Fabrizio Vergine

Curricula
⦁ BS, Aerospace Engineering
⦁ MS, Aerospace Engineering

Introduction
Aerospace engineers research, design, and develop high-speed transportation vehicles, such as airplanes, spacecraft, space stations, planetary vehicles, and space probes. Approximately half of all aerospace engineers work in the aerospace industry (e.g. Boeing, Lockheed-Martin, Cessna, etc.), 15% work for government agencies (e.g. NASA, Department of Defense, etc.), and the rest work in engineering services, research, testing, and navigation functions. Aerospace engineers also work in industries not associated with aerospace, such as automotive, where they may work both on the improvement of the aerodynamics of automobiles and on a number of related areas due to the breadth of their preparation. Students in our program have opportunities to participate in international hands-on design-build-fly competitions or work with engineers from local industry to design-build-test and launch microsatellites into space. The BS Aerospace Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.
BS - Aerospace Engineering

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

Students in this major must complete all courses in Required in the Major (All courses in Preparation, Core, and Concentration/Specialization) with a "C or better" to graduate.

University Graduation Requirements

**MS - Aerospace Engineering**

The MSAE Program is designed to prepare students for professional careers in industry or advanced study in Ph.D. programs. Students develop skills in research, design, development, experiment design, testing, and systems integration in air and space transportation systems. In addition to advanced aerospace engineering courses, electives are available in science, business, and other engineering fields. Class schedules are designed for the convenience of employed engineers who wish to pursue graduate work on a part-time basis. The MSAE Program welcomes students with undergraduate degrees in other engineering or science disciplines. For more information visit [www.sjsu.edu/ae/programs/msae/](http://www.sjsu.edu/ae/programs/msae/).

**Educational Objectives for Graduate Program**

To provide MSAE graduates with

1. A strong foundation beyond the undergraduate level in their chosen focus area as well as in mathematics, basic science, and engineering fundamentals, to be able to solve current aerospace engineering problems.

2. Contemporary professional and lifelong learning skills to successfully compete for technical engineering positions in the local, national, and global engineering market, advance in their current position or pursue doctoral studies.

3. Expertise necessary to work in the analysis, design, development, and testing of aerospace engineering systems with possible specialization in areas such as aircraft design or space transportation and exploration.

4. Strong verbal and written communication skills, including the ability to write engineering reports.

5. Ability to perform research and work independently to solve open-ended aerospace engineering problems.

**Admissions Requirements**

Candidates must meet all the university [admissions requirements](http://www.sjsu.edu/ae/programs/msae/). Students can be admitted in either classified or conditionally classified standing. If an applicant’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, the conditions will include taking preparatory courses to meet these requirements. Such courses will not count as part of the master’s degree program requirements.

To be admitted to classified standing, a student must possess a BS degree in Aerospace Engineering or related field (e.g., Aeronautical Engineering, Astronautical Engineering or Space Engineering, etc.) from an accredited institution with a grade point average of 2.75 or better in the last 60 units.

Students may be admitted with conditionally classified standing if they have a BS degree in any engineering or science discipline from an accredited institution. Students with conditionally classified standing will take a series of BSAE core courses based on their evaluation by the AE Graduate Coordinator.

If an applicant’s bachelor’s degree is not from a US or Canadian university, a GRE must be taken; minimum scores acceptable for admission are listed on the [Graduate Program Test Requirements](http://www.sjsu.edu/ae/programs/msae/) webpage at GAPE. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the [Graduate Program Test Requirements](http://www.sjsu.edu/ae/programs/msae/) webpage at GAPE.

**Requirements for Advancement to Graduate Candidacy**

Prior to registering for the first time (or upon re-entering), a student should consult with the AE Graduate Coordinator to develop a schedule of courses. Students admitted as conditionally classified must satisfy the requirements listed in their letter of acceptance. Students who have completed matriculation and achieved classified standing in the master’s degree curriculum must next advance to candidacy for the degree. A student may advance to candidacy after completing a minimum of 9 units of graded work as a graduate student in letter-graded 100- or 200-level courses acceptable to the AE Department as well as fulfilling the other university requirements for [advancement to candidacy](http://www.sjsu.edu/ae/programs/msae/) for the MS degree, as detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the [Graduation Writing Assessment Requirement](http://www.sjsu.edu/ae/programs/msae/) (GWAR). For graduate courses that meet the GWAR, refer to the [GWAR Course List](http://www.sjsu.edu/ae/programs/msae/) on the College of Graduate Studies website.

**Requirements for Graduation**

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the [Graduation Requirements](http://www.sjsu.edu/ae/programs/msae/) section of the Graduate Policies and Procedures.

**MS - Aerospace Engineering Graduation Requirements**

The AE Department offers courses designed to provide a flexible curriculum structure that allows students to follow a course of study to meet their individual career goals. As shown below, the program consists of 30 semester units of approved work, including 6 units devoted to a thesis or project. The required coursework includes 6 units of advanced mathematics and computational methods, 12 units of aerospace core subjects, and 6 units of electives.

In selecting a project/thesis topic, the student must first identify a faculty member in his or her area of interest. Once the faculty member agrees to act as the student’s project/thesis advisor, a program of study is established, including the project/thesis topic.
Culminating Experience (Plan A or Plan B)
In selecting a Plan A (Thesis) or Plan B (Project) topic, the student must first identify a faculty member in his / her area of interest. Once the faculty member agrees to act as the student’s advisor, a program of study is established, including the thesis or project topic. In either option students perform graduate level research and/or design and/or development, involving aerospace systems or components of aerospace systems under the supervision of an AE faculty member. Students are encouraged to submit and present their work at student and/or professional conferences.

A project or thesis proposal is due to the AE295A / AE299 Course Coordinator no later than the 2nd week of class. A written progress report is due at the end of each month. The first progress report must include a review of the relevant literature. An end-of-semester written report is expected at the end of the 1st semester.

Plan A (Thesis)
A thesis requires approval by a committee of three members. Two of the thesis committee members must be SJSU faculty. An AE faculty member must agree to serve as the chair of the committee. Students must secure the commitment of all three members of their thesis committee. The committee must approve the student’s thesis proposal no later than the 2nd week of the 1st semester. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the other committee members. The candidate for the MS/MAE degree must successfully pass a final oral defense of the thesis.

Plan B (Project)
In the Project Option students work under the supervision of an AE faculty member.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

</tr>
</tbody>
</table>

**Total Units Required** 30

Elective courses must be planned in consultation with the AE Graduate Coordinator. Students may also choose electives from other engineering fields, science, or business.

The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Introduction
San José State University supports a wing of Air Force Reserve Officer Training Corps (AFROTC) with cadets from San José State University, Santa Clara University, Stanford University, UC Santa Cruz, and many local community colleges. The Air Force ROTC program provides instruction in leadership, management, and national security studies along with military education and training. This program prepares the cadet for assignment to positions of responsibility and importance in the modern Air Force. Instruction is conducted on and off campus. This program offers all eligible SJSU students the opportunity to obtain an officer’s commission in the United States Air Force while earning their college degrees.

Program Overview
Our faculty brings a wealth of experience and diversity to the program. Instructors are active duty Air Force officers from various career areas and provide students with a first rate academic education and military training experience. Each faculty member also acts as a student advisor to guide students through the program and help them reach the goal of an officer’s commission in the United States Air Force.

College students wishing to commission as an Air Force officer through ROTC may enroll in a three, three-and-a-half, or four-year program. Students attend Air Force ROTC classes along with other college courses and receive elective academic credit.

After successfully completing all requirements, the cadets are commissioned as Air Force officers with a minimum four-year active duty service commitment.

Four-Year Program
The first two years of the Air Force ROTC four-year program, the General Military Course (GMC), consist of 1 hour of classroom work, two hours of leadership laboratory, and a minimum of two hours of physical conditioning each week. Upon completion of GMC requirements, cadets who wish to compete for entry into the last two years of the program, the Professional Officer Course (POC), must do so under the requirements of the POC selection system. This system uses qualitative factors, such as grade-point average, unit commander’s evaluation, aptitude test scores and physical fitness test scores to determine a student’s officer potential. After selection, students must successfully complete a three-week summer field training program at Maxwell Air Force Base in Montgomery, AL before entering the POC.

In the POC, cadets attend class three hours a week, participate in a weekly leadership laboratory lasting two hours, and perform a minimum of two hours of physical conditioning per week. Cadets apply what they have learned in the GMC and at field training. POC cadets conduct the leadership laboratories and manage the unit’s cadet corps. Each unit has a cadet corps based on the Air Force organizational pattern of flight, squadron, group, and wing. POC classes are small, with emphasis on group discussions and cadet presentations. Classroom topics include leadership, communication skills and national defense policy. Once enrolled in the POC, all cadets enlist in the Air Force Reserve and assigned to the Obligated Reserve Section.

Scholarships
Current emphasis in the Air Force ROTC College Scholarship Program is to award scholarships to candidates pursuing undergraduate engineering or other scientific and technical disciplines. More than half of Air Force ROTC scholarships are awarded to students in these disciplines. Additionally, scholarships are available for foreign language majors; contact the Aerospace Studies department for more information regarding which foreign languages majors are eligible. Students in every degree program may enjoy scholarship opportunities, as the Air Force seeks to engage students who excel both academically and militarily.
Air Force ROTC offers several types of scholarships, awarded in increments of two, three, and four years. All types of awards provide an allowance for books, most required fees and a monthly nontaxable stipend. All scholarship cadets are required to meet certain academic, military, and physical fitness standards to earn and maintain scholarship benefits.

**Field Training**
Field Training, in many cases, is a cadet’s first exposure to a working Air Force environment and the Aerospace Expeditionary Force (AEF) concept. The program develops military leadership and discipline, and provides Air Force officer familiarization, orientation and motivation. At the same time, the Air Force can evaluate each cadet’s potential as an officer and entry into the POC.
Field training provides Air Force leadership opportunities, professional development, marksmanship training, team building, physical fitness, and AEF orientation. Lodging, meals and transportation (from the cadet’s home of record or school) are provided at no cost.

**Medical Professions**
Nursing majors may apply for an AFROTC scholarship and graduates agree to accept a commission in the Air Force Nurse Corps and serve four years on active duty after successfully completing their licensing examination. Cadet premedical scholarship recipients who are accepted to medical school within one year of graduating may be sponsored in their pursuit of medical degrees.

**Legal Professions**
Both first-year and second-year law students can apply for ROTC scholarships. Students complete either a one-year or a two-year ROTC program while attending law school. Additionally, second-year law students can pursue an Air Force commission through Air Force ROTC’s graduate law program. This program guarantees judge advocate duty after a student completes all Air Force ROTC, law school, and bar requirements. After graduating from an American Bar Association-accredited law school, the student must be admitted to practice law before the highest state court of any state or a federal court. The new lawyer is then commissioned into the Air Force in the grade determined by the laws and directives in effect at the time of call to active duty.

**Aerospace Studies Minor**
All undergraduate students are eligible for the minor in aerospace studies. Those wishing to pursue a career as an Air Force officer after graduation should contact the Department of Aerospace Studies.
### Minor - Aerospace Studies

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Introduction
An indispensable part of the mission of a metropolitan university, the Department of African-American Studies provides a comprehensive liberal arts education by training our students to appreciate diversity and multicultural American society. Our unique interdisciplinary curriculum focuses on the areas of: crime/justice, politics, urbanization, religion, history, sociology/welfare, psychology, African history/politics, gender equality, aesthetics and general education courses. Our upper division courses cover such topics as the Harlem Renaissance, African American women in history, and black images in American film and television. Our faculty contributes to scholarship in the field, and we are intellectually and professionally linked to local and national African American communities through our membership and support of professional associations such as the National Council of Black Studies.
# BA - African American Studies

## University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

## 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

### Core Lower Division General Education
- Of the 39 units required by the university, 6 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

**NOTE:** STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

### Upper Division General Education
- Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

### American Institutions
- The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

### Physical Education
- 2 units

### Graduation Writing Assessment Requirement
- At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

## Minor - Black Women’s Studies

The Department of African American Studies is committed to providing students with critical and multidimensional scholarship, teaching, and community service based on Black feminist ideologies and concepts. The Black Women’s Studies minor explores, examines, and engages the intellectual traditions connected to the cultural, historical, philosophical and social perspectives of the lived experience at the nexus of Blackness and womanhood; topics covered within the minor are interdisciplinary in nature. The minor emphasizes the significance of understanding power and political structures of power through the intersections of race and womanhood. Students will acquire skills in critical thinking, cultivation of dialogue, research development, and contribution to social change based on Black feminist ideologies and concepts. The coursework in the minor focuses on integrating academic and experiential scholarship, teaching, and learning.

Professors
Shannon Rose Riley

Associate Professors
J. Todd Ormsbee

Assistant Professors
Tova Cooper
Funie Hsu

Curricula
⦁ BA, Humanities, Concentration in American Studies
⦁ Minor, American Studies

Introduction
The American Studies Program provides useful preparation for graduate study, for elementary or secondary teaching, or for careers in law, public service or government. In addition to the minor in American Studies, a student can receive a Bachelor of Arts in Humanities with a concentration in American Studies through the Humanities Department. All American Studies courses, whether for a major, minor, or for general education, enhance our understanding of how our nation developed in the past, what it has become, and how these changes affect us today. Courses focus on subjects such as the American dream, interracial relations, environmental issues, popular culture and women’s concerns.
Department - American Studies

This degree is listed with the Humanities Department.
BA - Humanities, Concentration in American Studies

⦁ BA, Anthropology
⦁ BA, Behavioral Science
⦁ BA, Organizational Studies
⦁ Minor, Anthropology
⦁ Minor, Native American Studies
⦁ Minor, Values, Technology and Society
⦁ MA, Applied Anthropology

Introduction
Anthropology majors study how humans live and have lived, present and past, and apply that knowledge to contemporary issues, learning how to articulate an anthropological perspective on human behavior. Our students develop skills in research, data analysis and clear and effective communication, preparing them to live in a complex, culturally diverse world. The Department of Anthropology's core curriculum provides an overview to the discipline as well as courses in cultural anthropology, archaeology, and physical anthropology. There are many opportunities for students to engage in research and service projects, and our faculty are scholars who bring their research into the classroom to enhance learning. We offer a BA in anthropology, an MA in applied anthropology, a BA in behavioral science, and a BA in organizational studies. Our graduates pursue careers in a wide range of professions, including law, medicine, business, social work, and health care.
## BA - Anthropology

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

## BA - Behavioral Science

Behavioral science majors develop an interdisciplinary perspective on human behavior and an understanding of psychological, social and cultural dimensions to being human in a complex society. Offered cooperatively by the Departments of Anthropology, Psychology and Sociology, the Behavioral Science Program is housed in the Department of Anthropology, which oversees academic advising. The program prepares graduates for a variety of jobs that require working with social science data and with people. Many of our alumni have pursued careers in human resources, social work, counseling, sales and marketing and law enforcement.

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). **BA - Organizational Studies**

The BA in Organizational Studies is an interdisciplinary major designed to help students develop skills for careers in a variety of organizations including small businesses, multinational corporations, non-profit organizations, and local, state, and national government agencies. Organizational studies courses are focused on giving students skills for real-world problem solving. Students take courses across a wide range of social science disciplines including anthropology, communications studies, economics, political science, psychology, and sociology. Organizational studies is ideally suited for students who aim to pursue careers in business, government, or the non-profit sector, where knowing how organizations work is a key to success.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

### University Graduation Requirements

**Total Units Required**: 120
Minor - Anthropology

An anthropology minor complements any career in which understanding human behavior is important. It is especially relevant to business majors and pre-professional students preparing for careers in law, medicine, or social work. Anthropology minors learn many useful skills including cultural competency, critical thinking, research design, and professional writing skills that are increasing in demand in private public, and non-profit organizations. Many students minor in anthropology simply because they find that learning about the human species is interesting and enjoyable.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Minor - Native American Studies

The interdisciplinary minor in Native American Studies gives students a deeper knowledge of the rich cultural heritage of our continent’s indigenous peoples. The minor provides students an opportunity to learn about the historical and contemporary struggles and achievements of Native Americans. Over the years our students have had the opportunity to work and study in collaboration with the Muwekma Ohlone, the Paiute, and other descendant communities. The Native American minor is particularly well suited for those seeking careers in heritage management or government.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

After consultation with an advisor, experimental courses (ANTH 195) may be used to fulfill minor requirements.
Minor - Values, Technology and Society

This interdisciplinary minor groups existing courses from a number of departments into an integrated study of the interaction of values, technology and society as they give shape and direction to the world in which we live. In particular, the minor focuses on the increasing recognition of the need to assert human values (in particular, moral, social, aesthetic and political values) given the accelerating development of modern technology and the associated increasing complexity and interconnectedness of our lives. Courses in the minor examine these themes as they are reflected in such issues as war and peace, the environment, health, modern science and technology, our use of computers, and the expression of values in our technological society through ethics, art, design and religion.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Students may take up to 6 units of lower division coursework in completing the minor requirements.

Total Units Required

| Total Units Required | 18 |
MA - Applied Anthropology

Information about the program and important dates can be obtained at the department website: www.sjsu.edu/anthropology.

Admissions Requirements
Candidates must meet all the university admission requirements. The university-level graduate application is separate from the application you send to the department. You will need to apply separately to the university to obtain approval for university-level admission and to the department to obtain admission into the Applied Anthropology Program. Minimum requirements for the program are a bachelor’s degree in Anthropology or a core of introductory Cultural and Physical or Archaeological Anthropology, an upper-division methods course in Ethnography, Archaeology, or Osteology, an upper-division anthropological theory course; and 6 elective units in upper-division Anthropology (approximately 18 units overall). A 3.0 grade point average (B or better) in the last 60 semester units of undergraduate work and all Anthropology courses is required. Depending on their level of preparation, applicants can be admitted in either classified or conditionally classified standing.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Department of Anthropology website: www.sjsu.edu/anthropology/degrees/maa/programfaq/#reqprogress.

Requirements for Advancement to Graduate Candidacy
Students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the MA degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Further requirements of the department for advancement to candidacy include completion of 18 units in the graduate program and submission of a project or thesis proposal to the department’s Graduate Committee. In order to advance to candidacy, all students must participate in the First Year Review in their second semester. Further information on the First Year Review is available on the program FAQ on the Department of Anthropology Website: www.sjsu.edu/anthropology/degrees/maa/programfaq.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, CPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MA - Applied Anthropology Graduation Requirements
Each course of study must include 36 semester units. Eighteen of the units are in the Applied Anthropology core. Six units of upper-division or graduate Anthropology depth courses will be taken with the permission of the student’s advisor, and 6 units of upper-division or graduate classes outside of Anthropology emphasizing the student’s area of application will be taken with the permission of the student’s advisor. Six additional units will reflect research or professional internships and thesis or project report preparation. SJSU Studies courses may not be used to fulfill the Anthropology depth requirement or field of application requirement. In addition, students are expected to conduct original research and write a thesis or, alternatively, to be engaged in professional activity and write a project report. All research or professional activity must conform to the ethical standards of the discipline of Anthropology as outlined by the American Anthropological Association, the Society for Applied Anthropology, and the university’s Institutional Review Board. The policy on timely progression to degree is available on the Applied Anthropology program website: http://www.sjsu.edu/anthropology/degrees/maa/programfaq/#reqprogress.

Culminating Experience
Students must choose between Plan A (Thesis) or Plan B (Project) in order to graduate. In both cases, students must submit (to the department) and have approved a proposal for the work they are undertaking. For more information on Plan A and Plan B options and how to choose between them, please see the program FAQ on the Department of Anthropology website: www.sjsu.edu/anthropology/degrees/maa/programfaq.

Plan A (Thesis)
Plan A students enroll in ANTH 299, Master’s Thesis, and complete a thesis under supervision of a department committee and submit it to the University Graduate Studies & Research Office for final approval. A thesis is a scholarly contribution to general knowledge. It follows a fairly standard, traditional form across disciplines and fields, and must conform to the guidelines required by the College of Graduate Studies. Typically, a thesis has an introductory chapter that includes a problem statement, a literature review chapter followed by one on methodology, one or more chapters of data and findings, an analytical/interpretive chapter and a concluding chapter. This basic template can be modified to best meet your needs, but it must be done in consultation with your committee chair to insure it meets university requirements.
Plan B (Project)
Plan B students enroll in ANTH 298, Anthropology Project, and undertake a project in applied anthropology and prepare a report documenting the process and results. The report is submitted to the anthropology graduate faculty, but not College of Graduate Studies. All research or professional activity must conform to the ethical standards of the discipline of anthropology as outlined by the American Anthropological Association, the Society for Applied Anthropology and the requirements of the university’s Institutional Review Board. A project report documents some activity that the student undertook to apply anthropological skills and knowledge. Because it is not submitted to College of Graduate Studies, it does not have to meet that office’s thesis requirements. Specifically, its length and organization are more variable and must be negotiated with the committee chair and the graduate faculty of the department. Project reports may be as brief as 50 pages and as long as several hundred. The report will typically document the problem, question or issue that stimulated the application; a literature review that includes both the history of the specific problem and its context, as well as comparable problems elsewhere is included. It will document in detail the application (i.e., what the student did), its rationale (i.e., why the student took the steps he or she did), and the outcomes (i.e., what happened). Although the emphasis will be on solving or addressing a particular problem, the report will also include systematic reflection on what happened and why, the larger lessons the student learned, and how they might inform practice in the future.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Curricula
- MS, Data Analytics (Special Session Program)

Introduction
The department provides the foundation for curricular innovation, student success, instructional support, and programmatic growth in the field of applied data science. Students in our programs emerge with a comprehensive understanding of how data is selected, collected, processed, modeled, analyzed, visualized and reported. Most importantly, through our responsive curriculum, our students gain mastery in the meaningful applications of data science, thus ensuring that they have the knowledge and capability of finding solutions to real-world data challenges.

The department intends to build an academic hub jointly with other SJSU departments and industry partners for promoting education and research in applied data science. To address the immense demands for data science professionals, the department launched MS in Data Analytics program in fall 2018. This program provides students with the advanced education necessary to draw insights from real data and apply analytical skills to solve practical problems. The curriculum of this program was developed jointly by subject experts of Silicon Valley companies and the faculty members of the College of Business, the College of Engineering, the College of Health and Human Sciences, the College of Professional and Global Education, as well as the College of Science.

**MS - Data Analytics**

The MS in Data Analytics degree program provides students from diverse academic and professional backgrounds with the advanced education necessary to draw insights from real data and to apply analytical skills to real-world problems. This program prepares students to conduct high-volume data management, predictive analytics, and data visualization toward solving real problems in their specialized career domains. Its multidisciplinary curriculum draws on insights from mathematics and statistics, computer sciences and software engineering, business management, health science, social science, and the natural sciences. Students completing the degree will have a practical knowledge of data analytics and the ability to apply appropriate statistical analyses and machine learning techniques needed to identify patterns, make predictions, design visualizations, and communicate findings effectively.

This Special Session degree program is offered through the College of Professional and Global Education (CPGE). It is a hybrid program consisting of ten courses with both in-person and fully online modes.

For Program Information visit: [www.sjsu.edu/msda](http://www.sjsu.edu/msda)

**Admissions Requirements**

**Admission to University**

Candidates must apply through the CSU admissions portal, [Cal State Apply](https://www.calstateapply.org), and meet all university admissions requirements. Applicants will need to apply separately to the university to obtain approval for university-level admission and to CPGE to obtain admission into the MS in Data Analytics.

In addition to holding a bachelor's degree as required above, international applicants (or applicants who earned their degrees in a country where the primary language is not English) must achieve a minimum English-language proficiency test score as indicated on the [Graduate Program Test Requirements](https://www.sjsu.edu/gradret/gradschool/) webpage at CAPE.

**Admission to Program**

Candidates must meet all the university admissions requirements. Students can be admitted in either classified or conditionally classified standing. To be admitted to classified standing, the successful applicant must have earned a bachelor’s degree from a regionally accredited institution and achieved a GPA of at least 3.0 (on a 4.0 scale) in the bachelor’s degree institution or in the last 60 semester or 90 quarter units of all coursework. Also required are an upper-division statistics course, one or more college calculus course(s), and at least one college-level programming course. An applicant might be conditionally admitted to the program with marginal deficiency in the above requirements.

**Admission to Conditionally Classified Standing**

An applicant might be conditionally admitted to the program with marginal deficiency in the above requirements. The individual admission notification will explain required terms and conditions for attaining Classified standing.

**Admission to Candidacy for Advancement to Candidacy**

The university requirements for advancement to candidacy for the master’s degree are outlined in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR), described in this catalog. DATA 294 is a multidisciplinary seminar class that exposes students to multiple domains in data analytics and satisfies the Graduation Writing Assessment Requirement (GWAR) for this program. For graduate courses that meet the GWAR, refer to the [GWAR Course List](https://www.sjsu.edu/gradret/gradschool/) on the Graduate Studies website.

**Requirements for Graduation**

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the [Graduation Requirements](https://www.sjsu.edu/gradret/gradschool/) section of the Graduate Policies and Procedures.

**MS - Data Analytics Graduation Requirements**

This is an interdisciplinary program consisting of 10 courses with both in-person and online modes. As shown below, each of the 6 core, 2 elective, and 2 thesis or project courses is 3 semester units.

**Culminating Experience (Plan A or Plan B)**

All students must complete one of the following culminating experience options as part of their 30-unit program requirement.

**Plan A (Thesis)**

Students opting to complete a master’s thesis will take the DATA 299A and DATA 299B as a two-course sequence. The student is responsible for securing the commitment of a full-time tenured or tenure-track faculty member who agrees to serve as the thesis committee chair. The student must also secure the commitments of two additional university faculty members, one of whom must be a full-time tenured or tenure-track faculty member, to serve as the student’s thesis committee. The student must write a thesis proposal and have it approved by the thesis committee and pass the DATA 299A before enrolling in the DATA 299B. The thesis must meet university requirements as stipulated in this catalog and in the [SJSU Master’s Thesis and Doctoral Dissertation Guidelines](https://www.sjsu.edu/gradret/theses/). It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee.
Plan B (Project)
The graduate project is a research or development effort performed by a team of students on a topic chosen by mutual agreement between an advisor and the team. The choice of project topic must also be approved by the instructor of DATA 298A. DATA 298A is the first part of the master’s project in which students develop a comprehensive plan and preliminary design of a data analytics project. DATA 298B is the second part of the master’s project course in which each students complete an in-depth written projects to achieve the program outcomes and satisfy the program culminating experience requirement.

Special Session Program Information
Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the CPGE website for more information.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

- BFA, Art, Concentration in Spatial Art
- Minor, Architectural Studies
- Minor, Art Education
- Minor, Art History and Visual Culture
- Minor, Photography
- Minor, Studio Art
- MA, Art, Art History and Visual Culture
- MFA, Art, Digital Media Art
Introduction
Visual art and art history play a central role in our increasingly visual and interactive culture. Without the barriers of language, the visual arts are able to foster the kind of cross-cultural understanding required of global citizens. Founded in 1913, the Department of Art and Art History is committed to researching, teaching and practicing conceptual creativity and creative problem solving in media which encompass equally the most contemporary technologies and the most ancient forms of artistic practice. We are dedicated to the understanding and analysis of visual communication, to complex critical thinking and writing, and to the interpretation of local and global culture, past and present. Our BA, BFA, MA, and MFA degrees, accredited by the National Association of Schools of Art and Design (NASAD), offer students the opportunity to study with award-winning faculty in a “best-in-the-West” combination of facilities for making, exhibiting, and researching art across many media. All programs are supported and enriched by a diverse schedule of exhibitions in the Natalie and James Thompson Gallery, eight student galleries, and weekly public lectures.
BA - Art, Concentration in Art History and Visual Culture

The Art History and Visual Culture major enriches the lives of its students by providing an in-depth knowledge of cultural traditions and creative accomplishment, and by providing the skills necessary for applying that knowledge in the service of our multicultural society. Course offerings include a wide range of themes and topics in Modern, Contemporary, Classical, Renaissance, Islamic, and Nineteenth Century art, architecture, and design. Examination of these diverse areas encourages students to become responsible citizens through an understanding of the aesthetic, cultural, and ethical choices inherent in human development. Students in this program acquire the communication skills, research techniques, and methods of critical inquiry that have become a vital part of modern life.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

BA - Art, Concentration in Studio Practice

The BA Art, Concentration in Studio Practice is a degree for artists who wish to chart their own path. This could include a broad-based approach to artistic media or a focus on a single medium; the contemporary art world embraces both these ways of working. Artists who put more emphasis on the communication of ideas and who wish to try everything may opt to take classes ranging from painting, to video art, to glassblowing, to photography, to woodworking. Others may desire to specialize in jewelry and metalsmithing, or drawing and printmaking, for example. The BA Art, Concentration in Studio Practice allows students to tailor their own degree to meet precisely their artistic interests, while progressing through a rigorous core of theoretical seminars and art history lecture classes that will inform their work in any medium. The degree puts an emphasis on entrepreneurship and the ability to fit into a variety of creative career prospects.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

### BA - Art, Concentration in Studio Practice, Preparation for Teaching

The BA in Studio Practice/Preparation for Teaching is designed for students interested in teaching art in high school or middle school and has been approved by the California Commission on Teacher Credentialing (CCTC) as meeting the undergraduate subject matter preparation for a single subject credential program to be completed after the BA. The Preparation for Teaching degree provides a broad foundation in contemporary art practice and permits some specialization in a favorite art medium as well as specialized courses in teaching art education for young people. (Note that completing this major does not guarantee admission to a credential program; see [http://www.sjsu.edu/education/](http://www.sjsu.edu/education/) for more information.) This is an excellent time to prepare for a teaching career in California.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](https://www.sjsu.edu/catalog/graduation/) section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

**Graduation Writing Assessment Requirement**

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

BFA - Art, Concentration in Digital Media Art

The BFA Concentration in Digital Media Art (DMA) offers a multidisciplinary degree in digital art and design in the areas of computer graphics, web development, programming, physical computing, fabrication, prototyping, human computer interface (HCI), interaction design, and computer games. Our curriculum is hands-on, providing project-oriented learning in collaborative workshop environments along with individually directed research and culminating exhibition opportunities. The DMA program area teaches technical, aesthetic, and critical thinking skills to empower students as problem solvers and innovators in the field of digital technology. Located in the heart of Silicon Valley, the DMA program is dedicated to the advancement of contemporary technologies through research and experimentation at the intersection of art and science. Students graduating from the program develop real-world skills using a wide range of tools, technologies, and techniques.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

No portfolios are required at the time of application for admission to SJSU. Major requirements for the first two years of study for BA Art/Studio Practice and all BFA degrees are very similar so that students have time to choose the right path and can apply for the BFA, if they choose to do so. At that time BFA program applicants must meet the following departmental requirements:

1. Have completed, be currently enrolled in, or planning to enroll within the following two semesters in all coursework in the common preparation for the BA and BFA Art majors (25-28 units of drawing, digital media, photography, sculpture, art history, ART 001, ART 002, ART 003 and ART 100W) with a minimum grade point average of 3.0 on a 4.0 scale. Also recommended, are three to six additional units from the desired BFA concentration area.

2. Pass the BFA - Art admissions review. During the review, which is held in October and March each year, images of the applicant’s creative work are reviewed by the art faculty to determine if the work demonstrates the creative level expected of BFA candidates. Instructions are available on the Art and Art History Department website.

Students complete the BFA Art program with a capstone project, for which each candidate prepares an individual art exhibit to demonstrate the candidate’s professional competence.

BFA - Art, Concentration in Photography

The BFA Concentration in Photography prepares students for careers in photography by providing courses that emphasize image as it relates to concept, theory, and professional practice in commercial and fine art photography. Our curriculum engages students in a diverse range of contemporary practices in the medium, from innovative approaches to digital imaging and traditional silver-based photography, to historic alternative photographic processes. We recognize the possibilities of the interdisciplinary nature of photographic practice and encourage interested students to explore installation, video and electronic media. In addition to our emphasis on fine art photography our program includes a strong commercial photography component, offering introductory through advanced courses in studio lighting and professional practices. The blend of fine art and commercial photography makes our program unique. Our technical facilities are extensive and include traditional black and white darkroom, commercial lighting studio stations, alternative practices studio, and large format digital printers.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

BFA - Art, Concentration in Pictorial Art

The Pictorial Art BFA program provides students with an intellectual, creative, and physical setting that supports excellence in painting, drawing, and printmaking. It provides a mix of discipline and autonomy. Preparation begins with a strong understanding of the fundamentals of drawing. From that foundation, the program provides comprehensive challenges in all pictorial disciplines and emphasizes both the historical traditions of painting and contemporary approaches. Faculty and students engage in critical and personal dialogue to encourage the development of a strong independent vision.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

No portfolios are required at the time of application for admission to SJSU. Major requirements for the first two years of study for BA Art/Studio Practice and all BFA degrees are very similar so that students have time to choose the right path and can apply for the BFA, if they choose to do so. At that time BFA program applicants must meet the following departmental requirements:

1. Have completed, be currently enrolled in, or planning to enroll within the following two semesters in all coursework in the common preparation for the BA and BFA Art majors (25-28 units of drawing, digital media, photography, sculpture, art history, ART 003, ART 002, ART 003 and ART 100W) with a minimum grade point average of 3.0 on a 4.0 scale. Also recommended, are three to six additional units from the desired BFA concentration area.
2. Pass the BFA - Art admissions review. During the review, which is held in October and March each year, images of the applicant’s creative work are reviewed by the art faculty to determine if the work demonstrates the creative level expected of BFA candidates. Instructions are available on the Art and Art History Department website.

Students complete the BFA Art program with a capstone project, for which each candidate prepares an individual art exhibit to demonstrate the candidate’s professional competence.

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-“ or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

### Physical Education

#### Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

BFA - Art, Concentration in Spatial Art

The BFA Art, Concentration in Spatial Art is a degree for artists seeking to specialize in sculpture and three-dimensional art processes. Spatial Art students begin with the common Art core of drawing, photography, digital media art, three-dimensional design, art history, and seminars about making a career as an artist. They then move into intermediate and advanced classes focused on large metal casting, woodworking, glass, ceramics, jewelry, and installation art. All studio classes emphasize concept development and recognition of contemporary art-world trends; while upper-division art history classes provide context and develop students’ critical thinking skills.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

No portfolios are required at the time of application for admission to SJSU. Major requirements for the first two years of study for BA Art/Studio Practice and all BFA degrees are very similar so that students have time to choose the right path and can apply for the BFA, if they choose to do so. At that time BFA program applicants must meet the following departmental requirements:

1. Have completed, be currently enrolled in, or planning to enroll within the following two semesters in all coursework in the common preparation for the BA and BFA Art majors (25-28 units of drawing, digital media, photography, sculpture, art history, ART 003, ART 002, ART 003 and ART 100W) with a minimum grade point average of 3.0 on a 4.0 scale. Also recommended, are three to six additional units from the desired BFA concentration area.
2. Pass the BFA - Art admissions review. During the review, which is held in October and March each year, images of the applicant’s creative work are reviewed by the art faculty to determine if the work demonstrates the creative level expected of BFA candidates. Instructions are available on the Art and Art History Department website.

Students complete the BFA Art program with a capstone project, for which each candidate prepares an individual art exhibit to demonstrate the candidate’s professional competence.

# Minor - Art History and Visual Culture

The minor in Art History and Visual Culture major enriches the lives of its students by providing an in-depth knowledge of cultural traditions and creative accomplishment, and by providing the skills necessary for applying that knowledge in the service of our multicultural society.

## University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

MA - Art, Concentration in Art History and Visual Culture

The Master of Arts in Art History and Visual Culture offers a broad education in art history including preparation for a Ph.D. degree program. It also helps to prepare students for a graduate library degree with a specialization in art history as well as a variety of positions including community college professor, researcher, museum curator, art administrator, conservator, and visual resource librarian.

Additional information is available in the Art & Art History Department Office and on the department website: www.sjsu.edu/art/.

Admissions Requirements

Admission to Classified Standing

Depending on their level of preparation, applicants can be admitted in either classified or conditionally classified standing. Admission requires two steps.

In addition to the university admission requirements, as outlined in this catalog, applicants must meet requirements for their area:

- Art History and Visual Culture: completion of 30 or more college-level semester units or equivalent in Art History courses with a minimum 3.0 GPA. At least 24 units should have been in upper-division Art History courses. Courses in related academic areas will be assessed in reviewing qualifications of applicants. Reading knowledge of a foreign language related to the subject of the intended thesis research is strongly recommended.
- Art Education: Completion of 45 or more college-level semester units or equivalent in appropriate Art courses with a minimum 3.0 GPA. At least 12 of these units must have been in Art History of which 6 units were upper-division courses and 3 units were in Art 138, Studio Art Experiences for Young People, or their equivalent.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Admission to Conditionally Classified Standing

Applicants who meet minimum requirements for admission to the Graduate Division but do not meet all other (programmatic) requirements (i.e., lacking prerequisites or GPA) may be admitted to conditionally classified standing. They will be advanced to classified standing when the Art History graduate advisor certifies they have satisfied all appropriate requirements.

Requirements for Advancement to Graduate Candidacy

Candidacy denotes that the student is fully qualified to complete the final stages of the MA - Art and is thus eligible to enroll in ART 299 (Master’s Thesis) or ART 297B (Master’s Project). In order to advance to candidacy, students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the MA degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Additional departmental requirements for candidacy include

- Secure commitment of three faculty members of the university, two of whom must be members of the Art and Art History faculty, to serve as members of the student’s MA - Art project or thesis committee, with one regular Art faculty member agreeing to serve as chair. For candidates in Art History and Visual Culture, the chair of the committee and at least one other committee member must be art historians. This committee must approve the student’s proposed program for the MA - Art degree are detailed in the Graduate Policies and Procedures section of this catalog. The proposed program must list a total of 30 semester units, of which at least 15 must be in the upper-division level.
- Submission of a proposed curriculum program conforming to university and departmental requirements. The proposed program must be approved by the Art graduate committee before the student may be considered for the MA - Art. The proposed program must include the required seminars and ART 299 (Master’s Thesis) or ART 297B (Master's Project). Electives to complete the 30 units may be drawn from approved 100 and 200-level courses.
- Passage of the first of two comprehensive exams and the language exam.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MA - Art Graduation Requirements

Requirements in the two areas or tracks are as follows:

- Art Education: Of the 30 units required, 21 must be in Art courses and 9 units may be in related areas of study. The upper-division writing requirement and EDLD 221, ART 260, and one seminar must be completed before candidacy may be granted.
• Art History and Visual Culture: Of the 30 units required, 21 must be in Art History and Visual Culture courses and 9 units may be in related areas of study. Five seminars (15 units) must be included. The MA - Art student with a concentration in Art History and Visual Culture must demonstrate reading knowledge of a foreign language related to the subject of the intended thesis research. The student must also pass a two-part comprehensive written examination designed to test general competence in Art History and Visual Culture. The second part of the exam is based on the candidate’s thesis proposal once that has been approved by a pre-thesis committee. Attainment of candidacy and eligibility to enroll in ART 299 (Master’s Thesis) will be contingent upon satisfactory completion of all comprehensive and language examinations.

Thesis Requirements
• The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee.
• Thesis Examination: The candidate for the MA - Art degree must successfully pass a final oral examination based on the thesis.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

MFA - Art, Concentrations in Digital Media Art, Photography, Pictorial Art and Spatial Art

Step I. Admission to MFA Classified Standing

Applicants must meet university requirements for admission to classified standing as outlined in this catalog. In addition, they must meet the following requirements:

1. Demonstrated interest in the area of study by a professional portfolio. The equivalent to a Bachelor of Fine Art (BFA) degree in the applicant’s designated area of graduate emphasis is recommended. At least 6 upper division units in art history are required.
2. Successful completion of the application procedure for the MFA Admission Review. During the MFA Admission Review, appropriate materials documenting the applicant’s creative work are examined by the art faculty to determine whether the quality of the work meets the standards expected for MFA graduate work. Applicants should submit copies of their creative materials for the MFA Admission Review; applicants should not submit their original materials unless requested to do so by the faculty. Applicants who pass the review and who meet minimum school and university requirements are admitted to classified standing for the following semester.

Applicants for the MFA Admission Review will be considered only if the review instructions have been carefully followed and all requested materials (including official transcripts) are supplied. Email or call the Art and Art History department, art@sjsu.edu or 408-924-4320, for details. The deadline for application to the departmental review is the second Friday in January each year; application to this departmental review should not be confused with application to SJSU which is also required prior to the university’s deadline.

Admission to Conditionally Classified Status

Applicants who meet the University’s minimum requirements for graduate admission and whose creative work, as examined during the MFA Admission Review, shows promise but is not supported by traditional undergraduate preparation in Art may be admitted to conditionally classified status and provided with a list of requirements to be addressed as soon as they enroll. They will be advanced to classified status when the art graduate advisor certifies all appropriate requirements for classified standing have been satisfied. Applicants who have completed an MA - Art degree must meet all prerequisites and requirements for the MFA - Art degree program.

Admission to Candidacy for the MFA - Art

Candidacy denotes that the classified graduate student is fully qualified to complete the final stages of the MFA - Art program and is thus eligible to enroll in ART 298A, MFA Special Study, and 298B, MFA Project. In order to attain candidacy, the student must meet the university requirements for admission to candidacy as outlined in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the CWAR, please refer to the Graduate Admissions and Program Evaluation website at www.sjsu.edu/gape. In addition, the student must:

1. Formalize their MFA project committee by obtaining the signatures of at least three university faculty members (two must be members of the art faculty) to serve as members of the student’s committee. A regular art faculty member who teaches in the student’s major area of emphasis must serve as chair. This committee must approve the student’s proposed program of study for the MFA - Art degree no later than one month prior to the end of the semester preceding the one in which the final project is created.
2. The student must submit a proposed program of study conforming to university and school requirements on the “Departmental Request for Candidacy” form obtained from Graduate Admissions and Program Evaluations and filed according to university deadlines. The proposed program of study must be approved by the art graduate committee and the College of Graduate Studies before the student may be considered for the MFA - Art.
3. Pass the Advancement to Candidacy (ATC) Review. This is an exhibition of original work which can be scheduled during any semester in one of the department’s student galleries. Students must obtain signatures of two faculty members willing to serve on their culminating project committee, including at least one faculty member teaching in the designated area of emphasis, in order to apply to the ATC Review. Passing the review is necessary before the student may file for the “Departmental Request for Candidacy” and enroll in their culminating project classes, ART 298A and Art 298B.

Additional information regarding advancement to candidacy is available in the Art & Art History Department Office.

Completing Requirements for the MFA - Art

1. General Requirements: The MFA - Art program requires a minimum of 60 units of approved courses completed after admission to classified status in the program, of which at least 30 units must be in courses at the 200 level. Electives to complete the 60 units may be drawn from approved 100 and 200 level courses. The program also requires the student to participate in regularly scheduled departmental activities such as studio visits by faculty, first-semester review, first-year review, and Advancement to Candidacy reviews.
2. Required Courses: see below.
3. All students must meet the university’s graduation writing assessment requirement.
4. MFA - Art Project: The culmination of the degree is the MFA - Art culminating project which must demonstrate the professional level of the candidate’s accomplishment. After admission to candidacy the culminating project will be developed under the guidance of the candidate’s MFA - ART project committee chair with the assistance of the project committee. Upon the committee’s prior approval of the completed work, projects will be appropriately exhibited in accordance with departmental requirements.
All candidates must also submit to the Department of Art and Art History a satisfactory report of the project, following the department’s approved format. MFA project reports will document the creative project and the creative process and context for that project with color images that illustrate each work in the project. The project report and the image record (in the case of studio projects) must be approved by the candidate’s culminating project committee and by the art graduate advisor before the degree may be awarded.

1. Final Examination: The candidate must successfully complete an oral examination based on the area of the MFA - Art culminating project.
2. The application for graduation form must be filed with the university Graduate Admissions and Program Evaluations (CAPE) according to the posted deadline during the semester prior to completion of degree requirements.

Introduction
Intercollegiate athletics offers a comprehensive spectrum of 17 sports (6 men’s and 11 women’s) which compete at the NCAA Division I level (the highest level of collegiate competition). San Jose State University is a member of the Mountain West Athletic Conference. Over the years, San Jose State athletics teams have won 10 NCAA team and 50 individual championships.

Course offerings are designed to satisfy the needs and interests of highly skilled student-athletes and provide them with the highest level of intercollegiate athletics experience. Note: Courses are open only to those SJSU students who are currently on one of the Spartan team rosters.

Curricula
⦁ BS, Aviation
⦁ Minor, Aviation

Introduction
The oldest and largest provider of aviation degrees on the West Coast, the Aviation programs in the Department of Aviation and Technology prepare students for careers as professional pilots, airport managers, technical, marketing and quality control managers, and other aviation industry professionals. Students receive hands-on experience in both basic and advanced aviation principles and procedures, including aircraft design, aviation safety, air traffic control, and legal and labor issues in national and international aviation. Bachelor degree candidates have the option to focus on professional flight, operations, aviation management, or maintenance management—a specialty that complements an AS-level Federal Aviation Administration (FAA)-approved community college maintenance program. Aviation classes are held both on campus and off-site at our Reid-Hillview Airport facility.

Note to Veterans
Those students who have successfully completed armed forces instructional programs in aviation and who have been awarded units by the Admissions Office for this service training may apply such credit as appropriate toward any of the major or minor programs offered by the department.

Honors Program
Students who have maintained a 3.5 grade point average in all aviation courses are eligible for the departmental honors program. Qualified candidates may apply or be nominated by the faculty, during their junior year. To meet the honors course requirements, candidates must enroll in at least two units of Aviation 180H Individual Studies. This individual studies course is specifically structured for honors students. Students who successfully complete the two, one-unit honors courses, and who maintain the required 3.5 grade point average, will qualify for the award of departmental honors at graduation.
BS - Aviation

The curriculum provides a four-year pattern of course work for those interested in the several different aspects of aviation. In addition to the required course work in general education, aviation, science and business, the student has the opportunity to choose one of four options - Professional Flight, Operations, Aviation Management, or Maintenance Management.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All courses in the Preparation and Required in Major (all courses in preparation, core, and concentration) must be completed with a grade of “C- or better”. With the exception of ENGR 100W which must be completed with a “C or better”.

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Preparation for the Major

| BUS2 090. Business Statistics ............................................................... 3 |
| CHEM 001A. General Chemistry ............................................................. B1+B3 5 |
| MATH 071. Calculus for Business and Aviation ......................................... B4 3 |

MATH 30 or MATH 30P may be used in lieu of MATH 71

COMPLETE ONE COURSE FROM:

| BUS1 020. Financial Accounting ............................................................... 3 |
| BUS1 020N. Survey of Accounting ............................................................. 3 |
### Requirements of the Major

To qualify for a baccalaureate degree in Aviation, students must earn a grade of "C-" or better in each required major and preparation course.

### Total Units Required
120
Minor - Aviation

A minor in aviation is granted upon the completion of a coherent course of study and may be designed to fit the needs of a student from another major. The minor must include at least 12 units, six of which must be upper division. Six units must be completed in residence. Contact the department office (IS 111) for more details.
Behavioral Sciences Program
College of Social Sciences

CLARK HALL 469
408-924-5710

Curricula
⦁ BA, Behavioral Science

Introduction
Behavioral science majors develop an interdisciplinary perspective on human behavior and an understanding of the psychological, social and cultural dimensions to being human in a complex society. Offered cooperatively by the Departments of Anthropology, Psychology and Sociology, the Behavioral Science Program is housed in the Department of Anthropology, which oversees academic advising. The program prepares graduates for a variety of jobs that require working with social science data and with people. Many of our alumni have pursued graduate work in health care, social work, human resources, and other fields.

The Department of Anthropology provides all academic advising for the Behavioral Science Program. Students are encouraged to call the Department of Anthropology, (408) 924-5710, with any questions about the program, including the availability of advisors.
BA - Behavioral Science (Interdepartmental)

This degree is listed with the Anthropology Department.

Introduction
As leaders in the education of a highly trained and diverse scientific workforce, our mission is to provide a dynamic educational experience by engaging students in hands-on, inquiry-based learning activities at the bench and in the field. Through these experiences our students will gain a conceptual and experiential understanding of the biological sciences spanning from molecules to ecosystems.

Our Program goals are to:
• Serve the diverse student population of our region.
• Educate students to be intellectually agile and technologically proficient.
• Provide students with intensive, rigorous laboratory and field experiences within the context of their regular coursework.
• Create individualized mentoring opportunities and state-of-the-art learning experiences within the context of our faculty research programs.
• Foster creativity, a sound theoretical foundation, and the ability to communicate effectively and interact cooperatively.
• Make substantial contributions to the scientific community through our research efforts and that of our students.

Honors Program
Students may apply for the honors program in Biology in BS - Biological Sciences, Concentration in Systems Physiology.

Students wishing to complete the honors program must:
1. Have a GPA of 3.5 or higher in courses required in the major,
2. Have an overall SJSU GPA of 3.0 or higher, and
3. Complete Biology, Botany, or Zoology 186 “Senior Thesis”.

Senior thesis courses involve the student in the completion of a research project under the direct supervision of a faculty member. As such, the research project must be on a mutually agreed upon topic. It is recommended that the student submit a proposal for research to the faculty member and have that proposal approved in the last semester of his/her junior year. The student is required to present the results of the research in written form and as a seminar.
### BA - Biological Science

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

**Major Exceptions**

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

**Major-Specific Graduation Requirements**

Students in this major must complete all lower division courses in the Requirements of the Major with a “C-” or better to graduate.

**Prerequisite Requirements**

Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of “C or better” (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

Students pursuing the California State Clinical Laboratory Science license should consult an advisor for additional requirements.
# BS - Biological Science, Concentration in Molecular Biology

## University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

## 4-Year Program Roadmap
Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

## Major Exceptions
This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

## Major-Specific Graduation Requirements
Students in this major must complete all lower division courses in the Requirements of the Major with a “C-” or better to graduate.

## Prerequisite Requirements
Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of “C” or better (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).
Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).
A grade of C or better (C- not accepted) is required to meet graduation requirement.

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Minor - Bioinformatics

Insights into many areas of biology, including genomics, molecular biology, neuroscience, physiology, microbiology, ecology and evolution, can be gained using computational methods. Bioinformatics is the use of computational tools to understand important questions in the biological sciences. The minor in bioinformatics gives students a background in the biological sciences, computation skills, and experience using these skills to address biological questions. The minor requires 8 units of biology courses, 6 units of introductory courses in a programming language (either Python or Java), and 6 units of courses in bioinformatics.

At least 12 of units must be distinct from the requirements of the student’s major. At least six units must be completed at SJSU. The minimum aggregate GPA for all coursework required for the minor must be at least 2.0. A grade of “C-” or better is required for courses being used to meet any requirement in the minor.

University Graduation Requirements
To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

### Total Units Required

For all courses for the minor, the instructor may accept related course work or experimental learning in lieu of stated prerequisites.

Total Units Required: 22
Clinical Lab Scientist Training Program

The Clinical Laboratory Scientist Training Program at San Jose State University is a 12 month training program that prepares students to take the ASCP national exam for Clinical Laboratory Scientists and obtain a California State Clinical Laboratory Scientist license.

The training program is a 40 hour per week commitment with an emphasis on hands-on learning in the hospital setting. Most weeks, students will spend 32 hours training at a clinical site and 8 hours in lecture. For more information on the program, please visit our website at www.sjsu.edu/cls.

As part of the application process, a group of applicants will participate in interviews which include representatives from our clinical affiliates. Students are admitted to the program based on a weighted score which takes into account the documents in their application, their performance during interview and an essay written on the day of the interview.

Admission Policies and Prerequisites

To be admitted to the program you must have:

- A bachelor’s degree in biology or a related science
- 18 semester units of Biology including instruction in Immunology, Hematology, Medical Microbiology
- 16 semester units of Chemistry including instruction in Biochemistry and Quantitative Analysis
- 3 semester units of Physics including instruction in optics and electromagnetism
- 3 semester hours of mathematics (statistics or calculus)
- A minimum C.P.A. of 2.8 on a 4 point scale
- A minimum C.P.A. of 3.0 in last 60 units
- Completion of Hematology, Immunology and Medical Microbiology courses with a grade of B or better within 5 years of application
- Coursework in Human or Mammalian Physiology and Human or General Genetics
- Three (3) letters of recommendation
- Acceptance by the SJSU CLS Program Selection Committee and a Clinical Affiliate
- All applicants must have completed 12 semester units of upper-division science course work at a United States university before applying to the program
- All applicants must have the legal right to work in the United States
- For students with a degree from a foreign university, TOEFL (minimum score of 100 or equivalent IELTS score)
- Meet admission requirements for San Jose State University (do not apply until AFTER you have been accepted to SJSU CLS Training Program and have been given instructions on how to proceed)
- Hold CLS Training license granted by State of California, Laboratory Field Services (do not apply until AFTER you have been accepted to SJSU CLS Training Program)

Three (3) letters of recommendation

Interview and Matching Process

A committee comprised of SJSU Biology Department faculty members review and score each candidate’s application and then meet to determine which candidates they will be inviting to interview. Candidates who are invited to interview receive the contact information for the education coordinators at the various clinical sites. They are invited to arrange tours of the participating facilities before they come to interview. We like to give at least a month for the candidates to make these arrangements. Candidates are asked to come to interview prepared to rank the clinical sites in their order of preference.

The interviews are conducted over two days, with each day having a morning and an afternoon interview session. Each session begins with a short essay (topic to be revealed at that time). Following that, there is a brief opportunity to speak with the education coordinators and CLS Training Program staff at a meet & greet breakfast (or lunch). Candidates will then have an opportunity to interview with the education coordinators, scheduled in 15-minute increments. There are generally 8-12 education coordinators seated around the conference table with the candidate sitting at the head of the table. Candidates are all asked the same questions, with time at the end for additional discussion as desired. The coordinators score each candidate on their interview.

At the end of the two days of interviews, the education coordinators are asked to fill out a form indicating which candidates they would be willing to train. They do not rank the candidates, they merely check “Yes” next to the names of candidates that are acceptable to them.

The CLS Training Program compiles all of the scores (application 50%, interview 40%, and essay 10%) to determine a ranking. With that ranking in hand, we take the preference sheet from the highest ranked candidate and determine his/her 1st choice of training facility. We then look to the form filled out by the education coordinator to see if they had indicated a willingness to train them. If they checked “yes”, we have a match. If there was no match, we go to the candidate’s 2nd choice of training facility, continuing until we have a match. We then continue down the list matching candidates in order of their ranking until all training positions have been filled.

We announce matches in coordination with the other training schools to allow candidates the opportunity to weigh their options from each school at the same time. We send out emails notifying the candidates of their matches. Candidates who are not matched are notified of their alternate status. If a candidate chooses to decline a match to accept a position at another school, we then go to the highest ranked candidate in our alternate list and go through the matching process again.

Candidates not placed stay in our alternate pool until training begins. If they do not receive a placement, we are happy to move letters and transcripts forward to a new application cycle, but a new application must be submitted.
### Required Core

- MICR 291A. Advanced Hematology ................................................................. 4
- MICR 291B. Advanced Pathophysiology ....................................................... 4
- MICR 291C. Advanced Human Immunology ................................................ 4

- MICR 291E. Advanced Immunohematology .................................................. 4
- MICR 291F. Molecular Based Diagnostic Techniques ................................. 4

### Additional Core

**THREE SEMESTERS OF THE FOLLOWING COURSE:**
- MICR 291G. Clinical Laboratory Management ........................................... 4
- MICR 292. Topics and Demonstrations in Clinical Laboratory Science .......... 3

### Total Units Required

45
Master in Biotechnology

The Master of Biotechnology (MBT) program integrates advanced, hands-on training in laboratory-based molecular biology courses with MBA-level business courses from the College of Business. The core courses provide an introduction to aspects of the biotechnology industry including drug development, marketing, finance and intellectual property. The required internship experience allows the students to apply what they have learned in real-life settings.

Through elective choices, students supplement the core program with additional hands-on science or MBA courses in support of their career goals. MBT program graduates are highly trained individuals who have had direct exposure to the biotechnology corporate world and are ready to make immediate contributions to biotechnology companies. Graduates work in a variety of positions in research, product development, marketing, regulatory affairs, clinical affairs, project management, quality, and others.

For more information visit: www.sjsu.edu/biology/.

Admissions Requirements

University Admissions
Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the Master in Biotechnology degree program. See the CAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE.

Admission to the Program
Applicants must submit to the Program Director their unofficial transcripts, GRE and TOEFL scores, two letters of recommendation, a statement of purpose and a resume. Potential candidates will be interviewed during the spring semester. Admission is based on the acceptance to the university and the outcome of the interview.

Requirements for Advancement to Candidacy

All students will submit their Advancement to Candidacy petitions during the fall of their second year, after having fulfilled all University requirements for advancement to candidacy, as detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR), which is satisfied in this degree by completion of BIOL 202TA and 202TB with grades of “B” or higher.

Culminating Experience
Plan B (Project)
The culminating experience is the Biotechnology Colloquium (Biol 285T), which includes the preparation of a business plan for a biotechnology startup company.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Graduation Requirements
The Master of Biotechnology program consists of 36 semester units of approved work. It includes a 2-unit internship in the biotechnology industry.

Special Session Program Information

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

This requirement is satisfied by passing BIOL 202TA and 202TB.

## Total Units Required

36

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
MA - Biological Sciences

The MA in Biological Sciences offers students broad training in areas of science that may include general biology, plant biology, cell biology, ecology, entomology, genetics, microbiology, immunology, systems physiology, toxicology, zoology, or, under special circumstances, marine biology. Students with an MA in Biological Sciences go on to careers in research, biotechnology, medical and health sciences, and teaching.

For more information visit the program website at: www.sjsu.edu/biology/.

Admissions Requirements

University Admissions
Candidates must apply through the CSU admissions portal, Cal State Apply, and meet all university admissions requirements. Applicants will need to apply separately to the university to obtain approval for university-level admission and to the department to obtain admission into the MA in Biological Sciences.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. The program does not currently require the GRE for admission.

Admission to the Program
In addition, applicants must submit to the Graduate Coordinator for the Department of Biological Sciences a personal statement and two letters of recommendation from people who can evaluate your potential to succeed in a graduate program.

Note: Applicants’ admission into the program is contingent upon their being accepted by a tenured or tenure-track faculty member in the Department of Biological Sciences who will become their major advisor. Applicants must contact tenured or tenure-track faculty members.

Requirements for Admission to Classified Standing
Students can be admitted in either classified or conditionally classified standing. To be admitted to the MA in Biological Sciences program in Classified status, an applicant must meet all of the minimum university and departmental requirements for admission.

Admission to Conditionally Classified Standing
If an applicant’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental and/or faculty requirements, the conditions will include passing additional courses (specified by the student’s major advisor) in the first semester of the program with a grade of B or better. The program admissions letter will explain terms and requirements.

Requirements for Advancement to Candidacy
Each semester, students should consult with their graduate advisor as to develop a schedule of courses. Students admitted as conditionally classified must satisfy the requirements listed in their acceptance agreement before advancement to candidacy. Students who have completed matriculation and achieved classified standing in the master’s degree curriculum must next advance to candidacy for the degree. A student may advance to candidacy after completing a minimum of 9 units of graded work as a graduate student in letter-graded 100- or 200-level courses acceptable to the AE Department as well as fulfilling the other university requirements for advancement to candidacy, as detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR), which is satisfied in this degree by completion of BIOL 202 with a “B” or higher.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Culminating Experience Requirements
Students in the MA, Biological Sciences may complete the program Culminating Experience through through either a comprehensive exam or graduate project. Students who have advanced to candidacy, and who have completed or are in the final semester of completing the 30 units of required coursework will choose, in consultation with their major advisor, one of two options for their Culminating Experience. The program does not offer a thesis option.

Plan B (Comprehensive Exam)
Students choosing the Plan B (Comprehensive Exam) will enroll in BIOL 298M M.A. Biological Sciences Culminating Experience, and successfully complete written exam, followed by an oral exam as their culminating experience. The advising committee determines the format of the written and oral exams. Once the written portion of the exam is passed, students take a two- to three-hour oral examination. Successful completion of both exams is required for award of the MA Biological Sciences degree. Students who are not successful in their first attempt will have one opportunity to retake one or both exams. Written and oral exams will include material from graduate-level coursework taken by the student. Successful completion of both the written and oral exam is determined by a majority vote of the student’s graduate committee.
Plan B (Project)
The student choosing the Plan B (Project) must enroll in the 1-unit 298M M.A. Biological Sciences Culminating Experience and complete a research project that has been approved and supervised by their major advisor. This culminating experience option requires students to complete a written report in the style of a manuscript for publication that describes the project and to deliver an oral presentation describing the project to the advising committee. Research projects for the MA Biological Sciences are typically 1-2 semesters in duration. Successful completion of both the manuscript and the oral presentation is determined by a majority vote of the student’s graduate committee.
As shown below, the program consists of 30 semester units of approved work. The student consults with his or her advisor to select coursework.

### Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Elective courses must be planned in consultation with the Graduate Advisor.
The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.
MS - Biological Sciences, Concentration in Ecology and Evolution

The master’s program in Biological Sciences with a concentration in Ecology and Evolution offers students training in the pursuit of rigorous scientific investigation with an emphasis on ecological and evolutionary processes. Students in this degree program emphasize botany, entomology, zoology, or conservation biology through choice of advisor, committee, course work, and thesis or project. Our graduates have an excellent grasp of theory and application of ecological and evolutionary principles.

In addition, students with our degree will have gained experience in critical thinking, problem solving, research methodology (e.g., experimental design, sampling techniques, and analysis), and both written and oral communication. Our alumni are successful applicants for doctoral degree programs and generally attain high-level academic and non-academic positions in both the private and public sectors.

For more information visit http://www.sjsu.edu/biology/.

Admissions Requirements

Candidates must meet all the university admissions requirements.

In addition, applicants must submit to the Graduate Coordinator for the Department of Biological Sciences a 1-2 page personal statement that includes the following sections: an explanation of why the student wants to earn an MA or MS, their long-term goals and how will the degree help facilitate those goals, the names of up to three faculty members whose research interests them, and two letters of recommendation. Applicants must also be accepted by a tenured or tenure-track faculty member in the Department of Biological Sciences prior to acceptance by the program. It is the student’s responsibility to contact any potential faculty advisors. For complete details on the student approval process, please visit: http://www.sjsu.edu/biology/graduate-programs/prospective-ms-students/index.html.

Students can be admitted in either classified or conditionally classified standing. Conditional acceptance means that the candidate must fulfill specific requirements in order to be eligible to apply for advancement to candidacy. These conditions will be stipulated as part of the acceptance agreement between the faculty adviser and the applicant. Failure to fulfill these requirements will result in disqualification from the program.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the admissions requirements section of this catalog. Candidacy includes successful completion of the Graduate Program Test Requirements webpage at CAPE.

Requirements for Advancement to Graduate Candidacy

Each semester, students should consult with their graduate advisor to develop a schedule of courses. Students admitted as conditionally classified must satisfy the requirements listed in their acceptance agreement before advancing to candidacy. Students who have comp achieved classified standing in the master’s degree curriculum must next advance to candidacy for the degree. A student may advance to candidacy after completing a minimum of 9 units of letter-graded work as a graduate student in 100- or 200-level courses acceptable to the department as well as fulfilling the other university requirements for advancement to candidacy, as detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR), which is satisfied in this degree by completion of BIOL 202 with a grade of “B” or higher.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MS Biological Sciences, Concentration in Ecology and Evolution, Graduation Requirements

As shown below, the program consists of 30 semester units of approved work. The student consults with his or her advisor to select a thesis or project topic.

Culminating Experience Requirements

Plan A (Thesis)

Thesis: The thesis must meet university requirements as stipulated in this catalog and in the SJU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee. The MS thesis document must be approved by the student’s thesis research committee before submission. Typically, the thesis committee will provide the candidate feedback during the Thesis Defense and may request changes to the thesis before final approval.

Oral Thesis Defense: All MS candidates are required to present a public seminar based on their research project.

Plan B (Project)

Written Project: The written project must be a manuscript describing the student’s research project, written following a professional journal's format for submission. It will be written under the guidance of the candidate’s graduate committee chair with the assistance of their graduate committee. The manuscript must be approved by the student’s graduate committee. Typically, the committee will provide the candidate feedback during the Project Defense and may request changes to the manuscript before final approval.

Oral Project Defense: All MS candidates are required to present a public seminar based on their research project.
Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

A grade of "B" or better in BIOL 202 will satisfy the graduate competency in writing requirement.

MS - Biological Sciences, Concentration in Physiology

The master’s program in Biological Sciences with a concentration in Physiology offers students training in the pursuit of rigorous scientific investigation with an emphasis on the integrative nature of physiology across levels of organization from molecule to organism. During their research experience, students acquire the skills necessary to successfully address a variety of research questions under the guidance of faculty.

In addition, students with our degree will have gained experience in critical thinking, problem solving, research methodology (e.g., experimental design, sampling techniques, and analysis), and both written and oral communication. Our alumni are successful applicants for doctoral degree programs and generally attain high level academic and non-academic positions in both the private and public sectors.

⦁ MS, Biomedical Engineering, Concentration Biomedical Devices

Introduction
Biomedical engineering is an inherently interdisciplinary field that lies at the intersection of engineering and the biological and health sciences. Biomedical engineers use the principles of engineering to develop solutions for a wide variety of products and technologies that improve the quality of life. Students majoring in biomedical engineering will have the satisfaction of being actively engaged in a discipline that has human health and welfare as its primary focus.

The mission of the Biomedical Engineering Department is to be a recognized leader in translational biomedical research; to provide hands-on education focused on solving real world biomedical problems; and to foster innovation and entrepreneurship in the service of human well-being.

The BS and MS Biomedical Engineering programs have been designed, in consultation with potential employers, to prepare graduates for the wide variety of emerging careers in biomedical devices, bioelectronics and instrumentation, imaging, bioinformatics, and manufacturing, among others. The coursework prepares students to function effectively in a U.S. Food & Drug Administration-regulated environment. These programs also promote the development of soft skills, such as oral and written communication, and team work, that are necessary for professional success and lifelong learning in the global marketplace. The ability to address and deal with ethical issues, which are of paramount importance in biomedical engineering, is also cultivated, and communications skills are integrated into the classes throughout the curriculum.

In addition to bachelor’s and master’s degrees in biomedical engineering, we offer an undergraduate minor in biomedical engineering, appropriate for students pursuing other fields of study but still interested in applications in biomedical engineering. The BS Biomedical Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.
BS - Biomedical Engineering

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions
This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements
The following course in Preparation for the Major must be completed with a “C- or Better”: ENGL 001B.

The following courses in Required in the Major Lower Division Core (LD Core) must be satisfied with a “C- or Better”: MATH 030*, MATH 031*, MATH 032*, PHYS 050*, PHYS 051, CHEM 001A*, CHEM 001B*, Biol 030*, ENGR 010*, BME 025*, BME 026, BME 028, BME 068, and EE 098. Those with an asterisk (*) must be completed with a GPA 2.0 and no individual course grade lower than “C-” before enrolling in Junior Core classes.

The Junior Core which consists of Math 133A or Math 123, BME 115*, BME 117*, BME 130*, BME 174*, BME 177*, and ENGR 100W*, must be completed with a GPA of 2.0 or better, and no individual course grade lower than “C-”. Those identified with an asterisk (*) must be completed before enrolling in Senior Project (BME 198A).

The Senior Core consists of: BME 147, BME 165, BME 168, BME 178, BME 198A and BME 198B. The entire Senior Core must be completed with a GPA of 2.0 or higher and no individual course grade lower than a C-.

All electives for the BS Biomedical Engineering degree must also be completed with a C- or better.

Prerequisite Requirements
Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of “C or better” (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

Physical Education

Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

*Must take BME 198A/B and ENGR 195 A/B to meet GE Area S and V requirements*

### Technical Major Electives

Electives must be selected from the approved departmental list in consultation with the students’ advisor.

### Total Units Required

| Units Required | 120 |

---

**ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE**
### Minor - Biomedical Engineering

Students must complete a minimum of 13 units as listed under the course requirements. All of these units must be outside the requirements for the student’s major, i.e., the same courses cannot be listed both on the minor and the major forms. BME 115 (4 units) and BME 177 (3 units) are required for all students taking this minor. In consultation with the Biomedical Engineering advisor, students must select two additional courses from the group of biomedical engineering-based courses. It is the student’s responsibility to make sure that the prerequisites for each course are met. Students in majors other than engineering, biology, chemistry or physics will probably need to take additional courses to meet prerequisites for the courses required for this minor. This sequence of courses is the recommended pattern for engineering majors. Alternative patterns may be approved by the Biomedical Engineering advisor for students majoring in biology, physics or chemistry.

Interested students are encouraged to meet with a BME Department Adviser to fill out the Biomedical Engineering Minor form [http://www.sjsu.edu/bcme/docs/BME%20Minor%20Form%20-%20Fall%202017.xlsx].

#### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

<table>

**Total Units Required**: 16
MS - Biomedical Engineering

Students pursuing the MS, Biomedical Engineering degree will have the satisfaction of being actively engaged in a discipline that has human health and welfare as its primary focus. Biomedical Engineering is an inherently interdisciplinary field in which professionals from engineering and the physical sciences play a major role in developing engineered products for deployment in the human body.

Program Objectives
The MS, Biomedical Engineering program incorporates and develops oral and written communication skills, teamwork, and the ability to address and deal with ethical issues, all of which are essential for professional success in the global marketplace and for lifelong learning. The MS, Biomedical Engineering program is designed to produce graduates who will be able to:

- Solve complex biomedical engineering problems and tasks in areas including design, manufacturing and quality control.
- Use engineering, science, and relevant regulations to justify recommendations.
- Evaluate the impact of their work on their fellow human beings and society as expressed through regulatory, ethical, economic, global and environmental considerations.
- Deliver effective presentations of biomedical engineering results in written and oral formats.
- Engage in lifelong self-directed learning to maintain and enhance professional skills and capabilities and keep abreast of the rapid developments in biomedical engineering and science.
- Be effective leaders capable of working in diverse environments and teams, in a globally competitive landscape.

Requirements for Admission
Applicants must meet all university admission requirements. (Please see SJSU Admission Requirements). Applicants who have a major GPA of 3.0 or higher are not required to take the GRE. All others must take the GRE General Test and obtain a combined score of 315 or higher in the Verbal and Quantitative sections, and 3.5 or higher in the Analytical Writing section.

Students can be admitted to classified or conditionally classified standing. To be admitted to classified standing, a student must possess a BS degree in biomedical engineering, or its equivalent from an accredited institution with a grade point average of 3.0 or better in the last 60 semester units, have met the GRE requirement if their major GPA is below 3.0; and have completed the Transition Courses, or their equivalents, with grades of B or better.

Conditionally Classified Admission
Students can be admitted to conditionally classified standing if they have a BS degree in an engineering discipline, chemistry, physics or biology from an accredited institution. Students with conditionally classified standing will take a series of Transition Courses. Once the series is completed satisfactorily, students can petition for transfer to classified standing. For more information on the transition courses contact the Biomedical Engineering Graduate Coordinator at biomedical-engineering@sjsu.edu.

Requirements for Candidacy
Students must meet the university requirements for candidacy, which include successful completion of a minimum of 9 units of graduate level classes. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details.

Course Requirements
To meet the requirements for the MS, Biomedical Engineering degree, a student must complete 30 units of approved courses. Students must achieve a minimum of a "C" in each course, a cumulative GPA of 3.0 or better in all their coursework, AND a GPA of 3.0 or higher for the courses listed in the Candidacy form.

Culminating Experience
In addition to the 30 approved course units, students must also complete a written thesis or project report and an oral defense of their thesis or project. The candidate may choose either the Plan A (thesis) or Plan B (project) option.

Plan A (Thesis)
The student who opts to complete a master’s thesis is responsible for securing the commitment of a full-time tenured or tenure-track BME faculty member who agrees to serve as thesis committee chair. The student must also secure the commitments of two additional university faculty members, one of whom must be a full-time tenure or tenure-track faculty member, to serve as the student’s thesis committee. The student must write a thesis proposal and have it approved by the thesis committee and pass the BME 291, MS Thesis/Project Preparation Seminar (1 unit) and BME 298, MS Project (2 units) before enrolling in the 3-unit BME 299, MS Thesis. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee.
Plan B (Project)
Students opting to complete a master’s project must pass the BME 291, MS Thesis/Project Preparation Seminar (1 unit) before enrolling in the 2-unit BME 298, MS Project (2 units). They will also take an additional 3-unit elective as part of their 6-units culminating experience.

The project proposal is prepared in BME 291 and must be approved by the student’s reading committee at the culmination of that course. Once the proposal is approved, the student is required to (a) implement the approved research plan using appropriate methods for the investigation, (b) use appropriate statistical techniques for analysis of the data and drawing conclusions, (c) discuss the results in light of findings reported by other investigators, (d) write a professional report of appropriate length, and (e) present it and defend the project to the reading committee.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw. html](http://info.sjsu.edu/gcw.html).

Preparation for the Masters

Students may be required to complete some or all of the following transition courses (or equivalent courses) prior to being admitted to Classified Standing in the major.

**Total Units Required**: 30
MS - Biomedical Engineering, Concentration in Biomedical Devices

The concentration in Biomedical Devices offers the student the opportunity to focus on the design, development and manufacture of medical devices that either come into contact with the human body or are implanted within the human body. This is an inherently interdisciplinary field. The concentration area has been created to provide individuals with B.S. degrees in an engineering field or chemistry or physics with the necessary graduate level education that prepares them to function effectively in this environment.

A student must meet all of the requirements for entry into the Master of Science in Biomedical Engineering Program. The transition courses required for admission to this concentration are:

- BME 115 - Fundamentals of Biomedical Engineering (4 units)
- BME 065 - Biomedical Applications of Statics (2 units)
- BME 068 - Biomedical Applications of Metals and Ceramics (3 units)
- BME 165 - Applied Engineering Biomechanics (3 units)
- BME 147 - Quantitative and Statistical Methods for Biomedical Engineers (3 units)
- CHEM 1A - General Chemistry (5 units)
- CHEM 1B - General Chemistry (5 units)
- EE 98 - Circuit Analysis (3 units)
- MATH 133A - Ordinary Differential Equations (3 units)
- PHYS 50 - General Physics/Mechanics (4 units)
- PHYS 51 - General Physics/Electricity and Magnetism (4 units)

Students who have not completed these classes or their equivalents during their undergraduate program will be required to complete these classes with a grade of B or better. This is in addition to the 30 semester units required for the Master of Science degree.

Requirements for Admission

Applicants must meet all university admission requirements. (Please see SJSU Admission Requirements). Applicants who have a major GPA of 3.0 or higher are not required to take the GRE. All others must take the GRE General Test and obtain a combined score of 315 or higher in the Verbal and Quantitative sections, and 3.5 or higher in the Analytical Writing section.

Students can be admitted to either classified or conditionally classified standing. To be admitted to classified standing, a student must possess a BS degree in biomedical engineering, or its equivalent from an accredited institution with a grade point average of 3.0 or better in the last 60 semester units, have met the GRE requirement if their major GPA is below 3.0; and have completed the Transition Courses, or their equivalents, with grades of B or better.

Conditionally Classified Admission

Students can be admitted to conditionally classified standing if they have a BS degree in an engineering discipline, chemistry, physics or biology from an accredited institution. Students with conditionally classified standing will take a series of Transition Courses. Once the series is completed satisfactorily, students can petition for transfer to classified standing. For more information on the transition courses contact the Biomedical Engineering Graduate Coordinator at biomedical-engineering@sjsu.edu.

Requirements for Candidacy

Students must meet the university requirements for candidacy, which include successful completion of a minimum of 9 units of graduate level classes. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details.

Course Requirements

To meet the requirements for the MS, Biomedical Engineering degree, a student must complete 30 units of approved courses. Students must achieve a minimum of a “C” in each course, a cumulative GPA of 3.0 or better in all their coursework, AND a GPA of 3.0 or higher for the courses listed in the Candidacy form.

Culminating Experience

In addition to the 30 approved course units, students must also complete a written thesis or project report and an oral defense of their thesis or project. The candidate may choose either the Plan A (thesis) or Plan B (project) option.
Plan A (Thesis)
The student who opts to complete a master’s thesis is responsible for securing the commitment of a full-time tenured or tenure-track BME faculty member who agrees to serve as thesis committee chair. The student must also secure the commitments of two additional university faculty members, one of whom must be a full-time tenure or tenure-track faculty member, to serve as the student’s thesis committee. The student must write a thesis proposal and have it approved by the thesis committee and pass the BME 291, MS Thesis/Project Preparation Seminar (1 unit) and BME 298, MS Project (2 units) before enrolling in the 3-unit BME 299, MS Thesis. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee.

Plan B (Project)
Students opting to complete a master’s project must pass the BME 291, MS Thesis/Project Preparation Seminar (1 unit) before enrolling in the 2-unit BME 298, MS Project (2 units). They will also take an additional 3-unit elective as part of their 6-units culminating experience.

The project proposal is prepared in BME 291 and must be approved by the student’s reading committee at the culmination of that course. Once the proposal is approved, the student is required to (a) implement the approved research plan using appropriate methods for the investigation, (b) use appropriate statistical techniques for analysis of the data and drawing conclusions, (c) discuss the results in light of findings reported by other investigators, (d) write a professional report of appropriate length, and (e) present it and defend the project to the reading committee.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Introduction

Since 1928, the College of Business has served the business education needs of our community. We provide San José and Silicon Valley with talent, thought leadership and service, ensuring our region’s growth in the global marketplace. An institution of opportunity, our accessible, high-value education empowers and transforms the lives of people of all ages and backgrounds. Both our challenging undergraduate curriculum and our innovative graduate program in the Donald and Sally Lucas Graduate School of Business equip graduates with the tools, work ethic and skills to succeed in the ever-changing global economy. The college is accredited by the Western Association of Schools and Colleges, the California State Board of Education, and the prestigious AACSB International (www.aacsb.edu). Fewer than five percent of business programs worldwide have earned the AACSB's certification of excellence.

The Gary J. Sbona Honors Practicum

The Gary J. Sbona Honors Practicum provides the best students in the College of Business with the opportunity to apply what they have learned in the classroom to real business problems. Students are selected based on a combination of high GPA, prerequisites, and excellent communication skills. Students are typically placed in groups of three to work on projects at Silicon Valley businesses for college course credit. The program also includes international study trips, executive level guest speakers, and networking events. Through seminar sessions students are also exposed to current issues, ideas, and practices in their own disciplines and other fields of business. Students who complete two semesters in the program, have a 3.5 GPA or above and write a scholarly paper qualify to graduate with honors from the College of Business.
BS - Business Administration, Concentration in Accounting

Accounting is a recognized profession concerned with the measurement, analysis, interpretation and communication of economic data. Students are prepared for careers as certified public accountants and managerial accountants for both the private and public sectors of the economy. The curriculum is designed to develop a basic understanding of the conceptual framework underlying the measurement and communication of economic data; a technical competence for effectively measuring, assimilating and communicating economic data; an awareness of the moral and ethical considerations involved; and incentives to grow and keep pace with ever-changing issues, conditions, forces and ideas.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for the Accounting Foundation Courses must be completed with a grade of “C or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ENGL 2, MATH 71, BUS1 20, BUS2 90.

BS - Business Administration, Concentration in Accounting Information Systems

This unique program prepares students to bridge the gap between two disciplines that are critical to business operations: Accounting and Management Information Systems. The program is taught exclusively within the Department of Accounting and Finance which strengthens the curriculum structure of the program focusing on important, relevant accounting, internal controls, and information technology issues. AIS students take courses in database design, networking and data communications, systems analysis and design, and IT audit, all with an accounting emphasis.

Students who complete this concentration will be entering into one of the fastest growing, most dynamic areas in accounting. Graduates are attractive to public accounting firms and corporations with jobs such as liaisons between the accounting/financial systems users and the information systems technical staff or to design and deploy information technology to improve the accounting systems of an organization. Careers might take paths in areas such as IT or internal audit, forensic accounting, risk management, or litigation services. This qualifies students to sit for the CISA (Computer Information Systems Auditor) examination.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for Accounting Information Systems must be completed with a grade of “C” or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C” or better: ENGL 2, MATH 71, BUS1 20, BUS2 90.

University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>
<th>24</th>

</tr>
</tbody>
</table>

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

COMPLETE ONE SEQUENCE FROM:

**African American Studies**

- AFAM 002A. African Americans and the Development of America’s History and Government D2 3
- AFAM 002B. African Americans and the Development of America’s History and Government M7 3

**Asian American Studies**

- AAS 033A. Asian Americans in U.S. History I D2 3
- AAS 033B. Asian Americans in U.S. History II M7 3

**U.S. History and Government**

- HIST 015. Essentials of U.S. History M12 3

**Chicana and Chicano Studies**

- CCS 010B. Mexican Americans and the Development of U.S. History and Government M7 3
### Physical Education

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

**Attendance Requirements**
- One course worth 3 units in Area I, II, III, IV, or V toward graduation requirements.
- One course worth 3 units in Area V toward concentration requirements.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

### Total Units Required

- University Electives: 1
- Total Units: 120
BS - Business Administration, Concentration in Business Analytics

Business Analytics is a quantitative approach to business, driven by the intelligent use of data and mathematical models. Practitioners leverage methods from statistics and operations research to form insights and make decisions that improve business performance. Business analytics is crucial to a broad range of industries. Banks need to perform credit risk analysis and analyze streaming transactions in real time to quickly identify potential fraud. Utility companies need to analyze energy usage data to gain a better understanding of demand patterns. Retailers need to perform markdown optimizations, firm-wide liquidity management, and understand the social sentiment around their products and markets to develop more effective campaigns and promotions. Business Analytics helps such organizations uncover insights from big data, build models that relate actions to consequences, and perform optimization and simulation analyses that lead to quality decisions and better outcomes in shorter times. The job opportunities for graduates with data analytical skills have never been more numerous. The business analytics concentration is designed to cater to this need by equipping our undergraduates with the skills needed to crunch huge data sets into meaningful information to further facilitate smart business decision-making.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for Business Analytics must be completed with a grade of “C- or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C” or better: ENGL 2, MATH 71, BUS 120, BUS 20.

University Graduation Requirements

| Requirement                                                                 | Units

120 units required.
BS - Business Administration, Concentration in Corporate Accounting and Finance

This unique concentration is designed for students who are attracted to career opportunities in corporate financial management. The concentration integrates two highly valued disciplines, Accounting and Finance.

The curriculum design develops a basic understanding of the conceptual framework underlying the measurement and communication of accounting data; a technical competence for effectively measuring, and assimilating and communicating economic data, ultimately to make sound financial decisions. Awareness of moral and ethical considerations in business is emphasized along with identifying incentives to grow and keep paced with ever-changing issues, conditions, forces, and ideas. The curriculum significantly enhances the attractiveness of its graduates to corporate finance groups as entry-level hires, and for the long-term, positions them to compete for roles in management. Required courses include four accounting and three finance courses. CFM graduates are able to move seamlessly between accounting and finance careers increasing their marketability in a field that has limitless opportunities.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and CPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for Corporate Accounting Finance must be completed with a grade of “C or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ENGL 2, MATH 71, BUS1 20, BUS2 90.

Complete one sequence from:

**African American Studies**

- AFAM 002A. African Americans and the Development of America’s History and Government .............................................. 3
- AFAM 002B. African Americans and the Development of America’s History and Government .............................................. 3

**Asian American Studies**

- AAS 033A. Asian Americans in U.S. History I .................................................................................................................. 3
- AAS 033B. Asian Americans in U.S. History II .................................................................................................................. 3

**U.S. History and Government**

- HIST 015. Essentials of U.S. History .......................................................................................................................... 3

**Chicana and Chicano Studies**

- CCS 010A. Mexican Americans and the Development of U.S. History and Government ...................................................... 3
- CCS 010B. Mexican Americans and the Development of U.S. History and Government ...................................................... 3
### Preparation for the Major

- **ECON 001A. Principles of Economics: Macroeconomics** ................................................................. 4
- **ECON 001B. Principles of Economics: Microeconomics** ............................................................... D1 4
- **ENGL 002. Critical Thinking and Writing** ....................................................................................... A3 3
  or equivalent
- **MATH 071. Calculus for Business and Aviation** ........................................................................ B4 3

  Transfer students with MATH 30 (C or better) may use this in lieu of MATH 71.

### Complete One Course From:

- **COMM 100W. Writing Workshop: Writing for Influence** ........................................................... Z 3
- **ENGL 100WB. Written Communication: Business** .................................................................... Z 3
- **LLD 100WB. Writing Workshop for Business Students** ............................................................. Z 3

**Total Units Required:** 120
**BS - Business Administration, Concentration in Entrepreneurship**

The concentration in entrepreneurship prepares students with a drive for innovation and the passion to create new businesses to be entrepreneurs or corporate innovators. Students who complete the program will gain a global perspective of entrepreneurship, an understanding of the key management principles across business functions and the need to embrace change in a rapidly evolving environment due to global competition, new technology and changing customer requirements.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](http://info.sjsu.edu/gwar.html) section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](http://testing.sjsu.edu/wst). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](http://testing.sjsu.edu/wst).

**Major-Specific Graduation Requirements**

All courses in the Concentration Requirements for Entrepreneurship must be completed with a grade of “C- or Better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ENGL 2, MATH 71, BUS1 20, BUS2 90.

BS - Business Administration, Concentration in Finance

Three areas of financial decision-making are emphasized: corporate finance, investments and financial institutions. Corporate finance courses are designed to prepare the student for financial analysis and planning as essential functions of a business enterprise. The investments area emphasizes the decision-making processes required to analyze the valuation of securities such as stocks or bonds and the principles of managing an investment portfolio. Financial institutions are studied both from an external viewpoint that emphasizes the function of money and capital markets, and from the internal perspective of a manager of a financial institution such as a commercial bank, savings and loan, mutual fund or life insurance company. The objective is to prepare students for careers such as financial officer of a corporation or a financial institution responsible for investment and financing decisions.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for Finance must be completed with a grade of “C or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ECON 1A, ECON 1B, ENGL 2, MATH 71, BUS1 20, BUS1 21, BUS2 90, BUS1 170.

BS - Business Administration, Concentration in General Business

The general business concentration offers students a broad spectrum of courses to prepare them for careers in small, medium-sized or family businesses and for jobs with companies that train new employees in a specific job largely unrelated to a functional area such as managing a large retail store or servicing technology company’s customers.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for General Business must be completed with a grade of “C- or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ENGL 2, MATH 71, BUS1 20, BUS2 90.

**BS - Business Administration, Concentration in Global Operations Management**

The Global Operations Management (GOM) concentration prepares graduates with state-of-the-art knowledge of managing operations in a global context. The focus will be on contemporary issues related to operations function which are of relevance in a firm’s ability to effectively collaborate with its supply chain partners in order to remain competitive in a global economy. The GOM concentration prepares students for careers with global manufacturing, service, and consulting organizations by offering a variety of courses in management of materials, quality, supply chains, services, global projects, and operations strategy. As part of this concentration, students have an opportunity to interact with GOM-related industry professionals as facilitated by the Global Operations Management Association, a GOM-affiliated student club at SJSU. They can also work on real-world consulting projects or explore internships in operations as facilitated by Silicon Valley Center of Operations and Technology Management.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

**Major-Specific Graduation Requirements**

All courses in the Concentration Requirements for Global Operations Management must be completed with a grade of “C- or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ENGL 2, MATH 71, BUS1 20, BUS2 90.

**Core Lower Division General Education**

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

**NOTE:** STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

**Upper Division General Education**

Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

**American Institutions**

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

BS - Business Administration, Concentration in Human Resource Management

The program provides the academic foundation for careers concerned with activities related to creating and sustaining the competitive advantage of organizations through the effective management of human capital. This area of study is concerned with both the strategic and current day-to-day activities in areas such as performance management, human resource planning and information systems, recruitment and staffing, training and employee development, compensation and benefits and union-management relations in an environment that changes rapidly due to competition, globalization, diversity, technology and laws. The program qualifies graduates for positions in private sector, non-profit and public sector organizations.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program [here]. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here].

**BS - Business Administration, Concentration in International Business**

The concentration in International Business (IB) is designed to prepare students for today's global business environment. IB as an interdisciplinary program builds capacity around key challenges and opportunities confronting all global businesses, including managing across borders, fostering innovation and entrepreneurship, and developing effective global strategies. In addition students may select an area of specialization, either a business functional area, an industry area, a geographic area of study, or language studies. Study abroad is required with one of three options: 1) a short-term faculty-led program; 2) a semester of study at a foreign university approved by CSU; or 3) an internship through AIESEC or other international internship program. The Director of the School of Global Innovation and Leadership can waive this requirement (e.g., international students need not study abroad). Study abroad courses that are regarded as equivalent can be substituted for IB program course requirements. This interdisciplinary approach provides a foundation for starting an international career. Graduates work in a variety of international areas and industries such as import/export, global operations, marketing, finance, hospitality and tourism, consulting, and project management, in both the private sector as well as governmental and non-governmental organizations.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

BS - Business Administration, Concentration in Management

The Management Program prepares graduate for successful and innovative careers. We emphasize fundamental principles underlying high-performance in diverse organizations at the team, company, and industry levels. We teach analytical tools, decision-making processes, and best practices for leading and managing workplaces that are legally compliant, ethical, and financially sustainable. Attention is focused on evidence-based management, competitive strategy, behavioral science, and stakeholder management.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for Management must be completed with a grade of “C- or better”. The following Preparation for the Major and Required for the Major courses must be completed with a grade of “C or better”: ENGL 2, MATH 71, BUS1 20, BUS2 90.

University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>

<td>Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

BS - Business Administration, Concentration in Management Information Systems

The Concentration in Management Information System merges the knowledge of information technologies, systems and management. Students gain practical knowledge and skills in integrating computers and other data/text/image/graphics/voice technologies into the management of business information. Computerized systems are developed as applied information tools for managerial decision making and action taking. Graduates of the MIS concentration will be prepared for careers in the rapidly expanding profession of using information technologies to support management planning and control.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

BS - Business Administration, Concentration in Marketing

Business graduates with a marketing concentration are prepared to pursue careers in small business and retail store management; in marketing, product or advertising management; also direct marketing, customer service and sales. The marketing program focuses on the business function concerned with market definition and objectives, product or service development, customer segmentation and product positioning, sales management, advertising and promotion, pricing and distribution.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses in the Concentration Requirements for Marketing must be completed with a grade of "C- or better". The following Preparation for the Major and Required for the Major courses must be completed with a grade of "C or better": ENGL 2, MATH 71, BUS1 20, BUS2 90, BUS2 130.

University Graduation Requirements

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.
### Preparation for the Major

- **ECON 001A. Principles of Economics: Macroeconomics** ................................................................. 4
- **ECON 001B. Principles of Economics: Microeconomics** ................................................................. D1 4
- **ENGL 002. Critical Thinking and Writing** ....................................................................................... A3 3
- **MATH 071. Calculus for Business and Aviation** ................................................................................ B4 3

Transfer students with **MATH 30 (C or better)** may use this in lieu of MATH 71.

### Complete One Course From:

- **COMM 100W. Writing Workshop: Writing for Influence** ................................................................. Z 3
- **ENGL 100WB. Written Communication: Business** ........................................................................... Z 3
- **LLD 100WB. Writing Workshop for Business Students** ................................................................. Z 3

Minor - Business

A minor consists of a minimum of 15 units and may be designed to fit the needs of a student majoring in any non-business department. The minor must include at least BUS 20N, Survey of Accounting, and BUS 160, Fundamentals of Management and Organizational Behavior, and nine additional units, three of which must be upper division courses. Six units must be completed in residence. Some majors have specific minor requirements.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

### Requirements of the Minor

Certificate - Advanced Accounting Topics

The certificate in Advanced Accounting Topics provides in-depth study of topics useful for CPA exam preparation and a career in accounting. It supplements coursework in the Certificate in Accounting Fundamentals and in the MSA program with advanced issues and topics relevant for a career in accounting. Specialized issues covered in the certificate program deepen understanding of accounting practice, broaden career preparation and better equip students for the CPA examination.

Certificate - Accounting Fundamentals (Special Session)

The certificate in Accounting Fundamentals is an intensive program providing a broad foundation of concepts and practices in financial reporting, managerial accounting, accounting information systems and corporate taxation. Over the course of one semester, it covers essential topics needed both for a career in accounting and for graduate study. The program is taught in its entirety during the summer, with each course taught in either two- or five-week sessions. The program is designed for both non-matriculated students and those satisfying entrance requirements for both the MS in Accountancy program. As this certificate is comprised of fundamental accounting knowledge and skills, students entering MSA program without an undergraduate degree in accounting will be required to complete this certificate before enrolling in MSA classes.

Total Units Required 9
Certificate - Tax Practice (Special Session)

The Certificate in Tax Practice provides nine units of graduate level tax research and tax foundation skills and knowledge to students who already have either an undergraduate or graduate degree in accounting. This certificate can also assist someone seeking nine units to help meet the required 150 units to become a CPA. It can help with career advancement and passing the CPA examination. The nine units can be applied to the MST program (if within the required time limits for degree completion).

Donald and Sally Lucas Graduate School of Business

The Donald and Sally Lucas Graduate School of Business offers the following graduate degree programs:

- Master of Business Administration
- Master of Science in Accountancy
- Master of Science in Taxation (Special Session)
- Master of Science in Transportation Management (Special Session)

All of the Lucas School's business degree programs are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

Mission of the Donald and Sally Lucas Graduate School of Business

The Lucas School provides advanced business and professional education to high potential individuals with diverse backgrounds and work experiences. We prepare our graduates to make responsible, personally enriching, and professionally advantageous decisions. The Lucas School's business programs bring together an interesting mix of full-time and part-time students from a variety of academic, career, and cultural backgrounds. Given SJSU’s Silicon Valley location, students come to the classroom with a wealth of real-world experience, including technical expertise (in engineering or software, for example), and wanting to develop business acumen, advance in managerial positions, or deepen their knowledge base.

Our Programs

The programs are innovative in design and delivery and offer a range of academically challenging and multi-disciplinary opportunities that enable students to improve and keep pace continuously within the dynamic Silicon Valley environment.

1. The Master of Business Administration provides advanced management education with the opportunity for a generalist degree. The Lucas MBA programs offer high caliber applied learning in an enriching environment thoroughly integrated with the Silicon Valley Experience. Courses are taught by an optimal mix of academics involved in cutting-edge research and professionals with extensive experience in the mosaic of high-tech and service businesses that constitute Silicon Valley. Students are exposed to leading business practices in the classroom and networking opportunities as an integral part of an innovative educational experience. The Lucas MBA programs consist of forty-two semester units including thirty units of core courses and twelve units of elective courses. Within an MBA program, all students complete the same core courses whereas the elective courses are selected depending on the individual’s interests and learning objectives.

1.1 The Early Career MBA is a program tailored for individuals with limited professional work experience (0-5 years). Classes meet on the vibrant San José State University Campus where students have access to a wealth of resources. Courses typically meet evenings and Saturdays in eight-week sessions during the Fall and Spring semesters and five-week sessions during the Summer semester. Students follow a pre-set sequence of core courses and select elective courses depending on their area of interest. An approved three unit Internship may count as one of the elective courses. This unique MBA program offers three different tracks that vary in length and pace:

- Accelerated Track - Designed for individuals who are willing to follow a very intense academic pace and wish to complete their MBA degree in 12 months.
- Full-Time Track - Designed for individuals who are interested in completing their MBA degree in 21-24 months. The full-time track is ideal for international students and complies with all student visa requirements.
- Part-Time Track - Designed for individuals who are working in full-time professional positions and are interested in completing their MBA degree in 33 to 36 months.

1.2 The MBA for Professionals is a Special Session program that is tailored for individuals with extensive professional work experience (5+ years). Offering a high level of flexibility, this program accommodates students with a demanding work and life schedule. Classes meet off-campus at the Lucas Business Complex in Santa Clara, an ideal location for many working professionals. The diverse educational and professional backgrounds of the students makes the Silicon Valley Experience an integral part of the MBA classroom. Courses typically meet evenings and Saturdays in eight-week sessions during the Fall and Spring semesters and six-week sessions during the Summer semester, with some courses available on-line. Students are able to choose and adjust the pace in which they complete their degree. This program can be completed in 2 to 3 years.

3. The MS - Accountancy (MSA) program is a full-time, daytime, 12-month program that admits non-accounting undergraduate majors in a competitive process that includes assessments by practitioners as well as faculty. Course work is structured around the accounting cycle to strongly encourage students to combine academic learning with accounting work experience (or internships) as well-rounded preparation for careers in professional accounting.

4. The MS - Taxation (MST) is a Special Session program that offers students technical knowledge, an understanding of tax policies and research and analytical skills development. Study of the tax law is enhanced through discussion of related accounting, legal and financial concepts and issues. The academic calendar is designed around the scheduling needs of working tax professionals. The extensive range of courses allows students flexibility in career specialization. The MST is offered at the Lucas School's Silicon Valley site.

5. The MS - Transportation Management (MSTM) is a Special Session program that provides opportunities for individuals from both technical and non-technical disciplines to obtain advanced specialization in surface transportation management. The program draws on the latest in transportation policy, administration and management concepts from several disciplines, and enables students to develop a fuller understanding of the diverse and sometimes conflicting needs of modern transportation management for better serving their employers, community and society. The degree is available through distance-learning facilities and electronic technologies, providing an opportunity for students to obtain the degree at remote locations.

6. The MBA/MS Engineering (with specializations in Systems Engineering and Software Engineering) - is a Special Session Off-Campus accelerated evening sequential degree program is a combined program for engineering professionals who wish to pursue technical and executive management positions.
MBA - Master of Business Administration

Purpose of the MBA Program
The MBA program provides a strong foundation of business concepts, models, skills and methods with which to face immediate and future managerial challenges. The basic program aims at creating a general management (rather than a functional specialist) perspective. Pragmatic in approach, the focus is on problem analysis and synthesis, decision making, action taking throughout the functional areas of business, and understanding the international context of business. The Lucas School's MBA prepares students through a broad curriculum of functional core courses, cross-functional and integrative courses, and elective courses.

Educational Objectives
The educational objectives of the Donald and Sally Lucas Graduate School of Business MBA are threefold: to provide a solid base of interdisciplinary business theories and techniques; to apply theory and analytic tools to the practical improvement of organizational performance; and to explore personal beliefs and values as they affect ethical and economic organizational practices. Key processes involve: investigating opportunities and problems; defining causes or contributing factors to problems, including those that cut across organizational units; generating alternatives from which feasible programs of action are selected and implemented; and monitoring and changing, where necessary, the progress of enacted decisions. These skills are developed using a combination of approaches including: the case method, experiential exercises, computer simulations, team projects and problem sets. Students are expected to develop competencies both as action-oriented leaders and as logical decision makers.

Benefits of the MBA
The program is geared to the professionally oriented person who aspires to move into middle management or to undertake greater managerial responsibility. It is designed to aid those who have the capabilities or potential to be action initiators rather than those who prefer to develop reports and recommendations for decision makers. The MBA program accommodates students with a variety of educational and work backgrounds. Business development projects are available to MBA students. The Lucas School has alliances with business incubator partners in Silicon Valley. Students have an opportunity to work with international businesses and entrepreneurial Silicon Valley start ups.

Lucas MBA Programs
Although SJSU grants one unique MBA degree, the Lucas Graduate School of Business offers two distinct MBA programs that differ according to student profile, flexibility, degree completion time, admission cycle and cost.

The Early Career MBA program is tailored to students who have fewer than five years of work experience. Classes are held on the SJSU campus during evenings and Saturdays in eight-week sessions. The Early Career Program offers three tracks that vary in length and pace: Accelerated Track (12 months), Full-Time Track (21-24 months), and Part-Time Track (33-36 months).

The MBA for Professionals is designed for working professionals with more than five years of work experience. This program offers a high level of flexibility in order to accommodate professionals with demanding life and work schedules. Classes meet evenings and Saturdays in eight-week sessions year round, with some courses available online. Class sessions are held off-campus at the Lucas Business Complex in Santa Clara.

Admission Requirements
Requirements for Admission to Classified Standing
To be fully accepted into classified standing, an applicant must have:
1. A bachelor's degree from an accredited university in the U.S. or the equivalent of a U.S. bachelor's degree earned from a recognized institution if the degree was earned outside of the U.S.
2. A 3.0 (on a 4.0 scale) grade point average (GPA) in the last 60 semester units or 90 quarter units of study. An absolute minimum GPA of 2.5 is required for graduate admission at SJSU.
3. Taken an English language proficiency examination if the previously earned degree was from an institution in which the principal language of instruction was not English. The university minimum entrance score for the TOEFL is 213 (computer-based) or 80 (internet-based). The minimum score required on the IELTS is 6.5, and the minimum PTE score is 53.
4. Taken the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). Scores at the 50th percentile in both the quantitative and verbal sections of either exam are considered competitive. Conditional on the approval of the MBA Director, the GMAT/GRE requirement may be waived if the applicant has any of the following:
   4.1. Earned a Master’s degree or Ph.D. from an accredited institution in the United States.
   4.2. Graduated with honors from the Lucas College of Business Gary J. Sbona Honors Program within the last five years.
   4.3. A GPA of at least 3.2 AND completed at least 5 years of full-time professional work experience with increasing responsibilities and a managerial role over people and/or budgets. An interview with the MBA Director and/or a letter from the supervisor attesting to the level of work responsibilities may be required.
5. Completed three prerequisite courses (Introduction to Microeconomics; Introduction to Macroeconomics; and Business Statistics) with a grade of B or higher within the last seven years. An applicant may be admitted to the MBA program on a conditional admission basis prior to completion of these three courses but will need to provide proof of completion of all three prerequisites before the day of orientation.

6. A personal statement of one to two pages explaining how an MBA can help achieving the applicant’s career objectives.

7. A resume detailing your professional and academic experiences.

8. (Optional) Two letters of recommendation.

The Lucas School does not follow a set formula for determining admission to the MBA programs. Our goal is to admit academically qualified candidates who show potential for completing the program and advancing into a successful business career. We seek to admit students whose backgrounds will enable them to contribute to the academic excellence and the demographic, educational and experiential diversity of each class.

An applicant’s academic profile - undergraduate major and institution, any graduate level work, GPA, and GMAT or GRE scores - is a major factor in the admission decision. Other important areas of evaluation include personal statement, work experience, letters of recommendation, writing skills, and extracurricular, community and professional activities. From this overall review, we assess an applicant’s potential for success and compatibility with our MBA program.

The GMAT or GRE score is just one part of a candidate’s overall profile. We realize that the GMAT/GRE has certain limitations, as does any standardized test; however, these exams do allow comparison among applicants from different schools, different countries and different majors. We encourage all applicants to prepare for the exam, take it as early as possible, and retake it if their score is not competitive.

The average GPA of admitted candidates is 3.3. Ideally a candidate’s GPA will be at 3.0 or above. Many circumstances may exist which offer explanation for a GPA below 3.0; candidates are encouraged to submit a statement of explanation if this is the case. However, please note that an absolute minimum GPA of 2.5 is required for graduate admission at San José State University.

Program of Study Requirements for the MBA Degree

To earn the MBA degree, all students must satisfy the following requirements:

1. Business Prerequisite Courses
   - Introduction of Macroeconomics (at SJSU this course is ECON 001A, Principles of Economics Macro)
   - Introduction to Microeconomics (at SJSU this course is ECON 001B, Principles of Economics Micro)
   - Business Statistics (at SJSU this course is BUS 90, Business Statistics)

2. Advanced Management Courses (Core Courses)
   In the Early Career MBA, all students are required to successfully complete eleven core courses for a total of thirty semester units. In the MBA for Professionals, all students are required to successfully complete ten core courses for a total of thirty semester units. Although the total units of core courses are identical across the two MBA programs, the composition of the core curriculum is slightly different to account for the differences in student academic and professional profiles. The advanced graduate courses (core courses - 30 units) ensure breadth in general management knowledge and help the student to develop mastery in applying essential business skills.

3. Elective Courses
   Four elective courses (12 units) are required of all students. As an elective course, a graduate student can select a maximum of one upper-division business undergraduate course (100-level) OR one graduate non-business course (200-level). Enrollment in such elective course is conditional on the written approval by the MBA Director and it is specific to a given course and a given semester.

4. Comprehensive Project
   The comprehensive project is incorporated in the Strategic Thinking course (BUS 290). The comprehensive project is a culminating experience integrating business functional and interdisciplinary areas. An individual written project report is required and an oral examination may be included. The project may take the form of a field study, research project, business simulation, or a strategic plan for an organization, as assigned by the Business 290 instructor. Students must receive an overall equivalent grade of “B” or better on the comprehensive project, and may be given a maximum of two opportunities to satisfy requirements.

5. Graduation Writing Assessment Requirement
   The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.
6. Maintenance of 3.0 GPA
Students must maintain a grade point average of 3.0 or better on all graduate level course work. Students who receive grades of “C-”, “D”, “F” or “WU” in any business graduate course must repeat that course to achieve a grade of “C” or better.

7. Transfer Credit
Subject to the approval of the Donald and Sally Lucas Graduate School of Business MBA Program Director and validation by the College of Graduate Studies, students may transfer a maximum of twelve semester units of business graduate course work from another regionally accredited institution. Grades in the transfer courses must be “B” or better.

8. Other University Requirements
Students must comply with all other graduate requirements contained in this catalog.

Early Career MBA

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Note: Four elective courses must be taken in addition to the Advanced Management Courses (Core Courses) in order to achieve the total of 42 semester units. A graduate student can select a maximum of one upper-division business undergraduate course OR one graduate non-business course conditional upon the written approval of a given course and a given semester by the MBA Director. Enrollment in BUS 203 is conditional on the approval of the MBA Director and the BUS 203 instructor.

#### Special Session Program Information

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the [CPGE website](http://www.cpge.sjsu.edu) for more information.
MS - Accountancy

The Master of Science in Accountancy is a flexible 30-unit degree program designed for both accounting and non-accounting undergraduates who aspire to a profession in accounting. Coursework includes advanced financial reporting, auditing, taxation, IT auditing and financial statement analysis. Students with an undergraduate degree in accounting enroll in a course of study to earn a masters degree that fulfills the 30 additional units required for CPA licensure. Ambitious, highly motivated people with undergraduate degrees in liberal arts, sciences or business will need to complete the intensive Certificate in Accounting Fundamentals summer program before they can be admitted into the MSA degree program.

For more information, see the Lucas Graduate School of Business website at http://www.sjsu.edu/lucasgsb/programs/msa

Purpose of the MSA Program

The MSA program prepares students for a career in public or corporate accounting by providing them with a strong foundation for both public accounting certification (CPA) and career advancement.

Educational Objectives

Students with an MSA degree should understand the accounting principles and procedures involved in measuring, recording, summarizing and reporting financial and nonfinancial data for business organizations; taxation concepts; auditing and control procedures; and the ethical and legal challenges in an accounting career. They should communicate effectively, both orally and in writing, evaluate information technology, and demonstrate analytical proficiency.

Benefits of the MSA

The program is designed for people with undergraduate degrees in accounting who want to further their studies in accounting while acquiring an additional 30 units needed for CPA licensure. It also allows liberal arts / sciences/business undergraduates who are interested in changing careers an entrance into the accounting profession. The course work and optional internship provide opportunities to build a framework for a successful and rewarding career in public or corporate accounting.

Admissions Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the MSA program.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE.

Requirements for Admission to Classified Standing

To be fully accepted into the MSA in classified standing, an applicant must have:

- A four-year bachelor’s degree from an accredited an accredited college or university in the United States or from a recognized institution if the degree was earned outside of the United States.
- A GPA of 3.0 or better (on a 4.0 scale) in the last 60 semester units or 90 quarter units of course work (Professional Development and Certificate Program course work cannot be included in this calculation);
- A Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) exam. Scores at the 50th percentile in both the quantitative and verbal sections of the exam are considered competitive. Conditional on the approval of the MSA Director, SJSU students who achieve a 3.5 GPA in upper division prerequisite courses 2 through 6 below may be granted a waiver from the GMAT/GRE requirement; and
- Taken an English proficiency exam if the applicant graduated from a postsecondary institution in a country where English is not the principal language. Accepted exams include the TOEFL (Test of English as a Foreign Language) with a preferred score of 90, the International English Language Testing System (IELTS) with a preferred score of 7.5, and the Pearson Test of English (PTE) with a preferred score of 75.

In addition, a personal interview may be conducted for each applicant.

Requirements for Admission to Conditionally Classified Standing

If not accepted into classified standing, the applicant may qualify for conditionally classified status. Ambitious, highly motivated applicants with undergraduate degrees in liberal arts, sciences or business will need to complete the intensive Certificate in Accounting Fundamentals program during the summer semester before matriculation into the MSA degree program. The individual admission letter will explain required terms and conditions for attaining Classified standing.

Program of Study Requirements

To receive the Master of Science in Accountancy, students must complete 30 semester units of prescribed course work. Specific program policies include the following:
1. Prerequisites
The curriculum requires completion of two lower division and five upper division prerequisite courses (3 semester hours or equivalent) within the past five years with an average grade in the courses of "B" (3.0) or better prior to the start of the program. All upper division prerequisites must be completed at an accredited four-year university in the U.S. The seven prerequisite courses are:

1. Introductory Financial Accounting (lower division course, gateway to upper division courses 2-6)
3. Intermediate Financial Accounting II
4. Accounting Information Systems
5. Management Accounting and Control Systems
6. Taxation of Individuals and Flow-Through Entities
7. Statistics (lower division course)

Students may be conditionally admitted into the program pending completion of the prerequisite courses. Students must, at a minimum, submit completion and/or verification of enrollment in Introductory Financial Accounting and Statistics by the published GAPE document submission deadline. One way to fulfill the rest of the prerequisites is to enroll in the Certificate in Accounting Fundamentals at SJSU to complete courses 2-6 with an average of B in the summer preceding Fall enrollment in the MSA program.

2. Course Requirements
The 30 semester units of coursework include three core courses (9 units) required of all students, two core courses (6 units) from a list of designated topics, a culminating experience course (3 units), and four elective MSA courses (12 units). Electives may be taken from offerings in the MST and/or MBA programs with approval from the MSA director.

3. Internship
The courses in the MSA program are designed to prepare students for internships with public accounting firms, governmental agencies, and corporations. From January through March, students may enroll in an internship course, BUS220K. Students in this course gain practical work experience, participate in firm training programs, and attend roundtable meetings to discuss topics such as professional ethics, working in the professional environment, communication effectiveness, marketing professional services and planning for professional growth.

4. Graduation Writing Assessment Requirement
The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

5. Culminating Experience
Plan B (Project)
All students must complete a comprehensive project integrating business functional and interdisciplinary areas. The MSA culminating experience is incorporated into BUS 220N, Project Management, Organization & Strategy and into BUS220A, Financial Statement Analysis. An individual written project report is required, and may take the form of a field study, business plan, research project or business simulation.

6. Maintenance of 3.0 GPA
Students must maintain a grade point average of 3.0 or better on all graduate-level course work. Students who receive grades of C-, D, F, or U in any business graduate course must repeat that course to achieve a grade of C or better.

7. Other University Requirements
Students must complete all residency, curriculum, unit, CPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures. Students must comply with all other graduate requirements contained in this catalog.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.
### Pre-requisite Courses

Any of the prerequisite courses may be waived through evidence of recent prior equivalency (within the last five years with a grade of "B" or better)

- Introductory Financial Accounting
- Intermediate Financial Accounting I
- Intermediate Financial Accounting II
- Accounting Information Systems
- Management Accounting and Control Systems
- Taxation of Individuals and Flow-Through Entities
- Statistics

</tbody>
</table>

If both courses are taken, one is the comprehensive project and the other is an elective.

### Total Units Required

30

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.
MS - Taxation (Special Session)

The Master of Science in Taxation (MST) Program is a 30-unit program designed to provide individuals with the conceptual understanding and sound technical knowledge necessary to compete successfully in the ever-changing tax world. It is appropriate for individuals already working in public accounting, a corporate tax department, a law practice or government service. College graduates with an accounting degree who wish to pursue a career in taxation and/or meet the 150 unit requirement to become a CPA will also benefit from the program. (State fee schedule does not apply.)

For more information, see the Lucas Graduate School of Business website [http://www.sjsu.edu/lucasgsb/programs/mst/](http://www.sjsu.edu/lucasgsb/programs/mst/)

Admissions Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at [calstate.edu/apply](http://calstate.edu/apply) and meet all the [university admission requirements](http://www.sjsu.edu/lucasgsb/programs/mst/). Applicants apply separately to the department to obtain admission into the MST program.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the [Graduate Program Test Requirements](http://www.sjsu.edu/lucasgsb/programs/mst/) webpage at CAPE.

Requirements for Admission to Classified Standing

To be fully accepted into the MST in classified standing, an applicant must have:

1. Completed the following undergraduate courses (or equivalent) prior to admission. The SJSU course numbers for these courses are in parenthesis:
   - Financial Accounting (BUS1 020)
   - Managerial Accounting (BUS1 021)
   - Intermediate Accounting I and II (BUS1 121A/B)
   - Tax Factors of Business and Investment Decisions (BUS1 123A)

   These requirements may be fulfilled at a community college. If your undergraduate degree is in Accounting, you have satisfied the course prerequisites.

2. A four-year bachelor’s degree from an accredited college or university in the United States or from a recognized institution if the degree was earned outside of the United States.

3. A GPA of 3.0 or better (on a 4.0 scale) in your last 60 semester units or 90 quarter units of course work (Professional Development and Certificate Program course work cannot be included in this calculation).

4. A Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) exam. Scores at the 50th percentile in both the quantitative and verbal sections of the exam are considered competitive. Conditional on the approval of the MST Director, the GMAT/GRE requirement may be waived if the applicant has any of the following:
   - Earned a Ph.D. in the United States
   - Passed all parts of the CPA exam (in the United States)
   - Passed the Enrolled Agent exam administered by the IRS.
   - Scored 145 or higher in the LSAT exam
   - Graduated with honors from the Lucas College of Business Gary J. Sbona Honors Program within the last five years.
   - A GPA of at least 3.2 from an accredited U.S. university AND completed at least three years of full-time work experience in taxation. An interview with the MST Director and/or a letter from the supervisor attesting to type of work responsibilities may be required.
   - A GPA of at least 3.75 from an accredited U.S. university. An interview with the MST Director may be required.

Program of Study Requirements for the Master of Science in Taxation

1. Core Taxation Courses
   Five core taxation courses (15 units) are required of all students. Of the core courses, two must be selected from a list of designated topic areas (business entities and multijurisdictional taxation); see below for details.

2. Elective Courses
   Students complete a minimum of 12 units of taxation elective courses.

3. Culminating Experience
   The culminating experience is a comprehensive individual written project incorporated into the capstone course, BUS 223H, Tax Policy Capstone. An oral examination may be included.
4. Maintenance of 3.0 GPA
Students must maintain a grade point average of 3.0 or better on all graduate-level course work. Students who receive grades of “C-”, “D”, “F”, or “U” in any business graduate course must repeat that course to achieve a grade of “C” or better.

5. Graduation Writing Assessment Requirement
The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For the MST Program, the required writing course is BUS 223A.

6. Transfer Credit
Subject to approval of the MST Program Director, students may transfer a maximum of nine semester units of business graduate course work from another accredited institution to be applied to advanced level course work requirements. Grades in the transfer courses must be “B” or better. MST courses taken via “Open University” are treated as transferred into the MST Program (and thus count toward the maximum of nine semester units of transferable course work).

7. Other University Requirements
Students must comply with all other graduate requirements contained in this catalog.

Requirements for Advancement to Graduate Candidacy
Students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the MST degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR).

Special Session Program Information
Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the CPGE website for more information.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Total Units Required

Elective courses must be planned in consultation with the graduate advisor.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
MS - Transportation Management (Special Session)

The Master of Science in Transportation Management (MSTM) is a fully accredited, 30-unit program that takes two and half or three years to complete as a part-time student. The curriculum consists of six required courses, two electives, and a two-course culminating capstone experience.

The curriculum is led by nationally recognized instructors who are academic or industry experts. The MSTM is fully accredited by the Association to Advance Collegiate Schools of Business (AACSB). Classes are held on weekday evenings, allowing students to work full time while earning their degrees. Students generally take one course at a time, one night per week, for each ten-class session, for a total of four classes per year. Classes are delivered by two-way video conferencing, supplemented by web coursework. Students attend class in-person at locations throughout California or via online video-conferencing.

Admission Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the Special Session MS, Transportation Management degree program. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Admission to the Department

Applicants who meet university and program requirements will be considered for classified admission. Admission to the Special Session MS, Transportation Management degree program requires the following (more details about these requirements are provided at the “Admissions” tab from https://transweb.sjsu.edu/education/graduate.php):

1. A bachelor's degree from an accredited university in the U.S. or the equivalent of a U.S. bachelor's degree earned from a recognized institution if the degree was earned outside of the U.S.

2. A preferred 3.0 (on a 4.0 scale) grade point average (GPA) in the last 60 semester units or 90 quarter units of study. An absolute minimum GPA of 2.5 is required for graduate admission at SJSU. Four-year undergraduate degree from an accredited institution, with a minimum 3.0 GPA for the last 60 units preferred.

3. Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) exam scores. Scores at the 50th percentile in both the quantitative and verbal sections of the exam are considered competitive. Conditional on the approval of the MSTM Program Director, the GMAT/GRE score requirement may be waived if the applicant has an interview with the MSTM Program Director and meets at least one of the following conditions:
   - Earned a master's degree or Ph.D. in the United States from an accredited institution.
   - Has at least five years of relevant full-time professional work experience in the transportation sector or a related field.
   - Graduated with honors from the Lucas College of Business Gary J. Sbona Honors Program within the last five years.

4. A statement of purpose explaining how a Master of Science in Transportation Management will help you to achieve your career objectives (500 to 800 words).

5. A resume detailing your professional and academic experiences.

6. A letter of recommendation written by a supervisor who managed you in paid or volunteer work or by a university instructor who taught you. Letters should include an evaluation of your writing and analysis skills.

7. For students who did not earn a 4-year bachelor's degree, master's degree, or Ph.D. from an institution in which the principal language of instruction was English: Scores from an English language proficiency examination. The university minimum entrance score for the TOEFL is 213 (computer-based) or 80 (internet-based). The minimum score required on the IELTS is 6.5, and the minimum PTE score is 53.

Admission in Conditionally Classified Standing

Applicants not accepted into classified standing may qualify for conditionally classified status. The individual admission notification will explain required coursework, terms and conditions for removing deficiencies and attaining classified standing.

Requirements for Advancement to Candidacy

Candidacy denotes that the student is fully qualified to complete the final stages of the MS - Transportation Management. In order to achieve candidacy, students must meet the university requirements for candidacy. General university requirements for advancement to candidacy, for the master’s degree are detailed in the Graduate Policies and Procedures section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Student disqualified from the MSTM program must follow the Disqualification and Probation - Graduate Students procedures in the SJSU catalog. It is the policy of the Donald and Sally Lucas Graduate School of Business not to readmit disqualified graduate students after a second disqualification.
Transfer Credit
With approval of the MSTM Program Director, the Donald and Sally Lucas Graduate School of Business Associate Dean for Graduate Programs, and the SJSU Associate Vice President for Graduate Studies and Research, students may transfer a maximum of six units of related graduate course work from another accredited university in the United States to satisfy elective course requirements. Grades in the transfer courses must be “B” or better. Extension course work from other institutions is not acceptable.

Culminating Experience
Plan B (Project)
The program culminating experience is incorporated into MTM 283 and MTM 290. Students use these courses to design and then carry out an individual, comprehensive project.

Special Session Program Information
Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the CPGE website for more information.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

MTM 201 serves as the GWAR requirement for this program.

Total Units Required

Elective courses must be planned in consultation with the MSTM Program Director. With prior approval from the Program Director, students may count towards the elective requirement one graduate or upper-division undergraduate course (3 units) from another SJSU program.

The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

Students must comply with all other graduate requirements contained in this catalog.

MTM 202. Introduction to Transportation Funding & Finance
Charles W. Davidson College of Engineering

ENGINEERING BUILDING 493
(408) 924-3800
general@engineering.sjsu.edu
http://engineering.sjsu.edu/

Introduction
The Charles W. Davidson College of Engineering offers undergraduate and graduate programs in Aerospace Engineering; Biomedical, Chemical and Materials Engineering; Civil and Environmental Engineering; Computer and Software Engineering; Electrical Engineering; General Engineering; Industrial and Systems Engineering; Mechanical Engineering; Industrial Technology; and Aviation. Each department offers a variety of major and minor programs which are identified in their respective parts of this catalog. General Engineering also offers interdisciplinary degrees in Engineering.

Preparation for Engineering Programs
To prepare for engineering, the high school student should take as much advanced math and science as possible, as well as high school engineering and technology courses that may be available at their school. Students with scores of 4 or above on the AP Calculus exams may be able to accelerate their degree program; students who are not calculus-ready on entrance may take a longer time to graduate. Students transferring from California community colleges will be given junior level standing in the Major if they have successfully completed the following course work:

- 12 semester units of calculus and differential equations
- 5-10 semester units of chemistry
- 8-13 semester units of physics which require calculus as a prerequisite
- 10-14 units of lower division engineering appropriate to their engineering major

Transfer students should use assist.org or this SJSU online catalog to determine the specific lower division requirements of their major. Graduation following two academic years of study is possible if the student completes all lower division units before transfer, satisfactorily completes the required upper division coursework and remains in good standing in the Major.

Preparation for Technology and Aviation Programs
To prepare for technology and aviation majors, the high school student should take industrial technology classes such as electronics, drafting, and manufacturing, or any engineering classes offered at their school, and should complete courses in physics, chemistry, and pre-calculus or calculus.

Community college students are urged to complete as many of the lower division requirements as possible in chemistry, physics, mathematics and technology or aviation at the community college.

Progress to Degree Requirements
All College of Engineering undergraduates are required to stay in good standing in their major by maintaining a Major GPA of 2.0 or above. The Major GPA includes all courses required for the major, including both lower and upper division math, science, engineering, technology, aviation or business courses required by their major. Some departments have additional grade requirements for individual courses, groups of courses or all courses taken in their department. See departmental sections for these requirements. Additional university GPA requirements are specified elsewhere in this catalog.

Incoming Engineering frosh, or other students seeking to change major into Engineering, must complete Math 30 (or 30P), Math 31 and Physics 50 within their first 60 units at SJSU. The Progress to Degree policy can be found on the College advising website.

General Education Requirements
Of the 51 units required by the university up to 27 units may be satisfied by specified major and support requirements. Engineering majors may satisfy the remaining units by taking AMS 1A-B (12 units), ENGL 1A-B (6 units), Oral Communication (3 units) and ENGR 100W (3 units). Transfer students may satisfy core GE through the IGETC or CSU breadth requirements. Consult advisors in the Engineering Student Success Center (Engr 344) for details.

Engineering Student Success Center (ESSC)
The Engineering Student Success Center provides General Education advising services and student success programs for the undergraduate students in the College of Engineering. We offer both drop-in advising and appointments.
Engineering Building, Room 344
408-924-3990
www.engr.sjsu.edu/students/essc
Undergraduate Programs Offered
The College of Engineering offers BS degrees in:
- Aerospace Engineering
- Aviation
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical Engineering
- General Engineering
- Industrial and Systems Engineering
- Industrial Technology
- Materials Engineering
- Mechanical Engineering
- Software Engineering

Please see the Degrees or Departments listings in this catalog for information about each undergraduate major.
**Graduate Programs Offered**

The College of Engineering offers graduate work leading to Master of Science degrees in:

- Aerospace Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical Engineering
- Engineering (Interdisciplinary) Program
- Industrial and Systems Engineering
- Materials Engineering
- Mechanical Engineering
- Software Engineering

Graduate work offered by the College of Engineering reflects and supports the advanced scientific and technological endeavor which is typical of California industry, government and business. Departmental curricula provide full- and part-time students the opportunity either to obtain master’s degrees or to take specialized courses to improve job capabilities.

The Master of Science in Engineering offered by the General Engineering Department has unique, interdisciplinary characteristics which may be particularly appealing to persons with a bachelor’s degree in engineering who are currently working in a technical management area and wish to extend their education.

The College of Engineering requires that all students whose native language is not English achieve a minimum score of 550 on the TOEFL examination. Students who meet this and the requirements for admission to the Graduate Division as outlined in this catalog should see individual department listings for requirements for admission to classified standing, conditionally classified standing and admission to candidacy for the specific degree in engineering.

In addition to departmental requirements, the University requires that all graduate students demonstrate competency in written English as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled "Competency in Written English" for details. For graduate courses that meet the competency in written English requirement, please refer to the Graduate Studies and Research website at www.sjsu.edu/gradstudies. In addition, all graduates must complete an acceptable thesis, project or comprehensive examination.

Introduction
Researchers, chemical and materials process engineers, pharmaceutical engineers, failure analysis engineers, and polymer engineers are some of the jobs that graduates of the Department of Chemical and Materials Engineering obtain in the Silicon Valley and beyond. Our graduates and alumni work in the traditional industries of petroleum processing and metallurgy, as well as in industrial sectors as diverse as semiconductors and microelectronics, additive manufacturing, nanotechnology and biotechnology, food engineering and cosmetics engineering, alternative energy and environmental remediation. In addition to bachelor’s and master’s degrees in chemical engineering and materials engineering, we offer undergraduate minors in and materials science and engineering. A high percentage of our graduates pursue masters of science and doctorate degrees in graduate schools across the country. The BS Chemical Engineering, and BS Materials Engineering programs are all accredited by the Engineering Accreditation Commission of ABET, www.abet.org.
## BS - Chemical Engineering

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

### Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

### Major-Specific Graduation Requirements

The following course in Preparation for the Major must be completed with a "C- or Better": ENGL 001B.

The following required courses in the Major Lower Division Core must be satisfied with a "C or better": Phys 50, Math 031, and Math 032.

The CHE Junior Core consists of a 2.0 average in [CHE 115, CHE 151, CHE 160A, CHE 162 and CHE 190] and ENGR 100W. Students receiving a grade less than "C-" in any CHE Junior Core course will have to repeat the course(s). The Junior Core must be satisfied in order to enroll in Senior Core course(s).

The CHE Senior Core consists of [CHE 161L, 163L, 165A, 165B, 185, 160B, and 158]. Students receiving any grade less than "C-" in a Senior Core course(s) will have to repeat the courses. Students can repeat any ChE Junior or Senior Core course with a grade of "C- or better" after the second attempt will result in disqualification from the ChE major.

### Prerequisite Requirements

Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of "C or better" (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

### Physical Education

#### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

BS - Materials Engineering

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

The following course in Preparation for the Major must be completed with a “C- or Better”: ENGL 001B.

The following required in the Major Lower Division Core must be satisfied with a “C- or Better”: MATH 030, MATH 031, MATH 032, PHYS 050, PHYS 051, CHEM 001A, CHEM 001B and ENGR 010.

The MATE Junior Core consists of a 2.0 average in {MATE 115, MATE 141, MATE 151, MATE 153, MATE 154 and MATE 155} and ENGR 100W. Students receiving a grade less than “C-” in a Junior Core course may have to repeat the course. The Junior Core must be satisfied in order to enroll in Senior Core courses.

The MATE Senior Core consists of {MATE 195, 198A, 198B, 185, and 152}. Students receiving a grade less than “C-” in a senior core course will have to repeat the course before graduation.

Prerequisite Requirements

Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of “C or better” (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 33 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Physical Education

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Minor - Materials Science and Engineering

Students enrolled in good standing in an engineering or science major may complete a Minor in Materials Science and Engineering. To be awarded the Minor, which appears on the official diploma and transcript, the student must complete 12 units, all of which must be outside the required courses in the major. The 12 units cannot be counted on both the Minor Form and the Major Form. Either MATE 025 or MATE 115 (or both) must be included in the Minor. The student, in consultation with a Materials Engineering academic advisor, should select 12 units in either the electronic materials option, the structural materials option or the general materials option. Prerequisites for each course must be met unless student receives instructor permission to waive them.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

MS - Chemical Engineering

The MS Chemical Engineering program provides advanced study of chemical engineering topics with emphasis on both the fundamental and applied aspects. A multidisciplinary approach to education is evident in the Chemical Engineering program’s specialization areas of biotechnology, environmental engineering, and semiconductor processing. Elective courses are also available in science, business, and other engineering fields. This broad-based, multi-disciplinary education has proven to be an important factor for a student’s future success, either at leading Silicon Valley companies or in Ph.D. programs. Class schedules are designed for the convenience of employed engineers who wish to pursue graduate work on a part-time basis.

The faculty are actively involved in research in a number of areas including: biochemical engineering, semiconductor processing, alternative energy, microfluidics, polymers and nanocomposites, nanotechnology, and environmental health and safety engineering, remediation, and bioprocess engineering. Research activity is sponsored by local industries as well as by government funding agencies.

The Chemical Engineering program welcomes students with undergraduate degrees in a variety of other engineering and science disciplines.

Class schedules are designed for the convenience of employed engineers who wish to pursue graduate work on a part-time basis as the majority of classes are scheduled in the evening hours.

For more information visit the department website: [www.sjsu.edu/cme](http://www.sjsu.edu/cme)

Program Objectives

The CHE Master’s program is designed to produce graduates who:

- Are able to solve complex engineering problems and tasks, and use engineering, science and statistics principles to justify recommendations.
- Are able to evaluate the impact of their work on society, including ethical, economic, global and environmental aspects.
- Can deliver effective presentations of engineering results in written and oral formats.
- Have life-long learning skills and are able to apply their engineering knowledge to critically evaluate relevant literature and new technologies or systems.
- Are effective leaders, capable of working in diverse environments.
- Are able to apply their engineering education to a variety of career paths.

Requirements for Admission

University Admission

Candidates must apply through the CSU admissions portal, Cal State Apply, and meet all university admissions requirements. Applicants will need to apply separately to the university to obtain approval for university-level admission and to the department to obtain admission into the MS in Chemical Engineering.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE. The program does not currently require the GRE for admission.

Admission to the Program

Candidates must meet all the university [admissions requirements](http://www.sjsu.edu/gape). Students can be admitted in either classified or conditionally classified standing. To be admitted to classified standing, a student must possess a U.S. baccalaureate degree with a major in chemical engineering and a grade point average of 3.0 or better in the last 60 units, from an ABET accredited chemical engineering program.

Students can be admitted with conditionally classified standing if they have a CHE degree from a U.S, accredited university in which they obtained a 2.7-2.99 GPA in the last 60 units; a CHE degree from a non-U.S, institution; or a BS degree in chemistry, biology, physics or related discipline from an accredited institution. Students admitted with conditionally classified standing will take a series of transition courses. The program admissions letter will explain terms and requirements. Once these are completed satisfactorily, students can petition for classified standing. For more information on the transition courses, contact the graduate coordinator.

Requirements for Candidacy

Students must meet the university requirements for candidacy which include successful completion of the [Graduation Writing Assessment Requirement](http://www.sjsu.edu/gape) (GWAR). The University requires that all graduate students complete the GWAR as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [www.sjsu.edu/gape](http://www.sjsu.edu/gape).

Course Requirements

To meet the requirements for the MS - Chemical Engineering degree, a student must complete 30 units of approved courses. Students must achieve a minimum of a “C” in each course and a cumulative GPA of 3.0 or better. In addition to the 30 approved course units, students must complete a written thesis or project report and an oral defense of their thesis or project. Either Plan A (Thesis) or Plan B (Project) may be chosen in consultation with the student’s SJSU research advisor.
Culminating Experience

Students in the MS, Chemical Engineering program may complete the program 6-unit Culminating Experience through their choice of a master’s thesis or graduate project.

Plan A (Thesis)

Students opting to complete a master’s thesis will take the CHE 281, CHE 298, and CHE 299, Master’s Thesis for a total of 6 units. The student is responsible for securing the commitment of a full-time tenured or tenure-track faculty member who agrees to serve as the thesis committee chair. The student must also secure the commitments of two additional university faculty members, one of whom must be a full-time tenured or tenure-track faculty member, to serve as the student’s thesis committee. The student must write a thesis proposal and have it approved by the thesis committee and pass the CHE 281 and CHE 298 before enrolling in the CHE 299. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee.

Plan B (Project)

Students opting to complete a graduate project will take the CHE 281 and CHE 298 and an additional 3 units of 200-level Engineering Math elective selected in consultation with graduate advisor. The candidate for the MS, Chemical Engineering degree must successfully pass a final defense of the project.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

MS - Materials Engineering

The MS Materials Engineering program provides advanced study of materials engineering topics with emphasis on both the fundamental and applied aspects. A multi-disciplinary approach to education is evident in the materials engineering program’s specialization areas of semiconductor processing, polymers, ceramics, structural materials, and biomaterials. Elective courses are also available in science, business, and other engineering fields. This broad-based, multi-disciplinary education has proven to be an important factor for a student’s future success, either at leading Silicon Valley companies or in Ph.D programs. Class schedules are designed for the convenience of employed engineers who wish to pursue graduate work on a part-time basis.

The faculty are actively involved in research in a number of areas including electronic and magnetic materials, microelectronics processing, nanomaterials, MEMS, microelectronic packaging, polymers, composites and biomaterials. Research activity is sponsored by local industries as well as by government funding agencies.

The Materials Engineering program welcomes students with undergraduate degrees in a variety of other engineering and science disciplines.

For more information visit the department website: [http://bcme.sjsu.edu](http://bcme.sjsu.edu) or email: bme-engineering@sjsu.edu.

Program Objectives

The MATE Master’s program is designed to produce graduates who:

- Are able to solve complex engineering problems and tasks, and use engineering, science and statistics principles to justify recommendations.
- Are able to evaluate the impact of their work on society, including ethical, economic, global and environmental aspects.
- Can deliver effective presentations of engineering results in written and oral formats.
- Have life-long learning skills and are able to apply their engineering knowledge to critically evaluate relevant literature and new technologies or systems.
- Are effective leaders, capable of working in diverse environments.
- Are able to apply their engineering education to a variety of career paths.

Requirements for Admission

Students can be admitted with conditionally classified standing if they have a MATE degree from a US accredited university in which they obtained a 2.7-2.99 GPA in the last 60 units; a MatE degree from a non-US institution; or if they have a BS degree in a related discipline, such as chemical engineering, chemistry, biology, or physics from an accredited institution. Students with conditionally classified standing will take a series of transition courses. Once these are completed satisfactorily, students can petition from classified standing. For more information on the transition courses, contact the graduate coordinator at bme-engineering@sjsu.edu.

Requirements for Candidacy

Students must meet the university requirements for candidacy which includes successful completion of the Graduation Writing Assessment Requirement (GWAR). The University requires that all graduate students on Graduation Writing Assessment Requirement as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [www.sjsu.edu/gape](http://www.sjsu.edu/gape).

Course Requirements

To meet the requirements for the MS - Materials Engineering degree, a student must complete 30 units of approved courses. Students must achieve a minimum of a "C" in each course and a cumulative GPA of 3.0 or better. Students must complete a written thesis or project report and an oral defense of their thesis or project. Either Plan A (thesis) or Plan B (project) will be chosen in consultation with the student’s SJSU research advisor. Minimum requirements for each plan are as follows:

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

⦁ MS, Chemistry

Introduction
Chemistry plays an integral role in solving everyday problems in areas such as energy production, pollution control and disease prevention. Our graduates go on to gain advanced degrees in chemistry, medicine, pharmacy and dentistry or enter the job market directly, building careers in the pharmaceutical, biotechnological, biomedical, energy and green technology sectors. We provide broad access, high quality education in the molecular sciences at both the bachelor’s degree and master’s degree levels. Undergraduates may specialize in biochemistry. Graduate degree candidates focus on analytical chemistry, biochemistry, inorganic, organic or physical chemistry. Our curriculum, taught by experts in each of the subfields of chemistry, supplements traditional classroom courses with hands-on laboratory and research instruction. For teaching purposes, as well as to support the department’s research mission, we maintain a large collection of state-of-the-art instrumentation, including mass spectrometers, spectrophotometers and lasers.
Undergraduate Honors Program
Student must be nominated by their research advisor and is selected for department honors by the Chemistry Department faculty. To be nominated chemistry majors need at least a 3.5 GPA in all chemistry course work required for the major and a minimum of two semesters of research by the time of graduation. The student would also have to submit, in electronic form, a written research report to support the nomination.

Non-Compliance with Safety Rules
Failure to comply with proper procedures and prescribed safety cautions shall subject the student to removal from the laboratory and/or disciplinary action.
1. Any student who engages in unauthorized experimentation or who seriously disregards safety, thereby endangering self or others shall be withdrawn immediately from the class with a grade of “F”.
2. Any student who shows persistent disregard for safety may have his or her grade lowered, and may risk being withdrawn with a final grade of “F”.

Prerequisites
To enroll in a Chemistry Course that has another Course as a prerequisite requires that a grade of “C or better” (C- not accepted) be earned in the prerequisite course. Exceptions may be made only with instructor consent or if not explicitly stated in the course description.
# BA - Chemistry

This program provides a fundamental chemistry background, while affording ample electives for developing a second specialty. The degree is designed for those wishing to work in scientific laboratories, or in fields allied to chemistry such as medicine, environmental monitoring, electronics, food processing, sales, pharmaceuticals, safety, literature search, or in a supervisory capacity in businesses dealing with chemical products.

## University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

## 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

## Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

## Prerequisite Requirements

Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of "C or better" (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJU Course Catalog for specific information regarding course prerequisites.

COMPLETE 10-12 UNITS FROM:

- CHEM 101. Chemistry and the Computer ......................................................... 3
- CHEM 121S. Radiation Safety ......................................................................... 1-2
- CHEM 130A. Biochemistry ............................................................................ 4
  - CHEM 135 or CHEM 130A may count toward the degree.
- CHEM 130B. Biochemistry ........................................................................... 4
- CHEM 130C. Biochemistry ............................................................................ 3
- CHEM 135. General Biochemistry ................................................................ 4
  - CHEM 135 or CHEM 130A may count toward the degree.
- CHEM 145. Inorganic Chemistry .................................................................. 3
- CHEM 170A. Foundations of Macromolecular Chemistry ............................. 1
- CHEM 180. Individual Studies ...................................................................... 1-4
- CHEM 191. Undergraduate Seminar ............................................................... 5
- CHEM 212. Natural Products ....................................................................... 3
- CHEM 213. Organic Synthesis ...................................................................... 3
- CHEM 236. Biophysical Methods .................................................................. 3
- CHEM 237. Bioinorganic Chemistry ............................................................... 3
- CHEM 245. Advanced Inorganic Chemistry .................................................. 3
- CHEM 250. Current Topics in Analytical Chemistry ...................................... 3

University Electives

- A minor is strongly recommended.

Total Units Required

- 16
- 120
BS - Chemistry

This curriculum prepares students for graduate work in chemistry or for responsible positions in industrial or government laboratories. This degree meets all requirements for Certification by the American Chemical Society. It does not require a minor, although with judicious choice of electives, a minor may be obtained in biology, mathematics or physics.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Prerequisite Requirements

Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of "C or better" (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

<tr>
<td>Of the 39 units required by the university, 24 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a &quot;C-&quot; or better to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS (EXCEPT FOR 1 COURSE IN GE AREA C AND 1 COURSE IN GE AREA D) AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP (WHICH INCLUDE THE MISSING GE IN AREA C AND D). MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

### Total Units Required

23
MA - Chemistry

The MA Chemistry degree is designed for persons who seek to augment and enhance their knowledge of chemistry beyond the bachelor’s level. It is intended for (1) those who are interested in teaching chemistry at community colleges, (2) high school teachers who are currently certified and have teaching experience, (3) those who are interested in chemical sales, technical librarianship, and scientific writing, or (4) those who already have a significant amount of research experience. The MA degree is not recommended to those who wish to conduct or direct chemical research and have no previous research experience in the private sector.

For more information visit the Chemistry Department’s Graduate Programs webpage.

Admissions Requirements
The applicant must apply to and be admitted by both San José State University and the Chemistry Department. Check the SJSU Graduate Admissions and Program Evaluations website (GAPE) and the Chemistry Department website for the most up-to-date instructions.

Admission to the University
Applicants are admitted to the program by the Chemistry Department Graduate Advisor after they have been admitted to the graduate school by the university. University admissions requirements include a bachelor’s degree (or equivalent), a minimum 2.5 GPA, and good standing at the last college or university attended. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage of GAPE.

Admission to the Chemistry Department
The Chemistry Department requires that the bachelor’s degree be in chemistry or an intimately related science (e.g., chemical physics, biochemistry, materials science). In all cases, however, incoming students must have had the equivalent of 40 semester units of undergraduate chemistry including at least 10 units of general chemistry, 10 units of organic chemistry, 4 units of analytical chemistry, and 4 units of physical chemistry. A grade point average of 3.0 or higher for the chemistry coursework is preferred. In addition, admission to the Chemistry MA program requires the general GRE and at least two, but preferably three, letters of recommendation.

Admissions Status
Admission may be with graduate classified standing, which means that the student is deemed qualified to enroll in the graduate curriculum. In some cases, students are admitted with conditionally classified standing, which means that they must complete specified prerequisite work and/or graduate work with acceptable grades before they can be moved to classified status. Students with conditionally classified status should complete the conditions of their acceptance as early as possible. Such students may take graduate courses at the same time they are fulfilling the conditions. Prerequisite work is assigned for one or more of the following reasons: (1) low chemistry course GPA in undergraduate work, (2) insufficient number of undergraduate units in chemistry, or (3) lack of coursework in particular areas of study. In order to change from conditionally classified to classified standing, a student must (1) fulfill the conditions, and (2) obtain the Graduate Advisor's signature on the Change of Classification in Graduate Program [http://www.sjsu.edu/gape/forms/Change of Classification in Graduate Program 03.17.16.pdf] form. Only students in classified standing may petition for advancement to candidacy, a requirement for graduation.

Requirements for Advancement to Graduate Candidacy
After approximately two semesters of coursework and completion of a preliminary seminar based on a proposed, faculty-guided research project, students may apply for advancement to graduate candidacy for the MA degree. In addition, the student must have graduate classified status and must have completed CHEM 100W for the Graduation Writing Assessment Requirement (GWAR). The Preliminary Seminar Guidelines and Evaluation form may be found on the Chemistry Department Forms webpage. The 30-unit Proposed Graduate Degree Program is written by the Graduate Advisor in consultation with the student and entered on the Petition for Advancement to Graduate Candidacy to Graduate Candidacy Form 10.7.15.pdf form which must be approved and signed by both the student’s Research Advisor and the Graduate Advisor. Students cannot enroll in CHEM 299 (Thesis) or apply for graduation until they are official candidates for a degree. See the Graduate Policies and Procedures section of this catalog for further details regarding university requirements for Petition for Advancement to Candidacy for the master’s degree.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MA - Chemistry Graduation Requirements
Note that the coursework requirements for the MA degree differ from the requirements for MS degree in Chemistry. In addition to completing the 30 units of coursework listed on the approved candidacy form, an MA degree candidate in Chemistry must complete the following activities as part of his or her culminating experience:
**Final Seminar**

All MA candidates are required to present a departmental seminar based on their research project. The seminar is scheduled through the faculty instructor for CHEM 285 and, therefore, must take place during the fall or spring semester.

**Final Oral Examination**

All MA candidates are required to pass a Final Oral Examination based on the research project as detailed in the thesis. The Final Oral Examination is administered by the thesis committee, and the candidate must provide the committee with a copy of the thesis for review at least two weeks prior to the exam date. The final exam may be scheduled on the same date as the Final Seminar if the two-week thesis delivery requirement is met.

**Thesis**

The MA thesis document must be approved by the student’s thesis research committee before submission. Typically, the thesis committee will provide the candidate feedback during the Final Oral Examination and may request changes to the thesis before final approval. See the most current version of the [SJSU Master’s Thesis and Doctoral Dissertation Guidelines](http://info.sjsu.edu/cgw) and the submission deadlines set by the College of Graduate Studies.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

This requirement is satisfied by passing CHEM 100W

| **Total Units Required** | 30 |
| Elective courses must be planned in consultation with the Graduate Advisor. |
| Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate. |
MS - Chemistry

The MS Chemistry degree is designed for persons who seek greater competency in chemical research or for those who want an introduction to graduate work before starting a program for the PhD degree. Emphasis is placed upon, but not limited to, training in advanced laboratory techniques, operation of state-of-the-art instruments, data acquisition and interpretation, and strategies involved in designing and conducting research in chemistry.

For more information visit the Chemistry Department’s Graduate Programs webpage.

Admissions Requirements

The applicant must apply to and be admitted by both San José State University and the Chemistry Department. Check the SJSU Graduate Admissions and Program Evaluations website (GAPE) and the Chemistry Department website for the most up-to-date instructions.

Admission by the University

Students are admitted to the program by the Chemistry Department Graduate Advisor after they have been admitted to the graduate school by the university. University admissions requirements include a bachelor’s degree (or equivalent), a minimum 2.5 GPA, and good standing at the last college or university attended. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage of GAPE.

Admission to the Chemistry Department

The Chemistry Department requires further that the bachelor’s degree be in chemistry or an intimately related science (e.g., chemical physics, biochemistry, or materials science). In all cases, however, incoming students must have had the equivalent of 40 semester units of undergraduate chemistry including at least 10 units of general chemistry, 10 units of organic chemistry, 4 units of analytical chemistry, and 4 units of physical chemistry. A grade point average of 3.0 or higher for the chemistry coursework is preferred. In addition, admission to Chemistry requires the general GRE examination and at least two, but preferably three, letters of recommendation.

Admissions Status

Admission may be with graduate classified standing, which means that the student is deemed qualified to enroll in the graduate curriculum. In some cases, students are admitted with conditionally classified standing, which means that they must complete specified remedial work and/or graduate work with acceptable grades before they can be moved to classified status. Students with conditionally classified status should complete the conditions of their acceptance as early as possible. Such students may take graduate courses at the same time they are fulfilling the conditions. Prerequisite work is assigned for one or more of the following reasons: 1) low chemistry course GPA in undergraduate work, 2) insufficient number of undergraduate units in chemistry, or 3) lack of coursework in particular areas of study. In order to change from conditionally classified standing, a student must 1) fulfill the conditions, and 2) obtain the Graduate Advisor's signature on the Change of Classification in Graduate Program form. Only students in classified standing may petition for advancement to candidacy, a requirement for graduation.

Requirements for Advancement to Candidacy

After approximately two semesters of coursework and completion of a preliminary seminar based on a proposed, faculty-guided research project, students may apply for advancement to graduate candidacy for the MS degree. In addition, the student must have graduate classified standing and must have completed CHEM 100W for the Graduation Writing Assessment Requirement (GWAR). The Preliminary Seminar Guidelines and Evaluation form may be found on the Chemistry Department Forms webpage. The 30-unit Proposed Graduate Degree Program is written by the Graduate Advisor in consultation with the student and entered on the Petition for Advancement to Graduate Candidacy form which must be approved and signed by both the student’s Research Advisor and the Graduate Advisor. Students cannot enroll in CHEM 299 (Thesis) or apply for graduation until they are official candidates for a degree. See the Graduate Policies and Procedures section of this catalog for further details regarding university requirements for Advancement to Candidacy for the master’s degree.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MS - Chemistry Graduation Requirements

In addition to completing the 30 units of coursework listed on the approved Candidacy form, a MS degree candidate in Chemistry must complete the following activities as part of their culminating experience:

Final Seminar

All MS candidates are required to present a departmental seminar based on their research project. The seminar is scheduled through the faculty instructor for CHEM 285 and, therefore, must take place during the fall or spring semester.
Final Oral Examination
All MS candidates are required to pass a Final Oral Examination based on the research project as detailed in the thesis. The Final Oral Examination is administered by the thesis committee, and the candidate must provide the committee with a copy of the thesis for review at least two weeks prior to the exam date. The Final Oral Examination may be scheduled on the same date as the Final Seminar if the two-week thesis delivery requirement is met.

The Thesis
The MS thesis document must be approved by the student’s thesis research committee before submission. Typically, the thesis committee will provide the candidate feedback during the Final Oral Examination and may request changes to the thesis before final approval. See the most current version of the SJSU Master’s Thesis and Doctoral Dissertation Guidelines and the submission deadlines set by the College of Graduate Studies.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

This requirement is satisfied by passing CHEM 100W

⦁ BA, Chicana and Chicano Studies
⦁ Minor, Chicana and Chicano Studies
⦁ MA, Chicana and Chicano Studies

Introduction
Created in 1969, the Department of Chicana and Chicano Studies (CCS) is the oldest graduate program in Chicana/o studies in the country and only one of five graduate programs in Chicana/o Studies programs in California today. Rooted in social justice principles, our interdisciplinary program prepares students to critically examine and address intellectual traditions and contemporary issues resulting from intersections in race, ethnicity, class, and gender in Chicanx-Latinx communities. We offer an MA degree with three areas of emphasis: education, policy and comparative ethnic studies. The BA provides students an in-depth understanding of the discipline of Chicana/o Studies, as well as insights and skills to analyze and work with Chicanx-Latinx communities through three areas of emphasis: Cultural & Creative Expression, Institutions & Community Engagement, and Transnationalism & Global Relations. It is designed to complement a number of majors across the university, for those who want a double major that includes CCS. We also offer a unique, interdisciplinary minor that supplements any undergraduate major by providing a well-rounded introduction to the Chicanx-Latinx community, including the community’s history, politics, culture and social, political and economic contexts. Our graduates become leaders in the fields of teaching, social services, policy, health care, government and community service, and pursue doctorates in Chicana/o studies, ethnic studies and other academic fields.
BA- Chicana and Chicano Studies

The BA in Chicana and Chicano Studies at SJSU provides students an in-depth understanding of the discipline of Chicana/o Studies as well as insights and skills to analyze and work with Chicanx-Latinx communities to address the issues they face. The degree encompasses three different areas of emphasis: Cultural & Creative Expression, Institutions & Community Engagement, and Transnationalism & Global Relations.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

MA - Chicana and Chicano Studies

Created in 1969, the Department of Chicana and Chicano Studies is the oldest graduate program in Chicana/o studies in the country and only one of five programs in Chicana/o Studies in California today. Rooted in social justice principles, our interdisciplinary program prepares students to critically examine and address intellectual traditions and contemporary issues resulting from intersections in race, ethnicity, class, and gender in Chicanx-Latinx communities. We offer an MA degree with three areas of emphasis: education, policy, and comparative ethnic studies. Our graduates become leaders in the fields of teaching, social services, policy, health care, government and community service and pursue doctorates in Chicana/o Studies, Ethnic Studies and other academic fields.

MA - Chicana and Chicano Studies, specialization in Comparative Ethnic Studies

The Comparative Ethnic Studies specialization is designed to prepare students for doctoral study in Chicana/o Studies, Ethnic Studies and other academic fields. In addition to courses in Chicana and Chicano Studies, students may take courses from other areas of Ethnic Studies, such as African American Studies and Asian American Studies, so as to develop strengths in several areas of Ethnic Studies.

MA - Chicana and Chicano Studies, specialization in Education

The Education specialization is intended to prepare students for effective work in a number of fields requiring expertise in issues relevant to Chicanx and Latinx education. Among the most critical areas within this emphasis is the analysis of the K-12 educational system and the development of methods for training competent professionals to work with these communities.

MA - Chicana and Chicano Studies, specialization in Policy Studies

The Policy Studies specialization is designed to provide students with a strong background in policy analysis and development as they relate to the Chicanx and Latinx community. The intent of this specialization is to prepare students to apply a Chicanx and Latinx perspective to the development and implementation of contemporary policies that address the needs of this and other communities.

Information about the program and important dates can be obtained at the department website: sjsu.edu/ccs

Admissions Requirements

Candidates must meet all the university admissions requirements. In addition to the regular application for admission to the university, each applicant must submit directly to the graduate advisor of the Chicana and Chicano Studies Program two letters of recommendation, a statement of purpose, and a writing sample (not to exceed 10 pages). Those students who do not meet the standards for classified status may be admitted with specific conditions as conditionally classified; the conditions must be fulfilled before the student will be advanced to candidacy for the master’s degree in Chicana and Chicano Studies. If the conditions are not fulfilled, the program reserves the right to dismiss the student from the program by notifying the Associate Dean of Graduate Studies.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Requirements for Advancement to Graduate Candidacy

Students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the MA degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. Students pursuing the Plan A (Thesis) option must meet additional departmental requirements for candidacy by securing the commitment of three faculty members of the university, two of whom must be members of the program permanent faculty, to serve as members of the student’s Plan A (Thesis) committee, with one permanent faculty member agreeing to serve as chair. The committee must approve the student’s thesis proposal no later than one month prior to the end of the semester preceding the one in which enrollment in the final thesis course (CCS 299, Master’s Thesis) is planned.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Department Graduation Requirements

At an appropriate time, and with the assistance of the graduate advisor, students will select a specialization and a culminating experience (Plan A, Plan B Project, or Plan B Applied Project) as outlined below:
Culminating Experience

Plan A (Thesis)

The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee. The candidate for the MA - Chicana and Chicano Studies degree must successfully pass a final oral defense of the thesis. This requirement is fulfilled by enrolling in CCS 298 and CCS 299 in consecutive semesters.

Plan B (Project)

The project is independently conducted research under the supervision of one member of the program permanent faculty. It is typically more focused on working directly with communities than the thesis. The candidate for the MA - Chicana and Chicano Studies degree must successfully complete a final project paper approved by the project advisor. This requirement can be fulfilled by enrolling in CCS 298 for one or two semesters.

Plan B (Applied Project)

The Applied Project is completed in the Capstone Seminar under the direction of the faculty and is presented to the campus community. Students choosing this option will complete other coursework instead of the 298 and/or 299 to meet the units required for the MA - Chicana and Chicano Studies degree.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Total Units Required

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

- Minor, Atypical Child Studies
- Minor, Child and Adolescent Development
- MA, Child and Adolescent Development

Introduction
Interested in K-8 teaching? In childcare? Or in agencies serving children, youth, and families? A degree in child and adolescent development is excellent training for careers involving children and families. Or perhaps you already possess entry-level credentials, already work with children and youth and want to advance your career. A wide range of professionals-from childcare administrators to parent educators to child/youth advocates to child and family counselors to pediatric nurses to healthcare workers-have gained the knowledge and expertise they needed to move ahead in the workplace through our bachelor’s and master’s degree programs. Our curriculum incorporates theory, research, policy and practice, providing students with a comprehensive understanding of children and adolescents. For hands-on training we offer numerous activities in community agencies and we operate a campus laboratory preschool. We graduate well-informed, responsible individuals, sensitive to the commonalities and diversities of the world and its people.

Child and Adolescent Development Honors Program
Students may apply for the departmental Honors Program in Child and Adolescent Development if they meet the following criteria: completion of 9 units of upper division child development course work with a minimum GPA of 3.5, and completion of CHAD 101 or STAT 95 (or equivalent) with a grade of “A-” or better. Students who meet the entrance criteria will be awarded departmental honors by showing evidence of distinguished scholarly work as indicated by completion of a BA honors thesis (CHAD 199: Honors Thesis) or work leading to a published paper or presentation at a professional meeting, and a minimum GPA of 3.5 in all upper division child development courses.
BA - Child and Adolescent Development

This program provides a strong foundation in child development and could be the basis for graduate study in child development and related fields. This major is designed for students interested in having a career in a variety of child-related fields, such as early childhood education, childcare, community settings, and/or agencies serving children, youth, and families. Students who have declared Child and Adolescent Development (CHAD) as their major should meet with the Department advisor for consultation and approval of the program. Information about CHAD advising and how to make an appointment can be found on the department website www.sjsu.edu/chad/.  

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.  
A grade of C or better (C- not accepted) is required to meet graduation requirement.

**Total Units Required**: 120

Note: The following Capstone courses, CHAD 158, CHAD 160 and CHAD 195 may be repeated only once.
BA - Child and Adolescent Development, Preparation for Teaching

This major is designed for students interested in teaching in elementary school or middle school. The following course work satisfies San José State University’s requirements for a BA in Child and Adolescent Development (ChAD). The SJSU pattern of Preparation for Teaching course requirements is designed for students who begin their college careers in this major. New students or transfer students in this BA track should see a department advisor during the first semester for a list of the required courses. Students who are transfers or who are changing into this major, in consultation with a department advisor, identify the course work appropriate for the individual. Information about ChAD advising and to make an appointment can be found on the department website: http://www.sjsu.edu/chad/chad-resources/advising/index.html.

The Commission on Teacher Credentialing in the state of California (CCTC) recognizes Teacher Prep degrees as verification of subject matter competence. The following course work satisfies San José State University’s requirements for a BA in ChAD, Preparation for Teaching. The department also has a program approved by the CCTC for waiver of the subject matter examination (CSET for Multiple Subjects) required to earn a teaching credential. There are different requirements for this waiver option. If interested see Preparation for Teaching w/CSET waiver.

Maintaining a minimum grade point average (CPA) of at least 2.87 and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

### Total Units Required

120

**Note for students taking the CSET waiver path,** there are specific GE requirements (see [Preparation for Teaching w/CSET waiver](#)).

Note: The following courses, CHAD 159 and CHAD 195, may be repeated only once.
BA - Child and Adolescent Development, Preparation for Teaching W/CSET Waiver

This major is designed for students interested in teaching in elementary school or middle school. The following coursework satisfies San José State University’s requirements for a BA in Child and Adolescent Development (ChAD). The SJSU pattern of Preparation for Teaching course requirements is designed for students who begin their college careers in this major. New students or transfer students in this BA track should see a department advisor during the first semester for a list of the required courses. Students who are transfers or who are changing into this major, in consultation with a department advisor, identify the course work appropriate for the individual. Information about ChAD advising and to make an appointment can be found on the department website: [http://www.sjsu.edu/chad/chad-resources/advising/index.html](http://www.sjsu.edu/chad/chad-resources/advising/index.html).

The Commission on Teacher Credentialing in the state of California (CCTC) recognizes Teacher Prep degrees as verification of subject matter competence. The following coursework satisfies San José State University’s requirements for a BA in ChAD, and is a program approved by the CCTC for waiver of the subject matter examination (CSET for Multiple Subjects) required to earn a teaching credential. (See Preparation for Teaching w/o CSET waiver.)

Maintaining a minimum grade point average (GPA) of at least 2.87 and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

### University Graduation Requirements

- **Core Lower Division General Education**
  - Of the 39 units required by the university, 30 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

- **Upper Division General Education**
  - Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

### American Institutions

- The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Highly recommend Foreign language and technology requirements for teaching credential (see Credential Information Services).

### Total Units Required

| Total Units Required | 120 |

**Note Students without the CSET waiver [http://info.sjsu.edu/web-dbgen/catalog/departments/CD-section-2.html] have more flexibility in their GE options.

Note: The following courses, CHAD 159 and CHAD 195, may be repeated only once.
## Minor - Atypical Child Studies

The courses for this minor provide a solid foundation in both normative and atypical early childhood development. The minor is particularly beneficial for students who plan to pursue careers in a number of branches of the social and life sciences, education, medicine and other human services professions focusing on atypical infants/children and their families.

### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

### Minor - Child and Adolescent Development

The courses for the minor in Child & Adolescent Development offer a range of opportunities to examine the course of human development with special emphasis on the period from infancy through adolescence. The minor is particularly appropriate for students planning to enter the fields of education, social welfare, nursing, child care, and other human services professions.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

**Requirements of the Minor**

MA - Child and Adolescent Development

The Master of Arts degree in the Department of Child & Adolescent Development (ChAD) prepares students for advanced study leading to a doctorate in the field; for community college teaching; and for professional careers in settings that serve children, youth, and families.

Detailed information about the program can be found on the department website: [http://www.sjsu.edu/chad/programs/ma-chad/index.html](http://www.sjsu.edu/chad/programs/ma-chad/index.html).

Admissions Requirements

Candidates apply separately to the university to obtain approval for university-level admission and to the department to obtain admission to the ChAD master’s program. Candidates must meet all the university admission requirements. Note that applicants must have an undergraduate grade point average of 3.0 (B) or better in the last 60 semester units of undergraduate work.

In addition to meeting university requirements, the minimum requirement for admission to the ChAD MA program is 1) a baccalaureate degree awarded by an accredited institution, 2) a completed department application, 3) three letters of recommendation, 4) a 1-2-page typed statement of educational and professional background and professional goals, and 5) an essay on various topic areas in child and adolescent development. In addition, students have the option of submitting GRE scores which will be evaluated within the context of all the applicant’s materials. Preference is given to candidates with a background in ChAD or a related field (e.g., Psychology, Sociology, Education, Social Work, Nursing). Applicants can be admitted either in a conditional or classified status.

Admission to the MA program requires successful completion of the Graduate Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Requirements for Advancement to Graduate Candidacy

Students must meet the university requirements for candidacy. General university requirements for advancement to candidacy are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the Graduate Studies website.

During the semester that the first 9 units of coursework will be completed, the ChAD MA candidate will need to submit a Departmental Request for Candidacy form. This form must be signed by the ChAD graduate program coordinator and submitted to GAPE by the appropriate deadline. Check the deadline for submitting the Petition for Advancement to Graduate Candidacy. Any changes made in the program degree academic plan as listed on the candidacy form need to be requested using the Request for Course Substitution in Graduate Degree Program. This form must be signed by the ChAD graduate program coordinator prior to submission to GAPE.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, CPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MA - Child and Adolescent Development Graduation Requirements

Students are expected to complete all required courses and select three electives from the department-approved list. In order to meet degree requirements, candidates for the MA in ChAD must maintain a 3.0 GPA in all courses with no single course grade below a B-. Students who earn less than a B- in any required course (ChAD 260A, 260B, 262, 266, 268, and 270) must retake the course and earn a grade of B- or better. For electives in which the earned grade was less than a B-, students have the option to retake the same course or to select a different elective.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

This requirement is satisfied by passing CHAD 260A.

### Electives

Three department-approved elective courses**

### Culminating Experience

COMPLETE ONE OPTION (PLAN A OR PLAN B):

- **Plan A (Thesis)**
  - CHAD 299. Master's Thesis                                      | 3-6   |

- **Plan B (Project)**
  - CHAD 298. Special Studies in Child and Adolescent Development | 3-6   |

### Total Units Required

30

* Meets the Graduation Writing Assessment Requirement (GWAR). Must be taken in the first semester of enrollment.

** Elective courses must be selected from the [department-approved list](#). The maximum number of upper-division undergraduate units that can be applied to the ChAD MA degree requirements is three.

*** To be completed concurrently with CHAD 260B.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

⦁ BS, Civil Engineering
⦁ MS, Civil Engineering

Introduction
Civil engineers plan, design and supervise the construction of water supply systems, communications networks and transportation systems. They construct buildings and foundations. Using modern technology, they solve pollution and planning problems and tackle other engineering challenges. The Department of Civil and Environmental Engineering offers both bachelor’s and master’s degree programs. The undergraduate program includes course work in construction, environmental, geotechnical, structural, transportation and water resources engineering. Classroom instruction is supplemented by hands-on laboratory experiences, and the opportunity to participate in student clubs, including the American Society of Civil Engineers, Associated General Contractors, Institute of Transportation Engineers, Water Environmental Federation and American Water Works Association. To accommodate graduate students who also work, graduate courses are scheduled in the late afternoon and evening. The undergraduate program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org
### BS - Civil Engineering

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

**Major Exceptions**

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

**Major-Specific Graduation Requirements**

The following course in Preparation for the Major must be completed with a "C or better": ENGL 001B

<table>
<thead>
<tr>
<th>University Graduation Requirements</th>
<th>27</th>
</tr>

<td>2</td>
</tr>
</tbody>
</table>

Three courses from Civil Engineering electives approved by a major advisor.

Two of the three elective courses must be approved design electives.

### Total Units Required

120
MS - Civil Engineering

The Master of Science in Civil Engineering program is designed for students to specialize in their choice of sub-discipline in Civil Engineering. The Department of Civil and Environmental Engineering offers specializations in Construction Management, Environmental Engineering, Geotechnical Engineering, Structural Engineering, Transportation Engineering, and Water Resources Engineering. Courses are practical-oriented, focusing on content and skills that prepare engineers to enter and/or advance in industry or enter doctoral programs. The program offers coursework in a once-per-week format in the afternoons and evenings to accommodate working individuals who wish to pursue their studies while gaining industry experience. Additional information is available at: http://cee.sjsu.edu.

Program Educational Objectives and Graduate Program Outcomes

The graduate program’s educational objectives (PEOs) for Civil Engineering are to

- Prepare students for their professional careers and licensure by strengthening their knowledge in their specialization (depth) and extending their skills and knowledge base (breadth);
- Provide students advanced proficiencies for professional practice to enable them to advance in the licensing process and equip them for advancement in their career;
- Improve students’ research skills and prepare them for further graduate study;
- Provide students with experience and skills for multi-disciplinary and cross-CE disciplinary practice.

Four graduate program learning outcomes (PLOs) are aligned with the PEOs and are assessed in individual graduate courses. By the end of the program, students should be able to

- Apply advanced concepts, theory, and analysis for problem solving;
- Synthesize and integrate necessary engineering concepts into engineering solution process;
- Apply modern tools for computations, simulations, analysis and design;
- Communicate effectively.

Admissions Requirements

Requirements for Admission to Classified Standing

Prospective students must apply separately to the university to obtain approval for graduate-level admission and to the department to obtain admission into the MS in Civil Engineering program. In addition to meeting university admissions requirements, an applicant must have:

- A bachelor’s degree in civil engineering; and
- A 2.7 grade point average (4.0-based scale).

Requirements for Admission to Conditionally Classified Standing

Applicants who do not qualify for classified standing in civil engineering but who meet university requirements for graduate admission and whose academic records or professional achievements and maturity give promise of satisfactory performance in graduate study in civil engineering may, upon approval of a committee of department faculty, be admitted, with specific conditions, as conditionally classified. The conditions must be fulfilled before the student can be advanced to candidacy for the degree. If the conditions are not fulfilled, the program reserves the right to dismiss the student from the program by notifying the Associate Dean of Graduate Studies. This process is known as administrative academic disqualification (see Section 41300.1, Title 5, California Code of Regulations). Applicants whose bachelor’s degrees are not in civil engineering will be required to take additional courses that will not be counted in the graduate degree program for the MSCE. Details can be obtained on the department website at: https://cee.sjsu.edu/graduate-studies/makeup-requirements.

English Proficiency Requirements

If an applicant’s bachelor’s degree is not from a US or Canadian university, a GRE must be taken; minimum scores acceptable for admission are listed on the Graduate Program Test Requirements webpage at GAPE. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Requirements for Advancement to Graduate Candidacy

Conditionally classified students must satisfy the conditional requirements listed in their letter of acceptance prior to advancing to candidacy. Students who have completed matriculation and achieved classified standing in the MS degree may advance to candidacy after completing a minimum of 9 units of graded work as a graduate student in letter-graded 100 or 200-level courses acceptable to the CE Department. Students must also fulfill other university requirements for advancement to candidacy for the master’s degree as outlined in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.
Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Approved courses may include graduate courses and upper-division elective courses in Civil Engineering and graduate or upper-division courses in other university departments from a list approved by the Civil Engineering Department Curriculum Committee. The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15. At least 60% of the courses taken must be letter graded. No more than 30% of the courses listed for candidacy can be transfer units, including any graduate-level courses taken in the senior undergraduate year at SJSU.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Eligible primary and secondary areas of specialization in civil engineering areas are:

- Construction Engineering
- Environmental Engineering
- Geotechnical Engineering
- Structural Engineering
- Transportation Engineering
- Water Resources Engineering

Culminating Experience

Plan A (Thesis)
Students choosing this option must complete 6 units of Project and Thesis courses. The student is responsible for securing the commitment of three committee members, in accordance with university policy, to serve as the student’s thesis committee. One faculty member in the CEE department must agree to serve as the thesis committee chair. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. The candidate must pass a final oral defense of the thesis. Meeting thesis standards and passing the oral defense is solely the responsibility of the student and a student who fails to meet these standards will be required to maintain continuous enrollment at the university until the work is complete.

Plan B (Project)
Students choosing the Project option must complete 3 units of CE 298-Special Problems under the advisement of at least one departmental faculty member. The student is also responsible for securing a committee to review the project. The project must culminate in a project report and an oral defense of the project. In addition to the project, the student must select and complete a program in a secondary area of emphasis in consultation with their advisor.

Plan B (Comprehensive Exam)
Students choosing this option must sign up for and pass the departmental comprehensive exam, given once per semester, during the final term of study. The student is responsible for applying for graduation prior to signing up for the exam. In addition to the comprehensive exam, the student must select and complete a program in a secondary area of emphasis in consultation with their advisor. The comprehensive exam covers topics in the student’s primary and secondary areas of emphasis. Signing up for the exam does not necessarily meet enrollment requirements for external agencies and cannot be used for that purpose. Students who fail to register for or pass the comprehensive exam in their final term of study will be required to maintain continuous enrollment with the university in subsequent semesters and may be required to complete remedial work.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

For Legend please see page 2
Introduction
The College of Health and Human Sciences (formerly Applied Sciences and Arts) provides both liberal and well-defined professional education at the undergraduate and graduate levels. Course work prepares students to be competent and transformative professionals in a technologically complex and culturally diverse society. The college’s courses and programs provide students with a theoretical base that is developed and tested through: (1) research; (2) knowledge that can be applied in diverse systems; (3) processes that incorporate human understanding, social justice and cooperation, and (4) supervised practice through internships, field work and/or preceptorships in a variety of career-related settings. Graduates become leaders and establish professional careers as administrators, educators, practitioners, information specialists and applied researchers in a variety of settings. These settings include both private and public agencies, government institutions at all levels, community and health care organizations and educational institutions. The College of Health and Human Sciences values and respects diversity, inclusion, civility and individual uniqueness; we recognize the strength these factors bring to our community and learning environment. All of our interactions should reflect trust, caring and mutual respect. We value education and intellectual curiosity above all. The academic freedom of faculty and students is vital to our role of promoting life-long learning through intellectual inquiry, scholarship and the pursuit of knowledge. An overarching goal is that faculty and our academic programs will be recognized for outstanding research, teaching and service across disciplinary and geographic boundaries.

STUDENT SUCCESS CENTER (CHHS)
Located in MacQuarrie Hall (MH) 533, the Student Success Center in the College of Health and Human Sciences (CHHS) provides advising for undergraduate students majoring or wanting to major in programs offered in CASA Departments and Schools.

All CHHS students and students who would like to be in CHHS are invited to stop by the Center for general education advising, help with changing majors, academic policy related questions, meeting with peer advisors, and/or attending various regularly scheduled presentations and workshops. Looking for academic advice or maybe just some tips about how to navigate your way around SJSU? Check out the CHHS Student Success Center! It’s also a great place to study, and you can check out laptops.

Internships
The departments/schools within the College offer internships that involve advanced practical experience, fieldwork or clinical experience in a professional work setting under direct supervision of qualified professionals. Interns would be assigned various duties and experiences related to their particular areas of specialization. Internships may include seminars, practica or preceptorships to further develop beginning and advanced level practice skills.

International Experience Requirement
The goal of the international experience requirement is to introduce students to international and intercultural perspectives in order to prepare them to live and work in an increasingly globalized world. A number of different types of international experiences, ranging in length from 9 days to one year, can meet this requirement. Most international experience courses also allow students to earn credit towards the degree. Scholarships and Financial Aid are available to defray the costs of international travel. See http://www.sjsu.edu/chahs/international-experience/ for more information.

Teaching Credential Programs
The Department of Kinesiology, in collaboration with the College of Education, provides two single subject professional programs designed for individuals who are interested in teaching physical education or adapted physical education in grades K-12. The California School Nurse Credential prepares Registered Nurses at the Master’s and Post Master’s level to provide and manage health services and programs in the school setting. The School of Library and Information Science offers a Teacher Librarian Credential. The teacher librarian impacts K-12 student outcomes by collaborating with teachers, working directly with students, championing reading and providing information-rich learning environments.

Organized Research Units and Unique Programs
The programs of the College of Applied Sciences and Arts are further enriched by educational, research, global partnerships, as well as cultural and training opportunities provided by the following specialized research units and unique programs: Institute of Nursing Research and Practice, Center for International Sport and Human Performance, Research Institute for Foster Youth Initiatives (RIFYI), Timpany Center, The Center for Research on Effective Services (CRES), and the Center for Healthy Aging in Multicultural Populations (CHAMP).
Introduction

The College of Humanities and the Arts seeks to instill in students an understanding of human existence that is tolerant, moral and appreciative of human creativity as manifested in works of language and literature, the visual and performing arts, philosophy and theology, and by engagement in the creation of art and criticism.

Through its programs, the College aims to develop engaged participants in the local communities as well as in the global dimension of cultural, intellectual, and economic life. College faculty educate students for lifelong learning as well as for their first job after graduation. Building upon a foundation of excellent oral and written communication, the College helps students pursue a wide variety of paths to knowledge and careers, through specialized study in many fields, including art history, animation, comparative literature, dance, film, foreign languages, musical composition and performance, painting, radio broadcasting, sculpture, television, linguistics, comparative religion, philosophy, and technical and creative writing.

Faculty in all disciplines of the College engage in research published by major scholarly journals and university presses, supported by the major national grants and foundations, and presented at the major scholarly conferences. Artists within the College publish in important literary journals, exhibit at nationally recognized venues, or participate in prestigious performing arts productions. Throughout the College, faculty seek to produce scholarship or creative works that achieve national recognition.

College curricula develop the individual’s power to communicate effectively and to analyze critically the conditions upon which cultural perceptions are built. Courses in the College attempt to reveal the evolving aspiration toward aesthetic and intellectual power in human cultures by exposing the student to important ideas, achievements, and experiences in the humanities and the creative arts. In its many professional arts programs, the College develops the talent of those who have the skill to perform or create works of art, fixing in vivid form the values of diverse heritages. In its programs in language, literature, philosophy, and other areas of the humanities, the College engages students in the discovery and exploration of works from around the world that deepen understanding of how human imagination and intellect function within different historical and cultural contexts. A primary purpose of a humanities education is to develop the skills and confidence that support a creative, analytical mind capable of lifelong learning and adaptation to different contexts and opportunities.

Through its General Education, Arts, and many scholarly programs and research units, such as the Center for Literary Arts, the Martha Heasley Cox Center for Steinbeck Studies, and the Ira Brilliant Beethoven Center, the College of Humanities and the Arts makes an indispensable contribution to the SJSU community and the region surrounding it.

Humanities and the Arts Student Success Center (HASSC)

The Humanities and the Arts Student Success Center is located in Clark Hall, Room 244. The H&A SSC provides general education advising, academic planning and serves as a resource to other programs at SJSU. We serve undergraduate students who are pursuing major(s) within the College of Humanities and the Arts. We offer both drop-in advising and appointments. All students within the college are encouraged to meet with an academic advisor to discuss a plan that will ensure timely graduation.

Internships

Internships provide students with the opportunity to incorporate work experience in a professional setting as part of their academic programs. Internship representatives are available within each department.

Teaching Credential Preparation Programs

Teaching credential preparation programs are offered by the School of Music and Dance, the departments of Art, English and Comparative Literature, Humanities (Liberal Studies) and Film and Theatre.
Introduction

In the College of Professional and Global Education, we provide access to relevant educational programs that allow individuals to gain knowledge and skills that create a solid foundation for them to be engaged and productive members of a global society. We offer a learning environment that is dynamic and innovative, ensuring that we are responsive to the ever-evolving workforce and industry demands. Our college is the nexus for connecting professionals, institutions, businesses and industries, locally and from around the world, to the knowledge, resources, and talents of Silicon Valley’s premier public university.

Professional Education

At our College, we provide career-minded students and working professionals with the real-world knowledge, experience, and access they need to compete and succeed in a contemporary work force. Within the California State University (CSU), we have the most extensive portfolio of graduate, academic programs, with the highest enrollments. Through our College or in partnership with six academic colleges, we offer a total of 22 professional degree programs at the Masters level and 15 advanced certificate, and three credential programs.

In addition to our degree programs, we offer credit-earning courses to augment and complement regularly scheduled classes. Through Open University individuals from outside the university can enroll in university courses on a space-available basis and gain college credit. In winter intersession and summer intersession, we have a robust offering of courses, including General Education (GE) courses. These accelerated-format university courses are perfect for satisfying prerequisites, completing GE or major course requirements, or enabling a faster pace towards graduation.

Finally, we offer continuing education courses for professionals (such as teachers and project managers) to meet their industry’s continuing education requirements for maintaining credentials or career advancement.

Global Education

In our College, we are committed to internationalizing our campus in order to cultivate an environment of diversity and inclusion, and to graduate students who are prepared to live and lead in an increasingly globalized world.

Our College serves more international students than any other master’s granting university in the U.S. Students have high success in obtaining internships and work opportunities in Silicon Valley via curriculum practical training during their studies, and once they graduate with over 2,000 students participating in OPT/STEM OPT. Our International Student & Scholar Services office (ISSS) offers comprehensive immigration advising and co-curricular support programming for our international students and scholars. The goal of ISSS is to enhance the students’ experience in the United States and integrate them into our community, while also contributing to their success during their tenure at SJSU and beyond.

In addition, our Study Abroad and Away office offers an extensive portfolio of off-campus globally focused programs that strive to meet the personal, academic, and professional goals of our students. We aim to provide programs for all SJSU students to learn and discover other cultures first-hand, including study abroad (international) and away (domestic), short-term (winter, spring, and summer breaks) and long-term (semester and year-long) options.

Our International Gateways unit provides comprehensive support services and instruction to help non-matriculated international students thrive at our University. Through International Conditional Admissions, we help students apply for Conditional Admission/Eligibility to SJSU undergraduate and graduate degree programs. Our non-credit Academic English and Test Preparation courses prepare students to meet the SJSU English language admission requirements and learn American academic culture. International students interested in studying abroad in Silicon Valley can participate in our Semester at SJSU program. In addition to regularly scheduled programs, we partner with global universities and SJSU academic departments to develop and deliver customized non-credit programs for students and professionals.

For more information about programs offered in CPGE, please visit www.sjsu.edu/cpge

Curricula
⦁ MS, Medical Product Development Management

Introduction
San José is at the center of Silicon Valley, known worldwide for its research institutes and industries that set the standard for scientific and technological innovation. San José State is the metropolitan university of the region, and the academic programs of the College of Science prepare students for rewarding careers through our bachelor’s and master’s level degree programs in the biological sciences, physical sciences, mathematics and computer science fields. Our departments have established partnerships with local employers where students find training and employment opportunities.

The College of Science provides the lower division core biology, chemistry, mathematics and physics courses supporting majors in other technical disciplines (such as engineering). As part of the university general education requirements, we offer courses in quantitative reasoning, the physical universe and its life forms, and earth and the environment. Furthermore, we teach the discipline-specific courses for the science and mathematics teacher credential programs.

Successful science students come from many backgrounds. Some enter the university immediately upon graduation from high school. Others, who have worked or have various life experiences, enroll as either full or part-time students in order to continue their education and better their career opportunities. The maturity, laboratory skills and experience of these students enrich our programs. We have several programs to increase the participation of women and underrepresented students in professional level science. Our College of Science Advising Center (COSAC) is available to assist students with their academic advising questions as well as to provide tutoring for key science and math courses.

There are active student clubs associated with each major, several of which have won national recognition for their professional and community service activities. Club members provide mutual support and are able to network with professionals in their field.

Advising Center
Located in Duncan Hall (DH) 213
Phone: 408-924-5193
Email: cosac@science.sjsu.edu

Special Centers
The College of Science has several unique interdisciplinary instructional research centers and programs: the Biotechnology Education and Research Institute (BERI), the Masters in BioTechnology (MBT), the Master’s in Medical Product Development Management, the Clinical Lab Science program, the Center for Applied Mathematics, Computation and Statistics, the Institute for Modern Optics, the Flow Cytometry Core Facility, the W.M. Keck Facility for Chemical Research, the laboratory for Conservation Genetics, the Moss Landing Marine Laboratories, and the Nuclear Science Facility. Partially funded by external grants and contracts, these centers provide our students opportunities to participate in sponsored research projects. Cooperative programs with local industries and government laboratories are additional sources of professional experience and financial support for our science majors.

Teaching Credential Programs
Two single subject credential programs are coordinated by the College of Science, in collaboration with the College of Education. The single subject professional programs are designed for individuals who are interested in teaching science or mathematics in middle schools or high schools. The Science Education Program offers single subject credential programs in biology, chemistry, earth science and physics. The Department of Mathematics and Statistics offers a mathematics single subject credential program. For detailed information, contact the appropriate program coordinator.

Through the Science Education Program, the College of Science supports the Science Education Resource Center, which provides hands-on science materials, textbooks, reference materials and technical assistance to pre-service and in-service teachers.
MS - Medical Product Development Management

Students in the Master of Science in Medical Product Development Management degree program develop proficiency in applying leadership, management and decision-making skills in a regulated environment; understanding and conversing with others in a multi-disciplinary field; and understanding ethical, business, financial, global, and strategic implications in medical product development. The MPDM program prepares students to enrich their communities as ethical and socially responsible graduates in a field in which the highest levels of integrity are a fundamental necessity. Please refer to the program website for more information http://www.medproddev.sjsu.edu.

Requirements for Admission to Classified Standing

Applying for graduate school at San José State University is a two-step process. Apply to the university through Cal State Apply to obtain approval for university-level admission, and to the department to obtain admission into the MS, Medical Product Development Management program. Please visit the SJSU Admissions Requirements page for more information. Applicants may come from a wide variety of undergraduate (or postgraduate) areas of study including but not limited to nursing, pre-med, biology, chemistry, mathematics, science education, pharmacy, engineering, business, computer science, psychology, social sciences, and pre-law.

To be accepted into the program in classified standing, an applicant must:
1. Meet all University requirements;
2. Hold a baccalaureate degree from an accredited four-year college or university;
3. Have a grade point average (GPA) of at least 2.5 (3.0 or above preferred) in the last 60 semester or 90 quarter units of coursework;
4. Satisfactory completion of a 3-unit undergraduate course in introductory statistics and probability from an accredited college or university is recommended; and
5. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

Applicants should note that a high degree of proficiency in both written and oral communications in English is a fundamental skill required both to complete the degree program and for success in the field.

The program does not accept students in conditionally classified standing.

Requirements for Advancement to Candidacy

Students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the master’s degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR).

For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. The program GWAR course is SMPD 281A. Requirements for advancing to candidacy in the MS, Medical Product Development Management are successful completion of SMPD 281A and 9 units of overall program credits.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Program Graduation Requirements
The general requirements for the course completion as outlined below.

Culminating Experience

Plan B (Project)
The culminating project challenges the student to demonstrate leadership, teamwork and decision-making skills. The student will write or prepare a publication-worthy paper or presentation for a biomedical professional journal, conference or event. The paper or presentation must demonstrate depth of knowledge of the processes, methods, and procedures used in clinical research and development or in the management of medical product development on a topic selected by the student (with advisor approval).

Special Session Program Information

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the CPGE website for more information.
Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

*SMPD 281A will satisfy the graduation writing requirement for MPDM*

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.
Introduction

Programs in the College of Social Sciences prepare students for work and life in Silicon Valley and a rapidly changing world. Our thirteen departments provide training for careers in counseling, criminology, environmental restoration, computerized mapping, public administration, economic analysis, organizational communication, international relations, ergonomics, urban and regional planning, and countless other fields in business, government, teaching and human services. Major courses of study emphasize the contributions of the many cultures that form our community. Internships are encouraged to help students relate academic work to the opportunities and needs of this diverse region. Completion of one of our undergraduate majors also provides an excellent foundation for advanced graduate work in one of the disciplines or at a professional school such as law or business.

New technologies increasingly improve our instruction and link us to the innovative industry of our region and to the educational resources of the world, but personal interaction between students and faculty is still prized within the College of Social Sciences. Capable and interesting teachers, active student clubs and small classes provide ideal environments for learning. If you are interested in majoring in one of the social sciences, contact an advisor in one of our departments or the dean’s office.

Academic Counseling Center for Excellence in the Social Sciences (ACCESS)

Academic Counseling Center for Excellence in the Social Science (ACCESS) is the student success center for the College of Social Sciences, located in Clark Hall 240. Both current COSS students and those students interested in minoring or majoring in a social sciences degree program are invited to stop by ACCESS for general education advising and/or help with changing majors, and to have academic policy-related questions answered. We also offer tutoring and support in social sciences statistics and writing. Are you a COSS student in need of some academic advice or perhaps need some tips about how to navigate your way around SJSU? Looking for a quiet place to study? Check out the COSS Student Success Center!

Special Centers

The programs of the College of Social Sciences are further enriched by educational, research and training opportunities provided by the following specialized units:

- **Burdick Military History Project** supports the study and teaching of military history through public lectures, the Veterans Oral History Project, and it specialized collection of materials relating to military history. Contact the History Department.
- **Center for Development of Recycling** advances education, research and dissemination of information in various areas of recycling. Contact the Environmental Studies Department.
- **Center for Economic Education** supports improvement in the teaching of economics through a multi-method approach and the dissemination of economics education materials. Contact the Economics Department.
- **East Asian Regional Materials and Resources Center** provides information and counsel about studies in Asia, including library and audio-visual material available to teachers. Contact the History Department.
- **Silicon Valley Center for Global Studies (SVCGS)** is a joint initiative with the College of International and Extended Studies. It develops and disseminates knowledge from research on globalization, especially related to population migration.
- **Sourisseau Academy** promotes better understanding and appreciation of California’s state and local history, with emphasis on the history of Santa Clara Valley, through graduate scholarships and collections of historical source materials. Contact the History Department.

Teaching Credential Programs

Teacher preparation programs are administered by the Director of Social Science Education within the College of Social Sciences. Both multiple subject and single subject programs are offered. The Environmental Studies Department also offers a multiple subject program, and the Communication Studies Department cooperates with the English Department to prepare students for the single subject credential in English. Contact these departments for details.

⦁ BA, Communication Studies
⦁ BA, Communication Studies, Preparation for Teaching (Not Accepting Students)
⦁ Minor, Communication Studies
⦁ Minor, Communication in the Information Age
⦁ Minor, Community Service Learning
⦁ MA, Communication Studies

Introduction
The Department of Communication Studies prepares competent and ethical communicators for meaningful participation in diverse local and global communities. The B.A. and M.A. programs focus on four primary areas or cornerstones: democracy, diversity, technology, and globalization. Democracy affirms the balance of individual freedom and socio-political consensus shaped through dialogue, argument, and persuasion between individuals and groups. Diversity explores the variety and complexity of communication efforts to shape beliefs, values, and perceptions in different communities and cultures. Technology interrogates the implications of human communication in a mediated world. Globalization recognizes the interconnectedness, integration, fragmentation, and conflict within human societies and cultures in global contexts. Our undergraduate and graduate degree programs prepare alumni for a wide range of careers in areas such as education, sales, marketing, public relations, human resource development, law, politics, and community service.
Communication Studies Honors Program

Students requesting departmental honors in Communication Studies will be evaluated against the following criteria: (1) a minimum GPA of 3.5 in all four unit upper division courses in the major (Foundations, Inquiry, Practice Courses, 101C and 199C); (2) have at least a 3.0 overall GPA; (3) satisfactorily complete one of the department’s four-unit graduate seminars; and (4) participate in a public honors colloquium to present a summary of the work produced in the selected graduate seminar. Contact the department office for details.
BA - Communication Studies

The department provides suggested programs and advice for students interested in emphasizing special areas of speech and communication, and for those wishing to combine courses in the major with relevant electives in other departments. Interdisciplinary interests are encouraged.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

COMM 101C is a prerequisite for COMM 198 and COMM 199C.

University Graduation Requirements

Core Lower Division General Education 33

Of the 39 units required by the university, 6 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education 3

Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions 6

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

### Physical Education

#### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

#### Requirements of the Major

*For the BA in Communication Studies only 6 units of CR/NC coursework will be accepted.*

BA - Communication Studies, Preparation for Teaching (Not Accepting Students)

This major is designed for students interested in teaching English or speech communication in high school or middle school. The following course work satisfies San José State University’s requirements for a BA in Communication Studies.

A Minimum grade point average (GPA) and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Minor - Communication in the Information Age

This interdisciplinary minor Communication in the Information Age provides students the theoretical insights and practical skills necessary to thrive in the information age. The curriculum teaches the basic skills of information retrieval and evaluation; provides insight into contemporary media practices; and explores the intersection of technology, identity, and culture. Completion of this minor means that you can:

- Employ a broad range of resources and information technologies (including content development, visual design, and website construction) for the purposes of effective personal, artistic, and professional communication.
- Practice effective principles of information gathering, evaluation and synthesis while demonstrating awareness of legal, ethical, and practical issues relating to these practices.
- Develop reasoned and well-articulated perspectives on contemporary questions related to rights and responsibilities in the information age, with particular awareness of issues related to equity, intellectual property, intellectual freedom, and the ethical responsibilities of media institutions.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

MA - Communication Studies

The Master of Arts in Communication Studies is a comprehensive 35-unit program that provides advanced study in the theoretical and ethical underpinnings of communication studies, the methodologies used in the study of communication, and practice in applying these concepts and methods in professional and scholarly contexts. It combines study in the areas of Intercultural Communication, Organizational Communication, Performance Studies, Cultural Studies, Rhetoric, Interpersonal and Small Group Communication, and Crisis and Conflict Resolution. By gaining a deeper understanding of the social process that is communication, our students prepare for professional careers in non-profit and corporate environments and for further graduate study. Many experience teaching at the college level through the Graduate Teaching Associate (GTA) program. Our alumni continue on to doctoral programs, teaching at colleges and universities, and careers in a wide range of professions in Silicon Valley and beyond.

Information about the MA, Communication Studies and important dates can be obtained on the Department of Communication Studies website: http://www.sjsu.edu/comm/degrees/ma_comm/index.html.

Admissions Requirements

University Admission
Candidates must apply through the CSU admissions portal, Cal State Apply, and meet all university admissions requirements. Applicants will need to apply separately to the university to obtain approval for university-level admission and to the department to obtain admission into the MA in Communication Studies.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. The program does not currently require the GRE for admission.

Admission to the Program
Minimum requirements for admission to the MA, Communication Studies are a bachelor’s degree in Communication Studies or a related field, usually in the social sciences, humanities, or arts. A 3.0 grade point average (B or better) is desired. Depending on their level of preparation, applicants can be admitted in either classified or conditionally classified standing.

To apply for the MA in Communication Studies, follow the steps on this page: http://www.sjsu.edu/comm/degrees/ma_comm/apply/index.html

Program Requirements for Admission to Classified Standing
Students can be admitted in either classified or conditionally classified standing. To be admitted to the Master of Arts in Communication Studies program in classified status, an applicant must have a grade point average of 3.0 or better in their last 60 units, and possess a baccalaureate degree in Communication Studies, or related field in the social sciences, humanities, or arts from an accredited U.S. or international university.

Program Requirements for Admission to Conditionally Classified Standing
If an applicant’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, the conditions of admission will include additional BA or MA level coursework in Communication Studies, depending on the nature of the applicant’s case. The program admissions letter will explain the terms and requirements.

Requirements for Advancement to Graduate Candidacy
Students must meet the university requirements for advancement to graduate candidacy. General university requirements for advancement to candidacy for the MA degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. For Communication Studies, candidates meet the GWAR requirement by taking COMM 200R, a required course that most students take in their first semester.

Further requirements of the department for advancement to candidacy include completion of 18 units in the graduate program and submission of a project or thesis proposal to the department’s Graduate Committee. If the proposal is satisfactory and the student is considered to be a potentially competent and mature practitioner, he or she will be advanced to candidacy. Students who fail to meet the expected standards will be terminated from the program.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.
Culminating Experience

Students in the MA, Communication Studies complete the program with a 6-unit Culminating Experience selected from three three options: a master’s thesis, graduate project, or comprehensive exam.

Plan A (Thesis)

Students opting to complete a master’s thesis will take 3 units of COMM 299, Master’s Thesis in two consecutive semesters for a total of 6 units. The student is responsible for securing the commitment of a full-time tenured or tenure-track MPH faculty member who agrees to serve as thesis committee chair. The student must also secure the commitments of two additional university faculty members, one of whom must be a full-time tenured or tenure-track faculty member, to serve as the student’s thesis committee. The student must write a thesis proposal and have it approved by the thesis committee and pass the first COMM 299 course before enrolling in the second. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee. The candidate for the MA, Communication Studies degree must successfully pass a final oral defense of the thesis.

Plan B (Project)

Students opting to complete a graduate project will take 3 units of COMM 298, Master’s Project in two consecutive semesters for a total of 6 units. The student is responsible for securing the commitment of a full-time tenured or tenure-track MPH faculty member who agrees to serve as project committee chair. The student must also secure the commitments of two additional university faculty members, one of whom must be a full-time tenured or tenure-track faculty member, to serve as the student’s project committee. The student must write a project proposal and have it approved by the project committee before work on the project can begin. The student must successfully pass a final oral defense of the project.

Plan B (Comprehensive Exam)

Students opting for the courses-only option must pass the Comprehensive Exam to earn the MA, Communication Studies degree. This option requires an additional 6 units of electives selected in consultation with the graduate advisor. The exam consists of three three-hour, closed book essay questions: one question on communication theory, one question on communication methodology, and one question on a topic of the student’s choice.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html). This requirement is satisfied by passing COMM 200R

</table>

### Total Units Required

**35**

Students may take up to 6 units of graduate-level courses in programs other than Communication Studies selected in consultation with the graduate advisor and apply those units toward the MA, Communication Studies degree. Elective courses must be planned in consultation with the Graduate Advisor. The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 6. Upper-division units must be linked to study abroad. Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Introduction
Located in the center of Silicon Valley, the Department of Computer Engineering provides local and national high-tech companies with high quality, practice-oriented computer graduates. Bachelor’s and master’s degree programs are offered in both computer engineering and software engineering. Course topics range from computer hardware design and embedded systems to software design and construction of real-time systems, virtual systems, and enterprise software. Curriculum integrates concepts and hands-on practice using the latest developments in emerging technologies, design, verification, implementation, and computer systems applications to provide students with advanced hardware and software skills. High-tech companies seek out our graduates. Our alumni work in hardware/software analysis, design and verification, hardware/software co-design, systems software, domain applications and product testing at many Silicon Valley firms from start-ups to Fortune 100 companies. The undergraduate degree in Computer Engineering and Software Engineering are accredited by the Engineering Accreditation Commission of ABET, www.abet.org.
### BS - Computer Engineering

#### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

#### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

#### Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

#### Major-Specific Graduation Requirements

All courses in the Preparation and Required in Major (all courses in preparation, core, and concentration) must be completed with a grade of “C-” or better. The following preparation for the Major courses must be completed with a grade of “C” or better: MATH 30, MATH 31, PHYS 50 and PHYS 51.

#### Approved Upper Division Electives

Selected in consultation with the student’s advisor

**Total Units Required** 120
Certificate - Cybersecurity Foundations

The Computer Engineering program offers an 18-unit certificate program to students seeking career opportunities in cyber security. The program aligns with the nationally defined knowledge areas and prepares the students with well-grounded fundamentals to become a professional in cyber security.

- CMPE 130. Advanced Algorithm Design ................................................................. 3
- CMPE 132. Information Security ............................................................................... 3
- CMPE 138. Database Systems I ............................................................................... 3
- CMPE 142. Operating Systems Design ................................................................... 3

Complete one course from:
- CMPE 148. Computer Networks I ........................................................................... 3
- CS 158A. Computer Networks .................................................................................. 3

Complete one course from:
- CMPE 181. Internet of Things Platforms ................................................................. 3
- CMPE 182. Internet of Things Security .................................................................... 3
- CS 158B. Computer Network Management ............................................................ 3

Total Units Required | 18
Certificate - Cybersecurity Engineering

With the global threats of cyber-crime, our nation’s continued security and economic prosperity depend on the availability of increasing cyber security workforce. The Computer Engineering Department offers a 12-unit Cyber Security Engineering (CSE) Certificate program to students who seek career opportunities in cyber security and information assurance. The courses in the certificate program cover mobile-based software system, advanced topics, and project experience in information security.

Total Units Required 12
Certificate - Secure Test Engineering

With the global threats of cyber-crime, our nation’s continued security and economic prosperity depend on the availability of increasing cyber security workforce. The Computer Engineering Department offers a 9-unit Secure Test Engineering (STE) Certificate program to students who seek career opportunities in cyber security and information assurance. The courses in the program cover the fundamentals in the design of secure software systems, including software systems engineering, quality assurance, and enterprise platforms.

- BUS 248. Cyber Risk Management ................................................................. 3
- CMPE 202. Software Systems Engineering .................................................... 3
- CMPE 287. Software Quality Assurance and Testing ..................................... 3

Total Units Required 9
Certificate - Secure Software Engineering

With the global threats of cyber-crime, our nation’s continued security and economic prosperity depend on the availability of increasing cyber security workforce. The Computer Engineering Department offers a 9-unit Secure Software Engineering (SSE) Certificate program to students who seek career opportunities in cyber security and information assurance. The courses in the certificate program cover critical aspects in security domain, including network security, software security, and cyber risk management.

- CMPE 209. Network Security .................................................................3
- CMPE 272. Enterprise Software Platforms ........................................3
- CMPE 279. Software Security Technologies .....................................3

Total Units Required 9
MS - Computer Engineering

The MS CMPE program provides students with an educational experience that combines electrical engineering and computer science with the best of academia, the high-tech industry, and Silicon Valley. The high-tech industry increasingly requires engineers to be equipped with both hardware and software development knowledge and skills. The program provides in-class theory with hands-on hardware design and software development exercises to give students the skills necessary to create contemporary microelectronic products that are typically embedded computing systems containing both hardware and software. Graduates with an MS in Computer Engineering can expect to find significant opportunities in digital and computer hardware design and verification, system-level software development, and prototyping and testing as well as technical support and marketing.

Class schedules are designed for the convenience of employed engineers who wish to pursue graduate work on a part-time basis.

For more information, visit http://cmpe.sjsu.edu/content/masters-in-computer-engineering.

Educational Objectives of the Graduate Program

To provide MSCMPE graduates with

1. advanced knowledge of the practice of computer engineering, from vision to analysis, design, validation, and deployment.
2. the ability to tackle complex engineering problems and tasks, using contemporary engineering principles, methodologies, and tools.
3. leadership skills and the ability to participate in teamwork in an environment with people of different disciplines of engineering, science, and business.
4. understanding of the ethical, economic and environmental implications of their work, as appropriate.
5. the ability to advance successfully in the engineering profession and sustain a process of life-long learning in engineering or other professional areas.
6. the ability to communicate effectively in both oral and written forms.

Admissions Requirements

Candidates must meet all university admissions requirements. Applicants can be admitted in either classified or conditionally classified standing. If an applicant’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, the conditions will include taking preparatory courses to meet these requirements. These courses will not count as part of the master’s degree program requirements.

For acceptance by the Department of Computer Engineering, the applicant must satisfy the following requirements:

a) Academic Background

An applicant must have a degree equivalent to a four-year U.S. undergraduate baccalaureate degree with a GPA of 3.0 (B) or higher in a computer-related field, such as computer engineering or electrical engineering. Under special circumstances but very rarely, applicants with other academic backgrounds will be considered.

b) Standard Test Scores

An applicant who does not have a baccalaureate degree from an accredited university in the United States must meet SJSU’s minimum requirements on an English-Language Proficiency Exam (TOEFL or equivalent; please visit the Graduate Program Test Requirements website at GAPE for more information). GRE scores are used by the MS CMPE program as an evaluation factor, on a competitive basis; they are generally required for any applicant whose bachelor’s degree was from a non-ABET-accredited program or whose bachelor’s degree GPA was beneath 3.0. Under some circumstances, applicants are eligible for a waiver of the GRE test requirement.

Requirements for Advancement to Graduate Candidacy

Students may advance to candidacy after completing all admission conditions and all prerequisites for the culminating experience (refer to the MSCMPE Student Handbook) including the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MS - Computer Engineering Graduation Requirements

To obtain an MS degree in Computer Engineering, a student must meet the following requirements:

1. achieve a classified student status, i.e., a conditionally admitted student must meet the admission conditions specified in the student’s admission letter;
2. complete all course requirements leading up to the culminating experience courses, as listed below.
3. complete 33 semester units of 200-level courses with a cumulative GPA of 3.0 or better. At least 24 units must be 200-level Computer Engineering courses. Undergraduate coursework does not count towards the master’s degree. Students may enhance their degree by adding internships (CMPE 298i) to their plan of study.
**Culminating Experience (Plan A or Plan B)**
All students must complete one of the following culminating experiences: thesis or project. Theses and projects are completed under the supervision of an advisor.

**Plan A (Thesis)**
A master's thesis includes original research on a topic approved by the thesis committee and must meet university requirements as stipulated in this catalog and in the [SJSU Master's Thesis and Doctoral Dissertation Guidelines](https://www.sjsu.edu/~gradprog/mast_diss.pdf). It undergoes a thorough review and revision process under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee.

**Plan B (Project)**
A master's project is a research or development effort performed by a team of students on a topic chosen by mutual agreement between an advisor and the team. The choice of project topic is also approved by the Graduate Advisor. At the end of CMPE 295B, a project report is submitted for department review, and students present their project work in a department project exposition.

**Graduation Writing Assessment Requirement**
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

This requirement is satisfied by passing CMPE 294 or ENGR 100W

CMPE 295A. Master Project I ................................................................. 3
CMPE 295B. Master Project II ............................................................... 3

Total Units Required 30
Elective courses must be planned in consultation with the Graduate Advisor.
The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.
Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
MS - Software Engineering

The MSSE program provides students with an educational experience that builds on traditional computer science and engineering and takes an integrative approach to software engineering. The program integrates the forces shaping software development, including emerging technologies, with the understanding of rapidly changing technologies and architectures and their influence on software engineering processes, where large-scale design is pre-eminent, service and component integration is the standard mode of development, and there is increased globalization of the software development workforce.

The program offers specializations in Enterprise Software Technologies, Cloud Computing and Virtualization, Software Systems Engineering, Data Science, Cybersecurity and Networking Software.

Class schedules are designed for the convenience of employed engineers who wish to pursue graduate work on a part-time basis.

The MSSE Program welcomes students with undergraduate degrees in other engineering or science disciplines.

For more information, visit msse.sjsu.edu.

Educational Objectives of the Graduate Program

To provide MSSE graduates with the ability to

1. Acquire advanced knowledge of the practice of software engineering, from vision to analysis, design, validation, and deployment;
2. Tackle complex engineering problems and tasks, using contemporary engineering principles, methodologies, and tools;
3. Demonstrate leadership and the ability to participate in teamwork in an environment with different disciplines of engineering, science, and business;
4. Understand the ethical, economic, and environmental implications of their work, as appropriate;
5. Advance successfully in the engineering profession and sustain a process of life-long learning in engineer or other professional areas; and
6. Communicate effectively in both oral and written forms.

Admissions Requirements

Candidates must meet all university admissions requirements. Applicants can be admitted in either classified or conditionally classified standing. If an applicant’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, the conditions will include taking preparatory courses to meet these requirements. Such courses will not count as part of the master’s degree program requirements.

Applicants may be considered for admission with conditionally classified standing if they have a BS degree in any engineering or science discipline from an accredited institution. Students with conditionally classified standing will take a series of core programming courses based on their evaluation by the MSSE Graduate Advisor.

To achieve classified standing, an applicant must possess a BSSE or BSCS degree from an accredited institution with a grade point average of 3.0 or better in the last 60 semester units.

The admission letter will explain required coursework, terms and conditions for removing deficiencies and attaining classified standing.

GRE scores must be submitted if an applicant’s bachelor’s degree is not from an ABET-accredited U.S. university. (Under some circumstances, applicants are eligible for a waiver of the GRE test requirement. Descriptions of the minimum GRE scores acceptable for admission and the conditions for waiver are listed on the msse.sjsu.edu admissions webpage. In addition, applicants who do not possess a degree from a US university must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Requirements for Advancement to Graduate Candidacy

Students may advance to candidacy after completing all prerequisites assigned during admissions, the degree core courses, specialization courses, and the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. MSSE program course requirements and the links to specialization course requirements are listed at msse.sjsu.edu.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.
MS - Software Engineering Graduation Requirements

The Computer Engineering Department offers courses designed to provide a flexible curriculum structure that allows students to follow a course of study to meet their individual career goals. As shown below, the program consists of 30 semester units of 200-level courses with a cumulative GPA of 3.0 or better. At least 24 units must be 200-level software engineering courses, and undergraduate coursework does not count towards the master’s degree unless approved by the MSSE Graduate Advisor. A detailed description of elective class requirements can be found at msse.sjsu.edu. Students may further their degree by adding internships (CMPE 298I) to their plan of study.

Culminating Experience (Plan A or Plan B)
All students must complete one of the following culminating experiences: thesis or project. Theses and projects are completed under the supervision of an advisor.

Plan A (Thesis)
A master’s thesis includes original research on a topic approved by the thesis committee and must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It undergoes a thorough review and revision process under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee.

Plan B (Project)
A master’s project is a research or development effort performed by a team of students on a topic chosen by mutual agreement between an advisor and the team. The choice of project topic is also approved by the Graduate Advisor. At the end of CMPE 295B, a project report is submitted for department review, and students present their project work in a department project exposition.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

This requirement is satisfied by passing CMPE 295W or ENGR 200W.

Introduction
Computer science is all about algorithms: inventing, testing, debugging and improving algorithms that might control a robot’s brain, encrypt a stock trade, even simulate an ecosystem. Our bachelor’s degree, accredited by the Computing Accreditation Commission of ABET, http://www.abet.org, provides a solid foundation in the basic theories that underpin computer software technology. For those who wish to pursue more advanced studies, our master’s degree program offers convenient late afternoon and evening classes. Our prime Silicon Valley location fosters high-tech employment opportunities for our graduates, who currently make up a significant portion of the area’s programmers, software architects, system analysts and computer scientists.

Honors Program in Computer Science
The requirements for computer science majors to graduate with departmental honors are: (1) at least a 3.0 G.P.A. overall, (2) at least a 3.5 G.P.A. in the major, (3) Completion of CS 180H (Individual Studies for Honors).

Minimum Grade Requirement
A grade of “C-” or better is required for courses being used to meet any requirement in any minor or major offered by the Department of Computer Science, including support courses.
**BS - Computer Science**

This degree provides a solid background for a variety of careers in the computing profession. Entry level positions include jobs in programming, systems analysis, software engineering and customer support. Such positions are required by nearly every institution whether it is public or private. The Computer Science Program is accredited by the Computing Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD, 21202-4012, 410.347.7700. The program not only prepares students for graduate work in computer science, but also for advanced work in the related fields of management science and operations research.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

**Major Exceptions**

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

**Major-Specific Graduation Requirements**

A grade of “C-” or better is required for courses being used to meet any requirement in any minor or major offered by the Department of Computer Science, including Preparation courses.

The Preparation for the Major and Requirements in the Major sections must include at least 37 units of upper division mathematics and computer science course work, excluding CS 100W.

Total Units Required: 120
Minor - Computer Science

At least 12 of units must be distinct from the student’s major. At least three units of upper division coursework must be completed in the Computer Science Department at SJSU. Students are expected to have satisfied the prerequisites for any of the courses taken to fulfill the requirements for the Computer Science Minor. A grade of “C-” or better is required for courses being used to meet any requirement in the minor.

University Graduation Requirements
To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Total Units Required 9
MS - Bioinformatics

The MS Bioinformatics features an interdisciplinary curriculum in bioinformatics, biology, computer science and mathematics. Questions in many areas of biology, including genomics, molecular biology, neuroscience, physiology, microbiology, ecology and evolution, must now be answered using mathematical and computational methods. New techniques allow the acquisition of many thousands or millions of biological measurements, and the field of bioinformatics has developed to address this need. The MS Bioinformatics program will provide students with an understanding of biological questions, a background in mathematics, and the computational skills necessary to address complex problems in the biological sciences. Students will also gain experience utilizing these skills to answer biological questions, including those with biomedical applications. The goal of the MS in Bioinformatics program is to prepare students for careers in the growing field of bioinformatics both in academia and in the biotechnology industry.

For more information, please visit [http://www.sjsu.edu/cs/programs/ms_bioinformatics](http://www.sjsu.edu/cs/programs/ms_bioinformatics)

Admissions Requirements

University Admission

Candidates must apply through the CSU admissions portal, [Cal State Apply](http://www.calstateapply.org), and meet all university admissions requirements. Applicants will need to apply separately to the university to obtain approval for university-level admission and to the department to obtain admission into the MS in Bioinformatics.

Applicants from countries in which the native language is not English or from countries with multiple native languages including English, must submit TOEFL scores. Minimum TOEFL scores acceptable for admission are 250 (Computer Based), 100 (Internet Based). Additional information about the TOEFL is given on the university webpage: [Graduate Program Test Requirement](http://www.sjsu.edu/graduate/careers/admissions/).

Admission to the Program

Candidates must meet all the university admissions requirements. Students can be admitted in either classified or conditionally classified standing. To be admitted to classified standing, applicants must have a Bachelor’s degree from an accredited college or university in the biological or computational sciences or in engineering, a minimum GPA of 3.0 on a 4.0 scale, and completion of all program prerequisites listed on the admission requirements webpage. Two letters of recommendation from academic instructors or advisors are also required. Currently, GRE exam results are not required.

To enter this program with classified standing, a student must have a minimum 3.0 GPA in the last 60 units of required degree course work and have completed each of the following courses with a grade of “C” or better:

- Biol 30 / Principles of Biology I (4 units)
- Biol 31 / Principles of Biology II (4 units)
- Biol 115 / General Genetics (4 units)
- CS 22A / Python Programming for Non-Majors I (3 units)
- CS 22B / Python Programming for Non-Majors II (3 units)
- Math 30 / Calculus I (3 units)
- Math 31 / Calculus II (4 units)
- Math 161A / Applied Probability and Statistics I (3 units)
- or equivalent courses

Students who meet the minimum university admission requirements can be conditionally classified if there is sufficient space in the program to accommodate them. Conditionally classified students will be required to complete undergraduate course work and prerequisite coursework (listed in “Requirements for Admission to Classified Standing”), as directed by the graduate coordinators.

Requirements for Advancement to Candidacy

To be admitted to candidacy for the MS degree, a student must meet the university requirements for advancement to candidacy for the master’s degree as outlined in the Graduate Policies and Procedures section of this catalog. University requirements include completion of 9 letter graded units with a GPA of at least 3.0 and satisfaction of the [Graduation Writing Assessment Requirement](http://www.sjsu.edu/graduate/careers/admissions/). The GWAR is met in this program by a “B” grade in CS 200W.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, CPA, and culminating experience requirements as outlined in the [Graduation Requirements](http://www.sjsu.edu/graduate/policies/).
Culminating Experience

Plan B (Project)

MS in Bioinformatics students will complete a written project as their culminating project. The project requires two consecutive semesters of enrollment in the 3-unit BIOL 298, CS 298B or MATH 298. Students not completing the project in one semester will be required to enroll in three additional units each semester until the project is completed. The student is responsible for identifying a project topic and for securing the commitment of a full-time tenured or tenure-track faculty member who agrees to serve as the project advisor. The student must also secure the commitments of two additional university faculty members, one of whom must be a full-time tenured or tenure-track faculty member, to serve as the student’s project committee. Topics and committee selections must be approved by the Bioinformatics Graduate Coordinator. The project requires writing a manuscript describing original bioinformatics research and formatted for publication in a professional journal. It must be approved by the student’s committee.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html). This requirement is satisfied by taking CS 200W

</tbody>
</table>

Total Units Required

Elective courses must be planned in consultation with one of the Graduate Coordinators. The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 12.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of at least 3.0 in order to graduate.
MS - Computer Science

The Master of Science in Computer Science degree provides greater depth in computer science for more advanced positions in industry or teaching at the community college level. Check the Department website for details at http://www.sjsu.edu/cs/programs/mscs.

Admissions Requirements

University Admissions

Applicants must submit a complete graduate application by applying through Cal State Apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the Computer Science program. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

To enter this program with classified standing, a student must meet the minimum requirements for admission to the Graduate Division. In addition, entering students are expected to have a bachelor’s degree in computer science or its equivalent, e.g., a degree presenting at least the breadth and depth of the SJSU BS, Computer Science program. An applicant holding a recent bachelor’s degree in Computer Science from an ABET-accredited university will normally meet the course requirements for admission to the MSCS program.

Requirements for Admission to Conditionally Classified Standing

Applicants who meet the minimum requirements for admission to the Graduate Division but lack other prerequisite course knowledge can be admitted in conditionally classified status if there is sufficient space in the program to accommodate them. Conditionally classified students will be required to complete undergraduate coursework to attain Classified standing. The individual admission notification will explain required terms and conditions for attaining Classified standing.

Transfer of Courses into the Major

Students may transfer nine credits into the program from coursework completed in the SJSU Computer Science Department. A maximum of 6 units may be from courses outside the SJSU Computer Science Department. All transfer credit must fulfill MS, Computer Science program requirements and be approved by the Graduate Coordinator.

Requirements for Advancement to Graduate Candidacy

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. The Computer Science Department policy is that students should complete the GWAR requirement (usually by taking CS 200W) in their first year in the MS program and must complete it two semesters before graduation. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Culminating Experience

Students choose a Plan A (Thesis) or Plan B (Written Project) option as their program culminating experience.

Plan A (Thesis)

After being admitted to candidacy, the student choosing the thesis option must obtain a thesis director from among the tenured or tenure-track faculty of the Computer Science Department who then becomes his or her advisor. Before work can begin, the thesis topic must be approved by a three-member committee consisting of the thesis director, another professor from the CS Department, and a third member who is an expert in the field, selected by the thesis director and approved by the Department Chairperson. The candidate should register for the CS 297, Preparation for Writing Project or Thesis before the final semester, and take CS 299, Master’s Thesis in the final semester of the program. Students who do not finish the thesis in that semester enroll in the 290R for subsequent semesters until it is completed. Upon completion of the thesis, the candidate must pass a comprehensive oral examination in the area of his or her thesis and conducted by the thesis committee. The thesis must also meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines.
Plan B (Written Project)
After being admitted to candidacy, the student must obtain a project director from the Computer Science Department who then becomes his or her advisor. Before work can begin, the project topic must be approved by a three-member committee consisting of the project director, another professor from the CS Department, and a third member who is an expert in the field, selected by the thesis director and approved by the Department Chairperson. The candidate should register for the CS 297, Preparation for Writing Project or Thesis before the final semester, and take the CS 298, Master’s Writing Project in the final semester of the program. Students who do not finish the project in that semester enroll in the 2290R for subsequent semesters until it is completed. Upon completion of the project, the candidate must pass an oral examination in the area of his or her project conducted by the project committee.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html

This requirement is satisfied by taking CS 200W

Variable topic courses may be repeated for up to 6 units.
### Electives

Select 6 units of permissible elective courses from the department list. Courses not on the list must be approved in advance by a Graduate Coordinator.

Electives may include three units from:

- CS 180. Individual Studies ................................................................. 1-3
- CS 280. Graduate Individual Studies ..................................................... 1-3

### Culminating Experience

Complete one option (Plan A or Plan B)

#### Plan A (Thesis)

- CS 297. Preparation for Writing Project or Thesis ..................................... 3
- CS 299. Master’s Thesis ........................................................................ 3

Comprehensive Oral Examination

#### Plan B (Project)

- CS 297. Preparation for Writing Project or Thesis ..................................... 3
- CS 298. Master’s Writing Project............................................................ 3

Comprehensive Oral Examination

### Total Units Required

33

No more than 6 units may be taken from outside the Department of Computer Science.

Elective courses must be planned in consultation with a CS Graduate Advisor or your CS Thesis or CS Writing Project advisor.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
Connie L. Lurie College of Education

SWEENEY HALL
(408) 924-3600
luriecollege@sjsu.edu
http://www.sjsu.edu/education/

Introduction
The Connie L. Lurie College of Education is a professional community of students, faculty and staff engaged in supportive partnerships to serve a community of culturally diverse children, youth and families by pursuing and promoting scholarly and reflective inquiry, and access to a quality lifelong education. Faculty, staff and graduates are compassionate and ethical professionals who are mindful of our responsibilities in a democratic society. The College’s core values are excellence and equity. Excellence is manifested in the rigor of our academic programs, in our teacher/scholar faculty contributions, and in the high level of staff service. We challenge our students to strive for excellence in their academic and personal pursuits, as informed and active citizens in their own communities. To achieve equity, our students, faculty, and staff continuously work for social justice and educational opportunities for all members of our society.

The college offers Bachelor’s and Master’s degrees, a doctoral program, and numerous professional teaching credentials. Programs are offered through seven academic departments which are supplemented by a variety of resources including the Armstead Center for Communication Disorders and the Child Development Laboratory Preschool. The college, housed in William Sweeney Hall, offers two computer laboratories that are open to both undergraduate and graduate students. Students also have access to other high tech education applications.

Student Service Centers
The Kay A. Armstead Center for Communication Disorders provides speech-language-hearing evaluations and therapy services and to students, staff, faculty, and the local San Jose community.

The Child Development Laboratory Preschool is housed in two locations on the SJSU campus, including toddler and pre-school labs. These programs provide undergraduates with both observation and hands-on clinical/practicum opportunities.

The Credentials Office and Student Services Center in Sweeney Hall 108 provides students with information about the California Basic Education Skills Test (CBEST), California Subject Examinations for Teachers (CSET), and Reading Instruction Competence Assessment (RICA). General information on elementary (Multiple Subject), secondary (Single Subject) and special education (Education Specialist) teaching credentials, as well as other service credentials and certificate programs are provided.

Advisement
Advising and information related to applications are handled through the six academic departments and the Ed.D. program.

These departments include Child and Adolescent Development, Communicative Disorders and Sciences, Counselor Education, Educational Leadership, Teacher Education (formerly Elementary Education and Secondary Education).

Curricula
⦁ BA, Creative Arts
⦁ Minor, Creative Arts

Introduction
Founded in 1956, the innovative Creative Arts Program is the only interdisciplinary arts and creativity studies program in the CSU. The program offers a flexible, interdisciplinary curriculum that examines creativity across the arts domains and emphasizes both creative and critical thinking. Students take core courses in creative arts in combination with art, English, comparative literature, music, dance, radio, film, and theatre courses, individualizing their program of study. We offer a major and a minor in Creative Arts. Key to the Program is an emphasis on creative thinking and the creative process—as a result, our students become effective thinkers and problem-solvers. Our graduates go on to become successful visual and performing artists, teachers, arts administrators, activists, software developers, software engineers, physicians, writers, sound recording engineers, costume designers, arts therapists, librarians, lawyers, and entrepreneurs.
### BA - Creative Arts

**Advisor:** Shannon Rose Riley. M.F.A., Ph.D.  

**University Graduation Requirements**
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

**4-Year Program Roadmap**
Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).  

**Major-Specific Graduation Requirements**
The following Required Major courses must be completed with a grade of “C-” or better: CA 172, CA 173, CA 175, CA 176 and CA 178.

Curricula
⦁ BA, Dance
⦁ BFA, Dance
⦁ Minor, Dance

Introduction
Located in the heart of Silicon Valley, SJSU’s School of Music and Dance is a recognized leader in the performing arts. Accredited by the National Association of Schools of Music (NASM), the National Association of Schools of Dance (NASD), the National Council of Accreditation of Teacher Education (NCATE), and the California Commission on Teacher Credentialing (CCTC), the school produces some of the finest music teachers, composers, and performers in the world. Our curriculum includes courses in composition, performance, music systems and theory, choreography (for dancers), technology, pedagogy, and improvisation. Student performance organizations include, among others, the Choraliers, the Jazz Orchestra, the Opera Theater, The Wind Ensemble, the Symphony Orchestra, and the Spartan Marching Band. Our dance program features a student performing company, UDT, directed by faculty and distinguished guest choreographers. Our music education program produces some of California’s leading educators, scholars, and administrators, and our certified music teacher graduates are in particularly high demand.

Curricula
⦁ BA, Design Studies
⦁ BS, Industrial Design
⦁ BFA, Art, Animation/Illustration
⦁ BFA, Graphic Design
⦁ BFA, Interior Design
⦁ Minor, Graphic Design
⦁ Minor, Interior Design

Introduction
Our Department is one of a very few public schools in the State that offer complete education in Animation/Illustration, Graphic Design, Industrial Design, and Interior Design in a single entity. Accredited by the National Association of Schools of Art and Design (NASAD), all the design programs at SJSU have an excellent reputation in their respective disciplines and the resulting dynamic adds up to the strongest center of design education in the CSU and one of the strongest in California.

We offer undergraduate degrees in animation and illustration, graphic design, interior design and industrial design as well as a BA in Design studies. Our comprehensive curriculum provides current, innovative training in the practice and theory of design in a broad spectrum of fields and specializations, preparing students conceptually and practically for a variety of careers.
BA - Design Studies

The BA, Design Studies provides students with broad exposure to design principles, history, and theory. In addition to receiving a foundation through core courses, students tailor their studies by focusing on one of the areas of specialization described below. Students may be admitted to the BFA in Interior Design or BFA in Graphic Design or the BS in Industrial Design on a space available basis after successfully completing required portfolio reviews.

PLEASE NOTE: Admission to the BFA in Graphic Design is determined at the time students apply for admission to the university. There is no internal transfer into the BFA Animation and Illustration. Animation/Illustration: Students who were admitted as BFA Animation/Illustration and did not pass portfolio review will continue as BA-Design Studies majors with a specialization in Animation/Illustration.

- Graphic Design: Provides a basic understanding of the aesthetic and technical skills needed for graphic design. Students wishing to pursue a BFA in Graphic Design, which would encompass exposure to a wider range of design disciplines, must pass portfolio review. Students should consult with a major advisor about the portfolio review process and deadlines at the time they enter SJSU.
- Industrial Design: Provides basic knowledge of 3D computer-aided design, materials and manufacturing, prototyping, and team-based theory. Students will have a basic preparation for jobs in computer-aided design support and model making, or be prepared to apply to a graduate program in Industrial Design or other areas. Students who wish to pursue the BS Industrial Design must pass portfolio review. Students should consult with a major advisor about the portfolio review process and deadlines at the time they enter SJSU.
- Interior Design: Provides a basic understanding of the aesthetic and technical skills needed for interior design. Students wishing to pursue a BFA in Interior Design, which would encompass exposure to a wider range of design disciplines, must pass portfolio review. Students should consult with a major advisor about the portfolio review process and deadlines at the time they enter SJSU.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

- 120
Professional Design Programs

The Department of Design offers professional programs in Animation/Illustration, Graphic, Industrial, and Interior Design. The curricula of the four programs combine the aesthetic sensitivity and technical knowledge necessary to function creatively in design, business and industry. Internships in design offices are integral to all four programs.

Admission Requirements for Animation/Illustration, Graphic, Industrial, and Interior Design

1. Meet university admission requirements; attain upper division standing by completing 60 transferable semester units or 90 transferable quarter units prior to enrollment.
2. Admission to the BFA in Animation and Illustration is determined at the time students apply for admission to the university. There is no internal transfer into this program. Students admitted to the BA Art Concentration in Design Studies may be admitted to the BFA in Graphic or Interior Design or the BS in Industrial Design on a space available basis after successfully completing required portfolio reviews in their first two years of study.

Portfolio reviews are held each semester for the following semester. Instructions are available in the Design department office. The following courses, or in some cases, their equivalent at another college via advisor approval, are required as preparation for the portfolio review:

- Animation/Illustration: ANI 10, 11, 13, 21, 31, 71, 101, 111, 121
- Graphic Design: ANI 11, DSGD 063, 083, 099, 100, 104.
- Industrial Design: DSID 021, DSID 022, DSID 031, DSID 032, DSID 032A.
- Interior Design: DSIT 005, 010, 029, 033, 034, 083, 102, and 103.
**BS - Industrial Design**

The Bachelor of Science Industrial Design (BSID) program prepares students for a career in industrial design through a curriculum in design studio, theory and skill classes supported by courses and content in technology, business, science, the arts and humanities. Emphasis is placed on critical thinking, creative design process management, aesthetic theory, communication skills and awareness of business as well as humanistic dimensions of product development. The program draws upon extensive resources of local and internationally prominent design firms and alumni. It emphasizes exposure to professional practice. Studio projects provide experience with a diverse spectrum of products, user scenarios, and industries, leading to a comprehensive professional portfolio. The Industrial Design Program is on the list of schools approved by the Industrial Designers Society of America (IDSA) and is accredited by National Association of Schools of Art & Design (NASAD).

Upon successful completion of the first year of study as a BA, Art Concentration in Design Studies, students can elect to participate in the BSID Portfolio Review. This review evaluates a student’s demonstrated ability and successful candidates are accepted into the BSID major. The subsequent years of study in the BSID major are highly structured and require passing three annual portfolio courses: DSID 123A, DSID 125A, DSID 128A.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

**Major Exceptions**

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

**Core Lower Division General Education**

Of the 39 units required by the university, 18 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

**Upper Division General Education**

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

**American Institutions**

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

BFA - Art, Concentration in Animation/Illustration

The award-winning Animation/Illustration program is committed to providing a world-class education at an affordable price, preparing students for careers in feature film animation, games, television and any other media that uses animation and storytelling as a core communication tool. Industry professionals and peer educators rank SJSU Animation/Illustration among the best in the nation. The core curriculum combines both traditional and innovative educational strategies. Rigorous drawing classes and intensive study of color theory, design, perspective, and conventional and digital painting are required, as well as the study of the principles of both traditional and 3-D animation, physics of motion, modeling, storyboarding, character design, and visual development. Upper-division classes further define these disciplines offering students an opportunity to specialize in their area of choice.

All students must pass a milestone portfolio review to remain in the BFA program. Students who were admitted as BFA Animation/Illustration and do not pass portfolio review will be changed to BA - Design Studies majors with a specialization in Animation/Illustration. This specialization provides instruction in A/F foundation skills, supplemented by studies in design, film, photography, and theater arts. Students receive basic preparation for entry-level jobs in the entertainment industry; optionally, they can later apply to a graduate program in Animation, Illustration or similar fields of study.

The BFA in Animation/Illustration is a highly impacted major. This means that the number of students who meet the qualifications far exceeds the number of spaces available in the program. Students interested in an impacted major must apply for admission during the initial filing period for admission in the fall. Applications for admission to impacted majors are not accepted after the initial filing period.

University Graduation Requirements

- Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

University Graduation Requirements

### Core Lower Division General Education

- Of the 39 units required by the university, 12 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

### Upper Division General Education

- Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

BFA - Graphic Design

The BFA Graphic Design program prepares students for intellectually and aesthetically challenging careers in Graphic Design. Preparation involves both theoretical and practical study with emphasis on typography, form and image, information architecture, experience design and interactive design. Admission to the BFA Graphic Design program is by portfolio review, which takes place after completing preliminary course work. After admission, passage of portfolio reviews conducted at the end of each semester are required to continue to advance through the BFA GD program. All students are required to complete a professional internship. In addition to the regular curriculum, students have the opportunity to attend special classes and workshops led by studio professionals and faculty members.

Students must pass a milestone portfolio review to remain in the BFA program. Students who do not pass the review will be changed to the BA-Art with a concentration in Design Studies.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

BFA - Interior Design

Students majoring in interior design draw upon a wide range of university and Bay Area community resources to prepare for professional careers in both the private and public sectors in areas such as corporate, hospitality, institutional, office and retail planning and design. Preparation involves both theoretical and practical study of interior architecture with emphasis on critical thinking, communication skills, design process, merging technologies, human factors, aesthetic sensibilities, laws, codes and regulations, and professional ethics. A portfolio review is required for this program. All students in the Interior Design Program are required to complete a 1 unit professional internship as part of their degree requirements.

San José State University is an accredited institutional member of the National Association of Schools of Art and Design (NASAD), which is recognized by both the California Council for Interior Design Certification (CCIDC) and the National Council for Interior Design Qualification (NCIDQ).

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Introduction

The Donald and Sally Lucas College and Graduate School of Business is the institution of opportunity, providing innovative business education and research for the Silicon Valley region and beyond since 1928. The College offers an accessible, high value education that empowers people of all ages and backgrounds to transform their lives. Faculty and staff are strongly committed to the College’s mission; maintain a collegial, inclusive teaching and learning environment; and are dedicated to continuous improvement in all areas of academic achievement, scholarship, teaching and service.

The college is an active member of the San José and Silicon Valley community and provides a talent pool, thought leadership and service that supports the region’s growth in the global marketplace. The college is one of the 755 institutions worldwide that are accredited by the prestigious AACSB International, the Association to Advance Collegiate Schools of Business. In addition, the college is accredited by the Western Association of Schools and Colleges and the California State Board of Education.

The college is dedicated to equipping graduates with the tools, work ethic and skills to succeed in the ever-changing global economy. This is accomplished through a challenging undergraduate curriculum and an innovative, high quality graduate education in the Donald and Sally Lucas Graduate School of Business.

Undergraduate Business Education

The college provides a rich undergraduate education through five departments and schools – Accounting and Finance, Information Systems and Technology, Management, Global Innovation and Leadership, and Marketing and Decision Sciences. Infused throughout the undergraduate program are opportunities to develop competencies in a number of key areas – communication, teamwork, global perspectives, critical thinking, ethics, entrepreneurship, community service, and innovation. The rigorous and challenging curriculum prepares graduates to be future leaders that succeed in the global economy.

The college is building upon its existing expertise in entrepreneurship, management, global finance, accounting, and leadership and organizational change. In addition, the college showcases the best and brightest students through the Gary J. Sbona Honors Program and the Thompson Global Internship Program.

Jack Holland Student Success Center (Formerly BSAC)

The Jack Holland Student Success Center, located on the garden level of the Boccardo Business Center, provides advice to students about undergraduate business courses and programs. Prospective students are encouraged to talk with advisors about requirements for business major and general education courses. Prospective graduate students are encouraged to meet a graduate advisor in the Graduate Program Office in the Business Tower.

Business Tutoring Center

The Tutoring Center gives individual and group assistance to business students seeking subject matter tutoring. It is located on the ground level of the Boccardo Business Center.

Donald and Sally Lucas Graduate School of Business

The Donald and Sally Lucas Graduate School of Business offers a high-value education with a global focus, innovative programs, and deep ties to Silicon Valley corporations and leaders. Our distinguished faculty provide a relevant business education focusing on excellence in teaching and applied research and serving the needs of diverse students from the Silicon Valley and beyond.

We offer an on-campus Early Career MBA program with three tracks: accelerated (12 months), full-time (21-24 months), and part-time (33-36 months). Our off-campus MBA for Professionals is a flexible part-time program suitable for working professionals who set their own paces. We also offer Master of Science in Accountancy, Master of Science in Taxation, Master of Science in Transportation Management programs and a dual degree MBA/Master of Science in Software Engineering or MBA/Master of Science in Engineering with a specialization in Systems Engineering.

Curricula
⦁ BA, Economics
⦁ BS, Economics
⦁ Minor, Economics
⦁ MA, Economics
⦁ MA, Economics, Concentration in Applied Economics

Introduction
Economics stresses the role of markets and institutions on business, political and socioeconomic outcomes. By emphasizing applied economics, the program encourages majors to hone their strategic thinking skills, learn to anticipate the unintended consequences of actions, and engage in consequential thinking about changes over time. By stressing oral and written communication and statistical analysis, the program encourages majors to acquire the skills necessary to communicate ideas. Economics graduates use economic tools to evaluate and pose reasoned solutions to multi-faceted, complex problems, as a result, they are in high demand in any field where decision making and reasoning are emphasized. Our bachelor’s degree is an excellent springboard to an MBA or law degree. Our master’s program prepares graduates for research and policy positions in government and business. Although we emphasize applied economics, we also provide students with the rigorous preparation necessary to pursue doctorates in economics.

Honors Program in Economics
To graduate with Economics Department honors student must have an overall GPA of 3.2, a GPA of 3.5 for all upper division economics courses. For more information, and to apply for honors, please consult the Economics Department web site.
BA - Economics

A general and flexible program to allow for a variety of student objectives.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses required in the major (Core, Area Courses, and major electives) must be completed with a minimum grade of "C-".

</tr>
</tbody>
</table>

Core Lower Division General Education

Of the 39 units required by the university, 18 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Graduate Programs Admission

Requirements for Admission with Classified Standing
Applicants must first meet the requirements for admission to the university. Additionally, applicants should possess an undergraduate grade point average of "B" or better. Bachelor degrees in fields other than economics are acceptable and welcomed. Admission to the program with classified standing, however, requires preparation in Intermediate Microeconomic and Intermediate Macroeconomic theory, one other upper division economics course, statistics, and proficiency in linear algebra and calculus. This coursework must be satisfactory (grades of "B" or better).

Requirements for Admission with Conditionally Classified Standing
Applicants who do not meet the Department’s requirements for admission with classified standing, may be admitted into the program with conditionally classified standing if he or she has demonstrated an interest in and an ability to master economic analysis. Conditional standing requires students to complete specific courses to correct the deficiencies as listed by the graduate advisor on the admission notification. Prerequisites can be completed at SJSU, but must be taken before commencing graduate level classes. Upon completing these requirements the student must then petition for a change in status to classified standing.

Requirements for Admission to Candidacy for the MA - Economics
To be admitted to candidacy for the Master of Arts degree, a student must first meet the university requirements for the degree as stated in the Academic Regulations section of this catalog. Also, a candidate:

1. Must have at least a 3.0 ("B") average in nine semester hours of approved San José State University courses in economics at the 100- or 200-level.
2. Must obtain approval of a formal master's degree program from the departmental graduate advisor and from the University Graduate Committee.
3. Must have successfully completed the Graduation Writing Assessment Requirement (GWAR). The University requires that all graduate students complete the GWAR as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Graduate Theory Grade Requirement
All master’s degree students must complete a microeconomic theory course (ECON 201) and macroeconomic theory or monetary theory course (ECON 202 or 235, if required) with a grade of "B" or better. All 100-level courses must be completed with a “B” or better. Students must file for candidacy before taking the comprehensive examination. Policies concerning Probation and Disqualification are available online and in the Economics Office.

Undergraduate Course Grade Requirement
Master's degree students may count a limited number of 100-level undergraduate courses as approved electives; however, these courses must be completed with a grade of "B" or better and must be approved in advance by a department graduate advisor. Students earning less than a "B" in any of these classes are allowed one attempt to retake and achieve the minimum grade. Policies concerning Probation and Disqualification are available online and in the Department of Economics Office.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

In consultation with the department graduate coordinator, the candidate will develop and pursue a program of study. The candidate must successfully complete all requirements of the selected plan including the course work specified in the Master’s Degree Approval Program. At an appropriate time, and with the assistance of the graduate advisor, the student chooses a proposed Master’s degree program and Plan A or Plan B culminating experience as outlined below.
MA - Economics

Culminating Experience

Plan A (Thesis)

The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate's thesis committee chair with the assistance of the thesis committee. It is the candidate's responsibility to find an Economics Faculty member to Chair the thesis committee, and work with the Chair to determine the other members of the committee and the thesis topic.

Plan B (Comprehensive Examination)

Most students complete a final written examination not a thesis. The comprehensive exam covers three subjects: microeconomic theory, macroeconomic/monetary theory or Econometrics, and applied economics. Students register once, for one unit of ECON 298E in the semester they plan to take the examination. Students can take the exam a total of three times. Policies concerning Probation and Disqualification for failure to complete the exam are available online and in the Economics Office.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

This requirement is satisfied by passing ECON 205.

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 12.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.
MA - Economics, Concentration in Applied Economics

Culminating Experience
Plan B (Comprehensive Examination)

Most students complete a final written comprehensive examination. The exam covers three subjects: microeconomic theory, macroeconomic/monetary theory or Econometrics, and applied economics. Students register once for one unit of ECON 298E in the semester they plan to take the examination. Students not passing the exam may take it a total of three times. Policies concerning Probation and Disqualification for failure to complete the exam are available online and in the Economics Office.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

This requirement is satisfied by passing ECON 205.

⦁ MA, Education, Concentration in Speech Pathology

Introduction
The mission of the Department of Communicative Disorders and Sciences is to provide rigorous academic and clinical preparation for students seeking careers working with individuals with communication disorders, and their families. One of the first Communicative Disorders and Sciences programs in California, the department has prepared students for careers as speech-language pathologists and audiologists for more than 40 years. Speech-language pathologists identify, evaluate and treat children and adults with speech-language, cognitive-communicative, and swallowing disorders. Audiologists diagnose and treat individuals with hearing or balance disorders. Our academic and pre-clinical undergraduate curriculum provides the basis for further graduate study, required for a career in either field. Our Master’s Degree in Education with a concentration in Speech Pathology is accredited by the Council on Academic Accreditation of the American Speech-Language and Hearing Association. Both members of the SJSU community and the larger community receive speech-language and hearing services at the Kay Armstead Center for Communication Disorders (Sweeney Hall 118B).
# BA - Communicative Disorders and Sciences

## University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

Communicative Disorders and Science courses are only offered once per year. That means that students begin CDS courses in Fall semesters only, as Spring semester courses cannot be taken without having completed the Fall semester prerequisites.

MA - Education, Concentration in Speech Pathology

The Department of Communicative Disorders and Sciences (CD&S) Master’s degree program offers an in-depth study of communication disorders with an emphasis on articulation and phonological disorders, fluency disorders (stuttering), augmentative and alternative communication, voice disorders, dysphagia (swallowing disorders), neurogenic disorders, hearing disorders, language disorders, social aspects of communication, and cognitive communication disorders. Courses and clinical training opportunities place a high priority on assessment and intervention within an evidence-based, ethical, and multicultural framework. Clinical practica are completed in varied settings, including the Kay Armstead Center for Communication Disorders housed in the department. Students have clinical opportunities for working with infants, toddlers, children, adolescents, and adults in multiple settings, including public, private and charter schools (preschool, elementary, middle, high schools), rehabilitation agencies, private practices, skilled nursing facilities, and hospitals.

Detailed information about the program can be found on the department website: http://www.sjsu.edu/cds/Programs/ma/

Admissions Requirements
Applicants must meet all university admission requirements. The university-level graduate application is separate from the application you send to the department. You will need to apply separately to the university to obtain approval for university-level admission and to the department to obtain admission into Master of Arts in Education with a concentration in Speech Pathology. Depending on their level of preparation, students can be admitted in either classified or conditionally classified standing. Minimum requirements for admission in classified standing are a completed bachelor’s degree or post-baccalaureate program in communication disorders. An applicant holding a bachelor’s degree in another field of study may be admitted with conditionally classified standing. The admissions letter will detail the preparatory coursework required for advancing to classified standing in the program. Additional requirements for international students are listed below.

Admission to the Department
Applicants who meet the following criteria beyond university requirements will be considered for classified admission into Department of Communicative Disorders and Sciences. The department admission process requires three (3) application processes and nine (9) tasks:

1. Via Communication Sciences and Disorders Centralized Application Service (CSDCAS)
   a. Official Transcripts (3.0 minimum GPA)
   b. Essay(reasons for pursuing Speech-Language Pathology; reasons for San Jose State University; personal qualities; any additional information)
   c. Graduate Record Exam (CRE) Score. Minimum CRE score requirements can be found on the Graduate Program Test Requirement webpage at GAPE.
   d. Three Letters of Recommendation
   e. Transcript Evaluation Report (for International Students)

2. Via the San Jose State University Office of Applications and Program Evaluation (GAPE)
   f. Official Transcripts
   g. English-Language Skills Verification

3. Via the Departmental Office
   h. CBEST Scores
      A minimum scaled score of 41 in each of three sections (reading, writing, mathematics). A section score as low as 37 is acceptable if the total scaled score is at least 123.
      We generally refer students to take the California Basic Educational Skills Test (CBEST) but you do not have to if you meet one of the other options outlined in the CTC leaflet cl-667. To submit test scores from one of the CTC leaflet alternatives, you must contact the SJSU Credentials Office (credentials@sjsu.edu) to verify the validity of your scores before submitting them to CSDCAS. Deadline for submission is February 1.

Applicants from countries in which the official native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Requirements for Advancement to Candidacy (Program Continuation)

Students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the MA degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. The department’s GWAR is met by completing EDSP 221 with a grade of B or better.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.
MA - Speech-Language Pathology Requirements
Students are expected to complete all required courses, the culminating experience, clinical practica, and observations. In order to meet degree requirements, candidates for the MA in Education with a concentration in Speech Pathology must maintain a 3.0 GPA in all courses with no single course grade below a B-. Students who earn less than a B- in any required course must retake the course and earn a grade of B- or better.

In addition to the CDS curriculum, students must demonstrate knowledge of five additional content areas as required by American Speech-Language Hearing Association (ASHA) and the California Commission on Teacher Credentialing (CCTC). They are ASHA Requirement 1: Biological Sciences; ASHA Requirement 2: Social/Behavioral Sciences; ASHA Requirement 3: Physical Sciences; ASHA Requirement 4: Statistics; and CCTC Requirement Child and/or Adolescent Development.

Candidates for the Master’s degree must accumulate a minimum of 375 clock hours in supervised clinical practicum in three distinctively different settings and 25 hours of observation.

Prior to providing any speech-language assessment or intervention services during clinical practica, students must show evidence of all of the following: (a) Certificate of Clearance, (b) Negative TB (tuberculosis) test, (c) Negative Hepatitis test, (d) Physical Clearance to provide speech-language pathology services, (e) successful completion of online training related to HIPAA (Health Insurance Portability and Accountability Act), and (f) CPR (Cardiopulmonary resuscitation) Certification.

Culminating Experience
Plan C (Comprehensive Exam)
All students in the MA, Education, Concentration in Speech Pathology program must successfully complete the Comprehensive Examination during their last semester (Spring semester of the second year). The examination assesses broad knowledge and competency across topics in speech, language, hearing, cognitive-communication, and swallowing disorders. Upon completion of the program, students receive a Master of Arts degree and are eligible to work as speech-language pathologists.

Plan A (Thesis)
Students who have a strong interest in research may be approved to complete the Thesis (Plan A). It requires students to secure a thesis advisor and a thesis committee and enroll in EDSP 299, Thesis during Fall semester of the second year. (Enrolling in the EDSP 299 adds 3 units to the program for a total of 66 units.) Students electing to take this option must also successfully complete the comprehensive examination. Theses must be defended and approved by the thesis committee and follow the College of Graduate Studies Master’s Thesis and Doctoral Dissertation Guidelines.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

- MA, Education, Concentration in Counseling and Student Personnel

Introduction
The Department of Counselor Education prepares individuals to assess and counsel students in culturally and economically diverse K-12 and postsecondary educational settings as well as work with clients through community-based organizations. In addition to a Master’s degree in Education with a concentration in Counseling and Student Personnel, we offer a Pupil Personnel Services (PPS) Credential in School Counseling and a Child Welfare and Attendance (CWA) specialization, which qualify individuals to work as guidance counselors in K-12 schools. Our faculty work closely with degree candidates to build effective assessment and counseling skills, nurture reflective thinking, and develop cultural skills and a commitment to social justice. Our graduates are prepared to facilitate individuals’ personal and educational success and lifelong learning.
Credential, K-12 School Counseling Specialization

Our Pupil Personnel Services (PPS) School Counseling Credential is a 54-unit program, which qualifies individuals to work as guidance counselors in K-12 public schools. We also offer an added Child Welfare and Attendance (CWA) specialization (additional 6 units), which focuses on truancy and dropout prevention issues.

Individuals admitted into our PPS School Counseling Credential program are eligible to apply for a PPS Internship Credential (valid for up to two years) if they are offered a school counseling position by a local school district before completing the program requirements. To be eligible, a student must have completed a minimum of 9 units and have passed the CBEST.

Total Units Required

Completion of coursework requires a minimum grade of C or higher in courses completed and a minimum overall GPA of 3.0.
MA - Education, Concentration in Counseling and Student Personnel

The Department of Counselor Education prepares its graduates to counsel and assess students in culturally and economically diverse K-12 and postsecondary educational settings as well as those involved with community-based organizations. Our department offers a Master of Arts degree in Education with a Concentration in Counseling and Student Personnel. Counselor Education faculty work closely with degree candidates to build effective assessment and counseling skills, nurture reflective thinking, and develop cultural skills and a commitment to social justice. Our graduates are prepared to facilitate student personal and educational success and lifelong learning.

Additional information is available on the Department of Counselor Education website: [www.sjsu.edu/counselored](http://www.sjsu.edu/counselored).

Admissions Requirements

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the MA, Education, Concentration in Counseling and Student Personnel. See the [CAPE Graduate Admissions](http://www.sjsu.edu/counselored) website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the [Graduate Program Test Requirements](http://www.sjsu.edu/counselored) webpage at CAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

Applicants may be fully admitted if they meet the admissions requirements for the Graduate Division and the department’s requirements. The minimum requirements for the program are a bachelor’s degree in any discipline and a 3.0 GPA. Preference is given to candidates who demonstrate a strong inclination to serve others, an interest in K-12 or post-secondary education, and a commitment to social justice.

A. Candidates must meet all university admissions requirements.

B. Department application materials include the items listed below and are to be sent directly to the department office at:

   Department of Counselor Education
   San José State University
   One Washington Square, SH 404
   San Jose CA 95192-0073

   1. Autobiographical and Professional Goals Statement (two to three pages, double-spaced) that includes the applicant’s: a) educational background, b) experiences demonstrating a concern and capacity to work with people, c) professional goals in pursuing the degree and/or credential (include areas of interest in counseling), and d) any additional information explaining your interest in the Department of Counselor Education master’s degree or credential program.

   2. Three (3) letters of recommendation from current or former professors and/or employers who can testify to the applicant’s ability to successfully pursue an advanced academic degree and/or discuss the applicant’s experience within the proposed field of study. Forms for these letters can be found on the Department of Counselor Education website.

   C. Official sealed transcripts from each college/university attended should be sent to:

      Graduate Admissions and Program Evaluations
      San José State University
      One Washington Square, SH 404
      San Jose CA 95192-0073

Admission to Conditionally Classified Standing

Applicants may be conditionally admitted (admitted with conditions) if they meet the admission requirements for the Graduate Division but do not fully meet departmental admissions requirements. The individual admission notification will explain required terms and conditions for attaining Classified standing.

Requirements for Advancement to Candidacy

Candidacy denotes that a student is fully qualified to complete the final stages of the Master of Arts degree. General university requirements for advancement to candidacy are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the [Graduation Writing Assessment Requirement (GWAR)](http://www.sjsu.edu/counselored). For graduate courses that meet the GWAR, refer to the [GWAR Course List](http://www.sjsu.edu/counselored) on the College of Graduate Studies website.

Department Requirements

1. Complete 18 units of core courses (EDCO 215, 218, 232, 248, 266, 282)
2. Complete 9 units of advanced courses with a “C” or better
3. Maintain an overall graduate GPA of 3.0 or higher
4. Meet with your advisor to complete the [Petition for Advancement to Graduate Candidacy](http://www.sjsu.edu/counselored) form.
Requirements for Graduation

University Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures. Completion of the degree also requires a minimum grade of “C” in all courses taken and a minimum overall GPA of 3.0.

Department Requirements
1. Complete 6 practicum/fieldwork units from among (EDCO 267, 280, 292, 293, 294)
2. Complete 6 units of advanced courses (EDCO 288 and 289)
3. Complete 12 units of advanced elective courses from among the following (EDCO 227, 244, 268, 279, 283, 285, 286, 287; can include additional practicum/fieldwork courses)
4. Complete 3 units (EDCO 221) to develop a project proposal (Plan B) or a thesis proposal (Plan A)
5. Apply for graduation via MySJSU
6. Successfully complete either the project (Plan B, EDCO 298) or thesis (Plan A, EDCO 299)

Culminating Experience
Students choose a Plan A (Thesis) or Plan B (Project) option as their program culminating experience.

Plan A (Thesis)
Students selecting the Plan A option will write a master’s thesis. The thesis will include original research on a topic approved by the thesis committee, and must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. Thesis proposals must be approved by the graduate committee, which is made up of two department faculty and a third faculty member from outside the department. Students enroll in EDCO 299, Master’s Thesis (3 units).

Plan B (Project)
Students selecting the Plan B option will complete a master’s project or research paper. These students enroll in EDCO 298, Special Studies in Counselor Education (3 units).

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

This requirement is satisfied by passing EDCO 215, EDCO 266, or EDCO 288 with a grade of B or better.

Curricula
- EdD, Educational Leadership

Introduction
The Ed.D. in Educational Leadership at San José State University emphasizes human centered approaches to educational leadership. The program builds on the view that educational leaders serve in learner-centered systems in which inquiry, learning, equity, and human care are central concerns. The expected role for educational leaders involves creating a learning community, one that promotes collaboration and shared decision making. This view implies moving towards more distributed models of leadership and creating a public will that is networked, dispersed and charged with successfully educating all students. The doctoral program begins with an intensive on campus five-week summer session that meets three days per week. During the fall and spring semesters in years 1 and 2, two classes each semester are scheduled. Together, the classes meet one evening per week for 8-10 weeks and on 4 or 5 Saturdays. The second summer session includes a required a global experience including a two-week educational and cultural experience outside of the United States. No formal class sessions are scheduled during the final two semesters of the Ed.D. program, when students complete independent research as part of the dissertation.
Ed.D. - Doctor of Education in Educational Leadership

The Ed.D. Program in Educational Leadership at San José State University is dedicated to developing outstanding education leaders who are well prepared to meet the demands and challenges of schools, today and in the future. The program builds on the following two basic principles: (1) schools are learner-centered organizations; and (2) educational leaders serve in human-care systems. The expected role for educational leaders involves creating a learning community that promotes collaboration and shared decision making. The Ed.D. Program is designed so that it may be completed in nine semesters over three years. This timeframe allows for completion of all coursework, pre-proposal/literature review, dissertation proposal, and completion of the dissertation. The program begins with an intensive on campus five-week summer session that meets three days per week. Fall and spring semester classes are scheduled as hybrid classes and meet on evenings, weekends, and online during the semester. The second summer requires a global component that includes a two-week educational and cultural experience outside of the United States. It is anticipated that students will concurrently be working full time as they pursue their doctoral studies.

Additional information is available in the Ed.D. Leadership Program Office and on the department website: www.sjsu.edu/edd/.

Admissions Requirements
Candidates must meet all university and Ed.D. Program admission requirements. The university-level graduate application is separate from the application that is sent to the Ed.D. Program. Minimum requirements for the program include a master’s degree from an accredited institution and a 3.0 grade point average (B or better) in the last 60 semester units completed. In exceptional cases, experience and service will be considered in lieu of the Master’s degree requirement.

In addition to the university admissions requirements as outlined in this catalog, applicants must meet the Ed.D. Program requirements below.

• Three letters of recommendation attesting leadership ability and potential for success in a doctoral program. One of the letters should be from a school district employer indicating support for participation in the doctoral program. Recommendation forms are available on the Ed.D. Leadership Program webpage at www.sjsu.edu/edd. Recommendation letters should be submitted directly from the person writing the recommendation letter to edd-leadership@sjsu.edu.

• Current professional resume or curriculum vitae that includes leadership experience and/or leadership strengths as indicated through job experiences, administrative credentials, and/or other evidence of leadership capacity and practice. Resumes or vitae should not exceed 4 pages.

• A written statement of purpose that explains reasons for pursuing doctoral studies in educational leadership. The statement should include relevant personal and professional history and background, some of the core commitments and principles that drive one’s career goals, and challenges facing education and educational leadership in California, nationally, and globally. Statements should not exceed 3 pages, single spaced.

• A recent writing sample (last 5 years) of an individually authored paper, research projects, or reports (maximum of 20 pages). All writing samples should be single-authored and include citations and references. The writing sample is intended to demonstrate ability to construct a meaningful argument on an education-related topic and to cite research/literature to support one’s views. A PowerPoint presentation is not acceptable.

Requirements for Advancement to Graduate Candidacy
Students who have completed matriculation and have achieved classified standing in the Ed.D. Program curriculum will advance to candidacy for the Ed.D. degree. Students advance to candidacy after completing a minimum of 9 units of letter-graded work that is acceptable to the Ed.D. Program and fulfilling other university requirements for advancement to candidacy as detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Requirements for Graduation
University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Ed.D. Leadership Program Graduation Requirements
To be eligible for graduation, the candidate shall have completed all coursework and global out-of-country (or equivalent) requirements, pre-proposal/literature review, the dissertation proposal, IRB, and the doctoral dissertation. Students are required to complete the dissertation proposal in two attempts in order to proceed with the dissertation.

Dissertation Requirements
• The Ed.D. dissertation is expected to contribute to an improvement in education practice and/or education policy in the context of a particular educational institution. It is expected that the dissertation will show evidence of originality, critical and independent thinking, appropriate form and organization, and a rationale for the examined research problem or question.

• The dissertation must meet all university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with assistance from two other members of the dissertation committee. The Dissertation Committee consists of three members, one who serves as the committee chair (or in some cases, two co-chairs can be identified). Two members of the dissertation committee must be tenured or tenure-track members of the San Jose State University faculty. The third member of the committee is expected to be employed at a local school or school district and have achieved the terminal degree (e.g., Ed.D., J.D., Ph.D.).
• All students must enroll in a total of 12 units of dissertation credit during the final year of the program: 6 units in the fall semester and 6 units in the spring semester of Year 3 of the program. Once the candidate has enrolled in 12 dissertation units, the maximum allowable, continuous enrollment must be maintained until the dissertation is approved and filed and the degree is awarded.

• All students are expected to produce a dissertation that consists of five chapters, namely Introduction, Literature Review, Methodology, Results/Analysis, and Conclusions/Recommendations. This is typically followed by a References section and relevant appendices. Alternatives to the traditional dissertation format will be considered, with approval by the faculty advisor/dissertation committee, within accepted norms of research, scholarship, and creative activities. The Lurie College of Education uses APA style for research and the SJSU Graduate Studies division provides additional formatting/style guidelines for theses and dissertations. Exception to the traditional five chapter dissertation will be made on a case by case basis.

• After completing the dissertation proposal defense and obtaining IRB approval, students carry out the research plan described in the approved proposal, collect and analyze data, and continue writing the dissertation. The Dissertation Committee Chair and committee members will guide the students to ensure their dissertation conveys scholarly work that results from an appropriate research study and contributes to the understanding and/or improvement of educational practice.

• All students are expected to submit drafts of their dissertation to their committee members in appropriately word-processed form. The completed final draft also includes the Abstract, Copyright Page, Title Page, Acknowledgments, Table of Contents, List of Tables, List of Figures, References, and Appendices. The students submit the final draft manuscript to committee members for a final reading and approval. The final dissertation may take a variety of forms depending upon the type of research undertaken. The conventional five-chapter dissertation may be revised to reflect a specific design and purpose.

• Dissertation Examination: Every candidate for the Ed.D. degree must successfully pass a final oral examination based on the dissertation. At the final oral defense, the candidate will make a public presentation of his or her dissertation research. The final oral defense is conducted as an open forum led by the candidate and guided by the Committee Chair and the two other members of the Dissertation Committee. The purposes of this formal meeting are to (1) examine and assess the quality of the dissertation; (2) evaluate the ability of the student to present research; and (3) provide an opportunity to share the research with the campus community. Unanimous agreement of the Dissertation Committee is required for approval of the dissertation and recommendation that the Ed.D. degree be conferred on the candidate.

EDD 599. Dissertation

Students take EDD 599 for two semesters.

Dissertation Defense

Total Units Required 60

Satisfactory Academic Progress

All students are expected to make satisfactory progress in accordance with the Ed.D. cohort structure and program of study through the time of advancement to candidacy. The normal expectation is that students will attend and participate in all required program components. In the event that a lack of attendance/participation would cause a student to fail to maintain a grade point average of 3.0, the student would be notified and counseled regarding requirements for satisfactory progress toward the degree in the time specified by program faculty.

A student must earn a grade of “C” or better in all required classes in the doctoral program, with all “sub-C” grades considered as failure; those classes would have to be repeated, and students would have one additional chance to do so. Failure to achieve the “C” grade in two chances would result in a recommendation for administrative-academic disqualification. All students are expected to achieve a grade point average of 3.0 or above in all semesters of coursework. In addition to the university requirements for minimal grade point average and academic disqualification, the Ed.D. Program requires that all students achieve a minimum grade point average of 3.0 or above in every semester of coursework. A student who achieves less than a 3.0 GPA in a given semester will be required to attend a meeting with the Ed.D. Director, the student’s advisor (if an advisor has been assigned), and the faculty member teaching the course(s) in which a grade below a “B” has been assigned. Possible outcomes of this meeting include (1) a recommendation for a remediation plan for the student, (2) academic probation in the Ed.D. Program with the recommendation of disqualification if achieved GPA falls below 3.0 in a subsequent semester, or (3) a recommendation that the student be immediately disqualified from taking further coursework in the doctoral program.

Additionally, satisfactory progress pertains to doctoral students’ adherence to the high standards of professional ethics. Students must adhere to scholarly and ethical standards in all courses, fieldwork, and research endeavors. Such standards are defined by the faculty, the professional accrediting bodies, policies of the university and the CSU, and relevant statutes of federal, state, and local governments. Students may be placed on probation or disqualified based on unsatisfactory scholastic progress or failure to adhere to professional and ethical standards.

We note that, according to university policy, a student who falls below a 3.0 GPA in an academic term will be notified in writing that he/she has been placed on academic probation. When the student’s overall GPA is below 3.0, failure to achieve a term GPA of 3.0 in any subsequent semester results in academic disqualification.

In all cases, a disqualified student will not be allowed to continue in the program, enroll in doctoral-level courses, or register in the doctoral program. The disqualification will be communicated to the student in writing through certified mail. A disqualified student will be permitted to apply for reinstatement into the Ed.D. Program; consideration of the student’s application for reinstatement will occur along with consideration for all new applications into the program in a given year.

Students who need to make up assignments must work with the faculty member teaching a particular class, and it is up to each individual faculty member how best to negotiate missed assignments and/or requests for a grade of Incomplete. In the event that lack of attendance/participation causes a student to fail to maintain a GPA of 3.0, the student will be notified of academic probation and counseled regarding requirements for satisfactory progress toward the degree.

Any student may request a leave of absence from the Ed.D. Program for up to one year through a written request to the Ed.D. Director and a formal petition to the university. The request may be approved or denied by the Director in consultation with the Ed.D. Program faculty. If approved, the approval will stipulate the timeline and conditions or options for returning to the doctoral program. One possible option is for the student to join a later cohort and resume taking the classes that were missed.

Curricula
⦁ Credential, Educational Leadership, Preliminary Administrative Services Credential
⦁ MA, Educational Leadership, Concentration in Administration and Supervision

Introduction
If schools are to meet the needs of an increasingly diverse student population, they must be led by women and men passionate about the importance of schooling and capable of managing significant school change. Graduates of the Department of Educational Leadership are trained to rise to that challenge in K-12 settings. We offer a master’s degree in educational administration and a preliminary administrative service credential (tier 1) that can be earned simultaneously. The fundamental goal of education, we believe, is the success of all students. To achieve that goal requires informed, courageous leadership.
## Preliminary Administrative Services Credential

### Basic Requirements to Earn Preliminary Credential

Applicants to the Preliminary Administrative Services credential must: possess a valid California teaching credential, Pupil Personnel, Health Services, Librarianship, or Clinical Rehabilitative credential; have at least three years of successful, full-time experience in the public schools, or in private schools of equivalent status; pass all parts of the CBEST exam; successfully complete the credential program; and two page writing sample, letter of recommendation from a supervisor attesting to probable success at the master’s level and potential for leadership, and complete the portfolio exit process.

### Recommended Preliminary Credential Course Pattern

#### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

An instructor may waive a course if a student demonstrates competency.
MA - Education, Concentration in Administration and Supervision

Admission Requirements
Candidates must apply through the CSU admissions portal, calstate.edu/apply. Applicants must meet all admission requirements.

Follow the link for general information about the university admission requirements and process. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

Admission to Graduate Standing, Classified
Applicants who meet the admission requirements for the Graduate Division and in addition meet the further requirements of the area of specialization for the master's degree are admitted to graduate standing. 3.0 GPA is required for entrance and exit.

Admission to Graduate Standing, Conditionally Classified
Applicants who meet the admission requirements for the Graduate Division but who fail to meet the requirements for classified standing in the area of specialization for the master's degree may be admitted to conditionally classified standing in the master's degree program. Individuals petitioning such admission should contact the chair for the specific prerequisites they must complete before receiving classified standing.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

⦁ MA, Education, Concentration in Special Education

Introduction
Graduates of the Department of Special Education are advocates for children. Our programs provide the knowledge and expertise necessary to teach students and young children with disabilities, to serve as change agents, and to help make lives the very best they can be. Our alumni are passionate about learning and education. We offer preparation for the Preliminary Education Specialist Teaching Credential in three areas (mild to moderate disabilities, moderate to severe disabilities, and early childhood special education) that can be completed as an Intern (or first year teacher) or as a traditional student. The Concurrent Option is the opportunity to earn the Education Specialist Mild to Moderate Disabilities Credential and the Multiple Subjects and/or Single Subjects Credential at the same time. We also have programs for the Added Authorizations in Early Childhood Special Education and Autism Spectrum Disorders, as well as the Certificate in Theory, Knowledge and Practice about Autism Spectrum Disorders. We offer a Master’s of Arts degree with a Special Education specialization.

The California Commission on Teacher Credentialing (CCTC) and the National Council on the Accreditation of Teacher Education Colleges (NCATE) accredit all teaching credential programs. CCTC identifies and defines the standards that all teachers must satisfy for the credential; students in the Department of Special Education programs meet these standards with completion of the program and then are recommended to CCTC for the Education Specialist credential.
Credential Programs Admission Requirements:
1. Application for admission to SJSU.
2. Application and required documents for admission to the Department of Special Education.
3. Graduation from an accredited university or college.
4. Passing scores on the California Basic Education Skills Test (CBEST).
5. Grade Point Average (GPA) of at least 2.75.
6. Completion of pre-professional experience.
7. Passing scores on the California Subject Examination for Teachers (CSET).
8. Department interview with passing results.
9. Completion of 165 pre-service coursework hours for Interns.
11. It is recommended that any individual interested in applying for a program attend an orientation meeting and visit the website at www.sjsu.edu/specialed.

MA Program Admission Requirements:
1. Application for admission to SJSU.
2. Application and required documents for admission to the Department of Special Education.
3. Graduation from an accredited university or college.
4. Grade Point Average (GPA) of 3.0.
5. Department interview with passing results.
6. A passing score on the Department of Special Education writing assessment.
7. Statistics Class
Minor - Atypical Child Studies

This interdisciplinary minor is offered under the Child and Adolescent Development Department and the Early Childhood Special Education Program in the Department of Special Education.

This degree is listed with the Child and Adolescent Development, Department of.

## Minor - Special Education

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

### Requirements of the Minor

**COMPLETE ONE TRACK FROM:**

#### Track 1 - Mild/Moderate Disabilities

- EDSE 102. Speech, Language & Typical, Atypical Dev................................................. $.......................... 3
- EDSE 192A. Including and Supporting Students ................................................................. 3
- EDSE 216A. Teaching Reading and Language Arts ............................................................... 3
- EDSE 241. Emerging Technology for All Learners ............................................................ 3

#### Track 2 - Moderate/Severe Disabilities

- EDSE 102. Speech, Language & Typical, Atypical Dev................................................. $.......................... 3
- EDSE 110. Autism Spectrum Disorders ........................................................................... 3
- EDSE 192A. Including and Supporting Students ................................................................. 3
- EDSE 216A. Teaching Reading and Language Arts ............................................................... 3

#### Track 3 - Early Childhood Special Education

- EDSE 102. Speech, Language & Typical, Atypical Dev................................................. $.......................... 3
- EDSE 104. Atypical Development in Young Children ......................................................... 3
- EDSE 108. Assessment and Evaluation: Atypical Young Children .................................... 3
- EDSE 110. Autism Spectrum Disorders ........................................................................... 3

MA - Education, Concentration in Special Education

Advisors: Dr. Peg Hughes, Dr. Hyun-Sook Park, Dr. Angela Rickford, Dr. Lisa Simpson, and Dr. Andrea Golloher

The MA in Education with a Concentration in Special Education is a 30-unit program designed to prepare students for leadership roles in Special Education through coursework in one of three areas of specialization: early childhood special education, mild/moderate or moderate/severe disabilities, or a combination of areas of interest. Students interested in the MA and a teaching credential must apply for both options. Please note that prospective teachers with the MA must also complete a credential program in an area of interest to work in public schools in the State of California. For more information see www.sjsu.edu/specialed/

Admission Requirements
Prospective students must apply separately to the university to obtain approval for graduate-level admission and to the department to obtain admission into the MA program. Applicants who meet the following requirements will be considered for admission in classified standing into the MA in Education with a Concentration in Special Education:

- Bachelors Degree or equivalent and a cumulative GPA of 3.0 or better;
- Passing score on the Department of Special Education writing assessment or GRE Analytical Writing (passing score of 4.0 score or better);
- Certificate of Clearance;
- STAT 095, Elementary Statistics or equivalent basic statistics course with a grade of 3.0 or better; and
- A teaching credential in special education is recommended.

In addition to the same requirements mentioned above, applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

Requirements for Admission to Candidacy
To be admitted to candidacy for the Master of Arts degree, a student must first meet the university requirements for the degree as stated in the Advancement to Candidacy section of this catalog. Candidates must also have:

- At least a 3.0 ("B") average in nine semester hours of approved San José State University courses;
- Approval of a formal master’s degree program from the departmental graduate advisor and from the Graduate Committee; and
- Successfully completed the graduate English Writing Requirement. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Culminating Experience
Plan B (Project)

Students will complete a research project that involves identification of a research problem, data collection, analysis, and discussion. The written requirement includes five chapters similar to the thesis format and a poster presentation to meet the oral requirement.
Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

### Requirements of the Masters

A statistics course is required as part of this masters program.

Introduction
The Teacher Education Program at San Jose State University is California’s oldest public teacher preparatory program. We are committed to preparing the highest quality educators (Prek-12), with knowledge, skills, dispositions, and ethics to teach students in our culturally diverse and technologically complex global communities. Teaching is a reliable and rewarding profession for those desiring to influence the lives of children and adolescents.

The Teacher Education Department offers a California multiple (grades PK-8) or single subject (grades 9-12) teaching credential offered by the State of California to teach pre-school, elementary, middle, and high school students in a California public school. These programs are post baccalaureate, offered at the graduate level, and are approved by the CCTC (California Commission on Teacher Credentialing). The Teacher Education Department offers many options, including a Teaching Credential only (in multiple or single subject), a Teaching Credential plus a Master of Arts Degree (in Elementary: Curriculum & Instruction) or a Master of Arts Degree (LACES) only (also in Elementary: Curriculum & Instruction). In addition, the Teacher Education Department offers an Advanced Teaching Certificate in the CCTC Common Core State Standards in Mathematics (K-8).

The links below will provide information on the department’s two programs, Elementary Education and Secondary Education.

Elementary Education
Secondary Education
Admissions Requirements

The following chart identifies admission requirements for all degree, credential and certificate programs in the Teacher Education Department. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the [Graduate Program Test Requirement](#) webpage at [GAPE](#) (Graduation Admissions and Program Evaluations).

Requirements for Program Continuation / Advancement to Candidacy

Students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the MA degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Applicants must also

- complete successfully 9 units of graduate coursework in the Elementary Education program;
- demonstrate aptitude for advanced work in professional education as measured by instructor appraisals, evaluation of previous academic work, recommendation by qualified professionals, or other assessments;
- meet with a graduate advisor to plan a formal course of study. The MA degree approved programs are individually designed to meet specific student objectives.

The proposed graduate program must be approved by the graduate coordinator before the student may be considered a candidate for the MA degree.

Minor in Education

The minor in Education is available to students who are interested in education from a variety of perspectives. Students in a degree program who may want to work with children in capacities inside or outside the classroom may be interested in this minor. For example, students interested in the following career paths could benefit from this course of study: becoming a teacher, working in the non-profit sector (e.g., educational foundations) or in any type of child advocacy work such as law or social work; or anyone working in a diverse environment where understanding how individuals learn and process information could benefit. Successful completion of the minor will enable students to earn 12 credits toward their multiple subject teaching credential.

University Graduation Requirements
To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Teaching Certificate in Common Core Mathematics (K-8)

The Advanced Teaching Certificate in Common Core Mathematics K-8 is designed for practicing teachers and mathematics coaches. Courses focus on developing the mathematical knowledge for teaching K-8 Common Core Standards and Mathematical Practices. Additional emphasis will be placed on pedagogical strategies that foster motivation, engagement, and the development of academic language in mathematics.

Introduction
Top-ranked among national BS/MS programs by U.S News and World Report, the Electrical Engineering Department powers Silicon Valley. We provide more electrical engineering graduates to this region than are provided by any other college or university anywhere. At the forefront of technological research and innovation in multimedia computing, global communications, and high-speed integrated circuitry, electrical engineers push technology to the limits of physical and mathematical laws. There is no greater challenge for the creative mind. We prepare students for exciting careers in diverse areas of hi-tech engineering, including micro and nano technologies, chip-scale integration, embedded hardware and software systems, controls, robotics and autonomy, power electronics and energy systems, communication and machine learning, networking and cybersecurity. Our accomplished faculty brings real-world experience to the classroom, and the department's links with local industry ensure that our laboratories are among the area's most advanced instructional facilities with up-to-date, state-of-the-art equipment. The BS Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org
BS - Electrical Engineering

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

Students in this major must complete the following Preparation and Required for the Major courses with a “C” or better”: ENGL 001B, EE 097, EE 098, EE 110, EE 118, EE 122, EE 128, EE 198A, ENGR 100W, MATE 153, MATH 133A or MATH 123. All other required courses in Engineering, Mathematics, Chemistry and Physics require a “C-” or better. Prerequisite requirements may be higher than graduation requirements.

Core Lower Division General Education

Of the 39 units required by the university, 33 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Physical Education

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Preparation for the Major

CHEM 001A. General Chemistry ................................................................. B1+B3 ................................. 5
ENGL 001B. Argument and Analysis ...................................................... C2 ........................................... 3
or equivalent second semester composition course.
MATH 030. Calculus I ............................................................................. B4 ....................................... 3
MATH 031. Calculus II ........................................................................... B4 ....................................... 4
MATH 032. Calculus III ......................................................................... B4 ....................................... 3
PHYS 050. General Physics/Mechanics ................................................... B1+B3 ..................................... 4
PHYS 051. General Physics/Electricity and Magnetism ......................... B1+B3 ..................................... 4
PHYS 052. General Physics/Waves, Light, Heat ..................................... B1+B3 ..................................... 4

COMPLETE ONE COURSE FROM:

MATH 123. Differential Equations and Linear Algebra .......................... 3
MATH 133A. Ordinary Differential Equations .......................... 3
Requirements of the Major

Students must complete the following courses with a "C" or better to graduate: EE 097, EE 098, EE 110, EE 112, EE 118, EE 122, EE 128, EE 198A, ENGR 100W, MATE 153. All other required courses in Engineering, Mathematics, and Physics require a "C-" or better to graduate.

Approved Upper Division Electives

Elective courses as approved by advisor.

Total Units Required

120
MS - Electrical Engineering

The Master of Science in Electrical Engineering is one of the largest graduate programs in the university with more than 500 graduate students and over twenty full-time faculty members. The curriculum is continually updated to keep abreast of advances in the engineering profession and industry. Along with the traditional emphasis on fundamental scientific knowledge, current engineering practice using computer design tools is integrated into the curriculum. Information about the MSEE program can be found at http://ee.sjsu.edu/.

Admissions Requirements
Candidates must apply through the CSU admissions portal, calstate.edu/apply. Applicants must meet all admission requirements.

Follow the link for general information about the university admission requirements and process. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at CAPE.

Requirements for Admission to Classified Standing
To be admitted to classified standing, an applicant must possess a baccalaureate degree with a major in Electrical Engineering or its equivalent and a grade point average of 3.0 or better on a 4.0 scale in the last 60 units from a U.S. university with an ABET-accredited Electrical Engineering program.

Requirements for Admission to Conditionally Classified Standing
Some applicants who do not qualify for classified standing may be admitted as conditionally classified graduate students. They must petition for a change to classified status after completing the common core graduate courses with grades of “B” or better. A maximum of 15 units earned before the student attains the classified status may be counted towards the MSEE degree requirements.

Applicants with a BSEE Degree from an Accredited University in the U.S.:
An applicant with a BS degree in Electrical or Computer Engineering from an accredited university within the United States, whose GPA in the last 60 units is 3.0 or above on a 4.0 scale, will be admitted to classified standing (GRE is not required). An applicant with a GPA in the last 60 units lower than 3.0 but higher than 2.75 on a 4.0 scale is required to submit his or her general GRE scores with the application. If accepted, the applicant will be admitted as a conditionally classified graduate student. Such a student may petition for a change to classified standing after successfully completing two of the following three courses: EE 210, EE 221, or EE 250 with a “B” or better grade in each course. Information about GRE score requirements can be found at Graduate Program Test Requirement.

Applicants with a BS Degree in Another Branch of Engineering from an Accredited University in the U.S.:
An applicant who possesses a baccalaureate degree in another branch of Engineering or in Physics or Mathematics with a minimum GPA of 3.0 on a 4.0 scale in the last 60 units is required to submit his/her general GRE scores with the application. If accepted, the applicant will be admitted as a conditionally classified graduate student. Such an applicant may be required to complete four undergraduate courses at the beginning of the graduate program. The four undergraduate courses are specified in the admission letter and are selected from EE 110 (Circuits and Systems), EE 112 (Introduction to Signal Processing), EE 118 (Digital Logic Circuit Design), EE 120 (Microprocessor Based System Design), EE 122 (Electronic Design I), EE 124 (Electronic Design II) and EE 140 (Principles of Electromagnetic Fields). Following the completion of the undergraduate courses, the student must successfully complete two of the three graduate core courses, EE 210, EE 221, or EE 250 with a “B” or better grade in each course. Information about GRE score requirements can be found at Graduate Program Test Requirement.

Applicants with Undergraduate Degrees from Foreign Universities
An applicant with a baccalaureate degree in Electrical, Electronic, Telecommunications, or Computer Engineering with a minimum GPA of 3.0 on a 4.0 scale in the last 60 semester units is eligible to apply. Applicants are required to take an English-proficiency test (TOEFL or equivalent) and general Graduate Record Exam (GRE). Information about minimum score requirements for English-proficiency tests and GRE can be found at Graduate Program Test Requirement. In general, there are no hard cut-offs on the GRE scores but the scores will be used with applicants’ degree and GPA to rank the candidates for admission.

Applicants satisfying these requirements may be admitted as conditionally classified graduate students with the condition that they must complete two of the three core graduate courses, EE 210, EE 221, or EE 250, with a “B” or better grade in each course before enrolling in any other graduate course. However, a student with a high GPA and GRE may be admitted into classified standing.

Applicants from Other Graduate Programs within the University
A graduate student who has been admitted to another department in San José State University has to complete at least one semester of work in that department before asking for transfer to the Electrical Engineering Department. A minimum GPA of 3.0 in the last 60 semester units and general GRE score are required. There are no hard cut-offs on the GRE scores but the scores will be used with applicants’ degree and GPA to rank the candidates for admission.

A “Change of Major Form” has to first be approved by the CAPE office and the file transferred to the Electrical Engineering Department before the student may be considered for transferring into the Electrical Engineering program.
Requirements for Advancement to Graduate Candidacy
Matriculated graduate students must submit a Petition for Advancement to Graduate Candidacy a minimum of one semester prior to graduating. See the link for information about this requirement.

Students also must fulfill the Graduation Writing Assessment Requirement (GWAR) before advancing to candidacy. See the link for information about the GWAR.

Requirements for Graduation
University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Course Requirements
To meet the requirements for the MS - Electrical Engineering degree, a student must complete 33 units including GWAR with a cumulative GPA of 3.0 or better. The program provides three options (two plans): MS thesis (Plan A), MS Project (Plan B), or courses only followed by a comprehensive exam (Plan B).

Culminating Experience
Plan A (Thesis)
Students choosing this option must complete the MSEE Thesis Proposal course (EE 299A) and MSEE Thesis course (EE 299B) in a two-semester sequence. The student is responsible for securing the commitment of three university faculty members, two of whom must be full-time EE faculty members, to serve as the student’s thesis committee, with one full-time EE faculty member agreeing to serve as thesis committee chair. The student must write a thesis proposal and have it approved by the thesis committee and pass the MSEE Thesis Proposal course (EE 299A) before enrolling in EE 299B. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee. The candidate for the MSEE degree must successfully pass a final oral defense of the thesis.

Plan B (Project)
The student must complete the MSEE Project Proposal course (EE 297A) and MSEE Project course (EE 297B) in a two-semester sequence. The student is responsible for securing the commitment of a full-time EE faculty member to serve as MSEE Project Advisor. The student must write a project proposal and have it approved by the project advisor and pass the MSEE Project Proposal course (EE 297A) before enrolling in the final MSEE Project course (EE 297B). The candidate for the MSEE degree must successfully pass a final defense of the project.

Plan B (Comprehensive Exam)
Students opting for the courses-only option must pass the Comprehensive Exam (given once a semester) to earn the MSEE degree. The exam is a 90-minute closed book exam with 14 problems selected from fourteen EE graduate-level elective courses. Students are required to answer three problems from the fourteen appearing on the exam.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

### Total Units Required

A coherent plan of study must be approved on the prescribed form by the graduate coordinator. In special circumstances, a maximum of 3 units of approved courses taken outside the Electrical Engineering Department may be applied toward the MS - Electrical Engineering degree. Students who wish to take courses outside the Electrical Engineering Department must have pre-approval by the Graduate Coordinator.

Students opting for the courses-only option must also pass the required Comprehensive Exam (given once per semester) to earn the MSEE degree.

In addition to the above requirements, students must satisfy all university requirements and procedures as stated in this catalog.

### Areas of Specialization

- Device Physics/Logic/Digital/Embedded System Design
- ASIC/VLSI Circuits
- Analog/Mixed-Signal IC
- Communications/Signal Processing/Machine Learning
- Networking/Cybersecurity
- Power Electronics/Control/Energy Systems

Students desiring to pursue an area of specialization not listed above should consult his or her area advisor. A coherent plan of study must be approved on the prescribed form by the area advisor and the graduate coordinator.

Introduction

Study with award-winning teachers and professional writers. Develop editing and production skills by working on Reed Magazine, one of the oldest literary journals in the West. Prepare for a variety of careers in teaching, career and technical writing, or advanced study in English, law and medicine. The Department of English and Comparative Literature offers programs in English, American, world, and comparative literature, and creative and professional writing. Our MA prepares students for teaching careers or doctoral studies. Our MFA in creative writing trains professional writers in the history and craft of poetry, creative nonfiction, fiction, script- and screen-writing. Home to the Steinbeck Fellows and the Lurie Visiting Distinguished Author programs, the department also houses the Center for Literary Arts, which brings distinguished poets, fiction writers and creative nonfiction writers to campus to give public readings.

Undergraduate Honors Program

Upper-division students with a minimum grade point average of 3.0 overall and 3.5 in the major are eligible for Departmental Honors. Honors students complete an Honors Colloquium (ENGL 190). Application to the honors program should be made through the English Department Office.
### BA - English

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

#### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

**BA - English, Preparation for Teaching (Single Subject)**

The following course work satisfies San José State University’s requirements for a BA in English. The BA-English Preparation for Teaching is approved as subject matter preparation for a single subject credential by the California Commission on Teacher Credentialing (CCTC). Individuals who do not wish to complete one of the degree program, or individuals seeking a single subject credential in subject areas not listed must pass all portions of the appropriate Commission-approved subject matter examination(s).

Minimum grade point average (GPA) and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Total Units Required 16
Certificate Program in Professional and Technical Writing

The English Department offers a 16-unit program consisting of a twelve-unit core (ENGL 106, 107 ENGL 129) and four units of an advisor approved elective. This program is designed for those seeking greater specialization, including postbaccalaureate students who hold or seek employment in technical or professional writing. Prerequisite: Passage of WST or graduate standing.

MA - English

The written word grounds the Master of Arts in English. Its students learn to analyze literature and to write on literary topics at an advanced level. Students complete a rigorous program of courses that introduce them to cutting-edge research while training them to understand a range of theoretical and literary-historical frameworks for understanding literature. Before students earn a Master of Arts in English, they pass a two-part comprehensive exam. They also may choose to write a thesis. Students have the option to engage in graduate study in rhetoric and to train as college-level writing teachers. The program also offers students pathways to prepare for doctoral work.

Additional information is available in the Department of English and Comparative Literature Department Office and on the department website: [http://www.sjsu.edu/english/graduate/ma/](http://www.sjsu.edu/english/graduate/ma/).

Admissions Requirements

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at [calstate.edu/apply](http://calstate.edu/apply) and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the Master of Arts in English. See the CAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage of CAPE.

Admission to Classified Standing

In addition to meeting the minimum university requirements for admissions to the Graduate Division as outlined in this catalog, applicants must have

- 3.0 grade point average in English or literature courses;
- a minimum of 24 semester hours of acceptable undergraduate upper-division course work in English or other literary studies;
- earned 2 semesters (3 quarters) credit in foreign language course or have the equivalent fluency as attested to by a credible academic source;
- approval by the department graduate committee.

In addition to the university application requirements, applicants to the English MA must submit a writing sample directly to the MA advisor.

Admission to Conditionally Classified Standing

Applicants who do not qualify for classified standing but who do meet university requirements for graduate admission and whose past performance gives promise of satisfactory completion of requirements for graduate admission to classified standing may, with approval of the department graduate committee, be admitted as conditionally classified in the English MA program. Generally, this category is used if the applicant has not yet earned the equivalent fluency of 2 semesters/3 quarters of credit in a foreign language course OR an applicant has not yet completed 24 units of upper-division coursework in literature but otherwise shows promise as a graduate student.

Requirements for Advancement to Graduate Candidacy

Candidacy denotes that the student is fully qualified to complete the final stages of the MA, English. In order to achieve candidacy, students must meet the university requirements. General university requirements for advancement to candidacy are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. MA, English students must complete ENGL 201, the program GWAR course, before they can apply for candidacy. Application for advancement to candidacy should be done by the middle of the semester before students intend to graduate.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the [Graduation Requirements section](http://www.sjsu.edu/graduate/ma/) of the Graduate Policies and Procedures.

MA - English Graduation Requirements

Students must complete an approved 30-unit program with a grade point average of 3.0 or better. At least 21 of these units must be graduate-level (i.e., 200-numbered) courses. Any undergraduate coursework to be applied to the MA program must be approved in advance by the graduate advisor.

Included in these 30 units, are the ENGL 201 and ENGL 297. The ENGL 297 requirement will be waived if a student completes a thesis (which requires 6 units of ENGL 299 in lieu ENGL 297 and one 4-unit graduate-level course).
Culminating Experience
Students choose Plan A (Thesis) or Plan B (Comprehensive Examinations) as their program culminating experience.

Plan A (Thesis)
To receive credit for ENGL 299 (thesis) units, students must submit a thesis proposal to the department graduate committee by the deadline in the semester prior to the one in which the student plans to take the 299 units and complete the thesis.
The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee (made up of three readers arranged by the student and approved by the department graduate committee).
Students choosing the Plan A (Thesis) option must also pass the two-part MA, English comprehensive examinations but are not required to enroll in ENGL 297.

Plan B (Comprehensive Examinations)
Students choosing this option must enroll in ENGL 297 and pass the two-part MA, English comprehensive examinations. They are also required to take an additional 4-unit elective.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

</tbody>
</table>

Elective courses must be planned in consultation with the English MA Advisor.
The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 6.
Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
MFA - Creative Writing

The Master of Fine Arts degree in Creative Writing is the recognized terminal degree that offers the minimum professional training deemed necessary by the major schools in the United States for university and college teaching and for positions in the publishing industry. It is also the degree most frequently held by professional writers.

For additional information, please see the program website at http://www.sjsu.edu/english/graduate/mfa/

Admissions Requirements

Requirements for Admission to Classified Standing

Applicants must meet university requirements for admission to the Graduate Division and classified standing as outlined in this catalog. In addition, they must meet the following department requirements:

- Earned a 3.0 grade point average in major courses.
- Demonstrate ability in Creative Writing by submitting a creative writing portfolio in Fiction (20-30 pages), Creative Nonfiction (20-30 pages), Poetry (10 pages), or Scriptwriting (20-30 pages).
- Be approved by the departmental MFA in Creative Writing Committee. For each annual cycle, applications are due by March 1, when review will begin.

Achieved one of the following:

- Possess a bachelor’s degree or master’s degree in English, Creative Writing, or a related field from an accredited institution.
- Passed a minimum of 12 semester hours in English, Creative Writing, or a related field beyond freshman composition.
- Demonstrated equivalent literary training or experience as determined by the Director of the MFA in Creative Writing Program.

Additional preparation may be required before a student can be considered for classified status in the degree program, at the discretion of the MFA Director (see Requirements for Admission to Conditionally Classified Standing).

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage of CAPE.

Requirements for Admission to Conditionally Classified Standing

Students who do not qualify for classified standing but who meet university requirements for graduate admission and whose past performance and creative writing ability gives promise of satisfactory completion of requirements for admission to classified graduate standing may, with the approval of the departmental MFA in Creative Writing Committee, be admitted as conditionally classified in the MFA program.

Requirements for Advancement to Graduate Candidacy

Candidacy denotes that the classified graduate student is fully qualified to complete the final stages of the MFA in Creative Writing program and is thus eligible to enroll in ENGL 291: Literary Practicum, and ENGL 299. In order to advance to candidacy, the student must meet the university requirements for advancement to candidacy as outlined in this catalog. The university requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled Graduation Writing Assessment Requirement for details. Most graduate-level literary seminars meet the GWAR.

For graduate courses that meet the GWAR, please refer to the GWAR Course List on the College of Graduate Studies website. In addition, the student must:

- Complete 24 units of an approved 44-unit program with a GPA of 3.0 or better. At least one-half of these units must be graduate-level (i.e., 200-numbered) courses. Any upper-division courses to be applied to the MFA must be approved in advance by the MFA Director.
- Formalize his or her MFA thesis committee by obtaining the signatures of three university faculty members (two must be members of the Creative Writing or English faculty) to serve as members of the student’s committee. A tenure-line Creative Writing faculty member who teaches in the student’s major area of emphasis must serve as chair.
- Propose to write a substantial full-length work, with critical introduction or preface (see below), in one of the four program emphases: Poetry, Fiction, Nonfiction, or Script Writing.
- Sign up to take the MFA Comprehensive Examination, which a student must pass before an MFA degree is awarded.

Culminating Experience

All candidates for the MFA degree in Creative Writing must complete a book-length thesis in their primary genre. The thesis must be approved by a three-member committee, of which at least two members must be full-time SJSU faculty. Thesis committees and projects are declared in the Departmental Thesis Proposal, which is submitted to the Graduate Committee of the Department of English & Comparative Literature the semester before the candidate registers for four units of ENGL 298D or ENGL 299.

At the time of filing for candidacy, MFA candidates must select from two options for filing the final documents. Plan A (Thesis), which we refer to as a University Thesis, will require enrollment in ENGL 299, and the resulting thesis will be reviewed by the College of Graduate Studies and published online, as described below. Plan B (Project), which the Department of English and Comparative Literature refers to as a Departmental Thesis, will require enrollment in ENGL 298D and is considered by the university as a “project” and thus not subject to review by the College of Graduate Studies nor to the policy requiring university theses to be published. Please note that the departmental requirements for the thesis itself as well as the composition of the thesis committee are the same under both options.

Candidates select their Thesis Plan on the Petition for Advancement to Graduate Candidacy form, typically submitted the semester prior to graduation (e.g., in October for May graduation, or in April for December graduation). Although the Candidacy Form lists three plans -- A, B, and C -- MFA candidates may select only Plan A or Plan B.
### Plan A (Thesis): University Thesis

After approval by the three-member thesis committee, MFA candidates submit the final manuscript as a PDF to the University’s College of Graduate Studies, where it is checked for format. Once certified by Graduate Studies, the PDF is published in two places: on ProQuest (a commercial academic publisher) and on ScholarWorks (the University’s open-access repository). Distribution through these two channels assures that research generated by SJSU students is available to as many readers as possible. Candidates who wish to shield their work from public view temporarily, for example to allow time for commercial publication, can request an embargo of up to five years. After the embargo expires, candidates can ask for an extension or allow the document to be released online. It is possible for access to be restricted to users of the SJSU campus network. Embargo and access options are chosen by candidates when they submit their theses to Graduate Studies.

Only theses submitted via Plan A are eligible for the University’s Outstanding Thesis Award, a distinction given annually to the one or two exceptional theses in the entire university. The award is presented at graduation and includes a monetary stipend. Candidates should ask their thesis directors or department chairs for more information about this award.

### Plan B (Project): Departmental Thesis

Under this option, the thesis manuscript is prepared according to University guidelines and approved by a three-member thesis committee and then signed off by the Chair of the Graduate Committee and the Department Chair. The manuscript is not submitted to the College of Graduate Studies. Instead, candidates may deposit a printed, bound copy of their thesis in the collection of the Department of English & Comparative Literature and, optionally, on the thesis shelf of the University Library (binding paid for by the candidate). Because the Departmental Thesis is never published online, this option makes sense for MFA candidates who wish to give their work the maximum possible protection. It is recommended for those students who wish to protect copyright of their creative work for future publication.

Departmental Theses are neither eligible for the University’s Outstanding Thesis Award nor for nomination to the Proquest Thesis Award.

### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

*Note that College of Graduate Studies requires all creative works that serve as theses (novels, poetry collections, screen plays, and so forth) to be accompanied by a preface. At a minimum of 10 pages, the preface should put the creative work in historical, cultural, literary, or other contexts. It should also expound on the literary influences on the student. The text must be written according to a style guide, APA being the guide of choice in the English and Comparative Literature Department, and include formal literature citations and a References Cited section, both written in accordance with the style guide rules.

Elective courses must be planned in consultation with the English MA Advisor.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Introduction
The mission of the Department of Environmental Studies is to provide students with rigorous interdisciplinary tools to study, manage and resolve environmental challenges. Among the first such programs in the country, the Department of Environmental Studies at SJSU has been granting degrees and training environmental professionals since 1970. Today, our students experience hands-on learning through field courses, the Center for Development of Recycling, the Environmental Resource Center and off-campus internships. Alumni fill positions in fields including environmental impact assessment, habitat restoration, renewable energy, water policy, environmental education, sustainable agriculture, park management, environmental policy, integrated waste management, and recycling. The program in Global Studies recently joined the Department, expanding offerings and opportunities to students. The BA in Global Studies is an interdisciplinary program that looks at the world holistically, examining the connections between international human migrations, the movement of goods, technology transfers, and environmental change. The Department offers a BS degree, BA degree, and a BA preparation for teaching in Environmental Studies in addition to the BA in Global Studies. We also offer a range of minors to students around campus. For students wishing to go further, the Department offers one of the few research-based Master of Science degrees in Environmental Studies in the country.
Structure of the BS, BA and MS Degrees

The undergraduate Environmental Studies degrees are structured around four components: the preparation sequence, consisting of specific classes in economics, sciences, and math; the core classes in Environmental Studies, which provide a solid foundation in environmental issues integrating science, social science, and the humanities; advisor-approved minor focused on a specific career pathway; and electives. Electives may consist of classes both within and outside the department and must be approved in advance by an Environmental Studies faculty advisor. The Master of Science graduate degree is a thesis-based program that requires original research. Information on all aspects of these degrees is found on the advising sheets available in the department office in Washington Square Hall 118 and on the department website at http://www.sjsu.edu/envs/.
BA - Environmental Studies

The BA degree is designed to prepare students for career opportunities in coastal resource management, environmental communications, environmental regulation and policy, integrated and solid waste management, human ecology and environmental planning.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst.

Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

### University Electives

0-6

### Total Units Required

120
### BA - Environmental Studies, Preparation for Teaching

This major is designed for students interested in teaching in elementary school or middle school. Students who wish to pursue a high school teaching career should complete a BA or BS in Environmental Studies in consultation with the department’s undergraduate advisor for teaching. The following course work satisfies San José State University’s requirements for a BA in Environmental Studies. The Commission on Teacher Credentialing in the state of California (CCTC) no longer recognizes Teacher Prep degrees as verification of subject matter competence. In order to verify subject matter competence for Multiple Subject Teaching Credential (K-8) individuals must pass all portions of the appropriate Commission-approved subject matter examination (CSET for Multiple Subjects).

Maintaining a minimum grade point average (CPA) of at least 2.87 and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

#### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](http://info.sjsu.edu/gwar.html) section of the Policies and Procedures.

#### 4-Year Program Roadmap

Students may find a roadmap for this program [here](http://info.sjsu.edu/gwar.html). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](http://info.sjsu.edu/gwar.html).

BS - Environmental Studies

The BS degree is designed to prepare students for career opportunities in energy or water resources management, biological resource protection, aquatic environments, sustainable agriculture, energy resources, environmental health and safety, environmental impact assessment, environmental restoration, and wilderness open space resource management.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>
<th>21</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 39 units required by the university, 18 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a &quot;C-&quot; or better to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

COMPLETE ONE SEQUENCE FROM:

African American Studies

| AFAM 002A. African Americans and the Development of America's History and Government | D2 | 3 |
| AFAM 002B. African Americans and the Development of America's History and Government | M7 | 3 |

Asian American Studies

| AAS 033A. Asian Americans in U.S. History I | D2 | 3 |
| AAS 033B. Asian Americans in U.S. History II | M7 | 3 |

U.S. History and Government

Chicana and Chicano Studies

| CCS 010A. Mexican Americans and the Development of U.S. History and Government | D2 | 3 |
| CCS 010B. Mexican Americans and the Development of U.S. History and Government | M7 | 3 |

Physical Education

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.
## Preparation for the Major

## Requirements of the Major

### Core Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENVS 001. Introduction to Environmental Issues</td>
<td>3</td>
</tr>
<tr>
<td>ENVS 100W. Environmental Research and Writing</td>
<td>3</td>
</tr>
<tr>
<td>ENVS 107. Introduction to Environmental Economics and Policy</td>
<td>3</td>
</tr>
<tr>
<td>ENVS 110. Resource Analysis</td>
<td>4</td>
</tr>
<tr>
<td>ENVS 117. Human Ecology</td>
<td>3</td>
</tr>
<tr>
<td>ENVS 124. Introduction to Environmental Law</td>
<td>3</td>
</tr>
<tr>
<td>ENVS 185. Environmental Impact Analysis</td>
<td>4</td>
</tr>
<tr>
<td>ENVS 198. Senior Seminar</td>
<td>3</td>
</tr>
</tbody>
</table>

### Major Electives

7-8 UNITS OF FIELD COURSES ARE REQUIRED FROM:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENVS 118. Sustainable Home Gardens</td>
<td>4</td>
</tr>
<tr>
<td>ENVS 144. California Wetland Controversies</td>
<td>4</td>
</tr>
<tr>
<td>ENVS 154. Sustainable Agriculture</td>
<td>4</td>
</tr>
<tr>
<td>ENVS 161. California Wildlands</td>
<td>4</td>
</tr>
<tr>
<td>ENVS 165. National Parks</td>
<td>3</td>
</tr>
<tr>
<td>ENVS 166. Nature and Conservation Photography</td>
<td>4</td>
</tr>
<tr>
<td>ENVS 173. Forest Ecology and Conservation</td>
<td>4</td>
</tr>
<tr>
<td>ENVS 187. Environmental Restoration</td>
<td>4</td>
</tr>
<tr>

<td>4</td>
</tr>
<tr>
<td>ENVS 191. Advanced Environmental Restoration</td>
<td>4</td>
</tr>
<tr>
<td>ENVS 270. Field Studies in Water Resource Management</td>
<td>4</td>
</tr>
</tbody>
</table>

RECOMMENDED THAT STUDENTS TAKE 1-3 UNITS OF:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENVS 194. Environmental Internship</td>
<td>1-9</td>
</tr>
</tbody>
</table>

IN CONSULTATION WITH YOUR ADVISOR, COMPLETE ONE SEQUENCE (6-9 UNITS) FROM:

### Sequence One

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENVS 168A. Global Climate Change I</td>
<td>6</td>
</tr>
<tr>
<td>ENVS 168B. Global Climate Change II</td>
<td>3</td>
</tr>
</tbody>
</table>

### Sequence Two

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENVS 150: Introduction to Environmental Thought</td>
<td>3</td>
</tr>
<tr>
<td>ENVS 159: Nature and World Cultures</td>
<td>3</td>
</tr>
</tbody>
</table>

COMPLETE ONE ‘R’ COURSE FROM:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENVS 111. Geology and the Environment</td>
<td>3</td>
</tr>
<tr>
<td>ENVS 113. Atmospheric Pollution</td>
<td>3</td>
</tr>
<tr>
<td>ENVS 119. Energy and the Environment</td>
<td>3</td>
</tr>
<tr>
<td>ENVS 152. Globalization and the Environment</td>
<td>3</td>
</tr>
</tbody>
</table>

### Advisor-Approved Required Minor

Minor - Recreation and Nature

This multidisciplinary minor covers topics including conceptual foundations of play, recreation and leisure; understanding structures and processes of living systems; managing outdoor recreation behavior; human activity impacts on living systems; and design and implementation of interpretive programs. Students will learn how to balance recreation needs with protecting and enhancing the natural environment. This is an ideal minor for students who are passionate about promoting and protecting outdoor recreational spaces and nature.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Courses that meet General Education/American Institution requirements are noted with area designation for required area.

For Legend please see page 2
Certificate - Global Citizenship

Global Citizenship is an interdisciplinary certificate program intended to assist students and members of the non-student community in understanding the interconnectedness of peoples, genders, cultures, and societies and celebrating the richness of human diversity in a global context. The program complements SJSU’s goals of globalizing the campus and graduating students who are globally responsible citizens. Students will examine questions of meaning and value associated with citizenship in today's increasingly connected world. Students will also develop their own understanding of personal, social, and corporate responsibility to the global community. In a rapidly changing world, it is necessary for college students to acquire the knowledge, skills, values, and attitudes to adapt and thrive in the enlarged and evolving global context. This degree is listed with the Global Studies.
MS - Environmental Studies

The Master of Science in Environmental Studies program is designed to prepare students for careers as environmental professionals or to pursue further academic training in Ph.D. and other advanced degree programs. Global and local perspectives are integrated in the coursework and the faculty and students embrace a diversity of perspectives. Faculty members work closely with graduate students within the above areas of specialization to execute a program of study. For additional information, review the list of faculty thesis advisors and contact those with focus areas of interest to you. See the department website for more information: http://www.sjsu.edu/envs/graduate/

Our interdisciplinary curriculum embraces both quantitative and qualitative research, and some of the topics that it focuses on include:

- California Wild (Protected) Lands
- Forest Ecology and Conservation
- Climate Impacts Research
- Human Ecology
- Coastal Environments
- Agroecology
- Insect Conservation
- Corporate Sustainability
- Marine Environments
- Energy
- Nature and Conservation Photography
- Environmental Education
- Political Ecology
- Environmental Impact Assessment
- Pro-environmental Behavior
- Environmental Justice
- Sustainable Food Systems
- Environmental Policy
- Water Resources Management
- Environmental Restoration
- Wetlands Ecology, Restoration, and Management
- Wildlife Conservation and Management

Admissions Requirements

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the Environmental Studies Program. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

The Department of Environmental Studies admits students to the Master of Science programs in Classified or Conditional Standing. Contact the department or see our admissions materials for specific application deadlines. For admission to classified standing the department requires the following:

1. An undergraduate degree in Environmental Studies or related field from an accredited institution;
2. An overall grade point average of 3.0 ("B") or better for the last 60 semester units of academic study;
3. The capability, in the opinion of the graduate committee, of successfully completing degree requirements;
4. The removal of deficiencies if preparation differs markedly from the BS - Environmental Studies at San José State University. (BA students may be required to complete a general science background.) Courses used to remove such deficiencies cannot be used to fulfill MS requirements. For further information, see graduate coordinator;
5. Two letters of recommendation from university faculty members or professionals in the field;
6. A personal statement of purpose that describes your background and objectives for seeking the MS - Environmental Studies at SJSU. This letter should also convey a sense of focus and direction for thesis research and potential faculty thesis advisers in the department; and

7. Applicants from countries in which the native language is not English must achieve a minimum score of 580 (Paper Based), 237 (Computer Based), or 92 (Internet Based) on the TOEFL exam for foreign students.

Requirements for Admission to Conditionally Classified Standing
If not accepted into classified standing, the applicant may qualify for conditionally classified status for which the following will be required: the ability, in the opinion of the departmental graduate committee, to remove deficiencies in a period not to exceed the equivalent of one full-time semester of coursework. The individual admission letter will explain required terms and conditions for attaining Classified standing.

Requirements for Advancement to Candidacy
Once a student has completed all required courses, with the exception of ENVS 299: Master’s Thesis or Project, and has submitted a completed and signed thesis proposal to the Graduate Coordinator, a Petition to Advance to Candidacy [http://www.sjsu.edu/gape/forms/candidacy.pdf] must be submitted to the Graduate Coordinator and GAPE office. The application to candidacy should be submitted a year prior to the expected graduation date. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, students must secure the commitment of three faculty members of the university, two of whom must be members of the permanent faculty, to serve as members of the student’s Plan A (thesis) or Plan B (Project) committee, with one permanent faculty member agreeing to serve as chair. The committee must approve the student’s thesis or project proposal for the master’s degree no later than one month prior to the end of the semester preceding the one in which enrollment in the final project or thesis course(s) is planned.

Requirements for Graduation
University Graduation Requirements
Students must complete all residency, curriculum, unit, CPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

In consultation with the department graduate coordinator, the candidate will develop and pursue a program of study. The candidate must successfully complete all requirements of the selected plan including the course work specified in the Master’s Degree Approval Program.

Culminating Experience
Students choose a Plan A (Thesis) or Plan B (Project) option as their program culminating experience. Each student must secure the commitment of three faculty members of the university, two of whom must be members of the permanent faculty, to serve as members of the student’s Plan A (thesis) or Plan B (Project) committee, with one permanent faculty member agreeing to serve as chair. The committee must approve the student’s thesis or project proposal for the master’s degree no later than one month prior to the end of the semester preceding the one in which enrollment in the final project or thesis course(s) is planned.

Plan A (Thesis)
The thesis will include original research on a topic approved by the thesis committee, and must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will undergo a thorough review and revision process under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee. In addition, the candidate for the MS degree must successfully pass a final oral defense of the thesis.

Plan B (Project)
Under rare circumstances, a very strong project of appropriate scope and depth for master’s level work might be approved in lieu of the thesis. This option requires the written consent of at least three graduate advisors, the graduate coordinator, and the department chair. In addition to the required coursework, Plan B students will take comprehensive examinations on three topics to be arranged by the student’s project committee.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

⦁ BA, Theatre Arts, Preparation for Teaching (Not Accepting Students)
⦁ Minor, Radio-Television-Film
⦁ Minor, Theatre Arts
⦁ Minor, Musical Theatre

Introduction

The Department of Film and Theatre prepares students for successful careers and leadership roles in performance and media. We develop media artists, directors, screenwriters, actors, designers, cinematographers, producers, technicians, educators, and scholars of the highest possible caliber. The entertainment industry is one of the largest contributors to the national economy, and media creators and performers are some of the strongest influencers in our society. To produce and distribute media that influence cultural dialogue, requires a rigorous liberal arts education. All aspects of Film and Theatre are under the guidance of award-winning filmmakers and theatre professionals, many of whom work in the industry. As a center for the training of future artists the Department of Film and Theatre is committed to introducing a diversity of fine arts and cultures to students. The Department provides students with the foundation to enter the entertainment industry, giving them excellent preparation to attend graduate school or enter the profession directly after graduating with their program degree.

The BA in Radio-Television-Film focuses on the development of creative voice and artistic expression in the context of a rigorous liberal arts education. This comprehensive program emphasizes a hands-on, project-based approach in which students will learn all the aspects of radio, television and film production through the use of our state-of-the-art facilities and best industry practices. Students will receive a solid foundation in the areas of Television/Film Production, Screenwriting, Radio-Television-Film Studies and Radio/Audio Production. Our Radio-Television-Film Studies program offers a comprehensive study of media from historical, cultural, and critical perspectives. While earning a BA in Radio-Television-Film students gain industry experience working with Spartan Studios (our in-house film studio), developing their directing skills for television and film, interning for local film festivals, or working on numerous media projects from the Bay Area to Los Angeles, across the country, and internationally.

The BA in Theatre gives students an opportunity to participate in a strong professional theatre curriculum with high quality productions that serve as a learning laboratory in which students collaborate with faculty and guest professionals; through studio workshops and advanced productions at San Jose State University’s newly acquired Hammer Theatre. The Theatre Program offers three areas of study with the specific goals of serving each student: acting and directing for film, television and theatre; musical theatre; and design and technology. While earning their BA in theatre, students gain real-world experience from working onstage and backstage with professional organizations such as the California Shakespeare Theatre, Magic Theatre, San Francisco Playhouse, TheatreWorks and the Berkeley Repertory Theatre.
BA - Radio-Television-Film

The Radio-Television-Film program is designed for students interested in working in and studying the world of media. Once students complete the required, well-rounded base of audio/film/video/writing/scholarship courses, students can then choose to focus more specifically with the program’s degree completion options.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Core Lower Division General Education

Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

BA - Theatre Arts

The Theatre Major emphasizes a strong foundation in acting, directing, writing, design and entertainment technologies. Theatre Arts students study the history and practices of theatre with a particular emphasis on the interrelationship between theatre and contemporary performance culture. Once students complete the required, well-rounded base of core courses, students can then choose to focus more specifically with the program's elective specialization areas.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

BA - Theatre Arts, Preparation for Teaching (Not Accepting Students)

This major is designed for students interested in teaching English or theatre arts in high school or middle school. The following course work satisfies San José State University’s requirements for a BA in Theatre Arts. A Minimum grade point average (GPA) criteria may be required for verification of subject matter competency. Completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Curricula
⦁ BS, General Engineering
⦁ Minor, Applied Computing for Behavioral and Social Sciences
⦁ Minor, Green Engineering
⦁ MS, Engineering
⦁ MS, Engineering, Concentration in Electronic Materials and Devices

Introduction
In addition to the traditional disciplinary majors, the College of Engineering offers an MS Engineering (MSE) with special concentrations, and a BS General Engineering. Both the BS and MS programs encompass interdisciplinary study. The College also offers minors in Green Engineering Minor and Applied Computing for Behavioral and Social Sciences.
BS - General Engineering

For selected high-performing students the General Engineering degree is an opportunity to develop a special interdisciplinary major. Students must meet with a General Engineering advisor early in their studies to determine if such a plan is right for them. Other students entering General Engineering are encouraged to explore the various traditional engineering fields and select a program which fits their interests by their second year of study at SJSU. All College of Engineering undergraduate majors are required to maintain a Major GPA of 2.0 or above. Major GPA includes all courses required for the major, including math, science and engineering.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

The following courses in Preparation for the Major must be completed with a “C or better”: ENGL 001B

<table>
<thead>
<tr>
<th>University Graduation Requirements</th>
<th>24</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Lower Division General Education</td>
<td>6</td>
</tr>
<tr>
<td>Of the 39 units required by the university, 33 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

| Upper Division General Education | 6 |
| Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details. |

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

<td></td>
</tr>
</tbody>
</table>

Physical Education

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

### Total Units Required

120
**Minor - Applied Computing for Behavioral and Social Sciences**

An interdisciplinary technology pathway program for behavioral and social science students seeking to develop and apply computing knowledge and skills toward real-world problems. Students learn programming languages such as Python and R, develop a working knowledge of data structures and algorithms, and complete a culminating interdisciplinary project.

**University Graduation Requirements**

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

<table>
<thead>
<tr>
<th>Requirements of the Minor</th>

</tbody>
</table>

**Total Units Required**

| 12 |
## Minor - Green Engineering

Students must complete a minimum of 12 units as listed under the course requirements. All of these units must be outside the requirements for the students major, i.e., the same courses cannot be listed both on the minor and the major forms. ENGR 102 or ME 172 (3 units) and ISE 103 (3 units) are required for all students taking this minor. Students also take one of the Environmental Studies or Business courses listed below. In consultation with the Green Engineering advisor, students must select one additional elective course. It is the student’s responsibility to make sure that the prerequisites for each course are met. Students in majors other than engineering will probably need to take additional courses to meet prerequisites for the courses required for this minor. This sequence of courses is the recommended pattern for engineering majors.

### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

MS - Engineering

The MS Engineering degree is an interdisciplinary program with the primary objectives of offering the practicing engineer the opportunity to develop a wide range of knowledge and skills needed to function in today's complex industrial environment. The program is designed to provide flexibility for students who need coursework that is truly interdisciplinary and not available through the other engineering programs in the college. The MS-Engineering programs typically include courses from at least three different programs in the College of Engineering and may also use courses in the College of Science or the College of Business. There are some specialized programs offered off-campus, such as the accelerated joint degree MBA/MS Engineering, which is offered in coordination with the College of Business. Additional off-campus specialized engineering graduate programs have been established at local industry sites. The MS Engineering programs include participation with local industry professionals as committee members and sponsors of master’s projects and theses.

Requirements for Admission to Classified Standing
Students seeking admission to MS Engineering programs must meet the general university requirements for admission as outlined in this catalog. In addition, the applicant must possess a baccalaureate degree from an ABET-accredited engineering program with a grade point average of at least 3.0 in the last 60 semester hours of upper division work completed in all subjects and in technical subjects only. Students meeting these criteria may be admitted in classified standing; however, students may still be admitted conditionally if they need prerequisite courses for the selected specialization. An engineering technology degree does not satisfy the degree requirement for admission to this program.

Requirements for Admission to Conditionally Classified Standing
A graduate applicant whose undergraduate record indicates deficiencies in one or more technical areas and/or has a grade point average less than 3.0 in the last 60 semester hours of upper division work completed in all subjects and in technical subjects only may be admitted for graduate work on a conditionally classified basis. Such students will be expected to satisfactorily complete additional coursework before becoming classified. Students admitted in conditionally classified status may petition for classified status when coursework in deficient areas has been completed, when they have satisfied the Graduation Writing Assessment Requirement (GWAR), and when their records in classes at San José State University show sufficient promise of success in the master’s degree program.

Requirements for Admission to Candidacy
Students seeking the MS Engineering degree must meet the general university requirements for candidacy as outlined in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJU catalog section titled “Graduation Writing Assessment Requirement - Graduate” for details. For graduate courses that satisfy the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, the applicant must demonstrate aptitude for advanced professional work in engineering as measured by instructor appraisals, analysis of previous academic work or other appropriate means. Admission to candidacy and approval of programs will be handled by a faculty committee and the student’s advisor.

Completing Requirements for the MS - Engineering
The normal course of study for the MS-Engineering degree consists of 30 semester hours of approved work in the following areas:

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

## Culminating Experience

**COMPLETE ONE SEQUENCE FROM:**

- **Master’s Thesis Sequence (Plan A)**
  - ENGR 281. Master’s Project/Thesis Preparation Seminar ................................................................. 1
  - ENGR 299. Master’s Thesis ............................................................................................................... 1-6

- **Master’s Project Sequence 1 (Plan B)**
  - ENGR 281. Master’s Project/Thesis Preparation Seminar ................................................................. 1
  - ENGR 298. Master’s Project ........................................................................................................... 2

- **Master’s Project Sequence 2 (Plan B)**
  - ENGR 295A. Master Project I ......................................................................................................... 3
  - ENGR 295B. Master Project II ....................................................................................................... 3

**Total Units Required**

Students have the option to complete the requirements for the MS by completing a thesis (Plan A) or a project (Plan B). The student must first complete ENGR 281 - Master’s Project/Thesis Preparation Seminar (1 unit) before beginning the thesis or project research.

The MBA/MS Engineering program and special off-campus programs are coordinated through the College of Engineering Graduate and Extended Studies (GES). Students interested in these programs should go to the Graduate and Extended Education section of the College of Engineering web site (www.ges.sjsu.edu).
**MS - Engineering, concentration in Electronic Materials and Devices**

The concentration in Electronic Materials and Devices provides students with an in-depth education in electronic materials processes and the design of semiconductor devices. This concentration includes elective emphases in the areas of Electronic Materials, Custom Analog VLSI and Custom Digital VLSI. Students may also choose to combine concentration electives to develop a custom emphasis, such as Mixed Signal VLSI.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

⦁ Minor, Geographic Information Science
⦁ Certificate, Advanced Certificate in Geographic Information Science (GIS)
⦁ MA, Geography

Introduction
We are the only Geography Department in the booming Silicon Valley. Our location in downtown San Jose provides the department a wonderful urban geography laboratory. We offer courses in all the academic sub-disciplines of geography including GIS and spatial analysis. We have long-standing relationships with government agencies, other universities, and the City of San Jose. We are developing research and educational partnerships with Facebook, Apple, Netflix, and Google as these, and other powerful technology companies are nearing the cusp of a locational analytics explosion. Geography is a rapidly growing field and our students gain the critical thinking, analytic and problem-solving abilities to prepare them to participate fully in rewarding careers. Prospective students are encouraged to consult the geography website (www.sjsu.edu/depts/geography/) as well as the informational brochures available in the department office (WSQ 118).

Departmental Geography Honors Program
Graduation with departmental honors in geography can be achieved by successful completion of any geography graduate seminar open to those seniors with a 3.5 GPA in geography, or completion of an Honors Thesis under supervision of a department faculty member. Students must have a 3.5 GPA in geography to qualify for Honors Thesis option.
BA - Geography

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>
<th>24</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE UNDER SB 1440 FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

| 9 |
| Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details. |

American Institutions

| 6 |
| The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details. |

**Total Units Required:** 15
MA - Geography

Admission to the graduate program is flexible, and potential students are evaluated on a case-by-case basis. A strong record based on either undergraduate performance or employment experience is expected. Graduate students without a geography degree can expect added course work in geographic literature and theory. More information can be found on our web site: http://www.sjsu.edu/geography/

Admissions Requirements

All graduate applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply. Additional information regarding university graduate admissions requirements in this catalog. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

Admissions to Classified Standing

Basic requirements for admission to the Graduate Division are outlined in the Admissions section of this catalog. In addition, the department requires the following for admission to classified standing:

1. An undergraduate degree in geography or a reasonably related field from an accredited institution.
2. A 3.0 (“B”) overall grade point average for the last 60 semester units of academic study.
3. The capability, in the opinion of the Department Graduate Committee, of successfully completing the degree requirements.
4. The removal of deficiencies if preparation differs markedly from the BA - Geography at San José State University.

Admissions to Conditionally Classified Standing

If not accepted into classified standing, the applicant may qualify for conditionally classified status for which the following will be required:

1. The ability, in the opinion of the Department Graduate Committee, to remove deficiencies which do not exceed the equivalent of one full-time semester of course work.
2. The qualifications to be accepted to classified standing within a reasonable length of time, and the background to conduct studies at the graduate level.

Requirements for Advancement to Candidacy

The student may be admitted to candidacy for the MA - Geography by complying with requirements of the university as outlined in the Academic Regulations section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, students must obtain their thesis advisor’s approval for their thesis proposal.

Students will complete a course of study designed to prepare them for professional work in their chosen subfield. Accordingly, they will need to take specific courses to support research and project work in that field.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Culminating Experience

In consultation with the department advisor, the candidate will develop and pursue a program of study outlined in Plan A or Plan B. The candidate must successfully complete all requirements of the selected plan including the course work specified in the Master’s Degree Approved Program.

Plan A (with Thesis)

1. A minimum of eighteen units in geography.
2. The thesis, based on independent research, is to be conducted under the direction of a thesis advisor and must be acceptable to and approved by the Thesis Committee. The Committee consists of the thesis advisor (committee chair), an additional member from the university faculty, and an additional member who may be from outside the university. The thesis topic shall be developed within the departmental foci in consultation with the thesis advisor. The thesis must conform to the university standards of style and form.
3. Final Examination: The thesis must be successfully defended orally before the thesis committee.
### Plan B (without Thesis)

1. A minimum of twenty-one units in geography, with at least 50% of the units in graduate level courses.
2. Project: The student shall present the results of a project in one of the areas of departmental focus. Appropriate projects include research completed for a geography graduate seminar or an independent study conducted under supervision of a faculty advisor. The results will be reported in a written paper and other materials submitted to the department, and will be presented formally to a geography faculty and student colloquium for acceptance.

#### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

<td></td>
</tr>
</tbody>
</table>

#### Total Units Required

Elective courses must be planned in consultation with the Graduate Advisor. The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15. Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

⦁ MS, Geology

Introduction
Rocks, soil, minerals, fossils, oceans, earthquakes, volcanoes, climate change—the Department of Geology specializes in increasing students’ understanding of the Earth and its geological features. We offer general education courses, K-12 teacher training and professional development, a rigorous, integrated undergraduate curriculum and graduate courses and research. Our bachelor’s degree program in geology prepares students for graduate study in the geosciences as well as for entry-level positions in geological and environmental consulting firms, regulatory agencies and other employment settings. Our bachelor’s program in earth science is designed to help students master the content needed for successful completion of the California Commission on Teaching Credentialing’s California Subject Examinations for Teachers, and provides a career path for students interested in becoming secondary school teachers. Our master’s degree program particularly emphasizes the study of applied geology, surface processes, and tectonics, enabling graduates to advance to Ph.D programs and to secure jobs as geologists, engineering geologists, hydrogeologists, geophysicists and environmental managers.

Geology and Earth Science Honors Program
Departmental honors in the BS Geology and Earth Science degree programs are awarded to those majors who have achieved a 3.5 grade point average in their required departmental courses and have completed an undergraduate research project. A proposal for undergraduate research, including an identified Geology faculty supervisor, must be approved by the Geology honors committee for acceptance into the honors program. Completion of two units of Geology 180 and both written and oral presentation of research results are required for completion of the program.
BA - Earth Science

This major provides broad background in the earth sciences. Students interested in teaching science in high school or middle school should take the specified elective courses (consult with the advisor as needed).

Completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

BS - Geology

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

### University Graduation Requirements

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

* A grade of C or better (C- not accepted) is required to meet graduation requirement.

### Total Units Required

**120**
### Minor - Geology

The Department of Geology offers a baccalaureate minor to supplement a major in some fields. The geology minor consists of at least 15 units, at least six of which must be upper division courses, selected in consultation with the geology advisor.

### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

#### Requirements of the Minor

MS - Geology

The MS program provides graduates with advanced training in Geology, culminating in the completion of an independent research thesis project. The academic curriculum and extensive faculty expertise provide the opportunity for study in many areas of Geology, with a particular emphasis on applied geology and tectonics. Graduates are employed as geologists, engineering geologists, hydrogeologists, hydrologists, geophysicists, environmental managers in engineering, geological, geophysical, and environmental consulting firms, and as geologists in the mining and petroleum industries.

The Geology Department welcomes students with undergraduate degrees in other disciplines.

For more information visit [www.sjsu.edu/geology/](http://www.sjsu.edu/geology/).

**Admission Requirements**

Candidates must meet all university [admissions requirements](http://www.sjsu.edu/geology/). Students can be admitted in either classified or conditionally classified standing. If an applicant’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements (typically because the student does not have a BS in Geology or related field), the conditions will include taking the core Geology BS courses to meet their requirements.

The GRE is not required.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the [Graduate Program Test Requirements](http://www.sjsu.edu/geology/) webpage at CAPE.

**Requirements for Admission to Graduate Candidacy**

**University Candidacy Requirements**

A student is eligible for admission to candidacy for the MS degree in Geology after the student has fulfilled the general all-university requirements for [admission to candidacy](http://www.sjsu.edu/geology/) as outlined in the Academic Regulations section of this catalog and the department requirements. Candidacy includes successful completion of the [Graduation Writing Assessment Requirement](http://www.sjsu.edu/geology/) (GWAR). For graduate courses that meet the GWAR, refer to the [GWAR Course List](http://www.sjsu.edu/geology/) on the College of Graduate Studies website. In addition, the student’s admission must be approved by the departmental graduate advisor.

**Department Candidacy Requirements**

The student will prepare a written thesis proposal in consultation with her/his thesis adviser. The student will defend her/his proposal in an oral examination with her/his thesis advisor and a minimum of two other thesis committee members.

**Requirements for Graduation**

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the [Graduation Requirements](http://www.sjsu.edu/geology/) section of the Graduate Policies and Procedures.

**Geology Department Requirements**

An approved program for each candidate may be designed in consultation with the advisor on the basis of each individual’s objectives. The program shall include at least 30 semester units earned beyond the bachelor’s degree in 200-level and 100-level courses approved for graduate credit. This total includes 4 semester units of thesis research. At least 12 units must consist of 200-level courses. All students are required to take a 2-unit seminar (GEOL 285). All candidates are required to submit a master’s thesis.

An oral presentation of thesis research is to be made before an open meeting of the Geology Department. The thesis must be approved by the student’s thesis committee and submitted in final form, as defined in the [SJSU Master’s Thesis and Doctoral Dissertation Guidelines](http://www.sjsu.edu/graduate/policies/gwrguidelines.html), to the Graduate Division of the university in accordance with published deadlines.

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

- Minor, Global Studies
- Certificate, Global Citizenship

Introduction
Global Studies at SJSU is an interdisciplinary program that encourages students to look at the world holistically. The tremendous international migrations of people, movements of goods, technology transfers, and mixing of cultures makes it important to study the world as a human community in ways we haven’t considered in the past. The program is designed to train future leaders to grapple with some of the most pressing issues of our time, from a global perspective. The focus of our program on studying global issues from multiple perspectives provides students the intellectual foundation and the analytical and communication skills to prepare for careers in government, education, NGOs, international development agencies, international philanthropic organizations, law, consulting, global health organizations, writing, and graduate study. We are the only Global Studies program in the San Francisco Bay Area and one of the few in the CSU system that offers an interdisciplinary program that includes a suite of core courses in Global Studies. Global Studies is a relatively new field and our program is at the leading edge of shaping this field for the future.
## BA - Global Studies

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

Minor Requirement

Global Studies majors are required to select a minor field in consultation with the Global Studies advisor.

Major Upper Division Electives

See a Global Studies Advisor for approved Upper Division Electives.

University Electives

Total Units Required
### Minor - Global Studies

Students may complete a minor in Global Studies by completing 15 units of lower and upper division core coursework in Global Studies.

#### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Certificate - Global Citizenship

Global Citizenship is an interdisciplinary certificate program intended to assist students and members of the non-student community in understanding the interconnectedness of peoples, genders, cultures, and societies and celebrating the richness of human diversity in a global context. The program complements SJSU’s goals of globalizing the campus and graduating students who are globally responsible citizens. Students will examine questions of meaning and value associated with citizenship in today’s increasingly connected world. Students will also develop their own understanding of personal, social, and corporate responsibility to the global community. In a rapidly changing world, it is necessary for college students to acquire the knowledge, skills, values, and attitudes to adapt and thrive in the enlarged and evolving global context.

- MS, Recreation, Concentration in International Tourism (Not Accepting Students)

Introduction
The Department of Health Science and Recreation prepares leaders and practitioners who promote health and improve the environments in which we live, work, learn, and play. We strive to embrace a Teacher-Scholar-Practitioner Model through student, alumni, faculty, and community engagement to advance practices in public health and recreation fields. Our undergraduate curriculum in public health examines the multiple dimensions/determinants of health (e.g., physical, emotional, social, environmental, and spiritual) and the scientific and practical basis for understanding and promoting health at the population level (including epidemiology, policies, and community health) to create the optimal, meaningful conditions for health and wellness for all. Founded in 1970, the Master of Public Health program (MPH) has been accredited by the Council on Education for Public Health (CEPH) since 1974 and is offered in two formats. Our campus format is regular session and offers the flexibility to complete the program full or part-time. Our synchronous online format is offered through the College of Professional and Global Education. Our MPH students engage in an integrated program of learning, scholarship, and internships in partnership with a diverse network of community agencies. Our recreation degree program, founded in 1947 (the oldest undergraduate recreation degree program in the State of California), has a core curriculum continuously accredited by the Council on Accreditation of Park, Recreation, and Tourism Related Professions (COAPRT) since 1987. We offer concentrations in Recreation Management and Recreation Therapy, as well as a minor in recreation and a minor in recreation and nature. We also plan to offer an innovative Master's Program in Recreation through Northern California CSU four-campus coalition.

All of our programs at both undergraduate and graduate levels incorporate student-centered curriculums with our commitment to community development, social justice orientations, interdisciplinary and intercultural/globalized approaches with its emphasis on rigor and innovation, high-impact experiential learning, and career-focused applied orientations. Developed by our recent strategic planning process, our new vision statement of the department is as follows - “We aspire to be innovators and leaders in learning and teaching, scholarship, and professional practice by integrating public health and recreation to ignite social change and work towards a more vibrant, prosperous, and just world where the optimal health and well-being of individuals and communities are achieved and sustained.”
BS - Public Health

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements
All courses in Required for the Major Core must be completed with a grade of “C” or better to graduate. All other approved electives require a “C-“ or better to graduate.

Health Science and Recreation International Experience Requirement
To satisfy the Health Science and Recreation Department international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Health and Human Sciences based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at http://www.sjsu.edu/chhs/international-experience/.

University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>
<th>24</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C” or better to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

Note: Students who have completed the ADT transfer degree (under SB 1440) for this major will have completed all lower division GE requirements and should follow the 60 unit guarantee roadmap. Meet with an advisor prior to registering for your first semester for the 60 unit roadmap or specific questions.

Upper Division General Education

| Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details. |
| 6 |

American Institutions

| The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details. |

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Preparation for the Major

Students in this major must earn a grade of "C" or better in each of the courses required in the Preparation for the Major.

- HS 001. Understanding Your Health ............................................................................................................................................................................................................................................... 3
- HS 015. Human Life Span .................................................................................................................................................................................................................................................. 3
- HS 025. Health Team Building ......................................................................................................................................................................................................................................... 3
- HS 067. Introductory Health Statistics .......................................................................................................................................................................................................................... 3

Any course that is currently articulated to STAT095 may be used to fulfill the HS067 preparation course for this major. UNVS 015F and UNVS 015S may be used in lieu of the statistics course required by this major.

- HS 074. Healthy Communities .................................................................................................................................................................................................................... 3

Requirements of the Major

Students must complete the following CORE courses with a grade of "C" or better to graduate. All other upper division electives require a "C-" or better to graduate.

Core Courses

- HS 03. Introduction to Health Policy ......................................................................................................................................................................................................................... 3
- HS 04. Community Health Promotion .................................................................................................................................................................................................................. 3
- HS 114. Applications in Community Health Promotion ............................................................................................................................................................................... 3
- HS 135. Health Issues in a Multicultural Society ............................................................................................................................................................................................................. 3
- HS 158. Health Communications .................................................................................................................................................................................................................. 3
- HS 159. Health Program Planning ................................................................................................................................................................................................................ 3
- HS 161. Epidemiology ................................................................................................................................................................................................................................. 3
- HS 162. Health Care Organization and Admin ........................................................................................................................................................................................................ 3
- HS 165. The Health Professional ................................................................................................................................................................................................................. 3
- HS 167. Biostatistics ................................................................................................................................................................................................................................. 3

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Any course that is currently articulated to STAT095 may be used to fulfill the HS067 preparation course for this major. UNVS 015F and UNVS 015S may be used in lieu of the statistics course required by this major.

- HS 074. Healthy Communities .................................................................................................................................................................................................................... 3

Additional Courses

Students must complete a Minor or take 21 units of upper division electives

BS - Recreation, Concentration in Recreation Therapy

Recreation therapy is a systematic process of treatment services that utilize recreation and other activity-based interventions to address the assessed needs of individuals with illnesses and/or disabling conditions, as a means to improve psychological and physical health, recovery, and well-being. Graduates of recreation therapy work in a wide range of health services settings (i.e. veterans administration, mental health, addictions, physical medicine, rehabilitation, prison/corrections, pediatrics, municipal park and recreation, hospice, skilled nursing, adventure/therapeutic camps, and private practice).

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

# Minor - Complementary and Alternative Health Practices

The Complementary and Alternative Health Practices Minor program is designed to provide a strong academic understanding of the theory, practice, and effectiveness of complementary and alternative medical (CAM) therapies. Emphasis is on critical thinking skills and using a scientific evidence-based eye while keeping an open mind. Classes will form the basis for evaluating CAM therapies commonly practiced by U.S. residents.

### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

## Requirements of the Minor

Master of Public Health Program

San José State University offers an MPH degree with a specialization in community health education in two formats; On Campus (regular session) and also online (through the College of Professional and Global Education). Both on campus and online students engage in the same rigorous course of study. The MPH degree on campus offers students the flexibility to complete their degree in two years or more, depending on personal circumstances. The MPH online option is offered through Special Session and is a fast-paced, 24-month program of study.

Our MPH Program was founded in 1970 to prepare community health education practitioners and has been continuously accredited by the Council on Education for Public Health (CEPH) since 1974. CEPH is the independent agency officially recognized to accredit graduate programs in public health. As stated in its mission statement, CEPH assures quality in public health education and training to achieve excellence in practice, research and service, through collaboration with organizational and community partners. The SJSU MPH Program is well-known for its practice-oriented, community-based training. The program’s essential mission is:

To provide professional education that prepares both students and graduates with knowledge, conceptual frameworks, health education and public health competencies, in order to develop programs, build community capacity, and advocate policy for health equity.

The MPH program’s mission is achieved through an integrated program of instruction, scholarship, and internships in partnership with a diverse network of community programs and practitioners. Our ultimate goal is public health and social justice through planned, organized, and empowering community efforts. Additional information is available on the Master of Public Health website at www.sjsu.edu/hsr/academicprograms/mph/

Graduate Admission

University Admission
Candidates must apply through the CSU admissions portal, Cal State Apply, and meet all university graduate admissions requirements.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE.

Program Admission
New students are admitted once a year, and begin course work during the fall semester in both online and campus formats. A detailed Admissions Information Packet is available at http://www.sjsu.edu/hsr/academicprograms/mph/oncampusprogram/applyingtotheprogram.

Applications for the Campus and Special Session Online formats are accepted between October 1 and May 1 for fall admission. Applications received by February 1 are eligible for early review and admission. Applications received between May 1 and June 1 will be considered on a space available basis. Applications received after June 1 will not be eligible for review and will require resubmission for consideration for the next application cycle. Applying to the MPH program, both campus and online, requires two parallel, but separate, application processes. All MPH applicants must:

A. Submit a complete university application through Cal State Apply. Successful applicants must be admitted to the university by the SJSU Graduate Admissions and Program Evaluations.

B. Submit a complete application to the MPH program, which includes:
   1. At least two letters of recommendation on official letterhead, signed, and include contact information for author
   2. Resume/CV
   3. Statement of Purpose (1-2 pages)

Additional information and the Application Packet are available on the department website: http://www.sjsu.edu/hsr/academicprograms/mph/admissions/index.html

Program Requirements for Admission to Classified Standing
Students can be admitted in either classified or conditionally classified standing. To be admitted to the Master of Public Health Program in Classified status, an applicant must possess a baccalaureate degree with overall minimum GPA of 3.0 in last 60 semester or quarter units, demonstrated multicultural experience, and a clear commitment to public health as evidenced through work or volunteer experiences.

Program Requirements for Admission to Conditionally Classified Standing
Admission with Conditionally Classified standing is available to Campus format applicants only. If an applicant’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, the applicant may be admitted with conditions that will include taking longer than two years to complete the program and taking writing and/or computation preparation courses. The program admissions letter will explain terms and requirements.
Requirements for Advancement to Candidacy
Matriculated graduate students must submit a Petition for Advancement to Graduate Candidacy a minimum of one semester prior to graduating. General university requirements for advancement to candidacy for the MPH degree are detailed in the Graduate Policies and Procedures section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section “Graduate Degree - Graduation Writing Assessment Requirement (GWAR)” for details.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Course Requirements
To meet the requirements for the MPH, a student must complete 42 units (and satisfy the program GWAR requirement) with a cumulative GPA of 3.0 or better. In consultation with the department graduate coordinator, the candidate will develop and pursue a plan of study. The candidate must successfully complete all requirements of the selected plan including the course work specified in the Master's Degree Approval Program. The MPH program requires grades of B- or better to pass courses.

Culminating Experience
The student must complete one of three culminating experience options: Plan A (Thesis), Plan B (Project), or the courses-only Plan B (Comprehensive Examination). Master's theses and graduate projects may only be undertaken by regular session MPH Campus students upon departmental approval and will require additional units. The Plan A (Thesis) option requires additional 6 units of coursework and College of Graduate Studies approval of the completed thesis. The Plan B (Project) option requires a minimum of 3 additional units of coursework.

Plan A (Thesis)
Campus students opting to complete a master's thesis will take the HS 299, Master's Thesis twice for an additional 6 units over program requirements. The student is responsible for securing the commitment of a full-time tenured or tenure-track MPH faculty member who agrees to serve as thesis committee chair. The student must also secure the commitments of two additional university faculty members, one of whom must be a full-time tenure or tenure-track faculty member, to serve as the student’s thesis committee. The student must write a thesis proposal and have it approved by the thesis committee, and pass the HS 205 and 215 courses before enrolling in the HS 299. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee.

Plan B (Project)
Campus students opting to complete a master’s project will take the HS 298, Graduate Project for an additional 3-6 units over program requirements.

Plan B (Comprehensive Exam)
All Online students and Campus students opting for the courses-only option must pass the Comprehensive Exam (given once a semester) to earn the MPH degree. The Comprehensive Exam is the student’s opportunity to demonstrate mastery and integration of the knowledge and skills of the MPH curriculum. The comprehensive exam is a written exam that is administered on campus in a computer lab.

Special Session Program Information
Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the IES website for more information.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

MS - Recreation

General Requirements for Admission
Applicants to the graduate program must complete all sections of the CSU online application including the personal statement which must address the applicant’s potential to develop expert knowledge and the advanced skills needed to succeed in the field and/or to continue study in a doctoral program. Criteria for admission include an overall grade point average of 2.5 and an upper division grade point average of 3.0. Additionally, applicants are requested to send a copy of their personal statement and their resume to the department graduate coordinator.

Requirements for Admission to Candidacy for the MS - Recreation
In addition to university requirements for admission to candidacy for the Master of Science degree in Recreation, students must have completed the following requirements: all deficiencies must be completed with a grade point average of at least 3.0, the admission to candidacy form must be completed and approved by the graduate program advisor and the Associate Dean for College of Graduate Studies; and the Graduation Writing Assessment Requirement (GWAR) must be demonstrated at least one semester prior to submission of the admission to candidacy form. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Curricula
⦁ BA, History
⦁ BA, History and Social Science Teacher Preparation Double BA
⦁ BA, Social Science, Preparation for Teaching (Single Subject)
⦁ BA, Social Science, Preparation for Teaching (Multiple Subject-Not Accepting Students)
⦁ Minor, Ancient and Medieval History
⦁ Minor, Asian History
⦁ Minor, European History
⦁ Minor, General History
⦁ Minor, Jewish Studies
⦁ Minor, Latin American History
⦁ Minor, Military History
⦁ Minor, United States History
⦁ MA, History
⦁ MA, History, Concentration in History Education

Introduction
To understand the present and prepare for the future, we must understand the past. The Department of History offers both undergraduate and graduate programs that enable students to comprehend the forces that have shaped the United States and the world. Our graduates are teachers and historians, and history is a particularly appropriate major for students bound for law or medical school. Also, history majors appear in every business field. Outstanding student research papers are published in the journal Passports, and Phi Alpha Theta, the history honor society, sponsors academic and social activities for students. At the graduate level, our primary fields of study are American history, European history, and world history. Our faculty and students conduct research that draws on the special resources of the MLK Library as well as outstanding area research facilities, including the San José Historical Museum, the California History Center at DeAnza College and the Hoover Institution at Stanford University.

Honors Program in History
A student may qualify for admission to the History Department honors program provided he or she is a history major or minor or a Social Science major who has completed 15 upper division units in history. To apply to History Honors the student must have an overall GPA of 3.0, a GPA of 3.5 for all history upper division courses, or the permission of the chair. If accepted, qualified seniors must complete one of the following: HIST 221, 230, 240, 241, 272, 274, 276, 280, 283, or 288, with a grade of “A” or “B” or the equivalents.
BA - History

Courses offered under this program are planned for those who wish a general liberal education, for those who want a broad foundation for any one of the social sciences, for those who desire advanced degrees in the field of history, and for those who wish to secure the teaching credential.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

A checklist of requirements is available in department office.
Double BA - History & Social Science Teacher Preparation (SSTP)

The double major in History and in Social Science Teacher Preparation (SSTP) is ideal for students considering a teaching career. Middle and high school social science teachers typically teach survey courses in both United States and World History. Future social science teachers would therefore benefit from acquiring the in-depth historical content knowledge and historical thinking skills of a History BA. But social science teachers at the secondary level must often teach economics, government, geography, or ethnic studies as well. Students who double major in History and SSTP will therefore benefit from the breadth of courses in the SSTP program and its emphasis on the practical elements of teaching, including how to engage students in the classroom and how to create and maintain effective learning environments. Both majors can be completed in four years and will provide subject matter preparation for a single subject teaching credential program.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

BA - Social Science, Preparation for Teaching (Single Subject)

This major is designed for students interested in teaching history, political science (government), economics, or social science in high school or middle school. The following course work satisfies San José State University's requirements for a BA in Social Science. The BA Social Science Preparation for Teaching is approved as subject matter preparation for a single subject credential by the California Commission on Teacher Credentialing (CCTC). Individuals who do not complete an approved degree program, or individuals seeking a single subject credential in subject areas not listed must pass all portions of the appropriate Commission-approved subject matter examination(s).

Minimum grade point average (GPA) of at least 2.87 and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

BA - Social Science, Preparation for Teaching (Multiple Subject- Not Accepting Students)

This major is designed for students interested in teaching in elementary school or middle school. The following course work satisfies San José State University’s requirements for a BA in Social Science. The Commission on Teacher Credentialing in the state of California (CCTC) recognizes the Social Science Teacher Preparation Multiple Subject degree as verification of subject matter competence. Individuals who do not complete an approved degree program, or individuals seeking a single subject credential in subject areas not listed must pass all portions of the appropriate Commission-approved subject matter examinations.

Maintaining a minimum grade of average (GPA) of at least 2.87 and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credit hour program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

MA - History

While designed to strengthen students’ depth and breadth of historical knowledge, the MA in History requires those who study the past at an advanced level to move beyond the acquisition of content knowledge and develop the more complex skills and habits of mind associated with historiography—including synthesis, analysis, and evaluation. This course of study serves those preparing to teach history at community colleges, those seeking preparation for the doctorate, museum curators, historical archivists, historians working in governmental agencies, and secondary teachers choosing a traditional Master’s degree.

Requirements for Admission to Classified Standing
Prospective students must apply separately to the university to obtain approval for graduate-level admission and to the department to obtain admission into the MA in History program. Applicants must meet all the university admission requirements as outlined in this catalog and stated in subsequent policy changes (this refers both to admission and graduation procedures). Students can be admitted in either classified or conditionally classified standing. Admission to classified standing for the MA - History requires that the undergraduate preparation of the applicant be comparable to that of the BA degree at San José State University. This preparation must include one upper-division or graduate course in historical method and a course in historiography. The applicant who does not have this preparation must remove all deficiencies. Students who have a baccalaureate degree in a field other than history will be required to complete up to 16 units in upper-division or graduate history courses. Units thus taken will not be counted toward the minimum 30 units required for the MA - History. Requirements and policies change; please refer to the Department of History website for the most current information.

Requirements for Admission to Conditionally Classified Standing
A student who does not meet all requirements for admission in classified standing for the MA - History may be admitted in conditionally classified status. The graduate advisor will list on the admissions notification all deficiencies and courses that must be taken. Upon completing these requirements, the student must file a petition for a change of status to classified standing.

University Requirements
The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Department of History website or at GAPE.

Requirements for Advancement to Candidacy
At least one semester before a candidate expects to graduate, the student must complete the Advancement to Candidacy Application delineating the entire degree program, that is, the courses that the student has completed or expects to complete toward the Master's. The candidate must submit the form to the Graduate Advisor and then to GAPE for final approval. Through this procedure, the student’s entire program will be examined to determine whether it complies with all departmental and university requirements for the degree, including the university requirement for demonstrated competency in written English.

Requirements for Graduation
University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Requirements for Admission to Classified Standing

Department Graduation Requirements
Following admission to the university and the department, the student should consult the history department website and speak with the graduate advisor regarding degree requirements and a proposed degree program. Candidates must complete 20 units of course work in one of the following fields of study: United States History, European History or World History. Eight units may be taken in any field of history. Two units will focus on professional development. Specialists in European History and United States History may apply one World History colloquium (HIST 220) to their primary field, and World History specialists may apply one U.S. History colloquium (HIST 210) or one European History colloquium (HIST 209 or HIST 212) to their primary field. Five courses and the 2 units of professional development—a total of 22 units—must be completed at the graduate level. All students must maintain a 3.0 GPA average to remain in the program and either pass the comprehensive examination or complete a thesis to receive the degree.

Culminating Experience

Plan B (Comprehensive Examination)
In addition to the course of study outlined above, graduate students must take and pass a comprehensive examination (Plan B). On the exam the student is expected to demonstrate considerable breadth and depth of knowledge, a familiarity with historiographical issues, and adherence to acceptable rules of grammar, spelling and literary style in presentation. The examination will be scheduled toward the end of the fall and spring semesters, and students must pass the examination within three attempts or no degree will be awarded.

Plan A (Thesis)
In some exceptional cases, students may substitute a thesis (Plan A) for the comprehensive examination. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee. A thesis option will be considered only upon the nomination of a professor, who agrees to serve as the first reader. The student must demonstrate to the nominating professor, in a written proposal, that he or she is capable of completing a thesis, both in terms of research skills and writing ability, and that he or she has sufficient time to undertake a major research and writing project. In addition, the proposed project must have intrinsic historical value. Demonstrating these points does not oblige a professor to nominate or to serve as a first reader, and no reason need be given to a student for declining to supervise a thesis. Permission to write a thesis is also contingent on finding two other professors willing to serve as second and third readers; they also serve entirely at their own discretion. Finally, the department’s graduate studies committee must approve all thesis proposals. After all three readers have signed the thesis, the candidate must submit it to the University for final approval.

A thesis committee has the option of terminating the thesis option if the candidate does not submit an acceptable thesis within five semesters. In that situation, the student will be required to take the Plan B comprehensive examination as the program culminating experience.

Language Requirement
All candidates for general MA in History must demonstrate competency in one foreign language. The sole exception are students whose primary field is U.S. History, who may, if they do not wish to meet the language requirement, take two history graduate level courses in substitution.

The language competency requirement may be met in four ways:
1. Through examination by a history faculty member with expertise in your language. The exam will be a translation of approximately 500 words to be completed in two hours with a dictionary allowed.
2. By taking two years of a foreign language at a university or community college. An average grade of "C" or better must have been attained, and the coursework completed within five years of admission to the university.
3. If your primary concentration is European History, you may also fulfill this requirement by taking one year of Greek and one year of Latin.
4. By taking and passing the Educational Testing Service Graduate Foreign Language Exam.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

MA - History, Concentration in History Education

The Master of Arts in History, Concentration in History Education is designed for middle and secondary school social science teachers. The curriculum broadens the candidate’s knowledge of U.S. and World History. In addition, the program increases the candidate’s academic proficiency in history subjects and his or her professional competence in special areas of interest within the field of history and social science education. This is a terminal degree. Candidates who plan to pursue more advanced graduate training in history should apply to the regular Master’s degree program outlined above. Please refer to the Department of History website for the most current information.

Requirements for Admission to Classified Standing
Prospective students must apply separately to the university to obtain approval for graduate-level admission and to the department to obtain admission into the MA in History, Concentration in History Education program. Applicants must meet all the university admission requirements. Students can be admitted in either classified or conditionally classified standing.

Admission to classified standing for the MA in History, Concentration in History Education requires that the student has completed a Single Subject Social Science Teaching Credential, has completed a BA in History or passed the Social Science CSET Examination.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

Requirements for Advancement to Candidacy
At least one semester before a candidate expects to graduate, the student must complete the Advancement to Candidacy Application delineating the entire degree program, that is, the courses that the student has completed or expects to complete toward the MA. The candidate must submit the form to the Graduate Advisor and then to Graduate Studies for final approval. Through this procedure, the student’s entire program will be examined to determine whether it complies with all departmental and university requirements for the degree, including the university requirement for demonstrated competency in written English.

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Procedures for approval for the MA in History, Concentration in History Education are the same as for the general Masters degree except the Concentration does not require a foreign language.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Department Graduation Requirements
Following admission to the university and to the department, the student should consult the history department website and speak with an advisor regarding degree requirements and a proposed degree program. Candidates must complete 20 units of course work in one of the following fields of study: United States History, Modern European History, or World History. Eight units may be taken in any field of history. Two units will focus on professional development. U.S. History specialists may apply one World History colloquium (HIST 220) to their primary field, and World History specialists may apply one U.S. History colloquium (HIST 210) to their primary field. Five courses and the 2 units of professional development—a total of 22 units—must be completed at the graduate level. All students must maintain a 3.0 average to remain in the program and pass the comprehensive examination (Plan B) to receive the degree. Procedures for approval for the MA in History, Concentration in History Education are the same as for the general Masters degree except the Concentration does not require a foreign language.

Culminating Experience
Plan B (Comprehensive Examination)
In addition to the course of study outlined above, graduate students must take and pass a comprehensive examination (Plan B). On the exam the student is expected to demonstrate considerable breadth and depth of knowledge, a familiarity with historiographical issues, and adherence to acceptable rules of grammar, spelling and literary style in presentation. Introduction
Where better to study hospitality management than in the heart of Silicon Valley, San Jose, California and the Bay Area? Thanks to our world renowned high tech companies, and vibrant metropolitan location, we attract millions of national and international visitors each year. According to a recent CSU impact report, hospitality ranks as one of the state’s top growth industries, ensuring that the demand for hospitality professionals will only increase. Our innovative, technology-driven curriculum and faculty provide the theoretical, practical, and professional training students need to pursue successful and meaningful careers. Our Bachelor of Science degree in hospitality, tourism and event management pairs academic study with hands-on experience and internships. Our graduates find employment as hotel/resort general managers, restaurant managers, private club managers, controllers, sales and marketing managers, human resources managers, concierge, catering and corporate event coordinators/producers, and convention and tradeshow managers. Come join our team!
**BS - Hospitality, Tourism and Event Management**

**University Graduation Requirements**
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

**4-Year Program Roadmap**
Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

**Hospitality, Tourism, and Event Management International Experience Requirement**
To satisfy the Department of Hospitality, Tourism, and Event Management international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at [http://www.sjsu.edu/chahs/international-experience/](http://www.sjsu.edu/chahs/international-experience/).

Introduction
Welcome to the Humanities Department: The home of Creative and Transdisciplinary Studies!

In the twenty-first century, we find ourselves awash in accessible information - but most of us have never learned how to swim in this sea of ideas, histories, and creative works. The Humanities Department is the place where the skills of integration are taught within creative and transdisciplinary paradigms. Whether studying multiple art forms and creativity in the Creative Arts BA, combining subject matter in the Liberal Studies Teacher Prep BA in order to prepare to become a teacher, or integrating perspectives from various academic disciplines in one of the three concentrations in the Humanities BA (American Studies, Religious Studies, or Liberal Arts), our students find in the Humanities Department the place where they can think broadly and imaginatively. With a BA from Humanities, our students acquire the ability to dive deeply into the welter of wonders and ideas in the contemporary world, through comparative, historical, and innovative approaches.
Courses in the Humanities Department typically integrate history, literature, education, philosophy, religion, politics, and the arts. Most importantly, Humanities students develop analytical and expressive skills as well as an ability to read, write, and think clearly, especially about their roles in shaping various societies. Our students win writing awards and our graduates pursue careers in a variety of fields, including arts administration, education, law, journalism, library science, public service, art therapy, occupational therapy, social work, community development, and public relations. We are home to the renowned GE programs in Humanities Honors and American Civilization as well as to the popular Liberal Studies Teacher Prep BA, one of the largest teacher preparation majors on campus.

Students pursuing the Liberal Studies Teacher Prep BA are interested in teaching in elementary or middle school. The program is approved by the California Commission on Teacher Credentialing (CCTC) for subject matter preparation.

Students pursuing the Humanities BA explore a wide array of human experience in diverse locations, in various media, art, and literature, and in significant cultural forms such as religion and other cultural traditions. The BA has three concentrations to select from: American Studies, Comparative Religious Studies, and Liberal Arts.

Students pursuing the interdisciplinary Creative Arts BA explore creativity across the human lifespan and in different cultural contexts and conduct a sustained inquiry into their own creative process. Students take classes in more than one arts area and investigate different purposes of the arts and creativity in different cultural contexts. The Creative Arts Program, established in 1956, is the only interdisciplinary arts and creativity studies BA program in the CSU!

The Humanities Department also offers several minor programs, including American Studies, Area Studies, Asian Studies, Creative Arts, Comparative Religious Studies, Middle East Studies, and Humanities.

Advisors: Christian Jochim, Amy Li, J. Todd Ormsbee, Cynthia Rostankowski, Shannon Rose Riley, Jennifer Rycenga, Susan Verducci

**American Cultures GE Curriculum**

The American Cultures curriculum is a two-semester, twelve-unit sequence which satisfies over one-fourth of all lower division general education requirements. Together, AMS001A and AMS001B provide six units of general education credit in arts and letters (Area C), six units in comparative systems and social issues (Area D), and satisfy the California Education Code American Institutions requirements in U.S. History, U.S. Constitution and California Government (Areas US1, US2, US3). The courses provide the opportunity to study America’s development and current conditions through themes such as the American dream, environmental issues, and ethnic and women’s studies.

**Humanities Honors GE Curriculum**

The Humanities Honors Program offers a four-semester survey course in World Cultures and Societies, Honors (HUM001A/001B) and Modern World Cultures, Honors (HUM002A/002B), which provides students with 24 units of core General Education in a format that emphasizes the interrelationship of art, literature, philosophy and social institutions. Core General Education requirements satisfied are: Oral Communication (3 units), Written Communication 1A (3 units), Critical Thinking and Writing (3 units), Arts & Letters (9 units), Comparative Systems (3 units), Social Issues (3 units), and American Institutions (AI) all areas US 1, 2, and 3. The course is interdisciplinary, globally-focused, and team-taught, and is organized chronologically from the Ancient World through the Middle Ages, the Renaissance, the Early Modern and Contemporary periods. Entering students with a high school GPA of 3.0 and a verbal SAT score of 550 or above are automatically eligible.

The Department also offers an upper division GE sequence in Advanced Honors in Integrated Science, Social Science, and Humanities (HUM177A/B), which covers SJSU Studies areas R, S. and V.
Departments & Degrees

BA - Creative Arts

This degree is listed with the Creative Arts Program.

Courses that meet General Education/American Institution requirements are noted with area designation for required area.

BA - Humanities, Concentration in American Studies

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements
Students in this major should consult their advisor regarding American Institutions requirement. Depending on sequence(s) a student chooses, 0-30 units of GE/AI can be met in the major.

<tr>
<td>Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a &quot;C-&quot; or better to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education
Of the 9 units required by the university, 6 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions
The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

CONSULT MAJOR ADVISOR FOR DEPARTMENT RECOMMENDED COURSEWORK TO MEET GE REQUIREMENT.

Physical Education

## BA - Liberal Studies, Concentration in Cross-Cultural Studies in Mexican and American Education (Not Accepting Students)

Cross-Cultural Studies in Mexican and American Education (CCSE) is an interdisciplinary major. This concentration provides future education professionals and scholars with a multi-disciplinary and cross-cultural program of study in education and society. The concentration is designed to facilitate students’ understanding of the impact of cultural, ethnic, linguistic, and economic backgrounds on schooling, both in Mexican and American contexts. It is designed to help students experience and understand a foreign culture, and to acquire the self-confidence, independence, and leadership qualities that result from studying abroad through the LA META Program in Querétaro, Mexico. Students majoring in CCSE may wish to work with youth in a variety of ways, including as a bilingual teacher.

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

BA - Liberal Studies, Integrated Teacher Education Program

The Liberal Studies Teacher Preparation - Integrated Teacher Education Program (LSTP-ITEP) combines the study of academic subjects aligned to California standards for the K-8 curriculum with professional preparation courses and field experiences leading to a preliminary Multiple Subject Credential (MSC). Successful completion of this ITEP leads to both a Bachelor of Arts degree in Liberal Studies and a Multiple Subject Teaching Credential.

The Liberal Studies, Integrated Teacher Education Program is approved by the California Commission on Teacher Credentialing (CCTC) for waiver of the subject matter examination (CSET for Multiple Subjects) required to earn a teaching credential.

## Total Units Required

- Freshmen and transfer students enter as Liberal Studies Teacher Preparation majors. Students apply for the ITEPB in the first semester of their junior year. Applicants must meet credential program standards and undergo screening for admission.
- All ITEPB students must take a Spanish Placement Test in their first semester to determine which Spanish language course(s) are needed to meet the prerequisite for Spanish 101A (four semesters of college Spanish or equivalent).
- All ITEPB students must take LSTP 139, EDTE 162, and EDEL 108A in Spanish.
- All ITEPB students must do student teaching (EDEL 143A and EDEL 143B) in Spanish bilingual classrooms.
- All courses required for the credential must be completed with a grade of C or higher, unless otherwise noted. The cumulative GPA for all credential courses must be 3.0 or higher.
BA - Liberal Studies, Preparation for Teaching

This major is designed for students interested in teaching in elementary school or middle school. The following course work satisfies San José State University’s requirements for a BA in Liberal Studies and is a program approved by the California Commission on Teacher Credentialing (CCTC) for waiver of the subject matter examination (CSET for Multiple Subjects) required to earn a teaching credential.

Maintaining a minimum grade point average (GPA) of at least 2.87 and completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 33 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE UNDER SB 1440 FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Consult major advisor for department recommended coursework to meet GE requirement.

Minor - American Studies

This interdisciplinary program offers students the opportunity to study American culture and society. In addition to the focus on a better understanding of American culture, there is emphasis upon analytic skills, close reasoning, and effective communication, providing useful preparation for graduate study, for elementary or secondary teaching, or for careers in law, public service or government.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

## Minor - Area Studies

The minor in Area Studies provides an opportunity for concentrated study in the history, politics, economics, geography, or culture of one of four designated regions of the world.

With the consent of the advisor for the Area Studies minor, a student may select courses concerning aspects of one of the following regions - East and Southeast Asia, Africa and the Middle East, Latin America, or Europe (inclusive of Russia) - and global courses from a general list.

### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

<table>

# Minor - Asian Studies

The Asian Studies minor will acquaint students with the histories, traditional cultures and contemporary conditions of Asian countries and societies. Courses may be selected from anthropology, art, business, foreign languages, geography, history, music philosophy, political science, and religious studies.

## University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Courses that meet General Education/American Institution requirements are noted with area designation for required area.

For Legend please see page 2
Minor - Middle East Studies

This interdisciplinary minor provides background for students whose professional goals include the promotion of mutual understanding, tolerance and peace in the region. The Middle East Studies minor is especially recommended to students seeking a career in international law, business, economic development, health care, education or religious studies. Courses encompass the disciplines of art history, anthropology, business, foreign languages, history, humanities, political science, sociology and religious studies.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

3-4
Minor - Religious Studies

This minor offers a basic understanding of religious beliefs and practices for those whose careers would benefit from familiarity with some religious traditions, such as those in teaching, business, journalism, social work, medicine, and law. The minor incorporates the study of religious traditions with reflection on what religion is and how we understand it.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

⦁ MS, Engineering Management
⦁ MS, Human Factors/Ergonomics
⦁ MS, Industrial and Systems Engineering

Introduction
Industrial and Systems Engineers figure out how to do things better by engineering processes and systems that improve quality and productivity. ISEs make significant contributions to their employers by saving money, increasing productivity, and making the workplace better for workers. Industrial and Systems Engineers focus on productivity improvement with respect for the human aspect of work. ISE bridges the gap between management and operations by applying six sigma principles, lean manufacturing processes, principles of organizational improvement, continuous improvement, and ergonomics. The undergraduate degree prepares engineers for challenges in manufacturing or service systems analysis and design. Students in our master’s program build on an aptitude already in evidence for advanced professional work in industrial engineering. Our alumni are employed in a variety of industries, businesses and institutions, from retail establishments to manufacturing plants to government agencies to hospitals. The BS, Industrial and Systems Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org
# BS - Industrial and Systems Engineering

## University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

## 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

## Major-Specific Graduation Requirements

All Technical Electives Required in the Major must be completed with a “C- or better”. The following courses in Preparation for the Major must also be completed with a “C- or better”: ENGL 001B

### Core Lower Division General Education

- Of the 39 units required by the university, 33 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C- or better” to meet the requirement. Consult with major advisor for details.

### Upper Division General Education

- Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

### American Institutions

- The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

AMS 001A. American Cultures to 1877 ................................................................. M4 ........................................ 6
AMS 001B. American Cultures 1877 to present .................................................. M5 ........................................ 6

### Physical Education

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Six Sigma Certificates

The revolutions in lean manufacturing and quality have swept the world and broadened into the disciplines of lean enterprise and six sigma. Six Sigma’s emphasis is on improving existing capabilities. Six Sigma is a set of structured methodologies, problem-solving tools and advanced statistical methods for analyzing and improving processes, product designs and services on a broad range of metrics, especially cost, quality, time and variability. It moves beyond treating symptoms and short-term problems to the elimination of root causes, thereby emphasizing lasting improvement.

This certificate is available to ISE graduate students and local professionals

Six Sigma Green Belt Certificate

Major-Specific Graduation Requirements

The following course in the minor requires a grade of "B or better": ISE 250

**MS - Industrial and Systems Engineering**

The goal of Industrial and Systems Engineering is to ensure that manufacturing or service organization systems are efficient, productive, safe, and well designed against cumulative injury, and that the systems incorporate the right tools and equipment. The Master of Science in Industrial and Systems Engineering curriculum prepares engineers for these activities and helps achieve the goals of ISE in a manufacturing or service organization. It prepares students to bridge the gap between operations and management with courses ranging from operations planning and control, quality assurance and reliability, human factors and ergonomics, human-machine interaction, information engineering, and cost-effectiveness analysis, to organizational development and total quality management. It prepares students to enter the profession immediately or to enter a PhD program.

**Requirements for Admission to Classified Standing**

Applicants must meet all university admissions requirements. Applicants who meet the following requirements beyond university requirements will be considered for admission into the ISE Department. Students may be admitted in either classified or conditionally classified standing. Applicants for classified standing will ordinarily be expected to have completed work for the BS degree in industrial engineering (or its equivalent) at San José State University or other university with an accredited curriculum, with a grade point average of 3.0 ("B") or better in the last 60 units.

**Requirements for Admission to Conditionally Classified Standing**

Applicants who do not have a baccalaureate degree in industrial engineering (or equivalent), but who meet university requirements for graduate admission and whose academic records or professional achievements give promise of satisfactory performance in graduate study in industrial engineering, may be admitted to Conditionally Classified standing. Applicants whose baccalaureate degrees are not in industrial engineering will be required to take additional courses (prerequisites), which will not be counted in the graduate degree program for the MS - Industrial and Systems Engineering. The GRE General Test is not required.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

**Requirements for Admission to Candidacy**

Students seeking MS degrees in the College of Engineering must meet the general university requirements for candidacy as outlined in the Academic Requirements section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJU catalog section titled "Graduation Writing Assessment Requirement" for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, the candidate must demonstrate aptitude for advanced professional work in industrial engineering, as measured by instructor appraisals, analysis of previous academic work or other appropriate means. Admission to candidacy and approval of programs will be handled by a faculty committee and the student’s advisor.

**Requirements for Graduation**

Completing Requirements for the MS - Industrial and Systems Engineering

Students who have been admitted to candidacy for master’s degrees in engineering must thereafter maintain grade point averages of 3.0 ("B") or better in all work taken in the graduate program, and in the minimum 30 semester units of approved graduate work. All students are required to complete a thesis, project, or pass a comprehensive examination covering either their graduate course work or major project. The general requirements for the MS - Industrial and Systems Engineering include completion of at least 30 semester hours of approved work. The course requirements consist of three core courses, four courses in a specialty area, one elective, and a culminating experience (thesis, project or comprehensive exam). Four specialty areas are offered: Production and Quality Assurance, Human Factors Engineering, Healthcare and Service Systems Engineering, and Supply Chain and Logistics Engineering.

**Culminating Experience**

**Plan A (Thesis)**

The thesis must meet university requirements as stipulated in this catalog and in the SJU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee, which consists of the chair and two other faculty members of the Department, College or University.

**Plan B (Project)**

The main purpose and hence the main scope of the MS project is to apply knowledge learned in a student’s graduate study to a real-world problem, either identified in a current industrial or business setting as a need for improvement or in an academic setting in anticipation of opportunities for potential improvement. In either case, the amount of work must at least be commensurate with a three-unit graduate lecture course. Although creating new knowledge is not expected in the project, most effective application of the knowledge learned in the student’s entire graduate program is.

The MS project should be an individual project. With special approval by the Graduate Advisor, a project whose scope is too large for one student can be pursued as a set of multiple MS projects. However, the scope of work for each student must be clearly defined and separated with respect to that of the other student(s). At the end of the MS Project, each student must complete and submit an individual project report and must give an individual presentation. The student earns credit (i.e., CR) for the MS Project if and only if the project has been successfully completed and the project report and the project presentation have been satisfactorily delivered. It will be written under the guidance of the candidate’s project committee advisor, with the assistance of the thesis committee, which consists of the chair and another faculty member of the Department, College or University.
Plan B (Comprehensive Exam)
The Comprehensive Exam is a five-hour exam covering three core courses and two elective courses. It is an open-book and open-notes exam. Students in this option take a third elective course (amounting to a total of 9 units of approved electives).

**Graduation Writing Assessment Requirement**
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Passing either ISE270 or ISE251 automatically satisfies this requirement.

</tr>
</tbody>
</table>

**Total Units Required**
Elective courses must be planned in consultation with the Graduate Advisor.
The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.
Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.
MS - Engineering Management

Engineering Management is a specialized form of management that is concerned with the application of engineering principles to business practice. Engineering management is a career that brings together the technological problem-solving savvy of engineering and the organizational, administrative, and planning abilities of management in order to oversee complex enterprises from conception to completion.

Engineering Management programs typically include instruction in the areas of accounting, economics, project management, finance, systems engineering, mathematical modeling and optimization, quality control and six sigma, operations research, human resource management, industrial psychology, safety and health. At SJSU, engineering management program emphasizes quality and six sigma, statistics, fundamentals of business accounting and finance, engineering economic analysis, business ethics, supply chain engineering, and systems engineering. Through technical electives, students become knowledgeable in other aspects of business management, such as project management, human resource management, and operations research.

Additional information can be found at www.sjsu.edu/ise/programs/ms-em

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the MS, Engineering Management program. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the website and this Catalog.

Test Requirements

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Test Requirements webpage at CAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

Applicants who meet the following requirements beyond university requirements will be considered for admission into the ISE Department. In addition, applicants must possess a baccalaureate degree from an ABET-accredited engineering program with a grade point average of at least 3.0 in the last 60 semester hours of upper division work completed in all subjects and in technical subjects only. Students meeting these criteria may be admitted in classified standing; however, students may still be admitted conditionally if they need prerequisite courses for the selected option. An engineering technology degree does not satisfy the degree requirement for admission to this program.

Requirements for Admission to Conditionally Classified Standing

Applicants who do not meet the requirements for classified standing may be admitted with specific conditions as conditionally classified. An applicant whose undergraduate record indicates deficiencies in one or more technical areas and/or has a grade point average less than 3.0 in the last 60 semester hours of upper division work completed in all subjects and in technical subjects only may be admitted for graduate work on a conditionally classified basis. Such students will be expected to satisfactorily complete additional course work before becoming classified. Any conditions stated in the admission notification must be fulfilled within the first year and before the student can be admitted to candidacy for the degree.

Students admitted in conditionally classified status may petition for classified status when course work in deficient areas has been completed, when they have satisfied the Graduation Writing Assessment Requirement (GWAR), and when their records in classes at San José State University show sufficient promise of success in the master's degree program.

Requirements for Admission to Candidacy for the MS - Engineering Management

Students seeking the Master of Science in Engineering Management degree must meet the general university requirements for advancement to candidacy as outlined in the Academic Requirements Section of The University Bulletin, including successful completion of the GWAR. Admission to candidacy and approval of degree program will be handled by the Graduate Advisor. All classified graduate students must apply for admission to candidacy after completing the GWAR and a minimum of nine units of graduate work. All MS EM students are encouraged to apply for advancement to candidacy as soon as they have completed the GWAR and three graduate courses.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Culminating Experience

Students choose the Plan A (Thesis) or Plan B (Project) option as their program culminating experience. The decision as to whether to embark on a thesis or project will be made by the student in consultation with the program's assigned advisor.
Plan A (Thesis)

Students wishing to pursue the thesis option must begin by obtaining the approval of the MS, Engineering Management (MS EM) program director, and then secure the agreement of a qualified faculty member to serve as Chair of the thesis committee. The candidate must provide the name of the committee Chair to the MS EM program Director prior to the beginning work on the thesis. The thesis and thesis process must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. The thesis will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee.

Plan B (Project)

The project is the expected choice for the MS, Engineering Management candidate’s culminating experience. Students must begin the project by identifying a qualified faculty advisor, or by having one appointed by the MS EM program director. The advisor and the student mutually agree on the scope of the project. The advisor determines when the student has met agreed upon project requirements and when the project report is acceptable for submission to the MS EM program, and notifies the MS EM program director of the student’s satisfactory completion of the culminating experience requirement.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Requirements of the Masters

| Core Courses                                                                 | 15 |

| ISE 299. Master’s Thesis                                                    | 3  |
| Plan B (Project)                                                            | 3  |
| ISE 298. Special Problems                                                   | 3  |

| Total Units Required                                                       | 30 |
| Elective courses must be planned in consultation with the Graduate Advisor. |
| The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15. |
| Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate. |
MS - Human Factors/Ergonomics

The Department of Industrial and Systems Engineering (ISE) administers the Master of Science in Human Factors/Ergonomics (HFE) degree program. This is a cooperative program involving the Departments of Industrial and Systems Engineering, Psychology, Industrial Design, and Kinesiology.

Human factors/ergonomics is the discipline concerned with the development and application of human-system interface technology to systems analysis, design and evaluation. This technology encompasses human-machine (hardware ergonomics), human-task (workplace ergonomics), human-environment (environmental ergonomics), human-software (cognitive ergonomics) and organizational-machine (macro-ergonomics) interfaces. Practitioners are engaged in developing design specifications, guidelines, methods and tools. They also apply human-system interface technology to ensure that work systems are compatible with the characteristics of the humans who operate, maintain or otherwise interact with them. Their efforts include improving the operability, maintainability, usability, comfort, safety and health characteristics of systems to improve human and system effectiveness and to reproduce the potential of injury and error (adapted from remarks published by H. Holbrook, 1995-96 President, Human Factors and Ergonomics Society, HFES Bulletin, January, 1996).

This program prepares students for practice in this emerging profession through an interdisciplinary course sequence that emphasizes theory, practical applications and research. HFE/E students take a group of five core courses from several different SJSU departments and elective courses in topics of their choosing. A one-semester weekly seminar is required of all students. The program culminates in a thesis or project.

Additional information can be found at http://www.sjsu.edu/hfe/

Admission Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the MS, Human Factors/Ergonomics program. See the CAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Test Requirements webpage at CAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

Applicants must meet all university admissions requirements. Applicants who meet the following requirements beyond university requirements will be considered for admission into the ISE Department. Applicants for classified standing must have completed a BS or BA degree in Psychology, Industrial Engineering, Occupational Therapy, Industrial Design, Kinesiology, or another related field at an accredited institution. A grade point average of 3.0 ("B") or better in the last two years of academic work is preferred. Applicants for classified standing will also be expected to have completed upper division courses in statistics, cognition, and perception.

Requirements for Admission to Conditionally Classified Standing

Applicants who do not meet the requirements for classified standing may be admitted with specific conditions as conditionally classified; any conditions stated in the admission notification must be fulfilled within the first year and before the student can be admitted to candidacy for the degree. If the conditions are not fulfilled, the program reserves the right to dismiss the student from the program by a process known as Administrative Disqualification (see Section 41300.1, Title 5, California Code of Regulations).

Requirements for Admission to Candidacy for the MS - Human Factors/Ergonomics

Students seeking the Master of Science degree in Human Factors/Ergonomics must meet the general all-university requirements for candidacy as outlined in the Academic Requirements section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. In addition, the applicant must demonstrate aptitude for advanced professional work in human factors/ergonomics, as measured by instructor appraisals, analysis of previous academic work or other appropriate means. Admission to candidacy and approval of programs will be handled by the student’s graduate advisor.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Culminating Experience

The decision as to whether to embark on the project (Option B) or Thesis (Option A) path for the culminating experience will be made by the student in consultation with the program’s assigned advisor.
Plan A (Thesis)
Students wishing to pursue the thesis option must begin by obtaining the approval of the HF/E program Director and then by securing the agreement of a qualified faculty member to serve as Chair of the candidate’s thesis committee. The name of the committee Chair must be provided to the HF/E program Director prior to the candidate beginning work on the thesis. The thesis and thesis process must meet university requirements as stipulated in this catalog and in the SJU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee.

Plan B (Project)
The project is the expected choice for the HF/E candidate’s culminating experience. Students must begin the project by identifying a qualified faculty advisor, or one will be appointed by the HF/E program Director. The advisor and the student mutually agree on the project’s scope. The advisor determines when the student has met the agreed upon project requirements and when the project report is acceptable for submittal to the HF/E program, and notifies the HF/E program Director of the student’s satisfactory completion of the requirement.

Three (3) elective courses must be planned in consultation with the Graduate Advisor. Electives may be selected from a wide range of graduate courses offered on the SJSU campus in industrial engineering, psychology, kinesiology and other departments. Course descriptions can be found under the listings for the respective departments elsewhere in this catalog. The program develops and offers its own elective courses from time to time in topics such as usability testing, human-computer interaction, safety and others. Please see the program website for further details.

Course Requirements
Students must maintain a GPA of 3.0 or above in all courses taken in fulfilling prerequisites and the 30 graduate units required for completion of the program. The general requirements for the course completion are as follows:

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Introduction
The San Jose State University (SJSU) School of Information prepares individuals for careers as information professionals. Graduates work in diverse areas of the information profession, such as user experience design, digital asset management, information architecture, electronic records management, information governance, digital preservation, and librarianship. The SJSU School of Information is a recognized leader in online education and received the Online Learning Consortium’s Outstanding Online Program award. For more information: ischool.sjsu.edu
## Credentials

To qualify for the California Library Media Teacher Services Credential with authorization as a library media teacher, the student must complete the credential course work outlined here in the university catalog.

Students must either already hold a valid California teaching credential or complete the requirements for a basic teaching credential (see College of Education section of this catalog for requirements for a teaching credential).

Post-Master’s Certificate in Library Information Sciences

The Post-Master’s Certificate program features eight career pathways focused on diverse specializations, such as digital curation, emerging technologies, web programming, data science and more! Certificate program students choose one career pathway and then select five courses from that career pathway, tailoring their in-depth learning experience to their career aspirations. In addition, all students begin the program with a one-unit guided learning experience that introduces our school's interactive online learning environment. After completing 16 units of required coursework, certificate students demonstrate their mastery of the program’s learning outcomes.

Gainful Employment Disclosure
# Certificate - Strategic Management of Digital Assets and Services

Handling and governance of digital information and data in organizational and networked contexts— including digital assets management, digital curation, information governance, information assurance, data analytics, marketing, community informatics, and demonstrating value. Students pick one career pathway and select 9 units from that pathway, [http://ischool.sjsu.edu/programs/advanced-certificate-strategic-management](http://ischool.sjsu.edu/programs/advanced-certificate-strategic-management)

Master of Science in Informatics (Special Session Program)

Informatics is an interdisciplinary and inter-professional field that focuses on collecting, analyzing, securing, and managing data and information; and turning that data and information into actionable knowledge from a user centered perspective within the context of another domain - such as health or sports.

Students will take 18 units of course work that will provide the foundations and skills needed to:

- Design and develop secure user-centered knowledge structures for the Web environment using design thinking, prototyping, and human computer interaction tools.
- Set up secure digital assets management systems (DAM) working with metadata, workflow, taxonomy, data security, governance, and preservation of digital assets.
- Define, identify, control, manage, secure, and preserve electronic records and information including the management of records and information as operational, legal and historical evidence in electronic environments.
- Manage projects: people, timelines, resources, goals and outcomes.

Students will apply the above informatics skill set in one of three domains with an additional 9 units focused on health, sports, or cybersecurity/privacy.

However, the central set of knowledge and skills obtained in the foundation and skills courses can be applied to many different domains as graduates develop their careers.

For more information: [http://ischool.sjsu.edu/programs/ms-informatics](http://ischool.sjsu.edu/programs/ms-informatics)

Requirements for Admission to Classified Standing

Candidates must meet all university admissions requirements.

Applicants who meet the following requirements beyond university requirements will be considered for admission into the School of Information:

- A bachelor’s degree from any regionally accredited institution in any discipline with a GPA of at least 2.8 at the bachelor’s degree institution or in the last 60 semester or 90 quarter units.
- Skill with HTML5 and CSS3 - or updated standards -as demonstrated via class transcripts or work experience.
- The School requires that all students have computer access from home. See Home Computing Requirements.
- Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage of GAPE.

Requirements for Admission to Conditional Classified Standing

The School of Information does not admit students on a conditional basis.

Requirements for Advancement to Graduate Candidacy

In order to achieve candidacy, students must meet the university requirements for candidacy. General university requirements for advancement to candidacy are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Students must complete and submit the Petition for Advancement to Graduate Candidacy after completion of nine units and by the posted deadlines for the semester in which they plan to graduate.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Special Session Program Information

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the CPGE website for more information.

**Total Units Required**

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
MLIS - Master of Library and Information Science (also offered in Special Session)

The San José State University (SJSU) School of Information prepares individuals for careers as information professionals. Graduates work in diverse areas of the information profession, such as user experience design, digital asset management, information architecture, electronic records management, information governance, digital preservation, and librarianship. The SJSU School of Information delivers all of its degrees and certificates fully online. It is a recognized leader in online education and received the Online Learning Consortium’s Outstanding Online Program award.

Requirements for Admission to Classified Standing
Candidates must meet all university admissions requirements. Applicants who meet the following requirements beyond university requirements will be considered for admission into the School of Information:

- A bachelor’s degree from any regionally accredited institution in any discipline with a GPA of at least 3.0 at the bachelor’s degree institution or in the last 60 semester or 90 quarter units;
- A general understanding of computers and technology. See Technology Literacy Requirements;
- The School requires that all students have computer access from home. See Home Computing Requirements and
- Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage of GAPE.

Requirements for Admission to Conditionally Classified Standing
The School of Information does not admit students on a conditional basis.

Requirements for Advancement to Graduate Candidacy
In order to achieve candidacy, students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the MLIS degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Students must complete and submit the Petition for Advancement to Graduate Candidacy after completion of nine units and by the posted deadlines for the semester in which they plan to graduate. For additional program requirements and submission instructions, refer to the MLIS Candidacy Approval Form Information website.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Special Session Program Information
Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

This requirement is satisfied by passing INFO 200.

Students can transfer up to 9 units subject to the School's [transfer policies](#). Elective courses must be planned in consultation with the Graduate Advisor. The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

**Culminating Experience**

**Plan A (Thesis)**

The thesis must meet university requirements as stipulated in this catalog and in the [SJSU Master's Thesis and Doctoral Dissertation Guidelines](#). It will be written under the guidance of the candidate's thesis committee chair with the assistance of the thesis committee.

**Plan B (ePortfolio)**

The e-Portfolio provides a program-based assessment to ensure that each student demonstrates mastery of all program learning outcomes for the MLIS degree before graduation. It requires students to select, document, and assemble evidence of their competence in a series of skill areas the faculty have deemed essential for entry-level professional performance.
Masters in Archives and Records Administration (Special Session Program)

The fully online Master of Archives and Records Administration (MARA) degree program at the San Jose State University School of Information prepares students for leadership positions in information governance and corporate archives.

With the convenient and fully online MARA program, students can live anywhere while they earn their graduate degrees. The master’s program is delivered exclusively online via interactive online learning technology. The multimedia format enlivens the learning experience while introducing students to the same types of tools they’ll use in their professional careers.

For more information: ischool.sjsu.edu

Requirements for Admission to Classified Standing

Candidates must meet all university admissions requirements. Applicants who meet the following requirements beyond university requirements will be considered for classified admission into the School of Information:

- A bachelor’s degree from any regionally accredited institution in any discipline with a GPA of at least 3.0 at the bachelor’s degree institution or in the last 60 semester or 90 quarter units;
- A general understanding of computers and technology. See Technology Literacy Requirements;
- The School requires that all students have computer access from home. See Home Computing Requirements; and
- Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the GWAR.

Requirements for Admission to Conditionally Classified Standing

The School of Information does not admit students on a conditional basis.

Requirements for Advancement to Graduate Candidacy

In order to achieve candidacy, students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the MARA degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Students must complete and submit the Petition for Advancement to Graduate Candidacy after completion of nine units and by the posted deadlines for the semester in which they plan to graduate. For additional program requirements and submission instructions, refer to the MARA Candidacy Approval Form Information website.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

Special Session Program Information

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Interdisciplinary Studies

Graduate Studies

ADMINISTRATION BUILDING, ROOM 145
408-924-2484
www.sjsu.edu/cgs

Curricula
- MA, Interdisciplinary Studies
- MS, Interdisciplinary Studies

Introduction
The Interdisciplinary Studies master’s program for either an MA or MS provides an alternative for individuals whose desired plan of study does not fit into the degree offerings of any single existing graduate degree program on campus.

More information about the program can be found on the College of Graduate Studies website at www.sjsu.edu/cgs.
Applying to the Interdisciplinary Masters

The Interdisciplinary Studies master’s program for either an MA or MS provides an alternative for individuals whose desired plan of study does not fit into the degree offerings of any single existing graduate degree program on campus.

More information about the program can be found on the College of Graduate Studies website.

Admissions Requirements

Candidates apply separately to the university to obtain approval for university-level admission and to the College of Graduate Studies for admission to the Interdisciplinary Studies program. Candidates must meet all university admissions requirements. They must also satisfy programmatic requirements, including a minimum 3.25 GPA in the last 60 semester units of post-secondary academic work. In addition, they must complete a programmatic application, separate from the university application, found in the Interdisciplinary Studies Guide, available at http://www.sjsu.edu/cgs/docs/interdisciplinary_studies_guide.pdf. In brief, the application includes the signature of a tenured or tenure-track faculty member from San Jose State who agrees to chair the master’s committee of the student. Approval of the proposed curriculum, periodic advice, and supervision of the student’s research and culminating report (usually a thesis) are expected of the faculty mentor. A summary of the proposed research and reasons for the appropriateness of the Interdisciplinary Studies program are also needed in advance of a positive admissions decision. Once the application is completed, it should be sent to the Associate Dean (AD) of Graduate Studies, who will make the final admissions decision.

Applicants from countries in which the official language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAFE.

Requirements for Advancement to Graduate Candidacy

General university requirements for advancement to candidacy for the Interdisciplinary Studies master’s degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MA or MS - Interdisciplinary Studies Graduation Requirements

The program consists of an individualized program of 30 units in classes taken from at least two different departments; a minimum of half of the units must be in graduate-level classes. Prerequisite classes must be taken in excess of the 30 unit total. The program may be Plan A (thesis), Plan B (project, but under highly restricted circumstances), or Plan C (creative project). All courses must be approved by the AD of Graduate Studies. The culminating report must be approved by the student’s master’s committee and by the College of Graduate Studies Associate Dean.

Curricula
- Minor, Jewish Studies

Introduction
In the Jewish Studies Program, students explore Jewish and Israeli culture, history, literature, religion, politics, philosophy, languages, and art. The curriculum fosters critical thinking within and across disciplines and, as is true with any good learning, seeks to enable students to make the leap from knowledge to commitment and action. An interdepartmental minor in Jewish studies includes courses offered by six departments within the College of Humanities and Arts and the College of Social Sciences: the Departments of History, Religious Studies, English and Comparative Literatures, Foreign Languages, Art History, Political Science, Geography and Global Studies. Scholarships are awarded each semester to outstanding students enrolled in the Jewish studies minor program.
Minor - Jewish Studies
This degree is listed with the History Department.

⦁ Minor, Journalism
⦁ Minor, Public Relations
⦁ MS, Mass Communication

Introduction
Founded in 1936, the School of Journalism and Mass Communications is the largest school of its kind in Northern California. In 2012, the journalism program was ranked among the top two in California, and the top 50 in the U.S. It is also nationally accredited by the Accrediting Council on Education in Journalism and Mass Communications (ACEJMC). We offer undergraduate degrees in advertising, convergence journalism and public relations, and a master's degree in mass communications. Timely, ethical and responsible visual storytelling utilizing new technologies is the focus in all our degree programs. We offer students access to scholarships, regional and global internships, and competitive prizes unavailable to students in non-accredited programs. Our faculty are experienced multimedia journalists, photographers, writers, graphics designers and advertising, public relations, and social media executives. Our graduates have won six Pulitzer Prizes and excelled in careers as online content producers, publishers, editors, news directors, and communication executives.

Students who wish to change their major at SJSU to one of those offered in the JMC School must fulfill department-specific coursework and GPA requirements as specified on the department website.

Honors Program
Majors with a 3.2 GPA overall and a 3.5 GPA in advertising, journalism, or public relations at the end of their junior year (at least 90 units completed of which 30 are in the major) are eligible to apply for the Honors Program in the School of Journalism and Mass Communications. Application must be made to the Director of the School no later than the first semester of the senior year. The School will limit those admitted to the Honors Program each year to no more than 10 percent of the number of its graduates in the previous academic year. Once admitted to the Honors Program, students must maintain at least a 3.2 GPA overall and at least a 3.5 GPA in their major. They must take a graduate-level seminar that has been approved by the graduate coordinator. To receive honors, students, as part of the seminar requirements, must complete and present a seminar paper and must receive a 3.0 or better grade in the course.
BS - Advertising

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Journalism and Mass Communication International Experience Requirement
To satisfy the Journalism and Mass Communication Department international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at http://www.sjsu.edu/chahs/international-experience/.

MS - Mass Communications

The School of Journalism and Mass Communications offers a 30-unit, four-semester Master of Science in Mass Communications degree program that culminates with a professional standard project. The curriculum was designed to help students master the concepts and skills that are driving emerging communication technologies in public relations, advertising and journalism. Elective units allow students to tailor the program to their interests.

Information about the Master of Science in Mass Communications is available on the website of the School of Journalism and Mass Communications: https://sjsujmc.com/programs/graduate/masters-in-mass-communications/

Admission Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applications meeting university graduate admission standards will be reviewed by the School of Journalism and Mass Communications. See the CAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

The School admits students in the fall semester only. Applicants are responsible for obtaining information on admissions criteria and deadlines from the JMC School Graduate Coordinator or the main school office.

To be admitted to the program a prospective student must:

1. Complete an application for admission to the university, submit required transcripts and pay the required application fees.
2. Complete a 250-500 word essay on the applicant's career objectives and upload it on the same application site as above;
3. Obtain two letters of recommendation from current or former professors and/or employers who can testify to the candidate's ability to pursue an advanced academic degree. These letters should be sent directly to the Graduate Coordinator of the program. At least one recommendation letter must be from a current or former professor unless the applicant has not taken any courses during the previous five years;
4. Foreign students must score at least 600 on the TOEFL and must demonstrate English proficiency in a written essay; and
5. Grade point averages are given considerable weight in evaluating applications, but are not the sole criterion. An applicant should have an average of 3.0 or better (3.3 for foreign students) in the last two years of undergraduate study and the undergraduate major. Exceptions may be made for applicants if the candidate has had significant professional experience in the mass media, offers strong letters of recommendation or other evidence indicating a potential for success in graduate study.

Applicants must meet requirements for graduate admission; however, no particular specialization in undergraduate work is required of a candidate.

Requirements for Admission to Candidacy

To be admitted to candidacy for the Master of Science degree, a student must first meet all university requirements for the degree as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. That requirement is met by taking MCOM 210 (a required course in the program).

The student must demonstrate an aptitude for advanced work in communications, as measured by instructor appraisals, evaluation of previous academic work, recommendations by qualified professionals or other assessments.

The student will meet with the graduate coordinator to develop a formal course of study. The MS degree-approved program will be individually designed to meet the specific objectives of each student. It will take into consideration the nature of previous undergraduate work and post-graduate work completed, as well as any professional and related occupational experience. The proposed graduate course of study must be approved by the graduate coordinator before the student may be considered a candidate for the MS, Mass Communications.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, CPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

In consultation with the department graduate coordinator, the candidate will develop and pursue a program of study. The candidate must successfully complete all requirements of the selected plan including the course work specified in the Master's Degree Approval Program.
### Culminating Experience
All students in this program follow Plan B (Project) for their culminating experience.

#### Plan B (Project)
Plan B requires successful completion of a professionally-oriented project employing multiple media and an oral presentation to a faculty-student audience. Projects should reflect the values of journalism, advertising, or public relations. Projects are designed and completed in a two-semester sequence.

### Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Introduction
Since 1930, the Department of Justice Studies has developed, promoted and fostered social justice and empowered communities. In an ever-changing social, political and economic environment, we remain committed to academic excellence, social activism and policy relevant research. We offer BS and MS degrees in justice studies, a BS in forensic science and minors in justice studies, forensic studies, an MS in criminology, legal studies and human rights. Among other topics, our widely regarded faculty conduct research in the areas of human rights, immigration, violence against women, sex offender behavior, family violence, and DNA profiling. Student groups and clubs include Alpha Phi Sigma, Chi Pi Sigma and the Forensic Science Club. Our graduates work in a multitude of settings including probation, parole, corrections, law enforcement, crime labs, and nonprofit agencies, or they continue their education in law school or other graduate programs.
BS - Justice Studies

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements
All courses in the Preparation and Requirements for the major (all courses in preparation, core, and concentration/specialization) must be completed with a grade of “C” or better.

Justice Studies International Experience Requirement
To satisfy the Justice Studies Department international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at http://www.sjsu.edu/chahs/international-experience/.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Prerequisite Requirements

Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of "C" or better (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJSU Course Catalog for specific information regarding course prerequisites.

Justice Studies International Experience Requirement

To satisfy the Justice Studies Department international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at http://www.sjsu.edu/chahs/international-experience/.

Total Units Required 120
### BS - Forensics Science, Concentration in Chemistry

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

#### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

#### Prerequisite Requirements

Enrollment in any chemistry course requires that the prerequisite courses be passed with a grade of “C” or better (C- not accepted). Exceptions may be made only with instructor consent or if not explicitly stated in the course description. Refer to the SJU Course Catalog for specific information regarding course prerequisites.

#### Justice Studies International Experience Requirement

To satisfy the Justice Studies Department international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at [http://www.sjsu.edu/chahs/international-experience/](http://www.sjsu.edu/chahs/international-experience/).

### Physical Education

**Graduation Writing Assessment Requirement**

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

*A grade of C or better (C- not accepted) is required to meet graduation requirement.*

### Minor - Human Rights

The Minor in Human Rights is meant to prepare students for careers in relation to international law, human rights advocacy/reporting/organizing, and human rights scholarship. The Minor can supplement the program of students who have interests in (for example) social problems, public policy, social movements and social change, international relations/studies, law and governance, issues of justice, and global cultures.

#### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

#### Requirements of the Minor

<table>
<thead>

# Certificate - Collaborative Response to Family Violence (Special Session Program)

The Certificate for Collaborative Response to Family Violence is available to community professionals of all disciplines who wish to enhance their skills and effectiveness through continued study. It is a 12-14 unit certificate program which integrates knowledge in the areas of family violence and collaboration to inform and improve our response to family violence and enhance innovation and effectiveness. Certificate participants will develop a strong working knowledge and awareness of:

- Family violence
- Dynamics, impacts and meaning of violence across disciplines
- Critical systems involved in responding to family violence
- Skills for collaboration
- Critical analysis of stages and elements of effective collaboration

**MS - Justice Studies**

The Department of Justice Studies at San José State University, offers a full-time two-year or part-time three-year Master's program drawing upon criminology, criminal justice, sociology, political science, psychology, law and history.

Areas of teaching and research in the Department include theory, policing, law and society, human rights, policy evaluation, juvenile justice, immigration, punishment & society, race theory, history, and forensic science.

The Master's program, prepares students for careers in criminal justice settings, public institutions, grassroots community organizations, and nonprofit agencies, as well as for doctoral programs and research positions in public agencies.

More information is available on the Department of Justice Studies website at [www.sjsu.edu/justicestudies/](http://www.sjsu.edu/justicestudies/)

### Admission Requirements

#### University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the MS Justice Studies program.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post Baccalaureate Information in this Catalog.

#### Admission to the Program

To be considered for admission to the Justice Studies Department, applicants must complete the university admission requirements, as well as have a minimum grade point average of 3.0 in the last 60 units of university course work. Admission decisions will be based on a weighted assessment of the applicant’s grade point average, course work and preparation, two letters of recommendation from academics, and a short essay on a justice-related topic chosen each year by the Justice Studies graduate committee (see department website for further information).

#### Admission in Conditionally Classified Standing

Applicants meeting the university’s requirements for the Graduate Division but lacking experience in research methods in the social sciences may, at the department’s discretion, be required to take one or two classes to prepare them for the degree. These students may be admitted under conditionally classified standing. The individual admission notification will explain required terms and conditions for attaining Classified standing.

### Requirements for Advancement to Candidacy

For advancement to candidacy for the Master of Science degree in Justice Studies, students must meet the general university requirements for admission to candidacy outlined in the Academic Regulations section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [www.sjsu.edu/gape](http://www.sjsu.edu/gape).

Advancement to Candidacy requires the following:

1. Classified standing;
2. Completion of 9 units of core or required courses with a grade point average of 3.0 (“B”) or better; and
3. Completion of the GWAR

Once advanced to candidacy, the student should meet with the department graduate coordinator to draft an approved plan of study. This program must identify 33 units of course work as outlined in the following list of course requirements.

### Requirements for Graduation

#### University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

#### Completing Requirements for the MS - Justice Studies

##### Course Requirements

Each student must complete a core curriculum of 18 units (JS 201, 202, 203, 207, 211 and 265), 9 units of elective courses, and master’s thesis or project as their 6-unit culminating experience. The thesis option requires six units of JS 299; the project option requires completion of JS 297 and an additional 3-unit elective. Elective courses must be 200-level courses in the department. Subject to graduate coordinator approval, two graduate courses in other departments on campus may be taken as electives, if the student demonstrates their relevance to the student’s program of study and/or career goals in Justice Studies. Undergraduate courses may not count toward the 33 units of required graduate course work. Students who are academically or administratively disqualified from the program will generally not be readmitted.
Culminating Experience
Students select one of the following options for their culminating experience. Students should choose the option that best suits their particular interests and goals.

Plan A (with Thesis)
Plan A provides an advanced program of study for those who are primarily interested in conducting research, and pursuing advanced study toward the doctorate. The Plan A is a 6-unit thesis option designed to provide opportunities for in-depth investigation in the student's area of emphasis. The thesis will include original research on a topic approved by the thesis committee, and must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. The student and the thesis committee chair, with approval by the graduate coordinator, determine the thesis requirements and timelines. Approval by the graduate coordinator and thesis committee and a "B" average in the core coursework is required before a student can register for JS 299, Master's Thesis (3 units). Students interested in this option must also submit a brief written statement to the graduate coordinator describing their research interests and expertise, and receive permission from the graduate coordinator.

Plan B (Project)
The Plan B option provides an advanced program of study for professionals and those who want to pursue careers in justice studies fields. It requires a 3-unit research project that is conducted with the rigor appropriate to graduate work. Its culminating experience is a substantial, original paper on a specific research topic and an associated poster presentation evaluated by a faculty panel comprised of all members of the Justice Studies graduate committee. Individual projects are agreed to by the graduate student and JS 297 academic advisor, and require approval of the Graduate Coordinator. Students choosing this option must take an addition 3-unit elective and enroll in JS 297, Program Evaluation Project during their final semester.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see the SJSU Master's Thesis and Doctoral Dissertation Guidelines.

Total Units Required: 33

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
MS - Criminology, Concentration in Global Criminology, Law and Justice (Special Session Program)

The Department of Justice Studies at San José State University, offers an online Master of Science in Criminology with a Concentration in Global Criminology designed to adapt to the ever-changing environment of the justice and legal systems, and the discipline of criminology. It uniquely combines advanced study of contemporary international crime and the various responses to crime around the globe with analytic and research techniques used by advanced scholars. It provides an international comparative curriculum that develops analytical skills, understanding of legal concepts, theoretical competency, and abilities to apply criminology in practical ways. It aims to equip graduates with a truly global outlook on crime and criminal justice, a commitment to international justice, and professional competencies to apply practices from around the globe to meet the particular needs of their communities.

This degree program is housed in the Department of Justice Studies. More information is available at [www.sjsu.edu/justicestudies/](http://www.sjsu.edu/justicestudies/)

Graduate Coordinator: Dr. Claudio Vera Sanchez (claudio.verasanchez@sjsu.edu)

Admission Requirements

To be considered for admission to the MS in Criminology program, applicants must complete the university admission requirements, as well as have a baccalaureate degree from an accredited four-year college or university, minimum grade point average of 3.0 in the last 60 credits of coursework, a general understanding of computers and technology, and access to a computer with Internet. International applicants must have a TOEFL score of 550 (Paper Based), 213 (Computer Based), or 80 (Internet Based).

International (Foreign) Students

Documentation of the applicant’s TOEFL score should accompany other admission material. For TOEFL Requirements see Policies and Procedures section, Graduate and Post baccalaureate information.

Requirements for Advancement to Candidacy

For advancement to candidacy for the Master of Science degree in Criminology, Concentration in Global Criminology, students must meet the general university requirements for admission to candidacy outlined in the Academic Regulations section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [www.sjsu.edu/gape](http://www.sjsu.edu/gape).

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Graduation Requirements for the MS - Criminology, Concentration in Global Criminology.

Each student must take a core curriculum of 15 units (JS 265, 266, 271, 272, and 273). Elective courses must be 200-level courses in the department. Subject to graduate coordinator approval, two graduate courses in other departments or programs may be taken as electives, if the student demonstrates their relevance to the student’s program of study and/or career goals. Undergraduate courses may not count toward the 30 units of required graduate course work. Students who are academically or administratively disqualified from the program will generally not be readmitted.

Special Session Program Information

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the CPGE website for more information.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

⦁ Minor, Kinesiology
⦁ MA, Kinesiology
⦁ MA, Kinesiology, Concentration in Athletic Training
⦁ MA, Kinesiology, Concentration in Exercise Physiology
⦁ MA, Kinesiology, Concentration in Sport Management
⦁ MA, Kinesiology, Concentration in Sport Studies

Introduction
Kinesiology majors study human movement, the physical activity involved in work and play. Many of our graduates work as athletic directors, athletic trainers, coaches, teachers, personal trainers and sports managers; others continue on to medical school or receive advanced degrees in physical therapy. A charter member of the American Kinesiology Association, our department is a recognized leader in the CSU system as well as in kinesiology education and other allied health professions throughout the country. We offer bachelor’s degrees in kinesiology, athletic training, and teaching, and a master’s degree in kinesiology that allows degree candidates to focus on athletic training, exercise physiology, sport management, sport studies, and other areas of specialization. We support several student organizations, including SPATO, the athletic training club; the Adapted Physical Activity Club, a student service organization that advocates for individuals with disabilities; the Pre-PT Club; and the Kinesiology Ambassadors’ Club, which seeks to spread information about the field of kinesiology.
BS - Kinesiology

Satisfactory completion of the requirements of the four-year major program in kinesiology leads to a BS degree. The program is based upon the discipline of kinesiology and stresses both theoretical and practical objectives. Five areas of specialization.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

Students in this major must complete all courses Requirements for the Major (All courses in Preparation, Core, Concentration/Specialization) with a “C- or better” to graduate. The following courses in Preparation of major must be passed with a “C or better”: KIN 100W.

Kinesiology International Experience Requirement

To satisfy the Department of Kinesiology international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at http://www.sjsu.edu/chahs/international-experience.

University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>
<th>24</th>
</tr>
</thead>
</table>
Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

**Total Units Required:** 120
BS - Kinesiology, Preparation for Teaching

This major is designed for students interested in teaching physical education in high school or middle school. The following course work satisfies San José State University’s requirements for a BS in Kinesiology. The BS—Kinesiology, Preparation for Teaching is approved as subject matter preparation for a single subject credential by the California Commission on Teacher Credentialing (CCTC). Individuals who do not wish to complete one of the degree programs, or individuals seeking a single subject credential in subject areas not listed must pass all portions of the appropriate Commission-approved subject matter examination(s).

Minimum grade point average (GPA) criteria may be required for verification of subject matter competency. Completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

Note: Students who wish to complete or have completed another major should consult with a Department of Kinesiology advisor who specializes in teacher preparation to determine requirements for single subject matter competency certification in physical education.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details. Major-Specific Graduation Requirements

Students in this major must complete all courses Required in the Major (All courses in Preparation, Core, Concentration/Specialization) with a “C- or better” to graduate. The following courses in Preparation of major must be passed with a “C or better”: KIN 100W.

Kinesiology International Experience Requirement

To satisfy the Department of Kinesiology international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Applied Sciences and Arts based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at http://www.sjsu.edu/chahs/ international-experience.

Core Lower Division General Education

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

## Physical Education

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

A grade of C or better (C- not accepted) is required to meet graduation requirements.

### Preparation for the Major

Graduate Program in Kinesiology

Graduate Coordinator: Dr. Ted Butryn

Requirements for Admission to Classified Standing

The Department of Kinesiology requires the following of all applicants seeking admission to classified standing in the MA - Kinesiology in addition to meeting requirements for admission to the Graduate Division:

1. A baccalaureate degree with a major or a minor in Kinesiology or successful completion of a maximum of 12 units of foundation course work as assigned by the Graduate Coordinator or an assigned Academic Advisor.
2. A minimum grade point average of 3.0 in the last 60 semester units (or 90 quarter units) of work.
3. A fully completed CSU Apply Application, including the Statement of Purpose on the application. Statement of purpose should include a thoughtful narrative about the applicant's research interests, as the two core research methods courses necessitate that students think about their final culminating experiences upon acceptance into the program.
4. A GRE General Test score of at least 150 verbal and 141 quantitative.
5. Two (2) letters of recommendation mailed (or signed, scanned and emailed from a university or professional work account) directly to the Graduate Coordinator.

Requirements for Admission to Conditionally Classified Standing

The graduate coordinator, in consultation with faculty, may approve admission of a student who meets the requirements for admission to the Graduate Division who has neither a major nor a minor in Kinesiology; has a grade point average below 3.0 in the last 60 semester units (or 90 quarter units), or scores below 150 verbal or 141 quantitative on the GRE General Test. The student may become eligible for admission to classified standing upon: satisfactory completion of prescribed undergraduate course deficiencies (foundation coursework), and/or completion of six units of graduate course work with a minimum grade point average of 3.0 in each course.

Requirements for Admission to Candidacy for the MA Degree

General university requirements for admission to candidacy for the Master of Arts degree are outlined in detail in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape. Following are additional requirements of the Department of Kinesiology for the Master of Arts degree.

Upon admission to the Graduate Division and prior to registration, each student should meet with a graduate academic advisor in the student’s chosen concentration area. If there are any deficiencies in a student’s undergraduate work, additional upper-division undergraduate foundation courses may be required. Foundation courses may not be counted for credit in the master’s program. If foundation units are required, additional upper-division KIN units will be assigned by the graduate advisor.

A proposed program for the graduate objective selected should be developed as early as possible with the assistance of a graduate academic advisor in the student’s concentration area.

The proposed program must be approved by the graduate advisor, the graduate coordinator, and the Office of Graduate Studies before the student is considered a candidate for the Master of Arts degree.

Graduation Requirements

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Completing Requirements for the MA - Kinesiology

Plan A (with Thesis)

The purpose of this plan is to provide concentrated study in one of the subdisciplinary areas of Kinesiology. It is crucial that students electing Plan A identify the focus of their concentration early so that an appropriate thesis topic may be developed and a thesis committee selected.

Required courses are KIN 250, KIN 251, and KIN 299 (6 units). Concentration and Elective classes (18 units) from the student’s selected concentration should be determined in consultation with a graduate academic advisor. A maximum of 9 units may be selected from outside the Department of Kinesiology.

Plan B (Non-Thesis)

This plan is for students interested in producing a research-based creative project in Kinesiology. The plan requires a special project in place of a thesis.

Required courses are KIN 250, KIN 251, and KIN 298 (3 units).

Concentration and Elective classes (21 units) from the student’s selected concentration should be determined in consultation with a graduate academic advisor. A maximum of 9 units may be selected from outside the Department of Kinesiology.

Note: The Graduate Athletic Training Education Program (GATEP) has a specific course structure and a separate application process.
### MA - Kinesiology

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

CLARK HALL 420G
408-924-4626

Professors
Damian Bacich, Coordinator

Curricula
_minor, Latin American Studies

Introduction
The interdepartmental minor in Latin American Studies is designed to complement a wide variety of academic majors by providing knowledge of Latin American affairs, culture and politics. Courses may be selected from art, world languages and literatures, history, Chicana and Chicano studies, philosophy, political science and theatre arts.
Minor - Latin American Studies
This degree is listed with the World Languages and Literatures.

Curricula
⦁ BA, Linguistics
⦁ Minor, Linguistics
⦁ Certificate, Computational Linguistics
⦁ Certificate, Undergraduate TESOL
⦁ Certificate, Graduate TESOL
⦁ MA, Linguistics
⦁ MA, Teaching English to Speakers of Other Languages

Introduction
Linguistics, the scientific study of human language, explores what language is, how it works and which features human languages have in common. Our curriculum focuses on understanding how the languages of the world work and on addressing the English language needs of our culturally diverse society. Students in the Department of Linguistics and Language Development (LLD) are part of an ethnically and linguistically diverse student body, taught by nationally and internationally recognized faculty. We offer graduate and undergraduate degrees in linguistics, a certificate in computational linguistics, a master’s degree in TESOL (Teaching English to Speakers of Other Languages), and undergraduate and graduate certificates in TESOL. Our research infrastructure includes a state-of-the-art computer lab, a phonology lab, and access to computerized language data. Approximately 25% of our students come from other countries and contribute greatly to our programs.
BA - Linguistics

The BA-Linguistics undertakes the scientific study of the nature, structure and function of language. Linguists study the origins of language, the meaning and history of words, variation in language, what language tells us about the workings of the human mind, and the practical aspects of language, including intercultural communication, language learning and teaching, and language as a conveyor of information in profound human arenas, such as medicine and law. Linguistics is also a central discipline that is involved in communicating with machines using natural language (i.e., artificial intelligence and machine recognition and synthesis of speech). The program offers state-of-the-art equipment for the acoustic and perceptual study of speech. Students in the major acquire critical thinking and problem-solving skills and receive excellent preparation for advanced studies in linguistics as well as anthropology, communication, education, law, and speech and hearing. Students with knowledge of more than one language have an excellent background for the study of linguistics.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

#### Core Lower Division General Education (33 units)

- Of the 39 units required by the university, 6 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

**NOTE:** STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

#### Upper Division General Education (6 units)

- Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

#### American Institutions (6 units)

- The 6 units of American Institutions (US223) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

Exceptions to the CWAR may be found at [http://info.sjsu.edu/gwar/html](http://info.sjsu.edu/gwar/html).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

The department recommends LLD 100W.

### Preparation for the Major

**MUST MEET ONE OF THE FOLLOWING CRITERIA:**

- One year of college level language other than student’s native language (10)
- Demonstrated equivalent competence (0)
- One year of college level American Sign Language (6)

For students for whom English is not the native language, one year of college level English study may fulfill this requirement.

### Requirements of the Major

*CE Basic Skills requirements must be completed prior to taking courses in the major.*

### Electives in the Major

A grade of C or better (C- not accepted) is required to meet graduation requirement.

**By a careful selection of five additional electives in the major (below), students can choose coursework toward completion of a Certificate in Computational Linguistics or a Certificate in TESOL.** Elective courses (up to 3 units) from other departments such as World Languages and Literatures, English, Communication Studies, Computer Science, Psychology, Philosophy, Anthropology and Communicative Disorders can also be taken with prior advisor approval.

**COMPLETE FIVE COURSES FROM:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 107</td>
<td>Patterns of English</td>
<td>3</td>
</tr>
<tr>
<td>LING 108</td>
<td>Introduction to Second Language Development, Teaching, and Assessment</td>
<td>3</td>
</tr>
<tr>
<td>LING 115</td>
<td>Corpus Linguistics</td>
<td>3</td>
</tr>
<tr>
<td>LING 122</td>
<td>English as a World Language</td>
<td>3</td>
</tr>
<tr>

<tbody>
<tr>
<td>120</td>
</tr>
</tbody>
</table>
# Minor - Linguistics

The minor in Linguistics provides training in the scientific study of language for students whose professional competence would be enhanced by a more thorough knowledge of linguistics than is provided in their majors.

## University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

### Proficiency for the Minor

<table>
<thead>
<tr>
<th>MUST MEET ONE OF THE FOLLOWING CRITERIA:</th>
</tr>
</thead>
<tbody>
<tr>
<td>One year of college level language other than student’s native language (10)</td>
</tr>
<tr>
<td>Demonstrated equivalent competence (0)</td>
</tr>
<tr>
<td>One year of college level American Sign Language (6)</td>
</tr>
</tbody>
</table>

*For students for whom English is not the native language, one year of college level English study may fulfill this requirement.*

### Requirements of the Minor

</table>
Certificate - Computational Linguistics

The Certificate in Computational Linguistics is an 18 unit program that provides a basic education and a certain amount of practical training in the interdisciplinary field of computational linguistics. It was designed to meet the needs of individuals who desire formal course preparation as language analysts in the environment of human language interfaces in software development. Please contact the computational linguistics coordinator for advising before beginning this certificate.

To receive the Certificate in Computational Linguistics, students must complete the following 18 units of course work and fulfill the programming requirement:

**Requirements of the Certificate**

<table>
<thead>
<tr>
<th>Course</th>

**Total Units Required**

18

Programming requirement: Demonstrated competence with a programming language, such as PERL, Java script, C, C++, Python, Ruby, Prolog, or Lisp. This requirement may be fulfilled by completing a course at SJSU or a community college, or by providing work demonstrating knowledge of a programming language. NOTE: CS and MATH courses above have pre-requisites of their own, so the total number of units you must take for the certificate may vary depending on your choice of electives and your academic background.

Any matriculated upper division undergraduate or graduate student may pursue this certificate. Non-matriculated students may take the courses through Extended Studies Open University. Students must maintain a 3.0 average in these courses to be awarded the certificate.
## Certificate - Undergraduate TESOL

The undergraduate certificate in TESOL is for students who have not yet completed the BA. Students complete courses related to the structure of English and teaching of English to speakers of other languages. For students whose major is not linguistics, the TESOL certificate can be combined with the minor in linguistics. To receive the undergraduate Certificate in TESOL, students must complete the following eighteen units of required course work:

### Requirements of the Certificate

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 101</td>
<td>Introduction to Linguistics</td>

<td>Introduction to Second Language Development, Teaching, and Assessment</td>
<td>3</td>
</tr>
<tr>
<td>LING 166</td>
<td>Sociolinguistics: Cross-Cultural Communication</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives**

Choose two courses with the approval of the TESOL Coordinator

**Total Units Required**

Any matriculated upper division student may pursue this certificate. Students must maintain a 3.0 average in these courses to be awarded the certificate.
Certificate - Graduate TESOL

The certificate is designed to meet the needs of individuals desiring formal course preparation and training as classroom teachers of English to speakers of other languages but not requiring an MA degree. While the certificate is approved by the university, it does not provide certification, accreditation, or credentialing approved by the Commission on Teacher Credentialing. Students must maintain a 3.0 average in these courses to be awarded the certificate.

<table>
<thead>
<tr>
<th>Requirements of the Certificate</th>

</tr>
</tbody>
</table>

Any matriculated graduate student may pursue this certificate. Non-matriculated post-graduate students may take the courses through Extended Studies Open University. Students must maintain a 3.0 average in these courses to be awarded the certificate.
Graduate Programs
Linguistics, the scientific study of human language, explores what language is, how it works and which features human languages have in common. Our curriculum focuses on understanding how the languages of the world work and on addressing the English language needs of our culturally diverse society. Students in the Department of Linguistics and Language Development (LLD) are part of an ethnically and linguistically diverse student body, taught by nationally and internationally recognized faculty. We offer graduate and undergraduate degrees in linguistics, a certificate in computational linguistics, a master's degree in TESOL (Teaching English to Speakers of Other Languages), and undergraduate and graduate certificates in TESOL. Our research infrastructure includes a state-of-the-art computer lab, a phonology lab, and access to computerized language data. Approximately 25% of our students come from other countries and contribute greatly to our programs.

Requirements for Admission to Conditionally Classified Standing
Students holding an accredited baccalaureate degree and who otherwise satisfy the graduate level admissions requirements of San José State University (in the case of students with baccalaureate degrees from a university where English is not the principal language of instruction the minimum score of 577, computer score of 233, or Internet based score of 90 on the TOEFL or 7.0 on IELTS) are eligible for admission as conditionally classified students. Students must have a grade point average of at least 3.0 in the last 60 semester (90 quarter) units.

Requirements for Admission to Classified Standing
Students are eligible for admission as classified graduate students if they hold an accredited baccalaureate degree and otherwise satisfy the graduate level admissions requirements for San José State University (in the case of students with baccalaureate degrees from a university where English is not the principal language of instruction, this includes a minimum score of 577, 233 on the computerized version, or 90 on the Internet based version on the TOEFL or 7.0 on IELTS). In addition, students in the MA Linguistics program are eligible for admission as classified graduate students if they have completed at least nine semester units of acceptable work in linguistics equivalent to San José State University's Introduction to Linguistics (LING 101), Introduction to Phonetics (LING 111), and Introduction to Syntax (LING 112) with a grade of "B" or better in each of these three classes. For students in the MA TESOL program, two courses are prerequisite for admission to classified standing: Introduction to Linguistics (LING 101), and Patterns of English (LING 107), which must be completed with a grade of "B" or better in each.

Students admitted as conditionally classified may complete the requirements for classified standing after admission to the program; however a “B” grade must be achieved in all prerequisite courses. Additionally, the granting of classified standing is subject to the coordinator’s review of the conditionally classified student’s work.

Requirements for Admission to Candidacy
The requirements for admission to candidacy for the Master of Arts degree in Linguistics or TESOL are those established by the university and the department. For information see the Graduate Policies and Procedures section of this catalog.

Graduation Writing Assessment Requirement
Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Requirements for Graduation
Students must complete all residency, curriculum, unit, CPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.
MA - Linguistics
The MA - Linguistics provides students with an interdisciplinary education in the scientific study of language. Courses in general and computational linguistics serve students interested in cognitive and functional linguistics, language variation and change, speech synthesis, and machine speech recognition. Graduates in linguistics offer a set of highly specialized skills to computer companies working in speech technology and artificial intelligence. Many pursue careers with companies specializing in these areas. A small but significant number of linguistics graduates enter PhD programs for more advanced study. Other graduates pursue teaching careers in language and linguistics in domestic and overseas institutions.

Requirements for the MA - Linguistics include those established by the department. For information concerning university requirements, see the Academic Requirements section of this catalog.

Graduation Requirements
University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Culminating Experience
Students have the option of completing the MA - Linguistics under one of two plans:

Plan A (Thesis)
Completion of 30 units; approved thesis proposal and thesis. The thesis option allows a student to pursue research in an area of common interest to the student and a faculty member. A thesis proposal may grow out of a course or be developed in LING 298, and must be approved by the student's advisor and thesis committee members. For Master's Thesis requirements please visit [http://www.sjsu.edu/cgs/current-students/thesis-and-dissertation-information/index.html](http://www.sjsu.edu/cgs/current-students/thesis-and-dissertation-information/index.html).

Plan B (Comprehensive Exam)
Completion of 30 units; passing of a comprehensive examination.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

</tr>
</tbody>
</table>

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master's degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.
MA - Teaching English to Speakers of Other Languages (TESOL)

The MA- TESOL prepares students to assess and systematically build the listening, speaking, reading and writing skills of students from other language backgrounds who wish to learn English or to improve their skills in English. The department strikes a balance between theory and practice. Graduates from the MA- TESOL program staff many of the area's English as a Second Language programs at the community college, adult school and private program level. In addition, a number of TESOL graduates have chosen careers in international settings, teaching English as a Foreign Language in universities, schools and companies in Taiwan, Korea, Japan, Hungary, Mexico and other countries. MA- TESOL graduates are also eligible to teach abroad through the U.S. government sponsored Fulbright and English Teaching Fellow programs. Any undergraduate major is appropriate preparation for this degree.

Culminating Experience

Plan A (with Thesis)
Completion of 30 units; approved thesis proposal and thesis. The thesis option allows a student to pursue research in an area of common interest to the student and a faculty member. A thesis proposal may grow out of a course or be developed in LLD 298, and must be approved by the student’s advisor and thesis committee members. For Master’s Thesis requirements please visit http://www.sjsu.edu/cgi/current-students/thesis-and-dissertation-information/index.html.

Plan B (without Thesis)
Students are required to complete a total of 30 units (27 required; 3 electives), in addition, students must pass a comprehensive examination.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Introduction

One of the oldest intellectual disciplines, mathematics plays a key role in many fields: cryptography, computer graphics, operations research, engineering and science. Students majoring in mathematics learn to communicate mathematical ideas effectively and to use basic computational skills, mathematical models and technology to solve practical problems. The Department of Mathematics and Statistics offers both undergraduate and graduate programs that prepare our alumni to work in industry and to teach in secondary schools or community colleges. In addition to a BA in mathematics, we offer a BS in applied mathematics that trains students for more technical careers and incorporates student research projects at the Center for Applied Mathematics, Computation and Statistics (CAMCOS). We also offer four master’s degrees: an MS and an MA in mathematics, an MA that concentrates on mathematics education and an MS in Statistics.

Honors Program in Mathematics

The requirements for mathematics majors to graduate with departmental honors are: (1) at least a 3.0 G.P.A. overall, (2) at least a 3.5 G.P.A. in the major, (3) Completion of MATH 180H (Individual Studies for Honors).

Restriction on Enrollment for Credit

Enrollment for credit in MATH 008, 010, 012, 070, 071, 101, 105, 106, 107A, and 107B will not be allowed for students who have received credit in MATH 019, 030, 031, 030P, 032, unless the particular course in question is required for the student’s major, minor or credential requirements.

Calculus Placement Examination

Many students who wish to enroll in MATH 030, MATH 030P, MATH 060 or MATH 071 are required to take the Calculus Placement Examination. Information and forms are available in the Mathematics and Statistics Department Office, MH 308, or online at the Mathematics and Statistics Department website: www.sjsu.edu/math.
BA - Mathematics

The BA - Mathematics is recommended for students who enjoy problem solving and would like to apply problem solving skills along with communication and analyzing skills in a future career. This degree also provides an excellent background for graduate work in mathematics and other disciplines including law and medicine as well as engineering and science.

The degree requires 33 upper division units of mathematics and computer science. If upper division mathematics and computer science requirements are satisfied using lower division transferred courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All courses in the Preparation and Required in the Major must be completed with a grade of “C- or better”, and the following Preparation for the Major course with a grade of “C or better”: MATH 100W

### Physical Education

#### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst).

Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Total Units Required 120
BA - Mathematics, Preparation for Teaching (Integrated)

This integrated major is designed for students interested in teaching mathematics in high school or middle school. The course work satisfies requirements for (1) a BA in Mathematics, (2) a single subject teaching credential in mathematics (SSC), and (3) an education specialist instruction credential in mild to moderate disabilities (ESC). The integrated BA Mathematics Preparation for Teaching has been approved by the California Commission on Teacher Credentialing (CCTC) as an integrated undergraduate teacher preparation program. Students who complete the 4-year BA Math degree will be recommended to the CCTC for a preliminary single subject credential to teach middle school and high school mathematics. Students who complete the ESC requirements for an additional semester after graduation will be recommended to the CCTC for a preliminary education specialist credential to teach math to students with special needs.

Students in the integrated program must have successfully passed the California Basic Educational Skills Test (or equivalent alternatives) and completed 80% of math coursework in order to satisfy subject matter competency and engage in solo teaching in middle school or high school math classrooms. Minimum grade point average (GPA) criteria is required to verify subject matter competency and entry to student teaching.

The subject matter preparation component of the integrated BA Math Preparation for Teaching Program includes (1) a minimum of 30 semester units of core mathematics coursework that is directly related to subjects that are commonly taught in departmentalized mathematics classes in California public schools and (2) a minimum of 15 semester units of coursework that provides extended study (breadth and depth) of the subject. The degree requires 30 upper division units of mathematics. If upper division mathematics requirements are satisfied using lower division transferred courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

The 33 required upper division units of credential courses need to be taken at SJSU.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses in the Preparation and Required in the Major must be completed with a grade of “C-” or better”, and the following Preparation for the Major course with a grade of “C” or better: ENGR 100W.

All credential courses in the Preparation and Required in the Major must be completed with a grade of “B” or better.

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 18 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

**Total Units Required**

120-122
### BS - Applied Mathematics, Concentration in Applied and Computational Mathematics

This degree is recommended for students who wish to work in the research and development area of industry. This program also prepares a student for graduate study in applied mathematics, numerical analysis, or operations research.

The concentration in applied and computational mathematics provides a solid foundation in classical applied mathematics as well as computational mathematics, which could be informally described as “how to employ mathematics on computers wisely.” A graduate could seek direct employment assisting a group of scientists with the formulation and solution of problems. There is a great need in local and national technical industries for people with sufficiently strong mathematical knowledge to participate on such teams. For example, modern techniques for solving partial differential equations are very sophisticated; the best method in a given situation depends on the properties of the model. Once a numerical approximation has been formulated, the techniques to solve that, and the commercial software available to do it, again require informed decisions.

30 upper division units of mathematics are required for this degree. If upper division requirements are fulfilled using transferred lower division courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

**Major-Specific Graduation Requirements**

All courses in the Preparation and Required in the Major must be completed with a grade of “C- or better”, and the following Preparation for the Major course with a grade of “C- or better”: MATH 100W

BS - Applied Mathematics, Concentration in Economics and Actuarial Science

This program is designed for students who want to become actuaries and for students who want a program that integrates business, economics, and mathematics. Actuaries are trained to analyze risk and are typically employed by insurance companies, banks, the government, and companies that handle retirement funds. 33 upper division units of mathematics are required for this degree. If upper division requirements are fulfilled using transferred lower division courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses in the Preparation and Required in the Major must be completed with a grade of "C- or better", and the following Preparation for the Major course with a grade of "C or better": MATH 100W

### BS - Applied Mathematics, Concentration in Statistics

This degree program is recommended for students who wish to pursue a career in statistics. This program also prepares a student for graduate study in probability and statistics.

The concentration in statistics is appropriate for students pursuing a career involving the collection and analysis of numerical data, the use of statistical techniques to predict population growth or economic conditions, the use of statistics to analyze medical, environmental, legal and social problems, or to help business managers make decisions and carry out quality control. The statistics concentration also provides a solid foundation for students who plan to become actuaries.

36 upper division units of mathematics are required for this degree. If upper division requirements are fulfilled using transferred lower division courses, then additional upper division math courses will need to be taken to obtain the required number of upper division units.

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

### Major-Specific Graduation Requirements

All courses in the Preparation and Required in the Major must be completed with a grade of “C- or better”, and the following Preparation for the Major course with a grade of “C or better”: MATH 100W

### University Graduation Requirements

MA - Mathematics

This degree is recommended for future community college teachers and for students who plan to continue toward the PhD in mathematics.

Requirements for Admission
Candidates must meet all the university admissions requirements. Students can be admitted in either classified or conditionally classified standing. If an applicant's preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, the conditions will include taking preparatory courses to meet these requirements. Such courses will not count as part of the master’s degree program requirements.

Candidates must meet all the university admissions requirements. Students can be admitted in either classified or conditionally classified standing. If an applicant's preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, the conditions will include taking preparatory courses to meet these requirements. Such courses will not count as part of the master’s degree program requirements.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE.

Classified Standing
To enter this program with classified standing, a student must meet the minimum requirements for admission to the Graduate Division, have completed 18 semester units of upper-division mathematics with a GPA of at least 3.0, and have one to three letters of recommendation submitted on his or her behalf. The coursework must be acceptable toward a bachelor’s degree in mathematics and may not be counted toward the MA degree.

Conditionally Classified Standing
A student who meets the minimum requirements for admission to the Graduate Division but does not satisfy the mathematics coursework requirements stated above may be admitted as a conditionally classified student. Eligibility is determined on a case-by-case basis. The individual admission letter will explain required terms and conditions for attaining classified standing. After arrival at SJSU, a conditionally accepted student must complete additional coursework to make up the unit deficiency in order to achieve classified status. These make-up units will not be included in the MA degree unit requirement total.

Requirements for Advancement to Graduate Candidacy
To advance to candidacy in the MA in Mathematics degree, a student must meet the university candidacy requirements, as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations (CAPE) website at www.sjsu.edu/gape.

Thesis and Writing Project students must have their committees (see below) in place before filing for candidacy.

The student must complete the Petition for Advancement to Graduate Candidacy form. This form lists, among other things, all the coursework to be counted toward the master’s degree. After the form has been signed by the student’s thesis or writing project director (if applicable) and the Graduate Coordinator, it is forwarded to CAPE for final approval. Any subsequent changes to the student’s program require approval from CAPE.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MA - Mathematics Graduation Requirements

Culminating Experience
Students must choose one of three options: The Plan A (Thesis), Plan B (Project), or Plan B (Comprehensive Examination).

Plan A (Thesis)
A student who selects the Thesis option must find a willing tenured or tenure-track faculty member to serve as the thesis advisor, and complete a thesis under that advisor’s supervision. The thesis must be reviewed and approved by a committee composed of the advisor and two other faculty members chosen by the student in consultation with the advisor. The student must give a public presentation on the thesis, which is followed by an oral examination (defense) conducted by the committee. Theses must be filed with the Associate Dean of the College of Graduate Studies, subject to the rules and deadlines established by the College of Graduate Studies.

Thesis students must enroll in MATH 299, Master’s Thesis (3 units). Students receive credit when the thesis is completed, successfully defended, and all committee members have signed off on it. Students who do not complete their theses during the semester in which they are enrolled in MATH 299 will receive a grade of “RP” for that course. If all other degree requirements have been completed, students must subsequently enroll in MATH 1290R in compliance with university regulations until the thesis is completed, defended, and approved by Graduate Studies.
Plan B (Project)
A student who selects the Project option must find a willing tenured or tenure-track faculty member to serve as the project advisor, and complete a written project under that advisor’s supervision. The project must be reviewed and approved by a committee composed of the advisor and two other faculty members chosen by the student in consultation with the advisor. The student must give a public presentation on the project, which is followed by an oral examination (defense) conducted by the committee.

Students choosing the Plan B (Project) option must enroll in MATH 298, Special Study (3 units). Students receive credit when the writing project is completed, successfully defended, and all committee members have signed off on it. Students who do not complete their projects during the semester in which they are enrolled in MATH 298 will receive a grade of “RP” for that course. If all other degree requirements have been completed, students must subsequently sign up for MATH 1290R in compliance with university regulations until the writing project is completed and defended.

Plan B (Comprehensive Examination)

Students who select this option must pass two written comprehensive examinations. One examination will be in Higher Algebra (221A and 221B). The second exam will be in Analysis (231A and 231B).

Students choosing the Plan B (Comprehensive Exam) option must enroll in an additional elective (3 units) selected in consultation with the program graduate advisor. Students complete the program Culminating Experience when they pass both exams. Students who successfully complete all other program requirements but not one or both exams must subsequently enroll in MATH 1290R for the following semester or semesters in compliance with the university requirement for continuous enrollment until both exams have been passed.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

   Oral Presentation
   Oral Defense

Plan B (Comprehensive Exam) ......................................................... 3
   MATH 295E. Mathematics Comprehensive Exam Preparation .......... 3
   Comprehensive Exam

Total Units Required .................................................................... 33

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 6.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
MA - Mathematics, Concentration in Mathematics Education (Not Accepting Students)

This degree is recommended for secondary school mathematics teachers who want to increase their mathematical competence and their knowledge of the teaching and learning of mathematics.

Requirements for Admission to Classified Standing
Admission requirements to classified standing for this program are the same as for the MA - Mathematics program, except the 18 semester unit requirement is replaced by 21 semester units.

Requirements for Admission to Conditionally Classified Standing
Admission requirements to conditionally classified standing are the same as for the MA - Mathematics program.

Requirements for Admission to Candidacy for the MA - Mathematics, Concentration in Mathematics Education
Requirements are the same as for the MA - Mathematics except that requirement 2 is replaced by: The Qualifying Examination is an individualized written exam on fundamental ideas related to the concentration in Mathematics Education. These ideas are normally covered in MATH 201A, MATH 201B, and MTED 209.

Completing Requirements for the MA - Mathematics, Concentration in Mathematics Education
Both Plan A (with Thesis) and Plan B (with Writing Project) requirements are the same as in the MA Mathematics except the thesis or writing project must be in the field of mathematics education.

Electives
The rules for elective units are the same as those for MA - Mathematics

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

- Plan B: 3 units

### Total Units Required
- The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 6.
- Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
- 30 units
MS - Mathematics
This degree is appropriate for students who seek to deepen their knowledge of mathematics and its applications for work in the research and development area of industry.

Requirements for Admission
Candidates must meet all the university admissions requirements. Students can be admitted in either classified or conditionally classified standing. If an applicant’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, the conditions will include taking preparatory courses to meet these requirements. Such courses will not count as units that fulfill the master’s degree program requirements.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Classified Standing
To enter this program with classified standing, a student must meet the minimum requirements for admission to the Graduate Division, have completed 18 semester units of upper-division mathematics with a GPA of at least 3.0, and have one to three letters of recommendation submitted on his or her behalf. The coursework must be acceptable toward a bachelor’s degree in mathematics and may not be counted toward the MS degree.

Conditionally Classified Standing
A student who meets the minimum requirements for admission to the Graduate Division but does not satisfy the mathematics coursework requirements stated above may be admitted as a conditionally classified student. Eligibility is determined on a case-by-case basis. The individual admission letter will explain required terms and conditions for attaining classified standing. After arrival at SJSU, a conditionally accepted student must complete additional coursework to make up the unit deficiency in order to achieve classified status. These make-up units will not be included in the MA degree unit requirement total.

Requirements for Advancement to Graduate Candidacy
To advance to candidacy for the MS degree, a student must meet the university candidacy requirements, as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section entitled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations (GAPE) website at www.sjsu.edu/gape.

Thesis and Writing Project students must have their committees (see below) in place before filing for candidacy.

The student must complete the Petition for Advancement to Graduate Candidacy form. This form lists, among other things, all the coursework to be counted toward the master’s degree. After the form has been signed by the student’s thesis or writing project director (if applicable) and the Graduate Coordinator, it is forwarded to GAPE for final approval. Any subsequent changes to the student’s program require approval from GAPE.

Requirements for Graduation
University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MS - Mathematics Graduation Requirements
Culminating Experience
Students must choose one of three options: The Plan A (Thesis), Plan B (Project), or Plan B (Comprehensive Examination).

Plan A (Thesis)
A student who selects the Thesis option must find a willing tenured or tenure-track faculty member to serve as the thesis advisor, and complete a thesis under that advisor’s supervision. The thesis must be reviewed and approved by a committee composed of the advisor and two other faculty members chosen by the student in consultation with the advisor. The student must give a public presentation on the thesis, which is followed by an oral examination (defense) conducted by the committee. Theses must be filed with the Associate Dean of Graduate Studies, subject to the rules and deadlines established by the College of Graduate Studies.

Thesis students must enroll in MATH 299, Master’s Thesis (3 units). Students receive credit when the thesis is completed, successfully defended, and all committee members have signed off on it. Students who do not complete their theses during the semester in which they are enrolled in MATH 299 will receive a grade of “RP” for that course. If all other degree requirements have been completed, students must subsequently enroll in MATH 1290R in compliance with university regulations until the thesis is completed, defended, and approved by College of Graduate Studies.
Plan B (Project)
A student who selects the Project option must find a willing tenured or tenure-track faculty member to serve as the project advisor, and complete a written project under that advisor's supervision. The project must be reviewed and approved by a committee composed of the advisor and two other faculty members chosen by the student in consultation with the advisor. The student must give a public presentation on the project, which is followed by an oral examination (defense) conducted by the committee. Students choosing the Plan B (Project) option must enroll in MATH 298, Special Study (3 units). Students receive credit when the writing project is completed, successfully defended, and all committee members have signed off on it. Students who do not complete their projects during the semester in which they are enrolled in MATH 298 will receive a grade of "RP" for that course. If all other degree requirements have been completed, students must subsequently sign up for MATH 1290R in compliance with university regulations until the writing project is completed and defended.

Plan B (Comprehensive Examination)
Students who select this option must pass two written comprehensive examinations. One examination will be in Numerical Analysis (243A and 243M). The second exam will be in Differential Equations/Dynamical Systems (233A and 234).

Students must enroll in MATH 298E (3 units) for the semester they are taking their comprehensive exams. Students receive credit when both exams are passed. Students who do not pass one or both exams during the semester they are enrolled in MATH 298E will receive a grade of "RP" for that course. If all other degree requirements have been completed, students must subsequently enroll in MATH 1290R for the following semester or semesters in compliance with the university requirement for continuous enrollment until both exams have been passed.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

</thead>
</table>

Elective courses must be planned in consultation with the Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 6.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
MS - Statistics

The Master of Science in Statistics prepares students to become practicing statisticians in business, government and industry fields. It features theoretical and applied coursework in statistics and advanced statistical techniques, and its skills-based coursework emphasizes writing and communication skills and provides students with practical project experience. The program was developed in concert with industry and is designed to dovetail into professional career opportunities.

Persons with bachelor's degrees in engineering, the sciences, economics, business, the social sciences or other fields that use statistics are encouraged to apply. Those with bachelor's degrees in mathematics or statistics are welcome to apply for the program in order to advance their technical and theoretical skills.

Information about the MS, Statistics is available on the Department of Mathematics & Statistics website at www.sjsu.edu/math

Admissions Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. See the CAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

To enter this program with classified standing, an applicant must meet the minimum requirements for admission to the Graduate Division. Applicants must also have completed the following SJSU courses or their equivalents each with a grade of "B" or better (this coursework is not counted toward the MS degree):

1. A calculus series through multiple integration and partial differentiation (equivalent to the SJSU courses MATH 30, 31 and 32);
2. Linear algebra equivalent to MATH 129A; and
3. Introductory calculus-based probability and statistics equivalent to MATH 161A.

Additional, applicants must also submit scores from the general GRE test. Applicants must have two letters of recommendation submitted on their behalf.

Requirements for Admission to Conditionally Classified Standing

An applicant who meets the minimum requirements for admission to the Graduate Division but does not yet satisfy the mathematics and statistics coursework program requirements stated above may be admitted as Conditionally Classified. The student must complete additional coursework to make up the deficiency before beginning the program. The units earned from this additional coursework may not be counted towards the total number of units required for the MS degree. The individual admission letter will explain required terms and conditions for attaining Classified standing.

Requirements for Admission to Candidacy

To be admitted to candidacy for the MS Statistics degree:

1. A student must meet the candidacy requirements as stated in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled "Graduation Writing Assessment Requirement" for details. The GWAR requirement is fulfilled by passing CS 200W.
2. Complete MATH 163 and 164, each with a grade of at least B.
3. Complete at least 18 units towards the degree with at least a 3.0 average.
4. Complete the Request for Candidacy and Graduate Degree Program form for the Master of Science degree. This form lists, among other things, all the coursework to be counted toward the master's degree. After the form has been signed by the Graduate Coordinator, it is forwarded to the Associate Dean for College of Graduate Studies for final approval. Any subsequent changes to the student’s program require approval from College of Graduate Studies.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.
### MS- Statistics Graduation Requirements

Students in the MS Statistics program complete all courses in the program core, project experience or written exam, and culminating experience. Those choosing the Specialization in Machine Learning complete the electives MATH 253, 252, 253 and 267. All other students complete MATH 261B and 9 units of electives selected in consultation with, and approved by, the Statistics Coordinator. The electives should form a coherent set of courses associated with the student's career goals. They may include a maximum of 3 units of MATH 180 and a maximum of three units of MATH 203 or MATH 298. The maximum number of 100-level undergraduate units that can be applied toward the master's degree is 15.

### Culminating Experience

#### Plan B (Project)

Students in the MS, Statistics enroll in the MATH 269 in their final semester. They complete the program culminating experience requirement by successfully completing the course and an oral examination related to their consulting project.

### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Curricula
- BS, Mechanical Engineering
- MS, Mechanical Engineering

Introduction
Do you like to design and innovate? Are you good at math and science? Would you like to help solve problems facing our society? Consider a BS or MS in Mechanical
Engineering. These programs are part of the Charles W. Davidson College of Engineering, which is ranked #3 in the nation among public universities that do not offer
a doctorate. We place hands-on labs and projects as a priority, and interaction with faculty is substantial. Mechanical engineering students focus on mechanical design,
mechatronics, thermal-fluids engineering, or a combination of those areas. Our BS and MS graduates work in industries including product design, sustainable energy,
transportation solutions, biomedical devices, aerospace systems, sensor technology, and semiconductor manufacturing. Please visit our website at www.sjsu.edu/me
for more information. The BS Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.
BS - Mechanical Engineering

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All courses required in the major (all courses in preparation for the major, core, required, capstone, and technical electives) must be completed with a grade of “C-” or better”. The following courses in Preparation and Required for the Major must be completed with a “C or better” to earn S and V credit: ME 195A, ME 195B, ENGR 195A, ENGR 195B.

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 33 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Physical Education

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

MS - Mechanical Engineering

The Mechanical Engineering graduate program is designed to afford ample opportunity for working engineers to continue their education. Courses and scholarly activities in such areas as computational fluid dynamics, thermodynamics, heat transfer, rigid-body dynamics, robotics, vibrations, product design, finite element methods, computer-aided mechanical engineering design and optimization, controls and manufacturing engineering and mechatronic systems engineering can lead to a degree of Master of Science in Mechanical Engineering (MSME).

For more information visit the program website at www.sjsu.edu/me.

Educational Objectives for Graduate Program

The Master of Science in Mechanical Engineering degree program provides students with:

1. A strong foundation beyond the undergraduate level in their chosen focus area as well as in mathematics, basic science and engineering fundamentals, that allows them to successfully compete for technical engineering positions in the local, national and global engineering market, advance in their current position or pursue doctoral studies.
2. Professional and lifelong learning skills to be able to apply and extend theory to solve practical contemporary engineering problems.
3. The expertise necessary to design mechanical engineering systems with possible specialization in areas such as energy systems, thermal management of electronic systems, electronics packaging and reliability, finite element analysis and CAD, mechatronics and MEMS, product design, robotics, automation and manufacturing.
4. Strong verbal and written communication skills, including the ability to comprehend and write technical documents.
5. Ability to think and work independently to perform design and in-depth analysis in solving open-ended mechanical engineering problems.

Admission Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the Mechanical Engineering Program. See the CAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Test Requirements webpage at CAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

Students desiring to pursue a Master of Science in Mechanical Engineering must meet all the university admissions requirements and satisfy each of the following requirements for admission to classified standing:

1. A Bachelor of Science degree from an engineering department accredited by the Accreditation Board of Engineering and Technology (ABET) or equivalent. Special programs can be developed for those with degrees from other related disciplines. These programs must be approved by the Graduate Program Advisor;
2. A minimum grade point average (GPA) of 3.0 on a 4.0 scale over the last 60 semester units completed in engineering and/or science; and
3. Applicants from non-ABET accredited Mechanical Engineering programs must have obtained minimum GRE scores as stipulated on the Graduate Program Test Requirements webpage at CAPE.

Admission to Conditionally Classified Standing

Applicants whose records show certain deficiencies, such as in GPA or having a non-ME undergraduate major, may be admitted to conditionally classified standing. The Mechanical Engineering Graduate Program Advisor should be contacted for this purpose. Conditionally classified students may later initiate petitions for classified standing in the program when such deficiencies have been removed and their records show promise of success in the degree program. The individual admission letter will explain required terms and conditions for attaining Classified standing.

Requirements for Advancement to Graduate Candidacy

Prior to registering for the first term (or upon reentering), a student should consult with the Mechanical Engineering Graduate Program Advisor. A schedule of courses will be developed at this time. Students admitted as conditionally classified must satisfy the requirements listed on their letter of acceptance and then apply to CAPE for a change of classification. Students who have completed matriculation and received classified standing in a master's degree curriculum must next be advanced to candidacy for the degree.

A student may advance to candidacy after completing a minimum of 9 units of graded work as a graduate student in 100- or 200-level courses acceptable to the department in which the degree is sought as well as satisfying all other university requirements for advancement to candidacy. Both the university overall GPA and the GPA in courses listed on the MSME Candidacy Form must be at least 3.0 on a scale of 4.0.

If a student’s preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements, it will be necessary to take the preparatory courses to meet these requirements. Such courses will not be counted as part of the master’s degree program requirements.
The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section entitled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Students must have their advancement to candidacy approved before starting the first semester of their master’s project or thesis classes (ME 295a or 299).

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Department Graduation Requirements
The MS program in Mechanical Engineering consists of 30 semester units of approved work as follows:

- 9 units of required core courses for the degree.
- 3 units of the 9-unit core satisfy the Graduate Writing Requirement (GWAR).
- 15 units of elective courses, which ordinarily must be 200-level courses in Mechanical Engineering. With approval by the Graduate Program Advisor, a student may apply up to 6 units of elective coursework from undergraduate (upper division) SJSU Mechanical Engineering electives or graduate courses from other departments, colleges, or universities.
- 6 units of thesis (Plan A) or project (Plan B).

Culminating Experience
Students choose a Plan A (Thesis) or Plan B (Project) as their program culminating experience.

Plan A (Thesis)
Plan A requires two semesters of ME 299 (Master’s Thesis), 3 units each. The thesis will include original research on a topic approved by the thesis committee, and must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will undergo a thorough review and revision process under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee. In addition, an open examination (oral defense) will be conducted by the student’s thesis committee.

Plan B (Project)
With Plan B, the master’s project sequence of ME 295A for 3 units followed by ME 295B for 3 units is required. In addition, an open examination (oral defense) will be conducted by the student’s project committee.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

tonja.green@sjsu.edu

Professors
Sulekha Anand, Statistics
Tonja Green, Director, Clinical Development
Sami Khuri, Bioinformatics
Arvinder Loomba, PMP, Business Management
Sheldon Mullins, Regulatory Affairs
Richard Steingart, Managerial Accounting and Finance

Curricula
⦁ MS, Medical Product Development Management

Introduction
The Masters of Science degree in Medical Product Development Management (MPDM) is offered by SJSU’s College of Science, in collaboration with the College of International and Extended Studies and the Lucas Graduate School of Business. The MPDM M.S. program combines clinical research, regulatory affairs, bioinformatics and customized technical classes with MBA-level business and management courses. The industry-relevant curriculum was designed in collaboration with experts from biomedical companies in the greater San Francisco Bay area to prepare students for careers in the biopharmaceutical, medical devices and in-vitro diagnostics industries. To accommodate students who work full-time, courses are offered during evenings or weekends, and several classes are offered online for scheduling flexibility.
MS - Medical Product Development Management

Students in the Master of Science in Medical Product Development Management degree program develop proficiency in applying leadership, management and decision-making skills in a regulated environment; understanding and conversing with others in a multi-disciplinary field; and understanding ethical, business, financial, global, and strategic implications in medical product development. The MPDM program prepares students to enrich their communities as ethical and socially responsible graduates in a field in which the highest levels of integrity are a fundamental necessity. Please refer to the program website for more information http://www.medproddev.sjsu.edu

Requirements for Admission to Classified Standing

Applying for graduate school at San José State University is a two-step process. Apply to the university through Cal State Apply to obtain approval for university-level admission, and to the department to obtain admission into the MS, Medical Product Development Management program. Please visit the SJSU Admissions Requirements page for more information. Applicants may come from a wide variety of undergraduate (or postgraduate) areas of study including but not limited to nursing, pre-med, biology, chemistry, mathematics, science education, pharmacy, engineering, business, computer science, psychology, social sciences, and pre-law.

To be accepted into the program in classified standing, an applicant must:
1. Meet all University requirements;
2. Hold a baccalaureate degree from an accredited four-year college or university;
3. Have a grade point average (GPA) of at least 2.5 (3.0 or above preferred) in the last 60 semester or 90 quarter units of coursework;
4. Satisfactory completion of a 3-unit undergraduate course in introductory statistics and probability from an accredited college or university is recommended; and
5. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

Applicants should note that a high degree of proficiency in both written and oral communications in English is a fundamental skill required both to complete the degree program and for success in the field.

The program does not accept students in conditionally classified standing.

Requirements for Advancement to Candidacy

Students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the master’s degree are detailed in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. The program GWAR course is SMPD 281A.

Requirements for advancing to candidacy in the MS, Medical Product Development Management are successful completion of SMPD 281A and 9 units of overall program credits.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Culminating Experience

Plan B (Project)

The culminating project challenges the student to demonstrate leadership, teamwork and decision-making skills. The student will write or prepare a publication-worthy paper or presentation for a biomedical professional journal, conference or event. The paper or presentation must demonstrate depth of knowledge of the processes, methods, and procedures used in clinical research and development or in the management of medical product development on a topic selected by the student (with advisor approval).

This degree is listed with the College of Science.

Click the above link to see the degree requirements (listed in the College of Science section).

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

⦁ Minor, Meteorology
⦁ MS, Meteorology

Introduction
The only one of its kind in the CSU system, the Department of Meteorology and Climate Science provides students with an in-depth knowledge of the atmosphere, preparing them for careers in the atmospheric sciences. Meteorology focuses on day-to-day weather; in climate science the focus is on the evolution of Earth’s climate. We train students to measure, analyze, model and predict the state of the atmosphere into the next week and on into the next century, offering undergraduate and graduate programs that are strong in both theoretical and applied courses. Among our alumni are weather forecasters with both the National Weather Service and in the private sector, air pollution specialists, environmental consultants, science teachers, university professors, science writers and top scientists in the National Atmospheric and Oceanographic Administration (NOAA), the U.S. Armed Forces, and NASA. We are one of the most research-active departments on campus, enabling students at all levels to participate and benefit from supervised research activities.
BS - Meteorology

The BS Meteorology degree program is designed to develop meteorologists who, upon graduation, are ready to begin professional practice in the private sector or in government, or are ready to enter graduate programs in atmospheric science.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All Preparation and Required in the Major courses must be completed with a “C- or better”.

Core Lower Division General Education

Of the 39 units required by the university, 24 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Physical Education

BS - Meteorology, Concentration in Climate Science

The BS Meteorology, concentration in Climate Science program is designed to prepare students for careers in emerging fields of climate change studies and mitigation, and related fields including energy and carbon management. Graduating students will be ready to begin careers in the private sector or in government, or will be ready to enter graduate programs in the atmospheric/climate sciences.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Minor - Meteorology

This minor is designed to prepare science and engineering students to solve interdisciplinary problems involving the atmospheric sciences.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Requirements of the Minor

*Taken in the Fall semester*

COMPLETE ONE COURSE FROM:

| METR 010. Weather and Climate | B1 | 3 |
| METR 012. Global Warming: Science and Solutions | B1 | 3 |

COMPLETE ONE COURSE FROM:

| METR 123. Advanced Climatology | 3 |
| METR 136. Empirical Techniques in Meteorology | 3 |
| METR 163. Meteorological Instrumentation | 3 |

Electives | 3

Please note: If a student is taking this minor as a requirement for their major, both courses may be required. Please see advisor for more details.

| METR 112. Global Climate Changes | R | 3 |
| METR 113. Atmospheric Pollution | R | 3 |

Total Units Required | 13
MS - Meteorology

The Master of Science in Meteorology prepares students for high-level professional responsibility, independent research, and continued graduate work in atmospheric science. Graduate-level theoretical and applied meteorology courses and a substantial research project lead to the preparation of the master's thesis, the culmination of the degree plan of study. Departmental opportunities for financial support include research and teaching assistantships.

The Department of Meteorology and Climate Science has one of the most active research programs at SJSU. The meteorology faculty has a wide range of expertise and supports a broad range of research activity. Their areas of specialization include Weather Analysis and Forecasting, Fire Weather, Urban Meteorology and Air Pollution, Atmospheres of Other Planets, Tropical Meteorology, Radar and Satellite Remote Sensing, Cloud and Aerosol Physics, Atmospheric Dynamics, Meteorological Data Processing, Data Communications, and Data Acquisition and Display.

Our graduates find employment in forecasting, research, consulting and media, and continue for the Ph.D. degree at top universities throughout the country. Department alumni include top scientists and forecasters in The National Oceanic and Atmospheric Administration (NOAA), the National Weather Service (NWS), the United States Air Force and Navy, NASA, various state and federal air pollution agencies, the aerospace industry, and aviation operations. Others of our alumni are university professors, high school and community college teachers, TV forecasters, meteorologists in the wind power, electric, gas and oil industries, science writers, and consultants for legal cases, air pollution problems and building design.

Admission Requirements

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the MS, Meteorology program. See the CAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

Students are admitted to the MS, Meteorology program in Classified or Conditional Standing. Admission to classified standing requires the following. Applicants must:

- Possess the equivalent of an SJSU BS in Meteorology or, with the approval of the department graduate committee, a degree in a physical science or mathematics. Students entering with degrees in other areas may be admitted to conditionally classified standing, and will be required to make up deficiencies (e.g., in meteorology and math) before enrolling in the core graduate classes;
- Have earned minimum GPA of 2.75 (on a scale of 0-4) in their BS degrees; and
- Submit Graduate Record Examination (GRE) scores. More information about the GRE can be found on the Graduate Program Test Requirements webpage.

Requirements for Admission to Conditionally Classified Standing

Those applicants who meet minimum requirements for graduate admission, but do not meet departmental requirements, may be admitted to conditionally classified standing on the approval of the department graduate committee. The individual admission notification will explain required terms and conditions for attaining Classified standing. Resolving deficiencies usually involve successful completion of undergraduate courses in meteorology courses and math. Upon completion of these courses, the student advances from conditional to classified standing via petition to Graduate Studies.

Requirements for Advancement to Candidacy

University requirements for advancement to candidacy for the master's degree are outlined in the Graduate Policies and Procedures section of this catalog. Competence in the general areas covered by METR 121A (Dynamic Meteorology I), METR 125 (Physical Meteorology), either METR 060 or METR 171A (Synoptic Meteorology, to be decided in consultation with the department graduate committee), and METR 100W or METR 202 (Technical Writing), must be demonstrated to the Department Graduate Committee prior to admission to candidacy. This can be done by satisfactory completion of these courses (or their equivalent) with a minimum grade of "B" in each, or successful completion of a comprehensive written examination. Students should consult with the graduate advisor concerning these alternatives. A student admitted in classified standing may be admitted to candidacy after completion of the terms and conditions specified in the admission notification letter.

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. MS, Meteorology students are currently required to take METR 202 to satisfy this University requirement.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, CPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures. Courses taken to meet the requirements for admission to candidacy will not be counted as part of the MS program. All students must complete the Graduation Writing Assessment Requirement.
Culminating Experience

Students complete the Plan A (Thesis) as their MS, Meteorology degree program culminating experience. The Plan B (Project) option is only offered under exceptional circumstances and students may not choose it themselves.

Plan A (Thesis)

This option requires an acceptable written research thesis and a successful oral presentation of the thesis. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. Students in the thesis option enroll in one unit of METR 285, Colloquium and two units of METR 299, Master’s Thesis or Project in their final semester. Students who complete the METR 299 but not its associated thesis enroll in the 1290R until both are completed.

Plan B (Project)

The Project option is open to students who can demonstrate to the Departmental Graduate Committee that they possess adequate professional meteorological experience to substitute for the research thesis. It is only offered under exceptional circumstances and students may not choose it themselves. Students approved for the Plan B option will select a suitable topic in meteorology on which to prepare a carefully documented written report in consultation with the project advisor. They will enroll in one unit of METR 285, Colloquium and an additional two units of METR 298, Research in their final semester. Students who complete their final METR 298 but not its associated thesis enroll in the 1290R until both are completed.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Curricula
⦁ Minor, Military Science

Introduction
Military Science offers an interdepartmental minor which consists of courses taught by active duty Army personnel. The purpose of the minor is to acquaint the university student with the fundamental principles of national security and military history, to introduce the techniques and principles of modern warfare, and to develop character and leadership skills. All undergraduate students are eligible for a minor in Military Science. Those wishing a career as an Army Officer after graduation should contact the Department of Military Science.

Basic Course
Fundamentals of Leadership and Management. The term Basic Course refers to first and second year courses (MILS 001A-B, and 002A-C), which are designed for beginning students who want to qualify for entry into the Advanced Course and for those students who may want to try Military Science without obligations. A number of popular or challenging extracurricular activities are associated with these courses. A student can also qualify for entry into the Advanced Course by completing only the summer encampment, Leader’s Training Course (LTC)(MILS 002C). Outstanding students in this course may receive a two-year scholarship.

Advanced Course
Advanced Leadership and Management. The Advanced Course consists of the courses MILS 130A-C, and 140A-B. It is open to students who have completed the Basic Course or earned placement credit for it (various methods). The Advanced Course qualifies a student for a commission as an officer in the United States Army. Students must complete MILS 130C, a five week leadership evaluation camp during the summer, in sequence unless otherwise approved by the Professor of Military Science. Students receive a monthly stipend during the school year. Students who do not desire to compete for a commission as an officer in the Army may take these courses for academic credit with approval by the Professor of Military Science.

Labs and Field Exercises
During each semester of class work, weekly leadership lab participation is required. Two off-campus exercises involving adventure training, rappelling, rifle marksmanship, leadership training and survival skills are optional for non-scholarship basic course students. Two off-campus exercises for Advanced course students are mandatory with the focus on leadership and military skills.
### Minor - Military Science

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

- MS, Marine Science

Introduction
The second oldest marine lab on Monterey Bay, Moss Landing Marine Laboratories, (MLML), established in 1966, has an international reputation for excellence in marine science research and education. MLML administers the interdisciplinary master’s of science degree in marine science for seven California State University (CSU) campuses: East Bay, Fresno, Monterey Bay, Sacramento, San Francisco, San José and Stanislaus. MLML’s hands-on, field-oriented approach places students, faculty, research and staff where discoveries are made: at the frontiers of marine science worldwide. The wealth of nearby marine resources, excellent marine facilities and operations, renowned faculty and research-based curriculum combine to make the MLML program one of the best graduate programs of its kind in the United States. MLML provides students with a cutting-edge education that prepares them for careers in science, education and outreach, conservation, policy and management, and for doctoral studies.
MS - Marine Science

Moss Landing Marine Laboratories (MLML) is the second oldest marine lab on Monterey Bay. Established in 1966, it has an international reputation for excellence in marine science research and education. MLML administers the interdisciplinary Master’s and Doctorate of Science in marine science for seven California State University (CSU) campuses: East Bay, Fresno, Monterey Bay, Sacramento, San Francisco, San José and Stanislaus. The hands-on, field-oriented MLML approach places students, faculty, research and staff where discoveries are made: at the frontiers of marine science worldwide. The wealth of nearby marine resources, excellent marine facilities and operations, renowned faculty and research-based curriculum combine to make the MLML program one of the best graduate programs of its kind in the United States. MLML provides students with a cutting-edge education that prepares them for careers in science, education and outreach, conservation, policy and management, and for doctoral studies. See the program website at: http://www.mlml.calstate.edu/

For more information contact the graduate program coordinator at MLML at gradprog@mlml.calstate.edu.

Admissions Requirements

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply. All admitted applicants must satisfy all SJSU catalog admission requirements. The university-level graduate application is separate from the program application. Apply separately to the university to obtain approval for university-level admission and to the department to obtain admission into the program. Program application and admission requirements are available at http://gradprog.mlml.calstate.edu

Before applying to MLML, prospective students must select an MLML faculty advisor(s) before submitting application materials and schedule a visit to MLML. Discussing your application with a potential faculty advisor and visiting MLML will 1) provide you with a better understanding of what our program has to offer; 2) help you determine if the selected faculty advisor is the right academic mentor for you; 3) enable you to speak with the potential advisor about the application process; 4) allow you to speak with current students; and 5) strengthen your application and improve your chances of acceptance. More information can be found at www.mlml.calstate.edu/gradprog/how-to-apply/

After completing the online program application by February 1, applicants must submit the following supplemental application materials to MLML-emailed as a single PDF attachment to the MLML Graduate Program Coordinator by February 15:

- Statement of Purpose - detailing (at a minimum) 1) why you want to study marine science, 2) why you want to attend MLML, 3) your background in marine science, 4) your specific research interests, and 5) what long-term goals you ultimately intend to pursue by attending MLML;
- CV/Resume – summarizing relevant academic and professional experience, including 1) academic background (degrees earned, GPA, relevant coursework), 2) research experience, and 3) relevant employment history, volunteer experience, and/or memberships;
- Unofficial Transcripts – from all post-secondary institutions attended; and
- Unofficial GRE scores – MLML does not require the GRE, but it is strongly recommended. Submit your unofficial GRE scores to MLML by either downloading your score report from the ETS website, or scanning the score report mailed to you by ETS, and including it in the PDF you email to the MLML Graduate Program Coordinator.

Please see SJSU’s minimum score requirements listed on the Graduate Program Test Requirement webpage.

Applicants must also request to have three letters of recommendation sent to the program from people familiar with their academic and/or professional background. Letters of recommendation must be emailed directly from your recommenders as a .pdf attachment to the MLML Graduate Program Coordinator at gradprog@mlml.calstate.edu by February 15.

These application instructions can also be found at www.mlml.calstate.edu/gradprog/step-by-step-application-instructions

Applicants may be admitted either as conditional or classified. Conditionally admitted applicants will have some condition(s), such as completion of additional coursework, placed upon their admission into the MLML program; classified students are admitted into the program without any such condition(s).

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at SJSU CAPE.

Requirements for Advancement to Candidacy

SJSU university requirements for advancement to candidacy for the master’s degree are outlined in the Graduate Policies and Procedures section of this catalog.

Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

Program requirements for Advancing to Candidacy are as follows:

- Completed the majority of coursework with the exception of the Culminating Experience course MS 299 Thesis
- Acquired thesis proposal approval from entire thesis committee, fulfilling the Graduation Writing Assessment Requirement (GWAR)
- Acquired research permitting approval (if applicable)

CSU policy requires that English competency shall be a requirement of classified graduate students as a condition necessary for advancement to candidacy for the award of a master’s degree. MLML students satisfy this requirement by successfully completing a Thesis Proposal before they advance to candidacy. The student’s thesis committee determines successful completion of this requirement.
Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MS - Marine Science Graduation Requirements
Graduate students shall successfully complete 30 units of course work with a grade of “B” or better in each course, a thesis project, and an oral research defense to qualify for the M.S. degree in Marine Science at Moss Landing Marine Laboratories. MLML program requirements are the same regardless of the student’s home campus affiliation; however, admission, graduation and department requirements may vary from campus to campus.

Degree requirements for the M.S. degree in Marine Science are:

- MS 104: Quantitative Marine Science with a grade of “B” or better, or transfer in with equivalent mathematical background. MS 104 course cannot be counted toward the 30-unit degree requirement.
- Three of the following five Core Courses: MS 103: Marine Ecology, MS 141: Geological Oceanography, MS 142: Physical Oceanography, MS 143: Chemical Oceanography, and MS 144: Biological Oceanography. (Courses from accredited institutions may be transferred with approval from MLML faculty). A minimum of fifteen graduate units (200 level) Advanced Coursework including MS 285: Graduate Seminar (2 unit minimum and 4 unit maximum), MS 298: Research in Marine Science (2 unit maximum), and MS 299: Master’s Thesis (Culminating Experience Plan A) (4 units).
- Fulfillment of Classification, Graduation Writing Assessment Requirement and Advancement to Candidacy.
- A thesis approved by the student’s thesis committee. The thesis must conform to the rules set forth by the home campus graduate office and meet the academic standards of the MLML graduate program.
- An oral thesis defense in the form of a seminar open to the general public. The student’s thesis committee must be present, may request further oral questioning after the seminar, and will evaluate the success of the presentation.

All students shall maintain continuous enrollment in the MLML graduate program until all degree requirements are met. All students shall complete core courses by their third semester to qualify for Classified standing. If a student receives lower than a “B” in a core course, the student may either retake this course or take another core course to fulfill the Classification requirement. If a student receives lower than a “B” in a non-core class, the student may either retake the course or take another course to use towards the 30-unit requirement. Students may enroll in MS 298: Research in Marine Science, while they are conducting their research. Students are eligible to use 2-units of MS 298 toward their Advanced Coursework requirement. Students are encouraged to complete their degree requirements within three years.

Culminating Experience

Plan A (Thesis)
The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee, and must meet the academic standards of the MLML program. The candidate for the MS in Marine Science at MLML must also successfully pass a final oral defense of the thesis, in the form of a seminar open to the general public, with the thesis committee evaluating the success of the presentation.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Introduction
Located in the heart of Silicon Valley, SJSU’s School of Music and Dance is a recognized leader in the performing arts. Accredited by the National Association of Schools of Music (NASM), the National Association of Schools of Dance (NASD), the National Council of Accreditation of Teacher Education (NCATE), and the California Commission on Teacher Credentialing (CCTC), the School produces some of the finest music teachers, composers, performers, and scholars in the world. Our curriculum includes courses in composition, performance, music skills, choreography (for dancers), technology, pedagogy, and improvisation. Student performance organizations include, among others, Concert Choir, Choraliers, Jazz Orchestra, Opera Theater, Wind Ensemble, Symphony Orchestra, and the Spartan Marching Band. Our dance program features a student performing company, UDT, directed by faculty and distinguished guest choreographers. Our music education program produces some of California’s leading educators, scholars, and administrators, and our certified music teacher graduates are in particularly high demand.

Music Honors Program
The Music Honors Program is designed for the superior student who has outstanding talent and scholastic ability. The program is open to senior music majors with a 3.5 average in the major and an overall university grade point average of 3.0. Approval by the student’s major advisor and the director is required prior to registering for honors courses. The proposed program may follow one of three general plans: a senior recital with an accompanying project paper (a historical-programmatic essay on the recital content); a major written project on some aspect of history, literature, or music education; or a major project in the field of music composition. Following official school approval, the student will register for three units of directed study in MUSC 190A (1 unit) and 190B (2 units) under a designated faculty member. The student must maintain a grade point average of 3.5 in the school and a 3.0 overall university grade point average throughout the senior year, and complete 190A and 190B to receive departmental honors at the awarding of the baccalaureate degree.
BA - Dance

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of "C- or better".

**Total Units Required: 120**
BA - Music

The Bachelor of Arts in Music is designed for the student who seeks a liberal arts education with a major in music. The degree can be tailored to each student. A senior project is required.

An entrance audition is required. All students must complete the core classes and then select electives from at least two categories, in consultation with the BA_Music Advisor, and directed toward a specific Capstone project. Four lower-division semesters of applied lessons are required. Ensemble participation is a co-requisite of applied lessons at all times.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

Major-Specific Graduation Requirements

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of “C” or better.

### BM - Bachelor of Music, Concentration in Composition

SJSU’s composition program provides a thorough and diverse exposure to the art of music composition and includes studies in electro-acoustics, recording technology and scoring for film. Private composition lessons are at the heart of this degree program, with many opportunities for students to hear their works performed by students, faculty, and professional musicians. Composition students also meet regularly as a group with faculty and guest composers to hear and discuss their compositions. Students in this program complete both junior and senior projects in addition to the regular course of study.

#### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

#### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

#### Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

#### Major-Specific Graduation Requirements

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of “C or better”.

## Physical Education

### Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

## BM - Music, Concentration in Jazz Studies

The Bachelor of Music, Concentration in Jazz Studies, is tailored for students intending to pursue careers as professional jazz performers and composers. Emphasis is placed on jazz improvisation, jazz performance styles, jazz arranging/composition, and jazz pedagogy. Students receive in-depth private instruction and many ensembles develop students' abilities as improvising musicians. Additionally, the university’s location allows almost limitless opportunities to secure performances in any of the Bay Area’s numerous nightspots. Students are required to complete a senior recital in addition to the regular course of study.

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

### Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

### Major-Specific Graduation Requirements

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of "C or better".

**Total Units Required:** 120
## BM - Bachelor of Music, Concentration in Music Education

Students in the Music Education program complete the subject matter preparation for the California Teaching Credential in Music, K-12.

The BM-Bachelor of Music in Music Education is approved as subject matter preparation for a single subject credential by the California Commission on Teacher Credentialing (CCTC). Individuals who do not wish to complete one of the degree programs, or individuals seeking a single subject credential in subject areas not listed, must pass all portions of the appropriate Commission-approved subject matter examination(s).

Students receive 60-minute weekly lessons in their area of specialty and must participate in the major ensemble of their respective applied area as a corequisite. In the final semester of applied study, a solo recital of a minimum of 30 minutes of music is required.

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

### Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

### Major-Specific Graduation Requirements

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of "C" or better.

### University Graduation Requirements

## Physical Education

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 300W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html). A grade of C or better (C- not accepted) is required to meet graduation requirement.

### BM - Bachelor of Music, Concentration in Performance

The Bachelor of Music, Concentration in Performance, is designed for students intending to pursue careers as professional singers or instrumentalists. In addition to the core music courses, the program includes weekly 60-minute private lessons and participation in large ensembles such as choirs, bands, symphony orchestra, and opera theater. Students also perform regularly as soloists and as chamber musicians, both in closed studio classes and in public recitals. In addition to their regular course of study, students are required to present both junior and senior recitals.

#### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](#) section of the Policies and Procedures.

#### 4-Year Program Roadmap

Students may find a roadmap for this program [here](#). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](#).

#### Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the [Major Exceptions](#) area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

#### Major-Specific Graduation Requirements

All courses in the preparation and major (all courses in preparation, and core) must be completed with a grade of "C or better".

<tr>
<td>Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a &quot;C-&quot; or better to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

| Upper Division General Education | 6 |
| Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details. |

#### American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

### Physical Education

#### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

MA - Music Education (Special Session Program)

Advisor: Diana Hollinger

The Master of Arts in Music Education is designed for the student with a career goal in music education. It provides a broad foundation in educational philosophy, theory, and history in research and practice for a solid grounding for continuing work in K-12 education, community music and other pursuits, and as preparation for further advanced study. The MA in Music Education is a two-year, 30-unit program focusing on one-on-one study with an advisor, courses and practicums in education theory, issues and research in conjunction with seminars in music research and writing, music history, and music theory. The degree culminates with the Written Culminating Exams (WCE), and the completion of a music education thesis (Plan A) or project (Plan B).

Special Session Program Information

Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session course or program must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the CPGE website for more information.

Admissions Requirements

You will need to apply separately to the university to obtain approval for graduate admissions and to the department to obtain admission into the Master of Arts - Music Education. The School of Music and Dance graduate program requires applicants to have a bachelor's degree in Music from a regionally accredited institution and to be in good academic standing at the last college or university attended. In rare circumstances, students with degrees in non-music areas who demonstrate artistic potential for graduate study in Music may be admitted to the program. The School of Music and Dance requires a minimum GPA of 3.00 in the last 60 units of undergraduate coursework. All required transcripts and supporting documents should be sent directly to the university.

Students from a country where the official language was not English are required to submit a TOEFL (Test of English as a Foreign Language), PTE (Pearson Test of English), or International English Language Testing System (IELTS) score. The minimum entrance score for the TOEFL is 590 (paper based), 243 (computer based), or 96 (internet based), with a score of 5 in the Writing Section. The minimum score for the PTE is 68; for the IELTS, the minimum score is 7.0. All test scores must be less than 2 years old. Test scores must be sent directly from the Educational Testing Service office (institution code 4687), Pearson Office, or IELTS office directly to SJSU.

The School of Music and Dance does not require the GRE (Graduate Record Exam).

Portfolio and Letters of Recommendation

The submission of a portfolio of work is required including a curriculum vitae, video recording of a teaching episode, statement of teaching philosophy, and a sample undergraduate term paper on an education topic. An interview is also required. Please see the School of Music and Dance website for specific requirements.

The School of Music and Dance requires three letters of recommendation addressing the applicant’s potential for graduate-level work in music to be sent to the Music Education area advisor.

Admission to Classified Standing

Graduate students admitted to the School of Music and Dance are usually admitted in “conditionally classified” status. This status is normal for all entering graduate students, who must demonstrate a bachelor’s level competence in music history and music theory by passing the Graduate Entrance Evaluations given during Pre-Instruction before the start of the fall semester. Students who pass their Entrance Evaluations may then become “graduate classified” and are eligible to take all 200-level graduate seminars after completing MUSC 200. Students who fail portions of the Evaluation will remain conditionally classified and will be required to remediate with the appropriate coursework before taking graduate seminars beyond MUSC 200. Coursework taken as remediation is not applied to the Master’s degree requirement units.

Students who fail the entire Entrance Evaluation will not be admitted into the program.

Please see “Graduate Program Test Requirements” for more information.

Requirements for Advancement to Candidacy

Candidacy denotes that the student is fully qualified to complete the final stages of the MA. In order to achieve candidacy, students must meet the university requirements for candidacy. General university requirements for advancement to candidacy for the MA degree are detailed in the Graduate Policies and Procedures section of this catalog. Advancement to candidacy requires that the student be in good standing with a 3.0 GPA or better in a minimum of 9 units of letter-graded coursework as a graduate student in 100- or 200-level courses in the degree program as indicated by all courses on the Petition for Advancement to Graduate Candidacy form. These courses must conform to university and departmental requirements, and the area and graduate advisors must approve the proposed program. The proposed program must list a total of 30 semester units, including the appropriate number of “core” courses, area specialization courses, required ensembles, and supervised graduate study.

The student must be “graduate classified” and have met and cleared their conditions for admission to the program indicated by their results in the Graduate Entrance Evaluation in music history and music systems/theory. Candidacy also includes successful completion of the Graduation Writing Assessment Requirement (GWAR), which in the School of Music & Dance is MUSC 200, Methods of Music Research & Writing.
Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MA - Music Education
Thesis: In Plan A, six units are devoted to the preparation and writing of a thesis guided by the candidate’s major professor and approved by a committee. After final approval by the advisor and thesis committee, the thesis is submitted to Graduate Studies for review. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. The successfully reviewed thesis is then submitted for publication.

Project: In Plan B, six units are devoted to the preparation and production of a written project.

Written Culminating Exams (WCE): At the end of their studies, students demonstrate their thorough grasp of music history, music systems/theory, and their field of specialization through the Written Culminating Exams (WCE). Students must pass all sections of the examination to be awarded their master’s degree.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Elective courses must be planned in consultation with the area coordinator and the School of Music & Dance Graduate Advisor.

The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.
MM - Music Graduate Programs

The Master of Music graduate program in the School of Music and Dance offers training for careers in performance, conducting, composition, research, and teaching. We also provide preparation for further advanced study in ten distinct areas:

- Composition
- Choral conducting
- Instrumental conducting
- Instrumental performance
- Jazz studies
- Keyboard studies
- Music education
- Music history
- Music systems/theory
- Vocal performance

Our MM, Music degree program is a 30-unit course of study, typically taken in four semesters over two years, and consists of graduate seminars, one-on-one private lessons, performance ensembles, and area specialization coursework. The program culminates with the master’s exam and the completion of a graduate recital, project, thesis, or music composition.

Additional information is available in the School of Music & Dance Office and at the department website: www.sjsu.edu/music/.

Admission Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university graduate admissions. Applicants apply separately to the department to obtain admission into the MM, Music program. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to the Program

You will need to apply separately to the university to obtain approval for university-level admission and to the department to obtain admission into the Master of Music Program. The School of Music and Dance graduate program requires applicants to have a bachelor’s degree in Music from a regionally accredited institution and to be in good academic standing at the last college or university attended. The School of Music and Dance requires a minimum GPA of 3.00 in the last 60 units of undergraduate coursework. All required transcripts and supporting documents should be sent directly to the university.

Students from a country where the official language is not English are required to submit a TOEFL (Test of English as a Foreign Language), PTE (Pearson Test of English), or International English Language Testing System (IELTS) score. The minimum entrance score for the TOEFL is 590 (paper based), 243 (computer based), or 96 (internet based), with a score of 5 in the Writing Section. The minimum score for the PTE is 68; for the IELTS, the minimum score is 7.0. All test scores must be less than 2 years old. Test scores must be sent directly from the Educational Testing Service office (institution code 4687), Pearson Office, or IELTS office directly to SJSU.

The School of Music and Dance does not require the GRE (Graduate Record Exam).

Audition, Portfolio, Interview

Conducting and Performance: a live (preferred) or unedited recorded audition is required for conducting and performance specializations. Please see the School of Music and Dance website for specific requirements of individual performance areas.

Composition, Education, History, Systems/Theory: the submission of a portfolio of work is required for all academic specializations. Please see the School of Music and Dance website for specific requirements of individual academic areas.

Individual areas may also require an interview.

Letters of Recommendation

The School of Music and Dance requires three letters of recommendation addressing the applicant’s potential for graduate-level work in music to be sent to the appropriate performance area advisor.
Admission to Classified Standing

Graduate students admitted to the School of Music and Dance are usually admitted in “conditionally classified” status. This status is normal for all entering graduate students, who must demonstrate a bachelor’s level competence in music history and music theory by passing the Graduate Entrance Evaluations given during Pre-Instruction before the start of the fall semester. Students who pass their Entrance Evaluations may then become “graduate classified” and are eligible to take all 200-level graduate seminars after completing MUSC 200.
