Fully-staged productions of original student choreographic works. Can be repeated up to 12 times when repertory changes.
Prerequisite: DANC 51A or instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1 unit

DANC 198. Internship in Dance
Supervised internship with approved dance organization. Written evaluation submitted by organizations and student after field work. Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units
MUSIC

LOWER DIVISION

MUSC 001A. Music Systems I
First course in a four-semester core sequence of study of analytical systems of music. Topics include rhythm, melody, harmony, timbre, structure, style and contexts for performance and composition.
Prerequisite: Placement examination or completion of MUSC 9 with a grade of ‘C’ or better.
Normal Grade Rules
2 units

MUSC 001B. Music Systems IB
First course in a four-semester core sequence of aural skills acquisition, including dictation, sight-singing and analysis.
Prerequisite: Placement examination.
Normal Grade Rules
1 unit

MUSC 002A. Music Systems II
Second course in a four-semester core sequence of study of analytical systems of music. Topics from MUSC 1A are continued in greater detail with increased complexity.
Prerequisite: MUSC 1A or placement examination.
Normal Grade Rules
2 units

MUSC 002B. Music Systems II B
Second course in a four-semester core sequence of aural skills acquisition, including diction, sight-singing and analysis.
Prerequisite: MUSC 1B or placement examination.
Normal Grade Rules
1 unit

MUSC 003A. Music Systems III
Third course in a four-semester core sequence of study of analytical systems of music. Topics from MUSC 2A are continued in greater detail with increased complexity.
Prerequisite: MUSC 2A or placement examination.
Normal Grade Rules
2 units

MUSC 003B. Music Systems III B
Third course in a four-semester core sequence of aural skills acquisition, including diction, sight-singing and analysis.
Prerequisite: MUSC 2B or placement examination.
Normal Grade Rules
1 unit

MUSC 004A. Music Systems IV
Fourth course in a four-semester core sequence of study of analytical systems of music. Topics from MUSC 3A are continued in greater detail and with increased complexity. GE Area: C1 when taken as part of the Music Intensive Package.
Prerequisite: MUSC 3A or placement examination.
Note: Music Intensive Package also requires MUSC 4B and MUSC 12
Normal Grade Rules
GE C1
2 units

MUSC 004B. Music Systems IV B
Fourth course in a four-semester core sequence of aural skills acquisition, including dictation, sight-singing and analysis. GE Area: C1 when taken as part of the Music Intensive Package.
Prerequisite: MUSC 3B or placement examination.
Note: Music Intensive Package also requires MUSC 4A and MUSC 12
Normal Grade Rules
GE C1
1 unit

MUSC 006. Jazz Theory
Understanding of traditional jazz nomenclature including chord symbols, chord/scale relationships, and jazz harmony. Various scales, their modes and their applications will be addressed as well as their applications to harmonic progressions common to the jazz idiom.
Prerequisite: MUSC 1A, MUSC 1B, MUSC 25A.
Normal Grade Rules
2 units

MUSC 009. Music Fundamentals
Understanding music terminology, fundamental concepts in music theory and techniques in music reading. Required of all music minors. Acceptable as elective credit for music major (as review of fundamentals or for individual instruction in conjunction with applied music study) only with prior advisor approval.
Musc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

MUSC 010A. Music Appreciation
General survey of Western music focusing on recorded and live performances. GE Area: C1
Normal Grade Rules
GE C1
3 units

MUSC 010B. Introduction to Music
Beginning piano playing as a means to understanding music. Listening skills developed through exposure to a variety of music: Popular/classical, old/new, Western/non-Western. GE Area: C1
Normal Grade Rules
GE C1
3 units

MUSC 011. Music Technology
Hands-on skills development in music hardware and software, including music integration in word processing and graphics, music notation and Internet/WWW-based research tools for music majors or non-music majors with some music background.
Normal Grade Rules
1 unit

MUSC 011A, Music Fundamentals
MUSC 019. Music in World Cultures
Introduction to music in various cultural contexts outside European classical tradition. Live performances, film, video tapes and slides. Projects involving related arts encouraged. GE Area: C1
Normal Grade Rules
GE C1
3 units

MUSC 025A. Piano Proficiency I
Skills development in performing four-part harmony; harmonizing melodies in pianistic style, modulation, simple score reading and sight-reading. First in three-course sequence to prepare applied music students for piano proficiency exam at the end of MUSC 25C.
Prerequisite: MUSC 9 (or equivalent) or instructor consent.
Musc/Lab: Activity 2 hours.
Normal Grade Rules
1 unit

MUSC 025B. Piano Proficiency II
25B continuation of 25A.
Prerequisite: MUSC 25A or equivalent, instructor consent
Normal Grade Rules
1 unit

MUSC 025C. Piano Proficiency III
Preparation for Piano Proficiency Exam
Prerequisite: MUSC 9, 25B or equivalent, instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 026A. Voice Fundamentals
Principles of voice production and performance.
Prerequisite: MUSC 9 or MUSC 10B (or equivalent).
Normal Grade Rules
1 unit
MUSC 029. Electro-Acoustics
Incorporating current music technology and instrumentation in creating works and projects. Required each semester of lower division electro-acoustic majors. Pre-requisite: Audition or Instructor Consent. Normal Grade Rules 1-2 units

MUSC 029AX. Applied Electro-Acoustic 1
The course is an intensive study of electro-acoustic music and audio production methods. Works and projects are created incorporating current music technology and instrumentation. Prerequisite: Successful audition into the applied area. Normal Grade Rules 1 unit

MUSC 029B. Electro-Acoustics 2
APPLIED LESSONS. Electro-acoustics level 2, incorporating current music technology and instrumentation into projects. For music technology majors. Pre-requisite: Audition and instructor consent, MUSC 29A or equivalent. Normal Grade Rules 1-2 units

MUSC 029B. Electro-Acoustics 2
APPLIED LESSONS. Electro-acoustics level 2, incorporating current music technology and instrumentation into projects. For music technology majors. Pre-requisite: Audition and instructor consent, MUSC 29A or equivalent. Normal Grade Rules 1-2 units

MUSC 029B. Electro-Acoustics 2
APPLIED LESSONS. Electro-acoustics level 2, incorporating current music technology and instrumentation into projects. For music technology majors. Pre-requisite: Audition and instructor consent, MUSC 29A or equivalent. Normal Grade Rules 1-2 units

MUSC 029BX. Applied Electro-Acoustic 2
The course is an intensive study of electro-acoustic music and audio production methods. Works and projects are created incorporating current music technology and instrumentation. Prerequisite: Successful audition into the applied area. Normal Grade Rules 1 unit

MUSC 029C. Electro-Acoustics 3
APPLIED LESSONS. Electro-acoustics level 3, incorporating current music technology and instrumentation into projects. For music technology majors. Pre-requisite: Audition and instructor consent, MUSC 29B or equivalent. Normal Grade Rules 1-2 units

MUSC 029CX. Applied Electro-Acoustic 3
The course is an intensive study of electro-acoustic music and audio production methods. Works and projects are created incorporating current music technology and instrumentation. Prerequisite: Successful audition into the applied area. Normal Grade Rules 1 unit

MUSC 029D. Electro-Acoustics 4
APPLIED LESSONS. Electro-acoustics level 4, incorporating current music technology and instrumentation into projects. For music technology majors. Pre-requisite: Audition and instructor consent, MUSC 29C or equivalent. Normal Grade Rules 1-2 units

MUSC 029DX. Applied Electro-Acoustic 4
The course is an intensive study of electro-acoustic music and audio production methods. Works and projects are created incorporating current music technology and instrumentation. Prerequisite: Successful audition into the applied area. Normal Grade Rules 1 unit

MUSC 030A. Piano 1
APPLIED LESSONS. Piano level 1. Required of BM piano majors every semester. Pre-requisite: Audition and instructor consent. Normal Grade Rules 1-2 units

MUSC 030B. Piano 2
APPLIED LESSONS. Piano level 2. Lessons required of BM piano majors every semester. Pre-requisite: Audition and instructor consent. Normal Grade Rules 1 unit

MUSC 030C. Piano 3
APPLIED LESSONS. Piano level 3. Lessons required of BM piano majors every semester. Pre-requisite: Audition and instructor consent, MUSC 30B or equivalent. Normal Grade Rules 1-2 units

MUSC 030CX. Applied Piano 3
The objective of applied lessons is for the instructor to work intensively with the individual piano major in acquiring skills both technical and interpretive in the mastery of standard repertoire. Prerequisite: Successful audition into applied area. Normal Grade Rules 1 unit

MUSC 030D. Piano 4
APPLIED LESSONS. Piano level 4. Lessons required of BM piano majors every semester. Pre-requisite: Audition and instructor consent, MUSC 30C or equivalent. Normal Grade Rules 1-2 units

MUSC 030DX. Applied Piano 4
The objective of applied lessons is for the instructor to work intensively with the individual piano major in acquiring skills both technical and interpretive in the mastery of standard repertoire. Prerequisite: Successful audition into applied area. Normal Grade Rules 1 unit
MUSC 030DX. Applied Piano 3
The objective of applied lessons is for the instructor to work intensively with the individual piano major in acquiring skills both technical and interpretive in the mastery of standard repertory.
Prerequisite: Successful audition into applied area
Normal Grade Rules
1 unit

MUSC 030X. Applied Piano
The objective of applied lessons is for the instructor to work intensively with the individual piano major in acquiring skills both technical and interpretive in the mastery of standard repertory.
Prerequisite: Successful audition into applied area
Normal Grade Rules
1 unit

MUSC 031. Harpsichord or Organ
APPLIED LESSONS: Harpsichord or organ. Required of BM harpsichord or organ majors every semester.
Prerequisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 031A. Harpsichord or Organ 1
APPLIED LESSONS: Harpsichord or organ level 1. Required of BM piano majors every semester.
Pre-requisite: Audition or Instructor Consent
Normal Grade Rules
1-2 units

MUSC 031AX. Harpsichord or Organ 1
APPLIED LESSONS: Harpsichord or organ. Required each semester of lower division BA, BM-Composition or BM-Jazz Studies majors for whom harpsichord or organ is the applied area.
Prerequisite: Audition and instructor approval
Normal Grade Rules
1 unit

MUSC 031B. Harpsichord or Organ 2
APPLIED LESSONS: Harpsichord or organ level 2. Required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 31A or equivalent
Normal Grade Rules
1-2 units

MUSC 031BX. Harpsichord or Organ 2
APPLIED LESSONS: Harpsichord or organ. Required each semester of lower division BA, BM-Composition or BM-Jazz Studies majors for whom harpsichord or organ is the applied area.
Prerequisite: Audition and instructor approval
Normal Grade Rules
1 unit

MUSC 031C. Harpsichord or Organ 3
APPLIED LESSONS: Harpsichord or organ level 3. Required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 31B or equivalent
Normal Grade Rules
1-2 units

MUSC 031CX. Harpsichord or Organ 3
APPLIED LESSONS: Harpsichord or organ. Required each semester of lower division BA, BM-Composition or BM-Jazz Studies majors for whom harpsichord or organ is the applied area.
Prerequisite: Audition and instructor approval
Normal Grade Rules
1 unit

MUSC 031D. Harpsichord or Organ 4
APPLIED LESSONS: Harpsichord or organ level 4. Required of BM piano majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 31C or equivalent
Normal Grade Rules
1-2 units

MUSC 031DX. Harpsichord or Organ 4
APPLIED LESSONS: Harpsichord or organ. Required each semester of lower division BA, BM-Composition or BM-Jazz Studies majors for whom harpsichord or organ is the applied area.
Prerequisite: Audition and instructor approval
Normal Grade Rules
1 unit

MUSC 031X. Harpsichord or Organ
APPLIED LESSONS: Harpsichord or organ. Required each semester of lower division BA, BM-Composition or BM-Jazz Studies majors for whom harpsichord or organ is the applied area.
Prerequisite: Audition and instructor approval
Normal Grade Rules
1 unit

MUSC 033. Voice
Required each semester of lower division voice majors.
Study and development of vocal techniques and performance of representative repertoire from principal periods in music. Includes compositions embracing the English, Italian, French and German languages.
Prerequisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 033A. Voice 1
APPLIED LESSONS: Voice level 1. Required of BM vocal majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 033A. Voice 1
APPLIED LESSONS: Voice level 1. Required of BM vocal majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1 unit

MUSC 033AX. Applied Voice 1
Applied Lessons 1-8, required each semester for lower and upper division Voice majors.
Prerequisite: Audition and/or the prior course in the sequence
Normal Grade Rules
1 unit

MUSC 033B. Voice 2
APPLIED LESSONS: Voice level 2. Required of BM vocal majors every semester.
Prerequisite: Audition and instructor consent, 33A or equivalent
Normal Grade Rules
1-2 units

MUSC 033BX. Applied Voice 2
Applied Lessons 1-8, required each semester for lower and upper division Voice majors.
Prerequisite: Audition and/or the prior course in the sequence
Normal Grade Rules
1 unit

MUSC 033C. Voice 3
Prerequisite: Audition and instructor consent, 33B or equivalent
Normal Grade Rules
1-2 units

MUSC 033CX. Applied Voice 3
Applied Lessons 1-8, required each semester for lower and upper division Voice majors.
Prerequisite: Audition and/or the prior course in the sequence
Normal Grade Rules
1 unit

MUSC 033D. Voice 4
APPLIED LESSONS: Voice level 4. Required of BM vocal majors every semester.
Pre-requisite: Audition and instructor consent, 33C or equivalent
Normal Grade Rules
1-2 units

MUSC 033DX. Applied Voice 4
Applied Lessons 1-8, required each semester for lower and upper division Voice majors.
Prerequisite: Audition and/or the prior course in the sequence
Normal Grade Rules
1 unit

MUSC 033X. Applied Voice
Applied Lessons 1-8, required each semester for lower and upper division Voice majors.
Prerequisite: Audition and/or the prior course in the sequence
Normal Grade Rules
1 unit
**Academic Year 2019-2020**

**Course Descriptions**

---

**MUSC 034. Strings**
Required each semester of lower division string majors.
Pre-requisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

**MUSC 034A. Strings 1**
APPLIED LESSONS: Strings level 1. Required of BM string majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

**MUSC 034AX. Strings 1**
Applied lessons A-D, required each semester of upper and lower division string majors.
Pre-requisite: Audition or instructor consent
Normal Grade Rules
1 unit

**MUSC 034B. Strings 2**
APPLIED LESSONS: Strings level 2. Required of BM string majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 34A or equivalent
Normal Grade Rules
1-2 units

**MUSC 034BX. Strings 2**
Applied lessons A-D, required each semester of upper and lower division string majors.
Pre-requisite: Audition or instructor consent
Normal Grade Rules
1 unit

**MUSC 034C. Strings 3**
APPLIED LESSONS: Strings level 3. Required of BM string majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 34B or equivalent
Normal Grade Rules
1-2 units

**MUSC 034CX. Strings 3**
Applied lessons A-D, required each semester of upper and lower division string majors.
Pre-requisite: Audition or instructor consent
Normal Grade Rules
1 unit

**MUSC 034D. Strings 4**
APPLIED LESSONS: Strings level 4. Required of BM string majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 34C or equivalent
Normal Grade Rules
1-2 units

**MUSC 034DX. Strings 4**
Applied lessons A-D, required each semester of upper and lower division string majors.
Pre-requisite: Audition or instructor consent
Normal Grade Rules
1 unit

**MUSC 035. Woodwinds**
Required each semester of lower division woodwind majors.
Pre-requisite: Audition or instructor consent.
Normal Grade Rules
1 unit

**MUSC 035A. Woodwinds 1**
APPLIED LESSONS: Woodwinds level 1. Required of BM woodwind majors every semester. Flute, oboe, bassoon, clarinet or saxophone.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

**MUSC 035AX. Woodwinds 1**
Applied Lessons 1-8, required each semester for lower and upper division woodwind majors.
Pre-requisite: Audition and/or the prior course in the sequence
Normal Grade Rules
1 unit

**MUSC 035B. Woodwinds 2**
APPLIED LESSONS: Woodwinds level 2. Required of BM woodwind majors every semester. Flute, oboe, bassoon, clarinet or saxophone.
Pre-requisite: Audition and instructor consent, MUSC 35A or equivalent
Normal Grade Rules
1-2 units

**MUSC 035BX. Woodwinds 2**
Applied Lessons 1-8, required each semester for lower and upper division woodwind majors.
Pre-requisite: Audition and/or the prior course in the sequence
Normal Grade Rules
1 unit

**MUSC 035C. Woodwinds 3**
APPLIED LESSONS: Woodwinds level 3. Required of BM woodwind majors every semester. Flute, oboe, clarinet, bassoon or saxophone.
Pre-requisite: Audition and instructor consent, MUSC 35B or equivalent
Normal Grade Rules
1-2 units

**MUSC 035CX. Woodwinds 3**
Applied Lessons 1-8, required each semester for lower and upper division woodwind majors.
Pre-requisite: Audition and/or the prior course in the sequence
Normal Grade Rules
1 unit

**MUSC 035D. Woodwinds 4**
APPLIED LESSONS: Woodwinds level 4. Required of BM woodwind majors every semester. Flute, oboe, bassoon, clarinet or saxophone.
Pre-requisite: Audition and instructor consent, MUSC 35C or equivalent
Normal Grade Rules
1-2 units

**MUSC 035DX. Woodwinds 4**
Applied Lessons 1-8, required each semester for lower and upper division woodwind majors.
Pre-requisite: Audition and/or the prior course in the sequence
Normal Grade Rules
1 unit

---

**MUSC 036. Brass**
Required each semester of lower division brass majors.
Pre-requisite: Audition or instructor consent.
Repeatable for credit
Normal Grade Rules
1-2 units

**MUSC 036B. Brass 1**
APPLIED LESSONS: Brass level 1. Required of BM brass majors every semester. Trumpet, trombone, french horn, euphonium, tuba.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

**MUSC 036BX. Brass 1**
Required each semester for lower and upper division brass majors.
Pre-requisite: Successful audition into the applied area.
Normal Grade Rules
1 unit

**MUSC 036C. Brass 2**
APPLIED LESSONS: Brass level 2. Required of BM brass majors every semester. Trumpet, trombone, french horn, euphonium, tuba.
Pre-requisite: Audition and instructor consent, MUSC 36B or equivalent
Normal Grade Rules
1-2 units
MUSC 036CX. Brass 2
Required each semester for lower and upper division brass majors.
Pre-requisite: Successful audition into the applied area.
Normal Grade Rules
1 unit

MUSC 036D. Brass 3
APPLIED LESSONS: Brass level 3. Required of BM brass majors every semester.
Trumpet, trombone, french horn, euphonium, tuba.
Pre-requisite: Audition and instructor consent, MUSC 36C or equivalent
Normal Grade Rules
1 unit

MUSC 036DX. Brass 3
Required each semester for lower and upper division brass majors.
Pre-requisite: Successful audition into the applied area.
Normal Grade Rules
1-2 units

MUSC 036E. Brass 4
APPLIED LESSONS: Brass level 4. Required of BM brass majors every semester.
Trumpet, trombone, french horn, euphonium, tuba.
Pre-requisite: Audition and instructor consent, MUSC 36D or equivalent
Normal Grade Rules
1-2 units

MUSC 036EX. Brass 4
Required each semester for lower and upper division brass majors.
Pre-requisite: Successful audition into the applied area.
Normal Grade Rules
1 unit

MUSC 036X. Applied Brass
Required each semester for lower and upper division brass majors.
Pre-requisite: Successful audition into the applied area.
Normal Grade Rules
1 unit

MUSC 037. Percussion
Required each semester of lower division percussion majors.
Pre-requisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 037A. Percussion 1
APPLIED LESSONS: Percussion level 1. Required of BM percussion majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1-2 units

MUSC 037AX. Applied Percussion 1
Applied Lessons - Instruction in technical, stylistic, and aesthetic elements of artistic performance in percussion.
Pre-requisite: Successful audition into the percussion studio
Normal Grade Rules
1 unit

MUSC 037B. Percussion 2
APPLIED LESSONS: Percussion level 2. Required of BM percussion majors every semester.
Pre-requisite: Audition and instructor consent, 37A or equivalent
Normal Grade Rules
1-2 units

MUSC 037BX. Applied Percussion 2
Applied Lessons - Instruction in technical, stylistic, and aesthetic elements of artistic performance in percussion.
Pre-requisite: Successful audition into the percussion studio
Normal Grade Rules
1 unit

MUSC 037C. Percussion 3
APPLIED LESSONS: Percussion level 3. Required of BM percussion majors every semester.
Pre-requisite: Audition and instructor consent, 37B or equivalent
Normal Grade Rules
1-2 units

MUSC 037CX. Applied Percussion 3
Applied Lessons - Instruction in technical, stylistic, and aesthetic elements of artistic performance in percussion.
Pre-requisite: Successful audition into the percussion studio
Normal Grade Rules
1 unit

MUSC 037D. Percussion 4
APPLIED LESSONS: Percussion level 4. Required of BM percussion majors every semester.
Pre-requisite: Audition and instructor consent, 37C or equivalent
Normal Grade Rules
1-2 units

MUSC 037DX. Applied Percussion 4
Applied Lessons - Instruction in technical, stylistic, and aesthetic elements of artistic performance in percussion.
Pre-requisite: Successful audition into the percussion studio
Normal Grade Rules
1 unit

MUSC 037X. Applied Percussion
Applied Lessons - Instruction in technical, stylistic, and aesthetic elements of artistic performance in percussion.
Pre-requisite: Successful audition into the percussion studio
Normal Grade Rules
1 unit

MUSC 038. Composition
Required each semester of lower division composition majors.
Works created incorporating traditional and twentieth century procedures.
Pre-requisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 038A. Composition 1
APPLIED LESSONS: Composition level 1. Required of BM composition majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 1A, MUSC 1B, MUSC 38B, with a B or better
Co-requisite: MUSC 2A and MUSC 2B
Normal Grade Rules
1-2 units

MUSC 038BX. Applied Instruction in Music Composition 1
The course is an intensive study of the materials of art music composition. Works are created incorporating common practice and twentieth century procedures
Normal Grade Rules
1 unit

MUSC 038C. Composition 2
APPLIED LESSONS: Composition level 2. Required of BM composition majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 1A and MUSC 38B, with a B or better
Co-requisite: MUSC 2A and MUSC 2B
Normal Grade Rules
1-2 units

MUSC 038CX. Applied Instruction in Music Composition 2
The course is an intensive study of the materials of art music composition. Works are created incorporating common practice and twentieth century procedures
Normal Grade Rules
1 unit

MUSC 038D. Composition 3
APPLIED LESSONS: Composition level 3. Required of BM composition majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 2A and MUSC 3B, with a B or better
Co-requisite: MUSC 3A and MUSC 3B
Normal Grade Rules
1-2 units

MUSC 038DX. Applied Instruction in Music Composition 3
The course is an intensive study of the materials of art music composition. Works are created incorporating common practice and twentieth century procedures
Normal Grade Rules
1 unit
MUSC 038E. Composition 4
APPLIED LESSONS: Composition level 4. Required of BM composition majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 3A and MUSC 3B. MUSC 3BD, with a B or better
Co-requisite: MUSC 4A and MUSC 4B
Normal Grade Rules
1-2 units

MUSC 038EX. Applied Instruction in Music Composition 4
The course is an intensive study of the materials of art music composition. Works are created incorporating common practice and twentieth century procedures
Normal Grade Rules
1 unit

MUSC 038X. Applied Instruction in Music Composition
The course is an intensive study of the materials of art music composition. Works are created incorporating common practice and twentieth century procedures
Normal Grade Rules
1 unit

MUSC 039A. Jazz: Improvisation, Composition or Arranging 1
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 1. Required of BM Jazz Studies majors every semester.
Pre-requisite: Audition and instructor consent
Normal Grade Rules
1 unit

MUSC 039AX. Jazz: Improvisation, Composition or Arranging 1
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 1. Required of BA, BM-Composition, or BM Jazz Studies majors every semester.
Pre-requisite: Audition and instructor consent approval
Normal Grade Rules
1 unit

MUSC 039B. Jazz: Improvisation, Composition or Arranging 2
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 2. Required of BM Jazz Studies majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 39A or equivalent
Normal Grade Rules
1-2 units

MUSC 039BX. Jazz: Improvisation, Composition or Arranging 2
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 2. Required of BA, BM-Composition, or BM Jazz Studies majors every semester.
Pre-requisite: MUSC 39AX or equivalent
Normal Grade Rules
1 unit

MUSC 039C. Jazz: Improvisation, Composition or Arranging 3
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 3. Required of BM Jazz Studies majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 39B or equivalent
Normal Grade Rules
1-2 units

MUSC 039CX. Jazz: Improvisation, Composition or Arranging 3
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 3. Required of BA, BM-Composition, or BM Jazz Studies majors every semester.
Prerequisite: MUSC 39BX or equivalent
Normal Grade Rules
1 unit

MUSC 039D. Jazz: Improvisation, Composition or Arranging 4
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 4. Required of BM Jazz Studies majors every semester.
Pre-requisite: Audition and instructor consent, MUSC 39C or equivalent
Normal Grade Rules
1-2 units

MUSC 039DX. Jazz: Improvisation, Composition or Arranging 4
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 4. Required of BA, BM-Composition, or BM Jazz Studies majors every semester.
Prerequisite: MUSC 39CX or equivalent
Normal Grade Rules
1 unit

MUSC 039X. Applied Jazz Saxophone
The goal of Applied Jazz Saxophone at any level is to present each student with the appropriate materials to increase his/her ability as an improvising musician. Emphasis will be placed on learning standard jazz repertoire; the transcription of a cappella and symphonic major works from all alphabet for lyric diction.
Prerequisite: MUSC 39AX or equivalent
Normal Grade Rules
1 unit

MUSC 039AX: Applied Jazz Saxophone
The goal of Applied Jazz Saxophone at any level is to present each student with the appropriate materials to increase his/her ability as an improvising musician. Emphasis will be placed on learning standard jazz repertoire; the transcription of a cappella and symphonic major works from all alphabet for lyric diction.
Prerequisite: MUSC 39AX or equivalent
Normal Grade Rules
1 unit

MUSC 239A. Studies Degree
Prerequisite: MUSC 139ABCD: Successful completion of Junior Qualifying Examination
MUSC 139ABCD: Successful audition into the BM Jazz Studies Degree
MUSC 139ABC: Successful audition into the MM Jazz Studies Degree
MUSC 239: With graduate advisors and applied instructors consent
Normal Grade Rules
1 unit

MUSC 040A. Jazz Improvisation - I
Development of performance skills for lead-sheet interpretation: response and interplay, ear-training for improvisers, basic chord-scales and jazz vocabulary. Vocal, instrumental, and transcription exercises. In-class performance. Emphasis will be placed on blues, modal compositions, and simple song forms.
Pre/Corequisite: MUSC 1A, MUSC 1B and MUSC 25A; or equivalent.
Misc/Lab: Seminar 1 hour/activity 2 hours.
Normal Grade Rules
2 units

MUSC 041A. Applied Lyric Diction
Pronunciation and applied execution of correct diction in French and German for singers in a master class setting. Performance of specific literature of these languages with emphasis on correct usage of the International Phonetic alphabet for lyric diction.
Prerequisite: Instructor consent.
Normal Grade Rules
1 unit

MUSC 041B. Applied Lyric Diction
Pronunciation and applied execution of correct diction in English and Italian for singers in a master class setting. Performance of specific literature of these languages with emphasis on correct usage of the International Phonetic Alphabet for lyric diction.
Prerequisite: Instructor consent.
Normal Grade Rules
1 unit

MUSC 050A. ENS: Concert Choir
Ensemble. Large select choral ensemble, specializing in advanced a cappella and symphonic major works from all periods.
Prerequisite: Audition and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 051. ENS: University Chorales
ENS: Rehearsal and performance of choral masterpieces and music with wide popular appeal. Students involved in the University Chorales will participate in either the SJSU Women's Chorus, Men's Glee Club, or other specialized choral ensemble and will have the opportunity to study and perform high quality choral literature.
Prerequisite: Audition or Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 052. ENS: Opera Theater
Ens. Training and performance experience in the field of opera. Fully-staged productions of one-act and conventional length works of varying styles.
Prerequisite: Audition and instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit
MUSC 053. ENS: University Symphony Orchestra
Ens: Rehearsal and performance of standard orchestral and operatic repertoire.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 054. ENS: Symphonic Band
ENS: Rehearsal and performance of large symphonic band repertoire.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 055. ENS: Wind Ensemble
ENS: Major performing group open to all wind instrumentalists by audition. Select group that performs the most advanced and high quality contemporary and traditional literature for wind ensemble from all periods. Programming changes every semester. Performances can include but not be limited to state and national conferences.
Prerequisite: Audition and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 056. ENS: Spartan Marching Band
ENS: Open by permission to all students who play saxophone, brass or percussion instruments. Performs at all home and selected away Spartan football games.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
2 units

MUSC 057. ENS: Jazz Orchestra
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 059. ENS: Afro-Latin Jazz Ensemble
ENS: Performance of Afro-Latin jazz and popular music repertoires of the US, the Caribbean, and Latin America. Ensemble techniques and solo improvisation. Concert performances.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060A. ENS: Choraliers
ENS: Small select chamber vocal group specializing in music from all periods, Renaissance to Contemporary.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060B. ENS: Chamber Orchestra
ENS: Study and performance of advanced literature for small orchestra, with music selected from a broad range of stylistic periods and composers
Prerequisite: Audition or Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060C. ENS: Chamber Music
ENS: In-depth chamber music study and performance of standard repertoire with two or more instruments plus piano.
Prerequisite: Audition and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060D. ENS: Collegium Musicum
ENS: Reinforces music history studies through performance. Authenticating performance of pre-Classical music on period instruments and accurate vocal/instrumental practices. Vocal and instrumental, sacred and secular music performed.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060E. ENS: Jazz Singers
ENS: Performance of advanced literature for chamber jazz chorus in concerts, festivals, and special events. Performance techniques, improvisation, musicianship and studio-recording techniques.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060F. ENS: Small Jazz Ensembles
ENS: Small-group jazz performance: standard literature, informal (“head”) arrangements. In-class and/or public performances.
Prerequisite: MUSC 001A, MUSC 001B, MUSC 40A and MUSC 40B or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060G. ENS: Pep Band
ENS: Limited to twenty-five woodwind, brass and percussion players; performs at home Spartan basketball games and certain campus functions.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060H. ENS: Percussion Ensemble
ENS: Performing class consisting of percussion majors. Master classes during fall semester.
Prerequisite: Non-majors by audition and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060I. ENS: Jazz Ensemble
ENS: Large jazz ensemble focused on learning standard repertoire, style, pedagogy and improvisation.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060J. ENS: String Ensemble
ENS: Chamber works for various string combinations studied and performed. Rehearsal and performance techniques for small chamber groups.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060K. ENS: brass ensemble
ENS: Performance of duet, trio, quartet and quintet literature for mixed and homogeneous brass instruments. Literature used represents all style periods with either original or transcription materials.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060L. ENS: Woodwind Ensemble
ENS: Chamber works for various woodwind combinations. Rehearsal and performance techniques for small chamber groups.
Prerequisite: Audition or Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 060M. ENS: Saxophone Ensemble
ENS: Overview of music for saxophone ensemble for two to twenty players. All styles studied from Renaissance to Jazz.
Prerequisite: Audition and Instructor Consent
Repeatable for credit
Normal Grade Rules
1 unit
MUSC 060O. ENS: Trombone Ensemble
ENS. Rehearsal and performance of literature for trombone ensemble. Weekly meetings will also include discussion of brass related topics.
Prerequisite: Audition and instructor consent
Repealtable for credit
Normal Grade Rules
1 unit

MUSC 061. REP: Styles and Interpretation of Opera I
REP: Introduction to styles of opera composition and presentation focusing on opera scenes being presented by the Opera Theater.
Prerequisite: Audition and Instructor Consent
Repealtable for credit
Normal Grade Rules
1 unit

MUSC 062. ENS: Opera Production
ENS: Hands-on training and experience in all phases of opera production.
Prerequisite: Audition and Instructor Consent
Repealtable for credit
Normal Grade Rules
1 unit

MUSC 063. REP: Styles and Interpretation of Opera II
REP: Advanced styles of opera composition and presentation focusing on opera scenes being presented by the Opera Theater.
Prerequisite: Audition and Instructor Consent
Repealtable for credit
Normal Grade Rules
1 unit

MUSC 081. Concert Listening I
Active involvement in the professional musical life of the campus and community through attending programs from the master list published each semester and writing five critical reviews.
Notes: Open to all university students.
Repealtable for credit
Credit / No Credit
1 unit

MUSC 100W. Written Communication II
Examines the process of critique, creative description, research, and professional communications central to the performing arts. Students develop writing skills through the study of varied formats focused on the arts. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE: Z
3 units

MUSC 102. Orchestration
Ranges, sonorities, transposition and technical considerations of orchestral instruments. Performance of project for full orchestra as culminating activity.
Prerequisite: MUSC 13, MUSC 4A and MUSC 4B or equivalents
Notes: May be taken singly or in any sequence.
Normal Grade Rules
3 units

MUSC 103. Form and Analysis
Formal design and pitch structure of Western art music. Prerequisite: MUSC 4A and MUSC 4B.
Normal Grade Rules
3 units

MUSC 104. Counterpoint
The study of the art of counterpoint from the sixteenth century to the present. Includes analysis, imitative and original composition. Prerequisite: MUSC 102 or equivalent.
Normal Grade Rules
3 units

MUSC 106. Jazz Arranging II
Second in a two-semester sequence of jazz arranging and composition required of all jazz majors. Deals primarily with techniques involved in writing and arranging music for the large jazz ensemble. Computer notation is required on all finished projects.
Prerequisite: MUSC 2A, MUSC 2B, MUSC 6, MUSC 40A.
Normal Grade Rules
2 units

MUSC 108. European-American Classical Tradition
Exploration and survey of the European-American classical tradition. Content will vary depending upon national and international trends, compositional techniques and performance media. Formal analysis, listening and performance.
Prerequisite: MUSC 110, or equivalent.
Normal Grade Rules
3 units

MUSC 110. Baroque and Classical Music History
Exploration and survey of the Baroque and Classical periods with study of styles, composers, works, music theory, performance practices, and cultural and intellectual history. Application of research and library skills through research assignments.
Prerequisite: MUSC 12, MUSC 3A (or equivalent), or instructor consent.
Normal Grade Rules
3 units

MUSC 111. Romantic and Modern Music History
Exploration and survey of Romantic and Modern classical music with study of styles, composers, works, music theory, performance practices, and cultural and intellectual history. Demonstration of research and library skills through a term paper.
Prerequisite: MUSC 110, or equivalent.
Normal Grade Rules
3 units

MUSC 116. Aspects of Twentieth Century Music
In-depth study of contemporary music from the various major musical cultures of the world including the European-American classical tradition. Content will vary depending upon national and international trends, compositional techniques and performance media. Formal analysis, listening and performance.
Prerequisite: MUSC 111 (or equivalent).
Note: Emphasis may vary. Offered only occasionally.
Repealtable for credit
Normal Grade Rules
3 units

Course approaches jazz as part of American and global cultural history, exploring the changing social contexts in which jazz musicians in the US and abroad have worked and lived throughout the 20th century and today. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE S
3 units

MUSC 122A. Fundamental Techniques and Literature: Instrumental
Woodwinds: Flute, Clarinet, and Saxophone. Required for credential. Instrumental emphasis in music education must take two units including flute, clarinet, saxophone, and double reeds. Choral/general emphasis must take a minimum of one unit including flute, clarinet, and saxophone.
Prerequisite: Upper division standing.
Misc/Lab: Activity 4 hours.
Normal Grade Rules
1 unit

MUSC 122B. Fundamental Techniques and Literature: Instrumental
Woodwinds: double reeds and saxophone. Required for credential. Instrumental emphasis in music education must take two units including flute, clarinet, saxophone and double reeds. Choral/general emphasis must take a minimum of one unit including flute, clarinet, and saxophone.
Prerequisites: Upper Division Standing, and Instructor Consent
Normal Grade Rules
1 unit

MUSC 123A. Fundamental Techniques and Literature: Instrumental
Upper Brass. Required for credential. Instrumental emphasis in music education must take two units including upper and lower brass. Choral/general emphasis must take a minimum of one unit of brass.
Prerequisite: Upper division standing.
Misc/Lab: Activity 4 hours.
Normal Grade Rules
1 unit

MUSC 123B. Fundamental Techniques and Literature: Instrumental
Lower Brass. Required for credential. Instrumental emphasis in music education must take two units including upper and lower brass. Choral/general emphasis must take a minimum of one unit of upper brass.
Prerequisite: Upper Division Standing and Instructor Consent
Normal Grade Rules
1 unit

MUSC 124. Special Topics in Music History/Literature
Content varies to allow presentation of one-time courses by specialists from artist-faculty and guests. Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
1-3 units

MUSC 125D. Fundamental Techniques and Literature: Instrumental
APPLIED LESSONS: Electro-acoustics level 5, incorporating current music technology and instrumentation into projects. For music technology majors.
Prerequisite: Audition or instructor consent
Repeatable for credit
Normal Grade Rules
1-2 units

MUSC 126. Marching Band Techniques
Methods and materials of marching band instruction. Techniques of show development, arranging, drill design, charting, and drill instruction. Principles of band administration, such as budget management, purchasing, and program development. Required for credential.
Prerequisite: Upper division standing and instructor consent.
Notes: Offer through Extended Studies.
Normal Grade Rules
1 unit

MUSC 127A. Fundamental Techniques and Literature: Instrumental
Upper Strings. Required for credential. Instrumental emphasis in music education must take two units including upper and lower strings. Choral/general emphasis must take a minimum of one unit of strings.
Prerequisite: Upper division standing.
Misc/Lab: Activity 4 hours.
Normal Grade Rules
1 unit

MUSC 127B. Fundamental Techniques and Literature: Instrumental
Lower Strings. Required for credential. Instrumental emphasis in music education must take two units including upper and lower strings. Choral/general emphasis must take a minimum of one unit of upper strings.
Prerequisite: Upper Division Standing and Instructor Consent
Normal Grade Rules
1 unit

MUSC 129. Electro-Acoustics
Incorporating current music technology and instrumentation in creating advanced works and projects. Required each semester of upper division electro-acoustic majors.
Prerequisite: Audition or instructor consent
Repeatable for credit
Normal Grade Rules
1-2 units

MUSC 129A. Electro-Acoustics 5
APPLIED LESSONS: Electro-acoustics level 5, incorporating current music technology and instrumentation into projects. For music technology majors.
Pre-requisite: Audition and instructor consent, MUSC 290 or equivalent
Normal Grade Rules
1-2 units
MUSC 129B. Electro-Acoustics 6  
APPLIED LESSONS: Electro-acoustics level 6, incorporating current music technology and instrumentation into projects. For music technology majors.  
Pre-requisite: Audition and instructor consent, MUSC 129A or equivalent  
Normal Grade Rules 1-2 units

MUSC 129C. Electro-Acoustics 7  
APPLIED LESSONS: Electro-acoustics level 7, incorporating current music technology and instrumentation into projects. For music technology majors.  
Pre-requisite: Audition and instructor consent, MUSC 129B or equivalent  
Normal Grade Rules 1-2 units

MUSC 129D. Electro-Acoustics 8  
APPLIED LESSONS: Electro-acoustics level 8, incorporating current music technology and instrumentation into projects. For music technology majors.  
Pre-requisite: Audition and instructor consent, MUSC 129C or equivalent  
Normal Grade Rules 1-2 units

MUSC 130. Piano  
Required each semester of upper division piano majors.  
Continuation of MUSC 30. Study and performance of selections comparable to Bach Preludes and Fugues from Well-Tempered Clavier; Beethoven Sonata, Op. 31 No 3; Chopin Ballade in A-flat and Debussy Preludes.  
Pre-requisite: Audition or instructor consent.  
Normal Grade Rules 1-2 units

MUSC 130A. Piano 5  
APPLIED LESSONS: Piano level 5. Lessons required of BM piano majors every semester.  
Pre-requisite: Audition and instructor consent, MUSC 130D or equivalent  
Normal Grade Rules 1-2 units

MUSC 130B. Piano 6  
Pre-requisite: Audition and instructor consent, MUSC 130A or equivalent  
Normal Grade Rules 1-2 units

MUSC 130C. Piano 7  
APPLIED LESSONS: Piano level 7. Lessons required of BM piano majors every semester.  
Pre-requisite: Audition and instructor consent, MUSC 130B or equivalent  
Normal Grade Rules 1-2 units

MUSC 130D. Piano 8  
APPLIED LESSONS: Piano level 8. Lessons required of BM piano majors every semester.  
Pre-requisite: Audition and instructor consent, MUSC 130C or equivalent  
Normal Grade Rules 1-2 units

MUSC 131. Keyboard  
APPLIED LESSONS: Harpsichord or organ. Required of BM piano majors every semester. Upper division.  
Pre-requisite: Audition or instructor consent, 31D or equivalent  
Normal Grade Rules 1-2 units

MUSC 131A. Harpsichord or Organ 5  
APPLIED LESSONS: Harpsichord or organ level 5. Required of BM piano majors every semester.  
Pre-requisite: Audition and instructor consent, MUSC 131D or equivalent  
Normal Grade Rules 1-2 units

MUSC 131B. Harpsichord or Organ 6  
APPLIED LESSONS: Harpsichord or organ level 6. Required of BM piano majors every semester.  
Pre-requisite: Audition and instructor consent, MUSC 131A or equivalent  
Normal Grade Rules 1-2 units

MUSC 131C. Harpsichord or Organ 7  
APPLIED LESSONS: Harpsichord or organ level 7. Required of BM piano majors every semester.  
Pre-requisite: Audition and instructor consent, MUSC 131B or equivalent  
Normal Grade Rules 1-2 units

MUSC 131D. Harpsichord or Organ 8  
APPLIED LESSONS: Harpsichord or organ level 8. Required of BM piano majors every semester.  
Pre-requisite: Audition and instructor consent, MUSC 131C or equivalent  
Normal Grade Rules 1-2 units

MUSC 133. Voice  
Required each semester of upper division voice majors.  
Continuation of MUSC 33. Study of more advanced repertoire and techniques.  
Pre-requisite: Audition or instructor consent.  
Normal Grade Rules 1-2 units

MUSC 133A. Voice 5  
Pre-requisite: Audition and instructor consent, 33D or equivalent  
Repeatable for credit  
Normal Grade Rules 1-2 units

MUSC 133B. Voice 6  
Pre-Requisite: Audition and instructor consent, 133B or equivalent  
Normal Grade Rules 1-2 units

MUSC 133C. Voice 7  
Pre-Requisite: Audition and instructor consent, 133B or equivalent  
Normal Grade Rules 1-2 units

MUSC 133D. Voice 8  
Pre-requisite: Audition and instructor consent, 133C or equivalent  
Normal Grade Rules 1-2 units

MUSC 134. Strings  
Required each semester of upper division string majors.  
Vioin: All major and minor scales and arpeggios in three octaves; double stops; Kreutzer, Fiorillo, Rode etudes; Bach unaccompanied sonatas and standard concert repertoire, including concerti and sonatas by Vivaldi, Bach, Mozart, Mendelssohn, Beethoven and Brahms. Viola: All major and minor scales in three octaves; double stops; standard etudes including Kreutzer, Mazas, Bruni; Bach suites; all standard repertoire including Block suites, Brahms, Hindemith and Schubert. Cello: All major and minor scales and arpeggios in three octaves; double stops; standard etudes including Kreutzer, Mazas, Bruni; Bach suites; all standard repertoire including Block suites, Brahms, Hindemith and Schubert. Double bass: All major and minor scales and arpeggios; Simon and Rehagens, Balle, Storch, Hrabe etudes. Includes solo literature of Bottesini, Dittersdorf, Dragonetti, Koussevitzky, Hindemith, Marcello, Vivaldi and standard orchestral literature.  
Har: Literature and techniques, with solo and ensemble performances. Etudes by Salzedo, Lariviure and standard concert works comparable to Ravel Introduction and Allegro, Salzedo Preludes; Prescetti Sonata and Pierre Impromptus CapriGuitar: Literature and technique of the guitar including studies by Shearer, Casassi, Giulini, Torrega and Segovia, and solos by J. S. Bach, Carulli, De Visee, Fernando Sor and Paganini.  
Pre-requisite: Audition or instructor consent.  
Normal Grade Rules 1-2 units

DESCRIPTION CONTENTS

MUSC 134A. Strings 5
APPLIED LESSONS: Strings levels 5. Required of BM string majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 340 or equivalent
Normal Grade Rules
1-2 units

MUSC 134B. Strings 6
APPLIED LESSONS: Strings levels 6. Required of BM string majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 134A or equivalent, MUSC 25C or equivalent
Normal Grade Rules
1-2 units

MUSC 134C. Strings 7
APPLIED LESSONS: Strings levels 7. Required of BM string majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 134A or equivalent, MUSC 25C or equivalent
Normal Grade Rules
1-2 units

MUSC 134D. Strings 8
APPLIED LESSONS: Strings levels 8. Required of BM string majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 134A or equivalent
Normal Grade Rules
1-2 units

MUSC 134E. Woodwinds 5
APPLIED LESSONS: Woodwinds levels 5. Required of BM woodwind majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 350 or equivalent
Normal Grade Rules
1-2 units

MUSC 135. Woodwinds
Pre-requisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 135A. Woodwinds 6
Pre-requisite: Audition and instructor consent, MUSC 25C or equivalent, MUSC 135A or equivalent
Normal Grade Rules
1-2 units

MUSC 135C. Woodwinds 7
Pre-requisite: Audition and instructor consent, MUSC 135B or equivalent
Normal Grade Rules
1-2 units

MUSC 135D. Woodwinds 8
Pre-requisite: Audition and instructor consent, MUSC 135C or equivalent
Normal Grade Rules
1-2 units

MUSC 136. Brass
Pre-requisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 136A. Vocal-Instrumental Improvisation
Advanced vocal and instrumental private lessons.
Development of performing skills in various styles, with emphasis on soloing, reading lead sheets and advanced levels of musicianship and musicianship.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 136B. Brass 5
Pre-requisite: Audition and instructor consent, MUSC 360 or equivalent
Normal Grade Rules
1-2 units

MUSC 136C. Brass 6
Pre-requisite: Audition and instructor consent, MUSC 25C or equivalent, MUSC 136B or equivalent
Normal Grade Rules
1-2 units

MUSC 136D. Brass 7
Pre-requisite: Audition and instructor consent, MUSC 136C or equivalent
Normal Grade Rules
1-2 units

MUSC 136E. Brass 8
Pre-requisite: Audition and instructor consent, MUSC 136D or equivalent
Normal Grade Rules
1-2 units

MUSC 137. Percussion
Required each semester of upper division percussion majors. Performance on timpani, keyboard percussion and snare drum as well as the accessory percussion instruments. Timpani etudes: Goodman, Firth, Cittone and the classical timpani repertoire. Keyboard repertoire includes Orchestral Mallet Player by Cittone. Goldberg etudes, standard orchestral literature plus 4-mallet literature. Snare drum methods of Podemski, Whaley and Cittone and the standard orchestral literature.
Prerequisite: Audition or instructor consent.
Normal Grade Rules
1-2 units

MUSC 137A. Percussion 5
APPLIED LESSONS: Percussion level 5. Required of BM percussion majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, 37D or equivalent
Repeatable for credit
Normal Grade Rules
1-2 units

MUSC 137B. Percussion 6
Pre-Requisite: Audition and instructor consent, MUSC 137A or equivalent, MUSC 25C or equivalent
Normal Grade Rules
1-2 units
MUSC 137C. Percussion 7
Pre-requisite: Audition and instructor consent, MUSC 137B or equivalent
Normal Grade Rules 1-2 units
MUSC 137D. Percussion 8
Pre-requisite: Audition and instructor consent, MUSC 137C or equivalent
Normal Grade Rules 1-2 units
MUSC 138A. Composition
Private studio lessons. Advanced applications of the process needed to bring personal musical ideas and concepts to realities, such as compositions or arrangements in concert performance and video productions.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit
MUSC 138B. Composition 5
APPLIED LESSONS: Composition level 5. Required of BM composition majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 4A and MUSC 4B, MUSC 36C.
Normal Grade Rules 1-2 units
MUSC 138C. Composition 6
Pre-requisite: Audition and instructor consent, MUSC 25C or equivalent, MUSC 138B.
Normal Grade Rules 1-2 units
MUSC 138D. Composition 7
APPLIED LESSONS: Composition level 7. Required of BM composition majors every semester. Upper division.
Pre-requisite: Audition and instructor consent, MUSC 102, MUSC 103, MUSC 104 and MUSC 138C.
Normal Grade Rules 1-2 units
MUSC 138E. Composition 8
Pre-requisite: Audition and instructor consent, MUSC 138D.
Normal Grade Rules 1-2 units
MUSC 139A. Jazz Studies 5
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 5. Required of BM Jazz Studies majors every semester. Upper Division.
Pre-requisite: Audition and instructor consent, MUSC 390 or equivalent
Normal Grade Rules 1-2 units
MUSC 139B. Jazz Studies 6
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 6. Required of BM Jazz Studies majors every semester. Upper Division.
Pre-requisite: Audition and instructor consent, MUSC 139A or equivalent, MUSC 25C or equivalent, MUSC 27A.
Normal Grade Rules 1-2 units
MUSC 139C. Jazz Studies 7
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 7. Required of BM Jazz Studies majors every semester. Upper Division.
Pre-requisite: Audition and instructor consent, MUSC 139B or equivalent
Normal Grade Rules 1-2 units
MUSC 139D. Jazz Studies 8
APPLIED LESSONS: Jazz. Vocal or instrumental improvisation, composition or arranging, level 8. Required of BM Jazz Studies majors every semester. Upper Division.
Pre-requisite: Audition and instructor consent, MUSC 139C or equivalent
Normal Grade Rules 1-2 units
MUSC 140B. Jazz Improvisation-II
Continuation of 40A in greater depth and complexity: advanced transcription projects, style analysis, developing personal improvisatory style, advanced rhythmic, melodic, and harmonic techniques. Emphasis will be placed on complex jazz compositions—primarily those of Wayne Shorter, Chick Corea, and Tom Harrell.
Pre/Corequisite: MUSC 2A and MUSC 2B and MUSC 140B, or equivalent.
Musc/Lab: Seminar 1 hour/activity 2 hours.
Repeatable for credit
Normal Grade Rules 2 units
MUSC 142. REP: Art Song Repertoire
Content varies each semester, with focus on German, French, Italian and Spanish, English and American, or Russian, Polish, Slavic and Scandinavian literature. Performance practice, language, style and history.
Prerequisite: Upper division standing or instructor consent.
Prerequisite: Seminar 1 hour/activity 2 hours.
Repeatable for credit
Normal Grade Rules 1 unit
MUSC 143. REP: Collaborative Keyboard Performance
For piano majors who wish to broaden their pianistic skills by performing with singers and instrumentalists both in studio sessions and recital situations. A maximum of four units may be repeated.
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit
MUSC 144. REP: Solo Lit., Performance, Pedagogy
Performance of vocal or piano literature studied in studio lessons, with discussion of technique, pedagogy, recital preparation and interpretive, stylistic and linguistic aspects of literature in a master class setting to develop confidence and serve as a forum for exchange of ideas.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit
MUSC 145. REP: Performance Concepts
Content varies to allow presentation of one-time courses by specialists from artist-faculty and guests. Repeatable for up to 4 units of credit when topic changes.
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules 2 units
MUSC 146. Introduction to Applied Music Pedagogy
An introduction to the fundamentals of teaching applied music for the performing musician.
Prerequisite: MUSC 30D, 31D, 33D, 34D, 35D, 36E or 37D
Normal Grade Rules
2 units

MUSC 146A. Pedagogy - Piano
For piano majors and established teachers who primarily wish to teach. Teaching techniques and application of these skills from elementary to most advanced levels.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
2 units

MUSC 146B. Pedagogy - Percussion
Two projects chosen from the following areas: conducting, composition, clinics, orchestral repertoire, lesson plans, article, book or research projects.
Prerequisite: Upper division percussion majors only.
Normal Grade Rules
1 unit

MUSC 147A. Beginning Conducting
Basic choral and instrumental conducting techniques. Prerequisite: Upper division standing or instructor consent.
Misc/Lab: Seminar 1 hour/activity 2 hours.
Normal Grade Rules
2 units

MUSC 147B. Advanced Conducting: Instrumental
Advanced instrumental conducting techniques. Rehearsal and performance of instrumental groups under supervision.
Prerequisite: MUSC 147A or instructor consent.
Misc/Lab: Seminar 1 hour/activity 2 hours.
Normal Grade Rules
2 units

MUSC 147C. Advanced Conducting: Choral
Advanced choral conducting techniques. Rehearsal and performance of choral groups under supervision.
Prerequisite: MUSC 147A or equivalent
Misc/Lab: Lecture 2 hours/Activity 2 hours.
Repeatable for credit
Normal Grade Rules
2 units

MUSC 148A. Improvisational Traditions of the World - Africa and Diaspora
Selected topics in performance practice and social context of improvisational musics from African and African-Diaspora cultures. Selected genres from Sub-Saharan Africa and their relations to Diasporic traditions in the Americas, the Caribbean, and elsewhere.
In-class and/or public performances.
Pre/Corequisite: MUSC 2A and MUSC 2B or equivalent.
Misc/Lab: Seminar 1 hour/activity 2 hours.
Repeatable for credit
Normal Grade Rules
2 units

MUSC 148B. Improvisational Traditions of the World - Asia
Selected topics in performance and social context of improvisational musics of Asia: gamelan and/or other selected genres. In-class and/or public performances.
Pre/Corequisite: MUSC 2A and MUSC 2B or equivalent.
Misc/Lab: Seminar 1 hour/activity 2 hours.
Normal Grade Rules
2 units

MUSC 150A. ENS: Concert Choir
Ensemble. Large select choral ensemble, specializing in advanced a cappella and symphonic major works from all periods.
Prerequisite: MUSC 50A or equivalent, audition and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 150B. ENS: University Chorales
ENS: Rehearsal and performance of choral masterpieces and music with wide popular appeal. Students involved in the University Chorales will participate in either the SJSU Women's Chorus, Men's Glee Club, or other specialized choral ensemble and will have the opportunity to study and perform high quality choral literature.
Prerequisite: MUSC 51 or equivalent, audition and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 151. ENS: University Symphonic Orchestra
ENS: Rehearsal and performance of standard orchestral and operatic repertoire.
Prerequisite: MUSC 053 or equivalent. Audition and instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 164. ENS: Symphonic Band
ENS: Rehearsal and performance of large symphonic band repertory.
Prerequisite: MUSC 54 or equivalent. Audition and instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 155. Wind Ensemble
Major performing group open to all wind instrumentalists by audition. Select group that performs the most advanced and high quality contemporary and traditional literature for wind ensemble from all periods.
Programming changes every semester. Performances can include but not be limited to state and national conferences.
Prerequisites: MUSC 55 or equivalent. Instructor's Consent
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 156. ENS: Spartan Marching Band
ENS: Open by permission to all students who play saxophone, brass or percussion instruments. Performs at all home and selected away Spartan football games.
Prerequisite: MUSC 56 or equivalent. Audition and instructor consent.
Repeatable for credit
Normal Grade Rules
2 units

MUSC 157. ENS: Jazz Orchestra
ENS: Big band jazz performance for instrumentalists and singers. Classic and new repertoire. Includes music from the past 100 years.
Programming changes every semester. Performances can include but not be limited to state and national conferences.
Prerequisite: MUSC 057 or equivalent. Instructor's Consent
Repeatable for credit
Normal Grade Rules
2 units

MUSC 159. ENS: Afro-Latin Jazz Ensemble
ENS: Performance of Afro-Latin jazz and popular music repertoires of the US, the Caribbean, and Latin America. Ensemble techniques and solo improvisation. Concert performances.
Prerequisite: MUSC 59 or equivalent. Audition and instructor consent.
Repeatable for credit
Normal Grade Rules
1 unit
MUSC 160A. ENS: Choraliers
ENS: Small select chamber vocal group specializing in music from all periods, Renaissance to Contemporary.
Prerequisite: 60A or equivalent. Audition and instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 160B. ENS: Chamber Orchestra
Study and performance of advanced literature for small orchestra, with music selected from a broad range of stylistic periods and composers.
Prerequisite: MUSC 60B or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 160C. ENS: Chamber Music
ENS: In-depth chamber music study and performance of standard repertoire with two or more instruments plus piano.
Prerequisite: Audition and instructor consent
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 160D. ENS: Collegium Musicum
ENS: Reinforces music history studies through performance. Authenticating performance of pre-Classical music on period instruments and accurate vocal/instrumental practices. Vocal and instrumental, sacred and secular music performed.
Prerequisite: MUSC 60D or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 160E. ENS: Jazz Singers
Performance of advanced literature for chamber jazz chorus in concerts, festivals, and special events. Performance techniques, improvisation, musicianship and studio-recording techniques.
Prerequisite: MUSC 060E or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 160F. ENS: Small Jazz Ensembles
Small-group jazz performance: standard literature, informal ("head") arrangements. In-class and/or public performances.
Prerequisite: MUSC 1A, MUSC 1B and MUSC 40A, MUSC 40B or equivalents.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 160G. ENS: Pep Band
Limited to twenty-five woodwind, brass and percussion players; performs at home Spartan basketball games and certain campus functions.
Prerequisite: 60G or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 160H. ENS: Percussion Ensemble
Performing class consisting of percussion majors. Master classes during fall semester.
Prerequisite: 60H or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 161. ENS: Jazz Ensemble
ENS: Large jazz ensemble focused on learning standard repertoire, style, pedagogy and improvisation.
Prerequisite: Audition and instructor consent
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 161J. ENS: String Ensemble
Chamber works for various string combinations studied and performed. Rehearsal and performance techniques for small chamber groups.
Prerequisite: 60J or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 161K. ENS: Brass Ensemble
Performance of duet, trio, quartet and quintet literature for mixed and homogeneous brass instruments. Literature used represents all style periods with either original or transcription materials.
Prerequisite: 60K or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 161L. Woodwind Ensemble
Chamber works for various woodwind combinations. Rehearsal and performance techniques for small chamber groups.
Prerequisite: 60L or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 161M. ENS: Saxophone Ensemble
Overview of music for saxophone ensemble for two to twenty players. All styles studied from Renaissance to Jazz.
Prerequisite: 60M or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 1600. Trombone Ensemble
Rehearsal and performance of literature for trombone ensemble. Weekly meetings will also include discussion of brass related topics.
Prerequisites: MUSC 60O or equivalent. Instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 161. REP: Styles and Interpretation of Opera I
REP: Introduction to styles of opera composition and presentation focusing on opera scenes being presented by the Opera Theater.
Prerequisite: 61 or equivalent. Audition and instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 162. ENS: Opera Production
ENS: Hands-on training and experience in all phases of opera production.
Prerequisite: MUSC 62 or equivalent. Audition and instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 163. REP: Styles and Interpretation of Opera II
REP: Advanced styles of opera composition and presentation focusing on opera scenes being presented by the Opera Theater.
Prerequisite: MUSC 61 or equivalent. Audition and instructor consent.
Repeatable for credit
Normal Grade Rules 1 unit

MUSC 166. Physics of Music
See PHYS 166
Normal Grade Rules
GE: R
3 units

MUSC 167. Electro-Acoustic Music I
Overview of electro-acoustic studio production/research techniques and hands-on study of analog, digital and hybrid synthesis techniques related to composition and performance. Introduction to signal processing, MIDI and basic software/hardware systems applications.
Prerequisite: MUSC 4A and MUSC 4B or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
MUSC 168. Electro-Acoustic Music II
Continuation of MUSC 167, covering advanced synthesis, programming and production. Development of strategies for sound design and music composition toward applications in studio and performance environments. Introduction to algorithmic composition. 
Prerequisite: MUSC 167 or instructor consent. 
Normal Grade Rules 
3 units

MUSC 169. Digital Synthesis
Techniques of direct digital synthesis and digital signal processing as related to composition, performance and research in new music. In-depth study of hardware and software instrument configurations as applied to various synthesis and processing algorithms. 
Prerequisite: MUSC 168 (or equivalent) or instructor consent. 
Normal Grade Rules 
3 units

MUSC 170A. Fundamentals of Sound Recording
Beginning techniques in studio sound and music recording: terminology, tape editing, overdubbing, microphone technique and production techniques. 
Prerequisite: MUSC 1A and MUSC 1B. 
Normal Grade Rules 
3 units

MUSC 170B. Intermediate Sound Recording
Intermediate sound recording and processing techniques in audio production: emphasis on microphone techniques, analog processing and multi-track production. 
Prerequisite: MUSC 170A or instructor consent. 
Normal Grade Rules 
3 units

MUSC 170C. Advanced Sound Recording Production
Advanced production techniques in multi-track recording and digital recording, including sound construction, modulation and digital processing. Emphasis on application of techniques to group productions in synchronized audio-visual media. 
Prerequisite: MUSC 170B or instructor consent. 
Normal Grade Rules 
3 units

MUSC 172. The Arts in U.S. Society
See CA 172. 
Normal Grade Rules 
GE: S 
3 units

MUSC 173. Thinking About Contemporary World Arts
See CA 173. 
Normal Grade Rules 
GE: V 
3 units

MUSC 180. Individual Studies
Prerequisite: Upper division standing and instructor and director consent. May be repeated up to 4 units of credit. 
Repeatable for credit 
Credit / No Credit 
1-2 units

MUSC 181. Concert Listening II
Required active involvement of all music majors in the professional musical life of the campus and community through attending programs from the master list published each semester and writing five critical reviews. 
Prerequisite: Upper division music major. 
Repeatable for credit 
Credit / No Credit 
1 unit

MUSC 182. Senior Project
Senior capstone project for B.A. in music. By advisement and according to degree requirements either a senior thesis, lecture/demonstration or lecture/recital. 
Prerequisite: Upper division standing, instructor consent and area approval. 
Credit / No Credit 
1 unit

MUSC 185A. Music for Children
Music fundamentals for the classroom teacher: Singing, playing instruments, movement, reading notation, creating music. Kodaly, Orff, Dalcroze, techniques emphasized with multicultural approach. Technology for elementary music through lab experience. 
Prerequisite: Upper division standing. 
Normal Grade Rules 
3 units

MUSC 186. Singing for Music Theatre
Theoretical and practical study of music as an extension, intensification and completion of the drama. Musical exercises and scenes, emphasizing singing, to introduce the functions and potentials of music in music theatre. 
Prerequisite: MUSC 10B, MUSC 26A and MUSC 26B. 
Musc/Lab: Lecture 2 hours/Lab 2 hours 
Normal Grade Rules 
2 units

MUSC 190A. Honors Project
Prerequisite: Upper division standing; instructor and director consent. 
Notes: MUSC 190B must be completed before total of 3 units is granted. 
Credit / No Credit 
1 unit

MUSC 190B. Honors Project
Prerequisite: MUSC 190A. 
Credit / No Credit 
2 units

MUSC 200. Methods of Music Research & Writing
Use and evaluation of resources for music research and writing, problems in critical writing and music literature history. 
Note: This course satisfies graduate-level GWAR in this master’s program. 
Normal Grade Rules 
GE: GWAR 
3 units

MUSC 201. Seminar in Music History
Research and analytical studies on selected topics in music history. May be repeated once for elective credit. 
Prerequisite: MUSC 200 and classified standing. 
Normal Grade Rules 
3 units

MUSC 202. Seminar in Music Systems & Theory
Research and analytical studies of selected theoretical and applied compositional techniques in music. 
Prerequisite: MUSC 200 and classified standing. 
Notes: Emphasis may vary. 
Normal Grade Rules 
3 units

MUSC 203. Seminar in Style & Performance Practices
Study of the history of performance practices and applications in contemporary performances. May be repeated once for elective credit. 
Prerequisite: MUSC 200 and classified standing. 
Normal Grade Rules 
3 units

MUSC 204. Materials for Graduate Music Studies
This course presents the foundation knowledge and practical skills of music systems and music history for graduate music studies. 
Normal Grade Rules 
3 units

MUSC 220. Seminar in Advanced Conducting
Problems in conducting, advanced score reading and interpretation. 
Prerequisite: Two semesters of undergraduate conducting (or equivalent) and instructor consent. 
Normal Grade Rules 
3 units

MUSC 221. Seminar in Jazz History
Research and analytical studies on selected topics in jazz history. 
Prerequisite: MUSC 200 and classified standing. 
Normal Grade Rules 
3 units
MUSC 222. Special Topics in Music  
Study of specialized subjects in music history, theory, performance or education.  
Prerequisite: Instructor consent.  
Repeatable for credit  
Normal Grade Rules  
1-3 units

MUSC 224. Supervised Graduate Study  
Prerequisite: Audition and/or consent of instructor and graduate advisor. Repeatable for credit  
Repeatable for credit  
Normal Grade Rules  
1-2 units

MUSC 230. Graduate Piano Lessons: Secondary  
Applied piano lessons for graduate student in a secondary area. Continuation of work from undergraduate study.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 231. Graduate Harpsichord or Organ Lessons: Secondary  
Applied harpsichord or organ lessons for graduate student in a secondary area. Continuation of work from undergraduate study.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 232. Advanced Field Experience--Pedagogy  
Provides opportunity for the qualified graduate student to be involved in planning and assisting in teaching college courses in music. The work is carried on in conjunction with the regular college teacher and must have this supervising teacher’s approval.  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 233. Graduate Voice Lessons: Secondary  
Applied voice lessons for graduate student in a secondary area. Continuation of work from undergraduate study.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 234. Graduate String Lessons: Secondary  
Applied string lessons for graduate student in a secondary area. Continuation of work from undergraduate study.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 235. Graduate Woodwind Lessons: Secondary  
Applied woodwind (clarinet, oboe, flute, saxophone or flute) lessons for graduate student in a secondary area. Continuation of work from undergraduate study.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 236. Graduate Brass Lessons: Secondary  
Applied Brass (trumpet, French horn, trombone or tuba) lessons for graduate student in a secondary area. Continuation of work from undergraduate study.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 237. Graduate Percussion Lessons: Secondary  
Applied percussion lessons for graduate student in a secondary area. Continuation of work from undergraduate study.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 238. Graduate Jazz Lessons: Secondary  
Applied jazz (saxophone, trumpet, guitar, piano, or trombone) lessons for graduate student in a secondary area. Continuation of work from undergraduate study.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 239. Graduate Jazz Lessons: Secondary  
Applied jazz (saxophone, trumpet, guitar, piano, or trombone) lessons for graduate student in a secondary area. Continuation of work from undergraduate study.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 240. Graduate Woodwind Lessons: Secondary  
Applied woodwind (clarinet, oboe, flute, saxophone or flute) lessons for graduate student in a secondary area. Continuation of work from undergraduate study.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 250A. ENS: Graduate Concert Choir  
ENS: Graduate large select choral ensemble, specializing in advanced acappella and symphonic major works from all periods.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 251. ENS: Graduate University Chorales  
ENS: Rehearsal and performance of choral masterpieces and music with wide popular appeal. Graduate students involved in the University Chorales will participate in either the SJU Women’s Chorus, Men’s Glee Club, or other specialized choral ensemble and will have the opportunity to study and perform high quality choral literature.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 252. ENS: Graduate Opera Theater  
ENS: Training and performance experience in the field of opera. Fully-staged productions of one-act and conventional length works of varying styles.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 253. ENS: Graduate University Symphony Orchestra  
ENS: Rehearsal and performance of standard orchestral and operatic repertory for graduate students.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 255. ENS: Graduate Wind Ensemble  
ENS: Major performing group open to all graduate wind and percussion instrumentalists by audition.  
Select group that performs the most advanced and high quality contemporary and traditional literature for wind ensemble from all periods. Performances can include but not be limited to state and national conferences.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 257. ENS: Graduate Jazz Orchestra  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 259. ENS: Graduate Latin Jazz Ensemble  
ENS: Performance of Afro-Latin jazz and popular music repertoires of the US, the Caribbean, and Latin America. Graduate level ensemble techniques and solo improvisation. Concert performances.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit

MUSC 260A. ENS: Graduate Choraliers  
ENS: Small select chamber vocal group of graduates and undergraduates specializing in music from all periods, Renaissance to Contemporary.  
Prerequisite: Audition and instructor approval  
Repeatable for credit  
Normal Grade Rules  
1 unit
MUSC 260C. ENS: Graduate Chamber Music Ensemble
ENS: Graduate level in-depth chamber music study and performance of standard repertoire with two or more instruments plus piano.
Prerequisite: Audition and instructor approval
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 260D. ENS: Graduate Collegium
ENS: Graduate. Reinforces music history studies through performance. Authenticating performance of pre-Classical music on period instruments and accurate vocal/instrumental practices. Vocal and instrumental, sacred and secular music performed.
Prerequisite: Audition and instructor approval
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 260F. ENS: Graduate Small Jazz Ensembles
ENS: Graduate small-group jazz performance: standard literature, informal ("head") arrangements. In-class and/or public performances.
Prerequisite: Audition and instructor approval
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 260H. ENS: Graduate Percussion Ensemble
ENS: Performance class consisting of graduate and undergraduate percussion majors. Master classes during fall semester. Small to larger percussion ensemble works performed.
Prerequisite: Audition and instructor approval
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 260J. ENS: Graduate String Ensemble
ENS: Graduate chamber works for various string combinations studied and performed. Rehearsal and performance techniques for small chamber groups.
Prerequisite: Audition and instructor approval
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 260K. ENS: Graduate Brass Ensemble
ENS: Graduate level performance of duet, trio, quartet and quintet literature for mixed and homogeneous brass instruments. Literature used represents all style periods with either original or transcription materials.
Prerequisite: Audition and instructor approval
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 260L. ENS: Graduate Woodwind Ensemble
Graduate level chamber works for various woodwind combinations. Rehearsal and performance techniques for small chamber groups.
Prerequisite: Audition and instructor approval
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 260M. ENS: Graduate Saxophone Ensemble
ENS: Graduate overview of and performance of music for saxophone ensemble for two to twenty players. All styles studied from Renaissance to Jazz.
Prerequisite: Audition and instructor approval
Repeatable for credit
Normal Grade Rules
1 unit

MUSC 298. Special Study
Special study in the field of music (excluding applied instruction).
Prerequisite: Consent of instructor, graduate advisor and the School of Music director.
Repeatable for credit
Mandatory CR/NC/RP
1-2 units

MUSC 299. Master's Thesis, Recital or Composition
Prerequisite: Admission to candidacy and consent and approval of graduate study instructor, graduate advisor and School of Music department chair.
Mandatory CR/NC/RP
1-3 units

UPPER DIVISION

MUSC 1290R. Culminating Experience Supervision
Continued work on thesis, composition, or project. Prerequisite: Outstanding RP grade in a preceding semesters in a thesis, composition, or project class.
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit

MUSIC EDUCATION

UPPER DIVISION

MUSC 140. Foundations of Music Education
Survey of music education’s historical, philosophical, psychological and sociological foundations.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

MUSC 142. Introduction to Music Education: Early Field Experience
Introduction to teaching music in the public schools. Includes in-school paraprofessional work in approved music program under supervision of university faculty and master teachers.
Prerequisite: Sophomore standing.
Credit / No Credit
1 unit

MUSC 170A. Teaching Instrumental Music
Materials, literature, methods and pedagogy for teachers of instrumental music.
Normal Grade Rules
2 units

MUSC 170B. Teaching Choral Music
Materials, literature, methods and pedagogy for teachers of choral music.
Prerequisite: Upper division standing.
Normal Grade Rules
2 units

MUSC 175. Practicum in Music Education
Practical experience in music education including pedagogy, classroom management and practice teaching.
Prerequisite: MUSD 140, MUSD 170, MUSD 147A, MUSD 147B or instructor consent.
Normal Grade Rules
3 units

MUSC 184I. Student Teaching for Music Individualized Interns
Supervised student teaching in music class(es) in the public school where the student is employed as an Individualized Intern.
Prerequisite: Admission to Single Subject Credential Program; music advisor and Single Subject Coordinator consent.
Repeatable for credit
Credit / No Credit
2-4 units

MUSC 184Y. Student Teaching II - Classroom Teaching
Minimum 80-120 class periods of classroom, teaching lab or field teaching in music subjects, grades K-12. Includes seminar.
Prerequisite: Upper division standing and joint approval of major and education departments.
Repeatable for credit
Credit / No Credit
4-6 units
MUED 184Z. Student Teaching III-Classroom Teaching
To be taken concurrently or in different semester than 184Y. May be in a different subject or in different school and will be at a different grade level.
Prerequisite: Upper division standing and joint approval of major and education departments.
Repeatable for credit
Credit / No Credit
4-6 units

MUED 188. Music Ed Trends
Investigation of current trends in music education. Topics vary with course offering.
Credit / No Credit
1-2 units

GRADUATE
MUED 221. Foundations of Music Education
This course provides an introduction to graduate studies in music education. Topics include; historical contexts; philosophy, sociology, aesthetics; psychology; and learning theory in music education.
Prerequisite: Graduate student standing and instructor consent
Normal Grade Rules
3 units

MUED 228. Research in Music Education
This course examines research in music education, concentrating on qualitative, quantitative, and historical methodologies. Attention will focus on applications of research within music education, and the course will culminate in a capstone project using one of these research methodologies.
Prerequisite: Graduate student standing, instructor consent
Normal Grade Rules
3 units

MUED 232. Directions and Issues in Music Education
This course examines current issues and directions in music education. Topics include historical, sociological, and philosophical contexts for music education; learning and development issues; curriculum and pedagogy; assessment; applied research in music education; and leadership development.
Prerequisite: Graduate student standing and instructor consent
Repeatable for credit
Normal Grade Rules
3 units

MUED 370A. Methodology for Music Educators: Elementary K-8
Study of Kodaly, Orff and Dalcroze elementary methods including a multicultural emphasis. A review of materials for the comprehensive elementary music curriculum. Peer teaching/field observations of classrooms, choral and instrumental classes required.
Prerequisite: Upper division standing or instructor consent.
Notes: Required for certification.
Normal Grade Rules
2 units

MUED 370B. Methodology for Music Educators: Secondary
Prepares secondary music instructors to teach non-performance courses, including music appreciation, theory, technology, history and multicultural survey. Peer teaching and field observations required. Organization of comprehensive secondary music departments included.
Prerequisite: MUED 370A.
Normal Grade Rules
2 units

UPPER DIVISION
MUED 1290R. Culminating Experience Supervision
Continued work on thesis or project
Prerequisite: Outstanding RP grade in a preceding semesters in a thesis, composition, or project class.
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit
Nuclear Science Program
Courses

NUCLEAR SCIENCE

UPPER DIVISION

NUCS 121S. Radiation Safety
Health hazards involved in working with radioactive substances. Physical nature of hazards, biological effects, standards of permissible exposures, safety precautions and protection techniques. Two units meet State of California recommendations.
Prerequisite: Lower division calculus, chemistry and physics.
Normal Grade Rules
1-2 units

NUCS 126. Introduction to Nuclear Science
See CHEM 126.
Normal Grade Rules
3 units

NUCS 127. Nuclear Science Lab
See CHEM 127.
ABC/No Credit
3 units

GRADUATE

NUCS 298. Research
Directed individual laboratory work or field studies in radiological health physics and nuclear science for students with adequate preparation. A maximum of 8 units may be repeated.
Prerequisite: Instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

NUCS 299. Master’s Thesis
Prerequisite: NUCS 298, instructor consent and admission to candidacy for the master’s degree.
Repeatable for credit
Mandatory CR/NC/RP
2-4 units
**Nursing, School of Courses**

**NURSING**

**LOWER DIVISION**

**NURS 022. Nursing Skills and Health Assessment I**  
Focuses on foundational nursing skills including health assessment, nursing process, communication, psychomotor skills and critical thinking in the context of diverse client populations. Person-centered care and safety are emphasized through the use of simulation.  
Repeateable for credit  
Normal Grade Rules  
3 units

**NURS 041. Geriatric Nursing Practicum**  
Provide supervised nursing care to geriatric clients in a variety of healthcare settings. Focus on applying professional fundamental nursing skills including therapeutic communications, nursing assessment and health promotion.  
Repeateable for credit  
Credit / No Credit  
1 unit

**NURS 023. Pathophysiology - Theory I**  
Introduction to biologic basis for health problems in children and adults. Focuses on the pathophysiology of a variety of disease processes using systems theory as an organizing framework.  
Prerequisite: Admission to nursing program. BIOL 65, BIOL 66, CHEM 30A, MICR 20, ENGL 1A, COMM 20, STAT 95, with a C or better.  
Corequisites: NURS 33, NURS 43, NURS 53; completion of core GE.  
Normal Grade Rules  
3 units

**NURS 024. Adult Care Management I**  
Covers the knowledge, skills, and attitudes required to provide safe nursing care to adults/older adults. A systems approach integrates concepts of health promotion, disease prevention, and evidence-based interventions related to actual/potential alterations in: oxygenation, circulation, metabolism, and elimination.  
Prerequisite: NURS 23, NURS 33, NURS 43, NURS 53  
Normal Grade Rules  
4 units

**NURS 032. Health Assessment & Skills III**  
Focuses on the childrearing and childbearing population with integration of clinical reasoning (nursing process) during health assessments and psychomotor skills to provide safe client care in a variety of settings.  
Repeateable for credit  
Normal Grade Rules  
1 unit

**NURS 033. Professional Role Development I**  
An overview of the professional nursing role. Includes: nursing, care values, roles of professional nurse, the nursing process, code of ethics, legal issues, Nurse Practice Act, and interpersonal communication skills in preparation for clinical practice.  
Prerequisite: Admission to nursing program. BIOL 65, BIOL 66, CHEM 30A, MICR 20, ENGL 1A, COMM 20, STAT 95, with grades of "C" or better.  
Corequisites: NURS 023, NURS 043, NURS 053; completion of core GE.  
Normal Grade Rules  
2 units

**NURS 024A. Professional Role Development II**  
Focus is on the role of the professional nurse in providing patient-centered care. Applying principles of the nursing process, professional communication, evidence-based practice and quality improvement in acute care setting.  
Prerequisite: Completion of NURS 23, NURS 33, NURS 43, NURS 53.  
Corequisite: NURS 44  
Normal Grade Rules  
1 unit

**NURS 043. Pharmacology**  
Focuses on drug prototypes from major drug categories. Emphasizes the pharmacodynamics, calculations, nursing assessments and interventions of drugs commonly prescribed.  
Prerequisite: Admission to nursing program. BIOL 65, BIOL 66, CHEM 30A, MICR 20, ENGL 1A, COMM 20, STAT 95, with grades of "C" or better.  
Corequisites: NURS 023, NURS 033, NURS 053; completion of core GE.  
Normal Grade Rules  
1 unit

**NURS 044. Adult Care Clinical Practicum I**  
Focus is on applying the nursing process to provide safe, client-centered nursing care to acute and chronically ill adults and older adults in the acute care setting.  
Prerequisite: NURS 023, NURS 033, NURS 043, NURS 053.  
Credit / No Credit  
3 units

**NURS 053. Skills in Nursing I**  
A beginning simulation course for the learning and practice of advanced psychomotor and cognitive skills used to provide direct care in the acute care setting. Includes: hygiene, safety, mobility, asepsis, medication administration, health assessment, interpersonal relationship skills.  
Prerequisite: Admission to nursing program. BIOL 65, BIOL 66, CHEM 30A, MICR 20, ENGL 1A, COMM 20, STAT 95, with grades of "C" or better.  
Corequisites: NURS 023, NURS 033, NURS 043, NURS 053; completion of core GE.  
Misc/Lab: Lecture 3 hours/Lab 3 hours  
Normal Grade Rules  
3 units

**NURS 054. Skills in Nursing II**  
A simulation course for the learning and practice of advanced psychomotor and cognitive skills used to provide direct care in the acute care setting. Skills include: IV therapy, venipuncture, trach care, wound care, NG tubes, blood transfusions, and postmortem care.  
Prerequisite: Completion of NURS 023, NURS 033, NURS 043, NURS 053.  
Corequisite: NURS 024 and NURS 034.  
Misc/Lab: Lecture 3 hours/Lab 2 hours  
Normal Grade Rules  
2 units

**UPPER DIVISION**

**NURS 100W. Writing Workshop**  
See HS 100W.  
Normal Grade Rules  
GE: V  
3 units

**NURS 108. Special Topics in Nursing**  
Significant nursing topics, issues, or themes. Consult Schedule of Classes and/or School of Nursing for focus which varies each semester.  
Prerequisite: Upper division standing.  
Repeateable for credit  
Normal Grade Rules  
3 units

**NURS 110ITL. Global Influences on Health**  
Examination of major issues influencing health and human services and their delivery on a global scale. The health care needs of a diverse and multicultural population, health care disparities, and strategies to address global health needs are explored. Includes special populations service provision, advocacy, patient/client centered care, psycho-social aspects of disease and wellness, health promotion and education, quality, cost controls, and multidisciplinary team approaches to service delivery. SJSU Studies Area: V  
Normal Grade Rules  
GE: V  
3 units

**NURS 111. Medical Ethics**  
See PHIL 111.  
Normal Grade Rules  
3 units

**NURS 112. Professional Practice Success II**  
Second course in a two course sequence focusing on the application of nursing concepts essential to successful professional nursing practice: improving clinical reasoning, developing a systems viewpoint, and implementing change in the current healthcare setting.  
Prerequisite: NURS 111, NURS 170 and NURS 171.  
Corequisite: NURS 172 and NURS 173.  
Repeateable for credit  
Normal Grade Rules  
2 units
**NURS 124. Nursing Theory II**
An RN Bridge course teaching the theoretical basis for health and illness management of culturally diverse individuals, families, and groups. Concepts include professionalism, health promotion, nursing theories, quality measurement, and clinical judgment. The delivery is in person and online.
Prerequisite: Acceptance into RN to BSN Bridge Program
Corequisite: NURS 144.
Normal Grade Rules
3 units

**NURS 125. Adult Care Management II**
Focus is on concepts and care related to adult medical-surgical clients in the acute care setting. Systems approach integrates human response to alterations in physiological functioning related to disorders of the musculoskeletal, neurological, gastrointestinal, integumentary, endocrine systems and oncologic disorders.
Prerequisite: NURS 100W, NURS 126A, NURS 126B, NURS 136, NURS 146A, NURS 146B
Normal Grade Rules
4 units

**NURS 126A. Pediatric Health Theory**
Focus is on direct health care of children in various health care settings. Exploration of biopsychosocial processes involved in health, life transitions, and illness with identification of related preventative and therapeutic nursing behaviors.
Prerequisite: NURS 24, NURS 34, NURS 44, NURS 54, NURS 128.
Normal Grade Rules
2 units

**NURS 126B. Maternal / Newborn Health Theory**
Focus is on direct health care of the childbearing family in various health care settings. Exploration of biopsychosocial processes involved in health, life transitions, and illness with identification of related preventative and therapeutic nursing behaviors.
Prerequisite: NURS 24, NURS 34, NURS 44, NURS 54, NURS 128.
Normal Grade Rules
2 units

**NURS 127A. Psychiatric / Mental Health Theory**
Concepts for nursing in psychiatric-mental health settings with clients from culturally diverse backgrounds. Systems approach integrates psychiatric/mental health nursing care for individuals, families and communities with complex health problems.
Prerequisite: NURS 125, NURS 133, NURS 145.
Normal Grade Rules
2 units

**NURS 127B. Community Theory**
Utilizes a systems approach to integrate the study of community and public health nursing care for culturally diverse individuals, families, and communities with complex health problems, and promotion of health and wellness across the lifespan.
Prerequisite: NURS 125, NURS 133, NURS 145 or NURS 124, NURS 144.
Normal Grade Rules
2 units

**NURS 128. Evidence-Based Nursing Practice**
Focus is on research methodology and terminology related to nursing process and evidence based nursing practice.
Prerequisites: NURS 023, NURS 033, NURS 043, NURS 053.
Normal Grade Rules
2 units

**NURS 133. Professional Role Development IV**
Focus is on the role of the professional nurse in providing patient-centered care, applying principles of the nursing process, professional communication, evidence-based practice and quality improvement in the acute care setting.
Prerequisite: NURS 126, NURS 136, NURS 146A, NURS 146B.
Normal Grade Rules
2 units

**NURS 135. Health Issues in a Multicultural Society**
See HS 135.
Normal Grade Rules
GE: S
3 units

**NURS 136. Professional Role Development III**
Expansion of the professional role in the childbearing-childrearing setting to include further application of: evidence-based practice, therapeutic communication, developmentally appropriate teaching/learning strategies, informatics, health literacy, developmental and cultural assessment, leadership and ethical principles, grief and loss.
Prerequisite: NURS 24, NURS 34, NURS 44, NURS 54, NURS 128.
Normal Grade Rules
2 units

**NURS 137. Professional Role Development V**
Using a collaborative learning environment, students acquire professional role competencies for community health and psychiatric/mental health nursing practice.
Prerequisite: NURS 125, NURS 133, NURS 145.
Normal Grade Rules
2 units

**NURS 138. Professional Role Development VI**
Focus is on demonstration of the professional nurse role. Includes integration of theoretical concepts and clinical practice skilled know-how into the practice setting. Encompasses models and theories of nursing management and leadership, communication, economics, quality improvement, ethics, and safety. GE Area: S
Prerequisite: NURS 127A, NURS 127B, NURS 137, NURS 147A, NURS 147B or NURS 139.
Normal Grade Rules
GE: S
3 units

**NURS 138X. Professional Role Development VI**
Focus is on demonstration of the professional nurse role. Includes integration of theoretical concepts and clinical practice skilled know-how into the practice setting. Encompasses models and theories of nursing management and leadership, communication, economics, quality improvement, ethics, and safety. GE Area: S
Prerequisite: Successful completion of NURS 127A, NURS 127B, NURS 137, NURS 147A, NURS 147B or NURS 139.
Normal Grade Rules
2 units

**NURS 139. Professional Role Development for Nurses**
Students use a systems approach to acquire professional role competencies required in a variety of healthcare settings (community health, acute care) in a collaborative learning environment. Focus is on nursing management and integration of nursing role concepts into professional practice.
Prerequisites: NURS 124, NURS 144.
Corequisites: NURS 127B, NURS 147B.
Normal Grade Rules
GE: S
3 units

**NURS 144. Clinical Nursing Applications**
Implements concepts and activities using a variety of health care settings. Focus is on health promotion, chronic illness and leadership/management.
Prerequisite: California RN License.
Pre/Corequisite: NURS 124 and NURS 134.
Normal Grade Rules
2 units

**NURS 145. Adult Care Clinical Practicum II**
Focus is on applying the knowledge, skills, and attitudes required to provide safe, client-centered care to acute and chronically ill adults and older adults in a variety of settings.
Prerequisite: NURS 126A, NURS 126B, NURS 136, NURS 146A, NURS 146B.
Credit / No Credit
4 units
NURS 146A. Pediatric Clinical
Focusing on providing family-centered care to culturally diverse childbearing families and children using concepts of systems theory in acute care, home, and community settings.
Prerequisite: NURS 24, NURS 34, NURS 44, NURS 54, NURS 128.
Credit / No Credit
2 units

NURS 146B. Maternal Health Clinical
Focusing on providing family-centered care to culturally diverse childbearing families using concepts of systems theory in acute care, home, and community settings.
Prerequisite: NURS 24, NURS 34, NURS 44, NURS 54, NURS 128.
Credit / No Credit
2 units

NURS 147A. Psychiatric/Mental Health Clinical
Supervised participation in nursing and healthcare of clients with psychiatric-mental health problems in varied settings. Concepts include a systems approach to therapeutic communication and relationships, evidence-based care, symptom management, teaching/learning, leadership, and collaboration with other health care workers.
Prerequisite: NURS 125, NURS 133, NURS 145.
Credit / No Credit
2 units

NURS 147B. Community Health Clinical
Applies nursing process to care of clients from diverse populations in the community in a variety of settings. Utilizes a systems approach to promoting health and wellness for individuals and groups across the lifespan.
Prerequisite: NURS 125, NURS 133, NURS 145.
Credit / No Credit
3 units

NURS 147B. Community Health Clinical -- International Experience
Applies nursing process to care of clients from diverse populations in a variety of international settings. A systems approach to caring for individuals and groups across the lifespan with community health care needs.
Prerequisite: Completion of NURS 125, NURS 133, NURS 145.
Corequisite: NURS 127B, NURS 137
Credit / No Credit
3 units

NURS 148. Nursing Practicum V
Using a systems approach, applies professional practices in a variety of health care settings. This is a preceptored experience.
Prerequisite: Completion of Semester 7 and successful completion of NURS 101B or Licensure as a Registered Nurse.
Corequisite: NURS 128 and NURS 138.
Credit / No Credit
3 units

NURS 148A. Senior Preceptorship
Independent, preceptored experience in a clinical setting. Uses a systems approach integrating knowledge of research, leadership, pathophysiology, and nursing into practice.
Prerequisite: NURS 127A, NURS 127B, NURS 137 or NURS 139, NURS 147A, NURS 147B.
Corequisite: NURS 138
Credit / No Credit
4 units

NURS 148A. Senior Practicum -- International Experience
Uses a systems approach to research, leadership management, theory and beginning clinical proficiency, in collaboration with other health care members in an international setting.
Prerequisite: Completion of Nursing Semester 5
Co-requisite: NURS 138
Credit / No Credit
4 units

NURS 155. Skills in Nursing III
Simulation course for the practice of advanced, specialized psychomotor and cognitive skills used to provide direct care.
Prerequisite: Completion of Semester 4.
Corequisite: NURS 125, NURS 133 and NURS 145.
Credit / No Credit
4 units

NURS 156. Simulation I
Provides objective-driven learning activities using a variety of simulation modalities. Faculty-guided simulations provide opportunities for developing problem identification and clinical reasoning skills across the lifespan. Reflective thinking is incorporated into all simulated experiences.
Repeatable for credit
Normal Grade Rules
2 units

NURS 161. Leadership II
Focuses on safe practice of professional nursing. Includes interdisciplinary communication, biocultural and legal concerns, cost of care, end-of-life care, and health literacy and disparities for culturally diverse clients. Prerequisite: NURS 10.
Repeatable for credit
Normal Grade Rules
2 units

NURS 166. Simulation I
Provides objective-driven learning activities using a variety of simulation modalities. Faculty-guided simulations provide opportunities for developing problem identification and clinical reasoning skills across the lifespan. Reflective thinking is incorporated into all simulated experiences.
Repeatable for credit
Normal Grade Rules
1 unit

NURS 180. Individual Studies
Individual study or project work on a selected problem or professional issue in nursing.
Prerequisite: Arrangement must be made with a nursing faculty member and approved by the school director during the semester prior to taking course.
Repeatable for credit
Credit / No Credit
1-4 units
NURS 214. Nurse Educator Theory & Practicum I
Covers theories, models, and concepts relevant to teaching and learning in nursing education and health care settings. Experience in implementing the educator role using teaching processes and strategies for diverse students and settings. Includes 2 units theory, 2 units practicum.
Prerequisite: NURS 200 or NURS 202
Corequisite: NURS 212
Misc/Lab: Lecture 5 hours/Supervision 1.5 hours
Normal Grade Rules
4 units

NURS 216. Nurse Educator Theory and Practicum II
Continuing experience with educational theories, models, concepts, and strategies, focusing on educational research, and contemporary educational issues. Advanced experience in implementing the teaching role with increasing independence. Course includes 1 unit theory and 3 units (120 hours) of practicum.
Prerequisite: NURS 212 and NURS 214
Misc/Lab: Lecture 5 hours/Supervision 1.5 hours
Repeatable for credit
Normal Grade Rules
4 units

NURS 236A. Nursing Administration Theories, Concepts and Practicum I
Emphasis on administrative concepts necessary for management of a health care system in a diverse environment. Opportunity for experience in the nurse administrator role in a practicum.
Pre/Corequisite: NURS 200, NURS 202, NURS 204
Misc/Lab: Lecture 3 hours/Supervision 1.5 hours
Repeatable for credit
Normal Grade Rules
3 units

NURS 236B. Nursing Administration Theories, Concepts and Practicum II
Opportunity for advanced experience in the nurse administrator role. Applying conceptual models and theories for operations and personnel management, the student assumes the administrator role in a practicum with minimal supervision within a diverse health care setting.
Prerequisite: NURS 236A
Misc/Lab: Lecture 4 hours/Supervision 1.5 hours
Repeatable for credit
Normal Grade Rules
4 units

NURS 248. Advanced Health Assessment
This advanced assessment course focuses on differentiation between normal and pathologic changes experienced in a primary care practice. Using systems theory framework, students formulate appropriate diagnoses using pertinent symptomatologies and etiologies. May be repeated, but not in same semester.
Prerequisite: NURS 200, NURS 202, NURS 104 (or equivalent).
Repeatable for credit
Normal Grade Rules
3 units

NURS 250. Family Nurse Practitioner Concepts and Theory I
Theory and evidence base for primary prevention, health maintenance, health promotion, health screening, health teaching and anticipatory guidance for nurse practitioners with an emphasis on case management techniques and interdisciplinary care. Emphasis on using algorithms and standardized procedures to effect primary prevention.
Prerequisite: NURS 248, NURS 259, NURS 260
Corequisite: NURS 253
Normal Grade Rules
2 units

NURS 251. Family Nurse Practitioner (FNP) Concepts and Theory II
Prerequisite: NURS 248, 259, 250, 260
Corequisite: NURS 254
Normal Grade Rules
2 units

NURS 252. Family Nurse Practitioner Concepts and Theory II
Diagnosis and management of common illnesses in primary care practice. Research and theory used to identify strategies to promote health and prevent illness. Introduction to pharmacologic therapeutic regimens with emphasis on interdisciplinary care, secondary and tertiary prevention.
Pre/Corequisite: NURS 250 and NURS 253
Repeatable for credit
Normal Grade Rules
2 units

NURS 252A. Family Nurse Practitioner (FNP) Concepts and Theory III
Prerequisite: NURS 248, 259, 250, 251, 260
Corequisite: NURS 256
Normal Grade Rules
2 units

NURS 253. Family Nurse Practitioner Practicum I
First clinical practicum increases nurse practitioner competence in the domain of management of patient health/illness status in the areas of health promotion, health protection, disease prevention and management of patient illness; using evidence based clinical practice guidelines.
Prerequisite: NURS 259, 260, 248
Corequisite: NURS 250
Misc/Lab: Laboratory 5 hours
Repeatable for credit
Credit / No Credit
2 units

NURS 254. Family Nurse Practitioner Practicum II
Second clinical practicum increases nurse practitioner competence in the domain of management of patient health/illness status in the areas of health promotion, health protection, disease prevention and management of patient illness; using evidence based clinical practice guidelines.
Prerequisite: NURS 259, 260, 248, 250
Corequisite: NURS 251
Misc/Lab: Lecture 5 hours/Supervision 1.5 hours
Repeatable for credit
Credit / No Credit
5 units

NURS 256. Family Nurse Practitioner Practicum III
Final clinical practicum increases nurse practitioner competence in the domain of management of patient health/illness status in the areas of health promotion, health protection, disease prevention and management of complex or chronic patient illness; using evidence based clinical practice guidelines.
Prerequisite: NURS 259, 260, 248, 250, 251, 253, 254
Corequisite: NURS 252
Misc/Lab: Lecture 5 hours/Supervision 1.5 hours
Credit / No Credit
5 units
NURS 258. Professional Issues for Nurse Practitioners  
Exploration of current health care environment as it  
pertains to policy development, health planning, and  
economic management at the national, state, and local  
levels. Exploration of equitable distribution of existing  
resources, policy development, program evaluation, and  
client/population outcomes.  
Pre/Corequisite: NURS 250, NURS 252 and NURS 253.  
Repealable for credit  
Normal Grade Rules  
2 units  

NURS 259. Advanced Clinical Pharmacology  
This course is designed to prepare family nurse  
practitioners and nurse educators to accurately describe,  
administer, and counsel patients regarding appropriate  
and safe medication regimens. Basic pharmacologic  
principles and the pharmacologic actions of the major  
drug classes will be discussed in relation to physiologic  
systems, with emphasis on the application of these  
agents.  
Normal Grade Rules  
3 units  

NURS 260. Advanced Physiology and  
Pathophysiology for Advanced Practice Nursing  
Advanced physiology and compensatory mechanisms  
are examined with emphasis on system interaction,  
homeostasis, and pathophysiology. Focus for this course  
is on physiologic processes with clinical application to  
individuals across the lifespan. Course has both online  
and in-class components.  
Prerequisites: Graduate status or instructor consent.  
Repealable for credit  
Normal Grade Rules  
3 units  

NURS 295A. Research Methods  
This course provides basic principles of research. Novice  
researchers are familiarized with research methodology.  
Candidates engage in evaluating public research, and  
develop and write a feasible proposal for implementation  
as a research project.  
Prerequisite: NURS 200  
Note: This course satisfies graduate-level GWAR in this  
master’s program.  
Normal Grade Rules  
GE: GWAR  
3 units  

NURS 297. Master's Project  
Project option is an alternative to thesis option. Students  
integrate learning from graduate courses and clinical  
practice by developing a project proposal, implementing  
and reporting the project in the form of a publishable  
paper. May not be repeated in same semester.  
Prerequisite: NURS 295A and advancement to candidacy.  
Repealable for credit  
Mandatory CR/NC/RP  
1-4 units  

NURS 298. Special Studies  
For students pursuing advanced study related to  
populations-at-risk. Independent study project developed  
by student may be an individualized small research  
activity or special study topic.  
Repealable for credit  
Mandatory CR/NC/RP  
1-6 units  

NURS 299. Master's Thesis  
Research proposal developed, research completed and  
study reported in approved thesis format during three  
semesters.  
Prerequisite: Instructor consent  
Mandatory CR/NC/RP  
1-4 units  

NURS 574. The Role of Diversity and Social  
Issues in Healthcare  
Analysis of social and cultural factors affecting health  
among populations defined by age, education, gender,  
ethnicity, culture, religion, occupation, income, mental or  
physical disability and language.  
Prerequisite: Admission to the DNP program.  
Normal Grade Rules  
2 units  

NURS 575. Application of Theories in Advanced  
Nursing Practice  
Application of theories of nursing, ethics, and teaching-  
learning to advanced nursing practice and healthcare  
leadership.  
Prerequisite: Admission to the DNP program.  
Normal Grade Rules  
2 units  

NURS 576. Application of Biostatistics to  
Population  
Examination of methods to generate and analyze  
bio-statistical data to design, implement, and evaluate  
programs and policies for the healthcare of populations.  
Prerequisite: Admission to the DNP program.  
Normal Grade Rules  
3 units  

NURS 580. DNP Practicum  
Integration of clinical practice, theory, and research.  
Development of clinical expertise in management of  
health problems in selected populations.  
Credit / No Credit  
1-6 units  

NURS 583. Leadership and Professional  
Responsibility in Complex Healthcare Systems  
Analysis of nursing leadership and evidence-based  
management theories necessary for the leadership of  
complex healthcare systems. Application of concepts of  
leadership, management, planning, and evaluation of  
population based efforts to provide quality affordable  
care. Analysis of professional role and responsibilities.  
Prerequisites: NURS 574, NURS 575 and NURS 576.  
Normal Grade Rules  
2 units  

NURS 584. Technology, Informatics, and  
Data Management in the Transformation of  
Healthcare  
Overview of patient-centered technology and clinical  
information systems. Application of nursing informatics  
in healthcare systems. Use of technology in evaluation of  
clinical outcomes to improve the healthcare system and  
to evaluate the effectiveness, quality, and efficiency of  
healthcare programs.  
Prerequisites: NURS 574, NURS 575 and NURS 576.  
Normal Grade Rules  
2 units  

NURS 585. Foundations of Evidence-Based  
Practice  
Exploration of issues related to evidence-based practice.  
Development of skills needed to identify, critically  
appraise, and utilize best evidence.  
Prerequisites: NURS 574, NURS 575 and NURS 576.  
Normal Grade Rules  
3 units  

NURS 586. Transformation of Health Care  
Systems: Health Policy and Economics  
Healthcare policies and economics and the political  
forces that shape them. Role of the DNP in the analysis,  
formulation, and implementation of healthcare policies.  
Prerequisites: NURS 583, NURS 584 and NURS 585.  
Normal Grade Rules  
2 units  

NURS 587. Principles of Epidemiology  
Principles and concepts of epidemiology. Distribution  
and determinants of disease risk in populations across  
the lifespan. Approach to disease and intervention,  
identification of cause of disease, response to disease  
outbreak, disease surveillance, evaluation of screening  
and prevention, and ethical issues.  
Prerequisites: NURS 583, NURS 584 and NURS 585.  
Normal Grade Rules  
3 units  

NURS 591. Curriculum Development  
Exploration of philosophical foundations of curriculum,  
curriculum design, and the development of curriculum  
frameworks, outcomes, and competencies. Analysis of  
determinants of learning and the developmental stages  
of the learning process. Theoretical foundations of teaching-  
learning emphasizing critical thinking and active learning.  
Prerequisites: NURS 586, NURS 587.  
Normal Grade Rules  
3 units  

NURS 592. Evaluation in Nursing Education  
Focuses on assessment, measurement, and evaluation  
of learning and program outcomes in nursing. Explores  
thories of educational measurement and evaluation  
and of measures to evaluate teaching effectiveness,  
student learning, student outcomes, and student clinical  
performance.  
Prerequisites: NURS 591, NURS 593 and NURS 595.  
Normal Grade Rules  
3 units
NURS 593. Financial Aspects of Projects and Practice
Principles of health care economics, third-party reimbursement, costing, budgets and budgeting, variance, economic evaluation methods, and writing a business plan to defend or market a health care program. Management of a successful project or practice emphasizing fiscal planning and control.
Prerequisites: NURS 586, NURS 587.
Normal Grade Rules
2 units

NURS 594. Application of Evidence-Based Teaching in Nursing
Prerequisites: NURS 591, NURS 593 and NURS 595.
Misc/Lab: Lecture 2 hours/Lab 6 hours.
Normal Grade Rules
2 units

NURS 595. Translating Evidence into Reflective Practice I
Integration of clinical practice, theory, and research. Development of clinical expertise in management of health problems in selected populations. Identification and development of a project proposal for implementation. Formal defense of proposal and IRB approval. One hour clinical conference per week. (204-306 total practicum hours).
Prerequisites: NURS 586, 587.
Normal Grade Rules
4-6 units

NURS 596. Translating Evidence into Reflective Practice II
Integration of clinical practice, theory, and research. Development of clinical expertise in management of health problems in selected populations. Implementation of project proposal. One hour clinical conference per week. (204-306 total practicum hours).
Prerequisites: NURS 591, NURS 593 and NURS 595.
Normal Grade Rules
4-6 units

NURS 597. Doctoral Project
Evaluation of data and completion of doctoral project. Dissemination of results through an oral defense and manuscript submission to a peer-reviewed journal.
Prerequisites: NURS 592, NURS 594 and NURS 596.
Mandatory CR/NC/RP
2 units
### Nutrition, Food Science and Packaging Department Courses

#### NUTRITION AND FOOD SCIENCE

**LOWER DIVISION**

**NUFS 001A. Physical Science of Food**
Introductory course to the physical, chemical and sensory properties of food for students not majoring in the sciences. Basic structure, function and organization of foods, laws of thermodynamics, systems of classification, as well as the interactions of energy and matter. GE Area: B1
- Normal Grade Rules
- GE: B1
- 3 units

**NUFS 008. Nutrition for the Health Professions**
Nutrients and their functions; recommended nutrient intakes and evaluation of dietary adequacy; relationship of nutrition to optimum health and dietary changes in disease. For nutritional science, nursing and other health profession majors.
- Prerequisites: CHEM 001A or CHEM 010A (with a grade of ‘C’ or better), or instructor consent.
- Normal Grade Rules
- 3 units

**NUFS 009. Introduction to Human Nutrition**
Principles and methodology of nutritional science; standards of nutrient intake; physiological functions and chemical classification of nutrients; nutrient needs throughout the lifespan; relationship between diet and disease; scientific, social, and psychological issues. GE Area: E
- Notes: Not open to majors.
- Normal Grade Rules
- GE: EE
- 3 units

**NUFS 012. Cost Control in Hospitality**
See HSPM 012
- Normal Grade Rules
- 3 units

**NUFS 016. Science, Physiology, and Nutrition**
Introduction to life sciences, from chemistry to cellular and physiologic functions, with nutrition as an underlying theme. Interactions with environment, including effect of culture, genetics, and nutrition on susceptibility to disease. Applications of biotechnology in the life sciences. GE Area: B2
- Normal Grade Rules
- GE: B2
- 3 units

**NUFS 020. Sanitation and Environmental Issues in the Hospitality Industry**
Sanitation in food service, hotel and travel/tourism industries; study of pathogenic organisms and food handling procedures. Occupational health, safety and environmental control in the hospitality industry.
- Normal Grade Rules
- 2 units

**NUFS 021. Culinary Principles and Practice**
Introduction to principles of food and beverage production and techniques. Emphasis on quality and culinary standards.
- Misc/Lab: Lecture 2 hour/Lab 3 hours.
- Normal Grade Rules
- 3 units

**NUFS 022. Catering and Beverage Management**
Planning and executing catering and buffet functions. Evaluation of alcoholic and non-alcoholic beverages regarding purchasing, storage, preparation, merchandising and regulations.
- Prerequisite: NUFS 020 or instructor consent
- Misc/Lab: Lecture/lab 4 hours.
- Normal Grade Rules
- 2 units

**NUFS 023. Culinary Concepts**
See HSPM 023.
- Normal Grade Rules
- 3 units

**NUFS 025. Internship in Foodservice Management**
Approved professional broad-based work experience in foodservice management industry for total of 200 hours. Written report due at completion. A maximum of 2 units may be repeated.
- Prerequisite: NUFS 020 and instructor consent
- Repeattable for credit
- Credit / No Credit
- 1-2 units

**NUFS 031. Professionalism in Nutrition, Food Science and Packaging**
Professional roles, skills and opportunities in the fields of dietetics, foodservice, food science, and packaging.
- Normal Grade Rules
- 1 unit

**NUFS 100W. Writing Workshop**
See HS 100W
- Normal Grade Rules
- GE: Z
- 3 units

**NUFS 101A. Food Science**
Experimental study of food and introduction to scientific methods used in food evaluation; functions of ingredients in prepared foods.
- Prerequisite: CHEM 030B or CHEM 008. College basic food preparation course or instructor consent.
- Misc/Lab: Lecture 3 hours/Lab 3 hours
- Normal Grade Rules
- 4 units

**NUFS 101B. Computer Applications for Professionals**
Computer applications for storage, editing, communication, managing, composition and processing of information. Focus on providing information and experience in using standard software packages for word processing, data management, graphics and statistics in educational and professional applications.
- Prerequisite: Upper division standing.
- Misc/Lab: Lecture 2 hours/lab 2 hours
- Normal Grade Rules
- 3 units

**NUFS 103. Food Processing and Packaging I**
Principles and methods of food preservation/processing and packaging operations. Raw materials handling, effect of processing on nutritional value of foods, packaging and food additives. Recommended: College basic food preparation course.
- Prerequisite: CHEM 030B or CHEM 008 or instructor consent.
- Misc/Lab: Lecture/lab 5 hours.
- Normal Grade Rules
- 2 units

**NUFS 103L. Food Processing Laboratory**
Laboratory activities associated with the principles and methods of food preservation/processing and packaging operations; raw materials handling, effect of processing on nutritional value of foods, packaging and food additives.
- Pre-requisites: CHEM 030B or CHEM 008, instructor consent
- Normal Grade Rules
- 1 unit

**NUFS 104A. Cultural Aspects of Food**
Regional, ethnic and religious influences on food culture. Activity with foods of several cultures.
- Prerequisite: Upper division standing.
- Misc/Lab: Lecture/activity 4 hours.
- Normal Grade Rules
- 3 units
NUFS 105. Current Issues in Nutrition
Controversial topics, including the relation of nutrition to cancer, coronary heart disease, hypertension, diabetes, eating disorders, osteoporosis and athletic performance; recommended nutrient intakes; and other current issues. Prerequisite: NUFS 008, NUFS 009, NUFS 163 or equivalent introductory course in human nutrition.
Normal Grade Rules
3 units

NUFS 106A. Human Nutrition in the Life Span
Integrates chemical, biological and social sciences into a comprehensive concept of human nutrition. Emphasis on assessing nutrient status; planning and intervention throughout the life cycle.
Prerequisite: NuFS 008 (with a grade of ‘C’ or better) or passing grade on a challenge exam.
Corequisite: HPRF 100W, NuFS 31.
Normal Grade Rules
3 units

NUFS 106B. Research Methodology in Nutrition and Food Science
Introduction to research methodology, interpretation and data analysis with a focus on developing strong information literacy skills, as well as critical thinking, reading, and writing skills in refining scholarly writing in the style of the discipline.
Prerequisite: STAT 095 or HS 67.
Corequisite: NUFS 106A and HPRF 100W.
Normal Grade Rules
3 units

NUFS 107. Principles of Packaging
See PKG 107.
Normal Grade Rules
3 units

NUFS 108A. Nutrition and Metabolism
Chemical and physiological studies of carbohydrate, protein, lipid, vitamin and mineral metabolism. Application to the normal nutrition of human beings.
Prerequisite: NUFS 106A, BIOL 066, CHEM 132 (both with a grade of ‘C’ or better); and HPRF 100W.
Normal Grade Rules
3 units

NUFS 108L. Nutrition Laboratory
Chemical and biochemical analysis of nutrients and metabolites in body fluids for the assessment of nutritional status of humans.
Prerequisite: CHEM 132L, STAT 095 or BUS 090 or HS 167.
Corequisite: NUFS 108A.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
1 unit

NUFS 109. Advanced Nutrition
Advanced studies of vitamins and minerals. Evaluation and interpretation of nutritional research methodology and findings.
Prerequisite: NUFS 106A ; CHEM 132 (with grades of ‘C’ or better in each); HPRF 100W, and BIOL 066, BUS 090, STAT 095 or HS 167.
Normal Grade Rules
3 units

NUFS 110A. Medical Nutrition Therapy
Application of nutritional principles and dietary intake to meet the needs of various pathological conditions.
Prerequisite: NUFS 108A (with grade of ‘C’ or better).
Corequisite: NUFS 109.
Misc/Lab: Lecture/activity 4 hours.
Normal Grade Rules
3 units

NUFS 110B. Medical Nutrition Therapy
Application of nutritional principles and dietary intake to meet the needs of various pathological conditions.
Prerequisite: NUFS 110A and NUFS 109 (with a grade of C or better in each).
Misc/Lab: Lecture/activity 4 hours.
Normal Grade Rules
3 units

NUFS 111. Foodservice Production Management
Principles and procedures for menu planning, production scheduling, volume food production, operation of foodservice equipment, sanitation control and formula costing.
Prerequisite: NUFS 101A or HSPM 011; NUFS 008 or NUFS 009; or instructor consent.
Misc/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

NUFS 113. Foodservice Systems: Mgmt & Proc
Selection and purchasing in foodservice operations: food and equipment and writing food/equipment specifications. Allocation and management of resources in foodservice systems: materials (food and supplies), facilities (equipment and space), human (management and employee labor), operational (time and money).
Prerequisite: NUFS 111 or instructor consent.
Misc/Lab: Lecture/lab 5 hours.
Normal Grade Rules
3 units

NUFS 114A. Community Nutrition for Majors
Nutrition problems; public policy, advocacy and legislation; government programs; needs assessments; management of community services.
Prerequisite: NUFS 106A; senior standing and instructor consent.
Normal Grade Rules
3 units

NUFS 114B. Community Nutrition (non-majors)
Key nutrition concepts and terms; age appropriate nutritional interventions focusing on school-age children; nutrition and public policy; advocacy and legislation; government programs and provision of community nutrition services focusing on mother and children.
Repeatable for credit
Normal Grade Rules
3 units

NUFS 115. Issues in Food Toxicology
Introduction to toxicology of foods, and food-borne chemicals and organisms. Scientific basis for determining biological and environmental safety of the food supply from food development, growth and production through harvesting, processing, storage and eventual consumption. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LDLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: R
3 units

NUFS 115ITL. Issues in Food Toxicology-International Experience
Seminars on food toxicology issues. Scientific basis for determining biological and environmental safety of the food supply from farm to table. Includes a field trip to learn agricultural systems outside the U.S. and gain a global view of food safety.
Prerequisite: Completion of core GE and Writing Skill Test
Normal Grade Rules
3 units

NUFS 116. Aging and Nutrition
The aging process, physiological changes, dietary requirements, diseases, environmental factors, housing, economic status, handicaps, personal relations and current programs for the aged.
Prerequisite: One college nutrition course or instructor consent.
Normal Grade Rules
3 units

NUFS 117. Food Evaluation Techniques
Studies in food experimentation, sensory evaluation and objective methods.
Prerequisite: NUFS 008 and NUFS 101A, CHEM 030A, CHEM 030B, CHEM 001A or instructor consent.
Misc/Lab: Lecture/lab 5 hours.
Normal Grade Rules
2 units
### NUFS 118. Food Chemistry
Important classes of food constituents, their nature, occurrence, chemical and biochemical significance, and the changes they undergo during food preservation and processing.

- Prerequisite: NUFS 101A and/or NUFS 103; Chem 308 or Chem 8; or Instructor Consent
- Misc/Lab: Lecture/lab 5 hours.
- Normal Grade Rules
  - 3 units

### NUFS 122. Chemical Analysis of Food
Techniques in chemical analysis of nutrients and other components of food. Planning, conducting and evaluating a scientific experiment and presenting the data in technical written form.

- Prerequisite: NUFS 103, HPRF 100W, STAT 95 or HS 67
- Misc/Lab: Lecture/lab 7 hours.
- Normal Grade Rules
  - 3 units

### NUFS 123. Nutrition for Sport
Planning optimum diets for performance and health; metabolism and energy systems; roles of nutrients in physical performance; efficacy of ergogenic nutrition aids.

- Prerequisite: NUFS 008 or NUFS 009.
- Normal Grade Rules
  - 3 units

### NUFS 124. Disordered Eating and Nutrition Therapy
Metabolic, physiological, and psychological determinants and effects of disordered dietary behaviors. Disorders in regulation of food intake, case studies, and different intervention approaches explored. Screening and treatment of disordered eating in athletes emphasized. Opportunities provided to develop counseling strategies.

- Prerequisite: NUFS 008.
- Normal Grade Rules
  - 3 units

### NUFS 125. Child Nutrition Program Administration
Study of the components of model child nutrition programs through application of current child health and nutrition principles, education practices, marketing procedures, communication strategies, computer-based nutrient and business analysis and operations management skills.

- Prerequisite: Upper division standing.
- Notes: Offered Summer only.
- Normal Grade Rules
  - 2 units

### NUFS 134. Complementary and Alternative Health Practices
See HPRF 134

- Normal Grade Rules
  - 3 units

### NUFS 135. Health Issues in a Multicultural Society
See HS 135

- Normal Grade Rules
  - GE: 5
  - 3 units

### NUFS 139. Hunger and Environmental Nutrition
Physiology of hunger/malnutrition on human development and health; political, social, cultural and gender factors that contribute to world hunger; scientific/technological foundation to population research and food production and their effect on the environment. GE Area: R

- Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted).
- Normal Grade Rules
  - GE: R
  - 3 units

### NUFS 139ITL. Hunger and Environmental Nutrition
The physiology of hunger/malnutrition on human development and health; political, social, cultural, and gender factors that contribute to world hunger; scientific/technological foundations of population research and food production and their effect on the environment.

- Prerequisite: WST, Completion of Core GE (3 units).
- Normal Grade Rules
  - Upper Division Standing
  - 3 units

### NUFS 141A. Packaging Materials I, Paper, Metal, and Wood Based
See PKG 141A

- Normal Grade Rules
  - 3 units

### NUFS 141B. Packaging Materials II, Plastics, Composites, and Glass
See PKG 141B

- Normal Grade Rules
  - 3 units

### NUFS 144. Food Culture: Consuming Passions
Cultural aspects of food as related to regional, ethnic, and religious influences. Issue-based examination of the effects of food behavior on culture, society, health, and economics abroad. Involves an international, study abroad experience.

- Prerequisite: WST or ENGL/LLD 100A with C or better; core GE, upper division standing.
- Corequisite: 100W is strongly recommended
- Normal Grade Rules
  - GE: V
  - 3 units

### NUFS 144ITL. Food Culture: Consuming Passions: International Experience
Cultural aspects of food as related to regional, ethnic, and religious influences abroad. Issue-based examination of the effects of food behavior on culture, society, health, and economics abroad. Involves an international, study abroad experience.

- Prerequisite: WST or ENGL/LLD 100A with C or better; core GE, upper division standing.
- Corequisite: 100W is strongly recommended
- Normal Grade Rules
  - GE: V
  - 3 units

### NUFS 146. Packaging for Medical Devices and Pharmaceuticals
See PKG 146

- Normal Grade Rules
  - 3 units

### NUFS 150. Food and Nutritional Toxicology
Major classes of food toxicants, their importance, properties, detection, metabolism, control and regulation; and basic issues in food/diet safety and toxicology

- Prerequisite: NUFS 103, CHEM 030B or CHEM 008; introductory courses in nutrition and biology and instructor consent.
- Normal Grade Rules
  - 2 units

### NUFS 156. Packaging Machinery Systems
See PKG 156

- Normal Grade Rules
  - 3 units

### NUFS 158. Protective Package Design and Testing
See PKG 158

- Normal Grade Rules
  - 3 units

### NUFS 159. Packaging Material Handling and Distribution
See PKG 159

- Normal Grade Rules
  - 3 units
NUFS 163. Physical Fitness and Nutrition
Use of scientific principles, scientific investigation, and current technological advances to assess the relationship between diet, physical fitness, and disease. Examine scientific literature to evaluate the effects of nutritional intervention on exercise performance. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Notes: Not for Nutrition majors or minors. All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: R
3 units

NUFS 169. Food Packaging and Preservation
See PKG 169.
Normal Grade Rules
3 units

NUFS 170. Packaging Development and Management
See PKG 170.
Normal Grade Rules
3 units

NUFS 180. Individual Studies
Individual work for majors or minors on special topics by arrangement.
Prerequisite: NUFS 008, instructor and department chair consent during semester prior to enrollment.
Repeatable for credit
Credit / No Credit
1-6 units

NUFS 190. Nutrition Education and Counseling
EDUCATION principles and behavior change theories; counseling and communication techniques for nutritionists and dietitians working with individuals and groups.
Prerequisite: NUFS 106A or Instructor Consent
Normal Grade Rules
3 units

NUFS 192. Field Experience in Nutrition and Food Science and Packaging Technology
Practical application of academic principles in nutrition, food science, packaging, dietetics food management, nutrition education, and/or sports nutrition. Repeatable for a maximum of 6 units.
Prerequisite: Senior standing in NUFS; instructor consent by end of prior semester.
Misc/Lab: Supervision 3 to 18 hours.
Repeatable for credit
Credit / No Credit
1-6 units

NUFS 194. Entrepreneurial Nutrition
Introduction to entrepreneurial nutrition including professional roles, skills and opportunities.
Prerequisite: ENGL 001A or instructor consent.
Normal Grade Rules
1 unit

GRADUATE

NUFS 201. Colloquium in Nutrition, Food Science and Packaging
Presentation and discussion of original research or specialized studies in Nutrition, Food Science and Packaging by graduate students, faculty & guest speakers.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

NUFS 216. Seminar in Food Chemistry and Packaging
Chemical and physical properties of food constituents as they relate to food quality, functionality and the use of proper packaging techniques to preserve nutritive value.
Prerequisite: NUFS 103.
Misc/Lab: Lecture 3 hours.
Repeatable for credit
Normal Grade Rules
3 units

NUFS 217. Issues in Nutrition, Food and Packaging
Discussion and critical evaluation of advanced topics in nutritional science, food science and technology, foodservice management, and packaging.
Prerequisite: Passing score on NUFS competency exam in emphasis area.
Corequisite: HS 167 or STAT 115.
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
3 units

NUFS 219A. Advanced Nutrition and Metabolism
Advanced seminar course in human nutrition and metabolism that covers sources and interactions among dietary constituents, digestion and absorption, transport, processing storage, and catabolism and excretion as well as the regulation of metabolic homeostasis in normal healthy individuals.
Prerequisite: NUFS 108A & NUFS 109 or equivalent advance courses in Human nutrition and Metabolism, Chem 132 or equivalent, Bio 66 or equivalent, advanced course in statistics or biostatistics, or Consent of Instructor.
Repeatable for credit
Normal Grade Rules
3 units

NUFS 219B. Seminar in Advanced Topics in Human Nutrition & Dietetics
Advanced seminar on selected topics in human nutrition and dietetics such as: sources and interactions among dietary constituents, nutrition and disease, community nutrition, nutrition education, hunger and environmental nutrition, sustainability, nutrition and culture, and issues of social justice.
Prerequisite: Instructor Consent
Repeatable for credit
Normal Grade Rules
3 units

NUFS 220A. Advanced Medical Nutrition Therapy
Assessment and evaluation of nutritional status; diet planning in health and disease; counseling techniques; and medical documentation.
Prerequisite: NUFS 110A and NUFS 110B (each with a grade of “C” or better).
Normal Grade Rules
3 units

NUFS 242. Advanced Foodservice/Restaurant Management
Quantitative and qualitative analyses of foodservice/restaurant operations as bases for managerial decision-making.
Prerequisite: NUFS 113.
Misc/Lab: Lecture 3 hours.
Normal Grade Rules
3 units

NUFS 260. Multidisciplinary Health Promotion in Later Life
Multidisciplinary assessment and planning: Principles of promoting health and preventing disability in later life. Physical, psychological, social, cultural, spiritual, and environmental factors that affect length and quality of life.
Prerequisite: BIOL 066 or GER0 108 or instructor consent.
Normal Grade Rules
3 units

NUFS 270. Package Design for End Use
See PKG 270.
Normal Grade Rules
3 units

NUFS 280A. Dietetic Internship
Supervised professional field experience to fulfill ADA eligibility requirements for registered dietitian examination.
Prerequisite: DPD or instructor consent.
Notes: Course can be taken for 1, 3, 6, 9 or 12 units.
Repeatable for credit
Credit / No Credit
1-12 units
NUFS 295A. Research Methodology
Introduction to scientific methodology, and research design; including refining scholarly search strategies to build a strong scientific base for research, development of research design, data collection, analysis, interpretation and application of research in nutrition, food science and packaging.
Prerequisite: NUFS 217; Completion of upper division statistics course with a grade of ‘C or better’
Corequisite: Current or previous enrollment or 1 unit NUFS 298 or NUFS 299
Normal Grade Rules
3 units

NUFS 298. Special Studies in Nutrition, Food Science and Packaging
Advanced individual research and projects.
Prerequisite: Consent of graduate advisor.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

NUFS 299. Master’s Thesis
Prerequisite: Admission to candidacy for the master’s degree.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

UPPER DIVISION

NUFS 1290R. Culminating Experience Supervision
This course satisfies the requirement that all graduate students must remain enrolled during semesters in which they are working solely on their theses or projects, for which they have previously received but not cleared an RP grade.
Prerequisite: Existing RP grade in a graduate-level thesis or project course
Note: No Degree Credit
Repeatable for credit
No Degree Credit
1 unit

PACKAGING

UPPER DIVISION

PKG 107. Principles of Packaging
Basic knowledge of packaging functions, materials and industry: A variety of packaging topics including distribution systems, packaging development, package design, legislation, regulations, societal and environmental issues, ergonomics and packaging careers.
Prerequisite: ENGL 001A or equivalent.
Normal Grade Rules
3 units

PKG 120. Artios CAD For Packaging
Prepares students for ArtiosCAD (a packaging design tool common to the folding carton and corrugated industries). Introduces basic commands of ArtiosCAD to draw and design the representations for different products. Students use the structure database, change from 2D to 3D models, and make simple animations.
Misc/lab: 2 hours lecture/ 2 hours activity
Normal Grade Rules
3 units

PKG 121. Solidworks For Packaging
Prepares students for SolidWorks (a computer drawing tool) so they can generate 3-D drawings suitable for specifications and transference to computer-driven cutting tables and 3-D printers to make prototype packages.
Misc/lab: 2 hours lecture/ 2 hours lab
Normal Grade Rules
3 units

PKG 141A. Packaging Materials I, Paper, Metal, and Wood Based
In-depth study of selected materials to provide a working knowledge of structures, physical and chemical properties, development, evaluation and design. Experiments in applications, design limitations and cost.
Prerequisite: PKG 107 or instructor consent.
Misc/lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

PKG 141B. Packaging Materials II, Plastics, Composites, and Glass
In-depth study of plastic and glass materials in packaging: chemical and physical properties, design, manufacturing, compatibility, and evaluation. Experiments in applications, design limitations and cost.
Prerequisites: NUFS 31, PKG 107, PKG 141A or instructor consent.
Misc/lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

PKG 146. Packaging for Medical Devices and Pharmaceuticals
Chemical and physical properties of medical device and pharmaceuticals packages, fabrications techniques, package testing and evaluation methods, regulatory requirements, ergonomics and child resistant packages, tamper evidence, shelf life and aging, coding.
Prerequisite: PKG 107, PKG 141A, PKG 141B or instructor consent.
 Misc/lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

PKG 152. Globalization and the Environment
See ENVS 152.
Normal Grade Rules
GE: R
3 units

PKG 156. Packaging Machinery Systems
Evaluation of packaging machinery as a subset of a packaging production system. Component selection, design, and implementation of package filling lines in a production facility. Package design requirements for filling lines.
Prerequisite: PKG 107, PKG 141A, PKG 141B, MATH 070, MATH 071, STAT 095.
Misc/lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

PKG 158. Protective Package Design and Testing
In-depth study of protective packaging dynamics; theory and practice of shock, vibration, compression, humidity, temperature extremes. Measurement and analysis of the dist environment, product fragility, package design principles, package testing and evaluation.
Prerequisite: PKG 107, PKG 141A, PKG 141B, MATH 070, MATH 071, STAT 095.
Misc/lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

PKG 159. Packaging Material Handling and Distribution
Transportation, handling, and storage of packaged goods. Transportation modes, environment hazards, measurement techniques. Military and Hazmat packaging regulations and testing, classification of goods, legal requirements, export packaging.
Prerequisite: PKG 158 or instructor consent.
Normal Grade Rules
3 units

PKG 169. Food Packaging and Preservation
This course investigates the interaction of food processing and packaging technology. Content includes food chemistry, microbiology in foods, food processing, and finally how packaging augments these areas in food protection and preservation.
Prerequisite: PKG 107 or instructor consent.
Normal Grade Rules
3 units

PKG 170. Packaging Development and Management
Capstone course emphasizing development and evaluation of packaging systems. Specifications and design, marketing criteria, package production, distribution performance, legal and environmental evaluations.
Prerequisite: PKG 107, PKG 141A, PKG 141B, PKG 156, PKG 158 or instructor consent.
Misc/lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units
PKG 180. Individual Studies
Individual work for majors or minors on special topics by arrangement.
Prerequisite: PKG 107, instructor and department chair consent during semester prior to enrollment.
   Repeatable for credit
   Credit / No Credit
   1-6 units

GRADUATE
PKG 270. Package Design for End Use
Current Package Design and Influences on Designs
Normal Grade Rules
3 units
Occupational Therapy
Department Courses

OCCUPATIONAL THERAPY

UPPER DIVISION

OCTH 156. Independent Living for the Aging and Disabled
Identification and application of basic management concepts used by the disabled and aging in daily living.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

OCTH 180. Individual Studies
Investigation of special problems not covered in regular courses, including research project and/or field experience. Course is repeatable for credit in the same term.
Prerequisite: Upper division majors with department chair approval.
Repeatable for credit
Credit / No Credit
1-4 units

OCTH 180H. Individual Studies
Individual project or special study in an area not covered in the regular curriculum. Results presented in departmental seminar and written report. An honors course.
Prerequisite: 3.0 overall GPA, 3.5 GPA in major.
Repeatable for credit
Credit / No Credit
1-3 units

OCTH 190. Foundations of Neuroscience for Occupational Therapy
Foundations of neuroscience related to occupational performance. Topics include an overview of anatomy and physiology of the human nervous system and the interaction among the central, peripheral and autonomic nervous systems related to function.
Prerequisite: BIOL 65 or BIOL 65O, BIOL 66
Normal Grade Rules
3 units

GRADUATE

OCTH 201A. Field Work Experience
Three months in full-time field work are required.
Prerequisite: OCTH 134.
Notes: This course fulfills departmental prerequisite requirements. It does not fulfill requirements for the graduate degree program. Travel to on-site facilities is the student’s responsibility.
Repeatable for credit
Credit / No Credit
3-6 units

OCTH 201B. Advanced Field Work Experience
Three months in full-time field work are required.
Prerequisite: OCTH 201A.
Notes: This course fulfills departmental prerequisite requirements. It does not fulfill requirements for the graduate degree program. Travel to on-site facilities is the student’s responsibility.
Credit / No Credit
3-6 units

OCTH 205. Mindfulness of Self in Occupational Therapy Practice & Daily Life
Mindfulness-based exploration of self in personal and professional life. The course will focus on personal mindfulness practice informed by study of the foundations of mindfulness and interpersonal mindfulness practice which will form the basis for bringing mindfulness into occupational therapy practice.
Prerequisite: MBSR program
Normal Grade Rules
2 units

OCTH 207. Mindfulness and Quality of Participation in Daily Occupations
Explore links among quality of participation in occupations, inter-occupational relationship patterns, level of attention, intention, and attitudes we bring to occupations. Examine relationships of automatic patterns of occupational engagement on health and well-being. Implement mindfulness-based approaches affecting occupational engagement.
Prerequisite: MBSR program and OCTH 205
Normal Grade Rules
2 units

OCTH 209. MBOT Intensive Training Retreat
The intensive 5-day residential training retreat in Mindfulness-Based Occupational Therapy (MBOT) includes periods of silent mindfulness practice and time for group discussion and learning focused on further developing participants’ skills in bringing mindfulness into their occupational therapy practice.
Prerequisite: MBSR, OCTH 205
Mandatory CR/NC/RP
2 units

OCTH 210. Seminar in Occupational Therapy
Seminar on special topics in occupational therapy. Students will develop knowledge and skills in a selected practice area.
Repeatable for credit
Normal Grade Rules
2-3 units

OCTH 210ITL. Seminar in Occupational Therapy: International Experience
Gain cross-cultural and -national insight into political, social, cultural, economic factors that influence occupational therapy services outside of the U.S, define the role of occupational therapy and therapists as global citizens, engage local people in its services, explore social, occupational justice issues.
Normal Grade Rules
2-3 units

OCTH 211. Historical and Theoretical Foundations of Occupational Therapy
History of occupational therapy practice, evolution of the concepts and values underlying its theoretical constructs, and the leaders who shaped the profession. Development of ideas, values, and beliefs concerning occupation within the context of historical, social, and scientific advances.
Normal Grade Rules
3 units

OCTH 212. Occupations through the Lifespan
The development of occupations, their meaning and role in human development through the lifespan, and the conditions that create barriers to engagement in meaningful occupations. Students will analyze how interactions between self and environment influence occupational participation at all ages.
Normal Grade Rules
3 units

OCTH 213. Professional Development I
Introduces occupational therapy as a profession and addresses professional organizations, roles, attitudes, behaviors, and ethics. Explores the influence of culture on worldview, communication, and health behaviors. Students engage in personal and professional self-assessment and goal setting for professional development.
Normal Grade Rules
3 units

OCTH 216. Evaluation in Occupational Therapy
The purpose and process of evaluation in determining need for and outcomes of intervention. Application of measurement theory, theoretical perspectives and practice models for selection, administration, and interpretation of appropriate instruments, including occupational profiles, skilled observation, interviews and standardized tests.
Normal Grade Rules
3 units

OCTH 220. Education and Occupational Therapy
Study of learning theory and teaching strategies used in teaching occupational therapy and other health-related professions. Content includes learning styles, objective writing, utilization of media and evaluations.
Credit / No Credit
3 units
OCTH 221. Occupational Analysis
Course focuses on analyzing occupations and occupational performance. Meaning and significance of competence, challenge, and success in occupations are explored through engagement in selected projects. Students learn to structure, adapt, plan, teach, and assess activities for therapeutic use.
Normal Grade Rules
3 units

OCTH 222. Functional Kinesiology for Occupational Therapists
Study of body movements based on neurophysiological and biomechanical principles of joint and muscle action correlated with analysis of the body in motion, physiological effects of activity and adaptation to physical dysfunction.
Normal Grade Rules
3 units

OCTH 223. Compassionate Care for Self and Others in Occupational Therapy Practice
Students will examine the relationship of mindful self and other compassion and how both relate to health, “psychological flourishing” (Germer & Neff, 2013), reduction of symptoms, motivation, and skills that enhance occupational therapy practice and client outcomes.
Prerequisite: MBSR program, OCTH 205, OCTH 207, OCTH 209
Corequisite: personal mindfulness practice
Normal Grade Rules
2 units

OCTH 224. Occupational Therapy Practice in the Community I
Introduction to community focused interventions based on the social model of health and occupational justice concepts, designed to promote health, well-being, social inclusion, empowerment, and health disparity reduction for populations and communities. Focus is on emerging and non-traditional practice settings.
Normal Grade Rules
3 units

OCTH 225. Capstone Evidence-Based MBOT Practice Project
The emphasis of Evidence-based practice for Mindfulness-Based Intervention in OT is on strategies for selecting, evaluating and analyzing professional literature, and critical analysis on gather information in clinical decision making and crafting into a publishable quality intervention program.
Prerequisite: MBSR program, OCTH 205, OCTH 207, OCTH 209, OCTH 223
Normal Grade Rules
3 units

OCTH 226. Occupational Therapy with Children
Occupational therapy practice for children from birth to early adolescence, focusing on integrating knowledge of the theoretical frameworks, practice settings, research evidence, clinical reasoning and regulatory and reimbursement policies in the provision of interventions for conditions and disorders experienced in this age group.
Normal Grade Rules
3 units

OCTH 230. Management and Occupational Therapy
Principles of ethical administrative, supervisory, and consultative practice in occupational therapy organizational settings. Students review the profession’s ethics and learn ethical decision making. Basic grant writing skills and OT advocacy are also included.
Normal Grade Rules
3 units

OCTH 233. Professional Development II
Deeper exploration into occupational therapy leadership, supervision, ethical conduct, advocacy, program development, and management principles related to current service models. Recent legislation and its impact on occupational therapy practice will be reviewed.
Prerequisite: OCTH 213
Normal Grade Rules
3 units

OCTH 234. Occupational Therapy Practice in the Community II
Community focused seminar and practicum providing intervention in emerging and non-traditional practice settings and underserved communities. Seminars address the diverse dimensions of practice in the community related to needs assessment, the community site, program development and implementing occupational therapy services.
Normal Grade Rules
3 units

OCTH 235. Cultural Diversity in Occupational Therapy
Roles of occupational therapist treating diverse populations is examined through exploration of professional culture, the cultures of poverty and disability, and cultures identified by ethnicity or lifestyle. Cultural variables include time, space, relationships, value, beliefs, communication, socioeconomics, gender and tradition.
Repeatable for credit
Normal Grade Rules
3 units

OCTH 236. Occupational Therapy with Youth
Occupational therapy practice for adolescents and young adults, focusing on integrating knowledge of the theoretical frameworks, practice settings, research evidence, clinical reasoning and regulatory and reimbursement policies in the provision of interventions for conditions and disorders experienced in this age group.
Normal Grade Rules
3 units

OCTH 245. Introduction to Research Methods
Introduction to research methodology and the process of critical inquiry. How one conducts research, including traditions and methods used in occupational therapy and how to understand research publications.
Prerequisite: Introductory Statistics
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

OCTH 246. Occupational Therapy with Young Adults
Occupational therapy practice for young adults ages 25-40, focusing on integrating knowledge of theoretical frameworks, practice settings, research evidence, clinical reasoning and regulatory and reimbursement policies in the provision of interventions for conditions and disorders experienced in this age group.
Normal Grade Rules
3 units

OCTH 256. Occupational Therapy with Middle Aged Adults
Occupational therapy practice for adults age 41-65, focusing on integrating knowledge of theoretical frameworks, practice settings, research evidence, clinical reasoning and regulatory and reimbursement policies in the provision of interventions for conditions and disorders experienced in this age group.
Normal Grade Rules
3 units

OCTH 266. Occupational Therapy with Older Adults
Focuses on older adults whose occupational participation and wellness are affected by age associated change, illness, injury, or disability. The occupational therapy process is applied to facilitate independence, remediate dysfunction, adapt to disability, and enhance wellness and quality of life.
Normal Grade Rules
3 units

OCTH 275. Evidence Based Practice in Occupational Therapy
Evidence based practice is explored through lecture, in-class activities and data base research. Emphasis is on strategies for selecting, evaluating and analyzing professional literature in clinical decision making and exploration of quantitative and qualitative analysis to support evaluation of literature.
Prerequisite: OCTH 245
Normal Grade Rules
3 units
OCTH 276. Practicum and Seminar 1A
Introductory practicum and seminar in occupational therapy. Students will develop beginning observation, reasoning, and documentation skills through placement at practice sites, and explore the integration of evidence and theory in the practice of occupational therapy through online and on-campus seminars.
Misc/Lab: Lecture 3 hours/Lab 3 hours.
Credit / No Credit
3 units

OCTH 286. Practicum and Seminar 1B
Clinical practice in occupational therapy. Students engage in direct intervention in departmental clinics. Seminars, in-service education, direct supervision, and one to one mentoring are used to develop practice skills.
Prerequisite: OCTH 276
Misc/Lab: Lecture 4 hour/Supervision 3 hours.
Repeatable for credit
Credit / No Credit
4 units

OCTH 295. Advanced Research Methods in Occupational Therapy
Advanced topics in research methodology and critical inquiry. Instrument development, the human subjects review process, quantitative and qualitative data analysis, interpretation and reporting of results. Critical analysis and synthesis of the gathered information crafted into a publishable quality paper and oral presentation.
Prerequisite: OCTH 245 and OCTH 275
Credit / No Credit
3 units

OCTH 298. Supervised Study in Occupational Therapy
Special problems assigned for individual study in the occupational therapy Master's program.
Prerequisite: OCTH 286
Repeatable for credit
Mandatory CR/NC/RP
1-3 units
Philosophy Department Courses

PHILOSOPHY

LOWER DIVISION

PHIL 009. Mathematics and Logic for General Education
A survey of basic concepts and methods, focusing on logic, computation, sets, numbers, geometry and probability. Emphasis will be placed on using these concepts in daily life and in coping with public issues. GE Area: B4
Corequisite: PHIL 096L required as a corequisite for Math Enrollment Categories M-III and M-IV, and recommended for Enrollment Category M-II.
Normal Grade Rules
GE B4
3 units

PHIL 010. Introduction to Philosophy
Perennial problems in philosophy, such as Who am I? What can I know? How should I live? Classical philosophical statements bearing on these issues. GE Area: C2
Normal Grade Rules
GE C2
3 units

PHIL 012. Philosophy of the Person
Philosophical issues concerning the origins, development and maturation of the self. GE Area: E
Normal Grade Rules
GE EE
3 units

PHIL 057. Logic and Critical Reasoning
Basic concepts of logic; goals and standards of both deductive and inductive reasoning; techniques of argument analysis and assessment; evaluation of evidence; language and definition; fallacies. GE Area: A3
Normal Grade Rules
GE A3
3 units

PHIL 061. Moral Issues
Moral philosophy covering major ethical theories and contemporary moral issues, such as abortion, euthanasia, animal rights, capital punishment, and sexuality. GE Area: C2
Normal Grade Rules
GE C2
3 units

PHIL 066. Introduction to Aesthetics
Issues such as the nature of beauty and ugliness, definition of art, creativity, and interpretation and evaluation of art. Philosophical discussion of works of art and our responses to them. GE Area: C1
Normal Grade Rules
GE C1
3 units

PHIL 070A. Ancient Philosophy
Includes pre-Socratics, Socrates, Plato and Aristotle; Hellenistic, Roman and Medieval philosophy. GE Area: C2
Normal Grade Rules
GE C2
3 units

PHIL 070B. Modern Philosophy
Seventeenth and eighteenth century philosophers such as Bacon, Descartes, Hobbes, Spinoza, Locke, Leibniz, Berkeley, Hume and Kant. GE Area: C2
Normal Grade Rules
GE C2
3 units

PHIL 096L. Math & Logic for GE Workshop
In-depth exploration of concepts, methods, and problem-solving strategies for PHIL 009. Opportunities for additional practice, applications, and feedback.
Co-requisite: PHIL 9
Normal Grade Rules
GE
1 unit

UPPER DIVISION

PHIL 104. Asian Philosophy
Philosophical examination of Confucianism, Daoism, Buddhism and some other significant movements of thought originated in Asia. Comparison with Western philosophy. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE V
3 units

PHIL 111. Medical Ethics
Selected ethical problems in health care practices. For example, abortion, patient rights, national health care, euthanasia and genetic engineering, with emphasis on philosophical methods.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 112. American Philosophy
The eighteenth century beginnings of American philosophy, Transcendentalism, Pragmatism, classic American philosophy, including Emerson, Peirce, James, Santayana, Dewey, and recent developments.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 113. Existentialism and Phenomenology
Twentieth century philosophies of experience and human existence. Main topics include description of consciousness, personal authenticity, choice, anxiety, death of God. Philosophers range from Husserl and Heidegger to Sartre and de Beauvoir.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 109. Philosophy of Religion
Philosophical issues regarding the existence of a supreme being, evil, mysticism, miracles, reincarnation, faith, the possibility of enlightenment, and the connection between religion and morality.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 110. Science, Technology and Human Values
The aims, methods and world views of science and technology; such value issues as technological determinism, design aesthetics and moral implications of computer and other technologies. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE V
3 units
PHIL 118. Latin American Philosophy
Analysis of main themes of Latin-American, Mexican and Mexican-American thought.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 119. Africana Philosophy and Culture
Philosophical examination of the ideological roots of social movements in black diaspora cultures from Be-Bop to Hip-Hop.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 120. Comparative Philosophy Theory & Practice
Examination of how different philosophical traditions (distinguished by culture or by style) via their relevant resources can talk to and learn from each other and make substantial joint contributions to our understanding and treatment of a range of philosophical issues.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 121. Philosophy and Feminism
A philosophical examination of writings that deal with issues of special concern to women, with emphasis on feminist writings.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 122. Social Justice
Critical examination of competing conceptions of justice and their application to social issues in a pluralistic society.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 126. Environmental Ethics and Philosophy
Extensions and applications of Kantian, Lockean, consequentialist and other philosophical theories of value to problems of the environment such as pollution, global warming, species depletion and overpopulation.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 132. Ethical Theory
Theoretical problems in the understanding of right conduct, value, obligation, justice, and virtue.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 133. Ethics in Science
An examination of values and practices in the culture of science. Issues: transmission of values in scientific communities, interactions between scientific and lay communities, historical development of norms of responsible research, cultural influence on scientific values. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

PHIL 134. Computers, Ethics and Society
The nature of privacy in a technologically interconnected world; the role of computer technologies in the exercise of the human intellect and imagination with respect to freedom of expression and the social good; rights and responsibilities of intellectual property ownership. GE Area: V
Prerequisites: Completion of core GE, satisfaction of Writing Skills Test and upper division standing. For students who begin continuous enrollment at a CCC or a CSU in Fall 2005 or later, completion of, or corequisite in a 100W course is required.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

PHIL 149. Metaphysics & Epistemology
Such topics as nature of knowledge, skepticism, nature of reality, space, time, substance and causality. Course is repeatable once for credit in different area.
Prerequisite: 3 units of philosophy or upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

PHIL 155. Philosophy of Law
Theories of the nature of law, legal reasoning, and morality. Philosophical issues in criminal, civil, and constitutional law.
Prerequisite: 3 units of philosophy or upper division standing.
Normal Grade Rules
3 units

PHIL 157. Intermediate Logic & Language Analysis
Predicate logic, methods of proof and some meta theory. Additional systems of logic may be considered.
Prerequisite: PHIL 009 or instructor consent.
Normal Grade Rules
3 units
PHIL 186. Professional and Business Ethics
Interdisciplinary study of types of ethical problems which arise within the contexts of business occupations and professions. Major ethical theories, critique of economic and criminal justice. Focus is on issues of justice and equality in the U.S. Case studies. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE S
3 units

PHIL 190. Seminar in Philosophical Classics
Works of a major philosopher or philosophical tradition. Course is repeatable for up to 12 units of credit when a seminar topic is different.
Prerequisite: PHIL 70A and PHIL 70B and 6 units of upper division philosophy or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

PHIL 195. Seminar in Philosophy of Law
Critical examination of topics in legal philosophy.
Prerequisite: 3 units of Philosophy and upper division standing.
Normal Grade Rules
3 units

PHIL 199. Seminar in Epistemology and Metaphysics
Classical or contemporary problems in knowledge and reality. Course is repeatable for credit when seminar topic is different.
Prerequisite: At least one upper division course in epistemology or metaphysics, or instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE GWAR
3 units

PHIL 192. Advanced Seminar in Ethics or Aesthetics
Classic or contemporary problems in some value area such as that of moral or aesthetic value. Course is repeatable for up to 12 units of credit when seminar topic is different.
Prerequisite: At least one upper division course in ethics or value theory, or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

PHIL 193. Advanced Seminar in Logical Theory
Concepts of logic, such as truth and inference, considered on an advanced level. Course is repeatable for credit when seminar topic is different.
Prerequisite: PHIL 9, PHIL 157 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

PHIL 198. Special Studies
Prerequisite: Advisor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

PHIL 199. Master’s Thesis
Prerequisite: Advisor consent.
Repeatable for credit
Mandatory CR/NC/RP
3 units
Physics and Astronomy
Department Courses

ASTRONOMY

LOWER DIVISION

ASTR 010. Descriptive Astronomy
A generally non-mathematical examination of principles, facts and logic of astronomy, emphasizing arrangement, origin and evolution of the solar system. GE Area: B1
Normal Grade Rules
GE B1
3 units

UPPER DIVISION

ASTR 101. Modern Astronomy
A principally non-mathematical discussion of current scientific observational and theoretical understanding of the origin and evolution of stars, galaxies and the cosmos. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Normal Grade Rules
GE R
3 units

ASTR 102. Astronomy Lab
Experimental examination of specific astronomical topics: coordinate systems, constellations, etc. Astronomical applications of general physical principles: gravitational motion, stellar spectra, etc. GE Area: B3
Prerequisite: Completion of or concurrent enrollment in a college-level astronomy course.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
GE B3
1 unit

ASTR 117A. Astrophysics I
Physical and observational foundations of astronomy and astrophysics. Celestial coordinates, telescopes, astronomical observations, orbital motion, physics and chemistry of planetary systems; introduction to stellar physics. Computer models and simulations may be used.
Pre-requisites: MATH 52 and PHYS 52 with a C- or better.
Normal Grade Rules
3 units

ASTR 117B. Astrophysics II
Physics of stellar structure and evolution; observed properties of stars; physics and chemistry of the interstellar medium, galaxies and cosmology.
Prerequisite: PHYS 52 and MATH 31 with a C- or better.
College of Science or Engineering Majors only.
Normal Grade Rules
3 units

ASTR 155. Topics in Modern Astrophysics
Topics vary each semester and may include observational and/or computational techniques. Course is repeatable for a total of 9 units.
Prerequisite: ASTR 117A with a C- or better
Repeatable for credit
Normal Grade Rules
3 units

PHYSICS

LOWER DIVISION

PHYS 001. Elementary Physics
Mechanics, energy, electricity, magnetism, optics, atomic and nuclear physics, properties of matter; emphasizes practical applications of physics principles to contemporary problems. GE Area: B1
Prerequisite: The following Declared Majors are not allowed to enroll in this course: Engineering, Chemistry, Geology, Meteorology, Physics, Earth Science.
Normal Grade Rules
GE B1
3 units

PHYS 001L. Elementary Physics Lab
Selected experiments on topics covered in Phys 1. GE Area: B3
Co-requisite: PHYS 001. The following Declared Majors are not allowed to enroll in this course: Engineering, Chemistry, Geology, Meteorology, Physics, Earth Science.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
GE B3
1 unit

PHYS 001L1. Elementary Physics Lab

PHYS 002. Fundamentals of Physics
First semester of a two-semester sequence that is non-calculus based and covers the topics of mechanics, heat, and sound.
Prerequisite: Algebra
Misc/Lab: Lecture 3 hours/lab 3 hours.
Note: Year course.
Normal Grade Rules
GE B1B3
4 units

PHYS 002AW. Fundamentals of Physics
A discussion course for students concurrently registered in Physics 002A covering problem solving methods as related to topics normally covered in Physics 002A.
Corequisite: PHYS 002A
Repeatable for credit
Credit / No Credit
1 unit

PHYS 002B. Fundamentals of Physics
Electricity and magnetism, optics and atomic structure.
Prerequisite: PHYS 002A (with grade of “C-” or better).
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE B1B3
4 units

PHYS 020. Invitation to Physics and Astronomy
Introduction to the physics department, its faculty, and basic skills necessary for success as a physics major. Topics include relativity and quantum theory for beginners, careers in physics and astronomy, career pathways of BA/BS physics recipients, the role of research in undergraduate STEM education, a historical perspective on the field of physics, and physics/astronomy in the news.
Normal Grade Rules
1 unit

PHYS 023. Animation Physics
This course presents principles and concepts of physics relevant to animation and special effects. Students will demonstrate mastery of this scientific knowledge in the critical analysis of films, shows, video games, etc., and in creating their own animated shorts. GE Area: B1
Normal Grade Rules
GE B1
3 units

PHYS 040. Introduction to Computational Physics
An introduction to programming for physics majors who have no previous programming experience. Problem solving, data visualization and analysis using computational methods.
Prerequisite: PHYS 50
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

PHYS 049. Introduction to Physics
A preparatory course in physics for science and engineering majors, emphasizing significant figures, unit conversions, vectors, quantitative reasoning. Introduction to Newton’s Laws and conservation laws. The relevance of physics to science and engineering careers.
prerequisites: Math 19 or pre-calc placement test
Normal Grade Rules
3 units
PHYS 050. General Physics/Mechanics
Prerequisites: English Enrollment Group E-I or E-II, or ENGL 1AF with a grade of CR, or ENGL 1A with a grade of C- or better, 3 or better on AP Calc Test or ’C’ or better in Math 30 or 30P or 30PL. College of Science or Engineering.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE: B1B3
4 units

PHYS 050W. General Physics/Mechanics Workshop
A discussion course for students concurrently registered in PHYS 050 General Physics/Mechanics covering problem solving methods as related to topics normally covered in PHYS 050.
Corequisites: PHYS 050
Repeatable for credit
Credit / No Credit
1 unit

PHYS 051. General Physics/Electricity and Magnetism
A calculus-based introduction to electricity and magnetism, covering electric charges, electric and magnetic fields, dc and ac circuits, and electromagnetic waves. Intensive Science Package GE: B1 and B3.
Prerequisite: PHYS 050, MATH 031 both with grades of “C” or better. College of Science or Engineering Majors Only.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE: B1B3
4 units

PHYS 052. General Physics/Waves, Light, Heat
Prerequisite: PHYS 51 and Math 31 both with grade of “C” or better. College of Science or Engineering Majors only.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE: B1B3
4 units

PHYS 055. Advanced Mechanics I
Prerequisite: PHYS 52, MATH 133A each with grade of “C” or better.
Note: Year course.
Normal Grade Rules
4 units

PHYS 056. Advanced Mechanics II
Dynamics of systems of particles: collisions, rigid body rotations, non-inertial frames, coupled oscillations, waves. This course is strongly recommended for students who are considering graduate study in physics.
Prerequisite: PHYS 05A with grade “C-” or better.
Normal Grade Rules
3 units

PHYS 100W. Methods of research and communication in physics
Develop communication skills for physics, including proposals, posters, research reports and oral presentations. Research strategies and methodologies for effective communication to general and specialized audiences. GE Area: Z.
Prerequisites: C- or better in GE Area A3, Completion of core GE, satisfaction of Writing Skills Test, or completion of LLD 100A with C- or better; and upper division standing.
Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).
Normal Grade Rules
GE: Z
3 units

PHYS 156. General Physics/Electricity and Magnetism II
Theories of electrostatics, magnetostatics, electrodynamics and electromagnetic waves.
Prerequisite: PHYS 110A
Normal Grade Rules
3 units

PHYS 120A. Electronics, Data Acquisition & Analysis
The characteristics of basic analog and digital electronic circuits used in a scientific laboratory. Topics include transistors, operational amplifiers, digital electronic circuits, and computer data acquisition.
Prerequisite: PHYS 51 with “C” or better. Physics Majors Only.
Misc/Lab: Seminar 2 hours/lab 3 hours.
Normal Grade Rules
3 units

PHYS 120B. Modern and Solid State Physics Lab
Experimental methods of modern physics and solid state physics, including semiconductors, superconducting, quantum interference, Faraday effect, magnetic resonance and electron spin resonance.
Prerequisite: PHYS 122 and PHYS 120A both with C- or better. Physics Majors only.
Misc/Lab: Seminar 1 hour/lab 6 hours.
Normal Grade Rules
3 units

PHYS 120C. Advanced Physics Lab: Optics and Lasers
Design of optical systems involving lasers and other common optical components. Use of optical systems to explore interference, holography, and other optical phenomena.
Pre-requisite: PHYS 120A and PHYS 158 all with grade of “C-” or better.
Misc/Lab: Lecture 1 hour/lab 6 hours.
Normal Grade Rules
3 units

PHYS 121S. Radiation Safety
See NUCS 121S.
Normal Grade Rules
1-2 units

PHYS 122. Modern Physics
Survey of modern physics for science majors, covering special relativity, pre-quantum theory, basic quantum mechanics, atomic and molecular physics, solid state physics, nuclear and particle physics, and cosmology. Historical foundations of these topics will also be presented.
Prerequisite: CHEM 001A, MATH 032, and PHYS 052 all with a C- or better.
Normal Grade Rules
4 units

PHYS 126. Introduction to Nuclear Science
See CHEM 126.
Normal Grade Rules
3 units
PHYS 127. Nuclear Science Lab
See CHEM 127.

ABC/No Credit

3 units

PHYS 130. Mathematical Methods in Physics
Mathematical methodologies commonly used in physics, including linear algebra, vector calculus, partial differential equations and complex variables, and their applications to classical mechanics, electricity and magnetism, and quantum mechanics.
Prerequisite: MATH 32 and PHYS 52
Normal Grade Rules
4 units

PHYS 140. Computational Methods in Physics
An introduction to the programming of algorithms and numerical techniques pertinent to physical systems.
Prerequisite: PHYS 40 or previous programming experience; PHYS 52 with a C- or better. Physics Majors Only.
Misc/Lab: Seminar 2 hours/lab 3 hours.
Normal Grade Rules
3 units

PHYS 158. Modern Optics
Thin and thick lens systems. Double and multiple beam interference, holography, Fraunhofer and Fresnel diffraction, Fourier optics, spatial filtering, polarization and birefringence.
Prerequisite: PHYS 52 with a C- or better; MATH 32.
Normal Grade Rules
3 units

PHYS 160. Thermodynamics and Statistical Physics
The laws of thermodynamics and kinetic theory with introduction to statistical mechanics.
Prerequisite: CHEM 001A and PHYS 52 both with a C- or better; MATH 32.
Normal Grade Rules
3 units

PHYS 163. Quantum Mechanics
General principles of quantum theories. Wave functions, operator algebra and approximation methods. Applications to atomic structure and solid state physics.
Prerequisites: PHYS 122, MATH 133A, PHYS 130 with a C- or better.
Normal Grade Rules
3 units

PHYS 166. Physics of Music
Physical, mathematical and perceptual foundations of music. Includes musical instruments, hearing, harmony, room acoustics, sound analysis, synthesis and reproduction. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: R
3 units

PHYS 168. Lasers
Prerequisite: PHYS 122 and PHYS 158 with a C- or better.
Corequisite: PHYS 110B.
Normal Grade Rules
3 units

PHYS 175A. Solid State Physics
A detailed treatment of the physics of solids using quantum mechanics, crystallography, electromagnetism, and metallurgy.
Pre-requisites: PHYS 122 with grade of "C-" or better.
Normal Grade Rules
3 units

PHYS 180. Individual Studies
Advanced work in special fields.
Prerequisite: Physics major or minor. Not available to Open University Students.
Notes: Maximum 4 units of 180/184 may be applied toward graduation.
Repeatable for credit
Credit / No Credit
1-4 units

PHYS 184. Directed Reading
Assigned readings of selected books, journals and special papers to fill gaps in training or for contact with new fields. Weekly reports and conferences.
Notes: Maximum 4 units of 180/184 may be applied toward graduation.
Prerequisites: Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-3 units

PHYS 185. Electromagnetic Theory
Topics in electrostatics and magnetostatics; Maxwell equations; solutions of boundary-value problems using methods of images and Green’s function; boundary-value problems in magnetostatics; electromagnetic plane waves and wave propagation in a dielectric media; Fresnel Equations.
Prerequisite: PHYS 230.
Normal Grade Rules
3 units

PHYS 196B. Physics Education: Theory and Practice
Instructional Student Assistants and Teaching Associates integrate educational theory, pedagogy, content, and practice by focusing on practical concerns and associated theoretical models. Weekly readings, in-class discussions, out-of-class data collection, reflections, projects, and presentations based on classroom teaching experience.
Prerequisite: PHYS 50, PHYS 2A, or equivalent
Normal Grade Rules
3 units

PHYS 205. Advanced Dynamics
Generalized methods and selected topics in classical mechanics.
Prerequisite: PHYS 105B, MATH 112 and MATH 133B.
Normal Grade Rules
3 units

PHYS 208. Introduction to Electro-Optics
This course introduces the physical principles of electro-optics including modulators (electro- and acousto-optic), non-linear optics, semiconductor lasers, optical detection and integrated optics with applications.
Prerequisite: PHYS 158
Normal Grade Rules
3 units

PHYS 210. Electromagnetic Theory
Topics in electrostatics and magnetostatics; Maxwell equations; solutions of boundary-value problems using methods of images and Green’s function; boundary-value problems in magnetostatics; electromagnetic plane waves and wave propagation in a dielectric media; Fresnel Equations.
Prerequisite: PHYS 230.
Normal Grade Rules
3 units

PHYS 220E. Modern Optics Lab
This course covers the application of Lasers and Optics with emphasis on topics such as Gaussian beams, Fabry-Perot cavities, Laser oscillators including CW and pulsed operation, non-linear optics, frequency stabilization and Fourier Optics.
Prerequisites: PHYS 120C, PHYS 258
Misc/Lab: Lecture 2 hour/Lab 3 hours
Normal Grade Rules
2 units

PHYS 230. Methods in Mathematical Physics
Partial differential equations and special functions: Bessel functions, Legendre polynomials, spherical harmonics, Green’s functions, complex variables and contour integrations; matrices and eigenvalue problems; Fourier and Laplace transforms.
Prerequisite: PHYS 105B, PHYS 110B, PHYS 160, PHYS 163, MATH 133B.
Normal Grade Rules
3 units
PHYS 240. Computational Physics
Numerical techniques and computational methods applied to solving problems from various branches of physics.
Prerequisite: PHYS 105B, PHYS 110B, PHYS 163 and a programming language.
Normal Grade Rules
3 units

PHYS 255. Advanced Physics
Selected topics in physics. Topics vary each semester. Course is repeatable when content changes.
Prerequisite: Suitable upper division background in physics and mathematics.
Repeatable for credit
Normal Grade Rules
3 units

PHYS 255C. Celestial Mechanics
Basic concepts in celestial mechanics emphasizing orbital mechanics and the calculation of orbital perturbation. Topics covered include dynamical principles, potential theory, planetary equations, the disturbing function, Lagrange’s perturbation equations and geopotential perturbations.
Prerequisite: Senior or graduate standing.
Normal Grade Rules
3 units

PHYS 258. Optics
Fourier optics, diffraction theory, imaging and image enhancement, holography and information processing.
Prerequisite: PHYS 158 and MATH 133A.
Normal Grade Rules
3 units

PHYS 260. Statistical Mechanics
Prerequisite: PHYS 160 and PHYS 163.
Normal Grade Rules
3 units

PHYS 263A. Quantum Theory
Prerequisite: PHYS 163, PHYS 230.
Normal Grade Rules
3 units

PHYS 268. Laser Spectroscopy
Importance of spectroscopy. Interaction of radiation with matter. Instrumentation for laser spectroscopy. Examples of various techniques, cw and pulsed.
Prerequisite: PHYS 110B, PHYS 158 or instructor consent.
Normal Grade Rules
3 units

PHYS 275. Solid State Physics
Properties of crystals; electric, magnetic and thermal properties of solids.
Prerequisite: PHYS 175A and PHYS 263A or instructor consent.
Normal Grade Rules
3 units

PHYS 277. Superconductivity and Magnetism in Solids
Prerequisite: PHYS 175A, PHYS 275 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

PHYS 285. Seminar
Meetings for the presentation and discussion of advanced studies in special fields including work by the faculty, guest investigators and graduate students. Topics will vary each semester.
Credit / No Credit
1 unit

PHYS 298. Research
Advanced individual work in physics.
Prerequisite: Instructor consent. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

PHYS 299. Master’s Thesis
Prerequisite: Admission to candidacy for the master’s degree. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

UPPER DIVISION

PHYS 1290R. Culminating Experience Supervision
Continued work on thesis or project.
Prerequisite: Outstanding RP grade in a preceding semester in Chem 299, Master’s Thesis
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit
### Political Science Department Courses

#### LOWER DIVISION

**POL 001. American Government**  
Notes: Satisfies American Institutions requirements in American and California government  
Normal Grade Rules  
GE: US2 3 units

**POL 002. Introduction to Comparative Politics**  
Comparative analysis of different kinds of political systems; their political institutions, processes and policies, the environments in which they occur and their consequences. GE Area: D2  
Normal Grade Rules  
GE: D2 3 units

**POL 003. Introduction to Political Thought**  
Thinking critically about the classic problems of politics; learning how to interpret, discuss and write about historical and contemporary political thought. GE Area: C2  
Normal Grade Rules  
GE: C2 3 units

**POL 004. Introduction to International Relations**  
Introductory survey of major topics in international relations, including global, national and individual causes of war and peace, international cooperation, north-south relations and political economy. GE Area: D3  
Normal Grade Rules  
GE: D3 3 units

**POL 015. Essentials of U.S. & California Government**  
Normal Grade Rules  
GE: M12 3 units

#### UPPER DIVISION

**POL 100M. Political Inquiry**  
Introduction to the scope and methods of political science. Beginning with research design, measurement, and ethical considerations, and including a variety of research methods including surveys, experiments, interviews, fieldwork, content analysis, and an introduction to quantitative and qualitative analysis. Notes: Should be taken junior year.  
Normal Grade Rules 4 units

**POL 100W. Writing Workshop**  
Writing skills for majors in political science. Basic materials; research, memos and research reports, press releases, analyses of political/Velectedor behavior, political speeches. GE Area: Z  
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. Note: All SJ State Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR). Should be taken junior year.  
Normal Grade Rules 4 units

**POL 101. American Government for Teachers**  
Introduction to the institutions and processes of American and California governments with emphasis on meeting CCTC Teacher Preparation Standards. Topics include U.S. Constitution, federalism, political participation, civil rights and liberties, Congress, the presidency.  
Normal Grade Rules 3 units

**POL 020. Controversial Legal Issues**  
Basic concepts in critical thinking as demonstrated in legal reasoning and analysis of contemporary legal issues possibly including abortion, drug testing, offensive speech, affirmative action, gender and sexual preference discrimination, school prayer and pornography. GE Area: A3  
Prerequisite: GE Areas A1 (Oral Communication) and A2 (Written Communication I) with grades of C- or better.  
Normal Grade Rules  
GE: A3 3 units

**POL 102. State Government and Politics**  
This course examines the politics and institutions of U.S. state governments. The structure and powers of state legislatures, governors, and court systems are analyzed. The effect of states’ racial, ideological, and economic characteristics on public policy is also explored. American Institutions Requirement: US3  
Notes: Satisfies American Institutions requirement in California government  
Normal Grade Rules  
GE: US3 4 units

**POL 103. Local Government and Politics**  
Offers a theoretical and practical study of local politics and government. The structure, role, and functions of city and county governments are examined. Students gain knowledge of the resources and skills required for effective citizenship in their communities.  
Normal Grade Rules 4 units

**POL 105. Congress**  
Examines politics and policymaking in the U.S. Congress. Topics include party leadership, interest groups in Congress, congressional committees, political representation, redistricting and congressional elections, party polarization, and the process of how a bill becomes law.  
Normal Grade Rules 4 units

**POL 106. The United States Presidency**  
Examination of the American presidency. Topics include the historical emergence of the presidency as an institution, the formal and informal powers of the modern presidency, and the tension between the presidency and other federal institutions, most notably Congress.  
Normal Grade Rules 4 units

**POL 107. Politics and Public Opinion**  
Examines the measurement and impact of public opinion on the democratic political process. The effects of socialization, media, and ideology on public opinion are explored, as well as the state of American public opinion on current political issues.  
Normal Grade Rules 4 units

**POL 108. Political Participation**  
Explores various forms of political participation including voting, community engagement, and social change. Includes consideration of the roles that socialization, media, campaign and elections, and other social and technological factors play in shaping citizen participation.  
Normal Grade Rules 4 units
POLS 109. Women and Politics
Examines social movement strategies and theories of gender and power employed by differently situated women. Includes critical examination of the relationship between sex and gender, and intersections of race, class, gender, law and nation.
Normal Grade Rules
4 units

POLS 110. Race and Politics
Examines race and politics in America by focusing on political participation and social movement strategies among minority groups. Explores theories of equality, diversity, and justice, and the changing legal relationship between states and citizens.
Normal Grade Rules
4 units

POLS 114. Introduction to Public Administration
A broad overview of the theory and practice of public policy analysis and management in the modern context. Topics include aspects of organizational theory, leadership, budgeting, finance, personnel management, problem formulation, analysis and decision making in a political environment.
Normal Grade Rules
3 units

POLS 120. Law and Society
Social and philosophical foundations of law and legal systems and development of legal institutions in various cultures. Anglo-American law and administration of justice in the U.S. emphasized. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LDL 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing. Prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE S
3 units

POLS 121A. Constitutional Law: Institutional Powers
Examines the U.S. Supreme Court, its processes, and the role it plays in the American governing system. Examination of judicial policy making through cases on judicial review, separations of powers, federalism, commerce, and tax and treaty powers.
Normal Grade Rules
4 units

POLS 121B. Constitutional Law: Civil Liberties
Explores the constitutional basis for civil liberties in America. Application of methods of constitutional analysis to cases involving freedom of speech, religion, and the press. Examination of personal privacy rights including abortion, gun rights, and criminal procedures.
Normal Grade Rules
4 units

POLS 121C. Constitutional Law: Civil Rights
Examines the constitutional basis for civil rights in America. Application of methods of constitutional analysis to cases involving discrimination, equal protection, and due process. Examination of leading cases related to voting rights, affirmative action, criminal justice, and other issues.
Normal Grade Rules
4 units

POLS 122. Judicial Politics
Examines the effects of political forces on judicial behavior. Includes consideration of the roles of interest groups, public opinion, methods of selecting judges, and the importance of judges' personal political beliefs, on judicial decisions.
Normal Grade Rules
4 units

POLS 124. Introduction to Environmental Law
See ENVS 124.
Normal Grade Rules
4 units

POLS 130. American Public Policy
Introduces students to the public policy making process in the American governing system. The politics of agenda setting, policy formulation, and policy implementation are examined. Students learn to analyze and evaluate public policy outcomes.
Normal Grade Rules
4 units

POLS 135. U.S. Environmental Policy
Inquiry focuses on state of the environment, public attitudes toward the problem, interest groups involved in formulation of policy, the response of government leaders to the problem and what the future outlook is for addressing the agenda.
Normal Grade Rules
3 units

POLS 142. African Politics
Basic concepts, theoretical perspectives, and information to understand the evolution of contemporary African states. Begins with a study of colonialism, and proceeds to nationalism, personalistic and military rule, development, democratization, and inter-state and civil war.
Normal Grade Rules
4 units

POLS 144. Middle Eastern Politics
Study of unfolding events in the Middle East. Themes include: the failure of democratic movements, nuclear proliferation and terrorism, US foreign policy towards the region, the Israel-Palestine conflict, urbanization, gender and human rights.
Normal Grade Rules
4 units

POLS 145. Asian Politics
Study of unfolding events in Asia. Themes include: the Asian economic ‘miracle,’ the implications of China’s rise for international security, nuclear proliferation and terrorism, and sustainability, specifically, energy, environment and human rights.
Normal Grade Rules
4 units

POLS 146. Latin American Politics
Survey of the political systems of Latin American countries. Places Latin American countries in a global perspective. Major themes include: civil-military relations, democratization, economic development, social movements, and foreign relations both within and outside Latin America.
Normal Grade Rules
4 units

POLS 147. Globalization
Considers the impact of economic and political globalization, focusing primarily on nations in Latin America, Asia and Africa. Issues include the effects of multinational production, migration, aid, international institutions and humanitarian intervention.
Normal Grade Rules
4 units

POLS 148. Nationalism and Comparative Political Cultures
Comparative analysis of the origin, nature, and impact of nationalism on the politics of Western and non-Western states. Students examine cases where nationalism resulted in conflict, and those in which it supports a stable nation-state. Completion of POLS 2, POLS 3 and POLS 4 highly recommended before enrolling.
Normal Grade Rules
4 units

POLS 149. Comparative Public Policy and Administration
Ideologies, institutions and public policy making in a comparative context. Policy making process in various countries, from emerging issues to choices to implementation and subsequent impact on political systems.
Normal Grade Rules
4 units
### POLS 150. War and Peace
Fundamental human questions about causes of war, definitions of peace and approaches toward achieving peace from perspectives of historical and contemporary thinkers, including philosophers, political leaders, military strategists and diplomats. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended. Not counted as a core course in the international relations subfield.
Normal Grade Rules
GE V
3 units

### POLS 152A. International Organizations and NGOs
Examines the structures and functions of different types of international organizations (such as the UN, NATO, regional organizations, and non-governmental organizations), and their role in maintaining international peace and security, promoting human rights and economic development, and protecting the environment.
Normal Grade Rules
4 units

### POLS 152B. Model United Nations
Structure and operations of the United Nations explored and analyzed through participation in annual U.N. simulation. Prerequisite: POLS 152A
Repealable for credit
Credit / No Credit
4 units

### POLS 153. European Union
Surveys and analyzes the historical evolution, the institutions, as well as the process of policy making in the European Union. Examines key policy areas: agricultural, social, economic, environmental, and foreign policy.
Normal Grade Rules
4 units

### POLS 154. U.S. Foreign Policy: Formulation and Administration
Consideration of the factors that shape American foreign policy making, including ideology, organization, as well as partisanship, interest groups, and public opinion. Issues considered include relations with the Middle East and Russia, and economic diplomacy.
Normal Grade Rules
4 units

### POLS 155. The Wealth of Nations
This course examines how states, international and multinational bodies, and global social movements shape trade, financial, and labor relations. Topics include: international trade and protectionism, the International Monetary Fund and the World Bank, regional integration, and transnational corporations.
Normal Grade Rules
4 units

### POLS 156. Islam, Politics and the West
See RELS 156
- Normal Grade Rules
- 3 units

### POLS 157. International Security
Examines theories of international security, debates over sources, conduct and termination of conflict, including but not limited to inter-state war; security decision-making; military and economic strategy; crisis management; regional security; intelligence; new and complex security issues along the war-peace continuum.
Normal Grade Rules
4 units

### POLS 160A. Classical Political Thought
Critical examination of the foundations of Western political thought and the continuing influence of these foundations; sources chosen from among a variety of pre-Renaissance traditions and include writers such as Plato, Aristotle, Augustine and Aquinas.
Normal Grade Rules
3 units

### POLS 160B. Modern Political Thought
The basis of the modern state and society as interpreted by political thought between (and including) the Renaissance and the French Revolution; this key period includes writers such as Machiavelli, Hobbes, Locke and Rousseau.
Normal Grade Rules
3 units

### POLS 160C. Recent Political Thought
The roots of today’s politics in the ideas and writers of the nineteenth and twentieth centuries; sources drawn from a variety of recent traditions such as democratic theory, Marxism, political psychology and political sociology.
Normal Grade Rules
3 units

### POLS 163. American Political Thought
Critical examination of the origins and development of American politics as seen through theorists, concepts and forces which have shaped American political consciousness.
Normal Grade Rules
3 units

### POLS 170V. American Politics in Global Perspective
A survey of U.S. and California political institutions and culture in comparison with political institutions and cultures outside the U.S. GE Area: V, as well as American Institutions Requirement: US2 and US3
Prerequisites: Completion of Core GE, satisfaction of writing skills test and upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
- GE USV
- 3 units

### POLS 177. Political Psychology
Introduction to the interdisciplinary field of political psychology, with a focus on topics including personality and leadership, political cognition, social identity, emotions and attitudes, voting and political behavior, racism and ethnocentrism, ethnic conflict and genocide, nationalism, terrorism, and conflict resolution.
Prerequisite: POLS 001 (or other US2-3), PSYC 001, or instructor consent
Normal Grade Rules
4 units

### POLS 180. Individual Studies
Individual study for advanced work in areas where no courses are offered.
Prerequisite: Appropriate courses, instructor consent and department chair consent.
Repeatable for credit
Credit / No Credit
1-4 units

### POLS 181. Internships
Offers students the opportunity to connect knowledge of politics, government, and policy making learned in the classroom to real life application through internships with elected officials, non-profit organizations, government agencies, or political campaigns.
Prerequisite: POLS 100W and instructor consent.
Credit / No Credit
4 units

### POLS 184. Directed Reading
Program of reading and writing created through student/ faculty consultation in areas not covered by other courses. Course is not repeatable for credit.
Prerequisite: Appropriate courses, instructor consent and department chair consent.
Normal Grade Rules
1-4 units

### POLS 190. Senior Seminar
Capstone course that serves as culminating experience for the political science major. Seminar class with significant participation required. Specific course topics vary each semester.
Prerequisite: POLS 100W or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units

### POLS 190H. Honors Thesis
Preparation and writing of an original project.
Prerequisite: Senior standing, 3.2 GPA and instructor consent.
Normal Grade Rules
1 unit
POLS 195. Applied Research Methods
Applied research methods in the social sciences, with a focus on quantitative analysis. Students will develop an understanding of survey methods, descriptive statistics and statistical inference, and learn to investigate relationships between two or more variables. Prerequisite: POLS 100M or instructor permission.
Normal Grade Rules
4 units

POLS 199. Current Political Issues
Major political issues of the day. Topics vary each semester. Course is repeatable for credit with instructor consent.
Repeatable for credit
Normal Grade Rules
1-3 units

PUBLIC ADMINISTRATION

GRADUATE

PADM 202. Regional Governance
An exploration of current theories, practices, issues and problems in the governance of urban regions in the United States.
Prerequisite: POLS 001, PADM 210.
Normal Grade Rules
3 units

PADM 210. Introduction to Public Administration
A broad overview of public administration, including policy analysis, budgeting, personnel, organization, leadership, decision-making and ethics in a political environment. Examination of the theory and application of public management practices at all levels of government.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

PADM 212. Administrative Research Methods
The study and application of principles and methods of social science research and evaluation in a public administration context. Emphasis on learning research designs and using statistics and computers.
Prerequisite: Statistics.
Normal Grade Rules
3 units

PADM 213. Policy Analysis and Evaluation
An examination of the application of analytical and administrative tools to solving public problems. Study of the processes of policy formulation and the research and political tools necessary to assess program effectiveness.
Prerequisite: Statistics.
Normal Grade Rules
3 units

PADM 214. Introduction to Public Management
A study of current principles and practices of effectively managing public service organizations. Emphasis on critical thinking, project management, and implementation processes.
Prerequisite: Statistics.
Normal Grade Rules
3 units

PADM 215. Public Personnel Administration
An overview of personnel management in a political environment and its role in maintaining a democratic society. Methods and problems of job analysis, compensation, staffing, EEO, evaluation, training and union relations.
Prerequisite: PADM 210.
Normal Grade Rules
3 units

PADM 217. Organizational Theory
Analysis and application of theories about organizations, including organizational goals, structures, authority, leadership, decision patterns and communications. Emphasis on methods of change and differences between the public and private sectors.
Prerequisite: PADM 210.
Normal Grade Rules
3 units

PADM 218. Public Budgeting
A study of current theory, techniques and practice of public budgeting for political decision-making, planning and management. Focus on executive and legislative budget processes, reform efforts, public choice analysis, financial processes and the role of accounting.
Prerequisite: PADM 210; ECON 1A (or equivalent).
Normal Grade Rules
3 units

PADM 219. Public Financial Administration
An overview of public financial administration, including microeconomic concepts and techniques, tax theory and policy, user charges, inter-governmental transfers, debt administration and risk management in a political environment.
Prerequisite: PADM 218.
Normal Grade Rules
3 units

PADM 220. Non-Profit Management
Focuses primarily on internal nonprofit management issues in the U.S. context; course exposes students to core and emerging theories for a range of topics related to nonprofit management, including leadership, governance, accountability, performance management, resource development and financial management.
Prerequisite: PADM 210, PADM 218.
Normal Grade Rules
3 units

PADM 223. Law and Public Administration
An overview of legal and political processes affecting relationships among the public, government institutions, administrative agencies and the courts. Focus on major cases related to administrative agency use of rules and orders to implement public policy.
Prerequisite: POLS 001 and PADM 210.
Normal Grade Rules
3 units

PADM 228. Urban Community Development
See URBP 228.
Normal Grade Rules
4 units

PADM 240. Environmental Planning
See URBP 240.
Normal Grade Rules
4 units

PADM 281. Public Administration Internship
Supervised practical experience in public administration. Focus on integrating student work experiences with the academic program by means of seminars and consultation.
Prerequisite: Instructor consent.
Credit / No Credit
3 units

PADM 284. Directed Reading
Program of reading and writing created through student/faculty consultation in areas not covered by other courses. Repeatable for credit for a maximum of 6 units.
Prerequisite: Appropriate courses, instructor consent and department chair consent.
Repeatable for credit
Normal Grade Rules
1-3 units

PADM 295. Topics in Public Administration
An exploration of current theories, problems and techniques in a selected major topic of current importance in public administration.
Repeatable for credit
Normal Grade Rules
3 units

PADM 297. Advanced Seminar in Public Management
This course serves as the “capstone” of the MPA program. It uses an analysis of real world cases to relate principles and theories of public administration to concrete, real world problems. The individual subject papers dealing with the main class topic that earn a grade of A- or better will be published as an electronic journal. The culminating project for this class is the approved prospectus for the PADM 298 project.
Prerequisite: Classified standing.
Normal Grade Rules
3 units
PADM 298. Special Problems
Advanced individual research and projects.
Prerequisite: PADM 210, 212, 213, 214 and 218; instructor consent; consent of the chair.
Mandatory CR/NC/RP
3 units

PADM 299. Master's Thesis
Independent research conducted under the supervision of a permanent faculty member and two other qualified persons. Emphasis on applying administrative concepts and analytical skills to actual problems of policy and administration in the public sector.
Note: Repeatable once for credit.
Repeatable for credit
Mandatory CR/NC/RP
3 units

UPPER DIVISION
PADM 1290R. Culminating Experience Supervision
Continued work on thesis or project.
Prerequisite: Outstanding RP grade in a preceding semester in a project class
Note: No Degree Credit
Repeatable for credit
No Degree Credit
1 unit
PSYCHOLOGY

LOWER DIVISION

PSYC 001. Introduction to Psychology
Psychology is the scientific study of behavior and mental processes. The content focuses on the exploration of major psychological theories and concepts, methods, and research findings in psychology. Topics include the biological bases of behavior, perception, cognition and consciousness, learning, memory, emotion, motivation, development, personality, social psychology, psychological disorders and therapeutic approaches to treatment, and applied psychology. GE Area: D1
Normal Grade Rules
GE D1
3 units

PSYC 002Q. Identity Development and Prejudice
This seminar is designed to facilitate the transition to the university smoothly with a view to an increased understanding of one’s cultural identity, and exploring mechanisms and consequences of prejudice and discrimination in American cultural groups. GE Area: E
Prerequisite: First term freshmen only.
Note: All courses with a ‘Q’ suffix are designated as First Year Experience courses.
Normal Grade Rules
GE EE
3 units

PSYC 018. Introduction to Research Methods
Psychological research methods and design (experimental, quasi-experimental [correlational], and descriptive investigations) covering observation, instrumentation, and the collection, analysis, interpretation, and reporting of research data as illustrated through a review of original research in a variety of the subdisciplines of psychology. Prerequisite: PSYC 001, and STAT 95.
Normal Grade Rules
3 units

PSYC 030. Introductory Psychobiology
Biological approaches to understanding behavior: evolutionary, genetic, neural and hormonal influences on normal and abnormal behavior. Prerequisite: BIOL 021 or BIOL 065.
Normal Grade Rules
3 units

PSYC 082. Foundations of Developmental Psychology
Psychological development of children from conception to adolescence.
Normal Grade Rules
3 units

PSYC 096C. Introduction to Cognitive Science
Focuses on the study of the mind and the nature of intelligence from interdisciplinary perspectives including computer science, philosophy, mathematics, psychology, neuroscience, and other disciplines. Specific topical coverage includes language acquisition, history of computer-based approaches to artificial intelligence and expertise, human learning, neuroscience, and mathematical, logical, and computational approaches to modeling cognitive process.
Normal Grade Rules
3 units

UPPER DIVISION

PSYC 100W. Writing Workshop
Practice in improvement of writing skills appropriate to the broad field of psychology, including essays, reports and scholarly communication. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. Psychology Majors/Minors and Behavioral Science Majors only.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE Z
3 units

PSYC 102. Psychology of Childhood
Psychological development of children from conception to middle childhood emphasizing normative (typical) development in the context of cognitive, socioemotional, biological, and cultural processes. Prerequisite: PSYC 100W with a “C” or better (or departmental equivalent)
Normal Grade Rules
3 units

PSYC 105. Special Topics in Developmental Psychology
Intensive examination of current research and theory in a specialized area of developmental psychology. Course is repeatable for credit when course content changes. Prerequisite: PSYC 102 or PSYC 112 or PSYC 114 or equivalent.
Repeatable for credit
Normal Grade Rules
3 units

PSYC 107. Psychology of Women
Sex-role development of women in terms of bio-social factors involved in intellectual and personal-emotional functions. Psychological theory and research.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 110. Adult Psychopathology
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 114. Psychology of Aging
Psychological development of middle-aged and older adults emphasizing normative (typical) development in the context of cognitive, socioemotional, biological, and cultural processes. Course content also includes age-related health problems and their prevention.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 117. Psychological Tests and Measures
Test and questionnaire construction, evaluation and interpretation applied to intelligence and ability tests, personality and adjustment questionnaires, ratings and behavioral observation techniques.
Prerequisite: STAT 095.
Normal Grade Rules
3 units

PSYC 118. Advanced Research Methods in Psychology
Descriptive, correlational, quasi-experimental, and experimental approaches: design, methodology, and analysis. Experience designing, conducting, analyzing, and presenting (verbal and written) research findings. Topics include: hypothesis testing, validity, reliability, scales of measurement, questionnaire development, power, statistical significance, and effect size.
Prerequisite: Lower division GE complete; STAT 95, PSYC 18, PSYC 100W with a “C” or better (or departmental approval). Upper division standing, Psychology or Behavioral Science majors only.
Normal Grade Rules
3 units

RETURN TO LAST PAGE
DESCRIPTION CONTENTS
PSYC 120. Advanced Research Methods and Design
Descriptive, correlational, quasi-experimental, and experimental approaches: design, methodology, and analysis. Experience designing, conducting, analyzing, and presenting (oral and written) research findings. Topics will include: hypothesis testing, validity, reliability, scales of measurement, questionnaire development, power, statistical significance, and effect size.
Prerequisite: lower division GE complete; STAT 95; PSYC 100W with 'C' or better (or department approval).
Upper Division, Psychology or Behavioral Science Major
Misc/Lab: Lecture 3 hours/activity 2 hours.
Normal Grade Rules
4 units

PSYC 121A. Advanced Research Methods Social/Personality Laboratory
Advanced treatment of research approaches used in social and personality psychology. The course focus is shared between traditional laboratory and fieldwork experimental designs and methods. Data collection and statistical data analysis facilitate experiential learning.
Prerequisite: PSYC 100W, and PSYC 118 or PSYC 120, and PSYC 139 or PSYC 154. Upper division standing. Psychology majors only.
Misc/Lab: 6 hours of Lab
ABC/No Credit
2 units

PSYC 121B. Advanced Research Methods: Cognition/Perception
Advanced treatment of research approaches used in Cognition and/or Perception. The primary focus is on traditional laboratory experimental designs and methods. Laboratory-based data collection and analysis facilitate experiential learning.
Prerequisite: PSYC 100W, and PSYC 118 or PSYC 120, and PSYC 135, PSYC 155, or PSYC 158
Normal Grade Rules
2 units

PSYC 121C. Advanced Research Methods: Clinical Laboratory
Advanced research methods used in clinical research. The primary focus is on traditional field and laboratory research methodologies. Data collection and statistical data analysis facilitate experiential learning.
Prerequisite: PSYC 100W and PSYC 118 or 120, and PSYC 110 or PSYC 142
Normal Grade Rules
2 units

PSYC 121E. Advanced Research Methods: Psychophysiology Lab
Intensive experiential introduction to applied laboratory work in human psychophysiology and hormonal influences on human behavior. Focus on experimental methodology.
Prerequisite: PSYC 100W and PSYC 118 or PSYC 120 and PSYC 129
Normal Grade Rules
2 units

PSYC 126. Drugs, Brain and Behavior
Survey of psychoactive drugs, including prescription and street drugs; social, behavioral and physiological effects of drugs; neural mechanisms of drug action; history of drug use.
Prerequisite: PSYC 030 or 3 units of biology
Normal Grade Rules
3 units

PSYC 129. Neuroscience
Principles of brain organization and function underlying behavior. Topics include neuroanatomy and physiology of language, vision, sexual behavior, memory and abnormal behavior.
Prerequisite: Either PSYC 030 and 3 units of biology, or 9 units of biology.
Notes: Not acceptable as an elective in the Biology major.
Normal Grade Rules
3 units

PSYC 135. Cognition
The activity of knowing: acquisition, organization and use of knowledge. Processes involved in that activity, including perception, memory, thinking and language.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 139. Psychology of Personality
Current approaches to the study of personality and personality processes.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 142. Child Psychopathology
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 145. Community Mental Health
See HS 145.
Normal Grade Rules
3 units

PSYC 150. Educational Psychology
Development of individuals and how they learn. Intelligence, emotions, interests, social relations as related to development and learning.
Prerequisite: PSYC 001.
Notes: No credit for those who have taken EDSC 173.
Normal Grade Rules
3 units

PSYC 153. Psychology in the Courtroom
Role of psychology in the legal system: legal procedure and adversary system, jury selection, jury decision-making, eyewitness testimony, mental health law, criminal responsibility and legal insanity, expert psychological testimony, role of forensic psychologists.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 154. Social Psychology
Theories, problems and issues in the study of human social behavior.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 155. Human Learning
Memory, forgetting, concept formation, language learning, reinforcement and related topics. Traditional learning theory, psychophysiology and findings with reference to contemporary classroom management, behavior modification and other applications.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 157. Psychology of Motivation
Empirical findings and theoretical developments in motivation in relationship to concepts of need, arousal, drive and emotion.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 158. Perception
Empirical and theoretical approaches to the psychology of perception with an emphasis on vision. Topics include the perception of form, color, depth and motion as well as the effects of attention and experience.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 160. Clinical Psychology
Survey of clinical psychology as a profession. Emphasis placed on training models, specializations within the field, the scientific study of psychological interventions, and the graduate school admissions process for masters and doctoral level psychotherapists.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 165. Theory and Methods of Counseling
A survey of theories focused on helping and behavior change. Course covers both historical and contemporary psychotherapeutic interventions found in clinical and counseling psychology and evidence-based practice approaches in psychotherapy.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units
PSYC 167. Sports Psychology
See KIN 167.
3 units
Normal Grade Rules

PSYC 170. Industrial and Organizational Psychology
Application of psychological theory, research and methodology to the work environment. Topics covered include leadership, power, group processes, motivation, satisfaction and issues in personnel psychology.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 173. Human Factors
Human psychology and physiological characteristics and methods for taking these into account in designs and development of human-machine systems. Current human factor engineering efforts in lab, design process and operational environment.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 175. Management Psychology
Theory and practice of psychology in organizations and management. Topics include learning, motivation, perception, attitudes, personality, stress, groups, culture, careers, communication, leadership, politics, conflict, cooperation, decision-making and organizational change.
Prerequisite: PSYC 001.
Normal Grade Rules
3 units

PSYC 177. Political Psychology
See POLS 177.
Normal Grade Rules
4 units

PSYC 180. Individual Studies
Research project in psychology.
Prerequisite: 12 units of psychology and instructor and department chair consent.
Repeatable for credit
Credit / No Credit
1-4 units

PSYC 184. Directed Reading
Directed reading on a specific psychological topic.
Prerequisite: 12 units of psychology and instructor and department chair consent.
Repeatable for credit
Credit / No Credit
1-4 units

PSYC 186. Psychology Field Work
Supervised field work in a selected area of psychology. Course is repeatable for 4 unit maximum.
Prerequisite: Instructor and department chair consent.
Repeatable for credit
Credit / No Credit
1-4 units

PSYC 190. Current Issues Capstone
Integrative survey of current issues in psychology, how they developed and likely future directions. Completion of the research methods requirement prior to enrollment in this course is recommended.
Prerequisite: PSYC 100W and senior standing.
Co/Prerequisite: PSYC 118 or PSYC 120
Normal Grade Rules
3 units

PSYC 191. The Psychology of Prejudice
Provides an examination of psychological theory and research related to prejudice and discrimination from the perspectives of both the holders and targets of prejudice. Includes individual and small group exercises to provide experiential learning. GE Area S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LDLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

PSYC 193. Behavioral Science in Practice
See ANTH 193.
Normal Grade Rules
3 units

PSYC 195. Honors Seminar in Psychology
Intensive examination of background and current status of student-selected problems.
Prerequisite: at least 18 units of PSYC/STAT, PSYC 100W, PSYC 118 or PSYC 120, overall PSYC/STAT GPA of 3.5, Senior Standing
Normal Grade Rules
3 units

PSYC 199. Senior Honors Thesis
Supervised thesis open only to exceptional senior psychology majors.
Prerequisite: Senior or graduate standing and instructor consent.
Mandatory CR/NC/RP
3 units

GRADUATE

PSYC 200. Seminar in Personality Theory
A survey of contemporary approaches to personality study.
Prerequisite: PSYC 139 (or equivalent) plus a total of nine semester hours of upper division psychology courses.
Normal Grade Rules
3 units

PSYC 203A. Clinical Assessment I
An in-depth introduction to objective, projective and behavioral assessment techniques used in the clinical evaluation of the behavior and functioning of adults, children and families.
Prerequisite: PSYC 117 (or equivalent).
Notes: MS program priority. This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

PSYC 204. Seminar in Developmental Psychology
An examination of significant theories, perspectives, and research in developmental psychology.
Prerequisite: PSYC 102 (or equivalent).
Normal Grade Rules
3 units

PSYC 208. Family Assessment and Intervention
An interdisciplinary exploration of how therapists can analyze and change interpersonal dynamics in couples and families.
Normal Grade Rules
3 units

PSYC 209. Psychology of Contemporary Families
An overview of current family issues faced by psychotherapists in clinical settings. Emphasis will be placed on identification and conceptualization of these issues from a psychological perspective, stressing integration of issues into clinical practice. MS Clinical program priority.
Prerequisite: PSYC 208.
Normal Grade Rules
3 units

PSYC 210. Advanced Psychopathology
Advanced course to provide knowledge and experience in the classification and treatment of disorders of childhood, adolescence and adulthood as they are identified in schools, family interactions and workite settings. Critical review of research related to the evaluation of treatment strategies.
Prerequisite: PSYC 110.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 211. Child Psychopathology
An overview on the nature, assessment and treatment of Child Psychopathology. Emphasis will be placed on understanding DSM-IV diagnoses from a developmental prospective. Objective methods of assessment and empirically supported treatments will be covered.
Normal Grade Rules
3 units
### PSYC 212. Life Span Development
Psychological, biological and social development throughout the life cycle. Interdisciplinary lecture course includes infancy, childhood, adolescence, young adulthood, middle age and old age. Topics include theories, research, influences, changes, problems and patterns of human development.
Notes: MS program priority.
Normal Grade Rules
3 units

### PSYC 219. HCI for Cyber Security
See ISE 219.
Normal Grade Rules
3 units

### PSYC 220. Seminar in Experimental Psychology
Applications of experimental method to current problems in psychology. Individual design and experimental work required.
Prerequisite: PSYC 120A.
Normal Grade Rules
3 units

### PSYC 221. Gender and Ethnic Issues in Counseling and Therapy
Theoretical and practical understanding of gender and ethnic issues in clinical practice, including issues arising from differing socialization, psychological structures, values and cultural assumptions that may affect therapeutic intervention within individuals, couples and families.
Notes: MS program priority.
Normal Grade Rules
3 units

### PSYC 223B. Clinical Psychology Theory I
Application of clinical theory to the treatment of behavioral problems of individuals and families.
Prerequisite: PSYC 222A.
Corequisite: PSYC 223B.
Notes: MS program priority.
Normal Grade Rules
3 units

### PSYC 224A. Clinical Psychology Practicum I
Supervised experience in the treatment of behavioral and emotional problems of individuals and families.
Prerequisite: Same as PSYC 223A.
Corequisite: PSYC 223A.
Notes: MS program priority.
Normal Grade Rules
3 units

### PSYC 224B. Clinical Psychology Practicum II
Advanced supervision in the treatment of behavioral and emotional problems of individuals and families.
Prerequisite: Same as PSYC 224A.
Corequisite: PSYC 223B.
Notes: MS program priority.
Normal Grade Rules
3 units

### PSYC 225. Advanced Group Dynamics
Advanced study of the dynamics of small group interaction. Limited supervised training in group facilitation techniques.
Prerequisite: PSYC 125 (or equivalent).
Notes: MS program priority.
Normal Grade Rules
3 units

### PSYC 226. Addictions and Treatment
Advanced course in assessment, diagnosis, and treatment, and prevention of substance abuse and dependence and co-occurring disorders in multiple settings. Critical review of research related to the evaluation of treatment strategies are provided from recovery models, family, and individual perspectives.
Prerequisite: PSYC 203A & graduate standing in MS psychology program
Normal Grade Rules
3 units

### PSYC 228. Professional Ethics for Psychologists
Consideration of ethical and legal issues related to the professional application of psychology. Designed particularly for students involved in field work.
Notes: MS program priority.
Normal Grade Rules
3 units

### PSYC 230. Seminar in Physiological Psychology
An advanced consideration of the neurophysiological correlates of behavior.
Prerequisite: PSYC 129 (or equivalent).
Normal Grade Rules
3 units

### PSYC 232. Clinical Psychopharmacology
Prepares counseling professionals to understand aspects of drug use, mechanisms of change and clinical outcomes.
Prerequisite: PSYC 126 or equivalent.
Normal Grade Rules
3 units

### PSYC 235. Seminar in Cognitive Psychology
Theories and current research in cognitive psychology with emphasis on components of cognitive processing from pattern recognition to problem solving. Substantial emphasis on cognitive development and mechanisms of cognitive change.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

### PSYC 240. Research Design and Applied Psychometrics
Advanced introduction to issues in psychological research (experimental, quasi-experimental and survey research), measurement and test construction (item analysis, test reliability and validity and development of norms).
Prerequisite: PSYC 117, STAT 115 or instructor consent.
Normal Grade Rules
3 units

### PSYC 243. Field Work in Psychology
Supervised field work experience in outside agency settings. Open through consultation only to students in MS programs.
Repeatable for credit
Credit / No Credit
1-6 units

### PSYC 249. Field Work in Industrial/Organizational Psychology
Supervised experience applying psychological and organizational theory and practice in business, industrial and other organizational settings.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-6 units

### PSYC 254. Social Psychology Seminar
Theoretical and practical approaches to the understanding of human behavior within a social context.
Prerequisite: PSYC 154 (or equivalent).
Notes: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

### PSYC 255. Seminar in Learning
Current problems in learning with primary emphasis on learning theory.
Prerequisite: PSYC 155 (or equivalent).
Normal Grade Rules
3 units

### PSYC 256. Seminar in Perception
Selected issues in visual sensation and perception. Topics include the perception of color, form, depth and motion. Emphasis on the relationship of perception to sensory physiology.
Prerequisite: PSYC 158 (or equivalent).
Normal Grade Rules
3 units

### PSYC 258. Methods of Psychotherapy
Survey of the theoretical background and practical application of various approaches to psychotherapy.
Prerequisite: PSYC 139.
Notes: MS program priority.
Normal Grade Rules
3 units
PSYC 260. Crisis and Trauma Counseling
Advanced course on trauma including strategies for assessing, managing, short and long term treatment for acute and chronic stress reactions. Empirically supported risk and protective factors, and evidence-based treatments are covered. Resilience, personal, multidisciplinary, and community perspectives are emphasized.
Prerequisite: PSYC 203A and Graduate Standing in MS Psychology program
Normal Grade Rules
3 units

PSYC 270. Seminar in Industrial and Organizational Psychology
Psychological theory, research and practice in organizations. Topics emphasized include motivation, job satisfaction, communication, leadership, group processes, decision-making, conflict, cooperation, power and organization development and change.
Prerequisite: Instructor consent.
Notes: MS I/O program priority. This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

PSYC 271. Seminar in Personnel Psychology
In-depth introduction to relevant methodology, research, applications and issues. Topics include legal issues in personnel, test validation, selection, job analysis, performance appraisal and training and development.
Prerequisite: Instructor consent.
Notes: MS I/O program priority.
Normal Grade Rules
3 units

PSYC 272. Training and Development in Organizations
Course will address ‘classic’, current, and future issues in training and development. Topics covered include theories of learning, needs assessment, training methodology, program evaluation, management development, and trends that may influence future training and development programs.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

PSYC 273. Seminar in Human Factors
Data and theory of sensory and cognitive psychology and their application to the design of systems used by humans.
Prerequisite: PSYC 135 and PSYC 158 (or equivalent).
Normal Grade Rules
3 units

PSYC 275. Professional Issues in I/O Psychology
Address topics and issues faced by I/O psychologists working within organizational settings. Review and analysis of research regarding the application of psychological theory, concepts, and research methodologies. Evaluation and discussion of early career-related ethical issues and professional challenges and strategies.
Prerequisite: Psyc 270 and graduate standing in MS I/O Psychology program
Repeatable for credit
Normal Grade Rules
3 units

PSYC 276. Groups at Work
Group process and performance, types of work groups and tasks, group development (norms, roles and strategies), group leadership approaches and skills, decision-making, team building, high performing and self-managing teams.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

PSYC 280. General Seminar
Current psychological literature in selected fields and the development of a specific topic by the student.
Prerequisite: Undergraduate major in psychology (or equivalent).
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

PSYC 281. Method and Design for Applied Research
Development and management of applied research programs based on contributions of psychological research and methodology. Criticizing existing and proposed research. Reporting and communicating research results.
Prerequisite: PSYC 18 or PSYC 120A, STAT 95 and STAT 115.
Notes: MS program priority.
Normal Grade Rules
3 units

PSYC 291. Organizational Development
Theory and practice of organization development, including systems thinking, action research, organization assessment and diagnosis, survey development and feedback, individual, group, inter-group and organization-wide interventions; consultant roles; and ethics of practice in organizations.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

PSYC 295. Substance Abuse, Human Sexuality, and Life-Span Issues for Therapists
An examination of current issues in marriage and family therapy related to substance use, sexual issues, and development across the lifespan. Course will cover theories and contemporary issues in these areas with an emphasis on application in treatment.
Normal Grade Rules
3 units

PSYC 299. Special Problems
Advanced work in areas not covered in any regular course offering. Course is repeatable for a maximum of four units.
Prerequisite: Instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

PSYC 299. Master’s Thesis or Project
Five units required for the M.A.; six units for the M.S.
Prerequisite: Admission to candidacy for the MA or MS degree and thesis chair permission.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

UPPER DIVISION
PSYC 1290R. Culminating Experience Supervision
Continued work on thesis or project unless concurrently enrolled in another SJSU course
Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit
### STATISTICS

#### LOWER DIVISION

**STAT 095. Elementary Statistics**
Hypothesis testing and predictive techniques to facilitate decision-making; organization and classification of data, descriptive and inferential statistics, central tendency, variability, probability and sampling distributions, graphic representation, correlation and regression, chi-square, t-tests, and analysis of variance. Computer use in analysis and interpretation. GE Area: B4
Prerequisite: Math Enrollment Category M-I or M-II, or completion of a GE Area B4 course with a grade of C- or better.
Notes: Intended for Psychology majors and minors as well as for programs in Behavioral Science, Child Development, Education, Health Science, Nursing, Nutritional Science, Social Science, and Social Work.
Normal Grade Rules
GE: B4
3 units

#### UPPER DIVISION

**STAT 115. Intermediate Statistics**
Statistical analysis at the intermediate level; chi-square, analysis of variance, correlation and regression, and topics in experimental design; use of microcomputers for statistical calculations.
Prerequisite: STAT 95 (or equivalent).
Notes: Intended for majors in education, nursing, personnel administration, psychology, social service and sociology, and psychology minors.
Normal Grade Rules
3 units

#### GRADUATE

**STAT 235. Multivariate Analysis**
Multivariate techniques for analyzing social science data with emphasis on multiple regression, multivariate analysis of variance, factor analysis, discriminant analysis and canonical correlation.
Prerequisite: STAT 115 or instructor consent.
Normal Grade Rules
3 units

**STAT 245. Advanced Statistics**
Advanced problems in statistical analysis. Advanced consideration of hypothesis testing, estimation and analysis of variance.
Prerequisite: STAT 115 or instructor consent.
Normal Grade Rules
3 units
Recreation Program Courses

LOWER DIVISION

RECL 010. Creating a Meaningful Life
Study how a meaningful life relates to the freedom to pursue happiness. Examines personal, social, and cultural bases for a creative and successful lifestyle. Learn to recognize and foster creative potential for lifelong personal growth, meaningful rewards, and leisure enjoyment. GE Area: E
Normal Grade Rules
GE: EE
3 units

RECL 015. Human Life Span
See HS 015.
Normal Grade Rules
GE: D1
3 units

RECL 090. Foundations of Recreation Parks & Tourism
Field of parks and recreation; history of development of the recreation profession; survey of recreation and leisure services.
Normal Grade Rules
3 units

RECL 094. The Outdoor Recreation Experience
Students will explore, understand, and experience firsthand the value, meaning, and benefits of a variety of outdoor recreation activities. Socio-cultural and ecological systems will be examined as they relate to the delivery of outdoor recreation experiences in both the public and private sector.
Normal Grade Rules
3 units

RECL 097. Event Planning
Principles of event planning with emphasis on development and integration of operational strategies in recreation and hospitality management. Application of programming techniques and exploration of career opportunities in event management.
Misc/Lab: Lecture 2 hours/activity 3 hours
Normal Grade Rules
3 units

RECL 100W. Writing Workshop
Developing and enhancing written communication skills in the recreation and leisure profession in the following areas: scientific/technical writing, administrative writing, public-relations-related writing and funding proposals. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).
Normal Grade Rules
GE: EE
3 units

RECL 110. Leisure, Life and Contemporary Society
Explore conceptual foundations of play, recreation and leisure and their importance in physical, social, psychological and spiritual development across the lifespan. Assess the roles of existing services in enhancing quality of life across social, cultural, economic and environmental realms.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 111. Leisure, Culture, and Identity
Perspectives of leisure as a source of self-expression and social control related to cultural beliefs, values, and practices and institutionalized social systems. Observation, analysis and critique of history and social structures, leisure and culture, and personal opportunities for change. GE Area: S
Prerequisite: Completion of core GE, successful completion of Writing Skills Test, upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: Z
3 units

RECL 112. Foundations of Recreation Therapy
Fundamentals of the profession; history, delivery models, theory and practice of Recreation Therapy as a treatment modality for persons whose functional abilities are impaired. Exposure to ADA facility assessment, inclusion, and impact of social attitudes through didactic and experiential learning.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 113. Leisure: Philosophy and Education
Examination of philosophical, historical, psychological, and wellness foundations for education for leisure. Learning systems to facilitate the process of change through leisure opportunities for wellness.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 130. Event Marketing in Recreation Enterprises
Develop competence in event promotion and marketing. Explore marketing fundamentals, such as targeting an audience, creating promotional materials and pricing to cover event costs as well as event sponsorship. The role of social media in special themed events will be surveyed.
Prerequisite: RECL 097
Normal Grade Rules
3 units

RECL 132. Recreation Program Planning
Learn to plan and implement programs and events for diverse individual, group and community recreation experiences using contemporary needs assessment, outcomes oriented goal setting, program/event selection, leadership techniques and evaluation tools.
Normal Grade Rules
3 units

RECL 133. Principles of Recreation Leadership
In-service training workshops to develop skills in planning, implementation and evaluation processes. Self-awareness, communication and group process.
Prerequisite: Upper division standing.
Misc/Lab: Lecture 4 hours/Activity 2 hours
Normal Grade Rules
4 units

RECL 135. Planning and Managing Rec Areas & Facilities
Content includes legal principles and risk management, as well as fundamentals of facility design and preventive maintenance in recreation, park, and tourism settings. This is a problem-based learning course, including case study, problem solving, project applications, and working with stakeholders.
Normal Grade Rules
3 units

RECL 136. Principles of Recreation and Park Administration
In the context of leadership roles and responsibilities in the field of recreation and park administration, course examines issues related to the organization and administration of human resources, finances, areas and facilities, programs, risk management, and liability.
Prerequisites: Upper Division Standing
Normal Grade Rules
3 units
RECL 140A. Spec Interventions in RT: Aquatic Therapy
Develop in-depth knowledge and skills related to the facilitation and supervision of a complex Recreation Therapy intervention. Includes equipment use, clinical application of each aspect of the activity or equipment, contraindications, safety, facilitation techniques, costs, industry standards, and evidence-based practices.
Repeatable for credit
Normal Grade Rules
1 unit

RECL 140B. Spec Inter in RT: Behavior Interventions
Theory and practice of interventions that positively affect healthy behaviors. Implementing prevention strategies including activity modification, assessment of harmful or disruptive behaviors, and identifying cause and effect relationships. Learn and practice teaching appropriate behaviors, increasing appropriate behaviors, decreasing inappropriate behaviors.
Repeatable for credit
Normal Grade Rules
1 unit

RECL 140C. Spec Inter in RT: Adventure Tx
Theoretical, hard, and soft skills related to adventure therapy interventions. Demonstrate skill development through facilitation. Learn diverse interventions and clinical application, modification, contraindications, and safety precautions for each based on psychiatric diagnosis served.
Repeatable for credit
Normal Grade Rules
1 unit

RECL 143. Festivals and Community Special Events
Principles and applications for effective management of festivals, fairs and community special events; including planning, marketing, financing, evaluating, logistics, consumer behavior, corporate sponsorship, licensing agreements, risk management, and sustainable practices.
Normal Grade Rules
3 units

RECL 144. Natural and Cultural Resource Interpretation in Recreation and Parks
Explore the interpretive approach to communicating value and vision of nature, outdoor recreation and tourism sites. Gain skills to develop and conduct activities such as guided walks, interpretive programs and fireside chats. Learn fundamentals of creating interpretive media such as brochures, displays, and exhibits as well as e-media.
Normal Grade Rules
3 units

RECL 148. Biofeedback Principles and Practices
Conceptual and historical review of Biofeedback theory and practice. Experiential engagement with software, instrumentation, data interpretation and personal reflection. Assessment, treatment, evaluation, and case studies applied to medical and non-medical practices.
Normal Grade Rules
3 units

RECL 150. For-Profit Enterprises in Recreation
Development of knowledge and skills relating to the variety and types of for-profit recreation enterprises, including planning for and management of commercial ventures; development of corporate identity and market niche, and forecasting of trends and shifts in consumer culture.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 151. Planning and Development of Tourism and Event Enterprises
Practices utilized in private profit, nonprofit and commercial sectors for planning, developing and operating leisure, tourism, and event enterprises. Management functions and consumer behavior related to products and services.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 152. Non-Profit Leadership & Management
Introduction to the historical and philosophical foundations of the Non-Profit sector. Provides a basic understanding of key issues in managing contemporary nonprofit organizations including: organizational behavior; board development; fund-raising; boundary-spanning skills; and developing leadership skills for social innovation and entrepreneurship.
Prerequisite: Upper Division Standing.
Normal Grade Rules
3 units

RECL 153. Youth Development and Services
Surveys the field of youth development, its historical roots, sociocultural and psychological development, and contemporary innovations. Develop knowledge of the institutional and programmatic factors that lead to positive developmental outcomes for youth in leisure and human service organizations.
Prerequisite: Upper Division Standing.
Normal Grade Rules
3 units

RECL 154. Development and Delivery of Recreation Programs
Survey of development and delivery of recreation programs for the prevention and treatment of health-related problems. Includes theories and models, assessment methods, program planning and development, delivery, and evaluation.
Normal Grade Rules
3 units

RECL 155. Outdoor Recreation Systems
Overview of outdoor recreation in the United States. Study of the historic, social, economic and political factors influencing natural resource protection. Includes a survey of organizations that manage visitors and protected areas to provide quality outdoor recreation experiences.
Prerequisite: Upper Division Standing.
Normal Grade Rules
3 units

RECL 156. Principles of Sustainable Travel and Tourism
Examination of travel and tourism as it relates to tourist motivations, hospitality and destination management. The impact of tourism on the physical, cultural and economic environment.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 157. Sustainable Recreation & Ecotourism
Course examines cultural, ethical, environmental and social science issues, and uses applied research methods to achieve competence in making programmatic and resource management decisions for recreational and tourism purposes.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 158. Cultural and Heritage Tourism
Heritage experiences leading to deeper cultural understanding are essential in the tourism segment of recreation. Exploration of culture and heritage using the lens of growth, popularity or compression will be examined. Discussion on practices and concerns associated with cultural heritage-based tourism.
Normal Grade Rules
3 units

RECL 160. Evaluation and Research in Recreation
Students will learn about the systematic process for evaluation or research. The course focuses on three main areas: Criteria and research questions, evidence and data (data collection and data analysis), and judgment and interpretation. The course is for students interested in basic information about systematic inquiry using evaluation and research design, data collection and analysis, and data reporting.
Prerequisite: RECL 090, RECL 100W, RECL 110
Corequisite: RECL 136.
Normal Grade Rules
3 units
RECL 165. Senior Seminar in Recreation
A capstone experience designed to help students synthesize and further develop skills acquired in program planning and development, implementation, and evaluation. Emphasis placed on negotiation of all phases of designing and facilitating meaningful recreation experiences in a variety of agencies and communities.
Prerequisite: Completion of 36 units of RECL coursework including RECL 90, RECL 97, RECL 110 and RECL 113.
Major form completed and signed by HSR advisor and chair. Senior standing.
Normal Grade Rules
3 units

RECL 169. Practicum in Recreation Therapy
Supervised 100 hour competency-based field learning in approved health agency (e.g., hospital, community health, municipal). Learning exposes the learner to different populations, interventions, terminology, resources. Learner will observe job task skills, apply knowledge, and gain abilities of Recreation Therapy practice.
Pre-requisites: RECL 90
Credit / No Credit
1 unit

RECL 170A. Pre-Intern Workshop
Introduces and prepares upper division majors for senior internship. Includes career goal clarification, resume development and interviewing through both workshops and online delivery.
Prerequisites: RECL 090, RECL 100V, RECL 110.
Corequisites: RECL 136, RECL 137.
Credit / No Credit
1 unit

RECL 170B. Internship in Recreation
Supervised 40-hour per week internship (minimum of 12 weeks) in a variety of approved agencies (leisure services, park and recreation, or tourism/commercial recreation).
Prerequisites: Upper division standing; RECL 136, RECL 160, RECL 170A.
Credit / No Credit
10 units

RECL 170C. Internship in Recreation Therapy
Supervised 40-hour per week internship (minimum 15 weeks, 600 hours) occurring in approved health agencies. Supervisor must have a valid CTRS credential. Student will develop competencies as identified in the NCTRC Job Task Analysis and ATRA Standards of Practice.
Credit / No Credit
10 units

RECL 180. Individual Studies
Individual work investigating special topics/problems through research, applied projects, and/or field experiences. Assessment by project(s) and/or paper(s).
Prerequisites: Upper division standing, supervising instructor approval, and department chair consent.
Repeatable for credit
Credit / No Credit
1-4 units

RECL 184. Directed Reading
Directed reading in journals and books by authorities in Hospitality, Recreation, Tourism and related fields. Assessment by project(s) and/or paper(s).
Prerequisite: Upper division standing, supervising instructor approval, and department chair consent.
Repeatable for credit
Credit / No Credit
1-4 units

RECL 185. Leisure, Recreation and Aging
Theory and practice related to the role of leisure services in maximizing the quality of life for older adults. Interrelationship of leisure and other supportive services for older adults in community and institutional settings.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 187. Leisure Education in Recreation Therapy
Overview of leisure education as it is used both in medical and non-medical settings to improve functioning and wellbeing among diverse clientele. Students will learn historical, philosophical, and contemporary conceptual foundations, evidence-based and practical applications to service delivery.
Normal Grade Rules
3 units

RECL 193. RT Interventions for People with Physical Conditions
Theoretical foundations, research, and evidenced based Recreation Therapy interventions for persons with physical, intellectual, and developmental disabilities and other chronic conditions. Focuses on rehabilitation, community reintegration, day programs, and inclusion.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

RECL 197. Recreation Therapy in Mental Health
Application of theory, models, concepts and facilitation processes used in Recreation Therapy and related professions for people with mental health conditions. Experiential learning and facilitation of leisure education, clinical interventions, and behavioral change processes used in medical and non-medical settings.
Prerequisite: Upper division status; RECL 112 and RECL 113.
Normal Grade Rules
3 units

RECL 199. Advanced Practices in Recreation Therapy
A discussion of selected problems and their possible solutions dealing with personnel administration, planning of recreation and park areas and facilities, program organization, public relations, financial procedure, legal aspects of recreation, etc.
Normal Grade Rules
3 units
RECL 204. Research Methods in Recreation and Tourism
A critical examination of the various approaches and methods used in research; a survey of research design, data collection, data coding, and analysis in the recreation, tourism, and related fields.
Prerequisite: RECL 202 or instructor consent.
Normal Grade Rules
3 units

RECL 205. Finance in Recreation
Examination of bases, sources and strategies for financing and marketing of recreation programs and services. Includes public, private-for-profit, nonprofit and commercial leisure service agencies.
Normal Grade Rules
3 units

RECL 210. Contemporary Theories in Recreation and Tourism
Reviews theoretical and empirical social science literature in recreation and tourism. Review, interpretation and evaluation of contemporary research in recreation, leisure, tourism, and related fields.
Prerequisite: RECL 200.
Normal Grade Rules
3 units

RECL 211. Therapeutic Recreation Practices
Development and analysis of individualized program plans based upon selected theoretical foundations; emphasis on assessment, program design, follow-up services. Major service delivery systems studied in depth with regard to implications for leisure service delivery affecting disabled or ill individuals.
Normal Grade Rules
3 units

RECL 212. Facilitation and Intervention in Therapeutic Recreation
Theories of intervention and facilitation integrated with methodology to recognize the interdependence of the individual and the environment. Direct and enabling technique application to the therapeutic recreation profession analyzed for situational effectiveness.
Normal Grade Rules
3 units

RECL 213. Advanced Professional Therapeutic Recreation Practices
Professional practices, including in-service and pre-service training, consultation and group facilitation; processes for addressing professional trends and issues, including credentialing, legislative processes, interdisciplinary service delivery and networking.
Prerequisite: RECL 211 and RECL 212.
Normal Grade Rules
3 units

RECL 215. International Tourism Trends and Issues
Analyze international tourism concepts, trends, and issues associated with development. Study goals and procedures for basic and applied tourism research and introduce varied information sources for independent research. Adopt a culturally sensitive perspective for interpreting information related to different cultures.
Normal Grade Rules
3 units

RECL 216. Marketing for Tourism and Recreation
Study of characteristics which define cultural groups around the world. Learn to adjust marketing approaches, materials, and technology to accommodate the different ways people communicate to attract specific markets. Includes field-based market research.
Normal Grade Rules
3 units

RECL 217. Information Technology and Tourism
Analysis of concepts, trends, and issues associated with technology and tourism development. History and applications of various information technologies in tourism businesses. Trends in technology and the impact on the travel industry.
Normal Grade Rules
3 units

RECL 218. Tourism Planning and Development
Review, analysis, and application of concepts, strategies, techniques, and approaches associated with destination tourism planning, development, and management. Emphasis is on integrated and sustainable tourism planning and development models at global, national, regional, and local/community levels.
Normal Grade Rules
3 units

RECL 219. Cultural and Heritage Tourism
Introduction to the concerns and issues involved in studies of heritage, tradition, historic preservation, public archaeology, and heritage tourism.
Normal Grade Rules
3 units

RECL 265. Graduate Research Seminar
Presentation, discussion, and evaluation of leisure research.
Prerequisite: RECL 200, RECL 202, or instructor consent.
Normal Grade Rules
3 units

RECL 270. Graduate Internship in Recreation and Tourism
A 12-week, 15 hours per week of applied management experience in a leisure service or tourism organization under the joint supervision of a faculty advisor and an organizational representative.
Prerequisite: RECL 200, RECL 202, RECL 204.
Normal Grade Rules
3 units
School of Social Work Courses

GERONTOLOGY

LOWER DIVISION

GERO 099. Death, Dying and Religions
See RELS 099
Normal Grade Rules
GE: EE
3 units

GERO 107. Aging and Society
Social, psychological and physiological aging processes. Implications of aging for individuals and societies, with emphasis on issues related to diversity, equality and gender in the U.S. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing
Normal Grade Rules
GE: S
3 units

GERO 108. Health in Later Life
Normal age-related health changes and common illnesses in later life. Health status, behavior and attitudes of older adults. The continuum of health care services. Professional and ethical issues in service delivery.
Prerequisite: College biological sciences course.
Normal Grade Rules
3 units

GERO 111. Medical Ethics
See PHIL 111
Normal Grade Rules
3 units

GERO 114. Psychology of Aging
See PSYC 114.
Normal Grade Rules
3 units

GERO 116. Aging and Nutrition
See NUFS 116.
Normal Grade Rules
3 units

GERO 117. Social Policy and Services in Aging
Social policy on aging from a historical perspective. Implications for service to the elderly. Indicators for future program projections.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GERO 118. Long Term Care Services
History and organization of the continuum of long term care for U.S. families, financing and regulatory policies, and factors influencing the quality of care. Professional and ethical issues facing long term care providers.
Prerequisite: GERO 107 or HS 162.
Normal Grade Rules
3 units

GERO 122. Women in the Second Half of Life
The roles and problems of the older woman in a changing society. Societal attitudes, stereotypes, employment and interaction patterns. Opportunity for focus on specific areas of interest.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GERO 127. Aging and Mental Health
Prerequisite: PSYC 1 (or equivalent).
Normal Grade Rules
3 units

GERO 133. Gerontology Field Work
Supervised work experience in an organization providing services to older adults. Short-term projects, observation of organizational dynamics and individual skills development.
Prerequisite: Completion of 9 units in gerontology.
Repeatable for credit
Credit / No Credit
3 units

GERO 137. Families, Aging, and Diversity
Family relationships of older adults in diverse U.S. ethnic groups. Current patterns of family and formal assistance to elders with disabilities. Critical analysis of eldercare policies and services.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GERO 156. Independent Living for the Aging and Disabled
See OCTH 156.
Normal Grade Rules
3 units

GERO 166. Medical Sociology
See SOCI 166.
Normal Grade Rules
3 units

GERO 180. Individual Studies
Individual work on special topics in gerontology by arrangement.
Prerequisite: Coordinator approval and upper division standing.
Repeatable for credit
Credit / No Credit
1-4 units

GERO 185. Leisure, Recreation and Aging
See RECL 185.
Normal Grade Rules
3 units

GERO 251. Social Work with Aging Populations
See SCWK 251.
Normal Grade Rules
3 units

GERO 260. Multidisciplinary Health Promotion in Later Life
See NUFS 260.
Normal Grade Rules
3 units

GERO 265. Seminar in Cognitive Disorders
See EDSP 265.
Normal Grade Rules
3 units

GERO 268. Lifespan Development
See EDCO 268.
Normal Grade Rules
3 units

GERO 298. Special Project
Supervised research in the field of gerontology to be taken only with approval of the program coordinator.
Mandatory CR/NC/RP
3 units

GERO 299. Master's Thesis or Project
Supervised individual research in gerontology. Preparation for doctoral level study.
Prerequisite: Admission to candidacy for the master’s degree and instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units
SOCIAL WORK

LOWER DIVISION

SCWK 010. Introduction to Social Welfare and Social Work
Social welfare institutions and the social work profession: its development, knowledge base, value system and specific areas of direct practice.
Normal Grade Rules
3 units

UPPER DIVISION

SCWK 100W. Writing Workshop
This course focuses on developing and enhancing writing and presentation skills vital to the social work profession in the following areas: research, grant writing, clinical documentation, and administration. GE Area: Z
Prerequisites: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE: Z
3 units

SCWK 107. Aging and Society
See GERO 107.
Normal Grade Rules
GE: S
3 units

SCWK 110. Foundations of Social Work Practice
Introduction to the history, mission, values, skills and knowledge base of generalist social work practice within a transcultural perspective. Focus on social work practice with emphasis on those populations-at-risk who are disenfranchised and marginalized.
Prerequisite: Junior standing, Social Work majors only.
Normal Grade Rules
3 units

SCWK 111. Generalist Social Work Practice I
Knowledge, values and skills for generalist social work practice utilizing problem-solving methods with systems of all sizes. Focus on developing professional relationships, defining issues, communication skills, collecting data and assessing individuals from diverse backgrounds interacting with their environments.
Prerequisite: SCWK 110, SCWK 120, SCWK 130, SCWK 140.
Corequisite: SCWK 141
Normal Grade Rules
3 units

SCWK 112. Generalist Practice II
Knowledge, values and skills for generalist social work practice with emphasis on families, groups, organizations and communities. Focus on transactions to optimize social well-being and empowerment of individuals, families and communities utilizing strengths and transcultural perspectives.
Prerequisite: SCWK 111 (with a grade of “C” or better).
Corequisite: SCWK 142.
ABC/No Credit
3 units

SCWK 120. Social Welfare Institutions and Policies I
Development of social work as a profession, including mission, values, ethics. Development and changes in the philosophy, legislative base and structures for social services as these affect social and economic justice and impact health and well-being.
Prerequisite: Junior standing, Social Work majors only.
Normal Grade Rules
3 units

SCWK 121. Social Welfare Institutions and Policies II
Methodology and framework for analyzing social policy and understanding institutional discrimination, particularly related to populations-at-risk and other disenfranchised groups. Political and organizational processes to influence policy development.
Prerequisite: SCWK 120, junior standing, Social Work majors only.
Normal Grade Rules
3 units

SCWK 130. Human Behavior in the Social Environment I
Theories and knowledge of bio-psycho-social development from birth to old age. The dynamics of interacting social systems and culture on human development. Theories and research on risk and resilience. Human diversity and populations-at-risk emphasized.
Prerequisite: Junior standing, Social Work majors only.
Normal Grade Rules
3 units

SCWK 131. Human Behavior in the Social Environment II
Theories and knowledge about families, groups, organizations, and communities from a systems perspective. The impact of discrimination, economic deprivation and oppression on populations-at-risk. Emphasis on the promotion of optimal health and well-being.
Prerequisite: junior standing, Social Work majors only.
Normal Grade Rules
3 units

SCWK 140. Introduction to Field Practicum
Direct involvement with community services to provide the student with exposure to clients/client systems prior to Field Practicum I. Six to eight hours weekly in community-based agencies and on-campus seminars.
Pre/Corequisite: SCWK 110 or consent of advisor. Social Work majors only.
Credit / No Credit
3 units

SCWK 141. Field Practicum I
Generalist social work practice with individuals, families and communities from a transcultural perspective in an agency under supervision. Sixteen hours per week required in placement.
Prerequisite: SCWK 110, SCWK 120, SCWK 130 and SCWK 140.
Corequisite: SCWK 111.
Credit / No Credit
2-5 units

SCWK 142. Field Practicum II
Generalist social work practice in an agency setting continued. Emphasis on individuals, small groups and communities from a transcultural perspective. Sixteen hours per week required in placement.
Prerequisite: SCWK 111, SCWK 141.
Corequisite: SCWK 112.
Credit / No Credit
2-5 units

SCWK 170. Introduction to Research Methods
Scientific and analytic approaches to building knowledge for social work practice, including ethical issues in social research. Evaluation of service delivery systems using qualitative and quantitative research methodologies.
Prerequisite: Junior standing, Social Work majors only.
Pre/Corequisite: STAT 95.
Normal Grade Rules
3 units

SCWK 175. Social Work Senior Seminar
An integrative capstone seminar reviewing current trends, problems and issues confronting the profession. Developments and challenges in California and the country for BA level generalist practitioners evaluated in light of the student’s own personal and professional goals.
Pre/Corequisite: SCWK 175 is open to Social Work majors only; must be taken concurrently with SCWK 112 and SCWK 142, or taken in the semester immediately following completion of SCWK 142, and all other Social Work courses must have been completed.
ABC/No Credit
3 units

SCWK 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Department major.
Repeatable for credit
Credit / No Credit
1-4 units
SCWK 192. Social Work with Families
Exploration of various family forms, cultural factors and dynamics influencing family interaction with agencies and community. Practice strategies include assessment, defining strengths and focusing on interventions to promote health and well-being.
Prerequisite: SCWK 110, SCWK 120 or SCWK 130 (or equivalent).
Normal Grade Rules
3 units

SCWK 192I. Int’l Program Studies
Repeatable for credit
Mixed Grading
1-6 units

GRADUATE

SCWK 202. Social Policy and Services: History and Values
History of social welfare and work with emphasis on diverse populations, particularly Latinos/as, African Americans and Asian Americans. Social policy and social work values in relation to practice issues and social services.
Normal Grade Rules
3 units

SCWK 204. Social Policy Analysis
Frameworks for analyzing social policies using principles of social and economic justice. The role of policy in helping or deterring people in attaining well-being. Focus on diverse populations and populations-at-risk.
Prerequisite: SCWK 202.
Normal Grade Rules
3 units

SCWK 212. Human Behavior in Social Environment I
Systems and ecological models presented with the transcultural perspective provide the primary theoretical foundation. Life course perspective is applied from infancy to end of adult life cycle to understand behaviors of individuals and families with special emphasis on marginalized groups.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

SCWK 214. Human Behavior in Social Environment II
Systems and ecological models provide the primary theoretical foundation. Special focus is given to transcultural perspective within the contexts of mezzo (families and small groups) and macro social work (organizations and communities) with marginalized populations.
Prerequisite: SCWK 212.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

SCWK 215. Advanced Standing Bridge Integrated
Summer bridge course for the Advanced Standing Masters of Social Work Program. It is intended to supplement the foundational knowledge, skills, and values developed by qualified students in respective BSW program.
Normal Grade Rules
4 units

SCWK 220. Transcultural Generalist Practice I
Transcultural generalist practice with client systems, particularly individuals and families, at micro, mezzo and macro levels. Assessment, planning and implementing interventions within a professional relationship, utilizing a strengths perspective, focusing on Latinos/as, African Americans and Asian Americans.
Corequisite: SCWK 230.
Normal Grade Rules
3 units

SCWK 221. Transcultural Generalist Practice II
Transcultural generalist practice with client systems, particularly groups, organizations and communities to enhance well-being. Approaches and skills to ameliorate conditions affecting people adversely, particularly those of diverse backgrounds and populations-at-risk. Emphasis on promoting social and economic justice.
Prerequisite: SCWK 220 and SCWK 230.
Normal Grade Rules
3 units

SCWK 222. Transcultural Advanced Generalist Practice I: Family Systems Focus
Transcultural advanced generalist practice with an emphasis on family systems, diverse cultural patterns and varying family forms. Assessment of multi-system interactions with communities and organizations, focusing on enhancing the health and well-being of marginalized populations and populations-at-risk.
Prerequisite: SCWK 221.
Corequisite: SCWK 232.
Normal Grade Rules
3 units

SCWK 223. Transcultural Advanced Generalist Practice II: Community Systems Focus
Methods of community intervention at multiple levels focused on empowerment and developing the strengths of diverse groups, particularly Latino/a, African American, Asian American and other oppressed and marginalized populations. Includes community social work, assessment and interventions.
Prerequisite: SCWK 221.
Normal Grade Rules
3 units

SCWK 224. Advanced Generalist Practice With Spanish Speaking Populations
Analysis of culturally relevant services to linguistic minority Spanish-speaking population from a transcultural generalist perspective. Skills to include Spanish language interventions appropriate for cultural access, appropriate assessment, individual, family and group interventions and advocacy for client systems at all levels.
Prerequisite: SCWK 221.
Normal Grade Rules
3 units

SCWK 230. Social Work Practicum I
Development of transcultural practice skills with families, groups and individuals in their social contexts. Emphasis on developing professional roles and relationships, applying multi-system assessment and interventions, particularly with Latino/a, African American and Asian American clients/client systems.
Corequisite: SCWK 220.
Repeatable for credit
Credit / No Credit
1-6 units

SCWK 231. Social Work Practicum II
Development of skills to differentially assess the strengths and capacities of interacting individuals, families, groups, organizations and communities. Application, termination and evaluation of problem-solving interventions from a transcultural generalist practice perspective.
Prerequisite: SCWK 230.
Corequisite: SCWK 221.
Repeatable for credit
Credit / No Credit
1-6 units

SCWK 232. Social Work Practicum III
Development of advanced generalist practice skills with individuals, families, groups, organizations and communities from a transcultural perspective emphasizing family, community and policy practice. Development of skill to use self effectively with diverse clients, colleagues and community members from various backgrounds.
Prerequisite: SCWK 231.
Corequisite: Advanced Courses
Repeatable for credit
Credit / No Credit
1-6 units
SCWK 233. Social Work Practicum IV
Development of advanced generalist practice skills with the aged, children and youth, health/mental health or educational settings. Developing culturally competent skills to assess, plan, implement and evaluate interventions from transcultural and strengths perspectives to address family and community well-being.
Prerequisite: SCWK 232.
Corequisite: Advanced Courses
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

SCWK 240. Research Methods and Design
Scientific method and problems of knowledge. Basic concepts and models of research methodology, qualitative research, program and practice evaluation in social work. Critical analysis of existing research on ethnic minorities and other populations-at-risk.
Normal Grade Rules
3 units

SCWK 242. Research Methods, Data Analysis and Evaluation
Basic concepts and models for research methodology applied to the analysis of data in social work. Emphasis on quantitative analysis using microcomputers.
Prerequisite: SCWK 240.
Normal Grade Rules
3 units

SCWK 243. Advanced Standing SW Bridge - Grad
Summer bridge course for the Advanced Standing Masters of Social Work Program. It is intended to supplement the foundational knowledge and skills needed for using research evidence to inform practice and policy.
Normal Grade Rules
2 units

SCWK 245. Management in Human Services
The organization and continuous operation of services delivery systems including the functions of management, decision-making, communication, authority, delegation, planning and staffing.
Notes: An elective.
Normal Grade Rules
3 units

SCWK 247. Collaborative Leadership in Social Service Contexts
Theory and practice of cross-systems collaboration in social services, grounded in an ecological and systems perspective. Emphasizes collaborative leadership and effective interdisciplinary collaboration in addressing complex social problems.
Pre-requisites: Undergraduates may enroll upon instructor approval.
Normal Grade Rules
1 unit

SCWK 250. Policy Practice in Aging
Critical analysis of the impact of policies on the elderly and their families, particularly those who are Latino/a, African American and Asian American. Assessment of organizations and policy implementation. Development of strategies to promote well-being and social change.
Prerequisite: SCWK 204.
Normal Grade Rules
3 units

SCWK 251. Social Work with Aging Populations
Notes: An elective.
Normal Grade Rules
3 units

SCWK 260. Policy Practice in Child and Family Welfare
Critical analysis of the impact of social policies on children and families, particularly those who are Latino/a, African American and Asian American. Assessment of organizational structures and policy implementation. Development of strategies to promote well-being and social change.
Prerequisite: SCWK 204.
Normal Grade Rules
3 units

SCWK 261. Social Work Practice with Children
Skills and knowledge in working with high-risk children and families from an advanced generalist perspective. Focus on understanding of child and family development as well as assessment and intervention at various levels in a transcultural context.
Notes: An elective.
Normal Grade Rules
3 units

SCWK 262. Social Work Practice with Adolescents
Skills and knowledge in working with diverse populations of high-risk adolescents from an advanced generalist perspective. Focus on understanding adolescent and family development as well as assessments and interventions at various levels in a transcultural context.
Notes: An elective.
Normal Grade Rules
3 units

SCWK 263. Social Work and the Law
Analytical skills to understand the legal system, its functions, organization, jurisdiction and case processing methods. An examination of the legal environment of social work practice in selected settings: domestic violence, child abuse and neglect, sexual abuse and education.
Notes: An elective.
Normal Grade Rules
3 units

This course focuses on advanced child welfare practice relevant to public and government settings. It provides a transcultural, multi-systems approach to working with children, youth, families and communities within the child welfare system, and as they intersect with community-based organizations.
Prerequisite: SCWK 231
Corequisite: SCWK 232
Normal Grade Rules
3 units

SCWK 272. Social Work in Educational Settings
Examines the promotion of well-being and social change, with emphasis on attainment of educational goals. Individual and family needs are explored in the context of educational policies, organizational dynamics, pupil adjustment and assessment, life cycle development, and advocacy.
Prerequisite: SCWK 212, SCWK 234, SCWK 220, SCWK 221.
Normal Grade Rules
3 units

SCWK 280. Policy Practice in Health/Mental Health
Critical analysis of the impact of health/mental health policies on populations-at-risk, particularly those who are Latino/a, African American and Asian American. Assessment of organizations and policy implementation. Development of strategies to promote well-being and social change.
Prerequisite: SCWK 204.
Normal Grade Rules
3 units

SCWK 281. Social Work in Health/Mental Health
Normal Grade Rules
3 units
SCWK 283. Psychopharmacology for Social Workers
Historical trends and specific cultural, ethnic, gender and age related issues of alcohol and drug use are presented. Psychotherapeutic drugs and the pharmacologic basis of medicines for psychiatric disorders and culturally competent treatment interventions for substance abuse will be discussed. Social Work program elective.
Normal Grade Rules
3 units

Examination of selected social problems related to the direct practice of social work that focus on in-depth knowledge of the problems and of the required direct practice skills and techniques.
Notes: An elective.
Repeatable for credit
Normal Grade Rules
3 units

Examination of selected social problems related to the direct practice of social work that focuses on in-depth knowledge of the problems and of the required direct practice skills and techniques across cultures.
Repeatable for credit
Normal Grade Rules
3 units

SCWK 287. Advanced Generalist Practice in Substance Abuse
An examination of clinical, policy, and practice issues regarding abuse and dependence of alcohol and other drugs. Analysis and utilization of micro, mezzo and macro considerations related to prevention, harm reduction, drug policies, and current intervention models and treatment approaches.
Notes: An elective.
Normal Grade Rules
1-3 units

SCWK 289A. Special Study A
Planning and implementation of research emphasizing culturally appropriate measures and design strategies.
First part of a two-part special project course in which students produce a professionally written project demonstrating an understanding of the knowledge base underlying social work issues and appropriate interventions.
Prerequisite: SCWK 242
Repeatable for credit
Credit / No Credit
1-4 units

SCWK 289B. Special Study B
Planning and implementation of research emphasizing culturally appropriate measures and design strategies.
Students continue their work from SCWK 289A to produce a professionally written project demonstrating an understanding of the knowledge base underlying social work issues and appropriate interventions.
Prerequisite: SCWK 289A.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

SCWK 299. Master’s Thesis or Project
Prerequisite: Admission to candidacy for the master’s degree; approval of the college’s research committee.
Repeatable for a total of 4 units.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units
This course is a foundational course designed to begin preparing students in their sophomore year or first year of transfer to SJSU to practice the leadership habits of mind and workplace skills needed to thrive in 21st century workplaces once they graduate from school. Given the increasingly competitive, globalized job marketplace, this course enables participants to cycle through rounds of interactive experiences and practice to acquire “hard” and “soft” skills needed to succeed. Students will apply these skills in real-life leadership situations and build meaningful networks of peers and adults, all while activating their personal assets and deepening their sense of self and community.

Prerequisite: ENGL 1A
Misc/Lab: 2 hours lecture/ 2 hours lab
Normal Grade Rules
3 units

SCI 105. Integrated Science Teacher Enhancement
A thematic approach to the study of relevant topics and concepts in integrated science. Development of inquiry-based, hands-on classroom activities in integrated science.

Prerequisite: Teacher credential and/or instructor consent.
Repealable for credit
Credit / No Credit
1-3 units

SCI 110. Global Themes of Science
The themes of energy, evolution, and systems & interactions are used to examine conceptual connections between biological, earth and physical sciences. Emphasis on strategies best suited to teach these unifying global themes of science.

Prerequisite: BIOL 21; GEOL 103 or Instructor consent.
Normal Grade Rules
3 units

SCI 157SL. Community Action/Community Service
See COMM 157SL
Normal Grade Rules
GE: S
3 units

SCI 180. Individual Studies
Work, under guidance, in special fields.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

SCI 184. Directed Reading
Assigned readings of selected books, journals and special papers chosen to fill gaps in training or to introduce new fields. Evaluation through weekly reports and conferences.

Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

GRADUATE

SCI 299. Master’s Thesis
Thesis development for Plan A MA Natural Science students, to be carried out under direct supervision of a faculty member and committee. Seminar presentation required upon final completion of thesis.

Prerequisite: Admission to candidacy for the master’s degree and selection of a thesis committee.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

UPPER DIVISION

SCI 103. Workshop Facilitator Training
Practical collaborative education theory and techniques for academic excellence workshop facilitators.

Prerequisite: Current appointment as AEW Facilitator.
Notes: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit

SCIENCE EDUCATION

LOWER DIVISION

SCED 005. Human Development and the Natural World
See GEOL 005.

### Academic Year 2019-2020

#### Course Descriptions

**v1**
July 1, 2019

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE

---

## UPPER DIVISION

### SCED 173. Secondary School Science

Theory and practice, instructional techniques, and materials for science in the secondary schools.  
**Pre/Corequisite:** Passage of CSET 118 and 119 and secondary science education advisor approval.  
**Normal Grade Rules**  
3 units  
**SCED 174. Training to Teach**  
This is a service learning course in which students will investigate how people learn and how to teach as they are immersed in teaching roles in the San Jose community that involve them acting as: Instructors leading small groups in science after school activities, facilitators assisting teachers with student centered activities and tutors providing personalized assistance.  
**Pre-requisites:** CHEM 001A or CHEM 030A, Math 19  
**Misc/Lab:** Lecture 3 hours/Activity 3 hours.  
**Normal Grade Rules**  
3 units  
**SCED 175. Classroom Experiences in Science Teaching**  
The goal of this hybrid online/face-to-face course is to provide students with the opportunity to complete their 45 hours of science teaching observation in California public schools while also reflecting on teaching and learning practices. The course will emphasize the multifaceted aspects of the teaching profession and most importantly will provide a forum for sharing experiences with other students who are similarly placed. The course will fulfill pre-professional teaching observation experience required of most Single Subject Teacher Credential Programs.  
**Prerequisites:** Sophomore or upper division standing. Not available to Open University Students.  
**Repeatable for credit**  
Normal Grade Rules  
1 unit  
**SCED 184Y. Student Teaching II - Classroom Teaching**  
Minimum 80-120 class hours of classroom, lab or field teaching in appropriate single subject, grades K-12 and related teaching activities/seminar.  
**Prerequisite:** SCED 173 (Science Credential Candidates must complete SCED 173 with a grade of “B” or better, “B-” not accepted) and joint approval of the Science Education Program and the Secondary Education Department. Not available to Open University Students.  
**Repeatable for credit**  
Credit / No Credit  
4 units

---

## GRADUATE

### SCED 204. Earth Systems Science for Teachers

See GEOL 204.  
**Repeatable for credit**  
**Normal Grade Rules**  
3 units  
**SCED 205. Methods of Research**  
Introduction to techniques and procedures of scientific research. Each student required to prepare and defend a working outline of a master’s thesis or project in his or her area of concentration.  
**Misc/Lab:** Lecture/seminar 3 hours.  
**Notes:** Introductory course in statistics or equivalent recommended.  
**Normal Grade Rules**  
3 units  
**SCED 220. Theories and Practices in Science Education**  
Analysis of current trends in science curriculum and instruction. Orientation for the philosophy and scope of the program. Emphasis on development of a theory of instruction and curriculum in science with implications for practice.  
**Misc/Lab:** Lecture/seminar 3 hours.  
**Notes:** Teaching experience preferred. Must be taken during first year in program. This course satisfies graduate-level GWAR in this master’s program.  
**Normal Grade Rules**  
GE: GWAR  
3 units  
**SCED 285. Seminar**  
Provides a format for the presentation and discussion of original work by faculty, guest investigators and graduate students.  
**Repeatable for credit**  
**Normal Grade Rules**  
3 units  
**SCED 297. Science Education Research**  
Research in science education under the supervision of a faculty member associated with the science education program.  
**Repeatable for credit**  
**Credit / No Credit**  
1-3 units  
**SCED 298. Research**  
Project development for Plan B MA Natural Science students, to be carried out under direct supervision of a faculty member and committee. Seminar presentation required upon final completion of project.  
**Repeatable for credit**  
**Mandatory CR/NC/RP**  
1-6 units  
**SCED 375. Colloquium in Science Education**  
Resources and innovations for science curriculum development and instruction. An interface with people and facilities which can enhance Bay Area science instruction.  
**Corequisite:** SCED 184Y or SCED 184Z.  
**Notes:** Also open to experienced teachers.  
**Credit / No Credit**  
2 units

Sociology and Interdisciplinary Social Sciences Department Courses

ASIAN AMERICAN STUDIES

LOWER DIVISION

AAS 020. Women of Color in the US
See WOMS 020.
Normal Grade Rules
GE: D2
3 units

AAS 025. The Changing Majority: Power and Ethnicity in America
See CCS 025.
Normal Grade Rules
GE: D2
3 units

AAS 033A. Asian Americans in U.S. History I
Historical and political processes shaping U.S. culture, institutions and society from before European expansion to the Civil War. Focus on the roles of workers, immigrants, and people of color from a comparative perspective. GE Area: D2
Note: Must complete the entire sequence (AAS 33A and 33B) to satisfy U.S. History, U.S. Constitution and California Government (US1,2,3).
Normal Grade Rules
GE: D2
3 units

AAS 033B. Asian Americans in U.S. History II
Historical and political factors that shaped U.S. culture, institutions and society from the mid-nineteenth century to the current era. Focus on experiences of Asian Americans as well as other immigrants and people of color. GE Area: D3, and American Institution Requirement: US1,2,3
Prerequisite: AAS 33A
Note: Must complete the entire sequence (AAS 33A and 33B) to satisfy U.S. History, U.S. Constitution and California Government (US1,2,3).
Normal Grade Rules
GE: D2
3 units

AAS 125. Filipino Experience in the United States
Filipinos in the United States beginning with immigration and culminating with analysis of past and contemporary issues facing Filipino Americans.
Normal Grade Rules
3 units

AAS 133. Introduction to Social Issues in Planning
See URBP 133.
Normal Grade Rules
4 units

AAS 145. Urban Policy and Its Impact on Inner City Residents
See AFAM 145.
Normal Grade Rules
4 units

AAS 170. Special Topics in Asian American Studies
Focus varies each semester and is announced in the schedule of classes. Repeatable for credit with program coordinator approval.
Repeatable for credit
Normal Grade Rules
3 units

AAS 175. Asian American Communities
Asian American demography, institutions and contemporary issues. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Note: All of SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

AAS 180. Individual Studies
Individual study and research.
Prerequisite: Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-4 units

AAS 185. Multicultural Perspectives within American Society
Examination of historical and sociocultural perspectives of American ethnic minorities. Theoretical and methodological approaches to the study of American ethnic minorities. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
3 units

AAS 186. The Vietnamese Experience in America
The experience of Vietnamese refugees from their exodus after the end of the Vietnam War in 1975 to their resettlement in America, emphasizing processes by which a new immigrant group is incorporated into the society.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

AAS 190. Internship
On-site experience with an Asian American community organization. Regular class meetings scheduled to discuss knowledge, skills and ideas related to the internship experience. Repeatable for credit with program coordinator approval.
Prerequisite: AAS 33B or instructor consent
Repeatable for credit
Credit / No Credit
1-4 units

AAS 192. History of Japanese Americans
The Japanese in America from approximately 1800. Includes relocation, wartime conditions, post-war history and contemporary situations.
Normal Grade Rules
3 units

SOCIOLOGY

LOWER DIVISION

SOCI 015. Statistical Applications in the Social Sciences
Introduction to statistical applications, particularly statistical inference, including central tendency, variation, normal distributions, probability, estimation, hypothesis testing, measures of association, correlation, linear regression and the analysis of variance. GE Area: B4
Prerequisite: Math Enrollment Category M-I, M-II, or M-III, or completion of a GE Area B4 course with a grade of C- or better. Corequisite weekly supported instruction required for Enrollment Category M-III, and recommended for M-II.
Normal Grade Rules
GE: B4
3 units

SOCI 016. The Vietnamese Experience in America
The experience of Vietnamese refugees from their exodus after the end of the Vietnam War in 1975 to their resettlement in America, emphasizing processes by which a new immigrant group is incorporated into the society.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units
SOCI 057. Community Involvement and Personal Growth
Human development in community context, with an emphasis on civic responsibility. The influence of community engagement on individual physiological, social/cultural, and psychological well-being. Participation in a service-learning project in a multicultural organization. GE Area: E
Normal Grade Rules
GE EE
3 units

SOCI 080. Social Problems
Sociological analysis of selected contemporary social problems such as housing and homelessness, economy and employment, environment and consumerism, family and divorce, crime and drugs, politics and media, race and gender, wealth and poverty, war and peace. Required for majors. GE Area: D3
Normal Grade Rules
GE D3
3 units

SOCI 100W. Writing Workshop
Practice in improvement of writing and research skills appropriate to the field of sociology, including formal reports, journals and articles. GE Area: Z
Prerequisite: Required for Sociology Majors, SOCI 1, A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE Z
3 units

SOCI 101. Social Theory
Comparative analysis of micro and macro sociological theories and their origins, including, but not limited to, conflict theories, consensus theories, structural functionalism, symbolic interaction and recent theoretical developments. Required for majors.
Prerequisite: SOCI 1 (or equivalent) and upper division standing.
Pre/corequisite: SOCI 100W
Normal Grade Rules
3 units

SOCI 102. Introduction to Statistics
Introduction to measures of central tendency, variation, correlation and regression, probability, estimation and hypothesis testing.
Prerequisite: SOCI 1 (or equivalent).
Normal Grade Rules
3 units

SOCI 103. SPSS Computer Analysis
Statistical analysis of social science data using SPSS. Online course with periodic required on-campus meetings.
Prerequisite: SOCI 1 (or equivalent) and must have completed or be concurrently enrolled in an introductory statistics course.
Misc/Lab: Activity 2 hours.
Normal Grade Rules
1 unit

SOCI 104. Quantitative Research Methods
Quantitative research methods including survey research design, hypothesis formulation, questionnaire and interview design, scaling, sampling and data preparation and SPSS analysis. Completion of a class research project plus individual research reports. Required for majors.
Prerequisite: SOCI 1 or equivalent, SOCI 15 or SOCI 102 or approved Statistics course from another school; SOCI 100W, SOCI 101 and upper division standing.
Normal Grade Rules
3 units

SOCI 104B. Advanced Quantitative Research Methods
Quantitative research project, typically applied, focused on a particular topic. Emphasis is given to research on local issues. Students will define research problems, design appropriate data gathering methods, collect data, conduct data analyses, and submit written research reports in professional formats.
Prerequisites: SOCI 100, SOCI 15 or SOCI 102, SOCI 100W, SOCI 101, SOCI 104.
Normal Grade Rules
3 units

SOCI 105. Qualitative Research Methods
Philosophy and logic of research design, interviewing techniques, field methods, issues of participant observation, theoretical perspectives, content analysis and qualitative microcomputer techniques. Required for Sociology majors.
Prerequisite: SOCI 1 or equivalent, SOCI 100W, SOCI 101 and upper division standing.
Normal Grade Rules
3 units

SOCI 105B. Advanced Qualitative Research Methods
Involves planning and conducting an in-depth research project utilizing interviews and/or participant observation. Students will design research project, collect data and take field-notes, code and analyze data, and write-up results. Project may involve exploration of a local issue.
Prerequisites: SOCI 100, SOCI 100W, SOCI 101 and SOCI 105.
Normal Grade Rules
3 units

SOCI 106. Global Society
Examination of global social issues, evaluation of the impact of change on world communities and analysis of the response of specific groups to emerging problems and opportunities. Required for majors.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 118. Sociology of Human Rights and Social Justice
Analyze meanings and practices of human rights violation and promotion by exploring the social consequences of issues such as war crime, sexism, migrant rights, and social displacement and by reflecting on prevailing and alternative institutions for social justice.
Prerequisite: SOCI 101 or equivalent
Normal Grade Rules
3 units

SOCI 120. Contemporary Social Issues
A current issue in contemporary society. Content differs each semester. Repeatable for 6 unit maximum of SOCI 120, SOCI 123 or any combination.
Prerequisite: SOCI 101 or equivalent.
Repeatable for credit
Normal Grade Rules
3 units

SOCI 122. Women in the Second Half of Life
See GERO 122.
Normal Grade Rules
3 units

SOCI 127. Community-Based Participatory Research
See ENVS 127.
Normal Grade Rules
3 units

SOCI 140. Sociology of Media
Examines the historical development of popular mass media and its role in contemporary society. Explores the relationship between culture, social behavior, and various media forms. Analyzes how gender, race, class, and sexuality have been depicted and represented in media images.
Prerequisite: SOCI 101.
Normal Grade Rules
3 units

SOCI 141. Environmental Sociology
This course will analyze how human beings interact with their environment from both macro and micro sociological perspectives. The course will address a number of other relevant topics, including environmental classism, environmental racism and policy responses to environmental problems.
Prerequisite: Upper Division Standing
Normal Grade Rules
3 units
SOCI 142. Critical Native American Studies
Investigation of current and historical issues Indigenous peoples in the United States face or have faced. Unpacks the complex relationship Native nations have developed with the United States, and the impact the government-to-government relationship has on Indigenous societies.
Normal Grade Rules
3 units

SOCI 145. Community Mental Health
See HS 145.
Normal Grade Rules
3 units

SOCI 146. Work, Power, and Leisure
Explores power in organizational settings where we work and play, and how those settings affect the family, the economy and communities. Settings examined may include corporations, cooperatives, social change organizations, community organizations, non-profit organizations such as hospitals and schools.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 151. Violence in the Family
A sociological examination of violence in families focusing on the causes and consequences of violence and on the ways in which various social institutions and community agencies respond to violence among intimates.
Prerequisite: SOCI 1.
Normal Grade Rules
3 units

SOCI 154. Sociology and Non-Conforming Behavior
Sociological analysis of behavior outside of social conventions including crime, mental illness, suicide and chemical dependency.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 160. Immigration and Identity
Examination of topics related to immigration and population movements. Includes the historical context of major migrations, legal, political and social issues and debates, opportunities, prejudices, immigrant communities, intergenerational tensions, and social and personal identity pressures.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 161. City Life
The city as a setting for diverse lifestyles. Challenges facing urban dwellers and adaptive strategies they take. Comparison of city, suburb and rural countryside as social environments.
Prerequisite: Upper Division or instructor consent.
Normal Grade Rules
3 units

SOCI 162. Race and Ethnic Relations
Analysis of racial and ethnic groups in American society, contacts and conflicts; prejudice and discrimination; dominant and subordinate group status; social structure of racial and ethnic inequality within society. Comparison of global race and ethnic relations. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LHD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

SOCI 163. Social Change
Analysis of causes, consequences and the role of individuals, organizations and social structures in producing social change.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 164. Social Action
The tactics and strategies of social action. Topics may include applying social action to the local community, studying current and past U.S. and international social action organizations, or examining theories of social movements. Repeatable once when content changes.
Prerequisite: SOCI 1 or equivalent.
Repeatable for credit
Normal Grade Rules
3 units

SOCI 165. Poverty, Wealth and Privilege
An examination of the causes and consequences of inequality along the dimensions of social class, race/ethnicity, gender, citizenship status, and/or sexualities. Approach may be local, national or global.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 166. Medical Sociology
Sociological analysis of medical and mental health institutions, values and roles. Patient-doctor interaction, influence of hospital structure on health care, social class and illness, cultural determinants of illness and related areas of old age (gerontology) and death.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 169. Political Sociology
Analysis of cultural, social and institutional foundations of political policies and actions. Emphasis on patterns affecting political behavior and processes in the industrialized and developing countries.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 170. Sociology of Family
Examines the historical development of family in the context of social, cultural, political, and economical inequalities, and how intersections of gender, race, class, nationality, sexuality, and age impact understandings of family and intimacy. Explores relationships within families and new family forms.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 171. Person and Society
Analyzes our “self” as socially created and maintained through everyday interactions. Explores how individuals manage and protect self identity in settings, e.g. school, family, work. Effects of race/ethnicity, gender, sexuality, and age on definitions of self and reality.
Prerequisite: SOCI 1 or instructor consent.
Normal Grade Rules
3 units

SOCI 172. Lesbian, Gay, Bi, Transgender Studies
Explores lesbian, gay, bisexual, transgender, and intersex communities. Analyzes sexual behavior, attitudes, and identities from historical, cross-cultural, and “insider” and “outsider” perspectives. Presents social reactions to LGBT movements and persons. Includes current stereotypes, misinformation, and movements to achieve equality.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 173. Socialization and Identity
Personality formation in the context of family, social interaction and institutions of socialization such as workplace, family and community. Emphasis on childhood and the social processes that mold basic beliefs and values in the formation of adult identity.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units

SOCI 174. Sexualities
Examines diverse social constructions of sexual intimacy, meanings, identities, practices, and power embedded in relationships, communities and organizations. Sociological themes of morality, control, sexual citizenship, science and the production of sexual subjects, and the political economy of sex may be examined.
Prerequisite: SOCI 1 or equivalent.
Normal Grade Rules
3 units
SOCI 175. Sociology of Masculinities and Femininities
Examination and analysis of social construction of gender through interaction and social institutions. Explores gender-based identities and how intersections of gender, race, class, and sexuality shape men’s and women's experiences. Examines theories of gender and gender-based social movements.
Prerequisite: SOCI 001.
Normal Grade Rules
3 units

SOCI 176. Sociology of Everyday Life
Examination of micro-sociology, small group processes, and interactions. Using the framework of Everyday Life, this includes studies of power, status, communication, cooperation, conflict resolution, task performance. Provides understanding of small formal and informal groups, work groups and intimate relationships.
Prerequisite: SOCI 001 or instructor consent
Normal Grade Rules
3 units

SOCI 177. Sociology of Education
This course applies sociology of education theory to the analysis of the relationship between society and education. The course focuses on race/ethnicity, class and gender in the U.S. educational system.
Prerequisites: Upper division standing or instructor consent
Normal Grade Rules
3 units

SOCI 178. Sociology of Childhood
Examination of sociological issues, theories, and research on childhood from infancy to adolescence, including the role of social institutions in shaping the childhood experience and the emergence of peer cultures that change societies.
Prerequisite: SOCI 001
Normal Grade Rules
3 units

SOCI 179. Sociology of Higher Education
This course will examine the institution of higher education and its relationship to and with society. The course will address a number of other relevant topics, including educational inequalities, student debt and consequences of policy.
Prerequisite: Upper Division Standing
Normal Grade Rules
3 units

SOCI 180. Individual Studies
Prerequisite: Instructor consent and department chair approval.
Repeatable for credit
Credit / No Credit
1-4 units

SOCI 181. Service Internship
Supervised placement in practical situations where sociologists are employed, including correctional services, community planning, industry, research, social action and social welfare agencies.
Prerequisite: SOCI 1 or equivalent, SOCI 100W, SOCI 101 and upper division standing, or graduate standing.
Department Chair approval.
Repeatable for credit
Credit / No Credit
1-6 units

SOCI 181B. Sociology Career Capstone
Capstone course to expand undergraduate senior opportunites and options. Analyzes trends in sociology, explores employment and careers, reflection and assessment of learning in the major.
Prerequisites: SOCI 001, SOCI 100W, SOCI 101, and SOCI 104 or SOCI 105.
Note: Students must have taken at least one of the required research method courses before enrolling in the capstone course.
Normal Grade Rules
3 units

SOCI 193. Behavioral Science in Practice
Preparation and writing of an original project. Repeatable for a total of 4 units.
Prerequisite: Sociology Honors Program student.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

SOCI 199H. Senior Honors Thesis
Preparation and writing of an original project. Repeatable for a total of 4 units.
Prerequisite: Sociology Honors Program student.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

GRADUATE

SOCI 200. Sociological Practice
Introduces graduate students to the theoretically informed practice of sociology with a particular emphasis on the analysis of social problems. Covers topics such as program evaluation, community and institutional research, and policy advocacy.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

SOCI 201. Graduate Sociological Theory
Introduction to the theories and concepts sociologists use in the study of society. The course emphasizes contemporary social theories, grounded in the classical canon of Marx, Durkheim, and Weber: Application of theory to contemporary social problems. Content may vary with instructor.
Prerequisite: Graduate Standing.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR

SOCI 204. Quantitative Data Analysis
Covers foundations of statistical analyses as well as the statistical techniques most commonly practiced by quantitative social science researchers such as univariate descriptive statistics, bivariate relationships, and multivariate modeling.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

SOCI 205. Seminar in Qualitative Research Methods
Involves planning and conducting an in-depth research project utilizing interviews and/or participant observation. Students will design research project, collect data and take field-notes, code and analyze data, and write-up results. Project may involve exploration of a local issue.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

SOCI 216. Seminar in Global Topics
Explores selected areas of interest in the sociological study of social processes, institutions, and organizations globally, transnationally, and internationally. Course content varies.
Prerequisite: Graduate Standing
Repeatable for credit
Normal Grade Rules
3 units

SOCI 223. Seminar in Sociological Issues
Analysis of a current issue in sociology which is not covered by other graduate seminars. Content differs each semester. Repeatable once with advisor consent when content changes.
Repeatable for credit
Normal Grade Rules
3 units

SOCI 224. Seminar in Deviance and Social Control
Historical and comparative theories of deviance, its function in society and its relation to formal and informal systems of regulation and control.
Normal Grade Rules
3 units

SOCI 262. Seminar in Race and Ethnic Relations
Analysis of sociological theories of race relations and racism, social structural conditions of race and racial identity formation, society’s institutional policies and practices that affect racial inequality.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units
SOCI 263. Seminar in Social Change
Theories of the origins and processes of social change. Analysis of efforts to control or to produce social change. Problems of research on the causes, effects and prediction of social change.
Normal Grade Rules
3 units

SOCI 270. Seminar in Sociology of Family
Comparative analysis of institutional forms and family small group systems including alternative life styles and minority families. Problems of the family. Changes in family roles and in family law.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

SOCI 275. Seminar in Gender Issues
Analysis of contemporary gender issues including an examination of existing gender theories and ways in which gender intersects with other forms of inequality. Focus on social institutions such as family, media, and workplace in order to examine the social, economic, and cultural factors that create gender and shape understandings of femininity and masculinity.
Prerequisite: Graduate Standing
Repeatable for credit
Normal Grade Rules
3 units

SOCI 281. Internship in Sociology
Supervised placement in practical situations where sociologists are employed: correctional services, community planning, industry, counseling agencies and others. Course is repeatable for a total of 6 units.
Notes: Open to graduate students by arrangement with the department.
Repeatable for credit
Credit / No Credit
1-6 units

SOCI 298. Special Study
Advanced individual research and projects. May not be related to thesis topic. Course is repeatable for a total of 4 units.
Prerequisite: Consent of instructor and approval by graduate advisor or department chair.
Repeatable for credit
Mandatory CR/NC/CRP
1-4 units

SOCI 299. Master’s Thesis or Project
Prerequisite: Consent of thesis committee chair and approval by graduate advisor or department chair.
Repeatable for credit
Mandatory CR/NC/CRP
1-6 units

UPPER DIVISION

SOCI 1290R. Culminating Experience Supervision
Continuing analysis of data and writing of thesis.
Prerequisites: Outstanding RP in a preceding semester for a Thesis or Special Project course.
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit

WOMEN’S STUDIES

LOWER DIVISION

WOMS 005Q. Gender, Race & Sexuality in Media
This course uses a cultural studies approach to explore the production and consumption of contemporary media in our everyday lives with a focus on race, class, gender, sexuality, and nation. CE Area: D1
Prerequisite: First term freshmen only.
Notes: All courses with a ‘Q’ suffix are designated as First Year Experience courses.
Normal Grade Rules
CE: D1
3 units

WOMS 010. Women, Gender, and Sexuality Studies
Interdisciplinary introduction to core concepts and analytical tools addressing the diversity of human experience cross cut by gender, sexuality, embodiment, and class location. Students will become familiar with key contemporary and historical debates in both global and local contexts. CE Area: D1
Normal Grade Rules
CE: D1
3 units

WOMS 020. Women of Color in the US
Constructs knowledge of the historical and contemporary experience of women of color. Focuses on Native American, African American, Latina, and Asian American women and considers contributions they have made to the shaping of the nation. CE Area: D2
Normal Grade Rules
CE: D2
3 units

UPPER DIVISION

WOMS 101. Sex, Power, and Politics
Multidisciplinary introduction to traditional and new images, roles, experiences, ethnic similarities and differences, and contemporary problems of American women. GE Area: S Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended. Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
CE: S
3 units

WOMS 102. The Global Study of Women
This course will be a survey of literature on the interaction of gender and forces of globalization. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Notes: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
CE: V
3 units

WOMS 107. Psychology of Women
See PSYC 107.
Normal Grade Rules
3 units

WOMS 112. Women in the Global Economy
Women’s participation in the economy, US and internationally: paid employment, consumption, subsistence labor, reproduction, volunteerism. It connects daily life activities with international economic trends, with particular attention to race, class, implications for families and strategies for equity.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 114. Politics of Mothering and Reproduction
Explore contemporary definitions and values inscribed in issues pertaining to mothers and reproduction. It will be built upon three literatures: discourses of law and legality, discourses of nature and science, and discourses based in feminist thinking.
Prerequisite: Upper Division standing or instructor consent.
Normal Grade Rules
3 units
WOMS 120. Special Topics in Women's Studies
Focus announced in the schedule of classes. Repeatable for credit with program coordinator approval.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 121. Philosophy and Feminism
See PHIL 121.
Normal Grade Rules
3 units

WOMS 122. Women in the Second Half of Life
See GERO 122.
Normal Grade Rules
3 units

WOMS 131. Gender, Sexuality, and Religion
See RELS 131.
Normal Grade Rules
3 units

WOMS 156. Black Women Writers: Race, Culture and Resistance
See AFAM 156.
Normal Grade Rules
3 units

WOMS 160. Queering Gender, Race, and Class
Queer analysis of race and class diversity, and social, political, and economic hierarchies of race, class, and gender in the U.S. Topics may include sexuality, racism, LGBT experience, and the welfare system.
Normal Grade Rules
3 units

WOMS 169. Sexualities and the Body
This course explores the social construction of sexuality and the body from a feminist perspective. It investigates various aspects of sexuality and gendered bodies including identity, community, and social movements based on intersections of race, gender, sexuality, culture, and nation.
Prerequisite: Upper Division Standing or instructor consent.
Normal Grade Rules
3 units

WOMS 175. Sociology of Masculinities and Femininities
See SOCI 175.
Normal Grade Rules
3 units

WOMS 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Minor or emphasis in women's studies.
Repeatable for credit
Credit / No Credit
1-4 units

WOMS 182. Women in Literature
See ENGL 182.
Repeatable for credit
Normal Grade Rules
4 units

WOMS 187. Feminist Perspectives on Gender and Education in the U.S.
The role of gender in the educational system in the United States from both a historical and contemporary context. We will focus on the significance of schools as the primary socializing institution for boys and girls.
Prerequisite: Junior standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 189. Islamic Perspectives on Gender
Contemporary feminist theories analyze premises of gender roles in Islamic cultures and variety of sexual expressions. This class will sensitize students to the diversity of Islamic cultures and communities, in addition to geographical, political, and social locations, like ethnicity and class affect the gender debate in Islamic perspectives.
Prerequisite: Upper Division Standing or Instructor Consent.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 190. Internship
On-site experience with community or campus organization or other agency involved with women's issues. Individual and group advising augments the experiential learning. Repeatable for credit with program coordinator approval.
Prerequisite: WOMS 101 or instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units
Technology Courses

TECHNOLOGY

LOWER DIVISION

TECH 020A. Computer-Aided-Graphics
Introduction to Computer-Aided-Grapical communication tools. Orthographic projections, section and auxiliary views and dimensioning standards. Development of visualization and technical sketching skills in conjunction with orthographic and pictorial projections. Dimensioning and tolerancing utilizing 2D and 3D commercially available software.
Misc/Lab: 1 hour lecture and 3 hours lab
Normal Grade Rules
2 units

TECH 025. Introduction to Materials Technology
Designed to introduce students to materials used to make consumer and commercial products. Including metals, plastics, and composites. How materials impact our lives and standard of living. Materials selection and the role of experimentation, testing and evaluation procedures.
Prerequisites: Math 008 or equivalent
Corequisites: Chem 001A or 030A or equivalent
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 030. Introduction to Python Programming
Introduction to Python programming, data types, arithmetic and strings, conditional execution, loops, functions, lists and files, exception handling, sets and dictionaries. Prerequisite: MATH 71 or MATH 30 or MATH 30P.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 031. Quality Assurance and Control
Introduction to concepts and statistical methods that companies use to manage and improve quality. Sampling inspection, statistical process control, quality function deployment, cost of quality, design of experiment and Taguchi’s method for designing in quality.
Prerequisite: BUS 090 or equivalent.
Normal Grade Rules
3 units

TECH 041. Machine Shop Safety
Introduction to basic machine shop safety and skills. Fabricating of mechanical components and assemblies from engineering drawings, performing tolerance inspection, developing fabrication process plans.
Prerequisite: ME 020, TECH 020, CE 020 or equivalent.
Repeatable for credit
Normal Grade Rules
1 unit

TECH 042. Manufacturing and Machine Shop Projects and Practices
Individual manufacturing processes and machine shop practices. Fabrication of mechanical components and assemblies in fulfillment of senior, course, special, and approved student club assignments and projects.
Prerequisites: TECH/ME 041 (with grade “C-” or better).
Misc/Lab: 3 hours lab
Repeatable for credit
Credit / No Credit
1 unit

TECH 045. Sustainable Facilities Design & Planning
Construction, planning, and maintenance of physical facilities and equipment for sustainable manufacturing operations. Green and sustainable practices and standards, plant facilities layout/design, regulatory and environmental compliance, safety/security and energy conservation. Production line planning and OSHA and NIOSH standards.
Prerequisite: ME/TECH 020, CE 020 or equivalent
Normal Grade Rules
3 units

TECH 046. Machine Operation and Management
Prerequisite: TECH 020.
Corequisite: TECH 041.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 054. Sustainable Facilities Design & Planning
Construction, planning, and maintenance of physical facilities and equipment for sustainable manufacturing operations. Green and sustainable practices and standards, plant facilities layout/design, regulatory and environmental compliance, safety/security and energy conservation. Production line planning and OSHA and NIOSH standards.
Prerequisite: ME/TECH 020, CE 020 or equivalent
Normal Grade Rules
3 units

TECH 063. Analog and Digital Circuits
Logic gates emphasizing TTL and CMOS Design techniques. Combinational circuits, counters, registers, multiplexers, Semiconductor theory. Operational amplifiers. Device applications, signal generators, voltage regulators and power supplies.
Prerequisite: TECH 060, MATH 71 or MATH 30 or MATH 30P.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 065. Networking Theory and Application
Co/Prerequisite: TECH 060
Normal Grade Rules
3 units

TECH 066. Network Administration
Prerequisite: TECH 065.
Misc/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

TECH 067. Introduction to Internet of Things
Introduction to Internet of Things (IoT) fundamentals, development of the knowledge and skills required for related technologies and hands-on, problem-solving experience. Designing and connecting IoT devices to capture data and control the physical world.
Prerequisite: TECH 060, TECH 065.
Misc/Lab: Lec 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

TECH 068. Internet of Things Systems
Cyber-physical systems as control systems, including problem formulation, mathematical representation, and analysis: IoT system components of switching, routing, security, wireless, virtualization, and their integration into end-to-end IoT systems.
Prerequisite: TECH 067.
Co-Requisite: CMPE 30.
Misc/Lab: Lec 2 hours/Lab 3 hours.
Normal Grade Rules
3 units
UPPER DIVISION

TECH 115. Automation and Control
Theory and application of automation elements including analog and digital sensors, controllers, indicators, actuators. Control modes for proportional, derivative, and integral control systems. Hands-on integration practices among PLC, robots, automatic identification devices, computers, and other industrial equipment. Prerequisite: TECH 060, PHYS 002A, PHYS 002B, MATH 071.
Misc/Lab: 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 136. Software Quality Management
Software quality management standard processes and techniques, certification standards. Web programming application. Mobile network applications. Software testing methodology. Role of software quality managers in a computer network system organization. Prerequisite: CMPE 030, BUS2 090, TECH 173.
Misc/Lab: 2hrs lecture/3hrs lab
Normal Grade Rules
3 units

TECH 139. Quality Management
Planning, designing and managing the performance of quality in an organization. Synthesis, modeling and application of total quality management to case studies in manufacturing and service industries. Prerequisite: TECH 031.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 140. Green & Sustainable Product Design
Advanced product and process design with a focus on green and sustainable design and on manufacturing green products. Analysis of process and material selection for environmental impact. Composite and advanced materials processing. Laboratory exercises and planning for green manufacturing. Prerequisite: ME/TECH 020, CHEM 001A or CHEM 030B, MATH 071 or MATH 030 or MATH 030P.
Misc/Lab: Lecture 3 hours/Lab 3 hours
Repeatable for credit
Normal Grade Rules
3 units

TECH 143. Polymers and Composites
Fundamental aspects of modern manufacturing technology using polymeric and composite materials. Hands-on lab exercises in casting, molding, coating, thermoforming and fiber reinforcement. Concepts of design, analysis and fabrication. Prerequisite: TECH 020, CHEM 001A and PHYS 002A.
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

TECH 145. Lean Manufacturing
Exploration and practice of techniques for reducing waste to optimize the value stream in both manufacturing and non-manufacturing environments. Toyota Production System, Value Stream Mapping, 7 Wastes, 5S, Just-in-Time, TPM, Kaizen. Prerequisite: BUS 140 or BUS 145 or ISE 140.
Normal Grade Rules
3 units

TECH 146. 3D Printing and Applications
Introduction to technologies in 3D printing, equipment, processes, and materials. Applications for a variety of markets and industry in accelerating time to market for products, improving manufacturing operations, and efficiency. Hands-on experience through CAD design to product realization. Prerequisite: TECH 20A, TECH 25, TECH 140.
Normal Grade Rules
3 units

TECH 147. Green Manufacturing Analysis & Management
Design, operation, and control of green production systems using techniques to promote sustainability and minimize environmental impact. Emphasis is on the physical design of high performance manufacturing and will include production flow, scheduling, work flow, layout of manufacturing plants, and material handling. Prerequisite: TECH 045, TECH 046, TECH 115.
Pre/corequisite: TECH 140.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 149. Computer Integrated Manufacturing Systems
Integration of all aspects of a manufacturing enterprise using computer-integrated manufacturing (CIM) technologies. Design development and implementation of manufacturing systems using project management techniques and team work. Prerequisite: TECH 145, TECH 147.
Pre/Co-requisite: TECH 160.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Repeatable for credit
Normal Grade Rules
3 units

TECH 150. Microprocessors Theory and Applications
Microprocessor concepts and applications to testing and data management. Assembly language and high-level language programming and techniques, including assembling, compiling, debugging. Current trends and issues in microprocessors. Prerequisite: TECH 063, TECH 115, and CMPE 030 or CS 049 or CS 049J.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 160. Telecommunications Systems
Normal Grade Rules
3 units

TECH 163. Wireless Communications Technologies
Misc/Lab: Lecture 3 hour/Lab 3 hours.
Normal Grade Rules
3 units

TECH 165. Control Systems
Theory and applications of feedback systems, transfer functions and block diagrams. Transducers, analog and digital controllers, signal conditioners and transmission. Analysis, testing, and troubleshooting of electronic systems with feedback. Prerequisite: TECH 063, TECH 115, and CMPE 030 or CS 049C or CS 049J.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 167. Control Systems
Theory and applications of feedback systems, transfer functions and block diagrams. Transducers, analog and digital controllers, signal conditioners and transmission. Analysis, testing, and troubleshooting of electronic systems with feedback. Prerequisite: TECH 063, TECH 115, and CMPE 030 or CS 049C or CS 049J.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 169. Applied Electronic Design
Design, test, simulation, development and implementation of electronic systems for control of industrial processes using project management techniques and team work. Hardware, software, and system interfacing. Prerequisite: TECH 160.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

TECH 170. Connected Products Applications
Introduction to connected products and applications, defining user (UX) for web and software and UX for Connected Things. Presenting models of human-computer interaction, design processes and product/service definition and strategy. Cases studies of IoT systems and design. Prerequisite: TECH 068.
Misc/Lab: Lec 2 hours/ Lab 3 hours.
Normal Grade Rules
3 units
TECH 171. Network Security & Prevention Management
Approaches to IT system security including physical, application, operating system, cyber- and network security. Using switches, routers, adaptive security appliance, firewalls, and intrusion protection systems to implement comprehensive security policies. IPv4 and IPv6 security, VPN technology.
Prerequisite: TECH 065, TECH 066, TECH 170. 
Misc/Lab: Lec 2 hours/Lab 3 hours. 3 units. Normal Grade Rules.

TECH 172. Database Server System Management
Practical big data analytics and management systems. Issues and problems involved in massive on-line repository systems. Current practical techniques for satisfying the needs of such systems. Current approaches that are likely to provide a basis for tomorrows solutions.
Prerequisite: TECH 171, TECH 173, TECH 179. 3 units. Normal Grade Rules.

TECH 173. Cloud Computing System Management
Technologies, hardware and software applications in cloud computing. Implementation of cloud computing in the enterprise through exploration of public and private clouds, comparison. Performance monitoring of data traffic flow and process improvement for the required server systems.
Normal Grade Rules 3 units.

TECH 179. Cyber Security System Management
Key issues associated with protecting information assets. Levels of protection and responses to security incidents. Planning for security and management of the system. Application of software, cryptography, encryption methods. Mobile and cloud systems security.
Normal Grade Rules 3 units.

TECH 180A. Individual Studies in Electronics and Computer Technology
Prerequisite: Upper division standing and instructor consent. Not available to Open University Students.
Repeatable for credit Credit / No Credit 1-4 units.

TECH 180B. Individual Studies in Manufacturing Technology
Prerequisite: Upper division standing and instructor consent. Not available to Open University Students.
Repeatable for credit Credit / No Credit 1-4 units.

TECH 180H. Individual Studies in Materials Technology
Prerequisite: Upper division standing and instructor consent. Not available to Open University Students.
Repeatable for credit Credit / No Credit 1-4 units.

TECH 180J. Individual Studies in Technology Issues
Prerequisite: Upper division standing and instructor consent. Not available to Open University Students.
Repeatable for credit Credit / No Credit 1-4 units.

TECH 190. Senior Seminar in Technology
Current industry analysis and career development. Leadership skills for a technology professional. Ethics for technology managers.
Prerequisite: Graduating senior, major form completed Normal Grade Rules 3 units.

TECH 190A. Senior Project I
Half of one-year senior team design projects. Professional Development and Proposal preparation with feasibility plans, specifications, oral/written reports, and career and professional seminar participation. Project proceeds over two semesters from problem definition and design to validation, prototype construction, and testing.
Prerequisite: Completion of major lower division requirements, senior standing, and consent of instructor.
Normal Grade Rules 3 units.

TECH 190B. Senior Project II
Second half of a one-year team project carried out under faculty supervision. Review, construction, testing, and evaluation of the design from Tech 190A culminating in demonstrations and written and oral presentations to faculty and peers.
Prerequisite: TECH 190A with a C or better Normal Grade Rules 3 units.

TECH 195. Cooperative Internship
Provides an educational strategy that links classroom learning and student interest with the acquisition of knowledge in an applied work setting. Students undertake a significant experiential learning opportunity, typically with a company, non-profit, governmental, or community-based organization.
Prerequisite: Upper division standing, course contract, instructor consent.
Credit / No Credit 1-3 units.

TECH 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules 3 units.

TECH 199A. Special Topics in Electronics & Cmp Tech
Current industry analysis and career development. Leadership skills for a technology professional. Ethics for technology managers.
Prerequisite: Instructor consent. Repeatable for credit Normal Grade Rules 3 units.

TECH 199B. Special Topics in Manufacturing Systems
Special topics in Manufacturing Systems. Content varies from semester to semester. Repeatable for a total of 6 units.
Prerequisite: Instructor consent. Repeatable for credit Normal Grade Rules 3 units.

TECH 200. Research Methods for Engineering and Technology
Current applied research methods applied to problems in engineering, technology, and other technical fields. Exposure to current literature, scientific/technological research ethics, research and experimental design and methods, skills in research proposal development and locating funding.
Prerequisite: STAT 115 (or equivalent) and graduate standing. Normal Grade Rules 3 units.
TECH 230. Six-Sigma and Continuous Improvement Systems Management
Six-Sigma quality systems for design production and business processes. Statistical foundations, implementation strategies, and practical industrial applications. Methods and practices of achieving continuous quality improvement, defect reduction, project planning and management methods to achieve universal participation in process improvement.
Prerequisite: STAT 115 or equivalent. Normal Grade Rules 3 units

TECH 231. Systems Reliability and Maintainability
Analysis of models for systems reliability including static, dynamic, and probabilistic engineering models; reliability estimation and optimization, life cycle prediction techniques; failure modes and effects analysis; maintainability prediction and analysis.
Prerequisite: TECH 230. Normal Grade Rules 3 units

TECH 232. Advanced Statistical Process Control
Analysis of advanced statistical process control (SPC) systems for monitoring and controlling process performance. Statistical methods for sample selection, probability theory, partition of variation, blanket studies, out-of-control action plans, process capability measurement, and SPC implementation strategies and analysis.
Prerequisite: STAT 115. Normal Grade Rules 3 units

TECH 233. Design and Analysis of Experiments
Analysis of experimental design strategies for process and design improvement. Industrial application of single factor, multi-factor, and optimization designs. Experimental analysis using t-tests, ANOVA, Chi-square, linear and multiple regression techniques. Model building and model validation.
Pre/Corequisite: TECH 232. Repeatable for credit Normal Grade Rules 3 units

TECH 234. Quality Systems Management: ISO 9000 and 14000
Strategies for developing and implementing ISO standards: Project management and planning, cost estimation, supply chain management, audit plans and documentation systems for ISO system compliance. Analysis of ISO 9000 and 14000 quality systems for product design, development and production.
Normal Grade Rules 3 units

TECH 235. Measurement Systems and Analysis
Analysis of variables and attributes methods for measurement systems analysis and control including: repeatability, reproducibility, accuracy, linearity and stability. A survey of measurement and testing systems, dimensional metrology, destructive and nondestructive testing, calibration methods, and inspection equipment and techniques.
Prerequisite: TECH 232. Normal Grade Rules 3 units

TECH 239. Design Assurance in Product Development
Analysis of product development strategies, understanding design constraints and market conditions, design and configuration control systems, documentation and revision control systems, design for manufacturability, phase review approaches for new product introduction, design reviews, and developing and maintaining design guidelines.
Prerequisite: TECH 200, TECH 230, and TECH 234. Normal Grade Rules 3 units

TECH 290. Graduate Problems
Graduate study or research of technical problems.
Prerequisite: TECH 200 and instructor consent. Not available to Open University Students. Repeatable for credit Credit / No Credit 2-4 units

TECH 298. Graduate Project
Graduate study research of professional problems.
Prerequisite: Admission to candidacy for the master’s degree and instructor consent. Not available to Open University Students.
Repeatable for credit Mandatory CR/NC/RP 2-4 units

TECH 299. Master’s Thesis
Prerequisite: Admission to candidacy for the master’s degree and instructor consent. Not available to Open University Students.
Repeatable for credit Mandatory CR/NC/RP 2-6 units

UPPER DIVISION

TECH 1290R. Culminating Experience Supervision
Continued work on thesis or project.
Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class
Note: No Degree Credit.
Repeatable for credit No Degree Credit 1 unit
Undergraduate Studies Courses

EARLY START ENGLISH

UPPER DIVISION

ESE 1001. Introduction—College Reading and Composition
This rhetoric-based course introduces students to the demands of college-level expository, analytical, and argumentative reading and writing. Students will study the relationships between authorial purpose, structure, and intended audience; types and use of evidence; the impact of rhetorical strategies; and the social, political, and philosophical assumptions that underlie the text. Students will receive feedback on their writing in every class. Full attendance and participation satisfies the Early Start requirement in English. An end of course analytical essay may be used to improve freshman English placement for SJSU students.
Prerequisite: Writing enrollment category W-III or W-IV and Undergraduate Transitory (UGT) program.
Note: No Degree Credit
Early Start Program,
1 unit

ESE 1003. Introduction to Analytical Writing
Students will submit an analytical essay on an assigned topic, master a rubric for evaluating analytical writing, peer review essays written by classmates, and then reevaluate their own writing. All deadlines must be strictly adhered to. Online course.
Prerequisite: Writing enrollment category W-III or W-IV and Undergraduate Transitory (UGT) program.
Note: No Degree Credit
Early Start Program,
1 unit

ESE 1005. Topics in Elementary Algebra
This course reviews topics from elementary algebra using an online tool called ALEKS. To fulfill the Early Start requirement, students must spend at least 15 hours using ALEKS. This course may not be used to improve freshman mathematics placement.
Prerequisite: Math enrollment category M-III or M-IV AND Undergraduate Transitory (UGT) program.
Note: No Degree Credit
Early Start Program,
1 unit

UNIVERSITY STUDIES

LOWER DIVISION

Concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data, graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis test for means and proportions, and chi-square tests. Must complete UNVS 15F/15S sequence to satisfy GE Area B4.
Misc/Lab: Lecture 1 hour / Activity 4 hours
Normal Grade Rules
3 units

UNVS 015S. Statway Part B: Statistics—Concepts & Methods
Concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data, graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis test for means and proportions, and chi-square tests. Completion with a grade of C- or better satisfies the GE Area B4 Mathematical Concepts requirement.
Prerequisite: UNVS 15F with a grade of C- or better and concurrent enrollment in UNVS 1015W.
Misc/Notes: Lecture 1 hour / Activity 4 hours
Normal Grade Rules
GE B4
3 units

UNVS 095. Special Topics in Student Leadership Development
University 95 is for students selected as staff for San Jose State University’s Summer Transition Programs (e.g., Summer Bridge Resident Assistants and Academic Coaches and Spartan Scholars Program Community Assistants and Academic Coaches). Through a series of lectures, peer-based activities, and required readings, students will explore both theoretical and practical elements of leadership.
Repeatable for credit
Normal Grade Rules
1 unit

UNVS 095A. Service Learning for Academic Leaders
Course enhances student success in college through basic and leadership skills development, pertinent academic information, and strategies for achieving personal and academic goals.
Normal Grade Rules
2 units

UNVS 095B. First Year Experience—Academic Success
University 95 is a series of lectures, project-based activities, and required readings to promote academic success. This course introduces students to university faculty, campus administrators, and campus resources. It also provides students with a wide range of information regarding various institutional academic expectations, university policies and procedures, and practical study skills to prepare them for the successful completion of courses at SJSU.
Normal Grade Rules
1-2 units

UNVS 095V. Warriors at Home: Success in College and Life
This course will assist veteran/military students in making positive transitions from military to civilian life or from deployment to post-deployment life. It provides essential tools to navigate the university, succeed in academics and interpersonal relationships, and develop a career plan.
Normal Grade Rules
3 units

UNVS 096D. Academic Skill Development
No Degree Credit
1 unit
UNVS 096E. Leadership and Creating Change
This course will introduce students to conceptual and theoretical dimensions of leading, following, and creating social change. We will be particularly interested in connecting the social construction of identities with the idea of leadership as a form of social influence. This will include an examination of issues of power, privilege, marginalization, inclusion, and social and group behavior. Students will explore literature, case examples and applications in the form of community service-learning to build their understanding of, and capacity for serving as ethical and effective community leaders, advocates and allies.

Normal Grade Rules
3 units

UPPER DIVISION
UNVS 101. Leadership and Career Accelerator
See SCI 101.
Normal Grade Rules
3 units
UNVS 120. Peer Mentor
Seminar course intended to provide the knowledge and skills necessary to be an effective Peer Mentor who will work in the new student seminars and in the Peer Mentor Center at San Jose State University.
Prerequisite: Must apply and be accepted.
Normal Grade Rules
3 units
UNVS 125M. McNair Research Colloquium
Course is designed to assist students in the SJSU McNair Scholars Program to prepare for graduate study at the doctoral level. Various faculty will lecture on topics including research methodology, research writing, protocol for presenting research results conferences, graduate school experiences and academic expectations.
Prerequisite: Students must be accepted in the SJSU McNair Scholars Program.
Repeatable for credit
Credit / No Credit
3 units
UNVS 190. University Internship
Supervised placement in student support services for advanced students.
Repeatable for credit
Credit / No Credit
1-4 units
UNVS 195H. Interdisciplinary Research Practicum
This practicum will integrate the methods of at least two disciplines to conduct basic and applied research. Undergraduate students will have hands-on experiences working with faculty from different disciplinary traditions in real research projects.
Prerequisites: Upper Division Standing
Credit / No Credit
3 units
UNVS 199. Orientation Leadership Studies
This class is designed for students selected by Student Life Center to serve as SJSU Orientation Leaders. Students will learn theoretical/practical aspects of leadership, and receive training in university policies/procedures. Curriculum will apply to students' leadership experiences.
Prerequisite: Apply and be selected (fall semester), 2.0 GPA, upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

GRADUATE
UNVS 295H. Interdisciplinary Research Graduate Practicum
This practicum will integrate the methods of at least two disciplines to conduct basic and applied research. Graduate students will have hands-on experiences working with faculty from different disciplinary traditions in real research projects.
Prerequisites: Graduate standing
Mandatory CR/NC/RP
3 units
UNVS 1015D. Statway Algebra Review Activity
Supplemental course for Statway students planning to enter a field requiring algebra or calculus, e.g., Business.
Prerequisite: UNVS 15F or instructor consent.
Corequisite: UNVS 15S.
Note: No degree credit.
1 unit
UNVS 1015W. Statway Supplemental Activity
Supplemental activity course for Statway students who complete UNVS 15F (Statway A) with a grade below C-.
Includes review of UNVS 15F and supporting activities for UNVS 15S.
Corequisite: UNVS 15S
Note: No Degree Credit.
Misc/Lab: Activity 2 hours.
1 unit
UNVS 1290R. Culminating Experience Supervision
Continued work on thesis or project writing.
Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class.
Note: No Degree Credit
Repeatable for credit
1 unit
Urban and Regional Planning Department Courses

**URBAN PLANNING**

**LOWER DIVISION**

**URBP 092. Int’l Program Studies**
Repealable for credit
Mixed Grading
1-6 units

**URBP 101. The City**
History and organization of the city, emphasizing contemporary issues and strategies for influencing urban policy. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Normal Grade Rules
GE: S
3 units

**URBP 102. Introductory Community Planning and Development Studio**
This course introduces students to the tools and techniques of working directly with diverse local communities to develop priorities and recommendations for improving neighborhood quality of life. Students learn about collaborative planning techniques via lectures, comparative studies, and group discussion.
Prerequisite: Upper Division Standing
Normal Grade Rules
4 units

**URBP 103. Local Government and Politics**
See POLS 103
Normal Grade Rules
4 units

**URBP 107. Introduction to Real Estate Development Business and Planning**
This course will introduce students to the business of real estate development and how the field of urban planning intersects with the development process. Topics addressed include development approval feasibility, land use regulation reform, and development during business cycles.
Prerequisite: Upper Division Standing
Normal Grade Rules
3 units

**UPPER DIVISION**

**URBP 110. Urbanization in the Global South**
See GEOG 110.
Normal Grade Rules
3 units

**URBP 120. Intro to Housing Economics and Policy**
Historic and policy aspects of housing, focusing on housing characteristics and public sector intervention. Topics may vary. Course may be repeated for credit when topic changes.
Prerequisite: Upper division standing or instructor consent.
Notes: Offered only occasionally.
Normal Grade Rules
4 units

**URBP 125. Urban Anthropology**
See ANTH 125.
Normal Grade Rules
3 units

**URBP 132. Creating Built Worlds**
See ANTH 132.
Normal Grade Rules
3 units

**URBP 133. Introduction to Social Issues in Planning**
Contemporary social issues related to urban and regional planning. Assessment of community social needs and resident planning. Focus on ethnic areas such as African, Asian and Mexican American neighborhoods.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

**URBP 136. Intro to Land Use and Urban Planning**
Land use and facilities planning practices in the context of American cities, emphasizing interrelationships between various land uses and public facilities and service requirements. Study of the role of public law in addressing urban growth and environmental change issues.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

**URBP 142. Introduction to Environmental Planning**
Environmental sustainability and its application to local planning. Review of regulatory tools and legislation that underlie most environmental planning and current environmental planning topics. Course may be repeated for credit when topic changes.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

**URBP 143. Intro Private Development and Planning**
Introduction to the real estate development process from preliminary product analysis through planning, construction, and marketing.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

**URBP 145. Urban Policy and Its Impact on Inner City Residents**
See AFAM 145.
Normal Grade Rules
4 units

**URBP 148. Intro Spatial Vis Tech in Urb Plan**
Lab-based course in digital visualization for urban spatial representation using industry standard software such as Adobe Photoshop, Adobe Illustrator and Trimble Sketch-Up.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

**URBP 150. Introduction to Municipal Finance**
An introduction to the theory and practice of municipal finance. Topics include public goals and externalities, the function of the budget, sources of revenues, finance tools, expenditure types, the planning programming-budgetary system (PPBS), and methods of project evaluation.
Prerequisite: Upper Division Standing
Normal Grade Rules
4 units

**URBP 151. Introduction to Urban Design**
Principles, goals and methods of the urban design process. Urban design as the comprehensive treatment of the human-made environment.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

**URBP 152. Introduction to Urban Design Studio**
Introduction to the analysis of alternative urban design policies to direct urban form development. Course may be repeated for credit when topic changes.
Prerequisite: URBP 151 or instructor consent.
Misc/lab: Activity 6 hours.
Normal Grade Rules
4 units
URBP 156. Introduction to Local Transportation Planning
Examination of transportation planning issues addressed at the neighborhood and municipal level such as bicycle and pedestrian planning, traffic calming, and parking policy.
Prerequisites: Upper division standing or instructor consent.
Normal Grade Rules
4 units

URBP 160. Topics in Environmental Planning
In-depth examination of selected topics specifically related to environmental planning. Consult department for current offerings. Course may be repeated for credit when topic changes.
Prerequisites: Upper division standing or instructor consent
Repeatable for credit
Normal Grade Rules
4 units

URBP 163. Twentieth Century Urban Design
See ARTH 163.
Normal Grade Rules
3 units

URBP 169. Introduction to Social Media in Planning
An introduction to social media tools and their use in urban planning, with a particular emphasis on public participation.
Prerequisite: Upper division standing
Normal Grade Rules
1-4 units

URBP 175. Urban Studies Topics
In depth examination of selected topics. Consult schedule of classes for current offerings. Course may be repeatable for credit with different topic.
Prerequisite: Upper division standing or instructor consent
Repeatable for credit
Normal Grade Rules
1-4 units

URBP 178. Intro to Regional Transport Planning
Principles and concepts relevant to transportation planning and policy at the regional level, such as historical and current regional transportation planning processes, the relationship between regional travel demand and transportation infrastructure, and travel demand modeling practices.
Prerequisite: Upper division standing
Normal Grade Rules
4 units

URBP 179A. Fundamentals of GIS for Urban Planning
Exploration of Geographic Information Systems (GIS) area analysis techniques for spatial information management in local government planning support systems, needs analysis, envisioning neighborhoods utilizing multiple maps, charts, photos and the Internet. Course may be repeated for credit when topic changes.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

URBP 179B. Advanced GIS for Urban Planning
Continued study of how geographic information systems (GIS) can be applied to urban and regional planning topics.
Prerequisites: URBP 179A or instructor consent.
Normal Grade Rules
4 units

URBP 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Instructor consent and department chair approval.
Repeatable for credit
Credit / No Credit
1-4 units

URBP 185. Environmental Impact Analysis
See ENVS 185.
Normal Grade Rules
4 units

URBP 190. Individual Program Studies
Individual study on special topics. See ARTH 190.
Normal Grade Rules
4 units

URBP 192. Int’l Program Studies
Study of the entire process of private development from preliminary product analysis through planning, construction and marketing.
Normal Grade Rules
3 units

URBP 200. Seminar on Urban and Regional Planning
Overview of the historical development of urban and regional planning in the United States, as well as prominent theories of urban planning practice. Emphasizing the connection between the theoretical and historical material and current planning practice.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE-CWAR
4 units

GRADUATE

URBP 203. Collaborative Neighborhood Planning
Through fieldwork and laboratory assignments, the student applies community-based participatory planning methods to develop recommendations for improving neighborhood quality of life through planning and design.
Prerequisite: URBP 201 or instructor consent.
Normal Grade Rules
4 units

URBP 204. Quantitative Methods
Urban research design, measurement, selected statistical research tools and introduction to computer processing. Extensive treatment of survey research.
Normal Grade Rules
4 units

URBP 205. Private Development and Urban Planning
Study of the entire process of private development from preliminary product analysis through planning, construction and marketing.
Normal Grade Rules
3 units

URBP 206. Market Analysis, Appraisal, & Finance of Real Estate Development
Students will be taught the real estate capital markets and the mix of the necessary financing sources required of developments. Students will evaluate criteria used by developers, real estate lenders and capital providers looking to minimize risk and maximize returns on real estate investments.
Normal Grade Rules
3 units

URBP 207. Real Estate Development Business and Planning
This course will introduce students to the California planning system, real estate development entitlement process, and contemporary issues in urban and regional planning.
Normal Grade Rules
3 units

URBP 208. Urban Real Estate Development Studio
This is a capstone studio course designed to immerse students in the real world of urban property development. Students will explore this world by taking part in a major mock-development project of an actual site in the San Francisco Bay Area.
Prerequisites: URBP 205, URBP 206, and URBP 207, or instructor consent.
Normal Grade Rules
3 units

URBP 211. Regional Analysis and Planning
Students learn the major concepts and techniques of regional analysis and apply these to assess and solve current planning problems.
Prerequisite: Instructor consent.
Normal Grade Rules
4 units
URBP 214. Introduction to Public Management
See PADM 214.
Normal Grade Rules
3 units

URBP 223. Housing Economics and Policy
Overview of the housing situation in the United States; examination of the theory of housing markets and framework for analyzing housing policies; in-depth study of the problem of affordable housing and critical examination of the steps that the public, private, and non-profit sectors have taken to alleviate the problem.
Normal Grade Rules
4 units

URBP 225. Land Use Planning and Law
Study of contemporary growth and land use management techniques used by local, state and federal governments. Examination of the role of public law in addressing urban growth and environmental change issues, and the legal aspects of preparing and administering planning controls and incentives.
Normal Grade Rules
4 units

URBP 226. Regional Transportation Planning
Overview of the evolution of key transportation institutions and policies at the metropolitan, state, and federal levels. Assessment of the current challenges facing regional transportation systems and evaluation of different planning and policy approaches proposed to improve the performance of regional transportation systems.
Prerequisite: Instructor consent.
Normal Grade Rules
4 units

URBP 228. Urban Community Development
The role, objectives and policies of the urban community development process; the social, economic, political and physical implications underlying community development programs; and relationships of these programs to comprehensive urban planning.
Normal Grade Rules
4 units

URBP 231. Urban Design in Planning
Urban design as part of the planning process; contemporary and historic urban design thought and ways of improving design quality in the urban environment.
Normal Grade Rules
4 units

URBP 232. Urban Design Studio
Through fieldwork and laboratory assignments, the student applies urban design theories, methods and principles to a current urban development issue.
Prerequisite: URBP 231 or instructor consent.
Normal Grade Rules
4 units

URBP 233. Social Issues in Planning
Multi-disciplinary study of the principles that guide the growth of a community so all members have equal access to the benefits of living in an urban environment. The course examines the coordination of citizen groups and government bodies to secure needed social services and facilities, champion initiatives that improve quality of life in our community, and engage issues important to underrepresented groups.
Normal Grade Rules
4 units

URBP 234. Field Study Seminar
Discussion and analysis of experience in the planning field under internship programs. May not be counted towards the Master of Urban Planning program of study.
Repeatable for credit with approval of the Graduate Student Advisor.
Prerequisites: Instructor consent and enrollment in the Master of Urban Planning degree program.
Repeatable for credit
Normal Grade Rules
1 unit

URBP 236. Urban and Regional Planning Policy Analysis: Tools and Methods
Analytical approaches to explain and evaluate the public policy making process with particular reference to urban and regional planning and development. Apply quantitative methods such as extrapolation techniques, population and economic projection models, and spatial interaction models for policy analysis.
Prerequisites: Passage of the Writing Skills Test.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
1 unit

URBP 240. Environmental Planning
Examination of the fundamental concepts and issues related to urban environment that planners face. Focus on land use and open space planning, planning and use of urban resources, interactions of urban residents and the physical environment, and the role of government in formulating appropriate policies and strategies.
Normal Grade Rules
4 units

URBP 241. Planning Sustainable Cities
An overview of urban sustainability covering topics such as the origins of urban sustainability, tools for sustainability planning, global dimensions of sustainability (including different approaches to planning across world regions), and visions for creating sustainable futures.
Repeatable for credit
Normal Grade Rules
2 units

URBP 248. Spatial Visualization Tech in Urb Plan
Lab-based course in digital visualization for urban spatial representation using industry standard software such as Adobe Photoshop, Adobe Illustrator and Trimble Sketch-Up.
Normal Grade Rules
1-4 units

URBP 250. Urban Planning Public Finance
An investigation of both the theory and practice of local public finance with emphasis on applications relevant to urban and regional planning. Topics include: public goals and externalities; the function of the budget; sources of revenue and expenditure; the planning programming-budgetary system (PPBS); methods of project evaluation; and traditional as well as innovative methods of public finance including property tax, user fee, impact fee, tax increment financing and use of special districts.
Normal Grade Rules
4 units

URBP 255. Urban and Regional Growth Management
Extensive study of causes, consequences and costs of sprawl; study of growth management and smart growth programs at the state, regional and local level, including the rationale, techniques, and economic, political, and organizational implications.
Normal Grade Rules
4 units

URBP 256. Sustainable Transportation Planning
Examination of transportation planning issues addressed at the neighborhood and municipal level such as bicycle and pedestrian planning, traffic calming, and parking policy, with a focus on promoting sustainable communities.
Repeatable for credit
Normal Grade Rules
4 units

URBP 260. Environmental Planning Topics
In-depth examination of selected topics specifically related to environmental planning. Consult department for current offerings. Course may be repeated for credit when topic changes.
Repeatable for credit
Normal Grade Rules
4 units

URBP 275. Urban Planning Topics
In-depth examination of selected topics introduced in the core seminars for the Master of Urban Planning degree.
Consult department for current offerings. Course may be repeated for credit when topic changes.
Repeatable for credit
Normal Grade Rules
1-4 units
URBP 275G. Geographic Information Systems Overview: Urban Planning Applications
An overview of Geographic Information Systems with a focus on applications to urban planning, including demographic data analysis, land use mapping, cartographic techniques and methods for determining the most appropriate display of quantitative data for a variety of intended audiences.
Normal Grade Rules
1 unit

URBP 276. Social Media in Planning
An overview of social media tools and their use in urban planning, with a particular emphasis on public participation.
Normal Grade Rules
1-4 units

URBP 278. Introduction to GIS for Urban Planning
Examination of geographic information systems (GIS) applications to urban and regional planning topics. Course may be repeated for credit when topic changes.
Repeatable for credit
Normal Grade Rules
4 units

URBP 279. Advanced GIS for Urban Planning
Further examination of advanced geographic information systems (GIS) applications to urban and regional planning topics
Prerequisite: URBP 278 or instructor consent.
Repeatable for credit
Normal Grade Rules
4 units

URBP 280. Planning Research Topics
In-depth examination of selected planning research topics introduced in core seminars for the Master of Urban Planning degree, such as the social and environmental impacts of planning policies.
Repeatable for credit
Normal Grade Rules
1-4 units

URBP 295. Capstone Studio: Community Planning
Through fieldwork and laboratory assignments, the student applies theories and techniques of analysis to identify the assets, problems, and opportunities of an urban community.
Prerequisite: Instructor consent.
Normal Grade Rules
6 units

URBP 297P. Planning Report Preliminary Proposal
Advanced research and proposal writing. Students conduct background research and develop a preliminary research proposal that demonstrates their capacity to do independent research, analysis, and writing about a complex planning problem.
Normal Grade Rules
1 unit

URBP 298A. Special Study: Planning Report
Advanced research and report writing. Students develop a plan and complete the initial research to write a planning report that demonstrates their capacity to do independent research, analysis, and writing about a complex planning problem.
Prerequisites: Passage of the Writing Skills Test and Graduate Adviser approval. Passage of URBP 297P with a grade of B or better.
Mandatory CR/NC/RP
3 units

URBP 298B. Special Study: Planning Report Completion
Advanced individual research and report writing. Students work with a faculty advisor to complete a professional planning report that demonstrates their capacity to do independent research, analysis, and writing about a complex planning problem.
Prerequisite: Passage of 298A and Graduate Student Advisor approval.
Mandatory CR/NC/RP
3 units
Women, Gender, and Sexuality Studies Courses

WOMEN GENDER SEXUAL STUDIES

LOWER DIVISION

WOMS 005Q. Gender, Race & Sexuality in Media
This course uses a cultural studies approach to explore the production and consumption of contemporary media in our everyday lives with a focus on race, class, gender, sexuality, and nation. GE Area: D1
Prerequisite: First term freshmen only.
Note: All courses with a ‘Q’ suffix are designated as First Year Experience courses.
Normal Grade Rules
GE: D1 3 units

WOMS 010. Women, Gender, and Sexuality Studies
Interdisciplinary introduction to core concepts and analytical tools addressing the diversity of human experience cross cut by gender, sexuality, embodiment, and class location. Students will become familiar with key contemporary and historical debates in both global and local contexts. GE Area: D1
Normal Grade Rules
GE: D1 3 units

WOMS 020. Women of Color in the US
Constructs knowledge of the historical and contemporary experience of women of color. Focuses on Native American, African American, Latina, and Asian American women and considers contributions they have made to the shaping of the nation. GE Area: D2
Normal Grade Rules
GE: D2 3 units

UPPER DIVISION

WOMS 101. Sex, Power, and Politics
Multidisciplinary introduction to traditional and new images, roles, experiences, ethnic similarities and differences, and contemporary problems of American women. GE Area: S Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended. Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S 3 units

WOMS 102. The Global Study of Women
This course will be a survey of literature on the interaction of gender and forces of globalization. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V 3 units

WOMS 107. Psychology of Women
See PSYC 107.
Normal Grade Rules
3 units

WOMS 112. Women in the Global Economy
Women’s participation in the economy, US and internationally: paid employment, consumption, subsistence labor, reproduction, volunteering. It connects daily life activities with international economic trends, with particular attention to race, class, implications for families and strategies for equity.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Normal Grade Rules
3 units

WOMS 114. Politics of Mothering and Reproduction
Explore contemporary definitions and values inscribed in issues pertaining to mothers and reproduction. It will be built upon three literatures: discourses of law and legality, discourses based in feminist thinking.
Prerequisite: Upper Division standing or instructor consent.
Normal Grade Rules
3 units

WOMS 120. Special Topics in Women’s Studies
Focus announced in the schedule of classes. Repeatable for credit with program coordinator approval.
Prerequisite: WOMS 10, WOMS 20, WOMS 101 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

WOMS 121. Philosophy and Feminism
See PHIL 121.
Normal Grade Rules
3 units

WOMS 122. Women in the Second Half of Life
See GER 122.
Normal Grade Rules
3 units

WOMS 131. Gender, Sexuality, and Religion
See RELS 131.
Normal Grade Rules
3 units

WOMS 156. Black Women Writers: Race, Culture and Resistance
See AFAM 156.
Normal Grade Rules
3 units

WOMS 160. Queering Gender, Race, and Class
Queer analysis of race and class diversity; social, political, and economic hierarchies of race, class, and gender in the U.S. Topics may include sexuality, racism, LGBT experience, the welfare system.
Normal Grade Rules
3 units

WOMS 169. Sexualities and the Body
This course explores the social construction of sexuality and the body from a feminist perspective. It investigates various aspects of sexuality and gendered bodies including identity, community, and social movements based on intersections of race, gender, sexuality, culture, and nation.
Prerequisite: Upper Division Standing or instructor consent.
Normal Grade Rules
3 units

On-site experience with community or campus organization or other agency involved with women’s issues. Individual and group advising augments the experiential learning. Repeatable for credit with program coordinator approval.
Prerequisite: WOMS 101 or instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units
World Languages and Literatures Courses

ARABIC

LOWER DIVISION

ARAB 001A. Elementary Arabic I
This course in Modern elementary Arabic is designed for students with no previous knowledge of Modern Standard Arabic. Starting with the alphabet, students will gradually learn basic oral and written communication in the target language.
Note: This course is not for native speakers of Arabic.
Normal Grade Rules
5 units

ARAB 025A. Intermediate Arabic I
Intermediate Arabic I is designed for students who have completed at least two semesters one year) of Arabic in an academic setting and have knowledge of basic grammatical features of Arabic.
Prerequisite: ARAB 001A, ARAB 001B or equivalent or SJSU placement exam.
Normal Grade Rules
5 units

CHINESE

LOWER DIVISION

CHIN 001A. Elementary Chinese
Basic skills and structure of the language in the context of culture. GE Area: C2
Prerequisite: 001B: CHIN 001A (or equivalent).
Normal Grade Rules
4 units

CHIN 001B. Elementary Chinese
Basic skills and structure of the language in the context of culture. GE Area: C2
Prerequisite: CHIN 001A (or equivalent).
Normal Grade Rules
4 units

CHIN 025A. Intermediate Chinese
Development of basic skills in the use of Mandarin, preparation for advanced courses in the language. GE Area: C2
Prerequisite: 8 units of college Chinese (or equivalent)
Normal Grade Rules
4 units

CHIN 025B. Intermediate Chinese
Continuation of CHIN 025A. Preparation for advanced courses in the language. GE Area: C2
Prerequisite: 12 units of college Chinese (or equivalent)
Normal Grade Rules
4 units

UPPER DIVISION

CHIN 101A. Advanced Chinese
Readings related to culture, discussion, syntax and composition. May be repeated once for credit.
Prerequisite: Four semesters of college Chinese (or equivalent)
Notes: Year course.
Repeatable for credit
Normal Grade Rules
4 units

CHIN 101B. Advanced Chinese
Readings related to culture, discussion, syntax and composition. May be repeated once for credit.
Prerequisite: 20 units of college Chinese (or equivalent)
Notes: Year course.
Repeatable for credit
Normal Grade Rules
4 units

CHIN 102. Chinese Culture
Traditional Chinese culture in light of contemporary values. Ideographs, folk tales, festivals, creeds and customs, myths and superstitions, opera and the arts, women, the art of living.
Notes: Taught in English.
Normal Grade Rules
4 units

Completion of, or co-registration in, 100W is strongly recommended.
Notes: Taught in English. All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

CHIN 180. Individual Studies in Chinese
Individual work by arrangement.
Prerequisite: Upper division standing in Chinese (or equivalent) and instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units
FOREIGN LANGUAGE EDUCATION

UPPER DIVISION

FLED 184Y. Student Teaching II - Classroom Teaching
Minimum 80-120 class periods of classroom teaching or field teaching in appropriate single subjects, grades K-12 and related teaching activities and seminar.
Prerequisite: Joint approval of major and Education departments.
Repeatable for credit
Credit / No Credit
4-6 units

FLED 184Z. Student Teaching III - Classroom Teaching
Notes: May be in different subject/school and will be at a different grade level.
See FLED 184Y.
Repeatable for credit
Credit / No Credit
4-6 units

FREN 001B. Elementary French
Basic structure of the language in the context of culture.
GE Area: C2
Prerequisite: FREN 001A (or equivalent).
Normal Grade Rules
GE C2
4 units

FREN 001X. Elementary French Individualized
Self-paced individualized instruction.
Repeatable for credit
Normal Grade Rules
1-5 units

FREN 001Y. Elementary French Individualized
Self-paced individualized instruction.
Prerequisite: 5 units of FREN 1A and FREN 1X (or equivalent).
Repeatable for credit
Normal Grade Rules
1-5 units

FREN 025A. Intermediate French: Reading
Intensive training in reading authentic texts of a broad variety of genres in French to increase the students' proficiency from ACTFL Low Intermediate to Mid and High Intermediate levels.
GE Area: C2
Prerequisite: One Year of college-level French (or equivalent or SJSU placement exam).
Normal Grade Rules
GE C2
4 units

FREN 025B. Intermediate French: Writing
Intensive practice in French expository writing to increase the students' written proficiency from ACTFL Low Intermediate to Mid and High Intermediate levels.
Review of major grammatical rules, vocabulary development and introduction to translation.
GE Area: C2
Prerequisite: Two years of college French or equivalent.
Normal Grade Rules
GE C2
4 units

FREN 101A. Advanced French: Reading and Writing
Increase proficiency in reading/writing from intermediate high to advanced. Gain competence in reading abstract and linguistically complex materials (fiction, non fiction and creative). Improve ability to express self in formal and informal writing on practical, social or professional topics.
Prerequisite: Two years of college French or equivalent.
Repeatable for credit
Normal Grade Rules
4 units

FREN 101B. Advanced French: Written Communication
Increase proficiency in reading/writing from advanced to advanced plus level. Gain competence in reading materials that are abstract and linguistically complex (literary genres). Improve ability to write about topics with precision and describe, narrate and support point of view.
Prerequisite: Two years of college French or equivalent.
Repeatable for credit
Normal Grade Rules
4 units

LOWER DIVISION

FREN 001A. Elementary French
Basic structure of the language in the context of culture.
GE Area: C2
Normal Grade Rules
GE C2
4 units
Academic Year 2019-2020
Course Descriptions
v1
July 1, 2019
ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE

3 units
FREN 102C. French Culture
French culture from the Revolution to the 21st Century.
Prerequisite: 20 units of college French (or equivalent).
Normal Grade Rules
4 units

FREN 105. Advanced Grammar: Phonetic Analysis
Contrastive analysis of French and English sound systems and their practical application to pronunciation. Intensive conversation and reading of poetry and plays. Language laboratory.
Prerequisite: Four semesters of college French (or equivalent).
Repeatable for credit
Normal Grade Rules
4 units

FREN 110. Advanced Grammar: Grammatical Analysis
Structural analysis. Comparison of morphological and syntactical patterns of English and French. Course is repeatable for a total of 6 units.
Prerequisite: FREN 101B (or equivalent).
Normal Grade Rules
4 units

FREN 120A. French Literature from the Middle Ages to 1600
Prerequisite: FREN 101B or instructor consent.
Repeatable for credit
Normal Grade Rules

**DESCRIPTION CONTENTS**
JPN 101C. Advanced Conversational Japanese
This course focuses on politeness aspects of Japanese language that appear in L19, 20, and 23 of Genki textbook II and heightens conversational competence to intermediate high in ACTFL through project works.
Prerequisite: JPN 025B
Normal Grade Rules
4 units

JPN 102. Japanese Culture
History, geography, fine art and daily life of Japan. May be repeated when content changes.
Prerequisite: Four semesters of college Japanese (or equivalent).
Repeatable for credit
Normal Grade Rules
3 units

JPN 103. Japanese Ideography and Calligraphy
Ideographs and Kana-syllabaries in their historical contexts-meaning, imagery, socio-anthropological backgrounds, formation and use of modern Japanese. Studio practice.
Prerequisite: JPN 101C or equivalent.
Normal Grade Rules
4 units

JPN 105. Media Japanese
Examination of language that appears in Japanese media such as newspapers, Internet news, and TV news to enhance four language skills (listening, reading, speaking and writing) to advanced level.
Prerequisite: JPN 101C or equivalent.
Normal Grade Rules
4 units

JPN 107. Japanese for Business Professionals
Advanced Japanese course for specific (business) purposes. It will acquaint students with practical vocabulary, a wide range of language structures, business manners, and business customs for developing communication skills useful in conducting business in Japanese.
Prerequisite: JPN 101C or equivalent.
Normal Grade Rules
4 units

JPN 110. Japanese Linguistics
Structural analysis of Japanese from historical as well as descriptive perspectives and its application to distinct Japanese social and communicative behaviors.
Prerequisite: JPN 101C or equivalent.
Normal Grade Rules
4 units

JPN 120. Japanese Literature and Translation
Examination of Modern Japanese Manga Literature and Light novels and their translation to heighten learners reading and translation skills.
Prerequisite: 101C or equivalent.
Normal Grade Rules
4 units

JPN 130. Readings in Japanese Culture
Readings from contemporary texts (including scholarly essays, newspapers and narrative) on various aspects of Japanese culture.
Prerequisite: JPN 101C or equivalent.
Repeatable for credit
Normal Grade Rules
4 units

JPN 140. Japanese Drama and Lyrics
Interpretation of Japanese drama and lyrics from Showa to the present to foster advanced level of Japanese language competence. Analysis of stylistic features, Japanese people and society’s socio-cultural values and their historical backgrounds.
Prerequisite: JPN 101C or equivalent.
Normal Grade Rules
4 units

JPN 150. Japanese Narratives and Life stories
Examination of Japanese narratives (folk tales) and life stories that represent Japanese society and archetype of Japanese people’s psychology.
Prerequisite: JPN 101C or equivalent.
Normal Grade Rules
4 units

JPN 160. Special Topics in Japanese Studies
A 25-day summer program that focuses on Japanese language, culture, and history. Explores Japanese culture and history through culture instruction conducted at cultural centers in Uji-city, Kyoto and field trips to historical sites and Japanese companies in Kyoto and other cities such as Osaka, Nara, Hiroshima, and Tokyo.
Repeatable for credit

<td>PERS 025B</td>
<td>Intermediate Persian Culture and Language</td>
<td>This course is a continuation of PERS 25A and is designed for students with previous knowledge of Persian, either from classroom or as a heritage speaker. Various language activities such as reading, writing, and, listening comprehension will be introduced while surveying the history and culture of the Persian speaking world across time and place, with a focus on Iran, from its roots in antiquity to the modern day, advancing students’ knowledge of Persian language and culture. Themes include the survey of history, socio-political systems, and textual and visual cultural traditions of the Persian society, which have made this culture a unique one for centuries. This course is conducted in Persian while the reading assignments are in both English and Persian. Prerequisite: PERS 25A or instructor consent. Normal Grade Rules 3 units.</td>
