The Music master’s degree is based on 12 units of four “core” graduate seminars, beginning with MUSC 200: Methods of Music Research & Writing, and 12 units of area courses and ensembles. Students with the academic specializations (Plan A), 6 units of thesis/composition supervision are taken in preparation for completing a thesis or composition. Students in performance specializations (Plan B), 6 units of private lessons with an individual teacher are taken in preparation for their master’s recital or project. All required prerequisite coursework must be passed with a grade of “B” or better and a minimum 3.0 GPA must be maintained in order to continue with the graduate program. To complete the program, students take their Written Culminating Exams (WCE) in their final semester.

Culminating Experience

Students choose a Plan A (Thesis), Plan B (Project), or Plan C (Creative Project - Composition or Recital) option as their program culminating experience. All students must also successfully complete the Written Culminating Exams (WCE)

Plan A (Thesis)

In Plan A (Thesis), six units of MUSC 299, Thesis are devoted to the preparation and writing of an advisor-approved thesis on a topic approved by the candidate’s major professor. Students choosing the thesis option must secure the commitment of three faculty members of the university, two of whom must be members of the permanent faculty, to serve as members of the student’s Plan A (thesis) committee, with one permanent faculty member agreeing to serve as chair. After final approval by the major advisor and thesis committee members, the thesis is submitted to Graduate Studies. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines.

Plan B (Project)

In Plan B (Project), six units are devoted to the preparation and production of a written project.

Plan C (Creative Project - Composition or Recital)

In Plan C (Creative Project), six units are devoted to the preparation of a music composition approved by the candidate’s major professor, or the preparation and performance of one or more master’s recitals. Performance candidates will perform one or two recitals (by advisement) of repertoire approved by the candidate’s advisor. These performances are recorded, and the recording and a hard copy of the recital program are submitted to the School of Music and Dance. Students must be in “graduate classified” status to perform their recital.
Written Culminating Exam (WCE)

At the end of their studies, all MM, Music students must demonstrate their thorough grasp of their field of specialization, music history, and music theory through the Written Culminating Exams (WCE). Students must pass all sections of the examination to be awarded their master’s degrees. The examination consists of three essay questions, which will concern subjects in (1) the student’s major field (piano, composition, etc.), (2) the information covered in the student’s Music 201 history class; and (3) the information covered in the student’s MUSC 202 theory class. The essay questions will be written by the major instructor and by the professors who taught the student Music 201 and 202. The examination will be given in the middle of the semester. If students are enrolled in MUSC 201 and/or 202 during their last semester, the essay question(s) will cover the material covered in class to that date. Students have two weeks to complete the examination, which is open book. Students are required to research their topics but cannot work with other students or any other persons on their examination. Each essay must represent only the student’s work, and students must sign a declaration on the cover sheet that the essays represent only their own research and writing. Each essay must be 4-6 pp. in length, typed, and double-spaced. Either footnotes or endnotes must be used in correct format to identify all sources. Failure to demonstrate knowledge of correct bibliographic citation will result in a failure in the examination. Students will be notified two weeks after the examinations are turned in if they have passed or failed. If the student fails, the examination may be retaken one time upon consultation with the Graduate Advisor. The examinations will be filed in the student’s School file.

It is the student’s responsibility to inform the Graduate Advisor at the beginning of his or her last semester that he or she needs to take the WCE that semester. The Graduate Advisor will ask for the names of the three professors who will be writing the examination questions, and will assign the dates for the examination. The Graduate Advisor will request the essay questions from your professors and give you the examination on the appointed date.
### MM - Music

#### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Elective courses must be planned in consultation with the Area Coordinator and the School of Music & Dance Graduate Advisor. The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15. Upon completion of the degree requirements, the student must have achieved minimum candidacy and an SJSU Cumulative grade point average of 3.0 in order to graduate.
Nuclear Science Program

College of Science

DUNCAN HALL 180
408-924-4954

Professors
Victor Maraschino, Radiation Safety Officer

Introduction
The Nuclear Science Facility of San José State University is the unique focus of all related teaching and research activity on campus. Undergraduate students have an opportunity to work in the facility as part of their general education classes in chemistry and physics. Students majoring in chemistry, physics, and biology come to the facility for some of their classes or for undergraduate research projects. The Department of Physics offers its major with a concentration in Nuclear Science. Consult the department listings for degree requirements and course descriptions.

SJSU also offers MS degrees in Chemistry and Physics. The course of study could emphasize nuclear chemistry or nuclear physics depending on the student’s particular interest. Consult the chemistry or physics listings respectively for degree requirements and course descriptions.

Resources
The university’s Nuclear Science Facility is a unique physical plant specifically designed and built for classroom, laboratory and research work in nuclear science and technology. The Nuclear Science Facility is a freestanding 10,000 square foot, three-story building contiguous to the university’s other science and classroom facilities. It is comprised of a briefing room, administrative and faculty offices, four undergraduate wet labs, two undergraduate counting rooms, five graduate wet labs, a high activity storage room, plant and animal experiment rooms, a waste water collection and sampling system, an ambient air sampling system and storerooms. The facility is staffed full-time by a director, an office manager, senior technologists and a radiation safety officer.

The reference library within the facility is comprised of approximately 300 volumes of standard science reference works and texts covering basic and advanced nuclear physics science and technology, radiobiology, health physics and standards and procedures. This collection supplements the university library, comprised of 900,000 volumes and more than 2,100 science and engineering periodicals.

Research
Research in the Nuclear Science Facility is sponsored through grants from DOE, NASA, NSF, and others. Most research is done in collaboration with other universities and national laboratories.

⦁ Certificate, Post Master’s Nurse Educator  
⦁ DNP, Doctor of Nursing Practice

Introduction
The Valley Foundation School of Nursing offers an innovative curriculum and varied experiential opportunities for students. The baccalaureate, master’s, and doctoral degree programs in The Valley Foundation School of Nursing at San Jose State University are accredited by the Commission on Collegiate Nursing Education. These programs prepare nursing professionals to be socially and ethically responsible clinicians and scholars who are able to meet the changing healthcare needs of a diverse global community. Under faculty supervision, baccalaureate nursing students participate in clinical experiences in both hospital and community agencies. Our nurse-managed centers, located in Santa Clara and Santa Cruz counties, offer students the opportunity to provide health services and illness prevention services to populations in need. Nurses returning for their master’s degree will gain additional knowledge and skills needed for either advanced practice concentration in the Nurse Educator role or the Family Nurse Practitioner role. California State University, Fresno and San Jose State University offer a joint post-master’s Doctor of Nursing Practice Program. The Doctor of Nursing Practice Program prepares professional nurses to assume leadership positions in clinical, administrative, and academic settings.
Undergraduate BSN Application and Admission Procedures

The application to the Undergraduate Nursing major is a 2-step application process.

Students interested in the nursing major should attend a 2 hour group advising session (usually offered monthly). Submit a University application to www.calstate.edu/apply and official transcripts of all previous college work to the Office of Admissions and Records by the posted University deadlines. As of Fall 2010, the University has designated “undeclared pre-nursing” as an impacted major. Impaction criteria for the undeclared prenursing major are posted on the University web pages under info.sjsu.edu. Students are admitted as “cohort groups” once they have been formally admitted to the nursing major. (Note: the nursing major application process has supplemental impaction criteria in place.) Students must file a separate application to the nursing major (www.sjsu.edu/nursing) listed under prospective students.

Prior to applying to the University, students should refer to The Valley Foundation School of Nursing website for information regarding advisement for entry into the major. Advising is available through individual or monthly group sessions. Refer to the nursing web site at www.sjsu.edu/nursing for more detail, dates, times, and rooms for monthly group advising sessions. The application process for The Valley Foundation School of Nursing will be posted on the nursing website. All online applications include proof of admission to SJSU, or at least that you have begun the csumentor.edu application process, a passing score on the Writing Skills Test, and a passing score on the TEAS test. Courses with designated “W” or “WB” are not considered for calculation purposes.

Nursing has been an impacted major since Spring 2005. Impaction imposes supplemental criteria that all students must meet. Pre-nursing students apply to the “undeclared pre-nursing” major, for consideration in the applicant pool. Students may apply to the nursing major twice maximum.

The Valley Foundation School of Nursing has biannual admission application periods - Spring and Fall. Supplemental criteria for eligibility for the applicant cohort pool include:

1. Composite GPA of 3.2 in 5 prerequisite courses (BIOL 065, BIOL 066, MICRO 020, ENGL 001A, and STAT 095). All courses must be passed with a C or better. Courses may not be repeated, except for forgiveness when taken at the original school and this designation must appear on official transcripts. ("W" and "WB" grades are excluded).

2. BIOL 065, BIOL 066, and MICRO 020 must be completed within 5 years of establishing eligibility and passed with a grade of "C" or better. If the course does not meet the 5-year recency requirement the student will need to retake that course. The grade for any of these 3 courses taken within the 5 years will be used for calculation purposes.

3. A minimum TEAS score of 78; version 6 of the TEAS. This exam may only be taken two times regardless of the version. (www.sjsu.edu/nursing)

4. Composite GPA of 3.0 in CHEM 030A, COMM 020, and an Area A3 (critical thinking) course. All courses must be passed with a C or better. Options for acceptable area A3 courses are listed on the University’s web site.

5. A passing score on the Writing Skills Test (WST).

Impaction Scoring

Students meeting the above minimum criteria will be ranked according to an impaction score, calculated and weighted from the following two areas:

1. GPA in composite of 5 prerequisite courses (BIOL 065, BIOL 066, MICRO 020, ENGL 001A, and STAT 095). None of these courses may be repeated, and only the first grade will be included in the calculation. Exceptions: The second attempt was for “Grade Forgiveness” (also known as Academic Renewal) or meet the 5 year recency for BIOL 065, BIOL 066, and MICRO 020.

2. A minimum score on the Test of Essential Academic Skills (TEAS) Test (www.sjsu.edu/nursing). The TEAS is a test of English, reading comprehension, mathematics, and basic science. It is available through the SJSU Testing Center. Refer to The Valley Foundation School of Nursing’s home page and the BS information packet (under prospective students) for further information. There is a fee. A Study and Review Guide is available for purchase online at www.atitesting.com to assist in preparation for the TEAS exam. Test administration dates (usually offered every 2 months) are posted under the University testing website. Check the testing website frequently for updates.

In order to join the applicant pool for The Valley Foundation School of Nursing, students must:

1. Declare “undeclared pre-nursing” as a major (this designation has supplemental entry criteria; see www.sjsu.edu/nursing). Change of major forms are done through the main university advising office in the Student Success Center on 10th street.

2. Complete the 8 required prerequisites courses with a grade of “C” or better. See minimum GPA under “impaction criteria.”

3. Pass the Writing Skills Test (WST) or approved equivalent (check the testing office website at http://testing.sjsu.edu/ for test dates, deadlines, and fees) prior baccalaureate students exempted from WST. Allow several months to do this, prior to applying to nursing.

4. Pass the TEAS test, version 6, within 2 attempts and submit the score(s) to the online vendor for application to SJSU The Valley Foundation School of Nursing (NOTE: a minimum TEAS score of 78 is required for eligibility). The TEAS score is divided by 30 for calculation of impaction scores.

5. United States citizenship or Green Card Permanent Resident (documentation required). “Dream Act” students need certain documentation. A California Drivers License (or picture ID from Drivers License bureau) is also required.

6. Complete a required background check and drug clearance, using the School’s vendor. Once the student is provisionally accepted into the nursing major, a clear background check and drug screen are required. More information on this content is on the School’s web site under “Policies”.

7. Submit an application with documentation of 1 through 5 above. Documentation of completion of prerequisites is submitted during the online application process.

8. Application to nursing and documentation deadlines for entry in Fall semester is Feb. 15. Application and documentation deadlines for entry in Spring semester is September 15. Specific clinical documentation will be required of all nursing students on admission to the major. Students may apply up to one month prior to these deadlines.

Please note that application requirements and prerequisite courses are subject to change. Interested students should check the nursing web site frequently for updates and changes. Monthly 2-hour group advising session does not require an appointment.

Co-requisite courses: There are 3 courses that must either be completed prior to entering nursing or within 1 year of entering the major. CHAD 070, PSYC 1, and HPRF/NURS 100W.

A student may only apply a maximum of two times to this program. If not admitted by then, the student should seek general University advising to change majors.
BS - Nursing

Undergraduate Coordinator and Advisor: Dr. Sue Malloy

Programs at SJSU prepare you for professional careers with a baccalaureate degree in Nursing. The following courses (or their equivalents) are to be completed for the baccalaureate degree. Extended campus facilities include public health departments, home health agencies, sub-acute facilities, skilled nursing facilities, ambulatory care clinics, acute care hospitals, Nurse-Managed Centers and a wide variety of community-based agencies for clinical experience. Students must provide their own transportation to extended campus facilities. Some community agencies require home visits, therefore students must have individual use of an automobile.

Overall requirements: Students must maintain a minimum grade of “C” or better or “Credit” in each nursing course and in all prerequisites and corequisite courses for the nursing major (see admission impaction supplemental criteria for exceptions). In addition, students must pass background and drug clearances. Policies are posted on The Valley Foundation School of Nursing website at www.sjsu.edu/nursing.

All students must meet all health requirements and obtain personal professional liability insurance through the School’s designated vendor. Students must carry personal health insurance at all times as well. Those who do not meet the health clearance guidelines must meet with the advisor for follow-up.

Students should be aware that the application requirements and prerequisite courses are subject to change. Interested students should check the nursing web site frequently for updates and changes.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

5-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All courses required in the major (preparation, major, and electives) require a grade of “C” or better or “Credit” (see admission impaction supplemental criteria for exceptions). In addition, students must pass background and drug clearances. Policies are posted on The Valley Foundation School of Nursing website.

RN to BS - Nursing

Advanced Placement Coordinator and Advisor: Dr. Arlene Spilker
Admittance into this degree requires an Associate in Science degree in Nursing and passage of the NCLEX (National Council Licensure Examination) the licensing examination for nurses in the United States.

Admission occurs every Spring and Fall semester. The RN to BSN program can be completed in 3 semesters of full-time study.

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Core Lower Division General Education
Of the 39 units required by the university, 39 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a "C-" or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education
Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions
The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Physical Education
Met as part of the community college transfer package required for admission to degree program.

Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Preparation for the Major
Community College Lower Division Coursework necessary for Associate Degree in Nursing (ADN)

External Exam Credit
NCLEX - RN examination
Students admitted to the program will receive 20 units of credit for passage of the National Council Licensure Examination (NCLEX) for Registered Nurses.

MS - Nursing

Graduate Options
The MS - Nursing degree has specializations* in:

- Nurse Educator
- Family Nurse Practitioner (offered via Special Session)

* Specializations are a cluster of courses used by departments for advising purposes. Specializations will not appear on transcripts or diplomas. Please see advisor for more details.

- Post-Masters Certificate/Credential Preparation as Nurse Educator
- Nurse Educator

The School of Nursing also offers an MS in Nursing with a concentration in Family Nursing Practice. This program is described elsewhere in this catalog. Finally, SJSU offers a joint Doctorate in Nursing Practice, a mostly online program.

All options are offered only if student enrollment is adequate. Please check the school website at http://www.sjsu.edu/nursing/ for current information on the status of our graduate programs and courses being offered.

Requirements for Admission
Candidates must meet all the university admissions requirements. Students can be admitted in either classified or conditionally classified standing.

After earning a baccalaureate degree in Nursing from an accredited program and obtaining San José State University admission, one may enter the master’s program with a major in Nursing. Graduates of non-accredited baccalaureate programs must take prior coursework that will be assessed to determine requisite content and equivalency to baccalaureate degree requirements. Programs of study for the MS degree with a major in Nursing are based on this assessment. A California RN license is required.

Requirements for Conditionally Classified Standing
Students whose records show certain deficiencies, but whose professional achievements indicate a promise of success, may be admitted on a conditional basis. To qualify for classified standing, the conditions must be met. The appropriate form will be completed by the Nursing Program Graduate Coordinator upon receipt of documentation. A California RN license is required.

Registered nurses with baccalaureate degrees in disciplines other than nursing may be accepted conditionally such that a specialized course of study is required prior to taking Master's in Nursing courses. There are a minimum of four undergraduate courses that need to be completed with a grade of "B" or better.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE.

Requirements for Admission to Classified Standing
General university requirements for consideration for admission in classified standing for the master's degree or from moving from conditionally classified to classified standing are outlined in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy and for conversion from conditional to classified standing. Refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations (CAPE) website at www.sjsu.edu/cape. In addition, the following School of Nursing requirements apply:

1. Completion of an accredited baccalaureate program in nursing with an upper-division major comparable to that offered at San José State University. Applicants who have completed other curricula or who have deficiencies will be considered individually and may be required to enroll in designated courses.
2. Applicants must present a GPA of at least 3.0 in the last 60 units of the undergraduate nursing major.
3. Completion of an introductory research course.
4. Evidence of licensure as a Registered Nurse (RN) in the State of California.
5. Completion of The Valley Foundation School of Nursing application with all attachments.
6. A statement of purpose that outlines the applicant’s goals and objectives in seeking a degree.
7. Evidence of having met health requirements of the school.
9. Evidence of knowledge and skills in the following areas: physical and psychosocial assessment skills developed to the level that the applicant can perform a complete history and physical exam on a well adult of either gender within one hour. Work completed to make up any of the above deficiencies will not be counted as part of the required units for the MS - Nursing.
Requirements for Admission to Graduate Candidacy

For advancement to candidacy for the MS - Nursing degree requires that the applicant has been granted classified standing and has removed any deficiencies involved. In addition, the candidate must have:

1. Earned at least a “B” (3.0) average in a minimum of nine graded semester units of 100- and/or 200-level work completed in graduate standing at San José State University and in any course work completed in graduate standing at other institutions before enrollment here.
2. classified standing.
3. Planned a proposed program of study approved by the Nursing School Graduate Coordinator and approved by GAPE.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MS - Nursing Graduation Requirements

Classified standing in Nursing or the permission of instructor is required for all nursing courses listed.

Students have the option to complete a post master’s Nurse Educator Certificate.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Total Units Required

Elective courses, if applicable, are to be taken outside The Valley Foundation School of Nursing. The content of these units is to support the chosen functional option. At least one of the courses must be at the 200-level of course work. FNP students do not have elective course requirements.
MS- Nursing, Concentration in Family Nurse Practitioner (Special Session Program)

A graduate of this program is prepared for advanced nursing practice with a concentration as a Family Nurse Practitioner (FNP).

Requirements for Admission
Candidates must meet all the university admissions requirements. Students can be admitted in either classified or conditionally classified standing.

The FNP option is offered in Special Session and only if student enrollment is adequate. After earning a baccalaureate degree in Nursing from an accredited program and obtaining San José State University admission, one may enter the master’s program with a major in Nursing. Graduates of non-accredited baccalaureate programs must take prior coursework that will be assessed to determine requisite content and equivalency to baccalaureate degree requirements. Programs of study for the MS degree with a major in Nursing are based on this assessment. A California RN license is required.

Requirements for Conditionally Classified Standing
Students whose records show certain deficiencies, but whose professional achievements indicate a promise of success, may be admitted on a conditional basis. To qualify for classified standing, the conditions must be met. The appropriate form will be completed by the Nursing Program Graduate Coordinator upon receipt of documentation.

Registered nurses with baccalaureate degrees in disciplines other than nursing may be accepted conditionally such that a specialized course of study is required prior to taking Master’s in Nursing courses. There are a minimum of four undergraduate courses that need to be completed with a grade of “B” or better. A California RN license is required.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Requirements for Classified Standing
General university requirements for admission in classified standing or for moving from conditionally classified to classified standing for the master’s degree are outlined in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy and for conversion from conditionally to classified standing. Refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations (GAPE) website at www.sjsu.edu/gape. In addition, the following School of Nursing requirements apply:

1. Completion of an accredited baccalaureate program in nursing with an upper-division major comparable to that offered at San José State University. Applicants who have completed other curricula or who have deficiencies will be considered individually and may be required to enroll in designated courses.
2. Applicants must present a GPA of at least 3.0 in the last 60 units of the undergraduate nursing major.
3. Completion of an introductory research course.
4. Evidence of licensure as a Registered Nurse (RN) in the State of California.
5. Completion of The Valley Foundation School of Nursing application with all attachments.
6. A statement of purpose that outlines the applicant’s goals and objectives in seeking a degree.
7. Evidence of having met health requirements of the school.
9. Evidence of knowledge and skills in the following areas: physical and psychosocial assessment skills developed to the level that the applicant can perform a complete history and physical exam on a well adult of either gender within one hour. Work completed to make up any of the above deficiencies will not be counted as part of the required units for the MS - Nursing.
10. Application for the Family Nurse Practitioner Program requires an interview.

Requirements for Advancement to Graduate Candidacy
Advancement to candidacy for the MS - Nursing program requires that the applicant has been granted classified standing and has removed any deficiencies involved. In addition, the candidate must have:

1. Earned at least a “B” (3.0) average in a minimum of 9 letter-graded semester units of 100-level and/or 200-level coursework completed while in graduate standing at San José State University and in any coursework completed while in graduate standing at other institutions before enrollment here.
2. Classified standing.
3. Planned a proposed program of study approved by the Nursing Graduate Coordinator and approved by GAPE.

Requirements for Graduation
University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.
### MS - Nursing Graduation Requirements

Classified standing in Nursing or the permission of instructor is required for all nursing courses listed.

#### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

#### Total Units Required

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
**Doctor of Nursing Practice Program**

The Doctor of Nursing Practice (DNP) is a practice degree program designed to prepare nurses at a doctoral level to lead health care change, serve as nursing faculty, and advance healthcare throughout central and northern California communities. The DNP program prepares nurse leaders and advanced practice nurses for evidence-based practice in patient care, leadership, and educational roles. Graduates are also prepared to serve as clinical faculty in postsecondary nursing education programs. The curriculum is based on the American Association of Colleges of Nursing’s The Essentials of Doctoral Education for Advanced Nursing Practice (2006) and meets all requirements for national accreditation.

Designed for working professionals, coursework is offered primarily in an online format with intensive sessions held on-site at the San José State University campus at the beginning of each semester. Our graduates will serve as stewards of the nursing discipline and work collaboratively with other disciplines to improve the health and health care systems of our community.

See the SJSU Valley Foundation School of Nursing website for more information: [www.sjsu.edu/nursing](http://www.sjsu.edu/nursing)

**Admission Requirements**

Prior to applying to the University, students should refer to The Valley Foundation School of Nursing website for information regarding advisement for entry into the DNP degree program. The DNP is a five semester, 37-unit program that can be completed in 23 months of full-time study. It follows the cohort model, and there is no part-time option. It requires 1,000 hours of post-baccalaureate clinical practice. Applications open in the fall for admission in the following Fall semester.

The Valley Foundation School of Nursing uses the Nursing CAS for submission of applications to the Doctor of Nursing Practice program.

1. MSN from an accredited institution or a master’s degree in a health-related field with additional post-baccalaureate courses in nursing theories, research methods, transcultural nursing and informatics;
2. Overall GPA of 3.0 or better;
3. Current, unrestricted California RN license;
4. National Certification in a nursing area or specialty; and
5. Preparation and experience as an APN, administrator, or educator.

In addition, applicants must apply separately for admission to the University and the department.

**University Admissions**

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at [calstate.edu/apply](http://calstate.edu/apply) and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the DNP degree program. See the [GAPE Graduate Admissions](http://gapecatalog.sjsu.edu/graduateadmissions) website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the [Graduate Program Test Requirements](http://gapecatalog.sjsu.edu/graduateadmissions) webpage at CAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

**Requirements for Admission to Classified Standing**

Applicants to the DNP program may be fully admitted in Classified status if they meet the admissions requirements for the University and the department. The minimum requirements for admission to the program are as follows:

1. MSN from an accredited institution or a master’s degree in a health-related field with additional post-baccalaureate courses in nursing theories, research methods, transcultural nursing and informatics;
2. Overall GPA of 3.0 or better;
3. Current, unrestricted California RN license;
4. National Certification in a nursing area or specialty; and
5. Preparation and experience as an APN, administrator, or educator.

All prospective students must also submit the following application materials, first to the Nursing CAS initially, and then to Cal State Apply:

1. California RN License. Applicant must upload a copy (front and back) of a current and unrestricted RN license. Upload under “License”;
2. Personal Statement. Upload a personal statement outlining your goals as a Doctor of Nursing Practice. Include your intended topic or area of interest for your doctoral project (evidence-based practice, quality improvement, program evaluation) and goals for improved practice. Statements should be typed, in Times New Roman font, double-spaced, and no longer than two pages. Upload under “Personal Statement”;
3. CV/Resume. Upload a copy of your current CV or resume. Upload under “CV/Resume”;
4. United States Veterans. If you are a U.S. Veteran please upload documentation. One seat is available each semester for veterans meeting application criteria. Upload under “Military Papers”;
5. National Certification (if applicable). National certification in a specialty field is a requirement for graduation but NOT for admission. However, if you are currently nationally certified, upload a copy under “Certification”;
6. Writing Sample. Upload an example of a scholarly paper you wrote in a prior course of study or a published manuscript. The example should include citation of scholarly research and proper use of a reference and citation format, grammar, punctuation, and style; and
7. Verification of Master’s program clinical hours. Upload a letter from the university’s program director or registrar that verifies the number of clinical hours that were completed within the Master’s program. Upload the letter under “Other.”

Conditionally Classified Standing
Applicants may be conditionally admitted (admitted with conditions) if they meet the admission requirements for the Graduate Division but do not fully meet departmental admissions requirements. The individual admission notification will explain required terms and conditions for attaining Classified standing.

Requirements for Advancement to Candidacy
Candidacy denotes that a student is fully qualified to complete the final stages of the Master of Arts degree. Matriculated graduate students must submit a Petition for Advancement to Graduate Candidacy a minimum of one semester prior to graduating. General university requirements for advancement to candidacy are detailed in the Graduate Policies and Procedures section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at http://www.sjsu.edu/gape. Successful completion of NURS 597 including passing the final written paper in this course with a grade of “B” or better, fulfills the GWAR in this program.

Requirements for Graduation
University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures. Completion of the degree also requires a minimum overall GPA of 3.0.

PRACTICUM REQUIREMENT
Practice Experiences in the Curriculum (AACN Essentials, 2006). DNP programs provide rich and varied opportunities for practice experiences aimed at helping graduates achieve the essential and specialty competencies upon completion of the program. In order to achieve the DNP competencies, programs provide a minimum of 1,000 hours of practice post-baccalaureate as part of a supervised academic program. Practice experiences are designed to help students achieve specific learning outcomes related to the DNP Essentials and specialty competencies. These experiences are designed to provide systematic opportunities for feedback and reflection. Experiences include in-depth work with experts from nursing as well as other disciplines and provide opportunities for meaningful student engagement within practice environments. Given the intense practice focus of DNP programs, practice experiences are designed to help students build and assimilate knowledge for advanced specialty practice at a high level of complexity. Therefore, end-of-program practice immersion experiences should be required to provide an opportunity for further synthesis and expansion of the learning developed to that point. These experiences also provide the context within which the final DNP product is completed.

Practice immersion experiences afford the opportunity to integrate and synthesize the essentials and specialty requirements necessary to demonstrate competency in an area of specialized nursing practice. Proficiency may be acquired through a variety of methods, including attaining case requirements, patient or practice contact hours, completing specified procedures, demonstrating experiential competencies, or a combination of these elements. Students who do not have 1,000 hours of eligible post-baccalaureate practice experience complete this requirement through the NURS 580, DNP Practicum. Units are contingent on hours required. Note that all students are required to perform 270 hours (one semester) of practice experience during the DNP program. These hours are performed in conjunction with the doctoral project.

CULMINATING EXPERIENCE
Plan B (Project)
All students must complete a doctoral project prior to conferral of the doctoral degree. The doctoral project requires enrollment in the NURS 595, 596, and 597 over consecutive semesters. Each student must form a Doctoral Project Committee comprised of three faculty/clinical professionals. The project committee chair shall be a tenured or tenure-track nursing program faculty member. Qualified individuals whose expertise is germane to the topic may be members of the Doctoral Project Committee pending approval of the committee chair and the student’s program advisor. All students are required to perform 270 hours (one semester) of practice experience in conjunction with the doctoral project.

The doctoral project shall be the written product of systematic, rigorous research related to advanced practice and focused on a potential or existing health problem or issue affecting a group or community, rather than an individual. The doctoral project will conform to the following criteria: It shall identify the research problem and question(s), state the major theoretical perspectives, explain the significance of the undertaking, relate it to relevant, scholarly and professional literature, set forth the appropriate sources for and methods of gathering and analyzing the data, and offer a conclusion or recommendation. Students must conduct the project according to ethical principles and present it in an oral defense to the project committee in a public forum. They must also submit one or more manuscripts of the project to an appropriate peer-reviewed journal to complete the program culminating experience.

Introduction
Nutritionists, food scientists, dietitians, foodservice and packaging professionals. The Department of Nutrition, Food Science and Packaging trains graduates for rewarding careers in settings as diverse as community organizations, educational institutions, hospitals, nutrition and research laboratories, corporations and government agencies. The first nutrition department in the CSU system, our department traces its roots to 1911. We currently offer a master's degree in nutritional science and two undergraduate degrees in the field: a general BS degree and a BS degree with the option of concentrations in dietetics and packaging. Our dietetics program is accredited by the Academy of Nutrition and Dietetics (AND) and the Accreditation Council for Education in Nutrition and Dietetics (ACEND) qualifying our students to apply for ACEND accredited internships and to work toward becoming registered dietitians.
# BS - Nutritional Science, Concentration in Applied Nutrition and Food Sciences

## University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](http://info.sjsu.edu/graduation-requirements) section of the Policies and Procedures.

## 4-Year Program Roadmap

Students may find a roadmap for this program [here](http://info.sjsu.edu/roadmap/4-year-roadmaps). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](http://info.sjsu.edu/roadmap/adt-roadmaps).

## Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://info.sjsu.edu/testing/wst](http://info.sjsu.edu/testing/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar](http://info.sjsu.edu/gwar).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

**CATALOG CONTENTS**
BS - Nutritional Science, Concentration in Food Management

The concentration in Food Management under the Bachelor of Science Degree Program in Nutritional Science provides students with the education and background needed to gain employment in foodservice administration. The course plan emphasizes providing a scientific foundation in introductory chemistry, bacteriology and human physiology. Support courses in psychology, statistics and economics also provide a strong background. Business courses in human resource management, accounting, and labor relations are needed to provide business skills utilized in foodservice management. Numerous courses in culinary skills, foodservice production management and procurement, catering, sanitation and food science, and cultural aspects of food, as well as nutrition, provide the industry focused education needed to function in the foodservice industry in management.

All students majoring in the Food Management concentration complete both a foodservice internship for 200 hours as well as a field experience course planned for a higher level of work experiences with enrollment as a senior for 90 hours. Both experiences provide the students majoring in the Food Management Concentration with the knowledge, skills, and confidence to interview for foodservice management positions. A carefully prepared multi-year program of study will ensure an appropriate sequencing of required courses and students should seek early and frequent advice from departmental advisors.

There are no minimum grade requirements for the major other than an overall 2.5 average across the courses in the major. The Concentration course plan meets the Program Learning Outcomes established for the Department. The BS degree in Nutritional Science with a Concentration in Food Management is a regimented degree plan for students who wish to develop a focused set of skills to be successful in the foodservice industry so they can apply these skills in a practical setting.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Core Lower Division General Education
Of the 39 units required by the university, 18 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

Upper Division General Education
Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions
The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

MS - Nutritional Science

The Master of Science in Nutritional Science program is designed to meet the needs of the student who has a baccalaureate degree and seeks advanced preparation in nutrition science, nutrition education, geriatric nutrition, and foodservice/restaurant management and packaging. The program is intended to prepare candidates to assume leadership roles in their profession and communities and to provide the opportunity to acquire a foundation for doctoral study. Our MS graduates have earned doctorates, become college and university faculty, been employed in private, federal and state research institutions, and have established their own private practice or consulting business. In the process of fulfilling requirements for the MS degree, it is possible to complete the academic requirements of the Academy of Nutrition and Dietetics (AND) and the Accreditation Council for Education in Nutrition and Dietetics (ACEND) toward becoming a registered dietitian. Courses are scheduled to accommodate the time needs of working graduate students.

Additional information is available on the department website: www.sjsu.edu/nufspkg

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the Nutritional Science program. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

Candidates must meet all the university admissions requirements. Students can be admitted to the MS, Nutritional Science program in either classified or conditionally classified standing. All prospective students need to apply separately to the university to obtain approval for university-level admission and to the department to obtain admission into the M.S. in Nutritional Science program. A selection committee will determine eligibility for admission to classified standing on the basis of information provided in the application. Criteria include:

1. BA or BS degree in Nutritional Science, Food Science, Foodservice Management, or equivalent;
2. Grade point average of 3.0 in upper division course; and
3. Completed Prerequisite course requirements as described in the MS, Nutritional Science graduate handbook
4. The following documents sent to the NUFS/PKG graduate coordinator by email:
   a. Signed and dated letter of intent
   b. Three (3) letters of recommendation
   c. Signed “right of access to letter of recommendation” form for each person providing a letter
   d. Resume

Requirements for Admission to Conditionally Classified Standing

Students seeking an MS, Nutritional Science degree who meet requirements for admission to the Graduate Division, but lack an undergraduate degree in Nutritional Science, Food Science, Foodservice Management or equivalent and have little or no professional experience, may apply for conditionally classified standing in the department. The decision to accept the student for study in this program will be made by a selection committee. Criteria include:

1. BA or BS degree;
2. Grade point average of 3.0 in upper division courses; and
3. Completion of prerequisite course requirements courses to correct deficiencies in undergraduate courses.

The individual admission letter will explain required terms and conditions for attaining Classified standing.

Requirements for Admission to Candidacy for the MS - Nutritional Science

Prior to registering for the first time (or upon re-entering), a student should consult with the Graduate Coordinator to develop a schedule of courses. Advancement to candidacy for the Master’s degree in Nutritional Science requires favorable action of the Graduate Committee of the Department of Nutrition, Food Science and Packaging and of the university’s Office of Graduate Admissions & Program Evaluations. In general, students will be recommended for candidacy when they:

1. Fulfill all university requirements for advancement to candidacy;
2. Attain classified graduate standing;
3. Complete a minimum of 9 units of letter-graded approved courses;
4. Receive a minimum 3.0 grade point average in all classes listed on the candidacy form;
5. Successfully complete NUFS 217 with at least a “C” to meet the Graduation Writing Assessment Requirement (GWAR); and
6. Select a graduate advisor and thesis or project topic.
Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MS - Nutritional Science Graduation Requirements
Maintenance of a 3.0 GPA is necessary. A comprehensive final oral examination is required and will be of such scope and manner as determined by the student’s graduate committee. As shown below, the program consists of 30 semester units of approved work, including 6 units of Plan A (Thesis) or 3 units of Plan B (Project).

Culminating Experience

Plan A (Thesis)
For this plan, the student is required to complete 6 units of the NUFS 299, Master’s Thesis. A maximum 3 units of the NUFS 298, Special Studies in Nutrition, Food Science and Packaging is allowed. See program thesis information for steps in completing a thesis. A bound copy of the thesis must be submitted to the Nutrition, Food Science and Packaging Department and to the student’s thesis advisor. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines.

Plan B (Project)
For this plan, the student is required to complete a written project in publication format. A bound copy of the project must be submitted to the Nutrition, Food Science and Packaging Department and to the student’s project advisor. This option requires an additional 3-unit elective.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Chiao-Ju Fang

Curricula
⦁ Certificate, Mindfulness-Based Occupational Therapy
⦁ MS, Occupational Therapy

Introduction
Occupational therapists help people of all ages whose daily lives are disrupted by illness, injury, or other conditions to improve their health, independence and participation through the therapeutic use of everyday activities (occupations). One of the fastest growing of the health care professions, the demand for occupational therapists will grow by almost 30 percent by 2020, the U.S. Bureau of Labor Statistics reports.

The SJSU OT department is the oldest accredited OT program in the CSU system. Founded in 1943, it is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery, Suite 200, Bethesda, MD 20814-3449. ACOTE’s telephone number, c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org. NBCOT School Program Performance Data is also available.

Courses are taught by nationally recognized faculty who have clinical, research and teaching expertise across a broad range of traditional and emerging practice areas. The Student Occupational Therapy Association (SOTA) provides a myriad of social, educational and leadership opportunities. Always in high demand, our graduates are hired by private and public health care institutions and agencies.
Advanced Certificate in Mindfulness-Based Occupational Therapy

This program is meant to provide the means for occupational therapists to develop, experience, and see the profession of OT through a guiding mindfulness-based practice model and lens. The program provides curricular opportunities in the community of other OTs to build skills for developing all of the senses and abilities one has currently available to be in wise relationship to the occupational paradox of being and doing and explores the value of occupational participation as it relates to meaning and purpose. Developing skillful and steadfast mindful self-care and compassion in the midst of our complex work as OTs is a primary focus of this training program. From this embodied experience of the mindfulness-based lens the program will provide guidance and mentorship for appropriately integrating mindfulness into one’s clinical work.

MS - Occupational Therapy

The SJSU Department of Occupational Therapy offers the oldest accredited OT program in the CSU system. Founded in 1943, the Master of Science in Occupational Therapy degree program is designed for those who have already earned a baccalaureate degree in another field. The program of study enables students to obtain the education and degree necessary to be eligible to practice as an occupational therapist. Once the MS degree in Occupational Therapy is complete, including the successful completion of the OCTH 201A and OCTH 201B courses, the student is eligible to sit for the national certification examination. Successful completion of the examination qualifies the candidate to apply for national certification and state licensure.

The MS, Occupational Therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery, Suite 200, Bethesda, MD 20814-3449. ACOTE’s telephone number, c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org. NBCOT School Program Performance Data is also available.

See the department website for more information: http://www.sjsu.edu/occupationaltherapy/

Admission Requirements

The curriculum of the Master of Science in Occupational Therapy degree program is designed for those who have already earned a baccalaureate degree in another field. The program of study enables students to obtain the education and degree necessary to be eligible to practice as an occupational therapist. Once the MS degree in Occupational Therapy is complete, including the successful completion of the OCTH 201A and OCTH 201B courses, the student is eligible to sit for the national certification examination. Successful completion of the examination qualifies the candidate to apply for national certification and state licensure. Applications are accepted beginning October 1 for the subsequent Fall semester. It is important that students apply as early as possible.

University Admissions

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Admission Requirements tab of the University Admissions section of the Graduate Program Catalog for general information about graduate admissions at SJSU.

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the Occupational Therapy program. See the CAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Admission to Classified Graduate Standing

Prospective students must meet the following prerequisites. All prerequisite courses must be completed before acceptance into the program:

1. Cumulative GPA of 3.0 (on 4.0 scale) in the last 60 semester units (or 90 quarter units) of coursework and a minimum grade of B or better for all prerequisite courses;
2. Minimum of 80 hours volunteer experience or equivalent paid work experience in 2 different types of therapeutic settings; 60 of the hours must be completed under the supervision of an occupational therapist. The additional 20 hours can be completed in a community service setting. Hours must be verified by supervisor on Evaluation Form for Volunteer Experience available on the Department of Occupational Therapy website; forms are submitted at the time of application;
3. Completion of Student Information Form available on the OTCAS and subsequent submission of the first page of the OTCAS application form and the general essay from the OTCAS application directly to the Occupational Therapy department;
4. Human Anatomy with human cadaver laboratory (virtual laboratory acceptable), 3 semester units or 4 quarter units;
5. Physiology with laboratory, 3 semester units or 4 quarter units;
6. General psychology course, 3 semester or 4 quarter units;
7. Introductory Sociology or Cultural Anthropology course, 3 semester or 4 quarter units;
8. Abnormal Psychology course, 3 semester or 4 quarter units;
9. One college-level skills course may be taken through adult education. The purpose of the course is to have students work with an artistic medium. Acceptable courses include: Ceramics, painting, weaving, graphic arts and woodworking. Previous work may be accepted as fulfilling this requirement at the discretion of the Admissions Committee;
10. Statistics course, either an upper division course offered by the departments of education, social sciences, psychology or division of health professions or a lower division statistics course that covers correlations and analysis of variance, 3 semester or 4 quarter units. Course must be completed within seven years of the application;
11. Neuroanatomy - Course available online through SJSU Occupational Therapy program. Courses from other institutions may also be acceptable at the discretion of the Admissions Committee. 3 semester or 4 quarter units;
12. Evidence of understanding of occupational therapy and defined career goals in relation to that profession as stated on the Student Information Form and/or accompanying personal written statements (see #3 above);
13. Ability to write as demonstrated in the student information form (see #3 above), transcripts of all previous work submitted and any correspondence;
14. A GRE (Graduate Record Examination) combined minimum Quantitative and Verbal score of 297 is required. In addition, a minimum GRE verbal score of 135 is required and a minimum Analytical Writing score of 4.0 is required; a score of 4.5 or higher in Analytical writing is desired. Note: Scores must be sent to both the University and the Department of Occupational Therapy;
15. Three letters of recommendation from former instructors, employers, supervisors, or other individuals knowledgeable about the candidate’s academic abilities, capacity for goal-directed behavior, and the ability to integrate and synthesize ideas. One letter must be from an academic instructor; and
16. Personal interview by Graduate Committee may be requested. If so, the student will be notified. If transportation, cost, and time are prohibitive, a phone or online interview can be arranged.

All prerequisite courses must be completed before acceptance into the program. All transcripts must be sent to OTCAS in addition to the University. For current admission procedures, please visit www.sjsu.edu/occupationaltherapy.

These requirements exist for all prospective students holding baccalaureate degrees in other disciplines. The department reviews completed files and makes recommendations for acceptance or denial to the SJSU Admissions Office.

Requirements for Advancement to Candidacy
Matriculated graduate students must submit a Petition for Advancement to Graduate Candidacy a minimum of one semester prior to graduating. General university requirements for advancement to candidacy are detailed in the Graduate Policies and Procedures section of this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at http://www.sjsu.edu/gape. Successful completion of OCTH 245, including passing the final written paper in this course with a grade of “B” or better, fulfills the GWAR in this program.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

In consultation with the department graduate coordinator, the candidate will develop and pursue a program of study. The candidate must successfully complete all requirements of the selected plan including the course work specified in the Master's Degree Approval Program.

Occupational Therapy International Experience Requirement
To satisfy the Occupational Therapy Department international requirement, students must study abroad for at least nine days in an approved program. (Exemption from the study abroad portion of the requirement must be approved by the dean of the College of Health and Human Sciences on the basis of compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at www.sjsu.edu/chhs.

Culminating Fieldwork Requirement
Following completion of the academic coursework (60 units), students must be enrolled in and complete two Fieldwork Courses, OCTH 201A and OCTH 201B, prior to the University awarding the Master of Science degree in Occupational Therapy.

Culminating Experience

Plan B (Project)
Students in this program fulfill their culminating experience requirement with a Plan B (Project). The Comprehensive Master’s project requires critical analysis and synthesis of information gathered, crafted into a publishable paper with a poster and oral presentation. Students will enroll in 3 units of OCTH 295, Advanced Research, which supports inquiry into advanced topics in occupational therapy practice, including theoretical and clinical problems.

Occupational Therapy International Experience Requirement
To satisfy the Occupational Therapy Department international requirement, students must study abroad for at least nine days in an approved program (exemption from the study abroad portion of the requirement must be approved by the dean of the College of Health and Human Sciences based on compelling individual life experiences or physical limitations. A relevant cross-cultural experience in the U.S. will be substituted). Specific details can be found on the college website at http://www.sjsu.edu/chahs/international-experience/.
Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Curricula
⦁ BA, Philosophy
⦁ Minor, Philosophy
⦁ MA, Philosophy

Introduction
Philosophy majors read and discuss ideas generated by some of the greatest thinkers in history and learn to examine contemporary theoretical problems from a philosophical perspective. Noted for its treatment of philosophy in a global context as well as its engagement with issues reflecting its Silicon Valley setting, the Department of Philosophy offers classes taught by faculty recognized and highly regarded for both teaching and scholarship. Our curriculum is equally strong in traditional and innovative areas of philosophy, such as feminist and applied philosophy, and we offer both undergraduate and graduate degree programs. Because the study of philosophy develops a student's ability to analyze ideas and arguments, to think critically and to write well, a major in philosophy provides pre-professional training in a number of fields, including the fields of law, medicine, psychology and theology.
BA - Philosophy

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

University Graduation Requirements

Core Lower Division General Education

Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet CE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

Upper Division General Education

Of the 9 units required by the university, 9 units may be satisfied by coursework outlined below. Consult with major advisor for details.

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

COMPLETE ONE SEQUENCE FROM:

African American Studies

AFAM 002A. African Americans and the Development of America’s History and Government. D2 3
AFAM 002B. African Americans and the Development of America’s History and Government. M7 3

Asian American Studies

AAS 033A. Asian Americans in U.S. History I. D2 3
AAS 033B. Asian Americans in U.S. History II. M7 3

U.S. History and Government

Chicana and Chicano Studies

CCS 010A. Mexican Americans and the Development of U.S. History and Government. D2 3
CCS 010B. Mexican Americans and the Development of U.S. History and Government. M7 3

Physical Education

Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C- not accepted) is required to meet graduation requirement.

**Philosophy Electives**

Complete seven upper division Philosophy courses, which may include SJSU Studies Philosophy courses.

*Students may substitute a Graduate Level Philosophy course for one of the seven upper division Philosophy courses with permission from the advisor.*

**University Electives**

At least 4 units must be Upper Division

**Total Units Required**

120
### Minor - Philosophy

The selection of philosophy courses should expose the student to the history, traditions and methods of philosophy in a manner that helps students to productively assess their major course work within a broader philosophical perspective.

#### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

<table>
<thead>
<tr>

| Total Units Required                                               | 18    |

Courses that meet General Education/American Institution requirements are noted with area designation for required area.

For Legend please see page 2
MA - Philosophy

Advisors: Dr. Carlos A. Sanchez

Requirements for Admission to Classified Standing
Candidates must meet all university requirements for admission. In addition, a student will be admitted to classified status only if:

1. At least 18 units in philosophy have been taken including at least 6 units in upper division work, at least 6 units in the history of philosophy, at least 3 units in ethics, and at least 3 units of symbolic logic (Phil 9 or its equivalent). Exceptions based on comparable studies and experience may be made with graduate committee approval.
2. The average grade received in the 18 units is at least a “B”.
3. Three letters of recommendation have been submitted.

Admission to Conditionally Classified Standing
Applicants who meet requirements for admission to the Graduate Division but who do not meet all the requirements for classified standing will be admitted as conditionally classified.

Requirements for Admission to Candidacy for the MA - Philosophy
The basic requirements for admission to candidacy for the MA - Philosophy are outlined in detail in the Academic Requirements section of this catalog. The University requires that all graduate students satisfy the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions & Program Evaluations website at www.sjsu.edu/gape.

Completing Requirements

Plan A - Thesis
Designed for students who wish to do a thesis.

Plan B - Option 1: Reading Intensive
Designed for students who wish to do a guided, individualized reading project.

Plan B - Option 2: Applied Philosophy Project
Designed for students who wish to do a project.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Curricula
⦁ BA, Physics
⦁ BA, Physics, Preparation for Teaching
⦁ BS, Physics
⦁ Minor, Physics
⦁ Minor, Astronomy
⦁ MS, Physics
⦁ MS, Physics, Concentration in Computational Physics
⦁ MS, Physics, Concentration in Modern Optics

Introduction
At the core of all science, physics helps us understand chemical reactions, protein folding, the Earth’s interior, and the life cycle of stars. Among much else, physicists invented the semiconductor, the laser, and the electron microscope. They play key roles in the design and operation of spacecraft and in the development of electronic and optical instrumentation. The Department of Physics and Astronomy offers an MS degree in physics and two undergraduate degrees: (1) a BS that prepares students for professional careers in applied physics or graduate study, and (2) a BA that combines a strong foundation in physics with electives that allow for a second area of concentration, such as computer science, chemistry, science education, or math. Our faculty are experts in lasers and optics, computational physics, condensed matter, astrophysics, and physics education research. The department receives on average approximately $1.8 million annually in external funding for sponsored research.
BA - Physics

This 120-unit program provides a strong foundation in physics while allowing sufficient electives for the student to pursue a second program of study in another field (e.g., science education, business, math, or another science; transfer students must take at least 12 units of upper division physics major courses at SJSU with a GPA of 2.0 or better in these courses).

University Graduation Requirements
Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap
Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

BA - Physics, Preparation for Teaching

This major is designed for students interested in teaching science in high school or middle school. Students enrolled in this program will earn units towards their single subject credential as an undergraduate. The following coursework satisfies San José State University’s requirements for a BA in Physics. A minimum grade point average (GPA) criterion may be required for verification of subject matter competency. Completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See “Teaching: How to Become a Teacher in California” (see Teaching) for information on application and admission to credential programs.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

| Physical Education                         | 2     |

| Graduation Writing Assessment Requirement  | 3     |

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

*A grade of C or better (C- not accepted) is required to meet graduation requirement.*

## Minor - Astronomy

The Astronomy minor offered by the Department of Physics and Astronomy requires completion of the physics and astronomy courses taken at San José State University with a grade of “C” (2.0 GPA) or better.

### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

### Requirements of the Major

Total Units Required: 21

Courses that meet General Education/American Institution requirements are noted with area designation for required area.

For Legend please see page 2
### Minor - Physics

A physics minor to accompany a major in some other field is offered. A physics minor is 18 units of physics courses taken at San José State University with a “C” (2.0) average or better.

#### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Graduate Programs in Physics

Admission Requirements

University Admission
Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the MS, Physics degree program. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Program Requirements for Admission to Classified Standing
Minimum requirements for admission to the Graduate Division are outlined in the Admissions section of this catalog. Students can be admitted in either classified or conditionally classified standing. To be admitted to the MS, Physics degree program in Classified status, an applicant must possess a baccalaureate degree with a major in Physics and a grade point average of 3.0 or better in the last 60 units. Applicants must also have completed at least 24 semester units of upper division physics, or courses in related fields approved by the Physics Department graduate advisor.

Program Admission to Conditionally Classified Standing
Students may be admitted to conditionally classified standing if they meet minimum requirements for admission to the University but their preparation for advanced graduate work is considered inadequate to meet the course prerequisites or other departmental requirements. The conditions will include completing PHYS 105A, PHYS 110A, and PHYS 163 with a grade of “B” or better. Students may need to complete additional coursework to meet prerequisites for these classes. The program admissions notification will explain terms and requirements.

Requirements for Advancement to Candidacy
Matriculated graduate students must submit a Petition for Advancement to Graduate Candidacy a minimum of one semester prior to graduating. General university requirements for advancement to candidacy for the MS degree are detailed in the Graduate Policies and Procedures section of this catalog.

Students also must fulfill Graduate Writing Assessment Requirement (GWAR). Graduate courses that meet GWAR requirements include.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Course Requirements
To meet the requirements for the MS, Physics, a student must complete 30 units (and satisfy the program GWAR requirement) with a cumulative GPA of 3.0 or better. The student must complete one of two culminating experience options: Plan A (Thesis) or the Plan B (Project). Note: The Plan A (Thesis) option requires Graduate Studies approval of the completed thesis.

In consultation with the department graduate coordinator, the candidate will develop and pursue a plan of study. The candidate must successfully complete all requirements of the selected plan including the course work and the culminating experience.

Culminating Experience
Students in the MS, Physics program choose a Plan A (Thesis) or Plan B (Project) option as their culminating experience.

Plan A (Thesis)
The student who opts to complete a Master's thesis is responsible for securing the commitment of a full-time tenured or tenure-track faculty member who agrees to serve as thesis committee chair. The student must also secure the commitments of two additional university faculty members, one of whom must be a full-time tenure or tenure-track faculty member, to serve as the student's thesis committee. The student must write a thesis proposal and have it approved by the thesis committee and pass at the PHYS 298, Research before enrolling in the PHYS 299, Master's Thesis. The thesis must meet university requirements as stipulated in this catalog and in the SJSU Master's Thesis and Doctoral Dissertation Guidelines. It will be written under the guidance of the candidate's thesis committee chair with the assistance of the thesis committee.

Plan B (Project)
Students opting to complete a master's project will take the PHYS 298, Research (3 units) and an additional elective for a total of 6 units. The project shall be one of the following:

- A written project or journal paper describing the research project.
- A presentation of the research topic at a department seminar with a written description of the project presented to the student's committee (both written and an oral presentation).
- Authorship in a peer reviewed journal and presentation of the results to the student's committee.
MS - Physics

At the core of all science, physics helps us understand chemical reactions, protein folding, the Earth’s interior, and the life cycle of stars. Physicists invented the semiconductor, the laser, and the electron microscope. They play key roles in the design and operation of spacecraft and in the development of electronic and optical instrumentation. The Department of Physics and Astronomy offers a Master of Science in Physics and two Concentrations. Our faculty are experts in lasers and optics, computational physics, condensed matter, astrophysics, and physics education research. The department receives on average approximately $1.8 million annually in external funding for sponsored research.

Additional information is available on the Department of Physics and Astronomy website at [http://physics.sjsu.edu](http://physics.sjsu.edu).

### Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

MS - Physics, Concentration in Modern Optics

The students in this concentration receive instruction in fundamental areas of physics and gain experience and knowledge in a wide range of subjects related to Modern Optics. All candidates are required to complete a thesis including the defense (Plan A) or take an oral comprehensive examination as culminating experience (Plan B).

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Total Units Required  

Elective courses must be planned in consultation with the Graduate Advisor.  
The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.  
Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.

⦁ Minor, Political Science
⦁ Minor, Public Administration and Public Policy
⦁ Masters, Public Administration

Introduction
Political science majors tackle the public issues of the day as well as the timeless issues of government, public policy and the political process. The Department of Political Science offers a BA in political science and a master’s degree in public administration (MPA). Our courses cover U.S. politics and public administration, public law, comparative politics, international relations and political theory. Our extensive internship program includes funded internships in Sacramento and Washington, D.C., and our students have the opportunity to participate in a Model United Nations and the honor society Pi Sigma Alpha. We arrange annual trips to the state capital and state supreme court and campus presentations by guest speakers who range from Holocaust survivors to U.S. Senators. We prepare our graduates for advanced graduate study as well as careers in law, teaching, government service, legislative staffing, political consulting, interest group representation, international relations and other fields. Contact us at 408-924-5550 or visit us at http://www.sjsu.edu/polisci/.
Honors Program

The achievements of political science majors with an overall GPA of 3.20 and a 3.50 GPA in political science are recognized by the department honors program. These outstanding students are eligible to enroll in POLS 190H, an honors thesis. Students who attain the required GPA and complete the honors thesis graduate with Honors in Political Science. Interested students should consult the department chairperson.
# BA - Political Science

The BA - Political Science provides students with an understanding of politics and the political process and prepares them for their lifelong responsibilities as citizens, as well as furthering their skills in critical analysis and communication. The major in political science may lead to a wide variety of careers, including teaching, the law, business and public service.

## University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the [Graduation Requirements](http://info.sjsu.edu/gwar.html) section of the Policies and Procedures.

## 4-Year Program Roadmap

Students may find a roadmap for this program [here](http://info.sjsu.edu/gwar.html). Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found [here](http://info.sjsu.edu/gwar.html).

### University Graduation Requirements

<table>
<thead>
<tr>
<th>Requirements</th>
<th>44</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Lower Division General Education</td>
<td>30</td>
</tr>
<tr>
<td>Of the 39 units required by the university, 9 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a &quot;C-&quot; or better to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

**NOTE:** STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

### Upper Division General Education

<table>
<thead>
<tr>
<th>Requirements</th>
<th>9</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.</td>

Minor - Applied Research Methods

The interdisciplinary Minor in Applied Research Methods (ARM) is designed to prepare students for careers involving social research and data analysis. The ARM Minor provides students with a broad understanding of research methods, including both quantitative and qualitative approaches and techniques such as surveys, experiments, interviews, focus groups, ethnography, and content analysis. Students in the ARM Minor will learn to apply these research skills to socially relevant issues, combining theoretical background with hands-on skills practice. The ARM Minor provides an ideal complement to the programs of students from a variety of social sciences, business, and applied sciences and arts disciplines.

University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

## Minor - Political Science

Students majoring in a wide variety of fields find a minor in political science interesting and useful, providing knowledge and skills that enhance their careers, improve their citizenship and cultivate their minds. The minor appeals especially to students in the other social sciences or in business, journalism or administration of justice, although many others also use the minor to broaden their education. Political Science department advisors help students customize their programs to support their special interests. A minimum of six units must be completed in residence to satisfy the requirements for a political science minor. The minimum requirements are:

### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

#### Upper Division Electives

- Twelve additional upper division units from POLS 102-199.

| Total Units Required | 18 |
### Minor - Public Administration and Public Policy

The Public Administration and Public Policy minor provides a structured introduction to the practice of government. This minor appeals especially to students who are interested in exploring careers in the public, private, or non-profit sectors that involve policy development, advocacy, and evaluation, or government relations. This minor compliments the Political Science major, as well as other majors across the social sciences, business, journalism, justice studies, social work, and many other disciplines.

#### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

MPA - Master of Public Administration

The program leads to the professional degree of Master of Public Administration. It provides pre-service students with the knowledge and skills necessary for effective administration of local, state, and federal government agencies and of nonprofit organizations. It also offers mid-career administrators and professionals in public service an opportunity to improve their management skills and qualifications. For the convenience of students who are employed full-time, all courses are offered in the evening. Alumni assist with orientation and mentoring activities.

The MPA program provides each student with a basic understanding of the environment of public policy and the ability to deal with:

- Political and legal institutions and processes
- Economic and social institutions and processes
- Organization and management concepts, and human resource administration
- Concepts and techniques of budgeting and financial administration
- Application of quantitative and qualitative techniques of analysis in policy and program formulation, implementation and evaluation, and decision making and problem solving

Students also develop the ability to:

Define and diagnose public problems, engage in supported decision-making, collect relevant data including big data, perform logical analyses, develop alternatives, implement an effective and ethical course of action, and evaluate results

- Organize and communicate information clearly to a variety of audiences through formats including oral presentations, written memoranda and technical reports, and statistical charts, graphs, and tables
- Recognize and value diversity and diverse viewpoints within the community, and integrate diverse view into community problem solutions
- Apply information technology to public administration problems, including community service provision and cybersecurity of systems

For more information on the program please go to the program's website at [http://www.sjsu.edu/mpa/](http://www.sjsu.edu/mpa/)

Admissions Requirements

The MPA program accepts students in unclassified and classified standing. People in unclassified standing must meet all admissions requirements, but may be lacking one or more of the prerequisites for the program. These prerequisites must be completed before registering for the fifth MPA course. People admitted in classified standing have met all requirements for admission to the program.

Minimum requirements for admission to the Graduate Division are outlined in this catalog. See [admissions requirements](http://info.sjsu.edu/_data/official_catalog/2019-2020/3/36/0012019-2020v01academic_year.html#admissions_requirements).

The MPA does not use the GRE, as it is not a good predictor of performance for people who have been in the working world for several years. The MPA program is designed for working professionals, although well qualified recent graduates may be admitted.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the [Graduate Program Test Requirements](http://www.sjsu.edu/cape/current_students/gpa/graduate_program_test_requirements.html) webpage at CAPE. For the MPA a minimum score of 575 is required.

Preparation

A bachelor’s degree or its equivalent, from an accredited college or university is required. No specific undergraduate major is necessary. Preparation must include introductory courses in American government, micro-economics and statistics from an accredited community college or university, and competency in spreadsheet use. These are known as prerequisites, requirements to be met before beginning the MPA program. Deficiencies in preparation must be removed before admission to candidacy and before completion of four MPA courses. Transcripts for the baccalaureate, including from all colleges where prerequisites were taken, must be sent directly to Graduate Admissions upon applying to the program, not to the department. Transcripts for the missing prerequisites submitted after admission must go to the MPA Director directly.

Grade Point Average (GPA) Requirements

Applicants applying directly after graduating from an undergraduate school need an overall grade point average of 3.0 in all courses, or in the last 60 units as an undergraduate, or in the major. Applicants applying three or more years after completing the BA degree need a grade point average of 2.75 overall, or in the last 60 units of undergraduate courses, or in the major. These are minimum qualifications for consideration, and may not result in admission. In addition, applicants should submit evidence of professional development, such as promotions noted on a resume or in letters of recommendation.

Requirements for Advancement to Graduate Candidacy

Students must apply for admission to candidacy as early as possible, but no later than the last semester of their graduate program. University requirements for advancement to candidacy [http://info.sjsu.edu/static/policies/candidacy.html](http://info.sjsu.edu/static/policies/candidacy.html) for the master’s degree as outlined in the Graduate Policies and Procedures section of this catalog can be found at this link.

Final date for submission in each semester may be found at the CAPE website [http://www.sjsu.edu/cape/current_students/deadlines/](http://www.sjsu.edu/cape/current_students/deadlines/). In addition to meeting the university-wide requirements for advancement to candidacy, as outlined in this catalog, applicants must have submitted an approved program for the degree.

Candidacy includes successful completion of the [Graduation Writing Assessment Requirement](http://www.sjsu.edu/cape/current_students/gpa/graduate_program_test_requirements.html) (GWAR). For graduate courses that meet the GWAR, refer to the [GWAR](http://www.sjsu.edu/cape/current_students/gpa/graduate_program_test_requirements.html) Course List on the College of Graduate Studies website. Within the MPA program, PADM 210 meets the GWAR.
Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Culminating Experience
Plan A (with Thesis)
A thesis demonstrating the student’s competence in original research and acceptable to the department must be submitted to the department at least eight weeks prior to the date on which the degree is to be awarded. This thesis must conform to university standards and be approved by the Associate Dean of Graduate Studies.

Plan B (with Project)
In lieu of a thesis, a student may complete an academically rigorous research project by enrolling in PADM 298, Special Problems. In PADM 298 the student will complete a substantial paper under faculty supervision to complete the project component of Plan B.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

This requirement is satisfied by passing PADM 210.

Requirements of the Masters 36

Core Courses 15
The courses form a base of knowledge and skills that prepare students for advanced seminars. Students must complete these courses before taking PADM 298.

Additional Electives 0-9
Depending on thesis or project arrangements, electives may include additional MPA courses, the PADM 281, Internship, the PADM 284 Independent Reading, or approved 100- or 200-level courses in political science or other departments, up to a maximum of 9 units.
Culminating Experience

COMPLETE ONE OPTION (PLAN A OR PLAN B):

Plan A (with Thesis) ......................................................................................................................................................................................................................3
PADM 299. Master’s Thesis ......................................................................................................................................................................................................................3

Plan B (with Project) ........................................................................................................................................................................................................3
PADM 298. Special Problems ........................................................................................................................................................................................................3

Total Units Required

No more than six units of 100-level course work may be applied towards the MPA degree.
No more than six units of transfer credit from other universities may be applied toward the MPA degree.
Students who do not have substantial management work experience related to the curriculum are required to register for PADM 281 and complete an appropriate internship.
Elective courses must be planned in consultation with the Graduate Advisor.
Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

⦁ MS, Psychology, Concentration in Industrial/Organizational Psychology

Introduction
The Department of Psychology seeks to develop skilled critical thinkers who use their knowledge of the principles of human behavior, cognition, and emotion to work and live effectively and in a multicultural global society. Our curriculum covers the major areas in the field of psychology to help students understand the complexities of human thought and behavior in a sociocultural context. In addition, the Department provides students with training in research methods, statistics, and scientific writing. Psychology students have opportunities to gain practical experience by working with our faculty in research labs, community outreach projects, Silicon Valley companies, and so on. The Department offers a BA in Psychology, a BS in Psychology, a minor in Human Systems Integration, a minor in Psychology, an MA in Research and Experimental Psychology, an MS in Clinical Psychology, and an MS in Industrial and Organizational Psychology. Detailed information about our faculty, students, and programs may be found on our website at www.sjsu.edu/psych.

Psychology Honors Program
Students requesting departmental honors in psychology will be evaluated against the following criteria at graduation: (1) a minimum aggregate GPA of 3.5 across all psychology course work; (2) evidence of distinguished scholarly work, as indicated by the completion of a BA thesis (PSYC 199), the honors seminar (PSYC 195), or work leading to a published paper or presentation at a professional meeting. Contact a psychology advisor for details.
BA - Psychology

The undergraduate degree assures a broad coverage of the major areas of content and methods in psychology identified by the American Psychological Association as the backbone of a strong degree program. The goal of the breadth part of the degree requirements is to provide a strong background in general psychology. In addition, sufficient flexibility is offered through choices in fulfilling these requirements and through the electives so that students, in consultation with their advisors, can design a program of study which focuses on each student’s particular area of interest.

A carefully prepared multi-year program of study will ensure an appropriate sequencing of required courses (e.g., BIOL 21 or BIOL 65 is a prerequisite to PSYC 30, STAT 95 is a prerequisite for PSYC 100W, PSYC 100W is a prerequisite for PSYC 120, PSYC 120 is a pre- or co-prerequisite for 190/195). Use the advisor’s expertise and the MyGPS planning tools for GE, SJSU Studies, and American Institutions course selection and to ensure a strong foundation for future coursework. Seeking advising is especially important to those at risk for probation, those in the honors program, and those planning to go on to graduate school in psychology. The two and four year planners give additional guidance in designing a particular program of study including suggestions about the order in which to take classes even if they are not governed by official prerequisite requirements. All of these materials as well as the extra coursework and other requirements for Departmental Honors are available on the department website www.sjsu.edu/psych or the department office.

Once declared as a psychology major, there are no minimum grade requirements for the major other than a C- or better for the lower division statistics requirement and an overall 2.0 average across the courses in the major (i.e., a D- can “count” towards meeting psychology requirements even if it does not count towards General Education requirements).

The lower division biology requirement cannot be met with general biology (BIOL 20) nor the online version of human anatomy (BIOL 65O).

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

### University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>
<th>24</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 39 units required by the university, 15 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

**NOTE:** STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

### Upper Division General Education

Of the 9 units required by the university, 0 units may be satisfied by coursework outlined below. Consult with major advisor for details.

### American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

### BS - Psychology

The BS degree is a regimented degree plan for students who wish to develop a focused set of skills in research focused scientific and methodological training. The BS degree program has more course requirements than the BA (i.e., fewer electives). Students should seek early and frequent advice from departmental advisors.

A carefully prepared multi-year program of study will ensure an appropriate sequencing of required courses (e.g., BIOL 21 or BIOL 65 is a prerequisite for PSYC 30, STAT 95 is a prerequisite for PSYC 100W, PSYC 100W is a prerequisite for PSYC 120, PSYC 120 is a prerequisite for PSYC 121A-E, and PSYC 120 is also a pre- or co-prerequisite for 190/195). Use the advisor’s expertise for GE, SJSU Studies, and American Institutions course selection and to ensure a strong foundation for future coursework. Seeking advising is especially important for those in the honors program or those planning to go on to research-oriented graduate programs in psychology. The two and four-year planners give additional guidance in designing a particular program of study including suggestions about the order in which to take classes even if they are not governed by official prerequisite requirements. All these materials as well as the requirements for Departmental Honors (BA or BS Psychology) are available from www.sjsu.edu/psych or the department office.

There are no minimum grade requirements for coursework in the major other than a C- or better for the lower division statistics requirement and an overall 2.0 average across the courses in the major (i.e., a D- can “count” towards meeting psychology requirements even if it does not count towards General Education requirements).

### University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Graduation Writing Assessment Requirement
At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see http://testing.sjsu.edu/wst. Exceptions to the GWAR may be found at http://info.sjsu.edu/gwar.html.

A grade of C or better (C– not accepted) is required to meet graduation requirement.

**University Electives**

| Units Required | 15-21 |

**Total Units Required**

| Units Required | 120   |
## Minor - Psychology

A minor in Psychology has a minimum of 18 units of PSYC and/or STAT. At least 12 of the 18 units must be upper division (i.e., courses numbered 100+ at SJSU). At least 12 units must be separate and distinct from the units used for the major program of the student. See a departmental advisor for approval of courses. Visit the [Psychology Department Advising website](#) for more information.

It is not permissible for a Psychology Major to also have a minor in Psychology.

### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

# Minor - Human Systems Integration

The Human Systems Integration (HSI) minor: (1) studies the cognitive, perceptual, and performance capabilities and limitations of people as they interact with sociotechnical systems and devices (e.g., energy and transportation systems, computers, mobile devices, workplaces); and (2) seeks to apply evidence-based principles in the development of human-centered systems and devices. The HSI minor aims to provide students with interdisciplinary training to prepare them to work in cross-functional teams to optimize human capabilities, increase system efficiency, reliability, and safety, and minimize error.

At least 12 units outside of preparation for the minor must be separate and distinct from the units used for the major program of the student. See a departmental advisor for approval of courses. Visit the Psychology Department Advising website for more information.

It is permissible for Psychology Majors to have a minor in Human Systems Integration.

## University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

### Total Units Required

| Total | 21-23 |
MA - Psychology, Concentration in Research and Experimental Psychology

The Master of Arts Program in Psychology affords its candidates an opportunity for advanced study of psychological theory and research techniques with the following objectives in mind:

- **To ultimately earn a doctorate in psychology** - the course work and experience obtained in the Psychology Program is designed to enhance students’ credentials when applying to highly competitive doctoral programs.
- **To succeed in business, industry and a research setting** - our program’s emphasis on the mastery of statistical and methodological procedures, research experience, and critical thinking produces graduates that are well suited for many careers in business, government, and/or an array of research settings.

**Admission Requirements**

To be eligible for admission into our program, you must:

Meet all of the University’s [graduate admissions requirements](http://www.sjsu.edu/gradstudies).

1. Have the equivalent of a U.S. baccalaureate degree
2. Have completed a minimum of 30 semester units in undergraduate psychology
3. Have a minimum GPA of 3.0 in the last 60 semester units (90 quarter units) of all college and/or university course work
4. Have a minimum GPA of 3.0 in all college and/or university psychology courses taken
5. Have taken the GRE Exam (General Test only), although we do not require a minimum score for your application to be considered.

**Degree Requirements**

General university requirements and procedures for completing the Master of Arts degree are described in the Academic Regulations section of this catalog. In addition to these, the following departmental requirements must be fulfilled.

**General Program requirements**

1. The student’s combined total of approved undergraduate and graduate work in psychology must be at least 60 semester units, including 30 units for the MA Degree Program.
2. The student must complete at least 30 approved graduate units. At least 27 of these 30 units must be psychology or statistics units; of the 27, at least 24 must be 200-level courses, i.e., up to six units may be from 100-level courses with the program coordinator’s approval.
3. The candidate must complete an acceptable thesis. This thesis will be a quantitative investigation of some degree of originality and of publication caliber.
4. Satisfactory performance on a final examination is required. This examination may be written, oral or both, as determined by the student’s thesis advisory committee. This is typically satisfied through the oral defense of the student’s thesis research.
5. The University requires that all graduate students complete the [Graduation Writing Assessment Requirement](http://info.sjsu.edu/gcw) (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Evaluations website at [http://www.sjsu.edu/gape](http://www.sjsu.edu/gape).

**Graduation Writing Assessment Requirement**

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

Thesis Requirement
The thesis serves as the culmination of a student’s course work, research experience, and growth as a scholar and scientist. This process is guided closely by a thesis advisor; a tenured or tenure-track faculty member of the Department of Psychology. As the student’s ideas develop into a full thesis proposal, a thesis advisory committee is formed in order to provide further guidance and expertise. Collection of the thesis data begins once the proposal has been approved by the committee and the proper animal care/human subjects’ approval has been obtained. The introduction, analysis, and interpretations of these data will form the core of the student’s written master’s thesis. These efforts all culminate in an oral presentation and defense before the thesis committee. A detailed statement of thesis policies is available in the Psychology Department Office and on the departmental website www.sjsu.edu/psych.
MS - Psychology, Concentration in Clinical Psychology

The Master of Science (MS) degree in Clinical Psychology is designed to provide the student with both theoretical and practical training in the assessment, diagnosis, and treatment of a wide variety of individual (adult and children), couples', and family mental health problems, and to prepare the student to work in private or public service agencies, independent practice, community mental health centers, or hospitals. The required academic course work and supervised fieldwork of 60 semester units meets the course work requirements for the California State Marriage and Family Therapist (MFT) license and most of the requirements for the Licensed Professional Clinical Counselor (LPCC) license (see www.bbs.ca.gov for requirements). An additional 2500-3000 hours of acceptable supervised experience is required for admission to the state MFT or LPCC licensing examination.

Admission Requirements

To be eligible for admission into the Clinical Psychology program, you must:

1. Meet all of the University graduate admissions requirements
2. Have a baccalaureate degree (BA or BS) in Psychology OR any baccalaureate degree (BA or BS) and a minimum of 30 semester units (45 quarter units) in Psychology
3. Have taken the REQUIRED six courses in psychology from the list provided below. These are to be included in the minimum 30 semester units (10 semester courses).
4. Have a minimum GPA of 3.0 in all Psychology coursework AND a minimum of 3.0 the last 2 years of academic work attempted (60 semester or 90 quarter units).
5. Provide evidence of a minimum of 100 hours of paid or volunteer applied clinical experience working with persons in a counseling/helping capacity (e.g., volunteer in home for emotionally disturbed children, juvenile hall, suicide and crisis telephone hotline).
6. Provide three letters of recommendation. One reference MUST be from a clinical supervisor. Additional references may come from former instructors and from supervisors of previous work in volunteer placements in the clinical field.

Undergraduate Courses in Psychology Required for Admission

1. General or Introduction to Psychology (SJSU code PSYC 1)
2. Elementary Statistics (SJSU code STAT 95)
3. Introduction to Research Methods (SJSU code PSYC 18 or PSYC 120)
4. Psychobiology or equivalent (SJSU code PSYC 30)

Each of the above four (1-4) may be taken at the community college or university level and may be lower division courses.

5. Upper division course in Abnormal Psychology (SJSU code PSYC 110)
6. Upper division course in Theory and Methods of Counseling, or Clinical Psychology (SJSU code PSYC 160, or PSYC 165)

Degree Requirements

General university requirements and procedures for completing the Master of Science degree are described in the Academic Regulations section of this catalog. In addition to these, the following departmental requirements must be fulfilled.

1. The student must complete a total of 60 units in clinical psychology as specified in the table below.
2. Candidates must demonstrate satisfactory performance on one or more final comprehensive examinations. These examinations are both written and oral.
3. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at http://www.sjsu.edu/gape.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

|            |                                                        | 60    |
MS - Psychology, Concentration in Industrial/Organizational Psychology

The Master of Science (MS) degree in Industrial/Organizational (I/O) Psychology program is designed to provide students with a fundamental grounding in theory, research, and application in the field of I/O Psychology and to prepare them to work in a wide range of settings including medium-to-large sized organizations, government agencies, human resources or management consulting firms, and large research organizations. The program places particular emphasis on the science-practitioner approach in which students understand and appreciate theory and research as they apply their knowledge and skills to the needs and challenges of organizations.

Admission Requirements
To be eligible for admission into the industrial/organizational Psychology program, you must:

1. Meet all of the University graduate admissions requirements
2. Have completed either a baccalaureate degree (BA/BS) in psychology or any baccalaureate degree and a minimum of 30 semester (45 quarter) units in psychology
3. Have a minimum GPA of 3.0 in the last 60 semester units (90 quarter units) of all college and/or university course work
4. Have a minimum GPA of 3.0 in all college and/or university psychology courses taken
5. Have taken the GRE Exam (General Test only), although we do not require a minimum score for your application to be considered.

Degree Requirements
General university requirements and procedures for completing the Master of Science degree are described in the Academic Regulations section of this catalog. In addition to these, the following departmental requirements must be fulfilled.

1. The student must complete a total of not less than 30 semester units for the industrial/organizational concentration as specified in the degree below.
2. Candidates in the MS Industrial/Organizational program must complete a thesis as part of their 30 semester unit degree requirement. The nature of the thesis is to be determined in consultation with a committee of at least three faculty members. The thesis ordinarily consists of a quantitative investigation or program design, trial and evaluation of some degree of originality. The topic should be relevant to the field of study in which the candidate plans to work. The thesis will generally constitute the final comprehensive examination.
3. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at [http://www.sjsu.edu/gape](http://www.sjsu.edu/gape).

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

⦁ MS, Recreation
⦁ MS, Recreation, Concentration in International Tourism

Introduction
The recreation degree program, founded in 1947, has a core accredited by the Council on Accreditation of Park, Recreation, and Tourism Related Professions (COAPRT). The degree has maintained continuous accreditation since its first awarding of this status occurred in April 1987, demonstrating the rigor and recognition of our programs. The Bachelor’s degree in Recreation is a nationally accredited program comprised of a core set of classes and courses split generally between concentration courses and major electives. Graduates completing one of these concentrations are eligible to apply for national and state certification. While the general recreation degree is the most flexible in terms of choosing related electives, students may instead elect to complete a more specialized course of study in one of our two approved concentrations within the B.S. Recreation Degree: Recreation Management and Recreation Therapy. We also offer M.S. in Recreation, all of which are designed to meet increasing needs and demands for recreation professionals and administrators in our growing fields of practices in public, non-profit, and commercial sectors, not only locally and regionally, but also nationally and globally.
BS - Recreation

⦁ Credential, Post-Master’s Pupil Personnel Services (PMPPSC)
⦁ MSW, Master of Social Work

Introduction
Social work is a dynamic and challenging profession that presents exceptional opportunities for personal job satisfaction. A professional social worker helps people cope with interpersonal and social problems and obtain the resources they need to live with dignity. Additionally, social workers help communities mobilize and deliver the services and support their citizens require. The School of Social Work is committed to the core values of service, social justice, the dignity and worth of individuals, human rights, competence, integrity and scientific inquiry. We honor diversity. Employing a transcultural perspective, we train our students to practice professionally in a broad range of groups, including Latinos, Asian and Pacific Islanders, African Americans, the disenfranchised and the marginalized. Our undergraduate and graduate degree programs are accredited by the Council on Social Work Education. Our On-Campus MSW Program may be completed in two or three years; our Online/Hybrid MSW Program is completed in two years through continuous part-time enrollment.
BA - Social Work

The BASW program, which has been fully accredited by the Council on Social Work Education since 1976, educates generalist social work practitioners with a liberal arts foundation for practice from a transcultural perspective with individuals, families, and groups within organizations and in the context of broader communities in which they are embedded. To develop the necessary professional generalist skills in their work with individuals, families, groups, and communities, the BASW program curriculum and field practicum experiences provide students with learning opportunities to develop: 1) a selected body of knowledge about social institutions, and methods of problem-solving in social relationships; 2) the skills for integrating knowledge, thought, and feeling into an effective and efficient program of doing; and, 3) a personal and professional value system which incorporates a growing self-awareness necessary for the sensitive and disciplined use of self in helping roles.

In addition to the core social work curriculum, which includes human behavior in the social environment, social policy and programs, practice, social research, and field education, electives are offered to expand a student’s interest in the areas of social work with families; social services to children and youth; alcoholism and substance abuse and the family.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major-Specific Graduation Requirements

The following courses Required in the Major must be completed with a grade of “C or better”: SCWK 110, SCWK 112, SCWK 120, SCWK 130, and SCWK 175. The following course must be completed with “Credit”: SCWK 140

University Graduation Requirements

## Physical Education

### Graduation Writing Assessment Requirement

At SJSU, students must pass both the SJSU Writing Skills Test (WST) and a 100W course. For additional information on the WST, please see [http://testing.sjsu.edu/wst](http://testing.sjsu.edu/wst). Exceptions to the GWAR may be found at [http://info.sjsu.edu/gwar.html](http://info.sjsu.edu/gwar.html).

A grade of C or better (C- not accepted) is required to meet graduation requirement.

Minor - Social Work
The minor in Social Work consists of 18 units and is designed to enrich the student’s major area of study by providing an understanding of the values and structures of current human service programs within a historical and developmental framework. Admission into the minor program is based on the availability of space.

University Graduation Requirements
To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

## Credentials for Master’s of Social Work Program

A **Credential in Spanish Language Counseling** is available to students who, through course work or examination, show evidence of competency to conduct counseling/therapy in Spanish.

### Pupil Personnel Services Credential (PPSC)

The **Pupil Personnel Services Credential (PPSC)** may be obtained by students who are completing the MSW degree in our program, the CBEST, and meet the PPSC program requirements. The PPSC is obtained in School Social Work and Child Welfare and Attendance. Students must accept placement in an approved PPSC program school setting for their second year practicum.

* Students in the MSW Program must consult with the MSW Program Coordinator and Advisor prior to starting the process to earn a PPSC.

* While enrolled in the MSW Program, students wanting to earn a PPSC must take and pass the following courses:

<table>
<thead>
<tr>
<th>Requirements of the Credential</th>
<th>14-16</th>
</tr>
</thead>
<tbody>
<tr>
<td>SCWK 263. Social Work and the Law</td>
<td>3</td>
</tr>
<tr>
<td>SCWK 272. Social Work in Educational Settings</td>
<td>3</td>
</tr>
<tr>
<td>An appropriate school-based internship approved by the Field Education program, i.e., through SCWK 232 and 233</td>
<td>8-10</td>
</tr>
</tbody>
</table>

**Total Units Required**

| 14-16 |

### Post-Master’s Pupil Personnel Services Credential (PM-PPSC)

Post-Master’s Pupil Personnel Services Credential (PM-PPSC), prepares individuals already with an MSW degree to qualify to be credentialed by the State of California as school social workers. Please see the School of Social Work website for PM-PPSC program information and application process: [http://www.sjsu.edu/socialwork/prospectivestudents/certsandcredentials/](http://www.sjsu.edu/socialwork/prospectivestudents/certsandcredentials/)

Students accepted into the PM-PPSC program must take and pass the following courses offered through Special Sessions.

<table>
<thead>
<tr>
<th>Requirements of the Credential</th>
<th>7-10</th>

| 7-10 |
MSW - Master of Social Work

The MSW Program offers graduate professional education in advanced generalist social work practice from a transcultural multi-systems perspective. It prepares graduates for advanced practice and leadership in one of three fields of practice: aging; children, youth, and families; and health/mental health. The curriculum emphasizes the application of skills in those areas of practice where the need for social workers in the next decade will be the greatest in the State of California. The graduate program has been fully accredited by the national Commission on Accreditation of the Council on Social Work Education since 1973.

For more information, see the department website at http://www.sjsu.edu/socialwork/.

Admissions Requirements

University Admissions Requirements
All graduate applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply. Candidates must meet all university-level admissions requirements. Additional information regarding university graduate admissions requirements may be found on the catalog web page.

Program Admissions Requirements
In addition to these general requirements established by the university, applicants for admission for the Master’s of Social Work degree must demonstrate a commitment to social work goals either by having completed undergraduate social work education, or by holding a baccalaureate in a related field and having significant experience, and/or personal involvement with social issues as they relate to various marginalized groups and communities.

To be admitted to the School of Social Work, an applicant must first complete the graduate application for admission to the University through calstate.edu/apply. The applicant then submit a separate application to the MSW program which includes:

a. A personal statement describing the applicant’s interest in the field and professional goals.

b. Three recommendations from professionals in the field or former professors who can testify to the applicant’s ability to succeed in a graduate-level academic program and his or her suitability to meet the challenges of the profession.

c. A description of all social work-related experience (paid, internship and/or volunteer).

d. A sample of the applicant’s best writing, i.e., a paper written for an upper-division or graduate-level class, technical report, or other example of academic or professional written work.

Applications to the Master’s in Social Work program and all supporting materials must be sent directly to the School of Social Work for review and recommendation by the MSW Program Admissions Committee.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirement webpage at GAPE.

Requirements for Conditionally Classified Standing
An applicant who does not meet all requirements for admission in classified standing for the Master’s in Social Work may be admitted into the program on a conditionally classified basis. The MSW Program Admissions Committee may consider applicants who possess strong or considerable work experience and who can by additional preparation remedy minor academic deficiencies. Such admissions will be conditional upon completion of specific courses listed by the graduate advisor on the admission notification.

Requirements for Advancement to Candidacy
Students must complete all university requirements for advancement to candidacy for the master’s degree as outlined in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website.

The student will consult with the MSW graduate advisor to complete a petition for advancement to candidacy. The petition includes an official plan of study listing all courses needed to complete the requirements for the degree. The plan of study must be approved by the MSW Graduate Advisor and then by the Office of Graduate Admissions and Program Evaluations (GAPE), which notifies the student of advancement to candidacy.

The student must also demonstrate aptitude for advanced study in social work, as measured by successful completion of the Foundation Year of study, instructor appraisals, and/or evaluation of previous academic work (i.e., applicable transfer units or course substitutions).

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

MSW - Graduation Requirements
The School of Social Work offers an On-Campus MSW Program and an Online/Hybrid MSW Program
On-Campus MSW Program
All students in the Master’s of Social Work program must complete a total of 60 semester units of study in social work with a minimum cumulative grade point average of 3.0 overall. This includes two years (1,200 hours) of field internship in a social agency or community setting selected and approved by the MSW Field Education Committee. The On-Campus MSW Program offers a Two-Year/Full-Time and Three-Year/Part-Time plan of study. The Two-Year Plan requires a full-time commitment to the program. The Three-Year plan is designed for working professionals. It includes two years of field practicum and coursework spread over three academic years, with many courses taught in the evening and on weekends. Both plans have identical course requirements for completing the degree.

To assist matriculated students in progressing more rapidly toward their MSW degree and to increase accessibility to the course curriculum for both Two-Year/Full-Time and Three-Year/Part-Time students, the MSW Program sometimes offers courses during the summer and winter terms when the budget allows for this. The number and type of courses are dependent upon student interest and faculty resources.

For detailed information on the program, see the School of Social Work “Masters of Social Work (MSW)” webpage: sjsu.edu/socialwork/prospectivestudents/msw

Culminating Experience: Project (Plan B)
Candidates for the degree complete a capstone project as part of their 60-unit degree requirement. This project is a complete research study on a social work-related topic.

Online/Hybrid MSW Program (Special Session Program)
The Online/Hybrid MSW Program is a two-year program that requires continuous part-time enrollment (i.e., two academic courses and a field education course concurrently through the calendar year). In this program, academic courses are completed online (with asynchronous sessions and synchronous sessions usually on weekday evenings), and field education is completed in-person. Note that the two Online/Hybrid MSW fields of practice are children, youth, and families; and health/mental health. The field of practice covering aging is not currently offered in the Online/Hybrid MSW Program. The Online/Hybrid MSW Program degree requirements and the social work competencies covered are the same as those of the On-Campus MSW Program.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Program Graduation Requirements
The general requirements for the course completion are as follows. Note that students in their Foundation Year take 4 units of both the SCWK 230 and SCWK 231 field courses. Students in their Advanced Year take 5 units of both the SCWK 232 and SCWK 233 field courses.

Special Session Program Information
Academic Programs offered through Special Session are operated by the College of Professional and Global Education (CPGE). Registration and enrollment in a Special Session must use the special session application form and will follow special session fee and course schedules. Note that regular session students seeking to enroll simultaneously in a special session course or program will trigger a separate and additional set of fees. This may require an additional enrollment appointment from the Registrar and it may have implications for financial aid status or requirements. Please visit the Special Session for more information.

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

This requirement is satisfied by passing SCWK 212 or 214 (both are required courses).

- MA, Science Education
- MA, Science Education with Single Subject Credential

Introduction
In concert with the College of Science, the Science Education program offers professional development opportunities for science teachers at all levels. We design and coordinate courses that support the preparation of science teachers in the areas of biology, chemistry, earth science, and physics. In cooperation with the College of Education and the Secondary Education Program, we oversee the single subject teacher credential program in science through advising, coursework offerings and student teacher supervision. In addition, we offer a master’s degree in Science Education and oversee the Science Education Resource Center (SERC), a unique resource center that houses science education materials available for checkout by our local teachers.
BA - Earth Science

This degree is listed with the Geology Department.
BA - Physics, Preparation for Teaching
This degree is listed with the Physics and Astronomy Department.

Minor - Science Content for Teaching

The science education minor is designed as a program of study that will allow students who are interested in becoming elementary and middle school teachers to satisfy the Introductory Science Authorization course work requirements of the California Commission on Teacher Credentialing.
MA - Science Education

The MA in Science Education is a flexible program designed for prospective and practicing K-12 science teachers, educators and specialists working in informal or outdoor education, community college science educators, and prospective science education PhD students. The curriculum is designed to augment and broaden the candidate’s knowledge of current advances in science education research, and connect these findings to best classroom practices.

For more information, please visit our website at www.sjsu.edu/scied/academic_programs/masters

Qualified students who have earned a multiple or single-subject credential at San José State University may apply up to 9 units of approved credential coursework from the College of Education and 3 units of approved credential coursework from the College of Science to the MA Science Education degree. Students who earned their credential elsewhere may transfer up to 9 units of completed post-graduate coursework to the MA Science Education program at the discretion of the Science Education Graduate Coordinator.

Admissions Requirements

Minimum requirements for admission to the Graduate Division are outlined in this catalog. In addition, classified standing requires an undergraduate major with a grade point average of 2.75.

- demonstrated subject-matter competency in science, either through a baccalaureate degree in science or by passing the Science Subtests I and II (test codes 118 and 119) of the California Subject Examinations for Teachers (CSET) and one Specialized Science CSET in either biology (120 or 124), chemistry (121 or 125), geoscience (122 or 126) or physics (123 or 127).

- evidence of appropriate goal(s) and commitment to graduate-level study as demonstrated by a personal statement written by the applicant and letters of recommendation from two or more persons qualified to judge the applicant’s potential as a graduate student.

- a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at CAPE, if the applicant is from a country in which the native language is not English.

- approval of the graduate advisor and/or graduate committee.

Requirements for Advancement to Graduate Candidacy

The student must satisfy general university requirements for advancement to candidacy as outlined in detail in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the Graduation Writing Assessment Requirement (GWAR), described in this catalog. SCED 220 meets the GWAR requirement and is also a required course in this program, so no additional classes beyond the core courses for the MA - Science Education are needed to meet this requirement.

Requirements for Graduation

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Culminating Experience

Plan A (with Thesis)

This option requires a thesis in science education approved by a master’s committee of no fewer than three members. The thesis is credited under SCI 299 units. At the end of the program, the candidate must successfully deliver an oral seminar and defense of the thesis, cumulatively known as a culminating experience. The written thesis must be submitted to the master’s advisor and master’s committee for approval before being submitted to the Office of Graduate Studies for university approval. Note: this is an uncommon choice for our graduate students.

Plan B (with Project)

This option requires a project related to science education approved by a master’s committee of no fewer than three members. The project is credited under SCED 298 units. At the end of the program, the candidate must successfully deliver an oral seminar and defense of the project, cumulatively known as a culminating experience. The written report of the project must be submitted to the master’s advisor and master’s committee. Note: the majority of our graduate students choose this path to graduation.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

This requirement is satisfied by passing SCED 220.

### Total Units Required

30

Elective courses must be planned in consultation with the Graduate Coordinator and Graduate Advisor. The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15. Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
MA - Science Education With Single Subject Credential

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html).

This requirement is satisfied by passing SCED 220.

Sociology and Interdisciplinary Social Sciences Department

College of Social Sciences

DUDLEY MOORHEAD HALL 241
408-924-5320

Professors
Maria Luisa Alaniz
Natalie Boero
Peter Chua
Hien Duc Do, Coordinator, Asian American Studies Program
Carlos Eduardo Garcia, Chair
Shahin Gerami
Amy Leisenring
Susan Bell Murray, Director of Graduate Studies
Scott Myers-Lipton
Alexander Yamato

Associate Professors
William Armaline
Tanya Bakhru, Coordinator, Women, Gender, and Sexuality Studies Program

Assistant Professors
Faustina DuCros
Yvonne Y. Kwan
Joanne Rondilla
Preston O. Rudy
Elizabeth Sweet
Megan Thiele

Curricula
⦁ BA, Sociology
⦁ BA, Sociology, Concentration in Community Change
⦁ BA, Sociology, Concentration in Race and Ethnic Studies
⦁ BA, Sociology, Concentration in Social Interaction
⦁ BA, Sociology, Concentration in Women, Gender and Sexuality Studies
⦁ Minor, Asian American Studies
⦁ Minor, Sociology
⦁ Minor, Sociology of Education
⦁ Minor, Women, Gender and Sexuality Studies
⦁ MA, Sociology (Not Accepting Students)

Introduction
The Department of Sociology and Interdisciplinary Social Sciences educates students about the social processes that create, maintain, and transform our society. The major uses sociological foundations and applications as well as interdisciplinary approaches to the study of society and in teacher education training. Sociologists analyze how social institutions and social structures such as the economy, politics, education, the family, mass media, and the criminal justice system affect individuals in society. The major provides students with the skills and knowledge to navigate the social, political, economic, historical, and cultural issues that build and sustain effective leadership in our complex global society. The teacher preparation program is designed to ensure that teachers will excel in classrooms that are increasingly heterogeneous in terms of race and ethnicity.

We have two major degree program tracks: Sociology, Sociology with Concentrations (Community Change; Race and Ethnic Studies; Social Interaction; Women, Gender and Sexuality Studies); Social Science Teacher Preparation (Multiple and Single Subject). The department offers several minor courses of study: Asian American Studies, Sociology, Sociology of Education, and Women, Gender and Sexuality Studies. These degree programs lead to careers in education, government and public policy, criminal justice, nonprofit organizations, marketing research, human resource management, social work, and other areas.
BA - Sociology

The BA in sociology educates students about social processes that create, maintain, and transform social institutions and social identities. Sociology provides a framework for understanding social behavior in groups, social change and inequality in society, and solutions to social problems. Analytical and research skills speak to the needs of a changing world. The degree offers students the widest flexibility in terms of future career choices.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

BA - Sociology, Concentration in Social Interaction

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

University Graduation Requirements

<table>
<thead>
<tr>
<th>Core Lower Division General Education</th>
<th>27</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 39 units required by the university, 12 units may be satisfied by coursework outlined below. Courses that meet GE Areas A1, A2, A3 or B4 must be passed with a “C-” or better to meet the requirement. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

NOTE: STUDENTS WHO HAVE COMPLETED THE ADT TRANSFER DEGREE (UNDER SB 1440) FOR THIS MAJOR WILL HAVE COMPLETED ALL LOWER DIVISION GE REQUIREMENTS AND SHOULD FOLLOW THE 60 UNIT GUARANTEE ROADMAP. MEET WITH AN ADVISOR PRIOR TO REGISTERING FOR YOUR FIRST SEMESTER FOR THE 60 UNIT ROADMAP OR SPECIFIC QUESTIONS.

<table>
<thead>
<tr>
<th>Upper Division General Education</th>
<th>6</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 9 units required by the university, 3 units may be satisfied by coursework outlined below. Consult with major advisor for details.</td>
<td></td>
</tr>
</tbody>
</table>

American Institutions

The 6 units of American Institutions (US123) coursework shown below also fulfills GE Areas D2 and D3. Other courses meet the American Institutions requirement, but may not include additional GE areas. The American Studies (AMS 1A/B) and Humanities Honors (HUM 1A/B, 2A/B) programs both offer larger integrated packages that meet this requirement. Consult with major advisor for details.

Courses that meet General Education/American Institution requirements are noted with area designation for required area.

For Legend please see page 2
## Minor - Sociology

The minor in sociology complements a large number of majors including any of the social sciences, business, journalism, radio and TV, child development, justice studies, kinesiology, education, social work and others. SOCI 1 and any other five sociology courses, at least three of which must be upper division = 18 total semester units required for the minor.

### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

MA - Sociology (Not Accepting Students)

Admissions Requirements
The Department of Sociology and Interdisciplinary Social Sciences at San José State University offers a General MA Degree in Sociology. The program is designed to prepare students for entry into PhD programs and to provide skills and training necessary for employment as professional sociologists and other related occupations. We are looking for students who are curious about the social world, academically dedicated, and committed to the examination of society. Information about the program can be found on the department website: sjusu.edu/siss/academics/grad/index.html

Admissions Requirements
Applicants must meet all of the university admission requirements as established by the university catalog. The Department of Sociology and Interdisciplinary Social Sciences sets criteria for admission into the Sociology Master of Arts Program that are higher than the base standards established by the university. The requirements of the Department of Sociology and Interdisciplinary Social Sciences are as follows:

- An earned baccalaureate at an accredited college or university with a grade point average of 3.0 (on a 4-point scale);
- Completion of the following prerequisite coursework with a grade of “B” or better: sociological theory (SOCI 101 or equivalent), research methods (SOCI 104 or equivalent), and social science statistics (SOCI 15 or SOCI 102 or equivalent);
- An approximately 1,000-word statement of purpose discussing the applicant’s purpose for pursuing an MA degree in Sociology, the applicant’s areas of interest and previous academic/professional experience, and the applicant’s career goals;
- Two letters of recommendation from faculty members who can assess the applicant’s potential for graduate level work in Sociology. In certain cases, one letter may be from an employer who can attest to the applicant’s ability and potential for graduate work; and
- A writing sample that consists of a 6- to 10-page paper (or portion of a paper) that highlights the applicant’s writing ability and analytical skills.

Depending on whether or not they have completed the prerequisite requirements, applicants can be admitted in either classified or conditionally classified standing. Students admitted in conditionally classified standing will need to complete any missing prerequisite courses and pass them with a grade of “B” or better within 2 semesters of being admitted. Students who do not do meet this requirement will be disqualified from the program.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

Requirements for Advancement to Graduate Candidacy
After completing a minimum of 9 units of letter-graded instruction at the graduate level (with at least a “B” average), students may apply to candidacy. Additionally, admission to candidacy requires:

- An approved program of study consisting of 30 units, developed in consultation with the graduate advisor and in conformity with university and departmental requirements; and
- Completion of the Graduation Writing Assessment Requirement (GWAR). The university requires that all graduate students complete the GWAR as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at http://www.sjsu.edu/gape.

Further requirements of the department for advancement to candidacy include submission of a declaration of a plan of study to the department’s Graduate Committee, detailing the student’s intent to complete either a special study project (SOCI 298) or a thesis (SOCI 299). If the plan is deemed satisfactory, the student will be advanced to candidacy.

Requirements for Graduation

University Graduation Requirements
Students must complete all residency, curriculum, unit, CPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Department Graduation Requirements
Requirements for the MA in Sociology include 30 units of graduate level course work. All students are required to complete SOCI 200, SOCI 201, SOCI 204, and SOCI 205 with a grade of “B” or better. With approval of the department’s graduate coordinator, up to 9 units of upper-division undergraduate course work in Sociology, graduate-level non-sociology course work, or a combination of the two, may count toward the total 30-unit requirement.
Culminating Experience

Plan A (Thesis)

Students selecting the thesis option must demonstrate research and writing competency and show the ability to conduct independent research. Upon successful completion of the four required core courses and after receiving approval from the Graduate Committee for the declared program of study, the student selects a thesis committee consisting of at least three members, two of whom must be from the faculty in the Sociology Department. The chair of the committee must also be a tenured or tenure-track faculty member in the department. The student may enroll in up to 6 units of thesis/research hours (SOCI 299) with the professor designated as chair of the committee. The student must successfully pass a final oral defense of the thesis and the thesis must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines.

Plan B (Project)

After the successful completion of the four required core courses and after receiving approval from the graduate committee for the declared program of study, the student enrolls in 3 units of SOCI 298 with the professor who is selected as the student’s advisor. The Project option involves a written paper that investigates or analyzes some facet of a social problem; the exact nature and scope of the project is determined by the student in consultation with his or her advisor.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see [http://info.sjsu.edu/gcw.html](http://info.sjsu.edu/gcw.html). This requirement is satisfied by passing SOCI 201.

Total Units Required

<table>
<thead>
<tr>
<th>30</th>
</tr>
</thead>
</table>

Elective courses must be planned in consultation with the Graduate Coordinator.

In all plans, students may have only 12 units of C/NC courses.

The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.

Curricula
- BS, Industrial Technology, Concentration in Computer Network System Management
- BS, Industrial Technology, Concentration in Manufacturing Systems
- Minor, Electronics
- Minor, Industrial Technology
- Minor, Manufacturing
- MS, Quality Assurance

Introduction
Choose a career in applied engineering design and management focused on green operations and sustainable manufacturing or in the dynamic, changing field of computer electronics and network technology. Two undergraduate Industrial Technology programs, accredited by the Association for Technology Management and Applied Engineering (www.ATMAE.org), are offered by the Department of Aviation and Technology: a bachelor’s degree with a concentration in Computer Electronics and Network Technology (CENT) and a bachelor’s degree with a concentration in Manufacturing Systems (sustainable manufacturing). The curriculum also prepares students who are interested in obtaining single subject teaching credentials in Industrial Technology Education in order to pursue careers as public school teachers and industry trainers. The Department also offers graduate work leading to the Master of Science in Quality Assurance (this program is currently not accepting students).
BS - Industrial Technology, Concentration in Computer Network System Management

The Bachelor of Science in Industrial Technology with a concentration in Computer Network System Management (CNSM) is designed to prepare graduates for the ever increasing employment opportunities in the field of Computer Network Systems and Management. You will gain knowledge, skills, and practical experiences in the Internet of Things (IoT), network theory and administration, wireless communication, network security and prevention management, and cyber security management.

The computer network professional plans for implementation of systems, maintains the software and hardware, monitors the system for potential disturbances, analyzes problems, and develops plans for potential solutions. A computer network specialist professional is a problem solver who assures the network system is operational, secure, and protected at all times against cyber-attacks.

Computer and networking professionals are employed to facilitate the exchange and use of data in an organization in furtherance of organization goals. They also protect individuals, companies, and government organizations and their information throughout the enterprise. This requires that such professionals be knowledgeable about and familiar with constantly changing technologies and security processes. The major priority of the computer networking specialist professional is the day-to-day support that keeps the network functioning and secure. Graduates of the BSIT in Computer Network System Management will be able to:

1. Demonstrate strong communication, critical thinking, and interpersonal skills
2. Use skills in team development, dynamics, and management to work as team players
3. Demonstrate ethical behavior and concern for colleagues, society, and the environment
4. Demonstrate leadership skills for a technology professional
5. Implement and manage computer and network systems
6. Solve problems related to daily interruptions of information flow
7. Design and interface components for connected products
8. Manage databases and cloud computing systems and services
9. Implement and manage Internet of Things (IoT) systems
10. Apply cybersecurity techniques to protect networks from attacks

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Major Exceptions

This degree program meets certain University Requirements through approved major modifications. Please see the Major Exceptions area in the Policy and Procedures section of this catalog to identify the specific adjustments for this degree program or contact your major advisor for more details.

Major-Specific Graduation Requirements

All courses in the Preparation and Required in the Major (all courses in preparation, core, and concentration) must be completed with a grade of “C- or better”.

BS - Industrial Technology, Concentration in Manufacturing Systems

The Bachelor of Science in Industrial Technology with a concentration in Manufacturing Systems is designed to prepare students for technical and management careers in business and industry. Manufacturing Systems prepares you for a career in manufacturing design and management with a special focus on green operations and sustainable manufacturing. You will gain knowledge, skills, and practical experiences in innovative manufacturing processes and management, green product design, computer integrated manufacturing, sustainable manufacturing practices, robotics and control systems, and computer aided manufacturing.

This dynamic and expanding field applies computer design tools and other advanced technologies to the solving of problems in manufacturing systems, computer aided design and manufacturing (CAD/CAM), and computer integrated manufacturing (CIM). A new, strong emphasis on green design practices and sustainable operations will add to your basic and advanced industrial manufacturing design knowledge. Graduates of the BSIT in Manufacturing Systems will be able to:

1. Use skills in the planning, design, and implementation of sustainable manufacturing processes.
2. Implement Green Design solutions to industrial and consumer product design challenges.
3. Use understanding of the product life cycle and the management of product manufacturing to direct sustainable operations in industry and business.
4. Design and plan sustainable and green industrial facilities in conformance with LEEDS and other environmental standards.
5. Select and operate computer numerical control and other machines for the production of consumer and commercial products.
6. Use knowledge of the uses, advantages, and disadvantages of current and evolving manufacturing techniques including laser machining, electrical discharge machining, water jet and abrasive water jet machining, and rapid prototyping in modern production systems.
7. Select, analyze and use polymers, composites and other materials in the design of manufactured products.
8. Apply the theory and methods of computer-integrated manufacturing (CIM), including the computer-aided design/computer-aided manufacturing (CAD/CAM) interface to industrial problems and settings.
9. Use the principles of production scheduling and planning in the management of the industrial environment.
10. Use robots and mechatronics for sustainable operations in a modern CIM environment.
11. Apply the latest methods for materials and production management including Just-in-Time (JIT), Materials Resource Planning (MRP), and Lean Manufacturing.
12. Integrate green design, sustainable manufacturing, and recyclable/reusable materials into the design and development of new products.
13. Apply the principles of Lean Manufacturing to manufacturing and soft systems.
14. Apply OSHA and NIOSH principles to facilities design and management.

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

MS - Quality Assurance

The Master of Science in Quality Assurance degree program prepares students to perform at the master’s level in the areas of Quality Systems development, Six-Sigma quality, and various quality system standards. The program emphasizes the acquisition of theoretical and analytical techniques in combination with management and communication skills. This program prepares students to earn globally-recognized Six-Sigma Certification through the American Society for Quality (ASQ).

Admissions Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply. Select the MS, Engineering (Special Session) program option. In the designated Statement of Purpose area, enter “Please redirect my application to the MS, Quality Assurance program.” Applicants must meet all university admission requirements. See the Graduate Admissions section of this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

The Department of Aviation and Technology admits students to the Master of Science in Quality Assurance program in Classified or Conditional Standing. Contact the department or see our admissions materials for specific application deadlines. For admission to classified standing the department requires the following:

1. A baccalaureate degree from an accredited academic institution in a technical or scientific discipline. Individuals from non-technical disciplines who demonstrate exceptional promise may be conditionally admitted to the graduate program;
2. Transcripts from an accredited academic institution which verify a minimum grade point average of 3.0 in the last 60 upper division university units;
3. Evidence of written and oral communication skills essential to meet the demands of graduate-level study and research. A well-written personal statement is often used for partial verification of these competencies; this statement should discuss the applicant’s career plans and make note of how the master's degree will enhance career objectives; and
4. Foreign students must present a TOEFL score of at least 550.

Requirement for Admission to Conditionally Classified Standing

Applicants from non-technical disciplines may be conditionally admitted to the graduate program pending completion of additional undergraduate course work as prescribed by the program graduate coordinator. Students who are conditionally classified may seek admission to classified standing only after completion of nine units of graduate level course work with a minimum grade point average of 3.0. The individual admission letter will explain required terms and conditions for attaining Classified standing.

Requirements for Admission to Candidacy

General university requirements for admission to candidacy for the Master of Science degree are outlined in the Academic Regulations section of this catalog. After successfully completing a minimum of 12 graduate units, with a minimum grade point average of 3.0, and satisfied the university GWAR, students must finalize their programs of study with the guidance of the Program’s Graduate Advisor.

The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. Successfully passing Tech 200 course meets the GWAR requirement.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, GPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

In consultation with the department graduate coordinator, the candidate will develop and pursue a program of study. The candidate must successfully complete all requirements of the selected plan including the course work specified in the Master’s Degree Approval Program.

Culminating Experience

Students choose a Plan A (Thesis) or Plan B (Project) option as their program culminating experience. Both options require a précis presentation prior to submission of the graduate proposal (TECH 298 or 299). Each précis shall include the following: An introduction, a literature review, a statement of the problem, research questions or hypothesis, and a methodology. Students must arrange the date of the précis presentation with the graduate coordinator and with reference to the program Deadlines and Due Dates sheet.
Plan A (Thesis)
Students opting to complete a thesis enroll in three units of TECH 299. They must secure the commitment of three faculty members of the department, college or university, two of whom must be members of the faculty (permanent or part-time), to serve as members of the student’s Plan A (thesis) committee, with one permanent faculty member agreeing to serve as chair. The committee must approve the student’s thesis proposal for the master’s degree no later than one semester prior to the end of the semester preceding the one in which enrollment in the final thesis course is planned. The thesis will include original research on a topic approved by the thesis committee, and must meet university requirements as stipulated in this catalog and in the SJSU Master’s Thesis and Doctoral Dissertation Guidelines. It will undergo a thorough review and revision process under the guidance of the candidate’s thesis committee chair with the assistance of the thesis committee. In addition, the candidate for the MS degree must successfully pass a final oral defense of the thesis. This includes a one-hour professional presentation with applicable slides outlining the work performed including an introduction, background and review of the relevant previous published literature, methodology, analysis/experiment/simulation, results and discussion, followed by conclusion(s).

Plan B (Project)
Students opting to complete a project enroll in three units of TECH 298. They must secure the commitment of three faculty members of the department, college or university, two of whom must be members of the faculty (permanent or part-time), to serve as members of the student’s Plan B (Project) committee, with one permanent faculty member agreeing to serve as chair. The committee must approve the student’s project proposal for the master’s degree no later than one semester prior to the end of the semester preceding the one in which enrollment in the final project course is planned. The project will include original research on a topic approved by the project committee. It will undergo a thorough review and revision process under the guidance of the candidate’s project committee chair and with the assistance of the committee members. In addition, the candidate for the MS degree must successfully pass a final oral defense of the project. This includes a one-hour professional presentation with applicable slides outlining the work performed including an introduction, background and review of the relevant previous published literature, methodology, analysis/experiment/simulation, results and discussion, followed by conclusion(s).

Graduation Writing Assessment Requirement
At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Elective courses must be planned in consultation with the Graduate Advisor.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU Cumulative grade point averages of 3.0 in order to graduate.
Undergraduate Studies

Curricula
- BA, Special Major
- BS, Special Major

Introduction
The courses offered by the Graduate and Undergraduate Programs Office under University Studies (UNVS) promote leadership, integrated and applied interdisciplinary academic experiences for students.

The office also sponsors undergraduate degrees as a Special Major, which is an individually designed course of study leading to a BA or BS degree. The Special Major is designed for situations in which an existing university-level SJSU undergraduate degree major does not adequately accommodate academic professional aims. Students who complete a Special Major shall be able to demonstrate the characteristics of “intentional learners” who can adapt to new environments, integrate knowledge from different sources, and continue learning throughout their life.

Special Major
The Special Major is an individually designed, interdisciplinary course of study leading to a BA or BS that gives a student who has a specific educational objective the opportunity to accomplish that goal. It is not to be used to bypass normal graduation requirements or projected programs of the University, nor to substitute for a major in which a student is having academic difficulty.

The proposed course of study must be a coherent program organized around an academic theme. Students who complete a Special Major shall be able to demonstrate: "the ability to analyze an issue or problem, integrating at least two disciplinary perspectives." In addition, students identify two or more student learning outcomes related to their specific areas of study in consultation with a major faculty advisor. They demonstrate their attainment of the learning outcomes through a portfolio or senior project completed in a capstone course.

Applicants must have both a cumulative and SJSU GPA of at least 2.75 and have sixty units (upper division standing) and at least one year of academic work still to be completed to meet minimum degree requirements. Special Majors are considered on a case-by-case basis. Approval is based on the academic merit of the proposed course of study, the applicant’s proposed rationale and potential for successful completion of the program, and the ability of the university to support the proposed program. Students apply for consideration for the Special Major through the Office of Graduate and Undergraduate Programs, ADM 159. For more information visit http://www.sjsu.edu/gup/docs/UGS/2016-Present-SpecialMajor_Guidelines.pdf

- Certificate, Real Estate Development
- Certificate, Transportation and Land Use Planning
- MUP, Urban Planning

Introduction
Urban planners manage and guide critical issues of growth and change while promoting environmental and social balance. Careers for urban and regional planners exist in city, county, regional, state and national government, private consulting firms, nonprofit organizations, and research and academic institutions.

SJSU's Department of Urban and Regional Planning is uniquely poised to educate planning professionals and generate innovative research, given its location in downtown San José, the largest city in Northern California and the capital of Silicon Valley. The department takes advantage of its location in a rapidly changing and socially complex region by collaborating with local planning agencies and community-based organizations. Faculty and students engage in public service projects designed to assist local communities in addressing topical planning issues, while also providing students with real-world professional experience.

We offer an undergraduate minor in urban studies, graduate certificate programs, and a Master of Urban Planning (MUP) degree.
### Minor - Urban Studies

The minor in Urban Studies is a professionally oriented program designed to: 1) familiarize students with the social, economic, political and physical aspects of the major urban issues of our time; and 2) introduce students to basic professional skills and strategies used to improve our urban environment.

#### University Graduation Requirements

To be awarded a minor, at least 12 units of coursework must be completely distinct and separate from the coursework in the major (University Policy S16-4).

Certificates

The Department of Urban and Regional Planning at San José State University offers six certificate programs which lead to specialization in Affordable Housing and Community Development Finance, Applications of Technology in Planning, Community Design and Development, Environmental Planning, Real Estate Development, and Transportation and Land Use Planning.

The certificate programs are open to graduate degree students enrolled in any program at San José State University (SJSU). Members of the public who hold an undergraduate degree may also complete any of the graduate certificate programs through SJSU’s Open University. To earn a certificate, students must complete a total of nine to sixteen units of course work, depending on the certificate. If course work is taken through Open University, the maximum number of units allowed by SJSU policy may be applied towards the MUP degree.

In addition, the student must:

- Maintain a minimum GPA of 3.0 over all semester credits of course work applied towards the certificate.
- Earn a minimum grade of “B Minus” in every course applied towards the certificate.
- Complete all the course work within seven years.

For detailed information on these programs, see the department’s website at [http://www.sjsu.edu/urbanplanning/](http://www.sjsu.edu/urbanplanning/) or contact the department’s Graduate Student Advisor.
Certificate - Affordable Housing and Community Development Finance

In this certificate program, students gain domain-specific knowledge as well as a deep understanding of interrelationships between urban & regional development, housing markets (especially affordable housing market), and financing of public infrastructure and services.

</table>

Total Units Required: 13
## Certificate - Transportation and Land Use Planning

In this certificate program, students learn the principles of transportation and land-use planning at the location and regional levels. In today's rapidly growing regions, planners recognize that transportation and land use planning are intricately connected and must be planned together to allow residents and freight carriers to access destinations quickly and efficiently, improve accessibility options for residents who cannot or choose not to drive, and build economically and environmentally sustainable communities.

MUP - Master of Urban Planning

The MUP program trains skilled professionals who graduate with a strong education in general planning practice and theory as well as specialized training in planning sub-fields. The program allows students to develop professional skills in an area of specialization such as Affordable Housing and Community Development Finance, Applications of Technology in Planning, Community Design and Development, Environmental Planning, Real Estate Development, or Transportation and Land Use Planning.

Graduates leave the program prepared with practical skills and theoretical knowledge that they can employ in jobs working to improve the quality of life and economic opportunity for all residents of urban regions as well as improving the quality of the natural environment.

A special mission of the program is to provide planning education opportunities for a diverse student population, including working students who prefer to attend the program on a part-time basis.

The MUP is an accredited professional degree program nationally recognized by the Planning Accreditation Board.

Information about the program and important dates can be obtained at the department website: www.sjsu.edu/urbanplanning.

Admissions Requirements

Candidates must meet all the university admissions requirements. To complete your application, you must submit materials to two distinct bodies: the SJSU Graduate Admissions and Program Evaluation (GAPE) Office through the online CSU application process and the Urban and Regional Planning Admissions Committee. Each has its own timetable. Approval by both offices is necessary to gain admission to the program. Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE.

1. Materials to be submitted to the SJSU Graduate Admissions and Program Evaluations Office
   - Fill out the on-line application form. The Master of Urban Planning (MUP) program at SJSU is listed on the online application form under Urban Planning.
   - Domestic Students - Submit one set of official transcripts from all higher educational institutions attended (even those where you did not get a degree) to the Graduate Admissions Office. Do not send transcripts to the Department of Urban & Regional Planning.
   - International Students - International students are advised to closely follow guidelines for submitting transcripts and any other supporting documents, including demonstrating competence in English, available on the Graduate Admissions & Program Evaluation website.

2. Materials to be submitted to the Department of Urban and Regional Planning (Admissions Committee)
   - Three original, signed letters of recommendation that come from either university instructors who taught you or supervisors who managed you in paid or volunteer work. It is highly recommended that at least one letter come from a university instructor. If this is not possible, ask your letter writers to include an evaluation of your writing and analysis skills. These letters must be submitted to the Urban and Regional Planning Admissions Committee, not to the SJSU GAPE Office. The department will accept only original, signed letters; faxed or emailed letters will not be accepted.
   - A short biographical statement of purpose (approximately 1.5 single-spaced typed pages) that indicates how a Master of Urban Planning degree will help you to achieve your career objectives. This can be the same statement as included on your online application.
   - Graduate Record Examination (GRE) scores are required for applicants with a GPA below 3.0. Original scores from the testing office must be submitted in a sealed, unopened envelope or sent directly by ETS (the code for SJSU is 4687).

Requirements for Advancement to Candidacy

Students must complete all university requirements for advancement to candidacy for the master's degree as outlined in the Graduate Policies and Procedures section of this catalog. Candidacy includes successful completion of the Graduation Writing Assessment Requirement (GWAR). For graduate courses that meet the GWAR, refer to the GWAR Course List on the College of Graduate Studies website. In addition, candidates must pass the Writing Skills Test (WST) at SJSU. Candidates with a previous degree from a California State University campus are exempt from the WST requirement.

Requirements for Graduation

University Graduation Requirements

Students must complete all residency, curriculum, unit, CPA, and culminating experience requirements as outlined in the Graduation Requirements section of the Graduate Policies and Procedures.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Catalog Contents

Electives

Sixteen units of coursework chosen from Urban and Regional Planning courses. Students are strongly encouraged to take at least 12 units from within a single MUP specialization. Electives from outside the Urban & Regional Planning Department (either upper-division undergraduate or graduate courses) may be taken, but must first be approved by the Graduate Advisor.

URBP 241. Planning Sustainable Cities ................................................................. 2
URBP 275G. Geographic Information Systems Overview: Urban Planning Applications ................................................................. 1
URBP 295. Capstone Studio: Community Planning ........................................... 6
URBP 297P. Planning Report Preliminary Proposal ........................................... 1

Total Units Required 48

Culminating Experience (Plan B only)

URBP 298A. Special Study: Planning Report ......................................................... 3
URBP 298B. Special Study: Planning Report Completion ..................................... 3

Students must earn a “B” or better grade in 100-level classes in order for the department to give credit for those classes towards the MUP degree.

URBP 298A and URBP 298B are graded on a Credit/No credit (CR/NC) basis. Receiving an NC in URBP 298A or URBP 298B has the following implications:

- An “NC” is the equivalent of failing the class. The “NC” will remain permanently on the student’s record, although the student GPA is not affected by the “NC.”.
- Students who receive an “NC” in URBP 298A or URBP 298B may enroll again in the class only if there is space available, with the department giving enrollment priority to students who meet the prerequisites and have not previously taken the class.
- Students who receive an “NC” in URBP 298A or URBP 298B will be placed on administrative-academic probation. To return to good standing, a student must re-enroll in the class and receive a grade of “CR.”.
- Students who receive a second “NC” in URBP 298A or URBP 298B will be disqualified from the MUP program.

The maximum number of upper-division undergraduate units that can be applied toward the master’s degree is 15.

Upon completion of the degree requirements, the student must have achieved minimum candidacy and SJSU cumulative grade point averages of 3.0 in order to graduate.
Women, Gender and Sexuality Studies

DUDLEY MOORHEAD HALL 241
408-924-5320

Curricula
⦁ BA, Sociology, Concentration in Women, Gender and Sexuality Studies
⦁ Minor, Women, Gender and Sexuality Studies

Introduction
The Women, Gender, and Sexuality Studies Program at San Jose State is committed to interdisciplinary scholarship and teaching based on global feminist frameworks. WGSS curriculum investigates how lives are shaped by gender and gender identity, race, class, sexuality, and nation. The program emphasizes the importance of understanding gender as integral to social and political structures of power. Students will obtain skills to cultivate critical thinking, cultivation of dialogue, coalition building, appreciation of diversity, and contribution to social change based on feminist frameworks. The goal of the WGSS program includes integrating the academic and experiential, thereby contributing to social change and justice.
BA - Sociology, Concentration in Women, Gender and Sexuality Studies
This degree is listed with the Sociology and Interdisciplinary Social Sciences Department.

Courses that meet General Education/American Institution requirements are noted with area designation for required area.

Introduction
Connect with the world. Study abroad. Become multilingual. Deepen your understanding of other cultures. Read great works of literature. The Department of World Languages and Literatures helps students communicate effectively and thrive in a global context. Our programs are multifaceted, our faculty and students are multicultural, our curriculum is international.

We offer majors and minors in four of the most widely spoken languages in the world: Mandarin Chinese, Japanese, French, and Spanish, and an M.A. program in Spanish. We also offer language minors in International Business, Italian, Portuguese, German, and Latin American Studies, and a single subject teaching credential program in French, Japanese, Mandarin Chinese and Spanish.

We offer language and culture courses in Assyrian, Hebrew and Vietnamese, and classes in Greek and Latin. Our graduates work as teachers, executives, translators, interpreters, civil servants, journalists, and hold many other occupations in global business and finance.

Proficiency Examination
A proficiency examination in the language is required of candidates for a teaching credential and is a prerequisite for enrollment in any graduate course.
BA - Chinese

University Graduation Requirements

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

4-Year Program Roadmap

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

### Total Units Required

120 units
**BA - French, Preparation for Teaching (Not Accepting Students)**

This major is designed for students interested in teaching world languages in high school or middle school. The following coursework satisfies San José State University's requirements for a BA in French. A minimum grade point average (GPA) criteria may be required for verification of subject matter competency. Completion of the program will not guarantee admission to the credential program. Like all other applicants, students must meet credential program standards and undergo screening for admission. See "Teaching: How to Become a Teacher in California" (see Teaching) for information on application and admission to credential programs.

**University Graduation Requirements**

Students must complete all residency, curriculum, unit, and GPA requirements as outlined in the Graduation Requirements section of the Policies and Procedures.

**4-Year Program Roadmap**

Students may find a roadmap for this program here. Roadmaps should be used in consultation with the catalog and your advisor to identify additional requirements for completing the major (for example, course grade minimums). Associate Transfer Degrees (ADT) pathway roadmaps can be found here.

Total Units Required 15-17
MA - Spanish

The Master of Arts Degree in Spanish offers students the opportunity to pursue studies in Hispanic literature, linguistics, and culture. The program prepares students for doctoral studies and for careers in the teaching of Spanish, bilingual education, international business, social and governmental services, and other related areas.

See the Department of World Languages and Literatures website for more information: www.sjsu.edu/wll

Admissions Requirements

University Admissions

Applicants must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply and meet all the university admission requirements. Applicants apply separately to the department to obtain admission into the MA, Spanish degree program. See the GAPE Graduate Admissions website and this Catalog for general information about graduate admissions at SJSU.

Applicants from countries in which the native language is not English must achieve a minimum English-language proficiency test score as indicated on the Graduate Program Test Requirements webpage at GAPE. For TOEFL Requirements, see the Policies and Procedures section, Graduate and Post-Baccalaureate Information in this Catalog.

Requirements for Admission to Classified Standing

Minimum requirements for admission to the Graduate Division are outlined in this catalog. In order to be admitted to classified standing in the M.A. program in Spanish, students should possess the following:

1. A bachelor’s degree (or its equivalent, as assessed by the department), with a major in Spanish, and including at least 15 units of upper division work in the major with a grade of “B” or better; and
2. Evidence of college-level proficiency in Spanish.

Requirements for Admission to Conditionally Classified Standing

A student may be admitted to conditionally classified standing if he or she meets minimum requirements for admission to the Graduate Division but does not fully meet requirements for Classified admission to the MA, Spanish program. The individual admission notification will explain required terms and conditions for attaining Classified standing.

Requirements for Admission to Candidacy for the MA - Spanish

Admission to candidacy requires favorable action by both the departmental graduate committee and the university graduate committee. All applicants meet institutional requirements as set forth in this catalog. The University requires that all graduate students complete the Graduation Writing Assessment Requirement (GWAR) as a condition for advancement to candidacy. Please refer to the SJSU catalog section titled “Graduation Writing Assessment Requirement” for details. For graduate courses that meet the GWAR, please refer to the Graduate Admissions and Program Evaluations website at www.sjsu.edu/gape.

Culminating Experience

Each candidate for the master’s degree must successfully complete a final comprehensive written examination.

Completing Requirements for the MA - Spanish

The minimum program for a Master of Arts in Spanish degree includes the following:

1. The 30 unit program for a Master of Spanish requires at least 18 semester units of 200-level courses. Included in these 30 units, students must take FORL 200, which satisfies the Graduation Writing Assessment Requirement (GWAR);
2. Up to 12 units of approved upper division (100-level) courses not used to meet a requirement for the BA degree in Spanish at San José State University may be taken in the Graduate Division to complete the minimum 30-unit program;
3. Final comprehensive examination conducted in Spanish; and
4. Demonstration of competence in written English.

Graduation Writing Assessment Requirement

At SJSU, students must pass the Graduation Writing Assessment Requirement (GWAR). For information on the GWAR, please see http://info.sjsu.edu/gcw.html.

Welcome to the listing for San José State University policies and procedures. This listing was created to organize important campus information that is critical to student success. Please suggest ways in which this section can better serve the SJSU community by contacting grad-undergrad-programs@sjsu.edu.
### Calendar - Fall 2019

#### APRIL 2019
- **Monday, April 1**: Fall 2019 Graduate Application for Candidacy Deadline
- **Monday, April 15**: Fall 2019 Enrollment appointments posted on MySJSU (for continuing students)
- **Fall 2019 Schedule of Classes goes live at info.sjsu.edu**

#### MAY 2019
- **Wednesday, May 1**: Frosh and Transfer Intent to Enroll deadline
- **Monday, May 27**: Memorial Day - campus closed

#### JUNE 2019
- **Monday, June 3**: Deadline to Clear Spring 2018 Incomplete Grades
- **Monday, June 10**: Fall 2019 Enrollment appointments posted on MySJSU (for newly admitted students)
  
  Academic standing posted on MySJSU
- **Saturday, June 15**: WST Exam
- **Monday, June 17**: Advance Registration for Fall 2019 for newly admitted students begins
- **Tuesday, June 18**: Frosh Orientation - Session 1
- **Thursday, June 20**: Frosh Orientation - Session 2

#### JULY 2019
- **Friday, June 28**: Deadline to submit all requested financial aid documents and to qualify for Fall 2019 tuition fee deferral

#### AUGUST 2019
- **Saturday, August 3**: Payment Due Date
- **Sunday, August 11**: International House opens to all residents
- **Thursday, August 15**: Graduate Student Orientation
- **Saturday, August 17**: On campus residence halls and apartments open
- **Sunday, August 18**: Fall 2019 Advance Registration closes at 11:59 pm
  
  Last day to withdraw for 100% refund of Fall 2019 fees
- **Monday, August 19 - Tuesday, August 20**: No registration activity on MySJSU

#### SEPTEMBER 2019
- **Monday, September 2**: Labor Day - Campus Closed
- **Tuesday, September 3**: Last day to Drop a Class without a "W" grade
- **Wednesday, September 4**: Payment Due Date

#### OCTOBER 2019
- **Friday, October 5**: Payment Due Date
- **Thursday, October 10**: Graduate Programs & Professional Fair
- **Saturday, October 19**: WST Exam

#### NOVEMBER 2019
- **Monday, November 11**: Veteran’s Day - campus closed
- **Friday, November 15**: Last day to submit late drop/withdrawal requests for Fall 2019
- **Wednesday, November 27**: Non-instructional holiday (no classes held)
- **Thursday - Friday, November 28 - 29**: Thanksgiving Holiday - campus closed

#### DECEMBER 2019
- **Monday, December 9**: Last day of instruction
- **Tuesday, December 10**: Study/Conference Day (no classes or exams)
## Final Exam Schedule - Fall 2019

Classes with meeting times other than those identified in the Final Examination Schedule, or which cannot be held at the scheduled time, should utilize the "Make-Up" period provided.

### Group I Classes

Group I classes are those classes which meet M, W, F, MTW, MWR, MTWF, MWRF, MW, WF, MWF, MF, WR, MT.

</tbody>
</table>

*Classes with start time between 1600 and 1725, which meet only once per week for more than two hours, will follow the same schedule as “Late Afternoon Classes.”

Classes with meeting times other than those identified in the Final Examination Schedule, or which cannot be examined at the scheduled time, should utilize the “Make-Up” period provided.
Late Afternoon Classes
Late afternoon and night classes meeting more than once per week should schedule their final exam on the earliest possible date. Example: final exam for ENGL 001A which meets on MWF from 17:30-18:45 should be scheduled on Wednesday, December 11 from 17:15-19:30 (not Monday, December 16).

<table>

Saturday Classes
All Saturday classes will administer final exams on Saturday, December 14, 2019, at the regularly scheduled class start time, for 2 hours and 15 minutes.

Online Classes
Online class final exams are to be administered during any of the following time periods
- Thursday, December 12: 1715-1930
- Thursday, December 12: 1945-2200
- Friday, December 13: 1715-1930
- Friday, December 13: 1945-2200
- Wednesday, December 18: All day

Make-Up
Any make-up examinations: Wednesday, December 18, 2019 All day

MATH 001, MATH 008, and MATH 019 Final Exam Schedule- Fall 2019
Note: These three courses administer common finals which do not follow the standard schedule for final exams. Questions should be addressed to the Department of Mathematics & Statistics.

Final Examination Policy

In accordance with University Policy S17-1, faculty members are required to have a culminating activity for their courses, which can include a final examination, a final research paper or project, a final creative work or performance, a final portfolio of work, or other appropriate assignment. Supervision, Internship and individual study courses are not required to have a culminating activity.

Time Frame for Culminating Activities:

In the case where there is to be a timed, sit down final examination or an online synchronous final, it must occur during the scheduled final examination time for that course. The required submission date and time for take-home examinations, final papers or other culminating activities must fall no earlier than the beginning of the scheduled final examination time for the course. Online asynchronous final exams are to be treated like take-home exams. Final exams shall not be given, nor culminating activities due, during regularly scheduled class periods or on “Study/Conference Day.” Supervision, Internship and individual study courses are not required to have a culminating activity.

Exceptions to Time Frame for Culminating Activities:

Exceptions for the above time frame are justified in the following circumstances:

- Performance courses in which it is impractical to examine each student individually in the time period assigned for final examinations; e.g. performance courses in theater arts, music, or athletics.
- Other such circumstances as approved by the chair with notification and rationale to be provided to the dean.

Circumstances in which students may request the rescheduling of a culminating activity:

a. A student may request the rescheduling of a culminating activity if there is a verifiable emergency.

b. A student may request the rescheduling of a culminating activity if three or more are scheduled/due within a 24-hour period. Requests must be made at least three weeks prior to the last class meeting of the semester.

- If one of the three or more culminating activities scheduled for the same day is a paper or project, the deadline for the paper/project will be moved to a mutually agreeable time within the final examination period.
- If three or more finals are scheduled on the same day, the student may request an alternative exam date and/or time from any one of the instructors.
- Final exam makeup day may be used for rescheduled exams.

c. Regarding a and b above: if a student and instructor are unable to reach agreement on rescheduling, the chair will first be consulted. If no agreement can be found through the chair, the dean (or designee) will be consulted.

d. Graduate students should refer to section on Master’s Examinations - Finals.

Oversight of Culminating Activities

The department chairperson will oversee culminating activities (examinations; portfolios; research or creative projects) in a manner that assures that the rules for culminating activities are followed. If a dispute arises, the dean (or designee) will be consulted.

Admission - Undergraduate Procedures and Policies

Admission - CSU Application Procedures and Policies for Undergraduate

Requirements for admission to San José State University are in accordance with Title 5, Chapter 1, Subchapter 3, of the California Code of Regulations. Complete information is available at www.calstate.edu/apply.

All CSU applications must be submitted online at www.calstate.edu/apply. An acknowledgement will be sent to the applicant when the online application has been submitted.

Importance of Filing Complete, Accurate, and Authentic Application Documents

San José State University advises prospective students that they must supply complete and accurate information on the application for admission, residency questionnaire, and financial aid forms. Further, applicants must, when requested, submit authentic and official transcripts of all previous academic work attempted. Failure to file complete, accurate, and authentic application documents may result in denial of admission, cancellation of registration or academic credit, suspension, or expulsion (Section 41301, Article 1.1, Title 5, California Code of Regulations).
Prospective students applying for part-time or full-time undergraduate programs of study must submit a completed undergraduate application. The $55 nonrefundable application fee should be paid on-line at the time of application via credit card, e-check, or PayPal and may not be transferred or used to apply to another term. An alternate major may be requested on the application if desired from the campus. The applications of persons denied admission to an impacted and/or closed campus may be redirected to another campus at no cost, but only if the applicant is CSU eligible. Upper Division Transfer applicants are required to complete a supplemental application to be considered for admission. More information can be found at sjsu.edu/admissions/impaction.

Admission - Impacted Programs

The CSU designates programs as impacted when more applications from CSU regularly eligible students are received in the initial filing period (October and November for fall terms and August for spring terms) than can be accommodated. Some programs are impacted at every campus where they are offered; others are impacted only at a few campuses. Candidates for admission must meet supplementary admission criteria if applying to an impacted program.

The CSU will announce during the fall filing period those campuses or programs that are impacted. Detailed information on campus and programs impaction will be available at www2.calstate.edu/attend/impaction-at-the-csu.

Campuses will communicate supplementary admission criteria for all impacted programs to high schools and community colleges in their application service area and will disseminate this information to the public through appropriate media. This information will also be published on the CSU campus websites and made available at www.calstate.edu.

Applicants must file applications for admission to an impacted program during the initial filing period. Applicants who wish to be considered for impacted programs at more than one campus should file an application at each campus for which they seek admission consideration.

Admission - Supplemental Criteria

Each campus with impacted programs or class-level admission categories uses supplementary admission criteria in screening applicants. Supplementary criteria may include rank-ordering of freshman applicants based on the CSU eligibility index or rank-ordering of transfer applicants based on verification of the Associate in arts for Transfer (AA-T) or Associate in Science Transfer (AS-T) degrees, the overall transfer grade point average (GPA), completion of specified prerequisite courses, and a combination of campus-developed criteria. Applicants for freshman admission to impacted campuses or programs are required to submit scores on either the SAT or the ACT, regardless of GPA. For fall admission, applicants should take tests as early as possible, but no later than November or December of the preceding year. Applicants who wish to be considered for admission to SJSU as an upper division transfer must complete a supplemental application. Details regarding the supplemental application process are posted to sjsu.edu/admissions/impaction.

The supplementary admission criteria used by individual campuses to screen applicants are made available by the campuses to all applicants seeking admission to an impacted program.

Admission - Application Filing Periods

Note: Not all terms/programs are open for admission.

Admission to San José State is competitive in all majors because SJSU continues to have more qualified applicants than available new student spaces. This situation is called “impaction” and it means that meeting the minimum California State University (CSU) requirements does not guarantee admission to SJSU. We will no longer have the enrollment capacity to accept all CSU eligible applicants, including some from local high schools and community colleges.

San José State gives preference in the competitive admission process to “local” applicants. For freshmen, you are considered a “local” applicant if you will graduate from a high school in Santa Clara County. For transfer applicants, you are considered a “local” applicant if you will earn the majority of your transferable units at a college located in Santa Clara or Santa Cruz county.

All applicants are strongly encouraged to apply to an alternative campus that offers your preferred major. If applying after the initial filing period, consult http://info.sjsu.edu for current information. Similar information is conveniently available at www.calstate.edu/apply.
Admission - Application Acknowledgment

About a week after applying at Cal State Apply, you will receive an email with your nine-digit SJSU ID included. This nine-digit number will be your primary university identification throughout your career at SJSU. Make sure the spam filters on your email account are set to accept email from @sjsu.edu.

For more information regarding the process go to www.sjsu.edu/admissions

Admission - Hardship Petitions

At the present time, because of severe budget limitations and the resulting campus-wide impaction, SJSU does not accept hardship petitions.

Admission - Notification

The Office of Undergraduate Admissions normally begins sending acceptance letters to applicants late February for admission to the fall semester and beginning in September for admission to the spring semester. Letters from departments or faculty do not constitute admission to the university.

Applicants are not admitted as students in the regular session of the university until they have received an official letter of admission from the Office of Undergraduate Admissions. In addition to the official letter of admission, International student applicants for F-1 and J-1 status will be issued the appropriate form I-20 or DS-2019 for immigration processing.

Admission - Selection

The university reserves the right to select its students and deny admission to the university or any of its programs as the university, in its sole discretion, determines appropriate based on an applicant’s suitability and the best interests of the university.

Admission - California Promise

The California Promise Program enables a specific number of campuses of the California State University (CSU) to establish pledge programs for entering first-time students who are both interested and able to complete baccalaureate degrees in four years. Many campuses have also established programs for students with Associate Degrees for Transfer from any California Community College to complete their baccalaureate degrees in two years. The program is limited to students who are residents of California.

Students who commit to enter either the four-year or two-year pledge will be given an early registration appointment for each state-supported enrollment period and will be provided with routine and thorough academic advisement. In order to remain in the program, students must meet with their advisors as prescribed, develop an enrollment plan, and complete 30 semester units or quarter equivalent units within each academic year, including summer. Students must fill out the SJSU pledge form, have a two or four-year plan in place in MyPlanner and started in Fall 2017 or later, form can be found at website: http://www.sjsu.edu/californiapromise/. Interested students entering the CSU in the fall 2019 term should contact the campus offices or visit www.calstate.edu/sas/california-promise.

Admissions - Other Applicants

Fully matriculated students enrolled at any CSU campus have access to courses at other CSU campuses on a space available basis unless those campuses/programs are impacted. This access is offered without students being required to be formally admitted to the host campus and in most cases without paying additional fees. Students should consult their home campus academic advisors to determine how such courses may apply to their specific degree programs before enrolling at the host campus.

CSU Fully Online Courses - Matriculated students in good standing may request enrollment in one course per term, offered by a CSU host campus. Enrollment requests will be granted based on available space, as well as completion of any stated prerequisites. Credit earned at the host campus is electronically reported to the student’s home campus to be included on the student’s transcript at the home campus.

CSU Visitor Enrollment - Matriculated students in good standing enrolled at one CSU campus may enroll at another CSU campus for one term. Credit earned at the host campus is reported at the student’s request to the home campus to be included on the student’s transcript at the home campus.

Intersystem Cross Enrollment - Matriculated CSU, UC, or community college students may enroll on a “space available” basis for one course per term at another CSU, UC, or community college and request that a transcript of record be sent to the home campus.
Admission - Appeal of Admission Decision

Section 89030.7 of the California Education Code requires that the CSU establishes specific requirements for appeal procedures for a denial of admission. Each CSU campus must publish appeal procedures for applicants denied admission to the University. The procedure is limited to addressing campus decisions to deny an applicant admission to the University.

Admissions appeal procedures must address the basis for appeals, provide 15 business days for an applicant to submit an appeal, stipulate a maximum of one appeal per academic term, provide specific contact information for the individual or office to which the appeal should be submitted, and indicate a time estimate for when the campus expects to respond to an appeal. The appeal procedures must be included in all denial of admission notifications to students, and must also be published on the campus website. For applicants please visit: [www.sjsu.edu/freshmanadmissions/have-applied/freshman-applicant/index.html](http://www.sjsu.edu/freshmanadmissions/have-applied/freshman-applicant/index.html). For transfer applicants, please visit: [www.sjsu.edu/transferadmissions/have-applied/transfer-applicant/index.html](http://www.sjsu.edu/transferadmissions/have-applied/transfer-applicant/index.html).

Admission - Orientation

Frosh Orientation

Orientation is an important first step to help new students learn to navigate SJSU, register for classes, and make the connections they need to be successful! These mandatory programs assist new students with making the transition to college. Orientation is delivered collaboratively by two SJSU departments, Academic Advising and Retention Services and New Student and Family Programs. These departments work with new students at Orientation and beyond by utilizing student leaders who are trained in issues of transition. At the program, professional staff advise students about required General Education courses, major courses, and prerequisites. Orientation staff who are knowledgeable about the campus will guide students and parents/guardians through experiences that educate them about campus programs and services.

Graduate Orientation

Graduate and Undergraduate Programs presents an all-day program designed to inform incoming graduate students of university-wide policies and resources beyond those of individual departments and colleges and to integrate students into the SJSU campus community. Attendance is not mandatory but is highly encouraged. New F-1 international students are required to report to the Office of International Student and Scholars Services (ISSS). Students must check-in with ISSS in order to meet U.S. government requirements.

Transfer Orientation

Transfer Orientation is a mandatory one-day program that acquaints students with the campus, introduces them to their colleges and major departments, and provides them with critical academic planning information. This program will be managed by New Student and Family Programs in collaboration with AARS and other campus offices.

Admission - Freshman Requirements

Generally, applicants will qualify for consideration for first-time freshman admission if they meet the following requirements:

1. Have graduated from high school, or have earned a Certificate of General Education Development (GED) or have passed the California High School Proficiency Examination;
2. Have a qualifiable minimum eligibility index (see Eligibility Index); and
3. Have completed with grades of C- or better each of the courses in the comprehensive pattern of college preparatory subject requirements also known as the “a-g” pattern (see “Subject Requirements”).

Admission - Freshmen - Eligibility Index

The eligibility index is the combination of the high school GPA and scores on either the ACT or the SAT. GP is based on grades earned in courses taken during the final three years of high school. Included in calculation of GPA are grades earned in all college preparatory “a-g” subject requirements, and bonus points for approved honors courses. Up to eight semesters of honors courses taken in the last three years of high school, including up to two approved courses taken in the tenth grade can be accepted. Each unit of A in an honors course will receive a total of 5 points; B, 4 points; and C, 3 points.

Note: CSU campuses will accept current and redesigned SAT scores (beginning in spring 2016) for admission eligibility. Applicants may submit scores from either test.
A CSU Eligibility Index can be calculated by multiplying a GPA by 800 and adding the total score on the SAT exam (mathematics and critical reading on the old SAT, or mathematics and Evidence-Based Reading and Writing on the new SAT). For students who took the ACT, multiply the GPA by 200 and add 10 times the ACT composite score. Persons who are California high school graduates (or residents of California for tuition purposes) need a minimum index of 2900 using the old SAT or 2950 using the new SAT or 694 using the ACT. The Eligibility Index Table illustrates several combinations of required test scores and averages. The university has no current plans to include the writing scores from either of the admission tests in the computation of the CSU Eligibility Index.

Freshmen applicants to programs in the College of Engineering will be ranked using a modified eligibility index that will weigh the math section of the SAT more heavily than the evidence-based reading and writing/critical reading section.

If you apply for admission before you graduate from high school, you should compute your GPA using grades earned in a-g courses completed after the 9th grade. Do not include grades you expect to earn in courses during the remainder of 12th grade.

Persons who neither graduated from a California high school nor are a resident of California for tuition purposes, need a minimum index of 3502 using the old SAT, 3570 using the new SAT or 842 using the ACT. Graduates of secondary schools in foreign countries must be judged to have academic preparation and abilities equivalent to applicants eligible under this section. An applicant with a grade point average of 3.00 or above (3.61 for nonresidents) is not required to submit test scores. However, all applicants for admission are urged to take the SAT or ACT and provide the scores of such tests to each CSU campus to which they seek admission. Campuses use these test results for advising and placement purposes and may require them for admission to impacted majors or programs. Impacted CSU campuses require SAT or ACT scores of all applicants for freshman admission.

### Eligibility Index Table for California High School Graduates or Residents of California

The CSU uses only the ACT score or the SAT mathematics and critical reading scores in its admission eligibility equation. The SAT or ACT writing scores are not currently used by CSU campuses.

GPA Below 2.00 does not qualify for regular admission.
Admission - Freshmen - Provisional Admissions

The offer of provisional admission is based on the academic information that applicants report on the CSU Apply application. All academic information must be verified before the admitted student will be allowed to enroll and register for classes at SJSU. The admission status will remain “provisional” until an official, final transcript(s) passes verification and confirmation of graduation from high school has been made. The offer of provisional admission to the academic plan (major) listed on the admission letter is only valid for the admit term and may not be deferred to another semester. In addition, it is not possible to change majors prior to enrollment at SJSU.

Applicants will qualify for regular (non-provisional) admission when the university verifies that they have graduated and received a high school diploma, have earned a qualifying minimum eligibility index, have completed the comprehensive pattern of college preparatory “a-g” subjects, and, if applying to an impacted program or campus, have met all supplementary criteria.

Admission - Freshmen - SAT and ACT Tests

The CSU uses only the ACT composite score, the mathematics and critical reading scores on the old SAT, or the mathematics and Evidence-Based Reading and Writing scores on the new SAT in its admission eligibility equation. The SAT or ACT writing scores are not currently used by CSU campuses.

Admission - Freshmen - Subject Requirements

The California State University requires that first-time freshman applicants complete, with grades of “C-” or better, a comprehensive pattern of college preparatory study totaling 15 units. A “unit” is one year of study in high school.

- 2 years of social science, including 1 year of U.S. history, or U.S. history and government.
- 4 years of English
- 3 years of math (algebra, geometry and intermediate algebra).
- 2 years of laboratory science (1 biological and 1 physical, both must include laboratory instruction).
- 2 years in the same foreign language (subject to waiver for applicants demonstrating equivalent competence).
- 1 year of visual and performing arts: art, dance, drama/theater, or music.
- 1 year of electives: selected from English, advanced mathematics, social science, history, laboratory science, foreign language, visual and performing arts or other courses approved and included on the UC/CSU “a-g” list.
Admission - Placement Measures for First-Year GE Written Communication and Mathematics/Quantitative Reasoning Courses

Freshman skills assessment and placement for general education written communication and mathematics/quantitative reasoning shall be based on systemwide skills assessment standards that include the Early Assessment Program/ Smarter Balanced Achievement Levels, ACT scores and/or SAT scores, high school coursework, high school GPA and math GPA.

Skills assessments are not a condition for admission to the CSU; they are a condition of enrollment. These skills assessments are designed to inform entering freshmen of placement in appropriate baccalaureate-level courses based on their skills and needs.

First-time freshmen in need of support as determined by the skills assessment will be placed in supported instruction. Supported instruction is designed to assist students in credit bearing courses. Students may also be required to participate in the Early Start Program. The Early Start Program gives students the opportunity to earn college credit in written communication and mathematics/quantitative reasoning the summer before their first term.

More information on supported instruction is found at www.sjsu.edu/supportedinstruction.

Assessments and Placement for GE Written Communication

Has Fulfilled the GE Subarea A2 Writing Requirement

The student has met the requirement via completion of one of the following:

Advanced Placement (AP) Test
- 3 or above: AP Language and Composition
- 3 or above: AP Composition and Literature

International Baccalaureate (IB) Exam
- 4 or above: IB Language A - Language and Literature (HL)
- 4 or above: IB Literature (HL)
- 4 or above: IB Language A1 (HL)

College Level Examination Program (CLEP)
- 50 or above: CLEP College Composition
- 50 or above: CLEP College Composition Modular

College Transfer Coursework
- Completed approved college course that satisfies CSU GE Area A2 (written communication) with a grade of C- or better

Placement in a GE Subarea A2 Writing Course

The student has met examination standards and/or multiple measures- informed standards via one of the criteria below:

English CAASPP/EAP Test:
- Standard Exceeded
- Standard Met and completed 12th grade approved year-long English course (CSU ERWC, AP, Weighted Honors English) with grade of C- or better

*English New SAT Test:
- 550 or above
- 510 - 540 and completed 12th grade approved year-long English course (CSU ERWC, AP, Weighted Honors English) with grade of C- or better English

ACT English Test:
- 22 or higher
- 19-21 and completed 12th grade approved year-long English course (CSU ERWC, AP, Weighted Honors English) with grade of C- or better
High School Courses and GPA:
- Weighted GPA 3.3 or above
- GPA 3.0 or above and completed approved 12 grade year-long English course (AP, CSU ERWC, Weighted Honors English)
- GPA 3.0 or above and completed Honors English
- GPA 3.0 or above and 5 or more years of high school English

Placement in a Supported GE Subarea A2 Writing Course and Participation in the Early Start Program Recommended
The student has met examination standards and/or multiple measures-informed standards via one of the criteria below:

*English New SAT Test:
- 510 - 540 and 4 or more years of high school English

ACT English Test:
- 19-21 and 4 or more years of high school English

Placement in a Supported GE Subarea A2 Writing Course and Participation in the Early Start Program Recommended
The student has met examination standards and/or multiple measures-informed standards via one of the criteria below:

*SAT score conversion for scores prior to March 2016 (old SAT): https://collegereadiness.collegeboard.org/sat-scoring-beforemarch-2016

Placement in a Supported GE Subarea A2 Writing Course and Participation in the Early Start Program Required
Based on multiple measures evaluation, student needs additional academic support including participation in the Early Start Program. Visit the Early Start Page to learn about the Early Start Program.

Assessments and Placement for GE Mathematics/Quantitative Reasoning: Non-Math Intensive Majors (Algebra and Statistics Disciplines, Non-STEM and Undecided Majors)

Has Fulfilled the GE Subarea B4 Math/Quantitative Reasoning Requirement
The student has met the requirement via completion of one of the following:

Advanced Placement (AP) Test:
- 3 or above: Calculus AB
- 3 or above on AP Calculus BC
- 3 or above on AP Statistics
- 3 or above on AP Computer Science Principles

International Baccalaureate (IB) Test:
- 4 or above on Math Higher Level (HL)

College Level Examination Program (CLEP):
- 50 or above on: Calculus, College Algebra, College Algebra-Trigonometry, Pre-Calculus or Trigonometry

College Transfer Coursework:
- Completed math/quantitative reasoning college course with a C- or better that satisfies CSU GE Area B4

Placement in a GE Subarea B4 Math/Quantitative Reasoning Course
The student has met examination standards and/or multiple measures-informed standards via one of the following criteria:

CAASPP/EAP Math Exam:
- Standard Exceeded
- Standard Met and completed 12th grade approved year-long math course beyond Algebra 2 with a C- or better
- Standard Met and 4 or more years of high school math or quantitative reasoning
*New SAT Math Test:*
- 570 or above
- 550 or above on Subject Test in Math Level 1 or 2
- 520 - 560 and completed 12th grade approved year-long math course beyond Algebra 2 with a C- or better

*ACT Math Test:*
- 23 or above
- 20-22 and completed 12th grade approved year-long math course beyond Algebra 2 with a C- or better

*High School Courses and GPA:*
- Weighted math GPA 3.0 or above and completed 12th grade approved year-long math course beyond Algebra 2 with a C- or better
- Weighted math GPA 3.0 or above and 5 or more years of high school math or quantitative reasoning
- Weighted high school GPA 3.7 or above
- Weighted high school GPA 3.5 or above and 4 or more years of high school math or quantitative reasoning

*SAT score conversion for scores prior to March 2016 (old SAT):* [https://collegereadiness.collegeboard.org/sat-scoring-beforemarch-2016](https://collegereadiness.collegeboard.org/sat-scoring-beforemarch-2016)

*Placement in a Supported GE Subarea B4 Math/Quantitative Reasoning Course and Participation in the Early Start Program Recommended*

  The student has met examination standards and/or multiple measures-informed standards via one of the criteria below:

  **High School GPA:**
  - Weighted math GPA 3.3 or above
  - Weighted high school GPA 3.0 or above

*Placement in a Supported GE Subarea B4 Math/Quantitative Reasoning Course and Participation in the Early Start Program Required*

  Based on multiple measures evaluation, student needs additional academic support including participation in the Early Start Program. Visit the Early Start page to learn about the Early Start Program.

**Assessments and Placement for GE Mathematics/Quantitative Reasoning: Pre-STEM/STEM and Other Math-Intensive Majors**

**Has Fulfilled the GE Subarea B4 Math/Quantitative Reasoning Requirement**

  The student has met the requirement via completion of one of the following:

  **Advanced Placement (AP) Test:**
  - 3 or above on AP Calculus AB
  - 3 or above on AP Calculus BC
  - 3 or above on AP Statistics
  - 3 or above on AP Computer Science Principles

  **International Baccalaureate (IB) Test:**
  - 4 or above on Math Higher Level (HL)

  **College Level Examination Program (CLEP):**
  - 50 or above on: Calculus, College Algebra, College Algebra-Trigonometry, Pre-Calculus or Trigonometry

  **College Transfer Coursework:**
  - Completed math/quantitative reasoning college course with a C- or better that satisfies CSU GE Area B4
Placement in a GE Subarea B4 Math/Quantitative Reasoning Course

The student has met examination standards and/or multiple measures-informed standards via one of the criteria below:

**CAASPP/EAP Math Exam:**
- Standard Exceeded
- Standard Met and completed 12th grade approved year-long math course beyond Algebra 2 with a C- or better

*New SAT Math Test:
- 570 or above
- 550 or above on Subject Test in Math Level 1 or 2
- 520 - 560 and completed 12th grade approved year-long math course beyond Algebra 2 with a C- or better

**ACT Math Test:**
- 23 or above
- 20-22 and completed 12th grade approved year-long math course beyond Algebra 2 with a C- or better

**High School Courses and GPA:**
- Weighted math GPA 3.5 or above and completed 12th grade approved year-long math course beyond Algebra 2 with a grade of C- or better
- Weighted math GPA 3.5 or above and 5 or more years of high school math or quantitative reasoning
- Weighted high school GPA 3.7 or above

*SAT score conversion for scores prior to March 2016 (old SAT): https://collegereadiness.collegeboard.org/sat-scoring-beforemarch-2016

Placement in a Supported GE Subarea B4 Math/Quantitative Reasoning Course and Participation in the Early Start Program Recommended

The student has met examination standards and/or multiple measures-informed standards via the criteria below:

**High School Math GPA:**
- Weighted math GPA 3.3 or above

Placement in a Supported GE Subarea B4 Math/Quantitative Reasoning Course and Participation in the Early Start Program Required

Based on multiple measures evaluation, student needs additional academic support including participation in the Early Start Program. Visit the Early Start page to learn about the Early Start Program.

Admission - Early Start Program

The goal of the Early Start Program (ESP) is to:
- Better prepare students in written composition and mathematics/quantitative reasoning before the fall term of freshman year, improving students’ chances of successful completion of a baccalaureate degree.
- If required to participate in ESP, as determined by multiple measures, students will begin in the summer before the start of the freshman year.
- For general information about ESP including fees and course listings, visit csusuccess.org/earlystart. Students are encouraged to visit the campus website for ESP information once admitted.
- Eligible financial aid applicants with an Estimated Family Contribution (EFC) of $5,000 or less will be eligible for waiver of the per unit ESP fee.

For more information on assessments, placements and the Early Start Program, please visit www.csusuccess.org

To facilitate appropriate first-year course placement, the CSU evaluates entering students for academic preparation in two areas: quantitative reasoning and written communication. The evaluation process takes into account several factors, including grade point average, completed high school coursework, transfer-level coursework, and scores on standardized tests such as the SAT, ACT, CAASPP/EAP, and Advanced Placement and International Baccalaureate examinations.
On the basis of this evaluation, some students who may benefit from additional academic preparation are required to participate in summer skill-building activities through the Early Start Program. The Early Start program provides students with an opportunity to take college level courses in the summer. This will allow the student to begin earning units towards their degree and have an early transition to SJSU. This requirement may be satisfied through live or online Early Start courses offered by any CSU campus. Students with an Early Start requirement will receive information about the program, including specific course options, through MySJSU starting in the first week of May and continuing throughout the summer. Regular financial aid packages may not be applied to Early Start classes; however, fee waivers are automatically given to qualifying students. For more information, go to www.sjsu.edu/earlystart.

Students who need sign language interpreters or other accommodations should contact the Accessible Education Center (AEC) at (408) 924-6000 as soon as possible, or at least two weeks prior to the first day of Early Start classes. For more information about obtaining accommodations through the AEC, go to www.sjsu.edu/aec/prospective-aec-students/earlystart/.

Students who fall into one or more of the following categories are excused from the Early Start requirement, regardless of their academic record:

1. Non-residents of California (See www.sjsu.edu/registrar/students/Residency/Residency_FAQ.html for information on residency.)
2. International students (F-1 and J-1 visas only)
3. Students admitted after June 1st

In addition, students who have a serious and compelling reason for not participating in the program may petition for an exception to the requirement. Exceptions are granted only when program participation is impossible or would lead to undue hardship. (Summer vacation plans are not be considered grounds for an exception.) The petition can be found at www.sjsu.edu/earlystart/. For a petition to be approved, documentation will be required.

Students who do not satisfy their Early Start requirement may be sanctioned as outlined in the SJSU Early Start Expectations for Completion section of the website, which can be found at www.sjsu.edu/earlystart/compliance/index.html.

---

**Admission - Subject Requirement Substitution for Students with Disabilities**

If you are unable to complete certain subjects because of your disability, please call the Accessible Education Center at 408-924-6000.

---

**Admission - Step to College/Unitrack - High School Students**

See Alternative Enrollment Programs

---

**Admission - Transfer Requirements**

Students who have completed fewer than 60 transferable semester college units (fewer than 90 quarter units) are considered lower division transfer students. Students who have completed 60 or more transferable semester college units (90 or more quarter units) are considered upper division transfer students. Applicants who complete college units during high school or through the summer immediately following high school graduation are considered first-time freshmen and must meet the CSU minimum eligibility requirements for first-time freshman admission. Transferable courses are those designated for baccalaureate credit by the college or university offering the courses and accepted as such by the campus to which the applicant seeks admission.

---

**Admission - Transfer Policies of CSU Campuses**

Most commonly, college level credits earned from an institution of higher education accredited by a regional accrediting agency recognized by the United States Department of Education is accepted for transfer to campuses of the CSU; however, authority for decisions regarding the transfer of undergraduate credits is delegated to each CSU campus.

California Community Colleges and other authorized certifying institutions can certify up to 39 semester (58.5 quarter) units of General Education-Breadth (GE-Breadth) or 37 semester (55.5 quarter) units of the Intersegmental General Education Transfer Curriculum (IGETC) for transfer students to fulfill lower-division general education requirements for any CSU campus prior to transfer.

“Certification” is the official notification from a California Community College or authorized institution that a transfer student has completed courses fulfilling lower-division general education requirements. The CSU GE-Breadth and the Intersegmental General Education Transfer Curriculum (IGETC) certification course lists for particular community colleges can be accessed at www.assist.org.
CSU campuses may enter into course-to-course or program-to-program articulation agreements with other CSU campuses, any or all of the California Community Colleges, and other regionally accredited institutions. Established CSU and California Community College articulations may be found on www.assist.org. Students may be permitted to transfer no more than 70 semester (105 quarter) units to a CSU campus from an institution that does not offer bachelor’s degrees or their equivalents, for example, community colleges. Given the university’s 30-semester (45-quarter) unit residency requirement, no more than a total of 90-semester (135-quarter) units may be transferred into the University from all sources.

**Admission - Lower Division Transfer Requirements**

Due to increased enrollment demands, most CSU campuses - including San José State - do not admit lower division transfer applicants. Generally, applicants will qualify for admission as a lower division transfer student if they have a cumulative GPA of at least 2.0 (C or better) in all transferable units attempted, are in good standing at the last college or university attended, and meet any of the following standards:

1. Will meet the freshman admission requirements (GPA and subject requirements) in effect for the term to which they are applying (see “Freshman Requirements”); or
2. Were eligible as a freshman at the time of high school graduation except for the subject requirements, and have been in continuous attendance in an accredited college since high school graduation, and have made up the missing subjects.

Applicants who graduated from high school prior to 1988 should contact the Admissions Office to inquire about alternative admission programs.

**Admission - Making Up Missing College Preparatory Subject Requirements**

San José State University does not allow students to make up missing college preparatory (a-g) subjects over the summer sessions. All work must be completed by the end of the 8th semester of high school with a “C- or Better” grade.

**Admission - Upper Division Transfer Requirements**

Generally, applicants will qualify for consideration for upper-division transfer admission if they meet all of the following requirements:

1. Cumulative grade point average of at least 2.0 (C or better) in all transferable units attempted;
2. In good standing at the last college or university attended; and
3. Completed at least sixty (60) transferable semester (90 quarter) units of college level coursework with a grade point average of 2.0 or higher and a grade C- or better in each course used to meet the CSU general education requirements in written communication, oral communication, critical thinking, and quantitative reasoning, e.g. mathematics.

The 60 units must include at least 30 units of courses that meet CSU general education requirement including all of the general education requirements in communication in the English language (both oral and written) and critical thinking and the requirement in mathematics/quantitative reasoning (usually 3 semester units) OR the Intersegmental General Education Transfer Curriculum (IGETC) requirements in English communication and mathematical concepts and quantitative reasoning.

All applicants for transfer will be required to complete a supplemental application including grades for all coursework completed and a list of all coursework in progress.

Any transfer applicant who wishes to be considered for admission must complete and submit the supplemental application by the deadline posted to his or her MySJSU To Do List.

For more information about the way that this information will be considered for admission and a list of major-specific coursework, please see Program Specific Supplemental Coursework section.

Questions about the Supplemental Application can be answered by consulting our help guide.
Admission - Associate Degrees for Transfer (AA-T or AS-T)

Student Transfer Achievement Reform (STAR) Act (SB 1440)

The Associate in Arts for Transfer (AA-T) and the Associate in Science for Transfer (AS-T) degrees offered at the California Community Colleges (CCC) are designed to provide California Community College students with the optimum transfer preparation and a clear admission pathway to those CSU degree majors. Students who have completed these transfer degrees and are admitted to a similar CSU major program or option for that discipline will be able to complete the Baccalaureate Degree within 60 semester or 90 quarter units providing that all remaining required courses are completed successfully without a break in attendance and providing that no supplemental courses for minors or areas of emphasis are undertaken.

CCC students who earn an Associate Degree for Transfer (AA-T or AS-T) are guaranteed admission with junior standing to a CSU and given priority admission over other transfer applicants when applying to a local CSU campus or non-impacted CSU program. AA-T or AS-T admission applicants are given limited priority consideration based on their eligibility ranking to an impacted campus/program or to campuses/programs that have been deemed similar to the degree completed at the community college. Students who have completed an AA-T/AS-T in a program deemed similar to a CSU major are able to complete remaining requirements for graduation within 60 semester (90 quarter) units. It is the responsibility of the student who has earned an AA-T/AS-T to provide documentation of the degree to the CSU campus.

Students who earn associate degrees for transfer and apply to a CSU campus but cannot be admitted due to impaction will be redirected to another CSU campus and offered admission for the same term. In order to qualify for the priority admission guarantee, transfer applicants must be conferred an approved Associate Degree for Transfer (AA-T/AS-T) by a California Community College, apply for admission to California State University campuses for an open term by the published deadline, submit all requested transcripts and documents, meet CSU admission eligibility requirements for the campus and/or program, and comply with any other prescribed admission requirements. It is the responsibility of these transfer students to provide documentation about the completion of the degree to each CSU campus that has received an application for admission.

Admission - Transfers - Provisional Admission

The offer of provisional admission is based on the academic information that applicants report on the CSU Apply application. All academic information must be verified before the admitted student will be allowed to enroll and register for classes at SJSU. The admission status will remain "provisional" until an official, final transcript(s) passes verification and confirmation of completion of any spring work in progress. The offer of provisional admission to the academic plan (major) listed on the admission letter is only valid for the admit term and may not be deferred to another semester. In addition, it is not possible to change majors prior to enrollment at SJSU.

Admission - Postbaccalaureate (Second Baccalaureate)

Due to enrollment restrictions and impaction, SJSU no longer accepts applications from post-baccalaureate/second baccalaureate students. The only exception is for Nursing.

Admission - International Student Requirements

The following information pertains to specific requirements for SJSU International Students.

Admission - International Student - Admission Requirements

The CSU must assess the academic preparation of international students. For this purpose, "international students" include those who hold U.S. temporary visas as students (F-1), exchange visitors (J-1), or in other nonimmigrant classifications.

The CSU uses separate requirements and application filing dates in the admission of "international students." Verification of English proficiency (see the section on the English Language requirement for undergraduate applicants), financial resources, and academic performance are each important considerations for admission. Academic records from international institutions must be on file by the posted deadlines and, if not in English, must be accompanied by certified English translations.
Admission - International Student - Insurance Requirement

Effective August 1, 1995, as a condition of receiving an I-20 or DS-2019 form, all F-1 and J-1 visa applicants must agree to obtain and maintain health insurance as a condition of registration and continued enrollment in the California State University. Such insurance must be in amounts as specified by the United States Department of State and San José State University. The campus president or designee shall determine which insurance policies meet these criteria. Further information may be obtained from International Student and Scholar Services, Student Union - CPGE. Visit http://www.sjsu.edu/isa/

Admission - International Student - English-Language Proficiency Exam Requirement

All undergraduate applicants whose native language is not English and who have not attended schools at the secondary level or above for at least three years full time where English is the principal language of instruction must present a score of 61 or above on the Test of English as a Foreign Language (TOEFL). Some majors and class levels may require a higher score. For graduate student applicants, please refer to www.sjsu.edu/graduateadmissions/admission-requirements/test-requirements/index.html. A few programs may also use alternative methods of assessing English fluency: Pearson Test of English Academic (PTE Academic) and the International English Language Testing System (IELTS).

SJSU will notify students after they apply when to submit scores.

Admission - Transcript Requirements

Admission - Transcript Submission

All transcripts submitted must be official and sent directly from the originating school or college to the Office of Admissions. San Jose State University accepts electronic transcripts as the preferred method. If possible please request your school to send your transcripts electronically. Electronic transcripts save processing time. Transcripts submitted by the student are not acceptable unless submitted in a sealed envelope. All records submitted become the property of the university, part of the student's file, and will not be released. If a student does not complete the application or enroll, the records will be kept on file for one year only.

Undergraduate students with college transfer work who are accepted for admission, and who desire advising, will be required to present a set of college transcripts to their departmental advisor. It is suggested that you order a set of transcripts for yourself at the same time you order transcripts sent to the Office of Admissions.

Admission - Freshmen Applicant Transcripts

Students applying for admission to the university while still attending high school may be evaluated on their self-reported application information. A final high school transcript with the date of graduation must be sent to the Office of Admissions at the time of graduation.

Admission - Transfer Applicant Transcripts

Transfer applicants who have completed 60 or more semester units of transferable credits and who are applying to the university need not file the high school transcript. However, applicants are cautioned that if, during the evaluation process, it is determined that fewer than 60 semester units of transferable credit have been earned, processing will stop and the application will be withdrawn.

All undergraduate applicants must file one official transcript from each college in which they have enrolled. This includes USAFI, the Defense Language Institute, Special Sessions (Winter Session and Professional Development), correspondence and audited courses, as well as any college in which the student was enrolled and withdrew without earning credit.

Former students need not order transcripts of work completed at SJSU whether this work was accomplished in the regular session, Open University, Special Sessions, or through the university Professional Development Program. Similarly, they need not reorder transcripts that were previously forwarded to this university. But if they did college work in the interim, such transcripts must be filed with their papers. Students absent from the university for a period of seven years or longer must resubmit all documents required for admission.
Admission - Credential Applicant Transcripts

Applicants to credential programs are required to file one official transcript from each and every college in which they have enrolled. Transcripts must be sent directly from the originating institution to the Office of Graduate Admissions & Program Evaluations (GAPE). Transcripts submitted by the student are not acceptable unless submitted in an official sealed envelope.

All college work must be reported. Failure to comply with this requirement may void the student’s application.

Test Requirements

EPT/ELM Placement Tests

EPT/ELM Placement Tests in English and Math

Prior to August 2017 the CSU required that each entering undergraduate, except those who qualified for an exemption, take the CSU Entry Level Mathematics (ELM) examination and the CSU English Placement Test (EPT) prior to enrollment. As of Spring 2018, these placement tests have been replaced by alternative assessments. See section on alternative assessments elsewhere in the policies.

Although the ELM/EPT are no longer offered, scores for students who previously took the ELM and EPT will be honored.

SAT and ACT

SJSU requires SAT or ACT scores from all freshman applicants.

Freshman and transfer applicants who have fewer than 60 semester or 90 quarter units of transferable college credit are strongly encouraged to submit scores, unless exempt (see “Eligibility Index”), from either the ACT or the SAT of the College Board. Persons who apply to an impacted program may be required to submit test scores and should take the test no later than November or December. Test scores also are used for advising and placement purposes. Registration forms and dates for the SAT or ACT are available from school or college counselors or from a CSU campus testing office. Or students may contact:

The College Board (SAT)
Registration Unit, Box 6200
Princeton, New Jersey 08541-6200
609-771-7588
www.collegeboard.org

ACT Registration Unit
P.O. Box 414
Iowa City, Iowa 52240
319-337-1270
www.act.org

Placement by Examination

Advanced Standing by Examination

Advanced standing by examination permits accelerated progress toward the degree and a wider selection of course work.

Advanced standing by examination is divided into three categories: (1) advanced placement by examination (no unit credit awarded), (2) waiver of requirements (no unit credit awarded); and (3) advanced credit by examination.

Course Placement by Examination

See the policies below and the respective departments for details about all placement examinations.
Mathematics

The Calculus Placement Exam is offered to students who would like to place into MATH 030, MATH 030P, MATH 030PL, or MATH 071, and have not yet satisfied the prerequisites (MATH 071: MATH 008/019 or SAT 570+ or ACT 23+; MATH 030: MATH 019 with B or better; Math 030P/030PL: MATH 019 with C- or better). See www.sjsu.edu/math/calculus/ for more information or contact the Testing Office; testing-office@sjsu.edu.

Foreign Language

Placement examinations in French, German and Spanish are recommended for those students who studied language in high school or acquired language skills through life experiences.

Students having completed college level foreign language (at SJSU or elsewhere) generally will not take the placement examination but will enroll in the course for which they qualify on the basis of units completed.

Music

All new and transfer music majors, including graduate students and returning former students, must report to the School of Music and Dance for auditions, advising and placement examinations. Music majors and minors must also audition for a major ensemble before completing registration.

Calculus Placement Examination (ALEKS)

The Calculus Placement Exam is offered to students who would like to place into MATH 030, MATH 030P, MATH 030PL, or MATH 071, and have not yet satisfied the prerequisites (MATH 071: MATH 008/019 or SAT 570+ or ACT 23+; MATH 030: MATH 019 with B or better; Math 030P/030PL: MATH 019 with C- or better). See testing.sjsu.edu/CalcPE, Testing Office, Industrial Studies Building Room 228; 408-924-5980; testing-office@sjsu.edu.

- Entering frosh who plan to take Calculus or Business Calculus their first semester should take the Calculus Placement Exam prior to attending orientation. Exams are offered throughout September through January for Spring admits and May through August for Fall admits. Check the Testing Office website for details at testing.sjsu.edu. [http://testing.sjsu.edu]
- For course registration information regarding Calculus I (MATH 030, MATH 030P, and Math 030PL) and MATH 071 see www.sjsu.edu/math/calculus.

Placement Through External Exams

- Any student who has earned a 3 or higher on the AP Calculus AB or Calculus BC/AB Subscore has credit for MATH 30 (Calculus I) and is eligible to enroll in Math 31 (Calculus II).
- Any student who has earned a 3 or higher on the AP Calculus BC have credits for Math 30 (Calculus I) and Math 31 (Calculus II) and is eligible to enroll to in Math 32 (Calculus III).
- Any student who has earned a 50 or higher on the CLEP Calculus has credit for Math 30 (Calculus I) and is eligible to enroll in Math 31 (Calculus II).
- Any student who has earned a 50 or 70 on the CLEP Pre-Calculus have credit for Math 19 (Pre-Calculus) and is eligible to enroll in Math 30P or Math 30PL (Calculus I).
- Any student who has earned a 71 or 80 on the CLEP Pre-Calculus have credit for Math 19 (Pre-Calculus) and is eligible to enroll in Math 30 (Calculus I).
- Any student who has earned a 50 or higher on the CLEP College Algebra has credit for Math 008 and is eligible to enroll in Math 71.

Calculus Placement Exam Dates

The Calculus Placement Exam at SJSU is conducted through ALEKS PPL, an adaptive online program that uses artificial intelligence to map a student’s strengths and weaknesses.

It consists of 3 parts:
1. Initial Assessment (30 questions, about 60-90 minutes to complete)
2. Prep and Learning Module (individualized, self-paced online review, with up to 2 practice tests)
3. Access to 2 Proctored Placement Assessments (proctored by the SJSU Testing Office)

For additional information on the CPE are posted at testing.sjsu.edu/CalcPE.

Registration and Payment

See information on testing.sjsu.edu.
Accommodations
Students needing accommodations can take the Calculus Placement Exam through the AEC. Registration can be done after payment and directly through the AEC.

Foreign Language Placement Examination
The placement test is recommended for those students who studied a language in high school or acquired language skills through life experiences such as foreign travel or study abroad.

If you have taken college level foreign language courses (at SJSU, a community college, or other university), you do not need to be tested. Just enroll in the course for which you qualify on the basis of units accumulated. If you are unsure about course equivalencies, call 408-924-4602 and you will be referred to an advisor.

Students may also take the Placement Test for Chinese, French, German, Japanese, Spanish or Vietnamese on an individual basis for the following semester. For details, call the Carmen Sigler Media Center at 408-924-4696.

For other languages, call 408-924-4602.

Waiver Examinations
A satisfactory score on one or more of the following tests will result in a waiver of the requirement, but no unit credit will be awarded. Information on all waiver examinations is available in the Testing Office. There is a test fee associated with some of these exams.

American Institutions
A waiver examination (giving no unit credit) is available in the Testing Office to challenge the California Government graduation requirement (Area US3).

Written Communication II Course (100W)
Students who have earned a waiver-eligible score on the Writing Skills Test (WST) at SJSU, or who have satisfied the CSU Graduation Writing Assessment Requirement at another CSU campus, are not required to take a 100W course unless their degree programs do not accept a waiver of the course. Consult the General Education section for a list of majors that do not accept the waiver.

Credit by Exam (CBE) for Challenge Examinations
In accordance with University Policies F15-5 and F15-11, academic credit may be earned through CBE for any department-approved 0-100 level course for which an equivalent CLEP exam is not available. Credit earned from CBE is non-transferable and awarded on a Credit/No Credit basis. It can only be used to clear SJSU requirements and assist with progress towards a degree at SJSU. CBE can be attempted only once per course, up to a maximum of 30 units. This 30 unit maximum also includes course credit earned through CLEP examinations.

If you are seeking Credit By Examination, you must meet the following criteria:
- You are a currently matriculated student at SJSU.
- You cannot be enrolled in the course, and have never received a grade (other than W) for the course or an equivalent course.
- You can only use the course towards completion of degree requirements at SJSU.
- You have never attempted CBE for the course before.
- You have fewer than the maximum of 30 units allowed for CBE/CLEP credit.

Contact the Testing Office to request a petition form. Visit testing.sjsu.edu/CBE for more information.

Credit by Examination

Standardized Exams
SJSU grants credit toward its undergraduate degrees for successful completion of various standardized exams. The following are the guidelines for the credit that may be granted at SJSU for each standardized exam. Students may not earn duplicate credit by examination if they have previously taken or subsequently take equivalent exams or course work.
College Board Advanced Placement Program (AP)

AP (Advanced Placement) Exams

SJSU grants credit toward its undergraduate degrees for successful completion of examinations of the Advanced Placement Program of the College Board. Students who present scores of three or better will be granted up to six semester units (nine quarter units) of college credit for each exam (no duplicate credit granted). The number of units granted, course equivalence, and satisfaction of requirements vary.

Requires scores of 3-5 for credit to be granted

### The International Baccalaureate (IB)

Students who present the following official higher level IB Exam scores of four or better, taken before college matriculation, will be granted up to six semester units of lower division baccalaureate credit. The course equivalence and satisfaction of requirements vary.

**Requires score of 4-7 on higher level exams for any credit to be granted.** Course equivalence dependent on major advisor for major, minor, or support credit.

Writing Skills Test (WST)

All students, regardless of where they began their college studies, are required by the California State University to satisfy an upper division written communication requirement. At SJSU the writing requirement has two parts: passing the WST and passing a 100W course.

- A satisfactory score on the Writing Skills Test (WST) is required prior to enrollment in Written Communication II (100W courses) and all SJSU Studies (advanced general education, Areas R, S, and V) courses. To make timely progress to their degree, students should register for, and take, the first available WST they can after completing English 1A course (CSU GE Area A2) and a critical thinking course (CSU GE Area A3).
- The WST requirement cannot be waived.
- High WST scores may also be used to waive the required Written Communication II course (100W). Some majors do not permit waiving of 100W no matter what score the student receives on the WST. Individual score reports explain each student’s status.

Beginning Fall 2014 the prerequisite for the WST is completion of English 1A (CSU GE Area A2) with a grade of “C- or Better”. Completion of a second semester composition course (e.g. Area A3 courses or English 1B at SJSU) is strongly recommended for students prior to taking the WST. For SJSU students who completed their English composition courses at SJSU prior to Fall 2014, English 1A and English 1B (or equivalent) were prerequisites for the WST.

Once the writing courses have been completed with grades of “C- or Better”, students should visit testing.sjsu.edu/wst to view upcoming test dates and register for the WST. Completion of the WST prior to reaching upper division standing will prevent any delays in registration for any courses which require the WST or 100W as a prerequisite for enrollment. Transfer students should complete the WST prior to their first semester at SJSU to prevent any delays in registration.

Consult testing.sjsu.edu for the most current information about the WST. The following students do not need to take the WST to enroll in any classes:

1. Students who have completed the Graduate Writing Assessment Requirement (GWAR) at SJSU or at another CSU campus as a matriculated student at the time of completion. Note: If you have satisfied the GWAR at another CSU campus, your department may still require that you take 100W to satisfy the requirements of the major, even though the university GWAR requirement has been met;
2. Post-baccalaureate students who have earned a baccalaureate degree from a regionally accredited U.S. college or university;
3. Students who have submitted a Written Communication II petition and received approval granting equivalency based on satisfactory completion of an upper division composition course completed at another university, or the submission of published work for which the student is the primary author.

For students who have failed the WST, SJSU offers, ENGL 100A and LLD 100A. Either course satisfies the WST requirement if passed with a “C or Better.” If you have questions about your status, contact the Testing Office at testing-office@sjsu.edu.

If you will not be in the U.S. for one of the spring or summer WST exams, take the first available exam in the fall semester.

If you will not be in the U.S. for one of the fall WST exams, take the first available exam in the spring semester. Students who live more than 50 miles away from campus may request to have their WST proctored at an approved testing center in the US. E-mail testing-office@sjsu.edu for more information.

Effective Fall 2012, students must take the WST no later than the term in which they reach 75 earned units (counting no more than 70 transfer units). If they do not pass, they must retake the WST or, if the WST has been failed once, take a 100A course each term until they pass. Students who reach 90 earned units without passing the test must enroll in 100A. (Updated - Presidential Directive 2009-05)

Graduate Students and the WST

All graduate students are required to satisfy the Graduation Writing Assessment Requirement (GWAR) through the completion of courses designed for this purpose in order to advance to candidacy and to graduate. The current list of courses can be found at [http://www.sjsu.edu/cgs/current-students/policies/index.html](http://www.sjsu.edu/cgs/current-students/policies/index.html). Some of these courses require the WST for registration. Waivers of the exam are issued for graduate students. The prerequisites described above (Eng 1A and a second semester composition course) are assumed to have been completed during the undergraduate education. Exceptions to the course requirements can be found at [www.sjsu.edu/pape/current_students/completing_masters/](http://www.sjsu.edu/pape/current_students/completing_masters/) and in the section on Graduation Writing Assessment Requirement - Graduate in this catalog. See your department graduate advisor for more information.

WST Scores

Scores will be reported on your MySJSU account. See [testing.sjsu.edu/wst/wstscores/index.html](http://testing.sjsu.edu/wst/wstscores/index.html) for detailed WST score information.
How to prepare for this exam

- WST information sample test questions, and registration materials may be obtained from helpful links can be found at testing.sjsu.edu/wst/wstprep/index.html.
- The Writing Center offers tutorial help and workshops on various writing topics: see www.sjsu.edu/writingcenter.

To register

1. Register at least 4 weeks in advance at testing.sjsu.edu/wst, dates are available on testing website.
2. Students who require disability-related accommodations must register and contact AEC at least four weeks prior to the posted test date.
3. The non-refundable test fee is $38.00, payable online via credit card, or at the Testing Office (Industrial Studies 228) with cash or check.

Test Accommodations

Students requiring test accommodations must submit the appropriate documentation to the Accessible Education Center (AEC). To ensure accommodations can be made, an appointment must be scheduled with an AEC counselor at least one month prior to a standardized or placement exam to determine eligibility and prescribe test accommodations. Students unable to meet this deadline should contact the AEC as soon as possible. See http://www.sjsu.edu/aec/for details.

Transfer Credit

SJSU has extensive articulation with many colleges and universities in California. Course-to-course articulation agreements identify courses of comparable content for major and minor requirements for undergraduate degree programs at SJSU. The articulation agreement assures students that the approved transfer courses on the transfer campus will be accepted “in lieu of” the comparable SJSU courses. Information about the courses for each campus that SJSU has agreements with can be found at our comprehensive on-line transfer planning site: http://transfer.sjsu.edu.

Generally, transfer credit will be posted within the first semester of attendance or sooner in some cases. It is important to submit official transcript(s) from all institutions attended for work completed to ensure that transfer credit is posted.

San Jose State University accepts electronic transcripts as the preferred method. If possible please request your school to send your transcripts electronically. Electronic transcripts save processing time. If you have questions or need assistance with your transfer credit, please email eval@sjsu.edu.

Credit from Other Colleges and Universities

California Community Colleges will certify to The California State University those courses that are of baccalaureate level and therefore transferable for at least elective credit. Credits earned in accredited community colleges will be evaluated by the Office of Undergraduate Admissions in accordance with Title 5 of the California Code of Regulations, Section 40409: A maximum of 70 semester units earned in a community college may be applied toward the degree, with the following limitations:

(a) No upper division credit may be allowed for courses taken at a community college, though content equivalence to upper division courses may be approved so that lower division courses may be articulated for “content credit only.”

(b) No credit may be allowed for professional courses in education taken at a community college, other than an introduction to education course.

Credits earned at a regionally accredited colleges will be evaluated by the Office of Undergraduate Admissions and advanced standing allowed on the basis of the evidence submitted. Credit toward the fulfillment of graduation requirements will be allowed only insofar as the courses satisfactorily completed meet the standards and the requirements of the basic course pattern of the college.

Credits earned at a non-accredited colleges may be accepted as a basis for advanced standing only to the extent that the applicant can demonstrate to the satisfaction of the university that a satisfactory degree of proficiency has been attained in the course in question.

For details on transferring graduate credits from other institutions, see the section on Transfer Credit in the Graduate Program.
Credit for Military Training in Non-Collegiate Settings

SJSU grants undergraduate degree credit for successful completion of non-collegiate instruction, either military or civilian, as recommended by the Commission on Educational Credit and Credentials of the American Council on Education. The number of units allowed is based on the recommendation in the Guide to the Evaluation of Educational Experience in the Armed Services and the National Guide to Educational Credit for Training Programs.

Six semester units of credit are awarded for being on active duty for at least one year in the Army, Navy, Air Force, Marines or Coast Guard. Three of these units can be used to complete Area E of the CSU General Education Program, two units will apply to the physical education requirement for SJSU graduation, and one unit is applied toward elective credit.

Documents that should be submitted to assess credit for military education are:

- Joint Service Transcripts (JTS; Army, Navy, Marines, Coast Guard)
- Community College of the Air Force transcript (CCAF)
- DD-214 (or DD-295 for students still in the military)

SJSU also awards credit for College Level Examination Program (CLEP) subject examinations. The specific credit for the 36 different CLEP exams can be found under credit by exam http://info.sjsu.edu/static/policies/cbe.html

The Office of Undergraduate Admissions will assist students with questions they may have about transfer credit in order to determine student level and admission eligibility.

Credit for Professional Education

Special Session

Courses numbered 100-399 earn degree and residence credit. While the university may accept this work toward baccalaureate and graduate degrees, it is a matter of individual department evaluation as to whether such work is accepted as applying toward the major or minor. A record of this work is maintained by the Registrar’s Office. Transcripts are available once credit is posted.

Continuing Education Units (CEUs)

Courses numbered 400-499 offer Continuing Education Units (CEUs), a nationally-recognized unit of measurement for a variety of noncredit programs applying toward licensure, promotion or career advancement. CEUs are not applicable to a degree nor to residence unit requirements. A record of this work is maintained by the College of Professional and Global Education. Transcripts are available once credit is posted. Contact College of Professional and Global Education (PGE).

Credit for Noncollegiate Instruction

San José State University grants undergraduate degree credit for successful completion of noncollegiate instruction, either military or civilian, appropriate to the baccalaureate degree, that has been recommended by the Commission on Educational Credit and Credentials of the American Council on Education. The numbers of units allowed are those recommended in the

- Guide to the Evaluation of Educational Experience in the Armed Services and the
- National Guide to Educational Credit for Training Programs.

Credit for Home Study

The university does not offer and rarely accepts credit for correspondence (home study) courses.
Credit for Work Experience

No unit credit is allowed toward bachelors’ degrees or master’s degrees for teaching or other practical experience. Specific requirements in certain departments may be waived, however, on the basis of previous experience.
Undergraduate Information and Requirements

Change of Major/Degree Objective

Undergraduate students who wish to change their degree major objectives should obtain a change of major form at www.sjsu.edu/registrar/forms. The form requires the approval and signatures of the appropriate university official(s). The completed form for students with fewer than 90 or more units must be returned to the Registrar’s Office. Students with 90 or more units must submit the change of major form to the major advisor, Department Chair, and Associate Dean of the major they wish to enter. Students changing to undeclared major must submit the completed form to Academic Advising and Retention Services (AARS). The forms are processed and filed with the Registrar’s Office.

The change of major is not official until the approved form is on file with the Registrar’s Office. This form may also be used to move from undeclared to a major, declare a second major, or change a minor. Change of undergraduate major and minor forms are downloadable from www.sjsu.edu/registrar/forms. For graduate change of major, see www.sjsu.edu/gaper/forms.

Students who have earned more than 90 earned units (counting no more than 70 community college transfer units) are not likely to be approved and will need to appeal.

Change of major is not guaranteed.

Classification of Students

San José State University students are classified in the lower or upper division or in graduate standing based on the units completed. The basis of classification is as follows:

Lower Division
Freshmen are those who have earned a total of fewer than 30 semester units. Sophomores are those who have earned a total of 30 through 59 semester units.

Upper Division
Juniors are those who have earned from 60 through 89 semester units. Seniors are those who have earned 90 semester units or more. Second or Postbaccalaureate students are those possessing a recognized baccalaureate degree and enrolled in an undergraduate degree program. Unless otherwise noted, postbaccalaureate students follow the same policies and procedures as upper division undergraduates.

Graduate Standing
Graduate standing is the classification for those who possess a recognized baccalaureate degree and are enrolled in graduate studies or in school credential programs.

Undeclared Majors

The university accepts freshmen who are not ready to declare a major academic objective or who cannot get into their desired major objective into the undeclared category.

Students selecting the undeclared category for admission must declare a degree major objective prior to attaining junior standing (earning 60 units). Students must obtain prior approval from the department in which they ultimately choose to major in accordance with university regulations.

Students who are in doubt about their degree program are encouraged to seek assistance from Academic Advising and Retention Services in the Student Services Center. AARS serves as the major department for Undeclared students and does require advising every semester. AARS also serves as the major department for Undeclared-PreNursing students.

Trained counselors are also available in Counseling & Psychological Services and in the Career Center. Students will be assisted on an individual basis with the appropriate use of vocational assessment when necessary. Staff and resources exist in the Career Center to support major and career exploration.

Undeclared students should report to Academic Advising & Retention Services in the Student Services Center for General Education and other academic advisement aimed at eventually discovering an appropriate major degree program.
Disqualification and Probation - Undergraduate & Postbaccalaureate

Disqualification - Academic

Undergraduate students on academic probation are subject to academic disqualification if their subsequent Fall or Spring term GPA falls below 2.0. Freshmen on Academic Probation are allowed a second consecutive semester of probation if their SJSU cumulative GPA is in the range 1.50 to 1.99. An undergraduate student reinstated on probation must achieve a grade-point average of 2.0 or better each semester following reinstatement until such time as he/she has achieved a cumulative SJSU GPA of 2.00. A student who fails to do so will be disqualified again (even if this occurs prior to readmission). Undergraduate students are eligible to repeat a limited number of courses with grades of “C-”, “D+”, “D”, “D-”, “F”, “NC”, “WU”, or “IC” through SJSU’s Open University. All work taken through Open University is included in the cumulative record and is considered in the determination of probation and disqualification. Graduate students should see the section on University Disqualification in the graduate portion of this catalog. Disqualified students should also refer to the section on reinstatement.

Unless otherwise noted, postbaccalaureate (second baccalaureate) students follow the same policies and procedures as upper division undergraduates.

Academic disqualification policies were revised in University Policy S16-16 and are effective with the determination of Academic Standing at the end of the Fall or Spring semester.

Disqualification - Administrative-Academic

A student who has been placed on administrative-academic probation may be disqualified from further attendance if:

1. The conditions for removal of administrative-academic probation are not met within the period specified;
2. The student becomes subject to academic probation while on administrative-academic probation;
3. The student becomes subject to administrative-academic probation for the same or similar reason for which he or she has been placed on administrative-academic probation previously, although not currently in such status.

When such action is taken, the student will receive written notification, including an explanation of the basis for the action.

In addition, an appropriate campus administrator may disqualify a student who at any time during enrollment has demonstrated behavior so contrary to the standards of the profession for which the student is preparing as to render him/her unfit for the profession. In such cases, disqualification will occur immediately upon notice to the student, which shall include an explanation of the basis for the action, and the campus may require the student to discontinue enrollment as of the date of the notification.

Administrative Academic Disqualification of Students

Section 41300 in Title 5 of the California Code of Regulations permits administrative-academic probation or disqualification from academic programs in the CSU for unsatisfactory scholastic progress regardless of cumulative GPA. See University Policy S16-16 for details.

Disqualification - Major

Each college, school, program and/or department has the option of employing a guideline for disqualification from the major. Those which opt to disqualify from the major must have published criteria for determining probation in the major, disqualification from the major, and reinstatement into the major. Such criteria may include individual course grades below “C” (2.0) or “CR”, a major GPA below 2.0, or a university GPA below 2.0. Students disqualified under this guideline must be notified by the department, school or college when placed on probation in the major or disqualified by the major.

Students disqualified from their major are listed as Undeclared, report to Academic Advising and Retention Services, and may do academic work to be reinstated to the major (if permitted by guideline), or change to another major for which they are qualified. Appeals may be submitted to the Academic Disqualification and Reinstatement Review Committee via the Office of Graduate and Undergraduate Programs.

Impacted degree programs are those most likely to have policies for disqualification in the major, but even non-impacted programs may have such policies. The Office of Graduate and Undergraduate Programs will maintain current information about disqualification in the major.

Disqualification - Graduate

See Graduate Information and Requirements
**Probation - Academic**

An undergraduate student is placed on academic probation if the SJSU cumulative grade point average falls below a “C” average (2.0). Students will remain on academic probation until they return to good academic standing (SJSU cumulative GPA greater than or equal to 2.0) or are disqualified. All work taken through Open University is included in the cumulative record and is considered in the determination of probation and disqualification.

Unless otherwise noted, postbaccalaureate (second baccalaureate) students follow the same policies and procedures as upper division undergraduates.

**Probation - Administrative-Academic**

A student may be placed on administrative-academic probation by action of the Provost for any of the following reasons:

1. **Withdrawal from all or a substantial portion of a program of studies in two successive terms or in any three terms.** A student whose withdrawal is directly associated with a chronic or recurring disability or its treatment is not subject to administrative-academic probation for such withdrawal.

2. **Repeated failure to progress toward the stated degree or other program objective, including that resulting from assignment of 15 units of “NC”, when such failure appears to be due to circumstances within the student’s control.**

3. **Failure to comply, after due notice, with an academic requirement or regulation which is routine for all students or a defined group of students** (examples: failure to complete a required CSU or campus examination, failure to complete a required practicum, failure to satisfy GE Areas A2 and B4 by the beginning of the 2nd year, failure to comply with professional standards appropriate to the field of study, failure to complete a specified number of units as a condition for receiving student financial aid or making satisfactory progress in the academic program).

When such action is taken, the student will be notified in writing and provided with the conditions for removal from probation and the circumstances which would lead to disqualification, should probation not be removed.

**Reinstatement - Undergraduate**

Reinstatement of Undergraduate Students After Academic Disqualification

Reinstatement is a different process from readmission. Readmission of a disqualified student is not possible unless reinstatement has been approved, but students must note that reinstatement is not readmission nor does it guarantee readmission. There may even be some situations in which reinstatement is sought with no intention of reapplying to SJSU, such as for admission to another institution or program.

In most situations, students will need to apply for readmission prior to being reinstated. **All returning students must submit an application for admission to SJSU.** Reapply for the next available term at www.calstate.edu/apply by the published deadline. If you miss the deadline for your desired term, you will need to submit an application for the next available term. The major listed on your application must match the major on the Petition for Reinstatement. If the majors differ, the major listed on your application will be changed to reflect the major listed on the Petition for Reinstatement. For more information regarding Readmission, see Readmission - Former Students Returning (FSR).

Categories for Reinstatement

1. **SJSU cumulative GPA 2.0 or better.** This category is for disqualified students who have attended SJSU through Open University and brought their SJSU cumulative GPA up to 2.0 or better. Raising the GPA to 2.0 or better does not guarantee that a department will approve the petition. Many departments place restrictions on reinstatement to their major degree programs. Please consult with your major advisor(s) as early as possible.

2. **Extenuating Circumstances.** Reinstatements in this category will only be granted for serious and compelling reasons that were clearly beyond a student’s control. Generally, all acceptable extenuating circumstances fall into one of the following eight categories: administrative error, employment, military, natural disaster, death of immediate family member, personal health or serious family illness, divorce, or personal/other (rarely approved). The following are not valid reasons for reinstatement under this category: Poor academic performance, non-attendance, change of major, or lack of prerequisite(s).

In addition to the required documentation of extenuation, approvals will require demonstration that poor performance in a particular semester was not within a student's control. Generally, all acceptable extenuating circumstances fall into one of the following eight categories: administrative error, employment, military, natural disaster, death of immediate family member, personal health or serious family illness, divorce, or personal/other (rarely approved). The following are not valid reasons for reinstatement under this category: Poor academic performance, non-attendance, change of major, or lack of prerequisite(s).

3. **Special Consideration.** This category is reserved for students whose petitions cannot be accommodated within the other categories. Typically, such students have spent substantial time away from SJSU since their disqualification (five years or more) and feel that their life experiences have prepared them for a successful return to school.

4. **Petitioned Grade Change.** This category is reserved for changes of grade approved under Section III (Grade Appeal) and Section IV (Change of Grade) of University Policy S09-7 (http://www.sjsu.edu/senate/docs/S09-7.pdf). If you are petitioning under this category, you must clearly explain which course grade was changed, when it was changed, and the reason for the change.
Reinstatement Petition Deadlines and Processing

1. Petitions for Reinstatement are accepted and evaluated on an ongoing basis. Allow at least fifteen business days for processing after submitting the completed petition form to the Registrar’s Office. You may petition under more than one category, but if you do so, your personal statement and documentation must support each category you have selected. Your petition will not be processed if you are not using the current form. See http://www.sjsu.edu/registrar/forms/index.html to be certain that you are using the most recent version of this petition.

Professional Education Scholastic Regulations

Disqualified students may enroll in Professional Education programs; however, the university, in considering applications for readmission and reinstatement, does not accept 400-series course credit as evidence of qualification for reinstatement.

Students desiring to apply extension credit toward the requirements for any degree or teachers’ credentials must secure approval from the department that is authorizing the reinstatement.

All students enrolling through Professional Education must meet course prerequisites and are bound by all applicable university regulations given in this catalog, or in the most recent Winter Session, Summer Session or Open University schedule of classes.

Information concerning tuition fees, admission and registration policies and procedures, withdrawal and refund policies, grading systems, academic standards and student advisement may be found in one or more of these publications. Regulations concerning the application of Professional Education credit toward bachelor’s degrees and toward residence credit in the university are given elsewhere in this catalog under Credit for Professional Education.

State Authorization for Distance Education

Distance education authorization only impacts prospective students who are interested in completing a SJSU degree or certificate program while simultaneously residing in another state.

States expect institutions to obtain approval for regulated activities that occur in their state. These activities may include but are not limited to online learning, practical experiences, faculty teaching from another state, marketing, and advertising. The requirements as to which activities require authorization, the application processes, and the costs to comply vary greatly from state to state. An institution’s compliance (or lack thereof) can affect its ability to receive federal financial aid.

Accreditation

San Jose State University is accredited by the Senior College and University Commission of the Western Association of Schools and Colleges (WASC). To view SJSU’s most recent accreditation letter as well as learn more about visits and reports, please visit SJSU’s WASC Accreditation website.

Resolving a Grievance

Students residing outside of California (while attending SJSU’s distance education programs) wishing to resolve a grievance should contact the appropriate office (e.g. Bursar’s Office, Financial Aid Office, etc.). If the issue persists, please follow the CSU Internal Complaint Process.

CSU Internal Complaint Process

Students are encouraged to utilize California State University’s internal complaint or review policies and procedures prior to filing a complaint with a state agency. Should the student wish to file a complaint in his or her home state, please select the state contact from the Consumer Protection State Contacts list to file a complaint directly in his or her state.

Arkansas

Arkansas Higher Education Coordinating Board certification does not constitute an endorsement of any institution, course or degree program. Such certification merely indicates that certain minimum standards have been met under the rules and regulations of institutional certification as defined in Arkansas Code §A76-61-301.

Georgia

After exhausting the below CSU Student Internal Complaint Process, Georgia residents may also file a complaint with the State of Georgia Nonpublic Postsecondary Education Commission at the following website: https://gnpec.georgia.gov/webform/gnpec-student-complaint-form.
Maryland

1. Information on registration with the Commission can be found on the following website: http://mhec.maryland.gov/institutions_training/Pages/acadaff/oos_online/oos_online_reg_list.aspx
2. The process for Maryland students to make complaints can be found on the following website: http://mhec.maryland.gov/institutions_training/Pages/acadaff/acadaffairsdepartments.aspx

Minnesota

San Jose State University is registered with the office pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

Oregon

According to the Oregon Administrative Rules (OAR 583-030-0035(18)(c)), after classes begin for a term, an Oregon student who withdraws from a course is eligible for a partial refund through the middle week of the term. Refunds shall be based on unused instructional time and shall be prorated on a weekly basis for schools using a semester calendar.

Refund Policy

If SJSU plans to be authorized to offer a program in a particular state but does not obtain approval before the term starts, the student’s application fee will be refunded.

For More Information

Visit the SJSU’s State Authorization website, http://www.sjsu.edu/extend/state-auth, or contact stateauthorization@sjsu.edu.

Readmission - Former Students Returning (FSR)

Readmission is the process of reapplying to the next available application cycle through CSU Apply and it is dependent on meeting all eligibility criteria.

Those that are intending to return to SJSU whether in good academic standing or disqualified are encouraged to submit the Readmission Petition. This petition process is based upon University Policy F12-7 (http://www.sjsu.edu/senate/docs/F12-7.pdf) which outlines enrollment priorities for Former Students Returning (FSR). Former Students Returning may complete and submit this petition by the deadlines stated on the petition found on the Office of Registrar’s website in order to receive priority consideration for admission prior to impaction processing for the term indicated by department administration.

TO BE ELIGIBLE TO SUBMIT THIS PETITION YOU MUST:

1. Have previously enrolled at SJSU as a fully admitted and matriculated student. (Students who have completed Open University units only are not eligible.) PLEASE NOTE: Students who left SJSU due to disqualification must complete the reinstatement process prior to submitting this petition.
2. Submit an application and application fee for admission by the deadline to apply via CSU Apply (http://www.calstate.edu/apply) for the term indicated on this petition. No exceptions.
3. Complete all the required steps for admission by the published deadlines for the term indicated. For example, transcripts must be submitted, intent to enroll must be completed, orientation must be attended, etc.

For the most up to date readmission information for former students returning, please visit Admissions website.

Former Students Returning - Disqualified

Students disqualified at the close of their last enrollment must petition for reinstatement. See the section titled Disqualification and Probation for detailed information. Students seeking reinstatement to the university are also advised to make early application for readmission and meet all application and admission deadlines posted at http://www.calstate.edu/apply. Contact the Student Services Center for details, or read the Petition for Reinstatement information on www.sjsu.edu/registrar/forms/index.htm.

A. Students disqualified from San José State University who wish to be considered for readmission should:

1. Read the section of this catalog titled Disqualification and Probation.
2. Complete a Petition for Reinstatement (http://www.sjsu.edu/registrar/forms/index.html). Petition guidelines can be found on page 1 of the petition form.
Approval for reinstatement to the University after disqualification does not assure readmission to any particular semester or specific degree objective.

1. Register and attend Transfer Orientation.

B. Students who have been disqualified from the college or university of last attendance (other than SJSU) will not be considered for admission to a regular session until:

1. They have reapplied for admission, as upper division transfers, during the next available admission application cycle and meet all posted deadlines.
2. The official transcript of record indicates eligibility to re-enroll
3. Former Students Returning (FSR) should complete an “FSR petition” from SJSU in addition to applying for admission. Details may be found at https://vpsaweb7.sjsu.edu/FSRpetition.pdf

Former Students Returning - Probation

Students on probation at the close of their last enrollment may be readmitted on probation as upper divisions transfers, provided they are otherwise eligible. They must meet all application and admission deadlines. Students must furnish transcripts of any college work taken during their absence.

Former Students Returning (FSR) should complete an “FSR petition” from SJSU in addition to applying for admission. Details may be found at https://vpsaweb7.sjsu.edu/FSRpetition.pdf

Former Students Returning - Good Standing

Undergraduates in good standing at the close of their last enrollment may be readmitted as upper divisions transfer provided they are otherwise eligible. They must meet all application and admission deadlines. All students must furnish transcripts of any college work taken during their absence.

Former Students Returning (FSR) should complete an “FSR petition” from SJSU in addition to applying for admission. Details may be found at https://vpsaweb7.sjsu.edu/FSRpetition.pdf

Leaves of Absence and Withdrawal

One Semester Leaves

Students who have attended at least one semester as a matriculated student and who are in good or probationary standing may choose to leave SJSU (“stop out”) for one semester (Fall or Spring) without a formal leave. Students choosing this option must return the following semester and continue their enrollment as matriculated students. If a student does not return in the semester following the one semester leave, he or she will be required to apply for re-admission to resume study at SJSU.

The exception to this rule is that graduate students who have completed all degree requirements except their culminating experience and who either have an RP grade in a project or thesis course or will be taking comprehensive exams may not stop out but must maintain continuous enrollment (see University Policy S17-5). They can do so by taking a 1-unit special session course designed for this purpose. Students should consult their department website or this catalog under the appropriate academic program to determine the course to take. Also consult the section in this catalog entitled Thesis and Project Work - RP Status - Graduate. At this stage of the graduate student career, leaves of absence other than medical or military will rarely be permitted.

Students in cohort programs may also be restricted in the semester of their return following a stop out or formal leave of absence. The individual program director or graduate advisor of the cohort program should be consulted before and after an absence to determine the semester of eligibility to return.
Leaves of Absence

By University Policy S15-3, a formal leave of absence for undergraduate or graduate students in the first or subsequent semesters for medical, care-giving, military service, personal hardship, or educational reasons may be requested by submission of the fully signed and documented Leave of Absence Petition. Submission to the Registrar’s Office (Window R at the Student Services Center) must precede the leave period except in the rarely granted cases of retroactive leaves. Leaves can be 1-4 semesters in length (with some exceptions). If a stop-out semester is taken prior to the formal leave, that semester counts in the 4-semester maximum period. Following the leave period, re-enrollment is required to avoid application for re-admission. An early return from leave must be accompanied by written notice to the Registrar’s Office. Students granted a leave are guaranteed a return to their department even if it is or becomes a program restricting the number of applicants.

Graduate students are eligible for all leaves of absence except when finished with all degree requirements other than their culminating experience (thesis, project, and/or comprehensive exam plus any other components required of the major). At that point, neither stopping out (voluntary absence for a semester) nor financial leaves are permissible.

Review University Policy S15-3, for specific information regarding:

- Categories of Leaves of Absence
- The process
- Leave Durations and Extensions
- Retroactive Leaves of Absence
- Exceptions

First-Semester Leaves

These leaves, which are rarely awarded, are for students accepted into the university, but unable to attend because of an exceptional trauma prior to the start of instruction. Once the semester begins, this type of leave is no longer applicable.

Medical Leaves

Matriculated students unable to continue their enrollment by reason of health are eligible for health leave as long as a minimum of one semester has been attended as a matriculated student prior to the leave. The leave request must be supported by a personal statement and documentation that details the health concern or the Healthcare Provider Verification of Medical Condition form signed by a California-registered physical or mental healthcare professional.

Primary Caregiver Leaves

A student can take a leave when responsible for taking care of a loved one in ill health. The Healthcare Provider Verification of Medical Condition form must also be submitted to confirm the medical condition of the patient.

Personal Hardship Leaves

If a student’s scholastic performance is affected by financial hardship, changes in work schedule, or other similar circumstances, he or she may seek a leave. The personal statement must include a plan to being oneself to financial security or to resolve the other personal hardship to be able to successfully return to one’s studies.

Military Leaves

Students called to U.S. military active duty and provide a copy of the military orders, may request a military deployment leave at any time for as long as five years.
Planned Student Educational Leaves

An Educational Leave permits a student to be absent from regular attendance for one or more terms while maintaining continuing enrollment status. Applicants must have an intention to return to formal study within a specified period and a plan for how the time is to be spent. There must be a clear educational objective for award of the leave. At least one supporting letter from an advisor, mentor, or chair from SJSU as well as the consent of the associate dean of the college is also necessary.

The opportunity to apply for such leave is available to all non-international students except those attending their first semester and those in disqualified status.

Leave arrangements must be made in advance with the department in which the student is majoring. Undergraduate students in undeclared status will make leave arrangements with Academic Advising and Retention Services (AARS) in the Student Services Center. Graduate students will make leave arrangements with the graduate program coordinator in their department.

Leave forms and additional information may be downloaded at www.sjsu.edu/registrar/forms.

International Student Leaves

International students must be enrolled in a full course of study (12 units for undergraduate students; 9 units for graduate students) for two semesters annually (summer and winter breaks not included). International students are eligible for leaves of absence only when authorized by International Student and Scholar Services (ISSS). Lack of enrollment for any reason other than prevention of the ability to pursue one’s studies by severe medical circumstances shall result in the student having to leave the US. If the student is able to return from abroad at the expiration of the leave period, he or she shall derive the benefits of having had the formal leave, such as avoiding the re-admission process. However, other restrictions, such as in the ability to work within the US, may be imposed by federal immigration regulations. International students in need of a leave of absence must first speak with an international student advisor. Walk in advising is available at ISSS in Student Union CPGE.

Withdrawal from the University

Students may withdraw officially from all courses during the first two weeks of instruction without academic penalty (no "W" grade on academic record). Students who have compelling reasons to cancel their registration or who wish to withdraw from all classes after the last day to drop without a "W" grade should consult their instructors, department chair or school director, academic advisor, and, for undergraduates, Academic Advising and Retention Services in the Student Services Center. Counseling & Psychological Services might also be sought for assistance.

A completed Petition for Withdrawal form (www.sjsu.edu/aars/forms/) for undergraduates or a Graduate Petition for Course Drop/Semester Withdrawal (www.sjsu.edu/gape/forms/Withdrawal.pdf) for graduate students must be submitted. Failure to follow formal university procedures may result in an obligation to pay fees as well as the assignment of failing grades in all courses. Students who leave the university but who do not officially withdraw will receive a grade of "WU" (denotes failure for unauthorized drop or withdrawal) in all of their classes. No personnel actions, grades, or transcript services will be permitted until all financial obligations, such as unpaid fines have been settled. If a student fails to return the semester immediately following withdrawal, reapplication for admission at http://www.calstate.edu/apply will be required.

Students who receive financial aid must consult with the Financial Aid and Scholarship Office prior to withdrawing from the university regarding any required return or repayment of grant or loan assistance received for that academic term or payment period. If a recipient of student financial aid withdraws from the institution during an academic term or a payment period, the amount of grant or loan assistance received may be subject to return and/or repayment provisions.

Students holding visas must consult with ISSS (International Student and Scholar Services) regarding effects on their visa status before submitting a withdrawal petition.

Refer to the section on Continuous Attendance and Catalog Rights for information about the possible effect a break in attendance may have on requirements for graduation.
Grade Appeals and Grade Assignments

University Policy S14-3

Assignment of Grades and Provisions for Appeals

The following principles support the minimum standards governing the assignment of grades and provisions for appeals (per CSU Executive Order 1037):

A. Faculty have the sole right and responsibility to provide careful evaluation and timely assignment of appropriate grades.

B. There is a presumption that grades assigned are correct. It is the responsibility of anyone appealing an assigned grade to demonstrate otherwise.

C. In the absence of compelling reasons, such as instructor or clerical error, prejudice or capriciousness, the grade assigned by the instructor of record is to be considered final.

D. Process for student appeal

1. Students who believe that an appropriate grade has not been assigned should first seek to resolve the matter informally with the instructor of record (per Change of Grade section).

2. If the matter cannot be resolved informally, the student may pursue a grade appeal and present his or her case to the Student Fairness Committee (according to University Policy S14-3, Student Fairness Dispute Resolution), have it reviewed and, where justified, receive a grade correction.

E. If the instructor of record does not assign a grade, or if he or she does not change an assigned grade when the necessity to do so has been established by appropriate campus procedures, it is the responsibility of other qualified faculty as determined by the appropriate campus entity. “Qualified faculty” means one or more persons with academic training comparable to the instructor of record who are presently on the faculty at that campus.

F. SJSU shall maintain and implement existing policy and procedures covering the assignment of grades and grade appeals that include the following provisions:

1. The time and manner of reporting course grades including provisions for assuring that such grades have been assigned by the instructor of record.

2. Circumstances under which the instructor of record may change a grade once assigned, and procedures for making such changes.

3. A means for preliminary review of potential appeals that may resolve differences before initiation of formal proceedings.

4. Grounds for which a grade appeal is permitted.

5. One or more committees for hearing grade appeals that shall provide safeguards to assure due process for both student and instructor. Such committees shall include student membership. Student members shall not participate in assignment of grades.

6. Procedures whereby grades are assigned by other qualified faculty in circumstances where the instructor of record does not do so, including those instances where a grade change is recommended by a grade appeals committee and the instructor of record does not carry out that recommendation.

7. Specification of time limits for completion of various steps in the appeal process and of the time period during which an appeal may be brought.

8. Description of the extent of the authority of appeal committee(s), including provisions that clearly limit grade changes to instances where there is a finding that the grade was improperly assigned.

9. Limitation of committee authority to actions that are consistent with other campus and system policy.

10. A statement that there is a presumption that grades assigned are correct. Thus, the burden of proof rests with the individual who is appealing.

11. Procedures for dealing with allegations of improper procedure.

12. Assignment of authority to revise policies and procedures for grade appeals to the campus Academic Senate. The campus president is responsible for ensuring that such revisions conform to the principles and provisions of this executive order.

13. Provision for annual reporting to the President and Academic Senate on the number and disposition of cases heard.

Change of Grade (Not Resulting from a Grade Appeal)

A. The basic principle underlying changes of grade is that all students be treated fairly and be given equal opportunities to demonstrate their academic learning and earn course grades representing that learning. Application of this criterion precludes the assignment of extra credit unless such assignments were made known and available to all students in the class. It further precludes rejudgment, afterthought, or reconsideration of an individual’s graded work unless such opportunity for change of grade is made equally available to all students in the class.

B. Unless a rejudgment, afterthought, or reconsideration is applied fairly and equally for all students in a class, a change of grade request may be submitted only when there is an error in grading an assignment or course component, or in the case of a clerical, computational, transcriptional, or other administrative error. The specific nature of the error shall be recorded on the form requesting the change of grade. Once approved, the original grade will be removed from the transcript and the new (changed) grade will replace it.
C. A change of grade request must be submitted by the department office directly to the Office of the Registrar in a timely fashion. Normally, such requests must be received by the drop deadline of the following Spring or Fall semester and will require the signatures of the instructor and the department chair. Further extension of this deadline will be considered only when there is documentation of the student’s attempt(s) to contact both the instructor and the department chair, and the late submission of the change of grade form is clearly beyond the student’s control.

D. A change of grade request received after the drop deadline of the following Spring or Fall semester and within one calendar year after the posting of the grade requires the signature of the appropriate college Associate Dean in addition to those of the instructor and the department chair.

E. A change of grade request received more than one year after the posting of the grade will require, additionally, the approval of the Associate Dean for Undergraduate Studies or Graduate Studies, as appropriate.

F. If a request for a change of grade is approved by the instructor but denied at a subsequent level of review, a written explanation for the denial shall be provided to the student, the faculty member, and the department chair.

Integrity of the Academic Record

A. All grades reported at the end of each semester are final, unless changes have been made according to the provisions given above, or those of University Policy F08-2. Students are responsible for reviewing their grades for accuracy before the beginning of the subsequent term. They are also responsible for verifying their transcripts for changes, e.g., from grade forgiveness, withdrawals, clearance of Incomplete grades, or clearance of Report Delayed (RD) grades.

B. A student who believes he or she has received a grade in error should contact the instructor to verify and, if appropriate, correct the grade. If an instructor is unavailable or absent during the subsequent semester, the student should promptly consult with the department chair about the grade in question. If the department chair is unable to contact the instructor, he or she shall notify the Associate Dean of the College in writing, requesting that an extension of the grade correction deadline be granted. The Associate Dean will then contact the Office of the Registrar if the request for an extension is deemed valid.

C. After a degree has been posted, no further adjustments can be made on the record except under extraordinary circumstances as determined by Undergraduate Studies or Graduate Studies.

Grade Disputes and Grievances

What is a Grievance?
A grievance is an allegation of an unauthorized or unjustified act or decision by a faculty or staff employee or an administrative officer (hereafter referred to as university employee(s), that in any way adversely affects the status, rights or privileges of a student.

What is a Grade Dispute?
There is a presumption that grades assigned are correct. It is the responsibility of anyone appealing an assigned grade to demonstrate otherwise (EO 1037).

We encourage you to contact the University Ombudsperson with questions or concerns related to a grievance or dispute. The Ombudsperson is a neutral, confidential, and impartial resource available to students, faculty, and staff.

For more information, please visit: http://www.sjsu.edu/ombudsperson/

Timely Feedback on Class Assignments

Students’ Rights to Timely Feedback on Class Assignments, University Policy F13-1
Every student has the right to know, within reasonable time, his academic test scores, to review his papers and examinations, and to be provided with an explanation of the determination of his course grade.

With changing pedagogical perspectives and increasing use of technology, instructors give a much wider range of assignment types - presentations, online discussion, group projects, etc. - and students should be granted the same expectation for feedback on all assignments within a reasonable period as with papers, tests, and examinations.

View the policy in its entirety here: http://www.sjsu.edu/senate/docs/F13-1.pdf
Grading System for Undergraduate

SJSU does not mail grades. Grades from Spring 1991 to the present are available at MySJSU (http://one.sjsu.edu). SJSU ID and Password required.

Fall 2019 Grades

Grades for Fall 2019 term will initially be posted on Saturday, December 21, 2019.
Academic standing will be posted on Wednesday, January 8, 2020.
See Transcripts in the Directory for information on official transcript requests.

Grades - Letter Grading

The grading policy of SJSU provides that A, B, C, D, F, shall be the basic grading system and shall apply to all course work acceptable toward a degree program except for those courses in which it is mandatory or permissible that Credit/No Credit grades be used.

</table>

The scholarship average is based on courses in which letter grades are earned (the total number of grade points divided by the number of units in letter-graded courses). Grade points are assigned as follows.

The grades of “CR,” “NC,” “AU” (audit), “I,” “W,” “WB,” and “RP” (report in progress) receive no grade points and the units are not considered in computing grade point average. A plus or minus sign following a grade of “A,” “B,” “C,” or “D” will affect the grade points allowed as indicated in the table. A grade of “A+” cannot exceed 4.0 grade points per California Code of Regulations, Title 5, Division 5, Chapter 1, SubChapter 2, Article 2, 40104.

Undergraduate and postbaccalaureate students must maintain a an SJSU Cumulative GPA of 2.0 or better (calculated by dividing grade points (GP) by units graded (UG)).
Grades - Auditing a Class - “AU”

An auditor must be officially enrolled in the course. Enrollment as an auditor is subject to permission of the instructor provided there is space available in the course. Auditors are subject to the same fee structure as credit students and regular class attendance is expected. Once enrolled as an auditor, a student may not change to credit status unless such a change is requested no later than the last day to add classes in that term. A student who is enrolled for credit may not change to audit after the last day to add classes in that term.

Grades - Credit/No Credit (CR/NC) - Elective

An upper-division (Junior or Senior) student shall have the option of taking a maximum of 12 semester units as long as the units are not in the major or minor, or in support of, preparation for or prerequisite to the major or minor, or for General Education on the basis of Credit/No Credit for courses under the basic letter grade system. Eligible students may choose this option by turning in the CR/NC option form, available at www.sjsu.edu/registrar/forms, by the add deadline. Students may accumulate a maximum of 60 semester units of Credit/No Credit grades toward a baccalaureate degree.

In addition to turning in the CR/NC Option form, you must have officially added the class.

CAUTION: Credit = A, A-, B+, B, B-, C+, C; No Credit = C-, D+, D, D-, F, IC, WU.

Grades - Credit/No Credit (CR/NC) - Mandatory

“CR/NC” grades are mandatory for thesis and remedial course work. It is also normally used in projects, field work, internships, individual studies, or directed reading. As recommended by departments and approved by the college dean, credit/no credit grades may be used in activity and laboratory courses, workshops, and selected seminars (colloquia). Students may accumulate a maximum of 60 semester units of Credit/No Credit grades toward a baccalaureate degree (excluding any remedial course work). A maximum of 40 percent of the units required in a graduate degree can be credit/no credit (e.g., 12 units in a 30 unit program).

CAUTION: Credit = A, A-, B+, B, B-, C+, C; No Credit = C-, D+, D, D-, F, IC, WU.

Grades - Incomplete - “I / IC”

The symbol “I” (Incomplete Authorized) indicates that a portion of required course work has not been completed and evaluated in the prescribed time period due to unforeseen, but fully justified, reasons and that there is still a possibility of earning credit. The student cannot reenroll in the course. It is the responsibility of the student to bring pertinent information to the attention of the instructor (regarding the unforeseen reason(s) for requesting an Incomplete) and to determine from the instructor the remaining course requirements that must be satisfied to remove the Incomplete. A final grade is assigned when the work agreed upon has been completed and evaluated. Clearing an incomplete grade does not permit retaking previously completed portions of the course, nor does it permit assignment of additional graded work (e.g., extra credit) that was not available to other students in the class.

An “I” must normally be made up within one calendar year immediately following the end of the term during which it was assigned.

This limitation prevails whether or not the student maintains continuous enrollment. Failure to complete the assigned work will result in an “I” being converted to an “IC” symbol, or an “NC” for non-traditionally graded courses, unless the faculty member assigns a specific letter grade at the time the Incomplete is assigned, which would replace the “I” in the student’s record after the calendar year deadline.

Failure to complete the assigned work within the established calendar year period for an “I” grade will result in an automatic grade change to an “IC” grade which calculates as a failing grade for grade point average and progress point computation.

Grades - Report Delayed - “RD”

The “RD” symbol may be used where a delay in the reporting of a grade is due to circumstances beyond the control of the student. The symbol may be assigned by the registrar only and, if assigned, shall be replaced by a substantive grading symbol as soon as possible.
Grades - Report in Progress - “RP”

The “RP” symbol is used in connection with courses that typically extend beyond one academic term. It indicates that work is in progress but that assignment of a final grade must await completion of additional work. Work is to be completed within one year except for graduate degree projects and theses (supervised courses, e.g., 298 & 299 courses), which have a two-year time limit. Failure to complete the assigned work for an “RP” grade will result in an automatic grade change to an “NC” grade unless a request for an extension has been made and approved.

A final grade will be assigned to all segments of the course on the basis of overall quality. Any extension of this time period must receive prior authorization by the instructor and department chair or school director.

Grades - Withdrawal - “W”

The symbol “W” on the official transcript indicates that the student was permitted to withdraw from the course after the drop deadline for the term with the approval of the appropriate campus administrator. It carries no connotation of quality of student performance and is not used in calculating grade point average or progress points. However, there are limits on the number of allowable units of “W” on the unofficial transcript. Undergraduate students may withdraw from no more than 18 units. Postbaccalaureate students may withdraw from no more than 12 units. Graduate students may withdraw from no more than 9 units. Exceptions to these unit limits are granted when the cause of withdrawal is due to circumstances clearly beyond the student’s control and the assignment of an Incomplete is not practicable. Such exceptions are designated “WB” for internal processing of drops and withdrawals, and will revert to “W” on the transcript (University Policy S09-7).

Undergraduates may download the appropriate petition (course drop or withdrawal from all courses) at www.sjsu.edu/aars/forms. Graduate Students may download the Course Drop/Semester Withdrawal petition at www.sjsu.edu/gape/forms.

Grades - Withdrawal Unauthorized - “WU”

The symbol “WU” indicates that an enrolled student did not officially withdraw from the course and also failed to complete course requirements. It is used when, in the opinion of the instructor, completed assignments or course activities or both were insufficient to make normal evaluation of academic performance possible. For purposes of grade point average and progress point computation this symbol is equivalent to an “F.”

Unit of Credit

The unit of credit is the semester unit. Transferred work from a quarter system college or university will be converted to semester system units and grade points. Each semester unit is equal to one and one-half quarter units.

Change of Grade

The basic principle underlying changes of grade is that all students be treated fairly and be given equal opportunities to demonstrate their academic learning and earn course grades representing that learning. Application of this criterion precludes the assignment of extra credit unless such assignments were made known and available to all students in the class. It further precludes rejudgment, afterthought, or reconsideration of an individual’s graded work unless such opportunity for change of grade is made equally available to all students in the class.

Unless a rejudgment, afterthought, or reconsideration is applied fairly and equally for all students in a class, a change of grade request may be submitted only when there is an error in grading an assignment or course component, or in the case of a clerical, computational, transcriptional, or other administrative error.

The specific nature of the error shall be recorded on the form requesting the change of grade. Once approved, the original grade will be removed from the transcript and the new (changed) grade will replace it.

A change of grade request must be submitted by the department office directly to the Office of the Registrar in a timely fashion. Normally, such requests must be received by the drop deadline of the following Spring or Fall semester and will require the signatures of the instructor and the department chair. Further extension of this deadline will be considered only when there is documentation of the student’s attempt(s) to contact both the instructor and the department chair, and the late submission of the change of grade form is clearly beyond the student’s control.

A change of grade request received after the drop deadline of the following Spring or Fall semester and within one calendar year after the posting of the grade requires the signature of the appropriate college Associate Dean in addition to those of the instructor and the department chair.

A change of grade request received more than one year after the posting of the grade will require, additionally, the approval of the Associate Dean for Undergraduate Studies or Graduate Studies, as appropriate.
Maximum Unit Loads

An undergraduate student who takes 12 or more units is classified as full-time for the purposes of financial aid. An average unit load of at least 30 units per academic year (15 units per semester without summer or winter coursework) is required to complete an undergraduate degree in four years. Advising is essential to be able to complete a degree in a timely and efficient manner. Students with work or family responsibilities outside of school should consult with an advisor and reduce their study loads appropriately.

The maximum load for graduate students is normally 15 semester units. Reasonable exceptions beyond this number up to 18 units may be approved, by the graduate advisor and department chair, for sufficient cause, and department chair, but permission must also be garnered from the Associate Dean of Graduate Studies by means of the Graduate Petition for Excess Units. Loads beyond 18 units for graduate students, are prohibited by the CSU. The Graduate Studies & Research Committee strongly recommends that graduate students carry no more than 12 units of 200-level work in any one semester. There is no official minimum load for graduate students other than for those who wish to receive financial assistance or other benefits.

Immigration and Customs Enforcement (ICE) regulations on international students require that undergraduates maintain full-time status of 12 semester units and graduate students 9 semester units, excluding summer in both cases. To appeal this regulation, go to International Student and Scholar Services (ISSS).

Excess Units

Enrollment limits for undergraduate students will be set on a semester by semester basis. Petitions and information are available at www.sjsu.edu/registrar/forms.

Verification of Unit Load

In verifying enrollments to the Veterans’ Administration, scholarship boards and loan agencies, the university reports the total number of units enrolled as the official unit load for an undergraduate.

The definition of “full-time student” made by the United States Citizenship and Immigration Service (USCIS), Veteran’s Administration and other agencies may vary. Students who are concerned with their status are urged to contact the specific agency involved to determine its policies. Full veterans’ subsistence payments require a course load of 12 weighted semester units for both graduate and undergraduate students. Graduate students from foreign countries who are in the U.S. on student visas must normally carry nine semester units to maintain full-time student status, while undergraduate international students must carry 12 semester units to maintain the required full-time status.

Students may request verification of unit load from the Registrar’s office located in the Student Services Center.

Course Numbering System

Course Numbers

Lower division (freshman and sophomore) courses are numbered 001-099 and cannot be used for credit in graduate or credential programs; upper division (junior and senior) courses are numbered 100-199; graduate courses are numbered 200-299.

Methods or professional courses given by or for other departments are allowed upper division credit are numbered 300-399 and doctoral courses are numbered 500-599. Courses in the NURS 574-597 series is a part of the joint Doctor of Nursing Practice (DNP) with CSU Fresno.

180, 184, 096, 196 and 296 Courses

Individual Studies (180) and Directed Reading (184) are used for independent study and are generally reserved for majors within a department. Normally, no more than four units of 180 and/or 184 may be taken for baccalaureate credit (see Unit Requirements). Courses numbered 96, 196 and 296 are offered to meet special demands for experimental courses on a temporary basis and are listed in the SJSU Schedule of Classes, but not in this catalog.

400-499 Continuing Education Units

Courses in the 400-series are especially designed for professional in-service and relicensure purposes. Continuing Education Units (CEU) are given for these courses. Courses are not applicable to degree programs and units earned do not affect grade point totals or average.

1000 No Degree Credit

Courses in the 1000-series do not earn credit toward any degree program. Examples: remedial courses and units devoted to thesis, project, or dissertation beyond minimum required units. (Effective May 30, 2016)
Transcript of Record

Transcript Requests
Current and former San Jose State students have several ways to order official and unofficial transcripts

1. Official transcripts through the E-transcript portal (preferred)
2. Official paper transcripts through MySJSU
3. Official paper transcripts by mail request
4. Unofficial transcripts through MySJSU

For more information on Transcripts visit http://www.sjsu.edu/registrar/students/transcripts/index.html

Holds
If there is any financial hold or administrative obligation on your student records, it must be cleared with the department that placed the hold before transcripts can be processed. Holds may be placed on your student records by other campus departments for various reasons (e.g. fees, books, housing, equipment or documents).

General Transcript Regulations:
1. Transcripts are a complete record of all courses and/or degrees completed at San José State University. Transcripts do not include course work completed at other institutions. Only the transferable units are reflected on transcripts under “Transfer Credit”. Transcripts from high schools or other colleges cannot be duplicated. You must apply directly to each school for copies of their transcripts.
2. For students who have undergraduate and post-baccalaureate or graduate course work, please be aware that it is not possible to separate undergraduate course work from the post-baccalaureate or graduate course work. All careers will appear on the transcript as it is considered one official record.
3. Transcript requests will not be accepted by fax or e-mail.
4. We do not accept requests for unofficial transcripts. Unofficial transcripts can be obtained through your Student Center page on the mySJSU portal (current and newly graduated students only). If you need assistance with your mySJSU account, please contact the IT Help Desk via e-mail: ithelpdesk@sjsu.edu

Repetition of Courses
Undergraduate and postbaccalaureate students (regular enrollment and Open University) may repeat courses only if they earned grades lower than a “C” (including “WU”, “IC”, and “NC”).

Special programs, such as credential programs, that are governed by external standards may require grades higher than a C. In courses specific to those programs, a course repeat may be permitted when the grade does not meet the necessary standard.

Graduate students may repeat courses only if they earned grades lower than a “B” (including “WU”, “IC”, and “NC”).

Repeating a course with an Incomplete (“I”) grade is not allowed; a grade must be assigned or the “I” must revert to an “IC” prior to repeating the course. Repeating a course with an “RP” is allowed, although the course instructor and individual departments should be consulted for their requirements in this regard.

The limits on course repetition apply only to units completed at SJSU.

1. See Repeating a class- Registration Restrictions for more information.
2. Courses designated “Repeatable for Credit” may be repeated even though the original grade was “C” or better.
3. The policies regarding repetition of courses with Grade Forgiveness or Grade Averaging (as described below) apply only to courses taken and repeated at SJSU.

Grade Forgiveness

Grade Forgiveness (Formerly known as “Academic Renewal”)

Course Repeats with “Grade Forgiveness.”

Formerly known as “Academic Renewal” at SJSU, Grade Forgiveness is the circumstance in which the new grade replaces the former grade with respect to the calculation of GPA. The original grade remains on the transcript.
1. Undergraduate and postbaccalaureate students may repeat a maximum of 16 units of total Grade Forgiveness, consisting of a combination of up to 9 units (maximum) of lower division (numbered 0-99) course work, and up to 9 units (maximum) of upper division (numbered 100-199) course work.

2. Graduate (numbered 200-299) course work is not eligible for Grade Forgiveness. Graduate students are not eligible for Grade Forgiveness, but may repeat up to 9 units of upper division or graduate course work through Grade Averaging.

3. Grade Forgiveness will be assigned automatically for all eligible courses as soon as a student registers. Eligible courses include those courses with earned grades lower than a “C” (including “WU”, “IC”; but excluding “NC”). Once the pool of available units is insufficient for the next repeated course, unused units may be applied to a future course of lower unit value or simply left unused in the pool. If a repeated course is dropped prior to the Drop Deadline or a “W” is recorded for a repeated course, then the Grade Forgiveness units return to the pool of available lower division or upper division units, as appropriate.

4. To opt out of grade forgiveness: A student may petition to have a repeated course NOT be granted Grade Forgiveness. Such petitions must be submitted prior to the Census Date for the term in which the course is repeated. See www.sjsu.edu/ugs for instructions and forms.

5. Students may repeat an individual course for Grade Forgiveness only once.

6. Grade Forgiveness shall not be applicable to courses for which the original grade was the result of a finding of academic dishonesty. Grade Forgiveness that results in a higher GPA will not remove a prior academic standing.

The policy regarding repetition of courses with Grade Forgiveness apply only to courses taken and repeated at SJSU (University Policy F08-2).

Course Repeats with Grades Averaged

1. Undergraduate and postbaccalaureate students may repeat a maximum of 28 units for graduation credit (including units repeated for Grade Forgiveness, excluding grades of “W”). After the pool of Grade Forgiveness units have been depleted or used to the fullest extent allowable, the repeat grade shall not replace the original grade. Instead grade points and units from all attempts shall be calculated in the student’s SJSU cumulative GPA and overall GPA.

2. Graduate students may repeat a maximum of 9 units of upper division or graduate course work for graduation credit.

3. Course repeats with Grades Averaged will be assigned automatically for all eligible courses as soon as a student registers. Once the pool of available units is insufficient for the next repeated course, unused units may be applied to a future course of lower unit value or simply left unused in the pool. If a repeated course is dropped prior to the Drop Deadline or a “W” is recorded for a repeated course, then the Grade Averaged units return to the pool of available units.

Students who (1) have repeated the maximum allowable units, (2) are otherwise making appropriate progress to degree, and (3) still need to repeat courses to fulfill specific major or minor requirements necessary for graduation may petition for an exception to the 28-unit limit. Graduate & Undergraduate Programs and the Registrar’s Office will administer the petition process. Any course(s) approved for repeating by this petition process will be Grade Averaged.

Duplicate Credit - Inadmissible Repeats

Unless a course is designated “Repeatable for Credit” in the catalog, repeating a course in which a “C or better” was earned on the first attempt is not admissible. This restriction applies whether the first attempt was at another institution and the second attempt at SJSU, or the reverse. Articulation agreements determine if the course at another institution is considered equivalent to an SJSU course. See the course-to-course articulation information at http://artic.sjsu.edu/web-dbgen/artic/all-course-to-course.html.

If the “inadmissible repeat” (second attempt) is taken at SJSU before the transfer record from the first non-SJSU attempt is posted, the units and grade points will appear on the transcript and the grade will initially be calculated into the SJSU and All College grade point averages. Students should be aware that units completed and grade points cannot be earned for “inadmissible repeats” and will be removed at any time prior to graduation. The grade earned will be indicated on the student’s record. Students should keep track of these units and not count them twice for graduation purposes.

This same restriction about duplicate credit applies to credit earned by AP, CLEP and IB exams. AP, CLEP and IB exams articulate to specific SJSU courses. See credit by exam articulation information at http://artic.sjsu.edu/static/policies/cbe.html. When an exam and a course duplicate credit, the exam credit shall be removed or reduced according to the amount of overlap (EO-1036).
Residency

Residency - Determination

University requirements for establishing residency are independent from those of other types of residency, such as for tax purposes, or other state or institutional residency. These regulations were promulgated not to determine whether a student is a resident or nonresident of California, but rather to determine whether a student should pay tuition on an in-state or out-of-state basis. A resident for tuition purposes is someone who meets the requirements set forth in the Uniform Student Residence Requirements. These laws governing residence for tuition purposes at the California State University (CSU) are California Education Code sections 68000-68085, 68120-68134, and 89705-89707.5, and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41900-41916. This material can be viewed on the Internet by accessing the CSU’s website at www.calstate.edu/GC/resources.shtml.

Each campus’s Registrar’s Office is responsible for determining the residence status of all new and returning students based on the Application for Admission, Residency Questionnaire, Reclassification Request Form, and, as necessary, other evidence furnished by the student. A student who fails to submit adequate information to establish eligibility for resident classification will be classified as a nonresident.

Generally, establishing California residence for tuition purposes requires a combination of physical presence and intent to remain indefinitely. An adult who, at least 366 days prior to the residence determination date for the term in which enrollment is contemplated, can demonstrate both physical presence in the state combined with evidence of intent to remain in California indefinitely may establish California residence for tuition purposes. A minor normally derives residence from the parent(s) with whom they reside or with whom they most recently resided.

Evidence demonstrating intent may vary from case to case but will include, and is not limited to, the absence of residential ties to any other state, California voter registration and voting in California elections, maintaining California vehicle registration and driver’s license (or California identification card), maintaining active California bank accounts, filing California income tax returns and listing a California address on federal tax returns, owning residential property or leasing an apartment where permanent belongings are kept, maintaining active memberships in California professional or social organizations, and maintaining a permanent military address and home of record in California.

Nonresident students seeking reclassification are required to complete a supplemental questionnaire that includes questions concerning their financial independence. Financial independence is required, along with physical presence and intent, to be eligible for reclassification. Financial independence is established if in the calendar year the reclassification application is made and in any of the three calendar years preceding the reclassification application the student:

- has not and will not be claimed as an exemption for state and federal tax purposes by his/her parent;
- has not and will not receive more than seven hundred and fifty dollars ($750) per year in financial assistance from his/her parent; and
- has not lived and will not live longer than six (6) weeks in the home of his/her parent.

A nonresident student who has been appointed as a graduate student teaching assistant, a graduate student research assistant, or a graduate student teaching associate on any CSU campus and is employed on a 0.49 or more time basis is exempt from the financial independence requirement.

Non-citizens establish residence in the same manner as citizens, unless precluded by the Immigration and Nationality Act from establishing domicile in the United States.

Exceptions to the general residence requirements are contained in California Education Code sections 68070-68085 and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41906-41906.6, and include, but are not limited to, members of the military and their dependents, certain credentialed employees of school districts and most students who have attended three or more years of high school in California and graduated from a California high school or attained the equivalent of graduation. Whether an exception applies to a particular student cannot be determined before the submission of an application for admission and, as necessary, additional supporting documentation. Because neither campus nor Chancellor’s Office staff may give advice on the application of these laws, applicants are strongly urged to review the material for themselves and consult with a legal advisor.

Residency - Appeals

Students classified as non-residents may appeal a final campus decision within 120 days of notification by the campus. For more information please visit the Residency website from the Office of the Registrar.
Residency Determination Dates

At San José State University, the residence determination dates are:

- Fall - September 20
- Spring - January 25
- Summer - June 1

The Office of General Counsel can either decide the appeal or send the matter back to the campus for further review. Students incorrectly classified as residents or incorrectly granted an exception from nonresident tuition are subject to reclassification as nonresidents and payment of nonresident tuition in arrears. If incorrect classification results from false or concealed facts, the student is subject to discipline pursuant to Section 41301 of Title 5 of the California Code of Regulations.

Resident students who become nonresidents, or who no longer meet the criteria for an exception, must immediately notify the Registrar’s Office. Changes may have been made in the rate of nonresident tuition and in the statutes and regulations governing residence for tuition purposes in California between the time this information is published and the relevant residence determination date. Students are urged to review the statutes and regulations stated above.

Open University - Courses

San José State University’s Open University program permits enrollment by non-matriculated students in specified regular curriculum classes on a space-available basis. Formal admission to the university is not required. Registration is not possible prior to the first class meeting. A maximum of 24 semester units may be applied toward bachelor degree and not more than nine units for a 30-unit master degree (30% of the degree program total). Units earned in Open University may not be used to meet residence unit requirements for a degree. For undergraduate students, exceptions to these restrictions may be granted by petition (http://www.sjsu.edu/gup/allForms/index.html#studentPetitions).

Regular (matriculated) students in good standing may not enroll as Open University students. Matriculated students are those who have been admitted to San José State University as a regular student for the current semester or were registered as a matriculated student in the previous semester and who have not graduated.

Disqualified students who seek reinstatement following disqualification must see their advisor to develop a plan to meet the required GPA standard for readmission to the university. In addition to reinstatement, disqualified students must reapply and be readmitted in order to become regular (matriculated) students once again.

All prerequisites, including WST are enforced when enrolling through Open University.

International Students

International students must be regular full-time matriculated students admitted to a degree program. Enrollment in Open University does not qualify international students for the immigration document necessary to enter the United States, to transfer to SJSU from another U.S. university, or to maintain their legal F-1 status. Academically disqualified international students are eligible to enroll through Open University but must transfer to another I-20 issuing institution to maintain their F-1 student status, or apply for reinstatement to F-1 student status from the U.S. Citizenship and Immigration Services after being re-admitted to SJSU.

Summer Session

Summer Session allows both matriculated and non-matriculated (i.e. Open University) students to enroll in summer classes at San José State University.

Winter Session

Both matriculated and non-matriculated students may enroll in this session. Credit earned may be applied to residence unit requirements for previously matriculated students, and is not subject to the 24-unit limitation in applying toward bachelor’s degree requirements at San José State University.

Honors

The university recognizes outstanding academic achievement of its students through a variety of different honors.
Honors - Departmental

Students who have completed an approved departmental honors program receive “honors at graduation” as distinct from “university honors at graduation.” The following departments offer departmental honors programs (for details see under each department in the university course catalog):

- Aviation
- Biological Sciences
- Business
- Chemistry
- Child Development
- Computer Science
- Economics
- English
- Environmental Studies
- Geography
- Geology/Earth Science
- History
- Journalism and Mass Communications
- Mathematics
- Music
- Political Science
- Psychology
- Sociology
- Theatre Arts

Honors - President and Dean Scholars

Each spring the Honors Convocation recognizes and encourages superior undergraduate academic achievement of President’s and Deans’ Scholars. There are two levels of Honors Scholars:

President’s Scholars: Any undergraduate student who has earned a 4.0 grade point average at San Jose State University during Fall or Spring terms.

Deans’ Scholars: Any undergraduate student who has earned a 3.65 or higher grade point average at San Jose State University during Fall or Spring terms.

The minimal load allowed for the award of academic honors is the student’s full program of graded courses or 12 units, CR (Credit) grades are not counted toward the calculation of the grade point average nor toward the 12 unit minimum. Only SJSU courses for which grades are posted, including the clearance of incompletes made during that time period, shall be used.

Recognition of these Honors Scholars through the Honors Convocation was inaugurated at the university in 1962 by the three honor societies - Phi Kappa Phi, Sigma Xi and the Phi Beta Kappa Faculty Club. It is currently under the sponsorship of the University Honors and Honors Programs Committee.

Note. Certain grades are not counted for honors: credit by examination, “overseas” grades, extension courses, “credit” grades and incompletes. Designation as a President’s or Dean’s Scholar does not apply to second baccalaureate, credential or graduate students.

Honors - Outstanding Graduating Senior Awards

Announced each year at Commencement by the University President, the Outstanding Graduating Senior Awards recognize exceptional scholarship and service to the university and community based on the following criteria:

- An overall cumulative GPA of at least 3.75;
- Significant demonstrated SJSU leadership area(s) of university life and/or;
- Significant contributions to the welfare of the university and/or the community, and/or;
- Evidence of a high level of intellectual, artistic, or academic accomplishment, and/or personal contribution as an undergraduate student;
• At least one professional nomination letter submitted by a SJSU faculty or staff member.

To be considered for this honor, visit the Student Affairs website at [www.sjsu.edu/studentaffairs](http://www.sjsu.edu/studentaffairs) and follow the link for Outstanding Graduating Senior Awards or contact the Office of the Vice President for Student Affairs at 408-924-5900.

**Honors - University Honors at Graduation**

Criteria used to determine honors at graduation are those in effect as of the date of graduation. Honors at graduation are only bestowed upon undergraduates.

**Summa Cum Laude** is awarded to those undergraduate students achieving a cumulative grade point average in all university and college work and a cumulative grade point average in all work undertaken at SJSU of not less than 3.85.

**Magna Cum Laude** is awarded to those undergraduate students achieving a cumulative grade point average in all university and college work and a cumulative grade point average in all work undertaken at SJSU of not less than 3.70.

**Cum Laude** is awarded to those undergraduate students achieving a cumulative grade point average in all university and college work and a cumulative grade point average in all work undertaken at SJSU of not less than 3.50.

**Graduation Requirements - Undergraduate**

Candidates for graduation with a baccalaureate degree must satisfy the regulations described in this section, and those outlined by the major department. The Bachelor of Arts and the Bachelor of Science degrees are offered with majors in the several fields listed under Curricula Offered. In addition to the BA and the BS, the Bachelor of Music (BM), the Bachelor of Fine Arts (BFA) degrees are also offered. Specific requirements for degrees in each field are outlined in the departmental sections of this catalog. All candidates for graduation must satisfy the general regulations described on the following pages in this section, as well as those outlined by the major department.

**Graduation Requirement - Academic**

An “All College” average of “C or Better” (2.0), a “C or Better” average earned in all units taken at SJSU (as indicated on the transcript by “SJSU Cum”), a “C or Better” average in both the requirements for the major and the minor (if applicable), a “C- or Better” in each of the four GE basic skills courses (Areas A1, A2, A3, and B4), an aggregate “C or Better” average in the nine units of upper division GE (Areas R, S, and V), and a “C or Better” in Area Z (100W), are required for graduation with a baccalaureate degree. Upon the completion of their programs, credential candidates must have a GPA of 3.0 or higher to be recommended for a credential.

A minimum of 120 semester units of credit must be earned for graduation with the baccalaureate degree. Normally, no more than four units of Individual Studies (180) and/or Directed Reading (184) may count for the baccalaureate degree. Exceptions must have approval from the major department.

All requirements listed here may be met either by passing external examinations (AP, CLEP, or IB), waiver examinations, where available, or by individual course challenge exams, or by course work. Students should note that success in a waiver examination satisfies a requirement but does not yield unit credit. For information about the examinations, contact the [SJSU Testing Office](http://www.sjsu.edu/testing).

Please check the SJSU catalog for any additional academic requirements that are specific to a major.

**Graduation Requirement - American Institutions (AI)**

U.S. History, U.S. Constitution, California State and Local Government. State law requires all students graduating from a CSU campus to demonstrate knowledge of these three areas, also referred to as the American Institutions and Ideals, the Title 5, or the “state code” requirement. Students may complete waiver exams or course work to satisfy the requirements. Consult the General Education Requirements and Courses section for approved courses or the Testing Office for information about the waiver examinations. Students should consult an advisor to determine which of the various course combinations are best for their degree objectives.
Graduation Requirement - Graduation Writing Assessment Requirement (GWAR)

The CSU Graduation Writing Assessment Requirement (GWAR) states that all students must demonstrate competency in writing skills as a requirement for graduation.

All undergraduate students must satisfy the GWAR by either passing a 100W course with a “C or better” (C- not accepted) or by earning a waiver score on the WST. Some departments require the 100W as part of the major degree program regardless of the WST score. A student may also satisfy the GWAR while matriculated at another CSU campus.

All undergraduate SJSU students take the Writing Skills Test (WST). A satisfactory score on the WST (or completion of 100A with a grade of “C or better” (C- not accepted) after failing the WST) is required to enroll in the 100W course designated by the major. The 100W Writing Workshop must be passed with a “C or better” (C- not accepted) when satisfying the CSU Graduation Writing Assessment Requirement. Information on currently available ways to meet this graduation requirement may be obtained from the Testing Office or Academic Advising and Retention Services (AARS).

Graduate students should refer to the section on Graduate Degree - Graduation Writing Assessment Requirement (GWAR)

Graduation Requirement - Physical Education (PE)

It is important that all students admitted to SJSU, regardless of major, have an opportunity to expand their knowledge and skills in physical activities. To accommodate the needs and interests of SJSU students, the Department of Kinesiology offers a diverse selection of activity courses which have the following goals:

- To provide a fundamental understanding of the influence physical activity has on physical and mental well-being;
- To promote development of a repertoire of skills for constructive leisure activity and a physically active lifestyle important to maintaining health;
- To provide an understanding of the guidelines for developing and maintaining physical fitness throughout the lifespan;
- To provide exposure to a variety of lifetime fitness activities and sports; and
- To enhance the student’s liberal arts education and develop a well-rounded individual.

All undergraduate students who matriculate at SJSU, except those majors that are exempt as listed under Major Exemptions [http://info.sjsu.edu/static/policies/majormod.html], are required to complete two units of physical education from Kinesiology/Dance activity courses (University Policy S14-11).

Two distinct activity courses or a single activity course of two or more units may be used to satisfy the PE requirement.

Two units of Intercollegiate Athletics may be used to satisfy the PE requirement.

Veterans who have completed at least one year of active duty in the armed services (Army, Navy, Air Force, Marines or Coast Guard) have satisfied the physical education requirement [http://info.sjsu.edu/static/policies/military-credit.html].

Kinesiology activity courses at SJSU are not repeatable for credit.

To challenge a course that meets the requirement, students must consult the Department of Kinesiology at least one semester prior to graduation.

Graduation Requirement - Residency

For all bachelor’s degrees, including second baccalaureates, a minimum of 30 units shall be earned in residence after matriculation at the campus granting the degree. Twenty-four of these units shall be earned in upper division courses, 12 of the units shall be in the major and 9 units shall be in General Education.

Extension credit or credit by evaluation shall not be used to fulfill any of the 30 units. Winter Session for previously matriculated students earns residence credit; Open University units are not applicable toward the residence requirement.

Graduation Requirement - Upper Division

At least 40 of the total units required for graduation with the bachelor’s degree must be upper division. For the BA, a minimum of 12 units of upper division credit in the major is required and for the BS, a minimum of 18 units of upper division credit in the major is required. Upper division credit will be allowed by the university and applied toward the baccalaureate degree only for SJSU courses numbered 100 or above and for courses from other universities clearly designated as junior or senior level courses.
Graduation Requirement - Catalog Rights

Undergraduate students remaining in attendance in regular sessions at any California State University campus, at any California community college, or any combination of California community colleges and campuses of The California State University may, for purposes of meeting graduation requirements, elect to meet the requirements in effect at the campus from which they will graduate either:

- at the time the student began such attendance, or
- at the time of entrance to the campus, or
- at the time of graduation.

Continuous attendance is defined as enrollment in at least one semester or two quarters in each calendar year. Absence related to an approved educational leave or for attendance at another accredited institution of higher learning is not considered an interruption, providing the absence does not exceed two years. Campus authorities may authorize or require substitutions for discontinued courses and may also require students changing their major or any minor field of study to complete the major or minor requirements in effect at the time of the change. Students who do not maintain continuous enrollment will be held to any new requirements approved by the university at the time of their readmission.

Graduation Requirement - Time Limits

Time Limit

Courses taken to meet degree requirements at San José State University are subject to a time limitation of 10 years. Students are required to meet those requirements in the major in effect no earlier than 10 years prior to receiving the degree. Students with an unusual problem may petition the major department chair for a waiver of the 10-year requirement.

Graduate students should refer to the section on Graduate Degree - Time Limits.

Facilitating Graduation

Effective Spring 2010, any undergraduate or graduate student will be precluded from enrolling in any additional state-supported courses when that student has already met all necessary requirements for the degree for which that student is matriculated. Moreover, students who have met all requirements for graduation prior to any semester in which they are enrolled will be permitted to drop all courses for which they are registered, with little or no penalty, and to graduate at the next available date. Students who have earned more than enough units to graduate but have some remaining requirements to complete, will be advised and precluded from registering in any courses other than those required for a timely graduation.

Units from 4-Year Colleges/Universities

At least 50 of the total units required for graduation with a bachelor’s degree must be earned from 4-Year Colleges/Universities. This is commonly referred to as a maximum of 70 units of Community College academic work that may count toward the minimum 120 units needed for all baccalaureate degrees.

Graduation Application

Candidates for the baccalaureate degree must file an application for graduation at least two semesters prior to the expected graduation date in order to allow time to make up any deficiencies or correct any discrepancies that may delay graduation. At least 85 semester units must be completed before an application for graduation may be submitted. In addition to fulfilling curricular graduation requirements, a student, to be eligible for a bachelor’s degree, must have a grade point average of at least 2.0 (C) in each one of the following categories: all college work (the overall average), all units attempted at SJSU, all units in the major, all units in the minor (if any), and all nine units of upper division GE (Areas R, S, and V).

Undergraduate students need to check with their major departments or their college success centers when they are ready to apply for graduation. Students from specific majors can now apply online for graduation via their MySJSU(link). See this page for guidance: http://www.sjsu.edu/registrar/students/graduation/index.html

Master’s or Ed.D. degree candidates, are available to eligible students through their MySJSU account. Eligible students will be messaged once they are eligible to apply online. A tutorial and video instructions for completing the application are available at www.sjsu.edu/gape/forms/, under Graduation.

Those planning to attend a college or university other than SJSU during the final semester must notify the Office of the Registrar. Courses must be completed by the date of graduation and transcripts received within one month after graduation.
If a candidate is unable to complete the course work as expected, or if the date of graduation is to be delayed for any reason, a Change of Graduation Date form must be submitted, accompanied with the fee, prior to the new expected graduation date.

**College of Business Graduation Applicants**

The College of Business requires that students apply to the Jack Holland Student Success Center. Graduation deadlines and procedures differ from those established by the university. For further information, check with the Jack Holland Student Success Center, BBC 008, 408-924-3435.

**Bachelor’s Degree Candidates**

- You should apply for graduation at least two semesters in advance, after completing at least 85 semester units.
- See major department for specific graduation course and unit requirements.
- File your application no later than the Processing Deadline dates shown below. Submitting your application by the priority processing deadline allows us to review your graduation requirements before Advance Registration ends for your last term of attendance.
- Graduation applications are available at: www.sjsu.edu/registrar/forms/index.html.
- Major/Minor Forms are available from your department office.
- Submit a completed graduation application, Major form (and Minor form as applicable), in a sealed department envelope to the Registrar’s Office, located in the Student Services Center. Incomplete applications will be returned and may cause a delay in graduation.
- Only original signed documents are acceptable.
- All courses and requirements must be completed by the date of graduation and transcripts received within one month after graduation. Any Incomplete (I) or Record Delayed (RD) grade must be cleared before your degree can be awarded. Once your degree has been posted, no grade changes will be made to your record.
- If you are unable to complete the course work, or if the date of graduation is delayed, a “Graduation Date Change Form” must be submitted to the Registrar’s Office. A $10.00 administrative fee must be paid at the Bursar’s Office.

Don’t delay! Apply by the priority processing deadline dates. See www.sjsu.edu/registrar/students/graduation/. Applications will continue to be accepted up to the last day to add classes for the term of graduation; however, delays may occur in the initial and final evaluation of your application and names may not appear in the commencement book. If we receive your application after the final deadline date for the term you are applying, your application will automatically be set up for the next available graduation date.

**Degrees - Conferring**

Degrees are conferred three times a year - in August, December and May - at the close of summer, fall and spring terms. The date of the diploma reflects the term during which the degree requirements were completed. There is one graduation or commencement ceremony each academic year, held at the close of the spring semester. Students who have completed all requirements in the previous summer and fall semester, or expect to complete their degree requirements in the spring semester, are eligible to participate.

**Double Major**

If a student has completed the requirements for two or more majors leading to the same baccalaureate degree (e.g., two B.A. degrees or two B.S. degrees) for the same graduation application period, those majors shall be acknowledged on a single diploma and on the student’s transcripts. Each major, not including courses in preparation for the major, must consist of at least 36 units for Bachelor of Science degree majors, or at least 24 units for Bachelor of Arts degree majors, units that are completely separate and distinct from the other degree. The University has the right to restrict students from pursuing double majors, particularly when resources must be equitably distributed among all students.
Double Concentration

If a student has completed the requirements for two or more concentrations within the same baccalaureate degree (e.g., two concentrations for the same B.S. degree) for the same graduation application period, those concentrations shall be acknowledged on a single diploma and on the student’s transcripts. Each concentration, not including courses in preparation for or in support of the major, generally must consist of at least 12 units that are completely separate and distinct from the other concentration. Individual degree programs may set higher limits for the number of units that are completely separate and distinct from concentration to the other. Exceptions to allow two concentrations with fewer than 12 units unique to each concentration will require the approval of both the appropriate College Associate Dean and the Associate Dean for Undergraduate Studies. The University has the right to restrict students from pursuing double concentrations, particularly when resources must be equitably distributed among all students.

Minors

An undergraduate student may elect to complete a minor. Also, some departments require or recommend a minor as part of the undergraduate degree. The minimum criterion for any minor is 12 units of course work completely distinct and separate from the course work in one’s major. At least 6 units must be upper division and at least 6 units must be taken at SJSU. The student must achieve a minimum aggregate GPA of 2.0 for all coursework required for the minor (University Policy S16-4). Courses designated as “preparation for the major” may be included in the minor and are considered distinct from the major. If a minor is completed after a degree has been granted, the minor is not recorded on the student’s permanent record.

Minors are only available to undergraduate students.

Double Minors

If a student has completed the requirements for two or more minors, each minor must independently satisfy the criteria for a single minor. Additionally, each minor must include a minimum of 12 units of course work completely distinct and separate from the course work in the other minor(s).

Special Major

The courses offered by the Graduate and Undergraduate Programs Office under University Studies (UNVS) promote leadership, integrated and applied interdisciplinary academic experiences for students.

The office also sponsors undergraduate degrees as a Special Major, which is an individually designed course of study leading to a BA or BS degree. The Special Major is designed for situations in which an existing university-level SJSU undergraduate degree major does not adequately accommodate academic professional aims. Students who complete a Special Major shall be able to demonstrate the characteristics of “intentional learners” who can adapt to new environments, integrate knowledge from different sources, and continue learning throughout their life.

The Special Major is an individually designed, interdisciplinary course of study leading to a BA or BS that gives a student who has a specific educational objective the opportunity to accomplish that goal. It is not to be used to bypass normal graduation requirements or projected programs of the University, nor to substitute for a major in which a student is having academic difficulty.

The proposed course of study must be a coherent program organized around an academic theme. Students who complete a Special Major shall be able to demonstrate: “the ability to analyze an issue or problem, integrating at least two disciplinary perspectives.” In addition, students identify two or more student learning outcomes related to their specific areas of study in consultation with a major faculty advisor. They demonstrate their attainment of the learning outcomes through a portfolio or senior project completed in a capstone course.

Applicants must both a cumulative and SJSU GPA of at least 2.75 and have sixty units (upper division standing) and at least one year of academic work still to be completed to meet minimum degree requirements. Special Majors are considered on a case-by-case basis. Approval is based on the academic merit of the proposed course of study, the applicant’s proposed rationale and potential for successful completion of the program, and the ability of the university to support the proposed program. Students apply for consideration for the Special Major through the Office of Graduate and Undergraduate Programs, ADM 159. For more information visit www.sjsu.edu/gup/ugs/students/specialmajors/index.html

Second or Additional Baccalaureate Degree

Effective Fall 2011: Postbaccalaureate students who have earned a first baccalaureate from a regionally accredited U.S. college or university, the second or additional baccalaureate degree will be awarded when the student has filed for graduation with Office of the Registrar and a graduation check determines that all major requirements have been satisfied. For such students, residence, university, GE, American Institutions, and PE requirements normally associated with first baccalaureate degrees are not applicable to second or additional baccalaureate degrees.
Continuous Attendance and Catalog Rights

Undergraduate students acquire “catalog rights” with respect to the requirements for a degree program by maintaining continuous attendance. A student who has been enrolled either at a California community college (CCC) or in regular sessions at a CSU campus for at least one semester or two quarters of consecutive calendar years is considered to be in “continuous attendance.” Once a student has established his or her “catalog rights,” an absence related to an approved leave of absence or for attendance at another accredited institution of higher learning (for undergraduates only) shall not be considered an interruption, providing the absence does not exceed two years.

This concept is important because continuous attendance affects the requirements a student must meet to graduate from a CSU campus. SJSU issues a new on-line catalog every year, which is the official record of all the degrees and degree requirements for the programs at SJSU. These degree requirements may change from one catalog to the next.

Students who have been in continuous attendance may meet the SJSU campus graduation requirements in force

- at the time they began continuous enrollment at a CCC or other CSU campus; or
- at the time they entered SJSU; or
- at the time they graduate from SJSU.

By maintaining continuous attendance and selecting option (1) or (2), students can be assured that their SJSU campus graduation requirements will not change. Their right to choose one of these options is called “catalog rights.” SJSU will use the matriculation term (i.e., option 2) as the initial option (default) for all students; however, students transferring from a CCC or CSU campus, who would benefit from an earlier term based on continuous enrollment, may request option (1) or (3) from their departments or the Office of the Registrar.

If a student follows an earlier version of a program in which his or her department has discontinued or modified required courses, the department may authorize appropriate substitutions. If while enrolled a student changes major, concentration, or minor, he or she may be required to complete the major or minor requirements in effect at the time of the change. However, he or she may continue to follow the university, General Education, and mathematics and writing requirements listed in the university catalog for which “catalog rights,” are claimed.

SJSU affords graduate students the same rights as indicated above with the exception of the references to CCCs.

Graduate Credit for Units Completed as a Graduating Senior

Seniors at San José State University may petition through their major departments to receive graduate credit for 200-level (graduate) courses completed in their final two undergraduate semesters, provided the following conditions are met:

1. No more than 15 semester units are needed to complete a baccalaureate degree at San José State University.
2. None of the courses to be taken for graduate credit is required for or used to satisfy requirements of the bachelor’s degree, including unit requirements.
3. The student has at least a 2.5 grade point average in all coursework in upper division standing completed at San José State University.
4. The student agrees to enroll for no more than the maximum load of 15 units for the term in which this work is taken.
5. The student has completed the graduation application check in Evaluations, Student Services Center.
6. The student agrees not to take letter-graded courses for “CR/NC” when graduate credit is requested.
7. If admitted to a graduate degree program, the student agrees that a maximum of 9 units of transfer credit of any type can be applied to a graduate program. That would include graduate credit earned through this process in addition to units taken in the period between conferral of the bachelor’s degree and the start of matriculation as a graduate student. In either case, transfer credit must be approved by the appropriate advisor of the graduate program.
This policy applies solely to graduate classes taken at SJSU; courses taken at other universities or undergraduate classes taken during the undergraduate career do not qualify for transfer into an SJSU graduate program. If the student subsequently matriculates into a graduate program at SJSU and the courses are approved by the program’s graduate advisor, the units will be transferred into the graduate career. The grade points will not be included in the student’s cumulative grade point average after admission to the Graduate Division.

These policies also apply to students in second baccalaureate status. No courses taken while a student is in second baccalaureate status shall be awarded graduate credit unless the student is within 15 semester units of qualifying for award of the second baccalaureate degree and meets the criteria specified above (including enrollment in all units required for completion of the second baccalaureate degree).

It is recommended that students obtain permission for future graduate credit in writing before enrolling in the graduate classes by means of the Request for Validation of Transfer Credit form available at www.sjsu.edu/gape/forms.
Graduate Information and Requirements

We appreciate your interest in pursuing a graduate career at San José State University. In this section you will find out more about SJSU, the programs we offer, our application process and requirements, and important deadlines and forms related to applying for graduate admission. Some additional external links that might be of interest to prospective students are also listed, including information about housing and other available services.

College of Graduate Studies

The College of Graduate Studies helps graduate programs and their faculty and students succeed. The College of Graduate Studies supports program development, advising faculty in transforming existing degree and certificate programs or building new ones at the post-baccalaureate, master’s, or doctoral level. College of Graduate Studies also is a resource for students seeking scholarships or facing special challenges such as probation or disqualification. The college helps maintain academic integrity through the fair and consistent administration of various graduate policies, including those issued by the Chancellor and by the university’s Academic Senate. Its Graduate Admissions and Program Evaluations (GAPE) division supports students as they enter and work their way through various degree requirements. The College of Graduate Studies interprets and administers the policies and procedures outlined in the sections that follow.

Admission - Graduate Programs (Doctoral, Master’s, Credential, and Advanced Certificates)

All graduate applicants (new and returning, including disqualified students who have an approved Program of Study agreement with their graduate department) must submit a complete graduate application by applying through the CSU Cal State Apply system at calstate.edu/apply. A $55 nonrefundable fee is required to submit the university application. Applicants for graduate programs are limited to the choice of a single program on each application. Those wishing to take SJSU classes in any capacity other than through our extension programs (e.g., Open University) must apply for admission to the university and, for most programs, to the department offering the degree in which he or she is interested. After formal admission, the applicant must enroll in classes in the first term of admission to retain active matriculation status.

Former students who have previously attended SJSU and have had a break of two or more consecutive semesters in their enrollment (not counting summer/winter session) must apply for readmission to regain their matriculation status. A former student of SJSU, whether returning after an official leave of absence or continuing immediately after receiving a baccalaureate or master’s degree, must also apply for admission. Reapplication by a previously matriculated student also results in loss of catalog rights. Therefore, returning students are subject, at departmental discretion, to current department policies and requirements.

Graduate Admission - Prospective Students

Students intending to pursue graduate work at San José State University may obtain pertinent information from a variety of sources. Careful reading of several publications will save time and prevent many difficulties that often arise due to lack of information. Publications recommended are:

- SJSU Catalog - The listing of regular session courses offered at SJSU and policies and regulations by which the academic programs are governed,
- Graduate Admissions & Program Evaluations (GAPE) at sjsu.edu/graduateadmissions,
- College of Graduate Studies at sjsu.edu/cgs, and
- various departmental publications available from department offices and advisors.

The prospective student is encouraged to consult an academic advisor for detailed information about his or her specific program of interest. Persons assigned responsibility for advising students in specific graduate programs are listed in various sections of the SJSU catalog. In addition, the Graduate Admissions website provides detailed information about university admission procedures and requirements.

Graduate Admission - CSU Application Procedures and Policies for Graduate and Post-Baccalaureate

All graduate applicants and post-baccalaureate (e.g., doctoral applicants, master’s degree applicants, those seeking educational credentials or certificates, and where permitted, holders of baccalaureate degrees interested in taking courses for personal or professional growth through regular or special session but not through Open University; students who have stopped out for more than one semester; students who have been disqualified) must file a complete graduate application as described in the graduate admission materials at www.calstate.edu/apply.
 Applicants who completed undergraduate degree requirements in the preceding term are also required to complete and submit an application and the $55 nonrefundable application fee. To be assured of initial consideration by more than one campus, it is necessary to submit separate applications (including fees) to each. All CSU applications must be submitted online at www.calstate.edu/apply. An acknowledgement will be sent to the applicant when the online application has been submitted.

Graduate Admission - Requirements

Graduate and post-baccalaureate applicants may apply for a degree objective, a credential or an advanced certificate objective. Depending on the objective, the CSU will consider an application for graduate admission as follows:

- General Requirements - The minimum requirements for admission to graduate and post baccalaureate studies at a CSU campus are in accordance with university regulations as well as Title 5, Chapter 1, Subchapter 3 of the California Code of Regulations.
- Specifically, a student shall at the time of enrollment: (1) have completed a four-year college course of study and hold an acceptable baccalaureate degree from an institution accredited by a regional accrediting association, or shall have completed equivalent academic preparation as determined by appropriate campus authorities; (2) be in good academic standing at the last college or university attended; (3) have earned a grade point average of at least 2.5 on the last degree completed by the candidate or have attained a grade point average of at least 2.5 (A=4.0 grading scale) in the last 60 semester (or 90 quarter) units attempted; and (4) satisfactorily meet the professional, personal, scholastic, and other standards for graduate study, including qualifying examinations, as appropriate campus authorities may prescribe. In unusual circumstances, a campus may make exceptions to these criteria.

Students who meet the minimum requirements for graduate and post-baccalaureate studies may be considered for admission in one of the four following categories:

- Graduate Classified - To pursue a graduate degree, applicants are required to fulfill all of the professional, personal, scholastic and other standards, including qualifying examinations, prescribed by the campus; or
- Graduate Conditionally Classified - Applicants may be admitted to a graduate degree program in this category if, in the opinion of appropriate campus authority, deficiencies may be remedied by additional preparation; or
- Post-Baccalaureate Classified, e.g. admission to an education credential program - Persons wishing to enroll in a credential or certificate program will be required to satisfy additional professional, personal, scholastic and other standards, including qualifying examinations, prescribed by the campus; or
- Post-Baccalaureate Unclassified - To enroll in undergraduate courses as preparation for advanced degree programs or to enroll in graduate courses for professional or personal growth, applicants must be admitted as post-baccalaureate unclassified students. By meeting the general requirements, applicants are eligible for admission as post-baccalaureate unclassified students. Admission in this status does not constitute admission to, or assurance of consideration for admission to, any graduate degree or credential program. (Most CSU campuses do not offer admission to unclassified post-baccalaureate students.)

(These and other CSU admission requirements are subject to change as policies are revised and laws are amended. The CSU website www.calstate.edu and the CSU admissions portal www.calstate.edu/apply are good sources for the most up-to-date information.)

Graduate Admission - Requirements for International Students

The CSU must assess the academic preparation of international students. The designation, “international students” includes those who are seeking to hold a student visa, hold U.S. visas as students (F-1), exchange visitors (J-1), or are in other nonimmigrant classifications and have completed their prior education in institutions outside of the U.S.

The CSU uses specific requirements and application submission dates in the admission of international (F-1)/J-1 seeking) students. Verification of English proficiency (see the section Admission - International Student - English-Language Proficiency Exam Requirement), financial resources, and academic performance are all important considerations for admission. World Education Services (WES) are used in lieu of academic records from international institutions. WES evaluations must be on file by the stated deadlines for the admission term. Although WES evaluations are used for the authentication of academic documents, the evaluation of credentials and CPA will be conducted by the evaluation team at the Graduate Admissions & Program Evaluations (GAPE) office. See www.sjsu.edu/graduateadmissions/deadlines/ for more information.
Graduate Admission - Test Requirements

New graduate students enrolling at SJSU who matriculate with graduate degree objectives may be required to take one or more parts of the Graduate Record Examination (GRE). Students with graduate objectives in Business (MBA, MSTax, MSAcc, MSTmMgt) are required to take the Graduate Management Admission Test (GMAT). Some departments may require a locally developed qualification examination in their subject matter areas. Test requirements can be viewed at [www.sjsu.edu/graduateadmissions/admission-requirements/test-requirements/index.html](http://www.sjsu.edu/graduateadmissions/admission-requirements/test-requirements/index.html), and on graduate program web pages.

Applications and information about dates of administration for the GRE and GMAT are available in the Testing Office.

Graduate Admissions - English Language Proficiency Requirement

All graduate and post-baccalaureate applicants, regardless of citizenship, whose native language is not English and whose preparatory education was principally in a language other than English must demonstrate competence in English. SJSU does not accept English-medium of instruction as a substitute for an English-language proficiency exam such as TOEFL, IELTS, or the Pearson’s Test of English. Letters from applicants or institutions will not be accepted. Note that scores lower than the minimum will not be accepted and waivers will not be given for lower scores. Also note that a few of our graduate programs do require a higher minimum score than what is posted by the university at [www.sjsu.edu/graduateadmissions/admission-requirements/test-requirements/index.html](http://www.sjsu.edu/graduateadmissions/admission-requirements/test-requirements/index.html).

Graduate Admission - Transcript Submission

Transcripts submitted for admission purposes must be official and sent directly from the originating school or college to Graduate Admissions & Program Evaluations (GAPE), San Jose State University, One Washington Square, San Jose, CA 95192-0017. International applicants must request WES evaluations to be sent directly to San Jose State University. Unofficial transcripts submitted via the student are not acceptable for this purpose. Records submitted become the property of the university and will not be released to the student. If a student does not fully complete an application and enroll, the records will be kept on file for about one year and then destroyed.

Graduate applicants must submit to GAPE one official transcript or WES evaluation from each accredited institution attended. Failure to report to the university on the admissions application all previous college-level enrollment and to provide transcripts certifying that enrollment are regarded as serious infractions of university policy and may be punishable by permanent separation from the university. Some departments may also require applicants to file additional transcripts with their graduate advisor. Program requirements are located on departmental websites, which can be accessed by clicking on the program name at [www.sjsu.edu/graduateadmissions/admission-requirements/degree-program-requirements/index.html](http://www.sjsu.edu/graduateadmissions/admission-requirements/degree-program-requirements/index.html).

Individuals currently enrolled in courses at the time of their application for admission are required to report of work in progress in the university Cal State Apply application by recording the department course number, course title, and units attempted and to submit an official transcript of the work when it is completed.

Graduate Admissions and Program Evaluations (GAPE)

GAPE processes the admission for all graduate and teaching credential programs. For most programs, the admissions process is two-step, whereby applicants apply to the university and the department program. Applicants must first pass CSU eligibility and then pass the admission criteria of the department program.

For new students, the GAPE office
- Receives all university applications, including supplemental materials such as transcripts, residency information, and declaration of finances
- Reviews documents for completeness
- Refers applications that meet minimum CSU eligibility requirements to departmental graduate advisors
- Sends out official letters of acceptance for those applicants accepted by both the university and the academic program.

For continuing students, evaluators assigned to each degree program review advancement to candidacy and graduation requests for accuracy and alignment with policies and procedures of the university and the academic programs.

Graduation System for Graduate Work

Traditional letter grades are used for all courses taken by graduate students except for field work, thesis, project, individual study and internship courses, which are usually graded Credit/No Credit or Credit/No Credit/Report in Progress. Incomplete grades are not permitted for thesis or project courses, and Credit may not be given for a thesis or project course before completion of the coursework. Graduate students do not have the option of choice between the traditional or non-traditional grading system. A grade of Credit in a graduate-level course indicates performance by the student equal to a letter grade of “C” or above.

The cumulative GPA for the master’s degree (3.0 minimum) includes all letter-graded work in 100-level or 200-level courses completed within the preceding seven years and for which the student received graduate credit, excluding transfer courses taken at another institution and those taken as an undergraduate at SJSU. Both the cumulative GPA and GPA of all of the course grades on the student’s candidacy form, with the exception of non-Open University transfer courses, must be at least at the 3.0 level. Both the cumulative GPA and the GPA of all courses on the candidacy form must be a minimum of 3.0.

The cumulative GPA of the graduate student is computed by dividing the total number of grade points earned by the total number of graded units attempted at SJSU, excluding Open University courses that are not counted as degree requirements, subsequent to enrollment in the graduate school.

Academic Standards - Graduate Students

To determine a student’s standing, whether “good,” probationary or disqualified, quality of performance and progress toward degree completion are considered based on units attempted, grade points earned and grade point average (GPA).

Grade points are assigned as follows:

A, A+ ......................4.0
A-..........................3.7
B+..........................3.3
B ...........................3.0
B-..........................2.7
C+..........................2.3
C ...........................2.0
C-..........................1.7
D+..........................1.3
D ...........................1.0
D-..........................0.7
F ...........................0.0
WU ..........................0.0
I ...........................0.0
IC ..........................0.0
RD ..........................0.0
RP ..........................0.0

Courses for which the symbols “CR,” “NC,” “RP,” “I,” “W,” and “RD” have been assigned do not enter into the GPA computation. Also excluded are lower-division courses and most transfer courses.
Disqualification and Probation - Graduate Students

Probation - Academic - Graduate

Graduate students enrolled in a degree program, credential program or certificate program are subject to academic probation if the SJSU cumulative GPA falls below 3.0 (grade of “B” on a 4.0-point scale) in all units attempted subsequent to matriculation in either conditionally classified or classified status. Courses taken at the lower-division level will be listed on the transcript but cannot be used for graduate degree credit and are not included in the GPA computation. Courses taken through SJSU Open University before matriculation will also be listed on the transcript and may, with advisor consent on the candidacy form, be used toward the graduate degree if adhering to the transfer course limitation and residency requirement. They will be figured into the GPA for advancement to candidacy and for the candidacy GPA computation at the completion of the program. All SJSU Open University course grades will be included in the SJSU Cumulative GPA, which is used to determine academic standing for degree conferral. However, courses transferred into the graduate program from other institutions or from the SJSU undergraduate career will not count in the cumulative GPA computation.

At the completion of the degree program, should the SJSU cumulative GPA fall below 3.0 at the same time that the candidacy GPA is above 3.0, the student’s academic standing will reflect the former only. In this unusual circumstance, the student or program must make the Associate Dean of Graduate Studies aware of this discrepancy.

Each Winter, Spring, Summer and Fall term while on probation, the student must achieve a 3.0 GPA in the semester’s work to avoid academic disqualification. To avoid disqualification, at least one graded course must be taken each Spring and Fall semester, while on probation. The student remains on continued probation as long as each individual term’s work is equal to or above the 3.0 threshold but the overall GPA is still below 3.0. Probation is cleared when the SJSU cumulative GPA rises to 3.0 or better in any subsequent Winter, Spring, Summer or Fall term.

Graduate students are eligible to repeat courses with letter grades lower than “B” or with grades of “NC,” “WU,” or “IC” up to a total of 9 units, no matter how many units there are in the individual degree program. Exceptions may be made by the Associate Dean of Graduate Studies in this course repetition limit with respect to high unit clinical or field courses, as long as the exceptions do not violate probation and disqualification policies established in the major (see sections on Probation - Administrative - Graduate and Disqualification - Administrative - Graduate). Repeated and elective courses may not be taken through Open University. Elective classes already taken in the degree program may be added to the candidacy form by means of the Request for Course Substitution in Graduate Degree form. However, the two courses will be grade averaged, as courses, once graded, cannot be removed from the candidacy form. The total allowable units that can be added as either repeated classes or substituted electives can be no greater than 30% of the total number of units for the individual degree for the entire graduate career. To clarify, in a 30-unit degree program, a student may add electives or repeat classes only up to a total of 9 units.

Failure to Achieve a 3.0 Grade Point Average on Completed Graduate Degree Program

If a master’s candidate does not complete the graduate degree program with a minimum 3.0 GPA in both the overall coursework and the candidacy coursework, the student’s major department may terminate the candidacy or permit completing additional courses in an attempt to raise the GPA in the program to the minimum 3.0 threshold. Elective courses may be added to the candidacy form for grade averaging if approved by the graduate advisor. Alternatively, courses can be repeated up to a limit of 9 units (per University Policy F08-2). In the entire graduate career, the combination of added elective units and repeated units cannot exceed 30% of the total number of units in the major. Failure to raise the candidacy and cumulative GPA to 3.0 after completing this additional coursework will result in a termination of the student’s candidacy and an inability to earn the degree. Thus the student would be academically disqualified without the ability to be reinstated by normal means.

Credential candidates who fail to achieve a 3.0 GPA upon completion of the credential program will be precluded by the department from attempting additional coursework and therefore not be recommended for an award of a credential by the State of California.

Probation - Administrative Academic - Graduate

Per Sections 41300.1 Title 5, graduate student may be placed on probation or may be disqualified by appropriate campus authorities for unsatisfactory scholastic progress regardless of cumulative grade point average or progress points. Such actions shall be limited to those arising from repeated withdrawal, failure to progress toward an educational objective and noncompliance with an academic requirement...” Therefore, regardless of the cumulative GPA, administrative academic probation or disqualification can be imposed by the university.
Most instances of administrative academic probation and disqualification result from probation in and disqualification from the graduate major. Thus despite maintaining an SJSU cumulative GPA of 3.0 or better, a graduate student’s academic performance in the major may fall below the minimum standards established in that major. In these cases, while students remain in overall good standing with the university, they are subject to probation in and disqualification from the graduate major. Departments have an obligation to inform students of these policies.

In most cases, a direct reassignment from good standing in the major to disqualification from the major is prohibited. In other words, at least one semester of probation in the major is required prior to disqualification from the major. By the same token, there must also be a way of returning from the probationary status to good standing. Exceptions to these regulations are described below under Disqualification - Administrative Academic - Graduate.

The department and university may impose administrative academic probation for any of the following reasons:

1. Failure to progress satisfactorily toward the degree or other program objective, including that resulting from assignment of 9 units of “NC,” when such failure appears to be due to circumstances within the student’s control, failure to pass writing requirements, or failure to take a reasonable number of courses in the student’s own degree program.
2. Failure to comply, after due notice, with an academic requirement or regulation that is routine for all students or a defined group of students (examples: failure to complete a required CSU or campus examination, failure to complete a required practicum, failure to make satisfactory progress in the academic program, failure to put together a graduate committee of qualified individuals in programs that require a committee).
3. Failure to achieve a set of academic standards of the department.
4. For example, a program might require the achievement of grades of “B” in every class or in particular classes with a stipulated number of repetitions permitted. Similarly, an acceptable standard would be to require a “CR” in field, student teaching, or internship courses with a stipulated number of “NC” grades allowed for repetition.
5. Programs may restrict a student to two attempts of any course offered by the program. Cohort programs may require that a minimum number of courses/units be taken each semester in order to best use resources or to ensure that the program is completed while student knowledge is still current. A maximum number of units can be set for students on probation.

When such action is taken, the student will be notified in writing and provided with the conditions for removal from probation and the circumstances that would lead to disqualification should probation not be removed.

Discontinuation from the University - Graduate

Students who fail to register for classes in two successive semesters, and thus stop out, are placed in a discontinued status that requires readmission to the university and program before being permitted to enroll again. This policy also applies to students who leave the university after having registered for classes but who do not officially withdraw or withdraw from all courses after the semester drop deadline. The courses will be assigned a grade of “WU” (denotes unauthorized drop or withdrawal). No personnel actions, grades, or transcript services will be permitted until all financial obligations, such as unpaid fines, have been settled. If the student fails to return the semester immediately following withdrawal, reapplication for admission will be necessary at www.calstate.edu/apply.

The exception to this policy is for students who file for a formal leave of absence. See the description of the options and regulations governing leaves in this catalog under Leave of Absence and Withdrawal.

Disqualification - Academic - Graduate

A graduate student who is on academic probation is academically disqualified if he or she fails to earn a 3.0 or better term GPA each Winter, Spring, Summer or Fall term until the required 3.0 cumulative GPA is established. This requires enrollment in at least one letter-graded course each Spring or Fall semester (but not Winter or Summer term) that the student is on probation. Teaching credential candidates are subject to the GPA dictates of the State Department of Education. Credential candidates will be notified of those requirements by their department within the College of Education in which they are seeking their credential preparation. At this time, the minimum GPA requirement matches that of the graduate division as a whole, that is, the 3.0 level. Credential candidates who fail to meet this standard are academically disqualified and are not eligible for reinstatement. Similarly, if at the time of completion of all credential requirements, a student’s candidacy GPA or cumulative GPA is below the 3.0 threshold, the student is academically disqualified and will not be afforded the option of repeating credential courses to raise the GPA.
For master’s candidates who complete all minimum degree requirements but fail to achieve a 3.0 GPA, the department may exercise its option to terminate the candidacy (see Failure to Achieve a 3.0 GPA on Completed Graduate Program). The department may also allow the student to repeat classes within the university limit of 9 units per graduate career or to add (via grade averaging) elective courses. The total units in the added courses and repeated courses (100 and 200 level coursework) cannot exceed in the entire graduate career 30% of the units of the degree program’s total. If a student fails to raise the candidacy and SJSU cumulative GPA to 3.0 after these measures, he or she is academically disqualified without a possible reinstatement.

With the exception of the scenario described in the paragraph above, reinstatement can be applied for (via the Graduate Petition for Reinstatement; see Reinstatement - Disqualification - Graduate) following a first disqualification at the graduate level. Departments have the option of reinstating or refusing to reinstate, but if the graduate student does garner all signatures of approval on the petition and fulfills the requirements for reinstatement (e.g., through passage of the Program of Study), then reinstatement will be granted; in addition, if reinstatement is achieved, the student is guaranteed readmission to the program when he or she reapplies for a future term.

After a second disqualification at the graduate level, reinstatement will not be granted and the student’s candidacy will be terminated.

Disqualification - Administrative Academic - Graduate

Upon notice by the coordinator of the graduate program in which a student has been placed on administrative academic probation, the student may be administratively academically disqualified from further attendance by the Associate Dean of Graduate Studies if the conditions for removal of administrative academic probation are not met within the period specified.

As mentioned in the section on administrative academic probation, a probationary period must normally precede a disqualification. However, exemptions to this general rule include the following:

1. In clinical courses, laboratory courses, student teaching assignments, or other types of programmatic requirements, there may be such serious concerns about the safety or well-being of the student, other students, clients, patients, and so forth that repetition of the courses is not reasonable. For such courses or programmatic experiences, departments may establish “no repeat” policies, i.e., a course may not be repeated if not passed on the first attempt. In clinical or lab settings in which safety or well-being are severely compromised, an instructor may disenroll a student from the course, which may lead to disqualification from the major.

2. A program can disqualify a student without a probationary period for behavior that fails to comply with professional standards of conduct appropriate to the field of study. This conduct could occur in or out of class. Examples include threatening behavior, repeated disruptions of classes that interfere with the educational opportunities of other students and repeated acts of professorial disrespect, badgering, rudeness, interruptions and verbal or written abuse.

3. Conditional acceptance to a program is, in effect, acceptance under probation in the major. Typically, a specified set of courses or requirements must be passed prior to attaining good standing in the program. There may be time limits or unit limits established to satisfy the conditions, which, if not met, may lead to disqualification from the major degree program without an intervening term on explicit probation. Cohort programs must provide in their policies a reasonable accommodation for students who must stop out for legitimate reasons.

In most cases (unless stipulated by the program in writing), graduate students administratively academically disqualified from their majors have no means for reinstatement. However, unlike academic disqualification, reinstatement and readmission are not absolutely necessary for continuation at the university after administrative academic disqualification. If a student finds another program willing to accept him or her within one semester, an Application for a Change of Graduate Program form can be filed and enrollment can resume following formal acceptance into the new program. SJSU does not allow an “unclassified status” at the graduate level, and thus a student must be accepted into some program to register for courses at the university other than through Open University. If more than one semester elapses from the point of disqualification, the student will be considered to have stopped out of enrollment and will be required to apply for readmission if a second department indicates willingness to allow a transfer.

Disqualification - International Students - Graduate

To maintain their legal status in the U.S., international students must be matriculated within a degree program. After disqualification from SJSU, international students must transfer to another institution to maintain their legal status. Enrollment in Open University alone does not qualify them for the immigration document needed to remain in the U.S. Disqualified international students who have transferred out to another university may enroll in Open University for a program of study in order to be academically reinstated but must seek immigration reinstatement from SJSU. Disqualified international students must speak with an international student advisor as soon as possible.
**Disqualification and Probation - Appeal - Graduate**

Students may appeal their probation or disqualification by petitioning the Academic Disqualification and Reinstatement Review Committee after the programmatic appeal process has been exhausted. The student should begin the appeal process by consulting with the graduate advisor. The appeal, in writing to the Associate Dean of Graduate Studies, should contain a description of actions by the department contrary to departmental rules or university policy or an explanation of extenuating circumstances that led to the action.

The student must present documentation- for example, physician’s letters, police reports, and/or transcripts- that the circumstances were beyond his or her control, that they disrupted previously satisfactory scholastic performance, and that they no longer affect the student’s academic work. The Associate Dean College of Graduate Studies has the authority to deny further appeal on the basis of reasonable grounds for appeal. If grounds exist, a subcommittee of the Academic Disqualification and Reinstatement Review Committee will in turn hold a formal hearing to confirm or rescind the probation or disqualification.

**Reinstatement - Disqualification - Graduate**

Following notice of disqualification, the graduate student should obtain a **Graduate Petition for Reinstatement**. The form indicates that there are four categories by which a student can be reinstated: extenuating circumstances, special consideration, grade change and program of study.

Graduate students may appeal their probation or disqualification by petitioning the Academic Disqualification and Reinstatement Review Committee after the programmatic appeal process has been exhausted. The student should begin the appeal process by consulting with the graduate advisor. The appeal, in writing to the Associate Dean College of Graduate Studies, should contain a description of actions by the department contrary to departmental or university policy or an explanation of extenuating circumstances that led to the action. The student must present documentation- for example, physician’s letters, police reports, and/or transcripts- that the circumstances were beyond his or her control, that they disrupted previously satisfactory scholastic performance, and that they no longer affect the student’s academic work. The Associate Dean College of Graduate Studies has the authority to deny further appeal on the basis of reasonable grounds for appeal. If grounds exist, a subcommittee of the Academic Disqualification and Reinstatement Review Committee will in turn hold a formal hearing to confirm or rescind the probation or disqualification.

**Raising the SJSU Cumulative GPA to 3.0 or Better**

The SJSU cumulative GPA can be raised through SJSU Open University coursework as part of a Program of Study (see below) if the graduate advisor approves of the transfer of the upper-division classes into the degree program. In addition, retroactive (after the last day of classes) actions by students, such as completion of Incomplete (“I”) grades or course drops, can also raise the SJSU cumulative GPA.

**Extenuating Circumstances**

Similar to the appeal process for probation or disqualification, a request for reinstatement due to extenuating circumstances must meet the conditions indicated above for that process. The petition is submitted along with evidence of the circumstances and their role in the decline in scholastic performance. After securing the requisite signatures, the form is submitted to the Associate Dean College of Graduate Studies for a final decision.

**Special Consideration**

This category is reserved for individuals who have been absent from the university for five or more years and who have in that time achieved a renewed sense of purpose through job activities or through increased maturity that would prompt a greater chance of academic success. Often this request is accompanied by a switch in major from that in which the disqualification occurred.

**Change of Grade**

If a grade that was changed results in an increase in the semester GPA or in the cumulative GPA to 3.0 or above, the student may qualify for reinstatement in this category. The **Change-of-Grade Form** must be submitted by the department office directly to the Office of the Registrar by the drop deadline of the following spring or fall semester. Extension of this deadline will be considered only when there is documentation of the student’s attempt(s) to contact both the instructor and the department chair and only when the late submission of the **Change-of-Grade Form** is clearly shown to be beyond the student’s control. If these conditions are met, the disqualification (or probation) will be rescinded. If the conditions are not met, even if the grade is subsequently changed and the GPA elevated, the probationary or disqualified status will remain unchanged. Note that a course or semester withdrawal is not considered to be a grade change, and reinstatement in this category would not be appropriate.
Program of Study

The most common grounds for reinstatement is the completion of a program of study. A student must confer with the graduate advisor to develop a schedule of classes appropriate to the student’s major. The courses must amount to a minimum of 6 and maximum of 9 units per semester, and all must be taken in a single semester. They must be letter graded, upper division (100-level), and taken through the SJSU Open University or SJSU’s Extended Studies winter or summer session. The 100-level courses may or may not be part of the graduation requirements for the student’s degree program. The advisor may require more than 6 units of course work. Graduate (200-level) courses are not permitted on the program of study, and disqualified students cannot enroll in 200-level courses. Under no circumstances will courses be accepted that were taken prior to approval of the program of study via submission of the Graduate Petition for Reinstatement. Also precluded from the program of study are courses taken at another university, 300-level or 400-level or 500-level courses, and lower-division courses. If the student plans to pursue a different degree program upon readmission to the university, the program of study must be applicable to the new major, be developed in conjunction with the graduate advisor of the new major, and demonstrate the student’s capacity to complete the new graduate degree requirements. If a course on an approved program of study becomes unavailable, another reinstatement petition must be submitted and approved immediately after enrollment in a substitute course. Once the program of study has been completed such that the student earns a minimum grade point average of 3.3 (“B+”), he or she will be reinstated and, after reapplication to the university, readmitted to the university and department. Reinstated students cannot be denied admission on the basis of their lack of good standing.

Reinstatement is not allowed for a second disqualification. Unless extenuating circumstances can be cited that result in rescinding the second disqualification, a Graduate Petition for Reinstatement will not be accepted from students who have been disqualified more than once.

Unless the disqualification is rescinded as above, reinstated students must apply to the university and department for readmission. Reapplication via www.calstate.edu/apply can be done during the semester in which the program of study is underway or in which the reinstatement petition is being considered. The application will be placed on hold at Graduate Admissions and Program Evaluations until the program-of-study grades are posted and students are reinstated. Under most circumstances, a department is expected to readmit students who have successfully completed programs of study signed off by that department. Disqualified, reinstated students seeking readmission are, nevertheless, subject to the same enrollment limitations and admission application requirements as all other applicants.

Readmission - Graduate

A graduate student readmitted after academic disqualification most often retains a sub-3.0 GPA and, therefore, remains on continued probation until the cumulative graduate GPA is raised to a minimum of 3.0. While disqualified, the graduate student has no capacity, outside of possible degree-satisfying courses taken as part of a program of study, to raise the GPA. Unlike an undergraduate in a disqualified status, courses taken by a graduate student through Open University or at other institutions during this period are not counted in university GPA calculations, except in the case of the program of study courses that are applicable to the degree program. At that point, the probationary status is removed, and a subsequent decline in cumulative GPA below 3.0 results again in probation. If while on probation, including following reinstatement, a student fails to achieve a term GPA equal to or above 3.0 in any Winter, Spring, Summer, or Fall term, he or she is disqualified a second and final time.

Disqualified students lose their privileges for course registration and so are effectively removed from the university. Readmission differs from reinstatement. An academically disqualified student may apply for and be granted reinstatement. But to continue with class enrollment requires that he or she also be readmitted into the university. Readmission is possible only after formal reapplication through Cal State Apply, university review, and acceptance by your former department.

The student can reapply as early as the term following a first disqualification, even if reinstatement has not yet been achieved. The university will make special arrangements, before an official term begins, for former students who wish to return to their studies. The Associate Dean College of Graduate Studies should be contacted if these circumstances apply.
Graduate Work in Special Session

Special session is often confused with Open University (see section below). Although both are administered by the College of Professional and Global Education (Formerly College of International & Extended Studies), they are different programs.

Special session classes are offered on a selective basis off-campus, via different delivery modes or by schedules different from the regular session term. Matriculation is required for special sessions courses. Credit earned in 100-level, 200-level, or 300-level special session courses at SJSU is entered on the matriculated graduate student’s record as graduate credit, provided the student holds an acceptable baccalaureate degree from an accredited institution at the time of enrollment in the courses. Courses taken through special session receive residence credit. Simultaneous enrollment in special and regular session is not possible at this time as students can only be classified in one type of session per academic term.

For further information concerning special session and policies, inquire at the College of Professional and Global Education (Formerly College of International and Extended Studies), One Washington Square, Student Union, San Jose, CA 95192-0135, call at 408-924-2670, or www.sjsu.edu/cpge.

Graduate Work in Open University

Open University, often known elsewhere as extension, is set up primarily as an option for members of the surrounding community to take college courses. It is attended by non-matriculated postbaccalaureate students who may hope to gain future admission to one of the SJSU graduate programs or who wish to take classes to prepare for a professional degree program, such as medicine. It can also be part of the program-of-study mechanism by which scholastically disqualified SJSU graduate students can gain reinstatement to the graduate school (see section on Program of Study). Non-matriculated students who enroll only for Open University courses are reminded that they must apply for admission to the university and graduate program and complete other details of matriculation if they wish to obtain a degree or credential from SJSU. Enrollment in Open University courses is governed by specific policies, as follows:

- Fees differ from those in regular and special sessions.
- Open University enrollment in a given graduate class is permitted only with instructor and department chair or school director approval and only after reasonable efforts are made to provide full enrollment opportunities to regularly matriculated students.
- Matriculated students may not take Open University courses. This restriction also applies, without special permission of the Associate Dean of Graduate Studies, to formerly matriculated students who have gone out of matriculation by stopping out or being disqualified.
- Letter-graded or CR/NR courses may be taken through Open University with the exception of supervisory courses, such as independent study courses and project or thesis courses.
- Either regular (state-support) or special (self-support) classes may be taken through Open University if all other requirements are met.
- Open University course enrollment in 200-level courses is only open to holders of baccalaureate degrees who meet course prerequisite requirements. Neither disqualified students nor those denied admission into a graduate program for reasons other than limitations imposed by enrollment caps are permitted to enroll in 200-level courses.
- Open University courses do not qualify for residence credit toward a master’s degree, as specified by Title 5.
- Upper-division (100-level) and graduate (200-level) Open University units up to 30% of the degree program total and taken prior to matriculation may be applied to a master’s degree program with the consent of the program’s graduate advisor. Note that these units are considered to be transfer units into the master’s program, and the allowable total of all transfer units is 30%, with the exception of transfers from credential programs into master’s programs (40% of degree unit total allowed, i.e., 12 units in a 30 unit master’s program). Upper-division courses taken as part of a program of study for reinstatement after disqualification may be applied to the graduate program if they were already present on the student’s candidacy form or were otherwise approved by the graduate advisor.

Open University courses are counted toward the cumulative GPA. Those taken in the postbaccalaureate career (before matriculation and enrollment in the semester admitted) are also counted in the candidacy GPA if transferred into the graduate program. Because the university cannot determine whether the courses are part of the degree program until they appear on the candidacy form, it is not until advancement to candidacy that the grade points are transferred. Thus a student may conceivably be disqualified before advancing to candidacy even if courses to be transferred would have raised the GPA to a passing level.

For further information concerning special session or Open University offerings and policies, inquire at the College of Professional and Global Education (Formerly College of International and Extended Studies), One Washington Square, Student Union, San Jose, CA 95192-0135, call at 408-924-2670, or www.sjsu.edu/cpge.
Transfer Credit in the Graduate Program

Students who have completed coursework at other regionally accredited colleges or universities may be eligible to apply credit toward master’s degree requirements at SJSU. To be transferable, the coursework must have been taken at a regionally accredited U.S. university, or accredited international institution, whether through regular session, special session, online programs, or extension. In the case of extension or online courses, the graduate advisor must petition the Associate Dean of Graduate Studies on behalf of the student and provide documentation that the courses have been approved for degree credit at that institution. To be transferable, courses must not have been in professional development courses. They must have been at the upper-division or graduate level and must have been taken within seven years from the time of posting of the grade to the degree of the course to the date of award of the graduate degree from SJSU.

As stipulated in University Policy S13-8, not less than 70% of course work required for the master’s degree must be completed in residence. Therefore, for example, a maximum of 9 units can be transferred into a 30-unit graduate program. This total includes all transferred classes, including those from Open University and the SJSU undergraduate career. Transfer work from any source may be applied toward the degree program only if it is approved by the graduate advisor. Those taken at SJSU, whether through Open University or as a matriculated undergraduate, may be revalidated in accordance with the rules on revalidation if surpassing the 7-year limit on course viability. Those taken at any institution other than SJSU cannot be revalidated.

No courses may be transferred if taken during a graduate (master’s, PhD, or other) degree program in which the degree was awarded, whether used to satisfy requirements for those degrees or not. The only exception to this rule is that letter-graded courses from previous master’s degree programs taken at SJSU may be included up to a total of one third of the current degree total (i.e., 10 units in a 30-unit program) if approved by the graduate advisor. If a course was taken as part of a prior graduate degree program that was not finished (thus there was no award of degree), then the courses qualify for transfer credit.

For university approval of transfer units up to the 30% limit, the courses are entered on the Petition for Advancement to Graduate Candidacy in the Transfer Course section. The graduate advisor has full authority to allow or disallow transfer credit for those courses that meet the university requirements of eligibility. The signature of the graduate advisor on the candidacy form is sufficient to indicate departmental approval of the courses without additional forms. If the courses meet all of the requirements stipulated above, the university will accept the courses for advancement to candidacy and for graduation requirements. Credit is awarded for transferred courses of all categories, but grade points are not included in the cumulative GPA for transferred courses other than those from the SJSU Open University program; therefore, the cumulative grade-point-average (GPA) calculation will not include those units nor will the GPA calculation for advancement to candidacy or graduation.

Official transcripts for all courses transferred from another university, if taken prior to application to the SJSU graduate school, must have been submitted directly to the GAPE office during your initial application to SJSU. Failure to have provided those transcripts precludes the later transfer of the courses. If the courses were taken or grades for them were posted after the application process, then the transferred courses must subsequently be verified by official transcripts sent to GAPE from that university at the time of transfer; failure to provide transcripts will result in a denial of advancement to candidacy and/or award of degree.

Repeat Policy - Graduate

University Policy F08-2 on course repetition stipulates that graduate students may repeat a maximum of 9 units in their graduate careers, regardless of the number of units required in a degree program. This total does not include classes the catalog indicates are repeatable for credit. If within this limit, a graduate student may repeat any 100-level or 200-level course in which a grade below a “B,” including an “NC,” “WU” or “IC,” was received in the first attempt. The student’s academic record will indicate the course repeated and the grade earned. Units attempted and grade points will be included in the student’s cumulative GPA; therefore, the course grades will effectively be averaged. The additional units gained by repeating the course will not contribute to the degree total. Graduate students and 200-level courses are not eligible for “grade forgiveness.”

Courses on the candidacy form in which a grade of any kind has been earned cannot be removed from the candidacy form; the grades will be averaged with other courses even when compensated for by additional coursework. Courses listed on the candidacy form in which grades of “NC,” “I,” “IC,” “RP,” “RD,” or letter grades below “C” have been recorded will prevent graduation until completed, repeated, or compensated for in another way. This is also true of courses in programs that have special grade requirements beyond those of the university standard, e.g., requirement of “B” grades in all core classes.

SJSU (only) courses can be repeated when they have gone beyond the seven-year period for completion of master’s or doctoral degree requirements. Teaching credential courses cannot be repeated if the 7-year limit has been broached. See the section Seven-Year Time Limit on Courses in Graduate Degree Programs.

See Repeating a Course- Registration Restrictions for more information about registering for a class you are repeating.
Change of Graduate Program for Graduate Students

Official changes in graduate objectives are to be initiated at the GAPE office. If the change in objective is from one graduate program to another, or from one academic session to another, the Change of Graduate Program Petition form, available at sjsu.edu/gape/forms, must be completed. Submission of this form by the student is not, however, synonymous with approval of the change. The new department must review you as a candidate for their program through initial communication with GAPE office after GAPE receives your change of program request. There is no fee for this change so long as the student was enrolled the semester prior to the application term. The student should become knowledgeable of any additional admission requirements of the department being entered. Student transfer to the new program is not automatic, but instead requires approval from the incoming department. The department must follow-up with the student request by signing the Change of Program Decision Form and returning its decision to the GAPE office. GAPE will then update the student’s status to reflect the new program change.

If a student obtains permission to change their program or concentration after advancing to graduate candidacy and the second program has different requirements than the first, then a new candidacy form (Petition for Advancement to Graduate Candidacy) with the signature of the new graduate advisor must be filed. The change of either program or concentration is made by virtue of approval of the Change in Graduate Program Petition. Graded courses on the first form can be eliminated on the second form if not part of the new curriculum.

For a change in the culminating plan from Plan A (thesis) or C (creative project) to Plan B (project or comprehensive exams) or vice versa, no new candidacy form is needed. Any 299 units, project course units, or exam preparation course units in which a Credit was given must be retroactively dropped or, less attractive to students, changed to an NC (no credit) grade. For a switch to Plan B, project and exam preparation courses as well as additional content courses might then be required, depending on the program. These changes all require that GAPE be informed by means of filing the Request for Course Substitution in Master’s Degree Program for each course change. Degree requirements for the new plan must be satisfied in full. Therefore, retroactively adding a 298 (project) class, for example, in place of a 299 (thesis) class will be permitted only if all the requirements of the project have been met. The requirements for projects include a written report in every case.

Graduate Degree - Change in Classification Status

Notification of a change from conditionally classified to classified status within the same graduate program before advancement to candidacy is made to GAPE by the graduate advisor by means of the Change in Classification in Master’s Program form, available at sjsu.edu/gape/forms. However, an advisor signature on the candidacy form indicates that the advisor has checked that all conditions have been fulfilled, allowing the conditional status to be lifted and establishing the classified status without the need for the Change in Classification in Master’s Program form. Graduate students must be in classified status in the graduate program to advance to candidacy. Once a student has advanced to candidacy and thus the student status has progressed to classified, any conditions discovered still unfulfilled are sacrificed and can no longer be required.
Masters Degree - Advancement to Candidacy

Matriculated graduate students must advance to candidacy a minimum of one semester prior to graduating. Advancement to candidacy requires that the student be in good standing. That is, a minimum of a 3.0 GPA is required in upper-division and graduate courses taken while in graduate status, and in the degree program as indicated by all courses on the candidacy form. The student must be classified with all admissions’ provisions and program conditions cleared. Also required is a minimum of 9 units of letter-graded coursework as a graduate student in 100- or 200-level courses that are acceptable to the department in which the degree is sought. Exceptions to this rule can be made for two-semester master’s programs. University policy also stipulates the Graduation Writing Assessment Requirement be fulfilled before advancement to candidacy. However, for special cases, the candidacy form, formally entitled the Petition for Advancement to Graduate Candidacy (available at www.sjsu.edu/gape/forms), may be filed during the semester in which a GWAR-satisfying course is taken. Advancement to candidacy will be formally denied during the semester, but the form will be kept on file by the CAPE office and approved when a passing grade is posted at the end of the semester.

Graduate Degree - Master’s Examinations - Finals

It is university policy to require final examinations or defenses in master’s degree programs in all departments. Departmental requirements for these examinations vary; they may be oral, written, or a combination of both. Students following Plans A and C are usually examined primarily over areas of their theses or projects. Plan B students are generally required to demonstrate their competence by writing in a broad field of concentration, by taking comprehensive examinations, or by completing a broad course project.

In all cases, it is the candidate’s responsibility to register through the departmental coordinator of graduate studies to take all required final examinations. The candidate’s advisor and/or the departmental graduate coordinator will be able to supply general information concerning the nature of the examinations and recommended preparation for them.

The master’s diploma cannot be transmitted to the candidate until the major department certifies to the program evaluator at CAPE via the Verification of Culminating Experience memo that final examinations have been completed satisfactorily.

Graduate Degree Program- Masters

As indicated above, the Petition for Advancement to Graduate Candidacy (“candidacy form”) is submitted to CAPE when the student is qualified to advance to candidacy. This form lists all courses and culminating experiences that must be fulfilled for degree award. The proposed program must meet the following requirements:

• statement of the total number of units in the degree program.
• at least half of the units included on the form must be in 200-level courses.
• at least 60% of all units included must be in letter-graded course work.
• at least 70% of the units included must be in residence at SJSU. Therefore, a maximum of 9 units may be transferred into a 30-unit program from all sources.

The course work included may be entirely within the major department, or it may include a combination of courses drawn from other fields acceptable to the major advisor, so long as it is within the parameters set by the department in the program descriptions on department websites. If deficiencies in the student’s record are identified, including in prerequisites for required courses, additional course work can be assigned by the major advisor. This course work would not appear on the candidacy form and would not be counted in the total number of units required for the degree.

Coursework that may not be applied to the graduate degree includes basic skills’ courses such as lower-division work, courses used to earn any prior degree (except other master’s degrees at SJSU), courses taken at unaccredited institutions, directed (student) teaching, or 300-level residence or 400-level Professional Education courses taken at SJSU, or courses taken over seven years previous to current degree conferral. Graduate credit by examination is not permitted.

There is no restriction in the number of units of project or thesis research (usually 298 courses) attempted but not included on the candidacy form. However, students completing a thesis must include at least one 299 unit on the form, and the total number must be commensurate with program requirements.

Students may not receive credit for project units unless the project course is successfully completed; instead either an RP or NC grade should be assigned in the semester of enrollment; extensions beyond the semester are prohibited without enrollment in that class in a subsequent semester.

Students may not receive credit for 299 units unless a thesis is submitted and accepted by the College of Graduate Studies. If thesis units are credited on the student record without thesis approval, the units must be retroactively withdrawn. The process of withdrawal is initiated by the student by submitting the Graduate Petition for Course/Semester Withdrawal, available at www.sjsu.edu/gape/forms.
The original copy of the completed, signed Petition for Advancement to Graduate Candidacy should be submitted to GAPE in the Student Services Center by the deadlines posted at www.sjsu.edu/gape/current_students/deadlines/. The student will be informed by the approval or denial of the petition through the student’s MySJSU account under “Other Indicators”.

**Graduate Degree - Program Course Work**

The candidacy form, once approved, is an official contract between the student and university. It can be changed only with the permission of the graduate advisor via written petition to the Associate Dean College of Graduate Studies, and even then the petition is likely to be denied. Course substitutions can be made by submission to GAPE of the Request for Course Substitution in Master’s Degree Program, available at www.sjsu.edu/gape/forms. A course may not be dropped from the graduate degree program, as indicated by its appearance on an approved candidacy form, once it has been completed.

If a student obtains permission to change programs and the second program has different requirements than the first one, then a new candidacy form must be filed; graded courses on the first form can be eliminated on the second form if not part of the new curriculum.
Graduation Requirements - Master’s Degree

After being admitted to candidacy for the master’s degree, the student is then required to:

- Maintain a minimum grade point average of 3.0 (“B”) in completing requirements in the graduate degree program. The program is defined as completed courses included in the original graduate degree program plus all additions or substitutions.
- Complete all courses in the graduate degree program with grades between “A” and “C,” or “CR.” Grades of “C-” or lower, including “NC,” “U,” “IC” and “WU,” are considered to be unsatisfactory. Should courses in the graduate degree program be completed with unsatisfactory grades, these grades must remain in the program and will continue to be computed in the grade point average of the program whether they are repeated or not.
- Complete all requirements for the degree as listed in the degree template in the university catalog. Substitutions for core and other required courses in the template must be justified by graduate advisor petitioning of the Associate Dean of Graduate Studies.
- Complete an acceptable thesis, project or comprehensive examination. The thesis (Plan A) or creative project (Plan C) requires that one copy be submitted to the Associate Dean College of Graduate Studies. In Plan B, completed projects are submitted to the student’s major department and a final comprehensive oral and/or written examination over the field of concentration for the degree must usually be successfully completed. Failure on initial attempts at these exams results in administrative-academic probation. Failure of the final attempt results in administrative-academic disqualification from the degree program. The program evaluator at GAPE is notified of passage of the exam by means of graduate advisor completion of the Verification of Culminating Experience memo.
- Complete all work on the graduate degree program within seven years preceding award of the degree. If courses become outdated, the candidate should consult the section titled Graduate Degree - Time Limits on Courses in Graduate Degree Programs in this catalog concerning steps to be followed.
- Apply for award of the master’s degree by posted deadline dates through your MySJSU account two weeks after achieving advancement to candidacy.
- Note that failure to clear incomplete (“I”), report-in-progress (“RP”), or report-delayed (“RD”) grades will prevent graduation. An “I” obtained in a graded class results in an automatic grade change to an “IC” grade, which calculates to an “F” grade on the transcript, even after separation or graduation. In an ungraded (“CR/NC”) course, the “I” reverts to a no credit (“NC”) grade and is, therefore, also unsatisfactory for graduation if in a course on the candidacy form.
- Be in good academic standing (cumulative 3.0 minimum GPA in Graduate Division) at San José State University to receive a degree from this university.

Graduation - Applying for the Master’s Degree

The Petition for Advancement to Graduate Candidacy Form must be approved by the CAPE office before applying for graduation. Students should apply for graduation at least one semester before the date of anticipated graduation. However, it is highly advised that students apply at least one year before their future graduation date.

Advancement to candidacy is permitted only when all conditions of admission, if applicable, are met, nine letter-graded units, all with grades of C or better and a GPA of 3.0 or better have been achieved, and the graduate CIWAR has been completed. For detailed information about these requirements, please visit sjsu.edu/gape/current_students/completing_masters/ and the catalog section Graduate Degree - Advancement to Candidacy.

IMPORTANT: Eligible students can apply for graduation through self-service within their MySJSU account approximately two weeks after students have been approved for advancement to candidacy by the CAPE office. Students will be sent a MySJSU message including instructions and prompting them to apply for graduation. Only students that apply for graduation will be considered for graduation review.

Please note the following:

- All courses and requirements must be completed by the date of graduation.
- Any Incomplete (I), Report Delayed (RD), or Report Pending (RP) grades must be cleared before the degree can be awarded.
- Once the degree has been posted, no grade changes can be made to the record.
- If a student is unable to complete the course work stipulated on the candidacy form or if the date of graduation is delayed, a Graduation Date Change Request for Award of Master’s Degree must be requested through sjsu.edu/gape/forms/ (see Online Graduation Date Change Request).
- Required forms must be submitted by the deadlines posted on the CAPE website at sjsu.edu/gape/current_students/deadlines/.
- Students are urged not to delay; failure to submit forms by the deadlines posted could delay graduation.
Doctorate Degree - Advancement to Candidacy

Matriculated graduate students must advance to candidacy a minimum of one semester prior to graduating. Advancement to candidacy requires that the student be in good standing. That is, a minimum of a 3.0 GPA is required in upper-division and graduate courses taken while in graduate status, and in the degree program as indicated by all courses on the candidacy form. The student must be classified with all admissions’ provisions and program conditions cleared. Also required is a minimum of 9 units of letter-graded coursework as a graduate student in 100- or 200-level courses that are acceptable to the department in which the degree is sought. Exceptions to this rule can be made for two-semester master’s programs. University policy also stipulates the Graduation Writing Assessment Requirement be fulfilled before advancement to candidacy. However, for special cases, the candidacy form, formally entitled the Petition for Advancement to Graduate Candidacy (available at www.sjsu.edu/gape/forms), may be filed during the semester in which a GWAR-satisfying course is taken. Advancement to candidacy will be formally denied during the semester, but the form will be kept on file by the GAPE office and approved when a passing grade is posted at the end of the semester.

Graduate Degree - Doctoral Examinations - Finals

Doctor of Education Degree - EdD - Finals

It is California State University policy to require a qualifying examination and an oral defense of the dissertation in Doctor of Education Degree (EdD) programs. Departmental requirements for these examinations vary. In all cases, it is the candidate’s responsibility to register through the departmental coordinator of graduate studies to take all required examinations and the oral defense of the dissertation. The candidate’s advisor and/or the departmental graduate coordinator will be able to supply general information concerning the nature of the examinations and recommended preparation for them. The EdD diploma cannot be transmitted to the candidate until the major department certifies to the program evaluator at CAPE via the Verification of Culminating Experience memo that the oral defense has been completed satisfactorily. The student shall have completed all requirements for the degree within five years of achieving classified standing in the doctoral program. The appropriate campus authority may extend the time for completion of the requirements.

More details on the Doctor of Education Degree and its requirements may be found in the California Code of Regulations Title 5 § 40511 and 40512.

Doctor of Nursing Practice (DNP) - Finals

It is California State University policy to require a doctoral qualifying examination or assessment and an oral presentation of the doctoral project in Doctor of Nursing Practice (DNP) programs. Departmental requirements for these examinations vary. In all cases, it is the candidate’s responsibility to register through the departmental coordinator of graduate studies to take all required examinations or undergo assessments and to give the oral presentation of the doctoral project. The candidate’s advisor and/or the departmental graduate coordinator will be able to supply general information concerning the nature of the examination or assessment and the oral presentation and recommended preparation for them.

The DNP diploma cannot be transmitted to the candidate until the major department certifies to the program evaluator at CAPE via the Verification of Culminating Experience memo that the oral defense has been completed satisfactorily. The student shall have completed all requirements for the degree within five years of matriculation into the doctoral program.

More details on the Doctor of Nursing Practice Degree and its requirements may be found in the California Code of Regulations Title 5 § 40513 and 40514.

Graduate Degree Program- Doctoral

As indicated above, the Petition for Advancement to Graduate Candidacy (“candidacy form”) is submitted to GAPE when the student is qualified to advance to candidacy. This form lists all courses and culminating experiences that must be fulfilled for degree award. The proposed program must meet the following requirements:

- statement of the total number of units in the degree program.
- at least half of the units included on the form must be in 200-level courses.
- at least 60% of all units included must be in letter-graded course work.
- at least 70% of the units included must be in residence at SJSU. Therefore, a maximum of 9 units may be transferred into a 30-unit program from all sources.
The course work included may be entirely within the major department, or it may include a combination of courses drawn from other fields acceptable to the major advisor, so long as it is within the parameters set by the department in the program descriptions on department websites. If deficiencies in the student’s record are identified, including in prerequisites for required courses, additional course work can be assigned by the major advisor. This course work would not appear on the candidacy form and would not be counted in the total number of units required for the degree.

Coursework that may not be applied to the graduate degree includes basic skills’ courses such as lower-division work, courses used to earn any prior degree (except other master’s degrees at SJSU), courses taken at unaccredited institutions, directed (student) teaching, or 300-level residence or 400-level Extended Studies courses taken at SJSU, or courses taken over seven years previous to current degree conferral. Graduate credit by examination is not permitted.

There is no restriction in the number of units of project or thesis research (usually 298 courses) attempted but not included on the candidacy form. However, students completing a thesis must include at least one 299 unit on the form, and the total number must be commensurate with program requirements. Students may not receive credit for project units unless the project course is successfully completed; instead either an RP or NC grade should be assigned in the semester of enrollment; extensions beyond the semester are prohibited without enrollment in that class in a subsequent semester.

Students may not receive credit for 299 units unless a thesis is submitted and accepted by the College of Graduate Studies. If thesis units are credited on the student record without thesis approval, the units must be retroactively withdrawn. The process of withdrawal is initiated by the student by submitting the Graduate Petition for Course/Semester Withdrawal, available at www.sjsu.edu/gape/forms.

The original copy of the completed, signed Petition for Advancement to Graduate Candidacy should be submitted to CAPE in the Student Services Center by the deadlines posted at www.sjsu.edu/gape/current_students/deadlines/. The student will be informed by the approval or denial of the petition through the student’s MySJSU account under “Other Indicators”.

**Graduate Degree - Program Course Work**

The candidacy form, once approved, is an official contract between the student and university. It can be changed only with the permission of the graduate advisor via written petition to the Associate Dean of Graduate Studies, and even then the petition is likely to be denied. Course substitutions can be made by submission to CAPE of the Request for Course Substitution in Master’s Degree Program, available at www.sjsu.edu/gape/forms. A course may not be dropped from the graduate degree program, as indicated by its appearance on an approved candidacy form, once it has been completed.

If a student obtains permission to change programs and the second program has different requirements than the first one, then a new candidacy form must be filed; graded courses on the first form can be eliminated on the second form if not part of the new curriculum.
Graduation Requirements - Doctoral Degree

After being admitted to candidacy for the doctorate degree, the student is then required to:

- Maintain a minimum grade point average of 3.0 ("B") in completing requirements in the graduate degree program. The program is defined as completed courses included in the original graduate degree program plus all additions or substitutions.
- Complete all courses in the graduate degree program with grades between "A" and "C," or "CR." Grades of "C-" or lower, including "NC," "U," "IC" and "WU," are considered to be unsatisfactory. Should courses in the graduate degree program be completed with unsatisfactory grades, these grades must remain in the program and will continue to be computed in the grade point average of the program whether they are repeated or not.
- Complete all requirements for the degree as listed in the degree template in the university catalog. Substitutions for core and other required courses in the template must be justified by graduate advisor petitioning of the Associate Dean of College of Graduate Studies.
- Complete an acceptable Dissertation. The thesis (Plan A) or creative project (Plan C) requires that one copy be submitted to the Associate Dean for College of Graduate Studies. In Plan B, completed projects are submitted to the student’s major department and a final comprehensive oral and/or written examination over the field of concentration for the degree must usually be successfully completed. Failure on initial attempts at these exams results in administrative-academic probation. Failure of the final attempt results in administrative-academic disqualification from the degree program. The program evaluator at CAPE is notified of passage of the exam by means of graduate advisor completion of the Verification of Culminating Experience memo.
- Complete all work on the graduate degree program within seven years preceding award of the degree. If courses become outdated, the candidate should consult the section titled Graduate Degree - Time Limits on Courses in Graduate Degree Programs in this catalog concerning steps to be followed.
- Apply for award of the master’s degree by posted deadline dates through your MySJSU account two weeks after achieving advancement to candidacy.
- Note that failure to clear incomplete ("I"), report-in-progress ("RP"), or report-delayed ("RD") grades must be cleared before the degree can be awarded. An "I" obtained in a graded class results in an automatic grade change to an "IC" grade, which calculates to an "F" grade on the transcript, even after separation or graduation. In an ungraded ("CR/NC") course, the "I" reverts to a no credit ("NC") grade and is, therefore, also unsatisfactory for graduation if in a course on the candidacy form.
- Be in good academic standing (cumulative 3.0 minimum GPA in Graduate Division) at San José State University to receive a degree from this university.

Graduation - Applying for the Doctoral Degree

The Petition for Advancement to Graduate Candidacy Form must be approved by the CAPE office before applying for graduation. Students should apply for graduation at least one semester before the date of anticipated graduation. However, it is highly advised that students apply at least one year before their future graduation date.

Advancement to candidacy is permitted only when all conditions of admission, if applicable, are met, nine letter-graded units, all with grades of C or better and a GPA of 3.0 or better have been achieved, and the graduate GWAR has been completed. For detailed information about these requirements, please visit sjsu.edu/gape/current_students/completing_masters/ and the catalog section Graduate Degree - Advancement to Candidacy.

IMPORTANT: Eligible students can apply for graduation through self-service within their MySJSU account approximately two weeks after students have been approved for advancement to candidacy by the CAPE office. Students will be sent a MySJSU message including instructions and prompting them to apply for graduation. Only students that apply for graduation will be considered for graduation review.

Please note the following:

- All courses and requirements must be completed by the date of graduation.
- Any Incomplete ("I"), Report Delayed ("RD"), or Report Pending ("RP") grades must be cleared before the degree can be awarded.
- Once the degree has been posted, no grade changes can be made to the record.
- If a student is unable to complete the course work stipulated on the candidacy form or if the date of graduation is delayed, a Graduation Date Change Request for Award of Master’s Degree must be requested through sjsu.edu/gape/forms/ (see Online Graduation Date Change Request)
- Required forms must be submitted by the deadlines posted on the CAPE website at sjsu.edu/gape/current_students/deadlines/
- Students are urged not to delay; failure to submit forms by the deadlines posted could delay graduation.
Graduate Degree - Graduation Writing Assessment Requirement (GWAR)

University Policy S94-7 requires that all graduate students demonstrate competency in written English for advancement to candidacy within a master’s program. Graduate students may satisfy the Graduation Writing Assessment Requirement (GWAR) in one of four ways:

- Satisfactory completion of a baccalaureate degree at a CSU campus;
- Satisfactory completion of a GWAR course listed here: http://www.sjsu.edu/cgs/current-students/policies/index.html;
- Approval by the Associate Dean of Graduate Studies of a well-written, professional (peer-reviewed) publication, graduate thesis or dissertation in which the student was the sole author;
- Satisfactory completion of a discipline-specific upper-division writing course at another university judged by the Associate Dean College of Graduate Studies to be equivalent in content and writing requirements to the SJSU 100W. To satisfy the requirement under this category, students are required to submit to their graduate advisors a transcript (unofficial acceptable) showing completion of the substituting course and the grade received (a “B” or better is required); the syllabus of the substituting course; and original, single-authored writing samples from the course, including especially a large term paper from the course with instructor feedback visible. If the graduate advisor approves of the substitution for an SJSU GWAR course, he or she would then petition the Associate Dean College of Graduate Studies on behalf of the student. Students may not petition College of Graduate Studies directly.

Candidates should be aware that each department may establish its own criteria within these policy guidelines, and candidates must abide by the department decision. Thus even if a student has satisfied one of the criteria above, the department must approve the waiver and can require that its GWAR-satisfying course still be taken. Waiving the program GWAR requirement will require the addition of an elective selected in consultation with the graduate advisor.

Graduate courses cannot be taken for credit by examination.
Master’s Thesis Requirements

Time is critical during the semester of submission of a master’s thesis. Students must allow enough time for preparation of the draft, consideration by graduate committee members by the deadline dates set in departments, word processing, acquisition of permissions to publish, and the inevitable corrections. Students must leave time for the final reading and signing by the committee members. In most departments, a minimum of two months is needed for the entire process, and some departments require a longer period. Students should confer with each committee member in advance regarding the time each requires for review and whether each will be in town and available when the review and signatures are due.

These instructions provide general guidance for authors of master’s theses at SJSU. Examples of front pages are provided in the guidelines. Students should read the guidelines carefully and consult their advisors concerning the format of the thesis, the professional style guide to use, and journal articles to emulate, if applicable. The major department sometimes provides students with more complete formatting instructions. In rare cases, College of Graduate Studies will provide assistance.

SJSU participates in the University Microfilm International (UMI) Dissertation Information Service. Students completing theses and dissertations are required to email their committee-approved manuscript and accompanying documents to Graduate Studies according to the instructions provided in the SJSU Thesis and Dissertation Guidelines at http://www.sjsu.edu/cgs/docs/Thesis-and-Dissertation/2017_Thesis_Guidelines.pdf.

Graduate Degree - Checking the Manuscript

The College of Graduate Studies does not serve as an editor. The author and graduate committee members should carefully proofread the thesis before it is submitted. A careful review should be used by the student as a guide to correcting similar errors in the entire manuscript. The review conducted by College of Graduate Studies should also be regarded as an indicator of problems to be addressed globally throughout the manuscript. Making only the changes specifically indicated, rather than applying the criticisms to the remainder of the document, would not only result in a flawed document but would also be beneath graduate school standards. College of Graduate Studies will reject a thesis with excessive errors.

Students can prevent rejection of the thesis by ensuring that the final manuscript is free of the following frequent errors: pages for which no numbers are assigned, failure to apply reference style consistently or to cite references when needed, careless spacing or centering, inappropriate margins, incorrect footnotes or bibliography entries, redundancy, awkward or unclear sentences, grammatical errors, punctuation errors, spelling errors, word-usage errors and inconsistences in or lack of adherence to style-manual formatting rules.

Neither SJSU nor any of its separate offices or departments is responsible for matters concerning a student’s relationships or agreements with any outside agency or individual consulted for manuscript preparation. Neither the university nor any of its offices will take part in disagreements between students and typists, editors or copy shops with regard to thesis preparation services, expected costs or billed costs. A student conducting thesis research off site, for example at a local company, must be free to include all of it in the thesis. SJSU’s legal relationship is only with the student and his or her compliance with the rules set forth in this and related documents and does not include any obligations to the company in question unless expressly agreed upon in a separate legal document.

Graduate Degree - Plans A, B and C

SJSU offers three plans for candidates for master’s degrees.

Plan A - Thesis Plan

This plan requires approval by the candidate’s advisor and other members of the thesis committee of a thesis topic and its satisfactory production in written form. Plan A requires registration in departmental 299, Master’s Thesis, for at least one unit. Departmental 298 units or other department-specific thesis research or methodology courses are often also taken during the data-gathering stages of the thesis research. While the total number of 298 and 299 units, as well as units in any other project or thesis-research or preparatory course, is restricted for degree credit (and therefore inclusion on the candidacy form) by departmental rules and university policy, the total number of these units taken is not restricted.
Plan B - Degree-Without-Thesis Plan

Plan B is characterized by substitution of the thesis and departmental 299 units with another set of courses and either a project or comprehensive exam. The plan is expected to provide substantial practical experiences by means of the tools and techniques of advanced study in the field. The purpose of Plan B is most often to provide breadth, rather than specialization, and so is tailored by the selection of courses and the nature of the final, comprehensive exam. The exam may be oral, written, or both and constitutes the culminating experience in the plan. Many departments historically have assigned students to Plan B for projects, whether they are also accompanied by a comprehensive exam or not. The projects are usually conducted as part of a departmental 298 or otherwise numbered 200-level project course for a maximum of six units, as stipulated by the department, and the write-up for the project is required as part of the culminating experience. Departmental 299 units are not permitted for graduate credit under this plan.

Plan C - Special Plans Including Creative Projects

This plan is reserved for exceptional cases for which needs will be served best through a special arrangement of courses and/or special creative assignments. The assignments might include original paintings, dramatic presentations, motion picture productions, works of sculpture, electronic media or videotapes. In these cases, the candidate is required to submit a written report on the creative project in the form of a supplementary guide or handbook that puts the work into historical, cultural and/or professional context. This written report is to be cataloged in the university’s institutional repository in the University Library in the same manner as regular theses discussed under Plan A. Departmental advisors will provide further information on special requirements of the plan. Plan C requires registration in a minimum of one unit of departmental 299. Note that creative projects can also be conducted under the Plan B umbrella without the submission of a thesis or taking departmental 299 units.

Thesis/Creative Project Unit Conditions

Registration for departmental 299 thesis courses occurs only after advancement to candidacy for the master’s degree. By that point, the thesis committee should be fully established in accordance with the SJSU University policy. Before collection of data from human subjects, prior approval must be granted by the Institutional Review Board; see the section on Human Subjects Data Collection in this catalog. Similarly, prior approval for research on or employing animals must be granted by the Institutional Animal Care and Use Committee; see the section on Animal Research Guidelines in this catalog.

A student is allowed a maximum of nine semester units of thesis research and writing courses (departmental 299 and usually 298 but other thesis courses apply) for graduate credit in Plan A and Plan C, although more of these units can be attempted. There is no minimum requirement except that all thesis students must have at least one 299 unit. The student may register for any or all of the required thesis units in one semester, but the sequence should follow departmental guidelines and regulations. All 299 units will receive a grade of “RP” until a final grade (“CR” or “NC”) is awarded when the thesis is approved by Graduate Studies. “RP” units cannot be changed to “CR” until that time. Extensions of the two-year period for completing thesis work under the “RP” designation should be made before the period expires by means of the form available at www.sjsu.edu/gape/forms. Upon satisfactory completion of the thesis, a “CR” is submitted by the thesis chair via the Change-of-Grade form to the Registrar to clear the “RP.” A separate form must be submitted for each occurrence of “RP” (each semester the grade is displayed) on the record.

Graduate Degree - Thesis - Copyright Permission

If a student copies a figure, table or a significant section of someone else’s work and it is believed that the use of these copyrighted materials is beyond that permitted by “fair use,” the student will be required to obtain separate written permission letters from the publishers or authors of the works cited. It must be indicated in the text or figure caption within the thesis that the material is “copied with permission.” The student should plan well so that permission letters will be received in time. If letters of permission are not submitted with the final copies of the thesis, College of Graduate Studies will not approve the thesis, and UMI will not microfilm the work.

The permission letters should be included with the initial submission of the thesis as well as when the thesis is submitted for publication. For questions about the process, including whether permission is required for a particular insertion, contact the thesis coordinator at College of Graduate Studies.

College of Graduate Studies
ADM 146
www.sjsu.edu/cgs
Graduate Degree - Thesis - Human Subjects Data Collection

If a thesis includes data gathered from human subjects, whether experiments, surveys, or interviews, the students must obtain approval from the SJSU Human Subjects Institutional Review Board (IRB). Information concerning the use of human participants is available online at or from the www.sjsu.edu/research/irb or from the IRB coordinator at 408-924-2479. Approval must be obtained from SJSU prior to data collection regardless of whether the research is done in conjunction with another institution that has given its approval. Approval must also be obtained even if the work is ultimately determined to be “exempt.” Federal law prohibits retroactive approval of human subjects research. Any human subject work conducted before IRB permission cannot be included in a thesis. The thesis will not be approved if it fails to comply with IRB policy.

Once the research is approved, thesis submission must include a copy of the permission letter, whether as a document separate from the thesis or as an appendix to the thesis. Failure to submit the appropriate documentation can result in a delay or denial of thesis approval by College of Graduate Studies.

Graduate Degree - Thesis - Animal Research Requirements

If the thesis includes research activities involving vertebrate animals or select invertebrate species, the care and use of animals or their tissues must be approved by the SJSU Institutional Animal Care and Use Committee (IACUC). Information concerning IACUC requirements and procedures is available from the IACUC Coordinator and online at http://www.sjsu.edu/research/iacuc/index.html. Animal research approval from SJSU must be obtained prior to data collection even if the work is done in conjunction with another institution from which approval has been granted. SJSU prohibits retroactive approval of animal research that is considered ongoing or completed. The official letter of protocol review, obtained with IACUC approval, must be submitted along with the thesis whether as an appendix or as a separate document. Failure to submit the necessary documentation can result in a delay or denial of the thesis by College of Graduate Studies.

Graduate Degree - Thesis - Approval

The last three steps in the thesis process are outlined below:

1. After the thesis has received final departmental (graduate committee) approval, as indicated by committee signatures, the complete document should be emailed along with the completed Thesis Information Packet, available at http://www.sjsu.edu/cgs/current-students/thesis-and-dissertation-information/index.html. Deadline dates for submission may be found at http://www.sjsu.edu/cgs/current-students/thesis-and-dissertation-information/index.html. The deadlines are firm, and exceptions are extremely rare.
2. The thesis will be read and returned to the student with an assessment by the staff from College of Graduate Studies as accepted without corrections, provisionally accepted with corrections, or not accepted.
3. If the manuscript has an abundance of errors in formatting, grammar, punctuation or other writing parameters, corrections will have to be made. The advisors on the student’s graduate committee should be consulted about these corrections. It bears repeating that the College of Graduate Studies staff reads and edits only portions of the manuscript, but it is expected that errors of the kinds indicated be corrected throughout the manuscript. If the manuscript is accepted with corrections, the student will be instructed to resubmit it within about a four-week period from the point of notification. If it is rejected, the revised manuscript may not be submitted until the following semester.
Doctoral Dissertation and Project Requirements

**Dissertation - Doctor of Education Degree**

It is California State University policy to require a dissertation in Doctor of Education Degree (EdD) programs. Per that policy, the EdD dissertation shall be the written product of systematic, rigorous research on a significant professional issue. It is expected to contribute to an improvement in professional practices or policy. It shall evidence originality, critical and independent thinking, appropriate form and organization, and a rationale. The EdD dissertation shall also identify the research problem and question(s), state the major theoretical perspectives, explain the significance of the undertaking, relate it to the relevant scholarly and professional literature, set forth the appropriate sources for and methods of gathering and analyzing the data, and offer a conclusion or recommendation. It shall include a written abstract that summarizes the significance of the work, objectives, methodology, and a conclusion or recommendation.

Time is critical during the semester of submission of a dissertation. Students must allow enough time for preparation of the draft, consideration by doctoral committee members by the deadline dates set in departments, word processing, acquisition of permissions to publish, and the inevitable corrections. Students must leave time for the final reading and signing by the committee members. A minimum of two months is needed for the entire process, and departments may require a longer period. Students should confer with each committee member in advance regarding the time each requires for review and whether each will be in town and available when the review and signatures are due. The student shall have completed all requirements for the degree within five years of achieving classified standing in the doctoral program. The appropriate campus authority may extend the time for completion of the requirements.

These instructions provide general guidance for authors of doctoral dissertations at SJSU. Examples of front pages are provided in the guidelines. Students should read the guidelines carefully and consult their advisors concerning the format of the thesis or dissertation, the professional style guide to use, and journal articles to emulate, if applicable. The major department sometimes provides students with more complete formatting instructions. In rare cases, College of Graduate Studies will provide assistance.

**Doctoral Project Requirements - Doctor of Nursing Practice Degree**

It is California State University policy to require a doctoral project in Doctor of Nursing Practice (DNP) programs. Per that policy, the DNP doctoral project shall be the written product of a systematic, rigorous, evidence-based endeavor focused on a significant nursing practice issue. The doctoral project is expected to contribute to an improvement in professional practices, policy, or patient outcomes. It shall evidence originality, critical and independent thinking, appropriate form and organization, and adequate rationale. The DNP doctoral project shall reflect a command of the scholarly literature and shall demonstrate the student’s mastery of evidence-based practice at the doctoral level. The written component of the doctoral project shall be organized in an appropriate form and shall identify the problem statement and purpose, state the major theoretical perspectives, explain the significance of the undertaking, relate it to the relevant scholarly and professional literature, identify the methods of gathering and analyzing the data, and offer a conclusion or recommendation.

Time is critical during the semester of submission of a doctoral project. Students must allow enough time for preparation of the draft, consideration by graduate committee members by the deadline dates set in departments, word processing, and the inevitable corrections. Students must leave time for the final reading and signing by the committee members. A minimum of two months is needed for the entire process, and departments may require a longer period. Students should confer with each committee member in advance regarding the time each requires for review and whether each will be in town and available when the review and signatures are due. The student shall have completed all requirements for the degree within five years of matriculation into the doctoral program. The appropriate campus authority may extend by up to two years the time for completion of the requirements.
Doctoral Degree - Checking the Dissertation Manuscript

The College of Graduate Studies does not serve as an editor. The author and graduate committee members should carefully proofread the dissertation before it is submitted. A careful review should be used by the student as a guide to correcting similar errors in the entire manuscript. The review conducted by the Office of Graduate Studies should also be regarded as an indicator of problems to be addressed globally throughout the manuscript. Making only the changes specifically indicated, rather than applying the criticisms to the remainder of the document, would not only result in a flawed document but would also be beneath graduate school standards. The College of Graduate Studies will reject a dissertation with excessive errors.

Students can prevent rejection of the dissertation by ensuring that the final manuscript is free of the following frequent errors: pages for which no numbers are assigned, failure to apply reference style consistently or to cite references when needed, careless spacing or centering, inappropriate margins, incorrect footnotes or bibliography entries, redundancy, awkward or unclear sentences, grammatical errors, punctuation errors, spelling errors, word-usage errors and inconsistencies in or lack of adherence to style-manual formatting rules.

Neither SJSU nor any of its separate offices or departments is responsible for matters concerning a student’s relationships or agreements with any outside agency or individual consulted for manuscript preparation. Neither the university nor any of its offices will take part in disagreements between students and typists, editors or copy shops with regard to thesis preparation services, expected costs or billed costs. A student conducting dissertation research off site, for example at a local company, must be free to include all of it in the dissertation. SJSU’s legal relationship is only with the student and his or her compliance with the rules set forth in this and related documents and does not include any obligations to the company in question unless expressly agreed upon in a separate legal document.

Doctoral Degree - Dissertation and Project - Copyright Permission

If a student copies a figure, table or a significant section of someone else’s work and it is believed that the use of these copyrighted materials is beyond that permitted by “fair use," the student will be required to obtain separate written permission letters from the publishers or authors of the works cited. It must be indicated in the text or figure caption within the dissertation that the material is “copied with permission.” The student should plan well so that permission letters will be received in time. If letters of permission are not submitted with the final copies of the dissertation, the College of Graduate Studies will not approve the dissertation, and UMI will not microfilm the work.

The permission letters should be included with the initial submission of the dissertation as well as when the dissertation is submitted for publication. For questions about the process, including whether permission is required for a particular insertion, contact the thesis coordinator at College of Graduate Studies.

College of Graduate Studies
ADM 146
www.sjsu.edu/cgs

Doctoral Degree - Dissertation and Project - Human Subjects Data Collection

If a dissertation includes data gathered from human subjects, whether experiments, surveys, or interviews, the students must obtain approval from the SJSU Human Subjects Institutional Review Board (IRB). Information concerning the use of human participants is available online at or from the www.sjsu.edu/research/irb or from the IRB coordinator at 408-924-2479. Approval must be obtained from SJSU prior to data collection regardless of whether the research is done in conjunction with another institution that has given its approval. Approval must also be obtained even if the work is ultimately determined to be "exempt.” Federal law prohibits retroactive approval of human subjects research. Any human subject work conducted before IRB permission cannot be included in a dissertation. The dissertation will not be approved if it fails to comply with IRB policy.

Once the research is approved, dissertation submission must include a copy of the permission letter, whether as a document separate from the dissertation or as an appendix to the dissertation. Failure to submit the appropriate documentation can result in a delay or denial of dissertation approval by College of Graduate Studies.
## Doctoral Degree - Dissertation and Project - Animal Research Requirements

If the dissertation includes research activities involving vertebrate animals or select invertebrate species, the care and use of animals or their tissues must be approved by the SJSU Institutional Animal Care and Use Committee (IACUC). Information concerning IACUC requirements and procedures is available from the IACUC Coordinator and online at [http://www.sjsu.edu/research/iacuc/index.html](http://www.sjsu.edu/research/iacuc/index.html). Animal research approval from SJSU must be obtained prior to data collection even if the work is done in conjunction with another institution from which approval has been granted. SJSU prohibits retroactive approval of animal research that is considered ongoing or completed. The official letter of protocol review, obtained with IACUC approval, must be submitted along with the dissertation whether as an appendix or as a separate document. Failure to submit the necessary documentation can result in a delay or denial of the dissertation by College of Graduate Studies.

## Doctoral Degree - Dissertation and Project - Approval

The last three steps in the dissertation-approval process are outlined below:

1. After the dissertation has received final departmental (graduate committee) approval, as indicated by committee signatures, the complete document should be emailed along with the completed Dissertation Information Packet, available at [http://www.sjsu.edu/cgs/current-students/thesis-and-dissertation-information/index.html](http://www.sjsu.edu/cgs/current-students/thesis-and-dissertation-information/index.html). Deadline dates for submission may be found at [http://www.sjsu.edu/cgs/current-students/thesis-and-dissertation-information/index.html](http://www.sjsu.edu/cgs/current-students/thesis-and-dissertation-information/index.html). The deadlines are firm, and exceptions are extremely rare.

2. The dissertation will be read and returned to the student with an assessment by the staff of the College of Graduate Studies as accepted without corrections, provisionally accepted with corrections, or not accepted.

3. If the manuscript has an abundance of errors in formatting, grammar, punctuation or other writing parameters, corrections will have to be made. The advisors on the student’s graduate committee should be consulted about these corrections. It bears repeating that the College of Graduate Studies staff reads and edits only portions of the manuscript, but it is expected that errors of the kinds indicated be corrected throughout the manuscript. If the manuscript is accepted with corrections, the student will be instructed to resubmit it within about a four-week period from the point of notification. If it is rejected, the revised manuscript may not be submitted until the following semester.

## Required Enrollment for Culminating Graduate Students - 1290R

Continuous enrollment is required of all graduate students between completion of regular courses and satisfactory completion of the culminating experience. Graduate students who receive an RP (report in progress) grade in a thesis (299), project (often 298) dissertation (599), doctoral project (often 598), or other culminating experience course, as well as those who have completed course requirements but not the program comprehensive examination, may maintain enrollment by registering for other courses or by registering for one unit of University Studies (UNVS) 1290R or departmental 1290R (Thesis/Project Supervision) through Special Sessions for each Fall and Spring semester until completion. Effective with the Fall 2018 semester, graduate students preparing for comprehensive exams or completing a courses-only program culminating experience are included in this policy.

Graduate students who have completed their course work but are still working on their culminating experience (thesis, project or comprehensive exam) no longer may stop out for even one semester, and they cannot be granted leaves of absence for any reasons other than military leave and severe medical issues. Departments may require repeated enrollment in project, thesis, or comprehensive exam-preparation classes each semester until completion, thereby precluding the need for the 1290R course. There are no formal class meetings for this course. Failure to register for this unit will result in a hold on graduation until the unit is retroactively added. At that time, late fees will apply.

### Registration for 1290R

Registration for the 1-unit UNVS 1290R or departmental 1290R course must be delayed to give students the opportunity to enroll in other courses. Students who have an RP grade in a culminating experience course, a graduation date in the current or future semester, and no enrollment in other courses will be notified after the add period by the Registrar’s Office and given appointments for the UNVS 1290R or departmental 1290R. Graduate advisors of courses-only programs and those with culminating experiences not attached to courses with the RP grade option will need to generate appointments by submitting student names to Graduate Studies. Students with appointments may then register online through MySJSU. No permission or add code is needed. Students will have until the last day of course instruction to register for the course. To maintain their immigration status, international students are encouraged to add the course as soon as their appointments are available. In each subsequent fall and spring semester, students still completing their culminating experience will have to register for this course and will be precluded from registering for any other. The RP grade in the project or thesis course remains on the official record until a culminating memo is submitted by the graduate advisor to the Office of Graduate Admissions & Program Evaluations (GAPE), the course instructor in which the RP was received has petitioned for a grade change, and the student has submitted the online graduation application through their MySJSU account.
The Associate Dean College of Graduate Studies is officially the instructor of record in all 1290R courses and is responsible for assigning the grades as well as establishing the courses with the College of Professional and Global Education each semester. Departments should not attempt to add 1290R courses on their own. To retroactively add a 1290R course requires the student to complete an online Enrollment & Grade for Retroactive 1290R Requests form, available at www.sjsu.edu/registrar/forms, and payment of associated tuition and fees.

More details on the continuous enrollment policy may be found in University Policy S17-5. Details on the RP (Report in Progress) administrative grading symbol may be found in University Policy S09-7. For more information on required enrollment for culminating graduate students - 1290R, please visit the Graduate Studies website.

Institutional Review Board - Human Subjects Research

The IRB reviews all research protocols involving human subjects. Students and faculty are required to submit a research protocol for IRB review and approval before beginning any data collection from participants if their work entails research involving human subjects. Instructions, forms, and templates can be found at www.sjsu.edu/research/irb.

Office of Research
IRB Coordinator
ADM 223B
408-924-2479
www.sjsu.edu/research

Graduation - Facilitation

Undergraduate or graduate students are precluded from enrolling in any additional state-supported courses when that student has already met all necessary requirements for the degree for which that student is matriculated. Moreover, students who have met all requirements for graduation prior to any semester in which they are enrolled will be permitted to drop all courses for which they are registered, with little or no penalty, and to graduate at the next available date. Students who have earned more than enough units to graduate but have some remaining requirements to complete will be advised and precluded from registering in any courses other than those required for a timely graduation.

Master’s Degree - Second (Sequential and Simultaneous)

There are two options for acquiring a second master’s degree. Graduate students who have completed one master’s degree program at San José State University may, with the approval of the new department, complete requirements for a second master’s degree at this institution.

In the first option, the student interested in a sequential second graduate degree after finishing another master’s degree must apply for admission to the second graduate degree program after the first degree is completed and recorded on the permanent record. All policies and procedures listed in this catalog applicable to satisfactory completion of a master’s degree apply to completion of requirements for a second master’s degree, including that program requirements must be completed within a seven-year period. College of Graduate Studies at SJSU will not admit an applicant in pursuit of a master’s degree if it is determined that the applicant has a similar degree already. Pursuit of a second master’s degree will receive a lower priority for admission.

The second option is pursuit of two simultaneous master’s degrees. A student in good standing enrolled in one master’s program may pursue a second master’s degree. Matriculated master’s students do not need to formally reapply to the university through Cal State Apply. However, the student must secure approval from and admission into the second master’s degree program. This requires submission of all application materials previously requested of applicants by the department or school to the first degree program, as well as any additional materials required by the second program. Current transcripts, GRE scores, English-language test scores and letters of recommendation might be among those items required by the second department or school. The student is responsible for making those items available to the department regardless of his or her date of matriculation into the first major. Individual department deadlines apply for acceptance in any particular semester. Note: Approval for admission into the second master’s program is given by means of its graduate advisor’s signature on the Master’s Level Double Degree Application; Contact the GAPE office for more information on this process.

The stipulation, however, is that a student pursuing simultaneous master’s degrees cannot apply for graduation or be awarded either degree until both degree programs are complete. Both degrees must effectively be completed at the same time, and diplomas are issued for both degrees. If a student gains admission into a second degree program while still pursuing the first degree and applies for graduation before finishing the second program, he or she will be awarded the first master’s degree and then lose matriculated status. Student status will thus be revoked and pursuit of a second master’s degree prohibited. To satisfy this procedural requirement, a student should simply delay the request for award of the first degree until the second degree program requirements have been fulfilled. Please keep in mind that graduate units expire after seven years.
Alternatively, if a second master’s degree is desired but will not be completed at the same time as the first, the student must file for graduation from the first degree program and formally apply for admission into the second program. That would require a full application, submission of all documentation required by the university and the department of the second master’s program, and acceptance by both entities. Pursuit of a second master’s degree will receive a lower priority for admission.

An approved program for a second degree should be prepared by the student and graduate advisor in the new field. If the new program happens to include coursework taken in the first degree, a maximum of 33% of the total units required for the new degree may be courses completed in the previous degree at this institution. Thus, for example, a student might be permitted to apply up to 10 units toward a 30-unit program. Such courses must have been completed by the student with a grade of “A,” “B” or, in special cases, “CR.” The courses must be approved by the graduate advisor, who may limit the number of transferred units. The 33% level is allowed only for transfer of units from master’s degree programs taken at SJSU. Transfer from completed degree programs at other institutions is not allowed.

Please note that both simultaneous degree programs must be completed in the same semester to qualify for the double degree award. Both programs must also be completed within seven years. The student who finds he or she cannot complete both degree programs in the same semester has the option of dropping one of the programs and receiving a single degree. Dropping one of the programs requires informing CAPE in writing.

**Interdisciplinary Studies Program - Master’s**

The Interdisciplinary Studies Major for either a Master of Arts or a Master of Science degree provides an alternative for individuals whose desired study plans do not fit the degree offerings of any single existing degree program on campus. In most cases, a thesis is required for this degree. Applicants or graduate students in other majors who wish to undertake the Interdisciplinary Studies major should consult the College of Graduate Studies website at [http://www.sjsu.edu/cgs/current-students/interdisciplinary-studies/index.html](http://www.sjsu.edu/cgs/current-students/interdisciplinary-studies/index.html) to obtain the Proposal for Interdisciplinary Studies Major, which must be completed to obtain initial approval by the Associate Dean of Graduate Studies to be able to enter the program.

For more information on the Interdisciplinary Studies program, contact:

College of Graduate Studies
ADM 146
[www.sjsu.edu/cgs](http://www.sjsu.edu/cgs)

**Graduate Degree - Time Limits- Masters**

Section 40510(b)(2), California Code of Regulations, Title 5, Education, requires that courses in completed masters degree programs be no older than seven years at the time of the degree award. The seven-year period is counted from the end of the semester in which the course was completed. Thus no more than seven years may elapse between the time the first course in a graduate program is completed and the time the last item in the program is completed, the latter indicating fulfillment of all degree requirements. With an outdated course, the candidate has the following options:

- Repeat the outdated course with a passing grade but without credit. The new grades will be factored into the GPA for graduation, and all grade requirements, such as the 3.0 minimum GPA, will still be in effect.
- Under some circumstances, another course (one already completed or to be taken) may be used to substitute for an outdated course. Permission for the substitution must be obtained from both the program’s graduate advisor and the Associate Dean College of Graduate Studies. This practice is highly discouraged, as it violates the rule that completed courses may not be removed from the candidacy form. If the original course is available for enrollment, it is unlikely that permission will be granted.
- Revalidate the outdated SJSU course by examination. Revalidation of courses is governed by University Policy S17-7. A student may revalidate a maximum of 9 units of a 30-unit master’s degree program, or 12 units for a program with more than 30 units. Only courses in which a student has earned a “B” or better may be revalidated. Permission to revalidate from Graduate Studies or from CAPE is not required; examination can proceed and the results communicated to the program evaluator at CAPE by the form entitled Request for Revalidation of Course that Has Exceeded the Seven-Year Time Limit available at [www.sjsu.edu/cape/forms](http://www.sjsu.edu/cape/forms). Course work completed at other institutions is not eligible for revalidation, but transfer courses taken at SJSU may be revalidated. However, some kinds of courses cannot be revalidated, including supervisory courses such as project and thesis courses, seminar courses, independent study courses, and internship courses.
- Departmental course, which satisfy the Graduation Writing Assessment Requirement (GWAR), do not expire and, therefore, need not be revalidated. Other courses that satisfy GWAR are more content-based and do expire; those can be revalidated.
Veterans who are candidates for graduate degrees and who have had their graduate programs interrupted by military service may petition through the Associate Dean College of Graduate Studies to extend the time limit imposed by the above regulations by the amount of time spent in military service. Nevertheless, students in this situation should apply for formal leaves of absence through the University Registrar, thereby making it unnecessary to contact College of Graduate Studies.

### Graduate Degree - Time Limits - Doctoral

Section 40512/40514, California Code of Regulations, Title 5, Education, requires that courses in completed doctoral degree programs be no older than five years at the time of the degree award. The seven-year period is counted from the end of the semester in which the course was completed. Thus no more than five years may elapse between the time the first course in a graduate program is completed and the time the last item in the program is completed, the latter indicating fulfillment of all degree requirements. With an outdated course, the candidate has the following options:

- Repeat the outdated course with a passing grade but without credit. The new grades will be factored into the GPA for graduation, and all grade requirements, such as the 3.0 minimum GPA, will still be in effect.
- Under some circumstances, another course (one already completed or to be taken) may be used to substitute for an outdated course. Permission for the substitution must be obtained from both the program’s graduate advisor and the Associate Dean the College of Graduate Studies. This practice is highly discouraged, as it violates the rule that completed courses may not be removed from the candidacy form. If the original course is available for enrollment, it is unlikely that permission will be granted.
- Revalidate the outdated SJSU course by examination. Revalidation of courses is governed by University Policy S17-7. A student may revalidate a maximum of 9 units of a 30-unit master’s degree program, or 12 units for a program with more than 30 units. Only courses in which a student has earned a “B” or better may be revalidated. Permission to revalidate from College of Graduate Studies or from CAPE is not required; examination can proceed and the results communicated to the program evaluator at CAPE by the form entitled Request for Revalidation of Course that Has Exceeded the Five-Year Time Limit available at www.sjsu.edu/cape/forms. Course work completed at other institutions is not eligible for revalidation, but transfer courses taken at SJSU may be revalidated. However, some kinds of courses cannot be revalidated, including supervisory courses such as project and thesis courses, seminar courses, independent study courses, and internship courses.
- Departmental course, which satisfy the Graduation Writing Assessment Requirement (GWAR), do not expire and, therefore, need not be revalidated. Other courses that satisfy GWAR are more content-based and do expire; those can be revalidated.

Veterans who are candidates for graduate degrees and who have had their graduate programs interrupted by military service may petition through the Associate Dean College of Graduate Studies to extend the time limit imposed by the above regulations by the amount of time spent in military service. Nevertheless, students in this situation should apply for formal leaves of absence through the University Registrar, thereby making it unnecessary to contact College of Graduate Studies.

### Graduate Degree - Leave of Absence - Masters

By University Policy S15-3, a formal leave of absence for graduate students for medical, care-giving, military service, personal hardship, or educational reasons may be requested by submission of the fully signed and documented Leave of Absence Petition. For detailed information on the process and restrictions see Leaves of Absence and Withdrawal.

Graduate students are eligible for all leaves of absence except when finished with all degree requirements other than their culminating experience (thesis, project, and/or comprehensive exam plus any other components required of the major). At that point, neither stopping out (voluntary absence for a semester) nor financial leaves are permissible and students must register for 1 unit of University Studies (UNVS) 1290R or a Departmental 1290R (Thesis/Project Supervision) through special session every semester until graduation (See Thesis and Project Work - RP Status - Graduate). During this stage of a graduate student’s career, leaves of absence for any reason beyond medical or military shall be precluded except under rare circumstances.

Note: International students may not take a leave of absence and must remain in the United States except for documented medical reasons. International students must be enrolled in a full course of study (9 units) for two semesters annually. Winter and Summer registration are not required. If you have further questions please contact the International Student Advising Office.

Note that the seven-year limit on course expiration (see Graduate Degree - Time Limits) remains in effect even for students who have taken leaves of absence, so it is important to plan carefully when applying for a leave of absence. Upon a student’s return, the student’s catalog rights shall pertain to his or her most recent admission date.
Graduate Degree - Leave of Absence - Doctoral

By University Policy S15-3, a formal leave of absence for graduate students for medical, care-giving, military service, personal hardship, or educational reasons may be requested by submission of the fully signed and documented Leave of Absence Petition. For detailed information on the process and restrictions see Leaves of Absence and Withdrawal.

Graduate students are eligible for all leaves of absence except when finished with all degree requirements other than their culminating experience (thesis, project, and/or comprehensive exam plus any other components required of the major). At that point, neither stopping out (voluntary absence for a semester) nor financial leaves are permissible and students must register for 1 unit of University Studies (UNVS) 1290R or a Departmental 1290R (Thesis/Project Supervision) through special session every semester until graduation (See Thesis and Project Work - RP Status - Graduate). During this stage of a graduate student’s career, leaves of absence for any reason beyond medical or military shall be precluded except under rare circumstances.

Note: International students may not take a leave of absence and must remain in the United States except for documented medical reasons. International students must be enrolled in a full course of study (9 units) for two semesters annually. Winter and Summer registration are not required. If you have further questions please contact the International Student Advising Office.

Note that the five-year doctoral limit on course expiration (see Graduate Degree - Time Limits) remains in effect even for students who have taken leaves of absence, so it is important to plan carefully when applying for a leave of absence. Upon a student’s return, the student’s catalog rights shall pertain to his or her most recent admission date.

Latin Honors - Not Available for Graduate Students

Latin honors are reserved at SJSU, as at most universities, for those earning baccalaureate degrees. Because graduate students are required to maintain a minimum cumulative GPA of 3.0, all finishing graduate students would receive honors. Thus they are not considered for receipt of Latin honors. Individual programs are free to award other forms of recognition to outstanding graduate students. For more information, see University Honors at Graduation.
Research - Office of Research

Students have opportunities in many majors to work with faculty on research, scholarship and creativity activity projects. Those who do can present their work in the spring semester in the SJSU Student Research Competition. Finalists of the SJSU competition are eligible for the CSU Student Research Competition. For more information, visit http://www.sjsu.edu/research/.

Organized Research and Training Units

Research units involve industry/university partnerships to enhance technology transfer, encourage development of new products and improve education.

**Accounting Advancement Center** links SJSU students and accounting professional firms; facilitates student networking and professional opportunities; sponsors student seminars on current accounting issues; and rewards excellence among students and faculty members through scholarships and grants.

**Bay Area Retail Leadership Center** consists of a multilateral partnership between SJSU students, retail industry partners, and SJSU faculty, administration, and staff. A program of Center-sponsored events brings constituents together in an effort to provide co-curricular, experiential learning opportunities designed to build students’ leadership skills as well as their awareness and knowledge of retailing as a career destination.

**Biotechnology Education and Research Institute** directs the development of biotechnology through inter-departmental cooperation, serves as a clearinghouse and promotes cooperation between industry, government and the university in biotechnology research and development.

**Center for Applied Mathematics, Computation, and Statistics** provides an innovative educational program to develop training through practical experience.

**Center for Applied Research on Human Services** housed in CHHS, provides supports and services to SJSU faculty interested in applied human services research, including a Grants Academy, writing groups, statistical consultation, and methodological workshops.

**Center for Asian Studies** provides information and counsel about studies in Asia.

**Center for Banking and Financial Services** provides an important complementary component to students’ curricular education in the area of financial intermediation. One of its major goals is to create a link between SJSU students and the banking and financial services sector. By promoting professional development events, the Center provides students with opportunities to interact with professionals. Another major goal is to provide value to the college and university by enhancing the students’ knowledge of financial topics. In fact, the Center sponsors presentations and lectures focusing on topics related to financial intermediation. Finally, the Center rewards excellence among students and faculty members by providing financial support through scholarships and research grants.

**Center for Comparative Philosophy** aims at promoting and enhancing the research and scholarship of comparative philosophy. Comparative philosophy considers philosophy in a global context: it emphasizes the constructive engagement between distinct methodological approaches, substantial views, or explanatory resources from different philosophical traditions and/or from the complex array of distinct approaches of the same tradition with a global vantage point.

**Center for the Development of Recycling** is a national clearinghouse for recycling information and for applied waste management research in order to increase the scope and availability of recycling information and to increase the effectiveness of recycling as a solid waste management strategy.

**Center on Ethics** facilitates the planning and coordination of research-related activities concerned with issues of professional and business ethics.

**Center for Human Language Technology** supports the study of computational linguistics, acts as a resource for Silicon Valley technology industries and explores applications of HLT in industry, education and society at large.

**Center for International Sport and Human Performance** promotes and facilitates cross-national and cross-cultural interaction of individuals and their ideas in the context of sport and human performance.

**Center for Literary Arts** provides programs featuring major contemporary writers, poets and scholars.

**Center for Organizational Resilience** In a world of accelerating change, resilience is recognized as ever more crucial to survival, not just for individuals but for organizations as well. The mission of the Center for Organizational Resilience (COR) at San Jose State University serves as Silicon Valley’s Center of Excellence for theory and practice in the emerging field of Resilience Management. COR supports a network of subject matter experts coalescing to provide resilience thought leadership and research and to disseminate leading practices to academia and the public and private sectors through training, seminars and a variety of digital channels.

**Center for Service Systems Engineering and Innovation (CSSEI)** focuses on the development and application of the principles of service science and management to complex service systems. CSSEI’s focus is on investigations related to creating and/or applying technological innovations and human centered systems engineering processes to improve the customer’s Access to services and the customer’s Service Experience. CSSEI forms collaborations of faculty, students, and industry partners to improve the performance of any health care and regional transportation service system or organization.
Center of Smart Technology and Computing for Complex Systems (STCCS) focuses on delivering state-of-the-art engineering solutions to industrial partners and funding agencies, and provides high-quality technical consulting services and technology training to young researchers and local professionals. Experienced academic faculty, students, and research staff at the Center will carry out highly focused R&D projects addressing current and future challenges and needs in businesses, social communities, and government agencies.

**Collaborative for Disaster Mitigation** is a proactive partnership of the public, private, and academic sectors to encourage and facilitate implementation of mitigation measures to minimize the consequences of natural and other disasters.

**Global Leadership Advancement Center** advances, fosters, and disseminates cutting-edge knowledge on global leadership and its development via diverse programs for scholars, students, and the community. GLAC has two innovative student programs unique to San José State: the GLLab, which is an assessment center for global competencies, and the Global Leadership Passport Program, a co-curricular program in which students earn stamps for activities that prepare them for global work. GLAC’s Social Innovation Initiative leverages the symbiotic relationship among SJSU, social entrepreneurs, the City of San José, foundations, and other innovation organizations to encourage and train people to apply technology and innovation for the good of the local community.

**Institute for Metropolitan Studies** facilitates the exchange of knowledge and expertise regarding urban problems and critical matters related to metropolitan development.

**Institute for Modern Optics** facilitates communication, collaboration, and coordination in the area of lasers and optics and promotes research projects in nonlinear effects at surfaces, laser beam characteristics, two-wave laser mixing, holography, light emission from thin film tunnels, and laser spectroscopy.

**Institute for Nursing Research and Practice** promotes the climate of inquiry within the School of Nursing by coordinating and promoting research projects and interests of nursing faculty in order to develop innovative models for nursing research, practice, and education.

**Institute for People and Performance** aspires to be a center of excellence aimed at advancing knowledge of human capital management, through a combination of training, research, and engagement with industry and professional organizations. Institute for Nursing Research and Practice promotes the climate of inquiry within the School of Nursing by coordinating and promoting research projects and interests of nursing faculty in order to develop innovative models for nursing research, practice, and education.

**Institute for the Study of Sport, Society and Social Change** encourages, creates and facilitates interdisciplinary collaboration to illuminate the substance, dynamics and significance of the institution of sport as a social sphere within which issues of power and ideology are created, reaffirmed, and challenged. It is dedicated to research, analysis and education focused on the intersection of sport and social justice with activities guided by the theoretical, methodological and applied research perspectives and traditions of the sociology of sport.

**Ira F. Brilliant Center for Beethoven Studies** is the only research facility and document repository in North America dedicated solely to the study of the life of and performance of the works of Ludwig van Beethoven.

**Martha Heasley Cox Steinbeck Research Center** houses one of the most extensive collections of John Steinbeck’s manuscripts, letters, photographs and artifacts, fostering research concerning the life and work of the author.

**Materials Characterization and Meteorology Center** provides materials imaging and chemical analysis capabilities for applications in various fields of science and engineering. Instruments are located in various buildings across campus.

**Mineta Transportation Institute** focuses on international surface transportation policy issues as related to three primary responsibilities: research, education, and technology transfer. MTI receives policy oversight from an internationally respected board of trustees who represent all of the major transportation foundations, and other innovation organizations to encourage and train people to apply technology and innovation for the good of the local community.

**Research Institute for Foster Youth Initiatives** explores ways to eliminate barriers that current and former foster youth have at obtaining a suitable education.

**Silicon Valley Big Data and Cybersecurity Center** directs the development of cyber security and big data research projects through multidisciplinary cooperation. Serves as the clearinghouse and promotes cooperation between industry, government, and SJSU in research & development, policy analysis & development, and workforce training.

**Silicon Valley Center for Entrepreneurship** aims to promote interdisciplinary research that is valuable to entrepreneurs and aspiring entrepreneurs, support academic departments in developing an entrepreneurship curriculum informed by research, foster an entrepreneurial mind-set among students, and strengthen the connective fabric of innovation and entrepreneurship within the university and in Silicon Valley.

**Silicon Valley Center for Global Engineering and Education** enhances engineering students’ educational experience and career prospects in the global context by cultivating a vital relationship between SJSU and international engineering education institutions. The activities of the Center are to develop, market, and implement educational cooperation programs to international universities and to work with various SJSU units to offer outreach activities around global engineering education.
Silicon Valley Center for Operations and Technology Management is a knowledge portal for sharing academic and industrial information related to operations, supply chain, and technology management among students, faculty members, and industry partners. It is also the point of training for supplying and supporting the professional needs of the industry. The Center will serve as a future knowledge hub through research on state-of-the-art topics relevant to the Center’s themes.

Sourisseau Academy promotes better understanding of California’s state and local history with emphasis on the history of Santa Clara Valley through graduate scholarships and collections of historical source materials.

For more detailed information on Organized Research and Training Units please visit http://www.sjsu.edu/research/ortu/index.html.
General Education (GE)

General Education (GE) - Program Objectives

A university brings together many separate areas of learning, yet it is more than just a collection of specialized disciplines. The SJSU General Education Program incorporates the development of skills, the acquisition of knowledge, and the integration of knowledge through the study of facts, issues, and ideas. Regardless of major, all who earn undergraduate degrees should share common educational experiences, as they become university scholars. In combination with major, minor, and elective courses, the General Education curriculum should help students attain those attributes found in an educated person.

Students who complete the General Education curriculum should be able to demonstrate:

- Knowledge of Human Cultures and the Physical and Natural World
  (focused by engagement with big questions, both contemporary and enduring through study in the sciences and mathematics, social sciences, humanities, histories, languages, and the arts)
- Intellectual and Practical Skills
  (practiced extensively, across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance)
- Personal and Social Responsibility
  (anchored through active involvement with diverse communities and real-world challenges)
- Integrative Learning
  (demonstrated through the application of knowledge, skills, and responsibilities to new settings and complex problems)

The advancement of academic discourse requires civility and a respectful attitude toward all in the expression and consideration of a variety of viewpoints. All courses shall reinforce the ethical responsibility of students and instructors to acknowledge respectfully the learning styles and forms of expression of individuals and members of all groups.

General Education (GE) - Policies

1. All students must complete 48 units of approved GE courses with letter grades. If a requirement is waived without unit credit, additional approved GE courses must be taken to complete a minimum of 48 GE units.
2. All three areas described below must be completed by all students: Core GE (39 units), SJSU Studies (9 upper division GE units and 100W) and American Institutions (0-6 units).
3. Transfer students may fulfill all lower division core GE by completing the Intersegmental GE Transfer Curriculum (IGETC) or a CSU GE 39-unit breadth certification prior to transfer. Having completed the IGETC or CSU GE Breadth certification, the transfer student cannot be held to additional lower division core GE requirements.
4. All students must satisfy SJSU Studies at SJSU regardless of GE completed at other institutions. Exceptions:
   - Written Communication II (100W) may be satisfied prior to transfer, unless also specified as a course requirement in the major.
   - A complete 48 unit GE Certification from another CSU is submitted, showing lower and upper division completed.
   - Second baccalaureate students who earned their first bachelor degree from a regionally accredited institution in the U.S. (effective Fall 2011)
   - Student’s complete an approved upper division GE course at another CSU, in person or online
5. If a course is listed as a sequence (A-B), the entire sequence must be completed to satisfy the requirement.
6. Oral Communication (A1), Written Communication I (A2), Critical Thinking and Writing (A3), and Mathematical Concepts (B4) courses each require a minimum grade of “C- or better”.
7. Completion of Written Communication I (Area A2) with a “C- or better” is prerequisite to the WST. Satisfying the WST requirement is prerequisite to any SJSU Studies course.
8. To find approved courses, check the GE designator listed for the requirement. This designator is printed by each GE class section in the SJSU Schedule of Classes.
9. All GE courses must be on the approved list of the California Community College (CCC), California State University (CSU) or University of California (UC) for CSU Breadth Requirements or the Intersegmental General Education Transfer Curriculum (IGETC) where and when the course is taken.

10. The following GE courses require prerequisites to enroll:
   - Oral Communication (Area A1) & Written Communication I (Area A2), both passed with grades of “C- or better”, are prerequisites to Critical Thinking and Writing (Area A3)
   - Satisfaction of the Writing Skills Test (WST) requirement and upper division standing are prerequisites to SJSU Studies (Areas R, S, V, Z)
   - Completion of Area A3 (or a 2nd semester composition course) with a “C- or better” is a prerequisite to Area Z (100W).

See the Testing section for additional information about these exams.

11. Subsequent to completion of all CSU general education requirements (at the lower and upper divisions), a student may not be required to satisfy additional general education requirements outside of the major program requirements.

12. Complete information on specific requirements and approved courses is found each semester in the SJSU Policies document.

General Education (GE) - Previous Requirements

Students approved for earlier GE patterns have four options:
1. Follow the pattern described here;
2. Continue to follow their previous pattern using courses that now appear in categories that are the same as the previous pattern;
   -or-
3. Use courses previously taken when approved for the required categories;
   -or-
4. Use courses in new categories to substitute for previous requirements.

General Education (GE) - Academic Advisement

Your college student success center and Academic Advising and Retention Services provides general education academic advising to ensure your academic success and help you achieve your educational goals. To make the most of your advising sessions, please observe the following:
- You must be a currently matriculated student at the time you make an appointment.
- Bring a complete set of all college transcripts—unofficial copies are acceptable.
- Bring a copy of your General Education certification if you attended a California Community College. A partial certification is acceptable.
- Review your MyProgress and MyPlanner reports prior to your appointment
- Learn the requirements for your major—see the SJSU Catalog for details.
- See your major advisor.

Note: Admitted students should wait until after attending an orientation program before requesting an appointment. Students who have not yet been admitted to SJSU should make an appointment for advising with Student Outreach and Recruitment at 408-924-2564.

### General Education (GE) - Requirements Overview

#### Core General Education

**BASIC SKILLS OF AN EDUCATED PERSON**

These courses build key skills for learning - communication and critical thinking. An educated person communicates ideas effectively both verbally and in writing. Being able to organize and express ideas is a key part of learning. An educated person must also have strong reasoning powers in order to analyze critically all types of information. The skills courses within General Education provide an opportunity for students to gain and enhance critical communication and analytical skills.

- Oral Communication (A1) ................................3
- Written Communication I (A2) .....................3
- Critical Thinking and Writing (A3) ..............3
- Mathematical Concepts (B4) ..........................3

Subtotal......................................................................12 units

**BASIC KNOWLEDGE OF AN EDUCATED PERSON**

In these courses, students gain the fundamental knowledge of an educated person. Students have opportunities to demonstrate an appreciation of the fundamentals of science, arts and letters, and the forces that shape the individual and modern society throughout the lifespan. This fundamental knowledge is crucial to understanding more advanced topics, including a major field of study.

- Physical Science (B1)*....................................................3
- Life Science (B2)* ..........................................................3
- One lab course in either physical or life science is required (B3)
- Arts (C1)........................................................................3
- Letters (C2)...................................................................3
A third course from either Arts or Letters (C1 or C2) ..........3
Human Behavior (D1) ...............................................................3
Comparative Systems, Cultures & Environments (D2) ..........3
Social Issues (D3) .................................................................3
Human Understanding & Development (E) .....................3
Subtotal ..................................................................................27 units

SJSU Studies - Upper Division General Education (R, S, and V) and Written Communication II (Z)

INTEGRATED KNOWLEDGE OF AN EDUCATED PERSON

In these courses, students become integrated thinkers who see connections between and among a variety of concepts and ideas. An educated person applies concepts and foundations learned in one area to other areas as part of a lifelong learning process. These courses help students to live and work intelligently, responsibly, and cooperatively in a multicultural society and to develop abilities to address complex issues and problems using disciplined analytical skills and creative techniques.

Earth and Environment (R) ..................................................3
Self, Society & Equality in the U.S. (S) ...............................3
Culture, Civilization & Global Understanding (V) ........3
Written Communication II (Z) ..............................................0-3
Subtotal ..................................................................................9-12 units

Graduation Requirements

Requirement .................................................................................. units
American Institutions (may be satisfied in Core) ..........0-6
Physical Education (two units or courses of activity are required) ....0-2
Written Communication II (Z) (part of SJSU Studies) ............0-3

TOTAL GENERAL EDUCATION UNITS 48 UNITS

Core ..................................................................................................39 units
Upper Division ................................................................................9 units

General Education (GE) - CORE (Basic Skills and Basic Knowledge of an Educated Person)

Students must complete 39 units of Core GE courses.

English Language Communication and Critical Thinking

9 units

Complete one course each in Oral Communication, Written Communication IA, and Critical Thinking and Writing.

ORAL COMMUNICATION (A1)

Oral Communication courses should cultivate an understanding of the social, psychological, political and practical significance of communication, with special emphasis on the roles of public communication in a free society.

COMM 020 ..........Public Speaking
COMM 020N ..........Public Speaking for Nonnative Speakers
COMM 040 ..........Argumentation & Advocacy
HUM 001A-1B ^ ..........World Cultures & Societies- Honors
HUM 002A-2B ^ ..........Modern World Cultures - Honors
MAS 074 ..........Public Address

WRITTEN COMMUNICATION I (A2)

Written communication 1A courses should cultivate an understanding of the writing process and the goals, dynamics, and genres of written communication, with special attention to the nature of writing at the university.

ENGL 001A ..........First Year Writing
ENGL 01AS .....................First Year Composition, Stretch II
HUM 001A-1B ^ ......World Cultures & Societies- Honors
HUM 002A-2B ^ ......Modern World Cultures - Honors

**CRITICAL THINKING AND WRITING (A3)**

Critical thinking courses should help students learn to recognize, analyze, evaluate, and produce reasoning.
ANTH 013 ..........Archaeology
COMM 041 ............Critical Decision Making
COMM 045 ..........Media and Culture
ENGL 002 ............Critical Thinking and Writing
HIST 050 ..........Historical Process: Understanding Historical Reasoning
HUM 001A-1B ^ ......World Cultures & Societies- Honors
HUM 002A-2B ^ ......Modern World Cultures - Honors
HUM 080 ..........Reading the World
LING 021 ..........Language & Thinking
LING 024 ..........Language Variation in Space, Time, & Culture
PHIL 057 ..........Logic & Critical Reasoning
POLS 020 ..........Controversial Legal Issues

^ = Eight GE areas, including third Area C, and all of American Institutions completed when the Humanities Honors sequence (HUM 1A/1B/2A/2B) is completed with grades of “C- or better.”

**Scientific Inquiry and Quantitative Reasoning**

9 units
Complete at least one 3-unit course in Physical Science, Life Science, and Mathematical Concepts.
At least one lab course (L) must be included.

**PHYSICAL SCIENCE (B1)**

In Science courses, students should master sufficiently essential quantitative and qualitative skills that are necessary to understand scientific knowledge and methods. Students should be able to incorporate scientific knowledge into the workplace and everyday life experiences.

ASTR 010 ............Descriptive Astronomy
CHEM 001A (L)* ......General Chemistry
CHEM 001B (L)* ......General Chemistry
CHEM 030A (L) ......Introductory Chemistry
ENGR 005 ......Science of High Technology
GEOG 001 ......Geography of Natural Environments
GEOL 001 ......General Geology
GEOL 003 ......Planet Earth
GEOL 006 ......Geology of California
GEOL 007 ......Earth, Time & Life
GEOL 009 ......Earth Disasters
METR 010 ......Weather & Climate
METR 012 ......Global Warming
NUFS 001A ......Physical Science of Foods
PHYS 001 ......Elementary Physics
PHYS 002A (L)* ......Fundamentals of Physics
PHYS 002B (L)* ......Fundamentals of Physics
PHYS 023 ......Animation Physics
PHYS 050 (L)* ......General Physics/Mechanics
PHYS 051 (L)* ......General Physics/Electricity and Magnetism
PHYS 052 (L)* ......General Physics/Waves, Light, Heat

*Intensive Science*

Students who have completed the Intensive Science courses with a "C- or better", will be allowed to use these courses to fulfill the requirement in B1/B3 or B2/B3. Students may petition to have (1) grades below C- (very rarely approved), or (2) other Intensive Science courses not on the list approved as intensive science courses. Additionally, the following packages of courses, all completed with "C- or better", will satisfy Areas B1, B2, and B3: Two courses from PHYS 50, PHYS 51, or PHYS 52, and CHEM 1A; or PHYS 2A and PHYS 2B and CHEM 1A; or CHEM 1A and CHEM 1B, plus a physics course. See details on the petition at: http://www.sjsu.edu/gup/allForms/index.html#studentPetitions.

*Intensive Math

Students who have not completed a course satisfying Area B4, but have completed MATH 030, MATH 030P, MATH 030PL, MATH 031, MATH 032, MATH 070, or MATH 071, with a grade of “C- or better” will be allowed to use one of these courses to fulfill the Area B4 requirement.

Arts & Letters (Area C)  

Effective Fall 2014, Area C3 has been discontinued. Completion of 9 units in Area C is still required.

In Area C, complete no fewer than 9 semester units, with at least one course in the Arts (C1) and one in the Letters (C2).

Arts and Letters courses should give students knowledge and understanding of significant works of the human intellect and imagination. Courses should enable students to participate in social and cultural communities associated with artistic and literary endeavors, enriching their personal and professional lives.

ARTS (C1)

AMS 001A-B ........ American Civilization

^ = Eight GE areas, including third Area C, and all of American Institutions completed when the Humanities Honors sequence (HUM 1A/1B/2A/2B) is completed with grades of "C- or better."

*Intensive Music

Students who have completed the Intensive Music courses, MUSC 4A, MUSC 4B and MUSC 12, with a “C or better”, will be allowed to use these courses to fulfill the requirements of Area C. Students may petition to have (1) grades below C (very rarely approved), or (2) other Intensive Music courses not on the list approved as intensive music courses. See details on the petition at: [http://www.sjsu.edu/gup/allForms/index.html#studentPetitions](http://www.sjsu.edu/gup/allForms/index.html#studentPetitions).
Social Sciences
9 units

Complete one course each in Human Behavior, Comparative Systems, and Social Issues.

Social Science courses should increase the student’s understanding of human behavior and social interaction in the context of value systems, economic structures, political institutions, social groups, and natural environments.

**HUMAN BEHAVIOR (D1)**

- Human Behavior courses will enable students to be able to recognize the interaction of social institutions, culture, and environment with the behavior of individuals.
- ANTH 011: Cultural Anthropology
- CHAD 075: Imagination, Play & Adult Creativity
- CMPE/CS 025: The Digital World & Society
- COMM 010: Communication & Human Relationships
- COMM 021: Performing Culture & Society
- ECON 001B: Principles of Economics: Microeconomics
- ENGR/TECH 098: Technology & Women
- ENVS 001: Introduction to Environmental Issues
- GEOG 010: Cultural Geography
- HS/GERO/RECL 015: Human Life Span
- JOUR 050: Navigating the News
- LING 020: Nature of Language
- LING 024: Language Variation in Space, Time, & Culture
- MAS 030: Race & Ethnicity in Public Space
- PSYC 001: General Psychology
- SOCI 001: Introduction to Sociology
- WOMS 005Q: Gender, Race & Sexuality in Media
- WOMS 010: Perspectives on Sex & Gender Roles

**COMPARATIVE SYSTEMS (D2)**

- Courses in this area will enable students to compare and contrast two or more ethnic groups, cultures, regions, nations, or social systems.
- AAS/AFAM/MAS 025: The Changing Majority: Power & Ethnicity in America
- AAS 033A-33B: Asian Americans in the United States Historical & Political Process
- AFAM 002A-2B: African-Americans and the Development of America’s History and Government
- AMS 001A-1B: American Civilization
- GEOG 012: Global Geography
- HIST 010A: Western Civilization
- HIST 010B: Western Civilization
- HIST 015: Essentials of U.S. History
- HUM 001A-1B: World Cultures & Societies - Honors
- HUM 002A-2B: Modern World Cultures - Honors
- MAS 10A-10B: Mexican Americans & the Development of U.S. History and Government
- POLS 002: Introduction to Comparative Politics
- WOMS/AAS 020: Women of Color in the US

**SOCIAL ISSUES (D3)**

- Social Issues courses will enable students to apply multidisciplinary material to a topic relevant to policy and social action at the local, national, and/or international levels.
- AAS 033A-33B: Asian Americans in the United States Historical & Political Process
- AFAM 002 A-B: African-Americans and the Development of America’s History and Government
Human Understanding & Development

3 units

Complete one course.

Human Understanding and Development courses will enable students to understand themselves as integrated physiological, social, and psychological entities who are able to formulate strategies for lifelong personal development. Students will also learn skills to employ available university resources to support academic and personal development.

**HUMAN UNDERSTANDING & DEVELOPMENT (S)**

- ANTH 025: Human Lifecourse in Context
- BIOL 054: Human Understanding
- BUS 012: Money Matters
- CA 060: Creativity Matters
- CHAD 060: Child Development
- CHAD 070: Lifespan Development in the 21st Century
- COMM 074/074Q: Fundamentals of Intercultural Communication
- EDCO 004/004FY: Personal, Academic & Career Exploration
- ENGR 010*: Introduction to Engineering
- GEOL 005: Human Development & the Natural World
- HS 001: Understanding Your Health
- KIN 069: Stress Management: A Multidisciplinary Perspective
- LING 022: Language Across the Lifespan
- NUFS 009: Introduction to Human Nutrition
- PHIL 012: Philosophy of the Person
- PSYC 002Q: Identity Development & Prejudice
- RECL 010: Creating a Meaningful Life
- RELS/HUM/GERO 099: Death, Dying & Religions
- SCI 002: Success in Science
- SOCI/UNVS 057: Community Involvement & Personal Growth
- TA 048: Voice & Movement for the Actor

*For specific department/program majors only
American Institutions Courses

6 Units

- All three requirements (US History, US Constitution, and California Government) must be completed from the following course work.
- Courses do not satisfy Core GE unless there is a GE area designator in parentheses.
- The WST is a prerequisite for HIST 170S and POLS 170V only.

Courses in American Institutions should expose students to alternative interpretations of the historical events and political processes that have shaped the social, economic, and political systems in which we live.

**US HISTORY, US CONSTITUTION & CALIFORNIA GOVERNMENT (US 1-2-3)**

All of these sequences satisfy Core GE requirements listed in parentheses. All courses in the sequence must be completed to satisfy the requirement.

- AAS 033A-33B .............. Asian Americans in the US Historical & Political Process (D2/3)
- AFAM 002A-2B .............. African-Americans & the Development of America’s History and Government (D2/3)
- AMS 001A-1B .............. American Civilization (C1/2, D2/3)
- HUM 001A-1B .............. World Cultures & Societies - Honors (A2, C1/2, D2)
- MAS 010A-10B .............. Mexican Americans & the Development of US History and Government (D2/3)

**AMERICAN HISTORY ONLY (US 1)**

- HIST 015 .............. Essentials of U.S. History (D2)
- HIST 020A .............. History of the American People
- HIST 020B .............. History of the American People
- HIST 170 .............. Topics American History
- HIST 170S .............. Topics Am History: Am Identities (S)

**US CONSTITUTION & CALIFORNIA GOVERNMENT ONLY (US 2-3)**

- POLS 001 .............. American Government
- POLS 015 .............. Essentials of US & California Government (D3)
- POLS 170V .............. Am Politics-Global Perspective (V)

**CALIFORNIA GOVERNMENT ONLY (US 3)**

- HIST 189A .............. California to 1900
- HIST 189B .............. California from 1900
- POLS 102 .............. State Government & Politics

^ = Eight GE areas, including third Area C, and all of American Institutions completed when the Humanities Honors sequence (HUM 1A/1B/2A/2B) is completed with grades of “C or better.”

**SJSU Studies**

Students complete 9 to 12 units of SJSU studies: 9 units of upper division general education courses (Areas R, S, and V) and 0 to 3 units of 100W (Area Z). In some cases that SJSU Studies areas are integrated in a single course or overlap with major courses.

- Complete one SJSU Studies course in each category.
- Completing Area Z with a grade of “C or better” (C- not accepted) is a graduation requirement.
- Prior to enrollment, all SJSU Studies courses require completion of core GE, satisfaction of Writing Skills Test and upper division standing. Pre/Co-requisite of a 100W course is strongly recommended for enrollment in Areas R, S, and V.
- Students who fail the WST may satisfy this requirement by passing ENGL 100A or LLD 100A with a grade of “C or better.”
- Students can satisfy Areas R, S, & V by taking COMM/ENVS/GEOL/HUM/METR 168A/168B: Global Climate Change or HUM 177A/177B: Advanced Honors in Integrated Science, Social Science and Humanities. These are year-long courses sequences: students enroll in 6 units in the Fall and 3 units in the Spring. By successfully completing one of these course sequences with a "C or Better" in each semester, students satisfy all nine units of upper division GE (Areas R, S, & V) within SJSU Studies.

- All first baccalaureate students are required to have a minimum aggregate GPA of 2.0 in their upper division GE courses (Areas R, S, & V). If more than one course is taken in any of the individual R, S, or V areas, then the highest grade in that individual area will be used to calculate the aggregate SJSU Studies GPA. This policy is effective Fall 2011 for all SJSU students who do not have catalog rights prior to Fall 2011.

- Second baccalaureate students who earned their first bachelor degree from a regionally accredited institution in the U.S. are not required to take SJSU Studies unless specific courses are required by the major. (Effective Fall 2011)

- Transfer students who complete any portion of upper division GE at another CSU campus may request equivalency for coursework in SJSU Studies. Contact the Office of Graduate & Undergraduate Studies for evaluation of coursework.

Areas R, S, and V.

9 units

Complete one 3-unit course from each category.

### EARTH & ENVIRONMENT (R)

Courses in Earth and Environment will cultivate a student's knowledge of the scientific study of the physical universe and its life forms. Students will understand and appreciate the interrelationship of science and human beings to each other.

*For specific department/program majors only

** Successful completion of this year-long course sequence (with a “C or Better” in each semester) satisfies Areas R, S, & V.

**SELF, SOCIETY & EQUALITY IN THE U.S. (S)**

In these courses, students will study the interrelationships of individuals, racial groups, and cultural groups to understand and appreciate issues of diversity, equality, and structured inequality in the U.S., its institutions, and its cultures.

### CULTURE, CIVILIZATION & GLOBAL UNDERSTANDING (V)

In these courses, students should receive an appreciation for human expression in cultures outside the U.S. and an understanding of how that expression has developed over time. Additionally, students should understand how traditions of cultures outside the U.S. have influenced American culture and society.

Written Communication II

3 units

All students must satisfy Area Z (GWAR) by

- Earning a “C or better” in a 100W course, all of which enforce the prerequisite of a passing score on the writing Skills Test (WST) or a grade of “C or better” for ENGL 100A or LLD 100A.
- For most degree programs, students should take the 100W course that is required as part of the degree program (listed below); or
- Completing the Graduation Writing Assessment Requirement (GWAR) while matriculated at another CSU, or equivalent course work at another university prior to SJSU enrollment; or
- A waiver score on the WST satisfies Area Z without the need to complete a 100W course only in majors that permit a waiver score. Majors that do not permit a waiver (regardless of score) are listed below.
- Effective Fall 2011: Second baccalaureate students who earned their first bachelor degree from a regionally accredited institution in the U.S. are not required to take this course unless required by their major department.

In written communication II courses, students will develop advanced proficiency in college-level writing and appropriate contemporary research strategies and methodologies to communicate effectively to both specialized and general audiences.
The following majors require that students complete the Written Communication II (Area Z) course regardless of their score on the Writing Skills Test (i.e., no waiver allowed).

- African American Studies
- Chemistry
- Communication Studies
- Engineering (all majors)
- English
- Environmental Studies
- Geography
- Geology
- Global Studies
- History
- Meteorology
- Nursing
- Political Science
- Psychology
- Social Science (Teacher Preparation and Multiple Subject Preparation)
- World Languages and Literature (all majors)
### Major Exceptions and Modifications for GE and SJSU Studies

**Major Exceptions**

Students with the following majors must consult with their major advisors regarding approved modifications of GE. Most exceptions are valid only if the student graduates with the listed degree major (noted by major). General Education Attribute Legend.

SB1440 Programs with PE Waivers

The following SB1440 TMC Roadmaps include PE Waivers:

- Art - Concentration in Art History & Visual Culture (BA)
- Behavioral Science (BA){with AA-T in Global Studies or AA-T in Social Justice Studies}
- Biological Sciences (BA)
- Biological Sciences, Concentration in Microbiology (BS)
- Biological Sciences, Concentration in Molecular Biology (BS)
- Biological Sciences, Concentration in Systems Physiology (BS)
- Business Administration, Concentration in Business Analytics (BS)
- Business Administration, Concentration in General Business (BS)
- Business Administration, Concentration in Global Operations Management (BS)
- Business Administration, Concentration in Entrepreneurship (BS)
- Business Administration, Concentration in Finance (BS)
- Business Administration, Concentration in Human Resource Management (BS)
- Business Administration, Concentration in Management (BS)
- Chemistry (BA)
- Chemistry (BS)
- Chinese (BA) {with AA-T in Global Studies or AA-T in Social Justice Studies}
- Computer Science (BS)
- Economics (BA){with AS-T in Business Administration]
- English (BA)
- English - Concentration in Professional and Technical Writing (BA)
- English - Concentration in Creative Writing (BA)
- Forensics Science - Concentration in Biology (BS)
- Forensics Science - Concentration in Chemistry (BS)
- French (BA) {with AA-T in Global Studies or AA-T in Social Justice Studies}
- Geography (BA)
- Humanities - Concentration in Religious Studies (BA)
- Hospitality Management (BS)
- Japanese (BA) {with AA-T in Global Studies or AA-T in Social Justice Studies}
- Math (BA)
- Math - Preparation for Teaching (BA)
- Physics (BS)
- Radio-TV-Film (BA)
- Social Science- Preparation for Teaching (Multiple Subject) (BA) {with AA-T in Elementary Education]
- Spanish (BA)
- Spanish (BA) {with AA-T in Global Studies or AA-T in Social Justice Studies}
- Spanish - Preparation for Teaching (BA)
Registration

Make sure you have working access to MySJSU via One.sjsu.edu

Make sure your browser (Explorer, Firefox, Safari) will work at MySJSU.

For your convenience, computer access locations are available at these campus locations:

- Clark Hall
- King Library
- Associated Students Computer Lab, Student Union
- Lobby, Student Services Center
- Peer Connections, Student Services Center
- Campus wireless hotspots

SJSU ID

- Use your SJSUOne login information to sign into MySJSU. Your SJSU ID, also known as your Tower ID, is the number found on the front of your Tower Card.
- Your ID can not be changed.
- New students receive this information from Admissions Office communications.

Password

- You can set your password for the first time or reset it if you have forgotten it by navigating to http://my.sjsu.edu and clicking on the Set/Reset Password button.
- When setting or changing your password, pay close attention to the case in which you enter the letters.
- Remember, your password is case sensitive!
- If you are having difficulty resetting your password, please contact ithelpdesk@sjsu.edu for assistance. Include your full name, SJSU ID if known, your date of birth, and your mailing address.

What to do if you can’t log in

- Contact ithelpdesk@sjsu.edu for assistance.

Registration - Appointments and Class Schedule

Do your research and plan your schedule

Check your enrollment appointment at http://my.sjsu.edu.

You will not be able to register before your appointment time, but you can enter the system, run MyProgress and MyPlanner, and research course offerings, degree requirements, course prerequisites, etc. You will not be able to register until you clear registration holds (see Registration Holds).

It is your responsibility to monitor your account to see when the appointment time is posted. Note that enrollment appointments are not mailed to students.

Create a registration worksheet before logging on

Build a sample schedule and have alternate schedules or classes prepared in the event courses are either closed or cancelled. SJSU offers course listings to you in 3 ways:

1. Use MyScheduler to find the schedule options that work for you, You can import your semester plan from MyPlanner to MyScheduler and you can block out times you have work other other commitments.
2. http://my.sjsu.edu class schedule search function: Real-time updates of available courses (open and closed sections, seats remaining).
3. info.sjsu.edu: Instructions, policies, procedures and course listings at one URL. Searchable, linked to SJSU Catalog degree templates.
4. info.sjsu.edu links to PDFs (Portable Document Format): Best current format if you want or need to print schedule pages.
5. http://www.sjsu.edu/advising/roadmaps/: Check out the Roadmap for your major requirements and run MyPlanner.
Registration - Course Offerings and Cancelled Classes

The courses listed in the online SJSU Schedule of Classes reflect the scheduled offerings by the departments available at the publication deadline. The online schedule of classes posted at MySJSU provides real time status of classes. Departments have the option, based on enrollment, to cancel and/or add sections or courses.

Registration - Priority Groups

Current work-in-progress is used to determine class level for registration purposes. All priority groups are approved by the Student Success Committee of the Academic Senate, per University Policy F17-4.

Group One

Priority Students

Students who are required by external agencies such as the National Collegiate Athletic Association, or by law, to receive priority. This excludes students covered by SB 412, the California Promise program unless they also fall under another group with required priority registration.

Students whose contributions to the university are recognized as being so extensive that their graduation would be postponed by the amount of time spent on their extracurricular duties.

Students serving on Senate committees that require student participation in order to perform essential functions.

Students who are part of any group that has a contractual agreement with SJSU to provide a full course load. Groups in this category include:

- Accessible Education Center (AEC) students
- AEC note takers
- Associated Students Board of Directors
- Student Fairness Committee Members
- NCAA Athletics
- Guardian Scholars
- Reciprocal Exchange students
- Veterans (as per Cal. Educ. Code §66025.8)
- Students serving on Academic Senate committees that require student participation in order to perform essential functions
- Students who are part of any group that has a contractual agreement with SJSU to provide a full course load
- Appropriately certified students with disabilities

Group Two

- Graduating seniors (bachelors-level students who have a graduation application on file with an anticipated graduation date for the current or next semester) in the California Promise program
- Remaining graduating students (bachelors- and graduate-level students who have a graduation application on file with an anticipated graduation date for the current or next semester)

Group Three

- Non-graduating Graduate students based on alphabetical groupings

Group Four

- Seniors in the California Promise Program
- Non-graduating Seniors based on alphabetical groupings

Group Five

- Second Baccalaureate students based on alphabetical groupings
Group Six
- Juniors in the California Promise Program
- All other Juniors based on rotating alphabetical groupings

Group Seven
- Sophomore and continuing Freshmen in the California Promise Program
- All other Sophomores and continuing Freshmen based on rotating alphabetical groupings

NOTE: First-Time Frosh registration is completed through Frosh Orientation In coming transfer student have a registration date dependent on when they matriculate.

Registration - Adding a Class

Go to [http://one.sjsu.edu](http://one.sjsu.edu)
Enter your SJSU ID and Password
Navigate to Academics > Add a Class
- Select the correct term. If you do not see the desired term, you are not eligible to enroll. New students should contact Admissions. Continuing students should contact the Registrar’s Office.

Choose the class you wish to add.
To search the schedule, click the green “Search Button.” Make sure the Course Career is set to Graduate or Undergraduate depending on the class you are searching for. If you find a class you wish to add, click the “Select Class” button to place it in your shopping cart.
Alternatively, if you know the class number for the class you wish to add, you can simply type the 5 digit Class Nbr and click the Enter button.

Either way, once you have chosen a class, a new page called “Class Enrollment Options” will appear. Verify that the course is the one you selected. If required, enter any permission numbers and select any related components if applicable, and click Okay. The Add Classes page will appear, and you will see your classes in your shopping cart.

Warning: you have not yet added your classes.

Component Classes
If the course has related components attached to it (e.g., lab, seminar), the system will prompt you to select the one you wish to add.

Department or Instructor Consent
If you received a Class Permission Number, enter it in the available field. Please note that most classes will require a Class Permission Number if you are adding during Late Registration.

Switching Class Sections?
You must drop the section (lecture and labs/seminar, as well, if they have related components or corequisites) before adding the new class section(s).

Add Additional Classes
If you want to add another class to your add classes list, simply repeat the previous steps.

Warning: Finish Enrolling
Make sure you complete the process! Once you have added all your classes to your shopping cart, click the green button that says “Proceed to Step 2 of 3.” On the next page you will be given the chance to review your enrollment and make sure that it is accurate. Once you have verified your classes, click the green “Finish Enrolling” button to submit your registration.

Verify Add
Check to make sure you did not receive any errors for the classes you added. If you did, you can see a message explaining why you could not add the class, for example, prerequisites not met, or the class is full. Finally, check your class schedule to make sure all the classes you added appear.
Registration - “Instructor Consent” or “Department Consent”

Should you receive a registration error indicating that “Instructor Consent” is required, you must go to the instructor to obtain the Permission number. To add the course, use the Permission Number with the Class Number for that specific course section, as listed in the course schedule.

“Department Consent” requires students to go to the department that offers the course to obtain the Permission Number. To add the course, use the Permission Number with the Class Number for that specific course section, as listed in the course schedule.

Permission numbers become ‘used’ only after an enrollment request is successful. To assure a successful enrollment request if you are adding using a permission number, remember the following before clicking the submit button:

Remember the following before clicking the submit button:

- Check that you have no holds.
- Check that you have met all prerequisites.
- Only enter the enrollment section in the class number section.
- Enter any and all Component Courses (e.g., corequisite labs or seminars) and determine what required course is approved even before trying to “Enroll in the Class.”

To enroll if you submitted a number but received an error, re-enter the same permission number after resolving the error.

Registration - Adding Classes on the First Day of Instruction

At the first class meeting, Group 3: Graduating Students (bachelors and graduate level students who have a graduation application on file with an anticipated graduation date for the current or next semester) shall have top priority for any available spaces. Students seeking to add the course should provide documentation showing that they are graduating seniors as defined above.

An impartial procedure (such as a lottery or any other method of random selection) shall be used to choose, from among the graduating seniors, those who will fill the available spaces.

- University Policy S93-7

Registration - Adding Classes after the Last Day to Add

Per University Policy F09-2, students can submit the Pre-census Late Enrollment petition form to the Registrar’s office. This petition is valid through census date.

Likewise, after census date, students can petition for late add using the Post-Census Late Enrollment form. This form replaces the Retroactive add petition form. Petition forms can be found on the Registrar’s website at www.sjsu.edu/registrar/forms/.

Registration - Late Fee Assessed

Students registering for classes after the term begins are assessed a late registration fee. Students in the Step to College programs are not required to pay the late registration fee.

<table>
<thead>
<tr>
<th>Amount</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>$25.00</td>
<td>Begins the first day of instruction within the term.</td>
</tr>
<tr>
<td>$45.00</td>
<td>Begins after late registration deadline and before census for any classes added.</td>
</tr>
<tr>
<td>$200.00</td>
<td>Begins after census for any classes added (includes Retroactive Adds - which begins the first day after instruction ends).</td>
</tr>
</tbody>
</table>
Waitlisting - Registration

SJSU has “waitlisting” for all classes. Waitlisting puts you in line to get a space in a closed class, should a space become available before the end of advanced registration.

Where do I sign up?

Waitlisting is only available at MySJSU (http://one.sjsu.edu). If a class is full, you may place yourself on a waitlist for any seats that might become available.

Waitlist When You Add Classes

- Navigate to ‘add classes.’
- At “Step 1, Select classes to add,” search for your preferred course.
- If the class is full and the waitlist option is available, you will see the yellow waitlist icon.
- To place yourself on the waitlist, you must click the checkbox next to “Wait list if class is full.”
- You will be returned to Step 1. You must complete the remaining steps of the process to add classes.
- When you finish enrolling in the class, you will see a message indicating that you are on the waitlist and your current position number on the list.
- Monitor your waitlist position by navigating to “My Class Schedule” at MySJSU.

Waitlist - Validity

You can add yourself to the waitlist for a class from the time the class is full until the end of Advance Registration period.

- Waitlists become null and void after this date.
- There is no guarantee you will be moved off the waitlist and enrolled in the class.
- The waitlist cannot enroll you for a different section of the same class and cannot override a time conflict.
- When classes begin, instructors are not required to add students who were waitlisted for the class.
- Check your schedule regularly at MySJSU to monitor your position on a waitlist.

If you decide you no longer wish to wait for space to become available, as a courtesy to other students, drop yourself from the waitlist.

Waitlist - Registration Procedures

- All scheduled class sections have waitlists.
- You may place yourself on the waitlist provided the list is not already full.
- If you are already enrolled in another section of the same course, you will not be moved from the waitlist if space becomes available unless you drop the section you are enrolled in.
- If there is a time conflict with a class for which you are already enrolled, you will not be moved from the waitlist.
- You must meet any requisites for the class before you can be placed on the waitlist, e.g., course pre-requisites, section co-requisites, major and class level restrictions. See related catalog/course descriptions at MySJSU.
- When you place yourself on a waitlist, you hold a position that changes as students ahead of you get added to the class or drop off the waitlist.
- You may not go over your enrollment limit. For example, if moving into a course from a waitlist exceeds your enrollment limit, you will not be enrolled in the class.
- Waitlists have priority over all general add requests. If students drop from a full class, students from the waitlist will be placed in the class before any student who logs in and requests the class, but is not on the class waitlist.
- If you are moved from the waitlist into the class, you will receive a confirmation message in your MySJSU account.
- As with any class, when you move from the waitlist into a class, it is your responsibility to drop the class if you decide not to attend. Failure to properly drop the class will result in a “WU” grade on your record which will lower your grade point average.
- It is your responsibility to monitor your movement up the waitlist, your enrollment limit, potential time conflicts and any additional fees due.

For Variable Waitlist Unit Limit process visit
http://www.sjsu.edu/registrar/students/registration/Variable_Waitlist_Unit_Limit/index.html
How do I move from the waitlist into the class?

Students are moved from the waitlist into the class if space becomes available, in the order they have been placed on the waitlist and subject to the restrictions described.

Students will be moved from the waitlist and placed into the class if other students drop or are dropped due to non-payment of fees.

---

**Waitlist - Registration Issues**

- There is a time conflict with another registered class: compare the exact time of the classes for which you have registered—even a 15 minute overlap will prevent you from moving from the waitlist into the class. Since potential time conflicts are not checked when you place yourself on a waitlist, it is your responsibility to make sure that waitlisted classes do not conflict with your enrolled schedule.
- You are already enrolled in another section of the same course: you will not be moved from the waitlist if space becomes available unless you drop the section you are enrolled in.
- If you are repeating the course: you will not be moved into the class. Instructors will have the discretion to allow you to register for the class with a permission number during Late Registration—the first day of instruction through the last day to add.
- For a course with components: you can waitlist in any section, but you must select all desired sections (lecture, lab and seminar). Space must open in all sections for you to be added to the class.
- You will not be enrolled from the waitlist if a hold is placed on your record after you sign on to the waitlist. If—for any of the reasons given above—you cannot be moved from the waitlist, you will be skipped over and the next student considered. You will not be reconsidered until the next time space becomes available in the class.

---

**Waitlist - Registration Billing**

- You may be added into waitlisted classes at any time which might incur additional charges. It is important to check your class schedule and amount due daily to avoid possible cancellation of all your classes for failure to pay your fees in full by your payment due date.

NOTE: All dates, fees & information subject to change without notice.
Registration - Dropping a Class

Go to MySJSU
- Enter your SJSU ID and Password
- If you drop a class, you must do so prior to the time you submit payment to ensure that your registration fees are properly assessed.

Navigate to “Self Service” > Student center > Drop a class”
- Click on “Drop Classes”
- Click the checkbox next to each class you wish to drop and click “Drop Selected Classes.”
- Review your selection and click “Finish Dropping.”
- It is the student’s responsibility to make sure classes are dropped.

Registration - Dropping Without Penalty

Courses may be added during the first fourteen days of classes. Courses may be dropped without academic penalty during the first nine days of classes. See the Calendar section or www.sjsu.edu/registrar for exact dates and deadlines. Courses dropped during this initial period will not appear on the student’s transcript. With instructor consent, students may late add a class up to one week later. Please view the pro-rata refund schedule for the appropriate semester at http://www.sjsu.edu/bursar/payment_refunds/prorata_refund/index.html

Registration - Dropping Classes After Drop Deadline

Dropping Classes After the Fourteenth Day of Instruction

Students may petition to late or retroactively drop a course or withdraw from an entire semester of courses for serious and compelling reasons after the drop deadline. Check the official academic calendar to verify the date.

Conditions and circumstances are defined as “serious and compelling” only if beyond the student’s control. Those acceptable as justifications for a late drop must have occurred after the drop deadline. A personal statement with supporting documentation must be submitted with the late and retroactive drop and withdrawal forms.

Undergraduates may download the appropriate petition (course drop or withdrawal from all courses) at www.sjsu.edu/aars/forms. Graduate students may download the appropriate petition at www.sjsu.edu/gape/forms.

Submission of these forms, even with an instructor’s signature, does not constitute approval. Continue attending class and complete all assignments until the petition is approved or denied.

Registration - Instructor Drops

Instructors are permitted to drop a student who fails to establish a committed presence in the class. “Establishing a committed presence” is defined as the following options for the student:

1. In-person classes. Attending the first class meeting or informing the instructor of the intention to continue in the class before 48 hours after the first official class meeting.
2. Online classes. Logging on to the LMS class shell on the first scheduled day of the class or informing the instructor of the intention to continue in the class before 48 hours after the official class start date.

Some instructors will drop students who do not meet the stated course prerequisites. However, they are not required to do so. It is the student’s responsibility to make sure classes are dropped.

Detailed information for instructors is available for download at www.sjsu.edu/registrar/docs/instructor_Drops_Procedure.pdf
Registration - Late Drop Petitions

Students may petition to Late Drop for serious and compelling reasons after the drop deadline. To verify the official dates, see www.sjsu.edu for links to the official academic calendar. Petitions are available at www.sjsu.edu/aars/forms for undergraduates and www.sjsu.edu/gape/forms for graduate students.

Conditions and circumstances are defined as ‘serious and compelling’ and are considered beyond the student’s control, and which occurred after the drop deadline.

A personal statement submitted without supporting documentation is not acceptable. Acceptable documentation includes:

- **Personal health or serious family illness**
  - Serious health reasons out of your control (e.g. personal health, serious family illness or assigned caretaker). Attach Healthcare Provider Form found at http://sjsu.edu/aars/forms.

- **Military (orders from CO)**
  - Submit military assignment papers.

- **Divorce**
  - Divorce papers or certification of pending divorce.

- **Natural Disaster: (e.g. fire, earthquake)**
  - Submit verifiable documentation.

- **Employment**
  - Letter from employer, on letterhead indicating reason(s) for work schedule circumstances conflicting with the class requested to drop and date of change in schedule.

- **Personal/Other (rarely approved)**
  - Submit verifiable and appropriate documentation other than student’s statement.

- **Administrative Error**
  - University documentation from appropriate departments. Students must understand that their personal letter alone will not suffice as verifiable documentation.

Late drops are to be submitted to the counter of Academic Advising and Retention Services in the Student Services Center.

Neither an instructor’s signature nor submission of a Late Drop petition constitutes approval. Continue attending class and complete all assignments until you are notified via MySJSU message that the petition has been approved or denied.

Academic Renewal

Graduating seniors with a grade point average (GPA) below 2.0 in the major, minor, SJSU, or overall college coursework, may request that all grades earned in a previous semester (or two semesters) be disregarded, to permit graduation. If the petition is approved, all grades and units earned during the semester will be disregarded when calculating GPAs for graduation, but the courses and grades will still appear on the transcript.

**ALL OF THE FOLLOWING CONDITIONS MUST BE MET:**

- You must have applied for graduation and be ready to graduate.
- You must have a GPA below 2.0 in a category required for graduation (major, minor, overall, SJSU)
- At least 5 years must have elapsed since the semester you want to disregard.
- You must have at least a 3.0 GPA in your most recent 15 units at SJSU, or 2.5 in the past 30 units, or 2.0 in the past 45 units.
- No courses or units earned during the semester you want to disregard may be counted toward graduation.
- You must document extenuating circumstances associated with the semester you want disregarded and show that your performance is not representative of your ability.

Apply for Academic Renewal (formerly known as ‘Disregard of Previous Semester’s Work’) at www.sjsu.edu/gup/allForms.

Cancellation of Registration or Withdrawal From the Institution

Students who find it necessary to cancel their registration or to withdraw from all classes after enrolling for any academic term are required to follow the university’s official withdrawal procedures. Failure to follow formal university procedures may result in an obligation to pay fees as well as the assignment of failing grades in all courses and the need to apply for readmission before being permitted to enroll in another academic term. Information on canceling registration and withdrawal procedures is available from Academic Advising and Retention Services (AARS) at 408-924-2129.
Students who receive financial aid funds must consult with the Financial Aid office prior to withdrawing from the university regarding any required return or repayment of grant or loan assistance received for that academic term or payment period. Students who have received financial aid and withdraw from the institution during the academic term or payment period may need to return or repay some or all of the funds received, which may result in a debt owed to the institution.

Please contact the Office of the Registrar at 408-924-5680 for more information.

Registration - Restrictions

Graduate students
Cannot enroll in lower division classes during Advance Registration. Lower division classes will need to be starting on the first day of instruction for the term.

Matriculated SJSU students cannot concurrently enroll in Open University.
Matriculated students are those who have been admitted to SJSU as regular students for the current semester or were registered as matriculated students in at least one of the two previous semesters and did not graduate. This policy does not apply to disqualified students.

Students returning after an absence:
After an absence of more than one semester (without a formal leave of absence), students must reapply for admission before access to registration is granted.

Maximum Unit Load:
Each student is provided a specific priority registration begin date and time (based on university policy). Please check the Office of the Registrar website for more information.

Repeating a Class - Registration Restriction
Any matriculated student who is repeating a course for the first time shall be allowed to register for the course during the Advance Registration period no earlier than approximately three weeks prior to the start of the semester. Students who have received a grade of “W” will be treated as a first-time registrant for a course. Students who are repeating a class for two or more times shall submit a completed petition to the Registrar’s Office (the petition form is available through the Registrar’s Office).

Returning After an Absence - Registration Restriction
If you are in good standing and you were not disenrolled for non-payment of fees and you choose not to enroll or “stop out” for one semester, there is no need to reapply for admission. However, in order to maintain your matriculation at SJSU, you must enroll in classes the semester immediately following the one semester you stopped out. Some examples:

- You attended a spring term, earned grades and you are still in good standing. You do not enroll in the fall term, but return to take classes in the following spring. You do not need to reapply for admission.

When you must reapply for admission
- You attended a fall term, earned grades and are in good standing. You do not enroll in the next spring or fall terms. You must reapply for admission.
- If you take a full year off from school—you must reapply for admission. Consider alternatives: read the “leave of absence” section of the catalog.
- You do not enroll in classes in your initial admission term and wish to attend a subsequent term. You must reapply for admission.

How to reapply for admission
Complete the online application at http://www.calstate.edu/apply.

If you intend to stop out for one semester but decide to extend your absence, you may not request a leave of absence.

If you return to SJSU after an absence of more than one semester you must reapply for admission before access to registration is granted. Note that a summer term is not included in this policy.
First Year Course Placement - English and Mathematics/Quantitative Reasoning Supported Instruction

- Students required to participate in Supported Instruction in Math and/or English may be restricted from enrolling in certain classes for which they do not meet prerequisites. Go to www.sjsu.edu/supportedinstruction for more details.
- Students required to participate in Supported Instruction in Math and/or English are required to enroll in an appropriate Math and/or English class during their first year and each successive term until those classes are completed with a grade of at least C-.
- All entering SJSU frosh assigned to enrollment category E-II or E-III must enroll in their A2 course(s) during their first academic year. All entering SJSU frosh assigned to enrollment category M-II or M-III must enroll in their B4 course(s) during their first academic year. (Spring admits choosing either Stretch English or Statway, both of which start only in Fall semesters, may extend their enrollment start date to their first Fall semester.
- Entering SJSU frosh assigned to enrollment category E-IV must enroll in their appropriate A2 course(s) in Fall of their first academic year. Entering SJSU frosh assigned to enrollment category M-IV must enroll in their appropriate B4 course(s) in Fall of their first academic year. (Spring admits choosing either Stretch English or Statway, both of which start only in Fall semesters, may extend their enrollment start date to their first Fall semester)
- Students required to participate in Supported Instruction in Math and/or English who do not enroll or who drop out of the appropriate class(es) during any registration period for fall or spring terms without consultation with the specified advisor in Academic Advising and Retention Services may be subject to having all courses dropped. If this occurs, students must re-register for courses with no guarantee that classes in which they were previously enrolled will be available.

Writing Skills Test (WST) - Registration Restriction

- Are you planning on taking an SJSU Studies General Education course?
- Are you planning on taking a 100W course outside of your major?

You must satisfy the WST requirement in order to register for any SJSU Studies (Area R, S, V, and Z) course. This is true even if you want to take the class for a major requirement, instead of GE. If you have not yet taken the WST, plan to take it as soon as possible. Check the General Education Section in this schedule for an explanation.

SJSU offers courses (LLD 100A and ENGL 100A) that satisfy the WST requirement, if completed with a grade of “C” or better. There are designated 100W classes for most degree programs. Clear any substitutions with your major advisor before attempting to register for a 100W class that is included in your major’s required courses.

Immunization Requirements - California State University

Entering CSU students are required to present proof of the following immunizations to the CSU campus they will be attending before the beginning of their first term of enrollment.

- Measles and Rubella: All new and readmitted students must provide proof of full immunization against measles and rubella prior to enrollment. Students enrolled in a California public high school for the seventh grade or higher on or after July 1, 1999 may have satisfied this requirement.
- Hepatitis B: All new students who will be 18 years of age or younger at the start of their first term at a CSU campus must provide proof of full immunization against Hepatitis B before enrolling.

Conditions of Enrollment: Providing proof of the indicated immunizations (or immunity) is a condition of enrollment in the CSU. Students need to obtain immunizations (or proof of immunity) and upload their documentation online BEFORE their first term on campus.

For Further Details: Visit http://www.sjsu.edu/registrar/students/immunization

Immigration Requirements for Licensure

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (P.L. 104-193), also known as the Welfare Reform Act, includes provisions to eliminate eligibility for federal and state public benefits for certain categories of lawful immigrants as well as benefits for all illegal immigrants.

Students who will require a professional or commercial license provided by a local, state, or federal government agency in order to engage in an occupation for which the CSU may be training them must meet the immigration requirements of the Personal Responsibility and Work Opportunity Reconciliation Act to achieve licensure. Information concerning the regulation these requirements are available from the Registrar’s Office, Student Services Center.
Registration Holds

Students should periodically check for holds at MySJSU. Follow the instructions on how to clear them. Holds on student accounts and records will prevent students from registering. Monetary holds of $50.00 or more will block you from registration, obtaining official transcripts, diplomas and other miscellaneous services.

College of Engineering Advising

All College of Engineering undergraduates must see an advisor every semester, prior to registration. Graduate Engineering students (except Civil and Environmental Engineering, Computer Engineering, General Engineering, and Industrial Systems Engineering) must also see a major advisor prior to enrolling every semester.

College of Science Advising

All undergraduate College of Science majors and graduate students in Chemistry, Computer Science and Physics must see a major advisor prior to registering every semester.

AARS Advising Hold

All Undeclared and Undeclared-PreNursing students are required to see an advisor in Academic Advising and Retention Services (AARS) prior to registering every semester.

ELM/EPT

Students might also see ELM (Entry Level Math) and EPT (English Placement Test) “service indicators” that indicate the need to enroll in remedial math or English. These do not prevent registration.

Financial Holds

- Do you have a balance due on your student account?

  If so, you will not be able to register until the debt has been paid. Be aware - balances can fluctuate on your student account depending on activity. Clear up any balance as soon as possible by paying your outstanding balance using the Pay Now option at MySJSU after the log-in under Self Service. Remember, payments are applied to the oldest balance first. Keep your account current by paying all charges by the assigned due date.

Online Title IX Training Hold

All incoming students (undergraduate and graduate) are required to complete online title IX training course addressing sexual assault prevention. A hold (HW1) will be placed if course is not completed. Questions? Email titleixeducation@sjsu.edu

AlcoholEdu Hold

All incoming undergraduates are required to complete AlcoholEdu, an online training course addressing alcohol abuse prevention. A hold (HW2) will be placed if the course is not completed. Questions? Email titleixeducation@sjsu.edu

Hepatitis B Immunization Series

- Are you a first time SJSU student?
- Will you be 18 years or younger on the first day of instruction?

If the answer to both of these questions is yes, you may be required to submit proof of full immunization or immunity against Hepatitis B. For further details please visit: http://www.sjsu.edu/registrar/students/Immunization

International student Health Insurance

Proof of health insurance is required prior to registration each semester. For questions about this hold, please call International Student and Scholar Services (ISSS) (408) 924-5920.
Measles and Rubella

- Are you a new or readmitted SJSU student?
- Were you born on or after January 1, 1957?

If the answer to both of these questions is yes, you may be required to submit proof of full immunization or immunity against Measles and Rubella. For further details please visit: http://www.sjsu.edu/registrar/students/Immunization

Missing Document Holds

If you owe documents or transcripts to the Undergraduate Admissions office, please submit by the deadline posted in your MySJSU account. You must submit final, official transcripts or official documents as instructed in your MySJSU “to do” items before you are allowed to register.

Probation Holds

- Is your SJSU cumulative grade point average below 2.00 for undergraduates (3.00 for graduate students)?
- Are you on a reinstated status on probation?

For undergraduates, if the answer is yes, you must see your major advisor or an Academic Advising and Retention Services advisor before you can register. This will happen each term until you are no longer on probation.

Graduation Registration Restriction

Students who have not taken the WST by the time they earn 75 units (counting no more than 70 transfer units) may have their registration held after being notified of the need to test. Students with 120 or more units who have not applied for graduation will not be allowed to register until they have submitted that application. Students with 150 or more units may be required to meet with an advisor in Academic Advising and Retention Services before registration and may have their registration for remaining requirements managed. Students who have changed their graduation date multiple times or who are otherwise in potential violation of Presidential Directive 2009-05 may be required to meet with an AARS advisor.
Records Holds

SJSU has the authority to withhold permission to register, receive services, materials, food or merchandise, or any combination of these, from any person owing a debt to the university. A debt is defined as an unpaid obligation of a student or former student, however incurred, arising while the debtor was a student. For students who have been recipients of Federal Perkins Loan funds, SJSU has the authority to withhold certain services for failure to complete a Perkins Exit Interview upon departure from SJSU.

A Record Hold is a method of implementing these restrictions or for a past due amount of the Federal Perkins Loan.

A automatic financial hold will be placed against the student’s records whenever a student has a past due balance with the University.

Services that may be held include, but are not limited to:
- Registration
- Grades
- Diploma
- Transcripts

When all due debts are cleared, the financial hold will be removed.
Alternative Enrollment Programs

**e-Learning**
San José State University delivers distance education courses via Web-based learning management systems and resources. These courses are offered by individual departments in regular and special sessions.

**Intrasystem and Intersystem Enrollment Programs**
Students enrolled at any CSU campus will have access to courses at other CSU campuses on a space available basis unless those campuses/programs are impacted or desired programs/admission categories. This access is offered without students being required to be admitted formally to the host campus and sometimes without paying additional fees. Although courses taken on any CSU campus will transfer to the student’s home CSU campus as elective credit, students should consult their home campus academic advisors to determine how such courses may apply to their specific degree programs before enrolling at the host campus.

There are a few programs for enrollment within the CSU and one for enrollment between CSU and the University of California or California Community Colleges. Additional information about these programs is available from the Registrar’s Office. Forms are available online at www.sjsu.edu/registrar/forms.

**CSU Concurrent Enrollment**
Matriculated students in good standing may enroll on a space available basis at both their home CSU campus and a host CSU campus during the same term. Credit earned at the host campus is reported at the student’s request to the home campus to be included on the student’s transcript at the home campus. Many online courses at CSU campus are available for concurrent enrollment.

**CSU Fully Online Courses**
Matriculated students in good standing may request enrollment in one course per term, offered by a CSU host campus. Enrollment requests will be granted based on available space, as well as completion of any stated pre-requisites. Credit earned at the host campus is electronically reported to the student’s home campus to be included on the student’s transcript at the home campus.

**CSU Visitor Enrollment**
Matriculated students in good standing enrolled at one CSU campus may enroll on a space available basis at another CSU campus for one term. Credit earned at the host campus is reported at the student’s request to the home campus to be included on the student’s transcript at the home campus.

**Intersystem Cross Enrollment**
Matriculated CSU, UC, or community college undergraduate students may enroll on a space available basis for one course per term at another CSU, UC, or community college and request that a transcript of record be sent to the home campus. This program is not available to graduate students.

**Step-to-College/Unitrack**
SJSU sponsors a low-cost concurrent enrollment program for area high school students through the Step-to-College program. Students must have permission from their school principal and meet all SJSU course prerequisites, including placement exams. Applications and more information are available at the Registrar’s Office.

**Office of the Registrar**
Student Services Center
408-924-2076
registrar@sjsu.edu
Open University

Open University is not available to matriculated students.

Open University allows students to earn degree units from SJSU or to take noncredit or Continuing Education Unit programs.

- Fall schedule available online in July.
- Spring schedule available online in December.

College of Professional and Global Education (PGE)
(Formerly College of International and Extended Studies)

Registration Fees, Payments and Refunds

CAUTION!

- Fees are subject to change without notice.
- You are responsible for keeping your MySJSU (one.sjsu.edu) account current.
- If a check or e-check is dishonored by the bank for any reason, including keying errors for e-checks, your registration is subject to cancellation.
- Any delinquent outstanding charges owed to the university will be submitted to the Franchise Tax Board for tax refund offset.

All payments apply to the oldest balance on your account. For example, if you are making a registration payment and you have a housing balance with an earlier due date, the payment will apply to the housing charges first. Keep your account current to avoid the possibility of enrollment cancellation.

When you register, your MySJSU will show the balance due and due date. Fees are payable by the due date(s) and must be posted to your account before or on the due date to avoid enrollment cancellation. Please see acceptable methods of payment and payment plan options on the Bursar’s Office website at www.sjsu.edu/bursar/

Failure to pay fees by the due date will result in enrollment cancellation and all classes will be dropped. Note: Classes are not automatically dropped after census. Students wishing to partially drop or withdraw from all classes must do so by following the university policies and procedures.

### Registration Fees

#### Schedule of Tuition Fees

Mandatory tuition fee pays the cost of student services such as counseling, testing, student activities, health services and student financial aid administration. In addition, these fees cover some supplies and service costs of instruction and instructional resources.

The CSU makes every effort to keep student costs to a minimum. Tuition and fees listed in published schedules or student accounts may need to be increased when public funding is inadequate. Therefore, CSU reserves the right, even after tuition or fees are initially charged or initial payments are made, to increase or modify any listed tuition fees. All listed fees, other than mandatory systemwide tuition, are subject to change without notice, until the date when instruction for a particular semester or quarter has begun. All CSU listed tuition and fees should be regarded as **estimates** that are subject to change upon approval by the Board of Trustees, the Chancellor, or the Presidents, as appropriate. Changes in mandatory systemwide tuition will be made in accordance with the requirements of the Working Families Student Fee Transparency and Accountability Act (Sections 66028 - 66028.6 of the Education Code).

The following reflects applicable systemwide tuition and fees for semester campuses that were authorized by the Board of Trustees at the March 2017 meeting. These rates are subject to change.

| **ESTIMATED TOTALS - CALIFORNIA RESIDENTS** |                |              |
| Undergraduate               | 1.0 - 6.0 units| $2,720.00    |
| Undergraduate               | 6.1 - or more units| $3,836.00 |
| Teacher Credential          | 6 units or fewer| $2,987.00   |
| Teacher Credential          | 6.1 units or more | $4,385.00  |
| Postbac/Graduate            | 1.0 - 6.0 units| $3,137.50    |
| Postbac/Graduate            | 6.1 - or more units| $4,643.00  |
| Doctorate (Education)       | 1.0 or more    | $6,974.00    |

Note: These fees do not include the $2.00 optional Student Involvement and Representation Fee (SIRF).

Fees and dates subject to change without notice.
Billing

SJState University does not issue bills. To see the amount of fees owed in MySJSU (one.sjsu.edu), after you register for classes, go to: Student Center > Scroll down to Finances > Account Inquiry (link) > Charges Due (tab). Due dates are posted within 24 hours after class registration. **It is the student's responsibility to make payments by the stated deadline - failure to pay fees by the due date or making a partial payment will result in all classes being dropped. Note: SJSU does not automatically drop classes after census. If you are on a waitlist, please check your account daily since enrollment in waitlisted classes may result in additional fees owed.**

Changing your unit load from 6.0 units to 6.1 or more, will result in additional fees being charged. Check your MySJSU account for your payment due date.

**Fees for Non-Residents/International Students**

Non-Residents of California and international students must pay all tuition listed above, plus mandatory non-resident fee of $396.00 per unit multiplied by the number of units for which the student is registered. Adding classes will increase the balance on the student account for non-resident students, so check your account after adding classes.

**Graduate Business Professional Tuition Fee**

For students pursuing the MBA or MS Accountancy degrees, the Graduate Business Professional Fee is charged on a $270.00 per unit basis in addition to basic tuition and campus fees.

**Parking Fees**

A variety of parking permits of varying pricing and duration are available for sale through Parking Online Services. For more information, please visit Parking Services [http://www.sjsu.edu/parking](http://www.sjsu.edu/parking), e-mail parking@sjsu.edu, or call 408-924-6556.

**Nonresident Tuition Exemptions (AB 540)**

If you attended high school in California for at least three full years and graduated or earned an equivalent, you may be eligible for resident tuition. Students must file an affidavit with SJSU stating that they have filed an application with INS to legalize their immigration status or will do so as soon as they are eligible. You will need to show proof of attendance and graduation.

On October 11, 2001, Governor Gray Davis signed Assembly Bill 540 (now Education Code Section 68130.5) creating a new exemption from nonresident tuition for any student who meets ALL of the following criteria:

a) attended high school in California for 3 or more years;

b) graduated from a California high school or attained the equivalent;

c) is registered at, or attending an accredited institution of higher education in California not earlier than Fall 2001; and

d) if a student without lawful immigration status files an affidavit with the campus stating that he or she has applied to legalize immigration status (using INS form I-130, Petition for Alien Relative) or will do so as soon as he or she is eligible.

See [www.sjsu.edu/bursar/students_parents/faqs/exemption_faqs/index.html](http://www.sjsu.edu/bursar/students_parents/faqs/exemption_faqs/index.html) for additional information.

**Registration Late Fees**

- Students eligible for participation in advance registration who do not register .......... $25
- Registration after add deadline through census ...................................................... $45
- Post Census Late Enrollment Fee ................................................................. $200

**Those exempt from the late fee(s) prior to enrollment census date are:**

- Students enrolled in the Step to College program
- Graduate students who cannot enroll in lower division classes during Advance Registration.
Registration Fees - Late Registration Participants

If you add classes during the Late Registration period which change your unit load from 6.0 units to 6.1 or less, additional tuition fees will be due. Review your account via MySJSU (one.sjsu.edu) to find the amount due and the payment deadline. Billing statements are not issued.

Registration - Deferrals and Waivers

In order to receive a tuition fee deferral, your financial aid file must be complete and all requested documents submitted. Check your “To Do” list at MySJSU for requested documents. Once you have submitted all requested documents, a fee deferral will be assigned to your record to hold your classes and delay the payment of registration tuition fees while your financial aid process is completed. To prevent enrollment cancellation, it is your responsibility to submit all requested documents prior to the scheduled tuition fee payment deadline. Be sure to monitor your account at MySJSU for file status changes and “To Do” items.

Important! Financial Aid fee deferrals are temporary and are issued once all requested financial aid documents are submitted. A financial aid fee deferral holds classes and delays the payment of enrollment fees while the financial aid process is completed. To prevent enrollment cancellation, it is the student’s responsibility to submit all requested financial aid documents prior to the scheduled fee payment deadline. The financial aid fee deferral does not cover housing charges.

If your tuition fees are to be paid by a third party (i.e. employer, government agency, college savings plan, or foreign embassy), documents must be on file before your payment deadline authorizing the university to bill the agency for your fees. Authorization may be given in person, mailed or faxed to the Bursar’s Office at 408-924-1654. If documentation is not received by your payment due date, classes may be dropped.

When financial aid or the amount to be paid by the a third party is less than the amount due, you must pay the difference owed.

Federal regulations prevent the university from deducting parking permit charges from financial aid. Financial aid recipients must pay for parking permits separately.
Payment Deadlines - Registration

The following dates are tentative. Check the Bursar’s Office website at http://www.sjsu.edu/bursar/fees_due_dates/due_dates/index.html for up to date information.

Advance Registration: Tuesday, April 30, 2019 - Saturday, August 18, 2019

</table>

See www.sjsu.edu/bursar/fees/installments for installment payment due dates.

Payment Plan Features

- There are fees for the payment plans, one for the tuition and fee plan and one for the housing plan.
- There will be a separate payment plan for housing charges
- Payments divided equally

Loan, Short Term

Short Term loans are available through the Bursar’s Office

To be eligible, you must:
- Be current on any outstanding debts to the university
- Must have sufficient financial aid or be gainfully employed
- Must be enrolled in at least half-time (six undergraduate or four graduate units).
Selective Service-Eligibility for Aid

The federal Military Selective Service Act (the “Act”) requires most males residing in the United States to present themselves for registration with the Selective Service System within thirty days of their eighteenth birthday. Most males between the ages of 18 and 25 must be registered. Males born after December 31, 1959 may be required to submit a statement of compliance with the Act and regulations in order to receive any grant, loan or work assistance under specified provisions of existing federal law. In California, students subject to the Act who fail to register are also ineligible to receive any need-based student grants funded by the state or a public postsecondary institution.

Selective Service registration forms are available at any U.S. Post Office, and many high schools have a staff member or teacher appointed as a Selective Service registrar. Applicants for financial aid can also request that information provided on the Free Application for Federal Student Aid (FAFSA) be used to register them with the Selective Service. Information on the Selective Service System is available and the registration process may be initiated online at http://www.sss.gov.
Refunds - Registration

A 100% refund of basic and/or non-resident fees will be given to students who drop all classes or withdraw from the university no later than August 18, 2019. Refundable fees include basic registration fees, non-resident fees, course fees and the miscellaneous SJSU fees.

A prorated refund will be given to students who withdraw from SJSU from the first day of instruction, August 21 through October 26, 2019.

Students who drop units resulting in a lower fee structure and/or mandatory fee obligation will be entitled to a refund of applicable tuition and mandatory fees up to the end of the designated SJSU Late Registration drop period on September 3, 2019. There are no refunds for individual course drops after this date.

See www.sjsu.edu/bursar/payment_refunds/prorata_refund/index.html for detailed information on refund percentages.

Financial Aid Students

When students who are receiving financial aid withdraw, the unearned portion of federal and state funds must be returned to the appropriate fund. The Financial Aid and Scholarship Office provides this information.

For All Students

Saturday, August 18, 2019

Last day for full refund of both basic registration tuition fees and non-resident tuition.

Wednesday, August 21, 2019

Pro rata refund schedule begins for both basic registration tuition fees and non-resident tuition for students who withdraw from the university. Fees owed will be calculated based on units enrolled after the last day to add (Monday, September 10, 2019).

Tuesday, September 3, 2018

After this date, students who remain enrolled but drop classes resulting in a lower fee category will not be eligible for a refund.

Saturday, October 26, 2019

The last day to receive a pro-rated refund based on withdrawal or dropping courses.

See http://www.sjsu.edu/bursar/fees_due_dates/ for specific refund details.

Special Session and Open University students

Consult www.sjsu.edu/cpge for specific refund policies.

Refund - Registration - Non-Resident

If a student completely withdraws or there is a reduction in units, any adjustments to the non-resident tuition is based on the transaction date according to the refund schedule as noted above.

Refunds - Parking Permits

Parking permits can be returned for a prorated refund (which adjusts weekly) minus a $10 administrative fee. No returns are accepted during the last month of each semester.

For questions or additional information, please contact Parking Services at 408-924-6556 or via email at parking@sjsu.edu.

All refunds are processed at Parking Services, located in the University Police Building.
California State University Tuition Fee Policies

Mandatory Fees Including Non-resident Tuition

Regulations governing the refund of tuition and mandatory fees, including nonresident tuition, for students enrolling at the California State University are included in Section 41802 of Title 5, California Code of Regulations. For purposes of the refund policy, mandatory fees are defined as those systemwide and campus fees that are required to be paid in order to enroll in state-supported academic programs at the CSU. Refunds of fees and tuition charges for self-support, special session, and Professional Education programs or courses at the CSU are governed by a separate policy established by the University, available at the College of Professional and Global Education (CPGE).

In order to receive a full refund of tuition and mandatory fees, including nonresident tuition, a student must cancel registration or drop all courses prior to the first day of instruction for the term. Information on procedures and deadlines for canceling registration and dropping classes is available in the Payments and Refunds section and at www.sjsu.edu/bursar.

For state-supported semesters, quarters, and non-standard terms or courses of four (4) weeks or more, a student who withdraws during the term in accordance with the university’s established procedures or drops all courses prior to the campus-designated drop period will receive a refund of tuition and mandatory fees, including nonresident tuition, based on the portion of the term during which the student was enrolled. No student withdrawing after the 60 percent point in the term will be entitled to a refund of any mandatory fees or nonresident tuition.

A student who, within the campus designated drop period and in accordance with campus procedures, drops units resulting in a lower tuition and/or mandatory fee obligation shall be entitled to a refund of applicable tuition and mandatory fees established by the campus.

For state-supported non-standard terms or courses of less than four (4) weeks, no refunds of tuition and mandatory fees, including nonresident tuition, will be made unless a student cancels registration or drops all classes, in accordance with the university’s established procedures and deadlines, prior to the first day of instruction for state-supported non-standard terms or courses or prior to the first meeting for courses of less than four (4) weeks.

Students will also receive a refund of tuition and mandatory fees, including nonresident tuition, under the following circumstances:

- The tuition and fees were assessed or collected in error;
- The course for which the tuition and fees were assessed or collected was cancelled by the university;
- The university makes a delayed decision that the student was not eligible to enroll in the term for which tuition and mandatory fees were assessed and collected and the delayed decision was not due to incomplete or inaccurate information provided by the student; or
- The student was activated for compulsory military service.

Students who are not entitled to a refund as described above may petition the Bursar’s Office for a refund demonstrating exceptional circumstances.

Information concerning any aspect of the refund of fees may be obtained from the Bursar’s Office, Student Services Center, 408-924-1601 or via e-mail at bursar@sjsu.edu

Parking Permit Refunds

Parking permits can be returned for a prorated refund minus an administrative fee. No returns are accepted during the last month of each semester. More information can be found at http://www.sjsu.edu/parking/permits/refunds/

Fees and Debts Owed to the University

Should a student or former student fail to pay a fee or a debt owed to the institution, including tuition and student charges, the institution may “withhold permission to register, to use facilities for which a fee is authorized to be charged, to receive services, materials, food or merchandise or any combination of the above from any person owing a debt” until the debt is paid (see Title 5, California Code of Regulations, Sections 42380 and 42381).

Prospective students who register for courses offered by the university are obligated for the payment of charges and fees associated with registration for those courses. Failure to cancel registration in any course for an academic term prior to the first day of the academic term gives rise to an obligation to pay student charges and fees including any tuition for the reservation of space in the course.

The institution may withhold permission to register or to receive official transcripts of grades or other services offered by the institution from anyone owing fees or another debt to the institution. The institution may also offset the amount due against any future state tax refunds due the student or refer the debt to an outside collection agency.
Nonresident Students (U.S. and Foreign) Tuition

Nonresident Tuition (in addition to basic tuition fees and other systemwide fees charged all students): $396 per unit each semester. The total nonresident tuition paid per term will be determined by the number of units taken.

Exemption from Non-Resident Tuition for Certain Students

If you attended high school in California for at least three full years and graduated or earned an equivalent, you may be eligible for resident tuition. Students must file an affidavit with the CSU campus stating that they have filed an application with USCIS to legalize their immigration status or will do so as soon as they are eligible. You will need to show proof of attendance and graduation.

Determining Residency for Tuition Purposes

University requirements for establishing residency for tuition purposes are independent from those of other types of residency, such as for tax purposes, or other state or institutional residency. These regulations were promulgated not to determine whether a student is a resident or nonresident of California, but rather to determine whether a student should pay University fees on an in-state or out-of-state basis. A resident for tuition purposes is someone who meets the requirements set forth in the Uniform Student Residency Requirements. These laws governing residency for tuition purposes at the California State University are California Education Code sections 68000-68086, 68120-68133, and 89705-89707.5, and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41900–41915. This material can be viewed by accessing the California State University’s website at www.calstate.edu/CC/resources.shtml.

Each campus’ Admissions Office is responsible for determining the residency status of all new and returning students based on the Application for Admission, Residency Questionnaire, Reclassification Request Form, and, as necessary, other evidence furnished by the student. A student who fails to submit adequate information to establish eligibility for resident classification will be classified as a nonresident.

Generally, establishing California residency for tuition purposes requires a combination of physical presence and intent to remain indefinitely in the State of California. An adult who, at least 366 days prior to residency determination date for the term in which resident status is sought, can demonstrate both physical presence in the state combined with evidence of intent to remain in California indefinitely may establish California residency for tuition purposes. A student under the age of 19 by the residency determination date derives residency from the parent(s) with whom he/she resides or most recently resided.

Evidence demonstrating intent may vary from case to case but will include, and is not limited to, the absence of residential ties to any other state, California voter registration and voting in California elections, maintaining California vehicle registration and driver’s license, maintaining active California bank accounts, filing California income tax returns and listing a California address on federal tax returns, owning residential property or occupying or renting a residence where permanent belongings are kept, maintaining active memberships in California professional or social organizations, and maintaining a permanent military address and home of record in California.

A nonresident student seeking reclassification are required to complete a Residency Questionnaire that includes questions concerning his/her financial independence. Financial independence is required, in addition to physical presence and intent to remain indefinitely, to be eligible for reclassification. Financial independence is established if in the calendar year the reclassification application is made and in any of the three calendar years preceding the reclassification application the student:

- Has not and will not be claimed as an exemption for state and federal tax purposes by his/her parent(s);
- Has not and will not receive more than $750 per year in financial assistance from his/her parent(s); and
- Has not lived and will not live longer than six (6) weeks in the home of his/her parent(s).

A nonresident student who has been appointed as a graduate student teaching assistant, a graduate student research assistant, or a graduate student teaching associate on any CSU campus and is employed on a 0.49 or more time basis is exempt from the financial independence requirement.

Exceptions to the general residency requirements are contained in California Education Code sections 68070-68086 and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41906–41906.6, 41910. Whether an exception applies to a particular student can only be determined after the submission of an application for admission and, as necessary, additional supporting documentation. Because neither the campus nor Chancellor’s Office staff may give advice on the application of these laws, applicants are strongly urged to review the material for themselves and consult with a legal advisor.
The Chancellor’s Office can either decide the appeal or send the matter back to the campus for further review. Students incorrectly classified as residents or incorrectly granted an exception from nonresident tuition are subject to reclassification as nonresidents and payment of nonresident tuition in arrears. If incorrect classification results from false or concealed facts, the student is also subject to discipline pursuant to Section 41301 of Title 5 of the California Code of Regulations.

Resident students who become nonresidents or who no longer meet the criteria for an exception must immediately notify the Admissions Office. Changes may have been made in the rate of nonresident tuition and in the statutes and regulations governing residency for tuition purposes in California between the time this information is published and the relevant residency determination date. Students are urged to review the statutes and regulations stated above.

### Average Support Cost Per Full-Time Equivalent Student and Sources of Funds

The total support cost per full-time equivalent student (FTES) includes the expenditures for current operations, including payments made to students in the form of financial aid, and all fully reimbursed programs contained in state appropriations. The average support cost is determined by dividing the total cost by the number of FTES. The total CSU 2018-19 budget amounts were $3,627,143,000 from state General Fund (GF) appropriations and before adding $22.5 million CalPERS retirement adjustment, $2,479,020,000 from gross tuition revenue, and $639,084,000 from other fee revenues for a total of $6,745,247,000. The 2018-19 resident FTES target is 364,131 and the nonresident FTES based on past-year actual is 24,416 for a total of 388,547 FTES. The GF appropriation is applicable to resident students only whereas fee revenues are collected from resident and nonresident students. FTES is determined by dividing the total academic student load (e.g. 15 units per semester) (the figure used here to define a full-time student’s academic load).

The 2016/17 average support cost per FTES based on GF appropriation and net tuition fee revenue only is $13,152 and when including all sources as indicated below is $14,528, which includes all fee revenue (e.g. tuition fees, application fees, and other campus mandatory fees) in the CSU Operating Fund. Of this amount, the average net tuition and other fee revenue per FTES is $5,764.

*Represents state GF appropriation in the Budget Act of 2018/19; GF is divisible by resident students only (364,131 FTES)

**Represents CSU Operating Fund, gross tuition and other fees revenue amounts (net of tuition fee discounts) submitted in campus August 2018/19 final budgets. Revenues are divisible by resident and nonresident students (388,547 FTES).

The average CSU 2018/19 academic year, resident, undergraduate student basic tuition fee and other mandatory fees required to apply to, enroll in, or attend the university is $7,303 ($5,742 tuition fee plus $1,561 average campus-based fees). However, the costs paid by individual students will vary depending on campus, program, and whether a student is part-time, full-time, resident or nonresident.

### Cancellation of Registration or Withdrawal from the University

Students who find it necessary to cancel their registration or to withdraw from all classes after enrolling for any academic term are required to follow the university’s official withdrawal procedures. Failure to follow formal university procedures may result in an obligation to pay fees as well as the assignment of failing grades in all courses and the need to apply for readmission before being permitted to enroll in another academic term. Information on canceling registration and withdrawal procedures is available from the Office of the Registrar.

Students who receive financial aid funds must consult with Financial Aid and Scholarships prior to withdrawing from the university regarding any required return or repayment of grant or loan assistance received for that academic term or payment period. If a recipient of student financial aid funds withdraws from the institution during an academic term or a payment period, the amount of grant or loan assistance received may be subject to return and/or repayment provisions.

For further information, consult www.sjsu.edu/bursar and www.sjsu.edu/faso.
Fee Waivers - CSU Systemwide

The California Education Code includes provisions for the waiver of mandatory systemwide fees as follows:

Section 66025.3

Military - Dependent eligible to receive assistance under Article 2 of Chapter 4 of Division 4 of the Military and Veterans Code; child of any veteran of the United States military who has a service-connected disability, has been killed in service, or has died of a service-connected disability, and meets specified income provisions; dependent, or surviving spouse who has not remarried, of any member of the California National Guard who, in the line of duty, and while in the active service of the state, was killed, died of a disability resulting from an event that occurred while in the active service of the state, or is permanently disabled as a result of an event that occurred while in the active service of the state; and undergraduate student who is a recipient of a Medal of Honor, or undergraduate student who is a child of a recipient of a Medal of Honor who is no more than 27 years old, meets the income restriction and California residency requirement. The waiver of tuition or fees under this section applies only to a person who is determined to be a resident of California pursuant to Chapter 1 (commencing with Section 68000) of Part 41.

Foster Youth - Current or former foster youth who are 25 years of age or younger; have been in foster care for at least 12 consecutive months after reaching 10 years of age; meet one of the following: is under a current foster care placement order by the juvenile court, was under a foster care placement order by the juvenile court upon reaching 18 years of age, or was adopted, or entered guardianship, from foster care; completes and submits the Free Application for Federal Student Aid (FAFSA); maintains a minimum grade point average and meets the conditions necessary to be in good standing at the campus; and meets the financial need requirements established for Cal Grant A awards. The waiver of mandatory systemwide tuition and fees under this section applies only to a person who is determined to be a resident of California pursuant to Chapter 1 (commencing with Section 68000) of Part 41 of the California Education Code.

Section 66602 - A qualifying student from the California State University who is appointed by the Governor to serve as Trustee of the California State University for the duration of his or her term of office.

Section 68075 - A student who is a member of the Armed Forces of the United States stationed in this state, except a member of the Armed Forces assigned for educational purposes to a state-supported institution of higher education, is entitled to resident classification only for the purpose of determining the amount of tuition and fees.

If that member of the Armed Forces of the United States who is in attendance at an institution is thereafter transferred on military orders to a place outside this state where the member continues to serve in the Armed Forces of the United States, he or she shall not lose his or her resident classification so long as he or she remains continuously enrolled at that institution.

Section 68075.7 - A nonresident student is exempt from paying nonresident tuition or any other fee that is exclusively applicable to nonresident students if the student (1) resides in California, (2) meets the definition of “covered individual” as defined in either: (A) Section 3679(c)(2)(A) or (B)(ii)(l) of Title 38 of the United States Code, as that provision read on January 1, 2017; or (B) Section 3679(c)(2)(B)(9)(i) or (ii)(l) of Title 38 of the United States Code, as that provision read on January 1, 2017; and (3) is eligible for education benefits under either the federal Montgomery GI Bill-Active Duty program or the Post-9/11 GI Bill program as each read on January 1, 2017.

Section 68120 - Surviving spouse or child of a deceased California resident who was employed by a public agency, or was a contractor or an employee of a contractor, performing service for a public agency, and was killed in the performance of his/her principal duties of active law enforcement or fire suppression and prevention duties (referred to as Alan Pattee Scholarships). A person who qualifies for the waiver under this section as a surviving child of a contractor or of an employee of a contractor, who performed services for a public agency must have enrolled as an undergraduate student at the California State University and meets income restriction requirement.

Section 68121 - A qualifying student enrolled in an undergraduate program who is the surviving dependent of any individual killed in the September 11, 2001 terrorist attacks on the World Trade Center in New York City, the Pentagon building in Washington, D.C., or the crash of United Airlines Flight 93 in southwestern Pennsylvania, if the student meets the financial need requirements set forth in Section 69432.7 for the Cal Grant A Program and either the surviving dependent or the individual killed in the attacks was a resident of California on September 11, 2001.

Students who may qualify for the above benefits should contact the Registrar’s Office for further information and/or an eligibility determination.

The California Education Code provides for the following nonresident tuition exemptions:

Section 66025.3

Military - Dependent eligible to receive assistance under Article 2 of Chapter 4 of Division 4 of the Military and Veterans Code; child of any veteran of the United States military who has a service-connected disability, has been killed in service, or has died of a service-connected disability, and meets specified income provisions; dependent, or surviving spouse who has not remarried, of any member of the California National Guard who, in the line of duty, and while in the active service of the state, was killed, died of a disability resulting from an event that occurred while in the active service of the state, or is permanently disabled as a result of an event that occurred while in the active service of the state; and undergraduate student who is a recipient of a Medal of Honor, or undergraduate student who is a child of a recipient of a Medal of Honor who is no more than 27 years old, meets the income restriction and California residency requirement. The waiver of tuition or fees under this section applies only to a person who is determined to be a resident of California pursuant to Chapter 1 (commencing with Section 68000) of Part 41.

Foster Youth - Current or former foster youth who are 25 years of age or younger; have been in foster care for at least 12 consecutive months after reaching 10 years of age; meet one of the following: is under a current foster care placement order by the juvenile court, was under a foster care placement order by the juvenile court upon reaching 18 years of age, or was adopted, or entered guardianship, from foster care; completes and submits the Free Application for Federal Student Aid (FAFSA); maintains a minimum grade point average and meets the conditions necessary to be in good standing at the campus; and meets the financial need requirements established for Cal Grant A awards. The waiver of mandatory systemwide tuition and fees under this section applies only to a person who is determined to be a resident of California pursuant to Chapter 1 (commencing with Section 68000) of Part 41 of the California Education Code.

Section 66602 - A qualifying student from the California State University who is appointed by the Governor to serve as Trustee of the California State University for the duration of his or her term of office.

Section 68075 - A student who is a member of the Armed Forces of the United States stationed in this state, except a member of the Armed Forces assigned for educational purposes to a state-supported institution of higher education, is entitled to resident classification only for the purpose of determining the amount of tuition and fees.

If that member of the Armed Forces of the United States who is in attendance at an institution is thereafter transferred on military orders to a place outside this state where the member continues to serve in the Armed Forces of the United States, he or she shall not lose his or her resident classification so long as he or she remains continuously enrolled at that institution.

Section 68075.7 - A nonresident student is exempt from paying nonresident tuition or any other fee that is exclusively applicable to nonresident students if the student (1) resides in California, (2) meets the definition of “covered individual” as defined in either: (A) Section 3679(c)(2)(A) or (B)(ii)(l) of Title 38 of the United States Code, as that provision read on January 1, 2017; or (B) Section 3679(c)(2)(B)(9)(i) or (ii)(l) of Title 38 of the United States Code, as that provision read on January 1, 2017; and (3) is eligible for education benefits under either the federal Montgomery GI Bill-Active Duty program or the Post-9/11 GI Bill program as each read on January 1, 2017.

Section 68120 - Surviving spouse or child of a deceased California resident who was employed by a public agency, or was a contractor or an employee of a contractor, performing service for a public agency, and was killed in the performance of his/her principal duties of active law enforcement or fire suppression and prevention duties (referred to as Alan Pattee Scholarships). A person who qualifies for the waiver under this section as a surviving child of a contractor or of an employee of a contractor, who performed services for a public agency must have enrolled as an undergraduate student at the California State University and meets income restriction requirement.

Section 68121 - A qualifying student enrolled in an undergraduate program who is the surviving dependent of any individual killed in the September 11, 2001 terrorist attacks on the World Trade Center in New York City, the Pentagon building in Washington, D.C., or the crash of United Airlines Flight 93 in southwestern Pennsylvania, if the student meets the financial need requirements set forth in Section 69432.7 for the Cal Grant A Program and either the surviving dependent or the individual killed in the attacks was a resident of California on September 11, 2001.

Students who may qualify for the above benefits should contact the Registrar’s Office for further information and/or an eligibility determination.

The California Education Code provides for the following nonresident tuition exemptions:
Section 68130.5 - A student, other than an nonimmigrant alien, who is not a resident of California is exempt from paying nonresident tuition if the student meets the requirements of (1) through (4) below:

1. Satisfaction of the requirements of either subparagraph (A) or subparagraph (B): (A) A total attendance of, or attainment of credits earned while in California equivalent to, three or more years of full-time attendance or attainment of credits at any of the following:
   (i) California high schools.
   (ii) California high schools established by the State Board of Education.
   (iii) California adult schools established by a county office of education, a unified school district or high school district, or the Department of Corrections and Rehabilitation (subject to the class hours’ requirement).
   (iv) Campuses of the California Community Colleges (subject to the credit requirements).
   (v) A combination of those schools set forth in clauses (i) to (iv), inclusive.
   (B) Three or more years of full-time high school coursework, and a total of three or more years of attendance in California elementary schools, California secondary schools, or a combination of California elementary and secondary schools.

2. Satisfaction of any of the following:
   (A) Graduation from a California high school or attainment of the equivalent thereof.
   (B) Attainment of an associate degree from a campus of the California Community Colleges.
   (C) Fulfillment of the minimum transfer requirements established for the California State University for students transferring from a campus of the California Community Colleges.

3. Registration as an entering student at, or current enrollment at, an accredited institution of higher education in California not earlier than the fall semester or quarter of the 2001-02 academic year.

4. In the case of a person without lawful immigration status, the filing of an affidavit with the institution of higher education stating that the student has filed an application to legalize his or her immigration status, or will file an application as soon as he or she is eligible to do so.

Nonresident Alien Tax Assessment

International students and scholars receiving payments from San José State University must comply with all federal and state tax reporting responsibilities. The Internal Revenue Service requires that SJSU comply with specific federal tax withholding and reporting regulations when making payments to nonresident aliens. Non-U.S. citizens will be required to complete a Foreign National Information Form to assist in the determination of tax residency and applicable tax withholding liability. Payments affected by these IRS rules include, but are not limited to: compensation, wages, honoraria, consulting fees, scholarships, fellowships, stipends, and some reimbursements for travel and other expenses. Questions regarding nonresident alien tax assessment can be addressed by contacting the Human Resources Service Group at 408-924-2250.

Fees - Dishonored Checks

An individual is not officially enrolled until the university has received full payment of fees. The university has not received payment if personal checks or E-checks are subsequently dishonored by the bank.

Individuals paying registration fees by personal check or E-check are hereby given notice that if their check is dishonored from the bank for any reason, the registration is subject to cancellation. A $25.00 fee is charged for the first returned check and $35.00 thereafter. An additional administrative fee may be charged. All dishonored checks must be paid with money order, cashier check or cash.
Fees - Establishment or Abolishment of Campus-Based Mandatory Fees

The law governing the California State University provides that specific campus fees defined as mandatory, such as a student association fee and a student center fee, may be established. A student association fee must be established upon a favorable vote of two-thirds of the students voting in an election held for this purpose (Education Code, Section 89300). The campus president may adjust the student association fee only after the fee adjustment has been approved by a majority of students voting in a referendum established for that purpose. The required fee shall be subject to referendum at any time upon the presentation of a petition to the campus president containing the signatures of 10 percent of the regularly enrolled students at the university. Student association fees support a variety of cultural and recreational programs, childcare centers, and special student support programs. A student center fee may be established only after a fee referendum is held which approves by a two-thirds favorable vote the establishment of the fee (Education Code, Section 89304).

Once bonds are issued, authority to set and adjust student center fees is governed by provisions of the State University Revenue Bond Act of 1947, including, but not limited to, Education Code sections 90012, 90027, and 90068.

The process to establish and adjust other campus-based mandatory fees requires consideration by the campus fee advisory committee and a student referendum as established by Executive Order 1102, Section III. The campus president may use alternate consultation mechanisms if he/she determines that a referendum is not the best mechanism to achieve appropriate and meaningful consultation. Results of the referendum and the fee committee review are advisory to the campus president. The president may adjust campus-based mandatory fees but must request the chancellor to establish a new mandatory fee. The president shall provide to the campus fee advisory committee a report of all campus-based mandatory fees. The campus shall report annually to the chancellor a complete inventory of all campus-based mandatory fees.

For more information or questions, please contact the Budget Office in the CSU Chancellor’s Office at 562-951-4560.

Fees - Voluntary

The CSU Board of Trustees established a voluntary student fee, the Student Involvement and Representation Fee (SIRF), which went into effect in the fall 2015 term. This is charged to all students unless they choose to opt out of the fee, which can be done via the student portal. The fee amount is $2.00 per term. For more information, please visit the California State Student Association (CSSA) website at http://www.csustudents.org.

Determining Residency for Tuition Purposes

University requirements for establishing residency for tuition purposes are independent from those of other types of residency, such as for tax purposes, or other state or institutional residency. These regulations were promulgated not to determine whether a student is a resident or nonresident of California, but rather to determine whether a student should pay University fees on an in-state or out-of-state basis. A resident for tuition purposes is someone who meets the requirements set forth in the Uniform Student Residency Requirements. These laws governing residency for tuition purposes at the California State University are California Education Code sections 68000-68085, 68120-68133, and 89705-89707.5, and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41900-41916.

Each campus’ Admissions Office is responsible for determining the residency status of all new and returning students based on the Application for Admission, Residency Questionnaire, Reclassification Request Form, and, as necessary, other evidence furnished by the student. A student who fails to submit adequate information to establish eligibility for resident classification will be classified as a nonresident.

Generally, establishing California residency for tuition purposes requires a combination of physical presence and intent to remain indefinitely. An adult who, at least 366 days prior to the residency determination date for the term in which enrollment is contemplated, can demonstrate both physical presence in the state combined with evidence of intent to remain in California indefinitely may establish California residency for tuition purposes. A minor normally derives residency from the parent(s) they reside with or most recently resided with.

Evidence demonstrating intent may vary from case to case but will include, and is not limited to, the absence of residential ties to any other state, California voter registration and voting in California elections, maintaining California vehicle registration and driver’s license, maintaining active California bank accounts, filing California income tax returns and listing a California address on federal tax returns, owning residential property or occupying or renting a residence where permanent belongings are kept, maintaining active memberships in California professional or social organizations, and maintaining a permanent military address and home of record in California.

Nonresident students seeking reclassification are required to complete a supplemental questionnaire that includes questions concerning their financial independence. Financial independence is required, in addition to physical presence and intent, to be eligible for reclassification. Financial independence is established if in the calendar year the reclassification application is made and in any of the three calendar years preceding the reclassification application the student:
• Has not and will not be claimed as an exemption for state and federal tax purposes by his/her parent;
• Has not and will not receive more than seven hundred and fifty dollars ($750) per year in financial assistance from his/her parent; and
• Has not lived and will not live longer than six (6) weeks in the home of his/her parent.

A nonresident student who has been appointed as a graduate student teaching assistant, a graduate student research assistant, or a graduate student teaching associate on any CSU campus and is employed on a 0.49 or more time basis is exempt from the financial independence requirement.

Exceptions to the general residency requirements are contained in California Education Code sections 68070-68085 and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41906-41906.6, 41910 and include, but are not limited to, members of the military and their dependents, certain credentialed employees of school districts and most students who have attended three or more years of high school (grades 9-12) in California and graduated from a California high school or attained the equivalent of graduation. Whether an exception applies to a particular student can only be determined after the submission of an application for admission and, as necessary, additional supporting documentation. Because neither campus nor Chancellor’s Office staff may give advice on the application of these laws, applicants are strongly urged to review the material for themselves and consult with a legal advisor.

A student classified as a nonresident may appeal a final campus decision within 30 days of notification by the campus. Information on the appeal process may be found at http://www.calstate.edu/sas/residency/appeals.shtml. A campus residency classification appeal must be submitted via the InfoReady online Residence Appeal Form to the California State University Chancellor’s Office at: https://calstate.infoready4.com/#competitionDetail/1760156

Appeals via email, fax and U.S. mail will not be accepted. A student with a documented disability that prohibits the student from submitting an appeal through the InfoReady site should contact Student Academic Services:

California State University
Attn: Student Academic Services
401 Golden Shore, 6th Floor
Long Beach, CA 90802-4210
Email: residencyappeals@calstate.edu

The Chancellor’s Office will either decide the appeal or send the matter back to the campus for further review. Students incorrectly classified as residents or incorrectly granted an exception from nonresident tuition are subject to reclassification as nonresidents and payment of nonresident tuition in arrears. If incorrect classification results from false or concealed facts, the student is also subject to discipline pursuant to Section 41301 of Title 5 of the California Code of Regulations.

Resident students who become nonresidents or who no longer meet the criteria for an exception must immediately notify the Admissions Office. Changes may have been made in the rate of nonresident tuition and in the statutes and regulations governing residency for tuition purposes in California between the time this information is published and the relevant residency determination date. Students are urged to review the statutes and regulations stated above.

Student Responsibilities and Rights

University Policies

To see official SJSU University Policies, see http://www.sjsu.edu/senate/policies/

Academic Standards

Students studying for a baccalaureate degree are expected to maintain a grade point average of 2.0 “C” or better in their academic work at SJSU and in their overall collegiate record in order to continue in good standing. In determining a student’s eligibility to remain enrolled in the university, both quality of performance and progress toward the student’s objective are weighed. Use of grade points and grade point average for all letter-graded courses determines quality of performance. The length of time in meeting requirements is a factor in determining progress toward objectives. While the Registrar’s Office makes every effort to notify students of their academic status, it is the student’s responsibility to continuously monitor his or her own academic standing at MySJSU (one.sjsu.edu).
Attendance Policy

University Policy F15-12, Attendance and Participation

Students are expected to attend all meetings for the courses in which they are enrolled as they are responsible for material discussed therein, and active participation is frequently essential to ensure maximum benefit to all class members. In some cases, attendance is fundamental to course objectives; for example, students may be required to interact with others in the class. Attendance is the responsibility of the student.

Participation may be used as a criterion for grading when the parameters and their evaluation are clearly defined in the course syllabus and the percentage of the overall grade is stated.

View the policy in its entirety here: [http://www.sjsu.edu/senate/docs/F15-12.pdf](http://www.sjsu.edu/senate/docs/F15-12.pdf)

Academic Integrity Policy

The University emphasizes responsible citizenship and an awareness of ethical choices inherent in human development. Academic honesty and fairness foster ethical standards for all those who depend upon the integrity of the university, its courses, and its degrees. University degrees are compromised and the public is defrauded if faculty members or students knowingly or unwittingly allow dishonest acts to be rewarded academically. This policy sets the standards for such integrity and shall be used to inform students, faculty and staff of the university’s Academic Integrity Policy. See University Academic Integrity Policies at [http://www.sjsu.edu/studentconduct/policies/](http://www.sjsu.edu/studentconduct/policies/)

Student Role

The San José State University Academic Integrity Policy requires that each student:

1. Know the rules that preserve academic integrity and abide by them at all times. This includes learning and abiding by rules associated with specific classes, exams and course assignments.
2. Know the consequences of violating the Academic Integrity Policy.
3. Know the appeal rights, and the procedures to be followed in the event of an appeal.
4. Foster academic integrity among peers.

Faculty Member Role

The San José State University Academic Integrity Policy requires that each faculty member:

1. Provide a clear and concise course syllabus that apprises students of the Academic Integrity Policy and the ethical standards and supporting procedures required in a course.
2. Make every reasonable effort to foster honest academic conduct. Specifically, examinations should be appropriately proctored or monitored to prevent students from copying, using non-cited resources, or exchanging information. Examinations and answers to examination questions should be kept private. Efforts should be made to give unique and varied assignments.
3. Take action against a student in accordance with this policy when supporting evidence indicates that the student has violated the Academic Integrity Policy.
4. Comply with the rules and standards of the Academic Integrity Policy.

Office of Student Conduct and Ethical Development Role

The San José State University Academic Integrity Policy requires that the Student Conduct Administrator:

1. Comply with and enforce the Student Conduct Code ([http://www.sjsu.edu/studentconduct](http://www.sjsu.edu/studentconduct)) which includes the Academic Integrity Policy.
2. Adjudicate student conduct cases and assign administrative sanctions to students who have violated the Student Conduct Code.
3. Serve as a resource for faculty, staff and students on matters of academic integrity and this policy.
4. Ensure dissemination of the policy to the campus community when changes are made to the policy or procedures.
1.0 Definitions Of Academic Dishonesty

1.1 Cheating

At SJSU, cheating is the act of obtaining or attempting to obtain credit for academic work through the use of any dishonest, deceptive, or fraudulent means. Cheating at SJSU includes but is not limited to:

1.1.1. Copying, in part or in whole, from another’s test or other evaluation instrument including homework assignments, worksheets, lab reports, essays, summaries, quizzes, etc.;
1.1.2. Submitting work previously graded in another course unless this has been approved by the course instructor or by departmental policy;
1.1.3. Submitting work simultaneously presented in two courses, unless this has been approved by both course instructors or by the department policies of both departments;
1.1.4. Using or consulting, prior to, or during an examination, sources or materials not authorized by the instructor;
1.1.5. Altering or interfering with the grading process;
1.1.6. Sitting for an examination by a surrogate, or as a surrogate;
1.1.7. Any other act committed by a student in the course of their academic work which defrauds or misrepresents, including aiding or abetting in any of the actions defined above.

1.2 Plagiarism

At SJSU plagiarism is the act of representing the work of another as one’s own without giving appropriate credit, regardless of how that work was obtained, and/or submitting it to fulfill academic requirements. Plagiarism at SJSU includes but is not limited to:

1.2.1 The act of incorporating the ideas, words, sentences, paragraphs, or parts of, and/or the specific substance of another’s work, without giving appropriate credit, and/or representing the product as one’s own work;
1.2.2 Representing another’s artistic/scholarly works such as musical compositions, computer programs, photographs, paintings, drawing, sculptures, or similar works as one’s own.

2.0 Notification of Standards of Detecting Plagiarism

2.1 SJSU or its faculty may subscribe to and/or use plagiarism detection services.

2.2 Any plagiarism detection service with which SJSU contracts must ensure the anonymity of all submitted work to third parties.

2.3 Except for the stated purpose of storing submitted work in databases and/or using the database solely for the intended purpose of detecting plagiarism, any plagiarism detection service with which SJSU contracts shall agree that to the fullest extent possible, ownership rights of all submitted work shall remain with the work’s author and not with the plagiarism detection service.

3.0 Evaluation and Reporting

When a faculty member suspects and has supporting evidence to substantiate that the behavior of a student or students fall(s) within one or both of the above sets of definitions, it is the faculty member’s responsibility to take the following steps:

3.1 Any classroom confrontation should be discreet. Faculty members should not discuss specific charges of cheating, plagiarism, or any other violations involving specific individuals in the classroom before other members of the class.

3.2 Communicate with the student concerning the alleged infraction; arrange for a conference to present documentation. Advise the student of the allegations and make them aware of the supporting evidence and the probable consequences. As a result of this conference, if the faculty member believes that the student’s response is insufficient to offset the charge of violating the Academic Integrity Policy, the instructor will inform the student of the sanctions to be assessed or recommended in accordance with section 3.0.

All notes and/or discussions between the student and the faculty member will be kept confidential except as may be relevant in subsequent disciplinary proceedings or any subsequent legal actions.

3.3 Report the alleged infraction and the academic action taken to the Office of Student Conduct & Ethical Development on the reporting form for violations to the Academic Integrity Policy. A copy of the supporting documentation must be attached to the reporting form.
3.4 The instructor may impose the recommended penalty and make the report called for in section 3.3 without a conference when a student fails to attend a scheduled conference to discuss the alleged dishonesty, or when the apparent dishonesty is detected only near the end of the semester and the faculty makes a good-faith effort to contact the student but is unable to do so. In either case, the student’s right to appeal is preserved.

4.0 Sanctions

There shall be two major classifications of sanctions that may be imposed for violations of this policy: academic and administrative. Academic sanctions are those actions related to the course work and/or grades which are the province of the faculty. Administrative sanctions are concerned with a student’s status on campus and are acted on by the Office of Student Conduct and Ethical Development. The imposition of either an academic or administrative sanction will not preclude the additional imposition of the other.

4.1 Academic Sanctions

Faculty members are responsible for determining the type of academic sanction to be applied to students involved in incidents of cheating or plagiarism. Faculty may find it helpful to consult with their department chair, senior faculty, and/or the Conduct Officer in consideration of appropriate academic sanctions. Such sanctions shall be proportional to the offense against the Academic Integrity Policy that has occurred. Usually a form of “grade modification” will be employed. Before sanctions can be employed, the faculty member must have verified the instances of academic dishonesty by personal observation and/or documentation. In all cases, the violation must be reported to the Office of Student Conduct & Ethical Development on the reporting form for violations to the Academic Integrity Policy. A student may be:

4.1.1 Reprimanded orally.
4.1.2 Failed in the evaluation instrument (paper or exam).
4.1.3 Reduced in course grade.
4.1.4 Failed in the course.
4.1.5 Referred for administrative sanctions. A faculty member may choose to refer a student to the Office of Student Conduct & Ethical Development for disciplinary action in addition to the academic sanction the faculty member has taken.

4.1.6 Faculty Discretion:

Cases involving the careless or inept handling of quoted material but which fall short of the definitions of the acts of cheating and/or plagiarism as defined in Items 1.1 and 1.2 of this policy may be dealt with at the discretion of the faculty member concerned. The faculty has the discretion to deal with any other act committed by a student in the course of their academic work which defrauds or misrepresents, including aiding or abetting other students who violate this policy.

4.1.7 Academic Sanctions:

For violations of sections 1.1.5 and 1.1.6, the student must be referred to the Office of Student Conduct & Ethical Development for administrative sanctions as outlined in 4.1.5.

For violations of other sections of this policy, the instructor should choose between sanctions 4.1.1 through 4.1.4 based on the severity of the infraction.

4.2 Administrative Sanctions

As stipulated in the California Administrative Code, Section 41301, cheating or plagiarism in connection with an academic program may warrant expulsion, suspension, probation or a lesser sanction. Administrative action involving academic dishonesty at SJSU is the responsibility of the Office of Student Conduct & Ethical Development.

The Office of Student Conduct & Ethical Development will respond to:
1. referrals from the faculty;
2. violations of the Academic Integrity Policy;
3. repeat violations as brought to attention by the faculty or through the centralized reports filed in the Office of Student Conduct & Ethical Development.

Faculty members will be notified by the Office of Student Conduct & Ethical Development when action has been taken. The Office of Student Conduct & Ethical Development shall maintain a record of students who have been reported for violating the Academic Integrity Policy. The information in this record will be used to identify and discipline students who have been reported.
5.0 Protection of Rights

Nothing in this policy is intended to deny students who come within its scope appropriate “due process,” including the right to be informed of the charges, the nature of the evidence supporting the charges, and to have a meeting with the faculty member, the Office of Student Conduct & Ethical Development or other decision-makers, at which time statements and evidence on behalf of the student may be submitted. Nor is it intended to deny the right to appeal, through appropriate university channels, any decision resulting from such a meeting.

5.1 The handling of student conduct code violations should be separated from the processes handling student disputes with other members of the university community. Specifically, grades resulting from cheating are not a matter of student fairness. Therefore the Office of the Ombudsperson and the Student Fairness Committee should be removed from the student conduct processes regarding academic misconduct (F15-7). Students may, however, consult with the Ombudsperson confidentially and informally regarding the Academic Integrity policy and/or process.

5.2 When an administrative sanction is being considered, Executive Order 1073, Student Disciplinary Procedures for the California State University, stipulates that a student is entitled to a hearing to determine whether violations of conduct and/or conduct-related regulations have occurred. Students may, however, consult with the Ombudsperson confidentially and informally regarding the Academic Integrity policy and/or process.

6.0 Threats

Any threats against any member of the faculty as a consequence of implementing this policy on academic integrity will be cause for disciplinary action under Section 41301, Title 5, California Code of Regulations, in addition to civil and criminal liabilities.

7.0 Dissemination of Information

7.1 This policy shall be published in the Schedule of Classes each semester and in the University Catalog. There shall also be copies of this policy in every department office and copies will be available to all interested parties in the Office of Student Conduct & Ethical Development.

7.2 Dissemination of this information shall be the responsibility of the Office of Student Conduct & Ethical Development. Information is available at http://www.sjsu.edu/studentconduct

7.3 The Office of Student Conduct & Ethical Development shall submit a statistical report on the number and type of infractions and their eventual disposition to the Academic Senate annually.

7.4 Colleges and departments are encouraged to periodically include at faculty meetings, discussion of this policy and strategies for ensuring academic integrity among students.

7.5 Department chairs and school directors should ensure that new faculty members receive a copy of this policy and a verbal explanation at the time they are given their first class assignment.

Complaints

A student involved in a dispute must first attempt to resolve the matter with the other party. If an agreement is not reached, the student should seek the aid of the University Ombudsperson or the immediate supervisor of the other party. Students may seek the counsel of the Ombudsperson before speaking with parties directly involved in the conflict. If this informal process fails to resolve the matter, the student should contact the University Ombudsperson regarding the formal complaint process.

Complaint Procedures - Alleged Violations of State Law

Student/Applicant Complaint Procedure for Alleged Violations of State Law Not Covered by Another CSU Complaint Procedure

This executive order fulfills the requirements of the Higher Education Act Title IV, 34 Code of Federal Regulations sections 600.9(g)(3)(i)(A) and 668.43(b), by establishing a complaint procedure for CSU students and student applicants alleging that the CSU has violated one or more state laws, where there is no other applicable CSU complaint procedure.
I. Scope of Procedure

This complaint procedure is for CSU students and student applicants who believe the CSU has violated one or more state laws. It does not encompass complaints already covered by another CSU complaint procedure (e.g., student complaints alleging discrimination, harassment and retaliation, covered by Executive Order No. 1045). It also does not encompass complaints regarding CSU’s compliance with academic program quality and accrediting standards; such complaints may be filed with the Western Association of Schools and Colleges (WASC), the agency that accredits the CSU’s academic program, at http://www.wasc.governor.org/comments.

II. The Complaint

A. The complaint must be filed within 30 work days of the CSU’s alleged violation of one or more state laws, or the complainant’s discovery thereof.

B. The complaint must be made in writing and clearly indicate the intent to file a complaint alleging that the CSU violated one or more state laws or specifically reference this executive order.

C. The complaint must contain the following:

   The complainant’s name, student I.D. number, mailing address and telephone number.
   The term and year of the complainant’s last active academic status or the term and year the complainant sought admission to the university.
   A detailed description of the specific actions that constituted the alleged violation of one or more state laws, including the specific law or laws alleged to have been violated and, if known, the name(s) and title(s) of the responsible CSU employee(s).
   The date(s) the alleged improper activities occurred or the condition developed.
   A list of witnesses, if any, including their contact information and the facts known by each.
   Copies of any documentary evidence that supports the complaint.
   Descriptions of documents that support the complaint and, if known, where the documents are maintained and by whom if the actual documents are not in the possession of the complainant.
   A dated and signed statement by the complainant under penalty of perjury that the complaint is true, or is believed by the complainant to be true.
   D. The complaint may be filed with the campus president or designee (“campus administrator”).

E. The complaint must be personally delivered, or sent by electronic or certified mail. The complaint filing date is the date of personal service, the date on the electronic transmission or the postmark date of the mailing.

III. The Level I Campus Investigation

A. The campus administrator shall review the complaint to determine whether it is timely filed, contains all the required information and falls within the scope of this executive order. If it does, the campus administrator shall notify the complainant in writing within 10 work days of receipt of the complaint that the complaint has been accepted. If it is untimely or does not contain all of the required information, the campus administrator shall notify the complainant in writing within 10 work days of receipt of the complaint that the complaint has not been accepted and state the reasons.

If it is determined that the complaint falls within the scope of another CSU complaint procedure, the campus administrator shall forward the complaint to the appropriate campus official and shall notify the complainant in writing within 10 work days of receipt of the complaint that the complaint has been deemed to fall within the scope of another CSU complaint procedure, why, and to whom the complaint has been forwarded. The administrator shall not forward the complaint or disclose the complainant’s identity to anyone who has or appears to have a conflict of interest in regard to the allegation(s).

B. If the complainant raises any new allegations after the complaint has been accepted, the campus administrator shall decide whether to include those allegations as part of the complaint. If they are not included as part of the initial complaint, the complainant shall be advised of the need to file a new complaint to address those allegations.

C. The campus administrator shall investigate the claim, or may appoint a third party to conduct an investigation. The investigator shall be a management personnel plan employee or an external consultant experienced in conducting investigations. If the complaint is against the CSU, the chancellor or any Chancellor’s Office employee, campus president or vice president, the campus administrator shall consult with the Associate Vice Chancellor, Academic Affairs at the Chancellor’s Office, who shall determine the appropriate handling of the complaint. The timelines and procedures for the process remain the same.

D. The complainant is required to fully cooperate in the investigation, and must participate in a timely intake interview. If the complainant does not cooperate, the campus administrator may end the investigation.
E. CSU employees are required to cooperate with the investigation, be truthful, maintain confidentiality, and provide all relevant and/or requested information to the investigator.

F. Complaints and other information gathered during the course of the investigation by the university shall be shared only with individuals who have a legitimate business reason to know.

IV. The Level I Campus Decision

The campus administrator shall make the final decision and issue a letter of determination to the complainant no later than 60 work days from the date the complaint was filed, unless s/he determines that extenuating circumstances warrant an extension of time. In no case shall the decision letter be issued later than 90 work days from the date the complaint was filed.

Within the investigation period, the investigator must make findings of fact and conclusions regarding the allegations, which s/he shall reduce to an investigative report. Preponderance of the evidence is the applicable standard: in order to establish a fact, the investigator must find that the evidence on one side outweighs the evidence on the other side.

The report should include the following information:

A summary of the allegations.

A description of the investigative process.

The preponderance of the evidence standard used to determine whether a violation occurred.

The evidence considered.

A determination of whether the allegations were found to be substantiated.

Within the time frame specified above, the campus administrator shall notify the complainant in writing of the outcome. The notification should include a summary of the allegations, a description of the investigative process, the preponderance of the evidence standard used, the evidence considered and a determination of whether the allegations were found to be substantiated. The notification shall also inform the complainant what, if any, actions were or will be taken (specific employee discipline is confidential), and of his/her option to file an appeal under Article V of this executive order. The campus administrator shall maintain a copy of the notification as required by the applicable document retention policy(ies).

V. The Level II Chancellor’s Office Review and Decision

A. If the complainant is not satisfied with the campus decision, s/he may file a Level II appeal with the Office of the Chancellor no later than 10 work days after receipt of the Level I decision. Level II appeals shall be addressed to: Associate Vice Chancellor, Academic Affairs, CSU Office of the Chancellor, 401 Golden Shore 6th Floor, Long Beach, California 90802.

B. The appeal shall be in writing and must detail the specific disagreements with the campus decision. The issues raised on appeal shall be limited to those raised during the Level I process.

C. The Associate Vice Chancellor, Academic Affairs or designee shall review the issues raised on appeal to determine whether the campus has adequately processed and addressed the complaint and/or whether the preponderance of the evidence indicates that there has been a violation of state law.

D. The Associate Vice Chancellor, Academic Affairs or designee shall issue a decision no later than 60 work days after receipt of the appeal unless s/he determines that extenuating circumstances warrant an extension of time. In no case shall the final decision letter be issued later than 90 work days from the date the appeal was filed. The decision shall include a summary of the issues raised on appeal, a description of the review process, the preponderance of the evidence standard used, the evidence considered and a final decision. The notification shall also inform the complainant what, if any, actions were or will be taken (specific employee discipline is confidential), and note that the CSU’s review of the complaint is now considered final and complete. A copy of the final decision letter shall be provided to the campus administrator.

VI. General Provisions

A. Work days are defined as Monday through Friday, excluding all official holidays or campus closures at the campus where the complaint originated.

B. A student/applicant must proceed with a complaint in good faith. A student who knowingly and intentionally files a false complaint, abuses this policy, or files a malicious or frivolous complaint may be subject to discipline. Discipline shall be taken in accordance with Section 41301, Title 5, California Code of Regulations.

C. When issuing a Level I or II response, personal delivery or certified mail shall be used. If personal delivery is used, a signature acknowledging the calendar date of delivery shall be obtained which will establish the date of response. If certified mail delivery is used, the postmark shall establish the date of response.
D. The CSU is not obligated under this executive order to investigate a complaint not timely filed under its provisions. Regardless, the CSU may investigate the underlying allegations if it determines the circumstances warrant investigation. Also, if the circumstances warrant investigation, the CSU may waive the time limits and choose to process the complaint under the complaint process set forth herein.

E. CSU will notify the California Department of Finance, Office of State Audits and Evaluation, and the Bureau of State Audits, of all cases of actual or suspected fraud, theft or other irregularities it learns of as the result of any complaint made under this executive order.

F. Time periods set forth in this executive order may be extended by the campus administrator and, at Level II, by the Associate Vice Chancellor, Academic Affairs up to the specified maximums, if any, provided the campus administrator informs the complainant of the new time period in writing.

G. Care shall be taken to keep confidential the identity of the complainant in so far as feasible and consistent with the law.

H. CSU employees are prohibited from retaliating against complainants or others who cooperate with the investigation.

Effective: September 1, 2011

**Model Complaint Procedure**

Model complaint procedure for CSU students/applicants in compliance with HEA Title IV, 34 CFR, Sections 600.9(a)(1)(i)(A) and 668.43(b)

**Student/Applicant Complaint Procedure Notice**

The California State University takes very seriously complaints and concerns regarding the institution. If you have a complaint regarding the CSU, you may present your complaint as follows:

(1) If your complaint concerns CSU’s compliance with academic program quality and accrediting standards, you may present your complaint to the Western Association of Schools and Colleges (WASC) at [http://www.wascsenior.org/comments](http://www.wascsenior.org/comments). WASC is the agency that accredits the CSU’s academic program.

(2) If your complaint concerns an alleged violation by CSU of a state law, including laws prohibiting fraud and false advertising, you may present your claim to the campus president or designee at [e-mail address]. The president or designee will provide guidance on the appropriate campus process for addressing your particular issue.

If you believe that your complaint warrants further attention after you have exhausted all the steps outlined by the president or designee, or by WASC, you may file an appeal with the Associate Vice Chancellor, Academic Affairs at the CSU Office of the Chancellor.

**Note:** Most complaints made to media outlets or public figures, including members of the California legislature, Congress, the Governor, or individual CSU trustees, are referred to the chancellor of the CSU.

Nothing in this disclosure should be construed to limit any right that you may have to take civil or criminal legal action to resolve your complaint.

The CSU has provided this disclosure to you in compliance with the requirements of the Higher Education Act of 1965, as amended, as regulated in 34 Code of Federal Regulations sections 600.9(a)(1)(i)(A) and 668.43(b).

---

**Course Syllabi**

Course Syllabi, University Policy, S16-9

Course syllabi enable students to better understand and fulfill their responsibilities as learners in courses. They are a necessary tool in higher education to enable students to take part in the learning process through knowing what is expected of them and what they can expect from the course. Student success is aided by students knowing in advance as much as possible about the course requirements so that they can plan their study time and coordinate work on assignments from multiple courses. Student success is also aided by encouraging students to contact their professors and providing information about key university policies to which they are subject. In addition, syllabi provide an opportunity to model thorough, clear, professional communication.

Review [Syllabi Information Website](http://www.sjsu.edu/senate/docs/S16-9.pdf)
Educational Equity

The California State University defines “educational equity” to be “…justice, equal opportunity, fairness and impartiality in the educational processes affecting under represented minorities. It involves the implementation of programs designed to attract, admit and support students heretofore excluded from full participation in the university by conditions of educational and economic disadvantages” (Educational Equity: A Continuing Commitment, published by the California State University, 1989).

The Office of Diversity, Equity and Inclusion leads university-wide efforts to ensure a welcoming, safe climate for every member of the San Jose State community.

San Jose State University defines diversity as the active appreciation, engagement, and support of ALL campus members in terms of their backgrounds, identities and experiences (as constituted by gender, socioeconomic class, political perspective, age, race, ethnicity, religion, sexual orientation, disability, regional origin, nationality, occupation, language, among others, and the intersection of these aspects).

For more information, visit: http://www.sjsu.edu/diversity/

Equal Opportunity

San José State University does not discriminate on the basis of accent, age, ancestry, citizenship status, color, creed, disability, ethnicity, gender, genetic information, marital status, medical condition, national origin, race, religion or lack thereof, sex, sexual orientation, transgender, or veteran’s status. This policy applies to all SJSU students, faculty and staff programs and activities. Title IX of the Education Amendments of 1972, and certain other federal and state laws, prohibit discrimination on the basis of sex in all education programs and activities operated by the university (both on and off campus). Questions regarding this policy should be directed to the Office for Equal Opportunity, 408-924-1115

The California State University is committed to providing equal opportunities to men and women CSU students in all campus programs, including intercollegiate athletics.

For more information, please visit: http://www.sjsu.edu/hr/about_us/hr_directory/eo_unit/title_IX/index.html

Establishing a Committed Presence in Class

Establishing a Committed Presence in a Class, University Policy F15-3

Six instructional days before Census Day, i.e. the 14th day of instruction, is the last day for the student to add a class; this is also the last day for an instructor to drop a student who fails to establish a committed presence in the class. “Establishing a committed presence” is defined as the following options for the student:

• In-person classes. Attending the first class meeting or informing the instructor of the intention to continue in the class before 48 hours after the first official class meeting.
• Online classes. Logging on to the LMS class shell on the first scheduled day of the class or informing the instructor of the intention to continue in the class before 48 hours after the official class start date.

View the full policy here: http://www.sjsu.edu/senate/docs/F15-3.pdf

Faculty Office Hours

University Policy S12-1, Faculty Office Hours

Today’s teaching and learning dynamics have changed dramatically for both students and faculty, with a much greater reliance on electronically mediated methods for communication. Faculty may now spend many hours in “unofficial” office hour time (including evenings and weekends) responding to students’ instructional needs. These consultations are frequently held outside of the physical “official” office hours, but nonetheless constitute instructional and advising time.

View the full policy here: http://www.sjsu.edu/senate/docs/S12-1.pdf
Disciplinary Action Statement

Students who fail to comply with federal, state, and local laws governing the use of alcohol, illicit drugs, and other grounds upon which student discipline can be based, will be subject to sanctions ranging from disciplinary probation up to and including expulsion from the California State University. California State University Executive Order 1098 entitled Student Conduct Procedures governs the procedures that the University follows in student discipline cases.

Any permanent or probationary employee of the California State University may be dismissed, demoted or suspended for any one of several causes, including addiction to the use of controlled substances, conviction of a felony or conviction of any misdemeanor involving moral turpitude or drunkenness on duty (Educ. Code 89535). Employees challenging the imposition of such sanctions may appeal to the State Personnel Board and receive a hearing before an impartial body. Faculty employees have alternative appeal processes outlined in their collective bargaining agreement.

Student Fairness Committee

The Student Fairness Committee is under the jurisdiction of the university’s Academic Senate and is guided by University Policy S14-3. This committee hears complaints of violations of student rights in instructional and curricular matters, including grade appeals, and, when appropriate, makes recommendations for redress. The committee also hears and seeks redress of non-instructional student grievances concerning individual members of the faculty, administration or staff and, when appropriate, makes recommendations for redress.

A grievance can be brought as a result of an unauthorized or unjustified act or decision by a member of the faculty or staff or an administrative officer which in any way adversely affects the status, rights, or privileges of a student. The SFC does not have the authority to receive complaints on matters of sexual harassment, civil rights, disability rights, or equity and diversity. Nor does the SFC deal with allegations of violations of the student code of conduct.

Disputes arising out of assignment of grades or grade appeals shall be considered and decided in accordance with Executive Order 1037. There is a presumption that grades assigned are correct. It is the responsibility of anyone appealing an assigned grade to demonstrate otherwise (EO 1037).

The SFC will hear grade dispute petitions when petitions are deemed to be appropriate and include evidence related to the following conditions:

1. When there is evaluation of students that differs from announced requirements.
2. When there are belated impositions of requirements.
3. When grades are based on criteria other than academic performance in the course.
4. When grading criteria do not provide a clear and consistent method of evaluating students’ work or performance.
5. When students’ requests for information during the semester regarding their academic progress in the course are not responded to in a reasonable time (e.g., two weeks after the request is made).
6. When students’ requests for an explanation of how the posted course grades for a term were determined are not responded to in a reasonable time (e.g., the later of two weeks after the request is made or one week before the add deadline for the fall or spring semester following the term in question).
7. When students are penalized for expressing opinions.
8. When students are given to understand that they are removed from a course without due process of a hearing

Petitions must be filed no later than the end of the subsequent fall or spring semester following that in which the alleged cause of the dispute occurred. Prior to lodging a formal complaint, the student must secure informal, confidential advisement from the University Ombudsperson. Before the committee will accept a petition, the student must exhaust all available avenues for informal resolution (i.e., prior to filing a petition, consult with instructor, Department Chair, and the College Dean - if applicable - about the specific complaint).

Any student may contact the University Ombudsperson ADM 269, 408-924-5995.

Ombudsperson

What steps should I take if I feel my rights have been violated?

If you feel that your rights have been violated or you would like to have an informal discussion with a confidential and neutral point person on campus you are encouraged to connect with the University Ombudsperson.

The University Ombudsperson is an advocate for procedural fairness who supports the integrity of the campus policies and procedures and ensures the equity of their application.

The Ombudsperson provides a neutral, confidential, and informal place to discuss a concern with the assurance that no action will be taken, nor will the visit be disclosed to anyone, without consent.
Religious Holidays

Accommodation to Students’ Religious Holidays, University Policy S14-7

San José State University shall provide accommodation on any graded class work or activities for students wishing to observe religious holidays when such observances require students to be absent from class. It is the responsibility of the student to inform the instructor, in writing, about such holidays before the add deadline at the start of each semester. If such holidays occur before the add deadline, the student must notify the instructor, in writing, at least three days before the date that he/she will be absent. It is the responsibility of the instructor to make every reasonable effort to honor the student request without penalty, and of the student to make up the work missed.

Student Conduct & Ethical Development

Student Conduct and Ethical Development promotes fairness and consistency in the administration of the student conduct process while supporting a safe and inclusive living and learning environment. Student Conduct and Ethical Development commits to the principles of empathy, ethics, equity, integrity, and respect.

Through effective prevention (interactions, outreach, presentations) and response (student conduct process) initiatives, Student Conduct and Ethical Development facilitates ethical development, effective decision making, and problem solving skills and contributes to students’ personal and academic success.

Student Conduct Code

Title 5, California Code of Regulations, 41301. Standards for Student Conduct

(a) Campus Community Values

The university is committed to maintaining a safe and healthy living and learning environment for students, faculty, and staff. Each member of the campus community should choose behaviors that contribute toward this end. Students are expected to be good citizens and to engage in responsible behaviors that reflect well upon their university, to be civil to one another and to others in the campus community, and contribute positively to student and university life.

(b) Grounds for Student Discipline

Student behavior that is not consistent with the Student Conduct Code is addressed through an educational process that is designed to promote safety and good citizenship and, when necessary, impose appropriate consequences.

The following behavior is subject to disciplinary sanctions and are the grounds upon which student discipline can be based:
(2) Dishonesty, including:
   • (A) Cheating, plagiarism, or other forms of academic dishonesty that are intended to gain unfair academic advantage.
   • (B) Furnishing false information to a university official, faculty member, or campus office.
   • (C) Forgery, alteration, or misuse of a university document, key, or identification instrument.
   • (D) Misrepresenting oneself to be an authorized agent of the university or one of its auxiliaries.

(2) Unauthorized entry into, presence in, use of, or misuse of university property.

(3) Willful, material and substantial disruption or obstruction of a university-related activity, or any on-campus activity.

(4) Participating in an activity that substantially and materially disrupts the normal operations of the university, or infringes on the rights of members of the university community.

(5) Willful, material and substantial obstruction of the free flow of pedestrian or other traffic, on or leading to campus property or an off-campus university-related activity.

(6) Disorderly, lewd, indecent, or obscene behavior at a university-related activity, or directed toward a member of the university community.

(7) Conduct that threatens or endangers the health or safety of any person within or related to the university community, including physical abuse, threats, intimidation, harassment, or sexual misconduct.

(8) Hazing, or conspiracy to haze. Hazing is defined as any method of initiation or pre-initiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university or other educational institution in this state (Penal Code 245.6), and in addition, any act likely to cause physical harm, personal degradation or disgrace resulting in physical or mental harm, to any former, current, or prospective student of any school, community college, college, university or other educational institution. The term “hazing” does not include customary athletic events or school sanctioned events.

   Neither the express or implied consent of a victim of hazing, nor the lack of active participation in a particular hazing incident is a defense. Apathy or acquiescence in the presence of hazing is not a neutral act, and is also a violation of this section.

(9) Use, possession, manufacture, or distribution of illegal drugs or drug-related paraphernalia, (except as expressly permitted by law and university regulations) or the misuse of legal pharmaceutical drugs.

(10) Use, possession, manufacture, or distribution of alcoholic beverages (except as expressly permitted by law and university regulations), or public intoxication while on campus or at a university-related activity.

(11) Theft of property or services from the university community, or misappropriation of university resources.

(12) Unauthorized destruction, or damage to university property or other property in the university community.

(13) Possession or misuse of firearms or guns, replicas, ammunition, explosives, fireworks, knives, other weapons, or dangerous chemicals (without the prior authorization of the campus president) on campus or at a university-related activity.

(14) Unauthorized recording, dissemination, or publication of academic presentations (including handwritten notes) for a commercial purpose.

(15) Misuse of computer facilities or resources, including:
   • (A) Unauthorized entry into a file, for any purpose.
   • (B) Unauthorized transfer of a file.
   • (C) Use of another’s identification or password.
   • (D) Use of computing facilities, campus network, or other resources to interfere with the work of another member of the university community.
   • (E) Use of computing facilities and resources to send obscene or intimidating and abusive messages.
   • (F) Use of computing facilities and resources to interfere with normal university operations.
   • (G) Use of computing facilities and resources in violation of copyright laws.
   • (H) Violation of a campus computer use policy.

(16) Violation of any published university policy, rule, regulation or presidential order.

(17) Failure to comply with directions of, or interference with, any University official or any public safety officer while acting in the performance of his/her duties.

(18) Any act chargeable as a violation of a federal, state, or local law that poses a substantial threat to the safety or well-being of members of the university community, to property within the university community or poses a significant threat of disruption or interference with university operations.
(19) Violation of the Student Conduct Procedures, including:

- (A) Falsification, distortion, or misrepresentation of information related to a student discipline matter.
- (B) Disruption or interference with the orderly progress of a student discipline proceeding.
- (C) Initiation of a student discipline proceeding in bad faith.
- (D) Attempting to discourage another from participating in the student discipline matter.
- (E) Attempting to influence the impartiality of any participant in a student discipline matter.
- (F) Verbal or physical harassment or intimidation of any participant in a student discipline matter.
- (G) Failure to comply with the sanction(s) imposed under a student discipline proceeding.

(20) Encouraging, permitting, or assisting another to do any act that could subject him or her to discipline.

(c) Procedures for Enforcing this Code

The Chancellor shall adopt procedures to ensure students are afforded appropriate notice and an opportunity to be heard before the university imposes any sanction for a violation of the Student Conduct Code. [Note: At the time of publication, such procedures are set forth in California State University Executive Order 1098 (Revised June 23, 2015), available at http://calstate.edu/eo/EO-1098-rev-6-23-15.html.]

(d) Application of this Code

Sanctions for the conduct listed above can be imposed on applicants, enrolled students, students between academic terms, graduates awaiting degrees, and students who withdraw from school while a disciplinary matter is pending. Conduct that threatens the safety or security of the campus community, or substantially disrupts the functions or operation of the University is within the jurisdiction of this Article regardless of whether it occurs on or off campus. Nothing in this Code may conflict with Education Code section 66301 that prohibits disciplinary action against students based on behavior protected by the First Amendment.

Title 5, California Code of Regulations, 41302. Disposition of Fees: Campus Emergency; Interim Suspension.

The president of the campus may place on probation, suspend, or expel a student for one or more of the causes enumerated in Section 41301. No fees or tuition paid by or for such student for the semester, quarter, or summer session in which he or she is suspended or expelled shall be refunded. If the student is readmitted before the close of the semester, quarter, or summer session in which he or she is suspended, no additional tuition or fees shall be required of the student on account of the suspension.

During periods of campus emergency, as determined by the president of the individual campus, the president may, after consultation with the chancellor, place into immediate effect any emergency regulations, procedures, and other measures deemed necessary or appropriate to meet the emergency, safeguard persons and property, and maintain educational activities.

The president may immediately impose an interim suspension in all cases in which there is reasonable cause to believe that such an immediate suspension is required in order to protect lives or property and to insure the maintenance of order. A student so placed on interim suspension shall be given prompt notice of charges and the opportunity for a hearing within 10 days of the imposition of interim suspension. During the period of interim suspension, the student shall not, without prior written permission of the president or designated representative, enter any campus of the California State University other than to attend the hearing. Violation of any condition of interim suspension shall be grounds for expulsion.

Student Conduct Procedures

SJSU is committed to ensuring a safe learning and living environment for students, faculty, and staff. The privilege of attending San José State University is accompanied by certain responsibilities to ensure this environment. The California Code of Regulations, Title 5, Section 41301 establishes behavioral expectations of our students to promote safety and good citizenship. The California State University issued Executive Order 1098, entitled, Student Conduct Procedures, on June 23, 2015 to outline the procedures for administering the Student Conduct Code as well as ensuring students’ rights to due process. The process is intended to be educational in nature, and appropriate sanctions may be administered.

Policy and Implementation

At San José State University the responsibility for administering the Student Conduct Code resides with the Director of Student Conduct and Ethical Development in the Division of Student Affairs. This position is responsible for carrying out the duties in Executive Order No. 1098 assigned to the Student Conduct Administrator, including the determination of whether to initiate disciplinary action.
Students may be accompanied by an advisor of their choice. The advisor's role is limited to observing and providing consultation, support, and advice to the student. The advisor may not speak on the student's behalf.

San Jose State University excludes attorneys from student discipline proceedings except in limited circumstances where there are (a) pending criminal (felony) charges or (b) the recommended sanction is Expulsion. (Refer to Executive Order 1098, Article II, Section C for additional details about attorneys.)

The duties of the president in Executive Order No. 1098 are delegated to the Vice President for Student Affairs, including the appointment of hearing officers (Article II, section B), review of final reports of hearing officers and issuing notice of the final decision (Article III, Sections E and F), and the imposition of interim suspension (Article VI, Sections H and I).

---

**Student Discipline and Conduct**

Questions regarding student disciplinary matters should be directed to Student Conduct & Ethical Development, Administration 218, 408-924-5985 or www.sjsu.edu/studentconduct/.

**Student Disciplinary Process**

The student conduct process is governed by Executive Order 1098. Copies of this document are available in Student Conduct & Ethical Development, Administration 218, 408-924-5985 or www.sjsu.edu/studentconduct/.

**California Code of Regulations**

Inappropriate conduct by students or by applicants for admission is subject to discipline as provided in Sections 41301 through 41304 of Title 5, California Code of Regulations.

---

**Regulation - Disposition of Fees**

**Disposition of Fees - Campus Emergency - 41302 - Interim Suspension**

The president of the campus may place on probation, suspend, or expel a student for one or more of the causes enumerated in Section 41301. No fees or tuition paid by or for such student for the semester, quarter, or summer session in which he or she is suspended or expelled shall be refunded. If the student is readmitted before the close of the semester, quarter, or summer session in which he or she is suspended, no additional tuition or fees shall be required of the student on account of the suspension.

During periods of campus emergency, as determined by the president of the individual campus, the President may, after consultation with the chancellor, place into immediate effect any emergency regulations, procedures, and other measures deemed necessary or appropriate to meet the emergency, safeguard persons and property, and maintain educational activities.

The president may immediately impose an interim suspension in all cases in which there is reasonable cause to believe that such an immediate suspension is required in order to protect lives or property and to insure the maintenance of order. A student so placed on interim suspension shall be given prompt notice of charges and the opportunity for a hearing within 10 days of the imposition of interim suspension. During the period of interim suspension, the student shall not, without prior written permission of the President or designated representative, enter any campus of the California State University other than to attend the hearing. Violation of any condition of interim suspension shall be grounds for expulsion.

**Regulation - Conduct by Applicants for Admission - 41303**

Notwithstanding any provision in this Chapter 1 to the contrary, admission or readmission may be qualified or denied to any person who, while not enrolled as a student, commits acts which, were he enrolled as a student, would be the basis for disciplinary proceedings pursuant to Sections 41301 or 41302. Admission or readmission may be qualified or denied to any person who, while a student, commits acts which are subject to disciplinary action pursuant to Section 41301 or Section 41302. Qualified admission or denial of admission in such cases shall be determined under procedures adopted pursuant to Section 41304.
Regulation - Student Disciplinary Procedures for the California State University - 41304

The chancellor shall prescribe, and may from time to time revise, a code of student disciplinary procedures for the California State University. Subject to other applicable law, this code shall provide for determinations of fact and sanctions to be applied for conduct which is a ground of discipline under Sections 41301 or 41302, and for qualified admission or denial of admission under Section 41303; the authority of the campus president in such matters; conduct-related determinations on financial aid eligibility and termination; alternative kinds of proceedings, including proceedings conducted by a hearing officer; time limitations; notice; conduct of hearings, including provisions governing evidence, a record and review; and such other related matters as may be appropriate. The chancellor shall report to the board actions taken under this section.

Drug-Free Schools Statement

In accordance with the Drug-Free Workplace and the Drug-Free Schools and Communities Act (P.L. 102-226) and the Presidential Directive (90-92), SJSU recognizes that the abuse of alcohol and other drugs is a threat to the health and welfare of the campus community and is not compatible with an environment where education takes place. Therefore, the following principles will serve as standards of conduct.

The unlawful manufacture, possession, distribution or use of a controlled substance is prohibited on campus. Violation of this standard may result in dismissal under the applicable regulations of the Title V and will be subject to civil and criminal penalties.

No individual below the age of 21 and no intoxicated individual may use, purchase or possess alcoholic beverages or they may be subject to the penalties imposed by local, state and federal laws.

SJSU recognizes that its policy on illicit drugs and alcohol meets the legal requirements of public laws 101-226, 100-440, 100-690 and the California Penal Code. For more explicit information on the policy and sanctions, contact the Office of the Vice President for Student Affairs or the Student Health Center.

SJSU’s Commitment to Student Health and Safety

SJSU is sincerely concerned for the welfare of all members of its community. The university recognizes that college and university campuses may be particularly vulnerable to the abuse of alcohol and other drugs. Concern for the potential impairment of education and learning and the safety and good health of all members of the campus community, as well as the effective conduct of campus affairs, has led SJSU to issue this information.

This information was prepared to inform members of the campus community of the problems associated with alcohol and illicit drug abuse; to indicate sources of assistance for such problems; to emphasize standards of conduct desired of students, faculty and employees; and to note sanctions associated with infractions of these standards and other illegal acts related to abuse.

All colleges and universities that receive federal funds in any form are required to comply with Public Law 101-226. Partial compliance with this new law requires annual distribution of information to students and employees. This law, in addition to the Drug Free Workplace Act (Public Law 100-690) which requires applicants for federally funded grants and contracts (including certain forms of student financial aid) to certify that they will take affirmative steps to prohibit the unlawful manufacture, distribution, possession and use of controlled substances in the workplace, establishes the legal requirements for SJSU.

A more complete compendium on Federal, State and Local laws is available at the following locations:

• Vice President for Student Affairs, ADM 242
• Human Resources, UPD
• Wellness and Health Promotion Office, Student Wellness Center 101

Safety Report

The Annual Security and Fire Safety Report is published each year in compliance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act. The report contains important safety information, SJSU policies, and crime statistics for the previous 3 years.

University Police
www.sjsu.edu/police
408-924-2172
**Sexual Harassment**

San José State University is committed to maintaining a learning and working environment free from sexual harassment of its students, employees, and those who apply for employee or student status. Sexual harassment is conduct subject to disciplinary action.

SJSU policy defines sexual harassment to include "behaviors such as sexual advances, request for sexual favors, and other verbal or physical conduct of a sexual nature directed towards an employee, student, or applicant when one or more of the following circumstances are present:

- Submission to or toleration of the conduct is an explicit or implicit term or condition of appointment, employment, admission or academic evaluation
- Submission to or rejection of such conduct is used as a basis for a personnel decision or an academic evaluation affecting an individual
- The conduct has the purpose of interfering with an employee’s work performance or creating an intimidating, hostile, offensive or otherwise adverse working environment
- The conduct had the purpose or effect of interfering with a student’s academic performance, creating an intimidating, hostile, offensive or otherwise adverse learning environment, or adversely affecting any student.

All complaints dealing with sexual harassment should be directed to the Office for Equal Opportunity, which is located in UPD 303, 408-924-1115.

---

**CSU Nondiscrimination Policy and Complaint Procedures**

**Regulation - CSU Executive Order 1045**

**California State University (CSU) Student/Applicant for Admission Discrimination/Harassment/Retaliation Complaint Process Timeline**

Systemwide Policy Prohibiting Discrimination, Harassment and Retaliation, Sexual Misconduct, Dating and Domestic Violence, and Stalking against Students and Systemwide Procedure for Addressing Such Complaints by Students

California State University Executive Order 1097 governs the procedures that SJSU follows when students make a complaint regarding Discrimination, Harassment and Retaliation, Sexual Misconduct, Dating and Domestic Violence, and Stalking.

California State University Executive Order 1097 informs students of their rights and responsibilities when they make a complaint and describes the Campus Early Resolution Process, Campus Investigation Process, Appeal Review-Office of the Chancellor, and Remedies that may be imposed.

**Regulation - Campus Climate**

**Tolerance, Respect and Understanding**

As members of a university community it is our responsibility to advocate tolerance, respect and understanding at a level above that which is minimally required of us by law. While SJSU has largely succeeded in creating a diverse campus community, it must also actively promote a civil campus climate. This may require changes in attitudes and behaviors as we develop our common bonds.

Several of the convictions that might help us as members of an educational institution create these bonds are:

Respect for the individual: In recognition of individual uniqueness and value, whether as students, faculty, staff or administrators, it is our commitment to discourage appropriately any actions, behaviors, communication or programs that erode this fundamental concern for the individual.

Commitment to issue and problem resolution: It is the intent of the university to recognize the process of problem and issue resolution as integral to the successful achievement of its mission. SJSU is committed to addressing problems and issues in a responsive, equitable and timely manner.

Open communication and feedback: The university endorses and supports an environment of open communication and feedback. In support of this principle, the university will develop internal programs to educate, evaluate and provide feedback to support the growth process, including the growth of community and civility.
Regulation - Protected Status: Genetic Information, Marital Status, Medical Condition, Nationality, Race or Ethnicity (including color or ancestry), Religion or Religious Creed, and Veteran or Military Status

The California State University does not discriminate on the basis of age, genetic information, marital status, medical condition, nationality, race or ethnicity (including color and ancestry), religion (or religious creed), and veteran or military status - as these terms are defined in CSU policy - in its programs and activities, including admission and access. Federal and state laws, including Title VI of the Civil Rights Act of 1964 and the California Equity in Higher Education Act, prohibit such discrimination.

CSU Executive Order 1097 (www.calstate.edu/EO/EO-1097-rev-6-23-15.pdf) is the systemwide procedure for all complaints of discrimination, harassment or retaliation made by students against the CSU, a CSU employee, other CSU students or a third party. The Director of Compliance has been designated to coordinate the efforts of San José State University to comply with all applicable federal and state laws prohibiting discrimination on these bases. Inquiries concerning compliance may be presented to this person at 408-924-1200 or the Office for Equal Opportunity, UPD 303, 408-924-1115.

Regulation - Protected Status: Disability

The California State University does not discriminate on the basis of disability (physical and mental) - as this term is defined in CSU policy - in its programs and activities, including admission and access. Federal and state laws, including sections 504 and 508 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, prohibit such discrimination. Each campus has been designated to coordinate the efforts to comply with all applicable federal and state laws prohibiting discrimination on the basis of disability. Inquiries concerning compliance may be presented to this person at 408-924-1115. CSU Executive Order 1097 Revised October 5, 2016 (www.calstate.edu/EO/EO-1097-rev-10-5-16.pdf) (or any successor executive order) is the systemwide procedure for all complaints of discrimination, harassment or retaliation made by students against the CSU, a CSU employee, other CSU students or a third party.

The Office for Equal Opportunity has been designated to coordinate the efforts of San José State University to comply with all relevant disability laws. Inquiries concerning compliance may be presented to this office at 408-924-1115.

Regulation - Protected Status: Gender (or sex), Gender Identity (including transgender), Gender Expression and Sexual Orientation

The California State University does not discriminate on the basis of gender (or sex), gender identity (including transgender), gender expression or sexual orientation - as these terms are defined in CSU policy - in its programs and activities, including admission and access. Federal and state laws, including Title IX of the Education Amendments of 1972, prohibit such discrimination. The California State University is committed to providing equal opportunities to all CSU students in all campus programs, including intercollegiate athletics. Inquiries concerning compliance may be presented to this person at 408-924-1200 or the Office for Equal Opportunity, UPD 303, 408-924-1115. CSU Executive Order 1097 Revised October 5, 2016 (www.calstate.edu/EO/EO-1097-rev-10-5-16.pdf) (or any successor executive order) is the systemwide procedure for all complaints of discrimination, harassment or retaliation made by students against the CSU, a CSU employee, other CSU students or a third party.

Title IX of the Education Amendments of 1972 protects all people regardless of their gender, gender identity, gender expression or sexual orientation from gender discrimination, which includes sexual harassment and violence:

Sexual Discrimination means an adverse action taken against a student by the CSU, a CSU employee, or another student because of gender or sex (including sexual harassment, sexual violence, domestic violence, dating violence, and stalking) that is perpetrated against an individual on a basis prohibited by Title IX of the Education Amendments of 1972, 20 U.S.C.1681 et seq., and its implementing regulations, 34 C.F.R. Part 106 (Title IX), California Education Code 766250 et seq., and/or California Government Code 11135.

Sexual Harassment, a form of sex discrimination, is unwelcome verbal, nonverbal or physical conduct of a sexual nature that includes, but is not limited to, sexual advances, requests for sexual favors, and any other conduct of a sexual nature where:

1. Submission to, or rejection of, the conduct is explicitly or implicitly used as the basis for any decision affecting a complainant’s status or progress, or access to benefits and services, honors, programs, or activities available at or through the university; or
2. The conduct is sufficiently severe, persistent or pervasive that its effect, whether or not intended, could be considered by a reasonable person in the shoes of the complainant, and is in fact considered by the complainant, as limiting his or her ability to participate in or benefit from the services, activities or opportunities offered by the university; or
The person was asleep or unconscious; consent nor does silence mean consent. Affirmative consent must be voluntary, and given without coercion, force, threats or intimidation.

Affirmative Consent means an informed, affirmative, conscious, voluntary, and mutual agreement to engage in sexual activity. It is the responsibility of each person involved in the sexual activity to ensure that s/he has the affirmative consent of the other participant(s) to engage in the sexual activity. Lack of protest or resistance does not mean affirmative consent. Therefore, the person was asleep or unconscious.

Sexual Misconduct: All sexual activity between members of the university community must be based on affirmative consent. Engaging in any sexual activity without first obtaining affirmative consent to the specific activity is sexual misconduct, whether or not the conduct violates any civil or criminal law. Sexual activity includes, but is not limited to, kissing, touching intimate body parts, fondling, intercourse, penetration of any body part, and oral sex. It also includes any unwelcome physical acts, such as unwelcome sexual touching, sexual assault, sexual battery, rape, and dating violence. When based on gender, domestic violence or stalking also constitute sexual misconduct. Sexual misconduct may include the use of force or violence upon the person of another because of that person’s gender or sex.

Sexual Battery is a form of sexual misconduct and is any willful and unlawful use of force or violence upon the person of another because of that person’s gender or sex as well as touching an intimate part of another person against that person’s will and for the purpose of sexual arousal, gratification or abuse.

Rape is a form of sexual misconduct and is non-consensual sexual intercourse that may also involve the use of threat of force, violence, or immediate and unlawful bodily injury or threats of future retaliation and duress. Any sexual penetration, however slight, is sufficient to constitute rape. Sexual acts including intercourse are considered non-consensual when a person is incapable of giving consent because s/he is incapacitated from alcohol and/or drugs, is under 18 years old, or if a mental disorder or developmental or physical disability renders the person incapable of giving consent. The respondent’s relationship to the person (such as family member, spouse, friend, acquaintance or stranger) is irrelevant.

Acquaintance Rape is a form of sexual misconduct committed by an individual known to the victim. This includes a person the victim may have just met; i.e., at a party, introduced through a friend, or on a social networking website.

Affirmative Consent means an informed, affirmative, conscious, voluntary, and mutual agreement to engage in sexual activity. It is the responsibility of each person involved in the sexual activity to ensure that s/he has the affirmative consent of the other participant(s) to engage in the sexual activity. Lack of protest or resistance does not mean consent nor does silence mean consent. Affirmative consent must be voluntary, and given without coercion, force, threats or intimidation.

• The existence of a dating or social relationship between those involved, or the fact of past sexual activities between them, should never by itself be assumed to be an indicator of affirmative consent. A request for someone to use a condom or birth control does not, in and of itself, constitute affirmative consent.

• Affirmative consent can be withdrawn or revoked. Consent to one form of sexual activity (or sexual act) does not constitute consent to other forms of sexual activity. Consent given to sexual activity on one occasion does not constitute consent on another occasion. There must always be mutual and affirmative consent to engage in sexual activity. Consent must be ongoing throughout a sexual activity and can be revoked at any time, including after penetration. Once consent is withdrawn or revoked, the sexual activity must stop immediately.

• A person who is incapacitated cannot give affirmative consent. A person is unable to consent when s/he is asleep, unconscious or is incapacitated due to the influence of drugs, alcohol, or medication so that s/he could not understand the fact, nature or extent of the sexual activity. A person is incapacitated if s/he lacks the physical and/or mental ability to make informed, rational decisions. Whether an intoxicated person (as a result of using alcohol or other drugs) is incapacitated depends on the extent to which the alcohol or other drugs impact the person’s decision-making capacity, awareness of consequences, and ability to make fully informed judgments. A person’s own intoxication or incapacity from drugs or alcohol does not diminish that person’s responsibility to obtain affirmative consent before engaging in sexual activity.

• A person with a medical or mental disability may also lack the capacity to give consent.

• Sexual activity with a minor (a person under 18 years old) is not consensual, because a minor is considered incapable of giving legal consent due to age.

• It shall not be a valid excuse that a person affirmatively consented to the sexual activity if the respondent knew or reasonably should have known that the person was asleep or unconscious;
The person was incapacitated due to the influence of drugs, alcohol or medication, so that the person could not understand the fact, nature or extent of the sexual activity; The person was unable to communicate due to a mental or physical condition.

- It shall not be a valid excuse that the respondent believed that the person consented to the sexual activity under either of the following circumstances:
  - The respondent’s belief in affirmative consent arose from the intoxication or recklessness of the respondent;
  - The respondent did not take reasonable steps, in the circumstances known to the respondent at the time, to ascertain whether the person affirmatively consented.

**Consensual Relationships:** Consensual relationship means a sexual or romantic relationship between two persons who voluntarily enter into such a relationship. While sexual and/or romantic relationships between members of the University community may begin as consensual, they may evolve into situations that lead to discrimination, harassment, retaliation, sexual misconduct, dating or domestic violence, or stalking.

- A university employee shall not enter into a consensual relationship with a student or employee over whom s/he exercises direct or otherwise significant academic, administrative, supervisory, evaluative, counseling, or extracurricular authority. In the event such a relationship already exists, each campus shall develop a procedure to reassign such authority to avoid violations of this policy.
- This prohibition does not limit the right of an employee to make a recommendation on the personnel matters concerning a family or household member where the right to make recommendations on such personnel matters is explicitly provided for in the applicable collective bargaining agreement or MPP/confidential personnel plan.

**Domestic Violence** is abuse committed against someone who is a current or former spouse, current or former cohabitant, someone with whom the abuser has a child, someone with whom the abuser has or had a dating or engagement relationship, or a person similarly situated under California domestic or family violence law. Cohabitant means two unrelated persons living together for a substantial period of time, resulting in some permanency of relationship. It does not include roommates who do not have a romantic, intimate, or sexual relationship. Factors that may determine whether persons are cohabiting include, but are not limited to (1) sexual relations between the parties while sharing the same living quarters, (2) sharing of income or expenses, (3) joint use or ownership of property, (4) whether the parties hold themselves out as husband and wife, (5) the continuity of the relationship, and (6) the length of the relationship. For purposes of this definition, “abuse” means intentionally or recklessly causing or attempting to cause bodily injury or placing another person in reasonable apprehension of imminent serious bodily injury to himself or herself, or another. Abuse does not include non-physical, emotional distress or injury.

**Dating Violence** is abuse committed by a person who is or has been in a social or dating relationship of a romantic or intimate nature with the victim. This may include someone the victim just met; i.e., at a party, introduced through a friend, or on a social networking website. For purposes of this definition, “abuse” means intentionally or recklessly causing or attempting to cause bodily injury or placing another person in reasonable apprehension of imminent serious bodily injury to himself or herself, or another. Abuse does not include non-physical, emotional distress or injury.

**Stalking** means a repeated course of conduct directed at a specific person that would cause a reasonable person to fear for his/her or others’ safety or to suffer substantial emotional distress. For purposes of this definition:

- Course of conduct means two or more acts, including but not limited to, acts in which the stalker directly, indirectly, or through third parties, by any action, method, device, or means, follows, monitors, observes, surveys, threatens, or communicates to or about a person, or interferes with a person’s property;
- Reasonable person means a reasonable person under similar circumstances and with the same protected status(es) as the complainant;
- Substantial emotional distress means significant mental suffering or anguish that may, but does not necessarily, require medical or other professional treatment or counseling.

---

**Regulation - Racial Incidents at Educational Institutions**

**Federal Statute and Guidelines on Handling Racial Incidents at Educational Institutions**

Title VII of the Civil Rights Act of 1964 is enforced by the U.S. Department of Education’s Office for Civil Rights issued guidelines for educational institutions receiving federal assistance to follow in handling “Racial Incidents and Harassment Against Students at Educational Institutions.” These guidelines clarify conduct that violates Title VI:

“Under Title VI of Civil Rights Act of 1964 (Title VI) and its implementing regulations, no individual may be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination on the ground of race, color or national origin under any program or activity that receives federal funds. Racially based conduct that has such an effect and that consists of different treatment of students on the basis of race by agents or employees, acting within the scope of their official duties, violates Title VI. In addition, the existence of a racially hostile environment that is created, encouraged, accepted, tolerated or left uncorrected ... also constitutes different treatment on the basis of race in violation of Title VI.”
These same Title VI guidelines further define a “racially hostile environment” as harassing conduct (e.g. physical, verbal, graphic or written) that is sufficiently severe, pervasive or persistent so as to interfere with or limit the ability of an individual to participate in or benefit from the services, activities or privileges provided.

**Regulation - Discrimination, Harassment and Retaliation Reporting and Protection**

SJSU policies prohibit retaliation against persons who file a complaint of discrimination, or assist with or participate in an SJSU or government agency investigation, proceeding or hearing concerning discrimination complaint. Retaliation complaints can be separately filed in the Office for Equal Opportunity, 408-924-1115. Or go to www.sjsu.edu/hr for more information.

San José State University is committed to creating an atmosphere in which all persons and groups can work and study free of unlawful discrimination.

**Unit 11 Academic Student Employee:** See Office of Faculty Affairs.

**Students**

If you have any complaints regarding unlawful discrimination or harassment follow the complaint guidelines outlined in CSU Executive Order 1097 and complete the Student Complaint Form for Discrimination, Harassment, Retaliation & Sexual Misconduct under Title IX (PDF) and return it to Office for Equal Opportunity.

For more information, see our FAQs or contact Office for Equal Opportunity.

For more information, visit http://www.sjsu.edu/hr/students/students_harassment_complaints/index.html

---

**Regulation - Sexual Harassment Policy and Complaints**

SJSU is committed to maintaining a working and learning environment free from sexual harassment for its students, employees and those who apply for employee or student status. Sexual harassment is conduct subject to disciplinary action.

CSU policy defines sexual harassment to include “such behavior as sexual advances, requests for sexual favors and other verbal or physical conduct of a sexual nature directed towards an employee, student or applicant when one or more of the following circumstances are present:

- Submission to, or rejection of, the conduct is explicitly or implicitly used as the basis for any decision affecting a Complainant’s academic status or progress, or access to benefits and services, honors, programs, or activities available at or through the University; or
- The conduct is sufficiently severe, persistent or pervasive that its effect, whether or not intended, could be considered by a reasonable person in the shoes of the Complainant, and is in fact considered by the Complainant, as limiting his or her ability to participate in or benefit from the services, activities or opportunities offered by the University; or
- The conduct is sufficiently severe, persistent or pervasive that its effect, whether or not intended, could be considered by a reasonable person in the shoes of the Complainant, and is in fact considered by the Complainant, as creating an intimidating, hostile or offensive environment.

Sexual Harassment could include being forced to engage in unwanted sexual contact as a condition of membership in a student organization; being subjected to video exploitation or a campaign of sexually explicit graffiti; or frequently being exposed to unwanted images of a sexual nature in a classroom that are unrelated to the coursework.

Sexual Harassment also includes acts of verbal, non-verbal or physical aggression, intimidation or hostility based on Gender or sex-stereotyping, even if those acts do not involve conduct of a sexual nature.

Executive Order 1097 covers unwelcome conduct of a sexual nature. While romantic, sexual, intimate, personal or social relationships between members of the University community may begin as consensual, they may evolve into situations that lead to Sexual Harassment or Sexual Misconduct, including Dating or Domestic Violence, or Stalking, subject to this policy.

Claiming that the conduct was not motivated by sexual desire is not a defense to a complaint of harassment based on Gender.

All complaints dealing with sexual harassment should be directed to the Director, Office for Equal Opportunity, who has been designated to investigate such allegations.
Regulation - ROTC Recruiting

This notice is to inform you that San José State University hosts the Air Force Reserve Officers Training Corps program on campus solely in compliance with the federal requirements contained in The Solomon Amendment. This law, passed as an attachment to the FY97 Federal Appropriations Bill, allows the government to deny federal funding, including federal student aid, to any school that does not provide access to ROTC programs and military recruiters on its campus.

San José State University is guided by the principle of equal opportunity, including the conviction that there will be no differential treatment or harassment of persons because of race, color, religion, national origin, age, sex, marital status, pregnancy, disability, veteran’s status, or sexual orientation. The university has a firm and unambiguous commitment to the active elimination of discrimination, and the affirmative recruitment of a diverse, multi-racial community of students, faculty and staff.

Information Regarding Campus, Criminal and Civil Consequences of Committing Acts of Sexual Violence

Individuals alleged to have committed sexual misconduct may face criminal prosecution by law enforcement and may incur penalties as a result of civil litigation. In addition, employees and students may face discipline at the university, up to and including suspension or expulsion. Employees may face sanctions up to and including dismissal from employment, pursuant to established CSU policies and provisions of applicable collective bargaining unit agreements.

Students who are charged by the university with gender discrimination, harassment or misconduct will be subject to discipline, pursuant to the California State University Student Conduct Procedures (see Executive Order 1098 at www.calstate.edu/EO/EO-1098-rev-6-23-15.pdf or any successor executive order) and will be subject to appropriate sanctions. In addition, during any investigation, the university may implement interim measures in order to maintain a safe and non-discriminatory educational environment. Such measures may include but not be limited to: immediate interim suspension from the university; a required move from university-owned or affiliated housing; adjustments to course schedule; and/or prohibition from contact with parties involved in the alleged incident.

Confidentiality and Sexual Misconduct, Dating Violence, Domestic Violence and Stalking

The university encourages victims of sexual misconduct, dating violence, domestic violence or stalking to talk to someone about what happened - so they can get the support they need, and so the university can respond appropriately.

Privileged and Confidential Communication

Physicians, Psychotherapists, Professional Licensed Counselors, Licensed Clinical Social Workers, and Clergy - Physicians, psychotherapists, professional, licensed counselors, licensed clinical social workers, and clergy who work or volunteer on or off campus, acting solely in those roles or capacities as part of their employment, and who provide medical or mental health treatment or counseling (and those who act under their supervision, including all individuals who work or volunteer in their centers and offices) including those who act in that role under their supervision may not report any information about an incident of sexual misconduct to anyone else at the university, including the Title IX Coordinator, without the victim’s consent. A victim can seek assistance and support from physicians, psychotherapists, professional, licensed counselors, licensed clinical social workers and clergy without triggering a university investigation that could reveal the victim’s identity or the fact of the victim’s disclosure. However, see limited exceptions below regarding when health care practitioners must report to local law enforcement agencies. Health care practitioners should explain these limited exceptions to victims, if applicable.

Sexual Assault and Domestic Violence Counselors and Advocates - Sexual assault and domestic violence counselors and advocates who work or volunteer on or off campus in sexual assault centers, victim advocacy offices, women’s centers and health centers and who are acting solely in that role (including those who act in that role under their supervision, along with non-professional counselors or advocates who work or volunteer in sexual assault centers, victim advocacy offices, women’s centers, gender equity centers, or health centers), may talk to a victim without revealing any information about the victim and the incident of sexual misconduct to anyone else at the university, including the Title IX Coordinator, without the victim’s consent. A victim can seek assistance and support from these counselors and advocates without triggering a university investigation that could reveal his/her identity or that a victim disclosed an incident to them. However, see limited exceptions below regarding when sexual assault and domestic violence counselors and advocates must report to local law enforcement agencies. Counselors and advocates should explain these limited exceptions to victims, if applicable.
The university will be unable to conduct an investigation into a particular incident or pursue disciplinary action against a perpetrator if a victim chooses to (1) speak only to a physician, professional licensed counselor, licensed clinical social worker, clergy member, sexual assault counselor, domestic violence counselor or advocate; and (2) maintain complete confidentiality. Even so, these individuals will assist victims in receiving other necessary protection and support, such as victim advocacy, disability, medical/health or mental health services, or legal services, and will advise victims regarding their right to file a Title IX complaint with the university and a separate complaint with local or university police. If a victim insists on confidentiality, such professionals, counselors and advocates will likely not be able to assist the victim with: university academic support or accommodations; changes to university-based living or working schedules; or adjustments to course schedules. A victim who at first requests confidentiality may later decide to file a complaint with the university or report the incident to the police, and thus have the incident fully investigated. These counselors and advocates can provide victims with that assistance if requested by the victim. These counselors and advocates will also explain that Title IX includes protections against retaliation, and that the university will not only take steps to prevent retaliation when it knows or reasonably should know of possible retaliation, but will also take strong responsive action if it retaliation occurs.

EXCEPTIONS: Under California law, any health practitioner employed in a health facility, clinic, physician’s office, or local or state public health department or clinic is required to make a report to local law enforcement if he or she provides medical services for a physical condition to a patient/victim who he or she knows or reasonably suspects is suffering from (1) a wound or physical injury inflicted by a firearm; or (2) any wound or other physical injury inflicted upon a victim where the injury is the result of assultive or abusive conduct (including sexual misconduct, domestic violence, and dating violence). This exception does not apply to sexual assault and domestic violence counselors and advocates. Health care practitioners should explain this limited exception to victims, if applicable.

Additionally, under California law, all professionals described above (physicians, psychotherapists, professional counselors, licensed clinical social workers, clergy, and sexual assault and domestic violence counselors and advocates) are mandatory child abuse and neglect reporters, and are required to report incidents involving victims under 18 years of age to local law enforcement. These professionals will explain this limited exception to victims, if applicable.

Finally, some or all of these professionals may also have reporting obligations under California law to: (1) local law enforcement in cases involving threats of immediate or imminent harm to self or others where disclosure of the information is necessary to prevent the threatened danger; or (2) to the court if compelled by court order or subpoena in a criminal proceeding related to the sexual misconduct, dating or domestic violence, or stalking incident. If applicable, these professionals will explain this limited exception to victims.

SJSU Policies

San José State University does not discriminate on the basis of accent, age, ancestry, citizenship status, color, creed, disability, ethnicity, gender, genetic information, marital status, medical condition, national origin, race, religion or lack thereof, sex, sexual orientation, transgender, or veteran’s status. This policy applies to all SJSU students, faculty and staff programs and activities. Title IX of the Education Amendments of 1972, and certain other federal and state laws, prohibit discrimination on the basis of sex in all education programs and activities operated by the university (both on and off campus). Questions regarding this policy should be directed to the Office for Equal Opportunity, 408-924-1115

San Jose State University is committed to creating a safe, healthy, and supportive learning environment for our whole community. In this spirit, and to comply with educational mandates under CSU Chancellor’s Office Executive Order 1095, all students are required to complete sexual assault prevention training annually.
Title IX (Nondiscrimination)

SJSU does not discriminate on the basis of sex in the educational programs and activities it conducts. Such programs and activities include admission of students and employment.

Department of Education, Office for Civil Rights: (800) 421-3481 or ocr@ed.gov

If you wish to fill out a complaint form online with the OCR, you may do so at: www2.ed.gov/about/offices/list/ocr/complaintintro.html

Title IX requires the university to adopt and publish complaint procedures that provide for prompt and equitable resolution of gender discrimination complaints, including sexual harassment and misconduct as well as provide training, education and preventive measures related to sex discrimination. CSU Executive Order 1097 (http://www.calstate.edu/EO/EO-1097-rev-10-5-16.pdf) is the systemwide procedure for all complaints of discrimination, harassment or retaliation made by students against the CSU, a CSU employee, other CSU students or a third party.

Except as provided below under confidentiality and sexual misconduct, dating violence, domestic violence, and stalking, any University employee who knows or has reason to know of allegations or acts that violate University policy shall promptly inform the Title IX Coordinator. These employees are required to disclose all information including the names of the parties, even where the person has requested that his/her name remain confidential. The Title IX Coordinator will determine whether confidentiality is appropriate given the circumstances of each such incident (see confidential reporting options outlined below).

Regardless of whether an alleged victim of gender discrimination ultimately files a complaint, if the campus knows or has reason to know about possible sexual discrimination, harassment or misconduct, violence, it must review the matter to determine if an investigation is warranted. The campus must then take appropriate steps to eliminate any gender discrimination/harassment/misconduct, prevent its recurrence, and remedy its effects.

Inquiries and complaints concerning the application of Title IX to programs and activities of SJSU may be referred to the Director of Compliance, SAB 106, 408-924-1200 or the Office for Equal Opportunity, UPD 303, 408-924-1115.

Reporting to the Title IX Coordinator and Other University Employees

Most university employees have a duty to report incidents of sexual misconduct when they are on notice of it. When a victim tells the Title IX Coordinator or another university employee about an incident of sexual misconduct, the victim has the right to expect the university to take immediate and appropriate steps to investigate what happened and to resolve the matter promptly and equitably. In all cases, the university strongly encourages victims to report incidents of sexual misconduct directly to the campus Title IX Coordinator. As detailed above, in the “Privileged and Confidential Communications” section of this policy, all university employees except physicians, licensed professional counselors, licensed clinical social workers, sexual assault counselors and advocates, must report to the Title IX Coordinator all relevant details about any incidents of sexual misconduct of which they become aware. The university will need to determine what happened - and will need to know the names of the victim(s) and the perpetrator(s), any witnesses, and any other relevant facts, including the date, time and specific location of the incident.

Student Complaint Procedure (Complaints Regarding the CSU)

The California State University takes very seriously complaints and concerns regarding the institution. If you have a complaint regarding the CSU, you may present your complaint as follows:

1. If your complaint concerns CSU’s compliance with academic program quality and accrediting standards, you may present your complaint to the Western Association of Schools and Colleges (WASC) at www.wasc.senior.org/comments. WASC is the agency that accredits the CSU’s academic program. If you believe that your complaint warrants further attention after you have exhausted all the steps outlined by WASC, you may file an appeal with the Assistant Vice Chancellor, Academic and Student Affairs at the CSU Chancellor’s Office.

2. If your complaint concerns an alleged violation by CSU of any law that prohibits discrimination, harassment or retaliation based on a protected status (such as age, disability, gender (or sex), gender identity, gender expression, nationality, race or ethnicity (including color or ancestry), religion or veteran or military status), you may present your complaint as described in Section XVI (Nondiscrimination Policy).

3. If your complaint concerns an alleged violation by the CSU of other state law, including laws prohibiting fraud and false advertising, you may present your claim to the campus president or designee. See Procedure for Student Complaints-Executive Order No. 1063 for details regarding the complaint requirements and complaint process: www.calstate.edu/EO/EO-1063.html.

4. Other complaints regarding the CSU may be presented to the campus dean of students, who will provide guidance on the appropriate campus process for addressing your particular issue.

This procedure should not be construed to limit any right that you may have to take legal action to resolve your complaint.
Civil and Criminal Penalties for Violation of Federal Copyright Laws

Anyone who is found to be liable for copyright infringement may be liable for either the owner’s actual damages along with any profits of the infringer or statutory damages of up to $30,000 per work infringed. In the case of a willful infringement, a court may award up to $150,000 per work infringed. (See 17 U.S.C. §§705.) Courts also have discretion to award costs and attorneys’ fees to the prevailing party. (See 17 U.S.C. §§706.) Willful copyright infringement can also result in criminal penalties, including imprisonment and fines. (See 17 U.S.C. §§705 and 18 U.S.C. §§2319.)

Health Policies

Regulation - Health Risks

Federal Law requires the university to provide a description of health risks associated with alcohol and drug abuse.

Regulation - Alcohol

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low to moderate doses of alcohol also increase the incidence of a variety of aggressive acts. Moderate to high doses of alcohol caused marked impairments in higher mental functions, severely altering a person’s ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described. Repeated use of alcohol can lead to dependence and addiction. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations and convulsions. Addictions often require medical support. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and liver.

Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics.

California Alcohol and Drug Abuse Law

The Alcoholic Beverage Control Act was enacted in 1953. This Act is intended to protect the safety, welfare, health, peace and morals of Californians, eliminate the unlicensed and unlawful manufacture, sale and disposal of alcoholic beverages and promote temperance in the consumption and use of alcoholic beverages. (Bus and Prof. Code §23001)

A person convicted of a violation of the Alcohol and Beverage Control Act is guilty of a misdemeanor or felony depending on the violation.

The Uniform Controlled Substances Act may be found in the Health and Safety Code, Section 11000-11651. This Act is the result of a growing concern over substances. Controlled Substances are divided into five Schedules and the substances under each Schedule may be found in Sections 11053-11058.

Local Laws

Local laws generally are consistent with Federal and State laws.

University Regulations

Use and Abuse of Alcohol and Other Drugs- University Policy F10-1

This policy delineates University policy concerning alcohol and illegal drugs or substances, provides procedural guidelines, and communicates the consequences of failing to adhere to established policies. Provision for the purchase, sale, service, and consumption of alcoholic beverages on campus is a privilege accorded to University members with the understanding that they will comply with internal rules, regulations, and relevant legislation (local, state or national). All members of the University community as well as their guests have a responsibility to ensure that alcohol is used in a responsible manner by persons twenty-one (21) years of age or older. The use of alcohol and other drugs should not interfere with the primary mission of the University as an educational institution.

Review the full policy here http://www.sjsu.edu/senate/docs/F10-1.pdf

University regulations controlling student behavior may be found in the Student Conduct Code (Title 5 of the California Code of Regulations Section 41301). The Campus Alcohol Policy includes procedures for serving alcoholic beverages on campus.

The University is required to post in designated areas information concerning the use of anabolic steroids.
Conduct Regarding Drugs and Alcohol

SJSU students, faculty and staff are expected to comply with Federal, State and Local laws governing the use of alcohol and illicit drugs on the University campus and as part of university activities both on and off the campus. These laws control the possession, use and distribution of alcohol and unlawful drugs.

All incoming students are required to complete AlcoholEdu, an online alcohol education course. All incoming students starting in the fall will receive information regarding AlcoholEdu in June. Those starting in the Spring will receive information in January.

The sale, possession, distribution or use of illicit drugs will not be tolerated. Students, faculty and staff are expected to comply with laws governing the possession, distribution and consumption of alcohol as promulgated by the State of California and the university.

It is the responsibility of every student, faculty member and employee to report incidents involving infractions of federal, state and local drug and alcohol laws on campus or at officially sponsored Off-Campus Activities to the Executive Vice President for Faculty Affairs, the Human Resources Officer or the Vice President for Student Affairs.

As is the case in courts, lack of awareness and/or failure to comprehend the regulations are not acceptable defense of one’s actions.

Available Drug or Alcohol Counseling and Treatment Programs

SJSU students are encouraged to seek assistance for drug and alcohol problems at the Counseling & Psychological Services (CAPS) or at the Student Health Center. The State also maintains an Employee Assistance Program to help employees and their dependents with problems of alcohol and drugs.

Regulation - Federal Trafficking Penalties

Federal penalties for trafficking are dependent upon several conditions including the substance, amounts involved and whether the matter is a first or second offense.

Penalties involve monetary sanctions and/or prison terms up to and including life in prison.

Federal Penalties and Sanctions For Illegal Possession Of A Controlled Substance 21 U.S.C. 844(a) - 1st conviction: Up to 1 year imprisonment and fined at least $1,000 but not more than $100,000 or both.

After 1 prior drug conviction: At least 15 days in prison, not to exceed 2 years and fined at least $2,500 but not more than $250,000 or both.

After 2 or more prior drug convictions: At least 90 days in prison, not to exceed 3 years and fined at least $5,000 but not more than $250,000 or both.

Special sentencing provisions for possession of crack cocaine: Mandatory at least 5 years in prison, not to exceed 20 years and fined up to $250,000 or both if:

- 1st crack conviction and the amount of crack possessed exceeds 5 grams.
- 2nd crack conviction and the amount of crack possessed exceeds 3 grams.
- 3rd or subsequent crack conviction and the amount of crack possessed exceeds 1 gram.

21 U.S.C. 833(a)(2) and 881(a)(7) - Forfeiture of personal and real property used to possess or to facilitate possession of a controlled substance if that offense is punishable by more than 1 year imprisonment.

21 U.S.C. 881 (a)(4) - Forfeiture of vehicles, boats, aircraft or any other conveyance used to transport or conceal a controlled substance.

21 U.S.C. 844a - Civil fine of up to $10,000 (pending adoption of final regulations).
21 U.S.C. 853a - Denial of Federal benefits, such as student loans, grants, contracts and professional and commercial licenses, up to 1 year for first offense, up to 5 years for second and subsequent offenses.

18 U.S.C. 922(g) - Ineligible to receive or purchase a firearm.

Regulation - Tobacco

As of August 2015, SJSU is a Smoke and Tobacco Free campus. For more information see Presidential Directive (PD1014-01) and CSU Executive Order 1108.

For more information: http://www.sjsu.edu/tobaccofree/

For tobacco cessation services:
- Counseling and Psychological Services (CAPS)
  408-924-5910
- Student Health Center- Wellness and Health Promotion
  408-924-6202
  www.sjsu.edu/wellness/tobacco
- Low Cost Nicotine Replacement Therapies (NRT):
  Patches and gum are available at Student Health Center Pharmacy
  408-924-6115
  - California Smoker's Helpline
    1-800-662-8887 (1-800-NO-BUTTS)
  - VA-San Jose Community Clinic
    408-363-3000
    http://www.paloalto.va.gov/locations/sanjose.asp

Some of the rationale for a smoke free campus includes:
- Tobacco, both smoked and smokeless, is the leading cause of cancers of the cheeks, gums, palate, tongue and lips.
- A one-pack-a-day smoker increases their chances of cancer of the esophagus by as much as 500%.
- Cigarette smokers are ten times more likely to die of lung cancer than non-smokers.
- Cancer is not the only disease associated with smoking.
- Cigarette smokers are twice as likely to get peptic ulcers as are non-smokers.
- Nicotine is a powerful constrictor of blood vessels and small arteries and results in the restriction of oxygen flow to the heart and elsewhere.
- Heart attacks and strokes are results of oxygen restriction.
- Smoking more than 1/2 pack daily is also associated with higher incidence of infertility in women.
- Babies born to women who smoke are lighter and smaller than those born to non-smokers. This is important because birth weight is a predictor of infant health.

Regulation - Human Immunodeficiency Virus (HIV)/Acquired Immune Deficiency Syndrome (AIDS)

HIV/AIDS is a viral disease which destroys the body’s ability to fight specific illnesses.

The risks of HIV/AIDS can be reduced by:
- Avoiding the exchange of body fluids. HIV can be passed through the exchange of blood, semen, vaginal secretions and breast milk.
- Using condoms correctly and consistently to greatly reduce the exchange of body fluids.
- Reducing the number of sexual partners.
- Avoiding the use of intravenous drugs or sharing needles.
- Abstinence.
- Communicating with sexual partners before having sex about being tested for sexually transmitted infections and protection.
For more information about HIV/AIDS prevention, confidential testing, safer sex and free condoms, contact:

Student Health Center, Wellness and Health Promotion

Privacy Rights of Students in Education Records

The federal Family Educational Rights and Privacy Act of 1974 (20 U.S.C. 1232g) and regulations adopted thereunder (34 C.F.R. 99) set out requirements designed to protect students' privacy in their records maintained by the campus. The statute and regulations govern access to certain student records maintained by the campus and the release of such records. FERPA provides that the campus must give students access to most records directly related to the student, and must also provide opportunity for a hearing to correct the records if the student claims they are inaccurate, misleading, or otherwise inappropriate. The right to a hearing under this law does not include any right to challenge the appropriateness of a grade determined by the instructor. FERPA generally requires the campus obtain a student's written consent before releasing personally identifiable data pertaining to the student. The campus has adopted a set of policies and procedures governing implementation of FERPA and the regulations. Copies of these policies and procedures may be obtained at (designate location on campus). Among the types of information included in the campus statement of policies and procedures are: (1) the types of student records maintained and the information they contain; (2) the official responsible for maintaining each type of record; (3) the location of access lists indicating persons requesting or receiving information from the record; (4) policies for reviewing and expunging records; (5) student access rights to their records; (6) the procedures for challenging the content of student records; (7) the right of the student to file a complaint with the Department of Education. The Department of Education has established an office and review board to investigate complaints and adjudicate violations. The designated office is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, D.C. 20202-5920.

The campus is authorized under the Act to release “directory information” concerning students. “Directory information” may include the student’s name, address, telephone listing, electronic mail address, photograph, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, grade level, enrollment status, degrees, honors, and awards received; and the most recent previous educational agency or institution attended by the student. The above-designated information is subject to release by the campus at any time unless the campus has received prior written objection from the student specifying what information the student requests not be released. Written objections should be sent to the Registrar’s Office. It should be noted, however, that University Policy S66-20 is more restrictive than the law. SJSU policy guidelines indicate that the only directory information routinely released to outside parties without student consent is enrollment status and degree completion (if applicable). Requests for addresses and telephone numbers are not honored, especially if requested for commercial purposes.

The campus is authorized to provide access to student records to campus officials and employees who have legitimate educational interests in such access. These persons have responsibilities in the campus’s academic, administrative or service functions and have reason for accessing student records associated with their campus or other related academic responsibilities. Student records will be disclosed to the Chancellor’s Office of the CSU in order to conduct research, to analyze trends, or to provide other administrative services on behalf of the CSU. Student records may also be disclosed to other persons or organizations under certain conditions (e.g., as part of the accreditation or program evaluation; in response to a court order or subpoena; in connection with financial aid; or to other institutions to which the student is transferring).

University Development (Advancement) Programs
Directory information (see definition earlier) may be used by the university for the development of campus affiliated programs.

Regulation - Career Placement Information
The Career Center may furnish, upon request, information about the employment of students who graduate from programs or courses of study preparing students for a particular career field. Any such data provided must be in a form that does not allow for the identification of any individual student. This information includes data concerning the average starting salary and the percentage of previously enrolled students who obtained employment. The information may include data collected from either graduates of the campus or graduates of all campuses in the California State University system.

Regulation - Student Identification Information
SJSSU ID Number
San José State University is concerned about keeping your personal data private. We are required to use Social Security numbers to process payroll; award financial aid and document fees paid for tax relief purposes. However, for all other purposes, we will use your SJSSU ID number for identification, rather than your Social Security Number.
Use of Social Security Number

Applicants are required to include their correct social security numbers in designated places on applications for admission pursuant to the authority contained in Section 41201, Title 5, California Code of Regulations, and Section 6109 of the Internal Revenue Code (26 U.S.C. 6109). The university uses the social security number to identify students and their records including identification for purposes of financial aid eligibility and disbursement and the repayment of financial aid and other debts payable to the institution. Also, the Internal Revenue Service requires the university to file information returns that include the student’s social security number and other information such as the amount paid for qualified tuition, related expenses, and interest on educational loans. This information is used by the IRS to help determine whether a student, or a person claiming a student as a dependent, may take a credit or deduction to reduce federal income taxes.

Campus and Information Resources

Accreditation

San José State University is accredited by the WASC Senior College and University Commission (WSCUC) - 985 Atlantic Avenue, Suite 100, Alameda, CA 94501, 510-748-9001, one of the six major regional college accreditation agencies in the United States; the California State Board of Education; and by a number of other agencies in special fields. The Teacher Education programs of the University also are accredited by the National Council for Accreditation of Teacher Education and approved by the California Commission on Teacher Credentialing.

- **Art and Design**: National Association of Schools of Art and Design
- **Advertising**: Accrediting Council on Education in Journalism and Mass Communications
- **Business**: Association to Advance Collegiate Schools of Business International
- **Chemistry**: American Chemical Society, Committee on Professional Training (ACS-CPT)
- **Computer Science**: ABET
- **Dance**: National Association of Schools of Dance (NASD)
- **Dietetics**: American Dietetic Association - Commission on Accreditation for Dietetics Education
- **Education**: California Commission on Teacher Credentialing (CTC)
- **Engineering**: ABET (Aerospace, Biomedical, Chemical, Civil, Computer, Electrical, Industrial and Systems, Materials, and Mechanical)
- **Industrial Technology**: Association of Technology, Management, and Applied Engineering (ATMAE)
- **Journalism**: Accrediting Council on Education in Journalism and Mass Communications
- **Kinesiology**: Commission on Accreditation of Athletic Training Education (undergraduate)
- **Library and Information Science**: American Library Association
- **Music**: National Association of Schools of Music
- **Nursing**: California Board of Registered Nursing and Commission on Collegiate Nursing Education
Colleges

Health and Human Sciences, College of

The College of Health and Human Sciences provides both liberal and well-defined professional education at the undergraduate and graduate levels. Course work prepares students to be competent and transformative professionals in a technologically complex and culturally diverse society. The college’s courses and programs provide students with a theoretical base that is developed and tested through: (1) research; (2) knowledge that can be applied in diverse systems; (3) processes that incorporate human understanding, social justice and cooperation; and (4) supervised practice through internships, field work and/or preceptorships in a variety of career-related settings. Graduates become leaders and establish professional careers as administrators, educators, practitioners, information specialists and applied researchers in a variety of settings. These settings include both private and public agencies, government institutions at all levels, community and health care organizations and educational institutions. The College of Health and Human Sciences values and respects diversity, inclusion, civility and individual uniqueness; we recognize the strength these factors bring to our community and learning environment. All of our interactions should reflect trust, caring and mutual respect. We value education and intellectual curiosity above all. The academic freedom of faculty and students is vital to our role of promoting life-long learning through intellectual inquiry, scholarship and the pursuit of knowledge. An overarching goal is that faculty and our academic programs will be recognized for outstanding research, teaching and service across disciplinary and geographic boundaries.

Internships

The departments/schools within the College offer internships that involve advanced practical experience, fieldwork or clinical experience in a professional work setting under direct supervision of qualified professionals. Interns would be assigned various duties and experiences related to their particular areas of specialization. Internships may include seminars, practica or preceptorships to further develop beginning and advanced level practice skills.
International Experience Requirement

The goal of the international experience requirement is to introduce students to international and intercultural perspectives in order to prepare them to live and work in an increasingly globalized world. A number of different types of international experiences, ranging in length from 9 days to one year, can meet this requirement. Most international experience courses also allow students to earn credit towards the degree. Scholarships and Financial Aid are available to defray the costs of international travel. See http://www.sjsu.edu/chhs/international-experience/ for more information.

Teaching Credential Programs

The Department of Kinesiology, in collaboration with the College of Education, provides two single subject professional programs designed for individuals who are interested in teaching physical education or adapted physical education in grades K-12. The California School Nurse Credential prepares Registered Nurses at the Master’s and Post Master’s level to provide and manage health services and programs in the school setting. The School of Library and Information Science offers a Teacher Librarian Credential. The teacher librarian impacts K-12 student outcomes by collaborating with teachers, working directly with students, championing reading and providing information-rich learning environments.

Organized Research Units and Unique Programs

The programs of the College of Applied Sciences and Arts are further enriched by educational, research, global partnerships, as well as cultural and training opportunities provided by the following specialized research units and unique programs: Institute of Nursing Research and Practice, Center for International Sport and Human Performance, Research Institute for Foster Youth Initiatives (RIFYI), Timpany Center, The Center for Research on Effective Services (CRES), and the Center for Healthy Aging in Multicultural Populations (CHAMP).

Business, Donald and Sally Lucas College and Graduate School of

The Donald and Sally Lucas College and Graduate School of Business is the institution of opportunity, providing innovative business education and research for the Silicon Valley region and beyond since 1928. The College offers an accessible, high value education that empowers people of all ages and backgrounds to transform their lives. Faculty and staff are strongly committed to the College’s mission; maintain a collegial, inclusive teaching and learning environment; and are dedicated to continuous improvement in all areas of academic achievement, scholarship, teaching and service.

The college is an active member of the San José and Silicon Valley community and provides a talent pool, thought leadership and service that supports the region’s growth in the global marketplace. The college is one of the 755 institutions worldwide that are accredited by the prestigious AACSB International, the Association to Advance Collegiate Schools of Business. In addition, the college is accredited by the Western Association of Schools and Colleges and the California State Board of Education.

The college is dedicated to equipping graduates with the tools, work ethic and skills to succeed in the ever-changing global economy. This is accomplished through a challenging undergraduate curriculum and an innovative, high quality graduate education in the Donald and Sally Lucas Graduate School of Business.

Undergraduate Business Education

The college provides a rich undergraduate education through five departments and schools - Accounting and Finance, Information Systems and Technology, Management, Global Innovation and Leadership, and Marketing and Decision Sciences. Infused throughout the undergraduate program are opportunities to develop competencies in a number of key areas – communication, teamwork, global perspectives, critical thinking, ethics, entrepreneurship, community service, and innovation. The rigorous and challenging curriculum prepares graduates to be future leaders that succeed in the global economy.

The college is building upon its existing expertise in entrepreneurship, management, global finance, accounting, and leadership and organizational change. In addition, the college showcases the best and brightest students through the Gary J. Sbona Honors Program and the Thompson Global Internship Program.

Donald and Sally Lucas Graduate School of Business

The Donald and Sally Lucas Graduate School of Business offers a high-value education with a global focus, innovative programs, and deep ties to Silicon Valley corporations and leaders. Our distinguished faculty provide a relevant business education focusing on excellence in teaching and applied research and serving the needs of diverse students from the Silicon Valley and beyond.

We offer an on-campus Early Career MBA program with three tracks: accelerated (12 months), full-time (21-24 months), and part-time (33-36 months). Our off-campus MBA for Professionals is a flexible part-time program suitable for working professionals who set their own paces. We also offer Master of Science in Accountancy, Master of Science in Taxation, Master of Science in Transportation Management programs and a dual degree MBA/Master of Science in Software Engineering or MBA/Master of Science in Engineering with a specialization in Systems Engineering.
Education, Connie L. Lurie College of

The Connie L. Lurie College of Education is a professional community of students, faculty and staff engaged in supportive partnerships to serve a community of culturally diverse children, youth and families by pursuing and promoting scholarly and reflective inquiry, and access to a quality lifelong education. Faculty, staff and graduates are compassionate and ethical professionals who are mindful of our responsibilities in a democratic society. The College’s core values are excellence and equity. Excellence is manifested in the rigor of our academic programs, in our teacher/scholar faculty contributions, and in the high level of staff service. We challenge our students to strive for excellence in their academic and personal pursuits, as informed and active citizens in their own communities. To achieve equity, our students, faculty, and staff continuously work for social justice and educational opportunities for all members of our society.

The college offers Bachelor’s and Master’s degrees, a doctoral program, and numerous professional teaching credentials. Programs are offered through seven academic departments which are supplemented by a variety of resources including the Armstead Center for Communication Disorders and the Child Development Laboratory Preschool. The college, housed in William Sweeney Hall, offers two computer laboratories that are open to both undergraduate and graduate students. Students also have access to other high tech education applications.

Student Service Centers

The Kay A. Armstead Center for Communication Disorders provides speech-language-hearing evaluations and therapy services and to students, staff, faculty, and the local San Jose community.

The Child Development Laboratory Preschool is housed in two locations on the SJSU campus, including toddler and pre-school labs. These programs provide undergraduates with both observation and hands-on clinical/practicum opportunities.

The Credentials Office and Student Services Center in Sweeney Hall 106 provides students with information about the California Basic Education Skills Test (CBEST), California Subject Examinations for Teachers (CSET), and Reading Instruction Competence Assessment (RICA). General information on elementary (Multiple Subject), secondary (Single Subject) and special education (Education Specialist) teaching credentials, as well as other service credentials and certificate programs are provided.

Advisement

The Lurie College Student Success Center works in collaboration with the academic departments to provide general education advising, academic support and guidance towards degree completion.

Engineering, Charles W. Davidson College of

The College of Engineering offers ten engineering curricula leading to BS and MS degrees in aerospace, biomedical, chemical, civil, computer, electrical, general, industrial and systems, materials, mechanical and software engineering. The college also has BS degree programs in aviation and industrial technology and a MS degree program in quality assurance. California provides, through community colleges, the California State University and the University of California, coordinated educational programs designed to meet local and statewide needs in engineering and technology.

Engineering Student Success Center

The goal of the Engineering Student Success Center is to mentor students from admission through graduation. The Center provides academic advising, support services, and opportunities for professional development and practice.

The MESA Engineering Program and the Women in Engineering Program work to increase the number of graduates entering the engineering profession from traditionally under-represented and economically disadvantaged groups. MEP actively recruits students, provides support services until graduation and acts as liaison with companies offering employment experiences. MEP assists students with admissions, academic and personal counseling, financial aid and scholarships, housing and registration. MEP maintains a study center for tutoring, workshops, individual and group study and social functions. A summer job placement program assists students in obtaining jobs in industry.

The Community for Engineering Learning and Living (CELL) is a themed living community offered by the University Housing Services for first year engineering students. CELL’s objectives are to provide a cooperative learning environment, to encourage and build the engineering community and to foster a sense of belonging and responsibility to the community. Through facilitated study groups, CELL students will experience the academic support and cooperation of a community committed to academic success. CELL students will have regular access to faculty, advisors and industry professionals through workshops and programs. CELL is about shared experiences and creating a vibrant and caring engineering community.
Graduate and Undergraduate Programs, Office of

Graduate and Undergraduate Programs (GUP) is involved with all aspects of graduate and undergraduate academic matters which support retention and graduation of students. It includes the following areas and programs: Academic Scheduling, Accreditation, Articulation, Assessment, General Education, Program Planning, Catalog, Curriculum, MyProgress, and MyPlanner.

Humanities and the Arts, College of

The College of Humanities and the Arts at San José State University provides a high-quality liberal arts education focused on creativity, innovation, and problem solving. Our programs in art and design, language, linguistics, and literature, film and theater, and music and dance and philosophy prepare students to be compassionate, informed citizens of the world. The College leverages the power of the arts and humanities to explore the most important questions of our time.

Building upon a foundation of excellent oral and written communication skills, our students analyze texts, explore experiences, and perform works that deepen their understanding and appreciation of diverse artistic and intellectual traditions. Under the direction of our accomplished faculty, our students develop the intellectual values, the practical skills, and the self-confidence they need to become accomplished professionals in such diverse fields as design, theatre, teaching, music performance, and visual art.

The Humanities and Arts Student Success Center partners with our academic departments to ensure that all undergraduate students receive on-time advising and robust academic planning support.

Teaching Credential Programs

The College of Humanities and Arts houses teaching credential programs in Art, English, Liberal Studies, Music, Theatre, and World Languages. Our teaching programs benefit from an active network of SJSU alums working in schools across the state.

Special Centers

The College of Humanities and the Arts is home to the Martha Heasley Cox Center for Steinbeck Studies, the Ira F. Brilliant Center for Beethoven Studies, the Center for Literary Arts, and the Center for Comparative Philosophy. The College manages the San José State University Writing Center, a resource for all SJSU students to help them become better writers. The College also manages the Hammer Theater, a city-owned venue that offers a professional venue for our best students in theater, music, and dance.

Professional and Global Education, College of

(Formerly the College of International and Extended Studies)

In the College of Professional and Global Education, we provide access to relevant educational programs that allow individuals to gain knowledge and skills that create a solid foundation for them to be engaged and productive members of a global society. We offer a learning environment that is dynamic and innovative, ensuring that we are responsive to the ever-evolving workforce and industry demands. Our college is the nexus for connecting professionals, institutions, businesses and industries, locally and from around the world, to the knowledge, resources, and talents of Silicon Valley's premier public university.

At our College, we provide career-minded students and working professionals with the real-world knowledge, experience, and access they need to compete and succeed in a contemporary work force. Within the California State University (CSU), we have the most extensive portfolio of graduate, academic programs, with the highest enrollments. Through our College or in partnership with six academic colleges, we offer a total of 22 professional degree programs at the Masters level and 15 advanced certificate, and three credential programs.

Science, College of

San José is at the center of Silicon Valley, known worldwide for its research institutes and industries that set the standard for scientific and technological innovation. San José State is the metropolitan university of the region, and the academic programs of the College of Science prepare students for rewarding careers through our bachelor’s and master’s level degree programs in the biological sciences, physical sciences, mathematics and computer science fields. Our departments have established partnerships with local employers where students find training and employment opportunities.

The College of Science provides the lower division core biology, chemistry, mathematics and physics courses supporting majors in other technical disciplines (such as engineering). As part of the university general education requirements, we offer courses in quantitative reasoning, the physical universe and its life forms, and earth and the environment. Furthermore, we teach the discipline-specific courses for the science and mathematics teacher credential programs.

Successful science students come from many backgrounds. Some enter the university immediately upon graduation from high school. Others, who have worked or have various life experiences, enroll as either full or part-time students in order to continue their education and better their career opportunities. The maturity, laboratory skills and experience of these students enrich our programs. We have several programs to increase the participation of women and underrepresented students in professional level science. Our College of Science Advising Center (COSAC) is available to assist students with their academic advising questions as well as to provide tutoring for key science and math courses.

There are active student clubs associated with each major, several of which have won national recognition for their professional and community service activities. Club members provide mutual support and are able to network with professionals in their field.

Special Centers

The College of Science has several unique interdisciplinary instructional research centers and programs: the Biotechnology Education and Research Institute (BERI), the Masters in BioTechnology (MBT), the Master’s in Medical Product Development Management, the Clinical Lab Science program, the Center for Applied Mathematics, Computation and Statistics, the Institute for Modern Optics, the Flow Cytometry Core Facility, the W.M. Keck Facility for Chemical Research, the laboratory for Conservation Genetics, the Moss Landing Marine Laboratories, and the Nuclear Science Facility. Partially funded by external grants and contracts, these centers provide our students opportunities to participate in sponsored research projects. Cooperative programs with local industries and government laboratories are additional sources of professional experience and financial support for our science majors.

Teaching Credential Programs

Two single subject credential programs are coordinated by the College of Science, in collaboration with the College of Education. The single subject professional programs are designed for individuals who are interested in teaching science or mathematics in middle schools or high schools. The Science Education Program offers single subject credential programs in biology, chemistry, earth science and physics. The Department of Mathematics and Statistics offers a mathematics single subject credential program. For detailed information, contact the appropriate program coordinator.

Through the Science Education Program, the College of Science supports the Science Education Resource Center, which provides hands-on science materials, textbooks, reference materials and technical assistance to pre-service and in-service teachers.

Social Sciences, College of

Programs in the College of Social Sciences prepare students for work and life in Silicon Valley and a rapidly changing world. Our twelve departments provide training for careers in counseling, human computer interaction, environmental impact assessment and restoration, computerized mapping, public administration, economic analysis, internet communication, and countless other positions in business, government, teaching, and human services.

Major courses of study emphasize the contributions of the many cultures that form our community. Internships are encouraged to help students relate academic work to the opportunities and needs of this diverse region. Completion of one of our undergraduate majors also provides an excellent foundation for advanced work in one of the disciplines or at a professional school such as law or business.

New technologies increasingly improve our instruction and link us to the innovative industry of our region and to the educational resources of the world, but personal interaction between students and faculty is still prized within the College of Social Sciences. Capable and interesting teacher-scholars, active student clubs and small classes provide ideal environments for learning.

Special Centers

The programs of the College of Social Sciences are further enriched by educational, research and training opportunities provided by the following specialized units:
Burdick Military History Project supports the study and teaching of military history through public lectures, the Veterans Oral History Project, and a specialized collection of materials relating to military history. Contact the History Department.

Center for the Development of Recycling advances education, research and dissemination of information in various areas of recycling. Contact the Environmental Studies Department.

Center for Economic Education supports improvement in the teaching of economics through a multi-method approach and the dissemination of economics education materials. Contact the Economics Department.

East Asian Regional Materials and Resources Center provides information and counsel about studies in Asia, including library and audio-visual material available to teachers. Contact the History Department.

Sourisseau Academy promotes better understanding and appreciation of California’s state and local history, with emphasis on the history of Santa Clara Valley, through graduate scholarships and collections of historical source materials. Contact the History Department.

Teaching Credential Programs

Teacher Credential Programs - To apply to a Teacher Credential Program please see the College of Education website.

Social Science Teacher Preparation: The College of Social Science offers California Commission on Teacher Credentialing (CCTC) approved Multiple and Single Subject Social Science Teacher Preparation (SSTP) programs. Students who complete the required coursework are considered “subject matter competent” and are not required to take the California Subject Examinations for Teachers (CSET).
Facilities Unique to SJSU

Africana Center functions both as a library resource center and a community center, with the goals of scholarship, leadership, and community responsibility about and for Africana people, a term that refers to all people of African descent. The Africana Center supports and sponsors programs and scholarship specific to Africana life, history, and culture.

Art Foundry, located one mile south of campus, provides facilities for casting and fabricating large-scale sculptures in bronze, aluminum, iron and steel as well as work in stone and other materials.

Asian American Resource Center is a place to study, research, gather and connect to SJSU. Community members bridge the gap between SJSU and the rich history and contributions of Asian-Americans to this region.

Aviation Facility provides hands-on aviation operation and maintenance experience from its classroom, laboratory and hanger facility at Reid-Hillview Airport.

Biological Sciences Research Collections include entomology, herpetology, vertebrate and invertebrate museums and the Carl Sharsmith Herbarium.

The Bloomberg Lab at the Lucas College of Business houses fifteen Bloomberg Terminals providing hands-on experience with the industry standard investment research platform. Supports the investment course and finance course modules, as well as the student managed Spartan Investment Fund.

Chicano Resource Center provides a single locus for books, periodicals, reference tools, pamphlets and clippings relating to Mexican-American history, culture and community.

Electro-Acoustical Studios offer undergraduate music students access to digital synthesizers.

Engineering Laboratories are state-of-the-art, the result of a $41 million project supported by many of the nation’s leading high technology corporations.

The Hammer Theatre is a city-owned venue operated by the university. The Hammer offers dynamic, diversified performing arts, educational, and technology-related programming.

Ira F. Brilliant Center for Beethoven Studies is the only research facility and document repository in North America dedicated solely to the study of the life and performance of the works of Ludwig van Beethoven.

Phyllis Forward Simpkins International House is a large residence hall, located one block from campus, that is home to overseas and U.S. students interested in widening their international experience.

Journalism Laboratories include the newsroom and advertising offices of the Spartan Daily, the studios of television’s Update News, and the production room of the student magazine, Access, that provide applied experience in specific media.

Moss Landing Marine Laboratories provides access to the geologically and biologically important Monterey Bay Canyon and to some of the world’s richest ocean and salt marsh research areas.

Science Education Resource Materials Center makes available to student teachers educational aids for science classes, including live fauna and geological models.

Speech and Hearing Center is an on-campus multilingual audiology and speech pathology community clinic.

Timpany Center is owned by Santa Clara County and operated by the Department of Kinesiology in collaboration with other schools/departments within the College of Health and Human Sciences to provide internships/research opportunities in health and physical activity for those with disability, older populations, and the obese.
Academic Advising and Pre-Admissions Counseling

Academic Advising ensures academic success and graduation in a timely manner. Undergraduates will have two types of academic advisors: a general education academic advisor and an advisor in the major department. Both types of academic advisors assist you with selecting courses and developing a plan for fulfilling SJSU requirements or choosing major requirements.

MyProgress Report

The MyProgress Report (formerly: Academic Requirements Report), linked at your MySJSU account, allows matriculated students, advisors, and evaluators to determine what requirements a student has satisfied and what requirements are still needed. The MyProgress report matches academic requirements (university and major) against a student’s individual academic record.

The report is a valuable tool in tracking your degree requirements, as well as an advising tool to assist you and your advisor in monitoring your academic progress. You should consult with your major advisor on a regular basis.

Official verification of completion of your degree requirements will be processed by the Graduation Evaluators.

Undergraduate Admission Counseling

- No appointments are needed. Students are seen on a first-come, first-serve basis
- All applicants: use access information sent to you by the Undergraduate Admissions office.
- Apply online at [http://www.calstate.edu/apply](http://www.calstate.edu/apply) for undergraduate and graduate admission.
- Receive information on admission requirements and information on majors offered at SJSU.
- Get help with questions about the undergraduate admission process or about your admission status.
- For campus tours, by appointment only, please go to [http://www.sjsu.edu/soar](http://www.sjsu.edu/soar) or call the Welcome Center at 408-924-2786.
- Pick up campus directions and self-guided tour map.

SJSU Writing Center
The San José State University Writing Center offers a variety of resources to help students become better writers, and all our services are free for SJSU students. Our mission is to enhance the writing skills of SJSU students so they can communicate clearly in any setting (informal, academic, or professional). All our writing tutors have gone through a rigorous hiring process, and they are well trained to assist all students at all levels within all disciplines to become better writers. We accomplish this goal through offering the following services:

- tutoring appointments;
- drop-in tutoring sessions;
- online tutoring;
- one-hour workshops on various writing topics;
- numerous online resources, including videos, handouts, and a blog;
- special programming, such as writing retreats and conversation groups.

**Accessible Education Center (AEC)**

AEC facilitates the delivery and referral of services for students with disabilities. Students who register and create a confidential file with AEC can receive a wide spectrum of services based on individualized needs. AEC recommends students submit an application through MyAEC prior to registering for classes; however, students can register anytime during the semester with the AEC. Access to MyAEC can be found on AEC’s home page. Accommodations and services include, but are not limited to the following:

**Center for Accessible Technology (CAT)**

Students registered with the AEC receive individual training in the use of assistive technology and have access to an open lab located in The Center for Accessible Technology (MLK 230).

**Curriculum Accommodations**

An array of academically related services is provided on a case-by-case basis for students with verified disabilities to support curriculum requirements. Accommodations include but are not limited to: accessible technology, alternative media, notetaking, sign language interpreters and test accommodations.

**Deaf and Hard of Hearing (DHOH)**

The DHOH Program provides Educational Sign Language Interpreters or Real-Time Educational Captioners for students who are Deaf or Hard of Hearing. Eligibility for this service is determined by the Deaf and HOH Coordinator and is based in part on the professional documentation provided by the student.

**Registration Priority**

Priority registration is provided to assist students to manage their disability related limitations in consideration of their course schedule.

---

**Bursar’s Office**

**Cashiering**

- Collect payments owed to the university
- Cash, check, money order transactions, and international wire payments
- Post outside scholarship checks and alternative loans

**Account Specialists**

- Approve and disburse emergency loans
- Conduct entrance and exit interviews for Perkins Loan, Kuhlman Loan and California Dream Loan
- Provide financial counseling
• Make payment arrangements for debts owed to the university
• Process financial petitions requesting reversal of fees
• Manage third-party agreements with agencies and departments paying student fees
• Process stop payment on university-issued checks

Online Services - MySJSU
• Students can pay online by e-Check or credit card. (There is a fee to pay by credit card.)
• Sign-up for the monthly payment plan.
• Sign-up for Direct Deposit to receive electronic refunds.
• Designate an authorized user to be able to to contact the Bursar’s Office to discuss the student’s account
• Access the 1098-T tax form.

Student Accounts
• Provide student account information

Tower Card
• Provide SJSU identification cards for students
• Administers the Gold Points program

Bursar’s Office
Student Services Center
408-924-1601
www.sjsu.edu/bursar
bursar@sjsu.edu

Tower Card
• To obtain an SJSU Tower Card, students must present a valid driver’s license, state ID (issued by the DMV), passport, or other government-issued ID at the Tower Card Window located in the Student Services Center.
• Newly admitted students receive their Tower Cards during orientation after registering for classes.
• You are required to use this card as student identification to obtain services at the Event Center, Health Center, Student Services Center (including Admissions, Bursar’s, Registrar Services), Career Center, MLK Library, Santa Clara County Valley Transportation Authority (buses and light rail) as well as to obtain parking permits and other frequently used student services.
• Replacement ID cards are $5.00, Cash only.

Career Center
Preparing for the college-to-career transition starts the moment you arrive on campus. Engage with us to discover career interests, get motivated to pursue your degree, build skills and experience, and find career opportunities open only to Spartans.

Career Readiness
• Major and career exploration resources
• Personalized career coaching from master-level career counselors with industry experience to guide you on your career journey
• Strategies to build career experience through on- and off-campus roles.
• Job- and internship-search resources to help you land a great opportunity
• Graduate study preparation resources
Career Opportunities

SJSU Handshake, the job and internship database, with thousands of new opportunities posted each month for SJSU students

- Career fairs, networking events, and interviews with top employers to help you stand out from the crowd

Services are available to:

- Currently enrolled SJSU students
- SJSU alumni who purchase a Career Center annual membership

Counseling and Psychological Services (CAPS)

Professionally trained multi-culturally sensitive staff provides confidential counseling services to enrolled SJSU students. Responding to the many pressures and demands facing students at different times, CAPS offers confidential counseling, groups and workshops; crisis intervention services; resource referral and consultation; and outreach presentations. The private offices in CAPS support an atmosphere of safety and confidentiality between a counselor and a student.

Personal/Psychological Counseling

Counselors can work with you to improve your mood, decrease your anxiety, increase your skills in handling stress, improve your skills in relationships, and help you make better decisions. Our professional staff includes licensed psychologists, professional clinical counselors, social workers, marriage family therapists and advanced doctoral-level clinical trainees supervised by licensed professionals.

Educational Counseling

CAPS Educational Programs provides students with life skills that promote academic success. Our program assist students in navigating the University by informing them of SJSU resources and policies, and serving as a bridge to personal counseling to help students’ overall well-being.

Each semester, CAPS Life Skills Workshops and groups are offered to help students become more successful at SJSU. For a complete listing of these with times and dates, please see: www.sjsu.edu/counseling/students/Workshops/index.html

Outreach Service

Our professional counselors offer a variety of presentations on topics of interest to campus organizations and student groups free of charge. Outreach services also include tabling, interviews, and supportive debriefs for the campus community.

Groups

Groups are a great way for students to connect with peers, learn new skills and strategies, and grow both emotionally and educationally! We offer numerous types of groups that get students interacting and connecting to help each other.

Suicide Prevention Training

We provide learning opportunities for gaining knowledge, skill, and awareness in suicide and mental health crisis and intervention (e.g. QPR, Mental Health First Aid, and ASIST). All trainings are free and open to all SJSU members.

Counseling and Psychological Services (CAPS)

Student Wellness Center, 3rd Floor, Room 300B
408-924-5910
www.sjsu.edu/counseling
Emergency Information

Dial 911 from any on-campus or pay phone (or 408-924-2222 from mobile phones) to report a crime in progress or any life-threatening police, fire or medical emergency.

Bluelight Phones

Bluelight emergency phones are located throughout the campus grounds and inside buildings, elevators and in parking lots and garages. Bluelight phones connect to University Police 24 hours a day and can be used to report emergencies or request an evening safety escort, shuttle ride or motorist assistance. Depending on the location, Bluelight phones are activated by either pressing a call button or picking up the phone receiver.

Non-Emergency and General Information

To report crimes not in progress, general concerns or request information, contact University Police at 408-924-2222 or visit UPD in the first floor of the University Police Building 24 hours a day.

Alert-SJSU Notifications and Major Emergency Information

Alert-SJSU is the campus emergency notification system that provides information about what to do and where to go during a natural disaster or life-threatening emergency. To register or update alert settings (most students are already automatically registered), sign in to MySJSU, select Alert-SJSU and enter your contact phone numbers and e-mail addresses. For more information during a major emergency, call 408-924-SJSU and not University Police (unless you are reporting a crime in progress or a life-threatening emergency).

Financial Aid and Scholarships

The Financial Aid and Scholarships Office awards federal, state and local grants, loans and scholarships. Start by filing the federal Free Application for Federal Student Aid (FAFSA) at www.fafsa.gov. Eligible AB540 students (undocumented immigrant status) may qualify for state grant programs by completing the CA Dream Application at www.caldreamact.org. The priority deadline is March 2 of every year. You must apply every year to be considered for financial aid for the following academic year. By completing the process, we establish your financial need. Need is the difference between a typical student budget and what you and your family are expected to pay. Aid is awarded via:

Grants: Since grants generally do not have to be repaid, grants typically are awarded to undergraduate students with the greatest need. SJSU distributes the Federal Pell Grants, Federal Supplemental Educational Opportunity Grants (SEOG), Federal Teacher Education Assistance for College and Higher Education (TEACH) Grant; California Grants A, B, Middle Class Scholarship (MCS), the State Graduate Fellowship, Educational Opportunity Program (EOP), Graduate Professional Business, Ed.D Program - Educational Leadership Grant, Spartan Completion Grant and the State University Grants.

Loans: Loans can be helpful, but they must be repaid. If you must borrow, limit the amount to what you really need. It may seem nice now, but you will be repaying the funds, with interest, after you leave school. SJSU awards the following loan type: Kuhlman Loan, a loan program funded from the estate of a generous alumna. Also, loans are awarded through the federal government for the Federal Direct Stafford Subsidized and Unsubsidized Loans and Federal Plus Loans (for parents of college students). In addition, graduate students are eligible to borrow through the Federal Graduate Plus Loan Program, CA Dream Loans are available to students who complete the CA Dream Application and meet eligibility criteria.

Scholarships: Apply online at http://www.sjsu.edu/faso/Scholarships/. The Scholarship Office has information to assist you with your scholarship search.

Work Study: Rather than take loans, the Federal Work-Study program allows students to work part-time while learning job skills. There are both on-campus and off-campus job listings for qualified students.

Fee Deferrals: Once you have submitted all requested documents, a fee deferral will be assigned to your record to hold your classes and delay the payment of registration fees while your financial aid process is completed. To prevent enrollment cancellation, it is your responsibility to submit all requested documents prior to the scheduled fee payment deadline. Be sure to monitor your account at MySJSU for file status changes and “To Do” items. Financial Aid fee deferrals are temporary and are issued once all requested financial aid documents are submitted.

Financial Aid and Scholarships

Student Services Center
408-283-7500
www.sjsu.edu/faso
Financial Assistance

The following information concerning student financial assistance may be obtained from the Director of Financial Aid and Scholarships, Student Services Center, 408-283-7500:

A description of the federal, state, institutional, local, and private student financial assistance programs available to students who enroll at San José State University;

For each aid program, a description of procedures and forms by which students apply for assistance, student eligibility requirements, criteria for selecting recipients from the group of eligible applicants, and criteria for determining the amount of a student’s award;

A description of the rights and responsibilities of students receiving financial assistance, including federal Title IV student assistance programs, and criteria for continued student eligibility under each program;

The satisfactory academic progress standards that students must maintain for the purpose of receiving financial assistance and criteria by which a student who has failed to maintain satisfactory progress may reestablish eligibility for financial assistance;

The method by which financial assistance disbursements will be made to students and the frequency of those disbursements;

The terms of any loan received as part of the student’s financial aid package, a sample loan repayment schedule, and the necessity for repaying loans;

The general conditions and terms applicable to any employment provided as part of the student’s financial aid package;

The responsibility of San José State University for providing and collecting exit counseling information for all student borrowers under the federal student loan programs; and

The terms and conditions for deferral of loan payments for qualifying service under the Peace Corps Act, the Domestic Volunteer Service Act of 1973, or comparable volunteer community service.

Health Services

The Student Health Center provides quality, convenient, affordable medical care and health promotion to any registered SJSU student. Primary care is covered by your registration fees. Additional services (some laboratory tests, immunizations, procedures, pharmacy, and specialty visits) are available at a nominal fee. Contact the Student Health Center for fee information.

Student Wellness Center

The Student Wellness Center houses the Student Health Center, Counseling and Psychological Services, Wellness and Health Promotion, a pharmacy, a lactation room, and a variety of other services. Also housed within the SWC is the Student Affairs Case Manager who assists students who are in distress or crisis-see: www.sjsu.edu/sjsucares.

Housing

SJSU’s residence halls and apartments provide you with a great opportunity to transition into university life. Living on campus is a great way to connect with the academic, social, and cultural aspects of our campus. Immerse yourself in study groups, clubs, athletic events and social activities for the total on-campus living experience!

Visit the University Housing website for more information and to fill out an online application.
Housing License Agreement

University Housing Services strives to create a residential community that supports and enhances academic success, fosters the learning and development of our students, and promotes student involvement and civic engagement. As a department, our practices promote efficiency, operational effectiveness and fiscal responsibility.

Freshman On-campus Housing Requirement - http://www.housing.sjsu.edu/housingaz/freshmanoncampushousing/

Institutional Assistance

Information concerning the cost of attending San José State University is available from the Director of Budget Services, 408-924-1660, and includes tuition and fees; the estimated costs of books and supplies; estimates of typical student room, board, and transportation costs; and, if requested, additional costs for specific programs.

Information concerning the refund policies of San José State University for the return of unearned tuition and fees or other refundable portions of institutional charges is available from the Bursar’s Office, Student Services Center, 408-924-1601.

Information concerning policies regarding Federal Title IV student assistance funding and return of those funds as required by regulation is available from the Financial Aid and Scholarship Office, Student Services Center, 408-283-7500.

Information regarding facilities and services available to students with disabilities may be obtained from the Director of the Disability Resource Center, 408-924-6000.

Information concerning San José State University policies, procedures, and facilities for students and others to report criminal actions or other emergencies occurring on campus may be obtained from University Police, 408-924-2222.

Information concerning San José State University annual campus security report may be obtained from Chief, University Police, 408-924-2172.

Information concerning the prevention of drug and alcohol abuse and rehabilitation programs may be obtained from the Director of Student Health Center, 408-924-6122.
Information regarding student retention and graduation rates at San José State University and, if available, the number and percentage of students completing the program in which the student is enrolled or has expressed interest may be obtained from Graduate and Undergraduate Programs Office, 408-924-2447. Information concerning athletic opportunities available to male and female students and the financial resources and personnel that San José State University dedicates to its men’s and women’s teams may be obtained from the Director of Compliance, 408-924-1514. Information concerning teacher preparation programs at San José State University, including the pass rate on teacher certification examinations, may be obtained from Credential Services, 408-924-3541. Information concerning grievance procedures for students who feel aggrieved in their relationships with the university, its policies, practices and procedures, or its faculty and staff may be obtained from the Ombudsperson, Administration 269, 408-924-5995.

The federal Military Selective Service Act (the “Act”) requires most males residing in the United States to present themselves for registration with the Selective Service System within thirty days of their eighteenth birthday. Most males between the ages of 18 and 25 must be registered. Males born after December 31, 1959, may be required to submit a statement of compliance with the Act and regulations in order to receive any grant, loan, or work assistance under specified provisions of existing federal law. In California, students subject to the Act who fail to register are also ineligible to receive any need-based student grants funded by the state or a public postsecondary institution. Selective Service registration forms are available at any U.S. Post Office, and many high schools have a staff member or teacher appointed as a Selective Service Registrar. Applicants for financial aid can also request that information provided on the Free Application for Federal Student Aid (FAFSA) be used to register them with the Selective Service. Information on the Selective Service System is available and the registration process may be initiated online at www.sss.gov.

**Library**

The Dr. Martin Luther King, Jr. Library, an innovative collaboration that integrates the collections, services and staffs of two major institutions: The SJSU University Library and the San José Public Library is a unique learning and community center where the entire Silicon Valley Community—students, faculty, and residents—can learn for life. The combined collections include more than 1.5 million items and the building houses 33 delightful public art installations.

King Library

**one.sjsu.edu (formerly My.SJSU.edu)**

One.sjsu.edu formerly MySJSU is the primary website for important transactions between students and the campus.

- Applicants can access information sent to them by the admissions offices (Undergraduate Admissions & Outreach and GAPE) by logging in to check application status and view messages.
- Admitted and enrolled students can view their enrollment appointment start date and time for registration.
- Admitted and enrolled students can register for classes.
- Admitted and enrolled students can search for open sections of classes.
- Admitted and enrolled students can print their own class schedule.
- Admitted and enrolled students pay fees online.
- Undergraduates can view their degree progress using MyProgress.
- Continuing and former students can print grades from Spring 1991 to the present.

**ID - SJSU ID**

An SJSU ID is assigned to all students. To protect your privacy, this SJSU ID replaces the use of Social Security Number for most SJSU transactions. This number cannot be changed.

New students receive this information via admission office communications.

See SJSU ID, also Tower Card
Password

Use your password to access one.sjsu.edu on the web along with your SJSU ID. MySJSU uses your SJSUOne login information. If you have not yet set your password, you can navigate to one.sjsu.edu to MySJSU and click the Set/Reset Password button to create a password.

- New students receive this information from admission office communications.

Having trouble logging in? If you cannot reset your password using the Set/Reset Password button, please contact ithelpdesk@sjsu.edu for assistance. Include your full name, SJSU ID if known (also known as your Tower ID), date of birth, and mailing address.

IT Help Desk

The IT Help Desk provides assistance with campus software and network issues, including MySJSU, Canvas, Wi-Fi, SJSU Email, and many other applications. If you need technical assistance, start here.

408-924-1530

Operating Hours:
7:30am - 11:00pm M-Th
7:30am - 6:00pm F
ithelpdesk@sjsu.edu

Parking Permits

Parking Online Services - www.sjsu.edu/parking

Effective July 1, 2019, Parking Services at San Jose State University will start using virtual permits. Virtual permits allow you to park in your designated area without being required to display a physical permit. The license plate registered when purchasing your parking session will become your virtual parking permit. As each vehicle's license plate is used as your parking permit, license plates must be registered precisely to avoid being issued a citation. Errors in license plate registration are the responsibility of the registrant and will cause the issuance of a violation. You can register up to three vehicles on your permit. Only one vehicle is allowed on campus at a time. Paid parking session is required at all times when parking on campus. 24 hours a day, 7 days a week. License Plate Recognition (LPR) verifies parking session in all garages and lots. SJSU LPR Usage and Privacy Policy can be found at www.sjsu.edu/parking.

Benefits of Virtual Permits

- Eliminates the requirement to display physical permits and the need to move permits from vehicle-to-vehicle
- Eliminates the need to come to the Office to pick up physical permits. No More Lines!!!
- Easy to upgrade or downgrade semester or academic virtual parking permit
- Lost or stolen permits and the associated replacement fees, police reports, and processing times will be eliminated
- Your permit is active as soon as the permit effective date
- No more forgetting your permit or worrying about a permit being displayed improperly

No physical parking permit will be sold at the Bursar's Office. Student parking virtual permits are available for sale through Parking Online Services. For more information, please visit Parking Services http://www.sjsu.edu/parking, e-mail parking@sjsu.edu, or call 408-924-6556.

Student virtual permits purchased online with a credit card are active as soon as the permit effective date. For other form of payment, please contact Parking Services.

Availability

Please note that parking permits do not guarantee on-campus parking availability during peak periods (typically Monday through Thursday, 9:00 am to 12:00 pm). During peak periods, commuters are encouraged to use Transportation Alternatives (see next section) or the Park & Ride Lot located at 1281 S. 7th St.

Parking Services
University Police Building
408-924-6556
parking@sjsu.edu
Transportation Alternatives

Don’t spend your semester stuck in traffic. Visit Transportation Solutions to explore ways to make your commute more enjoyable and environmentally-friendly. Transportation Solutions provides expert advice on how to use alternative commute options such as carpooling, public transit, and bicycling to get to campus.

Associated Students Transportation Solutions

    (9th Street Plaza)
    1 Washington Square,
    SU 1800, San Jose,
    CA 95192-0129
    408-924-RIDE (7433)

Pre-Professional Study

Several sources of information and assistance are available for students who plan to enter the professions of art administration, dentistry, medicine, law, pharmacy, optometry, veterinary medicine, physical therapy, social work and theology. General information, including names and locations of faculty members who have been designated as “pre-professional” advisors, may be obtained from the appropriate academic department office. Interested students should also contact the university of their choice for information regarding the professional prerequisites for that institution. Consultants are available at the Career Center to discuss possible career paths. Application forms for admissions tests to law school, medical school and dental school are available in the Testing Office.

Student associations in pre-law, pre-medicine and pre-dentistry conduct active programs which include information about admission to professional schools, test preparation and seminars/workshops in the profession.

Pre-Law Programs

Students planning to attend law school and pursue careers in law should be aware that no major has a special advantage in preparing them to compete on the Law School Admission Test or for admission into even the most prestigious law schools. The American Bar Association emphasizes this point in its publication Law as a Career: “An undergraduate should be aware that there is no particular course of study that is required or preferred by law schools. Accordingly, students from a wide variety of majors (e.g., philosophy, physics, political science, engineering, and business) are admitted to law schools each year. There is no true prelaw curriculum. Generally, a broad-based education that is rigorous and that stresses analytical and verbal communication skills will be useful.” Students with undergraduate degrees in the humanities and the arts as well as the social, health, and natural sciences are consistently successful in achieving competitive scores on the LSAT and in obtaining admission to law schools of distinction.

However, students should keep in mind that successful pursuit of a career in law depends on skills acquired only through particular kinds of courses. The Law School Admission Council’s Official Guide to U.S. Law Schools explains: “While no single curricular path is the ideal preparation for law school, you should choose courses that sharpen analytical reasoning and writing skills. Law schools prefer students who can think, read, and write well, and who have some understanding of what shapes human experience.”

Students considering careers in law should consult regularly with a pre-law faculty advisor. The number and kind of courses that prepare students for law can be offered by a variety of departments. It is therefore important that students consult with a faculty member familiar with the curricular choices that best align student aspirations with law school expectations. A faculty advisor can also provide valuable information concerning law school and law careers that will not be acquired through any set of courses. The following departments offer pre-law advising: Justice Studies, Philosophy, Political Science. A further resource for students considering a career in law is the Law School Advisor provided by Student Services.

Pre-Medical Programs

Medical schools do not require any specific major. While many applicants major in biology or biochemistry, the admission rate is quite good for non-science majors because these graduates will have shown strength in two academic areas. At a minimum, applicants must complete during their college years two years of major chemistry with lab, physics with lab, math through calculus, one year of English composition, and one year, preferably two, of biology with lab.

Students interested in any medical field should get as much hands-on experience as possible volunteering or working in medical settings so that they fully understand how physicians and other health professionals spend their time. There are pre-medical advisors in Biological Sciences and in Chemistry; consult them early and often.
Service Learning

In March 2000, the California State University Board of Trustees passed a landmark resolution in response to a request from the governor for a community service requirement for all students in California’s public institutions of higher education. The CSU Board of Trustees’ resolution called for the chancellor and each CSU president to “ensure that all students have opportunities to participate in community service, service learning (deemed academically appropriate by faculty), or both.”

To learn more about general education service learning classes, courses in your major, or other service-based leadership opportunities for students, contact the Center for Community Learning and Leadership.

Center for Community Learning and Leadership
Clark Hall 203
408-924-3540

Student Government

Associated Students, SJSU, was founded in 1897 to provide representation and services to students at San José Teachers College. Since then, the organization has evolved from a student club to a fully operational student government entity. Also, as an auxiliary to the University, we provide services that allow students to enhance their college experience.

Originally, voluntary fees were first collected in 1910 to provide services and activities. By 1957, all students were paying a portion of their registration fees to support their student government organization.

Associated Students was incorporated in 1980 and the Student Council also became the Corporation’s Board of Directors.

Review our website for more information and policies related to services provided: http://as.sjsu.edu/

Student Organizations

With over 400 student organizations at SJSU, getting involved is the best way to connect with campus life! For more information on department programs and services, please visit our website at: http://www.sjsu.edu/getinvolved/recognized-student-orgs/

Study Abroad and Away Programs

Study Abroad and Away contributes to the internationalization of San José State University by providing students the opportunity to study abroad on longterm programs (Exchange Programs, CSU International Programs, and International Student Exchange Programs) and short-term programs (Faculty-Led Programs and Summer School Abroad Programs) for academic credit, offering Alternative Spring Break Programs for cultural immersion, and designing other globally focused opportunities. Through these channels, we seek to cultivate a diverse global community through international and domestic academic opportunities and partnerships.

CSU International Programs

CSU International Programs provide students an affordable opportunity to study abroad for a full academic year. Students earn SJSU credit at their CSU campuses while they study at a host university or study center abroad. Affiliated with more than 30 recognized universities in 18 countries, CSU IP offers a wide selection of courses and study abroad destinations. SJSU students participating in CSU IP pay SJSU tuition, and financial aid applies to all programs. Scholarship opportunities are also available! Additional program information and application instructions can be found at www.csuip.calstate.edu.

Australia
- Griffith University (Brisbane)
- Macquarie University (Sydney)
- Queensland University of Technology (Brisbane)
- University of Queensland (Brisbane)
- Western Sydney University

Canada
- Concordia University (Montréal)
Students participating in CSU IP pay CSU tuition and program fees, and are responsible for airfare, accommodations, meals and other personal expenses. Financial aid, with the exception of Federal Work-Study, is available to qualified students and limited scholarship opportunities are also available. All programs require students to maintain good academic and disciplinary standing; many programs are open to sophomores or graduate students. California Community College transfer students are eligible to apply (to select programs) directly from their community colleges. Students must possess a current cumulative grade point average of 2.75 or 3.0, depending on the program, and must fulfill all coursework prerequisites. Additional program information and application instructions can be found on our website at www.calstatele.edu/ip.
International Student Exchange Programs (ISEP)

SJSU is a member of ISEP, a non-profit organization that offers study abroad options at over 200 universities in 51 countries. Study with ISEP for an academic year, a semester, or a summer! Immerse yourself in classes at local universities and receive SJSU credits for each course. If you are interested in studying abroad in a place that is off the beaten path, ISEP has the program for you!

SJSU Faculty-Led Programs (FLP) & Summer School Abroad (SSA)

SJSU Faculty-Led Programs and Summer School Abroad programs are 1-8 week study abroad programs that take place domestically and abroad during the summer or winter sessions. FLPs are led by an SJSU faculty member and SSA programs offer direct placement into a partner university’s summer school abroad for a short-term program. Both experiences provide students the opportunity to earn SJSU credit while participating in a global experience.

California State University (CSU)

Welcome to the California State University (CSU) - the world’s largest comprehensive higher education system in the nation with 23 unique campuses serving approximately 481,000 students with more than 52,000 faculty and staff. Each year, the University awards more than 125,000 degrees. CSU graduates are serving as leaders in the industries that drive California’s economy, including business, agriculture, entertainment, engineering, teaching, hospitality and healthcare. Learn more at www.calstate.edu.

A Tradition of Excellence for More than Five Decades

Since 1961, the CSU has provided an affordable, accessible, and high-quality education to more than 3.7 million graduates throughout California. While each campus is unique based on its curricular specialties, location and campus culture, every CSU is distinguished for the quality of its educational programs. All campuses are fully accredited, provide a high-quality broad liberal educational program and offer opportunities for students to engage in campus life through the Associated Students, Inc., clubs and service learning. Through leading-edge programs, superior teaching and extensive workforce training opportunities, CSU students graduate with the critical thinking skills, industry knowledge and hands-on experience necessary for employment and career advancement.

Facts

- In 2016-17, the CSU received $590 million in research and education grants and contracts by federal, state and regional agencies.
- Today, one of every 20 Americans with a college degree is a CSU graduate.
- One in every 10 employees in California is a CSU alumnus.
- The CSU awards 45 percent of the bachelor’s degrees earned in California.
- Almost half of all the nurses in the state earn their degrees from the CSU.
- The CSU awards 95 percent of the hospitality/tourism degrees in the state.
- Nearly half of all of the state’s engineers earn their degrees from the CSU.
- The CSU is the leading provider of teacher preparation programs in the state.
- The CSU offers more than 100 fully online and 129 hybrid degree programs and concentrations.
- The CSU offers over 3,800 online courses per term, providing more educational options to students who may prefer an online format to a traditional classroom setting.
- The CSU’s online concurrent enrollment program gives students the ability to enroll in courses offered by other campuses in the CSU.
- Over a recent four year period, the CSU has issued nearly 50,000 professional development certificates in education, health services, business and technology, leisure and hospitality, manufacturing, international trade and many other industries.
- Nearly half of the CSU’s 481,000 students are engaged in some type of community service, totaling 32 million hours of service annually.
- More than 13,000 students participate in STEM (science, technology engineering and mathematics) service-learning courses.
- For every $1 that the state invests in the CSU, the University generates $5.43 for California’s Economy.

Governance

The CSU is governed by the Board of Trustees, most of whom are appointed by the governor and serve with faculty and student representatives. The CSU Chancellor is the chief executive officer, reporting to the Board. The campus presidents serve as the campus-level chief executive officers. The Trustees, Chancellor and presidents develop systemwide educational policy. The presidents, in consultation with the CSU Academic Senate and other campus stakeholder groups, render and implement local policy decisions.

CSU Historical Milestones

The individual California State Colleges were established as a system with a Board of Trustees and a Chancellor in 1960 by the Donahoe Higher Education Act. In 1972, the system was designated as the California State University and Colleges, and in 1982 the system became the California State Universit. Today, the CSU is comprised of 23 campuses, including comprehensive and polytechnic universities and, since July 1995, the California Maritime Academy, a specialized campus.

The oldest campus-San José State University-was founded in 1857 and became the first institution of public higher education in California. The newest-CSU Channel Islands-opened in fall 2002, with freshmen arriving in fall 2003.
In 1963, the CSU’s Academic Senate was established to act as the official voice of CSU faculty in systemwide matters. Also, the California State College Student Presidents Association—which was later renamed the California State Student Association—was founded to represent each campus student association on issues affecting students.

Through its many decades of service, the CSU has continued to adapt to address societal changes, student needs and workforce trends. While the CSU’s core mission has always focused on providing high-quality, affordable bachelor’s and master’s degree programs, over time the university has added a wide range of services and programs to support student success – from adding health centers and special programs for veterans to building student residential facilities to provide a comprehensive educational experience.

To improve degree completion and accommodate students working full- or part-time, the educational paradigm was expanded to give students the ability to complete upper-division and graduate requirements through part-time, late afternoon, and evening study. The university also expanded its programs to include a variety of teaching and school service credential programs, specially designed for working professionals.

The CSU marked another significant educational milestone when it broadened its degree offerings to include doctoral degrees. The CSU independently offers Doctor of Education (Ed.D), Doctor of Physical Therapy (DPT), Doctor of Audiology (AuD) and Doctor of Nursing Practice (DNP) degree programs. A limited number of other doctoral degrees are offered jointly with the University of California and private institutions in California.

In 2010, in an effort to accommodate community college transfer students, the CSU, in concert with the California Community Colleges (CCC), launched the Associate Degree for Transfer (ADT), which guarantees CCC transfer students with an ADT admission to the CSU with junior status. ADT has since proven to be the most effective path to a CSU for transfer students.

Always adapting to changes in technology and societal trends to support student learning and degree completion, the CSU achieved another milestone in 2013, when it launched CalState Online, a systemwide collection of services that support the delivery of fully online programs from campuses. Now, full-time students have access to fully online courses offered at other CSU campuses.

By providing an accessible, hands-on education that prepares graduates for career success, the CSU has created a network of alumni that is so extensive and renowned that it spans across the globe. As of 2018-19, more than 3.7 million CSU alumni are making a difference in the lives of the people of California and the world.

The CSU strives to continually develop innovative programs, services and opportunities that will give students the tools they need to meet their full potential. In 2016, the university launched Graduation Initiative 2025, a bold plan to support students, increase the number of California’s graduates earning high-quality degrees and eliminate achievement and equity gaps for all students. Through this initiative, the CSU is ensuring that all students have the opportunity to graduate according to their personal goals, positively impacting their lives, families and communities. The CSU is committed to providing a quality higher education that prepares students to become leaders in the changing workforce.

**CSU Trustees**

**Ex Officio Trustees**

- The Honorable Gavin Newsom
  - Governor of California
- The Honorable Eleni Kounalakis
  - Lieutenant Governor of California
- The Honorable Anthony Rendon
  - Speaker of the Assembly
- The Honorable Tony Thurmond
  - State Superintendent of Public Instruction
- Dr. Timothy P. White
  - Chancellor of the California State University

**Officers of the Trustees**

- The Honorable Gavin Newsom
  - President
- Adam Day
  - Chair
- Lillian Kimbell
  - Vice Chair
- Andrew Jones
  - Secretary
- Steve Relyea
  - Treasurer
Appointed Trustees

Appointments are for a term of eight years, except student, alumni, and faculty trustees whose terms are for two years. Terms expire in the year in parentheses. Names are listed alphabetically.

Silas Abrego (2021)

</table>
Credit Hour

As of July 1, 2011 federal law (Title 34, Code of Federal Regulations, sections 600.2 and 600.4) requires all accredited institutions to comply with the federal definition of the credit hour. For all CSU degree programs and courses bearing academic credit, the “credit hour” is defined as the “amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time; or
2. At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution, including laboratory work, internships, practice, studio work, and other academic work leading to the award of credit hours.”

A credit hour is assumed to be a 50-minute period. In courses in which “seat time” does not apply, a credit hour may be measured by an equivalent amount of work, as demonstrated by student achievement.
Legalese

Although every effort has been made to assure the accuracy of the information in this catalog, students and others who use this catalog should note that laws, rules, and policies change from time to time and that these changes may alter the information contained in this publication. Changes may come in the form of statutes enacted by the Legislature, rules and policies adopted by the Board of Trustees of the California State University, by the Chancellor or designee of the California State University, or by the President or designee of the campus. It is not possible in a publication of this size to include all of the rules, policies and other information that pertain to students, the institution, and the California State University. More current or complete information may be obtained from the appropriate department, school, or administrative office.

Nothing in this catalog shall be construed as, operate as, or have the effect of an abridgment or a limitation of any rights, powers, or privileges of the Board of Trustees of the California State University, the Chancellor of the California State University, or the President of the campus. The Trustees, the Chancellor, and the President are authorized by law to adopt, amend, or repeal rules and policies that apply to students. This catalog does not constitute a contract or the terms and conditions of a contract between the student and the institution or the California State University. The relationship of the student to the institution is one governed by statute, rules, and policy adopted by the Legislature, the Trustees, the Chancellor, the President and their duly authorized designees.

The annual update of SJSU policies is recommended as an up-to-date source of information on course offerings, general education, registration procedures, schedule of fees and other pertinent information on policies and procedures.

Information is subject to change.

The San José State University Policies and Procedures information is coordinated by the Office of Graduate and Undergraduate Programs and Enrollment Services.

Non-Discrimination Policy and Complaint Procedures

The CSU and San José State University does not discriminate on the basis of age, genetic information, marital status, medical condition, nationality, race or ethnicity (including color and ancestry), religion (or religious creed), and veteran or military status - as these terms are defined in CSU policy - in its programs and activities, including admission and access. Federal and state laws, including Title VI of the Civil Rights Act of 1964 and the California Equity in Higher Education Act, prohibit such discrimination. The Office of Diversity, Equity and Inclusion has been designated to coordinate the efforts and comply with all applicable federal and state laws prohibiting discrimination on these bases. Questions regarding this policy should be directed to the Office of Diversity, Equity and Inclusion, 408-924-8168.

Protected Status: Disability

The California State University does not discriminate on the basis of disability (physical and mental) - as this term is defined in CSU policy - in its programs and activities, including admission and access. Federal and state laws, including sections 504 and 508 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, prohibit such discrimination. Each campus has been designated to coordinate the efforts to comply with all applicable federal and state laws prohibiting discrimination on the basis of disability. Inquiries concerning compliance may be presented to this person at [campus address and phone number]. CSU Executive Order 1097 Revised October 5, 2016 (http://www.calstate.edu/EO/EO-1097-rev-10-5-16.pdf) (or any successor executive order) is the systemwide procedure for all complaints of discrimination, harassment or retaliation made by students against the CSU, a CSU employee, other CSU students or a third party. All San José State University classes are wheelchair accessible. If you have other needs regarding accommodations, please contact the Accessible Education Resource Center. Telephone: 408-924-6000; TTY 408-924-5990; Fax: 408-924-5999.

Campus Safety Statistics

A campus safety report is available at www.sjsu.edu/police/crime_reporting/safety_report/ or by calling 408-924-2172.

CSU Executive Order 1097 (http://www.calstate.edu/EO/EO-1097.pdf) is the systemwide procedure for all complaints of discrimination, harassment or retaliation made by students against the CSU, a CSU employee, other CSU students or a third party.

Aerospace Engineering Department Courses

AEROSPACE ENGINEERING

LOWER DIVISION

AE 015. Air & Space Flight: Past, Present, and Future
Introduction to the history, basic principles, current and future developments of the aerospace engineering field through projects, guest speakers and field trips.
Normal Grade Rules
1 unit

AE 020. Computer-Aided Design for Aerospace Engineers
The course provides an introduction to the fundamentals of drafting and computer-aided design with applications in aircraft and spacecraft design.
Misc/Lab: Lecture 2 hours/Lab 3 hours
Normal Grade Rules
2 units

AE 030. Computer Programming for Aerospace Engineers
C language: Variables, data types, operators, functions, modular programming, input/output sequence, pointers and memory addressing, external libraries, dynamic memory allocation, MATLAB: Variables, scripts, operations, visualization, plotting and programming. Equation solving and curve fitting. Symbols, Simulink and I/O building block.
Misc/Lab: Lecture 1 hours/Lab 3 hours
Normal Grade Rules
2 units

AE 100. Fundamentals of Aerospace Engineering
Introduction to the fundamental disciplines and concepts of aerospace engineering and in particular of aerodynamics, aerospace structures, stability and control, propulsion, and flight mechanics. Prerequisites: MATH 30, PHYS 50, and ENGR 10 all with C or better
Normal Grade Rules
3 units

AE 110. Space Systems Engineering
Introduction to design, analysis and operation of spacecraft power, communications, attitude determination/control, structures, propulsion, and thermal management systems. Typical payload systems design and operation, including remote Earth sensors. System integration issues. Lab experiments and field trips.
Prerequisite: AE 105 with a grade of 'C-' or better.
Misc/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

AE 112. Aerospace Structural Analysis I
Prerequisites: MATH 32, PHYS 50 or Graduate Standing.
Corequisites: MATE 25, Engr 100W OR Graduate Standing
Normal Grade Rules
4 units

AE 114. Aerospace Structural Analysis II
Prerequisite: AE 112 or Graduate Standing
Corequisites: ENGR 100W
Normal Grade Rules
4 units

AE 135. Introduction to Composite Materials
See MATE 135.
Normal Grade Rules
3 units

AE 138. Vector-Based Dynamics for Aerospace Applications
Prerequisite: C- or better in Math 32 and Physics 50
Corequisites: AE 112
Normal Grade Rules
3 units

AE 140. Rigid Body Dynamics
Coordinate frames and descriptions of absolute and relative motion. General equations of rotational motion for single and multibody systems in Euler and Lagrangian formulations. Elasticity and dissipation effects. Spinning body motions. Impulsive motions. Applications to aerospace vehicles.
Prerequisite: C- or better in AE 138 OR Graduate Standing
Normal Grade Rules
3 units

AE 142. Astrodynamics
Two-body problem analysis and orbit design; Kepler’s Laws; Single-impulse orbit transfers; Hohmann transfers; Circularization; Plane changes; Kepler’s Equation; Planetary sphere of influence; Vector mechanics and relative motion of interplanetary flight; Patched conic trajectory model; Gravity-assist trajectories; Case studies; Restricted three-body problem.
Prerequisite: AE 138, AE 165
Normal Grade Rules
3 units

AE 157. Aerospace Automatic Control Systems Design
Prerequisite: Math 129A, Math 133A, AE 138 w. a grade of “C-” or better in each. Or Graduate Standing
Normal Grade Rules
3 units

AE 160. Aerodynamics I
Prerequisites: MATH 032, PHYS 050 (with a grade of ‘C-' or better in each) or graduate standing.
Corequisite: ENGR 100W
Normal Grade Rules
3 units

AE 162. Aerodynamics II
Two-dimensional and three-dimensional, incompressible and compressible potential flow theory. Airfoil and wing theory for subsonic, supersonic, and hypersonic flows. Flow visualization in a water tunnel. Lift and drag measurements in a subsonic wind tunnel.
Prerequisite: Allowed Declared Majors: Aerospace Engineering, Mechanical Engineering. ENGR 100W, MATH 133A, AE 160 or ME 111 (with a grade of ’C-’ or better in each). Or Graduate Standing.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

AE 164. Aerothermodynamics
Prerequisite: PHYS 052 and AE 160 with a grade of ’C-’ or better in each, or graduate standing
Normal Grade Rules
5 units
AE 165. Aerospace Flight Mechanics
Trajectory dynamics of atmospheric flight (aircraft and missiles) and spaceflight (orbital mechanics). Influence of vehicle design on trajectory. Aircraft static performance, stability and control. Rocket launch and re-entry dynamics. Computer simulations.
Prerequisite: AE 138 or graduate standing
Normal Grade Rules
3 units

AE 166. Rocketry
Introduction to rocketry through theory, computer simulations, and development/launch of an amateur level rocket. Topics include basic principles of aerodynamics, vehicle structures, rocket propulsion, flight mechanics, avionics, as well as past and current launch vehicle technologies.
Prerequisite: PHYS 50, AE 165
Normal Grade Rules
3 units

AE 167. Aerospace Propulsion
Basic one-dimensional flows: isentropic, area change, heat addition. Overall performance characteristics of propellers, ramjets, turbojets, turbofans, rockets. Performance analysis of inlets, exhaust nozzles, compressors, burners, and turbines. Rocket flight performance, single-/multi-stage chemical rockets, liquid/solid propellants and design problems.
Prerequisite: AE 160 and AE 164 with a grade of 'C-' or better in each. Allowed Declared Majors: Engineering, Aerospace Engineering, Mechanical Engineering.
Normal Grade Rules
3 units

AE 168. Aerospace Vehicle Dynamics and Control
Prerequisite: AE 140, AE 157, AE 165 and Math 129A with a grade of 'C-' or better in each. Allowed Declared Majors: Aerospace Engineering,or Graduate Standing.
Normal Grade Rules
3 units

AE 169. Computational Fluid Dynamics
Prerequisite: MATH 129A, AE 160 with a grade of 'C-' or better in each. Graduate Standing.
Normal Grade Rules
3 units

AE 171A. Aircraft Design I
First course in a two-semester sequence, in which students work in teams to complete the conceptual and preliminary design of an aircraft. Students are challenged to consider the relationship of aerospace engineering to the broader community.
Prerequisites: Must be senior in good standing with C or better in AE 20, AE 162, AE 165, ENGR 100W. Passage of the Writing Skills Test (WST) or ENGL/LDD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Allowed Declared Major: Aerospace Engineering or Graduate Standing.
Pre/Corequisite: AE164, AE168, ENGR 195A
Misc/Lab: Lab 9 hours
Note: Meets GE Areas S and V when course is taken in combination with: AE 171B, ENGR 195A and ENGR 195B. All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

AE 171B. Aircraft Design II
Second course in a two-semester sequence, in which students work in teams to complete the conceptual and preliminary design of an aircraft. Students are challenged to consider the relationship of aerospace engineering to the broader community. GE Area: V when taken with AE Major option sequence.
Prerequisite: AE 171 and ENGR 195A with a grade of 'C' or better in each, senior standing or graduate level standing.
Co-requisite: AE 167, AE 169, and ENGR 195B.
Note: Meets GE areas S and V when course is taken in combination with: AE 171A, ENGR 195A and ENGR 195B.
Normal Grade Rules
GE: V
3 units

AE 172A. Spacecraft Design I
First course in a two-semester sequence in which students work in teams to complete the conceptual and preliminary design of a spacecraft. Students are challenged to consider the relationship of aerospace engineering to the broader community. GE Area: S when taken with AE major option sequence.
Prerequisites: Must be senior in good standing with C or better in AE20, AE162, AE165, ENGR 100W. Or graduate level. Passage of the Writing Skills Test (WST) or ENGL/LDD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Pre/corequisite: AE164, AE168, ENGR 195A
Misc/Lab: Lab 9 hours
Note: Meets GE Areas S and V when course is taken in combination with: AE 172B, ENGR 195A and ENGR 195B. All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

AE 172B. Spacecraft Design II
Second course in a two-semester sequence, in which student teams complete the conceptual, preliminary, and detail design of a spacecraft. Projects integrate general education (GE) student learning outcomes including the relationship of aerospace engineering to the broader community both in the U.S. and worldwide, ethics, safety and liability issues, as well as issues of culture, civilization and global understanding in relationship to aerospace engineering practice. GE Area: V when taken with AE major option sequence.
Prerequisites: AE 172A, ENGR 195A with a grade of 'C' or better, senior in Good Standing or Graduate standing.
Corequisite: AE 167, AE 169 and ENGR 195B.
Note: Meets GE Areas S and V when course is taken in combination with: AE 172A, ENGR 195A and ENGR 195B.
Normal Grade Rules
GE: V
3 units

AE 173. Design of Unmanned Aerial Vehicles
Conceptual and preliminary design of autonomous aerial vehicles (UAVs). Review of low Reynolds number fixed and rotary wing aerodynamics, with a focus on wing and rotor design. Vehicle dynamics and control, flight path planning and optimization, control system design.
Normal Grade Rules
3 units

AE 180. Individual Studies
Individual work on special topics. By arrangement.
Prerequisite: Upper division standing and instructor consent. Not available to Open University Students.
Repeatable for credit
Normal Grade Rules
1-3 units

AE 199. Special Topics in Aerospace Engineering
Special topics that are currently of interest to industry and academia. Content varies from semester to semester.
Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
1-4 units

GRADUATE
AE 200. Engineering Analysis and Control of Aerospace Systems
Engineering analysis and control; linear algebra; ordinary differential equations; Laplace transformation; complex analysis; singular values; matrix perturbations; state-space models; input/output and robust stability; reachability and observability; feedback stabilization; H2 and H-infinity optimization.
Prerequisite: Graduate Standing or Instructor Consent
Normal Grade Rules
3 units
AE 210. Advanced Space Systems Engineering
Overview of the engineering process used in aerospace mission and system design spanning the entire system life cycle for the near-Earth and outer space environment. Effects of gravity field, temperature and radiation on physical systems and the human organism. Mission program inception, proposal development, cost analysis and risk management.
Prerequisites: BSAE or Instructor Consent
Normal Grade Rules
3 units

AE 242. Orbital Mechanics and Mission Design
Prerequisite: BSAE or Instructor Consent.
Normal Grade Rules
3 units

AE 243. Advanced Astrodynamics
Analysis of spacecraft motion using different dynamic models and perturbations. Use of the state transition matrix and differential corrections technique for trajectory computation. Orbit determination and station-keeping methods. Introduction to the three-body problem. Application of computational and analytic methods to solve astrodynamics problems.
Prerequisite: AE 242.
Normal Grade Rules
3 units

AE 245. Spacecraft Dynamics and Control
Prerequisite: BSAE or Instructor Consent.
Normal Grade Rules
3 units

AE 246. Advanced Aircraft Stability and Control
Natural longitudinal and lateral/directional motion of aircraft; mode shapes, eigenvalues, eigenvectors. Analysis and synthesis of various aircraft autopilots using classical and state space formulations.
Prerequisite: BSAE or Instructor Consent.
Normal Grade Rules
3 units

AE 250. Advanced Structures and Materials
Design and analysis of modern flight structures including static and dynamic structural response; materials design including metals, alloys, composites. Introduction to modern computational methods including finite elements.
Prerequisite: BSAE or Instructor Consent.
Normal Grade Rules
3 units

AE 262. Advanced Aerodynamics
Prerequisite: BSAE or Instructor Consent.
Normal Grade Rules
3 units

AE 264. Gas Dynamics
Advanced topics in compressible flow theory with emphasis on the design of high subsonic, supersonic and hypersonic vehicles. In addition to classical compressible flow theory and problem solving, the course may include supersonic wind tunnel experiments and computer simulations.
Prerequisite: Graduate standing in AE/ME or instructor consent.
Normal Grade Rules
3 units

AE 267. Space Propulsion Systems
Rocket propulsion fundamentals. Propulsion requirements for: multi-stage launch; orbit establishment, maneuver and maintenance; spacecraft attitude control. Nozzle flow, thermochromatic calculation of performance. Design and performance calculations for systems and components of chemical rockets (liquid, solid, hybrid), electric rockets and advanced concepts.
Prerequisite: BSAE or Instructor Consent. Allowed Declared Majors: Aerospace Engineering, Mechanical Engineering.
Normal Grade Rules
3 units

AE 269. Advanced Computational Fluid Dynamics
Advanced topics in computational fluid dynamics and numerical techniques to solve the Euler and Navier-Stokes equations. The student will use MatLAB, grid generation, CFD and visualization software for homework and projects.
Prerequisite: BSAE or Instructor Consent.
Misc/Lab: Seminar 2 hours/lab 3 hours.
Normal Grade Rules
3 units

AE 271. Advanced Aircraft Design
Project course in which students complete the preliminary design of an airplane of their choice. The design process involves defining the mission requirements, weight sizing, performance sizing, fuselage design, wing, high-lift system and lateral controls design, landing gear design, weight and balance, stability and control, drag polars, and final drawings. Final report includes discussion of environmental, economic and safety considerations for the airplane.
Prerequisite: Graduate Standing in AE/ME or instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE: GWAR
3 units

AE 273. Aircraft Subsystems
Aircraft subsystem analysis and design: flight controls; avionics and electrical systems; cabin systems; landing gear and other mechanical systems; systems safety analysis.
Prerequisite: Graduate Standing or instructor consent
Normal Grade Rules
3 units

AE 280. Hypersonics and Reentry Systems
Fundamental principles of hypersonic aerodynamics. Development of important theory and techniques, discussion of salient results with emphasis on physical aspects, and presentation of modern thinking on the subject.
Prerequisite: Graduate Standing or instructor consent
Normal Grade Rules
3 units

AE 295A. Aerospace Engineering Masters Project I
This is a first-semester aerospace engineering Master’s Project supervision course. Students perform original, graduate level research or design or development, involving aerospace systems under the supervision of an aerospace engineering faculty member or engineers from NASA/aerospace industry.
Prerequisite: Admission to candidacy for the master’s degree and a written proposal approved by instructor and graduate advisor. Not available to Open University Students.
Normal Grade Rules
3 units
AE 295B. Aerospace Engineering Masters Project II
This is a second-semester aerospace engineering Master’s Project supervision course, following AE295A. Students perform original, graduate level research and/or design and/or development, involving aerospace systems or subsystems under the supervision of an aerospace engineering faculty member and/or engineers from NASA/aerospace industry.
Prerequisite: A grade of “B” or better in AE295A
  - Normal Grade Rules
  - 3 units

AE 297. Special Topics in Aerospace Engineering
Special topics that are currently of interest to industry and academia. Content varies from semester to semester. Repeatable for up to six units.
Prerequisite: Graduate Standing or instructor consent
  - Repeatable for credit
  - Normal Grade Rules
  - 1-4 units

AE 298. Special Projects in Aerospace Engineering
Advanced individual work in Aerospace Engineering.
Prerequisite: Instructor consent. MATH 129A, AE 160 with a C- or better, or Graduate Standing.
  - Repeatable for credit
  - Mandatory CR/NC/RP
  - 1-3 units

Master’s thesis work in aerospace engineering.
Participation in a teaching experience.
Prerequisite: Grade of “B” or better in 1st sem. to continue in 2nd sem.
  - Repeatable for credit
  - Mandatory CR/NC/RP
  - 3 units

UPPER DIVISION

AE 1290R. Culminating Experience Supervision
Continued work on thesis or project beyond minimum required units, for cases in which final deliverables are still in progress.
Prerequisite: RP grade in a preceding thesis or project semester.
Note: No Degree Credit.
  - Repeatable for credit
  - No Degree Credit
  - 1 unit
**Aerospace Studies Department (Air Force ROTC) Courses**

**AEROSPACE STUDIES**

### LOWER DIVISION

**AS 001A. The Foundation of the United States Air Force**
Introduces students to the Air Force and AFROTC with an overview of basic characteristics, missions, and organization of the Air Force; additional topics include officership and professionalism, career opportunities, military customs and courtesies, and an introduction to communications skills.

Notes: Year course. Enrollment in leadership lab required.
1 unit

**AS 001B. The Foundation of the United States Air Force**
Introduces students to the Air Force and AFROTC with an overview of basic characteristics, missions, and organization of the Air Force; additional topics include officership and professionalism, career opportunities, military customs and courtesies, and an introduction to communications skills.

Notes: Year course. Enrollment in leadership lab required.
1 unit

**AS 002A. The Evolution of USAF Air and Space Power**
Examines general aspects of air and space power through historical study and analysis and provides the student with a knowledge level understanding of the capabilities, function and doctrinal employment of aerospace forces; emphasizes development of oral and written communication skills.

Notes: Year course. Enrollment in leadership lab required.
1 unit

**AS 002B. The Evolution of USAF Air and Space Power**
Examines general aspects of air and space power through historical study and analysis and provides the student with a knowledge level understanding of the capabilities, function and doctrinal employment of aerospace forces; emphasizes development of oral and written communication skills.

Notes: Year course. Enrollment in leadership lab required.
1 unit

### UPPER DIVISION

**AS 131A. Air Force Leadership Studies**
Study of leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills; develops application level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion.

Prerequisite: AS 1A and AS 1B, AS 2A and AS 2B, or as determined by department chair.
Notes: Year course. Enrollment in Leadership lab required.
Normal Grade Rules
3 units

**AS 131B. Air Force Leadership Studies**
Study of leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills; develops application level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion.

Prerequisite: AS 1A and AS 1B, AS 2A and AS 2B, or as determined by department chair.
Notes: Year course. Enrollment in Leadership lab required.
Normal Grade Rules
3 units

**AS 141A. National Security Affairs**
Examines the national security process, international and regional relations, advanced leadership ethics, and Air Force doctrine with focus on the military as a profession, officership, military justice, civilian control of the military and current issues affecting military professionalism.

Pre/Corequisite: AS 131A.
Notes: Enrollment in leadership lab required.
Normal Grade Rules
3 units

**AS 141B. Preparation for Active Duty**
Studies the role of the Air Force officer in contemporary society with emphasis on knowledge, comprehension, and application of skills needed to facilitate a smooth transition from civilian to military life.

Pre/Corequisite: AS 131B.
Notes: Enrollment in leadership lab required.
Normal Grade Rules
3 units
African American Studies

Department Courses

AFRICAN AMERICAN STUDIES

LOWER DIVISION

AFAM 002A. African Americans and the Development of America's History and Government
Major events in America's development, emphasizing African Americans' relationship to government and other basic institutions. GE Area: D2
Note: Must complete the entire sequence (AFAM 2A and 2B) to satisfy U.S. History, U.S. Constitution and California Government (US1,2,3).
Normal Grade Rules
GE: D2
3 units

AFAM 002B. African Americans and the Development of America's History and Government
Major events in America's development, emphasizing African Americans' relationship to government and other basic institutions. GE Area: D3, meets additional GE Areas when taken with AFAM 2A
Prerequisite: AFAM 2A
Note: Must complete the entire sequence (AFAM 2A and 2B) to satisfy U.S. History, U.S. Constitution and California Government (US1,2,3).
Normal Grade Rules
GE: M7
3 units

AFAM 022. The Humanities in African-American Culture
Analysis of several of the most important African-American creative art forms and personalities. Special attention to Black contributions in music, literature, cinema, photography and painting.
Normal Grade Rules
3 units

AFAM 025. The Changing Majority: Power and Ethnicity in America
See CCS 025.
Normal Grade Rules
GE: D2
3 units

AFAM 040. African Origins
Ancient African civilizations to the advent of the slave trade. Folklore and mythology manifested in ceremonies, rituals and rhythmic movements are examined.
Repeatable for credit
Normal Grade Rules
3 units

AFAM 100W. Writing Workshop
Development of advanced writing skills through study of principal techniques of communication in the Black community related to Black music, literature and politics. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: Must be passed with "C or better" to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE: Z
3 units

AFAM 102. African-American Music
Analysis of styles and techniques of major traditions in Black music. Development of music from slave work-a-day songs to rhythm and blues and modern jazz, 1950's to the present.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 105. Health, Justice, and the Black Experience
A review of the health and health-related issues of Blacks/African Americans within the U.S. Major disease health trends are discussed as by-products of the interaction of biological, cultural, economic and social forces in the U.S.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 106. Race and Culture in the African Diaspora
Examination of the role of race and ethnicity amongst persons of African descent i.e., the role race and ethnicity plays in primary and secondary relationships amongst Blacks and between Black and non-Black peoples.
Normal Grade Rules
3 units

AFAM 110. Education of the Black Child
Analysis of economic, sociocultural and educational issues that affect Black students. Emphasis directed at elementary and secondary school systems.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 111. African Nations: History, Politics, and Culture
Examination, exploration, and analysis of societies, history, and culture of nations on the African continent over time.
Normal Grade Rules
3 units

AFAM 112. African Immigrant Communities in the U.S.
An overview of Black immigrants from the African continent in the United States from 1970 to the present.
Normal Grade Rules
3 units

AFAM 115. The Black Community Past and Present
Analysis of historical development of African-Americans including migrational trends of Blacks from the rural South to urban North. Search for alternatives in new institutions and modification of old ones.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 119. Africana Philosophy and Culture
See PHIL 319.
Normal Grade Rules
3 units

AFAM 120. Sociology of African American Communities
Sociological analysis of the African American community traces development of the community from its historical inception to contemporary urban settings. Analyzes important trends, shifting values, institutional development and urban problems. Also examines how patriarchy, race, and class shape African Americans in their everyday lives in American society.
Normal Grade Rules
3 units

AFAM 125. The Black Family:Historical/Contemporary Realities
Normal Grade Rules
3 units

AFAM 130. Psychology of the Black Community
Impact of Black society and culture on personality growth in light of current sociological and social-psychological studies. Social interaction, group membership within the Black community and its influence on the shaping of behavior.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 133. Introduction to Social Issues in Planning
See URBP 133.
Normal Grade Rules
4 units

AFAM 142. Diaspora
History, culture, and politics of the African Diaspora.
Normal Grade Rules
3 units

AFAM 200A. African Americans and the Development of America's History and Government
Major events in America's development, emphasizing African Americans' relationship to government and other basic institutions. GE Area: D2
Note: Must complete the entire sequence (AFAM 2A and 2B) to satisfy U.S. History, U.S. Constitution and California Government (US1,2,3).
Normal Grade Rules
GE: M7
3 units

AFAM 202. The Humanities in African-American Culture
Analysis of several of the most important African-American creative art forms and personalities. Special attention to Black contributions in music, literature, cinema, photography and painting.
Normal Grade Rules
3 units

AFAM 205. The Changing Majority: Power and Ethnicity in America
See CCS 025.
Normal Grade Rules
GE: D2
3 units

AFAM 240. African Origins
Ancient African civilizations to the advent of the slave trade. Folklore and mythology manifested in ceremonies, rituals and rhythmic movements are examined.
Repeatable for credit
Normal Grade Rules
3 units

AFAM 210. African-American Music
Analysis of styles and techniques of major traditions in Black music. Development of music from slave work-a-day songs to rhythm and blues and modern jazz, 1950's to the present.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 215. Health, Justice, and the Black Experience
A review of the health and health-related issues of Blacks/African Americans within the U.S. Major disease health trends are discussed as by-products of the interaction of biological, cultural, economic and social forces in the U.S.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 216. Race and Culture in the African Diaspora
Examination of the role of race and ethnicity amongst persons of African descent i.e., the role race and ethnicity plays in primary and secondary relationships amongst Blacks and between Black and non-Black peoples.
Normal Grade Rules
3 units

AFAM 220. Sociology of African American Communities
Sociological analysis of the African American community traces development of the community from its historical inception to contemporary urban settings. Analyzes important trends, shifting values, institutional development and urban problems. Also examines how patriarchy, race, and class shape African Americans in their everyday lives in American society.
Normal Grade Rules
3 units

AFAM 225. The Black Family:Historical/Contemporary Realities
Normal Grade Rules
3 units

AFAM 230. Psychology of the Black Community
Impact of Black society and culture on personality growth in light of current sociological and social-psychological studies. Social interaction, group membership within the Black community and its influence on the shaping of behavior.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

AFAM 233. Introduction to Social Issues in Planning
See URBP 133.
Normal Grade Rules
4 units
### Academic Year 2019-2020

#### Course Descriptions

**AFAM 134. The Black Civil Rights Movements**  
Origins and development of Civil Rights movement from 1865 to present. Analysis of role of Martin L. King.  
- Normal Grade Rules  
- 3 units

**AFAM 137. Religion in the Black Community**  
Analysis of formation and development of African-American religious ideas and institutions (e.g., Christianity, Islam, Judaism) in the Black community and their effect on the African American personality.  
- Normal Grade Rules  
- 3 units

**AFAM 142. Race, Ethnicity, and the Law**  
Analysis of the politics of law and race in the U.S. with a focus on the experience of African-Americans and other racial and ethnic minorities as offenders, victims and as citizens engaged in a continuing movement for equality and an end to injustice.  
- Prerequisite: Upper division standing or instructor consent.  
- Normal Grade Rules  
- 3 units

**AFAM 145. Urban Policy and Its Impact on Inner City Residents**  
Effects of public policy decisions on inner city populations. Implications of urban planning processes for differential consumption costs of public goods and services.  
- Prerequisite: Upper division standing.  
- Normal Grade Rules  
- 4 units

**AFAM 150. West African Drumming and Culture**  
A study of the instrumental music, song, and dance of the African Diaspora with an emphasis on its cultural context.  
- Prerequisite: Upper division standing.  
- Normal Grade Rules  
- 3 units

**AFAM 151. Race, Class and the Environment**  
Analysis of the relationship between the environmental crisis and people of color and poor communities in the U.S., emphasizing the interplay among race/ethnicity, class and politics in the struggle for environmental justice and survival by communities of color and poor people.  
- Normal Grade Rules  
- 3 units

**AFAM 152. Black Women in the U.S.**  
Exploration of the social, historical, and cultural factors influencing the Black women in U.S. society.  
- Normal Grade Rules  
- 3 units

**AFAM 153. Black Women in the U.S. Society**  
The role of Black women in U.S. society.  
- Normal Grade Rules  
- 3 units

**AFAM 154. Black Women in the U.S. Culture**  
A study of the Black women's culture and its impact on society.  
- Normal Grade Rules  
- 3 units

**AFAM 155. The Triumph and Tragedy of Black Athletes in U.S. History**  
This course examines the significance and impact of Black athletes on popular culture, race relations and U.S. society.  
- Prerequisite: Upper division standing or instructor consent.  
- Normal Grade Rules  
- 3 units

**AFAM 156. Black Women Writers: Race, Culture and Resistance**  
Comparative analysis of the meaning and developmental stages of womanhood for women of African ancestry as depicted in the fiction of women of African ancestry. Emphasis on the role of race and culture in shaping contemporary conceptions of womanhood among Black women.  
- Prerequisite: Upper division standing or instructor consent.  
- Normal Grade Rules  
- 3 units

**AFAM 157. Globalization and Technology in Youth Culture**  
This course examines the impact of globalization and technology on youth worldwide from the perspective of youth in different cultures and countries. Topics will vary and focus on specific countries. Some sessions will be faculty-led international programs.  
- Prerequisite: Upper division standing.  
- Repeatable for credit  
- Normal Grade Rules  
- 3 units

**AFAM 159. Economic Issues in the Black Community**  
Analysis of continuing racial economic disadvantage in context of corporate and public policies. Exploration of new economic development and career opportunities emerging from changed environmental protection priorities.  
- Prerequisite: Upper division standing or instructor consent.  
- Repeatable for credit  
- Normal Grade Rules  
- 3 units

**AFAM 160. Blacks in U.S. Politics and Society**  
Examines the lives and major contributions of African-Americans to politics and U.S. society.  
- Prerequisite: Upper division standing.  
- Normal Grade Rules  
- 3 units

**AFAM 161. Black Representations in Media and New Technology**  
Examination of the representation of Black people in film, TV, and traditional and social media as well as new/alternative technological informational sources.  
- Prerequisite: Upper division standing.  
- Normal Grade Rules  
- 3 units

**AFAM 164. Survey of Black Business Organizations**  
Private sector businesses from the perspective of racial ownership and consumption patterns. Historical development, future trends, consumer market, government regulation and funding support as they impact the success of Black business.  
- Prerequisite: Upper division standing.  
- Normal Grade Rules  
- 3 units

**AFAM 165. Topics in Ethnic American Literature**  
See ENGL 165.  
- Normal Grade Rules  
- 4 units

**AFAM 166. African-American Women in History**  
Role of African American women in shaping U.S. history through a shared Afrocentric gender legacy of activism and public life guardianship. Resulting impacts on abolition, lynching deterrence, labor unions, civil rights and professional activities.  
- Prerequisite: Upper division standing.  
- Normal Grade Rules  
- 3 units

**AFAM 180. Individual Studies**  
Individual research project and field activity on phase or topic not covered in regular course offerings.  
- Prerequisite: Upper division standing.  
- Repeatable for credit  
- Credit / No Credit  
- 1-4 units

**AFAM 184. Directed Reading**  
Limited to qualified upper division students.  
- Repeatable for credit  
- Credit / No Credit  
- 1-4 units

**AFAM 190. Internship in Community Development**  
Supervised placement in practical situations where community workers are employed: community planning, correctional services, community development agencies, etc.  
- Prerequisite: Upper division standing or instructor consent.  
- Credit / No Credit  
- 1-4 units

**AFAM 198. Senior Seminar in African-American Studies**  
Major themes and topics in the African-American experience analyzed through readings, reports and discussions. Topics and materials vary each semester. Course is repeatable for 6 unit maximum.  
- Prerequisite: AFAM 2A, AFAM 2B and senior standing.  
- Repeatable for credit  
- Normal Grade Rules  
- 3 units

**AFAM 199. Senior Seminar in African-American Studies**  
Major themes and topics in the African-American experience analyzed through readings, reports and discussions. Topics and materials vary each semester. Course is repeatable for 6 unit maximum.  
- Prerequisite: AFAM 2A, AFAM 2B and senior standing.  
- Repeatable for credit  
- Normal Grade Rules  
- 3 units

GRADUATE

AFAM 200. Colloquium in African Origins
Analysis of historical writings of pre-colonial and colonial West Africa as a relevant background tool to the history of Black people in the U.S. Discussions based on assumption that assignments have been read in advance.
Prerequisite: Upper division or graduate standing.
Normal Grade Rules
3 units

AFAM 210. Seminar in African-American History
Detailed study and survey of the dispersal of African peoples from Africa to the United States and to other parts of the Americas.
Repeatable for credit
Normal Grade Rules
3 units

AFAM 220. Socio-Psychological Development of Black Community
Analysis of various aspects of socio-psychological development in the Black community. Particular emphasis on socialization and social perception, ghettoization (causes and consequences), prejudice, stress and inter-group relations.
Normal Grade Rules
3 units

AFAM 240. Seminar in Black Politics and Urban Problems
Analysis of the development of Black political power in selected urban areas, with an emphasis on its relationship to the general urban crisis. Special study of the ramifications of Black political development on the county, state and federal governmental levels with specific reference to congressional actions and judicial decisions.
Normal Grade Rules
3 units

AFAM 298. Special Studies
Advanced individual research and projects related to the Black community.
Prerequisite: Consent of graduate advisor.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
American Studies Program
Courses

AMERICAN STUDIES

LOWER DIVISION

AMS 001A. American Cultures to 1877
American culture examined through political, literary, artistic, economic and social development. American values, ideas and institutions from popular culture as well as traditional sources. GE Area: C1 and D2, meets additional GE Areas when taken as sequence.
Note: Entire sequence satisfies GE Areas C1,2; D2,3; U.S. History, U.S. Constitution and California Government US1,2,3.
Misc/Lab: Lecture 3 hours/lecture 3 hours
Normal Grade Rules
GE: M4
6 units

AMS 001B. American Cultures 1877 to present
American culture examined through political, literary, artistic, economic and social development. American values, ideas and institutions from popular culture as well as traditional sources. GE Area: C2 and D3, meets additional GE when taken in sequence.
Prerequisite: AMS 1A.
Note: Entire sequence satisfies GE Areas C1,2; D2,3; U.S. History, U.S. Constitution and California Government US1,2,3.
Misc/Lab: Lecture 3 hours/lecture 3 hours
Normal Grade Rules
GE: M5
6 units

UPPER DIVISION

AMS 100W. Writing in the Humanities
See HUM 100W.
Normal Grade Rules
GE: Z
3 units

AMS 129. How the World sees the United States
Comparative analysis of the cultural meaning of “America” outside the United States from the perspectives of global interdependence and transnationalism, and including both pro- and anti-American views through history.
Prerequisite: Upper division standing
Normal Grade Rules
3 units

AMS 159. Nature and World Cultures
The influence of industrialization and globalization on earth and the environment as seen through culture. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

AMS 160. Special Topics in Humanities
See HUM 160.
Repeatable for credit
Normal Grade Rules
3 units

AMS 169. The American Dream
The American search for identity and meaning, the struggle for equality and success, in relation to myths, illusions and realities reflected in history, literature and the arts. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

AMS 179. American Popular Culture
Music, sports, fashion, popular literature, television and other arts and activities that are main forms of influence, entertainment and escape. Expressions of American attitudes and ideas as important influences upon evolving culture and consciousness.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

AMS 180. Individual Studies
Supervised study of a particular aspect of American culture not covered in a regular course offering.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

AMS 190. Senior Seminar in Humanities
See HUM 190
Normal Grade Rules
3 units
## Anthropology Department Courses

### LOWER DIVISION

**ANTH 011. Cultural Anthropology**
Basic concepts, theories and methods used in the comparative study of socio-cultural systems. Includes cultural ecology and change; political, economic and kinship systems; language, art and religion; cultural perspectives on contemporary issues. GE Area: D1  
- Normal Grade Rules  
- GE D1  
- 3 units

**ANTH 012. Introduction to Human Evolution**
The human organism from an evolutionary perspective. The foundations of life and evolutionary theory. Introduction to primate behavior and the fossil record. Human biocultural evolution over the last sixty million years. GE Area: B2  
- Normal Grade Rules  
- GE B2  
- 3 units

**ANTH 013. Archaeology**
How archaeologists invent their own version of the past, illustrated with compelling Old and New World discoveries from early prehistory to the present. How archaeological sites are discovered, excavated and analyzed; how facts are tested and fictions unmasked. GE Area: A3  
- Normal Grade Rules  
- GE A3  
- 3 units

**ANTH 025. Human Lifecourse in Context**
Human development and its physiological, psychological and sociocultural contexts. Cross-cultural perspectives on infancy, childhood, adolescence, adulthood and old age. The role of university education in the life span. GE Area: E  
- Normal Grade Rules  
- GE EE  
- 3 units

---

### UPPER DIVISION

**ANTH 100W. Writing Workshop**
Practice in improvement of writing skills appropriate to the fields of anthropology and behavioral science. Includes essays, reports and scholarly communication. GE Area: Z  
- Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.  
- Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment Requirement (GWAR).  
- Normal Grade Rules  
- GE Z  
- 3 units

**ANTH 102. Silicon Valley Connections**
Examines issues of cultural diversity, work and family technology in daily life, attachment to organizations, and community building in Silicon Valley through an anthropological perspective. Connections to other global regions are explored; public policy implications are developed and analyzed.  
- Prerequisite: Upper Division Standing  
- Normal Grade Rules  
- 3 units

**ANTH 103. Archaeology**
How archaeologists invent their own version of the past, illustrated with compelling Old and New World discoveries from early prehistory to the present. How archaeological sites are discovered, excavated and analyzed; how facts are tested and fictions unmasked. GE Area: A3  
- Normal Grade Rules  
- GE A3  
- 3 units

**ANTH 104. Archaeology**
How archaeologists invent their own version of the past, illustrated with compelling Old and New World discoveries from early prehistory to the present. How archaeological sites are discovered, excavated and analyzed; how facts are tested and fictions unmasked. GE Area: A3  
- Normal Grade Rules  
- GE A3  
- 3 units

**ANTH 105. Applied Anthropology**
Use of anthropological knowledge in problem solving and policy making. Survey of applied anthropology, models of applying anthropology and affecting policy making, and the use of anthropology by non-professionals in diverse careers.  
- Prerequisite: ANTH 11 or instructor consent.  
- Normal Grade Rules  
- 3 units

**ANTH 107. Eating Culture: The Anthropology of Food**
This course will explore the many ways in which humans seek, collect, grow, transform and consume foods. We will examine elements of human evolutionary history that mold our current consumption choices. Changes in subsistence strategies, human migration, and colonial expansions remade our landscapes, kitchens, cuisines and our bodies. We will identify and analyze the material processes of food production, preparation and consumption; the cognitive models that define our food choices and the ways in which power and inequality drive global feast and famine. The course will draw on archaeological, biological and cultural anthropologies, as well as examining the potential applications by anthropologists of food.  
- Prerequisite: ANTH 11, Upper Division Standing  
- Normal Grade Rules  
- 3 units

**ANTH 108. Medical Anthropology**
A comprehensive examination of culture, sickness and healing in a cross-cultural perspective, emphasizing ecological/evolutionary bases of disease and healing and cultural dimensions of health in modern world.  
- Prerequisite: ANTH 11 or instructor consent.  
- Normal Grade Rules  
- 3 units

**ANTH 114. Legacy of Asia**
See HUM 114.  
- Normal Grade Rules  
- GE: V  
- 3 units

**ANTH 115. The Emerging Global Culture**
Introduction to systems concepts and approach as a way to investigate the global impacts of industrial technology on political, economic, social and moral/psychological structures of humankind. GE Area: V  
- Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted).  
- completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.  
- Completion of, or co-registration in, 100W is strongly recommended.  
- Notes: Recommended for behavioral science majors. All SJSU Studies courses require completion of the WST and upper division standing.  
- Normal Grade Rules  
- GE: V  
- 3 units

**ANTH 122. Magic, Science and Religion**
See RELS 122.  
- Normal Grade Rules  
- GE: V  
- 3 units

**ANTH 125. Urban Anthropology**
Anthropological theories and methods in analyzing the global effects of urban growth. Relevance of anthropological approach in understanding our local multiethnic metropolitan area.  
- Prerequisite: ANTH 11 or instructor consent.  
- Normal Grade Rules  
- 3 units

**ANTH 129. Environmental Anthropology**
Anthropological examination of humans’ relationship to their biological environment. Course topics include population growth, resource consumption, human induced climate change, biodiversity, solid and hazardous waste, economic and cultural patterns affecting the environment, environmental risk, water resources, hazards, disasters, sustainable initiatives.  
- Prerequisite: ANTH 11  
- Normal Grade Rules  
- 3 units

---

**Normal Grade Rules**

### ANTH 130. Kin, Kith, and Community: The Anthropology of Social Organization
Overview of social organization focused on local forms of human relationships: kinship, non-kin relations such as friendship and networking, and community. Explores the principles of kinship and community-building. Examples will be drawn from small-scale, complex and international societies.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

### ANTH 131. Theories of Culture
Seminar on evolutionary, functional and structural theories of culture. Analysis of contemporary theory and development of the discipline of anthropology.
Prerequisite: Upper division standing. ANTH 011; ANTH 012 or ANTH 013 or declared Anthropology major or instructor consent.
Normal Grade Rules
3 units

### ANTH 132. Creating Built Worlds
Cross-cultural exploration of material expressions of culture. Analysis of production and consumption of places, shelters, and goods. Implications for design and policy.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

### ANTH 133. Organizational Cultures
Complex organizations as dynamic sociocultural systems. Topics include organizational culture, cross-cultural study of organizations, organizational ethnography, cultural diversity, organizational learning and relevance of a cultural approach to enhance organizational effectiveness in a rapidly-changing world.
Prerequisite: ANTH 11 or instructor consent.
Repeatability for credit
Normal Grade Rules
3 units

### ANTH 134. Systemic Leadership
Examination of systemic leadership thought and practice, especially its application to helping resolve complex problematic issues more effectively and responsibly. Focus is on leading collaborative change efforts with diverse sets of stakeholders in group, organizational, community, cultural, and global settings.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

### ANTH 135. Thought Control in Contemporary Society
Anthropological analysis of sociocultural controls influencing and regulating human thought and behavior in the contemporary period. Topics include propaganda, censorship, undue influence, coercive persuasion and "brainwashing," groupthink, messianic cults, totalitarianism, technologies of control, ritualized rebellion, resistance movements, and democratic alternatives.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

### ANTH 140. Human Sexuality
Biological and sociocultural facets of human sexuality. Evolution and physiology of sex, reproductive biology/ethics and cross-cultural expression of sexual behavior.
GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

### ANTH 150. Human Evolution
Overview of social organization focused on local forms of human relationships: kinship, non-kin relations such as friendship and networking, and community. Explores the principles of kinship and community-building. Examples will be drawn from small-scale, complex and international societies.
Prerequisite: ANTH 11 or instructor consent.
Normal Grade Rules
3 units

### ANTH 152. Becoming Human
Explores the relationship between adaptive human behavior and the environment. Theories of interaction between biology, environment and culture are illustrated by examples of mobile foraging peoples, village sedentary farmers, complex chiefdoms and state-level societies.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

### ANTH 155. Middle Eastern Traditions
See RELS 145.
Normal Grade Rules
GE: V
3 units

### ANTH 164. Gifts, Markets, and Power
Cross-cultural analysis of economic systems. Topics include reciprocity, redistribution, and market exchange; the history of money and virtual currencies; the cultural construction of debt and credit; corporate capitalism and cyclical crises; global economic integration; and contemporary “alternative” economic systems.
Prerequisite: ANTH 11 or Instructor Consent
Normal Grade Rules
3 units

### ANTH 171. Modernity and Disease
Modernity and Disease explores the effects of the modern world on human biology, with specific emphasis on adaptations to the last several decades of environmental changes. Topics include reproduction, diet, and infectious, geriatric and environmental diseases.
Prerequisite: ANTH 12 or instructor consent.
Normal Grade Rules
3 units

### ANTH 172. Becoming Human
This course reviews the fossil evidence for human evolution. It emphasizes areas of scientific controversy in paleoanthropology by assessing recent fossil discoveries and molecular data. Lectures are supplemented with lab demonstration of modern skeletal materials and reproductions of fossil hominids.
Prerequisite: ANTH 12 or instructor consent.
Normal Grade Rules
3 units
ANTH 154. Monkeys, Apes and Humans
Behavior, ecology and evolution of our closest animal relatives, the nonhuman primates. Interpretive emphasis toward broader understanding of human evolution and behavior.
Prerequisite: Any lower division anthropology or psychology course or instructor consent.
Normal Grade Rules
3 units

ANTH 155. Human Osteology
The human skeletal system as an anatomical structure and biomechanical system. Lab experience in identification of osteological material and recognition of diseases associated with bone.
Prerequisite: ANTH 12 or instructor consent.
Misc/Lab: Lecture 3 hrs/lab 2 hrs.
Normal Grade Rules
3 units

ANTH 156. Bioarchaeology
Study of human skeletal remains from archaeological setting to aid in reconstructing the biological and cultural past. Current theoretical and methodological issues in bioarchaeology. Emphasis on potential of skeletal analysis associated with bone.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 157. Forensic Anthropology
An overview of forensic anthropological methods and applications emphasizing the recovery and interpretation of human remains within the context of multidisciplinary scientific death investigation. Topics include the history of the discipline and a concentrated hands-on overview of basic human osteological identification.
Prerequisite: ANTH 12, BIOL 10, BIOL 21, or BIOL 65.
Normal Grade Rules
3 units

ANTH 158. Mummies
Explore mummies from around the world. Examine the archaeological and biological evidence of how and why mumification was practiced in these cultures, plus what the examination of mummies can tell us about past peoples cultures, diseases, and lifestyles.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

ANTH 159. Reconstructing Lost Civilizations
Explores scientific archaeology and the reconstruction of civilizations. Topics include framing hypotheses, site selection, excavation, analysis of artifacts and ecofacts, and reconstructing social systems. GE Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LHD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
3 units

ANTH 160. Old World Civilizations
Prehistoric cultural development in Europe, Asia, and Africa from the Paleolithic to the development of civilizations. Discussions of early states include social organization, economic systems, art, architecture and intellectual achievements.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 161. North America before 1492
Archaeology and history of North American peoples before 1492. Precolumbian culture areas and relationships between them; development of state societies; relationships with and resistance to European colonizers.
Prerequisite: Upper division standing or instructor approval.
Normal Grade Rules
3 units

ANTH 162. Inca, Aztec and Maya Civilization
Ancient high civilizations of Mexico, Central America and Andean South America, their predecessors and contemporaries. Explores sociocultural systems with emphasis on art, architecture and intellectual achievements.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 163. Historical Archaeology
Course centers on the archaeology of the recent past. Students explore how to employ archaeological material analysis and archival research to develop a fuller understanding of the development of the modern industrialized world.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 164. North America before 1492
Archaeology and history of North American peoples before 1492. Precolumbian culture areas and relationships between them; development of state societies; relationships with and resistance to European colonizers.
Prerequisite: Upper division standing or instructor approval.
Normal Grade Rules
3 units

ANTH 165. Historical Archaeology
Course centers on the archaeology of the recent past. Students explore how to employ archaeological material analysis and archival research to develop a fuller understanding of the development of the modern industrialized world.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 166. Archaeological Methodology
Central methods of archaeological practice. Methods of archaeological inquiry, research design, and the cultural resource management presented through case studies in historic and prehistoric archaeology.
Prerequisite: ANTH 13.
Normal Grade Rules
3 units

ANTH 167. Archaeological Site Excavation
Artifact recovery and analysis during archaeological field project. All phases of professional archaeological practice leading to publication of findings. Sites may be local or distant.
Prerequisite: ANTH 13 or instructor consent.
Misc/Activity: 6 hours activity
Repeatable for credit
Normal Grade Rules
3 units

ANTH 168. Archaeological Ethnography
Planning, production, and presentation of ethnographic materials using various media. Theoretical and applied aspects of multimedia anthropology. Use of multiple media in data collection, analysis, evaluation, and representation of culture including photographs, documentary video, websites, the World Wide Web.
Prerequisite: ANTH 13 or instructor consent.
Normal Grade Rules
3 units

ANTH 169. Anthropology of Native America
Survey of indigenous peoples of the Pacific Rim from ethnohistorical times to the present. Cultural adaptation, social organization, world view, intercultural contact and cultural portrayal. Emphasis on Western Native North America with examples drawn from other Asian, Pacific and American indigenous cultures.
Prerequisite: Any lower division anthropology course or instructor consent.
Normal Grade Rules
3 units

ANTH 170. Historical Anthropology
The study of the evolution of human societies and cultures from earliest times to the present. Emphasis on the intellectual achievements in the field of anthropology.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 171. Historical Archaeology
Course centers on the archaeology of the recent past. Students explore how to employ archaeological material analysis and archival research to develop a fuller understanding of the development of the modern industrialized world.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 172. Historical Ethnography
Planning, production, and presentation of ethnographic materials using various media. Theoretical and applied aspects of multimedia anthropology. Use of multiple media in data collection, analysis, evaluation, and representation of culture including photographs, documentary video, websites, the World Wide Web.
Prerequisite: ANTH 13 or instructor consent.
Normal Grade Rules
3 units

ANTH 173. Indigenous Peoples of the Americas
An overview of the indigenous peoples of the Americas from prehistoric times to the present. The cultural diversity and material remains of the Americas, including anthropological and archaeological methods of reconstruction.
Prerequisite: Any lower division anthropology course or instructor consent.
Normal Grade Rules
3 units

ANTH 174. Anthropology of Native America
Survey of indigenous peoples of the Pacific Rim from ethnohistorical times to the present. Cultural adaptation, social organization, world view, intercultural contact and cultural portrayal.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 175. Historical Anthropology
The study of the evolution of human societies and cultures from earliest times to the present. Emphasis on the intellectual achievements in the field of anthropology.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ANTH 176. Indians of California
Native Californian cultures as they functioned before white contact, emphasizing ecological, sociopolitical and religious interrelationships and historic culture change. Ethnohistoric, archaeological and documentary sources.
Prerequisite: ANTH 11 or instructor consent.
Normal Grade Rules
3 units
ANTH 177. Anthropology of Asia
Sociocultural themes of selected Asia cultures. Covers cultural pluralism, intercultural contact, social organization, worldview and economic adaptations. Explores connections within the Pacific Rim, especially to the local region. Course is repeatable once for credit when different cultures are emphasized.
Prerequisite: Upper division standing.
Repeateable for credit
Normal Grade Rules
3 units

ANTH 180. Individual Studies
Prerequisite: Instructor consent.
Repeateable for credit
Credit / No Credit
1-4 units

ANTH 184. Directed Reading
Directed reading in cultural anthropology, physical anthropology or archaeology to gain a broader understanding of a particular topic, culture or theoretical issue.
Prerequisite: Upper division standing and instructor consent.
Repeatabe for credit
Credit / No Credit
1-4 units

ANTH 187. Special Topics
Contemporary issues in anthropological theory including cultural anthropology, archaeology and physical anthropology. Course is repeatable once for credit on different issue.
Prerequisite: Upper division standing.
Repeatabe for credit
Normal Grade Rules
3 units

ANTH 190. Designing Research
Describes research conception, development and implementation for academic research and applied careers alike. Emphasizes writing grant proposals, academic theses, and professional contracts. Topics include research question identification, methodological and technical approaches, broader significance and impact of research, and ethical considerations.
Prerequisites: Declared major in Anthropology or Behavioral Sciences; Completion of Area Z (100W); Two of the following courses: ANTH 011, ANTH 012, ANTH 013 or Instructor consent.
Normal Grade Rules
3 units

ANTH 191. Frontiers of Anthropology
Critical contemporary social issues that cut across archaeology and cultural and physical anthropology. Anthropology as a holistic social science. Seminar format uses reading, simulations and class discussions. Professionalism in the discipline stressed.
Prerequisite: ANTH 131 and senior standing or instructor consent.
Normal Grade Rules
3 units

ANTH 193. Behavioral Science in Practice
Capstone workshop for behavioral science majors. Students assess methods and knowledge of anthropology, psychology and sociology, and synthesize them by reflecting upon case studies of individual, organizational, community, and global issues. Emphasis is on cooperative learning, reflection and synthesis of skills and knowledge.
Prerequisite: Senior standing, declared major in Behavioral Science or Behavioral Science double major.
Normal Grade Rules
3 units

ANTH 195. Anthropology Practicum
Advanced practicum in archaeology, ethnography, physical anthropology or linguistics.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-6 units

ANTH 199. Anthropology Practicum
Advanced practicum in archaeology, ethnography, physical anthropology or linguistics.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

ANTH 231. Applications Core
Methods for the analysis sociocultural systems, ethnographic evaluation, and program/design development. Emphasis on professionalism, project management, budgeting, ethics, and contracts.
Prerequisite: ANTH 232, ANTH 105 or instructor consent.
Normal Grade Rules
3 units

ANTH 232. Applications Core
Methods for the analysis sociocultural systems, ethnographic evaluation, and program/design development. Emphasis on professionalism, project management, budgeting, ethics, and contracts.
Prerequisite: ANTH 231 or instructor consent.
Normal Grade Rules
3 units

ANTH 233. Fields of Application
Survey of domains in which anthropological skills and knowledge are applied. Topics include health, business and industry, sustainable regions, and immigration. Emphasis is on opportunities for anthropological contributions.
Corequisite: ANTH 231 or instructor consent.
Normal Grade Rules
3 units

ANTH 234. Advanced Research Methods
Advanced research methods including individual and group interviewing, structured observation, and formal analytical methods. Emphasis on data management, ethnographic writing, and presentation of data through different media.
Prerequisite: ANTH 149 or equivalent.
Normal Grade Rules
3 units

ANTH 235. Quantitative Methods
Advanced quantitative methods to gain comprehension of statistical analyses, especially in regards to predictive value for regional issues. Emphasis will be on understanding statistics, creating databases, using statistical software packages, and employing proper statistics.
Prerequisite: STAT 95 or equivalent.
Normal Grade Rules
3 units

ANTH 236. Graduate Program in Anthropology
Graduate Program; Read the Graduate Program in Anthropology. A master’s program.
Prerequisite: ANTH 131 or instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

ANTH 237. Special Topics
Contemporary issues in applied and practicing anthropology not covered in other courses. Course is repeatable once for credit on different topic with advisor consent.
Prerequisite: Graduate standing or instructor consent.
Repeatable for credit when topic changes.
Normal Grade Rules
1-3 units
ANTH 298. Anthropology Project
Course consists of supervised units applying anthropology in a project, the documentation of that project and the evaluation of the project in a written report. Course is repeatable for credit in the same semester.
  Repeatable for credit
  Mandatory CR/NC/RP
  1-6 units

ANTH 299. Master's Thesis
Independent anthropological research conducted under supervision of faculty advisor.
Prerequisite: Graduate standing.
  Repeatable for credit
  Mandatory CR/NC/RP
  1-6 units

ANTH 1290R. Culminating Experience
Supervision
Continued work on project or thesis.
Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class
Note: No Degree Credit.
  Repeatable for credit
  No Degree Credit
  1 unit

ORGANIZATIONAL STUDIES

UPPER DIVISION

ORGS 101. People & Organizations
Study of complex organizations in which people live their lives. Topics include organizational forms and functions; internal social and cultural dynamics; growth and change in material, social and symbolic environments; and ethical issues of organizational life.
Prerequisite: Upper Division Standing
Misc/Lab: Lecture 4 hours/Activity 2 hours
  Normal Grade Rules
  3 units

ORGS 102. Organizations, Inquiry & Analysis
Development of skills to analyze and design organizations. Topics include analysis of environments and resources; use of technology, communication and decision-making; workflow and division of labor; and symbols. Research skills for understanding organizational values, patterns, processes and environments.
Prerequisite: Upper Division Standing
Misc/Lab: Lecture 4 hours/Activity 2 hours
  Normal Grade Rules
  4 units

ORGS 103. Organizational Studies Capstone
Capstone course required of all ORGS majors. Emphasizes team projects working with community or institutional partners to address issues through organizational design or change.
Prerequisite: ORGS 101, ORGS 102, or instructor permission
Misc/Lab: Lecture 4 hours/Activity 2 hours
  Normal Grade Rules
  4 units
Applied Data Science
Department Courses

DATA ANALYTICS

GRADUATE

DATA 200. Computational Programming for Data Analytics
Hands-on programming covers constructs such as data structures and algorithms, iterations, functions, and other core concepts; cover skills include casting a problem as an algorithm, translating an algorithm to executable code, and debugging and testing code; applications focus on computational techniques to understand, analyze, and visualize data. Prerequisite: Admission into MS in Data Analytics and instructor consent
Credit / No Credit
3 units

DATA 220. Mathematical Methods for Data Analysis
Mathematical and Statistical methods for Data Analytics. Selected topics from probability, statistics, linear algebra, and mathematical optimization. Programming for numerical implementation of mathematical and statistical algorithms. Prerequisite: Instructor Consent
Normal Grade Rules
3 units

DATA 294. Data Analytics Seminar
Advanced and domain specific topics in the area of data analytics; content is updated in each offering; possible topics include though not restricted to research design and data analytics for the applications of business, engineering, natural science, social science, etc. Prerequisite: Graduate standing and instructor consent
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

DATA 295. Special Problems in Data Analytics
Advanced individual work in data analytics. Repeatable with graduate advisor approval.
Credit / No Credit
3 units

DATA 296. Special Topics in Data Analytics
Special topics in Data Analytics. Content varies from semester to semester. Repeatable in different topic areas.
Prerequisite: Instructor Consent
Repeatable for credit
Normal Grade Rules
3 units

DATA 297. Data Analytics Internship
Fieldwork for MS in Data Analytics students. A report is required at the end of the semester addressing the goals set at the start of the assignment.
Prerequisite: Completed 12 units degree required courses, classified status, in good standing, and graduate advisor consent
Credit / No Credit
1 unit

DATA 298A. Data Analytics Masters Project I
Comprehensive plan and preliminary design of data analytics project; integration of knowledge in technologies, processes and management to support program outcomes.
Prerequisite: Classified status, good standing, Data 294, and graduate advisor consent
Normal Grade Rules
3 units

DATA 298B. Data Analytics Masters Project II
Completion of an in-depth project to achieve the program outcomes and satisfy the cumulating experience; write a detailed project report; make a comprehensive presentation and demonstration.
Prerequisite: Advancement to candidacy, DATA 298A, and graduate advisor consent
Normal Grade Rules
3 units

DATA 299A. Data Analytics Masters Thesis I
First of a two-course sequence for the Plan A (Thesis) culminating experience. Prerequisite: Classified status, good standing, DATA 294, and graduate advisor consent
Credit / No Credit
3 units

DATA 299B. Data Analytics Masters Thesis II
Second of the two-course sequence for the Plan A (Thesis) culminating experience. Prerequisite: Admission to candidacy, DATA 299A, and graduate advisor consent.
Mandatory CR/NC/RP
3 units
Art and Art History Department Courses

ART

LOWER DIVISION

ART 001. Professional Preparation in Art
Introduction to skills and documents needed in preparation for professional careers in the arts; orientation to SJSU. Intended for BA/BFA ART majors and minors.
Credit / No Credit
1 unit

ART 002. The Artist in Contemporary Culture
Introduces art beginners to roles that artists play in contemporary culture. Critical readings and problem-solving: principles of form and theory and research applied to real-world situations confronted by contemporary artists. Orientation to SJSU.
Normal Grade Rules
3 units

ART 003. Medium and Message
This undergraduate seminar introduces intermediate-level artists to a research and project-based approach to artmaking with a focus on contemporary, idea-appropriate mediums and methods. Orientation to SJSU.
Normal Grade Rules
3 units

ART 012. Two-Dimensional Design and Color Concepts
Theories and applications of two-dimensional design and color in visual art and design. Studio practice.
Note: ART 12 is treated as a repeat for students who have taken ANI 12.
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 013. Three-Dimensional Design Concepts
Theories and applications of three-dimensional form in visual art and design. Studio practice.
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 014. Color
Attributes of color. Studio practice exploring theories and creative use of color in visual art and design.
Note: ART 14 is treated as a repeat for students who have taken ANI 14.
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 024. Drawing I
Elements and principles of drawing. Studio practice emphasizing line, shape and light-dark used in visual art and design.
Note: ART 24 is treated as a repeat for students who have taken ANI 24.
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 025. Expressive Drawing
Drawing concepts emphasizing creative expression. Studio practice with a variety of methods and materials.
Prerequisite: ART 24.
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 026. Drawing II
Observation and depiction of volume and perspective. Prerequisite: ART 24.
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 039. Multicultural Arts for Children
Focus on teaching arts of many cultures, places and times to young people (preschool through high school).
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 046. Introduction to Ceramics
Studio work in ceramics; a survey of methods used by contemporary artists. Includes use of the potter’s wheel, handbuilding techniques, clay preparation, glazing and firing for utilitarian and sculptural work.
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 047. Introduction to Metalsmithing
Introduction to tools, materials and techniques for small scale metal work. Primer course for metalsmithing and jewelry.
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 061. Beginning Painting
Studio practice in selected media. Specific content, materials and subject matter may vary with instructors.
Prerequisite: ART 12 and ART 24
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 068. Beginning Sculpture: Object & Concept
Introduction to core sculptural media: woodworking, welding, mold-making, metal-casting and working with found objects. Emphasis on concept development and critical making.
Prerequisite: Art 13 or instructor consent.
Misc/Activity: 6 hours activity
Repeatable for credit
Normal Grade Rules
CAN ART 12
3 units

ART 074. Introduction to Digital Media
Fundamental concepts and methods of Digital Media production. Introduction to visualization software applications and web presentation techniques.
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 075. Introduction to Digital Video Art
Introduction of the fundamental skills, software and techniques involved in the production of Digital Video.
Critical discourse and contemporary art theories will be explored.
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

UPPER DIVISION

ART 100W. Writing Workshop: Fine Arts
Advanced writing course for fine art majors, based upon philosophical issues and current professional practice in art. Clear analytical and critical writing in examination of these topics. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. Art and Design Majors only.
Note: Note: Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
CE: Z
3 units

ART 101. Digital Media Art
Experimental applications in creative coding as an art practice. Focus includes programming interactivity, generative graphics, intro to data visualization and user interface and user experience strategies.
Prerequisite: ART 074, ART 075 or instructor consent.
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units
ART 102. 3D Modeling and Printing
Introduces experimental 3D methods with a focus on conceptual and creative processes using 3D modeling software and 3D printing technology while addressing contemporary uses for artistic production. Prerequisite: ART 75 or instructor consent. Misc/Activity: 6 hours activity.
Normal Grade Rules
3 units

ART 103. Art as System
Experimental applications in the use of systems-based approach for art making. Focus on various CNC 3D printing/cutting methods, parametric art, CAD/CAM techniques, physical computing integration and collaborative art models. Prerequisites: ART 75 and ART 101. Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ART 104. Interdisciplinary Seminar in Digital Media Art
Investigation of theoretical topics in digital media art and analysis of contemporary technology research issues. Prerequisite: Upper division standing or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 105. Advanced Digital Video
Advanced exploration of digital video within the context of conceptual art practice. Focus on issues and applications of digital technology and critical thinking in art with specific focus on video, the Internet and alternative media applications. Prerequisite: ART 75 or permission of instructor. Misc/Lab: Lab 9 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 106. Topics in Human Machine Interface
Experimental applications in physical computing in art. Topics include computer-controlled sensors and actuators, the nature of the cyborg and interactive electronic interfaces for sculpture, environments and performance. Course is repeatable up to 6 units, when course topic changes. Prerequisites: ART 75 and ART 101 or permission of instructor. Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 107. Advanced Projects in Digital Media Art
Advanced issues and applications of digital technology in art. Application of interactive technology in installation and performance. Emphasis on collaborative projects, user interaction, and experience. Course is repeatable up to 6 units. Prerequisite: ART 75 or permission of instructor. Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 108. Introduction to Game Studies
Introduction to the systems, design, history, and cultural analysis of games with emphasis on critical studies, development, technological literacy, markets and impact on society. Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

ART 110. History and Theory of New Media
See ARTHY 110.
Normal Grade Rules
3 units

ART 124. Drawing 3
Form and expression in Drawing. Emphasis may vary with instructor.
Prerequisite: ART 024, ART 026
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 130. Topics in Intermediate Ceramics
Investigation of ceramic form and surface design with emphasis on the vessel. Development of skills on the potter’s wheel and in glazing, kiln loading and firing. Included are raku, salt, earthenware, stoneware and porcelain. Repeatable for up to 9 units of credit when course topic changes. Prerequisite: ART 13 or instructor consent.
Misc/Lab: Activity 6 hours activity
Normal Grade Rules
3 units

ART 132. Topics in Intermediate Ceramics
Investigation of ceramic form and surface design with emphasis on the vessel. Development of skills on the potter’s wheel and in glazing, kiln loading and firing. Included are raku, salt, earthenware, stoneware and porcelain. Repeatable for up to 9 units of credit when course topic changes. Prerequisite: ART 46 or instructor consent.
Misc/Activity: 6 hours activity
Repeatable for credit
Normal Grade Rules
3 units

ART 133. Topics in Ceramic Sculpture
Focus on handbuilding and nontraditional techniques in clay and related media. Includes gallery and studio visits. Repeatable for credit when topic changes, up to 3 times. Prerequisite: ART 13, ART 46 or instructor consent.
Misc/Activity: 6 hours activity
Repeatable for credit
Normal Grade Rules
3 units

ART 134. Topics in Advanced Ceramics
Focus on personal stylistic development, individual critiques and portfolio preparation. Includes gallery and studio visits. Repeatable for credit when topic changes, up to 3 times. Prerequisite: ART 132 or ART 133.
Misc/Activity: 6 hours activity
Repeatable for credit
Normal Grade Rules
3 units

ART 135. Topics in Moldmaking for Artists
Introduction to moldmaking for upper division/graduate students. Course will include techniques for rubber molds for wax or plastic, molds for pressed clay, slip casting and waste molds. Course is repeatable for a total of 6 units. Prerequisite: ART 13 or instructor consent.
Notes: Offered only occasionally.
Misc/Activity: 6 hours activity
Repeatable for credit
Normal Grade Rules
3 units

ART 137. Figure Modeling
Representation of the human figure in three dimensions. Sculpting in clay from a live model. Course is repeatable for a total of 6 units. Prerequisite: ART 13 and ART 55 or instructor consent.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 138. Elementary Art Methods
Equips prospective pre-K through high school educators with the basic knowledge, skills, and strategies to effectively organize and provide sequential art education. Emphasis on art teaching methods, art curriculum development, and art experiences. Prerequisite: Upper division standing.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 139. Teaching Diversity through Art
Strategies for teaching ideas of diversity through art in the preschool through high school classroom. Students deepen their understanding of culture and context and of why the arts matter. Prerequisite: upper-division standing or instructor consent.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

<tbody>
<tr>
<td>ART 140</td>
<td>Topics in Glass</td>
<td>Introduction to glass working techniques, chemistry, history and concept. Basic glass blowing, sand casting, slumping, fusing, cold working, stained glass and gluing techniques. Taught through a series of hands-on projects. Repeatable for up to 9 units when topic changes.</td>
<td>3</td>
<td></td>
<td></td>
<td>ART 140, ART 13 or instructor consent</td>
</tr>
<tr>
<td>ART 141</td>
<td>Topics in Advanced Glass</td>
<td>Technical and esthetic aspects of glass for sculpture and design. Advanced blowing, kiln casting, mold making, lamp working, lathe techniques and surface treatments. Repeatable for up to 9 units of credit when topic changes.</td>
<td></td>
<td></td>
<td></td>
<td>ART 140, ART 13 or instructor consent</td>
</tr>
<tr>
<td>ART 142</td>
<td>Topics in Metalsmithing and Jewelry</td>
<td>Technical and esthetic aspects of metalsmithing and jewelry design. Fabricating, surfacing, soldering, raising, forming and forging. Repeatable for 12 units of credit when topic changes.</td>
<td>3</td>
<td></td>
<td></td>
<td>Upper division standing or permission of instructor</td>
</tr>
<tr>
<td>ART 149</td>
<td>Topics in Jewelry and Small Sculpture</td>
<td>Technical and esthetic aspects of metalcasting for small-scale sculpture and jewelry. Pattern materials, gating techniques, burnout procedure, vacuum casting, centrifugal casting and finishing. Repeatable for 12 units of credit when topic changes.</td>
<td>3</td>
<td></td>
<td></td>
<td>Upper division standing or permission of instructor</td>
</tr>

**DESCRIPTION CONTENTS**

July 1, 2019

Page 20 of 387
ART 170. Topics in Fabricated Sculpture
Fabricated Sculpture includes welding training, a concise history of fabricated metal sculpture since 1945, and studio time wherein the student practices skills and executes three steel sculptures. Repeatable for up to 9 units of credit when course topic changes.
Prerequisite: ART 13.
Misc/Lab: Lab 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

ART 171. Advanced Sculpture
Self expression and advanced techniques in sculpture. Emphasis will be placed on individual development, current directions and goals.
Prerequisite: 6 units of sculpture.
Misc/Activity: 6 hours activity
Repeatable for credit
Normal Grade Rules
3 units

ART 172. Intermediate Sculpture: System/Structure
This is an intermediate-level sculpture class with a focus on contemporary materials and processes. Students will make sculptural responses to timely issues raised in course readings and lectures.
Prerequisite: ART 68 or instructor consent.
Misc/Activity: 6 hours activity
Repeatable for credit
Normal Grade Rules
3 units

ART 173. Topics in Installation Art
Exploration of cross-disciplinary artmaking, with an emphasis on conceptual development and critical dialogue. Students make installation art and site-specific artworks using a variety of techniques and processes, including time-based media. Course can be repeated for up to 6 units when course topic changes.
Prerequisite: ART 13 or instructor consent.
Misc/Activity: 6 hours activity
Repeatable for credit
Normal Grade Rules
3 units

ART 174A. Museum and Gallery Operations
Theoretical and technical problems of gallery and museum work including administration, security and curatorship.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ART 174B. Internship: Museum and Gallery Operations
Supervised internship in museum or gallery. Experience including installation, curating and administration. Course is repeatable for a total of 6 units.
Prerequisite: ART 174A.
Repeatable for credit
Credit / No Credit
3 units

ART 175. Special Topics in Studio Art
Varying concepts, media or techniques. Emphasizing individual expression, professional ability and recent movements and directions in art.
Prerequisite: Upper division standing in art.
Misc/Activity: 6 hours activity
Repeatable for credit
Normal Grade Rules
3 units

ART 176. Workshops in Studio Art
Workshop introduction to specific studio art skills or techniques taught through a series of hands-on projects. Repeatable for up to 6 units when topic changes.
Prerequisite: Upper division standing or instructor consent.
Prerequisite: Upper division standing or instructor consent.
Misc/Activity: 6 hours activity
Repeatable for credit
Normal Grade Rules
1 unit

ART 177. Professional & Business Practices
An introduction to the ways and means necessary to build a career in the arts while successfully negotiating its challenges, this course will provide information on portfolio development and professional and business practices essential for the practicing artist.
Prerequisite: Upper division or graduate standing.
Normal Grade Rules
3 units

ART 178. Art Field Work
Professional practice in a selected field.
Prerequisite: Application for assignment made preceding semester. Supervisor and department approval.
Repeatable for credit
Credit / No Credit
1-3 units

ART 179. Special Problems in Art
Individual study on a tutorial basis.
Prerequisite: Qualified seniors or graduates.
Repeatable for credit
Credit / No Credit
3 units

ART 180. Individual Studies
Special topics or projects by arrangement with instructor. Course is repeatable up to 4 units of credit toward graduation.
Prerequisite: Majors or minors with Department of Art & Art History consent.
Repeatable for credit
Credit / No Credit
1-3 units

ART 193. Digital Materials
Technical skills to facilitate the realization of projects conceptually rooted in an analysis of computational media and its relationship to the physical world. Introduction to video and computational outputs integrated with tangible presentation methods. Material survey, exhibition strategies, and introductory fabrication techniques that facilitate projects bridging computation, architecture, objects, and the body.
Prerequisite: ART 74 and ART 75
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units

ART 195. BFA Group Exhibition
Student deliver individual approaches, methodologies, and practices in the creation of art and participate in a final group show demonstrating professional competence in the students area of concentration. Participation in the final exhibition with the approval of the student’s advisory committee is required.
Prerequisite: 30 units of upper division art, admission to the BFA program and ART 198, or ART 210 with advisor’s approval.
Credit / No Credit
3 units

ART 197. BA Senior Project
Creation of a studio art or design capstone project consisting of new work in media selected by student to be documented and presented to studio or design faculty.
Prerequisite: 15 units of upper division work in the major.
Credit / No Credit
3 units

ART 198. BFA Seminar
Preparation for BFA project and postgraduate career planning, this course includes field trips, class discussions and studio visits with art professionals.
Prerequisite: Prior acceptance in the B.F.A. program.
Normal Grade Rules
3 units

ART 199. BFA Project
A project demonstrating professional competence in area of concentration. A gallery exhibition with the approval of the student’s advisory committee is required.
Prerequisite: 30 units of upper division art, admission to the BFA program and ART 198, or ART 178 with advisor’s approval.
Credit / No Credit
3 units
GRADUATE

ART 200W. Professional Writing in Contemporary Art
Graduate seminar focusing on issues and practices of writing about contemporary art, including artist statements, exhibition catalogs and art criticism.
Prerequisites: Graduate Standing in Department of Art & Art History.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

ART 208. Graduate Photography Critique
Professional practice in the discipline of fine art photography is multi-faceted and complex. To embrace this diversity, Art 208 Graduate Photography Critique offers rotating topics that influence portfolio development, emphasize an ongoing critique of work, and build a healthy professional practice. Repeatable for up to 18 units of credit when course topic changes.
Prerequisite: Classified status in art or instructor consent.
Misc/Activity: 9 hours lab
Repeatable for credit
Normal Grade Rules
3 units

ART 210. Seminar in Digital Media Art
Theoretical discourse involving art and information culture. Review and analysis of contemporary theory and critical literature. Emphasis on collaborative activities and art practice.
Prerequisite: Classified status in art or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 217. Tutorials in Pictorial Arts
Individual projects in painting, drawing and printmaking supervised by an instructor.
Prerequisite: Classified or conditionally classified status in art and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 219. Tutorials in Spatial Art
Individual projects in sculpture, installation, performance and other 3-D media supervised by an instructor.
Prerequisite: Classified or conditionally classified status in art and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 220. Tutorials in Digital Media Art
Individual problems in selected area of research or practice.
Prerequisite: Classified status in art and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 221. Tutorials in Design
Individual projects in specialized design areas supervised by an instructor.
Prerequisite: Classified or conditionally classified status in art and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 222. Tutorials in Photography
Individual projects employing photographic media supervised by an instructor.
Prerequisite: Classified or conditionally classified status in art and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 260. Special Tutorials in Art
Individual problems in a selected area supervised by an instructor.
Prerequisite: Classified or conditionally classified status in art and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ART 276. Artists Teaching Art
Seminar will examine theoretical and practical issues of art education which relate to traditional institutions of higher learning as well as to other teaching opportunities in the community.
Prerequisite: Classified status in art or instructor consent.
Repeatable for credit
Credit / No Credit
3 units

ART 281. Interdisciplinary Critique Seminar
Interdisciplinary peer group critiques and discussion of individual student work. Repeatable for up to 9 units when topic changes.
Prerequisite: Admission to the MFA in Art program.
Repeatable for credit
Normal Grade Rules
3 units

ART 282A. Seminar in the Theory and Criticism of Contemporary Art
A historical approach to the thought of major critics and theoreticians of contemporary art.
Prerequisite: ARTH 191A and admission to classified MFA status in art or instructor consent.
Normal Grade Rules
3 units

ART 282B. Seminar in Contemporary Art
An examination of a particular theme in contemporary art theory. Repeatable for credit.
Prerequisite: ARTH 191A and admission to classified MFA status in art or instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
3 units

ART 297A. Master’s Special Study
Advanced individual research in an area closely related to the master’s thesis, research or project. Course may be repeated for a total of 6 units.
Prerequisite: Acceptance of qualifications for candidacy by Art Graduate Committee and permission of Thesis, Research or Project Committee chair.
Repeatable for credit
Credit / No Credit
3 units

ART 297B. Master’s Project
Advanced projects in Creative Expression.
Prerequisite: Admission to candidacy for the master’s degree in art.
Repeatable for credit
Credit / No Credit
3 units

ART 298A. MFA Special Study
Advanced individual research in an area closely related to the MFA in Art project.
Prerequisite: Admission to candidacy for the MFA in Art program.
Repeatable for credit
Mandatory CR/NC/RP
3 units

ART 298B. MFA Project
A creative project of professional caliber.
Prerequisite: Admission to candidacy for the MFA in Art degree.
Repeatable for credit
Mandatory CR/NC/RP
3 units
ART 299. Master’s Thesis or Project
Advanced problems in research. Course may be repeated for a total of 6 units.
Prerequisite: Admission to candidacy for the master’s degree in art.
Repeatable for credit
Mandatory CR/NC/RP
3 units

UPPER DIVISION
ART 1290R. Culminating Experience Supervision
This course satisfies the requirement that all graduate students must remain enrolled during semesters in which they are working solely on their theses or projects, for which they have previously received but not cleared an RP grade.
Prerequisite: Existing RP grade in a graduate-level thesis or project course.
Note: No Degree Credit
Repeatable for credit
No Degree Credit
1 unit

ART HISTORY AND VISUAL CULTURE
LOWER DIVISION
ARTH 011. Modern Art History
Introductory survey of 20th and 21st century art, its history, and its contexts. Related developments in illustration, design, other forms of art production, and cultural institutions such as museums, galleries, publications also considered.
Pre/Corequisite: ART 12 or ART 13 or PHOT 40 or instructor consent.
Normal Grade Rules
3 units

ARTH 070A. Art History, Prehistoric to Medieval
Western painting, sculpture and architecture from Prehistoric times through the Middle Ages. Important art works of Egypt, Greece, Rome and Medieval Europe.
CE Area C1
Normal Grade Rules
3 units

ARTH 070B. Art History, Renaissance to Modern
Western painting, sculpture and architecture from the Renaissance to the present. Masters of the Renaissance, Baroque, Rococo, Neo-Classicism, Romantic, and Modern periods, including Da Vinci, Michelangelo, Durer, Rembrandt, Vermeer, David, Delacroix and Monet.
CE Area C1
Normal Grade Rules
3 units

ARTH 070C. Arts of Asia
Major trends in the art of China, India and Japan, as well as Southeast and Central Asia and Korea, from the Neolithic period to the twentieth century.
CE Area C1
Normal Grade Rules
3 units

ARTH 072. Design in Society
Considers the cultural role of design in addressing human needs in shaping the environment, providing shelter, clothing, utilitarian objects, and transportation, in visual communication for political and entertainment purposes.
CE Area C1
Normal Grade Rules
3 units

UPPER DIVISION
ARTH 101. Introduction to Practice of Art History
Introduction to practice of art history including visual analysis, research tools, and examination of professional options.
Prerequisite: Art History and Visual Culture major or instructor consent.
Normal Grade Rules
3 units

ARTH 110. History and Theory of New Media
The history of art and technology introducing contemporary critical theory and practice. Course will address digital visualization, simulation, interactive network technologies in the arts and speculate on the artistic implications of advances in engineering and science.
Prerequisite: ARTH 070B or ARTH 072 or instructor consent.
Normal Grade Rules
3 units

ARTH 126. History of Photography
Technical developments and aesthetic trends in photography traced from its invention in the nineteenth century to the present day. Slide presentations, discussions, field trips.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

arth 299. Master’s Thesis or Project
Advanced problems in research. Course may be repeated for a total of 6 units.
Prerequisite: Admission to candidacy for the master’s degree in art.
Repeatable for credit
Mandatory CR/NC/RP
3 units

UPPER DIVISION
ART 1290R. Culminating Experience Supervision
This course satisfies the requirement that all graduate students must remain enrolled during semesters in which they are working solely on their theses or projects, for which they have previously received but not cleared an RP grade.
Prerequisite: Existing RP grade in a graduate-level thesis or project course.
Note: No Degree Credit
Repeatable for credit
No Degree Credit
1 unit

ARTh 011. Modern Art History
Introductory survey of 20th and 21st century art, its history, and its contexts. Related developments in illustration, design, other forms of art production, and cultural institutions such as museums, galleries, publications also considered.
Pre/Corequisite: ART 12 or ART 13 or PHOT 40 or instructor consent.
Normal Grade Rules
3 units

ARTH 070A. Art History, Prehistoric to Medieval
Western painting, sculpture and architecture from Prehistoric times through the Middle Ages. Important art works of Egypt, Greece, Rome and Medieval Europe.
CE Area C1
Normal Grade Rules
3 units

ARTH 070B. Art History, Renaissance to Modern
Western painting, sculpture and architecture from the Renaissance to the present. Masters of the Renaissance, Baroque, Rococo, Neo-Classicism, Romantic, and Modern periods, including Da Vinci, Michelangelo, Durer, Rembrandt, Vermeer, David, Delacroix and Monet.
CE Area C1
Normal Grade Rules
3 units

ARTH 070C. Arts of Asia
Major trends in the art of China, India and Japan, as well as Southeast and Central Asia and Korea, from the Neolithic period to the twentieth century.
CE Area C1
Normal Grade Rules
3 units

ARTH 072. Design in Society
Considers the cultural role of design in addressing human needs in shaping the environment, providing shelter, clothing, utilitarian objects, and transportation, in visual communication for political and entertainment purposes.
CE Area C1
Normal Grade Rules
3 units

UPPER DIVISION
ARTH 101. Introduction to Practice of Art History
Introduction to practice of art history including visual analysis, research tools, and examination of professional options.
Prerequisite: Art History and Visual Culture major or instructor consent.
Normal Grade Rules
3 units

ARTH 110. History and Theory of New Media
The history of art and technology introducing contemporary critical theory and practice. Course will address digital visualization, simulation, interactive network technologies in the arts and speculate on the artistic implications of advances in engineering and science.
Prerequisite: ARTH 070B or ARTH 072 or instructor consent.
Normal Grade Rules
3 units

ARTH 126. History of Photography
Technical developments and aesthetic trends in photography traced from its invention in the nineteenth century to the present day. Slide presentations, discussions, field trips.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units
ARTH 127. Photography, Film, and Architecture
This course presents a closely contextualized examination of major photographers, architects and film-makers through their work and their interpretations of modern culture and its spaces. Lectures will cover developments in photography, film and architecture, as well as the changing relationship among these media and other domains visual culture.
Prerequisite: ARTH 70B or Instructor Consent
Normal Grade Rules
3 units

ARTH 160. Modern Architecture
Development of modern architecture from the late 19th century to the present, including Richardson, Sullivan, Wright, Le Corbusier, the Bauhaus, Mies van der Rohe, Meier and Gehry.
Prerequisite: ARTH 070B, ARTH 072 or instructor consent.
Normal Grade Rules
3 units

ARTH 161. Contemporary Architecture
History of contemporary architecture since 1945, covering major trends and issues in a global context; includes Louis Kahn, Frank Gehry and Zaha Hadid.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 162. California Architecture
History of architecture in California since 1700, covering major architectural developments in a national and transnational context; includes Bernard Maybeck, Richard Neutra and Morphosis.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 163. Twentieth Century Urban Design
History of urban design since 1900, covering theories and practices of urban design in the industrialized world; includes Camillo Sitte, Le Corbusier and Frank Lloyd Wright.
Prerequisite: ARTH 70B or URBP 151 or instructor consent.
Normal Grade Rules
3 units

ARTH 174A. Museum and Gallery Operations
See ART 174A.
Normal Grade Rules
3 units

ARTH 174B. Internship: Museum and Gallery Operations
See ART 174B.
Repeatable for credit
Credit / No Credit
3 units

ARTH 175. Theories of Art History and Art Criticism
The study of approaches used by professional art historians and critics. The focus will be on 20th century writers who helped shape the development of contemporary art history and criticism.
Prerequisite: Upper division standing, 6 units of ARTH 70A, ARTH 70B, and/or ARTH 70C or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 176A. Graphic Design History and Theory
The history of graphic design and typography with an emphasis on the 20th century. Define technological, historical and theoretical concerns and influences on individuals and movements in graphic design.
Prerequisite: ARTH 072, completion of Area Z, or instructor consent.
Normal Grade Rules
3 units

ARTH 176B. Industrial Design in Society
History of industrial design since 1900. Course covers practice and theories of major industrial designers and design movements in the context of social attitudes toward consumption, production, and aesthetics.
Prerequisite: ARTH 72 or instructor consent.
Normal Grade Rules
3 units

ARTH 178. Art History Field Work
Professional practice in a selected field of Art History.
Prerequisite: Application for assignment made preceding semester. Supervisor and department approval.
Repeatable for credit
Credit / No Credit
1-3 units

ARTH 179. Individual Studies in Art History
In-depth analysis of a selected art historical topic.
Prerequisite: Majors or minors with Department of Art & Art History consent.
Repeatable for credit
Normal Grade Rules
1-4 units

ARTH 180. Special Topics in Art History
In-depth analysis of a selected art historical topic.
Prerequisite: ARTH 70A and ARTH 70B or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 182A. Art of the Americas
A survey of architecture, ceramics, metalwork, sculpture, painting and textiles of North, South, and Meso American cultures.
Prerequisite: ARTH 70A or instructor consent.
Normal Grade Rules
3 units

ARTH 182B. American Art
From the Colonial Period to 1940. Social context of America.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

ARTH 183A. Art of Egypt and Mesopotamia
The Arts of Egypt, Sumer, Akkad, Babylonia, Assyria, Anatolia, Hittites, and Persia (Elamite to Sassanian).
Prerequisite: ARTH 70A or instructor consent.
Normal Grade Rules
3 units

ARTH 183B. Art of Islam-Early Islam to the Seljuks
Focus on the varied Islamic art and architecture from the 7th century to the 13th century, early Islamic period through the Seljuks.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

ARTH 183C. Art of Islam 13th-19th Century
This course will focus on the varied Islamic art and architecture from the 13th century to the 19th century, from Mongols through the Ottomans.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

ARTH 185. Art of the Classical World
Focus on the ancient arts of Greece, Roman and Etruria from the 8th century BC through the 4th century AD. Major monuments: Parthenon, Altar of Zeus at Pergamon, Ara Pacis and Forum of Trajan.
Prerequisite: ARTH 70A or instructor consent.
Normal Grade Rules
3 units

ARTH 186. Medieval Art
Introductory survey of art and architecture from from the end of the Western Roman Empire, circa 500 AD to the beginning of the Italian Renaissance, circa 1400 AD. Focuses on the meanings and uses of art and architecture within their specific historical and cultural contexts.
Normal Grade Rules
3 units
ARTH 187A. Art of the Italian Renaissance, Fifteenth Century
Early Renaissance art and architecture. Masaccio, Botticelli, Brunelleschi and Donatello.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 187B. Art of the Italian Renaissance, Sixteenth Century
High Renaissance and Mannerism in Italy. Leonardo, Michelangelo, Raphael and Titian.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 187C. The Art of Renaissance Venice
A study of Venetian art and its urban ideology, 11th through 18th century, emphasizing the great painters and architects of the Renaissance (Carpaccio, Bellini, Titian, Tintoretto and Veronese, Mauro Codussi, Sansovino and Palladio).
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 188A. Northern Renaissance Fourteenth and Fifteenth Centuries
Survey of art of Netherlans, France and Bohemia from mid-fourteenth through fifteenth century. Principal artists covered include the Limbourg Brothers, Van Eyck, Van der Weyden, Memling and Fouquet. Emphasis on northern painting, manuscripts, tapestries, traditions, iconography and social history of northern European art.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 188B. Northern Renaissance, Sixteenth Century
Survey of fifteenth and sixteenth century art of Netherlands, France and Germany. Principal artists covered include Bosch, Durer, Cranewald, Hollein and Bruegel. Emphasis on northern painting, printmaking traditions, iconography, social history of northern European art.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 189A. Baroque Art and Architecture in Italy and France
The art and architecture of Italy and France in the late 16th and 17th centuries. Broad trends and issues, artists such as Bernini, Caravaggio, the Carracci, Borromini, Poussin, Mansart.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 189B. Northern Baroque Art and Architecture
Art and architecture of Spain, the Low Countries, Germany, Austria in the 17th and 18th centuries. Artists such as Velazquez, Rubens, Rembrandt, Vermeer and Goya.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 190A. Art of the Nineteenth Century
Western Europe from Neoclassicism through Post-Impressionism including David, Delacroix, Goya, Manet, Monet, Cassatt, Cezanne, Van Gogh and Gauguin.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 190B. Early Modernist Art
Critical investigation of modern art from the 1880’s (Post Impressionism) to World War I with an emphasis on painting and sculpture with some attention paid to architecture, photography, printmaking and design.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 190C. 20th Century Art: from Dada to Pop
Critical investigation of modernist art from World War I to the 1960s (from Dada to Pop art) with an emphasis on painting and sculpture but some attention paid to architecture, photography, printmaking and design.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 191A. Issues in Contemporary Art
A critical investigation of a theme which bears on the arts from mid-century to the present, looking closely at major artists and trends in order to understand their philosophies, objectives, styles, and contexts. Course is repeatable for a total of 6 units.
Prerequisite: ARTH 70B.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 191B. Women in Art
Contributions made to Western culture by women involved in the arts from the Middle Ages to the present and the influence on art of attitudes held about women.
Prerequisite: ARTH 70B or instructor consent.
Normal Grade Rules
3 units

ARTH 191C. Contemporary Art in Mexico, the U.S., and Latin America
Contemporary Art in Mexico, the U.S., and Latin America. Includes Mexican modernism, social movements of post-revolutionary Mexico (1910-1940), and works influenced by the Chicano Civil Rights Movement (El Movimiento) in the United States (1960s-1990s) up to the present day.
Prerequisite: ARTH 70B or completion of Area Z or instructor consent
Normal Grade Rules
3 units

ARTH 192A. Modern Design
History of design philosophy and practice from the Industrial Revolution to the present including Art Nouveau and Art Deco, the Bauhaus, International Style, Functionalism vs. Formalism, Post-Modern and Deconstructivism.
Prerequisite: ARTH 072, completion of Area Z, or instructor consent
Normal Grade Rules
3 units

ARTH 192C. History of Interior Design
Survey of interior design through historical, political, social, economic, technological, and aesthetic factors that shape the built environment. Design will be analyzed formally and through parallel developments in the arts.
Prerequisite: ARTH 070B or ARTH 072, completion of Area Z, or instructor consent.
Normal Grade Rules
3 units

ARTH 193A. Worlds of Art and Culture
Focuses on the use of art images as primary sources for the study of cultural development in a globalized context and ways in which past cultures and their interactions influence the modern world. CE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
CE: V
3 units
ARTH 193B. East Meets West in Art
Comparative study of Eastern and Western art. Emphasis on cross-fertilization. Historical and cultural backgrounds. Includes lectures, discussions and presentations. Research or art project and paper required. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

ARTH 194A. Art of China
Architecture, sculpture and painting in China from prehistoric times to the Republic. Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

ARTH 195. Art of Japan
Architecture, sculpture and painting in Japan from prehistoric times to Edo era. Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

ARTH 196. German Art, 1800-2000
This course is an upper-division survey of historical figures, movements and developments in German art, architecture, aesthetics and design from the late Enlightenment to the present era. Prerequisite: ARTH 70B or completion of Area Z or instructor consent.
Normal Grade Rules
3 units

ARTH 199. Art History Capstone Seminar
This seminar explores art history as an academic discipline. Topics include: discovering subfields within art history; constructing art historical arguments; and the methods and practices of art history. Prerequisites: ARTH 70A or 70C; ARTH 70B; ARTH 100W
Normal Grade Rules
3 units

GRADUATE

ARTH 270. Seminar in Ancient Art
Directed group research in area of Egyptian, Mesopotamian, Minoan-Mycenaean, Greek, Etruscan or Roman Art History on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes. Prerequisite: At least two upper division art history courses or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 271. Seminar in Medieval Art
Directed group research in area of European Medieval art history on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes. Prerequisite: At least two upper division art history courses or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 272. Seminar in Renaissance Art
Directed group research in area of European art history of Renaissance period on topic designated by instructor. Research project required. Course is repeatable for up to 9 units of credit when course topic changes. Prerequisite: At least two upper division art history courses or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 273. Seminar in Baroque Art
Directed group research in area of European or Latin American art history of Baroque period on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes. Prerequisite: At least two upper division art history courses or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 274. Seminar in Nineteenth Century Art
Directed group research in area of European or American art of nineteenth century on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes. Prerequisite: At least two upper division art history courses or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 275. Seminar in Twentieth Century Art
Directed group research in area of European or American art of twentieth century on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes. Prerequisite: At least two upper division art history courses or instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
3 units

ARTH 276. Seminar in Oriental Art
Directed group research in area of Asian art on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes. Prerequisite: At least two upper division art history courses or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 277. Seminar in Historiography
Directed group research in theories and methodologies of art history. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes. Prerequisite: At least two upper division art history courses or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 278. Seminar in Myth and Symbol
Directed group research in sources and meanings of myths and symbols. Research projects required. Repeatable for up to 9 units of credit when course topic changes. Prerequisite: At least two upper division art history courses or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

ARTH 279. Seminar in Interdisciplinary Studies
Directed group research in examination of relationship of art history to other academic disciplines on topic designated by instructor. Research projects required. Course is repeatable for up to 9 units of credit when course topic changes. Prerequisite: At least two upper division art history courses or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units
ARTH 291. Graduate Problems in Art History
Independent studies on a focused research project.
Repeatably for credit
Normal Grade Rules
3 units

UPPER DIVISION
ARTH 1290R. Culminating Experience
Supervision
This course satisfies the requirement that all graduate students must remain enrolled during semesters in which they are working solely on their theses or projects, for which they have previously received but not cleared an RP grade.
Prerequisite: Existing RP grade in a graduate-level thesis or project course
Note: No Degree Credit.
Repeatably for credit
No Degree Credit
1 unit

PHOT 040. Beginning Photography
A beginning photography course which introduces basic aesthetic issues in (primarily black and white) image making. Introduces photographic technique utilizing digital cameras, electronic image processing and digital printing. Requires a DSLR (digital single lens reflex) type camera. Requires Adobe Lightroom.
Normal Grade Rules
3 units

PHOT 110. Black and White Photography
A traditional darkroom photography class which introduces black and white film developing, fiber based printing, and image manipulation and presentation techniques. Taught with traditional film and photo paper; requires a film camera, limited number of which department can loan students.
Prerequisite: PHOT 40.
Normal Grade Rules
3 units

PHOT 112. Color Photography
An intermediate course introducing principles of color photography, color theory, a refined use of the camera and digital printing techniques. Requires a DSLR (digital single lens reflex) type camera. Requires Adobe Lightroom and Adobe Photoshop.
Prerequisite: PHOT 40.
Normal Grade Rules
3 units

PHOT 114. Advanced Black and White Photography
An advanced exploration of traditional silver based film and darkroom printing, the use of view cameras, and the Zone System. Provides students with the opportunity to explore qualities of expression unique to the gelatin silver process.
Prerequisite: PHOT 040 and PHOT 110 or instructor consent.
Normal Grade Rules
3 units

PHOT 115. Intermediate Digital Imaging
An intermediate level course investigating the unique possibilities afforded by contemporary digital imaging. Includes preparation of images for presentation via print, video and/or web. Emphasis upon incorporating digital tools with ongoing development of student work.
Prerequisite: PHOT 040.
Normal Grade Rules
3 units

PHOT 116. Contemporary Issues in Photography
Examination and discussion of aesthetic trends and philosophies in photography and related media, their impact on the medium and society.
Prerequisite: PHOT 040
Normal Grade Rules
3 units

PHOT 121. Introduction to Studio Lighting
Concepts and principles of lighting using both daylight and incandescent light sources and the use of standard studio lighting equipment.
Prerequisite: PHOT 40.
Normal Grade Rules
3 units

PHOT 122. Advanced Studio Lighting
An advanced studio lighting course incorporating practices of professional photographic techniques that can be applied to commercial advertising photography or applied as fine art imagery. Training on professional level equipment is emphasized.
Prerequisite: PHOT 121
Normal Grade Rules
3 units

PHOT 123. Photography as Illustration
Technical and conceptual aspects of producing effective photographic illustrations for fine art and commercial purposes (fine art exhibitions, advertisements, posters, magazines, story illustrations, etc.). Can include studio work, location photography, darkroom work and digital manipulation.
Prerequisite: PHOT 40.
Repeatable for credit
Normal Grade Rules
3 units

PHOT 125. Special Topics in Photography
Photography is a rapidly evolving field of study. In order to keep our curriculum current and add diversity to our staple of course offerings, our Photo 125, “Special Topics in Photography” offers a rotating variety of contemporary topics. Can be repeated for up to 15 units of credit when course topic changes.
Prerequisite: PHOT 112, PHOT 113, PHOT 115, or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

PHOT 126. History of Photography
See ARTH 126.
Normal Grade Rules
3 units

PHOT 129. Professional Practices in Photography
Designed to prepare graduating photo majors for practicing their profession. Emphasis will be placed on building a comprehensive portfolio and business identity. Course is repeatable once for credit.
Prerequisite: PHOT 120, PHOT 121, plus two additional upper division photography courses.
Repeatable for credit
Normal Grade Rules
3 units

PHOT 180. Individual Studies
Individual work under guidance in field of special interest.
Prerequisite: PHOT 110.
Repeatable for credit
Credit / No Credit
1-3 units
PHOT 197. Senior Project Photography
Advanced course focused on creation or further development of photo-based project to be determined by the student and consisting of new work. Course emphasizes developing professional exit skills, a final body of finished work, and a professional portfolio. Prerequisite: 15 units of upper division courses in PHOT
Normal Grade Rules
3 units
# Athletics (Intercollegiate) Courses

## INTERCOLLEGIATE ATHLETICS

### LOWER DIVISION

**ATH 002I. Men's Baseball**
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men's baseball including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
- Repeatable for credit
- Normal Grade Rules
- 1 unit

**ATH 002S. Men's Skills Development, Baseball**
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate men's baseball. Approximately 8 hours per week.
- Repeatable for credit
- Credit / No Credit
- 1 unit

**ATH 004I. Men's Basketball**
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men's basketball including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
- Repeatable for credit
- Normal Grade Rules
- 1 unit

**ATH 004S. Men's Skills Development, Basketball**
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate men's basketball. Approximately 8 hours per week.
- Repeatable for credit
- Credit / No Credit
- 1 unit

**ATH 006I. Women's Basketball**
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's basketball including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
- Repeatable for credit
- Normal Grade Rules
- 1 unit

**ATH 006S. Women's Skills Development, Basketball**
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's basketball. Approximately 8 hours per week.
- Repeatable for credit
- Credit / No Credit
- 1 unit

**ATH 012I. Football**
Activities include mental and physical skill development for successful participation in NCAA intercollegiate football including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
- Repeatable for credit
- Normal Grade Rules
- 1 unit

**ATH 012S. Skills Development, Football**
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate football. Approximately 8 hours per week.
- Repeatable for credit
- Credit / No Credit
- 1 unit

**ATH 014I. Men's Golf**
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men's golf including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
- Repeatable for credit
- Normal Grade Rules
- 1 unit

**ATH 014S. Men's Skills Development, Golf**
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate men's golf. Approximately 8 hours per week.
- Repeatable for credit
- Credit / No Credit
- 1 unit

**ATH 016I. Women's Golf**
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's golf including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
- Repeatable for credit
- Normal Grade Rules
- 1 unit

**ATH 016S. Women's Skills Development, Golf**
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's golf. Approximately 8 hours per week.
- Repeatable for credit
- Credit / No Credit
- 1 unit

**ATH 020I. Women's Gymnastics**
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's gymnastics. Approximately 8 hours per week.
- Repeatable for credit
- Credit / No Credit
- 1 unit

**ATH 020S. Women's Skills Development, Gymnastics**
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's gymnastics. Approximately 8 hours per week.
- Repeatable for credit
- Normal Grade Rules
- 1 unit

**ATH 026I. Women's Tennis**
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's tennis including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
- Repeatable for credit
- Normal Grade Rules
- 1 unit

**ATH 026S. Women's Skills Development, Tennis**
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women's tennis. Approximately 8 hours per week.
- Repeatable for credit
- Normal Grade Rules
- 1 unit

**ATH 030I. Men's Soccer**
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men's soccer including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
- Repeatable for credit
- Normal Grade Rules
- 1 unit
ATH 030S. Men's Skills Development, Soccer
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate men's soccer. Approximately 8 hours per week.
Repeatable for credit
Credit / No Credit
1 unit

ATH 032I. Softball
Activities include mental and physical skill development for successful participation in NCAA intercollegiate softball including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
Repeatable for credit
Normal Grade Rules
1 unit

ATH 032S. Women's Skills Development, Softball
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate softball. Approximately 8 hours per week.
Repeatable for credit
Credit / No Credit
1 unit

ATH 034I. Women's Swimming
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's swimming including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
Repeatable for credit
Normal Grade Rules
1 unit

ATH 034S. Women's Skills Development, Swimming
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women’s swimming. Approximately 8 hours per week.
Repeatable for credit
Credit / No Credit
1 unit

ATH 036I. Women's Volleyball
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women’s volleyball including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
Repeatable for credit
Normal Grade Rules
1 unit

ATH 036S. Women's Skills Development, Volleyball
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women’s volleyball. Approximately 8 hours per week.
Repeatable for credit
Credit / No Credit
1 unit

ATH 042I. Women's Cross Country
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women's cross country including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
Repeatable for credit
Normal Grade Rules
1 unit

ATH 042S. Women's Skill's Development, Cross Country
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women’s cross country. Approximately 8 hours per week.
Repeatable for credit
Credit / No Credit
1 unit

ATH 044I. Women's Soccer
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women’s soccer including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
Repeatable for credit
Normal Grade Rules
1 unit

ATH 044S. Women's Skills Development, Soccer
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women’s soccer. Approximately 8 hours per week.
Repeatable for credit
Credit / No Credit
1 unit

ATH 046I. Women's Water Polo
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women’s water polo including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
Repeatable for credit
Normal Grade Rules
1 unit

ATH 046S. Women's Skills Development, Water Polo
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women’s water polo. Approximately 8 hours per week.
Repeatable for credit
Credit / No Credit
1 unit

ATH 048I. Men's Cross Country
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men’s cross country including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
Repeatable for credit
Normal Grade Rules
1 unit

ATH 048S. Men's Skills Development, Cross Country
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate men’s cross country. Approximately 8 hours per week.
Repeatable for credit
Credit / No Credit
1 unit

ATH 050I. Women’s Track & Field
Activities include mental and physical skill development for successful participation in NCAA intercollegiate women’s track & field including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
Repeatable for credit
Normal Grade Rules
1 unit

ATH 050S. Women’ Skills Development, Track & Field
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate women’s track & field. Approximately 8 hours per week.
Repeatable for credit
Normal Grade Rules
1 unit

ATH 052I. Men’s Water Polo
Activities include mental and physical skill development for successful participation in NCAA intercollegiate men’s water polo including drills, assignments, film study, scrimmages and competitions not to exceed 20 hours per week.
Repeatable for credit
Normal Grade Rules
1 unit
ATH 052S. Men’s Skills Development, Water Polo
Activities include sport specific fitness training and conditioning for successful participation in NCAA intercollegiate men’s water polo. Approximately 8 hours per week.
  Repeatable for credit
  Normal Grade Rules
  1 unit
Aviation Courses

AVIATION

LOWER DIVISION

AVIA 001. Introduction to the Aviation Industry
Career planning, paths, and opportunities within the aviation industry. Concepts and knowledge building blocks for any aviation professional, including history of aviation; qualifications and privileges of aviation professionals; basics of aeronautics.

Pre/Co-requisite: AVIA 001

Normal Grade Rules
3 units

AVIA 002. Private Pilot Ground
Foundational concepts of aviation studies for professional pilots. Ground course for private pilot FAA certification. Aeronautics basics, weather, visual navigation, regulations, and operational environment for conducting flights under visual flight rules.

Prerequisite: AVIA 001

Normal Grade Rules
3 units

AVIA 003. Introduction to Private Pilot Part 141 Flight
This course covers the FAA requirements leading up to the award of the FAA Private Pilot Certificate. The course consists of flight training segments in an FAA-approved FAR part 141 flight training program.

Prerequisite: AVIA 002

Credit / No Credit
2 units

AVIA 031. Aircraft Theory and Design
Aerodynamics and aeroelastics force. Load analysis of flight vehicles. Aircraft design optimization, material selection along with, safe-life, fail-safe and damage tolerance in design.

Prerequisite: AVIA 2, PHYS 2A, MATH 71

Pre/Co-requisite: PHYS 2B

Misc/Lab: Lecture 2 hours/Lab 3 hours.

Normal Grade Rules
3 units

AVIA 042. Aircraft Systems
Operational and analytical aspects of key aircraft systems such as propulsion, flight control, electrical, and hydraulic. Reliability and maintainability concepts related to the design of aircraft systems. Emphasis is placed on general aviation aircraft.

Prerequisite: AVIA 2, PHYS 2A

Pre/Co-requisite: PHYS 2B

Misc/Lab: Lecture 2 hours/lab 3 hours.

Normal Grade Rules
3 units

AVIA 043. Propulsion Theory

Prerequisite: AVIA 2, PHYS 2A

Pre/Co-requisite: PHYS 2B

Misc/Lab: Lecture 2 hours/lab 3 hours.

Normal Grade Rules
3 units

AVIA 062. Instrument Pilot Ground
Flight procedures, radio navigation, air traffic control, use of instrument charts. Flight simulator exercises on instrument flight maneuvers, departure and approach procedures.

Prerequisite: AVIA 2

Normal Grade Rules
3 units

AVIA 063. Instrument Rating Part 141 Flight
This course covers the FAA requirements leading up to the award of the FAA Instrument Rating Certificate. The course consists of 29 instrument flight training segments in an FAA approved FAR part 141 instrument flight training program.

Prerequisite: AVIA 003 or FAA Private Pilot Certificate, Avia 71

Credit / No Credit
2 units

AVIA 068. Avionics and Airborne Communication
Communications and navigation systems installed on a typical general aviation aircraft. History of avionics. Laboratory exercises will include field-testing and airworthiness evaluation.

Pre/corequisite: AVIA 42

Misc/Lab: Lecture 2 hours/lab 3 hours.

Normal Grade Rules
3 units

AVIA 073. Air Traffic Control

Prerequisite: AVIA 2

Normal Grade Rules
3 units

AVIA 078. Introduction to Aviation Management

Normal Grade Rules
3 units

AVIA 091. Aircraft Turbine Engines
A study of gas turbine fundamentals, including various gas turbine cycles, components and component efficiency, thrust, specific fuel consumption, duct flow and inlet diffuser, centrifugal and axial compressors, combustion chambers and jet nozzles for aircraft propulsion.

Prerequisite: AVIA 43

Normal Grade Rules
3 units

UPPER DIVISION

AVIA 110. Aviation Meteorology
Introduction to meteorology with emphasis on aviation applications. Causes of weather; characteristics of common weather phenomena and climatology. Aviation weather resources and reporting, and weather briefings in relation to visual and instrument meteorological conditions for flying.

Normal Grade Rules
3 units

AVIA 112. Commercial Pilot Ground
Material necessary for the FAA requirements leading up to the award of the FAA Commercial Pilot Certificate. Formatted as a ground school and covers the aeronautical knowledge requirements for the Commercial Pilot Knowledge Test.

Prerequisite: Avia 31, Avia 42, Avia 91

Normal Grade Rules
3 units

AVIA 113. Commercial Professional Pilot Part 141 Flight
This course covers the FAA requirements leading up to the award of the FAA Commercial Pilot Certificate. The course consists of 58 flight training segments in an FAA approved FAR part 141 flight training program.

Prerequisite: FAA Private Pilot Certificate

Co-requisite: AVIA 112

Credit / No Credit
2 units

AVIA 128. Aviation Safety and Security
Safety in aviation design, operation, and maintenance; hazardous materials; airport environment issues; security regulations for aviation.

Prerequisite: AVIA 2

Normal Grade Rules
3 units

AVIA 141. Human Factors in the Aviation Environment
Effects of time zone changes, sleep disruption, drugs on pilot performance. Role of FAA inspectors, physicians, cabin attendants, unions. Cockpit crew coordination; pilot psychology; aviation safety and accident investigation. Experimental avionics.

Prerequisite: Sophomore or Upper division standing.

Notes: Not an elective in most department majors.

Normal Grade Rules
3 units
### Academic Year 2019-2020

#### Course Descriptions

**AVIA 150. Unmanned Aerial Systems**  
Prerequisite: AVIA 31 or Instructor Consent  
Normal Grade Rules  
3 units

**AVIA 173. Aviation Law**  
Law and legal issues in aviation from both a national and international perspective. Rights and responsibilities of individuals, organizations, and the aviation community. Regulations and liability pertaining to the design, manufacture, operation and maintenance of aircraft.  
Prerequisite: AVIA 78.  
Normal Grade Rules  
3 units

**AVIA 176. Airline Operations and Management**  
Aspects of managing air transportation companies. Integration of technical, environmental, market and regulatory considerations in the decision-making process in airline management. Future planning techniques.  
Prerequisite: AVIA 78.  
Normal Grade Rules  
3 units

**AVIA 177. General Aviation Operations and Management**  
Aspects of managing general aviation companies, such as the structure of the general aviation industry, supply and demand of products, and technical and regulatory constraints.  
Prerequisite: AVIA 2, AVIA 78  
Normal Grade Rules  
3 units

**AVIA 178. Airport Planning and Management**  
Design, planning, and management of airports in the US including airport development and airport design. Legal responsibilities as an airport manager. Issues and regulations applicable to airport planning and management.  
Prerequisite: AVIA 78.  
Normal Grade Rules  
3 units

**AVIA 179. Advanced Airport Planning and Management**  
Noise generation and abatement. Leasing and property management including the impact of federal regulations. Concession planning. Use of technology to increase efficiency and security in airports.  
Prerequisite: AVIA 178.  
Normal Grade Rules  
3 units

**AVIA 180. Individual Studies**  
Special topics by arrangement. Course is repeatable for a maximum of 3 units.  
Prerequisite: Aviation majors or minors after advisor consultation and department chair approval.  
Repeatable for credit  
Credit / No Credit  
1-3 units

**AVIA 180H. Individual Studies**  
Individual honors studies by arrangement. Course is repeatable for a maximum of 2 units.  
Prerequisite: Acceptance into Aviation Honors Program.  
Repeatable for credit  
Credit / No Credit  
1-2 units

**AVIA 190. Senior Capstone Seminar**  
Current industry analysis and career development, leadership skills for an aviation professional. Aviation standard procedures. Ethical principles for Aviation. Student projects related to Aviation major.  
Prerequisite: Graduating senior, major form completed  
Normal Grade Rules  
3 units

**AVIA 193. Aerodynamics**  
Aerodynamic forces involved in an airplane in flight. Fundamental flowing gas, incompressible and compressible flow, Bernoulli’s Principles, circulation forces, boundary layer, airfoils, measurement methods, laminar and turbulent flow, force and vortex interactions.  
Prerequisite: PHYS 2A, MATH 71, AVIA 31.  
Misc/Lab: Lecture 2 hours/Lab 3 hours  
Normal Grade Rules  
3 units

**AVIA 194. Pilot Avionics and General Aviation Systems**  
Operations of avionics as found on modern general aviation aircraft and turboprop/turbofan aircraft. Major systems used on general aviation aircraft including GPS, FMS, navigation systems, fuel systems, hydraulic systems, environmental systems, landing gear.  
Prerequisite: AVIA 42, AVIA 43.  
Normal Grade Rules  
3 units

**AVIA 195. Internship with the Aviation Industry**  
Practical experience with aviation industry under direct supervision of aviation professionals. Experience will relate to air carrier or general aviation aircraft operation/management/maintenance, fixed-based operation management and/or airport operation/management. Course is repeatable for a maximum of 12 units.  
Prerequisite: Junior standing and instructor consent.  
Repeatable for credit  
Credit / No Credit  
1-6 units

**AVIA 197. Cooperative Education Project**  
See ENGR 197.  
Normal Grade Rules  
3 units

**AVIA 198. Aviation and Human Civilization**  
Critical analysis of the role of aviation in human civilization focusing on cultures outside the US and how their development impacted US practices. Topics include: aviation early history; impact of aviation on global economy; gender disparity in the field. Meets SJSU Studies Area: V  
Prerequisite: Completion of Core General Education and upper division standing are prerequisites to all SJSU Studies courses.  
Normal Grade Rules  
CE: V  
3 units

**AVIA 199A. Special Topics in Aviation Management**  
Special topics in Aviation Management. Content varies from semester to semester. Course is repeatable for a total of 6 units.  
Prerequisite: Instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

**AVIA 199B. Special Topics in Aviation Operations**  
Special topics in Aviation Operations. Content varies from semester to semester. Course is repeatable for a total of 6 units.  
Prerequisite: Instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

**AVIA 199X. Special Topics by Arrangement**  
Special topics by arrangement. Course is repeatable for a maximum of 12 units.  
Prerequisite: Aviation majors or minors after advisor consultation and department chair approval.  
Repeatable for credit  
Credit / No Credit  
1-2 units

**AVIA 199Y. Special Topics by Arrangement**  
Special topics by arrangement. Course is repeatable for a maximum of 3 units.  
Prerequisite: Aviation majors or minors after advisor consultation and department chair approval.  
Repeatable for credit  
Credit / No Credit  
1-3 units

**AVIA 199Z. Special Topics by Arrangement**  
Special topics by arrangement. Course is repeatable for a maximum of 1 unit.  
Prerequisite: Aviation majors or minors after advisor consultation and department chair approval.  
Repeatable for credit  
Credit / No Credit  
1 unit

**AVIA 198. Aviation and Human Civilization**  
Critical analysis of the role of aviation in human civilization focusing on cultures outside the US and how their development impacted US practices. Topics include: aviation early history; impact of aviation on global economy; gender disparity in the field. Meets SJSU Studies Area: V  
Prerequisite: Completion of Core General Education and upper division standing are prerequisites to all SJSU Studies courses.  
Normal Grade Rules  
CE: V  
3 units

**AVIA 199A. Special Topics in Aviation Management**  
Special topics in Aviation Management. Content varies from semester to semester. Course is repeatable for a total of 6 units.  
Prerequisite: Instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

**AVIA 199B. Special Topics in Aviation Operations**  
Special topics in Aviation Operations. Content varies from semester to semester. Course is repeatable for a total of 6 units.  
Prerequisite: Instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units

**AVIA 199X. Special Topics by Arrangement**  
Special topics by arrangement. Course is repeatable for a maximum of 12 units.  
Prerequisite: Aviation majors or minors after advisor consultation and department chair approval.  
Repeatable for credit  
Credit / No Credit  
1-6 units

**AVIA 199Y. Special Topics by Arrangement**  
Special topics by arrangement. Course is repeatable for a maximum of 3 units.  
Prerequisite: Aviation majors or minors after advisor consultation and department chair approval.  
Repeatable for credit  
Credit / No Credit  
1-3 units

**AVIA 199Z. Special Topics by Arrangement**  
Special topics by arrangement. Course is repeatable for a maximum of 1 unit.  
Prerequisite: Aviation majors or minors after advisor consultation and department chair approval.  
Repeatable for credit  
Credit / No Credit  
1 unit
Biological Sciences Department Courses

BIOLOGY

LOWER DIVISION

BIOL 010. The Living World
Provides students with an understanding of the most fundamental concepts of modern biology including ecology (the interaction between organisms and their environment), human inheritance, the structure and function of living organisms, evolution, strategies for survival and reproduction, and biotechnology. GE Area: B2
Notes: Not an elective in the department majors.
Normal Grade Rules
CE B2 3 units

BIOL 020. Ecological Biology
Introduction to diversity, ecology, evolution and behavior. In conjunction with BIOL 21 a more complete survey of biology. GE Area: B2 and B3
Misc/Lab: Lecture 2 hours/lab 3 hours/field trips.
Notes: Not an elective in the department majors.
Normal Grade Rules
CE B2B3 3 units

BIOL 021. Human Biology
Introduction to physiology, reproduction, development, heredity and aging. With BIOL 20 a more complete survey of biology. GE Area: B2 and B3
Misc/Lab: Lecture 2 hours/lab 3 hours.
Notes: Not an elective in the department majors.
Normal Grade Rules
CE B2B3 3 units

BIOL 030. Principles of Biology I
Cellular and physiological aspects of biological diversity. Concepts include: biomolecules, cellular structures/function, cell-cell communication, cellular energetics, molecular evolution, gene expression, enzymes, and animal physiological systems.
Prerequisite: Writing Enrollment Group W-1 or W-II, or ENGL 1AF with a grade of CR, or ENGL 1A with a grade of C- or better; Math Enrollment Group M-I or M-II, or completion of a GE Area B4 course.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
CE B2B3 4 units

BIOL 031. Principles of Biology II
The diversity of life and the mechanisms by which that diversity has arisen. Concepts include: scientific method, origins of life, adaptation of organisms to different environments, ecology, and evolution.
Prerequisite: BIOL 30 with a grade of "C" or better for Biology and Forensic Science majors. Instructor consent for all other majors. Must be majoring in Biology (all), Biomedical Eng, Biochemistry, ENVS (all), Forensic Science (all), Nutritional Science, Meteorology-CS, Kinesiology, Computer Science, and Communicative Disorders.
Misc/Lab: Lecture 3 hours/Lab 3 hours
Normal Grade Rules
CE B2B3 4 units

BIOL 054. Human Understanding
Major issues in health and disease, learning and memory, maturation and aging (such as diet, exercise, mind-body medicine, and addictions). Emphasis on learning how to understand and apply physiologic information for personal growth and lifelong learning. GE Area: E
Normal Grade Rules
CE EE 3 units

BIOL 055. Biostatistics
Introductory experimental design and statistical analysis of biological data from manipulated experiments. This course provides experience in designing and analyzing experiments utilizing both univariate and multivariate tests.
Prerequisite: BIOL 30 and 31 with a grade of C or better, or instructor consent.
Misc/Lab: Lecture 3 hours/Lab 3 hours
Normal Grade Rules
CE B2B3 3 units

BIOL 065. Human Anatomy
Introductory study of gross and microscopic human anatomy including corresponding pathology. For majors in nursing and kinesiology.
 Misc/Lab: Lecture 3 hours/lab 3 hours.
Note: Not an elective in the department majors.
Normal Grade Rules
CE B2B3 4 units

BIOL 065O. Human Anatomy
Introductory study of gross and microscopic human anatomy including corresponding pathology. For majors in nursing and kinesiology.
This online anatomy course is not intended for students pursuing degrees in kinesiology, recreation (therapeutic recreation) or to meet the anatomy prerequisite for occupational therapy at SJSU. Students who intend to transfer the human anatomy course to another institution which requires an “in class” lab should enroll in BIOL 65.
Misc/Lab: Lecture 3 hours/lab 3 hours.
Notes: Not an elective in the department majors.
Normal Grade Rules
CE B2B3 4 units

BIOL 100W. Scientific Communication Workshop
Analysis and communication of scientific research to both scientific and general audiences. Satisfies upper division writing requirement. GE Area: Z
Prerequisite: BIOL 30 and 31 (with grades of "C" or better), A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. Allowed declared majors: Biology, Natural Science.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Must be passed with “C or better” to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
CE Z 3 units

UPPER DIVISION

BIOL 450. Biostatistics
Introductory experimental design and statistical analysis of biological data from manipulated experiments. This course provides experience in designing and analyzing experiments utilizing both univariate and multivariate tests.
Prerequisite: BIOL 30 and 31 with a grade of C or better, or instructor consent.
Misc/Lab: Lecture 3 hours/Lab 3 hours
Normal Grade Rules
CE B2B3 3 units
Biol 101. Origins of Life
Process of evolution, fossil evidence for life origins, and the place of humans in nature. GE Area: R
Prerequisites: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Notes: Not an elective in the department majors. All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: R
3 units

Biol 105. Principles of Developmental Biology
Emphasis on human development. Other animal systems (fly, frog, chick, mouse) will also be studied to aid in understanding anatomical, physiological, genetic, and molecular mechanisms operating during gametogenesis, fertilization, cleavage, gastrulation and organogenesis. Prerequisites: BIOL 030 and BIOL 031 (with grade of “C” or better in each), or instructor consent; BIOL 115 with “C” or better.
Normal Grade Rules
3 units

Biol 106. Physiological Ecology
Physiological ecology is the study of the interaction of an organism with its environment. Looking at both plants and animals, we will examine how both structure and function interact to enable an organism to survive under particular environmental conditions. Prerequisites: BIOL 113 or 114 with a grade of “C” or better or instructor consent, CHEM 008 and/or CHEM 112A and CHEM 112B with a grade of “C-” or better, BIOL 100W, upper division standing.
Normal Grade Rules
3 units

Biol 106L. Physiological Ecology Lab
This course is the lab section that accompanies the lecture section, Bio 106 Physiological Ecology. Prerequisite: BIOL 113 or 114 with a grade of “C” or better or instructor consent, CHEM 008 and/or CHEM 112A and CHEM 112B with a grade of “C-” or better, BIOL 100W.
Co-requisite: BIOL 106
Normal Grade Rules
1 unit

Biol 107. Immunology
Provides information about all areas of immunology with emphasis on the basic concepts of immune mechanisms of the acquired and innate immune systems. Uses the basic information to study immune disorders and the immune response to infectious agents. Prerequisites: Micro 101 with a grade of “C” or better, or instructor consent.
Normal Grade Rules
3 units

Biol 107L. Immunology Laboratory
The experiments in this beginning immunology laboratory are designed to study both the innate and acquired immune systems. Experimentation into the formation, function and detection of antibodies provides students with skills in basic immunologic techniques. Flow cytometry is used in identification of immune cells as well as functional assays of complement mediated phagocytosis.
Corequisite: Biol 107, or instructor consent
Misc/Lab: 3 hour Lab.
Normal Grade Rules
2 units

Biol 109. Human Neuroanatomy and Physiology
Gross and microscopic structure and function of the human nervous system. Introduction to experimental and clinical techniques. Prerequisite: BIOL 65 or instructor consent
Misc/Lab: Lecture 3 hours/lab 3 hours.
Notes: Not an elective in the department majors.
Normal Grade Rules
4 units

Biol 110. Biodiversity and Biopolitics
Application of ecological principles to the conservation of biodiversity and the management of ecosystems. Analysis of biological, economic, social and political interrelationships involved in conservation. GE Area: R
Prerequisites: BIOL 115 or MICR 127 with a grade of “C” or better in each), or instructor consent; CHEM 001A and CHEM 001B (with a grade of “C” or better in each). MISC/LAB: Lecture 3 hours/discussion 1 hour.
Normal Grade Rules
4 units

Biol 110L. Genetics Laboratory
Selected experiments to demonstrate genetic concepts using Drosophila, bacteria and other organisms. Techniques include those of classical, bacterial and molecular genetics. Prerequisite: BIOL115 or MICR127 with a grade of “C” or better
Misc/Lab: Lecture 1 hours/Lab 6 hours.
Normal Grade Rules
3 units

Biol 111. Human Genetics
Mendelian traits, classical and molecular cytogenetics, DNA variation, sex determination, gene mapping, mutation, population genetics, multifactorial inheritance, genetic counseling and prenatal diagnosis. Prerequisite: BIOL 115 (with a grade of “C” or better).
Normal Grade Rules
3 units

Biol 114. Functional Morphology
Develops understanding and skills needed to taxonomically study biodiversity, including the use of morphological and DNA sequence characters to examine phylogeny, and use of a range of biodiversity research techniques and tools. Prerequisites: BIOL 115 or BIOL 118 with a grade of “C” or better or instructor consent.
Misc/Lab: Lecture 2 hours/Lab 3 hours.
Normal Grade Rules
3 units

Biol 115. General Genetics
Principles and methods of microbial, plant and animal genetics. Mendelism, cytogenetics, molecular genetics, mutation, quantitative genetics and genetic aspects of evolution. Prerequisite: BIOL 30 and BIOL 31 (with a grade of “C” or better in each), or instructor consent; CHEM 001A and CHEM 001B (with a grade of “C” or better in each).
Misc/Lab: Lecture 3 hours/discussion 1 hour.
Normal Grade Rules
4 units

Biol 116. Molecular Genetics
Molecular genetics of eukaryotes. Replication, repair, mutation, regulation of gene expression, gene organization and methods of recombinant DNA research. Prerequisite: BIOL 115 or MICR 166, and CHEM 135 all with “C” or better.
Normal Grade Rules
4 units

Biol 116L. Genetics Laboratory
Selected experiments to demonstrate genetic concepts using Drosophila, bacteria and other organisms. Techniques include those of classical, bacterial and molecular genetics. Prerequisite: BIOL115 or MICR127 with a grade of “C” or better
Misc/Lab: Lecture 1 hours/Lab 6 hours.
Normal Grade Rules
3 units

Biol 117. Human Genetics
Mendelian traits, classical and molecular cytogenetics, DNA variation, sex determination, gene mapping, mutation, population genetics, multifactorial inheritance, genetic counseling and prenatal diagnosis. Prerequisite: BIOL 115 (with a grade of “C” or better).
Normal Grade Rules
3 units
**Biol 118. Evolutionary Genetics**  
Principles of molecular and population genetics from an evolutionary perspective. Application of DNA analyses and other techniques to conservation biology, evolution, ecology and systematics.  
Prerequisite: BIOL 30 and BIOL 31 with a grade of C or better  
Misc/Lab: Lecture 3 hours/sem lab 1 hour.  
Normal Grade Rules  
4 units

**Biol 119. Neurogenetics**  
Cellular and molecular neuroscience at the neuron, synapse and circuit level, including electrical and chemical signaling. Neurophysiology of development, maintenance and modification of neural circuits. Molecular genetics of neurological disorders such as autism, schizophrenia, Alzheimer’s disease, and mood disorders.  
Prerequisite: BIOL 115 (with a grade of “C” or better).  
Normal Grade Rules  
3 units

**Biol 122. Bacterial Diversity**  
See MICR 122.  
Normal Grade Rules  
2 units

**Biol 122L. Bacterial Diversity Laboratory**  
See MICR 122L.  
Normal Grade Rules  
2 units

**Biol 123A. Bioinformatics I**  
See CS 123A.  
Normal Grade Rules  
3 units

**Biol 123B. Bioinformatics II**  
See CS 123B.  
Normal Grade Rules  
3 units

**Biol 124. Systems Physiology**  
Physiology of organ systems of mammals, with emphasis on the human. Neuromuscular, respiratory, digestive, cardiovascular, renal, endocrine, reproductive and thermoregulatory physiology.  
Prerequisite: Biol 30, BIOL 31, BIOL 115, Phys 2A, 2B, Chem 112A, 112B; All courses with a “C” or better  
Corequisite: BIOL 125 highly recommended.  
Normal Grade Rules  
3 units

**Biol 125. Systems Physiology Laboratory**  
Selected lab units to demonstrate complex physiological mechanisms and the physiology of organ systems. Methods include animal experiments and physiological recording and stimulation.  
Pre/co-requisite: BIOL 124 (with grade of C or better) or Instructor Consent  
Misc/Lab: Lab 6 hours.  
Normal Grade Rules  
2 units

**Biol 129. Neuroscience**  
See PSYC 129.  
Normal Grade Rules  
3 units

**Biol 131. Endocrine Physiology**  
Emphasis on mammalian systems. Mechanisms of hormone action, secretion and physiological effects; hormone assay techniques.  
Prerequisite: Upper division organ systems physiology (e.g., BIOL 124) with C- or better, or Instructor Consent.  
Normal Grade Rules  
3 units

**Biol 134. Vertebrate Histology**  
Light and electron microscopic structure of vertebrate tissues with consideration of related functions. Emphasis on the examination of human tissues including corresponding pathology.  
Prerequisite: BIOL 30, BIOL 31 and BIOL 124 or instructor consent.  
Misc/Lab: Lecture 2 hours/lab 6 hours.  
Normal Grade Rules  
4 units

**Biol 135A. Eukaryotic Cell and Molecular Biology I**  
First semester of a year-long cell and molecular biology course. Topics include membrane structure, signal transduction, cytoskeletal structure, cell migration, and gene expression.  
Prerequisites: BIOL 30, BIOL 31, BIOL 115, CHEM 112A, CHEM 112B, CHEM 135, all with a C or better  
Normal Grade Rules  
3 units

**Biol 135B. Eukaryotic Cell and Molecular Biology II**  
BIOL 135B is the second semester of a year-long cell and molecular biology course. Topics covered include chromosome structure and maintenance, stem cell biology, cell death, and cancer biology. GE Area: R for majors only  
Prerequisite: BIOL 115, BIOL 135A, Biol 100W, both with a grade of C or better. Majors only.  
Normal Grade Rules  
3 units

**Biol 135L. Molecular Cell Biology Lab**  
Lab experience in nucleic acid and protein purification, enzyme assay, bacterial and mammalian cell culture, immunofluorescence, radioisotopic labeling, column chromatography, agarose and polyacrylamide gel electrophoresis, spectrophotometry, liquid scintillation counting, etc.  
Corequisite: BIOL 135A.  
Misc/Lab: Lab 6 hours.  
Normal Grade Rules  
3 units

**Biol 136. Vertebrate Neurophysiology**  
Review of topics from the molecular to the organismal level. Chemical and electrotropic phenomena of membranes, neurochemistry, sensory transduction, information coding, neural control, and additional rotating topics.  
Prerequisite: BIOL 124 with a C- or better or instructor consent  
Normal Grade Rules  
3 units

**Biol 136L. Vertebrate Neurophysiology Laboratory**  
Course-based undergraduate research experience using electrophysiological techniques to study nervous system function. Topics include chemical and electrotropic phenomena of membranes, information coding, and additional rotating topics.  
Prerequisite: BIOL 124 with a C- or better.  
Corequisite: BIOL 136.  
Misc/Lab: Lab 3 hours.  
Normal Grade Rules  
1 unit

**Biol 137. Introduction to Principles of Toxicology**  
Emphasis on basic principles of toxicology. Toxicity of several classes of compounds covered in depth. Focus on basic chemical principles and appropriate applications.  
Prerequisite: BIOL 030, BIOL 031, BIOL 124, and CHEM 112B with a grade of C- or better, or instructor consent  
Normal Grade Rules  
3 units

**Biol 140. Human Sexuality**  
See ANTH 140.  
Normal Grade Rules  
GE: S  
3 units

**Biol 142. Paleontology**  
See GEOL 142.  
Normal Grade Rules  
4 units

**Biol 145. Advanced Undergraduate Biology Seminar**  
Undergraduate Seminar in Biology. May be taken concurrently with BIOL 145L. Course is repeatable for credit when content changes.  
Prerequisites: Completion of nine (9) units of upper division majors’ coursework. Instructor consent.  
Note: Course is repeatable when content changes.  
Repeatable for credit  
Normal Grade Rules  
1-3 units
BIOL 145L. Advanced Undergraduate Biology Lab
Advanced undergraduate laboratory or field experience. May be taken concurrently with BIOL 145. Course is repeatable for credit when content changes.
Prerequisites: Completion of nine (9) units of upper division majors’ coursework. Instructor consent.
Repeatable for credit
Normal Grade Rules
1-2 units

BIOL 150. Field Studies in Natural History
Field courses given on site, typically covering general ecology, botany, geology, zoology and specialized natural areas such as Baja California, Death Valley, seacoasts and mountains. Repeatable for up to a total of 3 units of credit when location or content changes. GE Area: B3
Notes: Not an elective in the department majors.
Repeatable for credit
Normal Grade Rules
GE B3
1-2 units

BIOL 155. Hypothesis Testing
Experimental design and statistical analysis of biological data from manipulative experiments. This course provides experience in designing and analyzing experiments using t-tests, 1- and 2-way ANOVA, Randomized Block ANOVA, Nested ANOVA, Linear Regression and Tests of Independence.
Prerequisite: BIOL 30 and BIOL 31 with a grade of “C” or better, or instructor consent. Allowed Declared Majors: Biology, Environmental Studies.
Misc/Lab: Lecture 2 hours/lab 3 hours
Normal Grade Rules
3 units

BIOL 156. Ecological Sampling Design and Analyses
Sampling design and statistical analysis of biological patterns. In this course, students design and execute a field experiment (one required weekend field trip) that incorporates multivariate measurements. Students analyze the data with Log Linear analysis, Logistic Regression, Principal Components Analysis, Canonical Correlation and various Regression techniques.
Prerequisite: BIOL 113 or 114 with a grade of “C” or better, or instructor consent. Allowed Declared Majors: Biology, Business, Environmental Studies.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

BIOL 159. Integrative Biology
Capstone course in the BA Biological Science degree. Critical reading of scientific literature, experimental design and scientific communication skills will be emphasized. Topics covered may vary for a given semester. SJSU Studies Area: R
Prerequisites: Senior standing, BIOL 55 and 115, at least 6 units of upper division biology electives. Completion of Core General Education and upper division standing are prerequisites to all SJSU Studies courses.
Normal Grade Rules
GE R
3 units

BIOL 160. Ecology
Factors that influence the distribution and abundance of organisms; some aspects of applied ecology. GE Area: R for Biology Majors only.
Prerequisite: Allowed Declared Majors (Biology, Natural Science), BIOL 113 or BIOL 114 (with a grade of “C” or better). Completion of core GE, satisfaction of Writing Skills Test and upper division standing. 100W strongly recommended.
Pre/Corequisite: BIOL 55 or BIOL 155 or BIOL 156 or equivalent Biostatistics course or Instructor Consent
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
GE R
4 units

BIOL 163. Conservation Biology
Principles of conservation biology, including management for the preservation of biodiversity and maintenance of viable populations. Examples from plants and animals.
Prerequisite: BIOL 113 or BIOL 114 (with grade of “C” or better) or instructor consent.
Normal Grade Rules
3 units

BIOL 164. Ecological Field Methods
Techniques for evaluating and managing the abundance and diversity of plants and animals.
Prerequisite: BIOL 113 or 114 with a grade of “C” or better, or instructor consent.
Misc/Lab: Lecture 1 hour/lab-field 6 hours.
Normal Grade Rules
3 units

BIOL 165. Advanced Human Anatomy
Study of human anatomy, including clinical correlations, for pre-professional students. Not open to student who have completed BIOL 065.
Prerequisite: BIOL 30, BIOL 31 and BIOL 115 all with a C or better or instructor consent.
Misc/Lab: Lecture 2 hours/lab 6 hours.
Normal Grade Rules
4 units

BIOL 170. Cellular and Molecular Physiology
Introduction to the structure and physiological function of cells. Topics include synthesis of cellular macromolecules such as DNA, RNA and proteins, internal cellular organization; biochemical reactions necessary for cell growth, death and cellular communication. Relevant pathophysiology examples of cellular dysfunction are presented.
Prerequisite: BIOL 124 with C- or better, or Instructor Consent.
Normal Grade Rules
3 units

BIOL 177. Physiology for Engineers
See BME 177.
Normal Grade Rules
3 units

BIOL 178. Integrative Physiology
Integrative Physiology is the capstone course in the Systems Physiology concentration. The specific physiology topics covered may vary depending on the semester. Critical reading of scientific literature, experimental design and scientific communication skills will be emphasized. GE Area: R for majors
Prerequisite: Biol 100W, BIOL 115, Biol 124, both with a “C” or better, at least one upper division systems physiology elective, or instructor consent. Majors only.
Normal Grade Rules
GE R
3 units

BIOL 180. Individual Studies
Advanced lab work in special fields.
Prerequisite: Majors only. Not available to Open University Students
Repeatable for credit
Credit / No Credit
Credit / No Credit
1-4 units

BIOL 167. Cardiorespiratory Physiology
Covers the normal anatomy and physiology of the cardiovascular and respiratory systems, as well as how they function following perturbations in homeostasis. Focuses on the mammalian system with some discussion of comparative physiology.
Prerequisite: Biol 124 with a C- or better or instructor consent
Normal Grade Rules
3 units

BIOL 168. Reproductive Physiology
Reproductive Physiology covers the anatomy and physiology of the reproductive system, as well as how deviations from the norm affect reproduction. Course focuses on the mammalian system with discussion of comparative physiology.
Prerequisite: BIOL 124 with C- or better or Instructor Consent
Normal Grade Rules
3 units

BIOL 170. Cellular and Molecular Physiology
Introduction to the structure and physiological function of cells. Topics include synthesis of cellular macromolecules such as DNA, RNA and proteins, internal cellular organization; biochemical reactions necessary for cell growth, death and cellular communication. Relevant pathophysiology examples of cellular dysfunction are presented.
Prerequisite: BIOL 124 with C- or better, or Instructor Consent.
Normal Grade Rules
3 units

BIOL 177. Physiology for Engineers
See BME 177.
Normal Grade Rules
3 units

BIOL 178. Integrative Physiology
Integrative Physiology is the capstone course in the Systems Physiology concentration. The specific physiology topics covered may vary depending on the semester. Critical reading of scientific literature, experimental design and scientific communication skills will be emphasized. GE Area: R for majors
Prerequisite: Biol 100W, BIOL 115, Biol 124, both with a “C” or better, at least one upper division systems physiology elective, or instructor consent. Majors only.
Normal Grade Rules
GE R
3 units

BIOL 180. Individual Studies
Advanced lab work in special fields.
Prerequisite: Majors only. Not available to Open University Students
Repeatable for credit
Credit / No Credit
Credit / No Credit
1-4 units
### Biolog 181. Introduction to Health Care
Participation and observation with a medical doctor, dentist, optometrist, pharmacist, or veterinarian in private practice, hospital or retail setting.

Notes: Hepatitis B or other vaccinations may be required in some settings.

Prerequisite: Instructor consent. Not available to Open University Students.

Credit / No Credit

1-3 units

### Biolog 182. Tutor Assistant in Biology
Supervised classroom or field experience as a tutor-assistant in experiments, demonstrations and discussions.

Prerequisite: Sophomore or Upper division standing, instructor consent and appropriate academic background.

Not available to Open University Students.

Repeatable for credit

Credit / No Credit

1-2 units

### Biolog 184. Directed Reading
Assigned readings of selected books, journals and papers chosen to fill gaps in training or for contact with new fields. Evaluation through weekly reports and conferences.

Prerequisite: Instructor consent. Not available to Open University Students.

Repeatable for credit

Credit / No Credit

1-4 units

### Biolog 186. Senior Thesis
Advanced library, laboratory or field research under the supervision of a faculty member, culminating in a senior thesis.

Prerequisite: Instructor consent. Not available to Open University Students.

Credit / No Credit

2-4 units

### Biolog 190. Field Studies in Biology
Field program involving planning and execution of a project. Course is repeatable for a maximum of 12 units.

Prerequisite: Instructor consent. Not available to Open University Students.

Repeatable for credit

Credit / No Credit

1-4 units

### Biolog 193. Microbiological Techniques
Microbiological techniques for non-biologists.

Prerequisite: Upper division standing, lower division biology or instructor consent.

Normal Grade Rules

1 unit

### Biolog 198. Undergraduate Research
Field or laboratory biological research under the direction of a faculty member.

Repeatable for credit

Normal Grade Rules

0.5-4 units

### Biolog 198. Undergraduate Research
Field or laboratory biological research under the direction of a faculty member.

Repeatable for credit

Normal Grade Rules

0.5-4 units

### Biolog 201. Graduate Seminar in Biological Sciences
Seminar designed to introduce principles and topics in biological research. Mandatory during first semester of enrollment. Must be taken twice for credit.

Repeatable for credit

Normal Grade Rules

1 unit

### Biolog 202. Graduate Studies in Biology
A seminar on current research and theory in the life sciences, emphasizing scientific writing and formal oral presentations.

Prerequisite: Instructor consent

Misc/Lab: Lecture/seminar/discussion 5 hours.

Note: This course satisfies graduate-level GWAR in this master’s program.

Normal Grade Rules

GE: GWAR

3 units

### Biolog 202TA. Biotech Seminar: Biotech Products
BIOL 202TA is a seminar course in which students develop professional skills in writing, speaking, literature review, and critical thinking. Assignments are targeted at developing expertise and knowledge useful in the biotechnology industry. BIOL 202TA focuses on biotechnology products.

Prerequisite: Enrollment in the Master of Biotechnology Program.

Note: This course satisfies graduate-level GWAR in this master’s program.

Normal Grade Rules

GE: GWAR

3 units

### Biolog 202TB. Biotech Seminar: Drug Development Process
BIOL 202TB is a seminar course in which students develop their professional skills. Assignments are targeted at developing expertise and knowledge useful in the biotechnology industry. BIOL 202TB focuses on the development of drugs and other biotechnology products.

Prerequisite: Enrollment in the Master of Biotechnology Program.

Note: This course satisfies graduate-level GWAR in this master’s program.

Normal Grade Rules

GE: GWAR

3 units

### Biolog 203. Biology Teaching Forum
Introduction to effective methods for teaching undergraduate biology laboratories, activities, seminars and/or lectures. Emphasis on pedagogy and application of best practices and strategies for teaching biology to a diverse audience. Course administration, student conduct and expectations, and assessment will also be covered.

Prerequisite: graded standing or instructor consent

Normal Grade Rules

3 units

### Biolog 205. Advanced Molecular Techniques
Emphasizes the laboratory techniques of modern molecular biology. Depending on instructor, focus will be on animal, plant, yeast, bacterial, or viral systems. Course is repeatable for credit if content changes.

Prerequisite: BIOL 135L or instructor consent.

Misc/Lab: Lecture 2 hours/lab 6 hours.

Repeatable for credit

Normal Grade Rules

4 units

### Biolog 205T. Advanced Molecular Techniques for Biotechnology
Emphasizes the laboratory techniques of modern molecular biology, especially: report writing and communication of research results. Depending on instructor, focus will be on animal, plant, yeast, bacterial, or viral systems.

Prerequisite: BIOL 135L and admission into the Master of Biotechnology program.

Misc/Lab: Lecture 2 hours/lab 6 hours.

Normal Grade Rules

4 units
BIOL 215. Seminar in Advanced Genetics
Selected topics of current interest in advanced genetics. Each semester will emphasize a particular field of genetics, e.g., molecular genetics, human genetics, developmental genetics, population genetics, etc.
Normal Grade Rules
3 units

BIOL 218. Evolution
Integrated use of modern molecular techniques and classical evolutionary theory to address a broad array of questions in evolutionary biology.
Prerequisite: BIOL 115 and instructor consent.
Normal Grade Rules
3 units

BIOL 220. Science Communication
This course will focus on learning to effectively present ongoing scientific research to a wide audience, with an emphasis on developing science communication skills, learning to place data within the context of a field, and developing critical thinking skills.
Pre/Corequisite: BIOL 202
Normal Grade Rules
3 units

BIOL 221T. Advanced Bioinformatics for Biotechnology
Bioinformatics/computer applications to solve advanced problems in molecular and cell biology by manipulation and analysis of DNA, RNA, and protein sequences.
Prerequisites: Biol 116 or either Chem 130A, Chem 135, or Chem 136 and admission into the Master of Biotechnology program.
Normal Grade Rules
4 units

BIOL 227. Advanced Physiology and Pharmacology
Foundation for understanding physiological, biochemical and anatomical interaction of drugs within the body. Physiological regulation and principles of pharmacology including pharmacokinetics and physiological responses to drugs and hormones. Drug classes and their mechanism of action at a molecular level. Regulatory (FDA) and industrial aspects of pharmacological science.
Prerequisite: BIOL 124 and BIOL 125 or equivalent course, standing grade or advisor consent.
Normal Grade Rules
3 units

BIOL 227T. Principles of Pharmacology
Principles of pharmacology, especially as related to the pharmaceutical industry and clinical applications.
Prerequisites: BIOL 030 or equivalent; Physiology recommended
Normal Grade Rules
3 units

BIOL 229T. Biotechnology Instrumentation
Introduction to the principles of operation of common instruments used in the biotechnology and pharmaceutical industries. Includes understanding and experience with calibration, detection mechanisms, data output, troubleshooting and decision making process.
Prerequisite: Enrollment in the Master of Biotechnology program.
Lab: Lecture 2 hours / Lab 3 hours
Normal Grade Rules
3 units

BIOL 230. Comparative Animal Physiology
A seminar in the functional relationships of invertebrates and vertebrates. Evolutionary patterns and environmental adaptations are considered.
Prerequisite: An upper division course in physiology or instructor consent.
Normal Grade Rules
3 units

BIOL 233. Immunological Techniques
Principles, concepts and mechanisms relative to serological and other immunological procedures and reactions with emphasis on practical applications.
Prerequisite: Upper division microbiology or cell biology, organic chemistry and instructor consent.
Lab: Lecture 2 hours / Lab 9 hours.
Normal Grade Rules
3 units

BIOL 233T. Immunological Techniques for Biotechnology
Principles, concepts, and mechanisms relative to serological and other immunological procedures and reactions with emphasis on applications in the biotechnology industry.
Prerequisite: Immunology laboratory (grade “B” or better) or equivalent experience and admission to the Master of Biotechnology program.
Normal Grade Rules
3 units

BIOL 242. Advanced Paleontology
See GEOL 242.
Normal Grade Rules
4 units

BIOL 255E. Advanced Topics: Ecology and Evolution
Advanced Topics: Ecology and Evolution is a rotating topics course; each offering will have different content. The purpose of the seminar is to help students develop a deeper understanding of specific aspects of ecology and evolution through thorough examination of primary scientific literature, discussion and presentations. Enrollment in at least 3 units of BIOL 255E is mandatory for the MS Biological Sciences: concentration in Ecology and Evolution program.
Prerequisite: Graduate standing or Instructor consent
Repeatable for credit
Normal Grade Rules
1-4 units

BIOL 255L. Advanced Biology Laboratory
Laboratory or field experience in advanced biology. Course is repeatable for credit when content changes.
Prerequisite: Instructor consent.
Notes: May be taken concurrent with any 255 seminar.
Repeatable for credit
Normal Grade Rules
1-4 units

BIOL 255M. Advanced Topics: Molecular & Microbiology
Advanced study in molecular and microbiology. Course is repeatable for credit when content changes.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
1-4 units

BIOL 255P. Seminar in Advanced Biology: Physiology
Advanced study in plant or animal physiology. Course is repeatable for credit when content changes.
Prerequisite: Graduate standing or instructor consent
Repeatable for credit
Normal Grade Rules
1-4 units

BIOL 255T. Introduction to Stem Cell Techniques
This laboratory/lecture course exposes students to the theoretical and practical aspects of contemporary stem cell techniques. Students will culture mouse embryonic stem cells on feeders and characterize them using immunofluorescence and flow cytometry, differentiate various lineages and observe genetic modifications. The course will prepare students for research purposes. Students are expected to keep a laboratory notebook and document their experiments and results. Additionally, students will present scientific papers on recent topics in stem cell basic research, as published in scientific journals of recent year. The goal of this course will be to provide students with basic experience in methods used in stem cell laboratories, so that they can transition to an internship in a stem cell laboratory (although many of these techniques are applicable in a number of diverse fields), and to provide students with the most current stem cell topics while practicing effective presentation and evaluation skills.
Normal Grade Rules
4 units
### BIOL 256. Advanced Experimental Design and Analysis
Provides training in advanced statistical procedures and experimental designs for graduate-level research. The content is tailored to research needs of enrolled students. Includes sampling schemes, randomization analyses, complex ANOVA and multivariate analyses.

**Prerequisite:** Upper division statistics course; graduate standing.  
**Normal Grade Rules**  
**3 units**

### BIOL 280. Individual Studies
Allow a graduate student to pursue an avenue of academic interest that is not a specific part of a thesis research project. The program of study must be approved by an academic advisor in the graduate program. Projects may include, but are not limited to: manuscript development, presentations of findings, development and leadership in developing seminars for other graduate students.

**Prerequisite:** Graduate standing and instructor consent.  
Not available to Open University Students.  
**Repeatable for credit**  
Credit / No Credit  
1-3 units

### BIOL 280T. Internship in the Biotechnology Industry
A 8-10 week internship at a Bay Area biotechnology company in R&D, quality control, manufacturing, human resources, marketing, or sales.

**Prerequisite:** Admission to the Master of Biotechnology program.  
**Repeatable for credit**  
Credit / No Credit  
1-3 units

### BIOL 281T. Individual Studies in Biotechnology
Supervised, advanced work in specialized fields relevant to biotechnology.

**Prerequisite:** Admission to the Master of Biotechnology program; instructor consent and Program Director.  
**Repeatable for credit**  
Credit / No Credit  
1-4 units

### BIOL 282C. Biotechnology Company Management
Provides general management perspectives of biotechnological innovation; focuses on challenges of managing the development of new technologies, products, and processes in biotech sectors; examines management concepts, industry practices, and cases relevant to the biotechnology sector.

**Normal Grade Rules**  
**3 units**

### BIOL 283T. Topics in Biotech Regulatory Affairs
Introduction to laws regulating the pharmaceutical, biotechnology, medical device industries. Discussions of company organization; product development and commercialization; Good Manufacturing Practice.

**Prerequisite:** Admission to the Master of Biotechnology program and consent of the Program director.

**Misc/Lab:** Lecture 3 hour/Activity 6 hours.  
**Repeatable for credit**  
**Normal Grade Rules**  
**3 units**

### BIOL 284. Master’s Directed Reading
Directed reading and discussion of biological literature and/or individualized preparation for culminating graduate experience. Pre/Corequisite: Graduate standing in MA program and instructor consent. Not available to Open University Students.

**Prerequisite:** Graduate Standing in MA program; instructor consent  
**Repeatable for credit**  
**Mandatory CR/NC/ RP**  
1-3 units

### BIOL 285. Colloquium in Biological Sciences
Meetings for the presentation and discussion of advanced studies in special fields including original work by the faculty, guest investigators and graduate students. Topics will vary from year to year.

**Repeatable for credit**  
**Credit / No Credit**  
1 unit

### BIOL 285T. Colloquium in Biotechnology
Meetings for reporting, by written and oral presentations, progress through the MBT program.

**Prerequisite:** Admission to the Master of Biotechnology program.  
**Credit / No Credit**  
1 unit

### BIOL 287. Individual Studies in Biotechnology
Supervised, advanced work in specialized fields relevant to biotechnology.

**Prerequisite:** Admission to the Master of Biotechnology program; instructor consent and Program Director.  
**Repeatable for credit**  
Credit / No Credit  
2 units

### BIOL 291A. Introduction to Molecular Diagnostics I
Graduate level course which will include topics relevant to all tests and methods used to identify a disease or the predisposition for a disease through DNA or RNA analysis of human clinical samples.  
**Prerequisite:** Instructor consent.  
**Normal Grade Rules**  
3 units

### BIOL 291B. Introduction to Molecular Diagnostics II: Human Genetic Diseases and Detection
Graduate level course which will include topics relevant to all tests and methods used to identify a disease or the predisposition for a disease through DNA or RNA analysis of human samples.

**Prerequisite:** BIOL 291A or Instructor Consent.  
**Normal Grade Rules**  
3 units

### BIOL 292. Advanced Experimental Design and Analysis
Provides training in advanced statistical procedures and experimental designs for graduate-level research. The content is tailored to research needs of enrolled students. Includes sampling schemes, randomization analyses, complex ANOVA and multivariate analyses.

**Prerequisite:** Upper division statistics course; graduate standing.  
**Normal Grade Rules**  
**3 units**

### BIOL 293. Topics in Biotech Regulatory Affairs
Introduction to laws regulating the pharmaceutical, biotechnology, medical device industries. Discussions of company organization; product development and commercialization; Good Manufacturing Practice.

**Prerequisite:** Admission to the Master of Biotechnology program and consent of the Program director.

**Misc/Lab:** Lecture 3 hour/Activity 6 hours.  
**Repeatable for credit**  
**Normal Grade Rules**  
**3 units**

### BIOL 294. Master’s Directed Reading
Directed reading and discussion of biological literature and/or individualized preparation for culminating graduate experience. Pre/Corequisite: Graduate standing in MA program and instructor consent. Not available to Open University Students.

**Prerequisite:** Graduate Standing in MA program; instructor consent  
**Repeatable for credit**  
**Mandatory CR/NC/ RP**  
1-3 units

### BIOL 295. Colloquium in Biotechnology
Meetings for reporting, by written and oral presentations, progress through the MBT program.

**Prerequisite:** Admission to the Master of Biotechnology program.  
**Credit / No Credit**  
1 unit

### BIOL 298. MS Project Culminating Experience
Culminating experience for MS Project Option, consisting of the development of a manuscript describing student’s research and following journal guidelines for manuscript preparation, followed by a public seminar defending the research project.

**Prerequisite:** Admission to candidacy for the Master of Science degree  
**Repeatable for credit**  
**Mandatory CR/NC/ RP**  
1 unit

### BIOL 298M. MA Culminating Experience
Advanced individual work toward program Plan B (Comprehensive Exam or Master’s Project). Prerequisite: Advancement to candidacy for the MA in Biological Sciences and graduate advisor approval.

**Repeatable for credit**  
**Mandatory CR/NC/ RP**  
1 unit

### BIOL 299. Master’s Thesis
Prerequisite: Admission to candidacy for the Master of Science degree.

**Pre/Corequisite:** Not available to Open University Students  
**Repeatable for credit**  
**Mandatory CR/NC/ RP**  
1-4 units

### BIOL 1290R. Culminating Experience Supervision
This course covers the same topics and has the same objectives as BIOL 298/BIOL 299.

**Prerequisite:** BIOL 298 or BIOL 299  
**Note:** No Degree Credit  
**Repeatable for credit**  
**No Degree Credit**  
1 unit

---

**Upper Division**

### BIOL 1290R. Culminating Experience Supervision
This course covers the same topics and has the same objectives as BIOL 298/BIOL 299.

**Prerequisite:** BIOL 298 or BIOL 299  
**Note:** No Degree Credit  
**Repeatable for credit**  
**No Degree Credit**  
1 unit
BOTANY

UPPER DIVISION

BOT 104. Plant Taxonomy
Taxonomic relations and classification of ferns, conifers and flowering plants, with practice in their collection and identification. Selected techniques of cytotaxonomy, chemotaxonomy, palynology and numerical taxonomy.
Prerequisite: BIOL 113 or 114 with a grade of “C” or better, or instructor consent.
Misc/Lab: Lecture 2 hours/lab 6 hours.
Normal Grade Rules
4 units

BOT 113. Comparative Taxonomy
See BIOL 113
Normal Grade Rules
3 units

BOT 114. Functional Morphology
See BIOL 114
Normal Grade Rules
3 units

BOT 160. Ecology
See BIOL 160
G.E. R
4 units

BOT 165. Plant Communities of California
Prerequisite: BIOL 113 or 114 with a grade of “C” or better, or instructor consent.
Misc/Lab: Lecture 2 hours/lab-field 6 hours (some weekend field trips).
Normal Grade Rules
4 units

BOT 180. Individual Studies
Advanced work in special fields.
Prerequisite: Majors only or instructor consent.
Repealable for credit
Credit / No Credit
1-4 units

BOT 186. Senior Thesis
Advanced laboratory or field research under supervision of faculty member, culminating in a senior thesis.
Prerequisite: Instructor consent.
Credit / No Credit
2-4 units

BOT 192. Int’l Program Studies
Repeatable for credit
Mixed Grading
1-12 units

GRADUATE

BOT 255. Advanced Botany
Advanced aspects of morphology, mycology and other fields of botany. Course may be repeated for credit with advisor consent.
Prerequisite: Specialization in botany and instructor consent.
Repealable for credit
Normal Grade Rules
1-3 units

BOT 298. Research
Independent investigations.
Prerequisite: Instructor consent.
Repealable for credit
Mandatory CR/NC/RP
1-4 units

BOT 299. Master’s Thesis or Project
Prerequisite: Admission to candidacy for the master's degree.
Repealable for credit
Mandatory CR/NC/RP
1-4 units

ENTOMOLOGY

UPPER DIVISION

ENT 101. Insect Diversity
Introduction to biology, ecology and behavior of insects. Ways in which insects affect humans and the environment. Students collect, curate and identify common families of insects.
Prerequisite: BIOL 113 or 114 with a grade of “C” or better, or instructor consent; CHEM 001A, CHEM 001B.
Misc/Lab: Lecture 3 hours/lab-field 3 hours.
Normal Grade Rules
4 units

ENT 106. Forensic Entomology
Forensic entomology examines the science and methodology used to collect, analyze, and present information regarding insects and other arthropods that are important in legal investigations.
Prerequisite: BIOL 30 and 31 with grades of “C” or better, or instructor consent.
Misc/Lab: Lecture 3 hours/lab-field 3 hours.
Normal Grade Rules
4 units

ENT 114. Functional Morphology
See BIOL 114
Normal Grade Rules
3 units

ENT 133. Comparative Taxonomy
See BIOL 113
Normal Grade Rules
3 units

GRADUATE

ENT 281. Advanced Laboratory Skills in Entomology
Advanced lab work in entomology.
Prerequisite: MA graduate standing.
Credit / No Credit
3 units

ENT 282. Entomology Internship
Professional career development and/or individualized preparation for culminating graduate experience.
Prerequisite: Graduate standing.
Credit / No Credit
3 units

ENT 283. Directed Readings in Entomology
Directed reading assignments in entomological literature including but not limited to: research, governmental guidelines/protocols/procedures and risk assessment/management.
Prerequisite: MA graduate standing.
Normal Grade Rules
2 units

ENT 298. Research
Independent investigations.
Prerequisite: Instructor consent.
Repealable for credit
Mandatory CR/NC/RP
1-4 units
ENT 299. Master’s Thesis or Project
Prerequisite: Admission to candidacy for the master's degree.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

MEDICAL PRODUCT DEVELOPMENT MANAGEMENT

GRADUATE
SMPD 202T. MPDM Seminars: Biomedical Business
Special Topics seminar in the management principles and practices of medical product development. Repeatable for credit when topic changes.
Prerequisite: Graduate Standing
Repeatable for credit
Normal Grade Rules
3 units

SMPD 281A. Clinical Development Seminar I
Provides a comprehensive overview of the regulated medical product development process. Topics include initial drug development/device invention to drug/device approval and post-market surveillance. Discussions include non-clinical and clinical studies, regulations, clinical indication determination, research methodology and ethical conduct. Fulfills GWAR requirement
Prerequisite: Admission to MPDM program or certificate
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

SMPD 281B. Clinical Development Seminar II
Current practices for medical product development and the clinical and regulatory pathways required for approval in the USA; including non-clinical study design and GMP process. Emphasis on oral and written communication. Presentations from experts in the field.
Prerequisite: Admission to the Medical Product Development Management program and completion of SMPD 281A.
Misc/Lab: Lecture 2 hour/activity 4 hours.
Normal Grade Rules
2 units

SMPD 283A. Regulatory Affairs I, Biopharmaceutical
Provide foundational knowledge of the pharmaceutical, biotechnology and biomedical industries with focus on company organization, product development and commercialization-associated activities such as chemical synthesis, device prototyping, quality assurance, regulatory affairs, manufacturing, control, marketing, and post-marketing surveillance.
Normal Grade Rules
3 units

SMPD 283B. Regulatory Affairs II Device-Diagnostics
Overview of laws and regulations enforced by the US Food and Drug Administration (FDA) and other Regulatory Agencies as they relate to biotechnology, medical device and diagnostic industries
Prerequisite: Admission to the MPDM program.
Normal Grade Rules
3 units

SMPD 285. MPDM Research / Practicum
Independent research project / practicum to explore deeper understanding or breadth of experience in medical product development management.
Prerequisite: Admission to MPDM program.
Repeatable for credit
Credit / No Credit
1 unit

SMPD 286. Statistical Methods in Clinical Trials
Overview of statistical methods used in the design and interpretation of clinical trials of drugs and medical devices.
Prerequisite: Admission to the MPDM program.
Normal Grade Rules
3 units

SMPD 287. Informatics in Drug and Device Development
Provides business and regulatory perspectives on electronic information technologies, processes and standards in the conduct of clinical trials. Special emphasis: data collection, clinical trial & data management randomization and drug supply, statistical processes, safety databases and electronic regulatory submission, electronic records and signatures, sys validation processes, and data standards.
Prerequisite: Admission to the MPDM program and completion of SMPD 286.
Normal Grade Rules
3 units

SMPD 289A. Special Topics in Clinical Trials Management I
Serious focusing on critical issues in clinical development. This programmatic capstone series of seminars challenges the students to demonstrate a mature, professional manner and technical proficiency in the field. Emphasis on oral and written communications. Course includes numerous presentations by industry experts.
Prerequisite: Admission to MPDM program and completion of SMPD 285.
Misc/Lab: Lecture 2 hour/activity 4 hours.
Normal Grade Rules
2 units

SMPD 289B. Clinical Trials Seminar II
Capstone course of the MPDM program
Prerequisite: Admission to MPDM program.
Normal Grade Rules
3 units

MICROBIOLOGY

LOWER DIVISION

MICR 020. General Bacteriology
Fundamentals of basic microbiology emphasizing cell structure, cell metabolism, molecular genetics, microbial diversity and ecological relationships.
Prerequisite: BIOL 30 or BIOL 30A, and CHEM 30 with a grade of “C” or better.
Normal Grade Rules
3 units

MICR 122. Bacterial Diversity
The focus of this course is the study of the characteristics and microecology of unusual prokaryotes. Molecular and traditional approaches will be discussed.
Prerequisite: MICR 101 (with a grade of “C” or better) or instructor consent.
Misc Lecture 1 hour
Normal Grade Rules
2 units

MICR 122L. Bacterial Diversity Laboratory
Laboratory techniques in bacterial diversity.
Prerequisite: MICR 101 (with grade of “C” or better) or Instructor Consent
Misc/Lab: 6 hour Lab.
Normal Grade Rules
2 units

MICR 123. Food Microbiology
Detection and enumeration of both normal microbiological flora and spoilage organisms of specific foods. Control of sanitation problems in food production and processing.
Prerequisite: MICR 101 (or equivalent with grade of “C” or better)
Pre/Corequisite: BIOL 6
Normal Grade Rules
1 unit

MICR 101. General Microbiology
Fundamentals of basic microbiology emphasizing cell structure, cell metabolism, molecular genetics, microbial diversity and ecological relationships.
Prerequisite: BIOL 30 or BIOL 30A, and CHEM 30 with a grade of “C” or better.
Normal Grade Rules
3 units

MICR 202L. Bacterial Diversity Laboratory
Laboratory techniques in bacterial diversity.
Prerequisite: MICR 101 (with grade of “C” or better) or Instructor Consent
Misc/Lab: 6 hour Lab.
Normal Grade Rules
2 units

MICR 222. Bacterial Diversity
The focus of this course is the study of the characteristics and microecology of unusual prokaryotes. Molecular and traditional approaches will be discussed.
Prerequisite: MICR 101 (with a grade of “C” or better) or instructor consent.
Misc Lecture 1 hour
Normal Grade Rules
2 units

MICR 222L. Bacterial Diversity Laboratory
Laboratory techniques in bacterial diversity.
Prerequisite: MICR 101 (with grade of “C” or better) or Instructor Consent
Misc/Lab: 6 hour Lab.
Normal Grade Rules
2 units

MICR 223. Food Microbiology
Detection and enumeration of both normal microbiological flora and spoilage organisms of specific foods. Control of sanitation problems in food production and processing.
Prerequisite: MICR 101 (or equivalent with grade of “C” or better)
Pre/Corequisite: BIOL 6
Normal Grade Rules
1 unit
MICR 123L. Food Microbiology Laboratory
Practical microbiological techniques for the detection and enumeration of both normal microbiological flora and spoilage organisms of specific foods; and for the control of sanitation problems in food production and processing. Field trips to local food industries and/or water treatment plant may be required within lab hours.
Prerequisite: MICR 101 or equivalent (with grade of "C" or better).
Misc/Lab: 6 hour Lab.
Normal Grade Rules
2 units

MICR 127. Microbial Physiology
Studies of the physiology of microbes specifically focusing on bacteria (growth, metabolism and regulation of gene expression); growth experiments and mutagenesis techniques. SJSU Studies Area: R for Biology Majors only
Prerequisite: CHEM 135, MICR 166, both with a C or better, or instructor consent. Passage of the Writing Skills Test (WST) or ENC/LLD 100A with a C or better (C- not accepted), Completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, co-registration in 100W is strongly recommended. Majors only.
Normal Grade Rules
GE: R
3 units

MICR 127L. Microbial Physiology Laboratory
Laboratory experiments involve small and large-scale growth experiments (fermentation, continuous culture and batch culture), techniques used in mutation and mutant characterization as well as construction and studies of reporter fusions.
Prerequisites: MICR 101 (with grade of "C" or better) or Instructor Consent
Misc/Lab: Lab 6 hours.
Normal Grade Rules
2 units

MICR 140. Hematology
Blood and blood forming organs. Theoretical and clinical aspects of normal and pathologic conditions of the erythrocytic, leukocytic, coagulation and blood group systems.
Prerequisite: Micro 101 with C or better.
Repeatable for credit
Normal Grade Rules
3 units

MICR 140L. Hematology Laboratory
Laboratory methodologies used to diagnose hematologic pathology
Prerequisite: MICR 101 (with a grade of "C" or better) or Instructor Consent
Pre/corequisite: MICR 140.
Misc/Lab: Lab 2 hours.
Repeatable for credit
Normal Grade Rules
2 units

MICR 141. Pathogenic Microbiology I
Concepts and principles of medical microbiology, emphasizing the biology of host-parasite interactions and mechanisms of infectious disease pathogenesis.
Prerequisite: MICR 101, BIOL 107 with C or better, CHEM 008 OR CHEM 112A or Instructor Consent
Normal Grade Rules
3 units

MICR 141L. Pathogenic Microbiology I - Laboratory
Application of principles of medical microbiology to pathogen isolation, characterization and identification.
Prerequisite: MICR 101, BIOL 107, BIOL 107L with grades of "C" or better, Organic Chemistry or instructor consent.
Corequisite: MICR 141.
Misc/Lab: Lab 9 hours.
Normal Grade Rules
3 units

MICR 142. Pathogenic Microbiology II
Concepts and principles of medical microbiology, emphasizing the biology of host-parasite interactions and mechanisms of infectious disease pathogenesis. Continuation of MICR 141.
Prerequisite: MICR 141 (with grade of "C" or better).
Misc/Lab: Lecture 9 hours.
Normal Grade Rules
3 units

MICR 142L. Pathogenic Microbiology II - Laboratory
Application of principles of medical microbiology to pathogen isolation, characterization and identification.
Prerequisite: MICR 141 and MICR 141L (with grades of "C" or better); BIOL 107L.
Corequisite: MICR 142.
Misc/Lab: Lab 9 hours.
Normal Grade Rules
3 units

MICR 166. Bacterial Genetics
Fundamental prokaryotic genetic concepts and their incorporation into problem solving and experimental design. Emphasis on how and why some-one might use genetic approaches to their benefit when addressing biological questions in bacteria.
Prerequisites: MICR 101 with a "C or better" or Instructor Consent
Normal Grade Rules
4 units

MICR 170. General Virology
Molecular and biological aspects of animal, plant and microbial viruses and their relationships with their hosts.
Prerequisite: BIOL 30, BIOL 31, and Organic Chemistry with a "C" or better
Normal Grade Rules
3 units

MICR 180. Individual Studies
Advanced lab work in special fields.
Prerequisite: Majors only or instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

MICR 184. Directed Reading
Assigned readings of selected books, journals and papers to fill gaps in training or for contact with new fields. Evaluation through weekly reports and conferences.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units
MICR 291E. Advanced Immunohematology
Students will engage in advanced study of immunohematology and the use of transfused products in medical treatment. Emphasis will be on experience through clinical practice.
Note: Not an elective for Biology majors and not available to Open University students.
Credit / No Credit
4 units

MICR 291F. Molecular Based Diagnostic Techniques
Students will engage in advanced study of application of molecular techniques for diagnostic purposes. Emphasis will be on advanced practical training.
Note: Not an elective for Biology majors and not available to Open University students.
Credit / No Credit
4 units

MICR 291G. Clinical Laboratory Management
Students will engage in advanced study of laboratory management skills, including finance, time management, team building, quality control, basic human resources management and other topics. Emphasis will be on practical training.
Note: Not an elective for Biology majors and not available to Open University students.
Repeatable for credit
Credit / No Credit
4 units

MICR 292. Topics and Demonstrations in Clinical Laboratory Science
Presentations and demonstrations of topics and selected clinical lab procedures.
Prerequisite: Baccalaureate degree in a biological science, valid license as a CLS Trainee, admission into the CLS Traineeship, and instructor consent. Concurrent enrollment in MICR 291.
Repeatable for credit
Normal Grade Rules
3 units

MICR 298. Research
Advanced individual work in a specialized field of microbiology.
Prerequisite: Instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

MICR 299. Master’s Thesis or Project
Prerequisite: Admission to candidacy for the Master of Science degree and instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units

ZOOL 113. Comparative Taxonomy
See BIOL 113
Normal Grade Rules
3 units

ZOOL 114. Functional Morphology
See BIOL 114
Normal Grade Rules
3 units

ZOOL 115. Invertebrate Zoology and Natural History
The evolution, distribution, structure, natural history and systematics of invertebrates other than insects.
Prerequisite: Biol 113 or 114, or instructor consent.
Misc/Lab: Lecture 2 hours/lab-field trips 6 hours.
Normal Grade Rules
4 units

ZOOL 116. Vertebrate Evolution and Natural History
Prerequisite: BIOL 113 or 114 with a grade of "C" or better, or instructor consent.
Misc/Lab: Lecture 2 hours/lab 6 hours with several field trips.
Normal Grade Rules
4 units

ZOOL 160. Zoogeography
Animal distribution throughout the world and factors and basic principles affecting it.
Prerequisite: BIOL 31 or equivalent or instructor consent.
Normal Grade Rules
3 units
Academic Year 2019-2020
Course Descriptions

v1
July 1, 2019

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE

Biomedical Engineering Department Courses

BIOMEDICAL ENGINEERING

LOWER DIVISION

BME 025. Introduction to Biomedical Engineering Design
Introduction to the broader field of biomedical engineering, with emphasis on design of biomedical devices. Development of familiarity with standards and software tools relevant to the biomedical engineering industry, packages for design and analysis, FDA and EU guidelines.
Prerequisite: CHEM 1A, ENGR 10, with C- or better
Co-requisite: MATH 31, PHYS 50
Misc/Lab: 2 hours lecture/2 hours lab
Normal Grade Rules
3 units

BME 065. Biomedical Applications of Statics
Detailed study of bodies in equilibrium as they apply to biomedical systems. Two-dimensional analysis of human joints and load-bearing implants are explored. Topics include free body diagrams, anthropometric measurements, internal forces, loading types, and stress shielding.
Prerequisite: MATH 031, PHYS 050
Normal Grade Rules
2 units

BME 066. Biomedical Applications of Metals and Ceramics
Fundamentals of the structure, processing, and properties of metals and ceramics used in medical technology. Emphasis is placed on using metals and ceramics for implantable and non-implantable biomedical devices. Recent trends in biomaterials are explored.
Prerequisite: CHEM 001A, MATH 031, PHYS 050
Normal Grade Rules
3 units

UPPER DIVISION

BME 115. Foundations of Biomedical Engineering
Introduction to the fundamental principles of biomedical engineering. Core conservation equations are applied to mass, energy, charge, and momentum transfer in biomedical systems. Additional topics provide a breadth of exposure in cell and molecular biology, diagnostics and analytical techniques, statistical analysis of biomedical data, bioinformatics, bioinstrumentation, FDA regulations, and biomedical ethics.
Prerequisite: BIOL 30, CHEM 001B, ENGR 010, MATH 032 and PHYS 050
Misc/Lab: Lecture 3 hours / Lab 3 hours
Normal Grade Rules
4 units

BME 117. Biotransport Phenomena
Applications of fundamentals of thermodynamic and kinetic aspects of energy and mass transport phenomena to biological systems. Development of quantitative description of transport processes beginning from the molecular level to entire organ systems.
Prerequisite: BME 115, Math 123 or Math 133A, BME 130 all with C- or better.
Normal Grade Rules
3 units

BME 130. Numerical Methods in Biomedical Engineering
Course applies computational and numerical analysis techniques to myriad engineering problems. The course focus is on application of numerical analysis to BME topics ranging from image analysis to nonlinear systems. We will employ various computational tools, including MATLAB/Simulink and ImageJ.
Prerequisite: MATH 32, BIOL 30, CHEM 1B all with C- or better
Corequisite: BME 115, MATH 133A or MATH 123
Misc/Lab: Lecture 2 hours/Lab 3 hours
Normal Grade Rules
3 units

BME 147. Quantitative Methods for BME
Descriptive statistics; hypothesis testing; linear and nonlinear model regression; statistical approach to medical device verification and validation; statistical sampling plans; analysis of survival data; bioinformatics; quantitative methods for design and testing of biomedical devices; programming for statistical analysis (R, Matlab).
Prerequisite: MATH 32 or MATH 32H, BME 115, BME 177 all with C- or better.
Normal Grade Rules
3 units

BME 165. Applied Engineering Biomechanics
Exploration of structural biomechanics applied to the human body. Students compare linear and nonlinear elastic, and viscoelastic models for describing the behavior of musculoskeletal tissues and implants. Concepts include bone remodeling, osteoarthritis, implant failure, muscle contraction, and cardiac mechanics.
Prerequisite: CE 095, CE 099, BME 065 or equivalent; And MATE 025 or BME 068 or equivalent.
Normal Grade Rules
3 units

BME 168. Medical and Biological Polymers
Polymers applications in medical devices and equipment, biological and biodegradable polymers, structure-processing-properties relationships, chemistry, thermal transitions, mechanical, electrical and optical properties, clinical outcomes and complications arising from use of polymers, regulatory framework for polymer use in humans.
Prerequisite: BME 68 or MATE 25 with "C-" or better
Normal Grade Rules
3 units

BME 174. Biomedical Regulatory Requirements
Study of Food and Drug Adminstration regulations for design of biomedical engineering products and processes, including design review and documentation processes; Good Laboratory Practices; Good Manufacturing Practices; quality and reliability requirements.
Prerequisites: Engr 100W, BME 115
Corequisite: BME 177
Normal Grade Rules
3 units

BME 175. Biomaterials
See MATE 175.
Normal Grade Rules
3 units

BME 177. Physiology for Engineers
Structure and function of physiological systems and discussion of topics of particular importance to the design, development, construction and clinical application of biomedical devices. Practical laboratory application of technologies to monitor, repair, replace or augment physiological systems.
Prerequisite: BIOL 30, CHEM 1B, PHYS 50
Misc/Lab: Lecture 2 hour/Lab 3 hours.
Normal Grade Rules
3 units
BME 178. Biomedical Product Realization
Basics of product realization from concept to clinical trials to prepare students for career(s) in multiple bioengineering sectors. Specific topics include: Product Concept, Research & Development, Design Controls in Application, Design Verification and Design Validation, Process Control in Application, Software Validation, Effective Risk Management, Engineering and Quality Management System Practices.
Prerequisites: ENGR 100W, BME 147, BME 174 all with a grade of C- or better.
Normal Grade Rules
3 units

BME 180. Individual Studies
Individual work on special topics. Students work with faculty and/or industry mentors on design, research, lab development or other types of projects.
Course credit: 1-3 units.
Prerequisite: Upper division standing
Repeatable for credit
Credit / No Credit
1-3 units

BME 182. Orthotics and Prosthetics
Diagrammatic breakdown of prosthetic design covering patient interfaces, socket designs, materials, modular components, prosthetic feet, prosthetic knees, upper extremity designs. Treatment options within current standard of care, device design trends, future device, and tools that facilitate start-up and expansion of capital equipment. Introduction to design processes and development or other types of projects.
Course credit: 1-3 units.
Prerequisite: Upper division standing
Repeatable for credit
Credit / No Credit
1-3 units

BME 188. Biomedical Device Manufacturing
Overview of manufacturing processes for producing biomedical devices, implants, instruments, prosthetics, and capital equipment. Introduction to design processes and tools that facilitate start-up and expansion of manufacturing activities.
Prerequisite: BME 25, MatE 25, BME 115, BME 177, all with C- or better
Normal Grade Rules
3 units

BME 198A. Senior Design Project I
Apply bioengineering principles to the design and implementation of an approved project, from problem definition to analysis, design and validation, and experimentation, including possible construction and testing. Integrate global and social issues in engineering.
GE Area: S when taken with BME Major sequence.
Prerequisite: ENGR 100W, BME 117, BME 177 all with a C or better. Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Allowed Declared Major: Biomedical Engineering or Graduate Standing.
Corequisite: ENGR 195A, and BME 147 or CHE 162 or ISE 130
Note: Meets GE Areas S and V when course is taken in combination with: BME 198B, ENGR 195A and ENGR 195B
Misc/Lab: Lecture 1 hour/Lab 3 hours.
Normal Grade Rules
GE: S
3 units

BME 198B. Senior Design Project II
Continuation of BME 198A. Culmination of project requiring formal oral presentation and report consisting of documentation of project methodology and results.
GE Area: V when taken with BME major sequence.
Prerequisite: BME 198A with C or better; BME 147 with C- or better. Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Allowed Declared Major: Biomedical Engineering or Graduate Standing.
Prerequisite: ENGR 195B
Note: Meets GE Areas S and V when course is taken in combination with: BME 198A, ENGR 195A and ENGR 195B
Misc/Lab: Lecture 1 hour/Lab 3 hours.
Normal Grade Rules
GE: V
2 units

BME 198C. Senior Design Project III
Continuation of BME 198B. Culmination of project requiring formal oral presentation and report consisting of documentation of project methodology and results.
GE Area: V when taken with BME major sequence.
Prerequisite: BME 198B with C or better; BME 147 with C- or better. Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Allowed Declared Major: Biomedical Engineering or Graduate Standing.
Corequisite: ENGR 195C
Note: Meets GE Areas S and V when course is taken in combination with: BME 198A, BME 198B, ENGR 195A and ENGR 195B
Misc/Lab: Lecture 1 hour/Lab 3 hours.
Normal Grade Rules
GE: V
2 units

BME 207. Experimental Methods in BME
Introduction to experimental methods and techniques used in Biomedical Engineering. Principles of data representation, analysis, and experimental designs in bioreactors, biomaterials, and medical devices. Topics include error analyses, modeling, normality testing, hypothesis testing. This is a hands-on course, and students will operate equipment in the departments laboratories.
Prerequisite: BME 115, graduate standing
Misc/Lab: 2 hours lecture/3 hours lab
Normal Grade Rules
3 units

BME 210. Mathematical Methods in Biomedical Engineering
Mathematical and computational methods applied to biomedical engineering. Topics include: i) statistical analysis of biomedical datasets; ii) design of experiments to meet FDA requirements; iii) solution techniques for partial differential equations, and iv) modeling of stochasticity in biological systems including error analysis.
Prerequisite: CompE 30, Math 133A, Graduate standing
(or by instructor consent)
Normal Grade Rules
3 units

BME 254. Microscale Biomedical Systems: Physics and Applications
Introduction to microscale physics and phenomena used in biomedical systems; analytical techniques and diagnostic applications. Course will discuss: microscale fluid mechanics (Navier-Stokes), electrical phenomena (Maxwell), and particle/molecule/device interactions. Case studies focus on applications of microscale physics to biomedical engineering analyses.
Prerequisite: BME 117, Math 123 or Math 133A, and graduate standing; or instructor consent
Normal Grade Rules
3 units

BME 256. Biomedical Applications of Nanoplatforms
Biomedical applications of nanoplatforms explores the development of three cutting edge sub fields: nanoplatforms in therapeutics; nanoplatforms in prosthesis and implants; and nanoplatforms in diagnosis and screening. The socioeconomic risks and solutions of nanoplatforms in biomedical applications are also explored.
Prerequisite: BME 177, Graduate Standing or instructor consent
Normal Grade Rules
3 units

BME 258. Medical Imaging for Engineers
Prerequisite: Phys 51, Math 123 or Math 133A, BME 177, and BME 210, or Instructor consent.
Misc/Lab: Lecture 3 hours/Lab 3 hours
Normal Grade Rules
3 units
BME 272. Biomedical Device Design and Principles
Principles involved in designing medical devices to function reliably in human body; interaction between synthetic and biological materials; use of design principles during conception and development of medical devices; effect of design on manufacture clinical performance, reliability and quality/regulatory assurance.
Prerequisite: BME 115, Graduate standing or instructor consent.
  - Normal Grade Rules
  - 3 units

BME 274. Regulatory, Clinical and Manufacturing Aspects of Medical Devices
FDA regulations related to medical devices; planning and implementation of clinical trials; sterilization techniques; failure mode analysis; quality control for medical device manufacture; intellectual property; field trips to device manufacturers.
Prerequisite: BME 115, Graduate standing; or instructor consent.

BME 280. Tissue Engineering
This course strikes a balance among the diversity of subjects that are related to tissue engineering, including biology, chemistry, material science, and engineering, among others. Emphasis on research areas of clinical value for engineering new organ systems.
Prerequisite: Graduate Standing or Instructor Consent
  - Normal Grade Rules
  - 3 units

BME 291. MS Thesis/Project Preparation Seminar
Development of project or thesis proposal.
Prerequisites: Good standing (GPA 3.0), classified status in the BME program, candidacy form submitted, satisfactory completion of graduation writing assessment requirement (GWAR).
  - Credit / No Credit
  - 1 unit

BME 298. MS Project
Masters project work in Biomedical Engineering.
Prerequisite: Admission to candidacy. BME 291
  - Mandatory CR/NC/RP
  - 2 units

BME 299. MS Thesis
Masters thesis work in Biomedical Engineering.
Prerequisite: Admission to candidacy, BME 291, BME 298.
  - Mandatory CR/NC/RP
  - 3 units

UPPER DIVISION
BME 1290R. Culminating Experience Supervision
Continued work on dissertation, thesis, or project or in preparation for comprehensive exams beyond the minimum required units for cases in which final deliverables are still in progress and all other degree requirements except the culminating experience have been fulfilled.
Prerequisite: Outstanding RP grade in a previous semester in BME 298 or 299
Note: No Degree Credit.
  - No Degree Credit
  - 1 unit
Business Courses

ACCOUNTING AND FINANCE

LOWER DIVISION

BUS1 020. Financial Accounting
Accounting postulates and principles, application of accounting theory to accumulate and summarize financial data; critical analysis and interpretation of financial statements.
Prerequisite: MATH 071.
Normal Grade Rules
3 units

BUS1 020N. Survey of Accounting
Introduction to accounting theory and techniques for business minors and non-business majors. Principles are applied to accumulating and summarizing financial data; critical analysis and interpretation of financial statements.
Prerequisite: Sophomore status recommended, non-business majors only.
Normal Grade Rules
3 units

BUS1 021. Managerial Accounting
Uses of accounting data for managerial decision-making. Topics include: cost accumulation for product costing; cost structure for control and motivation; cost-volume-profit relationships; profit planning; standard costing; flexible budgets, and relevant costs for non-routine decisions.
Prerequisite: BUS 20 or BUS 20N.
Normal Grade Rules
3 units

BUS1 120A. Accounting Information Systems
Documentation, flow and processing of accounting information in business organizations; related principles of internal control; system design principles. Computerized and non-computerized procedures are used for processing.
Prerequisite: BUS 20 with a “C” or better. Declared Major in Accounting, Accounting Information Systems or Corporate Accounting and Finance. Upper division standing.
Normal Grade Rules
3 units

BUS1 120B. Advanced AIS and IS Risk Assessment
Hands-on project-oriented computer lab to develop working knowledge and skills in using Microsoft Excel and Access as application development tools. Students design a prototype accounting system and generalized audit module prototype assessing integrity of previously designed databases.
Prerequisite: BUS 120A and COMM 100W or ENGL 100WB or LLD 100WB with a minimum grade of “C” or better in both. Upper division standing.
Normal Grade Rules
3 units

BUS1 120C. Network Environment and Accounting Controls
Introduction to current network arrangements in small, medium and large corporations, including hardware/software components used to control the integrity, and access of networks. Internet interfaces including TCP/IP basics and network configurations. A practical NT domain and its administration will be included.
Prerequisite: BUS 120B with a minimum grade of “C”.
Upper division standing.
Normal Grade Rules
3 units

BUS1 120D. Accounting Topics in IT Audit
Students will be exposed to real life audit environment cases. Students will apply the EDP auditing techniques of integrated audit risk management, auditing of platforms, applications, and network as appropriate. Discussion of network security, including telecommunications, firewall, encryption and other current IT Audit issues will be included as part of IT discussion.
Prerequisite: BUS 120B and BUS 120C with a grade of “C” in each. Upper division standing.
Normal Grade Rules
3 units

BUS1 120E. Platforms Security & E-Commerce Controls
Students will be exposed to overall functional capabilities of the security of UNIX, NT, and Novell platforms, and how to audit the security of these platforms. Students will also be exposed to the E-Commerce IT environments, and setting up of an E-Commerce website with security considerations.
Prerequisite: BUS 120B and BUS 120C with a grade of “C” in each.
Normal Grade Rules
3 units

BUS1 120G. Programming and Systems Development in AIS
This course covers the process, technical elements and current techniques used in accounting systems development. Programming topics include business reporting languages. Systems development topics include requirements analysis, functional specification, system design, implementation, testing, and maintenance.
Prerequisite: BUS 020 with a minimum grade of “C”.
Normal Grade Rules
3 units

BUS1 121A. Intermediate Accounting I
Principles, control and theory of accounting for assets; correction of prior year’s earnings; measurement and determination of income. Projects involving spreadsheet software required.
Prerequisite: BUS 20 with a minimum grade of “C” and Upper division standing. Student must be a declared Accounting, Accounting Information Systems, Finance, or Corporate Financial Management major to enroll.
Normal Grade Rules
3 units

BUS1 121B. Intermediate Accounting II
Principles, controls, and theory of accounting for liabilities and equities; preparation, utilization, and analysis of cash flow and fund statements; financial ratios and statistical analysis of financial statements accounting data. Projects involving spreadsheet software required.
Prerequisite: BUS 121A (with minimum grade of “C”).
Upper division standing.
Normal Grade Rules
3 units

BUS1 122A. Management Accounting and Control Systems
Examination of the nature, objectives and procedures of cost management as applied to product and service costing, decision-making and cost planning and control systems.
Prerequisite: BUS 20 with a minimum grade of “C” and upper division standing. Declared Major in Accounting, Accounting Information Systems or Corporate Accounting and finance.
Normal Grade Rules
3 units

BUS1 123A. Tax Factors of Business and Investment Decision
Introductory course in taxation with emphasis on certain themes that pervade the federal income tax system and its impact on business. Property transactions, deferral techniques, accounting periods, accounting methods and research techniques with emphasis on corporations.
Prerequisite: BUS 20 with a minimum grade of “C”, Upper division standing and declared Accounting, Accounting Information Systems or Corporate Accounting Finance Major.
Normal Grade Rules
3 units
BUS1 123C. Taxation of Individuals and Pass
Through Entities
Emphasis on the unique factors involved in taxation of
individuals and pass-through entities (partnerships, S
corporations, estates and trusts). Taxation of the transfer
of wealth through gifts and inheritance.
Prerequisite: BUS 123A with a grade of “C” or better.
Upper division standing. Business Minor or Accounting
or Corporate Accounting Finance major.
Normal Grade Rules
3 units

BUS1 124. Forensic Accounting
This course will examine the various frauds that are
perpetrated on companies and discuss ways the
accountant can uncover the frauds. The criminal justice
system will be reviewed and the various litigation-support
functions provided to attorneys by accountants will be
discussed.
Prerequisite: BUS 20, COMM 100W or ENGL 100WB or
LLD 100WB, BUS 121A and BUS 121B with a minimum
grade of “C” in each. Accounting and Corporate
Accounting Finance Majors only.
Normal Grade Rules
3 units

BUS1 125. Special Financial Reporting Topics
Analysis of specialized and emerging accounting
topics (such as interim reporting, deferred taxes, post-
employment benefits and new FAS pronouncements)
with emphasis on research, application and analytical
skills.
Prerequisite: COMM 100W or ENGL 100WB or LLD
100WB, BUS 121A and BUS 121B (with minimum grade
of “C” in each). Accounting and Corporate Accounting
Finance Majors or Business Minor only.
Normal Grade Rules
3 units

BUS1 125A. Advanced Writing for Accounting
Students learn to communicate accounting and
other specialized financial information to a variety of
audiences including employers, clients and the investing
public in a manner that promotes clarity, accuracy and
professionalism.
Prerequisite: BUS1 121A
Normal Grade Rules
3 units

BUS1 125B. Accounting Ethics
Students study accounting ethics, professional codes
of conduct and the application of accounting ethics in
various fields of accounting including auditing, managerial
accounting and taxation.
Pre-requisite: BUS1 121A, BUS1 122A
Normal Grade Rules
3 units

BUS1 125C. Professional Development and
Communications
Interview and verbal presentation skills, including
computer applications, in professional, business and
social situations are developed. Professional Skills and
personal awareness are emphasized.
Prerequisites: BUS1 20
Normal Grade Rules
3 units

BUS1 125D. Internship in Accounting
Course integrates accounting education with work
experience and exposes students to career opportunities
and accounting in the business environment. It provides
individualized educational experience through structured
employment and on-the-job learning.
Prerequisite: BUS1 121A and BUS1 125A
Normal Grade Rules
3 units

BUS1 126. Advanced Accounting
Accounting for multi-unit operations: consolidated
reporting issues, transfer pricing issues, globalization
issues (foreign tax structures, organizational forms, and
international accounting) translating foreign currency
transactions and operations, hedging foreign currency
exposures, goodwill, and business combinations.
Extensive use of spreadsheets (Excel)
Prerequisite: COMM 100W or ENGL 100WB or LLD
100WB, BUS 121A and BUS 121B (with minimum grade
of “C” in each). Accounting or Corporate Accounting
Finance Majors or Business Minor only.
Normal Grade Rules
3 units

BUS1 127A. Honors Practicum in Corporate
Financial Management
Corporate sponsored projects in accounting and finance.
Students are assigned to a host company and are required
to work with the host company and faculty advisor on a
topic in financial management. A report will be presented.
Students are admitted based on an average 3.0 GPA in four
prerequisite courses.
Prerequisite: COMM 100W or ENGL 100WB or LLD
100WB, BUS 121A, BUS 121B, BUS 122A, and BUS 170
with a minimum grade of “C” in each and instructor
approval. Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

BUS1 127B. Advanced Honors Practicum
Course involves advanced corporate sponsored projects
in accounting and finance. Students are assigned to
supervisory personnel at the host company under the
advise of the instructor. Course is repeatable for
credit for a total of 6 units.
Prerequisite: Declared major in Accounting, Finance,
AIS or Corporate Financial Management and instructor
consent.
Repeatable for credit
Normal Grade Rules
3 units

BUS1 128. Accounting for Nonprofit
Organizations
Principles, objectives and methods of accounting for
governmental and other nonprofit organizations.
Prerequisite: COMM 200W or ENGL 100WB or LLD
100WB and BUS 121A (with minimum grade of “C” in
both). Accounting or Corporate Accounting Finance
Majors or Business Minor only.
Normal Grade Rules
3 units

BUS1 129A. Financial Auditing
Emphasis on process by which an accountant forms an
opinion on financial statement fairness of presentation.
Examines public accounting profession, application of
relevant professional standards, auditing procedures,
and professional ethics.
Prerequisites: BUS1 120A, BUS 121A with grade of C
or better.
Normal Grade Rules
3 units

BUS1 129B. Operational Auditing
Study of professional and technical aspects of internal
and operational auditing with emphasis on concepts,
ethics and significance in preparation/implementation
of the audit and its findings.
Emphasis on process by which an accountant forms an
opinion on financial statement fairness of presentation.
Examines public accounting profession, application of
relevant professional standards, auditing procedures,
and professional ethics.
Prerequisites: BUS1 120A, BUS 121A with grade of C
or better.
Normal Grade Rules
3 units

BUS1 170. Fundamentals of Finance
The finance function and its relationship to other
decision-making areas in the firm; the study of theory
and techniques in acquisition and allocation of financial
resources from an internal management perspective.
Prerequisite: BUS 21 or BUS 122A, ECON 1A, ECON 1B
and BUS 90. Upper division standing.
Normal Grade Rules
3 units

BUS1 171A. Financial Institutions and Markets
Study of financial markets and institutions that operate
in them. Examinations of money and capital markets,
interest rates and financial institutions, both depositary
and non-depositary. Emphasis on past, current and future
industry and regulatory authorities.
Prerequisite: BUS 170 (with minimum grade of “C”),
Upper division standing. Business Administration Finance
or Corporate Accounting and Finance majors only.
Normal Grade Rules
3 units
BUS1 171B. Commercial Banking
Analytical tools for the evaluation of the performance and risk of commercial banks. The measurement and management of interest rate, liquidity, credit and solvency risks. Historical and current banking regulations. Commercial credit analysis and loan policies.
Prerequisites: BUS1 171A with a minimum grade of “C”.
Normal Grade Rules
3 units

BUS1 172A. Investment Analysis
Procedures and tools necessary to evaluate investment opportunities, determine value and analyze risk/return characteristics of equity, fixed income securities, and alternative individual investments. Emphasizes responsible decisions and provides background for portfolio analysis.
Prerequisite: BUS 170 (with minimum grade of “C”).
Upper division standing. Business Administration Finance or Corporate Accounting and Finance Majors only.
Normal Grade Rules
3 units

BUS1 172B. Portfolio Management
Basic procedures and analytical tools necessary to construct, analyze, evaluate and revise investment portfolios or groups of assets, including computerized portfolio models. Approach and content consistent with objectives of Chartered Financial Analyst (CFA) program.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB and BUS1 172A with a minimum grade of “C” in both. Upper division standing.
Normal Grade Rules
3 units

BUS1 172C. Futures and Options
The use of derivatives for risk management by individuals, banks and corporations. The functioning of the futures and options markets for equities, fixed income and commodities. Option valuation models; Black-Scholes and beyond. Risk arbitrage. Applications in personal investment strategies.
Prerequisite: BUS 170 and BUS 172A with a minimum grade of “C” in each.
Normal Grade Rules
3 units

BUS1 172D. Student Managed Investment Fund
Prerequisite: BUS1 170
Normal Grade Rules
3 units

BUS1 173A. Financial Management: Theory and Policy
From the financial manager’s perspective, considerations and alternatives for maximizing a firm’s value. Tools for understanding what determines value and what managerial actions can alter value, by combining theory with practical knowledge of marketplace limitations.
Prerequisite: BUS 170 (with minimum grade of “C”).
Upper division standing. Business Administration Finance or Corporate Accounting and Finance Majors only.
Normal Grade Rules
3 units

BUS1 173B. Problems in Financial Management
Advance study of business case materials, including assessment of financial condition, projection of capital requirements, and analysis of decisions pertaining to working capital, capital expenditures, financing, capital structure, dividends, mergers and reorganization.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB and BUS1 173A with a minimum grade of “C” in both. Upper division standing.
Normal Grade Rules
3 units

BUS1 173C. Entrepreneurial Finance
Basic principles of finance applied to new ventures and small businesses. Topics include incorporation, venture capital, business models, financial analysis, valuation, capital structure, cash flow forecasting, growth and exit strategies.
Prerequisite: BUS 170 with a minimum grade of “C” and Upper Division Standing.
Normal Grade Rules
3 units

BUS1 175. Real Estate Finance
Real estate financing from the viewpoint of borrower and lender; financing mathematics, legal aspects of lending, appropriate financial instruments, taxes and real estate, loan cost analysis, loan valuation, development and assumability. Mortgage markets/institutions considered together with alternative financing techniques for various types of properties.
Prerequisite: BUS1 170 (with minimum grade of “C”).
Upper division standing.
Normal Grade Rules
3 units

BUS1 177. International Business Finance
Focuses on the determination of exchange rates and the workings of international financial markets. Develops exchange rate parity relationships and techniques for hedging exchange rate risk. Strategies for managing working capital, long term debt, fixed asset selection and international financial reporting are also examined.
Prerequisite: BUS1 170 (with minimum grade of “C”).
Upper division standing.
Normal Grade Rules
3 units

BUS1 179B. Selected Topics in Business Finance
Extensive investigation of selected topics with major emphasis on integration of finance theory and practice within a current business context.
Prerequisite: BUS1 173A (with minimum grade of “C”).
Upper division standing.
Normal Grade Rules
3 units

BUS1 196B. Corporate Finance II
Introduction to selected topics of corporate finance: mergers and acquisitions, bankruptcy, initial public offerings, working capital management, payout policy, capital structure, multinational financial management. Application of finance theory to investment and financing decisions of a corporation.
Prerequisite: BUS1 173A
Normal Grade Rules
3 units
BUS 201. Business Communications
This business communications course develops students’ written and oral communication skills, emphasizing clear, concise and coherent articulation via a multitude of channels: e-mails, memos, cover letters, resumes, presentations, reports, etc. The course enables students to continue practicing effective communication in all aspects of their academic and professional careers.
Normal Grade Rules
1 unit

BUS 202. Managing in the Global Economy
This course investigates the world economy, including how markets, institutions and organizations vary from country to country, and how global competition, climate change, digital and emerging economics, and shifting from manufacturing to a service economy affect management practice.
Prerequisite: Graduate standing. Restricted to Business - MBA majors only
Normal Grade Rules
3 units

BUS 203. International Experience for American Executives
An intensive one-week program at one of the nine EMBA Consortium partner schools with opportunities to collaborate with classmates from around the globe. Develop your global business acumen while learning about the unique culture and business practices of the region you visit. The course consists of classroom work, company visits, and cultural experiences. Prerequisite: Instructor Consent
Normal Grade Rules
3 units

BUS 210. Developing and Managing People
Based on the philosophy that increased self-awareness and effective self-management leads to more effective management of others, uses experientially focused, integrating models, principles, and activities. Prerequisite: Graduate standing. Restricted to Business - MBA majors only
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

BUS 211. Orientation and Behavioral Workshop
The course provides graduate business students with frameworks, processes and methods to improve their opportunity for success in a rigorous, accelerated graduate business program format. Students are introduced to key concepts in business communication and etiquette, case study methodology, and business strategy. This overview includes the opportunity to apply key concepts in a team format and discuss their strategic, behavioral and career implications
Credit / No Credit
1 unit

BUS 220. Financial and Managerial Accounting
Introduces students to financial and managerial use of accounting information systems and concepts, including the sources, uses and limitations of accounting information as used by investors outside the firm and by managers within the firm.
Prerequisite: Graduate standing. Restricted to Business - MBA majors only
Normal Grade Rules
3 units

BUS 220A. Financial Statement Analysis for Accountants
Course develops the ability to understand, interpret, and analyze financial information, and examines the relationship between financial statements and the capital markets. Students develop financial analysis skills, and expand business knowledge from an accounting perspective.
Prerequisite: MSA Classified Standing
Normal Grade Rules
3 units

BUS 220B. Financial Reporting and Analysis I
Principles, control and theory of accounting for assets, correction of prior year’s earnings, measurement and determination of income.
Prerequisite: MSA classified standing
Normal Grade Rules
3 units

BUS 220C. Accounting Information Systems I
Will provide conceptual framework concerning contemporary accounting information systems including: database concepts; internal control, use of systems technology, applications, management, systems analysis/ design and auditing.
Prerequisite: MSA classified standing
Normal Grade Rules
3 units

BUS 220D. Financial Analysis and Markets
Provides an overview of the required skills and the environment appropriate to the financial and economic decision-making function of the firm. The integrated approach of this course is designed to identify and analytically evaluate those internal and external variables which contribute to economic and financial decisions.
Prerequisite: MSA classified standing
Normal Grade Rules
3 units

BUS 220E. Financial Reporting and Analysis II
Continuation of Financial Reporting and Analysis I. Principles, controls, and theory of accounting for liabilities and equities; preparation, utilization, and analysis of cash flow statements; financial ratios and statistical analysis of financial statements accounting data.
Prerequisite: MSA classified standing
Normal Grade Rules
3 units

BUS 220F. Management Accounting and Control Systems
Provides the student techniques with an overview of the concepts and procedures of cost accounting relevant to managerial decision-making. Emphasizes planning and control, inventory valuation and income determination, and performance measurement.
Prerequisite: MSA classified standing
Normal Grade Rules
3 units

BUS 220G. Tax Factors of Business and Investment Decisions: Theory and Practice
Introduces essentials of tax research methodology, focusing on taxation of corporations and shareholders. Includes taxation of property transactions, deferral techniques, accounting periods, and accounting methods.
Prerequisite: MSA classified standing
Normal Grade Rules
3 units

BUS 220H. Auditing: Concepts/Practice
Discusses the public accounting profession and its socio-economic role, auditing techniques with an emphasis on EDP environment; audit procedures, practice and programs; working paper preparation; unqualified and qualified report writing.
Prerequisite: MSA classified standing. Graduate Standing only
Normal Grade Rules
3 units

BUS 220I. Forensic Accounting
Course will examine the frauds perpetrated on companies and methods of discovery. The criminal justice system will be reviewed and litigation support services provided by accountants to attorneys, including damage computations and testifying techniques and skills will be covered.
Normal Grade Rules
3 units

BUS 220J. Business Communications & Ethics
Emphasizes communication effectiveness and skill building for influencing and guiding people. Includes fundamental skill building in researching, organizing and writing reports, making persuasive presentations that are sensitive to the needs and requirements of clients, peers and managers.
Prerequisite: MSA classified standing
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units
BUS 220K. Accounting Practicum
The Accounting Practicum is an internship with an accounting firm or corporate finance group. This provides opportunities to apply program content to real-world environments, gain appreciation of work expectations and demands, and relate field experience to remaining program curriculum.
Prerequisite: MSA classified standing.
Credit / No Credit
3 units

BUS 220L. Legal and Ethical Environment of Accounting Practice
Emphasizes knowledge in the areas of the Law of Contracts and selected portions of the Uniform Commercial Code: Sales of Goods; Commercial Paper and other Negotiable Instruments; and Secured Transactions.
Prerequisite: MSA classified standing.
Normal Grade Rules 3 units

BUS 220M. Accounting Ethics
Examines professional ethical standards for accountants. Focuses on professional codes of conduct and workplace decisions for professionals in the fields of auditing, managerial accounting and taxation.
Prerequisite: BUS 220H, Graduate Standing only.
Normal Grade Rules 3 units

BUS 220N. Management of Organizations and Projects
Examines the integrative role of the general manager as a strategist responsible for leading and managing multi-functional projects and develop skills related to leadership, planning, decision-making, motivating, scheduling and shaping organizational team culture by making extensive use of team building exercises/cases.
Prerequisite: MSA Classified Standing.
Normal Grade Rules 3 units

BUS 220P. Taxation of Individuals and Flow-Through Entities
Taxation of individuals and pass-through entities (partnerships, LLCs, S corporations, estates and trusts) with emphasis on unique rules and factors in the Internal Revenue Code and Treasury Regulations.
Prerequisite: MSA classified standing.
Normal Grade Rules 3 units

BUS 220R. Software Applications for Accounting
Creation, internal controls, evaluation and audit of advanced electronic spreadsheets. Students learn to use complex queries to extract information from databases.
Prerequisites: BUS220C or equivalent
Normal Grade Rules 3 units

BUS 220S. Financial Reporting and Analysis III
Accounting for multi-unit operations: consolidated reporting issues, transfer pricing issues, globalization issues (foreign tax structures, organizational forms and international accounting), translation of foreign currency transactions and operations, hedging foreign currency exposures, goodwill and brief exposure to business combinations.
Prerequisite: MSA classified standing.
Normal Grade Rules 3 units

BUS 220T. Accounting Information/Tax
Prerequisite: MSA classified standing.
Normal Grade Rules 6 units

BUS 220U. IT Audit & Internal Controls
The course provides an understanding of the types of risk that arise in computer environments and consider the impact these risk and threats have on the audit by examining computer-assisted audit tools and techniques.
Prerequisite: MSA Classified Standing.
Normal Grade Rules 3 units

BUS 220V. Special Topics in Accounting
Current special topics in accounting including an understanding of the financial accounting policies and procedures followed by state, county, and municipal governments, universities, and other non-profits for accounting and budgeting of the receipt and expenditure of tax and related revenues.
Prerequisite: MSA Classified Standing.
Normal Grade Rules 3 units

BUS 220X. Business Analysis and Valuation Using Financial Statements
Development of Accounting based valuation framework that integrates a firm’s strategy, accounting performance, and value; assessing a firm’s value proposition and identifying key value drivers and risks; evaluating degree to which a firm’s accounting policies capture the underlying business reality.
Prerequisite: MSA classified standing.
Normal Grade Rules 3 units

BUS 220Y. Professional Communications and Relationships III
Skill development in converting critique into meaningful and important information to improve professional performance; integration of professional skills, personal style with effective communication skills to prepare the student for transition to professional in the further development of their careers.
Prerequisite: MSA classified standing.
Normal Grade Rules 3 units

BUS 220Z. Data Analytics for Accounting
Basic principles and practices of data analytics as applied to accounting.
Prerequisite: Graduate standing in MS Accountancy program
Normal Grade Rules 3 units

BUS 222. Profit Planning and Control
Course covers how financial planning and control systems operate, and are used to deploy strategy, align interests, improve operations, and facilitate strategic change, maximizing firm value. Includes disciplined processes of decision-making, resource allocation, performance measurement to link strategy, management action, and shareholder accountability.
Prerequisite: BUS 220 and graduate standing.
Normal Grade Rules 3 units

BUS 223A. Tax Research and Decision Making
Develops basics for tax research and evaluates the interrelationships of statutes, regulations, rulings and court cases. Identifies tax services and other primary research materials with emphasis on their use in tax decision-making. Emphasizing critical thinking and communication skills.
Prerequisite: Graduate standing.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
C: GWAR 3 units

BUS 223B. Taxation of Partnerships
Income tax treatment of partners and partnerships and LLCs, including the creation, operation, liquidation and sale or other amalgamation of organizations. Special allocation and non-recourse debt arrangements are also covered.
Prerequisite: BUS 223A and BUS 223G
Normal Grade Rules 3 units
BUS 223D. Seminar in Tax Planning and Practice
Capstone course for the MS in Taxation degree. Will integrate financial planning throughout the program, including sale of the business and estate planning, and will include a final written comprehensive project.
Prerequisite: Graduate standing and completion of at least 3 tax core courses.
Notes: Completion of the course or BUS 223E satisfies the MST comprehensive project requirement.
Normal Grade Rules
3 units

BUS 223F. Tax Accounting Methods/Periods
Definition and importance of accounting methods and periods; timing rules for income, expenditures, inventory and R&D; change procedures; special methods; book-tax differences; introduction to provision for income taxes.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 223G. Taxation of Business Entities
Income tax treatment of different types of business entities and their owners. Focuses on operations, reporting, formation, restructuring and termination. Selected state and international tax rules, tax planning, and underlying tax policies also covered.
Corequisites: BUS 223A
Normal Grade Rules
3 units

BUS 223H. Tax Policy Capstone
Capstone course that examines the principles and policies that underlie and shape tax systems and rules. Students gain a broader perspective of the tax law beyond its technical application, and learn how tax, economic, social and environmental policies interact.
Prerequisites: BUS 223A, BUS 223F, BUS 223G
Normal Grade Rules
3 units

BUS 224. Financial Statement Analysis
Course develops the ability to understand, interpret, and analyze financial information, and examines the relationship between financial statement information and the capital markets. Students develop financial analysis skills, and expand perspectives of business and professional roles.
Prerequisite: BUS 220 and graduate standing.
Normal Grade Rules
3 units

Examine managerial accounting in medical product development with emphasis on financial aspects of the industry. Develops understanding of profit/loss statements, budget preparation and execution; financial implication of patent life, rationale for mergers and acquisitions; financial implications of outsourcing.
Prerequisite: Admission to MPDM program & completion of Bus 210 and SMPD 281A.
Normal Grade Rules
3 units

BUS 225A. Taxation of Estates and Trusts
Excise and transfer tax treatment of estates, gifts, trusts, creators, beneficiaries and fiduciaries. Distinguish between revocable and irrevocable trusts, including proper trusts to achieve desired goals. Reviews taxation of asset sales and dissolution or liquidation of estates or trusts. Analyzes estate evaluation, family limited partnerships, grants, GST, and planning opportunities.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225B. Taxation of Corporate Reorganizations
Income tax treatment of corporate reorganizations and amalgamations, including acquisitions, tax-free and taxable as well as corporate division. Tax treatment of net operating losses, earnings and profits, property basis and other corporate attributes.
Prerequisite: BUS 223A and BUS 223G
Normal Grade Rules
3 units

BUS 225C. International Tax - US Corporations with Foreign Activities
Taxation of outbound investment and activities of the US corporations. Topics include sourcing, foreign tax credit, subpart F, Sections 482 and 367, foreign currency, establishing foreign operations, state taxation of outbound operations, and issues affecting expanding US multinational technology firms.
Prerequisite: BUS 223G and BUS 225W
Normal Grade Rules
3 units

BUS 225D. International Tax - Individuals and Foreign Corporations
Taxation of individuals with foreign activities, and inbound investment and activities of foreign corporations. Topics include taxation of US expatriates and foreign nationals, foreign tax credit, tax treaties, foreign-owned US real estate, and issues of mobile employees.
Prerequisite: BUS 223G and BUS 225W
Normal Grade Rules
3 units

BUS 225E. State Taxation Fundamentals
Introduction to the legal foundation, nature and operation of key state and local taxes. Constitutional constraints regarding nexus, sourcing and apportionment are covered. Additional topics include research techniques, compliance and planning considerations, current issues and state tax reform.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225F. Taxation of S Corporations
Topics include: Income tax treatment of S Corporations and their shareholders, built-in gains tax and excess net passive income tax; operating and distribution rules, shareholders basis, NOL pass-through rules; formation, reorganizations, Q5SUBS, and state income tax consequences.
Prerequisite: BUS 223A and 223G
Normal Grade Rules
3 units

BUS 225G. Taxation of Property Transactions
Key rules and planning considerations of property development, transfer, lease, abandonment, worthlessness, and destruction; depreciation and amortization; special types of intangibles and relevant tax rules; property indebtedness; sale of a business; tax-deferred transactions; sale of a principal residence; and basics of non-income taxes applicable to property and property transactions.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225I. Tax Practices, Penalties and Procedures
Procedures applicable to filing returns, amended returns and claims for refund. Also covers key procedural matters governing examinations, appeals, and adjudication of disputes. Relevant penalty provisions and rules of conduct are also examined. While the focus is on federal rules, key procedural differences in California law are also covered.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225J. Taxation of Executive Compensation
Tax aspects of executive compensation includes qualified and nonqualified stock options, deferred compensation, fringe benefits, 401(k), 403(b), pension and profit sharing plans, rabbi trusts, etc.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

Course Descriptions

v1
July 1, 2019

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE

Bus 227D. Employment Taxation and the Modern Workforce
An overview to the types of employment tax and related issues that can arise for companies and workers when employees telecommute or have multiple work locations. The basics of Federal employment taxes are covered along with worker classification rules as well as selected state and international tax issues and rules relevant for today’s workforce.
Pre/Corequisites: Bus 223A
Normal Grade Rules
1 unit

Bus 227E. Foundation for Understanding Taxation
Legal foundation of taxes, types of taxes, and underlying theories, definitions and concepts. How to analyze transactions and activities for tax consequences. Helps strengthen one’s overall understanding of taxation and application of analytical skills to resolving tax issues.
Prerequisites: Undergraduate tax course
Normal Grade Rules
1 unit

Bus 227F. Personal and Business Leadership Skills for Tax Practitioners
Learn the intrapersonal and interpersonal skills and knowledge a tax practitioner needs for personal and professional success. Includes listening, oral and written communication, ethical reasoning, relationship and team building, establishment and assessment of accountability measures, time management, and career planning.
Pre-Requisite: Graduate Standing
Normal Grade Rules
2 units

Bus 230. Marketing Management
Fundamental concepts and skills required for understanding markets and managing marketing efforts. Includes market orientation, consumer and industrial buyer behavior, market segmentation, target market identification, product development, pricing, distribution channels, marketing communication, strategy development, and marketing planning and control.
Prerequisite: Graduate standing. Restricted to Business - MBA majors only
Normal Grade Rules
3 units

Bus 231. Consumer and Market Behavior
Influence of consumer behavior upon marketing management strategy; examination of behavioral concepts as they relate to purchase decisions; types of consumer research instructions and applications; focus on buyer behavior in action-oriented environments.
Prerequisite: Bus 230 and graduate standing.
Normal Grade Rules
3 units

Bus 231A. Market Forecasting
Course will help business people in understanding and identifying the appropriate forecasting methods in order to make a more accurate prediction of future demand.
Prerequisite: Bus 230, Business statistics and graduate standing
Normal Grade Rules
3 units

Bus 231C. High Tech Marketing
Course will give students exposure to marketing in technology industries. Principal ideas from the technology adoption life cycle form the conceptual basis for the course. Differences between technology marketing and other kinds of marketing are explored and special skills identified.
Prerequisite: Bus 230, business statistics, and graduate standing
Normal Grade Rules
3 units

Bus 232. Third World Marketing Manager
Marketing in Third World high risk areas: Russian, African, Islamic. Understanding methods of marketing, as well as how to deal with specific third world risks: mafia, bribery, "black" market, smuggling and corruption.
Prerequisite: Bus 230 and graduate standing.
Normal Grade Rules
3 units

Bus 233. Business to Business Marketing
Course deals with business-to-business marketing, that is, the marketing of goods, services, and ideas to business and non-retail institutions. Covers product, price, promotion and distribution with emphasis on strategy development and marketing decision-making.
Prerequisite: Bus 230 and graduate standing.
Normal Grade Rules
3 units

Bus 234A. Social Media Marketing
Approaches to social media marketing. Benefits and opportunities companies face as online social networking influences company marketing strategies. Use of emerging technology to promote brand awareness and strategies for social recovery.
Normal Grade Rules
3 units

Bus 234B. Promotional Strategy
Explores the media and techniques used by businesses to communicate with consumers, resellers, and the public. Topics will include budgeting, choosing media, testing communication effectiveness, executing and controlling advertising, personal selling, and consumer trade promotions.
Prerequisite: Bus 230 and graduate standing.
Normal Grade Rules
3 units

Bus 235A. Introduction to Business Analytics
This course will introduce fundamental business analytics tools including Probability Analysis, Decision Analysis, and Linear and Discrete Optimization. An emphasis will be placed on conceptual understanding and analytic insight.
Prerequisite: Graduate Standing only.
Normal Grade Rules
3 units

Bus 235B. Business Research
This course introduces participants to 21st Century business research methodology. The emphasis here is not on issues related to ongoing data sources but rather to unique, one-time problems that are best solved with custom research projects. Quantitative methods are emphasized but the advantages of the qualitative perspective are not overlooked. Other topics include questionnaire design, data collection, analysis, and presentation, highlighting appropriate new technology. The aim is to prepare managers to conduct research as well as to enable them to engage collaboratively with their research consultants.
Prerequisite: Graduate Standing only.
Normal Grade Rules
3 units

Bus 235C. Data Mining
Data mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in transactional databases or gathered through web mining. Topics: data visualization, association rules, clustering, and various modern classification techniques.
Prerequisite: Graduate Standing only.
Normal Grade Rules
3 units

Bus 235D. Business Analytics Simulation
Transforming diverse data into knowledge-driven business decisions. Participants make tactical and strategic decisions based on consumer, competitor, aggregate market, financial, etc. Success is gauged by monitoring a dashboard that includes manufacturing productivity, return on investment, investment in the future, market share, product quality, financial performance, etc.
Prerequisite: Graduate Standing only.
Normal Grade Rules
3 units

Bus 236. Current Topics in Marketing
Emphasizes marketing and decision-making in social, government and business environments. Uses behavioral science and quantitative techniques to develop strategies for tactical and strategic marketing solutions to problems which impact on R&D, finance, logistics, manufacturing, distribution and others.
Prerequisite: Bus 230 and graduate standing.
Repeatable for credit
Normal Grade Rules
3 units
BUS 237. Sales Management
Learn to recognize and capitalize on emerging market opportunities. Develop ability to manage different personality types, enhance communication skills, and increase cultural sensitivity. Sales forecasting, training, motivational techniques, and ethics.
Normal Grade Rules
3 units
BUS 238. International Marketing
The development of international marketing strategy. Focus on the evaluation of the various environmental variables, selection of target markets, methods of entry, developing an appropriate marketing mix and planning/control of the international marketing effort.
Prerequisite: BUS 230 and graduate standing.
Normal Grade Rules
3 units
BUS 240. Electronic Commerce
Focuses on organizational uses of information technology, impacts of IT on organizational operations and strategies, and increasing importance of Internet in business activities. Covers fundamentals of IT, organizational applications of IT and Internet, and successfully developing and implementing IT-based applications.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
BUS 241. Structured Methods of Information Technology
An analysis of structured methodologies of programming, documentation, testing, and management. Examined in terms of various information technologies; emphasis on development of techniques to analyze, design and adapt system solutions to organizational information needs.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
BUS 242. Distributed Information Systems
An analysis of database management systems, data communications, and telecommunications in a distributed information network. Focus will concentrate on identifying the means through which an organization can use the information technologies of distributed systems to satisfy its data needs.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
BUS 243. Database Management
Introduction to database approach of planning, design and implementation of information systems applications in organizations from the viewpoint of the manager as a knowledgeable user. Includes data modeling, data integrity and practical project assignments.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
BUS 245. Service Innovation
The course introduces students to the service in a variety of trade, enterprise and service industry settings. Students will learn about the economics and management of service systems and their design, operations, information technology, performance measurement, marketing, supply chain and quality assurance.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
BUS 247. Big Data Management
Exploration of Big Data and how businesses are succeeding (or failing) in using it. Learn to extract value from Big Data by getting data ready for analysis (data wrangling), and by understanding and communicating the business value.
Normal Grade Rules
3 units
BUS 248. Cyber Risk Management
This course surveys cyber risk management concepts and best practices. Topics include cyber security threats, countermeasures, vulnerabilities, cost/benefit analysis, incident handling/response, business contingency planning, ethics, and legal imperatives within the organizational context.
Normal Grade Rules
3 units
BUS 250. Law and Ethics
Course focuses on both law and ethics in the business environment, how individuals and organizations approach law and ethics, as well as the ethical, legal and social consequences of disregarding law and ethics in favor of other objectives.
Prerequisite: Graduate standing. Restricted to Business - MBA majors only
Normal Grade Rules
3 units
BUS 251. Strategic Human Capital Performance Management
This course utilizes case and research discussions as well as quantitative costing and utility analyses to develop practical skills in the global deployment of human resources to achieve and sustain strategic competitive advantage.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
BUS 252. Managing Organizational Change
The focus will be upon applied organizational change by covering organizational behavior from a normative, policy-oriented perspective. The perspective will be one of viewing the person (student) as an actual or potential change agent; a consultant (internal or external), innovative personnel specialist, or middle or top level manager.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
BUS 253. Negotiation and Conflict Management
Introduces a theoretical framework and skill-building exercises/simulations for negotiating agreements in adversarial or competitive relationships. Explores conflict resolution methods applicable to commercial transactions, employee relations, union management negotiation and contract disputes, as well as international diplomacy.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
BUS 254. Advanced Personnel Management
Selected human resource management topics are studied, including: computer applications and quantitative methods, forecasting, job analysis, personnel recruitment and selection, training and development, EEO, compensation, performance appraisal, OSHA requirements, labor relations.
Prerequisite: BUS 251 (or equivalent); statistics and computer applications; graduate standing.
Repeatable for credit
Normal Grade Rules
3 units
BUS 255. Diversity in the Workforce
Analysis of communication, leadership, motivation, group dynamics, decision-making, problem solving, training, change, conflict resolution and other behavioral concerns as they apply to the management of the multicultural workforce.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
BUS 258. Leading Edge Managers
Experiential seminar to develop specific managing and leading capabilities. Focus on skills typically missing from MBA education: managing a multi- and cross-cultural workforce, developing effective teams and collaborative work; building a high-performing work system.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
BUS 259. Mg Legal Aspects of Tech & New Prod Dev
This course addresses emerging issues in intellectual property - patent, copyright, trademark, and trade secrets laws - with an emphasis toward managing and protecting innovation and new product development in areas such as computer technology, biotechnology, and cyber-space.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units
Prerequisite: Graduate standing.

BUS 260. Managerial Decision Analysis
Concerns the inherent complexities in the process of choice. Covers decomposition of the decision environment, the use of decision trees, value theory, analysis of criterion, the statistical measurement of risk and uncertainty, preposterior analysis, and problems of collective choice.
Prerequisite: Business statistics and graduate standing; restricted to Business - MBA majors only
Normal Grade Rules
3 units

BUS 261. Legal Challenges for the International Manager
Learn how legal systems affect international business. Topics include: securities law in international transactions; US trade law; export regulations; foreign legal problems; legal risk analysis; labor law systems; control of capital and currency; intellectual property rights; licensing; business with state-controlled agencies.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

BUS 262. Leadership
Explores classic and contemporary models of leaders and leadership and defines the difference between management and leadership. Practical applications of theory emphasizing the contingency perspective.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

BUS 262A. Global Leadership and Innovation
This course provides an in-depth introduction to global leadership and its development and to fostering innovation and global change. Through assessments and behavioral simulations, it prepares students to do global work effectively in a complex context with people from various cultures.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

BUS 262B. Global Leadership Development
Students learn about global leadership and, in particular, its development in the Global Leadership Laboratory. As CLLab Associates, they help facilitate high impact experiential exercises, learn to give feedback, and supervise and coach student teams in global leadership courses.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

BUS 263. High Performance Management
An intense analysis of management with main focus on understanding organizations as systems. Use of academic theories as tools with which you solve real-world tactical performance problems. Emphasizes critical thinking and problem solving.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

BUS 264. Introduction to Technology Planning and Management
Develops technology strategies through a qualitative (scenario and strategy map-based) and a quantitative (decision analysis and option theory-based) approach for technology portfolio planning and management. It provides practical, stimulating, and easy-to-use methods for realistic applications.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

BUS 264A. Professional/Business Ethics
Ethical principles relevant to decision-making in business situations. Using case studies, examines and analyzes moral issues to determine the most appropriate actions. Experiential and self-reflective as well as theoretical.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

BUS 265. Silicon Valley Experience
This course is designed to develop the “whole student” for success in the business world, including professionalism, ethics, case competitions, communications, networking, career success, and work/life balance. It includes lectures, speakers, panels, competitions, and other events providing students with an in-depth exposure to Silicon Valley.
Normal Grade Rules
2 units

BUS 267. Alternative Compensation Systems
A systematic exposure to theories and practices of various organizational reward systems. Drawing on managerial, behavioral, and economic frameworks to review various compensation topics and tackle some of the most controversial or innovative issues in compensation management.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

BUS 268. Managing Across Cultures
A comprehensive foundation for understanding, managing, and successfully interacting in the multi-faceted, culturally-embedded contexts of multinational firms. Understanding major issues facing multinational corporations in the management of international operations; insights into cultural, historical and institutional factors; skills for working effectively in international multicultural teams.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

BUS 268A. Global Business Management
A global view on business, investigating why and how companies succeed internationally. It provides students a conceptual tool by which to understand how economic, social and political factors influence both domestic and international operations.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

BUS 269. Strategic Management in the Computer Industry
The online course focuses on the industry-specific strategic challenges faced by companies that comprise the sector that is preeminent in the Information Age. Case studies favor PCs over big iron and software over hardware.
Prerequisite: Graduate standing
Normal Grade Rules
3 units

BUS 270. Financial Management
Introduces the structure, markets and regulatory factors within the financial system. Develops basic skills in preparing financial plans/budgets, valuing capital costs, financial assets and evaluating the firm’s capital structure, cost of capital, working capital, dividend policies, financing and investment decisions.
Prerequisite: BUS 220 or BUS 231B and graduate standing; restricted to Business - MBA majors only
Normal Grade Rules
3 units

BUS 271. Capital Markets
Driven by technological change, deregulation and globalization, course provides students an overview of the U.S. and international financial environment through financial media, spreadsheets and the Internet. Students leave the class with knowledge of interest rates, flow of funds, derivatives, money and capital markets and financial intermediaries.
Prerequisite: BUS 270 and graduate standing.
Normal Grade Rules
3 units
BUS 272. Current Topics in Finance
Presented as a collection of topics of current interest and concern to managers, investors and creditors. A seminar approach emphasizes discussion, illustrations, examples and applications drawn from current financial practice to encourage exploration of all facets of select financial issues.
Prerequisite: BUS 270 and graduate standing.
Repeatable for credit
Normal Grade Rules
3 units

BUS 273. Business Valuation
Course uses accounting and market data to determine the value of public and private businesses. The course considers methods and models whereby business values are created and destroyed. Techniques, from basic rules of thumb to holistic computer models are considered.
Prerequisites: BUS 220 and BUS 270.
Normal Grade Rules
3 units

BUS 274. Financial Analysis of Technology-Based Firms
Students will learn to develop financial strategies in practical settings. This includes the ability to construct and interpret pro forma financial statements, planning and control models, working capital analysis, capital structure studies, capital budgeting and cost of capital models, and valuation analysis.
Prerequisite: BUS 270 and graduate standing.
Normal Grade Rules
3 units

BUS 275. Corporate Finance: Cases in High Tech Firms
Course is a continuation of corporate finance where finance concepts directly related to high technology firms are examined. The concepts are enhanced by using five Harvard cases. Other data and handouts are provided to supplement these cases and the textbook.
Prerequisite: BUS 270 and graduate standing.
Repeatable for credit
Normal Grade Rules
3 units

BUS 276. New Venture Finance
New ventures face different business and financing environments than large, publicly-traded firms. The risk of R&D failure is more severe for new ventures. Examines how business and financing decisions are intertwined. Topics: Venture capital, joint ventures and intrapreneurship.
Prerequisite: BUS 270 and graduate standing.
Normal Grade Rules
3 units

BUS 277. Investment Analysis and Management
Principles of financial and portfolio analysis applied to investments in common stocks and bonds. Descriptive characteristics of financial markets reviewed, with main emphasis on application of financial theory and statistics to understanding movements in security prices and portfolio values. A financial management viewpoint will be taken in conducting fundamental valuation analysis and formulating portfolio policy.
Prerequisite: BUS 270 and graduate standing.
Normal Grade Rules
3 units

BUS 278. International Corporate Finance
The finance manager's responsibilities, risks, problems and need for strategic planning. Unique aspects of financial analysis for international business discussed and applied to real and/or similar decision situations.
Prerequisite: BUS 270 and graduate standing.
Normal Grade Rules
3 units

BUS 280. Operations and Supply Chain Management
Analysis of effective and efficient flow of materials, products, services, and information within and across organizations. Includes: process flow analysis, capacity planning, quality, lean supply chain, layout, aggregate planning, supply chain networks, inventory management, sourcing, ERP and logistics planning.
Prerequisite: Graduate standing. Restricted to Business - MBA majors only
Normal Grade Rules
3 units

BUS 281. Management of High Technology Organizations
Investigates ingredients for sustained profitable innovation. Emphasizes management of technological innovation, including: innovation strategies, organization, project selection, project management, managing and integrating functional areas. Analyzes developmental processes which enable small firms to grow and prevent large organizations from stifling innovation.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 282. Silicon Valley: The Business of Technology
The Silicon Valley Business of Technology course prepares students for fast-paced and pressure-packaged conditions to accelerate development of Critical Thinking Skills; providing a unique insight into the Silicon Valley culture. Students will apply technology to various industries by understanding its origins, categories, and functionality.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

BUS 282A. Essentials of Management and Organizational Behavior
Familiarizes students with the challenges that arise for managers in organizational settings; surveys theories and practices relating to managerial roles, organizational cultures, strategy, planning, team building, communication, motivation, leadership, decision-making, control, structure, and change.
Prerequisite: Enrollment in the MBT program.
Normal Grade Rules
3 units

BUS 282B. Essentials of Operations Management
Familiarizes students with the role and importance of operations management and how it interacts with other parts of the organization; develops skills in applying analytical tools and techniques to operations management challenges.
Prerequisite: Enrollment in the MBT program.
Normal Grade Rules
3 units

BUS 283. Entrepreneurship
Examines the growth and nature of entrepreneurship and the support infrastructure of tasks, people, finances and technology. Emphasizes entrepreneur characteristics sought by venture capitalists and investors, role of the business plan and evolutionary stages of start-up activity.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 284. Managing Product Development
Views product development as a cross-functional business process. Examines concepts used and management challenges faced in structuring product development activity and in strategically managing a portfolio of product development projects.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

BUS 284C. Managing Medical Product Development
Views medical product development as a cross-functional business process. Examines concepts used and management challenges faced in structuring medical product development activity and in strategically managing a portfolio of medical product development projects. Examines industry practices and cases relevant to medical product development.
Prerequisite: Admission to MPDM program and completion of BUS 224C, BUS 286 and SMPD 289A.
Normal Grade Rules
3 units
BUS 285. Total Quality Management
Documents forces which propel quality (competition, Deming, Baldrige, etc.) and impact on planning, benchmarking and competitive analysis. Includes design for manufacturability, design of experiments, Taguchi methods, systems analysis, continuous process development and statistical process control.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 286. Project Management
Covers both strategic and operational points of view for managing projects. Quantitative methods include project planning, budgeting, selection, scheduling, evaluation and control. Qualitative methods include project organization, staffing and team building.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 287. Advanced Topics in Global Supply Chain Management
In depth analysis of current issues in global SCM with emphasis on industry best practices from around the globe. Topics may include continuous replenishment, value of information, outsourcing, collaboration, strategic alliances, e-SCM, supply chain risk, performance metrics, SCM simulations.
Prerequisite: Bus 280. Graduate standing.
Normal Grade Rules
3 units

BUS 288. Manufacturing Planning, Cost and Control
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 289. Strategic Thinking
Integrative focus on managing the total enterprise, including corporate and business-level strategy formation. Applies market and industry analysis, using qualitative and quantitative techniques, to position companies in their competitive environment. Students create a strategic plan for on-going or new organization.
Prerequisites for Early Career MBA students: Completion of BUS 201, BUS 202, BUS 210, BUS 220, BUS 230, BUS 250, BUS 260, BUS 270, BUS 280 and graduate standing; restricted to Business - MBA majors only.
Prerequisites for MBA for Professional students: BUS 200W, BUS 202, BUS 210, BUS 220, BUS 230, BUS 250, BUS 260, BUS 270, BUS 280 and graduate standing; restricted to Business - MBA majors only.
Note: Must receive a minimum grade of “B” on project.
Normal Grade Rules
3 units

BUS 294. Management Simulation Competition
Developing analytical and general management decision-making skills as member of a team competing in the regional business schools’ management simulation game. Extensive use of computers for simulation and analytical/planning tools.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

BUS 295. Management Consulting Field Experience
Apply management theory and learn consulting skills by carrying out an intensive project. Identify and analyze actual business problems, develop and evaluate alternative solutions and present plan to management.
Prerequisite: Graduate standing and instructor consent.
Normal Grade Rules
3 units

BUS 297A. Special Topics in Business Administration
Special topics to augment regularly-scheduled electives.
Prerequisite: Graduate standing and prerequisite courses as specified.
Repeatable for credit
Normal Grade Rules
1-4 units

BUS 297B. Special Topics in Business Administration
Special topics to augment regularly-scheduled electives.
Prerequisite: Graduate standing and prerequisite courses as specified.
Repeatable for credit
Normal Grade Rules
3 units

BUS 297C. Applied Business Experience Internship
The course provides students with an opportunity to translate their academic training into real world practice and gain overall knowledge of key functional areas of business. The internship must offer students a valuable learning experience and must significantly increase their knowledge of business organizations. Students are responsible for identifying a specific internship opportunity and obtaining an official offer from an employer. Upon approval from the MBA Director, the students will be able to enroll in the 3-unit course which will count as one of the MBA electives. The course requires the preparation of an internship journal & report. The internship qualifies as Curricular Practical Training (CPT) for international students.
Prerequisites: Advancement to Candidacy
Normal Grade Rules
3 units

BUS 298. Master’s Project
Supervised completion of the Plan B (Project) culminating experience.
Prerequisite: Advancement to Candidacy and instructor consent. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
3 units

BUS 298C. Applied Business Experience Internship
For the student with a specific internship providing a quality experience that reinforces the curriculum and involves meaningful work. The student must submit a one-page formal proposal to the graduate program director. A final report is required. The internship must qualify as Curricular Practical Training (CPT) for international students.
Prerequisite: Approved advancement to candidacy.
Repeatable for credit
Mandatory CR/NC/RP
1 unit

BUS 299. Master’s Thesis
Master’s Thesis Plan A.
Prerequisite: Approval of the instructor and admission to candidacy. Not available to Open University Students
Mandatory CR/NC/RP
1-4 units
GLOBAL INNOVATION AND LEADERSHIP

LOWER DIVISION

BUS 016. Introduction to Leadership & Innovation
This interdisciplinary course covers basic theories of leadership and innovation and investigates key topics that influence contemporary social leadership issues. Students assess their leadership styles to create personal development plans leading toward positive, innovative impacts on society.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

BUS 040. Developing Your Entrepreneurial Potential
This course introduces foundational concepts in innovation and entrepreneurship. It provides insights into the characteristics and motivations of entrepreneurs, and the factors that foster an entrepreneurial mind-set and enable individuals to translate positive attitudes toward entrepreneurship into actual behavior.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

BUS 141B. Transportation & Logistics Management
Coverage of the fundamentals of transportation management combined with a focus on its role in global supply management. The challenge of managing the various modes of transportation is combined with strategies for their use in the supply chain environment.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

BUS 142. Total Quality Management
Holistic approach to managing quality: interaction of production design, work design and the manufacturing process. International view and roles qualitative and quantitative techniques play in successful quality management programs.
Prerequisite: Upper Division Standing or instructor consent.
Normal Grade Rules
3 units

BUS 142B. Business Process Management
Includes concepts and methods to optimize business processes relevant for creating value for the customers and adding value to an organization. Provides capability of designing and managing business processes and the interfaces between Operations Management and other business functions.
Prerequisite: Upper Division Standing or instructor consent.
Normal Grade Rules
3 units

BUS 144. Supply Chain Management
Addresses concepts/tools for effective and efficient management of supply chains. Topics include materials planning/control, sourcing strategy, strategic alliances, information technology role, quality/customer issues, inventory management, and distribution/logistics management.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

BUS 144B. Global Operations Analytics
Builds analytic thinking for improving global operations management (GOM). Introduces analytical methods, tools, and software to analyze GOM problems and then derive managerial implications and decisions in global business operations perspectives.
Prerequisite: Upper Division Standing or Instructor Consent
Normal Grade Rules
3 units

BUS 145. Global Operations Strategy
Studies operations management issues unique to manufacturers with extensive international operations. Educational objectives are to develop an understanding of: the strategic tradeoffs associated with global operations, total supply chain management and the economics of transnational logistics.
Prerequisite: Upper Division Standing or instructor consent.
Normal Grade Rules
3 units

BUS 145B. Healthcare Operations Management
Operations Management (OM) approaches across a broad range of healthcare settings: clinical, management, and support processes in the medical and public healthcare systems. Apply OM tools including flowcharting, process analysis, queueing, forecasting, six-sigma, health worker scheduling.
Prerequisite: Upper Division Standing or instructor consent.
Normal Grade Rules
3 units

BUS 146. Fundamentals of Project Management
Fundamentals of managing projects, basic concepts and techniques underlying project management, and application using the appropriate software.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

BUS 147. Service Operations Management
Develops skills in setting formal standards for product attributes and operating procedures that comprise service experience. Categories of services; indirect and direct consumption. Psychological/social characteristics of the consumer/server encounters, enhancing ability to monitor service quality. Total quality management.
Prerequisite: Upper Division Standing or instructor consent.
Business Minor
Normal Grade Rules
3 units

BUS 148. Sustainable Operations Management
Introduces a holistic view of the interaction between operations activities and the environment. Builds awareness of major environmental problems and issues in the operations function of business, and learns environmental assessment and management tools for operations management.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units
**BUS 162. International and Comparative Management**
Management functions and practices in an international context; comparison of management and business practices from various political and cultural perspectives, emphasis on what managers need to be aware of in order to perform in the international environment.
Prerequisite: Any 100W, BUS 187 or instructor consent.
Upper division standing.
Normal Grade Rules
3 units

**BUS 162A. International Business Strategy**
Course focuses on the strategic challenges and the strategic management of firms that operate and compete in a global environment. Course provides an overarching experience in international business by integrating knowledge and previous international business learning.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, BUS 187, or instructor consent.
Normal Grade Rules
3 units

**BUS 163. Management Issues in High Technology Companies**
Provides an overview of a wide variety of key managerial concerns, industry knowledge and management techniques that are especially relevant in high technology companies. Such organizations compete within an environment characterized by rapid technological change and a high degree of uncertainty.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

**BUS 163A. Negotiating Globally**
Introduces a theoretical framework and skill-building exercises for negotiating agreements, resolving disputes, and making decisions across cultures. Builds awareness of the global negotiating environment including cultural and institutional factors. Applicable to commercial transactions, employee relations, contract disputes, and international diplomacy.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
3 units

**BUS 163B. Globalization and Innovation in Emerging and Developing Markets**
This course investigates the world economy, specifically emerging and developing markets and provides an in-depth understanding of how institutions shape the strategies that firms employ and the actions that managers take in these countries.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, BUS 187, or instructor consent.
Normal Grade Rules
3 units

**BUS 164. Strategies in High Technology Companies**
Examines strategies for companies within high technology industries, focusing on how to anticipate, identify and exploit such technological change for competitive advantage. Technological change creates opportunities for new industries and products, but at the same time renders obsolete existing company capabilities.
Prerequisite: BUS 161A. Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units

**BUS 164A. Country Perspectives on Business and Management**
Provides a comprehensive study of the business and management practices of a featured country or region. Includes historical, institutional, sociopolitical, and cultural context. Japan is the featured country this semester. May be repeated for credit with a different featured country or region.
Prerequisite: Upper Division Standing or Instructor Consent
Repeatable for credit
Normal Grade Rules
3 units

**BUS 164B. Doing Business Globally**
Course is designed with a faculty-led program abroad. Students gain first-hand knowledge of the historical, institutional, and cultural factors influencing business and management practices in the destination country. May be repeated for credit with a different country destination.
Prerequisite: Upper Division Standing or Instructor Consent
Normal Grade Rules
1-4 units

**BUS 165A. Global Leadership**
This course introduces students to global leadership and its development and is designed for students who want to work effectively with people in diverse settings. Taught experientially, the course involves simulations, innovation projects, and extensive individual feedback.
Prerequisite: Any 100W
Normal Grade Rules
3 units

**BUS 165B. Leadership & Innovation Practicum**
This is a project-based practicum course for students interested in global leadership and innovation. Course topics include project management of multicultural teams, innovation, and change management. Students apply theory and skills gained in previous courses as they implement personal leadership projects.
Prerequisites: Any 100W, BUS 3 016, BUS 3 165A or instructor consent.
Normal Grade Rules
3 units

**BUS 167. Managing Environmental Issues**
The management of environmental issues, the relationship of business to the natural environment, the public policy context of management decision-making, and the greening of the corporation and implications for strategic management, operations, human resources, marketing and accounting.
Normal Grade Rules
3 units

**BUS 169B. Honors Practicum in Organization and Management**
Second part of a two-semester honors program sequence. Student teams will work on a project sponsored by a company or other organization, under the supervision of the sponsor and the instructor. Teams will present their final report to the sponsor.
Prerequisite: BUS 160 or BUS 161A and permission of the instructor.
Normal Grade Rules
3 units

**BUS 180D. Individual Study**
Individual work on special topics by arrangement. Petition and plan of study must have consent of instructor and Chairperson.
Repeatable for credit
Credit / No Credit
1-3 units

**BUS 181. Introduction to Entrepreneurship**
Insight into the characteristics of entrepreneurs, the approaches they use to create, identify and evaluate opportunities for new ventures and the skills that are needed to start and manage new ventures and develop a preliminary business plan.
Prerequisite: Upper division standing
Repeatable for credit
Normal Grade Rules
3 units

**BUS 182. Business Plans for New Ventures**
An integrative course involving teamwork to prepare complete plans for starting a new business. This will require analyzing the industry and potential market, the competitive advantage of the business proposition, human and financial resource requirements and the founders’ skills.
Prerequisite: BUS 183 or instructor consent. Upper division standing.
Repeatable for credit
Normal Grade Rules
3 units
**BUS 183. Global Entrepreneurship**  
Will explore the opportunities that entrepreneurs create, encounter and change in the global and cross-cultural arena. It will examine how entrepreneurs adapt to and succeed in a global economy and how institutional networks facilitate global and immigrant entrepreneurship.  
Prerequisite: Upper Division or instructor consent  
Normal Grade Rules  
3 units

**BUS 184A. Management of Innovation**  
Discusses types of innovation and their impact. Analyzes industry practices in management of innovation for corporate growth and renewal through new products, processes, organizations, and business models. Examines strategic and tactical aspects of the innovation process and alignment of innovation efforts with strategy.  
Prerequisite: Upper division standing or instructor consent  
Normal Grade Rules  
3 units

**BUS 185. Family Business Dynamics**  
This course explores and analyzes the unique issues and challenges of family businesses in terms of the dynamic relationship between the family and business and its impact on decision-making and performance of the business.  
Prerequisite: BUS 3181 or instructor consent.  
Normal Grade Rules  
3 units

**BUS 186H. Entrepreneurship Laboratory**  
Explores all facets of growing an entrepreneurial organization, including building the team, sales, marketing, operations, and finance. Opportunity to learn with practical internships and roundtables with entrepreneurs, venture capitalists and others in the new venture ecosystem.  
Prerequisite: Instructor’s consent.  
Normal Grade Rules  
3 units

**BUS 186. Current Issues in Entrepreneurship**  
A presentation of topics of current interest to entrepreneurs and intrapreneurs. Focuses on one or more special topics of concern to current practice, such as green entrepreneurship, social entrepreneurship, or managing high-growth ventures.  
Prerequisites: BUS 3181 or instructor consent.  
Normal Grade Rules  
3 units

**BUS 186V. Venture Lab**  
VLAB is an experiential course in which students work on the process of developing and testing the idea(s) for a new venture. The course combines theory with hands-on entrepreneurship. Students will test each aspect of the business model outside the class, and share the insights with their peers in class. By the end of the course, they will have completed a prototype and be able to demonstrate the business opportunity.  
Prerequisite: Upper Division Standing or Instructor Consent  
Normal Grade Rules  
3 units

**BUS 187. Global Dimensions of Business**  
An integrative interdisciplinary foundation for more specialized courses and self-directed learning. Provides an overview of economic, social, cultural and political/legal forces and factors influencing crossborder business and an introduction to international dimensions of business functions and operations.  
Prerequisites: Upper division standing.  
Normal Grade Rules  
3 units

**BUS 194. Business Organization and Management of Technology Enterprise**  
See ENGR 194.  
Normal Grade Rules  
3 units

**BUS 196. Doing Business Globally**  
A hands-on, project-oriented course beginning with seminars led by instructor with experience in Latin American business providing insights into conducting business in the region. Each weekly, hour-long seminar will involve discussions of international business topics and issues specifically related to countries in the Latin American region. Students work through solutions with the instructor’s guidance. To provide students with an opportunity apply a real-world context to what they have learned, at least one week of the course will be set in a Latin American country in which students will visit local businesses and other organizations, along with cultural sites.  
Prerequisite: Upper division standing.  
Normal Grade Rules  
3 units

**BUS 196F. Critical Thinking in Business**  
Development of critical thinking skills in business through analysis of current news stories, business case studies, and videos to assess credibility of sources, biases, assumptions, and inferences, and generate alternative hypotheses based on logic and facts. Analysis of a current social issue including its sources, associated biases, related assumptions, current attempts at the solving the issue, and generation of solutions based on logic and facts.  
Prerequisite: COMM 100W, ENGL 100W or LLD 100W  
Normal Grade Rules  
3 units

**BUS 197. Special Topics in International Business**  
This course features special topics in International Business. The course can be taken for credit on campus or in a study abroad or short-term faculty-led program. It may be repeated for credit in the case of different special topics.  
Prerequisite: Upper Division Standing or Instructor Consent  
Normal Grade Rules  
3 units

**BUS 198. Strategic Consulting for Small Business**  
An integrative course requiring student work in a consulting arrangement with a local small business. Field study involves working within an integrated strategic framework to guide original data collection/analysis/recommendations encompassing external and internal considerations.  
Prerequisite: Upper Division Standing.  
Normal Grade Rules  
3 units

**BUS 209. Business Statistics**  
In terms of theory and application: collection and presentation of data; measures of central values and spread; probability as a measure of uncertainty; sampling and sampling distribution of the sample mean; confidence intervals; hypothesis testing; regression and correlation.  
Prerequisite: MATH 071  
Normal Grade Rules  
3 units
**UPPER DIVISION**

**BUS 130. Introduction to Marketing**
Analysis of marketing opportunities, planning of marketing programs with emphasis on product, price, promotion and distribution; control of the marketing effort; social and ethical responsibilities of marketing.
Prerequisite: Upper division standing
Recommended: COMM 100W or ENGL 100WB or LLD 100WB.
Normal Grade Rules
3 units

**BUS 131A. Business to Business Marketing**
Marketing of goods, services and ideas to businesses. Examines distribution, pricing, promotion, marketing research and planning. Emphasizes strategy development and the decision-making processes of customers.
Prerequisite: BUS 130. Upper division standing.
Normal Grade Rules
3 units

**BUS 131B. Retail Marketing Management**
Special issues faced and approaches taken in retailing. Topics include store location, merchandise selection and display, financial management, promotion, store layout and image.
Prerequisite: BUS 130. Upper division standing.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

**BUS 131D. Marketing in New Ventures**
Examines and explores the roles of marketing in the new venture. Focuses on learning conceptual framework for understanding customers, designing appropriate marketing activities, making marketing decisions and addressing marketing problems in building a new venture. Students analyze cases and undertake projects.
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 132B. Business Logistics**
Logistics in the process of planning, implementing and controlling the efficient, effective flow and storage of goods, services and related information from the point of origin to the point of consumption for the purpose of conforming to customer requirements.
Prerequisite: BUS 130 and BUS 190. Upper division standing.
Normal Grade Rules
3 units

**BUS 133A. International Marketing**
Impact of the international business environment on the development of marketing strategy and marketing mix, with emphasis on development of a global perspective and cultural sensitivity. Also covers international trade, importing and exporting.
Prerequisite: BUS 130. Upper division standing.
Normal Grade Rules
3 units

**BUS 133B. Relationship Marketing: Pacific Rim**
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 133C. International Marketing: Developing Nations**
Prerequisite: BUS 130. Upper division standing.
Normal Grade Rules
3 units

**BUS 133E. Marketing to Eastern/Western Europe**
To market in Europe, one must learn how Europeans market. Developed and evolved over centuries, European business methods are complex, subtle, and largely unknown to America. This course provides insights into these methods.
Prerequisite: BUS 130.
Normal Grade Rules
3 units

**BUS 134A. Consumer Behavior**
An examination of psychological, sociological, and other factors that affect customer behavior. These factors are examined in an effort to help businesses and other organizations to accurately assess and effectively satisfy customer needs.
Prerequisite: BUS 130, and Any 100w. Upper division standing.
Normal Grade Rules
3 units

**BUS 134B. Integrated Marketing Communications**
Focus is on design and delivery of marketing messages to targeted audiences. Analysis and planning seeks integration of messages delivered through advertising, sales promotion, personal selling, public relations, and other communication methods.
Prerequisite: BUS 130 and Any 100w. Upper division standing.
Normal Grade Rules
3 units

**BUS 135. Sales Management**
Teaches skills in personal selling with guidelines for designing and managing the sales function. Topics include advanced sales techniques, high impact questioning methodologies, closing techniques and managing objections, account and territory planning and management, resource planning and management, and sales compensation programs.
Prerequisite: BUS 130. Upper division standing.
Normal Grade Rules
3 units

**BUS 136. Product Development**
Integrative analysis of product development related to life-cycle management. Emphasis is on new product/service planning.
BUS 130. Upper division standing.
Normal Grade Rules
3 units

**BUS 137A. Soft Skills**
An examination of the soft skills (self-management skills and people skills) employers feel recent college graduates are lacking. Some of these skills include, but aren’t limited to, listening skills, likability, flexibility, giving/receiving criticism, work ethic, dining etiquette, cultural sensitivity, etc.
Prerequisites: BUS 130
Normal Grade Rules
3 units

**BUS 137H. Marketing Honors Practicum**
Course involves sponsored projects in the area of Marketing. Students are assigned to a host company and are required to work with the host company and faculty advisor on a topic in Marketing. A report will be presented.
Prerequisite: BUS 130, or Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

**BUS 137S. Special Topics in Marketing**
Special topics in the management of marketing or in the marketing environment. The instructor may choose to address one special topic, theme, or several related topics.
Requires one or more projects, at instructors discretion.
Prerequisite: BUS 130.
Normal Grade Rules
3 units
BUS2 138. Marketing Research
Fundamentals of empirical study in marketing, including hypotheses formulation, testing, and the basis of inference. Questionnaire and experimental design, attitude measurement, sampling and data collection, and analysis are emphasized along with applications to marketing decision-making.
Prerequisite: BUS2 90, BUS2 130, Any 100W. Upper division standing.
Normal Grade Rules
3 units

BUS2 139. Marketing Management
Marketing management is a capstone course whose purpose is to provide the student with the opportunity to demonstrate and integrate the capabilities acquired from the prerequisite courses.
Prerequisite: BUS2 130, BUS 134A, BUS 134B, BUS 138, COMM 100W or ENGL 100WB or LLD 100WB and Senior standing.
Recommend: BUS 190 is strongly recommended.
Normal Grade Rules
3 units

BUS2 190. Quantitative Business Analysis
Quantitative models and computer software used in business decision-making. Studies of network and transportation models, linear programming, CPM/PERT project analysis, decision analysis, simulation and other techniques used in management science applications.
Prerequisite: BUS2 090 and MATH 071. Upper Division Standing. Not available to Open University Students.
Normal Grade Rules
3 units

BUS2 191. Decision Making Under Uncertainty
Decision analysis models and methods for optimizing decision policies: Bayes’ Theorem, decision trees, influence diagrams, utility functions and certainty equivalence functions for risk-averse analyses, measures of the value of information, use of relevant spreadsheet computer tools.
Prerequisite: BUS2 090 or any one of the following: MATH 161, HS 167, JSE 130, ECON 003, ECON 103A, or Instructor Consent.
Note: Offered only occasionally.
Normal Grade Rules
3 units

BUS2 193. Data Mining
Data Mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in very large databases or through web mining. Topics: data visualization, association rules, clustering, and various modern classification techniques.
Prerequisite: BUS2 90, BUS2 130 or Instructor Consent
Normal Grade Rules
3 units

BUS2 194A. Statistical Analysis
This course develops fundamental knowledge and skills for applying statistics in business decision-making. Topics include hypothesis testing, simple and multiple regression, experimental design, time series analysis and non-parametric estimation.
Prerequisite: BUS2 90
Normal Grade Rules
3 units

BUS2 194B. Business Analytics
This course covers applications of linear, nonlinear, and discrete optimization as well as the modeling of stochastic processes, including inventory control models and waiting line models.
Prerequisite: BUS2 190
Normal Grade Rules
3 units

BUS2 195A. Spreadsheet Modeling
Develop your analytical modeling skills and learn advanced features of Excel. Focus is on using Excel to model real-world decision-making problems. Covers Excel features including IF functions, lookup tables, date and text manipulation, sorting, filtering, graphing, and VBA.
Prerequisite: BUS2 190
Normal Grade Rules
3 units

BUS2 195B. Data Visualization
This course focuses on state-of-the-art data techniques for creating effective visualizations for structured and unstructured data. The course targets students who are interested in using visualizations to better understand information and communicate with other people.
Prerequisite: BUS2 90
Normal Grade Rules
3 units

BUS2 195C. Simulation Modeling and Analysis
Building and using simulation models in business systems using both Excel and high-level simulation software package. Topics include discrete-event simulation, Monte Carlo simulation, simulation input data collection and analysis, statistical analysis of simulation output.
Prerequisite: BUS2 190
Normal Grade Rules
3 units

BUS2 195D. Analytic Strategy
This course provides hands-on experience in transforming large amounts of diverse data into business decisions. This is accomplished via an engaging, complex simulation in which participants develop data-driven tactical and strategic decisions.
Prerequisite: BUS2 194A and BUS2 194B
Normal Grade Rules
3 units

BUS4 091A. Advanced Computer Tools for Business
Students learn advanced spreadsheet and presentation software skills through individual lessons and through application in team case projects.
Prerequisite: Basic Excel and PowerPoint skill proficiency
Credit / No Credit
1 unit

BUS4 091L. Computer Tools for Business
Fundamentals of spreadsheet software through in-class exercises and individual assignments. Team projects to improve students’ collaboration and communication skills, using online tools to produce slide and video presentations.
Credit / No Credit
1 unit

BUS4 092. Introduction to Business Programming
Analysis of business problems to design and implement the software component of an information system. Emphasis on structured design and programming. Introduction to visual programming languages.
Prerequisite: BUS 91L
Normal Grade Rules
3 units

BUS4 110A. Fundamentals of Management Information Systems
Prepares students for upper division MIS courses by providing an overview of the strategic and managerial issues involved in the design, implementation, and maintenance of information systems. Includes an introduction to business application programming.
Prerequisite: BUS 92, upper division standing.
Normal Grade Rules
3 units

BUS4 110B. Systems Analysis and Design
Introduction to systems development methodologies, techniques and tools. Emphasis on enterprise, process, data and object modeling techniques. Students use UML and prototyping tools to analyze and design an information system.
Corequisite: BUS4 092.
Normal Grade Rules
3 units
BUS 111. Networking and Data Communications
Emphasis on the concepts, architectures, components, protocols and standards for message movement within information networks. Uses the network design process to develop understanding of business and information technology perspectives. Prerequisite: Upper Division Standing. Normal Grade Rules 3 units

BUS 112. Database Management Systems
Introduction to intermediate database management concepts, methods, and technologies, stressing the design and development of relational databases and data analysis. Emphasis on data modeling, data integrity, and SQL. Non-relational data and information management technologies are also introduced. Prerequisite: BUS 092 with a grade of C or better. Normal Grade Rules 3 units

BUS 115. Advanced Networking and Data Communications
Integration of telecommunications and database management systems concepts in a distributed information systems environment. Emphasis on information systems architectures, systems integration, open systems and other advanced topics. Prerequisite: BUS 111. Normal Grade Rules 3 units

BUS 116. Advanced Database Management Systems
Advanced topics in relational data management and analysis including advanced SQL, PL/SQL, and database functions, procedures, and triggers; dimensional modeling, data warehousing, and data visualization; non-relational (NoSQL, big data) databases and data analysis. Prerequisite: BUS 112. Normal Grade Rules 3 units

BUS 118C. Information Security and Assurance Management
Introduces the spectrum of threats and associated best practices for managing information security and assurance in organizations. Covers use of education/training, policy/procedure and technology to balance information confidentiality, integrity and accessibility requirements against associated costs to support organizations’ strategic goals. Corequisite: BUS 111. Note: Offered only occasionally. Normal Grade Rules 3 units

BUS 118D. Big Data
How to formulate business questions and use current Big Data analytics technologies through hands on assignments to wrangle, query, and graph relationships using a large unstructured dataset. Issues relating to developing the business proposition, Big Data strategies, and ethical considerations. Prerequisite: BUS 112. Co-Requisite: BUS 110A. Normal Grade Rules 3 units

BUS 118H. Honors Practicum in MIS I
Honors student teams formulate, develop and initiate implementation of an MIS project for an organization in our community. Requirements include using industry-standard project management tools and methods, interacting with project stakeholders in a professional manner, and applying appropriate technical skills/processes to the project. Prerequisite: BUS 110A, BUS 110B, 100W, admission to MIS Honors Program. Corequisite: BUS 112. Normal Grade Rules 3 units

BUS 118S. Special Topics in MIS
Special topics to augment regularly scheduled electives. Course is repeatable for credit, maximum 9 units. Prerequisite: BUS 111, BUS 112, and COMM 100W or ENGL 100WB or LLD 100WB. Repeatable for credit. Normal Grade Rules 3 units

BUS 118W. Web Based Computing
Explores Web applications for personal, E-Commerce and corporate computing. Covers essentials of WWW protocols. Students will learn to design and program both client and server-side applications using HTML and extensions, JavaScript, Perl, VBScript, Active Server Pages, database connections, XML, Java. Prerequisite: Grade of “C” or better in BUS 110A and BUS 112. Normal Grade Rules 3 units

BUS 119A. Practicum in MIS
Students, working in teams, complete an MIS project for a community organization. Requirements include using industry-standard project management tools and methods, interacting with project stakeholders in a professional manner, and applying appropriate technical skills and processes to the project. Prerequisite: Any 100W or equivalent, BUS 110A, BUS 110B, BUS 111 and BUS 112. Normal Grade Rules 3 units

BUS 119B. Business Strategy and Information Systems
Analysis of the effective use of information systems and technology for competitive advantage by a business organization for enterprise, business-to-business, and e-Commerce computing. Emphasis on integration of information systems and technology with business strategy, financial justification, personnel and organizational considerations. Intended for last semester before graduation. Prerequisite: Any 100W or equivalent, BUS 110A, BUS 110B, BUS 111, BUS 112. Normal Grade Rules 3 units

BUS 119H. Honors Practicum in MIS II
Honors student teams develop and complete implementation of an MIS project for an organization in the community initiated in 118H. Requirements include using industry-standard project management tools and methods, interacting with project stakeholders in a professional manner, and applying appropriate technical skills/processes to the project. Prerequisite: BUS 118H. Normal Grade Rules 3 units

BUS 188. Business Systems and Policy
Provides system perspective on organizations, using information as an integrating vehicle. Examines how information systems can serve business functions and integrate value chain activities. Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB. Pre/Corequisite: Fundamental courses. Normal Grade Rules 3 units

SCHOOL OF MANAGEMENT
LOWER DIVISION

BUS 310. Discovering Business
Simulates setting up a small business to explore the many facets of an enterprise (marketing, accounting, finance, management, information systems, etc.). Through self-assessment and readings, directs students toward career paths that best reflect their personal aptitudes and interests. Prerequisite: Highly recommended for SJSU freshman business majors, optional for others. Normal Grade Rules 3 units
BUS3 012. Managing My Life
An interdisciplinary course in personal development that introduces basic concepts and practical skills for improving and enhancing life during college and beyond. The course includes how to succeed in college, manage one’s finances, plan one’s career, manage stress, and increase overall happiness and well-being.
Normal Grade Rules
3 units

BUS3 080. Legal Environment of Business
Understand the judicial system and dispute resolution with emphasis on the role of law in purchasing, contracting and administering a business as it impacts the firm’s constituencies and society as a whole.
Prerequisite: Sophomore status.
Normal Grade Rules
3 units

BUS3 148. E-Commerce Management
Includes all aspects of management of e-commerce businesses. Topics include business planning, business-to-business and business-to-consumer sectors, entrepreneurship, and small business management.
Normal Grade Rules
3 units

BUS3 149. Negotiation and Conflict Resolution
Provides conflict resolving and negotiation techniques. Case studies demonstrate applications of these methods in real world business, personal, interpersonal and international situations. Emphasis on acquiring and improving skills.
Normal Grade Rules
3 units

BUS3 150. Fundamentals of Human Resource Management
Theories, concepts and processes of human resource management; specific topics include EEO, employee motivation, job analysis and work design, strategic human resource planning, recruitment and selection, talent assessment and development, performance management, compensation and benefits, OSH, and employee rights and discipline.
Prerequisite: BUS 91L or instructor consent. Upper division standing. Lower Division Business Pool or Business Minor.
Normal Grade Rules
3 units

BUS3 151. Labor Relations
Private sector union-management relations; labor history, basic labor economics. Legislative, judicial, administrative issues in collective bargaining; contract negotiations, grievance procedures, dispute resolution. Overview of public sector collective bargaining and comparative labor relations. Current trends, including labor-management cooperation.
Prerequisites: Upper division standing.
Normal Grade Rules
3 units

BUS3 152. Human Resource Information Systems
Examines the strategic role of Human Resource Information Systems (HRIS) in the effective management of organizations; needs analysis, criteria for selection and evaluation of software tools for HR decision-making; HRIS issues in Internet, privacy, security, system integration, expert systems.
Prerequisite: BUS 150 or instructor consent. Upper division standing.
Normal Grade Rules
3 units

BUS3 153. Management of Diversity
Cross-cultural differences in effective HR management; organizational culture, cross-cultural communication, opportunity structures, organizational change; legal compliance and planning models such as Equal Employment Opportunity and Affirmative Action; conflict resolution strategies; dealing with internal and external compliance agencies.
Prerequisite: BUS 150 or instructor consent. Upper division standing.
Normal Grade Rules
3 units

BUS3 154. Workforce Planning, Staffing and Training
Examines basic concepts, strategies and current issues in recruitment, talent acquisition, selection and training. Involves use of computer tools to analyze impacts of legal compliance, diversity, technology, outsourcing, restructuring and downsizing on effective management of human resources.
Prerequisite: BUS 150 and COMM 300W or ENGL 100WB or LLD 100WB. Upper division standing.
Normal Grade Rules
3 units

BUS3 155. Performance Management and Development
Assessment and performance management of individuals, groups and organizations in a rapidly changing environment. Explores need for change management skills such as organizational development, career development and coaching to assess and improve the talent base of organizations. Project required.
Prerequisite: BUS 150, COMM 300W or ENGL 100WB or LLD 100WB.
Normal Grade Rules
3 units

BUS3 156. International Issues in Human Resource Management
Personnel practices in international context; cross-cultural management, human resource planning, recruitment and selection, expatriation/repatriation, training, performance appraisal, compensation and benefits, labor relations as experienced by multinational corporations; comparative human resource management.
Prerequisite: BUS 150 or instructor consent. Upper division standing.
Normal Grade Rules
3 units

BUS3 157. Legal Issues in Human Resource Management
Legal aspects of the employment relationship, including employment at will; contract, privacy, public policy, and whistleblower exceptions; EEO and affirmative action; prohibitions against discrimination and harassment; arbitration, trade secrets and non-competition agreements; occupational safety/health; compensation, benefit and family leave laws. Project required.
Prerequisite: BUS 80, BUS 150 and BUS100W or COMM 100W or ENGL 100WB or LLD 100WB. Upper division standing. Allowed Declared Major: Bus Admin/ Human Resource Mgmt or Business Minor.
Normal Grade Rules
3 units

BUS3 158. Compensation and Reward Systems
Theories and practices of compensation and benefits; strategies to establish and administer equitable pay structures; job analysis, and evaluation, salary surveys, pay and motivation, skill-based pay systems, long-term and short-term performance plans, merit increase, bonus, stock options, profit-sharing, executive compensation and computer tools in compensation.
Prerequisite: BUS 91L and BUS 150. Upper division standing.
Normal Grade Rules
3 units

BUS3 159. Senior Seminar in Human Resource Management
Extension and integration of student knowledge, skills and abilities in strategic HRM; critical analysis of current HRM issues; exploration of HR career options; analysis of existing organization to develop methods of improving HRM decision-making in a real-world setting.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB, BUS3 150, BUS3 157 and BUS3 158. Allowed Declared Major: Bus Admin/Human Resource Mgmt. Graduating Senior Status.
Normal Grade Rules
3 units
BUS 160. Fundamentals of Management and Organizational Behavior
Provides a foundation for major topics in management and organizational behavior by surveying theories and practices relating to managerial roles, organizational cultures, fundamental strategic issues, planning, team building, communication, motivation, leadership, decision-making, control, structure and change.
Prerequisites: Upper division standing.
Normal Grade Rules
3 units

BUS 161A. Applied Organizational Behavior
Focuses on high-level application, analysis, synthesis and evaluation of group dynamics, interpersonal communication, motivation, leadership, perception and attitudes, individual power and politics, conflict and stress management. In-depth emphasis on key theories plus interpersonal managerial skills.
Prerequisite: BUS 160, COMM 100W or ENGL 100WB or LLD 100WB.
Normal Grade Rules
3 units

BUS 161B. Organization Theory
Managing organization-wide structural and cultural changes leading to designs that enhance organizational effectiveness. Change issues of managing growth, resistance, intervention phases, crisis management, intergroup conflict/power are combined with design issues of balancing innovation and predictability, decentralization and centralization.
Prerequisite: BUS 160, COMM 100W or ENGL 100WB or LLD 100WB. Upper division standing.
Normal Grade Rules
3 units

BUS 166. Business, Government, & Society
Analysis of the American business system in terms of socio-economic and political constraints imposed upon business organizations by external, physical, legal, political, social and economic environments. Special reference to ethical issues in business, corporate social responsibility, profit maximization and countervailing powers in a pluralistic society.
Prerequisite: COMM 100W or ENGL 100WB or LLD 100WB. Upper division standing.
Normal Grade Rules
3 units

BUS 169A. Honors Seminar
This course will introduce some of the seminal theories in management and related fields. The seminar will provide a variety of views on organizations, organizational life and the way organizations function. The course will be cross-disciplinary, drawing on readings about organizations from a variety of sources and disciplines. Students will be required to apply theoretical concepts to their own work, field study, or internship experiences.
Prerequisite: BUS 160 or BUS 161B.
Normal Grade Rules
3 units

BUS 186. Professional and Business Ethics
See PHIL 186.
Normal Grade Rules
GE: S
3 units

BUS 189. Strategic Management
Integrative capstone seminar analyzing interrelationships of managerial decisions/actions within and between the firm and its environment. Applies multi-disciplinary techniques to diagnose and recommend actions appropriate to specific company situations, using case method.
Prerequisite: Any 100W. Restricted to students who completed the Jack Holland Student Success Center graduation application process.
Normal Grade Rules
3 units

TRANSPORTATION MANAGEMENT

GRADUATE

MTM 201. Transportation Systems and Society
Core transportation knowledge and systems thinking. Characteristics of travel modes and infrastructural elements that produce transportation systems; public, private, and nonprofit actors involved in transportation; transportation systems as levers toward achieving economic viability, social equity, environmental sustainability, and community goals; and key challenges transportation system managers will face in the coming decade. Note: This course satisfies the GWAR for the MSTM program.
Normal Grade Rules
GE: GWAR
3 units

MTM 202. Introduction to Transportation Funding & Finance
Introduces financial and managerial uses of accounting information systems and concepts. Includes standard costs, cost-volume-profit relationships, contribution analysis, budgeting, performance measurement, variance analysis, working capital, valuing capital costs and financing investment decisions. Explores use of complex information systems.
Normal Grade Rules
3 units

MTM 203. Transportation Marketing and Communications Management
Emphasizes positioning services to meet the needs of particular groups/market segments and marketing the system to new users/user groups (including developing the public/private sector relationship). Examines strategies for developing the community relationship with marketing and public relations efforts (and using the media to advantage).
Normal Grade Rules
3 units

MTM 214. Transportation Policy and Regulation
Surveys political frameworks of governments as both customer and provider, development of transportation policy with public involvement, and performance measurement with public oversight. Reviews policy impact on intermodal development in seeking to manage public and private objectives and diverse agendas of federal, state and local agencies.
Normal Grade Rules
3 units

MTM 215. Transportation Planning and Project Development
Examines management of transportation planning and project development processes, including: regional and state system-wide planning, project-level planning, environmental review, obtaining governmental approvals and permits, contract management, and project management. Prerequisite: MTM 201 or instructor approval.
Normal Grade Rules
3 units

MTM 217. Leadership and Management of Transportation Organizations
A study of the human resource aspects of managing transportation systems, including labor management, collaboration/negotiation and consultative employee relations programs. Builds skills in leadership and team building within the context of bringing about organizational change in a complex transportation system.
Normal Grade Rules
3 units

MTM 226A. Emergency Management Issues for Transportation Professionals
Examines the role of emergency management within transportation agencies and the role of transportation and related resources in community-wide responses to emergencies disasters. Includes instruction in Standardized Emergency Management Systems (SEMS).
Normal Grade Rules
3 units

MTM 226B. Security Issues for Transportation Professionals
Examines contemporary challenges to transportation security. Topics to be covered include: management of infrastructure challenges (such as tunnel, bridge, road and rail vulnerabilities) prevention of and response to theft, work place violence, disruptive terrorism, suicide and placement combing attacks, and their related protection strategies. Students will learn about federal and state grants for security, as well as regional transportation planning for disaster response planning.
Normal Grade Rules
3 units
MTM 230. Multi Modal Transportation in CA
Course provides an overview of public transit systems in California. It examines the maze of public transit services, funding and regulation.
Repeatable for credit
Normal Grade Rules
3 units

MTM 236. Managing Technology Innovations in Transportation
Management challenges posed by five technological trends: electrification, vehicle automation, connected vehicles and infrastructure, car sharing and ride sharing, and mobility as a service. Topics include: impacts on infrastructure, financing, and labor; managing technologies to support environmental, equity, and economic efficiency policy goals; and supporting collaboration between public agencies and private sector firms.
Normal Grade Rules
3 units

MTM 245. High Speed Rail Mgmt I
The course is designated for students interested in participating in the evolving high-speed rail program in the United States. The course will introduce students to the HS Passenger Rail mode and describe its attributes and technical components. The course will also deal with general enterprise management and the management competencies required. It will also introduce students to the issues of organizing for HSR project development and implementation.
Normal Grade Rules
3 units

MTM 246. High Speed Rail Mgmt II
Designed for students interested in participating in the evolving Intercity and High Speed Passenger Rail Program in the United States, the course is a companion to MTM245, and will introduce students to the Intercity and High Speed Passenger Rail mode and describe its attributes and technical components. The worldwide status of the mode will be described as well as the path being taken in the United States. The course will also deal with general enterprise management and the management competencies required. It will introduce students to the issues of organizing project development and implementation.
Normal Grade Rules
3 units

MTM 250. Transportation and the Environment
Students will be introduced to the complexities in the relationship of transportation and the environment. An important theme of this class is that real world trade-offs are inherent in addressing transportation as an important cause of environmental degradation. Solutions considered have technical, socio-economic, and cultural impediments.
Students will learn from case studies of success in creating more environmentally-benign forms of access and mobility. Students will contribute their own ideas in class discussions and a term paper on innovation in transportation policy to address environmental concerns.
Normal Grade Rules
3 units

MTM 283. MSTM Capstone - Project Design
Provides the first part of a culminating experience in which students design and carry out an individual, comprehensive policy or program evaluation. Students conduct background research and develop a Policy or Program Evaluation Proposal that demonstrates their capacity to do independent research, analysis, and writing about a complex transportation management problem.
Prerequisite: Completion of 21 units towards the Master of Science in Transportation Management degree
Credit / No Credit
3 units

MTM 290. MSTM Capstone - Evaluation Report
Provides the second part of a culminating experience in which students design and carry out an individual, comprehensive policy or program evaluation. Students complete a Policy or Program Evaluation following the proposal design they developed in MTM 283. The final report demonstrates their capacity to do independent research, analysis, and writing about a complex transportation management problem.
Prerequisite: MTM 283
Mandatory CR/NC/RP
3 units

UPPER DIVISION

MTM 1290R. Culminating Experience Supervision
Continued work on thesis or project.
Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit
Charles W. Davidson College of Engineering Courses

ENGINEERING

LOWER DIVISION

**ENGR 005. Science of High Technology**
Scientific principles underlying commonly used high technology devices and systems such as the computer, cell phone, IPODS, cameras, and the Internet. Emphasizes practical applications of scientific principles to contemporary engineering products and services. GE Area: B1
- Normal Grade Rules
- GE B1
- 3 units

**ENGR 008Q. Engineering Success**
Combination of workshop and lab exercises emphasizing group interaction, communications skills and problem solving for incoming students. May be repeated for a total of 2 units.
- Misc/Lab: Activity 2 hours.
- Repeatable for credit
- Credit / No Credit
- 1 unit

**ENGR 010. Introduction to Engineering**
Introduction to engineering through hands-on design projects, case studies, and problem-solving using computers. Students also acquire non-technical skills, such as team skills and the ability to deal with ethical dilemmas. GE Area: E
- Prerequisite: Eligible for MATH 019 and Writing Enrollment Category W-I or W-II, or ENGL 1AF with a grade of CR, or ENGL 1A with a grade of C- or better.
- Engineering Majors Only
- Misc/Lab: Lecture 2 hours/lab 3 hours.
- Normal Grade Rules
- GE EE
- 3 units

**ENGR 011. Intro to Engineering: Transfer Students**
Ethical issues related to engineering. Information literacy and communication skills in engineering. Working on multidisciplinary teams on collaborative engineering projects.
- Prerequisite: Upper division transfer student in engineering
- Normal Grade Rules
- 1 unit

**ENGR 025. The Digital World and Society**
The secure, effective and ethical use of information technology. The effect of such technology on people and institutions. Technology-related challenges to society and policy. Frameworks for the analysis of information technology with respect to its cultural, historical, environmental, and spatial contexts. GE Area: D1
- Normal Grade Rules
- GE D1
- 3 units

**ENGR 060SL. Engineering Projects in Community Service**
EPICS is a service-learning course where engineering students work in multidisciplinary teams to undertake community-identified engineering projects. Students will gain insight into design and development processes and perform and report upon tasks consistent with their level of discipline expertise.
- Prerequisite: Engineering major; non-remedial Repeatable for credit
- Normal Grade Rules
- 1 unit

**ENGR 090W. Technical Writing Workshop**
Weekly writing and speaking practice to develop technical communication skills. Repeatable not for graduation credit.
- Prerequisite: Referral by engineering faculty.
- Repeatable for credit
- Credit / No Credit
- 2 units

**ENGR 100W. Technical Writing and Communication: Transfer**
- Prerequisite: Eligible for MATH 019 and Writing Enrollment Category W-I or W-II, or ENGL 1AF with a grade of CR, or ENGL 1A with a grade of C- or better.
- GE Area: E
- Normal Grade Rules
- GE EE
- 3 units

**ENGR 102. Renewable Energy Engineering**
- Prerequisite: CHEM 1A and (PHYS 71 or PHYS 52 or PHYS 2B); Upper division standing in engineering.
- Normal Grade Rules
- 3 units

**ENGR 108. Green Electronics**
- Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of co-registration in, 100W is strongly recommended.
- Normal Grade Rules
- GE R
- 3 units

**ENGR 119. Energy and the Environment**
See ENVS 119
- Normal Grade Rules
- GE R
- 3 units

**ENGR 120. Programming Concepts for Behavioral and Social Science Applications**
This course covers the application of Python programming to the fields of behavioral and social sciences, as well as basic building blocks of computers and the Web. This course also covers how programming is used in various careers.
- Prerequisite: STAT 095, or MATH 30, or MATH 71
- Normal Grade Rules
- 3 units

**ENGR 121. Data Structures and Algorithms for Behavioral and Social Science Applications**
Represent and analyze behavioral and social science data using Python and data structures such as classes, trees, and graphs; use related algorithms to solve behavioral and social science problems.
- Prerequisite: ENGR 120 with C- or instructor consent
- Normal Grade Rules
- 3 units

**ENGR 122. Data Technology for Behavioral and Social Science Applications**
Use R programming language to collect, analyze, and present data sets from behavioral and social science applications.
- Prerequisite: ENGR 120
- Normal Grade Rules
- 3 units
ENGR 157SL. Community Action/Community Service
See COMM 157SL
Normal Grade Rules
GE: S
3 units

ENGR 160SL. Engineering Projects in Community Service UD
EPICS UD is a service-learning course where upper division engineering students work in multidisciplinary teams to undertake community-identified engineering projects. Students will gain insight into design and development processes and perform and report upon tasks consistent with their level of discipline expertise.
Prerequisite: Engineering major; upper division standing
Repeatable for credit
Normal Grade Rules
1 unit

ENGR 180. Individual Studies
Individual work on special topics, by arrangement.
Prerequisite: Upper division standing and instructor consent.
Allowed Declared Majors: Engineering. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-3 units

ENGR 184. Business Strategy in Practice in Technology Enterprise
This course provides students with the practical tools and assessment for applying their business acumen. The first half introduces the students to standard business assessment tools that feed business strategies, such as marketing, business development and M & A. The second half of the course is comprised of developing the basic elements of a formal Business Plan and providing both comprehension and application levels of learning of business strategy.
Prerequisite: BUS 193 or ENGR 193 and BUS 181.
Normal Grade Rules
3 units

ENGR 194. Business Organization and Management of Technology Enterprise
This course provides a “top down” overview of how commercial business works, including the business components: Corporate Environments, Human Resources, Legal, Marketing, Customer Insights, Management/Leadership. Communication and business soft skills will be covered providing a foundation for a solid business acumen. All class sessions focus on local and global perspectives.
Prerequisite: BUS 193 or ENGR 193.
Normal Grade Rules
3 units

ENGR 195A. Global and Social Issues in Engineering
Interdisciplinary seminar treating social and global impacts of technology and engineering. This integrated GE experience requires students to apply these concepts in their senior project classes. Students must enroll concurrently in their department senior project course Part A. GE Area: S when taken as part of Engineering Major sequence.
Prerequisite: ENGR 100W with a C or better. Engineering Majors only. Completion of Core General Education and upper division standing are prerequisites to all SJSU Studies courses.
Corequisite: Enrollment in major capstone course or equivalent.
Note: Meets GE Areas S and V when course is taken in combination with ENGR 195B and Engineering major specific sequence. Must be passed with a C or better to earn S and V
Repeatable for credit
Normal Grade Rules
GE: S
1 unit

ENGR 195B. Global and Social Issues in Engineering
Second course in a two-course sequence to support the integration of General Education Area S and Area V into the engineering major. Case study approach to the relationship of engineering to social, ethical and cultural aspects of the broader community both in the U. S. and worldwide. GE Area: V when taken as part of Engineering Major Sequence.
Prerequisite: ENGR 195A (with a grade of “C” or better). Engineering Majors Only Passage of the Writing Skills Test (WST) or ENGL/LDL 100A with a “C or better” (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Corequisite: Enrollment in major capstone course or equivalent.
Note: To receive credit for GE Areas S and V, students must complete both ENGR 195A and ENGR 195B, each with a grade of C or better. They must also complete their senior project course sequence and earn a grade of C or better in each course.
Repeatable for credit
Normal Grade Rules
GE: V
1 unit

ENGR 195C. Interdisciplinary Senior Project I
Interdisciplinary team senior design projects. Proposal preparation with feasibility plans and specifications; oral and written reports; professional seminars. GE Area: S when taken as part of an engineering major sequence.
Prerequisites: ENGR 100W, eligible for senior project course in major.
Note: Meets GE Areas S and V when course is taken in combination with: ENGR 195D, ENGR 195A and ENGR 195B
Normal Grade Rules
GE: S
3 units

ENGR 195D. Interdisciplinary Senior Project II
Construction, testing, and evaluation of the design from ENGR 195C culminating in demonstrations and written and oral presentations to faculty, industry mentors and peers. GE Area: V when taken as part of an engineering major sequence.
Prerequisites: ENGR 195C with a grade of “C” or better.
Note: Meets GE Areas S and V when course is taken in combination with: ENGR 195C, ENGR 195A and ENGR 195B
Normal Grade Rules
GE: V
3 units

ENGR 195E. Interdisciplinary Computing Project
Culminating project experience for students to apply computing knowledge and skills to solving problems or generating insights in their chosen area of study such as behavioral and social sciences.
Prerequisite: ENGR 120 or Instructor Consent
Normal Grade Rules
3 units

ENGR 197. Cooperative Education Project
Part or full-time on-site paid work experience based on a pre-approved project assignment in area of student’s career objective. Oral presentations, written final report and evaluation by project supervisor. Approved technical elective.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

ENGR 198. Technology and Civilization
See TECH 198
Normal Grade Rules
GE: V
3 units
ENGR 200W. Engineering Reports and Graduate Research
Graduate level technical writing workshop designed to develop advanced communication skills that will readily transfer to the engineer’s professional needs, along with research methodologies, copyright issues, and proper documentation for the master’s thesis project. Prerequisite: Graduate standing and completion of an undergraduate writing course.
Note: This course satisfies graduate-level GWAR in this master’s program.
ABC/No Credit
GE: GWAR
3 units

ENGR 201. Engineering Analysis
Mathematical techniques for solving engineering problems. Topics include linear systems analysis, probability and statistics, and differential equations. Applications include modeling and simulation, optimization, projection, experimental design. Several computer projects are required. Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

ENGR 202. Systems Engineering
Large scale system design and development. Integrated approach including mission statement, synthesis of design concepts, tradeoff studies, risk assessment and interactions encountered in the optimal design, development, manufacture and test of systems. Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

ENGR 203. Engineering Management
Students will develop contemporary expertise in the principles of engineering finance, management, IP, operations management, performance metrics, and their application to design, development, and commercialization of new products and services in dynamic environments. Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

ENGR 206. Renewable Energy Systems
Advanced knowledge in renewable energy resources such as solar, wind, geothermal, biomass, waves and tidal energy. Solar resources and technologies, Integrated Resource Planning and System Operations, Enabling technologies and new energy use trends: Smart Grid, Demand Response, Energy Storage, and Electric Vehicles. Prerequisite: Instructor consent
Normal Grade Rules
3 units

ENGR 212. Engineering Management in a Global Economy
Application of engineering methodologies and practices to manage projects and organizations in a global digital economy. Topics include shifting from a manufacturing, production, marketing, and supply chain to a service economy, premium manufacturing, ethics, and competitive soft skills. Prerequisites: ENGR 203 or Instructor Consent.
Normal Grade Rules
3 units

ENGR 231. Fundamentals of Facility Management
Overview of facility managers’ financial and business responsibilities. Principles of real estate and property management, facility operations, maintenance activities, and human resource management. Includes sustainable development, environmental management, and corporate social responsibility. Repeatable for credit
Normal Grade Rules
3 units

ENGR 232. Technology for Facility Management
Overview of current and emerging facility management technologies and how and when to apply them. Includes facility management automation, transactional and human-centric processes, building automation and control systems, BIM technologies, and GIS analysis. Repeatable for credit
Normal Grade Rules
3 units

ENGR 233. Managing Facility Assets for Cost and Compliance
Fundamental skills for assessing condition indices of assets in high-tech factories/laboratories, large office buildings, and other modern facilities; quantifying costs and financial impacts; and providing decision support for asset replacement or maintenance and for lease negotiation. Includes ISO 55000 standards for facility management. Repeatable for credit
Normal Grade Rules
3 units

ENGR 234. Facility Operations and Maintenance
Fundamental skills and management and assessment tools for facility maintenance and operations. Includes predictive facility maintenance management, facility maintenance methods and strategies, analysis of service providers, and analysis of facility systems, equipment, and grounds. Prerequisite: ENGR 231
Repeatable for credit
Normal Grade Rules
3 units

ENGR 236. Design for Manufacturability
Knowledge-based design, value engineering, DFM methodologies, robust design, process and materials selection, design constraints, design for assembly. Techniques of quality engineering, CAD/CAM integration and simultaneous engineering, cost estimating, activity-based costing, case studies, team projects. Prerequisite: Principles of Design and Manufacturing Processes.
Normal Grade Rules
3 units

ENGR 240. Control Systems Design and Applications
Introduction to control system analysis, feedback control theory, control law design and implementation. Topics include system modeling and identification, computer simulation, frequency domain and state space design approaches, control law implementation, and commonly used sensors and actuators for control systems. CAD tools for control systems analysis, design and simulation are used throughout this course. Prerequisite: Graduate Standing
Normal Grade Rules
3 units

ENGR 261. Battery Technologies I
ENGR 261 teaches fundamentals of battery technologies. Concepts and understanding of electrochemical interactions, kinetics and thermodynamics in batteries will be covered. Basic concepts, material development and modeling of lithium-ion batteries will be discussed as well as understanding of flow batteries. Advanced and future technologies for next generation batteries will be introduced.
Normal Grade Rules
3 units

ENGR 262. Battery Technologies II
This follow-up course will provide an in-depth look at batteries with a focus on cutting-edge research and development. Topics such as material synthesis techniques, science of electrode fabrication, advanced characterization techniques, battery life degradation mechanisms, design of battery electrodes, thermal management, and state-of-charge and state-of-health measurements will be covered.
Normal Grade Rules
3 units

ENGR 263. Battery Electrochemistry
This course will cover the basics of electrochemistry, including thermodynamics, kinetics, mass transfer effects, reference electrodes, porous electrodes, dilute and concentrated solution theory, and electro-analytical methods, including voltammetry, coulometry and impedance spectroscopy.
Normal Grade Rules
3 units

</tbody>
</table>
ENGR 295A. Master Project I
In-depth developmental engineering work relating to problems of interest to an individual or a group of students. Project includes proposal formulation, analysis, design, implementation, and testing.
Prerequisite: Graduate Advisor consent. Not available to Open University students.
Repeatable for credit
Mandatory CR/NC/RP
3 units

ENGR 295B. Master Project II
A continuation of ENGR 295A. Students complete the in-depth project, write a detailed project report and make a comprehensive presentation and demonstration of project.
Prerequisite: Admission to Candidacy of Master’s Degree and CMPE 295A or CMPE 295W. Not available to Open University students.
Mandatory CR/NC/RP
3 units

ENGR 297C. Special Topics in Systems Engineering
Special seminars and discussions to augment regularly-scheduled graduate courses. Emphasis on systems, process, product, and service integration in short-life cycle product and service industries using systems, concurrent engineering, and cost of ownership principles.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

ENGR 297D. Special Topics in Emerging Technologies
Special topics in emerging technologies that emphasize new development in technologies, skills and knowledge which are suitable for the new technologies development such as but not limited to Machine Learning, Big Data Processing, Analytics, Data Analysis, and Information retrieval.
Prerequisite: Instructor consent.
Normal Grade Rules
1-3 units

ENGR 297E. Special Topics in Electronic Materials and Devices
Special seminars and discussions to augment regularly-scheduled graduate courses. Emphasis on VLSI design computer-aided design, modeling, simulation and testing. Materials and processes includes characterizing and processing of electronic materials.
Prerequisite: Instructor’s consent
Repeatable for credit
Normal Grade Rules
3 units

ENGR 297G. Battery Technology 1
Basic and fundamentals about battery technologies. Cover the concepts and understanding of electrochemical, kinetics and thermodynamics in batteries. Discussion on basic concepts on material development and modeling of lithium-ion batteries as well as understanding of flow batteries. Introduction to advanced and future technologies for next generation batteries.
Prerequisite: Graduate standing or instructor’s consent
Repeatable for credit
Normal Grade Rules
3 units

ENGR 297M. Special Topics in Engineering Management
Special seminars and discussions to augment regularly-scheduled graduate courses. Emphasis on engineering management fundamentals, product development and marketing, finance management, managing people and organizations and communication, planning, estimation, tracking metrics, risk analysis, e-business, project and change management.
Prerequisite: Graduate standing or instructor’s consent
Normal Grade Rules
3 units

ENGR 298. Master’s Project
Completion of an in-depth project, a detailed project report, followed by a comprehensive presentation and demonstration of project.
Prerequisite: ENGR 281, satisfaction of English Proficiency requirement, advancement to candidacy.
Misc/Lab: Lab 6 hours.
Mandatory CR/NC/RP
2 units

ENGR 298I. MSE Internship
Student will be employed in an industry as an intern, working in an engineering area to their MSE option. This course supplements and supports the student’s program of study.
Prerequisite: Student must have been enrolled in ENGR298 or ENGR299 in a previous semester.
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit

ENGR 299. Master’s Thesis
Master’s thesis work in engineering.
Prerequisite: Admission to candidacy for master’s degree; written contract with thesis advisor and graduate coordinator.
Misc/Lab: Lab 9 hours.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
Chemical and Materials Engineering Department Courses

CHEMICAL ENGINEERING

UPPER DIVISION

CHE 109. Heat Transfer in Electronics
Introduction to thermodynamics and heat transfer, including conduction, convection and radiation. An emphasis on applications for electronics, including heat transfer in computer components, heat sinks, liquid and air cooling and heat pipes.
Prerequisite: EE 098, PHYS 051 and one of the following courses: MATH 129 or MATH 123 or MATH 129. Allowed Declared Majors: Computer Engineering, Electrical Engineering, Engineering, Industrial and Systems Engineering
Normal Grade Rules
3 units

CHE 115. Industrial Chemical Calculations
Methods of formulation and solution of material and energy balances as applied to chemical processes.
Prerequisite: CHEM 1B; MATH 133A, CHEM 001B
Corequisite: ENGR 010
Misc/Lab: Lecture 2 hours/calculation period 3 hours.
Normal Grade Rules
3 units

CHE 131. Air Pollution Meteorology
See METR 131.
Normal Grade Rules
3 units

CHE 151. Process Engineering Thermodynamics
Analysis of the ideal and real behavior of gases, liquids and solids from a macroscopic viewpoint; 1st and 2nd Law; phase rule, volumetric properties of fluids; heat effects; solution theory and applications; vapor-liquid and solid-solid equilibrium; chemical reaction equilibria.
Prerequisite: CHE 115 and ENGR 10
Misc/Lab: Lecture 3 hours/calculation period 3 hours.
Normal Grade Rules
4 units

CHE 158. Kinetics and Reactor Design
Analysis of unsteady chemical processes with emphasis on kinetics of reactions and application of fundamental principles to the design and operation of commercial reactors.
Prerequisite: CHE 115, CHE 151, CHE 160A, CHE 162 and CHE 190 (with an average of “C” or better in the five courses); ENGR 100W.
Misc/Lab: Lecture 2 hours/calculation period 3 hours.
Normal Grade Rules
3 units

CHE 160A. Unit Operations I
Materials transportation, fluid metering, mixing, sedimentation, filtration, heat exchange and evaporation; types of equipment used and numerous practical applications. Introduction to transport theory.
Prerequisite: CHE 115 and CHE 190
Misc/Lab: Lecture 3 hours/lab 3 hours.
Normal Grade Rules
4 units

CHE 160B. Unit Operations II
Continuation of CHE 160A. Mass transfer operations, diffusion, absorption, extraction, distillation, humidification, membrane separations, drying and crystallization. Field trips to process industries. Integrate global and social issues in engineering.
Prerequisite: CHE 115, CHE 151, CHE 160A, CHE 162 and CHE 190 (with an average of “C” or better in the five courses); ENGR 100W. Allowed Declared Major: Chemical Engineering.
Misc/Lab: Lecture 3 hours/calculation period 3 hours.
Normal Grade Rules
4 units

CHE 161. Process Safety and Engineering Ethics
Topics include principles of chemical process safety, risk assessment, analysis of ethics issues, and the application of the engineering ethical code using case studies.
Integrate global and social issues in engineering.
Prerequisite: CHEM 1B.
Misc/Lab: Lecture 1 hour.
Normal Grade Rules
1 unit

CHE 161L. Undergraduate Chemical Engineering Laboratory
Quantitative study of chemical engineering processes, with emphasis on fluid flow and heat transfer operations. Written and oral reports required.
Prerequisite: CHE 115, CHE 151, CHE 160A, CHE 162 and CHE 190 (with an average of “C” or better in the five courses); ENGR 100W.
Corequisite: CHE 160B and CHE 161.
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

CHE 162. Engineering Statistics and Analysis
Topics will include error analysis, probability, statistics including hypothesis testing, confidence limits and control variables, design of experiments and statistical process control as they are utilized in the chemical, materials and process engineering industries.
Prerequisite: MATH 133A.
Misc/Lab: Lecture 1 hour/lab 3 hours
Normal Grade Rules
2 units

CHE 163L. Undergraduate Chemical Engineering Laboratory II
Chemical engineering principles with an emphasis on traditional and novel applications in focuses such as environmental engineering and biotechnology. Written and oral reports are required.
Prerequisite: ENGR 100W, CHE 161L
Corequisite: CHE 158 and CHE 160B
Misc/Lab: Lecture 1 hour/lab 3 hours.
Normal Grade Rules
2 units

CHE 165A. Plant Design I
Introduction to the technical and economic evaluation of a chemical processing plant design. Introduction to project design and effective team management.
Corequisite: CHE 158 and CHE 160B, instructor consent.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
1 unit

CHE 165B. Plant Design II
Continuation of the technical and economic evaluation of a chemical processing plant, including most aspects of a typical industrial design.
Major plant design project report required.
Prerequisite: CHE 165A, instructor consent.
Misc/Lab: 2 hours lecture/ 2 hours lab
Normal Grade Rules
3 units

CHE 172. Biofuels Process Engineering
Focus on the practical applications of engineering principles and practices used to produce the three major biofuels products commonly available today: ethanol, biodiesel and methane. Differences between entrepreneurial efforts and more traditional processes will be explored.
Prerequisite: CHE 160A
Normal Grade Rules
3 units

CHE 174. Hazardous Materials
Review of current methods and procedures for management of hazardous materials and hazardous wastes; analysis of contaminated systems and remedial actions.
Prerequisite: PHYS 51, PHYS 52, or PHYS 71 and CHEM 1A or instructor consent.
Normal Grade Rules
3 units
### CHE 176. Energy Storage Systems
Principles and technology of energy conversion related to energy storage systems such as batteries, fuel cells, solar cells, and super capacitors. Relationships among electricity, chemistry, heat and mass transfer in energy storage systems. Energy storage system design and applications are emphasized.
Prerequisite: Senior Standing. Engineering and Science majors only.
Normal Grade Rules
3 units

### CHE 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Not available to Open University Students.
Repeatable for credit.
Credit / No Credit
1-3 units

### CHE 180R. Undergraduate Research and Projects
Individual work on special topics by arrangement. This section is for students working on formal, structured research or projects that are substantial enough to meet the requirements of the elective ChE lab requirement in each of the emphasis tracks.
Repeatable for credit.
Normal Grade Rules
1-3 units

### CHE 185. Chemical Process Dynamics and Control
Dynamic behavior of representative chemical processes. Process control; dynamics of open-loop systems; techniques of closed-loop control.
Prerequisite: CHE 160B.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

### CHE 190. Introduction to Transport Phenomena
Prerequisite: PHYS 051 (with a grade of “C-” or better); MATH 133A; CHEM 001B, CE 099.
Normal Grade Rules
3 units

### CHE 192. Introduction to Biochemical Engineering
Enzyme kinetics and enzyme reactors, enzyme isolation and purification, cellular regulation and recombinant DNA technology, microbial kinetics and design of operation of fermenters.
Prerequisite: CHEM 112A, or both CHEM 130A and CHEM 130B, or CHEM 135 or CHE 158.
Normal Grade Rules
3 units

### CHE 193. Microbiological Techniques
See BIOL 193.
Normal Grade Rules
1 unit

### CHE 194. Biochemical Engineering Lab
Principles, concepts and mechanisms of growth and purification of products from biological systems investigated, with emphasis on scale-up procedures. Reombinant DNA techniques and bioinformatics included.
Pre/Corequisite: CHE 192.
Misc/Lab: Lecture 2 hour/lab 3 hours.
Normal Grade Rules
3 units

### CHE 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

### CHE 199. Special Topics in Chemical and Materials Engineering
Special Topics in Chemical and Materials Engineering.
Content varies from semester to semester. Course is repeatable for a total of 6 units.
Prerequisite: Instructor consent.
Repeatable for credit.
Normal Grade Rules
3 units

### CHE 207. Mass Transfer
An advanced study of the principles of mass transfer in the diffusional operations of distillation, absorption, extraction, drying and humidification.
Prerequisite: CHE 160B.
Normal Grade Rules
3 units

### CHE 208. Research Methods
Introduction to key statistical, experimental, and computational tools for independent project and research investigation in chemical and materials engineering. Literature review, experiments, data analysis, and individual written reports.
Prerequisite: Conditional graduate standing in Chemical or Materials Engineering.
Note: This course satisfies graduate-level GWAR.
Normal Grade Rules
3 units

### CHE 211. Advanced Chemical Engineering Thermodynamics
Quantitative development of fundamental laws of thermodynamics and their application to chemical processes. Equilibria and thermal effects in homogeneous and heterogeneous systems. Studies of behavior of complex mixtures and high pressure phenomena.
Prerequisite: CHE 151 and MATH 133A.
Normal Grade Rules
3 units

### CHE 218. Reaction Kinetics
Theoretical background of simple homogeneous reactions collision theory and absolute reaction rate theory, mechanisms of complex homogeneous reactions. Mechanisms of reactions catalyzed by solids; diffusion in solid catalyst. Reactor design.
Prerequisite: MATH 133A, CHE 151 and CHE 158.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE: GWAR
3 units

### CHE 219. Transport Processes
Derivation of general differential equations for transport of heat, mass and momentum; kinetic theory of fluids and its application to transport phenomena based on molecular motion; methods for estimating transport coefficients in fluids.
Prerequisite: CHE 160B.
Normal Grade Rules
3 units

### CHE 281. MS Thesis/Project Preparation Seminar
See MATE 281.
Credit / No Credit
1 unit

### CHE 291. Industrial Bioseparations
Industrial considerations for downstream bioseparation processes including design, troubleshooting, scale-up, economics and validation with a focus on pharmaceutical products.
Prerequisite: CHE 192 or biochemistry or relevant industrial experience.
Normal Grade Rules
3 units

### CHE 293. Applied Bioinformatics
Bioinformatics theory and applications including sequence search, proteomics, molecular modeling, and combinatorial chemistry. Students will work in teams and be guided in independent inquiry to solve practical bioinformatics problems.
Prerequisite: Senior or graduate standing in engineering or science.
Normal Grade Rules
3 units
CHE 297. Special Topics in Chemical Engineering
Special topics to augment regularly-scheduled graduate courses.
Prerequisite: Graduate standing or instructor permission.
Repeatable for credit
Normal Grade Rules
1-4 units

CHE 298. MS Research/Project
Master's project work in Chemical Engineering.
Prerequisite: Admission to candidacy. Not available to Open University Students.
Corequisite: CHE 281.
Repeatable for credit
Mandatory CR/NC/RP
1-2 units

CHE 299. Master's Thesis
Master's thesis work in Chemical Engineering.
Prerequisite: CHE 281 and CHE 298. CHE 298 may be taken co-currently with instructor approval. Not available to Open University Students.
Mandatory CR/NC/RP
3 units

CHE 299I. Master's Thesis Internship
Master's thesis work in Chemical Engineering. This section is for students completing their Master's thesis work at an off campus location. Prerequisite: CHE 281, CHE 298. Not available to Open University Students.
Note: CHE 298 may be taken co-currently with instructor approval.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

MATERIALS ENGINEERING

LOWER DIVISION

MATE 025. Introduction to Materials
Atomic and crystal structures; imperfections and atom movement; phase equilibria and transformations; boundaries; heat treatment of metals; mechanical, physical and chemical properties of engineering materials.
Prerequisite: CHM 001A, PHYS 050, MATH 031.
Allowed Declared Majors: Any Engineering
Normal Grade Rules
3 units

UPPER DIVISION

MATE 115. Structure/Properties of Solids
Bonding and crystal structure; the space lattice and unit cell calculations; crystalline anisotropy; point, line and surface defects; phase equilibria and interpretation of phase diagrams; thermal activation and the vacancy mechanism of mass transport in solids.
Prerequisite: PHYS 051 (with a grade of “C-” or better); MATH 133A; CHM 001B and MATE 025
Corequisite: ENGR 101.
Normal Grade Rules
3 units

MATE 129. Introduction to Integrated Circuits Processing and Design
Basic processes involved in fabrication of integrated circuits; semiconductor physics, material preparation, oxidation, diffusion, photolithographic, thin-film deposition and etching. Simple component layout and evaluation of device parameters.
Prerequisite: MATE 25 or MATE 153.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

MATE 131. Fundamentals of Additive Manufacturing
Introduction to additive manufacturing (AM) and 3D printing, including development of AM, AM process chain, design for AM, and case studies. Focus on capabilities, limitations, and basic principles of various AM techniques, such as material extrusion, vat polymerization, powder bed fusion processes, material jetting, binder jetting, sheet lamination, and directed energy deposition processes.
Prerequisite: MATE 25 with “C” or better
Normal Grade Rules
3 units

MATE 135. Introduction to Composite Materials
Introduction to theory, application, and design with composite materials, including high performance resin-matrix fibrous composites and metal-matrix materials. Topics include materials, test techniques, environmental effects, design considerations, and application requirements.
Prerequisite: MATE 025.
Normal Grade Rules
3 units

MATE 141. Structure and Analysis of Materials
Crystallography and structural analysis of materials by X-rays and electrons. Imaging, diffraction, scattering and spectroscopic methods of characterization.
Prerequisite: MATE 115.
Corequisite: MATE 153.
Normal Grade Rules
3 units

MATE 143. Principles of Scanning Electron Microscopy
Principles and practice of scanning electron microscopy. Basic theory and skills development of electron microscopy, including electron dispersive spectroscopy. Imaging and compositional analysis of conductive and non-conductive samples.
Prerequisite: Introductory course in chemistry, physics or materials engineering.
Misc/Lab: 3 hour lab.
ABC/No Credit
1 unit

MATE 144. X-Ray Diffraction Lab
Practical applications of X-ray diffraction. Including phase identification, texture analysis, grain size determination.
Prerequisite or Corequisite: MATE 141 or instructor consent.
ABC/No Credit
1 unit

MATE 145. Principles of Scanning Probe Microscopy
Principles and practice of various surface probe microscopies including AFM and STM.
Prerequisite: Introductory course in chemistry, physics or materials engineering.
ABC/No Credit
1 unit

MATE 151. Solid State Thermodynamics
Analysis of the ideal and real behavior of gases, liquids and solids from a macroscopic viewpoint; 1st and 2nd Law, phase rule, volumetric properties of fluids; heat effects, solution theory and applications, vapor-liquid and solid-solid equilibrium; chemical reaction equilibria.
Prerequisite: MATE 115
Notes: Lecture 3 hours
Normal Grade Rules
3 units
MATE 152. Solid State Kinetics
Diffusion and rates of reaction in solids. Transformations in solids, including nucleation and growth, martensitic transformation, spinodal decomposition and order-disorder reactions.
Prerequisite: 2.0 average for MATE 115, MATE 141, MATE 151, MATE 154 and MATE 155; ENGR 100W, CHE 162.
Normal Grade Rules
3 units

MATE 153. Electronic, Optical and Magnetic Properties of Materials
Crystalline and energy band structure of materials, thermal properties and electrical conduction in semiconductors and metals, optical and magnetic properties of solids.
Prerequisite: PHYS 051; CHEM 001A; EE 098 and MATH 133A
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

MATE 154. Metals and Alloys
Thermal and mechanical processing of metals and alloys. Heat treatments, metallography and interpretation of microstructure. Biomedical, aerospace, automotive and other applications of metals discussed, including precipitation hardening of non-ferrous metal alloys, and the processing/structure/properties relationship in titanium alloys.
Prerequisite: MATE 115
Corequisite: MATE 153 or ENGR 100W
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

MATE 155. Materials Selection and Process Design
Methodology for selecting materials in process design for engineering applications. Case studies emphasizing materials selection and process parameters. Evaluation of material performance, robust design, and process control on semiconductor manufacturing, bioengineering devices, energy storage and conversion, water purification applications.
Prerequisite: MATE 115, CHE 162, and ENGR 010
Normal Grade Rules
3 units

MATE 156. Photovoltaic Fabrication/Testing Lab
Laboratory course covering photovoltaic (solar cell) design, fabrication, and testing. TCAD simulation tools will be used in design. Fabrication processes will include cleaning, surface texturing, deposition, diffusion, metallization, photolithography, etching, and electrical testing.
Prerequisites: MATE 025 or MATE 153 or corequisite of MATE 129.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
1 unit

MATE 168. Microfluid Fabrication and Design
See ME 168.
Normal Grade Rules
1 unit

MATE 169. Microelectromechanical Systems Fabrication and Design
See ME 169.
Normal Grade Rules
1 unit

MATE 175. Biomaterials
Fundamentals of structure, processing, and properties of metallic, ceramic and polymeric materials utilized in biomedical devices and biotechnology. Effect of structure and processing on properties, especially biocompatibility, corrosion and long term reliability. Methods for characterization and testing of materials. New trends in biomaterials for interventional cardiology, implants, vascular prostheses, catheters and orthopedics.
Prerequisite: MATE 25 or instructor consent.
Misc/Lab: Lecture 3 hours/Lab 3 hours.
Normal Grade Rules
3 units

MATE 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Major form on file with department and instructor consent. Not available to Open University Students.
Repealable for credit
Credit / No Credit
1-3 units

MATE 185. Ceramics
Structure, properties and processing of crystalline and glassy ceramics, including defect thermodynamics, surfaces, ternary phase equilibria, and sintering. Applications include solid oxide fuel cells, oxide based chemical sensors, ceramics for biomedical and dental applications, and processing of electronic components.
Prerequisite: MATE 115, MATE 151, MATE majors must also satisfy Jr. Core requirements.
Normal Grade Rules
3 units

MATE 186. Polymers
Structure and properties of solid polymers; chemistry, thermal transitions; mechanical, electrical and optical properties, influence of chemical structure and processing on properties, applications.
Prerequisite: MATE 25 (with a grade of “C”) Normal Grade Rules
3 units

MATE 195. Mechanical Behavior of Materials
Elasticity, plasticity, anelasticity, deformation mechanisms; effect of microstructure and imperfections; fatigue, creep, fracture, plane stress and plane strain; failure analysis for structural applications involving engineering devices and systems, bulk and nanomaterials, material compatibility, and interfacial bonding in thin films.
Prerequisite: MATE 115, ENGR 100W, CHE 162, CE 099; MatE majors must satisfy the Junior core.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

MATE 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

MATE 198A. Senior Design Project
Apply materials engineering principles to the design and implementation of an approved materials engineering project. Integrate global and social issues in engineering. GE Area: S when taken as part of the MATE Major sequence.
Prerequisite: 2.0 average and “C-” minimum grade in (MATE 115, MATE 141, MATE 151, MATE 153, MATE 154, MATE 155); ENGR 100W; CHE 162.
Corequisite: ENGR 195A, MATE 195 and CHE 161
Misc/Lab: Lecture 1 hour/Lab 3 hours.
Note: Meets GE Areas S and V when course is taken in combination with: MATE 198B, ENGR 195A and ENGR 195B
Normal Grade Rules
GE: S
2 units

MATE 198B. Senior Design Project
Apply materials engineering principles to the design and implementation of an approved materials engineering project. Integrate global and social issues in engineering. GE Area: V when taken as part of the MATE Major sequence.
Prerequisite: MATE 198A with a minimum grade of “C”.
Corequisite: ENGR 195B
Misc/Lab: Lecture 1 hour/Lab 3 hours.
Note: Meets GE Areas S and V when course is taken in combination with: MATE 198A, ENGR 195A and ENGR 195B.
Normal Grade Rules
GE: V
2 units

MATE 199. Special Topics in Chemical and Materials Engineering
See CHE 199.
Repeatable for credit
Normal Grade Rules
3 units
GRADUATE

**MATE 205. Advanced Mechanical Behavior of Solids**
Structure-property relationships in mechanical behavior of materials, including elastic, anelastic and plastic behavior; creep characteristics, fracture, testing methods, dislocation dynamics, strengthening mechanisms.
Prerequisite: MATE 115 (or equivalent).
Normal Grade Rules
3 units

**MATE 210. Experimental Methods in Materials Engineering**
Advanced study of experimental techniques used in materials engineering, including data acquisition and analysis, experiment design strategy and hands-on operation of advanced equipment.
Prerequisite: MATE 115 (or equivalent).
Misc/Lab: Lecture 2 hour/lab 3 hours.
Normal Grade Rules
3 units

**MATE 215. Solid State Materials Engineering**
Electrical, optical and magnetic properties. Includes wave mechanics, bonding theory, energy band theory, electronic transport, conduction, semiconduction and insulation.
Prerequisite: MATE 115 (or equivalent).
Normal Grade Rules
3 units

**MATE 220. Principles and Applications of Electrochemistry**
Applied electrochemical systems, such as fuel cells, batteries, electrolytic plating, electrolysereaction. Environmental degradation in biological and material systems. Modern electrochemical techniques in analytical chemistry, including polarography, cyclic voltammetry, coulometric and pulse methods.
Prerequisite: MATE 155 (or equivalent) or instructor consent.
Normal Grade Rules
3 units

**MATE 232. Plasma Processing of Materials**
Principles of low temperature plasmas used for materials processing, including plasma fundamentals, plasma chemistry, collision and heating mechanisms and diagnostics. Material interactions in plasma assisted etching, deposition, and surface treatment will be emphasized.
Prerequisite: MATE 133A, MATE 25, and PHYS 51 or equivalent courses.
Normal Grade Rules
3 units

**MATE 241. Advanced Methods of Materials Characterization**
Methods for characterization and analysis of bulk materials, films, nanoscale structures and surfaces.
Prerequisite: Upper division undergraduate course in chemistry, condensed matter physics or materials.
Normal Grade Rules
3 units

**MATE 251. Advanced Solid State Thermodynamics**
Thermodynamics of phase changes, nucleation and growth, martensitic changes, diffusion, rate theory, structural changes accompanying transformation, applications of theoretical concepts to materials development.
Prerequisites: MATE 115 and MATE 151 (or equivalent).
Normal Grade Rules
3 units

**MATE 260. Theory of Semiconductor Materials**
Advanced theory of constitution, structure and energy bands in semiconductors; material requirements of devices; different methods of doping, interconnection, isolation of circuits, material processing and failure analysis.
Prerequisite: MATE 25, MATE 115, MATE 153 or MATE 129 (or equivalent).
Normal Grade Rules
3 units

**MATE 265. Principles of Nanomaterials**
The fundamental properties of nanomaterials including thermodynamic, mechanical, electrical, magnetic, optical and biochemical properties and synthesis and characterization. Applications including nanomaterials for structural composites, memory and logic devices, clean renewable energy technologies, bio materials in drug delivery, and aerospace applications.
Prerequisites: CHEM 001A, EE 098, MATH 133A, PHYS 051, PHYS 071, MATE 025, and MATE 153.
Normal Grade Rules
3 units

**MATE 270. Methods of Thin Film Deposition**
Chemical and physical methods of thin film deposition including evaporation, sputtering, chemical vapor deposition, and electroplating. Thermodynamics and kinetics of growth, considerations for reactor design, control of deposition to alter film properties; deposition processes used for metals, dielectrics and semiconductors.
Prerequisite: MATE 152 (or equivalent).
Normal Grade Rules
3 units

**MATE 281. MS Thesis/Project Preparation Seminar**
Development of project or thesis proposal.
Prerequisites: Classified standing, completion of minimum 9 units towards MS degree, candidacy form submitted, satisfactory completion of university graduate writing requirement.
Misc/Lab: Lab 3 hours.
Credit / No Credit
1 unit

**MATE 297. Special Topics in Materials Engineering**
Special topics to augment regularly-scheduled graduate courses.
Prerequisite: Graduate standing or instructor permission.
Notes: By arrangement only.
Repeatable for credit
Normal Grade Rules
1-4 units

**MATE 298. MS Research/Project**
Master’s project work in Materials Engineering.
Prerequisite: Admission to candidacy.
Corequisite: MATE 281. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
1-2 units

**MATE 298I. Master’s Project Internship**
For students completing their MATE Master’s Plan B (Project) work at an off-campus location.
Repeatable for credit
Mandatory CR/NC/RP
1-2 units

**MATE 299. Master’s Thesis**
Master’s thesis work in Materials Engineering.
Prerequisite: Admission to candidacy. Not available to Open University Students.
Corequisite: MATE 281.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

**MATE 299I. Master’s Thesis Internship**
For students completing their MATE Master’s thesis work at an off-campus location. Prerequisite: MATE 281, MATE 298. MATE 298 may be taken co-currently with instructor approval. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units
MATE 1290R. Culminating Experience Supervision

Continued work on dissertation, thesis, or project or in preparation for comprehensive exams beyond the minimum required units for cases in which final deliverables are still in progress and all other degree requirements except the culminating experience have been fulfilled.

Prerequisite: Outstanding RP grade in a previous semester in MatE 298 or 299

Note: No Degree Credit

No Degree Credit

1 unit
### Chemistry Department Courses

#### LOWER DIVISION

**CHEM 001A. General Chemistry**
Topics including stoichiometry, reactions, atomic structure, periodicity, bonding, states of matter, energy changes, solutions using organic and inorganic examples. Lab program complements lecture. Prerequisite: Proficiency in high school chemistry or CHEM 010 (with a grade of "C" or better; "C-" not accepted) or instructor consent; proficiency in high school algebra and eligibility for MATH 019. Writing Enrollment Group W-I or W-II, or ENGL 1AF with a grade of CR, or ENGL 1A with a grade of C- or better. Misc/Lab: Lecture 3 hours/ activity 2 hours.
Normal Grade Rules
GE: B1B3
5 units

**CHEM 001B. General Chemistry**
Topics including stoichiometry, colligative properties, kinetics, equilibria, thermodynamics and electrochemistry. Lab program complements lecture. GE Area: B1 and B3. Prerequisite: CHEM 001A (with a grade of "C" or better; "C-" not accepted). Misc/Lab: Lecture 3 hours/ lab
Normal Grade Rules
GE: B1B3
5 units

**CHEM 008. Organic Chemistry**
Introduction to the chemistry of carbon compounds for allied health majors and others requiring only 3 units of organic chemistry lecture. Prerequisite: CHEM 001B (with a grade of "C" or better; "C-" not accepted).
Notes: CHEM 008 is not a satisfactory prerequisite for CHEM 112B. No credit toward Chemistry major or minor. Normal Grade Rules
3 units

**CHEM 009. Organic Chemistry Lab**
Organic chemistry laboratory for allied health majors and others requiring only 1 unit of organic chemistry lab. Pre/Corequisite: CHEM 008. Misc/Lab: Lab 3 hours.
Notes: No credit toward Chemistry major or minor. Normal Grade Rules
1 unit

**CHEM 010. Chemical Calculations and Concepts**
Fundamental concepts in chemistry and problems in chemical symbolism and calculations. For students wishing to continue in chemistry, but lacking prerequisites for CHEM 001A. Prerequisite: One year high school algebra. Misc/Lab: Lecture 2 hours/activity 2 hours.
Notes: No credit toward chemistry major or minor. Normal Grade Rules
3 units

**CHEM 030A. Introductory Chemistry**
The physical world as seen by a chemist; the ways this world affects humans, other animals and plants used as illustrations of fundamental general chemistry. GE Area: B1 and B3. Misc/Lab: Lecture 2 hours/lab 3 hours.
Notes: No credit toward Chemistry major or minor. Normal Grade Rules
GE: B1B3
3 units

**CHEM 030B. Introductory Chemistry**
Organic compounds produced both in nature and artificially and the reactions they undergo, particularly in the human. Prerequisite: CHEM 030A or CHEM 001A (with a grade of "C" or better; "C-" not accepted). Misc/Lab: Lecture 2 hours/lab 3 hours.
Notes: No credit toward Chemistry major or minor. Normal Grade Rules
3 units

**CHEM 055. Quantitative Analysis**
Introduction to theories and techniques of chemical analysis. Prerequisite: CHEM 001B (with a grade of "C" or better; "C-" not accepted). Normal Grade Rules
2 units

**CHEM 055L. Quantitative Analysis Laboratory**
Introduction to chemical analysis techniques. Pre/Co-requisite: CHEM 055. Misc/Lab: Lab 6 hours.
Normal Grade Rules
2 units

**CHEM 090. Problem Solving for Chemistry**
Supplemental course taken simultaneously with lower division chemistry lecture courses. Techniques for studying and problem solving emphasis. Preparation and active participation expected. Consult schedule of classes for current offering(s). Notes: No credit toward chemistry major or minor. Repeatable for credit.
Credit / No Credit
1 unit

#### UPPER DIVISION

**CHEM 100W. Writing Workshop: Chemical Communications**
Improvement of skills in scientific writing and speaking. GE Area: Z. Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing. CHEM 055 or CHEM 112A (with grades of "C" or better; "C-" not accepted). Allowed Declared Majors: Chemistry, Biochemistry.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with "C or better" to satisfy the CSU Graduation Writing Assessment Requirement (CGWAR).
Normal Grade Rules
GE: Z
3 units

**CHEM 101. Chemistry and the Computer**
Analysis of chemical problems. Spreadsheets, mathematical software packages, computer programming, computational chemistry methods. Prerequisite: CHEM 055 and MATH 030 or MATH 030P (with a grade of "C" or better; "C-" not accepted). Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

**CHEM 112A. Organic Chemistry**
Chemistry of the carbon compounds, both aliphatic and aromatic, emphasizing underlying concepts. Prerequisite: CHEM 101 (with a grade of "C" or better; "C-" not accepted). Normal Grade Rules
3 units

**CHEM 112B. Organic Chemistry**
Continuation of CHEM 112A. Prerequisite: CHEM 112A (with a grade of "C" or better; "C-" not accepted). Normal Grade Rules
3 units

**CHEM 113A. Organic Chemistry Lab**
Fundamental techniques for the isolation, characterization and synthesis of organic compounds. Prerequisite: CHEM 112A (with a grade of "C" or better; "C-" not accepted). Chemistry, Biology, Forensic Science-Chemistry, Forensic Science-Biology, Biomedical Engineering and Chemical Engineering majors only, all others by department consent. Misc/Lab: Lab 6 hours.
Normal Grade Rules
2 units
CHEM 113B. Organic Chemistry Lab
Continuation of CHEM 113A including more advanced work.
Prerequisite: CHEM 113A (with a grade of “C” or better; “C−” not accepted). Chemistry majors only or instructor consent.
Pre/Corequisite: CHEM 112B.
Misc/Lab: Lecture 1 hour/lab 6 hours.
Normal Grade Rules
3 units

CHEM 114. Advanced Organic Chemistry Lab
A capstone course on special topics in laboratory experiments utilizing modern chemical, physical and spectrometric methods. A grade of “C” or better is required for majors.
Prerequisite: CHEM 055, CHEM 100W, CHEM 112B and CHEM 113B (with grades of “C” or better; “C−” not accepted).
Misc/Lab: Lecture 1 hour/lab 6 hours.
Normal Grade Rules
3 units

CHEM 118. Special Topics in Organic Chemistry
Introduction to a wide range of subjects typically missing from the traditional organic chemistry sequence (CHEM 112A and CHEM 112B, CHEM 113A and CHEM 113B).
Consult schedule of classes for current offering(s).
Prerequisite: CHEM 112B (with a grade of “C” or better; “C−” not accepted).
Repeatable for credit
Normal Grade Rules
1 unit

CHEM 120S. Chemical Safety Seminar
Safety protocol appropriate to working with hazardous chemicals. Physical nature of hazards, biological effects, permissible exposures, safety precaution techniques. OSHA requirements.
Prerequisite: College level chemistry course. Upper division standing.
Credit / No Credit
1 unit

CHEM 121S. Radiation Safety
See NUCS 121S.
Normal Grade Rules
1-2 units

CHEM 126. Introduction to Nuclear Science
Properties of the atomic nucleus. Applications of nuclear science in biology, chemistry, engineering, geology and physics.
Prerequisite: Lower division calculus, chemistry and physics.
Normal Grade Rules
3 units

CHEM 127. Nuclear Science Lab
Basic techniques and procedures used in nuclear science. Nuclear decay, nuclear reactions, radiation detection and measurements, nuclear analytical methods and tracer techniques.
Prerequisite: NUCCS 121S, CHEM 100W and CHEM 126 (with grades of “C” or better; “C−” not accepted); or instructor consent.
Misc/Lab: Lecture 1 hour/lab 6 hours.
ABC/No Credit
3 units

CHEM 130A. Biochemistry
Chemistry of amino acids, carbohydrates, lipids and nucleotides. Studies of protein structure and function, protein isolation, enzyme kinetics and enzyme mechanisms.
Prerequisite: CHEM 112B (with grades of “C” or better; “C−” not accepted).
Note: CHEM 130A and CHEM 135 cannot both be applied towards a chemistry major or a chemistry minor.
Normal Grade Rules
4 units

CHEM 130B. Biochemistry
Continuation of CHEM 130A, Concepts of bioenergetics; biochemical pathways of degradation and synthesis; metabolic regulation.
Prerequisite: CHEM 130A and BIOL 30 (with grades of “C” or better; “C−” not accepted).
Normal Grade Rules
4 units

CHEM 130C. Biochemistry
Advanced biochemical topics selected from the fields of immunology, physiology, molecular and cell biology.
Prerequisite: CHEM 130A and BIOL 30 (with grades of “C” or better; “C−” not accepted).
Normal Grade Rules
3 units

CHEM 131A. Biochemistry Lab
Fundamental qualitative and quantitative techniques and methodology in modern biochemistry.
Prerequisite: CHEM 55, 55L and 113A (with a grade of “C” or better; “C−” not accepted).
Pre/Corequisite: CHEM 130A.
Misc/Lab: Lab 6 hours.
Normal Grade Rules
2 units

CHEM 131B. Biochemistry Lab
A capstone course on advanced isolation techniques and enzyme methodology. A continuation of CHEM 131A. A grade of “C” or better is required for majors.
Prerequisite: CHEM 100W, CHEM 130A, CHEM 131A (with grades of “C” or better; “C−” not accepted).
Pre/Corequisite: CHEM 130B or CHEM 130C.
Misc/Lab: Lecture 1 hour/lab 6 hours.
Normal Grade Rules
CE R
3 units

CHEM 132. Introductory Biochemistry
Cellular and nutritional biochemistry for those who do not plan to continue in biochemistry, such as nutritional science and other science majors.
Prerequisite: CHEM 308 or CHEM 8 (with grades of “C” or better; “C−” not accepted).
Note: No credit toward Chemistry major or minor.
Normal Grade Rules
4 units

CHEM 132L. Introductory Biochemistry Lab
Lab work associated with chemistry of foods and nutrition, cellular metabolism, biomacromolecules, vitamins and the structure of carbohydrates, lipids, proteins and nucleic acids.
Prerequisite: CHEM 030B or CHEM 008 (with a grade of “C” or better; “C−” not accepted).
Pre/Corequisite: CHEM 132.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
No credit toward Chemistry major or minor.
Normal Grade Rules
1 unit

CHEM 135. General Biochemistry
Survey course on structure/function of biological molecules such as amino acids, proteins including enzymes, lipids/membranes, carbohydrates, and nucleic. Course topics include intermediary metabolism, regulation, and molecular biology.
Prerequisite: BIOL 30, CHEM 112A, CHEM 112B (with a grade of “C” or better; “C−” not accepted).
Note: CHEM 135 and CHEM 130A cannot both be applied toward a chemistry major or a chemistry minor.
Normal Grade Rules
4 units

CHEM 145. Inorganic Chemistry
Development of unifying principles to understand the chemistry of the elements. An introduction to the chemistry, bonding theories and applications of coordination compounds.
Prerequisite: CHEM 112B (with grade of “C” or better; “C−” not accepted).
Co-requisite: CHEM 113A (with grade of “C” or better; “C−” not accepted).
Normal Grade Rules
3 units

CHEM 146. Physical-Inorganic Techniques
Application of advanced instrumental and preparative techniques to the study of structure, reactivity and spectroscopy of inorganic and organic substances including materials. This is a capstone course. A grade of “C” or better is required for majors. Prerequisite: CHEM 100W, CHEM 101, CHEM 145, CHEM 161A (with grades of “C” or better; “C−” not accepted) or instructor consent.
Pre/corequisite: CHEM 155 Misc/Lab: Lecture 1 hour/lab 6 hours.
Normal Grade Rules
4 units
<table>

Prerequisite: CHEM 100W or ENCR 100W; CHEM 161A or CHEM 160 (all prerequisites with grades of “C” or better, “C-” not accepted). Note: If using CHEM 161A as a prerequisite, it requires either CHEM 161B or CHE 158 as a co-requisite. Misc/Lab: Lab 6 hours.</td>
<td>CHEM 100W or ENCR 100W; CHEM 161A or CHEM 160 (all prerequisites with grades of “C” or better, “C-” not accepted). Note: If using CHEM 161A as a prerequisite, it requires either CHEM 161B or CHE 158 as a co-requisite. Misc/Lab: Lab 6 hours.</td>
<td>Normal Grade Rules 2 units</td>
</tr>
<tr>
<td>CHEM 170A</td>
<td>Foundations of Macromolecular Chemistry</td>
<td>Introduction to macromolecular, supramolecular, mesoscale and nanoscale systems and the principles that govern them including preparation, characterization and physical properties. Prerequisite: CHEM 112B with grade of “C” or better (C- not accepted). Normal Grade Rules.</td>
<td>CHEM 112B with grade of “C” or better (C- not accepted). Normal Grade Rules.</td>
<td>1 unit</td>
</tr>
<tr>
<td>CHEM 172</td>
<td>Chemistry of Wine</td>
<td>Introduction to chemistry of important components (organic acids, pigments, tannins, flavor constituents, etc) of grape wine. Chemical changes that occur during fermentation, maturation and aging. Prerequisite: CHEM 1B (with a grade of “C” or better, “C-” not accepted) or instructor consent. Normal Grade Rules.</td>
<td>CHEM 1B (with a grade of “C” or better, “C-” not accepted) or instructor consent. Normal Grade Rules.</td>
<td>1 unit</td>
</tr>
<tr>
<td>CHEM 173</td>
<td>Polymer Chemistry</td>
<td>Chemistry of polymeric substances, both natural and synthetic, emphasizing polymers of current interest. Prerequisite: CHEM 112B (with a grade of “C” or better, “C-” not accepted) or instructor consent. Normal Grade Rules.</td>
<td>CHEM 112B (with a grade of “C” or better, “C-” not accepted) or instructor consent. Normal Grade Rules.</td>
<td>3 units</td>
</tr>
<tr>
<td>CHEM 180</td>
<td>Individual Studies</td>
<td>Advanced supervised lab work. Work and results described in written and oral reports as required by instructor. An honors course. Prerequisite: CHEM 120S, instructor consent and “B” average. Not available to Open University Students. Repeatable for credit.</td>
<td>CHEM 120S, instructor consent and “B” average. Not available to Open University Students. Repeatable for credit.</td>
<td>1-4 units</td>
</tr>
<tr>
<td>CHEM 184</td>
<td>Directed Reading</td>
<td>Assigned readings of selected books, journals and papers to fill gaps in training or for contact with new fields. Regular conferences with instructor. Written report required. An honors course. Prerequisite: Instructor consent and CHEM 55. Not available to Open University Students. Repeatable for credit.</td>
<td>Instructor consent and CHEM 55. Not available to Open University Students. Repeatable for credit.</td>
<td>1-3 units</td>
</tr>
<tr>
<td>CHEM 180</td>
<td>Introduction to Research</td>
<td>Supplemental course taken simultaneously with lower and upper division chemistry lecture courses. Foundational techniques for doing research. Preparation and active participation expected. Normal Grade Rules.</td>
<td>Supplemental course taken simultaneously with lower and upper division chemistry lecture courses. Foundational techniques for doing research. Preparation and active participation expected. Normal Grade Rules.</td>
<td>1 unit</td>
</tr>
<tr>
<td>CHEM 191</td>
<td>Undergraduate Seminar</td>
<td>Problem solving and presentation of topics within specialized sub-areas of chemistry by students, faculty and guests. A total of 2 units may be repeated. Prerequisite: CHEM 1B. Repeatable for credit.</td>
<td>CHEM 1B. Repeatable for credit.</td>
<td>0.5 units</td>
</tr>
<tr>
<td>CHEM 199</td>
<td>Senior Thesis or Project</td>
<td>Prerequisite: Minimum of 2 units of CHEM 180 or CHEM 184, instructor consent and CHEM 100W. Not available to Open University Students. Credit / No Credit.</td>
<td>Minimum of 2 units of CHEM 180 or CHEM 184, instructor consent and CHEM 100W. Not available to Open University Students. Credit / No Credit.</td>
<td>1 unit</td>

</table>
CHEM 218. Organotransition Metal Chemistry
Structure and reaction chemistry of compounds which contain transition metal-carbon bonds. Applications to catalytic processes and to organic synthesis.
Prerequisite: CHEM 112B and CHEM 145 (or equivalents with grades of "C" or better; "C-" not accepted) or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 231. Advanced Biochemistry
Chemistry of the amino acids, peptides and proteins, the chemistry of enzyme action and introduction to the metabolism of amino acids and related compounds.
Prerequisite: CHEM 130B or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted).
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 232. Nucleic Acids
Topics include structural features of DNA and RNA, protein-DNA or RNA interactions, chemical and enzymatic basis for gene expression, and recombinant DNA methods.
Prerequisite: CHEM 130C or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted).
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 234. Enzymology
Enzyme structure, function, classification, isolation and methodology, mechanisms, theory of catalysis, enzyme kinetics, pH effects, allosterism and regulation.
Prerequisite: CHEM 130B or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted).
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 236. Biophysical Methods
Advanced lectures on theory and methodology of biophysical measurements. Topics selected from spectroscopic, electromigration and hydrodynamic methods. Practice, limitations and data reduction procedures for each method examined.
Prerequisite: CHEM 130A or CHEM 135 (or equivalent with a grade of "C" or better; "C-" not accepted) or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 237. Bioinorganic Chemistry
Provides an in-depth survey of the frontiers of bioinorganic chemistry from both biochemical and synthetic inorganic chemistry perspectives.
Prerequisite: CHEM 130A (or equivalent with a grade of "C" or better; "C-" not accepted) or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 245. Advanced Inorganic Chemistry
Advanced topics of current interest in inorganic chemistry.
Prerequisite: CHEM 145 (or equivalent with a grade of "C" or better; "C-" not accepted).
Notes: Alternate years.
Repeatable for credit
Normal Grade Rules
3 units

CHEM 250. Current Topics in Analytical Chemistry
Lecture, discussion and reading assignments on special topics in analytical chemistry. Topics vary each semester.
Course may be repeated for credit for different topics.
Prerequisite: CHEM 155 (or equivalent with grade of "C" or better; "C-" not accepted).
Repeatable for credit
Normal Grade Rules
3 units

CHEM 264. Chemical Applications of Group Theory
The application of group theoretical principles to problems in quantum chemistry, molecular structure, spectroscopy and ligand field theory.
Prerequisite: CHEM 161B (or equivalent with grade of "C" or better; "C-" not accepted) or instructor consent.
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 265. Molecular Spectroscopy
Prerequisite: CHEM 161B (or equivalent with grade of "C" or better; "C-" not accepted).
Notes: Alternate years.
Normal Grade Rules
3 units

CHEM 268. Laser Spectroscopy
See PHYS 268.
Normal Grade Rules
3 units

CHEM 270. Advanced Chemistry
Lectures, discussions and reading assignments in special fields of chemistry. Topics vary. Course may be repeatable for maximum of 10 units.
Prerequisite: Satisfactory background in upper division chemistry and instructor consent.
Repeatable for credit
Normal Grade Rules
1-5 units

CHEM 270L. Advanced Chemistry Laboratory
Advanced laboratory assignments in special fields of chemistry. Topics vary. Maximum of 4 units may be repeatable.
Prerequisite: Satisfactory background in upper division chemistry, CHEM 120S and instructor consent.
Repeatable for credit
Normal Grade Rules
1-3 units

CHEM 276. Physical Polymer Chemistry
Techniques for characterizing molecular weights of polymers, their distribution functions, polymer chain statistics and solution thermodynamics.
Prerequisite: Satisfactory background in upper division chemistry. Topics vary.
Course may be repeated.
Normal Grade Rules
3 units

CHEM 285. Seminar
Presentation of chemical topics by graduate students, faculty and guests. A maximum of 3 units may be repeated.
Repeatable for credit
Normal Grade Rules
0-5 units

CHEM 291. Divisional Seminar
Problem solving and presentation of topics in chemistry by graduate students, faculty and guests. A maximum of 1 unit may be repeated.
Repeatable for credit
Credit / No Credit
0.5 units

CHEM 293. Applied Bioinformatics
See CHE 293.
Normal Grade Rules
3 units

CHEM 297. MA Special Study
Supervised individual MA project. Maximum of 12 unit may be repeated.
Pre/corequisite: CHEM 201 and instructor consent. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-12 units
**CHEM 298. Research**
Supervised individual laboratory work or directed chemical field studies for the student with adequate preparation. Maximum of 12 unit may be repeated.
Pre/Corequisite: CHEM 120S, CHEM 201 and instructor consent. Not available to Open University Students
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

**CHEM 299. Master’s Thesis**
Prerequisite: CHEM 298, instructor consent and admission to candidacy for the master’s degree. Maximum of 6 unit may be repeated. Not available to Open University Students
Notes: 1-2 units per semester.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

**UPPER DIVISION**
**CHEM 1290R. Culminating Experience**
**Supervision**
Continued work on thesis or project.
Prerequisite: Outstanding RP grade in a preceding semester in CHEM 299, Master’s Thesis
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit
### Academic Year 2019-2020

#### Course Descriptions

**Chicana and Chicano Studies Department Courses**

**CHICANA AND CHICANO STUDIES**

#### LOWER DIVISION

**CCS 001. Introduction to Chicana and Chicano Studies**
Through readings, lectures, discussions and assignments students are introduced to Chicana/o Studies. Students learn how CCS examines problems, policies, and social issues to analyze theories, problems, resistance, historical development, identity choices, social/cultural contributions, and consciousness among Chicanas and Chicanos.

Normal Grade Rules
3 units

**CCS 002. Library Studies**
An introduction to the library, its resources, and skills for students to be successful in the MAS major and at SJSU. Topics will cover developing a research topic, developing a research strategy, and finding and evaluating print and non-print sources.

Credit / No Credit
1 unit

**CCS 007. Mexican Folklorico Dance**
Introduction to Mexican Folklorico Dance. Focus is on the development of fundamental Mexican Folklórico dance skills and knowledge. Review of the interrelationship of dance culture to origins, holidays, people, and historical context. Students learn danzas & Mestizo dances from various states and regions of Mexico (e.g. Veracruz Huasteca, Tamaulipas Norte) and indigenous community (e.g. Oaxaca Mixe) dance categories.

Repeatable for credit
Normal Grade Rules
GE: PE
1 unit

**CCS 010A. Mexican Americans and the Development of U.S. History and Government**
The American people and institutions from various ethnic points of view. Historical similarities and differences of various groups that make up the U.S. and its historical/political institutions. From pre-Columbian times to 1865. CE Area: D2, meets additional GE Areas when taken with MAS 10B.

Note: Must complete the entire sequence (MAS 10A and 10B) to satisfy U.S. History, U.S. Constitution and California Government (US1,2,3).

Normal Grade Rules
GE: D2
3 units

**CCS 010B. Mexican Americans and the Development of U.S. History and Government**
The American people and institutions from various ethnic points of view. Historical similarities and differences of various groups that make up the U.S. and its historical/political institutions. From 1865 to the present. CE Area: D3, meets additional GE Areas when taken with MAS 10A.

Prerequisite: MAS 10A

Normal Grade Rules
GE: M7
3 units

**CCS 025. The Changing Majority: Power and Ethnicity in America**
Comparative and historical analysis of racial minorities. Focus on Euro American response to American Indians, Asian Americans, African Americans and Mexican Americans to provide understanding of minority experience in the U.S. as well as American culture. CE Area: D2

Normal Grade Rules
GE: D2
3 units

**CCS 030. Race and Ethnicity in Public Space**
This course focuses on race and ethnicity. Using readings, field trips, media images, and course discussion students learn about racialization in American society. We explore uses of racial and ethnic categories and their institutionalization in everyday life. CE Area: D1

Normal Grade Rules
GE: D1
3 units

**CCS 040. The Chicano Theatre (El Teatro Chicano)**

Prerequisite: ENGL 1A or instructor consent.

Misc/Lab: Lecture 1 hour/activity 2 hours.

Repeatable for credit
Normal Grade Rules
3 units

**CCS 074. Public Address**
Techniques of effective oral communication. Principles of rhetoric through analysis and critique of contemporary issues concerning Mexican Americans. CE Area: A1

Normal Grade Rules
GE: A1
3 units

#### UPPER DIVISION

**CCS 105. Chicanos: United States/Mexico Relations**
Exploration of U.S./Mexico relations through the Chicana/o perspective. Emphasis is on both historical and contemporary issues.

Normal Grade Rules
3 units

**CCS 115. Chicanas/o Families**

Examines Mexican and Mexican American families from the 19th to the 21st century. Special attention is given to the diversity of family structures in terms of incorporation, settlement, and socio-cultural interfacing within group and with diverse race/ethnic communities.

Prerequisite: Upper division standing.

Normal Grade Rules
3 units

**CCS 120. Political Economy and Chicana/o Communities**

Analysis of the American political and economic systems and institutions and their inter-connections from a Chicana/o perspective. Focus on the changing roles of Chicanas/os in the U.S. and global economies and political processes.

Prerequisite: Upper division standing.

Normal Grade Rules
3 units

**CCS 125. Chicanas/o Community Studies**
Examination of Chicana/o community activities, including organizations and contemporary issues.

Normal Grade Rules
3 units

**CCS 127. Chicanas/os and the Criminal Justice System**

Crime, delinquency and the interaction between Chicano/Latino communities and the criminal justice system. The roles of government agencies, local law enforcement, the courts and corrections.

Prerequisite: Upper division standing or instructor consent.

Normal Grade Rules
3 units

**CCS 130. Chicanas and Chicanos in American Society**

Analysis of the Chicana/o community and its role in US society, emphasizing understanding social change. Covers critical areas of the Chicana/o experience, including: family, politics, gender and sexual orientation, education, immigration, identity, institutional racism and discrimination, class, and environmental justice. CE Area: S

Note: All SJSU Studies courses require completion of the ENGL/LLD 100A with a C or better (C- not accepted), Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/ALLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.

Completion of, or co-registration in, 100W is strongly recommended.

Note: All SJSU Studies courses require completion of the WST and upper division standing.

Normal Grade Rules
GE: S
3 units
CSC 135. Contemporary Chicana/o Issues
Analysis of selected issues/topics involving Chicana/Latino communities. May be repeated with different topic/issue.
Prerequisite: ENGL 1A or instructor consent.
Repealable for credit
Normal Grade Rules
3 units

CSC 144. Chicana/o Literature
An examination of selected Chicana/o literature including poetry, short stories, essays, and novels. May be repeated with different topic.
Prerequisite: ENGL 1A or instructor consent.
Repealable for credit
Normal Grade Rules
3 units

CSC 147. Music in Mexican America
Introduction to historical and stylistic musical developments in the experience of ethnic Mexicans in the U.S. The course surveys various styles and genres (such as corridos, conjunto, Tejano, Chicana/o rock and rap). No musical (performance) experience is required.
Normal Grade Rules
3 units

CSC 150. Research Methods
A survey of research methods used in Chicana/o studies that address issues in Chicana/o communities.
Prerequisite: ENGL 1A and CSC 130.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

CSC 151. Theory in Chicana/o Studies
An introduction to the theories and study of race, gender and sexuality in Chicana/o communities. Study of the various theoretical and analytical frameworks that are or have been used in the scholarly field.
Prerequisite: CSC 1 and CSC 2
Normal Grade Rules
3 units

CSC 152. The Story of Chicano Spanish
Exploration of the origins, development, and use of the Spanish spoken by Mexican Americans and Chicanas/os in the United States. Examines Chicano Spanish from its roots in Colonial Mexico through its development and use in the United States since the first Spanish/Mexicans settled the American Southwest. Particular focus on the etymology of Chicano Spanish.
Prerequisite: CSC 1 and CSC 2
Normal Grade Rules
3 units

CSC 160. Gender and Sexuality in the Chicana/o Community
An examination of how patriarchy, race, and class shape Chicanas in their everyday lives in American society. It explores how women resist and challenge the limitations placed on them as a result of being women and members of a racial/ethnic group. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

CSC 170. Hollywood’s Image of Chicanos/Chicanas
Analysis of Hollywood’s contribution, through cinema, to shaping the socio-political relations between Chicanas/os and the dominant society, plus the use of traditional ideological concepts in promoting stereotyped images of Chicanas/os.
Prerequisite: ENGL 1A and ENGL 2 or instructor consent.
Normal Grade Rules
3 units

CSC 175. Human Migrations: Global Reach
Examines Mexican immigration to the United States within the context of global movements as both historical and contemporary phenomena. Considers social, political, cultural, and economic forces that influence immigration.
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

CSC 180. Individual Studies
Individual research projects and field activities.
Prerequisite: Upper division standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

CSC 185. Teaching in a Diverse Society
This course will provide future teachers with an understanding of the ways in which diversity in the classroom influences the learning process and how specific teaching strategies can enhance student learning.
Normal Grade Rules
3 units

CSC 192. Int’l Program Studies
Repeatable for credit
Mixed Grading
1-6 units

CSC 200. Ideology and the Chicana/o Experience
Seminar exploring the ideological and philosophical forces that shape Chicana/o experiences and identities.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

CSC 205. Chicana/o History
Seminar exploring the historical experiences of Chicanas/os, from the indigenous past to the present. Integrates historiography, as it is grounded in an analysis of the development of and changes in the field of Chicana/o history.
Normal Grade Rules
3 units

CSC 210. Foundations in Chicana/o Studies
An analysis of the evolution of Chicana/o thought and intellectual production and the development of the field of Chicana/o Studies. Analyzes the basic constructs and theories underlying Chicana/o Studies, from early works to the present.
Normal Grade Rules
3 units

CSC 215. Chicanas/os and Education
Focus is on key educational issues facing Chicanas/os both historically and currently, including policy, curriculum, cultural conflict, and the different efforts to address them.
Normal Grade Rules
3 units

CSC 225. The Impact of American Institutions on the Chicana/o Community
Seminar analyzing the impact of social, political, economic, and cultural systems on Chicana/o communities.
Normal Grade Rules
3 units

CSC 230. Policy Analysis and the Chicana/o Community
Policy analysis focusing on a specific institution or institutions. Emphasis is on analyzing major issues and social policies that affect the Chicana/o community. Effective strategies to affect social change are examined.
Repeatable for credit
Normal Grade Rules
3 units
CCS 240. Applied Chicana/o Studies Seminar
Integrates major issues and theories from MAS core courses and applies them to current problems. Includes analyses of the latest research on politics, economics, gender, immigration, education, community development, sexual orientation, and interethnic conflicts and collaborations.
Prerequisite: MAS core.
Repeatable for credit
Normal Grade Rules
3 units

CCS 252. Comparative Ethnic Studies
Interdisciplinary introduction to critical topics and debates in comparative ethnic studies, including race and representation, racialized and gendered labor and citizenship, indigeneity, feminism, nationalism, segregation and environmental injustices.
Normal Grade Rules
3 units

CCS 275. Research Methods
Seminar exploring the methodological challenges posed by Chicana/o Studies. The course helps students develop skills in specific research methods of their choice as well as research proposals for the project/thesis, or other areas of post-graduate work.
Prerequisite: Core courses.
Normal Grade Rules
3 units

CCS 298. Special Studies
Supervised project with advisor.
Prerequisite: Completion of core courses and written consent of the department's graduate advisor.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

CCS 299. Master's Thesis
Supervised thesis.
Prerequisite: Admission to candidacy for master's degree and written consent of the department's graduate advisor.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units

UPPER DIVISION
CCS 1290R. Culminating Experience Supervision
Continued work on dissertation, thesis, or project or in preparation for comprehensive exams beyond the minimum required units for cases in which final deliverables are still in progress and all other degree requirements except the culminating experience have been fulfilled.
Prerequisite: Graduate Student, RP recorded for thesis or project courses.
Corequisite: Enrollment in no other courses, all degree requirements completed except thesis or project.
Note: No Degree Credit.
No Degree Credit
1 unit
Child and Adolescent Development, Department of Courses

CHILD AND ADOLESCENT DEVELOPMENT

LOWER DIVISION

CHAD 060. Child Development
The child in the family and community from prenatal life throughout the adolescent years. Observation required. GE Area: E
Normal Grade Rules
GE EE
3 units

CHAD 070. Lifespan Development in the 21st Century
Understanding life-long development in the 21st century is promoted through studying theories, research, and the role of culture in shaping physical, cognitive, social, and emotional development. We explore commonalities and differences in human development to understand ourselves as global citizens. GE Area: E
Normal Grade Rules
GE D1
3 units

CHAD 075. Imagination, Play and Adult Creativity
Explores childhood play and imagination as well as adult creativity and the influence of value systems, economic structures, political institutions, social groups and natural environments on the development of play, imagination and creativity. GE Area: D1
Normal Grade Rules
GE D1
3 units

UPPER DIVISION

CHAD 100W. Writing Workshop
Development of advanced skills in writing, particularly in the field of child development. Focus on development of a mature writing style and organization of persuasive and analytical prose. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better)
Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE Z
3 units

CHAD 101. Research Methods in Child Development
Study of various techniques and methods used in child development research. Development of proposal writing skills.
Prerequisite: CHAD 060 or instructor consent
Normal Grade Rules
3 units

CHAD 102. Development of Self in a Culturally Diverse Society
Examines the influence of various institutions and society on the psychosocial development of children and adolescents from culturally diverse backgrounds in the United States. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Note: Lecture and field observations. All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE S
3 units

CHAD 104. Program Evaluation and Assessment in Community-Based Programs
Optimizing services for children and families requires knowledge and skills in program evaluation and assessment. Through lecture, discussion and case studies, students are introduced to the principles and varied methods of evaluation, and to underlying ethical issues and cultural competencies.
Pre-requisite: CHAD 060
Normal Grade Rules
3 units

CHAD 106. Concepts of Childhood
Explores the historical diversity in the ways in which childhood has been defined; investigates diverse cultural definitions of childhood; examines the impacts of those beliefs and definitions on human development. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses.
Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE V
3 units

CHAD 130. Coding for Scientific Discovery
The physical universe and its life forms are studied through scientific investigations (via computer modeling/coding) that reflect the epistemology and reasoning of scientific practices. These investigations are contextualized with issues related to diversity, equity, ethics, and the teaching/learning of science. SJSU Studies Area: R
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education.
Normal Grade Rules
GE R
3 units

CHAD 131. Equity, Resilience, Risk in Public Schools
Students study the interrelationship of individuals, racial groups, and cultural groups to understand and appreciate issues of diversity, equality, and structured inequality in the U.S., its institutions, and its cultures. Specifically, students explore micro and macro influences that place children’s educational trajectory and achievement at risk. Students examine protective factors, at both micro and macro levels, that can help achieve educational equality for all children. SJSU Studies Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education.
Normal Grade Rules
GE S
3 units

CHAD 132. Education from a Global Perspective
Explores the meaning of education as a concept, or philosophy, both within the US and around the globe. Concepts of education, such as education as empowerment or education as meeting national goals, are examined. Explores how educational traditions outside the US have influenced American education systems (with respect to culture and societal norms), how cultures develop distinctive education systems and how those education systems interact with education systems in other cultures. Provides a foundation for understanding K-8 visual and performing arts standards as well as standards for K-8 history and social studies. SJSU Studies Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education.
Normal Grade Rules
GE V
3 units
CHAD 133. Introduction to K-8 Math/Science Instruction
Introduction to effective instruction and assessment in K-8 math/science. Reviews learning and pedagogical theories and methods for adapting curriculum for all learners. Reviews developmental processes related to achievement in math/science. Students develop knowledge of Common Core Standards for math/science. Prerequisite: Upper division standing, probationary admission to the ChAD credential program, and passing the CBEST.
Normal Grade Rules
3 units

CHAD 134. K-8 Math & Science Practicum
Prepares teachers to teach mathematics and science in culturally, ethnically, and linguistically diverse K-8 classrooms. Examines the rationale for interdisciplinary curriculum design and enables students to make informed decisions about creating and implementing interdisciplinary curriculum that strengthens the teaching/learning process.
Prerequisite: Upper division standing; admission to the ChAD credential program; passing the CBEST; ChAD 133; Certificate of Clearance from the CTC; and current (last 3 years) TB tests (negative results).
Normal Grade Rules
6 units

CHAD 135. Development of Language & Literacy in Children
An overview of the development of children's communicative competence as well as the foundations of language and literacy in the context of a diverse, technologically complex society. Course content covers theories, contexts for development; linguistic diversity, and information/media literacy.
Prerequisite: Completion of Core General Education, completion of A3 with a grade of C or better, passage of the Writing Skills Test (WST), passage of 100w, upper division standing, and acceptance into the ChAD BA Credential Program.
Normal Grade Rules
3 units

CHAD 136. Foundations of K-8 Language Arts & Social Studies
Introduction to effective instruction and assessment in reading/language arts/social studies. Reviews learning/pedagogical theories, methods for adapting curriculum for all learners, and developmental processes underlying achievement in these areas. Students develop knowledge of Common Core Standards for language arts/social science. Prerequisite: Upper division standing, Admission to the ChAD credential program and a passing score on the CBEST and CSET.
Normal Grade Rules
3 units

CHAD 137. K-8 Language Arts & Social Studies Practicum
Prepares educators to teach language arts/social science in culturally, ethnically, and linguistically diverse K-8 classrooms. Discusses methods/strategies and development of a balanced, comprehensive, evidence-based program that addresses the needs of all learners. Technology use and curricular integration are explored.
Prerequisite: Admission to the ChAD credential program, CHAD 136, and a passing score on the CBEST and CSET.
Normal Grade Rules
6 units

CHAD 149. Child Health and Physical Activity
An integrative approach to understanding the multiple factors that impact children's health and physical fitness and that influence the development of lifelong habits. Emphasis is on the inter-relationships between health and fitness and cognitive, social, and emotional well-being.
Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units

CHAD 150. Development of Communicative Competence
Survey of major topics in the development of communicative competence (theoretical approaches to understanding language acquisition, contexts for development, language diversity, relationship between language and cognition). Attention given to language acquisition, media influences and language assessment.
Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units

CHAD 151. Developing Literacy in a Diverse Society
Knowledge of a balanced literacy approach, including an understanding and use of the major descriptors of developing literacy, appropriate assessment methods and instruments, and a developmental and analytical appreciation for writing strategies, conventions, and applications.
Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units

CHAD 152. Foundations for Early Childhood Curriculum
Examines the foundation for implementing integrated ECE curricula. Addresses historical and theoretical issues of curriculum models, assessment of children’s learning, research and standards applicable to curriculum in language, literacy, and STEAM (science, technology, engineering, arts, and math) content areas.
Prerequisite: CHAD 60 or Instructor Consent
Normal Grade Rules
3 units

CHAD 153. Introduction to K-8 English/Language Arts
Introduces students to the teaching of English Language Arts as a major content area. Focuses on the development of pedagogical theories and methods for adapting curriculum for all learners. Designed to meet the requirements of the Commission on Teacher Credentialing. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

CHAD 154. Development of Literacy in a Diverse Society
Examines the foundations of literacy instructional program models, including theoretical, research-based, and practical knowledge necessary to meet criteria for adult supervision in programs that serve children and youth.
Pre-Requisite: CHAD 060
Normal Grade Rules
3 units

CHAD 155. Practicum in Community-Based Organizations Serving Children and Youth
This course provides for a practical application of the theoretical information acquired across the ChAD major coursework. Students will participate in the context of a community service organization serving youth and families.
Prerequisite: CHAD 060
MISC/LAB: Lecture 3 hours/Lab 3 hours
Normal Grade Rules
3 units

CHAD 156. Child Development K-8 Practionum
Principles, techniques, observation and participation in the guidance of elementary and middle school children.
Prerequisite: CHAD 060 or instructor consent.
MISC/LAB: Lecture 1 hour/lab 6 hours.
Normal Grade Rules
3 units

CHAD 157. Adult Supervision for Programs Serving Children, Youth, and Families
The course is designed to provide students with the practical knowledge necessary to meet criteria for adult supervision in programs that serve children and youth.
Prerequisite: CHAD 060
Normal Grade Rules
3 units

CHAD 158. Practicum in Community-Based Organizations Serving Children and Youth
This course provides for a practical application of the theoretical information acquired across the ChAD major coursework. Students will participate in the context of a community service organization serving youth and families.
Prerequisite: CHAD 060
MISC/LAB: Lecture 3 hours/Lab 3 hours
Normal Grade Rules
3 units

CHAD 159. Child Development K-8 Practionum
Principles, techniques, observation and participation in the guidance of children.
Prerequisite: CHAD 060 or instructor consent.
MISC/LAB: Lecture 1 hour/activity 4 hours.
Normal Grade Rules
3 units

CHAD 160. Child Development Practicum
Principles, techniques, observation and participation in the guidance of children.
Prerequisite: CHAD 060 or instructor consent.
MISC/LAB: Lecture 1 hour/activity 4 hours.
Normal Grade Rules
3 units

CHAD 161. Administration of Early Childhood Progs
Survey of practices and procedures integral to designing, administrating, and assessing high quality early learning environments. Focus is on parent involvement, staff development, curriculum design, and program development and administration.
Prerequisite: CHAD 152
Normal Grade Rules
3 units

CHAD 162. Childhood and Adolescence in a Multicultural Society
Exploration of the agents and processes by which cultural values and social attitudes are transmitted. Interactions of individuals from four groups in the U.S. examined from culturally monolithic and pluralistic perspectives.
Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units
CHAD 163. Critical Issues in Adolescent Development
Relationships among major socialization agents (family, peers, school, media). Ethnicity, primary language and socioeconomic status as they affect adolescents. Prerequisite: CHAD 60 or instructor consent.
Normal Grade Rules
3 units

CHAD 164. Contemporary Parenting
Philosophies and theories of parent-child relationships in a multicultural society. Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units

CHAD 165. Risk and Resilience in a Community Context
This course provides students with an understanding of theories, concepts and research that explain risk and resilience. Students will explore community-based organizations that promote resilience and apply their knowledge of risk and resilience to a variety of settings and contexts. Prerequisite: CHAD 060
Normal Grade Rules
3 units

CHAD 168. Social and Emotional Development in Childhood and Adolescence
Understanding issues in social and emotional development and processes of development underlying the emergence of self, social behavior, and emotional competence. Study coping and models of resiliency as related to familial and extrafamilial contexts of social and emotional development. Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units

CHAD 169. Motivating Children and Adolescents in Educational Settings
Perspectives of psychoanalysis, individual psychology, behaviorism and cognitive psychology as applied to the motivation of children and adolescents in educational settings. Prerequisite: CHAD 060 and PSYC 001 (or equivalent) or instructor consent.
Normal Grade Rules
3 units

CHAD 170. Contextual Influences on Cognitive Development
Survey of major topics and issues in cognitive development and the acquisition of communication skills. The influence of family, school and cultural environment on these developmental changes. Prerequisite: CHAD 060 or instructor consent.
Normal Grade Rules
3 units

CHAD 173. Crit. Issues in Infant/Toddler Development
Surveys infant and toddler development in five domains (i.e. social, emotional, cognitive, language, physical) as well as relevant contexts (e.g. culture). Attention given to best practices in infant and toddler care and factors that place infants and toddlers at risk. Prerequisite: CHAD 060 (or equivalent) and PSYC 001
Normal Grade Rules
3 units

CHAD 180. Individual Studies
Individual work on special topics by arrangement. Prerequisite: Program director consent.
Repeatable for credit
Credit / No Credit
1-4 units

CHAD 195. Senior Seminar in Child Development
Advanced study of recent and seminal research and writing in the area of child and adolescent development. Prerequisite: CHAD major, 12 units completed in CHAD, senior standing, and completion of CHAD or LLD 100W with a grade of ‘C’ or better (‘C-’ not accepted).
Normal Grade Rules
3 units

CHAD 199. Senior Honors Thesis
Supervised thesis. Enrollment limited to qualified senior child and Adolescent development majors. Prerequisite: Senior or graduate standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

CHAD 260A. Seminar in Child and Adolescent Development: Research
Advanced study of recent child and adolescent development research. Examination of quantitative and qualitative research methodologies used in the field. Prerequisite: Graduate standing; 12 units in CHAD or related disciplines; CHAD 101 (or equivalent); CHAD majors.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE GWAR
3 units

CHAD 260B. Seminar in Child and Adolescent Development
Capstone course with advanced study of recent research and writings in the area of child and adolescent development. Course includes completion of the cumulative experience project. Prerequisite: Graduate standing; 9 units in CHAD MA core courses, co-registration in CHAD 298; CHAD majors.
Normal Grade Rules
3 units

CHAD 266. Social Policy Issues in American Childhood and Youth
Survey of issues in child and adolescent development which are the topics of national debate in the United States. Research background and social policy implications of these topics are addressed. Prerequisite: 9 units in CHAD or related disciplines.
Normal Grade Rules
3 units

CHAD 268. Seminar in Social and Emotional Development
Examination of current issues in childhood and adolescent social and emotional development: processes underlying self-esteem and self-control and emergence of the self. Contributions of family, school and society are considered. Prerequisite: 9 units in CHAD or related disciplines.
Normal Grade Rules
3 units

CHAD 270. Seminar in Cognitive and Language Development
Examination of major topics in cognitive and language development: stages of development, nature/nurture controversy, stability of behavior over time. Individual differences in cognition and cognitive styles are also explored. Prerequisite: 9 units in CHAD or related disciplines.
Normal Grade Rules
3 units

CHAD 298. Special Studies in Child and Adolescent Development
Supervised study in the field of child development. Prerequisite: Admission to candidacy for the master’s degree.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units
CHAD 299. Master's Thesis
Supervised thesis in the field of child development.
Prerequisite: Admission to candidacy for the master's degree.
Repeatable for credit
Mandatory CR/NC/RP
3-6 units
Civil and Environmental Engineering Department Courses

LOWER DIVISION

CE 008. Plane Surveying
Theory and practice of engineering measurements. Techniques and instruments used establishing horizontal and vertical control. Topographic methods. Prerequisite: MATH 019 or eligibility for MATH 30, 30P or 30PL
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CE 020. Engineering Graphics, CAD and Programming
Develop visualization skills by using technical sketching, AutoCAD and manual drafting to solve civil engineering graphical problems. Subjects include: isometric sketching, orthographic projection, descriptive geometry, and plan reading. Writing computer programming code and logic flow. Prerequisites: MATH 019 or eligibility for MATH 30, 30P or 30PL
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CE 095. Theory and Application of Statics
Detailed study of bodies in equilibrium to provide background for advanced study of engineering mechanics. Applications to general three-dimensional bodies and structural systems. Topics include free body diagrams, centroids, internal forces, distributed loads, moments of inertia and friction. Prerequisites: MATH 031, PHYS 050
Normal Grade Rules 3 units

CE 099. Introductory Statics
Introduction to the study of two-dimensional bodies in equilibrium. Applications to two-dimensional particles and structural systems. Topics include free body diagrams, centroids, and moments of inertia. Prerequisite: MATH 031, PHYS 050
Normal Grade Rules 2 units

CE 112. Mechanics of Materials
Stress distributions, strain, stresses and deformations in machines and structures subject to axial, bending and torsional loads, including combined loads. Stability of columns. Prerequisite: CE 95 or CE 99, Math 133A. Allowed Declared Majors: Any Engineering
Normal Grade Rules 3 units

CE 113. Mechanics of Materials Laboratory
Experimental stress analysis. Verification of theoretical models through testing. Deflection of beams, inelastic bending and column instability. Prerequisite: CE 112. Allowed Declared Majors: Any Engineering
Normal Grade Rules 1 unit

CE 120. Construction Materials Laboratory
Properties, testing and design of civil engineering construction materials, including aggregates for concrete and bituminous mixes. Theory and design of bituminous and portland cement-aggregate mixes. Prerequisite: CE 112. Allowed Declared Major: Civil Engineering
Misc/Lab: Lab 3 hours.
Normal Grade Rules 1 unit

CE 111. Transportation Engineering
Principles, theories, practices in transportation engineering design; planning surveys and data analysis; traffic flow characteristics, location and geometric design of systems to include highways, rail, airports, waterways and pipelines. Problems in planning, design and operations. Prerequisite: CE 008, CE 020, MATH 032, PHYS 050. Allowed Declared Major: Civil Engineering
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CE 121. Transportation Engineering
Introduction to construction engineering, construction contract types, contracting documents, project delivery methods, owner-engineer-contractor relationships, professional liability, engineering ethics, construction cost estimates, construction planning, basic concepts and techniques of scheduling, creating CPM scheduling, updating and reporting a schedule. Prerequisite: CE 130
Normal Grade Rules 3 units

CE 130. Civil Engineering Economic Analysis
Marginal theoretic procedures for identifying optimal investment alternatives. Algorithmic approaches to one-dimensional deterministic benefit-cost analysis. Multidimensional and probabilistic decision problems. Prerequisite: MATH 032. Allowed Declared Major: Civil Engineering
Normal Grade Rules 2 units

CE 131. Introductory to Construction Engineering
Introduction to construction engineering, construction contract types, contracting documents, project delivery methods, owner-engineer-contractor relationships, professional liability, engineering ethics, construction cost estimates, construction planning, basic concepts and techniques of scheduling, creating CPM scheduling, updating and reporting a schedule. Prerequisite: CE 130
Normal Grade Rules 3 units

CE 132. Construction Methods and Equipment
Construction earthmoving, excavating, loading, compacting; safety; equipment productivity; construction methods and materials. Prerequisite: CE 130, CE 140 or graduate standing
Normal Grade Rules 3 units

CE 134. Project Management for Construction
Methods of planning and controlling construction including the participants, processes and techniques required to maintain the life cycle of a construction project. Planning construction operations, estimating, analyzing the bid process, job site operations and functions, safety, quality and scheduling. Prerequisite: CE 131 or Graduate standing. Junior Standing in Engineering
Normal Grade Rules 3 units

CE 140. Geotechnical Engineering
Soil as an engineering material; Classification, compaction, consolidation, shear strength, and permeability of soils; Basic design concepts for bearing capacity of shallow foundations, lateral earth pressures and slope stability. Prerequisite: CE 20, CE 112, ME 111, ENGR 100W. Allowed Declared Majors: Civil Engineering, Geology
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CE 144. Transport in Porous Media
Flow of groundwater through soil; Unsaturated flow; Groundwater and Geologic Processes, Flow nets for structures; Groundwater Contaminant Remediation; Seepage.
Prerequisite: CE 234, CE 150 or graduate standing
Normal Grade Rules 3 units
CE 145. Foundation Engineering
Use of field data in Geotechnical design; Design of shallow foundations for bearing capacity and settlement; Design of deep foundations for shear and tip resistance; Analysis of mat foundations. Design of retaining walls. 
Prerequisite: CE 140 or graduate standing.
Normal Grade Rules
3 units

CE 150. Introduction to Hydrology and Hydraulics
Analysis and design of open channels and pipe networks. Introduction to hydraulic structures, machinery, basic hydrology, and computer modeling. Social impacts of Civil Engineering.
Prerequisite: CE 20, ME 111, ENCR 100W.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

CE 152. Engineering Hydrology
Hydrologic processes; streamflow, hydrographs and flood routing; groundwater hydraulics; flood frequency analysis. 
Prerequisite: CE 150 or graduate standing.
Normal Grade Rules
3 units

CE 154. Hydraulic Design
Design of hydraulic structures-reservoirs, dams, spillways, energy dissipators, outlet works, hydroelectric systems and flood control.
Prerequisite: CE 150 and graduate standing.
Normal Grade Rules
3 units

CE 160. Structural Analysis
Analysis of statically determinate beams, frames, and plane trusses. Force method of analysis of statically indeterminate structures. Applications to building design. Introduction to computer analysis.
Prerequisite: CE 20, CE 112, and ME 101. Allowed Declared Major: Civil Engineering.
Misc/Lab: Lecture 2 hours/computation period 3 hours.
Normal Grade Rules
3 units

CE 162. Structural Concrete Design
Prerequisite: CE 160 and ENCR 100W. Allowed Declared Major: Civil Engineering.
Misc/Lab: Lecture 2 hours/design period 3 hours.
Normal Grade Rules
3 units

CE 163. Design of Steel Structures
Structural steel design elements for buildings and bridges, tension members, beams, columns, bolted and welded connections. Design project.
Prerequisite: CE 160 or graduate standing. Allowed Declared Major: Civil Engineering.
Normal Grade Rules
3 units

CE 164. Design of Wood Structures
Prerequisite: CE 160 and graduate standing.
Normal Grade Rules
3 units

CE 165. Earthquake Resistant Design
Seismic resistant design according to the provisions of the Uniform Building Code. Elements of seismic hazard analysis.
Prerequisite: CE 160 or graduate standing.
Normal Grade Rules
3 units

CE 170. Principles of Environmental Engineering
Introduction to environmental (water, air and land) pollution problem, surface water and groundwater quality, water and wastewater treatment processes, drinking water and wastewater treatment flowsheets, design of drinking water treatment processes, contemporary environmental issues, and environmental sustainability.
Prerequisite: CE 20, ME 111, CHEM 1A, and ENGR 100W.
Misc/Lab: Lecture 2 hours/lab/design 3 hours.
Normal Grade Rules
3 units

CE 171. Environmental Engineering Analysis and Design
Fundamentals of environmental systems and design: Pollution flow and concentration, pollution materials balance, reaction kinetics for destruction of pollutants, pollution control reactor analysis and design, application in the design of water and wastewater treatment processes.
Prerequisite: CE 170 and graduate standing.
Normal Grade Rules
3 units

CE 172. Solid Waste Management Engineering
Introduction to engineering analysis, planning and design problems associated with storage, collection, processing, treatment and disposal of solid waste.
Prerequisite: CE 170 or graduate standing.
Normal Grade Rules
3 units

CE 173. Engineering for Sustainable Environment
Introduction to environmentally conscious engineering and pollution prevention for sustainable environment, and a review of impact of engineering projects, processes and products on the environment.
Prerequisite: CE 170 or graduate standing.
Normal Grade Rules
3 units

CE 174. Design of Water Distribution and Wastewater Collection Systems
Application of environmental engineering and fluid mechanics to the design of water distribution systems, wastewater collection systems, water/wastewater storage systems, and appurtenances.
Prerequisite: CE 150 and CE 170.
Normal Grade Rules
3 units

CE 180. Individual Studies
Individual work on special topics by arrangement.
Prerequisite: Upper division standing. Allowed Declared Major: Civil Engineering. Not available to Open University Students.
Repeatable for credit.
Credit / No Credit
1-3 units

CE 181. Civil Engineering Systems
Principles of systems design for civil engineers, including formulation of project objectives, constraints, problem statements, alternatives generation, alternatives evaluation and decision analysis. Principles demonstrated through case studies.
Prerequisite: CE121, CE 130, CE131, CE140, CE150, CE160, CE170, CE192.
Normal Grade Rules
3 units

CE 190. Numerical Solutions of Civil Engineering Problems
Reformulating linear and non-linear, static and dynamic civil engineering problems for numerical solution by computers.
Prerequisite: MATH 133A, ENGR 10. Allowed Declared Majors: Any Engineering.
Normal Grade Rules
2 units

CE 192. Probabilistic Models for Civil Engineering Decisions
Elementary concepts of probability theory, statistics and decision theory. Applications to modeling and decision-making.
Prerequisite: MATH 032.
Normal Grade Rules
2 units
CE 210. Advanced Mechanics
Beams on elastic foundations, curved beams, torsion of non-circular sections, introduction to the theory of elasticity, three dimensional stress and strain, failure theories, deep beams.
Prerequisite: CE 161 and MATH 133A (or equivalent). Normal Grade Rules 3 units

CE 212. Structural Dynamics
Analysis of lumped and distributed parameter systems subject to dynamic loading; matrix analysis and orthogonal functions applied to beams, frames and complex structures. Introduction to earthquake response spectrum analysis.
Prerequisite: CE 161 (or equivalent). Normal Grade Rules 3 units

CE 220. Rigid and Flexible Pavement Design
Advanced study of the theories and practices in the structural design of flexible and rigid pavements for highways and airports; magnitude and arrangement of wheel loads; stresses in flexible and rigid pavements; pavement behavior under moving loads; design of bases and subbases; methods of structural design of flexible and rigid pavements; pavement evaluation, strengthening and selection criteria; accelerated traffic and loading tests.
Prerequisite: CE 120 and CE 140 (or equivalent). Normal Grade Rules 3 units

CE 221. Advanced Highway Design
Advanced study of highway location and design principles; advanced analysis of criteria controlling geometric design of highways including design speed, design volume, vehicle requirements and capacity; advanced theory and practice in the design of alignment, grade and cross-section; design of intersections and interchanges; access control, frontage roads.
Prerequisite: CE 121 (or equivalent). Normal Grade Rules 3 units

CE 222. Transportation Engineering Planning
Technical and economic evaluation of transportation improvements; capacity restraints; geometric design factors, location and relocation principles; optimization theory in transportation system design; user costs and benefits; transport equipment; operation and safety; economic impact, construction and maintenance practices; intergovernmental coordination, cooperation, responsibility and financial participation.
Prerequisite: CE 121 and CE 130. Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules GE GWAR 3 units

CE 224. Traffic Operations
Flow, density and speed characteristics. Capacity and level of service analysis of transportation facilities with emphasis on highways and streets. Analysis of strategies and tactics, including traffic control, related to optimal use of facilities.
Prerequisite: Instructor consent. Note: This course satisfies graduate-level GWAR in this master’s program. Normal Grade Rules 3 units

CE 225. Public Transportation Systems
Performance characteristics of public transportation systems. Planning, design and operational issues related to public transportation systems. Emerging technologies.
Prerequisite: CE 121 or instructor consent. Note: This course satisfies graduate-level GWAR in this master’s program. Normal Grade Rules 3 units

CE 226. Topics in Transportation Engineering
Presentation and discussion of special topics in transportation engineering. Topics may vary each semester. Course may be repeated with instructor consent.
Prerequisite: Graduate standing or instructor consent. Repeatable for credit Normal Grade Rules 3 units

CE 232. Construction Estimating and Cost Analysis
Estimating and bid preparation in the construction industry including cost analysis techniques for labor, materials, equipment and overhead costs on a construction project. Development of schedules and networks for construction.
Prerequisite: CE 130 and CE 131. Repeatable for credit Normal Grade Rules 3 units

CE 233. Construction Project Management
Provides information technology applications in construction, from traditional computer applications to emerging web-based and mobile technologies. Design, development, and implementation of decision support systems for construction management applications.
Prerequisite: CE 131 or instructor consent. Normal Grade Rules 3 units

CE 234. Construction Law
Construction contracts and specifications, bid documents, sources of law, agency relationships, contract formation, breach of contract, tort law, contract interpretation, changes, mechanics liens, claims and disputes.
Prerequisite: CE 131 (or equivalent). Normal Grade Rules 3 units

CE 236. Construction Operations Analysis
Overall aspects of productivity improvement for construction operations. Quantitative methods for measuring, analyzing and improving productivity at job sites. Concepts of computer simulation to study, plan and optimize construction operations.
Prerequisite: CE 132 or instructor consent. Normal Grade Rules 3 units

CE 237. Sustainable Construction
Green construction processes, sustainable construction materials, material recycling and reuse in construction, green construction policy, green building case study, economic analysis of green buildings, and LEED rating systems and certification.
Prerequisite: CE 130 and CE 131, or instructor consent. Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules GE GWAR 3 units

CE 238. Advanced Construction Project Management
Provides the principles and techniques of construction project management and develops the engineering project management skills necessary to successfully participate in the management of the project delivery process.
Prerequisite: CE 131 or instructor consent. Normal Grade Rules 3 units

CE 239. Information Technology in Construction
Provides information technology applications in construction, from traditional computer applications to emerging web-based and mobile technologies. Design, development, and implementation of decision support systems for construction management applications.
Prerequisite: CE 131 or instructor consent. Normal Grade Rules 3 units

CE 240. Advanced Soil Mechanics
Advanced study of classical and modern soil mechanics theories, including: consolidation, stress and deformation, shear strength. In-depth discussion of stress paths, flow nets and stress variants.
Prerequisite: CE 140 (or equivalent). Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules GE GWAR 3 units

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>CE 243</td>
<td>Advanced Foundation Design</td>
<td>Advanced analysis of foundation design for atypical soil conditions. Seismic design of foundations. Laterally loaded foundations. Structural design of shallow foundations. Prerequisite: CE 141 (or equivalent). Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 245</td>
<td>Geotechnical/Structural Seminar</td>
<td>Meetings for the presentation and discussion of special topics and case histories of significant engineering projects by the faculty, guest lecturers and graduate students. Topics will vary each semester. May be repeated for credit when content changes. Prerequisite: CE 140 (or equivalent).</td>
</tr>
<tr>
<td>CE 246</td>
<td>Geotechnical Earthquake Engineering</td>
<td>Wave propagation in soils, seismology, fundamentals of dynamic soil behavior, seismic hazard analysis, site effects, liquefaction, and seismic design. Prerequisite: CE 140 (or equivalent). Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 247</td>
<td>Earth Retention and Stability</td>
<td>Design of classic retaining walls using lateral earth pressure theory; Slope stability of earthen embankments, cut slopes and natural slopes; Design of modern earth-retention systems, including soil nails, mechanically-stabilized earth walls, soil anchors, etc. Prerequisite: CE 140 or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 248</td>
<td>Forensic Engineering and Failure Analysis</td>
<td>Analysis of civil engineering failures. Investigation into causes of failure, implications of failure and lessons learned from failure. Legal obligations and responsibilities of ethical engineers. Prerequisite: Graduate Standing Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 250</td>
<td>Modeling in Water Resources Engineering</td>
<td>Technical, economic, legal, political, environmental and social factors in decision-making in water project planning and water resources development and management. Prerequisite: Instructor consent. Note: This course satisfies graduate-level GWAR in this master’s program. Normal Grade Rules GE: GWAR 3 units</td>
</tr>
<tr>
<td>CE 251</td>
<td>Hydraulics of Open Channels</td>
<td>Conveyance characteristics, the varied flow equation, specific energy, channel transitions, waves, routing of floods and super-critical flow. Prerequisite: ME 111; Math 133A or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 252</td>
<td>Advanced Hydrology</td>
<td>Advanced topics in hydrograph analysis, flood routing, statistical methods and groundwater flow. Prerequisite: CE 150 and CE 152. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 254</td>
<td>Water Resources Systems Management</td>
<td>Various modeling techniques for optimal planning and operation of water resources systems, which involve many random variables. Prerequisite: CE 150 or instructor’s consent. Note: This course satisfies graduate-level GWAR in this master’s program. Normal Grade Rules GE: GWAR 3 units</td>
</tr>
<tr>
<td>CE 255</td>
<td>Sediment Transport</td>
<td>Introduction to sediment transport; concepts of bedload, suspended load, bed formation, stable channels and regime theory; environmental issues. Prerequisite: CE 150. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 256</td>
<td>Sustainable Water Resources Engineering</td>
<td>Water use, water-energy nexus, water excess management, environmental impact assessment, risk-based analysis, and water resources management. Prerequisite: CE 150 or instructor’s consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 257</td>
<td>GIS Applications in Water Resources Engineering</td>
<td>Geographic Information Systems (GIS) Applications in hydrology and water supply, spatial analysis, Digital Elevation Model (DEM), pre and post processing of hydrologic model Prerequisites: CE 150 or instructor consent Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 258</td>
<td>Advanced Steel Design</td>
<td>LRFD (Load Resistant Design) of steel structures, including buildings and bridges. Detailing of steel frames for seismic resistance. Structural details of connections. Prerequisite: CE 163 or instructor consent. Note: This course satisfies graduate-level GWAR in this master’s program. Normal Grade Rules GE: GWAR 3 units</td>
</tr>
<tr>
<td>CE 260</td>
<td>Matrix Analysis of Structures</td>
<td>Linear static and dynamic analysis of structures by matrix methods, including load combinations and multi-story buildings. Introduction to finite element analysis of structural systems. Discussion of computer-aided design of structures. Prerequisite: CE 161 (or equivalent). Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 261</td>
<td>Advanced Structural Concrete Design</td>
<td>Design of beams, columns, slabs, walls and connections according to provisions of the American Concrete Institute. Advanced topics in compression elements, shear, torsion and development. Elements of bridge and building systems. Prerequisite: CE 161 and CE 162 (or equivalent). Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 264</td>
<td>Prestressed Concrete Design</td>
<td>Basic concepts and history; pretensioned and post-tensioned systems; prestress losses; cracking and ultimate moments; design of simple spans, continuous spans and slabs; composite beams; tanks. Prerequisite: CE 161 and CE 162 (or equivalent). Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 265</td>
<td>Advanced Seismic Design</td>
<td>Design of frames, shear walls and other building systems to resist earthquake accelerations. Applications of dynamic analysis. Introduction to performance-based engineering. Corequisite: CE 232 or instructor consent. Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 267</td>
<td>Advanced Topics in Structural Design</td>
<td>Concepts in reinforced masonry, seismic isolation, structural retrofitting, computer-aided design and modern construction materials. Topics to be specified at beginning of semester. May be repeated for credit when content changes. Repeatable for credit Normal Grade Rules 3 units</td>
</tr>
<tr>
<td>CE 270</td>
<td>Environmental Engineering Process Kinetics</td>
<td>Process kinetics in drinking water and wastewater treatment. Prerequisite: CE 170 Normal Grade Rules 3 units</td>
</tr>
</tbody>
</table>
CE 271. Physical/Chemical Processes in Environmental Pollution Control
Theory, analysis and engineering design of physical and chemical systems in environmental pollution control. Topics include mechanisms involved in physical/chemical destruction of pollutants, clarification, softening, coagulation and others.
Prerequisite: CE 170 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CE 272. Biological Processes in Environmental Pollution Control
Theory, analysis and engineering design of biological systems in environmental pollution control. Topics include mechanism of biological destruction of pollutants, aerobic and anaerobic processes, nutrient removals and others.
Prerequisite: CE 170 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CE 273. Water Treatment and Plant Design
Studies in the theory, design and operation of water treatment facilities. Water quality standards and water quality control.
Prerequisite: CE 170 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CE 274. Wastewater Treatment and Plant Design
Studies in the theory, design and operation of traditional primary and secondary sewage treatment facilities. Review of water pollution control laws and regulations.
Prerequisite: CE 170 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CE 275. Industrial and Hazardous Waste Management and Treatment
Study of industrial and hazardous wastes. Sources, characteristics, management, treatment and disposal. Effects on the environment.
Prerequisite: CE 170 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CE 276. Management and Reuse of Process Solids
Solids production at water and wastewater treatment plants, types, characteristics, processing, management and reuse including biofuel production from wastewater biosolids, and disposal of residual matter.
Prerequisite: CE 271 and CE 272.
Repeatable for credit
Normal Grade Rules
3 units

CE 277. Environmental Sustainability
Studies of various engineering design and practices for sustainable environment.
Prerequisite: CE 170 or Instructor Consent
Normal Grade Rules
3 units

CE 279. Special Topics in Environmental Engineering
Current problems in environmental engineering. Course is repeatable for credit with instructor consent.
Prerequisite: Instructor consent
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
3 units

CE 277. Environmental Sustainability
Studies of various engineering design and practices for sustainable environment.
Prerequisite: CE 170 or Instructor Consent
Normal Grade Rules
3 units

CE 279. Special Topics in Environmental Engineering
Current problems in environmental engineering. Course is repeatable for credit with instructor consent.
Prerequisite: Instructor consent
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
3 units

CE 297. Special Topics in Civil Engineering
Special topics to augment regularly-scheduled graduate courses.
Normal Grade Rules
1-4 units

CE 298. Special Problems
Advanced individual research and projects.
Prerequisites: Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

CE 299. Master’s Thesis or Project
Prerequisite: Admission to candidacy for the MS degree.
Not available to Open University Students
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
APPLIED SCIENCE AND ARTS

UPPER DIVISION

APSC 198ITL. International Experience Seminar
Seminar for students participating in an approved international experience activity. Students will analyze and reflect upon their international experience in relation to discipline-specific knowledge acquired through academic study, their intended career, and their identity as a global citizen.

Credit / No Credit

1-6 units
College of Humanities and Arts Courses

HUMANITIES AND ARTS

UPPER DIVISION

HA 157SL. Community Action/Community Service
See COMM 157SL
Normal Grade Rules
GE: S
3 units

HA 187. Creative Team Practicum
Collaborative hands-on practical application of concepts and skills for written and visual communications solutions in a fast-paced client-driven environment supported by an interdisciplinary team of instructors of technical writing, graphic design, videography and photography. Enrollment requirements are based on section topic. Prerequisites: Departmental consent required.
Repeatable for credit
Normal Grade Rules
3 units
### College of Science Courses

#### SCIENCE

##### LOWER DIVISION

**SCI 001. Academic Excellence Workshop**
Cooperative learning activity to accompany selected College of Science courses and sections.
Corequisite: Enrollment in course and section accompanying workshop.

- **Notes:** No credit toward requirements of the major or requirements of the minor for any science major or minor. May be used for university electives.
- **Misc/Lab:** Activity 4 hours.
- Repeatable for credit
- **Credit / No Credit**

**SCI 002. Success in Science**
Emphasis on development of study skills, time management, and personal growth needed to transition from high school to university. Orientation to SJSU policies and procedures; and degree and career options in science. Guest lecturers, peer advisors, and community building, GE Area: E
- **GE: E**
- **Normal Grade Rules**
- **GE: EE**
- **3 units**

**SCI 075. Fundamentals of Leadership and Career Accelerator**
This course is a foundational course designed to begin preparing students in their sophomore year or first year of transfer to SJSU to practice the leadership habits of mind and workplace skills needed to thrive in 21st century workplaces once they graduate from school. Given the increasingly competitive, and globalized job marketplace. It is aimed at students in their junior year or first year of transfer, though all upper division students of all majors can participate. Through online, peer learning, interactive experiences, and reflection, students will build meaningful networks, discover their innate leadership, and cultivate the “hard” and “soft” skills and habits of mind needed to thrive in twenty-first century workplaces and make positive impact through their careers upon graduation. The course’s primary text will serve as the foundation to the course, but will include additional articles and videos each week that are curated from a wide range of fields and that includes perspectives of both researchers and practitioners. Sci 75 and Sci 125 can not both be taken for credit.
- **Prerequisite:** Upper division standing
- **Misc/Lab:** 2 hours lecture/ 2 hours lab
- **Normal Grade Rules**
- **3 units**

**SCI 090. Success as Transfer Students**
Emphasis on development of study skills, time management, and personal growth needed to transition from community college to university. Orientation to SJSU policies and procedures; and degree and career options. Guest lecturers, peer advisors, and community building.
- **Misc/Lab:** Lecture 1 hour/activity 2 hours/recitation 1 hour.
- **Normal Grade Rules**
- **2-3 units**

##### UPPER DIVISION

**SCI 101. Leadership and Career Accelerator**
This is course is designed to prepare students for the increasingly competitive, globalized job marketplace. It is aimed at students in their junior year or first year of transfer, though all upper division students of all majors can participate. Through online, peer learning, interactive experiences, and reflection, students will build meaningful networks, discover their innate leadership, and cultivate the “hard” and “soft” skills and habits of mind needed to thrive in twenty-first century workplaces and make positive impact through their careers upon graduation. The course’s primary text will serve as the foundation to the course, but will include additional articles and videos each week that are curated from a wide range of fields and that includes perspectives of both researchers and practitioners. Sci 75 and Sci 125 can not both be taken for credit.
- **Prerequisite:** Upper division standing
- **Misc/Lab:** 2 hours lecture/ 2 hours lab
- **Normal Grade Rules**
- **3 units**

**SCI 105. Integrated Science Teacher Enhancement**
A thematic approach to the study of relevant topics and concepts in integrated science. Development of inquiry-based, hands-on classroom activities in integrated science.
- **Prerequisite:** Teacher credential and/or instructor consent.
- **Repeatable for credit**
- **Credit / No Credit**
- **1-3 units**

**SCI 110. Global Themes of Science**
The themes of energy, evolution, and systems & interactions are used to examine conceptual connections between biological, earth and physical sciences. Emphasis on strategies best suited to teach these unifying global themes of science. Prerequisite: BIOL 21; GEOL 103 or Instructor consent.
- **Normal Grade Rules**
- **3 units**

**SCI 157SL. Community Action/Community Service**
See COMM 157SL
- **Normal Grade Rules**
- **GE: S**
- **3 units**

**SCI 180. Individual Studies**
Work, under guidance, in special fields.
- **Prerequisite:** Instructor consent.
- **Repeatable for credit**
- **Credit / No Credit**
- **1-4 units**

**SCI 184. Directed Reading**
Assigned readings of selected books, journals and special papers chosen to fill gaps in training or to introduce new fields. Evaluation through weekly reports and conferences.
- **Prerequisite:** Instructor consent.
- **Repeatable for credit**
- **Credit / No Credit**
- **1-4 units**

##### GRADUATE

**SCI 299. Master’s Thesis**
Thesis development for Plan A MA Natural Science students, to be carried out under direct supervision of a faculty member and committee. Seminar presentation required upon final completion of thesis.
- **Prerequisite:** Admission to candidacy for the master’s degree and selection of a thesis committee.
- **Repeatable for credit**
- **Mandatory CR/NC/RP**
- **1-6 units**

##### UPPER DIVISION

**SCI 1003. Workshop Facilitator Training**
Practical collaborative education theory and techniques for academic excellence workshop facilitators.
- **Prerequisite:** Current appointment as AEW Facilitator.
- **Notes:** No Degree Credit.
- **Repeatable for credit**
- **No Degree Credit**
- **1 unit**
College of Social Sciences Courses

COLLEGE SOCIAL SCIENCES

LOWER DIVISION

SSCI 090. Successfully Negotiating Social Science
Course designed to help students in the College of Social Sciences, enabling them to learn the skills and knowledge necessary to become successful students. Students will explore the ways in which different social scientists see, research, analyze, understand and communicate.

Normal Grade Rules
1 unit
Communication Studies
Department Courses

COMMUNICATION STUDIES

LOWER DIVISION

COMM 010. Communication and Human Relationships
Course examines role of communication in developing/maintaining human relationships. Discussion focuses on relational communication processes as they occur in various settings, such as the intercultural, the family, the intimate, the organizational, the public and between/within genders. GE Area: D1
Normal Grade Rules
GE D1
3 units

COMM 020. Public Speaking
Principles of rhetoric applied to oral communication; selecting, analyzing, adapting, organizing and delivering ideas effectively. GE Area: A1
Normal Grade Rules
GE A1
3 units

COMM 020N. Public Speaking for Nonnative Speakers
Public speaking for the nonnative speaker. Course content identical to COMM 20 with intercultural emphasis. GE Area: A1
Prerequisite: English Language Learners/nonnative speakers
Normal Grade Rules
GE A1
3 units

COMM 021. Performing Culture and Society
Live performance used as a method for exploring human behavior as it occurs within contemporary cultures and societies. Performance assignments will draw from among the following: performance of texts, street performance, personal narrative, oral history, everyday life, and social justice. GE Area: D1
Normal Grade Rules
GE D1
3 units

COMM 040. Argumentation and Advocacy
Principles of inquiry and advocacy in public discussion and necessary basic skills for intelligent participation in discussion and debate. GE Area: A1
Normal Grade Rules
GE A1
3 units

COMM 041. Critical Decision Making
Critical reasoning and problem solving in group discussion. Examination of the relationship between critical decision-making and group communication. Practice in group problem solving as a means for developing critical thinking skills. GE Area: A3
Prerequisite: Completion of GE Areas A1 and A2 each with grades of C- or better
Normal Grade Rules
GE A3
3 units

COMM 045. Media and Culture
Application of critical thinking, writing, and oral communication skills in the analysis of media representations of culture. Practice in reasoning, advocating ideas, researching and evaluating arguments, developing well supported factual conclusions, and engaging in meaningful dialogue on diverse issues. GE Area: A3
Prerequisite: GE Areas A1 (Oral Communication) and A2 (Written Communication I, English 1A) with grades of “C” or better (C- not accepted)
Normal Grade Rules
GE A3
3 units

COMM 076. Fundamentals of Intercultural Communication
Emphasis on direct experience and the development of skill in intercultural communication. Provides opportunity for discussion of variations within and among cultures. Encourages students to examine their own cultural heritage. GE Area: E
Note: All courses with a “Q” suffix are designated as First Year Experience courses.
Normal Grade Rules
GE EE
3 units

COMM 074Q. Fundamentals of Intercultural Communication
Emphasis on direct experience and the development of skill in intercultural communication. Provides opportunity for discussion of variations within and among cultures. Encourages students to examine their own cultural heritage. GE Area: E
Note: All courses with a “Q” suffix are designated as First Year Experience courses.
Normal Grade Rules
GE EE
3 units

COMM 101C. Junior Seminar: Theorizing Communication
Overview of the contemporary field of communication studies based on survey of theoretical and practical responses to communication problems arising from changing social contexts. Discussion of communication literature, resources and methods of inquiry. Students will begin their major portfolios.
Prerequisite: Completion of GE oral communication.
Normal Grade Rules
GE EE
3 units

COMM 101W. Writing Workshop: Writing for Influence
Current conventions and forms of exposition, argument and persuasion. Writing for the general and specialized audience from the thesis statement approach. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE ZZ
3 units

COMM 109B. Activity Projects in Forensics: Intramural Platform Speaking
Supervised activity in the forensics program. B: Intramural Individual events-Platform Speaking including persuasive speaking and communication analysis. A total of 3 units applicable to the major may be repeated.
Repeatable for credit
Normal Grade Rules
1 unit

COMM 109A. Activity Project in Forensics: Intramural Debate
Supervised activity in the forensics program. A: Intramural competition in debate. A total of 3 units applicable to the major may be repeated.
Repeatable for credit
Credit / No Credit
1 unit

COMM 109J. Judge Training
Community service course designed to train students to judge high school speech and debate tournaments. Students are taught the rules and given criteria for judging each event in oral interpretation of prose poetry, and drama; platform speaking, debate; and Student Congress. Students are required to write cogent ballots that help competitors.
Credit / No Credit
1 unit

UPPER DIVISION

COMM 100W. Writing Workshop: Writing for Influence
Current conventions and forms of exposition, argument and persuasion. Writing for the general and specialized audience from the thesis statement approach. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE ZZ
3 units

COMM 101C. Junior Seminar: Theorizing Communication
Overview of the contemporary field of communication studies based on survey of theoretical and practical responses to communication problems arising from changing social contexts. Discussion of communication literature, resources and methods of inquiry. Students will begin their major portfolios.
Prerequisite: Completion of GE oral communication.
Normal Grade Rules
GE EE
4 units
COMM 105P. Communication, Self and Society
Examines the role of communication in the development of the self and the creation of social worlds. Students develop an appreciation for and practical skills in negotiating self-society tensions inherent in a diverse, global, and mediated environment.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 110F. Interpersonal Communication
Integration of theory and practice to facilitate student understanding and skills in evaluating and participating in interpersonal relationships across contexts and the lifespan.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 111P. Interviewing
Setting and achieving communicative goals essential in preparing for and conducting interviews. Special attention on developing effective questions and responses. Participation in a variety of interviews, including employment, appraisal, journalistic, research, survey, health care, and persuasive.
Prerequisite: Completion of the GE oral communication.
Normal Grade Rules
4 units

COMM 113P. Games in Everyday Life
Games serve key communicative functions in promoting fun, play, collaboration, competition, and learning. Explores games and the use of game elements across communication contexts, including interpersonal, small group, organizational/business, health, and education.
Prerequisite: Completion of GE Area A1
Normal Grade Rules
4 units

COMM 114P. Business and Professional Speaking
Application of current theory and research to develop communications skills within larger global and ethical issues across a range of professional and workplace contexts, including interviews, oral reports, persuasive presentations, group meetings, and mediated public speaking.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 115P. Communication and Conflict
Focus on theories of communication as related to interpersonal and group conflict. Development of communication skills in conflict management, and applied activity in interpersonal conflict management.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 116P. Mediation: Theory and Practice
Theoretical background and communication skills training in Mediation Practice. Basic 40 hours of training includes readings, analysis and role plays as well as some observation.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 117F. Understanding Play & Games
Examines play and games as fundamental social experiences central to developing cultural norms and structures. Explores topics such as gameplay, identity, narrative, and serious games. Special attention to communication theories that provide insight into the nature of play and games.
Prerequisite: Upper Division Standing
Normal Grade Rules
4 units

COMM 119I. Researching Games
Introduction to research methods commonly used to study games and human communication, such as observation, textual analysis, interviewing, and surveys. Students develop and apply analytical skills and ethical practices for understanding, conducting, and evaluating research in games and communication.
Prerequisite: Upper Division Standing
Normal Grade Rules
4 units

COMM 120P. Persuasive & Presentation Skills
Applies theories, concepts, and research associated with persuasive communication to develop effective presentation skills. Considers broader issues of persuasion and influence at societal and global levels, examining how those issues provide a context for everyday persuasion.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 121P. Performance as Practice
Exploration of performance as a site of communication and embodied practice. Will examine the many ways in which performance exists and operates in our culture with a focus on literature, ethnographic fieldwork, personal narrative, and everyday rituals.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 122F. Performance Studies
Examines the constitutive effects of performance, broadly understood, across a variety of communication contexts. Special attention paid to how performances construct experiences of culture, everyday life, ritual, political protest, social belonging, and identity.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 123I. Performance of Ethnodrama
Explores how live performance can be used to create, interpret, and present arts-based scholarship. Students will read ethnodramatic texts and engage in original research, script writing, rehearsal, and performance. Emphasis is on cross-cultural performances.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 124P. Communication Training and Development
Principles of designing and delivering ethical and socially responsible communication training programs including needs assessment, setting objectives, program design, selection and development of training materials, presentation skills, facilitation skills, and training evaluation.
Prerequisite: Completion of A1 Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 125P. Ensemble Performance
Students collaborate to conceive, write, rehearse, and produce an ensemble project culminating in a public performance. Readings and written work focus on performance as a community-building process as well as dramaturgical research for the production.
Prerequisite: Completion of A1 of Core GE requirement
Normal Grade Rules
4 units

COMM 126F. Race and Performance
Examination of the various ways in which racial identities are performed across a variety of communication contexts, including daily life, popular entertainment, ritualized behavior, cultural practice, and the public sphere.
Prerequisite: Completion of GE Area A1.
Normal Grade Rules
4 units
COMM 130F. Activism, Action, and Resistance
Examines national and global historical and contemporary social movements in the context of communication practices ranging from street protests to use of media and the internet. Resistance is explored using variety of theoretical and cultural perspectives.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 131P. New Media/You Media
Practical application of current communication theories and research to facilitate skill development in the use and critique of new media tools, such as social networking sites, blogs, microblogs, wikis, personal webpages, video sharing sites, and similar digital communication venues.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 132F. Dis/Ability Communication
Theoretical foundations in dis/ability communication facilitate student understanding of the social construct of disabilities and provide means to deconstruct communications surrounding difference.
Prerequisite: Upper Division Standing.
Normal Grade Rules
4 units

COMM 133F. Ethical Problems in Communication
Examines current and historical theoretical approaches to ethical problems across communication contexts, including workplace, interpersonal, and mediated settings.
Explores the role of cultural and societal practices in ethical communication.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 134P. Argumentation and Debate
Principles of argumentation including analysis of propositions, issues, evidence and reasoning. Training and experience in debate forms.
Prerequisite: Completion of A1 of Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 131P. New Media/You Media
Practical application of current communication theories and research to facilitate skill development in the use and critique of new media tools, such as social networking sites, blogs, microblogs, wikis, personal webpages, video sharing sites, and similar digital communication venues.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 132F. Dis/Ability Communication
Theoretical foundations in dis/ability communication facilitate student understanding of the social construct of disabilities and provide means to deconstruct communications surrounding difference.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 133F. Ethical Problems in Communication
Examines current and historical theoretical approaches to ethical problems across communication contexts, including workplace, interpersonal, and mediated settings.
Explores the role of cultural and societal practices in ethical communication.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 134P. Argumentation and Debate
Principles of argumentation including analysis of propositions, issues, evidence and reasoning. Training and experience in debate forms.
Prerequisite: Completion of A1 of Core GE requirement or instructor consent.
Normal Grade Rules
4 units

COMM 141F. Activism, Action, and Resistance
Examines national and global historical and contemporary social movements in the context of communication practices ranging from street protests to use of media and the internet. Resistance is explored using variety of theoretical and cultural perspectives.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 141P. Small Group Communication
An applied approach to small groups and teamwork that links theory and practice across a variety of contexts. Emphasis on the relationships between group communication and larger cultural issues, such as diversity and democracy.
Prerequisite: Completion of CE oral communication.
Normal Grade Rules
4 units

COMM 144F. Organizational Communication
Application of organizational communication theories and concepts to communication processes and functions in organizational life. Examines topics such as ethics, leadership, teams, culture, networks, power, diversity, identity, and assessment of communication practices.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 145I. Quantitative Communication Inquiry
Introduction to ethnography from a communication studies perspective, i.e. ethnographic approaches to studying situated communication practices in particular cultural milieus, such as ethnography of communication, critical ethnography, digital ethnography, autoethnography, and/or other types relevant to communication studies.
Normal Grade Rules
4 units

COMM 145I. Quantitative Communication Inquiry
Introduction to ethnography from a communication studies perspective, i.e. ethnographic approaches to studying situated communication practices in particular cultural milieus, such as ethnography of communication, critical ethnography, digital ethnography, autoethnography, and/or other types relevant to communication studies.
Normal Grade Rules
4 units

COMM 146F. Communication and the Environment
Examination of communication in environmental issues, especially conflicting values and modes of discourse that assume different meanings of human-nature relationship.
Emphasis on environmentalism as popular movement, rhetoric of radical ecology and the technical discourse of environmental policy administration.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 146F. Communication and the Environment
Examination of communication in environmental issues, especially conflicting values and modes of discourse that assume different meanings of human-nature relationship.
Emphasis on environmentalism as popular movement, rhetoric of radical ecology and the technical discourse of environmental policy administration.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 147P. Argumentation and Persuasion in Courts of Law
Principles of legal argumentation, cross-examination, jury selection and strategy. Selected trial transcripts studied to explore differing uses of the trial forum.
Prerequisite: Completion of CE oral communication.
Normal Grade Rules
4 units

COMM 148P. Environmental Advocacy
Applies theories and research of message framing, social marketing and community engagement to environmental communication. Considers broader issues of persuasion and influence surrounding sustainability to develop environmental advocacy campaigns.
Prerequisite: Upper Division Standing.
Normal Grade Rules
4 units

COMM 149F. Rhetoric and Public Life
Knowledge of rhetorical theory and practice as they relate to public life, democratic governance and social conflict and consensus from the classical era to contemporary times.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 150I. Inquiry in Organizational Communication
Introduction to research methods commonly used in studies of organizational communication, such as focus group, interviewing, survey, ethnography, appreciative Inquiry, and textual analysis.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 151I. New Media/New Methods
Examines the internet and related digital communication systems as both a site of and a tool for communication research. Special attention to legal and ethical concerns associated with communication research in digital environments.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 151I. New Media/New Methods
Examines the internet and related digital communication systems as both a site of and a tool for communication research. Special attention to legal and ethical concerns associated with communication research in digital environments.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 152I. Communication in World Cultures
Origins of human communication studies in early societies, including those of China, Egypt, Greece, India, Mesopotamia and Rome. Special attention to the cultural origins of classic texts and significant patterns of communication which continue to inform our contemporary experiences.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 152I. Communication in World Cultures
Origins of human communication studies in early societies, including those of China, Egypt, Greece, India, Mesopotamia and Rome. Special attention to the cultural origins of classic texts and significant patterns of communication which continue to inform our contemporary experiences.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 153I. Discourse Analysis
Introduction to discourse analytic approach to studying situated communication practices, including research design, data collection, data analysis, and ethical issues pertaining to conducting discourse analyses.
Normal Grade Rules
4 units

COMM 154I. Ethnography for Communication Studies
Introduction to ethnography from a communication studies perspective, i.e. ethnographic approaches to studying situated communication practices in particular cultural milieus, such as ethnography of communication, critical ethnography, digital ethnography, autoethnography, and/or other types relevant to communication studies.
Normal Grade Rules
4 units

COMM 154I. Ethnography for Communication Studies
Introduction to ethnography from a communication studies perspective, i.e. ethnographic approaches to studying situated communication practices in particular cultural milieus, such as ethnography of communication, critical ethnography, digital ethnography, autoethnography, and/or other types relevant to communication studies.
Normal Grade Rules
4 units

COMM 151I. Quantitative Communication Inquiry
Quantitative social scientific approaches to communication facilitate students understanding of the philosophical foundations of quantitative methods and skills in hypothesis testing, research design, data collection, analysis, and interpretation. Methods to be covered include experimental design, survey research and content analysis.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 151I. Quantitative Communication Inquiry
Quantitative social scientific approaches to communication facilitate students understanding of the philosophical foundations of quantitative methods and skills in hypothesis testing, research design, data collection, analysis, and interpretation. Methods to be covered include experimental design, survey research and content analysis.
Prerequisite: Upper division standing.
Normal Grade Rules
4 units
COMM 156I. Observation and Interviewing Methods
Observation and interviewing methods, or qualitative approaches to communication, facilitate student understanding of the philosophical foundations of developing research questions, research design, data collection, analysis, and interpretation. Methods covered include ethnography and participant observation, interviewing, focus groups, and action research. Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 157SL. Community Action/Community Service
A campus-wide service learning program with opportunities for direct involvement with local community services, both off campus and on campus. Weekly seminars held on campus or at the field site, plus four to six hours of community service work per week at the field site. Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended. Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

COMM 160F. Language, Meaning and Culture
Course addresses the question of how language, symbols and society work together. Students will learn about the nature of language and how language and symbols shape individual and collective actions. Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
GE: S
4 units

COMM 161F. Communication and Culture
Human communication explored as a mechanism of control and as a vehicle of cultural change. Applies theoretical principles of communication to social issues and communication settings in different cultures. Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 164F. Communication and Global Organizations
Examines the relationships among culture, communication, technology, and ways of organizing in various types of global organizations (e.g., governmental organizations, nongovernmental organizations, not-for-profits, corporations). Explores the unique communicative processes and ethical issues that arise in international organizing. Pre/Corequisite: upper division standing.
Normal Grade Rules
4 units

COMM 165P. Communication and Organizational Philanthropy
A broad look at the history of Philanthropy, fundraising, legal and compliance issues, messaging and marketing, recruitment and managing of volunteers, technology, evaluating non-profits and philanthropy as a career choice. Prerequisite: Completion of Area A1 of core GE or instructor consent.
Normal Grade Rules
4 units

COMM 168A. Global Climate Change I
Scientific and social scientific approaches to the process and effects of global climate change: Climate changes in the Earth’s past, interactions between climate and life, anthropogenic climate change, socioeconomic contexts of environmental effects, cultural influences on climate change mitigation strategies. Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Normal Grade Rules
GE: RSV
6 units

COMM 168B. Global Climate Change II
Scientific and social scientific approaches to the process and effects of global climate change: Climate changes in the Earth’s past, interactions between climate and life, anthropogenic climate change, socioeconomic contexts of environmental effects, cultural influences on climate change mitigation strategies. GE Area: RSV with completion of course (COMM 168A). Prerequisites: COMM/ENVS/GEOL/HUM/METR 168A, with a grade of “C” or better (“C-“ not accepted), Passage of the Writing Skills Test (WST) or ENGL/LLD 100A with a “C” or better (“C-“ not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Normal Grade Rules
GE: RSV
3 units

COMM 169I. The Media: Response and Criticism
Examination of media as a locus of meaning making. Critical analysis of communication practices and content in a variety of venues, such as television, film, radio, social networking, and other sites of web-based communication. Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units

COMM 170F. Persuasion
Explores theories, concepts, and research associated with persuasive communication. Considers broader issues of persuasion and ethics at societal and global levels, examining how those issues provide a context for the kinds and contexts of persuasion encountered in everyday life. Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 172F. Multicultural Communication in the United States
Analysis of the communication process between and among people in a culturally diverse domestic population (United States). Topics cover speech communication principles, conflict management, language, script analysis, attitudes and values. Includes both theory and activity-based exercises. Prerequisite: Upper division standing.
Normal Grade Rules
4 units

COMM 173F. Intercultural Communication and Global Understanding
Analysis of communication among persons from different U.S. and world cultures. Experiences and research in intercultural communication. The influence of varying values, norms, belief structures and roles. Prejudice, ethnocentrism, nationalism and racism in communication. Prerequisite: Upper division standing.
Normal Grade Rules
4 units
## Course Descriptions

### Academic Year 2019-2020

**Note:** All SJSU Studies courses require completion of the Writing Skills Test (WST) and upper division standing. Note: All SJSU Studies courses require completion of the WST and upper division standing.

### COMM 174. Intercultural Comm & Struct Inequality
Analysis of intercultural communication in the U.S. as it relates to social inequalities, power differences, and diversity. Examines identities and interactions between people of different racial/ethnic backgrounds. Investigates influence of sociocultural forces on intercultural communication encounters and relationships. GE Area: S

**Prerequisite:** Passage of the Writing Skills Test (WST) or ENGL/ULDL 100A with a C or better (C- not accepted). Completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.

**Note:** All SJSU Studies courses require completion of the WST and upper division standing.

**Normal Grade Rules**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 174</td>
<td>3</td>
</tr>
</tbody>
</table>

### COMM 175F. Nonverbal Communication
A look at differences between and the interdependency of verbal and nonverbal messages. Students will study the role of nonverbal communication in everyday life.

**Prerequisite:** Upper division standing or instructor consent.

**Normal Grade Rules**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 175F</td>
<td>4</td>
</tr>
</tbody>
</table>

### COMM 176P. Communication and Gender
An analysis of issues and problems related to communication and gender. The course will consider theoretical and practical perspectives on male-female and same-sex interactions in a variety of situations and cultures.

**Prerequisite:** Completion of A1 of Core GE requirement or instructor consent.

**Normal Grade Rules**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 176P</td>
<td>4</td>
</tr>
</tbody>
</table>

### COMM 178P. Communication and the Classroom
Analysis of the classroom as a communication system. Application of communication principles to the facilitation of educational dialogue.

**Prerequisite:** Completion of GE oral communication.

**Normal Grade Rules**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 178P</td>
<td>4</td>
</tr>
</tbody>
</table>

### COMM 178F. Critical Intercultural Communication Studies
An overview of the critical paradigmatic perspective in intercultural communication. Such a perspective proffers an exploration of power dimensions and macro structures that frame and shape micro-intercultural communication encounters, episodes, and contexts.

**Prerequisite:** Completion of Core GE requirement or instructor consent.

**Normal Grade Rules**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 178F</td>
<td>4</td>
</tr>
</tbody>
</table>

### COMM 179. Global Media and Resistance
Study of communication issues facing global resistance movements, particularly the role of new technology and social media in public dissent. Covers the application of social movements and resistance theories and concepts.

**GE Area:** V

**Prerequisites:** Completion of core GE, satisfaction of Writing Skills Test and upper division standing.

**Note:** All SJSU Studies courses require completion of the WST and upper division standing.

**Normal Grade Rules**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 179</td>
<td>4</td>
</tr>
</tbody>
</table>

### COMM 180. Individual Studies
Supervised study in specific fields of speech not covered by offered courses.

**Prerequisite:** Department chair consent.

**Repeatable for credit**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 180</td>
<td>1-3</td>
</tr>
</tbody>
</table>

### COMM 181F. New Media/New World
Explores the impact of the internet, mobile devices, and other information and communication technologies on social interaction, self-representation, business, politics, and cultural production. Covers the application of mediated communication theories and concepts.

**Prerequisite:** Upper division standing.

**Normal Grade Rules**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 181F</td>
<td>4</td>
</tr>
</tbody>
</table>

### COMM 182P. Communication in the Classroom
Application of communication principles to the facilitation of educational dialogue.

**Prerequisite:** Completion of GE oral communication.

**Normal Grade Rules**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 182P</td>
<td>4</td>
</tr>
</tbody>
</table>

### COMM 184. Directed Reading
Supervised activity in communication studies. Application of principles and theories of communication in business, community and professional settings.

**Prerequisite:** Upper division or graduate standing and department chair approval. A total of 3 units may be repeated.

**Repeatable for credit**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 184</td>
<td>1-2</td>
</tr>
</tbody>
</table>

### COMM 189. Activity Projects in Speech
Supervised activity in communication studies. Application of principles and theories of communication in business, community and professional settings.

**Prerequisite:** Upper division or graduate standing and department chair approval.

**Repeatable for credit**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 189</td>
<td>1-6</td>
</tr>
</tbody>
</table>

### COMM 190. Activity Projects in Speech International
Supervised activity in communication studies for international students. Application of principles and theory of communication in business, community, and professional settings with specific attention to needs of visiting international students.

**Prerequisite:** Upper division or graduate standing, or department chair approval.

**Repeatable for credit**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 190</td>
<td>1-6</td>
</tr>
</tbody>
</table>

### COMM 191A. Activity Projects in Forensics

**Prerequisite:** Department chair consent.

**Repeatable for credit**

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 191A</td>
<td>1-3</td>
</tr>
</tbody>

<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 191C</td>
<td>1-3</td>
</tr>
</tbody>
</table>
COMM 191J. Activity Projects in Forensics
Supervised activity in the forensics program. A: Competition in debate. B: Individual events-Platform Speaking including persuasive speaking and communication analysis. C: Individual events oral interpretation (field trips required). J: Preparation for and judging competitive speaking activities (debates, individual events in college and high school forensics tournaments, community-sponsored speech contests). M: Research and oral presentation of appellate court arguments from simulated cases before law judges or in intercollegiate tournaments. A total of 6 units applicable to the major may be repeated.
Repeatable for credit
Credit/No Credit
1 unit

COMM 191M. Activity Projects in Forensics
Supervised activity in the forensics program. A: Competition in debate. B: Individual events-Platform Speaking including persuasive speaking and communication analysis. C: Individual events oral interpretation (field trips required). J: Preparation for and judging competitive speaking activities (debates, individual events in college and high school forensics tournaments, community-sponsored speech contests). M: Research and oral presentation of appellate court arguments from simulated cases before law judges or in intercollegiate tournaments. A total of 6 units applicable to the major may be repeated.
Repeatable for credit
Credit/No Credit
1 unit

COMM 193. Activity Projects in Intercultural/International Communication
Supervised activity in communication studies for students participating in immersive experiences in different cultural environments. Students demonstrate proficiency in evaluating and applying core communication concepts relevant to the experience of living, studying, and/or working in a different cultural environment.
Repeatable for credit
Normal Grade Rules
1-3 units

COMM 194. Specialized Projects for International Immersion
Supervised activity in communication studies for students participating in immersive direct enrollment programs abroad. Students demonstrate proficiency in evaluating and applying core communication concepts relevant to the experience of living, studying, and/or working in a different cultural environment.
Repeatable for credit
Credit/No Credit
1 unit

COMM 195. Special Topics in Communication Studies
Investigation of topics not included in regular departmental offerings. Topics range from corporate training to communication in health settings to teaching speech in the high school. Focus varies each semester and is announced in the schedule of classes. Course is repeatable with department chair consent no more than 3 times.
Repeatable for credit
Normal Grade Rules
1-3 units

COMM 198. Applied Activity in Communication
Practical application of communication theory to real world settings to provide meaningful applied capstone experiences. Students demonstrate proficiency in the critical application of core communication requirements to speech acts and contexts outside the traditional classroom.
Repeatable for credit
Credit/No Credit
1-2 units

COMM 199C. Senior Seminar: Synthesis & Application
Capstone overview of the contemporary field of communication studies that builds on theory, concepts, and skills learned in COMM 101C and upper-division major courses. Synthesis and application of communication literature, resources and methods of inquiry. Students complete their major portfolios.
Prerequisite: COMM 101 or COMM 101C, upper division standing.
Repeatable for credit
Credit/No Credit
1 unit

COMM 200R. Graduate Study in Communication
History of and current research in the communication field; introduction to humanistic and social science methods and computer applications; theory-building and metatheoretical issues; reviewing and critiquing studies; preparing research questions/hypotheses and prospectus.
Prerequisite: Admission into the Graduate Program, Graduate standing.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE: GWAR
4 units

COMM 201. Communication Methodologies
Introduction to the methodologies and methodological considerations pertinent to the field of communication studies, including social scientific, humanist and critical approaches to quantitative, qualitative and rhetorical methods.
Prerequisites: Graduate standing or instructor consent
Corequisites: COMM 200R
Normal Grade Rules
3 units

COMM 210R. Seminar in Interpersonal Communication
Examination of the role of communication in creating and maintaining social relationships. Draws on interpretive, critical, and/or quantitative theories and methods for investigating relationships in different cultural contexts and across the life span.
Prerequisite: Graduate standing
Normal Grade Rules
4 units

COMM 231R. Performing Presentational Aesthetics
Explores the practice and theory of presentational aesthetics through performance. Students will acquire the skills of writing, adapting, directing, and presenting performances of literary texts, ethnographic interviews, and social activism. Required of graduate students who wish to do thesis performances.
Prerequisite: Graduate standing, or instructor consent
Normal Grade Rules
4 units

COMM 232R. Seminar in Performance and Culture
Explores cultural identity as constructed, contested, and displayed through acts of performance such as theatre, dance, storytelling, performance art, film, literature, and everyday behavior. Focuses on performance as a site of cultural manifestation and transformation.
Repeatable for credit
Normal Grade Rules
4 units

COMM 240R. Seminar in Argument and Debate
Advanced study of patterns, techniques, and theory of argumentation and advocacy as reflected in debates on significant issues in a variety of contemporary and historical settings.
Prerequisite: Graduate standing
Normal Grade Rules
4 units
COMM 241R. Seminar in Small Group Communication
Exploration of group process and structure. Special attention given to democratic process, effective group decision-making, team-building concerns, group leadership, the distinctive place of communication research in small group studies.
Prerequisite: Graduate standing.
Normal Grade Rules
4 units

COMM 244R. Seminar in Organizational Communication
Examination of internal communication processes in large organizations. Emphasis on information flow, communication networks, communication relations and the design and management of communication systems. Experience in gathering and analyzing data to monitor and assess a communication system.
Prerequisite: Graduate standing.
Notes: MBA recommended elective.
Normal Grade Rules
4 units

COMM 245R. Seminar in Communication Criticism
Theories guiding critical evaluation of messages communicated in a variety of media, from oral to digital. Emphasis on the historical, political, and social contexts where such messages are designed, transmitted, interpreted, and used.
Prerequisite: Graduate standing.
Repeatable for credit
Normal Grade Rules
4 units

COMM 249R. Seminar in the Philosophy of Communication
Study of philosophical models of communication, their foundations, insights, and implications for social practice.
Prerequisite: Graduate standing, or instructor consent.
Normal Grade Rules
4 units

COMM 250R. Seminar in Communication Theory: Critical and Interpretive
Major theorists and theories of communication in the rhetorical, historical, critical, empirical, and philosophical traditions.
Prerequisite: Graduate standing.
Pre/Corequisite: COMM 200R.
Normal Grade Rules
4 units

COMM 255R. Seminar in Communication Theory
Review and evaluation of communication theories and research, past and present. Examination of methods of theory construction and scholarly inquiry. Experience in applying theory to designing and conducting communication research.
Prerequisite: Graduate standing, or instructor consent.
Normal Grade Rules
4 units

COMM 265. Seminar in Crisis Communication
Role of public communication in crisis situations; types of crisis; pre- and post-crisis planning; crisis communication management; risk communication; crisis narratives and rhetoric; ethical obligations of crisis communication; dealing with media, image restoration. Independent research project required.
Prerequisite: Classified Graduate Standing or instructor consent.
Normal Grade Rules
3 units

COMM 269R. Seminar in Contemporary Communication
Advanced analysis of recent developments and trends in communication. Topics include globalization, symbolic power and creativity, media and information technology, and formation of cultural styles and identities.
Prerequisite: Admission into the Graduate Program, Graduate standing.
Normal Grade Rules
4 units

COMM 274R. Seminar in Intercultural Communication
Advanced study of the theories, perspectives, and processes that affect intercultural communication among diverse cultural groups in the world.
Prerequisite: Graduate standing.
Pre/Corequisite: COMM 200R.
Normal Grade Rules
4 units

COMM 280. Independent Study
Supervised and specialized study in specific fields of communication not covered by offered courses or that extends beyond what can be covered in an offered course.
Prerequisite: Department Chair consent
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

COMM 282R. Seminar in Communication Pedagogy
Investigation and analysis of the intersections of communication and instruction, including communication education, instructional communication, and critical communication pedagogy.
Prerequisite: Graduate standing, or instructor consent.
Normal Grade Rules
4 units

COMM 285A. Teaching Associate Practicum I
Instruction and supervised experience in teaching university level courses in Communication Studies. Topics include curriculum design, instructional objectives and activities and assessment.
Prerequisite: Appointment as Departmental Teaching Associate, or instructor consent.
Credit / No Credit
2 units

COMM 285B. Teaching Associate Practicum II
Instruction and supervised experience in teaching university level courses in Communication Studies. In addition to advanced discussion of topics from 285A, topics will include theories of teaching and learning, identity, culture and power.
Prerequisites: Appointment as Departmental Teaching Associate and COMM 285A, or instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

COMM 291. Communication Studies Graduate Internship Program
Practical application of communication theory and research methods to real world settings to provide applied capstone experiences. Students demonstrate proficiency in the critical application of core communication requirements to speech acts in engaged and applied settings outside the traditional classroom.
Prerequisite: Graduate Standing, Permission of Director
Repeatable for credit
Credit / No Credit
1-4 units

COMM 295R. Special Topics in Communication
Advanced consideration of selected topics in communication research and theory with emphasis on current literature. The topic will vary from term to term. Course may be repeated with instructor and advisor consent.
Repeatable for credit
Normal Grade Rules
4 units

COMM 297. Advanced Writing Workshop
Advanced graduate level writing instruction in preparation for the culminating experience.
Prerequisite: Graduate standing or instructor consent.
Repeatable for credit
Normal Grade Rules
2 units

COMM 298. Master’s Project
Supervised project work in the field of Communication Studies.
Prerequisites: Admission to candidacy for the master’s degree, completion of core requirements and instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units
COMM 299. Master's Thesis
Supervised thesis work in the field of Communication Studies.
Prerequisites: Admission to candidacy for the master's degree, completion of core requirements and instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

SPEECH EDUCATION

UPPER DIVISION

SPED 184Y. Student Teaching II - Classroom Teaching
Minimum 80-120 class periods of classroom, teaching laboratory or field teaching in appropriate single subjects, grades K-12 and related teaching activities/seminar.
Prerequisite: Joint approval of major and Education departments.
Repeatable for credit
Credit / No Credit
4-6 units

SPED 184Z. Student Teaching III - Classroom Teaching
Notes: May be in different subject/school and will be at a different grade level.
See SPED 184Y.
Repeatable for credit
Credit / No Credit
4-6 units

GRADUATE

SPED 242C. Educational Internship in Teaching
Designed to provide opportunity for supervised teaching on either the elementary or secondary school level on the basis of a special provisional credential.
Prerequisite: Matriculation as a Graduate student
Repeatable for credit
Credit / No Credit
4-6 units
Computer Engineering Courses

LOWER DIVISION
CMPE 030. Programming Concepts and Methodology
Introduction to programming; overview of computer organization and introduction to software engineering. Topics include methodologies for program design, development, style, testing, and documentation; algorithms, control structures, functions, and elementary data structures.
Corequisites: MATH 030 or equivalent.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CMPE 050. Object-Oriented Concepts and Methodology
Application of object-oriented software engineering techniques to the design and development of larger programs; data abstraction, structures, classes, and associated algorithms.
Prerequisite: CMPE 030 with a minimum grade of "C-". Computer Engineering and Software Engineering Majors only.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CMPE 120. Computer Organization and Architecture
Introduction to computer organization and architecture, system buses, internal memory and external memory, input/output, central processing unit CPU, instruction sets, CPU structure and function, RISC, control unit. Prerequisite: CMPE 050 or CS 046B (with a grade of "C-" or better). Computer Engineering and Software Engineering Majors Only.
Normal Grade Rules 3 units

CMPE 124. Digital Design I
Combinational and sequential logic theory and circuits. Emphasis on mixed logic and algorithmic state machines. Design projects using standard integrated circuit packages.
Prerequisite: EE 97 and EE 98 (both with C or better). Computer Engineering or Software Engineering Majors Only.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CMPE 125. Digital Design II
Digital system building blocks, data path and control units, system-level RTL design, Verilog HDL for design and verification, contemporary design flow and methodology, lab experiments using industry standard CAD tools and field programmable gate array (FPGA) devices.
Prerequisite: CMPE 124 (with grade of "C-" or better). Computer Engineering or Software Engineering Majors Only.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

UPPER DIVISION
CMPE 102. Assembly Language Programming
Assembly programming; assembly-C interface; CPU and memory organization; addressing modes; arithmetic, logic, and branch instructions; arrays, pointers, subroutines, stack and procedure calls; software interrupts; multiplication, division and floating point arithmetic.
Prerequisite: CMPE 050 or CS 046B (with grade of "C-" or better) Sophomore or upper division standing. Allowed Declared Majors: Computer Engineering, Software Engineering. Normal Grade Rules 3 units

CMPE 110. Electronics for Computing Systems
RC, RL, and RLC circuit analysis, diodes and diode circuits, MOSFET and bipolar transistor I-V characteristics and circuits, CMOS logic circuits, CMOS-TTL interface, sensors and signal conditioning circuits using operational amplifiers, A/D and D/A converters, electromechanical device control. Prerequisites EE 97, EE 98, Math 123 all with a C or better
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CMPE 114. Software Engineering I
Why software engineering? What is software engineering? Software development lifecycle activities: project planning and management requirements analysis, requirement specification. Software design, software testing, verification, validation, and documentation. Software quality assurance and review techniques, software maintenance, team-based projects.
Prerequisite: CMPE major: CMPE 126 (C- or better), SE major: CS 46B (C- or better), other majors: CMPE 30 and MATH 32 (C- or better)
Normal Grade Rules 3 units

CMPE 120. Computer Organization and Architecture
Introduction to computer organization and architecture, system buses, internal memory and external memory, input/output, central processing unit CPU, instruction sets, CPU structure and function, RISC, control unit. Prerequisite: CMPE 050 or CS 046B (with a grade of "C-" or better). Computer Engineering and Software Engineering Majors Only.
Normal Grade Rules 3 units

CMPE 124. Digital Design I
Combinational and sequential logic theory and circuits. Emphasis on mixed logic and algorithmic state machines. Design projects using standard integrated circuit packages.
Prerequisite: EE 97 and EE 98 (both with C or better). Computer Engineering or Software Engineering Majors Only.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CMPE 125. Digital Design II
Digital system building blocks, data path and control units, system-level RTL design, Verilog HDL for design and verification, contemporary design flow and methodology, lab experiments using industry standard CAD tools and field programmable gate array (FPGA) devices.
Prerequisite: CMPE 124 (with grade of "C-" or better). Computer Engineering or Software Engineering Majors Only.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CMPE 127. Microprocessor Design I
Microprocessor architecture and assembly language. Design of peripheral blocks and their interfaces to the microprocessor. Design projects using standard integrated circuit packages.
Prerequisite: CMPE 124 with a grade of "C-" or better; Computer Engineering or Software Engineering Majors Only.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules 3 units

CMPE 130. Advanced Algorithm Design
Design and analysis of data structures and algorithms. Advanced tree structures, hashing, searching and sorting. Divide-and-conquer, greedy and dynamic programming algorithm design techniques.
Prerequisite: CMPE 126, ISE 130 (with grades of "C-" or better). Computer Engineering or Software Engineering Majors Only.
Normal Grade Rules 3 units

CMPE 131. Software Engineering I
Why software engineering? What is software engineering? Software development lifecycle activities: project planning and management requirements analysis, requirement specification. Software design, software testing, verification, validation, and documentation. Software quality assurance and review techniques, software maintenance, team-based projects.
Prerequisite: CMPE major: CMPE 126 (C- or better), SE major: CS 46B (C- or better), other majors: CMPE 30 and MATH 32 (C- or better)
Normal Grade Rules 3 units

CMPE 132. Information Security
A study of computer and network security from centralized systems to distributed networks. Cryptology, vulnerabilities and controls. Firewalls, privacy enhanced e-mail, viruses and worms. Case studies will be featured.
Prerequisite: CMPE 126. Computer Engineering or Software Engineering Majors Only.
Normal Grade Rules 3 units

CMPE 133. Software Engineering II
Software Architecture, Software Technical Metrics, evaluating products, processes, and resources, improving predictions, products, processes, and resources. Advanced topics such as: Formal Methods, Software Reuse, Reengineering, Client/Server Software Engineering, Computer-Aided Software Engineering, Team-Based Projects.
Prerequisite: CMPE 131 with a grade of "C-" or better
Normal Grade Rules 3 units

CMPE 135. Object-Oriented Analysis and Design
Feasibility analysis and system requirements determination, object-oriented design methodology, and information systems design using object-oriented modeling techniques. Emphasis on both theoretical and practical aspects of object-oriented systems analysis and design. Team-based design project.
Prerequisite: For SE Majors: CS 046B or for others CMPE 126. See SJSU Catalog for detailed list of prerequisites
Normal Grade Rules 3 units
CMPE 137. Wireless Mobile Software Engineering
Mobility analysis, design principles, techniques, and methods for software systems on a variety of wireless and mobile Internet based computing and communication platforms, such as advanced pocket/tablet PCs, GPS, Bluetooth, Infrared, Wi-Fi, and RFID. Design multidisciplined mobile project. Prerequisite: CMPE 131. Computer Engineering or Software Engineering Majors Only.
Normal Grade Rules
3 units

CMPE 138. Database Systems I
File organization and storage structure, database system architecture, entity relationship model, normalization techniques, SQL, relational algebra, storage organization, query processing, and concurrency control. Prerequisite: CMPE 126 with a grade of "C-" or better. Computer Engineering or Software Engineering Majors Only.
Normal Grade Rules
3 units

CMPE 139. Fundamentals of Data Mining
Introduction to data management and data mining, data preprocessing, OLAP and data warehousing, frequent pattern mining and association rules, clustering, classification, web mining, web search, recommender systems, social network analysis. Prerequisites: CMPE 126 or CS 146 (with C- or better). Computer Engineering or Software Engineering Majors Only.
Normal Grade Rules
3 units

CMPE 140. Computer Architecture and Design
Pipelining and timing issues in CPU data-paths. Principles of RISC-type CPU instruction set and architecture. Structural, data and control hazards in a RISC processor, forwarding loops, branch mechanisms. Memory architectures in CPUs such as register files and caches. Prerequisite: CMPE 125 (with grade of "C-" or better). Computer Engineering or Software Engineering Majors Only.
MISC/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

CMPE 142. Operating Systems Design
Corequisite: CMPE 130 with grades of "C-" or better.
Normal Grade Rules
3 units

CMPE 144. Real-Time Embedded System Co-Design
Embedded system architecture with real-time operating system including microcontrollers, interfacing techniques for industrial applications using transducers, sensors, and A/D-D/A converters. Hardware/software integration and codesign. Prerequisite: CMPE 110 and CMPE 127 with grade of "C-" or better. Computer Engineering or Software Engineering Majors Only.
MISC/Lab: Lecture 2 hrs/lab 3 hrs.
Normal Grade Rules
3 units

CMPE 147. Fundamentals of System on Chip (SoC) Design
System on Chip implementation of a computing system. Implementation of parallel and serial bus architectures. SRAM, SDRAM and Flash memory interfaces. Direct Memory Access (DMA), interrupt controller, transceiver, timers and data converters. Verilog skills are required. Prerequisite: CMPE 125 (with "C-" or better). Computer Engineering or Software Engineering Majors Only.
Normal Grade Rules
3 units

CMPE 148. Computer Networks I
Comparative evaluation of network architecture, layering model, standards, protocol examples for ISO and TCP/IP layers. Network applications, transport layer protocols, Internet routing, data link and physical transmissions. Applications in world wide web, file transfer, electronic mail, peer-to-peer and other areas. Prerequisite: For CMPE major: CMPE 124 and CMPE 126; for SE major: CMPE 120 and CS 146, Computer Engineering or Software Engineering Majors Only.
Normal Grade Rules
3 units

CMPE 150. System Architecture and Electronic Design for Robotics
Design and architecture for generating autonomous and human-reliant robots, algorithm development for object perception, electronic design and system integration for cognitive and sensory capabilities of robots, mechanisms for actuation and mobility, fault diagnosis and self-calibration. Prerequisite: CMPE 110, CMPE 124
Normal Grade Rules
3 units

CMPE 152. Compiler Design
Principles of lexical analysis, finite state automata and parsing; issues of variable declarations, variable types, control statements, function calls, nested scopes and efficient assembler target code. Prerequisite: CMPE 126 and CMPE 102 both with a "C-" or better
Normal Grade Rules
3 units

CMPE 163. Introduction to Computer Graphics and Augmented Reality
Introduction to 2D and 3D vector and pixel graphics, 2D and 3D transformations, world to viewer transformation pipeline, perspective projection, hidden line and surface removal, decimation algorithm and texture mapping, integration of pixel graphics and augmented reality, and hands-on laboratories. Prerequisite: CMPE 127, ENGR 100W; MATH 123 or MATH 129A or EE 112.
Corequisite: ENGR 100W
Normal Grade Rules
3 units

CMPE 165. Software Engineering Process Management
Integrated approach to managing development within small teams; including mission statement, synthesis of design concepts, tradeoff studies, risk assessment and the interactions encountered in the optimal design, development, manufacture and test of systems. Prerequisite: CMPE 131 with a "C-" or better
Normal Grade Rules
3 units

CMPE 172. Enterprise Software Platforms
Introduction to enterprise software systems. Covers network operating systems, DBMS, transaction monitors, groupware, distributed objects, system management and the Web. Covers standards such as J2EE, CORBA, SQL, JDBC, and HTTP; and emerging software technologies. Prerequisite: CMPE 142 or CS 149 with grade of "C-" or better. Computer Engineering or Software Engineering Majors Only.
Normal Grade Rules
3 units

CMPE 180. Individual Studies
Individual work in computer engineering. Prerequisite: Upper division standing and instructor consent. Not available to Open University Students. Repeatable for credit
Credit / No Credit
1-3 units

CMPE 180A. Data Structures and Algorithms in C++
Data representation and preprocessing, proximity, finding nearest neighbors, dimensionality reduction, exploratory analysis, association Object-oriented data organization and representation as strings, arrays, stacks, queues, dequesues, lists, sets, trees, tables, and graphs. Sorting and searching and algorithm design and performance analysis. Testing methods and data are discussed. Prerequisite: Admission into MS Computer Engineering or MS Software Engineering
Credit / No Credit
3 units
CMPE 180B. Database Systems
File organization and storage structure, database system architecture, entity relationship model, normalization techniques, SQL, relational algebra, storage organization, query processing, and concurrency control.
Prerequisite: Admission into MS Computer Engineering or MS Software Engineering
Credit / No Credit
3 units

CMPE 180C. Operating Systems Design
Prerequisite: Admission into MS Computer Engineering or MS Software Engineering
Credit / No Credit
3 units

CMPE 180D. Digital Design and Microprocessors
Binary codes/number representations, binary arithmetic, combinational logic design with gates, logic minimization, decoders, encoders, adders; sequential logic design with latches, flip-flops, registers, counters, state machine design, basic microprocessor architectures (control/data paths) and memory subsystems, asynchronous logic (racing, glitches, timing diagrams).
Prerequisite: Admission into MS Computer Engineering
Credit / No Credit
3 units

CMPE 181. Internet of Things Platforms
Internet of Things (IoT) landscape, fundamentals, architecture, standards and protocols, software and hardware systems, security, and data analytics. Investigate state-of-the-art IoT platforms. Develop hands-on expertise in IoT system development.
Prerequisites: For CMPE major: CMPE 124 and CMPE126; for SE major: CMPE 120 and CS 146.
Normal Grade Rules
3 units

CMPE 182. Internet of Things Security
Secure Internet of Things (IoT) system design, vulnerabilities, attacks, and countermeasures, principles of privacy-by-design, secure IoT system development and lifecycle. Blockchains, distributed consensus, and identity management systems for connected devices.
Prerequisites: CMPE 126 or CS 146.
Normal Grade Rules
3 units

CMPE 187. Software Quality Engineering
Software testing and quality assurance engineering concepts, processes, models, criteria, and methods. Software unit testing, integration, function validation, system performance and reliability evaluation; Software security testing methods and tools; software quality management, control systems, standards, and evaluation metrics.
Prerequisite: CMPE 131. Computer Engineering or Software Engineering Majors Only.
Normal Grade Rules
3 units

CMPE 188. Machine Learning for Big Data
Introduction to machine learning and pattern recognition for big data analytics; machine learning concepts, theories, approaches, algorithms, and big data analytic applications; supervised learning unsupervised learning and learning theory.
Prerequisite: CMPE 126 or CS 146
Normal Grade Rules
3 units

CMPE 189. Special Topics in Computer Engineering
Advanced topics in Computer Engineering. Content varies from semester to semester.
Prerequisite: Instructor consent
Normal Grade Rules
3 units

CMPE 190A. Senior Design Project I
Comprehensive plan and preliminary design of a group computer/software engineering project; integration of knowledge in science, technologies and team processes; group written report and oral presentation; individual professional development plans.
Prerequisite:
For CMPE Majors: CMPE 125, CMPE 127, CMPE 130, CMPE 133, ISE 130 (all with a C- or better); ENGR 100W (with a grade of “C” or better), in good academic and major standings and graduation application on file.
For SE Majors: CMPE 133, ISE 130 or MATH 161A (with a grade of “C-” or better), ENGR 100W (all with a grade of “C-” or better), in good standing in the major, graduation application on file.
Normal Grade Rules
1 unit

CMPE 190B. Senior Design Project II
Comprehensive plan and preliminary design of a group computer/software engineering project; integration of knowledge in science, technologies and team processes; group written report and oral presentation; individual professional development plans.
Prerequisite:
For CMPE Majors: CMPE 125, CMPE 127, CMPE 130, CMPE 133, ISE 130 (all with a C- or better); ENGR 100W (with a grade of “C” or better), in good academic and major standings and graduation application on file.
For SE Majors: CMPE 133, ISE 130 or MATH 161A (with a grade of “C-” or better), ENGR 100W (all with a grade of “C” or better), in good standing in the major, graduation application on file.
Normal Grade Rules
3 units

CMPE 195A. Senior Design Project I
Comprehensive plan and preliminary design of a group computer/software engineering project; integration of knowledge in science, technologies and team processes; group written report and oral presentation; individual professional development plans.
Prerequisite:
For CMPE Majors: CMPE 125, CMPE 127, CMPE 130, CMPE 133, ISE 130 (all with a C- or better); ENGR 100W (with a grade of “C” or better), in good academic and major standings and graduation application on file.
For SE Majors: CMPE 133, ISE 130 or MATH 161A (with a grade of “C-” or better), ENGR 100W (all with a grade of “C” or better), in good standing in the major, graduation application on file.
Normal Grade Rules
1 unit

CMPE 195B. Senior Design Project II
Implementation of group design project initiated in CMPE 195A, group oral presentation and written report; integrated global and social issues in engineering; CE Area: V when taken as part of CMPE major sequence
Prerequisite: CMPE 195A (with grade of “C” or better), junior and senior only. Allowed Declared Majors: Computer Engineering, Engineering, Software Engineering.
Corequisite: ENGR 195B
Note: Meets CE Areas S and V when course is taken in combination with: CMPE 195A, ENGR 195A and ENGR 195B. All SJSU Studies courses require completion of the WST and upper division standing.
Misc/Lab: Lab 9 hours.
Normal Grade Rules
CE: V
3 units

CMPE 195E. Senior Design Project I
Comprehensive plan and preliminary design of a group computer/software engineering project; integration of knowledge in science, technologies and team processes; group written report and oral presentation; individual professional development plans.
Prerequisite:
For CMPE Majors: CMPE 125, CMPE 127, CMPE 130, CMPE 133, ISE 130 (all with a C- or better); ENGR 100W (with a grade of “C” or better), in good academic and major standings and graduation application on file.
For SE Majors: CMPE 133, ISE 130 or MATH 161A (with a grade of “C-” or better), ENGR 100W (all with a grade of “C” or better), in good standing in the major, graduation application on file.
Normal Grade Rules
1 unit

CMPE 195F. Senior Design Project II
Implementation of group design project initiated in CMPE 195A, group oral presentation and written report. Prerequisite: CMPE 195A (grade of C or better); in good academic and major standings
Misc/Lab: 9 hours of Lab
Normal Grade Rules
3 units

CMPE 197. Cooperative Education Project
See ENGR 197.
Normal Grade Rules
3 units

CMPE 198. Technology and Civilization
See TECH 198.
Normal Grade Rules
CE: V
3 units
CMPE 200. Computer Architecture
Computer design overview, processor instruction set architecture and microarchitecture, instruction-level parallelism, memory hierarchy, storage and I/O systems, multicore/multiprocessor and data/threads-level parallelism, introduction to parallelism. Prerequisite: CMPE 180D or instructor consent. Computer Engineering or Software Engineering majors only.
  Normal Grade Rules
  3 units

CMPE 202. Software Systems Engineering
Integrated approach to software design and development including requirements elicitation and analysis, system design and construction through studying multiple facets of software development processes, design methodologies, modeling approaches, and implementation techniques. Prerequisite: Classified graduate standing or instructor consent. Computer Engineering and Software Engineering majors only.
  Misc/Lab: Lecture 3 hours.
  Normal Grade Rules
  3 units

CMPE 203. Software Engineering Management
Development of software systems from the perspective of project management within the dynamic and complex nature of software technologies and environments; development lifecycle, communications, team dynamics, planning, estimation, scheduling, risk analysis, metrics tracking, problem management, and configuration management. Prerequisite: Graduate standing or instructor consent. Computer Engineering or Software Engineering Majors only.
  Normal Grade Rules
  3 units

CMPE 206. Computer Network Design
Network topology and queuing theory. The seven layers of the ISO reference model: physical, data link, network, transport, session, presentation and application. Example networks. Network design project. Prerequisite: CMPE 180A, classified standing, or instructor consent
  Normal Grade Rules
  3 units

CMPE 207. Network Programming and Application
Development and implementation of networking software for building distributed applications. Application Programming Interfaces: BSD Sockets, Winsock, Remote Procedure Call and Middleware. Network programming project. Prerequisite: CMPE 206, or instructor consent.
  Normal Grade Rules
  3 units

CMPE 208. Network Architecture and Protocols
In-depth study of the principles and architecture of Internet protocols in current practice. Analysis of protocols of network, transport, and application layers. Topics will also cover emerging network architecture and protocols. Network analysis project. Prerequisite: CMPE 206 or instructor consent.
  Normal Grade Rules
  3 units

CMPE 209. Network Security
Network security protocols and applications, cryptography algorithms, authentication systems, intrusion detection, network attacks and defenses, system-level security issues, and building of secure systems. Prerequisite: CMPE 206 or EE 281 or instructor consent.
  Normal Grade Rules
  3 units

CMPE 210. Software-defined Networks and Network Functions Virtualization
The course covers development and implementation of Software-defined Networks and Network Functions Virtualization for building programmable network applications. It includes their concepts with various use cases. Students conduct a network programming project related to SDN/NFV by using open source projects. Prerequisite: CMPE 206 (or equivalent graduate network courses) or instructor consent.
  Normal Grade Rules
  3 units

CMPE 211. Advanced Network Security in IoT
Advanced security topics in the Internet of things (IoT). SDN/NFV (Software Defined Networking and Network Function Virtualization) and blockchain to defend against IoT attacks and protect IoT infrastructure. Network security protocols and applications, intrusion detection, network attacks and defenses, and system-level security issues. Prerequisite: CMPE 206 or Instructor Consent
  Normal Grade Rules
  3 units

CMPE 212. System Verification
Introduction to SoC system configuration and integration, on-chip protocols, assertion based verification, code and functional coverage metrics, methodologies, tools, and environments for functional verification of special function blocks (IPs) and integrated SoC-based computer systems. Prerequisite: CMPE 200 and CMPE 264 or instructor consent.
  Normal Grade Rules
  3 units

CMPE 213. Parallel Computing
How to effectively program parallel computers, from smartphones to large clusters. Types of parallel architectures, routing, communication operations, parallel programming models, performance analysis, parallel algorithms for sparse matrix and graph problems, load balancing, advanced topics. Applications to Big Data Analytics. Prerequisite: Classified graduate standing or instructor consent.
  Normal Grade Rules
  3 units

CMPE 214. GPU Architecture and Programming
Explores state-of-the-art parallel architecture and various parallel programming techniques. Investigate the architectural difference between GPU and various parallel architectures including CPU, programming basics of parallel platforms such as CUDA, optimization and debugging techniques. Prerequisite: CMPE 140 or CMPE 200
  Normal Grade Rules
  3 units

CMPE 215. Human Computer Interaction
See ISE 217.
  Normal Grade Rules
  3 units

CMPE 219. HCI for Cyber Security
See ISE 219.
  Normal Grade Rules
  3 units

CMPE 220. System Software
System software overview, assemblers, macro-assemblers, loaders and linkers, compilers and operating systems. Design project. Prerequisite: CMPE 180A and 180C, or classified standing. Computer Engineering and Software Engineering majors only.
  Normal Grade Rules
  3 units

CMPE 221. Database Systems
Database architectures, technologies, and practices for enterprise systems that use structured, semi-structured, and unstructured data. Provides opportunities to research and acquire experience using modern and emerging concepts in relational and non-relational database theory and technologies. Prerequisite: CMPE 272 or instructor consent. Computer Engineering or Software Engineering majors only.
  Normal Grade Rules
  3 units
CMPE 235. Mobile Software System Design
Study of wireless-based software systems in design and engineering, underlying networks, infrastructures and frameworks, wireless security, mobile user security & privacy (e.g. biometric security), emergent mobile programming platforms and technologies (such as RFID/Barcode/NFC), mobile commerce and service application systems. Prerequisite: CMPE 220 or CMPE 202 or instructor consent. Computer Engineering and Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 236. Mobile Web Application Systems
Mobile web system concepts, technology, architectures, security, design methods, validation techniques, mobile platforms and enabled technologies, mobile cloud, database and access services; mobile app development and platform solutions. Prerequisite: CMPE 202 or instructor consent.
Normal Grade Rules
3 units

CMPE 240. Advanced Computer Design
Architecture of a computing system including system bus, memory subsystems and peripherals. Unidirectional and bidirectional bus architectures. SRAM, SDRAM and FLASH memories. Design of DMA, interrupt controller, transmitter/receiver, timer, display adapter, A/D and D/A converters and other system peripherals. Design of memory and peripheral bus interfaces. Prerequisite: CMPE 180D or instructor consent. Computer Engineering and Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 242. Embedded Hardware Design
Advanced topics dealing with microprocessor and microcontroller hardware and firmware including processor architecture, advanced memory and I/O systems design, multilevel bus architecture, interrupt systems. Design project. Prerequisite: CMPE 180A and 180D, classified standing, or instructor consent.
Computer Engineering or Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 243. Embedded Systems Applications
Embedded system interfacing techniques; peripheral devices; discussion of industrial, telecommunication, automotive, medical, and consumer applications of embedded systems. Design project. Prerequisite: CMPE 180A and 180D, classified standing, or instructor consent.
Computer Engineering or Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 244. Embedded Software
Experiments dealing with advanced embedded software programming concepts, interfacing techniques, hardware organization, and software development using embedded systems. Individual projects. Prerequisite: CMPE 180A and 180D, classified standing, or instructor consent.
Computer Engineering or Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 245. Embedded Wireless Architecture
Embedded wireless architecture with basic communication protocols and hands-on labs with state of the art embedded system development tools. Prerequisites: CMPE 180A and 180D, classified standing, or instructor consent.
Computer Engineering or Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 246. Interface Design in Embedded Systems
Oscillator configuration, parallel and serial I/O port initialization and interface building techniques with Microchip DSP microcontrollers. Integration of external memory blocks, MEMS sensors, MEMS microphone, ADC, DAC and image recognition camera to achieve a specific system functionality. Servo motor, stepper motor and brushless motor interface designs and control. Design specification and development with Microchip MPLABX design tools. Prerequisite: CMPE 180A and 180D, classified standing, or instructor consent.
Normal Grade Rules
3 units

CMPE 247. Interface Design in Embedded Systems
Deep neural networks and their applications to various problems, e.g., speech recognition, image segmentation, and natural language processing. Covers underlying theory, the range of applications to which it has been applied, and learning from very large data sets. Prerequisite: CMPE 255 or CMPE 257 or instructor consent. Computer Engineering and Software Engineering Majors only.
Normal Grade Rules
3 units

CMPE 255. Data Mining
Data representation and preprocessing, proximity, finding nearest neighbors, dimensionality reduction, exploratory analysis, association analysis and sequential patterns, supervised inference and prediction, classification, regression, model selection and evaluation, overfitting, clustering, and advanced topics. Prerequisite: CMPE 180A, classified standing, or instructor consent.
Computer Engineering or Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 256. Large Scale Analytics
Data mining and machine learning algorithms and applications for large amounts of data. Information retrieval and search engines, social network analysis, link analysis, and ranking. Web personalization, recommender systems, opinion mining and sentiment analysis, and advanced topics. Prerequisite: CMPE 180A, classified standing, or instructor consent.
Computer Engineering or Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 257. Machine Learning
Machine learning concepts, feasibility and learning types, theory of generalization, bias and variance, linear models for classification and regression, nonlinear transformation, regularization and validation, kernel methods, radial basis functions, support vector machines, ensemble methods, neural networks, and hands-on projects. Prerequisite: CMPE 180A, classified standing, or instructor consent. Computer Engineering and Software Engineering Majors only.
Normal Grade Rules
3 units

CMPE 264. Advanced Digital and Computing System Design
Advanced topics in register-transfer-level design of complex digital functional blocks, application-specific instruction set processors, and system-level integration/validation using Verilog/VHDL/C-level hardware description languages. Prerequisite: CMPE 200 or instructor consent.
Normal Grade Rules
3 units

CMPE 265. High Speed Digital System Design
Introduction to high speed interface design techniques and analyzing high speed circuits utilizing latest modeling and simulation tools to provide necessary knowledge for the printed circuit board layout. Prerequisite: CMPE 200 or instructor consent.
Normal Grade Rules
3 units
CMPE 266. Big Data Engineering and Analytics
New big data related technologies, architecture, tool, algorithms and analytics to manage and extract values and hidden knowledge from data whose scale, diversity, speed and complexity are big.
Prerequisite: CMPE 272 or Instructor Consent
Normal Grade Rules
3 units

CMPE 270. Information Engineering
See ISE 270.
Normal Grade Rules
CE: GWAR
3 units

CMPE 272. Enterprise Software Platforms
Enterprise software, system and virtualized platforms. OSS, NOS, security, databases (OLTP, big data, analytics), transactions, groupware, components, web services, web, systems management, and app development. Standards and emerging technologies. Prerequisite: MSSE graduate student or instructor consent.
Normal Grade Rules
3 units

CMPE 273. Enterprise Distributed Systems
Introduction to application protocols for large scale distributed systems including object request brokers, asynchronous messaging, and Web services. Lab is based on using protocols to build distributed systems. Prerequisites: Java programming or instructor consent. Computer Engineering and Software Engineering majors only.
Corequisites: CMPE 272
Normal Grade Rules
3 units

CMPE 274. Business Intelligence Technologies
This course covers technologies that are key to delivering business intelligence to an enterprise. The goal of business intelligence is to analyze and mine business data to understand and improve business performance by transforming business data into information into knowledge. Prerequisite: CMPE 272 or instructor consent. Computer Engineering and Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 275. Enterprise Application Development
Distributed component design, scalability, messaging, and integration practices for modern and emerging architectures and technologies. Prerequisite: CMPE 273 or instructor consent. Computer Engineering and Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 277. Smartphone Application Development
Architectures, technologies, and programming concepts for developing smartphone applications. Covers current smartphone/tablet OSs, application development, and deployment environments. Prerequisites: Classified graduate standing or instructor consent. Computer Engineering and Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 279. Software Security Technologies
Fundamental concepts, methods, and tools used to design and implement software security technologies for constructing trustworthy centralized, distributed, or enterprise-wide software systems. Corequisite: CMPE 272 or 220 or instructor consent.
Normal Grade Rules
3 units

CMPE 280. Web UI Design and Development
Web User-interface (UI) design and development with contemporary web standards. Understand interaction and interface design principles and processes for rich web applications, mobile web, web graphics, web design fundamentals, tools, interaction using client side scripting and server side frameworks. Pre-requisite: Classified graduate standing or instructor consent. Computer Engineering and Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 281. Cloud Technologies
Cloud computing concepts, evolution, architectures, infrastructures, opportunities, risks, enterprise adoption strategies, standards and polices, Software-as-a-Service (SaaS), Platform-as-a-Service (PaaS), Infrastructure-as-a-Service (IaaS), modern cloud computing technologies and tools, case studies and team projects. Corequisites: CMPE 272 or instructor consent. Computer Engineering and Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 282. Cloud Services
Cloud service architecture and layering, administrative issues, resiliency and security considerations, business development, operations and business support service, case studies and team projects. Prerequisites: CMPE 281 or instructor consent. Computer Engineering and Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 283. Virtualization Technologies
Virtualization concepts, components and infrastructure, hardware and software virtualization, virtualization machine life cycle management, virtualization services, case studies, and team projects. Corequisite: CMPE 272 or instructor consent.
Normal Grade Rules
3 units

CMPE 284. Storage and Network Virtualization
Network and storage technologies, network virtualization and storage virtualization, including virtual local area networks, load balancers, firewalls, virtual private networks, network attached storage and storage area networks, case studies, and team projects. Prerequisites: CMPE 283 or instructor consent. Computer Engineering and Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 285. Software Engineering Processes
Software system development with emerging software engineering processes and technologies; planned and agile development processes, processes of Service-Oriented Architecture; component-based, Web-based, mobile based, event programming, wireless, user interface, and database access technologies. Corequisite: CMPE 202 or CMPE 220 or instructor consent. Computer Engineering and Software Engineering majors only.
Normal Grade Rules
3 units

CMPE 287. Software Quality Assurance and Testing
Software testing concepts, processes, models, criteria, and methods; software unit testing, integration, function validation, system performance measurement, and reliability evaluation; software security testing methods, assurance criteria, and validation tools; software security assurance process, standards, techniques, and case study. Corequisite: CMPE 202 or 220 or instructor consent.
Normal Grade Rules
3 units

CMPE 289. Cloud Security Engineering
Cloud security engineering concepts, issues, infrastructures, risks, enterprise adoption concerns; cloud security management; standards, criteria, processes, polices, regulations, identity and access management; security as a service and emergent security solutions and tools in clouds, case studies and team projects. Prerequisites: CMPE 272 or instructor consent.
Normal Grade Rules
3 units

CMPE 292. Int'l1 Program Studies
Repeatable for credit
Mixed Grading
1-9 units

CMPE 294. Computer Engineering Seminar
Provides graduate students with a background to conduct research, write proposals and present results in oral and written form. Prerequisite: Instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
CE: GWAR
3 units
CMPE 294A. Cyber Security Seminar  
Provides graduate students with the background and capability to conduct research and write technical reports in the area of cyber security  
Prerequisites: Instructor consent  
Note: This course satisfies graduate-level GWAR in this master’s program.  
Normal Grade Rules  
GE: GWAR  
3 units  

CMPE 295A. Master Project I  
Comprehensive plan and preliminary design of a computer/software engineering project; integration of knowledge in technologies, processes and management to support program outcomes.  
Prerequisite: Classified status, good standing, completed 2 degree core courses, completed 2 courses in specialization, and graduate advisor consent.  
Misc/Lab: Lab 9 hours.  
Repeatable for credit  
Normal Grade Rules  
3 units  

CMPE 295B. Master Project II  
Completion of an in-depth project to achieve the program outcomes and satisfy the cumulative experience; write a detailed project report; make a comprehensive presentation and demonstration.  
Prerequisite: CMPE 295A (with a B or better) or CMPE 295W (with a B or better), completed all degree core courses, admission to candidacy and graduate advisor consent.  
Misc/Lab: Lab 9 hours.  
Repeatable for credit  
Normal Grade Rules  
3 units  

CMPE 295W. Master Project  
In-depth developmental engineering work relating to problems of interest. Project includes proposal formulation, analysis, design, implementation, and testing.  
Prerequisites: Completed degree and specialization core requirements, classified status, in good standing and graduate advisor consent.  
Note: This course satisfies graduate-level GWAR in this master’s program.  
Normal Grade Rules  
GE: GWAR  
3 units  

CMPE 296Y. High Level Synthesis  
Purpose, methodologies, and techniques of high level synthesis (HLS), hands-on HLS practices starting from C/C++/SystemC description to FPGA device implementation.  
Prerequisites: CMPE 200, CMPE 212, and CMPE 264.  
Normal Grade Rules  
3 units  

CMPE 296Z. System Architecture  
System-level description and verification, performance and power driven system optimization via microarchitecture exploration and hardware/software trade-offs, system integration and hardware/software co-verification.  
Prerequisites: CMPE 200, CMPE 212, and CMPE 264  
Normal Grade Rules  
3 units  

CMPE 297. Special Topics in Computer/Software Engineering  
Special topics to augment regularly-scheduled graduate courses. May be taken up to three times in different topic areas.  
Prerequisite: Instructor consent.  
Repeatable for credit  
Normal Grade Rules  
3 units  

CMPE 298. Special Problems  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299A. Master Thesis I  
The first part of a thesis culminating the work for the master’s degree in the specialization.  
Prerequisite: Completed core courses and classified status. Not available to Open University students.  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299B. Master Thesis II  
The second part of a thesis culminating the work for the master’s degree in the specialization.  
Prerequisite: Admission to Candidacy of Master Degree and CMPE 299A. Not available to Open University students.  
Mandatory CR/NC/RP  
3 units  

CMPE 299I. Computer/Software Engineering Internship  
Field work for computer and software engineering graduate students. A report is required at the end of the semester addressing the goals set at the start of the assignment.  
Prerequisite: Completed 6 units degree core plus six additional degree program units, classified status, in good standing and graduate advisor consent  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299M. Master Project III  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299N. Master Project IV  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299R. Master Project V  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299S. Master Project VI  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299T. Master Project VII  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299U. Master Project VIII  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299V. Master Project IX  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299W. Master Project X  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299X. Master Project XI  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299Y. Master Project XII  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units  

CMPE 299Z. Master Project XIII  
Advanced individual work in computer engineering.  
Prerequisite: Instructor consent. Not available to Open University Students.  
Repeatable for credit  
Mandatory CR/NC/RP  
1-6 units

Computer Science Department Courses

COMPUTER SCIENCE

LOWER DIVISION

CS 022A. Python Programming for Non Majors I
This course is an introduction to Python Programming. Programming in interesting, relevant, and practical contexts. Image and video manipulation, digital music, databases, web pages, data analysis in life sciences, other applications. Fundamental programming constructs: data structures and algorithms, iterations, functions.
Prerequisite: This course is intended for students who have no prior programming experience. This course is not open to computer science majors or minors or software engineering majors.
Normal Grade Rules
3 units

CS 022B. Python Programming for Non Majors II
Hands-on Python programming skills. Skills include casting a problem as an algorithm, translating an algorithm to executable code, and debugging and testing code. Applications focus on computational techniques to understand, analyze, and visualize data.
Prerequisite: CS 22A or consent of the instructor. This course is not open to computer science majors or minors or software engineering majors.
Normal Grade Rules
3 units

CS 025. The Digital World and Society
See ENGR 025.
Normal Grade Rules
GE: D1
3 units

CS 040. Introduction to Computers
For students with little or no computer experience. Topics include: history of computing, user interfaces, computer applications, programming, hardware and software, computer networks.
Normal Grade Rules
3 units

CS 042. Discrete Mathematics
See MATH 042.
Normal Grade Rules
3 units

CS 046A. Introduction to Programming
Prerequisite: Eligibility for Math 019 and a major of Computer Science, Software Engineering, or Undeclared; or instructor consent.
Misc/Lab: Lecture 4 hours/lab 3 hours.
Normal Grade Rules
4 units

CS 046B. Introduction to Data Structures
Prerequisite: Knowledge of Java equivalent to CS 046A (in Java) or CS 049J (with grade of "C" or better).
Eligibility for MATH 030 or MATH 030P, or instructor consent.
Pre/Corequisite: MATH 042.
Misc/Lab: 3 hours of lecture/ 3 hours lab
Normal Grade Rules
4 units

CS 047. Introduction to Computer Systems
Instruction sets, assembly language and assemblers, linkers and loaders, data representation and manipulation, interrupts, pointers, function calls, argument passing, and basic gate-level digital logic design.
Prerequisite: CS 46B (with a grade of "C-" or better)
Normal Grade Rules
3 units

CS 049C. Programming in C
Beginning course in the C language.
Prerequisite: Previous programming experience and completion of math GE.
Normal Grade Rules
3 units

CS 049J. Programming in Java
Introduction to the Java programming language and libraries. Topics include fundamental data types and control structures, object-oriented programming, string processing, input/output, and error handling. Use of Java libraries for mathematics, graphics, collections, and for user interfaces.
Prerequisite: Previous programming experience in a language other than Java.
Normal Grade Rules
3 units

CS 050. Scientific Computing I
See METR 050.
Normal Grade Rules
2 units

CS 085C. Practical Computing Topics
Computing topics of current interest in industrial practice. Emphasis on effective use and integration of software/hardware. Different topics may be offered at different times in a short-course lecture/lab format. Different versions of this course may be repeated for credit.
Pre/corequisite eligibility for MATH 19
Additional Prerequisite: Varies with topic
Repeatable for credit
Normal Grade Rules
3 units

UPPER DIVISION

CS 100W. Technical Writing Workshop
Advanced writing through preparation of technical reports and presentations. Improving skills for writing subject-related reports, project proposals and personal resumes through practice and evaluation. Course assignments will be related to issues concerning careers in computer science. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE: Z
3 units

CS 108. Introduction to Game Studies
See ART 108.
Normal Grade Rules
3 units

CS 116A. Introduction to Computer Graphics
Vector geometry, geometric transformations and the graphics pipeline. Basic raster graphics algorithms for drawing discrete lines, clipping, visible surface determination and shading. Display of curves and surfaces. Graphics data structures.
Prerequisite: MATH 31, MATH 129A, CS 146 (with a grade of "C-" or better in each) and previous programming experience in C/C++, or instructor consent.
Normal Grade Rules
3 units

Normal Grade Rules
3 units

Courses
Computer Science Department
Academic Year 2019-2020
Course Descriptions
July 1, 2019
ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE
CS 116B. Computer Graphics Algorithms
In-depth discussion of algorithms and techniques used in computer graphics and their implementation. Topics include: animation, fractals, anti-aliasing, fill algorithms, visible surface algorithms, color and shading, ray tracing, radiosity and texture maps. Substantial programming required.
Prerequisite: CS 116A (with a grade of "C-" or better) or instructor consent.
Notes: Offered only occasionally.
Normal Grade Rules
3 units

CS 122. Advanced Programming with Python
Advanced features of Python programming language, with emphasis on algorithmic theory and programming practice. Programming projects in linguistics, music, scientific computing, system administration, and bioinformatics.
Prerequisite: CS 146 (with a grade of "C-" or better) or instructor consent
Normal Grade Rules
3 units

CS 122A. Bioinformatics I
Introduction to the main public domain tools, databases and methods in bioinformatics. Analysis of algorithms behind the most successful tools, such as the local and global sequence alignment packages, and the underlying methods used in fragment assembly packages. Solution of complex biological questions requiring modification of standard code.
Prerequisite: BIOL 30 and BIOL 31, or CS 46A and CS 46B
Allowed Declared Majors: Biology, Chemistry, Computer Science
Normal Grade Rules
3 units

CS 122B. Bioinformatics II
Computational methods used for searching, classifying, analyzing, and modeling protein sequences. Tools for analyzing DNA and RNA sequences. More advanced topics, such as genetic algorithms and simulated annealing, which can be used to address folding problems.
Prerequisite: CS 123A.
Normal Grade Rules
3 units

CS 134. Computer Game Design and Programming
Architectures and object-oriented patterns for computer game design. Animation, simulation, user interfaces, graphics, and intelligent behaviors. Team projects using an existing game engine framework.
Prerequisite: CS 146 and either CS 151 or CMPE 135 (with a grade of "C-" or better in each); or instructor consent.
Normal Grade Rules
3 units

CS 143C. Numerical Analysis and Scientific Computing
See MATH 143C.
Normal Grade Rules
3 units

CS 143M. Numerical Analysis and Scientific Computing
See MATH 143M.
Normal Grade Rules
3 units

CS 144. Advanced C++ Programming
Advanced features of C++, including operator overloading, memory management, templates, exceptions, multiple inheritance, RTTI, namespaces, tools.
Prerequisite: CS 46B and CS 49C (with a grade of "C-" or better in each), or equivalent knowledge of object-oriented programming and C, or instructor consent.
Normal Grade Rules
3 units

CS 146. Data Structures and Algorithms
Implementations of advanced tree structures, priority queues, heaps, directed and undirected graphs. Advanced searching and sorting (radix sort, heapsort, mergesort, and quicksort). Design and analysis of data structures and algorithms. Divide-and-conquer, greedy, and dynamic programming algorithm design techniques.
Prerequisite: MATH 030, MATH 042, CS 049 (or equivalent knowledge of Java), and CS 046B (with a grade of "C-" or better in each); Computer Science, Applied and Computational Math or Software Engineering Majors only; or instructor consent.
Normal Grade Rules
3 units

CS 147. Computer Architecture
Introduction to the basic concepts of computer hardware structure and design, including processors and arithmetic logic units, pipelining, and memory hierarchy.
Prerequisite: CS 47 or CMPE 102 (with a grade of "C-" or better), Computer Science, Applied and Computational Math, or Software Engineering majors only; or instructor consent.
Normal Grade Rules
3 units

CS 149. Operating Systems
Fundamentals: Contiguous and non-contiguous memory management; processor scheduling and interrupts; concurrent, mutually exclusive, synchronized and deadlocked processes; files. Substantial programming project required.
Prerequisite: CS 146 or SE 146 (with a grade of "C-" or better). Computer Science, Applied and Computational Math or Software Engineering Majors only; or Instructor Consent
Normal Grade Rules
3 units

CS 151. Object-Oriented Design
Prerequisite: MATH 42, CS 46B, and CS 49 (or equivalent knowledge of Java) (with a grade of "C-" or better in each); Computer Science, Applied and Computational Math or Software Engineering majors only; or instructor consent.
Normal Grade Rules
3 units

CS 152. Programming Paradigms
Prerequisite: CS 151 or CMPE 135 (with a grade of "C-" or better); Computer Science, Applied and Computational Math or Software Engineering Majors only; or instructor consent.
Normal Grade Rules
3 units

CS 153. Concepts of Compiler Design
Theoretical aspects of compiler design, including parsing context free languages, lexical analysis, translation specification and machine-independent code generation. Programming projects to demonstrate design topics.
Prerequisite: CS 47/ or CMPE 102, CS 146, and CS 154 (with a grade of "C-" or better in each); Computer Science, Applied and Computational Math or Software Engineering majors only; or instructor consent.
Normal Grade Rules
3 units

CS 154. Formal Languages and Computability
Finite automata, context-free languages, Turing machines, computability.
Prerequisite: MATH 42 and CS 46B (with a grade of "C-" or better in each); Computer Science, Applied and Computational Mathematics, or Software Engineering, majors only; or instructor consent.
Normal Grade Rules
3 units

CS 155. Introduction to the Design and Analysis of Algorithms
Algorithm design techniques: dynamic programming, greedy algorithms, Euclidean and extended Euclidean algorithms, Discrete and Fast Fourier transforms. Analysis of algorithms, intractable problems and NP-completeness. Additional topics selected from: selection algorithms and adversary arguments, approximation algorithms, parallel algorithms, and randomized algorithms.
Prerequisite: CS 146 (with a grade of "C-" or better) or instructor consent.
Normal Grade Rules
3 units
CS 156. Introduction to Artificial Intelligence
Basic concepts and techniques of artificial intelligence: problem solving, search, deduction, intelligent agents, knowledge representation. Topics chosen from logic programming, game playing, planning, machine learning, natural language, neural nets, robotics.
Prerequisite: CS 146 and either CS 151 or CMPE 135 (with a grade of "C-" or better in each), or instructor consent.
Normal Grade Rules
3 units

CS 157A. Introduction to Database Management Systems
Prerequisite: CS 146 (with a grade of "C-" or better); Computer Science, Applied and Computational Math, or Software Engineering majors only, or instructor consent.
Normal Grade Rules
3 units

CS 157B. Database Management Systems II
Prerequisite: CS 157A (with a grade of "C-" or better); Computer Science, Applied and Computational Math, or Software Engineering Majors only, or instructor consent.
Normal Grade Rules
3 units

CS 157C. NoSQL Database Systems
Prerequisite: CS 157A with a "C-" or better
Normal Grade Rules
3 units

CS 158A. Computer Networks
Introduction to computer networks, including network layered architectures, local and wide area networks, mobile wireless networks, Internet TCP/IP protocol suite, network resource management, network programming, network performance, network security, network applications.
Prerequisite: CS 146, and CS 147 or CMPE 120, (with grades of "C-" or better in each), or instructor consent.
Normal Grade Rules
3 units

CS 158B. Computer Network Management
Principles and technologies of network management: reference models, functions (fault, configuration, performance, security and accounting management), management information, communication protocols, integration, and assessment. Network security and cyber defense: cryptography, key distribution, authentication protocols, network attacks, access control, and example systems.
Prerequisite: CS 158A or CMPE 148 (with a grade of "C-" or better), or instructor consent.
Normal Grade Rules
3 units

CS 159. Introduction to Parallel Processing
Major parallel architectures: shared memory, distributed memory, SIMD, MIMD. Parallel algorithms: techniques for scientific applications, measures of performance. Parallel programming: principles and implementations in various languages. Assignments on available parallel and vector computers.
Prerequisite: CS 146 (with a grade of "C-" or better); Computer Science, Applied and Computational Math, or Software Engineering Majors only, or instructor consent.
Normal Grade Rules
3 units

CS 160. Software Engineering
Software engineering principles, software process and process models, requirements elicitation and analysis, design, configuration management, quality control, project planning, social and ethical issues. Required team-based software development, including written requirements specification and design documentation, oral presentation, and tool use.
Prerequisite: CS 146, CS 151 (with a grade of "C-" or better in each), CS 100W (with a grade of "C-" or better) or instructor consent. Computer Science and Software Engineering Majors only.
Normal Grade Rules
3 units

CS 161. Software Project
A substantial project based on material from an advanced area of computer science. Includes lectures on the project topic and the design and testing of software systems. At least 50% of the course grade to be based on the project.
Prerequisites: CS 160 (with a grade of "C-" or better) or instructor consent. Computer Science and Software Engineering Majors only.
Normal Grade Rules
3 units

CS 166. Information Security
Fundamental security topics including cryptography, protocols, passwords, access control, software security, and network security. Additional topics selected from multilevel security, biometrics, tamper-resistant hardware, information warfare, e-commerce, system evaluation and assurance, and intrusion detection.
Prerequisite: CS 146 (with a grade of "C-" or better) and either CS 47 or CMPE 102 or CMPE 120 (with a grade of "C-" or better); Computer Science, Applied and Computational Math, or Software Engineering Majors only, or instructor consent.
Normal Grade Rules
3 units

CS 174. Server-side Web Programming
Development and deployment of multi-tier web-based applications. Introduction to HTML, XML, enterprise design patterns, web services and database access.
Prerequisite: CS 146 (with a grade of "C-" or better); Computer Science, Applied and Computational Math, or Software Engineering Majors only.
Normal Grade Rules
3 units

CS 175. Mobile Device Development
Mobile Platform APIs including those for networking, touch, graphics, data, location, and camera. Testing and profiling on devices and emulators/simulators.
Prerequisites: CS 047, and knowledge of Java equivalent to that of CS 069A or CS 049J
Normal Grade Rules
3 units

CS 180. Individual Studies
Individual study in a specific field.
Prerequisite: Department chair consent. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-3 units

CS 180H. Individual Studies for Honors
Senior project on advanced topics in computer science as determined by the instructor. Written paper or oral presentation of the project required. Intended for students graduating with departmental honors.
Prerequisite: At least junior standing as computer science major. GPA of 3.5 or higher in the major and department chair consent.
Credit / No Credit
3 units

CS 185C. Advanced Practical Computing Topics
Computing topics of current interest in industrial practice. Emphasis on effective use and integration of software/hardware. Different topics may be offered at different times in a short-course lecture/lab format and may be repeated for credit.
Prerequisite: Varies with topic.
Repeatable for credit
Normal Grade Rules
3 units
CS 190. Internship Project
Work on an approved semester-long paid project at an industrial site. Meet once per week on campus. Progress reports, oral presentations, final report, and evaluation by project supervisor will be used to demonstrate the acquisition of skills identified as goals prior to the start of the assignment.
Prerequisite: CS 146 (with a grade of “C-” or better) or graduate standing, selection by a company, and instructor consent
Repeatable for credit
Normal Grade Rules
1 unit

CS 190I. Internship Project
Work on an approved semester-long paid project at an industrial site. Meet once per week on campus. Progress reports, oral presentations, final report, and evaluation by project supervisor will be used to demonstrate the acquisition of skills identified as goals prior to the start of the assignment.
Prerequisite: CS 146 (with a grade of “C-” or better) or graduate standing, selection by a company, and instructor consent
Normal Grade Rules
3 units

GRADUATE

CS 200W. Graduate Technical Writing
Graduate technical writing workshop to develop advanced communication skills that will meet the professional needs of computer scientists, along with research methodologies and proper documentation for the master’s thesis project. (This course does NOT satisfy the undergraduate GE Area Z requirement.)
Prerequisite: Graduate standing.
Note: This course satisfies graduate-level GWAR in this master’s program.
No Credit
GE: GWAR
3 units

CS 216. Geometric Modeling
Representation of curves and surfaces, basic differential geometry, solid modeling fundamentals, implementation considerations.
Prerequisite: CS 116A or instructor consent.
Normal Grade Rules
3 units

CS 218. Topics in Cloud Computing
Topics in cloud computing, including distributed system models, virtual machines, virtualization, cloud platform architectures (IaaS, PaaS, SaaS), service-oriented architectures, cloud programming and software environments, peer-to-peer computing, ubiquitous cloud, cloud security and trust management.
Prerequisite: CS 149
Normal Grade Rules
3 units

CS 223. Bioinformatics
The course investigates the main algorithms for solving computational problems in bioinformatics. Methods will include Hidden Markov Models for gene prediction and protein profiling, and Genetic Algorithms for biological sequence analysis and structure prediction. Students will be given programming projects.
Prerequisite: CS 123A or CS 155
Normal Grade Rules
3 units

CS 235. User Interface Design
Human-computer interaction principles. Direct manipulation, focus plus context, interaction history, interfaces for websites and website collections; usability testing; role of metaphors; case studies; advanced topics include information visualization, interfaces for collaboration, intelligent interfaces, and software agents.
Prerequisite: CS 130 or CS 116A, or instructor consent.
Normal Grade Rules
3 units

CS 243A. Advanced Numerical Analysis
See MATH 243A.
Normal Grade Rules
3 units

CS 243B. Advanced Topics in Numerical Analysis
See MATH 243B.
Normal Grade Rules
3 units

CS 247. Advanced Computer Architecture
Advanced topics in vector architectures, including pipelined architectures, dataflow computers, VLSI architectures, butterfly connections; bus and memory architectures; cache structures; hardware implementations of algorithms.
Prerequisite: CS 147 and CS 249 or instructor consent.
Normal Grade Rules
3 units

CS 249. Distributed Computing
Current issues in operating systems, including multiprocessor systems and distributed computing, networks, security and performance. Case studies of current operating systems.
Prerequisite: CS 149 or instructor consent.
Normal Grade Rules
3 units

CS 251A. Object-Oriented Analysis
Emphasizes the important concepts, activities, and artifacts of the design phase of object-oriented software development. CASE tools and UML are used to model application domain data, workflows, system requirements, deployment, and life cycles.
Prerequisite: CS 160 or instructor consent.
Normal Grade Rules
3 units

CS 251B. Object-Oriented Design
Course covers important concepts, activities, and artifacts of the design phase of object-oriented software development. Topics include design metrics, design patterns, refactoring, frameworks, and testing.
Prerequisite: CS 160 or instructor consent.
Normal Grade Rules
3 units

CS 252. Advanced Programming Language Principles
Language design and paradigms, including concepts underlying functional, logic, object-oriented and parallel paradigms. Theoretical foundations, including lambda calculus, denotational and axiomatic semantics. Proofs of program correctness. Programming projects emphasizing different aspects of language design.
Prerequisite: CS 152 or instructor consent.
Normal Grade Rules
3 units

CS 253. Advanced Compiler Design
Prerequisite: CS 153 or instructor consent.
Normal Grade Rules
3 units

CS 254. Theory of Computation
Models of computation; decidability, complexity measures; hierarchies; P, NP and other complexity classes; intractable problems.
Prerequisite: CS 154 or instructor consent.
Normal Grade Rules
3 units

CS 255. Design and Analysis of Algorithms
Randomized algorithms. Parallel algorithms. Distributed algorithms. NP-completeness of particular problems. Approximation algorithms.
Prerequisite: CS 155 or instructor consent.
Normal Grade Rules
3 units

CS 256. Topics in Artificial Intelligence
Introduction to topics in artificial intelligence such as problem solving methods, game playing, understanding natural languages, pattern recognition, computer vision and the general problem of representing knowledge. Students will be expected to use LISP.
Prerequisite: CS 156 or instructor consent.
Normal Grade Rules
3 units
CS 257. Database System Principles
Design management and performance issues on: file organization and access methods, buffer management and storage management. Query processing and query optimization, transaction management, recovery, and concurrency control techniques: Reliability, protection and integrity techniques. Extensive programming project.
Prerequisite: CS 157B or instructor consent.
Normal Grade Rules
3 units

CS 258. Computer Communication Systems
Design, analysis and survey of the latest advancements in network and Internet technologies, such as supporting TCP/IP over various network media, software-defined networks, networks supporting cloud computing, network security, peer-to-peer and overlay networks, and quality of services.
Prerequisite: CS 158A or instructor consent.
Normal Grade Rules
3 units

CS 259. Advanced Parallel Processing
An advanced hardware architecture and software development class focused on multi-threaded, parallel processing algorithms and techniques. A study of high-performance parallel hardware architectures and parallel programming languages. Applications of parallel and GPU processing, including computer gaming.
Normal Grade Rules
3 units

CS 262. Randomized Algorithms and Applications
Design and analysis of algorithms which incorporate randomness in their design. Applications will be given in several of the following areas: data structures, pattern matching, cryptography, parallel computing, distributed computing, and interactive proof systems.
Prerequisite: CS 154 or CS 155.
Normal Grade Rules
3 units

CS 265. Cryptography and Computer Security
Security mechanisms for protecting information in computer systems and networks. Includes cryptography and its applications to security services in distributed systems, mathematics of cryptography, access control, protection models, security policies, design of secure systems, firewalls, and intrusion detection.
Prerequisite: CS 149 or instructor consent.
Normal Grade Rules
3 units

CS 266. Topics in Information Security
Advanced topics in the area of information security. Content differs with each offering. Possible topics include, but are not restricted to: Network Security, Software Reverse Engineering and Cryptanalysis.
Prerequisite: CS 166 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

CS 267. Topics in Database Systems
Advanced topics in the area of database and information systems. Content differs in each offering. Possible topics include though not restricted to: Data Mining, Distributed Databases and Transaction Processing.
Prerequisite: CS 157B
Repeatable for credit
Normal Grade Rules
3 units

CS 268. Topics in Wireless Mobile Networking
Advanced topics in the area of wireless mobile networking. Content may differ in each offering. Possible topics include though not restricted to: wireless local and metropolitan area networks, mobile Internet, sensor networks, mobile computing, wireless network security. Repeatable when topic changes.
Prerequisite: CS 158A.
Repeatable for credit
Normal Grade Rules
3 units

CS 271. Topics in Machine Learning
Variable topics in machine learning. Content may include hidden Markov models, principal component analysis, support vector machines, clustering, boosting, random forests, neural networks, and deep learning. Relevant applications will be covered.
Normal Grade Rules
3 units

CS 274. Topics in XML and Web Intelligence
XML: DTD, Schema, Namespace, XSLT, XPath, Xquery, Encryption, Signature in XML, applications in vertical industries; Semantic Web, RDF, RDFS, Ontology, Inferences; Web services, relevant tools for search, inference, data conversion in XML, Semantic web applications.
Prerequisites: CS 160 or instructor consent.
Normal Grade Rules
3 units

CS 280. Graduate Individual Studies
Individual study in specific field.
Prerequisite: Department chair consent. Not available to Open University Students.
Repeatable for credit
Credit / No Credit
1-3 units

CS 286. Advanced Topics in Computer Science
Selected topics in computer science. Topics vary each semester and may be repeated for a maximum of 6 units.
Prerequisite: Suitable upper division background in mathematics and computer science as set by instructor.
Repeatable for credit
Normal Grade Rules
3 units

CS 297. Preparation for Writing Project or Thesis
Supervised individual research and project work to prepare for a master’s writing project or thesis.
Prerequisite: Fully classified standing in the MSCS program, department chair consent. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
3 units

CS 298. Master’s Writing Project
Supervised individual research of an advanced character for the conclusion of the masters project.
Prerequisite: Fully classified standing in the MS in Bioinformatics program and department chair consent.
Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
3 units

CS 299. Master’s Thesis
Supervised individual research and admission to candidacy for the MS degree. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
3 units
Connie L. Lurie College of Education Courses

EDUCATION

LOWER DIVISION

EDUC 080. Independent Study
Supervised study related to the field of education appropriate to lower division undergraduate students. Individuals work on special topics by arrangement with a faculty member.
Credit / No Credit
1-3 units

UPPER DIVISION

EDUC 157SL. Community Action/Community Service
See COMM 157SL.
Normal Grade Rules
GE: S
3 units

EDUC 186. Using Instructional Media
Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GRADUATE

EDUC 298. Individualized Studies in Education
Supervised study in school administrations for both the preliminary and professional services credential programs.
Prerequisite: Admission to Graduate department, EDAD 200, EDAD 270 or advisor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units
Creative Arts Program Courses

CREATIVE ARTS

LOWER DIVISION

CA 060. Creativity Matters
Study why creativity matters to you from imagining possible career paths to improving communication, expressing ideas, and flourishing over the course of one's lifetime. Creativity is not just for artists and inventors! It is a human faculty that matters for life. GE Area: E
Normal Grade Rules
GE: EE
3 units

CA 070. Visual & Media Arts for K-8 Teachers
Introductory and interdisciplinary course in the Visual Arts and Media Arts designed for students interested in teaching in K-8 classrooms. Basic techniques and processes a prospective teacher needs in the Visual Arts and Media Arts to instruct students. Students actively engage in the art forms as well as explore standards-based instructional strategies, classroom management strategies, and aesthetic inquiry. Introduction to Arts Education research, advocacy, and community arts resources.
Normal Grade Rules
3 units

CA 075. Performing Arts for K-8 Teachers
Basic dance, theatre, and music techniques and processes a prospective teacher needs to create dance/movement, vocal and instrumental music, creative dramatics and formal theatre with K-8 students. Students actively engage in the three arts disciplines, as well as explore standards-based instructional strategies, classroom management strategies, and aesthetic inquiry. Students are introduced to Performing Arts Education research, advocacy, and community arts resources.
Normal Grade Rules
3 units

CA 076. Performing Arts for K-8 Teachers
CA 095. Introduction to Queer Arts
Exploration of the ways that LGBTQ individuals and groups have used the arts, in various times and places, to make their lives, communities, and selves meaningful and to resist the domination of non-queer cultures. GE Area: C1
Normal Grade Rules
GE: Cs
3 units

CA 095. Introduction to Queer Arts
CA 124. Literature and Religious Experience
See RELS 124
Repeatable for credit
Normal Grade Rules
3 units

CA 124. Literature and Religious Experience
See RELS 124
Repeatable for credit
Normal Grade Rules
3 units

CA 134. Religion Film & Media
See RELS 134
Normal Grade Rules
3 units

CA 139. Teaching Diversity through Art
See ART 139
Normal Grade Rules
3 units

CA 150. Field Experience in the Arts
See ARED 150.
Normal Grade Rules
3 units

CA 172. The Arts in U.S. Society
Study of American arts and artists in their aesthetic, social, and political contexts, focusing on 20th and 21st centuries. Arts examined include architecture, poetry, music, visual arts, dance, theatre, performance art, and fiction. Special emphasis on issues of cultural diversity. GE Area: S
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LDD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: S
3 units

CA 173. Thinking About Contemporary World Arts
An interdisciplinary course on contemporary arts and culture which investigates connections between arts disciplines and world cultures. The course uses critical and creative thinking as the lens to focus on issues in the arts, especially personal and cultural identities. GE Area: V
Prerequisite: Passage of the Writing Skills Test (WST) or ENGL/LDD 100A with a C or better (C- not accepted), completion of Core General Education and upper division standing are prerequisites to all SJSU studies courses. Completion of, or co-registration in, 100W is strongly recommended.
Note: All SJSU Studies courses require completion of the WST and upper division standing.
Normal Grade Rules
GE: V
3 units

CA 174. Special Topics Seminar
In-depth study of historical and/or contemporary topics in the interdisciplinary creative arts. Content changes each semester.
Course repeatable when content changes
Prerequisite: Upper division standing
Repeatable for credit
Normal Grade Rules
3 units

CA 175. Seminar in Creative Process
An exploration of the creative process across the creative domains and of the use of practice-based research in the humanities and creativity studies.
Prerequisite: CA60 or upper division standing
Repeatable for credit
Normal Grade Rules
3 units

CA 176. Creativity and Creative Leadership
A course focusing on mastering current theories about creativity, adapting theoretical knowledge for an individual/personal strategy, and embodying both the knowledge and strategy in a collaborative project.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

CA 177. Interdisciplinary Arts for Teaching
Creativity in teaching and learning-a course designed for prospective teachers; connections between the various arts disciplines, integrating other core subjects taught in California’s classrooms.
Normal Grade Rules
3 units

CA 178. Senior Seminar in Creative Arts
A capstone seminar in two sections. First, students present and facilitate discussion of a major book or topic in creative arts or, when appropriate, humanities. Second, students devote themselves to senior projects (a written thesis or work in other media).
Prerequisite: CA 172 or CA 173.
Normal Grade Rules
3 units

CA 180. Individual Studies
Individual work on special topics, by arrangement.
Prerequisite: Coordinator approval.
Notes: Mixed grading.
Repeatable for credit
Credit / No Credit
1-4 units

CA 190. Field Work/Internship
Pre-professional experience in arts management/program design/implementation in a public setting.
Prerequisite: Coordinator approval.
Repeatable for credit
Credit / No Credit
1-3 units

CA 194. Community Building through Arts Orgs
In-depth study of strategies and methods for building community through creative arts organizations, both for-profit and non-profit.
Prerequisite: Upper Division Standing
Normal Grade Rules
3 units
# Dance Courses

## LOWER DIVISION

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DANC 010</td>
<td>Dance Appreciation</td>
<td>A survey of dance as art in the Western world. The course examines the diversity of people, cultures and events that led to the development of Ballet, Modern, Jazz, Tap and Musical Theatre Dance. GE Area: C1</td>
</tr>
<tr>
<td>DANC 012</td>
<td>Ensemble Dance Rehearsal and Performance</td>
<td>ENS. Training and performance experience in the field of dance. Fully-staged productions of original professional choreographic works. Pre-requisite: Audition and Instructor Consent</td>
</tr>
<tr>
<td>DANC 040A</td>
<td>Topics in Modern Dance I</td>
<td>Training experience in the field of beginning modern dance with varied topics. Can be repeated when topic changes.</td>
</tr>
<tr>
<td>DANC 041A</td>
<td>Topics in Ballet I</td>
<td>Training experience in the field of beginning ballet dance with varied topics. Can be repeated when topic changes.</td>
</tr>
<tr>
<td>DANC 042A</td>
<td>Topics in Jazz Dance I</td>
<td>Training experience in the field of beginning Jazz dance with varied topics. Can be repeated when topic changes.</td>
</tr>
<tr>
<td>DANC 043</td>
<td>Dance Improvisation</td>
<td>Introduction to dance improvisation, developing skills in creativity in preparation for DANC 145A. Prerequisite: Intermediate technique standing and permission of instructor.</td>
</tr>
<tr>
<td>DANC 044A</td>
<td>Beginning Lindy Hop and Night Club Swing</td>
<td>See KIN 045A. Normal Grade Rules GE: PE 1 unit</td>
</tr>
<tr>
<td>DANC 046A</td>
<td>Beginning Ballet Dance</td>
<td>See KIN 046A. Normal Grade Rules GE: PE 1 unit</td>
</tr>
<tr>
<td>DANC 046B</td>
<td>Intermediate Social Dance</td>
<td>See KIN 046B. Normal Grade Rules GE: PE 1 unit</td>
</tr>
<tr>
<td>DANC 048A</td>
<td>Beginning Latin Dance</td>
<td>See KIN 048A. Normal Grade Rules GE: PE 1 unit</td>
</tr>
<tr>
<td>DANC 049A</td>
<td>Topics in Tap Dance I</td>
<td>Training and experience in the field of beginning tap dance with varied topics. Can be repeated when topic changes.</td>
</tr>
<tr>
<td>DANC 051A</td>
<td>Dance Production</td>
<td>Practical experience in technical aspects of producing a dance concert. Prerequisite: Instructor consent</td>
</tr>

</table>

## DANC 112. ENS: Dance Rehearsal and Performance

ENS: Training and performance experience in the field of dance. Fully-staged productions of original professional choreographic works of varying styles. Prerequisite: Audition and instructor consent Misc/Lab: Lab hours required. Repeatable for credit
DANC 140B. Topics in Modern Dance IV
Training experience in the field of advanced modern dance with varied topics. Can be repeated for credit when topic changes.
Prerequisite: DANC 140A and permission of instructor.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
2 units

DANC 141B. Topics in Ballet IV
Training experience in the field of advanced ballet with varied topics. Can be repeated for credit when topic changes.
Prerequisite: DANC 141A and permission of instructor.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
2 units

DANC 142B. Topics in Jazz Dance IV
Training experience in the field of advanced Jazz dance with varied topics. Can be repeated for credit when topic changes.
Prerequisite: DANC 142A and permission of instructor.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
2 units

DANC 144A. Dance History and Repertory
History of dance and dances from ancient time to the court of King Louis XIV. Selected repertory works.
Prerequisite: Upper division standing.
Misc/Lab: Lecture 2 hours/activity 3 hours.
Normal Grade Rules
3 units

DANC 144B. Dance History and Repertory
History of dance and dances from the court of King Louis XIV through the twentieth century. Selected repertory works.
Prerequisite: Upper division standing.
Misc/Lab: Lecture 2 hours/activity 3 hours.
Normal Grade Rules
3 units

DANC 145A. Choreography I
Presentation and criticism of solo choreography, introduction to improvisational techniques.
Prerequisite: DANC 043 and Audition.
Misc/Lab: Activity 4 hours.
Normal Grade Rules
3 units

DANC 145B. Choreography II
Styles; forms; use of improvisation; presentation and criticism of small group dance.
Prerequisite: DANC 145A and Audition.
Misc/Lab: Activity 4 hours.
Normal Grade Rules
3 units

DANC 145C. Choreography III
Practical application of external style in relationship with art from tribal to contemporary times. Concepts, styles and forms of modern dance in the twentieth century.
Prerequisite: DANC 145B and Audition.
Misc/Lab: Activity 4 hours.
Repeatable for credit
Normal Grade Rules
3 units

DANC 147A. Dance Seminar
Course geared toward the understanding of a broader perspective of the Art of Dance with emphasis on current trends, development of personal artistic statement and introductory teaching techniques.
Prerequisite: Senior standing and completion or concurrent enrollment in DANC 144A and/or DANC 144B.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

DANC 148. Children's Dance
Study of dance for children as personal expression through movement. Use of creative dance as a tool for the enrichment of learning. Experiencing dance in a variety of cultures.
Prerequisite: Upper division standing.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

DANC 150A. Kinesiology I
This course is designed to help provide the dancer with essential information about structure and function of the human body and the achievement of optimal performance through the science of human motion.
Misc/Lab: Lecture 2 hours/lab 2 hours.
Normal Grade Rules
3 units

DANC 150B. Kinesiology II
This course is designed to help provide the dancer with essential information about injury prevention and introduce active somatic techniques to increase muscular efficiency, balance and overall awareness of the body.
Prerequisite: DANC 150A.
Misc/Lab: Lecture 2 hours/activity 2 hours.
Normal Grade Rules
3 units

DANC 151. Introduction to Dance Pedagogy
Examines methods and modes of teaching dance as an art form, and embodied practice for producing and constructing knowledge and as movement research. Course investigates both theory and practice with concentrated focus on experiential, relational and holistic learning modes.
Prerequisite: DANC 54 and instructor approval.
Misc/Lab: 1 hour lecture/ 2 hours activity
Normal Grade Rules
2 units

DANC 154A. Topics in Dance Technique III
Intermediate/advanced dance with varied topics.
Prerequisite: Audition or Instructor Approval.
Repeatable for credit
Normal Grade Rules
GE: PE
3 units

DANC 154B. Topics in Dance Technique IV
Advanced Dance with varied topics.
Prerequisite: Audition or Instructor Approval.
Repeatable for credit
Normal Grade Rules
GE: PE
3 units

DANC 186. Choreographing the Musical
Study and practice of staging and choreographing musical comedy. Analysis of scripts and choreographic techniques.
Prerequisite: DANC 75, DANC 145A and permission of instructor.
Misc/Lab: Lecture/activity 3 hours.
Normal Grade Rules
3 units

DANC 194. Dance Repertory Activity
Training and performance experience in the field of dance. Fully-staged productions of original student choreographic works. Can be repeated up to 12 times when repertory changes.
Prerequisite: DANC 51A or instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1 unit

DANC 198. Internship in Dance
Supervised internship with approved dance organization.
Written evaluation submitted by organizations and student after field work.
Prerequisite: Instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units
Design Department Courses

ANIMATION AND ILLUSTRATION

LOWER DIVISION

ANI 010. Light and Optics
An investigation into the physical properties of light and optics relevant to the visualization of artwork for the screen arts industry.
Prerequisite: BFA Animation/Illustration majors only
Normal Grade Rules
3 units

ANI 011. Illustration Fundamentals I
Basic principles of animation and illustration stressing composition, sequential visual storytelling, value drawing and other visual art techniques utilized by professionals in the screen arts industry.
Prerequisite: BA Design Studies or BFA Animation/Illustration majors only
Normal Grade Rules
3 units

ANI 012. Conceptual Illustration
Advanced course in illustration professionalism, stressing individual responses to assignments that typify those expected of freelance illustration providers. Emphasis on individual expression and development of personal direction.
Prerequisite: ANI 122, passage of Mid-Program Review
Normal Grade Rules
3 units

ANI 013. Drawing for Animation/Illustration I
Principles of drawing for illustration and animation: gesture, construction, anatomy and technique. An intensive study of the human figure from life, and its use in working in animation and the screen arts industry.
Prerequisite: ANI 011, and BFA Animation/Illustration
Normal Grade Rules
3 units

ANI 014. Introduction to 3D Modeling
Emphasis is on generating an in-depth understanding of digital media using commercial 2-D and 3-D software. Students are introduced to the underlying mathematical and conceptual processes of computer graphics.
Prerequisite: ANI 011 and BFA Animation/Illustration major only
Normal Grade Rules
3 units

ANI 061. Introduction to 3D Animation
Basic concepts and professional practices used in 3D computer animation. Application of traditional principles of animation to the 3D digital environment.
Prerequisite: BFA Animation/Illustration majors only
Normal Grade Rules
3 units

ANI 071. Visual Principles
Presents concepts of 2D design as they apply to the creation of sequential narrative imagery for the screen arts.
Prerequisite: BFA Animation/Illustration Majors only
Normal Grade Rules
3 units

ANI 101. Visual Storytelling
Basic principles of animation and illustration stressing composition, sequential visual storytelling, value drawing and other visual art techniques utilized by professionals in the screen arts industry.
Prerequisite: ANI 010 and ANI 011
Normal Grade Rules
3 units

ANI 111. Drawing for Animation/Illustration II
Principles of drawing for illustration and animation: gesture, construction, anatomy and technique. An intensive study of the human figure from life, and its use in working in animation and the screen arts industry.
Prerequisite: ANI 123; Allowed Declared Majors: Animation Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ANI 121. Illustration Fundamentals II
Exploration of basic illustration problems involving studies in color, light, painting technique, and their application to the screen arts industry.
Prerequisite: ANI 021, BFA Animation/Illustration Major
Normal Grade Rules
3 units

ANI 122. Illustration Fundamentals III
Completion of a complex painting incorporating knowledge of drawing principles, construction, composition, value and technique.
Prerequisite: ANI 121, Allowed declared Animation major only
Misc/Lab Activity 6 hours.
Normal Grade Rules
3 units

ANI 123. Visual Development I
Narrative problems for illustrative assignments, professional processes and technical accomplishment.
Prerequisite: ANI 122, Allowed Declared Majors: Animation Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ANI 124. Visual Development II
Advanced visual development projects with emphasis on attaining professional standards. Explores experimentation with the exaggeration and abstraction of realistic imagery to realize new, stylized imagery.
Prerequisite: ANI 123; Allowed Declared Majors: Animation Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ANI 131. 2D Animation II
Fundamentals of 2D animation involving the completion of a series of basic exercises in motion, action analysis and kinetics.
Prerequisite: ANI 031, Passage of Mid-Program Portfolio Review; Allowed declared Animation major only
Misc/Lab Activity 6 hours.
Normal Grade Rules
3 units

ANI 132. 2D Animation III
Demonstrate understanding of 2D animation principles through the completion of a series of advanced exercises in motion study, action analysis, pre-production, and narrative development; culminating in the completion of a short, animated film.
Prerequisite: ANI 131
Normal Grade Rules
3 units

ANI 021. Color Principles for Screen Arts
Exploration of basic illustration problems involving studies in color, light, painting technique, and their application to color scripting in the screen arts industry.
Prerequisites: Allowed declared Animation major only
Note: ANI 21 (formerly ANI 14) is treated as a repeat for students who have taken ART 14. Misc/Activity: 6 hours activity.
Normal Grade Rules
3 units

ANI 022. Illustration Fundamentals II
Principles of drawing for illustration and animation: gesture, construction, anatomy and technique. An intensive study of the human figure from life, and its use in working in animation and the screen arts industry.
Prerequisite: ANI 021, BFA Animation/Illustration Major
Normal Grade Rules
3 units

ANI 071. Visual Principles
Presents concepts of 2D design as they apply to the creation of sequential narrative imagery for the screen arts.
Prerequisite: BFA Animation/Illustration Majors only
Normal Grade Rules
3 units

ANI 101. Visual Storytelling
Basic principles of animation and illustration stressing composition, sequential visual storytelling, value drawing and other visual art techniques utilized by professionals in the screen arts industry.
Prerequisite: ANI 010 and ANI 011
Normal Grade Rules
3 units

ANI 111. Drawing for Animation/Illustration II
Principles of drawing for illustration and animation: gesture, construction, anatomy and technique. An intensive study of the human figure from life, and its use in working in animation and the screen arts industry.
Prerequisite: ANI 123; Allowed Declared Majors: Animation Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ANI 121. Illustration Fundamentals II
Exploration of basic illustration problems involving studies in color, light, painting technique, and their application to the screen arts industry.
Prerequisite: ANI 021, BFA Animation/Illustration Major
Normal Grade Rules
3 units

ANI 122. Illustration Fundamentals III
Completion of a complex painting incorporating knowledge of drawing principles, construction, composition, value and technique.
Prerequisite: ANI 121, Allowed declared Animation major only
Misc/Lab Activity 6 hours.
Normal Grade Rules
3 units

ANI 123. Visual Development I
Narrative problems for illustrative assignments, professional processes and technical accomplishment.
Prerequisite: ANI 122, Allowed Declared Majors: Animation Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ANI 124. Visual Development II
Advanced visual development projects with emphasis on attaining professional standards. Explores experimentation with the exaggeration and abstraction of realistic imagery to realize new, stylized imagery.
Prerequisite: ANI 123; Allowed Declared Majors: Animation Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

ANI 131. 2D Animation II
Fundamentals of 2D animation involving the completion of a series of basic exercises in motion, action analysis and kinetics.
Prerequisite: ANI 031, Passage of Mid-Program Portfolio Review; Allowed declared Animation major only
Misc/Lab Activity 6 hours.
Normal Grade Rules
3 units

ANI 132. 2D Animation III
Demonstrate understanding of 2D animation principles through the completion of a series of advanced exercises in motion study, action analysis, pre-production, and narrative development; culminating in the completion of a short, animated film.
Prerequisite: ANI 131
Normal Grade Rules
3 units
ANI 133. Animation Production - Storyboarding
Special problems in animation studies: storyboarding, sequential visual narrative, film making, professional practices and portfolio preparation.
Pre/Co-requisite: ANI 132
Normal Grade Rules
3 units

ANI 134. Animation Production II
Concepts of sound design, video editing, compositing, and post production; principles necessary to put advanced animation skills into practical application for film production.
Prerequisite: Passage of Mid-Program Portfolio Review, Instructor Consent
Normal Grade Rules
3 units

ANI 141. Digital Modeling I
Intermediate level 3D digital modeling techniques using current industry standard software for the creation of 3D digital models. Introduction to the concept of production pipelines, with focus on modeling.
Prerequisite: ANI 041
Normal Grade Rules
3 units

ANI 142. Digital Modeling II
Advanced level 3D digital modeling techniques using current industry standard software for the creation of 3D digital models. Students re-investigate the character pipeline with focus on human characters with complicated costuming and accessories.
Prerequisite: ANI 141
Normal Grade Rules
3 units

ANI 161. Digital Animation I
Creation of believable movement by applying the traditional principles of animation to 3D digital characters, focusing on body mechanics, with emphasis on the building blocks of an animated scene, and the workflow from planning phase to final animation.
Prerequisite: ANI 061 and Passage of Mid-Program Portfolio Review
Normal Grade Rules
3 units

ANI 162. Digital Animation II
Application of the traditional principles of animation for intermediate level 3D character animation, with focus on arcs, overlapping action, spacing, squash and stretch, strong posing and silhouette. In terms of workflow, the emphasis is on achieving a strong blocking more efficiently, and on techniques for polishing the animation.
Prerequisite: ANI 161
Normal Grade Rules
3 units

ANI 175. Professional Practices in Entertainment Design
Current professional practices in the field of Entertainment Design. Technically and conceptually sophisticated projects foster a deeper understanding of narrative, stylization, individual point of view, acting and character, through hands-on creative work, class critiques and discussions.
Prerequisite: Instructor Consent
Normal Grade Rules
3 units

ANI 178. Animation / Illustration Internship
Professional practice in a selected field relevant to current practices in the screen arts industry.
Prerequisite: Program and Supervisor Approval; Allowed declared Animation major only
Repeatable for credit
Credit / No Credit
1-6 units

ANI 179. Special Topics in Animation/ Illustration
Special Topics in Animation and Illustration: Repeatable when topic changes for up to 6 units.
Prerequisite: ANI 124, ANI 142 or ANI 162 AND Passage of Mid-Program Portfolio Review
Repeatable for credit
Normal Grade Rules
3 units

ANI 180. Individual Studies
Special topics or projects by arrangement with instructor
Prerequisites: Upper-division standing in Animation/ Illustration; Allowed declared Animation major only
Repeatable for credit
Credit / No Credit
1-6 units

ANI 185. Senior Seminar Animation/Illustration
Special topics or projects by arrangement with faculty
Prerequisite: Art and design majors with upper division standing.
Repeatable for credit
Credit / No Credit
1-4 units

ANI 188. Senior Project Animation/Illustration
A project demonstrating professional competence in area of concentration. A gallery exhibition with the approval of the student’s advisory committee is required.
Prerequisite: ANI 198; Allowed declared Animation major only
Misc/Activity: 6 hours activity
Normal Grade Rules
3 units
DSGN 197. BA Senior Project
In-depth study of current issues in the design fields. Utilizes interdisciplinary approaches and concepts to provide a capstone experience for the design studies student.
Prerequisite: DSGD 99 and DSGD 100
Misc/Lab: Activity 6 hours.
   Normal Grade Rules
   3 units

GRADUATE

DSGD 248. Spatial Visualization Tech in Urb Plan
See URBP 248.
   Normal Grade Rules
   1-4 units

GRAPHIC DESIGN

LOWER DIVISION

DSGD 063. Fundamental Graphic Visualization
Critical examination and theories on how to work with two-dimensional compositional space and the interrelated basic principles, attributes, and elements of graphic design, includes the relationships between some production methods and materials.
Normal Grade Rules
   3 units

DSGD 083. Digital Applications: Basics
The fundamental use of features and functions inherent within graphic software programs for graphic design.
Normal Grade Rules
   3 units

DSGD 099. Introduction to Typography
Study and demonstration of letterforms and fundamental typographic principles. Emphasis on the vocabulary of typographic form and its relationship to message/purpose.
Prerequisite: CD majors: ANI 11 or ART 24, DSGD 83; ANI majors: ANI 11, ANI 11, IT majors: DSIT 33, DSIT 33, ID majors: completion of DSID 22 or completion of DSGD 83 and concurrently enrolled in DSID 22
Misc/Lab: Activity 6 hours
   Normal Grade Rules
   3 units

UPPER DIVISION

DSGD 100. Visual Communication & Process
Problems explore methods of visual organization used in graphic communication. Course promotes the critical examination and development of ideas, two-dimensional spaces, and three-dimensional structures, including the relationship between some production methods and materials.
Prerequisite: ANI 11 (or ART 24 or DSID 21 or DSIT 10), DSGD 063, DSGD 083 (or ANI 50 or DSID 22, DSIT 83), DSGD 99
   Normal Grade Rules
   3 units

DSGD 102. Intermediate Typography
Application of typographic principles to a diverse series of graphic design problems utilizing text and display letterforms, organizational systems, fundamental design theories and conceptual innovation.
Prerequisite: Pass BFA portfolio review, DSGD 104
   Normal Grade Rules
   3 units

DSGD 103A. Advanced Typography I
Advanced conceptual investigations, verbal and visual problem solving utilizing typography and image.
Prerequisite: Pass BFA Portfolio Review, DSGD 105, DSGD 186
   Normal Grade Rules
   3 units

DSGD 103B. Advanced Typography II
Capstone conceptual investigations, verbal and visual problem solving utilizing typography and image.
Prerequisite: Pass BFA Portfolio Review, DSGD 105, DSGD 186
   Normal Grade Rules
   3 units

DSGD 104. Introduction to Graphic Design
Familiarization to form and message development.
Emphasis on visual concepts and fundamental design theory. Course is repeatable for a total of 6 units.
Prerequisite: DSGD 100, DSGD 99
   Repeatable for credit
   Normal Grade Rules
   3 units

DSGD 105. Intermediate Graphic Design
Development of concepts combining image/form, message, typography and function with fundamental design theory. Course is repeatable for a total of 6 units.
Prerequisite: Pass BFA Portfolio Review, DSGD 102, DSGD 110
   Normal Grade Rules
   3 units

DSGD 106. Advanced Graphic Design
Advanced and diverse series of topics confronting a wide variety of situations and needs emphasizing conceptual innovation, organization, planning and analysis.
Prerequisite: Pass BFA Portfolio Review
   Normal Grade Rules
   3 units

DSGD 107A. Special Topics in Graphic Design
Comprehensive design problems utilizing design theories, analysis, experimentation, innovation and conceptual development as systematic approaches to structuring various degrees of graphic design issues; database scientific visualization, graphic information system, publication design, and promotion & media graphics.
Prerequisite: Pass BFA Portfolio Review
Misc/Lab: Lab 6 hours.
   Normal Grade Rules
   3 units

DSGD 107B. Special Topics in Experience Design
Capstone design problems utilizing design methodologies, theories, and analysis in the area of time-base multi-media design; narrative filming, kinetic typography in motion, interaction design, and event design as related to visual information design.
Prerequisite: Pass BFA Portfolio Review
Misc/Lab: Lab 6 hours.
   Normal Grade Rules
   3 units

DSGD 108. Graphic Design Portfolio
Portfolio preparation using various media and methods for effective professional presentation.
Prerequisite: Pass BFA Portfolio Review, DSGD 105, DSGD 186
   Normal Grade Rules
   3 units

DSGD 110. Visual Literacy: Image Making
A course that defines the ability to assess and utilizes communications composed of various visual images (hybridization of manual, analog, and digital processes) for goal oriented projects. Students will develop tools needed to critically examine the visual world and strategies for creating unique visual forms and process of visual encoding and visual decoding for incorporating into graphic design projects.
Prerequisites: Pass BFA portfolio review; DSGD 104
   Normal Grade Rules
   3 units
DSGD 111. Design Values and Professional Practices
Defines and investigates design practices, processes, materials, and the ethical, social, and professional issues of design thinking for positive local to global outcomes.
Prerequisite: ANI majors: ANI 50, GD majors: DSGD 63, DSGD 83, IT majors: DSIT 33, DSIT 83, ID majors: DSID 22 or DSGD 83.
Corequisite: DSDS 22
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

DSGD 120. Exhibition Design & Info Graphics
Introducing principles, processes, and vocabularies of exhibition design. A substantial amount of student activity in the classroom will address acquiring and refining the two- and three-dimensional visualization of objects and spaces.
Prerequisites: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units

DSGD 127. Design Practicum
Building a successful design career requires an understanding of best practices and the standards governing the ever-evolving business of graphic design. This course aims to explore the creative business processes, marketing, negotiation and pricing, ethical standards of design business, and professional relationships in design.
Prerequisite: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units

DSGD 131. Motion Graphics
A capstone design problems course that exposes students to the principles, methodologies, and elements of motion graphics and narrative design. Students will develop techniques and skills for synthesizing the language of motion simultaneously with an emphasis on narrative structure, and text and image in relation to time-based media. The project will be examined in terms of its historical, cultural and conceptual implications.
Prerequisites: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units

DSGD 132. User Interface & Interaction Design
An advanced course focusing on the fundamental theory and practice of computer user interface and interactive design with emphasis on: the 2D graphic digital user interfaces, the current interaction development technology, theory, process and methods, and its overall impact on culture and society.
Prerequisites: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
3 units

DSGD 141. 3D Branding & Promotion Design
Experimental problems and themes exploring theories, strategies, and methodologies in 3D branding and Promotion Design such as marketing communication tools, packaging and P.O.P design, emphasizing innovative expression. Projects also examine contextual and conceptual prototyping for point of purchase display.
Prerequisite: Pass BFA Portfolio Review, DSGD 105 and DSGD 186
Normal Grade Rules
3 units

DSGD 150. Degree Project: Senior Studio
This in-depth studies course focuses on research concerning current issues in visual communication/ information/graphic design fields. This course is for procuring the undergraduate degree in BFA Graphic Design degree where the student will develop an individual design approach, process, and methodology for the application of graphic design solutions as the thesis project that will fulfill the criteria expected for graduation.
Prerequisites: Pass BFA Portfolio Review, DSGD 105, DSGD 186
Normal Grade Rules
4 units

DSGD 176A. Graphic Design History and Theory
See ARTH 176A.
Normal Grade Rules
3 units

DSGD 186. Digital Applications: Methodology
Exposes students to the tools, skill sets, and languages that are essential to understanding the fundamentals for web based information and interaction design principles and discovery of its practice in the profession.
Prerequisite: Pass BFA Portfolio Review
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

DSGD 132A. ID Portfolio Project I
ID portfolio project class combines 2D and 3D skills from previous ID classes, in the first complete product design application. Complete presentation for ID faculty review required.
Prerequisites: DSGD 21, DSGD 31, BA Design Studies and BS Industrial Design Majors only.
Corequisites: DSGD 022, DSGD 032
Misc/Lab: Activity 2 hours
Repeatable for credit
Normal Grade Rules
1 unit
DSID 041. Materials and Processes I
Introduction to materials and manufacturing processes as they relate to product development and the Industrial Design profession.
Prerequisites: DSID 022, DSID 032; BS Industrial Design majors only, BA Design Studies majors with department consent.
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

UPPER DIVISION

DSID 121. Industrial Design Process
Explores how a conscious and rational approach can enhance creativity. Techniques used include goal-setting, brainstorming, time-management, evaluation matrices and journal keeping.
Prerequisite: DSID 125A, BS Industrial Design or HFS Graduate Majors Only, or Instructor consent
Normal Grade Rules
3 units

DSID 122. Cont. & Crit. Studies: Industrial Design
This course thematically offers readings in Industrial Design theory, considers specific applications intended to highlight problems in contemporary practice, and is divided into five modules. Course content and examples will be selected to complement the studio projects in the program.
Prerequisite: DSCN 100w; BA Design Studies or BS Industrial Design Majors Only.
Misc/Lab: Lecture 3 hours/Lab 1 hours.
Normal Grade Rules
3 units

DSID 123. Intermediate Industrial Design
Design theories, methods and presentation techniques used by product designers in small scale product design. Stress application of knowledge of ergonomics, industrial materials and manufacturing processes.
Prerequisite: DSID 32A, BS Industrial Design Majors only
Repealtable for credit
Normal Grade Rules
3 units

DSID 123A. ID Portfolio Project 2
Provides instruction on integrating ergonomics (DSID 126), CAD (DSID 129), typography (DSID 99 or equivalent), materials and processes (DSID 41), and at least two major design projects (DSID 123 and at least one Design Elective) into Intermediate Design Projects and Portfolio. Comprehensive presentation to ID faculty required.
Prerequisites: DSID 32A (Credit), BS Industrial Design Majors Only.
Credit / No Credit
3 units

DSID 124. Design for All
Designing for as broad a percentage of the population as possible. Course focuses on accessible design despite physical, cognitive and/or socioeconomic obstacles. Course is repeatable for a total of 6 units.
Prerequisite: DSID 32A (Credit), BS Industrial Design Majors Only or Instructor Consent.
Misc/Lab: Activity 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

DSID 125. Advanced Industrial Design
Advanced exploration of industrial design theory and practice with projects involving high levels of complexity of technological, functional and aesthetic constraints.
Prerequisite: DSID 123A, BS Industrial Design Majors only
Repeatable for credit
Normal Grade Rules
3 units

DSID 125A. ID Portfolio Project 3
Development of design competition entry and cohesive portfolio using work created in prior and concurrent DSID courses by integrating advanced computer graphics and technology knowledge. Comprehensive presentation to ID faculty and invited professionals required.
Prerequisite: DSID 123A, BS Industrial Design Majors only
Credit / No Credit
2 units

DSID 126. Ergonomics for Design
Aspects of products affecting human performance, comfort and safety. Emphasis on design of computer interfaces, automobiles and furniture. Topics include visual displays, anthropometry, seating design and safety design.
Prerequisite: DSID 022, DSID 032; BS Industrial Design Majors only, BA Design Studies with Department consent.
Misc/Lab: Lab 6 hours.
Normal Grade Rules
3 units

DSID 128. Advanced Projects in Industrial Design
Comprehensive, in-depth analysis and design of faculty-assigned projects as well as a student-proposed project. Student proposed projects must meet with the approval of the Industrial Design faculty.
Prerequisite: DSID 125A, DSCN 127; BS Industrial Design Majors Only
Misc/Lab: Lab 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

DSID 128A. ID Portfolio Project 4
Integration of business and advanced technologies into the special graduating project. Final show and presentation for ID faculty and invited professionals required.
Prerequisite: DSID 125A, DSID 128, DSCN 127, BS Industrial Design Majors Only.
Misc/Lab: Activity 2 hours.
Repeatable for credit
Credit / No Credit
1 unit

DSID 129. Visualization III
Principles of computer graphics, computer-aided technology and applications in industrial design. Emphasis on the transition from 2D applications to 3D applications.
Prerequisite: DSID 022, DSID 032, BS Industrial Design Majors only, BA Design Studies with Department consent.
Misc/Lab: Lab 6 hours.
Normal Grade Rules
3 units

DSID 130. Sustainable Design
Design products with a focus on minimizing their impact on the environment. The entire lifespan of designed and manufactured products will be explored. Course is repeatable for credit for a total of 6 units.
Prerequisite: DSID 32A (Credit), BS Industrial Design Majors only, or Instructor Consent
Notes: Offered only occasionally
Repeatable for credit
Normal Grade Rules
3 units

DSID 131. Interaction Design
Advanced practical applications of interaction design theory, with an emphasis on strategies for software products including aspects of both UX (user-experience) and UI (user-interface) design.
Prerequisites: DSID 123A, DSID 126, BS Industrial Design or HFE Graduate Majors only.
Misc/Lab: Lab 6 hours.
Repeatable for credit
Normal Grade Rules
3 units

DSID 132. Softgoods
Design of products that incorporate soft materials and textiles in their construction. Products include furniture, clothing, shoes, and other products that contribute to current lifestyles.
Prerequisite: DSID 032A (Credit), BS Industrial Design Majors only, or Instructor’s Consent
Repeatable for credit
Normal Grade Rules
3 units
DSID 133. Design Projects: Making It
Students take an idea from concept to actual product (and multiples of the product) in one semester. The course ends with the creation of a store and the sale of the products produced.
Prerequisite: DSID 032A credit or instructor permission.
Repeatable for credit
Normal Grade Rules
3 units

DSID 134. Design and Meaning
This course will focus on the formal properties of products to better understand how design addresses and projects meaning as it relates to designed and manufactured objects. Coursework will explore this via experiments in specification and fabrication.
Prerequisite: DSID 32A; BS Industrial Design Majors Only
Normal Grade Rules
3 units

DSID 135. Design, Entrepreneurship, Intellectual Property and Professional Practice
Strategies for entering the profession as a business owner or design entrepreneur. Course includes the exploration of past and future business models as well as issues of intellectual property protection.
Prerequisite: DSID 123A or Instructor Permission.
Repeatable for credit
Normal Grade Rules
3 units

DSID 136. Advanced Digital Workshop
Advanced Digital modeling and prototyping tools for Industrial Design.
Prerequisite: DSID 129; BA Design Studies or BS Industrial Design Majors only, or Instructor Consent
Repeatable for credit
Normal Grade Rules
3 units

DSID 137. Advanced Physical Prototyping
Advanced Prototyping techniques for Industrial Design including patternmaking, sewing and casting.
Prerequisite: DSID 032, DSID 041, BA Design Studies or BS Industrial Design Majors only.
Repeatable for credit
Normal Grade Rules
3 units

DSID 143. Advanced Materials, Process & Technology
Advanced Materials, Processes and Technology will enhance themes covered in Materials and Processes coursework with the addition of study of the relevance and implications of advanced materials and technologies on designed artifacts.
Prerequisite: DSID 32, DSID 041, BA Design Studies or BS Industrial Design Majors only, or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

DSID 144. Design for Healthcare
Introduction to unique theories and challenges associated with the design of objects, experiences and services related to healthcare. Focuses on the application of patient-centered design theories for the betterment of patient experiences and patient-provider relationships.
Prerequisites: DSID 123 or instructor consent
Misc/Lab: Activity 6 hours.
Normal Grade Rules
3 units

DSID 176B. Industrial Design in Society
See ARTH 176B.
Normal Grade Rules
3 units

GRADUATE

DSID 226. Ergonomics for Design
Aspects of products affecting human performance, comfort and safety. Emphasis on design of computer interfaces, automobiles and furniture. Topics include visual displays, anthropometry, seating design, and safety design.
Prerequisite: Graduate status in Human Factors/ Ergonomics (HFE) or instructor consent.
Normal Grade Rules
3 units

INTERIOR DESIGN

LOWER DIVISION

DSIT 005. Introduction of Interior Design and Architecture
A comprehensive introduction to the field of Interior Architecture. Focuses on social, psychological, economic and aesthetic challenges facing designers in the 21st century. Integration of design principles, creative expression and consumer information pertaining to living environments and public spaces.
Normal Grade Rules
3 units

DSIT 010. Sketching, Drawing + Modeling
Explore the processes of conceptual sketching and drawing. Utilize and teach architectural documentation techniques such as interior: floor plans, reflected ceiling plans, elevations, sections, details, perspectives and axonometric drawings. Demonstrate techniques in pencil, contemporary pens, markers, and artistic visualization techniques.
Corequisite: DSIT 005
Normal Grade Rules
3 units

DSIT 029. Design Process
Development of skills to work with point, line and plane to create volumes with spatial relationships.
Normal Grade Rules
3 units

DSIT 033. Architectural Presentation
Further study, exploration, and comprehensive development of the technical and conceptual aspects of architectural drawing and modelmaking used to visualize innovative and functional interior spaces.
Prerequisite: DSIT 29
Corequisite: DSIT 34
Normal Grade Rules
3 units

DSIT 034. Interior Architecture Foundation Studio
In-depth study exploration and comprehensive development of innovative and functional interior spaces using the technical and conceptual aspects of architectural drawing and architectural model making and the theoretical and conceptual methodologies used to formulate interior architectural space. Course emphasizes design theory, process, programming and human factors. Focus on residential and small-scale commercial building types.
Prerequisite: DSIT 29
Corequisite: DSIT 33
Misc/Activity: Activity 6 hours.
Normal Grade Rules
3 units

DSIT 083. Visual Communication I
Principles of digital drawing and presentation tools essential to 2D architectural representation. Principles and skills and disciplines of making 3D forms through the use of digital technology.
Prerequisites: DSIT 005, DSIT 010.
Corequisites: DSIT 015, DSIT 029.
Misc/Lab: Activity 6 hours
Normal Grade Rules
3 units

DSIT 088. Visual Communication II
Introduction to Building Information Modeling concepts, practices, and drafting techniques. Using parametric 3D modeling software, students will create a virtual architectural model that will aid in the creation of construction documents and design presentation materials.
Prerequisites: DSIT 005, DSIT 010.
Corequisites: DSIT 033, DSIT 034.
Normal Grade Rules
3 units

DSIT 099. Architectural Forum
Discussion and analysis of the processes of interior architecture, lectures and field trips emphasizing critical thinking, communication skills and professional ethics.
Prerequisite: ART 1
Normal Grade Rules
3 units
UPPER DIVISION

DSIT 100. Building Codes
Introduction to building codes and legal regulations related to interior architecture design. Occupancy levels, regulations for the handicapped, general accessibility requirements, finishes and material specifications and fire ratings are highlighted in the class. Prerequisite: DSIT 034.

Miss/Lab: Activity 6 hours.
Normal Grade Rules 3 units

This course covers the functional, aesthetic and environmental aspects of building materials and systems focusing on the documentation of design through BIM software.
Prerequisite: DSIT 033, DSIT 034
Miss/Lab: Lecture 3 hours/Activity 4 hours.
Normal Grade Rules 3 units

DSIT 102. Computer Graphics for Interior Architecture
Examination of programs related to the development of state of the art presentation methods and portfolios.
Prerequisite: DSIT 34.
Normal Grade Rules 3 units

DSIT 103. Interior Architecture Conceptual Design Studio
Organize programmatic adjacencies and allocate planned spaces based on a singular design concept or objective. Conceptualize and execute a design through the use of 3D modeling software, digital animation and analogue methods of fabrication. Site analysis, formal, thermal and material issues problem-solving, iterative and rigorous production, experimentation, and research. Presentation of work to a jury.
Prerequisite: DSIT 33, DSIT 34
Corequisite: DSIT 102
Miss/Lab: Activity 6 hours
Normal Grade Rules 3 units

DSIT 104. Interior Architecture Space Planning Studio
Further project-oriented study, examination and analysis of planning and designing innovative and functional interior spaces. Emphasis on the space planning of state of the art commercial environments. Additional emphasis on implementation and interpretation of laws, codes and regulations. Course is repeatable for a total of 6 units.
Prerequisite: DSIT 103 and pass portfolio review.
Repeatable for credit
Normal Grade Rules 3 units

DSIT 105. Interior Architecture Advanced Design Studio
In-depth project oriented study, examination and analysis of planning and designing innovative and functional interior spaces. Emphasis on the advanced design of state of art commercial environments. Additional emphasis on implementation and interpretation of laws, codes and regulations.
Prerequisite: DSIT 103, and pass portfolio review.
Normal Grade Rules 3 units

DSIT 106. Architectural Project Materials
Discussion and analysis of materials for interior architecture. Lectures and field trips emphasizing aesthetic sensibilities, human factors, manufacturing processes and specifications.
Prerequisite: DSIT 34.
Normal Grade Rules 3 units

DSIT 107. Furniture Design
Design and production of original furniture, including drawing, prototypes and materials selection. Prerequisite: DSIT 34.
Normal Grade Rules 3 units

DSIT 108. Architectural Lighting Design
Theory and practice of architectural lighting emphasizing aesthetics, drawing, specifications, terminology, calculations and advances in technology. Course is repeatable for a total of 6 units.
Prerequisite: DSIT 103, DSIT 104 or upper division standing and instructor consent.
Repeatable for credit
Normal Grade Rules 3 units

DSIT 109. Object Design for Interiors
Advanced exploration of object design theory and practice with projects involving high levels of aesthetic and functional complexity.
Prerequisite: DSIT 105, DSIT 106 and DSIT 108.
Normal Grade Rules 3 units

DSIT 110. Capstone Thesis Studio
Students will select an appropriate project type, determine the site, prepare existing drawings, write a project statement and program, and develop a design solution. Work must be presented to a jury of professionals, and exhibited in a thesis exhibition.
Prerequisites: DSIT 104, DSIT 105.
Normal Grade Rules 3 units

DSIT 111. Interior Architecture Seminar
A capstone course for discussion of design work and professional values as a basis for portfolio and resume preparation.
Prerequisite: DSIT 105 and enrollment in graduation semester.
Normal Grade Rules 3 units

DSIT 112. Professional Practice of Interior Archit
Examination of the business, legal, financial, and managerial considerations of interior design practice as well as the role and responsibilities of a design assistant, with emphasis on ethical considerations and the legal issues of the profession and licensing. Prerequisites: DSIT 100.
Normal Grade Rules 3 units

DSIT 116. Solar Energy Analysis
See ENVS 116.
Normal Grade Rules 3 units

DSIT 132. Solar Home Design
See ENVS 132.
Normal Grade Rules 3 units

DSIT 151. Introduction to Urban Design
See URBP 151.
Normal Grade Rules 4 units

DSIT 152. Introduction to Urban Design Studio
See URBP 152.
Normal Grade Rules 4 units

DSIT 192C. History of Interior Design
See ARTH 192C.
Normal Grade Rules 3 units
Academic Year 2019-2020

Course Descriptions

v1
July 1, 2019

ALL DATES, FEES & INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE

Donald and Sally Lucas College and Graduate School of Business Courses

BUSINESS

UPPER DIVISION

BUS 180. Individual Studies in Business
Individual work on special topics by arrangement.
Notes: Business majors only. Petition and plan of study must have consent of instructor and Chairperson in the department of concentration.
Prerequisites: Upper division standing. Not available to Open University Students.
Credit / No Credit
1-6 units

BUS 200. Business, Economics and Society
Emphasizes the relationship between the micro and macro economic environment and thoughtful managerial decision-making. Examines various theories and techniques that underlie the market economy. Costs and benefits of various governmental policies are investigated in a historical context.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 200W. Business Research and Communications
Using a case approach, students will learn about communication within the business world, with the intention that they will practice interpersonal, team, and presentation skills that are expected of effective managers.
Prerequisite: Graduate standing. Restricted to Business - MBA majors only
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

BUS 211. Orientation and Behavioral Workshop
The course provides graduate business students with frameworks, processes and methods to improve their opportunity for success in a rigorous, accelerated graduate business program format. Students are introduced to key concepts in business communication and etiquette, case study methodology, and business strategy. This overview includes the opportunity to apply key concepts in a team format and discuss their strategic, behavioral and career implications.
Credit / No Credit
1 unit

BUS 220. Financial and Managerial Accounting
Introduces students to financial and managerial use of accounting information systems and concepts, including the sources, uses and limitations of accounting information as used by investors outside the firm and by managers within the firm.
Prerequisite: Graduate standing. Restricted to Business - MBA majors only
Normal Grade Rules
3 units

BUS 202. Managing in the Global Economy
This course investigates the world economy, including how markets, institutions and organizations vary from country to country, and how global competition, climate change, digital and emerging economics, and shifting from manufacturing to a service economy affect management practice.
Prerequisite: Graduate standing. Restricted to Business - MBA majors only
Normal Grade Rules
3 units

BUS 203. International Experience for American Executives
An intensive one-week program at one of the nine EMBA Consortium partner schools with opportunities to collaborate with classmates from around the globe. Develop your global business acumen while learning about the unique culture and business practices of the region you visit. The course consists of classroom work, company visits, and cultural experiences. Prerequisite: Instructor Consent
Normal Grade Rules
3 units

BUS 220A. Financial Statement Analysis for Accountants
Course develops the ability to understand, interpret, and analyze financial information, and examines the relationship between financial statement information and the capital markets. Students develop financial analysis skills, and expand business knowledge from an accounting perspective.
Prerequisite: MSA Classified Standing.
Normal Grade Rules
3 units

BUS 220B. Financial Reporting and Analysis I
Principles, control and theory of accounting for assets, correction of prior year’s earnings; measurement and determination of income.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220C. Accounting Information Systems I
Will provide conceptual framework concerning contemporary accounting information systems including: database concepts, internal control, use of systems technology, applications, management, systems analysis/design and auditing.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220D. Financial Analysis and Markets
Provides an overview of the required skills and the environment appropriate to the financial and economic decision-making function of the firm. The integrated approach of this course is designed to identify and analytically evaluate those internal and external variables which contribute to economic and financial decisions. Strategies of financial management in practical settings, application of concepts and analytical tools.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220E. Financial Reporting and Analysis II
Continuation of Financial Reporting and Analysis I. Principles, controls, and theory of accounting for liabilities and equities; preparation, utilization, and analysis of cash flow statements; financial ratios and statistical analysis of financial statements accounting data.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220F. Management Accounting and Cost Systems
Provides the student techniques with an overview of the concepts and procedures of cost accounting relevant to managerial decision-making. Emphasizes planning and control, inventory valuation and income determination, and performance measurement.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220G. Financial Statement Analysis for Executives
This course focuses on understanding the basic principles of financial statements, and on the interpretation and evaluation of financial statement information. Emphasis is placed on the application of financial statement analysis techniques to practical decision making.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220H. Financial Reporting and Analysis III
Principles, control and theory of accounting for assets, correction of prior year’s earnings; measurement and determination of income.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220I. Accounting Information Systems II
Will provide conceptual framework concerning contemporary accounting information systems including: database concepts, internal control, use of systems technology, applications, management, systems analysis/design and auditing.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220J. Financial Analysis and Markets
Provides an overview of the required skills and the environment appropriate to the financial and economic decision-making function of the firm. The integrated approach of this course is designed to identify and analytically evaluate those internal and external variables which contribute to economic and financial decisions. Strategies of financial management in practical settings, application of concepts and analytical tools.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220K. Management Accounting and Cost Systems
Provides the student techniques with an overview of the concepts and procedures of cost accounting relevant to managerial decision-making. Emphasizes planning and control, inventory valuation and income determination, and performance measurement.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units
BUS 220G. Tax Factors of Business and Investment Decisions: Theory and Practice
Introduces essentials of tax research methodology, focusing on taxation of corporations and shareholders. Includes taxation of property transactions, deferral techniques, accounting periods, and accounting methods.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220H. Auditing: Concepts/Practice
Discusses the public accounting profession and its socio-economic role; auditing techniques with an emphasis on EDP environment; audit procedures, practice and programs; working paper preparation, unqualified and qualified report writing.
Prerequisite: MSA classified standing. Graduate Standing only.
Normal Grade Rules
3 units

BUS 220I. Forensic Accounting
Course will examine the frauds perpetrated on companies and methods of discovery. The criminal justice system will be reviewed and litigation support services provided by accountants to attorneys, including damage computations and testifying techniques and skills will be covered.
Normal Grade Rules
3 units

BUS 220J. Business Communications & Ethics
Emphasizes communication effectiveness and skill building for influencing and guiding people. Includes fundamental skill building in researching, organizing and writing reports, making persuasive presentations that are sensitive to the needs and requirements of clients, peers and managers.
Prerequisite: MSA classified standing.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

BUS 220K. Accounting Practicum
The Accounting Practicum is an internship with an accounting firm or corporate finance group. This provides opportunities to apply program content to real-world environments, gain appreciation of work expectations and demands, and relate field experience to remaining program curriculum.
Prerequisite: MSA classified standing.
Credit / No Credit
3 units

BUS 220L. Legal and Ethical Environment of Accounting Practice
Emphasizes knowledge in the areas of the Law of Contracts and selected portions of the Uniform Commercial Code: Sales of Goods, Commercial Paper and other Negotiable Instruments; and Secured Transactions.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220M. Accounting Ethics
Examines professional ethical standards for accountants. Focuses on professional codes of conduct and workplace decisions for professionals in the fields of auditing, managerial accounting and taxation.
Prerequisite: BUS 220H, Graduate Standing only.
Normal Grade Rules
3 units

BUS 220N. Management of Organizations and Projects
Examines the integrative role of the general manager as a strategist responsible for leading and managing multi-functional projects and develop skills related to leadership, planning, decision-making, motivating, scheduling and shaping organizational team culture by making extensive use of team building exercises/cases.
Prerequisite: MSA Classified Standing.
Normal Grade Rules
3 units

BUS 220P. Taxation of Individuals and Flow-Through Entities
Taxation of individuals and pass-through entities (partnerships, LLCs, S corporations, estates and trusts) with emphasis on unique rules and factors in the Internal Revenue Code and Treasury Regulations.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220Q. Software Applications for Accounting
Creation, internal controls, evaluation and audit of advanced electronic spreadsheets. Students learn to use complex queries to extract information from databases.
Prerequisites: BUS 220C or equivalent
Normal Grade Rules
3 units

BUS 220R. Financial Reporting and Analysis III
Accounting for multi-unit operations: consolidated reporting issues, transfer pricing issues, globalization issues (foreign tax structures, organizational forms and international accounting), translation of foreign currency transactions and operations, hedging foreign currency exposures, goodwill and brief exposure to business combinations.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220T. Accounting Information/Tax
Prerequisite: MSA classified standing.
Normal Grade Rules
6 units

BUS 220U. IT Audit & Internal Controls
The course provides an understanding of the types of risk that arise in computer environments and consider the impact these risk and threats have on the audit by examining computer-assisted audit tools and techniques.
Prerequisite: MSA Classified Standing.
Normal Grade Rules
3 units

BUS 220V. Special Topics in Accounting
Current special topics in accounting including an understanding of the financial accounting policies and procedures followed by state, county, and municipal governments, universities, and other non-profits for accounting and budgeting of the receipt and expenditure of tax and related revenues.
Prerequisite: MSA Classified Standing.
Normal Grade Rules
3 units

BUS 220W. Business Analysis and Valuation Using Financial Statements
Development of Accounting based valuation framework that integrates a firm’s strategy, accounting performance, and value; assessing a firm’s value proposition and identifying key value drivers and risks; evaluating degree to which a firm’s accounting policies capture the underlying business reality.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220X. Professional Communications and Relationships III
Skill development in converting critique into meaningful and important information to improve professional performance; integration of professional skills; personal style with effective communication skills to prepare the student for transition to professional in the further development of their careers.
Prerequisite: MSA classified standing.
Normal Grade Rules
3 units

BUS 220Y. Data Analytics for Accounting
Basic principles and practices of data analytics as applied to accounting.
Prerequisite: Graduate standing in MS Accountancy program.
Normal Grade Rules
3 units
BUS 222. Profit Planning and Control
Course covers how financial planning and control systems operate, and are used to deploy strategy, align interests, improve operations, and facilitate strategic change, maximizing firm value. Includes disciplined processes of decision-making, resource allocation, performance measurement to link strategy, management action, and shareholder accountability.
Prerequisite: BUS 220 and graduate standing.
Normal Grade Rules
3 units

BUS 223A. Tax Research and Decision Making
Develops basics for tax research and evaluates the interrelationships of statutes, regulations, rulings and court cases. Identifies tax services and other primary research materials with emphasis on their use in tax decision-making. Emphasizing critical thinking and communication skills.
Prerequisite: Graduate standing.
Note: This course satisfies graduate-level CWAR in this master’s program.
Normal Grade Rules
GE: CWAR
3 units

BUS 223B. Taxation of Partnerships
Income tax treatment of partners and partnerships and LLCs, including the creation, operation, liquidation and sale or other amalgamation of organizations. Special allocation and non-recourse debt arrangements are also covered.
Prerequisite: BUS 223A and BUS 223G
Normal Grade Rules
3 units

BUS 223D. Seminar in Tax Planning and Practice
Capstone course for the MS in Taxation degree. Will integrate financial planning throughout the program, including sale of the business and estate planning, and will include a final written comprehensive project.
Prerequisite: Graduate standing and completion of at least 3 tax core courses.
Notes: Completion of the course or BUS 223E satisfies the MST comprehensive project requirement.
Normal Grade Rules
3 units

BUS 223F. Tax Accounting Methods/Periods
Definition and importance of accounting methods and periods; timing rules for income, expenditures, inventory and R&D; change procedures; special methods; book-tax differences, introduction to provision for income taxes.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 223G. Taxation of Business Entities
Income tax treatment of different types of business entities and their owners. Focuses on operations, reporting, formation, restructuring and termination. Selected special state and international tax rules, tax planning, and underlying tax policies also covered.
Corequisites: BUS 223A
Normal Grade Rules
3 units

BUS 223H. Tax Policy Capstone
Capstone course that examines the principles and policies that underlie and shape tax systems and rules. Students gain a broader perspective of the tax law beyond its technical application, and learn how tax, economic, social and environmental policies interact.
Prerequisites: BUS 223A, BUS 223F, BUS 223G
Normal Grade Rules
3 units

BUS 224. Financial Statement Analysis
Course develops the ability to understand, interpret, and analyze financial information, and examines the relationship between financial statement information and the capital markets. Students develop financial analysis skills, and expand perspectives of business and professional roles.
Prerequisite: BUS 220 and graduate standing.
Normal Grade Rules
3 units

Examine managerial accounting in medical product development with emphasis on financial aspects of the industry. Develops understanding of profit/loss statements; budget preparation and execution; financial implication of patent life, rationale for mergers and acquisitions; financial implications of outsourcing.
Prerequisite: Admission to MPDM program & completion of BUS 210 and SMPD 281A.
Normal Grade Rules
3 units

BUS 225A. Taxation of Estates and Trusts
Excise and transfer tax treatment of estates, gifts, trusts, creators, beneficiaries and fiduciaries. Distinguishes between revocable and irrevocable trusts, including proper trusts to achieve desired goals. Reviews taxation of asset sales and dissolution or liquidation of estates or trusts. Analyzes estate evaluation, family limited partnerships, grants, CST, and planning opportunities.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225B. Taxation of Corporate Reorganizations
Income tax treatment of corporate reorganizations and amalgamations, including acquisitions, tax-free and taxable as well as corporate division. Tax treatment of net operating losses, earnings and profits, property basis and other corporate attributes.
Prerequisite: BUS 223A and BUS 223G
Normal Grade Rules
3 units

BUS 225C. International Tax - US Corporations with Foreign Activities
Taxation of outbound investment and activities of the US corporations. Topics include sourcing, foreign tax credit, subpart F, Sections 482 and 367, foreign currency, establishing foreign operations, state taxation of outbound operations, and issues affecting expanding US multinational technology firms.
Prerequisite: BUS 223G and BUS 225W
Normal Grade Rules
3 units

BUS 225D. International Tax - Individuals and Foreign Corporations
Taxation of individuals with foreign activities, and inbound investment and activities of foreign corporations. Topics include taxation of US expatriates and foreign nationals, foreign tax credit, tax treaties, foreign-owned US real estate, and issues of mobile employees.
Prerequisite: BUS 223G and BUS 225W
Normal Grade Rules
3 units

BUS 225F. State Taxation Fundamentals
Introduction to the legal foundation, nature and operation of key state and local taxes. Constitutional constraints regarding nexus, sourcing and apportionment are covered. Additional topics include research techniques, compliance and planning considerations, current issues and state tax reform.
Pre/Corequisite: BUS 223A
Normal Grade Rules
3 units

BUS 225G. Taxation of S Corporations
Topics include: Income tax treatment of S Corporations and their shareholders, built-in gains tax and excess net passive income tax; operating and distribution rules, shareholder basis, NOL pass-through rules; formation, reorganizations, QSUBs, and state income tax consequences.
Prerequisite: BUS 223A and 223G
Normal Grade Rules
3 units
### BUS 225H. Taxation of Property Transactions
Key rules and planning considerations of property development, transfer, lease, abandonment, worthlessness, and destruction; depreciation and amortization; special types of intangibles and relevant tax rules; property indebtedness; sale of a business; tax-deferred transactions; sale of a principal residence; and basics of non-income taxes applicable to property and property transactions.

**Pre/Corequisite:** BUS 223A  
**Normal Grade Rules**  
**3 units**

### BUS 225J. Taxation of Executive Compensation
Tax aspects of executive compensation includes qualified and nonqualified stock options, deferred compensation, fringe benefits, 401(k), 403(b), pension and profit sharing plans, rabbi trusts, etc.

**Pre/Corequisite:** BUS 223A  
**Normal Grade Rules**  
**3 units**

### BUS 225L. Accounting for Income Taxes
Financial accounting rules regarding the calculation and presentation of a company’s provision for income taxes.

**Prerequisite:** Graduate standing.  
**Normal Grade Rules**  
**3 units**

### BUS 225M. State Tax Planning
Tax planning considerations are covered for multistate and single state businesses for key state taxes. Tax effects of location of property, payroll and sales are covered along with state tax incentives and dealing with incomplete guidance.

**Prerequisite:** BUS 223A and BUS 225F  
**Normal Grade Rules**  
**3 units**

### BUS 225N. Financing Options - New or Growing Bus
Covers the fundamentals of various financing techniques for such businesses including equity, debt and ”going public”. Decision-making considerations, strategy, valuation and relevant security and tax laws are covered.

**Pre/Corequisite:** BUS 223A  
**Normal Grade Rules**  
**3 units**

### BUS 225O. Taxation of Tax Exempt Organizations
Taxation of tax exempt organizations, including application of UBIT; investment in partnerships and S Corp., foundation, pension plans, VEBAS, form 990’s.

**Pre/Corequisite:** BUS 223A  
**Normal Grade Rules**  
**3 units**

### BUS 225P. Advanced International Tax - US Corporations
Advanced study of income tax treatment of international corporate transactions including international reorganizations and Section 367, Section 304 and corporate inversions. Planning for intangibles, subpart F planning, foreign entity structuring including use of check-the-box entities, foreign currency transactions, and foreign tax credit planning.

**Prerequisite:** BUS 223A and BUS 225C  
**Normal Grade Rules**  
**3 units**

### BUS 225S. Consolidated Returns
Review and analysis of theory, rules and practice involving affiliated entities and filing of consolidated returns.

**Prerequisite:** BUS 223A and BUS 223G  
**Normal Grade Rules**  
**3 units**

### BUS 225T. Intermediate Acctg for Income Taxes
Follow-up to BUS 225L, Accounting for Income Tax. Topics covered include IFRS-CAAP convergence, FAS 141R (Purchase accounting), International tax accounting (including APB 23, ARB 51, FAS 52), FAS 123R (advanced topics), State & Local considerations, FIN 48 and other relevant/current topics.

**Prerequisite:** BUS 225L  
**Normal Grade Rules**  
**3 units**

### BUS 225U. Fundamentals of Transfer Pricing
Introduction to the fundamental principles of intercompany pricing, applications of transfer pricing methods to related party transactions under U.S. transfer pricing regulations and OECD Guidelines, and the economic analysis required for intercompany transactions of multinational corporations.

**Prerequisites:** BUS 223A and BUS 225W  
**Normal Grade Rules**  
**3 units**

### BUS 225V. Tax Considerations for High Tech Companies
Explores the nature of high tech companies, special features, and why tax issues exist. In depth learning about tax incentives for innovation including the research credit, treatment of intangibles, stock options, multistage financing, multi-jurisdictional considerations, and book-tax differences.

**Pre-Requisite:** BUS 223A  
**Normal Grade Rules**  
**3 units**

### BUS 225W. Introduction to International Taxation
Introduction to the structure, basic rules, and policies of the federal income tax system with respect to international transactions of US and foreign persons. Topics include residency, sourcing, tax treaties, foreign tax credit, transfer pricing, and compliance.

**Prerequisite:** BUS 223A  
**Corequisite:** BUS 223G  
**Normal Grade Rules**  
**3 units**

### BUS 225X. International Taxation - US and Foreign Individuals
Taxation of US and foreign individuals with investments and activities outside their home country. Topics include FTC, treaties, withholding taxes, US expatriates, foreign nationals, mobile employees, and compliance considerations, including US Bank Secrecy Act, FATCA and PFICs.

**Prerequisite:** BUS 223A and BUS 225W  
**Normal Grade Rules**  
**3 units**

### BUS 225Y. Accounting Ethics
Covers professional responsibilities for accountants; meets CA licensure rules for a 3-unit accounting ethics course. Addresses CA statutory and regulatory ethics, AICPA rules of professional conduct, SS15, and Circular 230, emphasizing compliance, history, process of change, and research.

**Normal Grade Rules**  
**3 units**

### BUS 225Z. Personal & Business Leadership Skills for Tax Professionals
Learn intrapersonal and interpersonal skills and knowledge a tax practitioner needs for personal and professional success. Includes listening, oral and written communication, ethical reasoning, relationship and team building, conflict minimization, leadership behaviors, EQ, mindfulness, and career planning.

**Prerequisite:** Graduate Standing  
**Normal Grade Rules**  
**3 units**
BUS 227A. Individual Tax Compliance
Basics of federal income tax compliance from information gathering to return filing. Includes practice preparing various individual forms and schedules, software tools, engagement letters, rules of conduct, disclosures, record keeping, key California adjustments, and completion of a moderately complex Form 1040.
Corequisites: BUS 223A.
Normal Grade Rules
1 unit

BUS 227B. Ethics for Tax Practitioners
Review of rules of conduct, tax penalties and professional ethical behavior relevant to tax compliance and planning. Key rules applicable to a CPA are covered in the context of their application in the day-to-day work of a tax practitioner.
Prerequisite: Graduate Standing only.
Corequisites: BUS 223A.
Normal Grade Rules
1 unit

BUS 227C. Tax Symposium
Tax symposium topics may vary from year to year to allow for focus on new developments or special tax topics.
Check the MST schedule for the topic description.
Corequisites: BUS 223A.
Repeatable for credit
Normal Grade Rules
1 unit

BUS 227D. Employment Taxation and the Modern Workforce
An overview to the types of employment tax and related issues that can arise for companies and workers when employees telecommute or have multiple work locations. The basics of federal employment taxes are covered along with worker classification rules as well as selected state and international tax issues and rules relevant for today’s workforce.
Pre/Corequisites: BUS 223A.
Normal Grade Rules
1 unit

BUS 227E. Foundation for Understanding Taxation
Legal foundation of taxes, types of taxes, and underlying theories, definitions and concepts. How to analyze transactions and activities for tax consequences. Helps strengthen one’s overall understanding of taxation and application of analytical skills to resolving tax issues.
Prerequisites: Undergraduate tax course.
Normal Grade Rules
1 unit

BUS 227F. Personal and Business Leadership Skills for Tax Practitioners
Learn the intrapersonal and interpersonal skills and knowledge a tax practitioner needs for personal and professional success. Includes listening, oral and written communication, ethical reasoning, relationship and team building, establishment and assessment of accountability measures, time management, and career planning.
Pre-Requisite: Graduate Standing
Normal Grade Rules
2 units

BUS 230. Marketing Management
Fundamental concepts and skills required for understanding markets and managing marketing efforts. Includes market orientation, consumer and industrial buyer behavior, market segmentation, target market identification, product development, pricing, distribution channels, marketing communication, strategy development, and marketing planning and control.
Prerequisite: Graduate standing. Restricted to Business - MBA majors only
Normal Grade Rules
3 units

BUS 231. Consumer and Market Behavior
Influence of consumer behavior upon marketing management strategy; examination of behavioral concepts as they relate to purchase decisions; types of consumer research instructions and applications; focus on buyer behavior in action-oriented environments.
Prerequisite: Bus 230 and graduate standing.
Normal Grade Rules
3 units

BUS 231A. Market Forecasting
Course will help business people in understanding and identifying the appropriate forecasting methods in order to make a more accurate prediction of future demand.
Prerequisite: BUS 230, Business statistics and graduate standing.
Normal Grade Rules
3 units

BUS 231C. High Tech Marketing
Course will give students exposure to marketing in technology industries. Principal ideas from the technology adoption life cycle form the conceptual basis for the course. Differences between technology marketing and other kinds of marketing are explored and special skills identified.
Prerequisite: BUS 230, business statistics, and graduate standing.
Normal Grade Rules
3 units

BUS 232. Third World Marketing Manager
Marketing in Third World high risk areas: Russian, African, Islamic. Understanding methods of marketing, as well as how to deal with specific third world risks: mafia, bribery, “black” market, smuggling and corruption.
Prerequisite: BUS 230 and graduate standing.
Normal Grade Rules
3 units

BUS 233. Business to Business Marketing
Course deals with business-to-business marketing, that is, the marketing of goods, services, and ideas to business and non-retail institutions. Covers product, price, promotion and distribution with emphasis on strategy development and marketing decision making.
Prerequisite: BUS 230 and graduate standing.
Normal Grade Rules
3 units

BUS 234A. Social Media Marketing
Approaches to social media marketing. Benefits and opportunities companies face as online social networking influences company marketing strategies. Use of emerging technology to promote brand awareness and strategies for social recovery.
Normal Grade Rules
3 units

BUS 234B. Promotional Strategy
Explores the media and techniques used by businesses to communicate with consumers, resellers, and the public. Topics will include budgeting; choosing media; testing communication effectiveness; executing and controlling advertising; personal selling, and consumer trade promotions.
Prerequisite: BUS 230 and graduate standing.
Normal Grade Rules
3 units

BUS 235A. Introduction to Business Analytics
This course will introduce fundamental business analytics tools including Probability Analysis, Decision Analysis, and Linear and Discrete Optimization. An emphasis will be placed on conceptual understanding and analytic insight.
Prerequisite: Graduate Standing only.
Normal Grade Rules
3 units

BUS 235B. Business Research
This course introduces participants to 21st Century business research methodology. The emphasis here is not on issues related to ongoing data sources but rather to unique, one-time problems that are best solved with custom research projects. Quantitative methods are emphasized but the advantages of the qualitative perspective are not overlooked. Other topics include questionnaire design, data collection, analysis, and presentation, highlighting appropriate new technology. The aim is to prepare managers to conduct research as well as to enable them to engage collaboratively with their research consultants.
Prerequisite: Graduate Standing only.
Normal Grade Rules
3 units
BUS 235C. Data Mining
Data mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in transactional databases or gathered through web mining. Topics include visualization, association rules, clustering, and various modern classification techniques.
Prerequisite: Graduate Standing only.
Normal Grade Rules
3 units

BUS 235D. Business Analytics Simulation
Transforming diverse data into knowledge-driven business decisions. Participants make tactical and strategic decisions based on consumer, competitor, aggregate market, financial, etc. Success is gauged by monitoring a dashboard that includes manufacturing productivity, return on investment, investment in the future, market share, product quality, financial performance, etc.
Prerequisite: Graduate Standing only.
Normal Grade Rules
3 units

BUS 236. Current Topics in Marketing
Emphasizes marketing and decision-making in social, government, and business environments. Uses behavioral science and quantitative techniques to develop strategies for tactical and strategic marketing solutions to problems which impact on R&D, finance, logistics, manufacturing, distribution and others.
Prerequisite: BUS 230 and graduate standing.
Repeatable for credit
Normal Grade Rules
3 units

BUS 237. Sales Management
Learn to recognize and capitalize on emerging market opportunities. Develop ability to manage different personality types, enhance communication skills, and increase cultural sensitivity. Sales forecasting, training, motivational techniques, and ethics.
Normal Grade Rules
3 units

BUS 238. International Marketing
The development of international marketing strategy. Focus on the evaluation of the various environmental variables, selection of target markets, methods of entry, developing an appropriate marketing mix and planning/control of the international marketing effort.
Prerequisite: BUS 230 and graduate standing.
Normal Grade Rules
3 units

BUS 239. Electronic Commerce
Focuses on organizational uses of information technology, impacts of IT on organizational operations and strategies, and increasing importance of Internet in business activities. Covers fundamentals of IT, organizational applications of IT and Internet, and successfully developing and implementing IT-based applications.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 241. Structured Methods of Information Technology
An analysis of structured methodologies of programming, documentation, testing, and management. Examined in terms of various information technologies, emphasis on development of techniques to analyze, design and adapt system solutions to organizational information needs.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 242. Distributed Information Systems
An analysis of database management systems, data communications, and telecommunications in a distributed information network. Focus will concentrate on identifying the means through which an organization can use the information technologies of distributed systems to satisfy its data needs.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 243. Database Management
Introduction to database approach of planning, design and implementation of information systems applications in organizations from the viewpoint of the manager as a knowledgeable user. Includes data modeling, data integrity and practical project assignments.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 245. Service Innovation
The course introduces students to the service in a variety of trade, enterprise and service industry settings. Students will learn about the economics and management of service systems and their design, operations, information technology, performance measurement, marketing, supply chain and quality assurance.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 246. Cyber Risk Management
This course surveys cyber-risk management concepts and best practices. Topics include cyber security threats, countermeasures, vulnerabilities, cost/benefit analysis, incident handling/response, business contingency planning, ethics, and legal imperatives within the organizational context.
Normal Grade Rules
3 units

BUS 247. Big Data Management
Exploration of Big Data and how businesses are succeeding (or failing) in using it. Learn to extract value from Big Data by getting data ready for analysis (including wrangling), and by understanding and communicating the business value.
Normal Grade Rules
3 units

BUS 248. Advanced Personnel Management
Selected human resource management topics are studied, including computer applications, quantitative methods, forecasting, job analysis, personnel recruitment and selection, training and development, EEO, compensation, performance appraisal, OSHA requirements, labor relations.
Prerequisite: BUS 251 (or equivalent); statistics and computer applications; graduate standing.
Repeatable for credit
Normal Grade Rules
3 units

BUS 250. Law and Ethics
Course focuses on both law and ethics in the business environment, how individuals and organizations approach law and ethics, as well as the ethical, legal and social consequences of disregarding law and ethics in favor of other objectives.
Prerequisite: Graduate standing. Restricted to Business - MBA majors only.
Normal Grade Rules
3 units
BUS 255. Diversity in the Workforce
Analysis of communication, leadership, motivation, group dynamics, decision-making, problem solving, training, change, conflict resolution and other behavioral concerns as they apply to the management of the multicultural workforce.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 258. Leading Edge Managers
Experiential seminar to develop specific managing and leading capabilities. Focus on skills typically missing from MBA education: managing a multi- and cross-cultural workforce; developing effective teams and collaborative work; building a high-performing work system.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 259. Mg Legal Aspects of Tech & New Prod Dev
This course addresses emerging issues in intellectual property - patent, copyright, trademark, and trade secrets laws - with an emphasis toward managing and protecting innovation and new product development in areas such as computer technology, biotechnology, and cyber-space.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 260. Managerial Decision Analysis
Concerns the inherent complexities in the process of choice. Covers decomposition of the decision environment, the use of decision trees, value theory, analysis of criterion, the statistical measurement of risk and uncertainty, preposterior analysis, and problems of collective choice.
Prerequisite: Business statistics and graduate standing; restricted to Business - MBA majors only
Normal Grade Rules
3 units

BUS 261. Legal Challenges for the International Manager
Learn how legal systems affect international business. Topics include: securities law in international transactions; US trade law; export regulations; foreign legal problems; legal risk analysis; labor law systems; control of capital and currency; intellectual property rights; licensing, business with state-controlled agencies.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 262. Leadership
Explores classic and contemporary models of leaders and leadership and defines the difference between management and leadership. Practical applications of theory emphasizing the contingency perspective.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 262A. Global Leadership and Innovation
This course provides an in-depth introduction to global leadership and its development and to fostering innovation and global change. Through assessments and behavioral simulations, it prepares students to do global work effectively in a complex context with people from various cultures.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 262B. Global Leadership Development
Students learn about global leadership and, in particular, its development in the Global Leadership Laboratory. As GLLab Associates, they help facilitate high impact experiential exercises, learn to give feedback, and supervise and coach student teams in global leadership courses.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

BUS 263. High Performance Management
An intense analysis of management with main focus on understanding organizations as systems. Use of academic theories as tools with which you solve real-world tactical performance problems. Emphasizes critical thinking and problem solving.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 264. Introduction to Technology Planning and Management
Develops technology strategies through a qualitative (scenario and strategy map-based) and a quantitative (decision analysis and option theory-based) approach for technology portfolio planning and management. It provides practical, stimulating, and easy-to-use methods for realistic applications.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 264A. Professional/Business Ethics
Ethical principles relevant to decision-making in business situations. Using case studies, examines and analyzes moral issues to determine the most appropriate actions. Experiential and self-reflective as well as theoretical.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 265. Silicon Valley Experience
This course is designed to develop the “whole student” for success in the business world, including professionalism, ethics, case competitions, communications, networking, career success, and work/life balance. It includes lectures, speakers, panels, competitions, and other events providing students with an in-depth exposure to Silicon Valley.
Normal Grade Rules
2 units

BUS 266. Managing Across Cultures
A comprehensive foundation for understanding, managing, and successfully interacting in the multi-faceted, culturally-embedded contexts of multinational firms. Understanding major issues facing multinational corporations in the management of international operations, insights into cultural, historical and institutional factors, skills for working effectively in international multicultural teams.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 268A. Global Business Management
A global view on business, investigating why and how companies succeed internationally. It provides students a conceptual tool by which to understand how economic, social and political factors influence both domestic and international operations.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 269. Strategic Management in the Computer Industry
The online course focuses on the industry-specific strategic challenges faced by companies that comprise the sector that is preeminent in the Information Age. Case studies favor PCs over big Iron and software over hardware.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 270. Financial Management
Introduces the structure, markets and regulatory factors within the financial system. Develops basic skills in preparing financial plans/budgets, valuing capital costs, financial assets and evaluating the firm’s capital structure, cost of capital, working capital, dividend policies, financing and investment decisions.
Prerequisite: BUS 220 or BUS 231B and graduate standing; restricted to Business - MBA majors only
Normal Grade Rules
3 units
BUS 271. Capital Markets
Driven by technological change, deregulation and globalization, course provides students an overview of the U.S. and international financial environment through financial media, spreadsheets and the Internet. Students leave the class with knowledge of interest rates, flow of funds, derivatives, money and capital markets and financial intermediaries.
Prerequisite: BUS 270 and graduate standing.
Normal Grade Rules
3 units

BUS 272. Current Topics in Finance
Presented as a collection of topics of current interest and concern to managers, investors and creditors. A seminar approach emphasizes discussion, illustrations, examples and applications drawn from current financial practice to encourage exploration of all facets of select financial issues.
Prerequisite: BUS 270 and graduate standing.
Repeatable for credit
Normal Grade Rules
3 units

BUS 273. Business Valuation
Course uses accounting and market data to determine the value of public and private businesses. The course considers methods and models whereby business values are created and destroyed. Techniques, from basic rules of thumb to holistic computer models are considered.
Prerequisites: BUS 220 and BUS 270.
Normal Grade Rules
3 units

BUS 274. Financial Analysis of Technology-Based Firms
Students will learn to develop financial strategies in practical settings. This includes the ability to construct and interpret pro forma financial statements, planning and control models, working capital analysis, capital structure studies, capital budgeting and cost of capital models, and valuation analysis.
Prerequisite: BUS 270 and graduate standing.
Normal Grade Rules
3 units

BUS 275. Corporate Finance: Cases in High Tech Firms
Course is a continuation of corporate finance where finance concepts directly related to high technology firms are examined. The concepts are enhanced by using five Harvard cases. Other data and handouts are provided to supplement these cases and the textbook.
Prerequisite: BUS 270 and graduate standing.
Repeatable for credit
Normal Grade Rules
3 units

BUS 276. New Venture Finance
New ventures face different business and financing environments than large, publicly-traded firms. The risk of R&D failure is more severe for new ventures. Examines how business and financing decisions are intertwined. Topics: Venture capital, joint ventures and intrapreneurship.
Prerequisite: BUS 270 and graduate standing.
Normal Grade Rules
3 units

BUS 277. Investment Analysis and Management
Principles of financial and portfolio analysis applied to investments in common stocks and bonds. Descriptive characteristics of financial markets reviewed, with main emphasis on application of financial theory and statistics to understanding movements in security prices and portfolio values. A financial management viewpoint will be taken in conducting fundamental valuation analysis and formulating portfolio policy.
Prerequisite: BUS 270 and graduate standing.
Normal Grade Rules
3 units

BUS 278. International Corporate Finance
The finance manager’s responsibilities, risks, problems and need for strategic planning. Unique aspects of financial analysis for international business discussed and applied to real and/or similar decision situations.
Prerequisite: BUS 270 and graduate standing.
Normal Grade Rules
3 units

BUS 279. Operations and Supply Chain Management
Analysis of effective and efficient flow of materials, products, services, and information within and across organizations. Includes: process flow analysis, capacity planning, quality, lean supply chain, layout, aggregate planning, supply chain networks, inventory management, sourcing, ERP, and logistics planning.
Prerequisite: Graduate standing. Restricted to Business - MBA majors only.
Normal Grade Rules
3 units

BUS 280. Management of High Technology Organizations
Investigates ingredients for sustained profitable innovation. Emphasizes management of technological innovation, including: innovation strategies, organization, project selection, project management, managing and integrating functional areas. Analyzes developmental processes which enable small firms to grow and prevent large organizations from stifling innovation.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 281. Management of High Technology Firms
Views product development as a cross-functional business process. Examines concepts used and management challenges faced in structuring product development activity and in strategically managing a portfolio of product development projects.
Prerequisite: Graduate Standing.
Normal Grade Rules
3 units

BUS 282. Silicon Valley: The Business of Technology
The Silicon Valley Business of Technology course prepares students for fast-paced and pressure-packed conditions to accelerate development of Critical Thinking Skills; providing a unique insight into the Silicon Valley culture. Students will apply technology to various industries by understanding its origins, categories, and functionality.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

BUS 282A. Essentials of Management and Organizational Behavior
Familiarizes students with the challenges that arise for managers in organizational settings; surveys theories and practices relating to managerial roles, organizational cultures, strategy, planning, team building, communication, motivation, leadership, decision-making, control, structure, and change.
Prerequisite: Enrollment in the MBT program.
Normal Grade Rules
3 units

BUS 282B. Essentials of Operations Management
Familiarizes students with the role and importance of operations management and how it interacts with other parts of the organization; develops skills in applying analytical tools and techniques to operations management challenges.
Prerequisite: Enrollment in the MBT program.
Normal Grade Rules
3 units

BUS 283. Entrepreneurship
Examines the growth and nature of entrepreneurship and the support infrastructure of tasks, people, finances and technology. Emphasizes entrepreneur characteristics sought by venture capitalists and investors, role of the business plan and evolutionary stages of start-up activity.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 284. Managing Product Development
Views product development as a cross-functional business process. Examines concepts used and management challenges faced in structuring product development activity and in strategically managing a portfolio of product development projects.
Prerequisite: Graduate Standing.
Normal Grade Rules
3 units
BUS 284C. Managing Medical Product Development
Views medical product development as a cross-functional business process. Examines concepts used and management challenges faced in structuring medical product development activity and in strategically managing a portfolio of medical product development projects. Examines industry practices and cases relevant to medical product development.
Prerequisite: Admission to MPDM program and completion of BUS 224C, BUS 286 and SMPD 289A.
Normal Grade Rules
3 units

BUS 285. Total Quality Management
Documents forces which propel quality (competition, Deming, Baldrige, etc.) and impact on planning, benchmarking and competitive analysis. Includes design for manufacturability, design of experiments, Taguchi methods, systems analysis, continuous process development and statistical process control.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 286. Project Management
Covers both strategic and operational points of view for managing projects. Quantitative methods include project planning, budgeting, selection, scheduling, evaluation and control. Qualitative methods include project organization, staffing and team building.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 287. Advanced Topics in Global Supply Chain Management
In depth analysis of current issues in global SCM with emphasis on industry best practices from around the globe. Topics may include continuous replenishment, value of information, outsourcing, collaboration, strategic alliances, e-SCM, supply chain risk, performance metrics, SCM simulations.
Prerequisite: Bus 280. Graduate standing.
Normal Grade Rules
3 units

BUS 288. Manufacturing Planning, Cost and Control
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 289. Managing Information and High Technology
Applies convergence among information, technology and strategy to organization and design of information and business systems for competitive advantage. Practical uses of electronic data interchange, expert systems and design and control of database systems to manage high-tech production.
Prerequisite: Graduate standing.
Normal Grade Rules
3 units

BUS 290. Strategic Thinking
Integrative focus on managing the total enterprise, including corporate and business-level strategy formation. Applies marketing and industry analysis, using qualitative and quantitative techniques, to position companies in their competitive environment. Students create a strategic plan for on-going or new organization.
Prerequisites for Early Career MBA students: Completion of BUS 201, BUS 202, BUS 210, BUS 220, BUS 230, BUS 250, BUS 260, BUS 270, BUS 280 and graduate standing; restricted to Business - MBA majors only.
Prerequisites for MBA for Professional students: BUS 200W, BUS 202, BUS 210, BUS 220, BUS 230, BUS 250, BUS 260, BUS 270, BUS 280 and graduate standing; restricted to Business - MBA majors only.
Note: Must receive a minimum grade of “B” on project.
Normal Grade Rules
3 units

BUS 294. Management Simulation Competition
Developing analytical and general management decision-making skills as member of a team competing in the regional business schools’ management simulation game. Extensive use of computers for simulation and analytical/planning tools.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

BUS 295. Management Consulting Field Experience
Apply management theory and learn consulting skills by carrying out an intensive project. Identify and analyze actual business problems, develop and evaluate alternative solutions and present plan to management.
Prerequisite: Graduate standing and instructor consent.
Normal Grade Rules
1-3 units

BUS 297A. Special Topics in Business Administration
Special topics to augment regularly-scheduled electives.
Prerequisite: Graduate standing and prerequisite courses as specified.
Repeatable for credit
Normal Grade Rules
1-4 units

BUS 297D. Special Topics in Business Administration
Special topics to augment regularly-scheduled electives.
Prerequisite: Graduate standing and prerequisite courses as specified.
Repeatable for credit
Normal Grade Rules
3 units

BUS 298. Master’s Project
Supervised completion of the Plan B (Project) culminating experience.
Prerequisite: Advancement to Candidacy and instructor consent. Not available to Open University Students.
Repeatable for credit
Mandatory CR/NC/RP
3 units

BUS 298C. Applied Business Experience Internship
The course provides students with an opportunity to translate their academic training into real world practice and gain overall knowledge of key functional areas of business. The internship must offer students a valuable learning experience and must significantly increase their knowledge of business organizations. Students are responsible for identifying a specific internship opportunity and obtaining an official offer from an employer. Upon approval from the MBA Director, the students will be able to enroll in the 3-unit course which will count as one of the MBA electives. The course requires the preparation of an internship journal & report. The internship qualifies as Curricular Practical Training (CPT) for international students.
Prerequisites: Advancement to Candidacy
Normal Grade Rules
3 units

BUS 298I. Applied Business Experience
For the student with a specific internship providing a quality experience that reinforces the curriculum and involves meaningful work. The student must submit a one-page formal proposal to the graduate program director. A final report is required. The internship must qualify as Curricular Practical Training (CPT) for international students.
Prerequisite: Approved advancement to candidacy.
Repeatable for credit
Mandatory CR/NC/RP
1 unit

BUS 299. Master’s Thesis
Master’s Thesis Plan A.
Prerequisite: Approval of the instructor and admission to candidacy. Not available to Open University Students
Mandatory CR/NC/RP
1-4 units
Economics Department Courses

ECONOMICS

LOWER DIVISION

ECON 001A. Principles of Economics: Macroeconomics
Determination of economic aggregates such as total output, total employment, the price level and the rate of economic growth.
Notes: May be taken concurrently or prior to ECON 1B.
Normal Grade Rules
4 units

ECON 001B. Principles of Economics: Microeconomics
Allocation of resources and distribution of income as affected by the workings of the price system and government policies. GE Area: D1
Notes: May be taken concurrently or prior to Econ 1A.
Normal Grade Rules
GE D1
4 units

ECON 002A. Principles of Macroeconomics Online Lab
Self-paced, online lab guides students through practice and graded problem sets of key macroeconomics tools and concepts.
Credit / No Credit
1 unit

ECON 002B. Principles of Microeconomics Online Lab
Self-paced online lab guides students through practice and graded problem sets of key microeconomics tools and concepts.
Credit / No Credit
1 unit

ECON 002C. Statistics Lab
This 1 unit, credit/no credit statistics lab is designed for transfer students who have taken a 3 semester-unit elementary statistics course. SJSU Economics Department requires 4 semester units of introductory statistics. Transfer students who are economics majors and minors must make-up the missing unit. The lab also is useful for those who have taken an elementary statistics course and are in need of a refresher.
Basic statistical concepts and methods that emphasize understanding the principles of data collection and analysis rather than theory. Discussions of how statistics is commonly used in the real world.
Credit / No Credit
1 unit

ECON 003. Economic Statistics
Elementary statistical analysis of economic data, probability theory, probability distributions, sampling, sampling distributions, estimation, hypothesis testing, simple linear regression, correlation and index numbers.
Prerequisite: ECON 1A, and ECON 1B
Misc/Lab: Lecture 3 hours/lab 2 hours.
Normal Grade Rules
4 units

ECON 100W. Writing Workshop: Economic Reports
Writing skills appropriate to majors in economics of lucid expression in essays, reports and other types of communication. GE Area: Z
Prerequisite: A3 or equivalent second semester composition course (with a grade of C- or better); Completion of core GE, satisfaction of Writing Skills Test and upper division standing.
Note: All SJSU Studies courses require completion of the WST and upper division standing. Must be passed with C or better to satisfy the CSU Graduation Writing Assessment requirement (GWAR).
Normal Grade Rules
GE Z
4 units

ECON 101. Microeconomic Analysis
Consumer behavior determining demands for goods and services. Theory of the firm including theories of production and cost. Theory of distribution to production factors.
Prerequisite: ECON 1B.
Normal Grade Rules
4 units

ECON 102. Macroeconomic Analysis
Theory of aggregate demand and related topics: national income accounting, employment and inflation, monetary and fiscal policies, economic stability, growth and balance of payments equilibrium.
Prerequisite: ECON 1A.
Normal Grade Rules
4 units

ECON 103. Intro to Econometrics
Use of econometric methods in analyzing economic data. Simple and multiple regression. Problems of autocorrelation multicollinearity and heteroskedasticity.
Prerequisite: ECON 3 or equivalent.
Misc/Lab: Lecture 3 hours/lab 2 hours
Normal Grade Rules
4 units

ECON 104. Mathematical Methods for Economics
Applications of linear algebra and differential calculus to economic analysis. Topics include market equilibrium, properties of production functions, multipliers, optimization methods, comparative statics analysis.
Prerequisite: ECON 1A, ECON 1B & MATH 30 or MATH 71
Normal Grade Rules
4 units

ECON 106. Managerial Economics
Applications of economic analysis to practical problems in the private and public sector. Demand and cost analysis, market structure, statistical estimation and forecasting, case studies.
Prerequisite: ECON 1B.
Normal Grade Rules
4 units

ECON 107. Introduction to Environmental Economics and Policy
See ENVS 107.
Normal Grade Rules
3 units

ECON 108. Cost-Benefit Analysis
Theory and practice of cost-benefit analysis applied to various topics including public projects and environment. Welfare foundations of CBA, valuation of goods (such as clean air, wilderness, and sports arenas), discounting future values and cost.
Prerequisite: ECON 1B and ECON 3 or STAT 95, or instructor consent.
Normal Grade Rules
4 units

ECON 109. Analysis of Economic Issues for Teachers
Economic analysis of such topics as unemployment, inflation, poverty, pollution, education and international trade will be covered within the context of K-12 education.
Prerequisite: Upper division standing.
Notes: Not acceptable for Economics majors, except double majors; acceptable for Economics minors.
Normal Grade Rules
3 units

ECON 112. Economic Development
Theories of development and underdevelopment. Problems of initiating and sustaining growth. Relations between developed and underdeveloped regions. Economic reform and change in the underdeveloped world.
Prerequisite: ECON 1A and ECON 1B.
Normal Grade Rules
4 units
ECON 113A. Economic History of the United States
Economic analysis of U.S. and Canadian history to the mid-20th century and its application to understanding the causes, patterns and consequences of economic development.
Prerequisite: Upper division standing or instructor consent.
Normal Grade Rules
4 units
ECON 113B. Economic History of Europe
Economic analysis of U.S. history to the mid-20th century and its application to understanding the causes, patterns and consequences of economic development.
Prerequisite: Upper division standing or instructor consent.
Notes: Offered summer and winter sessions and occasionally during the academic year.
Normal Grade Rules
4 units
ECON 121. Industrial Organization
Microeconomic theory applied to pricing of products by seller having different market structures such as competition, imperfect competition, monopoly, public utility regulation or government pricing.
Prerequisite: ECON 1B.
Normal Grade Rules
4 units
ECON 122. Public Finance
Prerequisite: ECON 1B.
Normal Grade Rules
4 units
ECON 123. Public Choice
Economic analysis applied to non-market decision making. Topics may include: voting, special interests, rent-seeking, legislative decision-making, bureaucracy, collective action problems, judicial decision-making, political business cycles, and comparative political institutions.
Prerequisite: ECON 001B
Normal Grade Rules
4 units
ECON 132. Public Finance
Prerequisite: ECON 1B.
Normal Grade Rules
4 units
ECON 133. Public Choice
Economic analysis applied to non-market decision making. Topics may include: voting, special interests, rent-seeking, legislative decision-making, bureaucracy, collective action problems, judicial decision-making, political business cycles, and comparative political institutions.
Prerequisite: ECON 001B
Normal Grade Rules
4 units
ECON 135. Money and Banking
Monetary institutions and theory, central banking, Federal Reserve System, interest rates, foreign exchange, price level theory, flow of funds, policy relative to private, government and international finance.
Prerequisite: ECON 1A.
Normal Grade Rules
4 units
ECON 136. International Economics
International trade theory, customs union, tariffs, quota policies. International monetary system balance of payments problems, foreign exchange markets.
Prerequisite: ECON 1A and ECON 1B.
Normal Grade Rules
4 units
ECON 137A. Fundamentals of Corporate Finance
Net present value criterion for investment and financial decisions, portfolio analysis, capital assets pricing model, information efficiency of security markets, influence of dividend policy on stock prices and optimality of financial structure of corporations.
Prerequisite: ECON 1B.
Normal Grade Rules
4 units
ECON 137B. Topics in Corporate Finance
Analytical coverage of topics such as role of leverage, valuation of options (warrants, puts, calls and convertibles), valuation of risky debt, capital budgeting, mergers, financial planning and international aspects of corporate finance.
Prerequisite: ECON 137A or instructor consent.
Normal Grade Rules
4 units
ECON 138. Business and Economic Forecasting
Use of regression techniques to forecast movements in economic conditions having effects on business firms and governments.
Prerequisite: ECON 1A, ECON 1B and a semester of statistics.
Normal Grade Rules
4 units
ECON 139. Principles of Investments
Stocks, bonds, money market instruments, options, futures and real estate. Institutions, markets and theory. Speculation, present value theory, yields, term structure, taxes, portfolios and insurance.
Prerequisite: ECON 1A and ECON 1B.
Normal Grade Rules
4 units
ECON 141. Law and Economics
Effects on resource use of existing and proposed laws concerning contracts, tort liability, crime, water resources, antitrust, real property, the environment and corporations.
Prerequisites: STAT 95 or ECON 3, any 100W.
Normal Grade Rules
4 units
ECON 151. Labor Economics
Development of labor institutions and markets, public regulation of unions, economics of collective bargaining. Theories of wages, employment and labor income.
Prerequisite: ECON 1A or ECON 1B, ECON 3 or equivalent, ECON 100W.
Normal Grade Rules
4 units
ECON 155. Principles of Austrian Economics
Examines the discipline of Austrian economics and differentiates from other economic disciplines. Uses the Austrian approach to analyze and understand the consequences of various policy prescriptions.
Prerequisite: ECON 001A and ECON 001B.
Normal Grade Rules
4 units
ECON 158. Economics of Entrepreneurship
Examines how economists have approached the phenomenon of entrepreneurship, from its behavioral foundations to its effects on economic growth and progress. Explores the role of entrepreneurship in theory and policy, and emphasizes its cultural, legal, and political determinants.
Prerequisite: ECON 001A and ECON 001B.
Normal Grade Rules
4 units
ECON 160. Public Regulation of Business
Economic criteria of public regulation and control of private business with emphasis on the problems of public policy.
Prerequisite: ECON 1B.
Notes: Offered summer and winter sessions and occasionally during the academic year.
Normal Grade Rules
4 units
ECON 165. Regional Economics
The economic structure of a region, including the economic base and its relation to industries serving the local market, the relationships among the subregions and the location of industry.
Prerequisite: ECON 1A or ECON 1B or instructor consent.
Normal Grade Rules
4 units
ECON 166. Urban Economics
Analysis of major economic problems of metropolitan areas: taxation, financing of urban services, transportation, residential and industrial development, local growth controls, zoning and housing.
Prerequisite: ECON 1B.
Normal Grade Rules
4 units
ECON 170. Health Economics
Introduction to the application of economics to healthcare and medical care issues including demand and supply of healthcare, health insurance, health quality and safety, and the role of regulations within a healthcare system.
Prerequisite: ECON 1A and ECON 1B
Normal Grade Rules
4 units
ECON 180. Individual Studies
Prerequisite: Instructor consent and department chair approval.
Repeatable for credit
Credit / No Credit
1-4 units

ECON 185. Applied Economics Internship
Supervised work with a private or public employer. Provides opportunity to gain experience in applied economics or in a discipline closely related to economics. Prerequisite: Junior or senior standing and consent of internship coordinator.
Repeatable for credit
Credit / No Credit
3 units

ECON 190. History of Economic Thought
Course includes Ancient Greek thought; the School of Salamanca; mercantilism; Adam Smith and classical economics; Karl Marx; marginalist revolution and the development of neoclassical economics; and monetary theory from David Hume to Keynes. Prerequisite: Econ 1A and Econ 1B
Normal Grade Rules
4 units

ECON 191. Economic Thought of Nobel Prize Winners
Exploration of lectures and essays related to economics Nobel Prize Winners since 1969. Topics include market theory, information theory, game theory, macroeconomic models, and new developments. Students submit weekly questions, three papers, and a presentation on a Nobel Prize winner. Prerequisites: ECON 001A, ECON 001B, any 100W.
Normal Grade Rules
4 units

ECON 193. New Institutional Economics
Introduces recent approaches to the study of institutions in economics and other social sciences. Examines how formal and informal institutions, including laws, contracts, norms and conventions, affect economic and political outcomes from a global perspective. Prerequisite: ECON 001B
Normal Grade Rules
4 units

ECON 195. Computational Methods for Economics
Covers the use of software which has the greatest applicability in economics and related social sciences; i.e., spreadsheets, databases, and programs for statistical analysis of data and numerical computation. Examples of software programs that may be covered include Excel, Gretl, Matlab/Octave, Netlogo, R, and STATA. Prerequisite: ECON 1A, ECON 1B and a semester of statistics.
Normal Grade Rules
4 units

ECON 197. Experimental Economics
Experimental Economics uses computerized laboratory experiments, field experiments, and quasi-natural experiments to test economic theory and human behavior. The course covers game theory, markets and auctions, experimental methodology and design, and field experiments. Prerequisite: ECON 103
Normal Grade Rules
4 units

ECON 201. Seminar in Microeconomic Analysis
Advanced analysis of costs, pricing, revenue, market structures, economic efficiency, rates of wages, rent, interest, profits and allocation of resources; analytical models and economic equilibrium. Prerequisite: ECON 101 and ECON 104.
Normal Grade Rules
3 units

ECON 202. Seminar in Macroeconomic Analysis
Aggregate analyses of inflation and unemployment (and of alternative fiscal and monetary policies) using general equilibrium and dynamic disequilibrium adjustment models of real output, labor, real capital and financial markets (both domestic and international). Prerequisite: ECON 101, ECON 102 (or equivalents approved by the instructor, with grades of “B” or better). Normal Grade Rules
3 units

ECON 203A. Economic Research Methods
Illustrates how to construct an economic study. Topics include basic statistical methods, cost-benefit analysis, data analysis, other quantitative techniques, literature reviews, and the professional standards of the discipline. Prerequisite: Econ 003 & Econ 101 or instructor permission.
Normal Grade Rules
3 units

ECON 203B. Seminar in Econometric Methods
Elements of statistical inference (t, F and Chi-square tests); the classical regression model and simultaneous equations models; estimation and prediction; the use of lagged and dummy variables; problems of multicollinearity, heteroskedasticity, serial correlation of disturbances and errors in the variables. Prerequisite: ECON 103 or instructor consent.
Normal Grade Rules
3 units

ECON 204. Seminar in Mathematical Economics
The use of mathematical techniques such as differential and integral calculus, linear algebra, topology, differential and difference equations, mathematical programming, optimal control theory and game theory to analyze economic models. Prerequisite: ECON 104 (or equivalent).
Notes: Offered summer and winter sessions and occasionally during the academic year.
Normal Grade Rules
3 units

ECON 205. Workshop in Policy Analysis
Survey of major areas of economic policy such as taxes, transportation, health, housing, environment, trade and education. Students prepare a written report on some topic of policy analysis and present the results to the class. Prerequisite: instructor consent.
Notes: Usually offered in the Spring semester.
Normal Grade Rules
GE: GWAR
3 units

ECON 205A. Economic Decision Making (Quantitative Economic Analysis for Public Decision-Making)
The nature and use of techniques for estimating the impact of alternative courses of action. Emphasizes fiscal impact analysis, cost benefit analysis, input-output analysis and multiplier methods. Prerequisite: ECON 101 and ECON 102, or instructor consent.
Normal Grade Rules
3 units

ECON 221. Industrial Organization
Analysis of the relations between industry structures, business conduct and economic performance under conditions of limited governmental interference. Appraises the role of competition and monopoly in the American economy. Stresses the role played by antitrust laws and regulatory commissions in the U.S. economy. Prerequisite: Instructor consent.
Normal Grade Rules
3 units
ECON 232. Seminar in Public Finance
The public sector. Determination of objectives of the public sector; pricing and output in the public sector; taxes, their distribution and allocative effects; public expenditure theory; public debt theory and policy.
Prerequisite: Instructor consent.
Normal Grade Rules
3 units

ECON 235. Seminar in Monetary Theory and Policy
Concentration on the theoretical aspects of money and monetary policy. Early and modern theories of money demand; early Keynesian and Monetarist monetary analysis; expectations and dynamic monetary business cycles; monetary policy under the Keynesian, Monetarist and New Classical assumptions; open economy monetary theory.
Prerequisite: ECON 1A, ECON 102 and ECON 135, or instructor consent.
Normal Grade Rules
3 units

ECON 236. Seminar in International Trade and Finance
Advanced theory of international trade and finance and its application to current problems in international economics.
Prerequisite: Instructor consent.
Notes: Not offered on a regular basis.
Normal Grade Rules
3 units

ECON 241. Seminar in Law and Economics
Examines the economic effects of legal institutions, existing and proposed, and economic analysis applied to the law. Evaluation of the interactions between legal and economic principles and introduction to standard topics such as property rights, contracts, liability, and torts. Includes case studies, a proposal, research paper and oral presentation.
Prerequisite: Graduate Standing
Normal Grade Rules
3 units

ECON 251. Seminar in Labor Economics
Analysis of labor markets, utilizing economic theory and empirical techniques with applications to public policy. Topics include: investment in human capital, employee compensation issues, compensating wages, discrimination, unions, and public sector labor markets.
Prerequisite: Graduate Standing or Instructor consent.
Notes: Offered summer and winter sessions and occasionally during the academic year.
Normal Grade Rules
3 units

ECON 281. Advanced Topics in Economics
This course addresses current developments or special-interest topics in economics.
Prerequisite: Instructor Consent
Repeatable for credit
Normal Grade Rules
3 units

ECON 285. Applied Economics Internship
Supervised work with a private or public employer.
Prerequisite: Graduate standing and 3.0 GPA.
Credit / No Credit
3-6 units

ECON 298. Special Study
Advanced individual research projects.
Prerequisite: Instructor consent and department chair approval.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

ECON 298E. Special Study Comprehensive Exam
Individual preparation for the comprehensive exam. Students must file for candidacy before enrolling. Approval of department chair, graduate advisor, or instructor is required. Satisfactory completion satisfies culminating experience requirement.
Mandatory CR/NC/RP
1 unit

ECON 299. Master’s Thesis or Project
Open only to approved candidates for the MA - Economics degree.
Description: Open only to approved candidates for the MA - Economics degree.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

UPPER DIVISION
ECON 1290R. Culminating Experience Supervision
Department and University support for progress to completion of culminating experience.
Prerequisite: Outstanding RP grade in a preceding semester in a culminating experience class or project.
Note: No Degree Credit.
Repeatable for credit
No Degree Credit
1 unit
Audiology

**UPPER DIVISION**

**EDAU 115. Introductory Hearing Science**
Anatomy, physiology and psychoacoustics of the auditory system; theories of hearing and physics of sound.
Prerequisite: CDS major, upper division standing, or instructor consent.
Normal Grade Rules
3 units

**EDAU 116. Audiology for Speech-Language Therapists**
Anatomy, physiology and psychoacoustics of the auditory system; theories of hearing and physics of sound.
Prerequisite: CDS major, upper division standing, or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

**EDAU 170. Audiology I**
Theory and application of the fundamentals of pure tone and speech, audiometric procedures and immittance measurements basic to identification audiometry and the differential diagnosis of peripheral auditory problems.
Prerequisite: EDAU 115 or instructor consent.
Normal Grade Rules
3 units

**EDAU 172. Introduction to Principles of Aural Rehabilitation**
Principles and methods of aural rehabilitation procedures. Components include development of listening, visual and oral communication skills, psycho-social aspects of hearing loss.
Prerequisite: EDAU 115 and EDAU 170.
Normal Grade Rules
3 units

**EDAU 177. Practicum in Audiology**
Supervised clinical experience in basic testing and treatment of children and adults with communicative disorders due to hearing impairments.
Prerequisite: EDAU 170 and EDAU 172 or instructor consent.
Repeatable for credit
Credit / No Credit
1-3 units

**EDAU 180. Individual Studies**
Supervised study in specific fields of audiology not covered by offered courses.
Prerequisite: Upper division standing and area coordinator consent.
Repeatable for credit
Credit / No Credit
1-3 units

**GRADUATE**

**EDAU 257. Seminar in Audiology**
Current issues impacting the practice of audiology.
Prerequisite: 6 units of graduate work or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

**EDAU 273. Aural Rehabilitation**
Aural rehabilitative services and procedures for the hearing impaired. Emphasis on governmental agencies, community services, especially for adult and geriatric populations, school programs and the professional role and responsibilities of the audiologist.
Repeatable for credit
Normal Grade Rules
3 units

**EDAU 277. Advanced Practicum in Aural Rehabilitation**
Supervised advanced clinical experience with children and adults with complex communicative disorders due to hearing impairments, leading to independence in administering therapeutic services.
Prerequisite: EDAU 177, EDAU 172 (or equivalent) and instructor consent.
Repeatable for credit
Normal Grade Rules
1-3 units

**EDAU 298. Special Studies**
Supervised study in a specific field of audiology.
Prerequisite: Consent of area coordinator.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

**SPEECH PATHOLOGY**

**UPPER DIVISION**

**EDSP 102. Language Development in Children**
Students will acquire knowledge concerning the language learning process and theories as well as the factors that intervene in its normal development. We will review linguistic terminology, components in language, stages of language development, and language diversity factors.
Prerequisites: CDS major or instructor consent.
Normal Grade Rules
3 units

**EDSP 110. Resources for Human Communication Disorders**
Scope of human communication disorders and public attitudes affecting educational, sociological, psychological and vocational opportunities of the communication disordered. Management resources for the communication handicapped.
Prerequisite: CDS major, upper division standing, or instructor consent.
Normal Grade Rules
3 units

**EDSP 111. Introduction to Phonetics**
Principles of the International Phonetic Alphabet and their application.
Prerequisite: CDS major, upper division standing, or instructor consent.
Normal Grade Rules
3 units

**EDSP 112. Principles of Assessment and Treatment in Communicative Disorders**
Fundamental principles of assessment and treatment of communicative disorders.
Prerequisite: EDSP 102, 111, 113, or instructor consent.
Normal Grade Rules
3 units

**EDSP 113. Speech Science**
Analysis and measurement of the components and processes involved in the production and reception of speech.
Prerequisite: CDS major, upper division standing, or instructor consent.
Normal Grade Rules
3 units

**EDSP 120. Communicative Disorders in Children**
Etiology and remediation of communicative disorders in children.
Prerequisite: EDSP 102, 111, 113, or instructor consent.
Normal Grade Rules
3 units
EDSP 124. Assessment in Speech Pathology
Principles and practices of assessment of language, speech and communication disorders. Clinical procedures and theory in diagnostic evaluations.
Prerequisite: EDSE 102, EDSP 110, EDSP 111 or instructor consent.
Normal Grade Rules
3 units

EDSP 161. Normal Processes of Speech, Language and Hearing
Normal neuropsychological processes of swallowing, speech, language and hearing. Normal functioning of the nervous system in sensory, cognitive and motor processes.
Prerequisite: Upper division standing, EDSP 113 or instructor consent.
Normal Grade Rules
3 units

EDSP 162. Communicative Disorders in Adults
Etiology and remediation of communicative disorders in adults.
Prerequisite: EDSP 102, 111, 113, or instructor consent.
Normal Grade Rules
3 units

EDSP 176. Guided Professional Clinical Observations
Guided observation experiences in audiology and speech-language pathology, introduction to clinical reasoning and clinical mindset; professional conduct; clinician-client interactions and perspectives; efficacy and evidence-based practice; inter-professional collaboration; effective oral, listening, nonverbal, and written clinical communication skills.
Prerequisite: EDSP 102, EDSP 111, EDSP 113
Normal Grade Rules
3 units

EDSP 177. Practicum in Speech Pathology
Supervised clinical experience with children and adults who have speech and language disorders.
Prerequisite: EDSP 112, EDSP 120 and EDSP 125 or instructor consent.
Credit / No Credit
1-3 units

EDSP 180. Individual Studies
Supervised study in specific fields of speech pathology.
Prerequisite: Upper division standing and area coordinator consent.
Repeatable for credit
Credit / No Credit
1-3 units

EDSP 212. Research Seminar in Communicative Disorders
An overview of the theory, procedures, application and use of research in educational settings; assist in the study of a specific area of applied research from the current professional literature; and assist in the development of a specific research proposal.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

Explores and discusses connections between listening, speaking, reading and writing with applications in assessing and planning intervention programs for monolingual and bilingual individuals who have a developmental or acquired language-learning disabilities. Required for speech-language pathologists. Prerequisite: EDSP 251, EDSP 259, EDSP 262, EDSP 276 or instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

EDSP 250. Seminar in Voice Disorders
Advanced discussion of human voice production, the perceptual, acoustic, and physiologic characteristics of voice disorders, and clinical implications, with hands-on learning of assessment methods and treatment of functional, organic, and neurological voice disorders across the lifespan.
Normal Grade Rules
3 units

EDSP 251. Seminar in Phonological Disorders
Establishes a level of advanced competency in the knowledge and understanding of phonology and phonological disorders: the procedures of analysis, the assessment of phonological disorders and the establishment of intervention strategies as a logical consequence of diagnostic findings.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 252. Seminar Fluency Disorders
Examines the complex issues related to the clinical management of fluency disorders. Includes contemporary research on etiology, assessment methods and concerns, intervention approaches, interdisciplinary considerations, and technological advancements.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 254. Seminar in Neurological Disorders
Provides an understanding of the neuropsychological, cognitive and linguistic correlates underlying adult neurological disorders. Assessment and treatment for a variety of disorders emphasized.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 255. Seminar in Motor Speech Disorders
Provides an understanding of anatomy, physiology and neurology of motor speech disorders. Emphasis on assessment and treatment of apraxia and dysarthrias.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 259. Seminar in Language Disorders in Children
Provides an understanding of the neuropsychological, cognitive and linguistic correlates of developmental language disorders which underlie the competencies to diagnose and provide treatment for children with language impairments.
Prerequisite: Graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 260. Seminar in Dysphagia
A review of the anatomic, neurologic, physiologic, and behavioral correlates of normal and disordered swallowing across the life-span. Assessment and treatment of swallowing disorders will be emphasized in children and adults with genetic and acquired disorders.
Prerequisite: EDSP 254, 255, 265 or Instructor Consent.
Normal Grade Rules
3 units

EDSP 262. Speech and Language in a Cross-Cultural Society
Communication development and disorders in bilingual clients. Emphasis on the assessment of such disorders to the bilingual population.
Normal Grade Rules
3 units

EDSP 264. Contemporary Professional Issues
Organization and development of profit and nonprofit agencies that serve the communicatively impaired. Role and responsibilities of supervisors included.
Normal Grade Rules
3 units

EDSP 265. Seminar in Cognitive Disorders
Provides a framework for better understanding the process of cross-generational communication and the improvement of communication competencies for interaction with cognitively impaired persons.
Normal Grade Rules
3 units
EDSP 269. Field Experience in Public Schools - Speech Pathology and Audiology
Supervised teaching in speech pathology and audiology. Two hundred clock hours minimum requirement for credential as speech, language and hearing specialist.
Prerequisite: TB clearance, CPR, basic physical, Hep B
Normal Grade Rules
6 units

EDSP 276. Practicum in Advanced Assessment
Supervised clinical experience in assessment of a variety of speech/language disorders. Laboratory and classroom experience required.
Prerequisite: EDSP 124 and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

EDSP 277. Advanced Practicum-Speech Pathology
Working with children, adult, and group clients within a clinical practicum setting including preparing lesson plans, analyzing assessment results, developing and implementing therapy activities, collecting data, conducting client conferences and writing reports and home programs.
Prerequisite: Graduate standing and instructor consent.
Repeatable for credit
Normal Grade Rules
1-3 units

EDSP 278. Clinical Management and Practicum
Supervised clinical experience.
Prerequisite: EDSP 254, EDSP 255, EDSP 276, EDSP 277 and instructor consent.
Repeatable for credit
Credit / No Credit
6-10 units

EDSP 288. Seminar in AAC and Communication Disorders
Exploration of how augmentative and alternative communication is used for individuals with complex communication needs. The impact of cognition, educational, physical, psychosocial and linguistic aspects of behavior on AAC use, assessment, intervention and research will be explored.
Prerequisite: EDSP 255, graduate standing or instructor consent.
Normal Grade Rules
3 units

EDSP 298. Special Studies
Supervised study in a specific field of speech pathology.
Prerequisite: Instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

EDSP 299. Master's Thesis
Supervised thesis work in the field of speech pathology.
Prerequisite: Instructor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units
Education - Counselor Education, Department of Courses

COUNSELOR EDUCATION

LOWER DIVISION

EDCO 004. Personal, Academic and Career Exploration
This course explores the concepts and applications of personal development. Introduction to lifespan development concepts through the use of self-assessment instruments and procedures. Orientation to San Jose State University. CE Area: E
Normal Grade Rules
GE EE
3 units

EDCO 004FY. Personal, Academic and Career Exploration
This course explores the concepts and applications of personal decision-making. Introduction to lifespan development concepts through the use of self-assessment instruments and procedures. Orientation to San Jose State University.
Misc/Lab: 2 hours lecture/ 2 hours Lab
Normal Grade Rules
GE EE
3 units

EDCO 010. Adjunct Learning
Reading/writing/learning skills necessary for comprehension of textbooks and lectures in various disciplines; includes notetaking, exam preparation and library techniques. Not repeatable for graduation credit.
Repeatable for credit
Credit / No Credit
1-2 units

EDCO 215. Introduction to Counseling and Guidance
Introduction to counseling and guidance research, theories, concepts, and competencies. Provides an overview of the related professional roles and settings.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE GWAR
3 units

EDCO 218. Counseling Process & Techniques
Foundational course in individual and small group counseling process, skills, and techniques. Examines the characteristics of an effective counselor, the role of the counselor in the counseling process, and fundamental counseling microskills and techniques.
Normal Grade Rules
3 units

EDCO 219. Practicum in Guidance II
Provides for the expansion and extension of the skills with a focus on group systems communication. Media will be used to help students be aware of constructive and destructive elements of interpersonal functioning in group systems. Two intensive training weekends.
Repeatable for credit
Credit / No Credit
3 units

EDCO 221. Research in Counselor Education
Exploration of research and evaluation in education and counseling. Research procedures, forms of evaluation, and data collection and analysis techniques are examined. Coursework focuses on the conceptualization and development of a research proposal.
Prerequisite: EDCO 215
Normal Grade Rules
3 units

EDCO 227. School-Family-Community Collaboration
Exploration of the socio-cultural and psychological dynamics influencing home, school, and community relations. To provide knowledge to collaborate effectively with diverse families, communities, and school personnel to support students’ learning, achievement, and psychological well-being.
Normal Grade Rules
3 units

EDCO 232. Law & Ethics in Counseling
Examination of the professional ethical standards guided by the American School Counselor Association (ASCA) and American Counseling Association (ACA) codes of ethics. To explore local, state and federal laws relating to youth and child welfare, adults, and families.
Normal Grade Rules
3 units

EDCO 244. Cultural Perspectives in Counseling
Exploring, identifying, and broadening personal perspectives, with an emphasis on culture and diversity in the context of counseling. Raising awareness regarding multicultural diversity and social justice issues.
Prerequisite: EDCO 215, 218, 232, 248
Normal Grade Rules
3 units

EDCO 268. Dynamics of Behavior and Development
Study of the dynamics of individual and group behavior over the lifespan. Specific study of selected personality and development theory and practices.
Normal Grade Rules
3 units

EDCO 266. Education and Career Planning
Study of theory and practice of educational and career planning. Includes sources, uses, evaluation and filing of educational and career information and procedures for working with both individuals and groups.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE GWAR
3 units

EDCO 268. Lifespan Development
Examination of human development across the lifespan, through multiple theoretical and cultural perspectives, with a holistic integration of physical, cognitive, and socio-emotional aspects of development. To deepen knowledge to assist children, adolescents, and adults with life challenges.
Normal Grade Rules
3 units

EDCO 279. Advanced Group Process Theory and Practice
Focus on diverse theoretical approaches in group dynamics, group facilitation/leadership and the group as an instrument of learning within varying institutional settings.
Prerequisite: Core curriculum and instructor consent.
Normal Grade Rules
3 units
EDCO 280. Multicultural Counseling
Practical application of multicultural counseling theories and techniques. Examine and understand personal cultural perspectives; develop empathy and understanding of various community cultures.
Prerequisite: EDCO 215, 218, 232, 248, 266 and 244
Repeatable for credit
Normal Grade Rules
3 units

EDCO 282. Assessment for Counselors
Exploration of the assessment and diagnostic process, including differential diagnosis and use of diagnostic tools including the current edition of the Diagnostic and Statistical Manual. Discuss development of pathology, applicable for use within educational and counseling agency settings.
Prerequisite: EDCO 215, 218, 232, 248
Normal Grade Rules
3 units

EDCO 283. Advanced Educational Assessment
Concept and practice in uses of standardized evaluative instruments in school and community. Emphasis on generating curriculum and guidance hypotheses for groups.
Prerequisite: Core curriculum.
Normal Grade Rules
3 units

EDCO 285. Trauma Counseling & Crisis Intervention
Advanced seminar addressing cognitive, affective, behavioral, physiological, and interpersonal effects of trauma. To learn to assess and respond to crises as well as brief and long-term counseling interventions for individuals and groups in K-12, higher education, and agency settings.
Prerequisites: EDCO 215, 218, 232, 248, 266, 282
Normal Grade Rules
3 units

EDCO 286. Organizational Change and Development
Examination of organizational change within educational and community settings. To develop knowledge and increase skills in using institutional change strategies and innovations in various settings. Concepts and skills are applied through the design and planning of a change intervention.
Prerequisite: EDCO 215, 218, 232, 248, 266, and 282
Normal Grade Rules
3 units

EDCO 287. Comprehensive School Counseling Analysis
Examination of the planning, development, organization, and evaluation of comprehensive K-12 school counseling programs based on national standards. Coursework is designed to increase effective use of data and technology to promote students’ academic, career, and personal/social development. Hybrid course format.
Prerequisite: EDCO 227
Normal Grade Rules
3 units

EDCO 288. Seminar in Counseling Theory and Practice
Assists students in the clarification of philosophical and psychological theory and develops a consistent individual and group counseling theory in relation to a defined lifestyle and the study of practice in school and agency settings.
Prerequisite: Core curriculum.
Corequisite: EDCO 280.
Prerequisite: Instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

EDCO 289. Seminar in Professional Counseling
A culminating seminar which emphasizes a critical review and critique of theory and research in application of human development specialties. May be repeated for credit when an alternate focus is shown in the Schedule of Classes.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

EDCO 292. Supervised Experience in Counseling
Supervised field experience in guidance and counseling. Assignments to public schools or agencies.
Prerequisite: Core curriculum.
Repeatable for credit
Credit / No Credit
3-6 units

EDCO 293. Practicum in Child and Substance Abuse
A practicum in peer group systems and psychodrama counseling intervention for treatment of addiction, physical and sexual abuse, teen pregnancy and other at-risk groups. Required participation in a peer group counseling process.
Prerequisite: Instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

EDCO 294. Practicum in Self-Development
Facilitates training in individual and group counseling methods, including transpersonal journal, psychodrama and peer group techniques.
Prerequisite: EDCO 218, EDCO 219 and instructor consent.
Repeatable for credit
Normal Grade Rules
3 units

EDCO 298. Special Studies in Counselor Education
Supervised study for master’s degree counselor education candidates with a final course product that satisfies the department and university Plan B requirement.
Prerequisite: EDCO 215 and EDCO 221
Repeatable for credit
Mandatory CR/NC/RP
3 units

EDCO 299. Master’s Thesis
Supervised thesis in the field of counseling and guidance.
Prerequisites: Advanced to candidacy, satisfactory completion of EDCO 221 & advisor/designated faculty consent
Repeatable for credit
Mandatory CR/NC/RP
3 units
EDUCATIONAL LEADERSHIP

EDD 501. Quantitative Analysis for Educational Research
Students will develop a comprehensive understanding of the statistical principles used in the description and analysis of data. Students will also learn how to conduct appropriate statistical analyses, interpret findings, and compose meaningful reports while examining how these skills can lead to being a more informed and involved educator.

Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 502. Qualitative Methods in Educational Research
Explores qualitative research approaches and methods including participant observation, interviews, ethnography, narrative and case study approaches; includes methods of data analysis such as discourse analysis, dialogic analysis, and visual analysis.

Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 510. Educational Leadership: Theory and Practice
This course presents an overview of the major concepts and theories that constitute the knowledge base in the leadership of education, including an examination of leadership theories from early models of hierarchical control to contemporary models of shared leadership and organizational transformation.

Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 511. Leadership for Learner Centered Organizations
Students will develop the knowledge and skills for examining, designing and implementing organizational, classroom, and training conditions that support quality learning experiences for individuals in the organization.

Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 512. Leadership, Complexity, and Systems Thinking
This course presents principles, theories, attributes related to individual leadership development. It includes concepts related to systems thinking that are critical to the long-term sustainability of your school, agency, or organization.

Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 515. Leadership, Diversity, and Culture: Family, School and Community Connections
Educational leadership and management issues related to an increasingly diverse student body in educational institutions. Reviews educational research, practice, theory and legal matters within local and global contexts. Students engage in activities and discussions focused on strategies utilized by social justice advocates that have the potential to improve educational experiences and opportunities in P-12 settings, and in university-school-community partnerships. Emphasis placed on the interaction between underrepresented segments of society and educational institutions with attention to varying cultural backgrounds, communication patterns, social networks, leadership and administrative styles.

Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 520. Organizational Behavior and Change in Education
This course seeks to interpret and analyze observed organizational processes, behavior, and potential solutions using theoretical insights. The course relies on seminar discussions, theory applications, and an organizational change design project and evaluation research design.

Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 522. Communication and Educational Leadership
This course analyzes popular narratives on education and practices persuasive, rhetorical strategies for using those narratives to shape public expectations of educators, students, and schools.

Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 525. District Office Administration: The Superintendency
An overview of the major concepts and theories that constitute the knowledge base in the superintendency, including public education governance, role characterizations and management responsibilities, the conditions of practice and contemporary challenges, the school organization, federal and state policy and superintendent-school board relations.

Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 530. Assessment, Testing and Evaluation: Contexts and Implications for School Reform
This course provides a historical, analytical and empirical framework for understanding assessment, testing and evaluation in K-12 education. The context aims at exploring the current national and state accountability policy regimes in the U.S. particularly those linked to the Common Core Standards movement.

Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 535. Education Policy, Resource Allocation and School Reform
This course is designed for students to develop understanding of education policy. The course explores the formation, design, and implementation of school reform efforts across different levels of educational system.

Prerequisite: Acceptance into the Ed.D. Program
Normal Grade Rules
3 units

EDD 540. Education and Leadership in Global Context: Globalization & Narrative Ethics
This course provides global perspectives on education and leadership in contemporary society with emphasis on social, political, and economic factors that affect access and equity and the role of leadership.

Normal Grade Rules
3 units

EDD 585. Field Experience: Global Context
Lectures, field visits, and extended study of education and leadership in global context

Mandatory CR/NC/RP
3 units

EDD 591A. Proseminar I: Introduction to Doctoral Studies in Educational Leadership
This course provides an orientation to the doctoral program in educational leadership, doctoral studies more generally, and an overall introduction to educational leadership studies. The seminar will discuss the skills and practices needed to be successful doctoral students, both as consumers and producers of research.

Credit / No Credit
3 units
EDD 591B. Proseminar II - Practitioner-Led Research
The course content focuses on practice-led research methods and the problems they are best suited to answer. In practice-led research, the primary focus of the research is to advance knowledge about practice, or to advance knowledge within practice.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

EDD 591C. Professional Seminar III: Structuring & Writing a High Quality Dissertation
The focus of the seminar is to facilitate the production of a high quality dissertation. Candidates will gain a deep understanding of the expectations of dissertation writing by examining published dissertations and considering relevant applications to their own dissertation writing.
Mandatory CR/NC/RP
3 units

EDD 599. Dissertation
Over the final year of the program, students must enroll in 12 units of dissertation credit. This course carries degree credits to recognize work done on the dissertation and is to be used on the candidacy form and to fulfill graduation requirements.
Prerequisite: Acceptance into the Ed.D. Program
Repeatable for credit
Mandatory CR/NC/RP
1-12 units

UPPER DIVISION
EDD 1290R. Culminating Experience Supervision
Continued work on dissertation or project.
Prerequisite: Outstanding RP grade in a preceding semester in a project or thesis class
Note: No Degree Credit.
No Degree Credit
1 unit
Education - Educational Leadership, Department of Courses

ADMINISTRATION AND HIGHER EDUCATION

UPPER DIVISION

EDAD 160. 1st Generation College Students Pathways
This course is designed to review and discuss research-based issues of educational equity and the experience of first-generation college students pathways to undergraduate and graduate school. Students will also have opportunities to engage research, theory, and practice through introductory approaches to qualitative research method called autoethnography.
Prerequisites: Passage of the Writing Skills Test (WST) or ENGL/100A with a C or better (C- not accepted), 100W is strongly recommended as a pre-requisite or co-requisite, Upper division standing, Completion of core general education
Normal Grade Rules
3 units

EDAD 200. The School Manager
Management skills for leading effective school organizations. Present and emerging issues in our society and how they relate to schooling; Governance of education.
Prerequisite: Admission to Graduate Division.
Normal Grade Rules
3 units

EDAD 201. The School Leader
Leadership as principal and program administrator in a variety of settings. Promotion of successful learning. Instructional program administration. Personnel functions at school level. Group problem solving and decision-making
Prerequisite: Admission to Graduate Division
Normal Grade Rules
3 units

EDAD 202. The Educator
Prerequisite: Admission to Graduate Division.
Repeatable for credit
Normal Grade Rules
3 units

EDAD 203. The School Human Resources Administrator
Certificated staff supervision and staff development. Organization development, staff motivation and personnel management functions at the district level.
Prerequisite: Admission to Graduate Division.
Normal Grade Rules
3 units

EDAD 204. School Fiscal and Legal Leadership
Prerequisite: EDAD 200 and admission to Graduate Division
Normal Grade Rules
3 units

EDAD 205. The School Leader in the Community
Mobilization of community and public agency resources. Response to cultural and socio-economic diversity in the community. Communication with the community.
Prerequisite: Admission to Graduate Division.
Normal Grade Rules
3 units

EDAD 206. Advocate for All Students
Administration of programs for handicapped, economically disadvantaged and other exceptional students. Needs assessment and goal setting. Preparation of proposals for competitive funding to foundations and public agencies.
Prerequisite: Admission to Graduate Division.
Normal Grade Rules
3 units

EDAD 221A. Research Seminar Ed Leadership
To provide an overview of the theory, procedures, application, and use of research in educational settings. To deepen your understanding of the ways that educational research can be brought to bear on the challenges of practice.
Normal Grade Rules
3 units

EDAD 221B. Research Seminar Ed Leadership: Methods
To provide an overview of theory, procedures, application, and research in educational settings. To assist in the study of a specific area of applied research from the current professional literature and in the development of a specific research proposal.
Prerequisite: EDAD 221A
Normal Grade Rules
3 units

EDAD 221C. Research Ed Leadership: Data Collection
To provide an overview of and support during data collection, data organization, and preliminary analyses of findings. To assist in the study of a specific area of applied research from the current professional literature to carry out a specific research project.
Prerequisites: EDAD 221A and EDAD 221B
Normal Grade Rules
3 units

EDAD 242A. Fieldwork: Effective Leadership
This fieldwork course focuses on dispositions of effective educational leadership and provides for the application of administrative skills in various educational settings in instructional leadership, school management, personnel management, and business management.
Prerequisite: Program director consent.
Repeatable for credit
Credit / No Credit
3 units

EDAD 242B. Fieldwork: Instructional Leadership
This fieldwork course focuses on dispositions of effective instructional leadership and provides for the application of administrative skills in various educational settings in instructional leadership, school management, personnel management, and business management.
Prerequisite: Program director consent.
Repeatable for credit
Credit / No Credit
6 units

EDAD 242C. Fieldwork: Assessing Resources
This fieldwork course focuses on the application of administrative skills in various educational settings in instructional leadership, school management, personnel management, and business management. Leadership skills will be developed for the management of school change initiatives.
Prerequisite: EDAD 242A and EDAD 242B
Credit / No Credit
6 units
EDAD 242D. Fieldwork: Advocacy
This fieldwork course focuses on dispositions of critical leadership while advocating for all students and provides for the application of administrative skills in various educational settings in instructional leadership, school management, personnel management, and business management. 
Prerequisite: EDAD 242A, EDAD 242B, and EDAD 242C
Credit / No Credit
6 units

EDAD 242H. Educational Field Work in Higher Education
Designed to provide opportunity for supervised field experience in administration in community colleges and universities.
Repeatable for credit
Credit / No Credit
3 units

EDAD 253. Seminar in Administration in Educational Settings
Analysis of practical problems in educational administration. Application of planning, evaluation and research methodologies to problems in education.
Prerequisite: Completion of all other courses in the administrative credential sequence and EDLD 221.
Repeatable for credit
Normal Grade Rules
3 units

EDAD 270. Administrative Assessment and Induction
Assessment activities for development of Professional Development Action Plan. Development of a plan with official district representative, student, mentor and university supervisor.
Prerequisite: Admission to Professional Services Credential Program.
Credit / No Credit
2 units

EDAD 275A. The Successful School
Based on problem approach to educational administration through exploration of essential questions dealing with leadership in successful schools. Challenged to answer questions/problems in a way that continues development as an educational leader. Challenged to raise questions/problems that you feel are essential.
Prerequisite: EDAD 270 and admission to Professional Services Credential Program.
Note: This course satisfies graduate-level GWAR in this master's program.
Normal Grade Rules
GE: GWAR
2 units

EDAD 275B. Improving Schools From Within and Without
One of the courses in the core program of the Professional Credential Program. Assessment and improvement of school level learning support systems; development, supervision and evaluation of certificated staff.
Prerequisite: EDAD 270 and admission to the Professional Services Credential Program.
Normal Grade Rules
6 units

EDAD 275C. Building Equity in Diverse Communities
One of the courses in the core program of the Professional Credential Program. Exploring leadership behaviors that maximize learning for all students.
Prerequisite: EDAD 270 and EDAD 275B.
Normal Grade Rules
2 units

EDAD 275D. Politics and Economics of Education
One of the courses in the core program of the Professional Credential Program. School, district, state and federal governance, and management; Private sector/public sector financial relationships and school/community pressure groups.
Prerequisite: EDAD 270 and admission to the Professional Services Credential Program.
Normal Grade Rules
2 units

EDAD 285A. Advanced Fieldwork/Peer Coaching/Mentoring
Supervised advanced field experiences for school administrators. Peer coaching skills are applied to specialization areas. May not be repeated in the same semester.
Prerequisite: EDAD 270, admission to Graduate Division and admission to the Professional Services Credential Program.
Repeatable for credit
Credit / No Credit
2-6 units

EDAD 298. Individualized Studies in Education
Supervised study in school administrations for both the Preliminary and Professional Services Credential Programs.
Prerequisite: Admission to Graduate Division; EDAD 200 or EDAD 270, advisor consent.
Repeatable for credit
Mandatory CR/NC/RP
1-4 units
SPECIAL EDUCATION

LOWER DIVISION

EDSE 014A. American Sign Language I
Introductory course covering basic vocabulary and grammatical structures, appropriate cultural and linguistic behaviors within the deaf community and basic information about the deaf community.
Normal Grade Rules
3 units

EDSE 014B. American Sign Language II
Continuation of EDSE 14A. Covers additional basic vocabulary and grammatical structures, cultural and linguistic behaviors within the deaf community and information about the deaf community.
Prerequisite: EDSE 14A or instructor consent.
Normal Grade Rules
3 units

EDSE 102. Speech, Language & Typical, Atypical Dev
Developmental levels of speech, language, and communicative competence. Dialectal variations. Second language acquisition. Communication disorders. Language assessment and development. GE Area: S
Prerequisite: Upper Division Standing or Instructor Consent
Normal Grade Rules
GE: S
3 units

EDSE 104. Atypical Development in Young Children
Historical and philosophical background of intervention theories of learning related to young children with high risk development. Skills and techniques to promote optimal environments and appropriate methods for early intervention and stimulation of young children with special needs.
Prerequisite: CD 60 (or equivalent).
Normal Grade Rules
3 units

EDSE 105. Supervision Induction Plan Evaluation
Supervised observation, support and feedback for new special education teachers and evaluation of the induction plan.
Prerequisite: Department consent.
Repeatable for credit
Credit / No Credit
6 units

EDSE 105X. Intern Support Seminar
Discussion about challenging aspects of Interns’ jobs and a focus on problem solving. Collaboration and effective practices for collaborative group work is addressed. Interns learn to collaboratively interact with others, and to provide support to each other.
Prerequisite(s): Enrollment in the Collaborative Intern Program and teaching with an Intern Credential.
Repeatable for credit
Credit / No Credit
1 unit

EDSE 108. Assessment and Evaluation: Atypical Young Children
Identification, description and assessment of atypical children ages birth through 8 years. Introduction to early intervention and collaboration.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 110. Autism Spectrum Disorders
EDSE 110 provides an overview to autism spectrum disorders and examines theoretical foundations and applications of evidence-based best practices (EBPs) for students on the Autism Spectrum.
Prerequisite: Special Education Minor
Normal Grade Rules
3 units

EDSE 115. Introduction to Deaf Culture
This course is an introduction to the American Deaf Culture and provides a comprehensive analysis of how Deaf people are understood from a cultural perspective. The identities, contributions and experiences of Deaf people are explored in educational and linguistic context.
Prerequisite: EDSE 014A or EDSE 102
Normal Grade Rules
3 units

EDSE 124. Methodologies for Eng Learners w/ out Dis
Examines unique considerations and approaches to working with culturally and linguistically diverse students with special needs. Discussion and application course, emphasizing teaching and learning of language skills and content to English Learners (EL’s) with and without disabilities. Focus on legislation requirements, strategies to deliver sheltered instruction, materials, and resources. Candidates become proficient in using the Sheltered Instruction Observation Protocol for English Language Learners. GE Area: V
Prerequisite: Upper Division Standing
Normal Grade Rules
GE: V
3 units

EDSE 154. Practicum and Student Teaching in Special Education
Field-based course to measure competency in a special education setting.
Prerequisite: Department consent.
Repeatable for credit
Credit / No Credit
6 units

EDSE 180. Individual Studies
Supervised study of a specific problem or topic.
Prerequisite: Upper Division Standing and instructor consent.
Repeatable for credit
Credit / No Credit
1-4 units

EDSE 192A. Including and Supporting Students
Preparation for teaching students with disabilities in general education; provides intervention strategies prior to referral for special education with policies and procedures regarding placement of and services for students with disabilities, either in special education or within an inclusive classroom.
Prerequisites: Department consent
Normal Grade Rules
3 units

GRADUATE

EDSE 206A. Assessment Strategies for M/S
Strategies for comprehensive assessment of students from diverse backgrounds and with a variety of language and cognitive skills for the purpose of making instructional decisions. Required field experiences and an emphasis on developing effective communication practices and collaborative partnerships.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 209. Educating Students with Emotional Disorders
Identification of students with emotional disorders, effective models of instruction, educational theories, teaching strategies and positive behavior support.
Prerequisite: Department consent.
Corequisite: EDSE 105 or instructor consent.
Normal Grade Rules
3 units

EDSE 213A. Curriculum, Instruction and Transition
Exploration of instructional practices and current issues for students with moderate-severe disabilities and English Learners with moderate-severe disabilities. Curriculum design aligned with content standards that promote life skills and successful student transition into school and community settings.
Prerequisite: EDSE 206A and department consent.
Normal Grade Rules
3 units
EDSE 214A. Augmentative and Alternative Comm Strat
The use of augmentative and alternative communication (AAC) devices and strategies for assessing and instructing individuals with complex communication needs in home, school, and community settings, and computer-based technology to facilitate the teaching and learning process. Prerequisite: Department consent. Normal Grade Rules 3 units

EDSE 215. Assessment And Evaluation of Individuals with Mild/Moderate Disabilities
Formal and non-formal evaluation methods to assess students with mild/moderate disabilities for first and second language learners. Includes standardized and alternative assessment, tools and practices, case studies, report development, and a comprehensive understanding of related research. Prerequisite: Department consent. Normal Grade Rules 3 units

EDSE 216A. Teaching Reading and Language Arts
Emphasis on socio-cultural propensities of diverse groups and theories of culturally relevant pedagogy and a model of teaching reading and writing that is based in scientific research. Prerequisite: Department consent. Normal Grade Rules 3 units

EDSE 217A. Directed Teaching I
Supervised teaching experience in educational settings for students with mild to moderate disabilities. Concurrent seminar. Prerequisite: Department consent. Credit / No Credit 6 units

EDSE 217B. Directed Teaching II
Supervised teaching experience in educational settings for students with mild to moderate disabilities. Concurrent seminar. Prerequisite: Completion of prescribed credential program including EDSE 217A and departmental consent. Credit / No Credit 6 units

EDSE 217D. Advanced Directed Teaching
Supervised teaching experience in educational settings for students with disabilities. Prerequisite: Departmental consent. Repeatable for credit Credit / No Credit 3 units

EDSE 218A. ASD: Moderate to Severe Disabilities
Theoretical foundations and application of evidence-based best practices for students with ASD and M/S disabilities including social language interventions, social stories, integrated playgroups, positive behavior support, self-advocacy skills inclusive education, recreation and leisure, and special interventions for young children. Prerequisite: Department consent. Normal Grade Rules 3 units

EDSE 218B. ASD: Mild to Moderate Disabilities
Theoretical foundations and application of evidence-based best practices for students with ASD and M/M disabilities including social language interventions, social stories, integrated playgroups, positive behavior support, self-advocacy skills, inclusive education, recreation and leisure, and special interventions for young children. Prerequisite: Department consent. Normal Grade Rules 3 units

EDSE 218C. ASD: Collaboration and Implementation of Best Practices
Focus on collaboration and understanding roles of service providers for students with autism spectrum disorders. Team work and strategies for working with educational professionals and parents or significant others in the life of the students with autism spectrum disorders. Prerequisite: Department consent. Normal Grade Rules 3 units

EDSE 220. Research Seminar on Exceptional Individuals
Applied research or projects in the field of special education. Prerequisite: Department consent. Normal Grade Rules 3 units

EDSE 221. Intervention for Young Children with Disabilities and Delays
Intervention strategies for young children with special needs; theory and design of content; linkage between assessment, intervention and evaluation; inclusion of motor, adaptive, cognitive communication and social skills development; attention to multicultural/linguistic considerations. When content changes may be repeated. Prerequisite: Department consent. Normal Grade Rules 3 units

EDSE 224. Methodologies for Second Language Learners in Special Education Programs
Examines the unique considerations, legislation, and approaches to working with culturally and linguistically diverse students with special education needs. Prerequisite: Department consent. Normal Grade Rules 1-3 units

EDSE 228A. Topics in Collaboration and Transition
Strategies for effective communication and collaboration practices with members of the various teams that plan and serve students receiving special education services. Emphasis on planning transitional life experiences across the lifespan. Prerequisite: Department consent. Normal Grade Rules 3 units

EDSE 230A. Curriculum and Instruction M/M
Focus on special education alignment with content standards, integrated curriculum design, information literacy, evidence-based practices for differentiated classroom instruction, multiple intelligences and modeling and integrating habits of mind. Prerequisite: Department consent. Normal Grade Rules 3 units

EDSE 231. Issues and Research in Special Education
Evaluation of research on characteristics and methods of identification of individuals with disabilities; including minority and underachieving students. Current funding issues, research models, research on individuals with disabilities and instructional organization are reviewed and analyzed. Prerequisite: Department consent. Repeatable for credit Normal Grade Rules 3 units

EDSE 231X. Educational Research: Design and Implementation
EDSE 231X is a continuation of the process for the development of educational research, implementation of the study, and writing for the Masters of Arts project or thesis started in EDSE 231. Prerequisites: EDSE 231 and EDSE 285. Normal Grade Rules 3 units

EDSE 234. Advanced Fieldwork in Special Education
Application of knowledge and skills in classrooms. Examination of ethical practices, work with parents, challenges in application, and professional growth. Prerequisite: Department consent. Repeatable for credit Credit / No Credit 6 units
EDSE 235A. Movement, Mobility, Sensory and Health
Identifies the special services available to students with moderate/severe disabilities and defines the implementation of these services in the school and community. The course will define the role, function and services provided by professionals available to meet the health care and educational needs of students with multiple disabilities. The course will also address appropriate assessment and referral practices for teachers, seizures protocols, basic first aid and universal precautions, medication administration, positioning and handling for students with severe disabilities and feeding techniques.
Prerequisite: Department consent.
Normal Grade Rules
3 units

EDSE 241. Emerging Technology for All Learners
Effective use of the computer to meet exceptional learning needs, including special education software evaluation, word processing for written language development, logo, individualized lessons with graphics and speech and database management for cognitive and language development.
Prerequisite: Department consent.
Repeatable for credit
Normal Grade Rules
3 units

EDSE 279. Managing Behavior and Emotional Problems of Students in Special Education
Introduction to the application of various management approaches to individual and group instruction of exceptional individuals.
Prerequisite: Department consent.
Repeatable for credit
Normal Grade Rules
3 units

EDSE 281. Student Teaching with Deaf and Hard of Hearing Students
Classroom teaching with hearing impaired students in an educational setting under supervision of the instructor.
Prerequisite: Department consent.
Repeatable for credit
Credit / No Credit
6 units

EDSE 285. Seminar on Issues Related to Teaching Exceptional Individuals
Issues, trends and research in educating handicapped students.
Prerequisite: Department consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
3 units

EDSE 298. Special Studies
Supervised study in a specific field of special education; to be taken only with the consent of the division head.
Prerequisite: Department consent.
Repeatable for credit
Mandatory CR/NC/RP
1-3 units

EDSE 299. Master’s Thesis
Supervised thesis in the field of special education, to be taken only with chair consent.
Prerequisite: Department consent.
Repeatable for credit
Mandatory CR/NC/RP
3 units
EDEL 102. Psychological Foundations of Education
Cognitive, affective and social/emotional development related to school settings. Theories of development, learning and instruction critically examined. Other topics include individual differences, measurement, evaluation, instructional goals, classroom management and diversity in the classroom.
Prerequisite: Upper division standing. 
Normal Grade Rules  
3 units

EDEL 103. Social-Multicultural Foundations of Education
Foundational preparation focused on implications of social, cultural, linguistic and economic diversity on teaching and learning. Emphasis on understanding the implications of history and social context on the educational endeavor in a pluralistic and democratic society.
Prerequisite: Upper division standing. 
Normal Grade Rules  
3 units

EDEL 108A. Curriculum: Reading/Language Arts
Elementary school language/literacy acquisition in culturally diverse classrooms; emphasis on listening, speaking, reading and writing within the context of theory and practice. May be repeated for different subtitle.
Prerequisite: Upper division standing. 
Repeatable for credit  
Normal Grade Rules  
2-6 units

EDEL 108B. Curriculum: Science
Elementary school science curriculum and theoretical approaches; emphasis on materials, methods, content and evaluation procedures for teaching science in elementary and middle schools in a multicultural and technological society. May be repeated for different subtitle.
Prerequisite: Upper division standing. 
Repeatable for credit  
Normal Grade Rules  
1-3 units

EDEL 108C. Curriculum: Social Studies
Elementary school social studies curriculum and instruction with emphasis on the influence of ethnic, linguistic, cultural, economic, gender and disability factors on present day culture.
Prerequisite: Upper division standing. 
Repeatable for credit  
Normal Grade Rules  
1-3 units

EDEL 108D. Curriculum: Mathematics
Elementary school mathematics curriculum and methodology relationships between instructional materials and how children construct knowledge; the role of technology and issues that bear on the teaching of school mathematics. May be repeated for different subtitle.
Prerequisite: Upper division standing. 
Repeatable for credit  
Normal Grade Rules  
1-3 units

EDEL 108E. Teaching Reading in Linguistically and Culturally Diverse Classrooms
Prerequisite: LLD 108, ENGL 103 or LLD 107. 
Note: Should be taken in final semester of undergraduate program. 
Repeatable for credit  
Normal Grade Rules  
1-3 units

EDEL 143A. Beginning Student-Teaching (Phase I)
Role of state and local government in education. Clinical observation of classroom, school and district organization. Emphasis on lesson planning.
Prerequisite: Upper division standing. 
Repeatable for credit  
Credit / No Credit  
1-6 units

EDEL 143B. Advanced Student-Teaching (Phase II)
Practicum in public school classrooms at two grade levels for student teaching experience; includes field and campus seminar. Supervision by College of Education faculty.
Prerequisite: EDEL 143A. 
Repeatable for credit  
Credit / No Credit  
1-10 units

EDEL 294. Research and Practices in Health and Special Education
Introduces students to issues in health and special education that are necessary for them to know and be able to meet their legal and professional responsibilities. The course includes identifying, referring, and supporting students who may be at risk of health problems and have special needs. Students will also learn about effective instruction in health and special education content and skill development and how to create and support a safe and healthy environment for learning for all students.
Prerequisite: Upper Division Standing  
Normal Grade Rules  
3 units
EDSC 173. Psychological Foundations of Secondary Teacher Education
Application of developmental cognitive and socio-cultural theories of adolescent psychology and culture as a rationale for teaching and learning.
Prerequisite: Program director consent.
Normal Grade Rules
3 units

EDSC 182. Assessment and Evaluation
Principles and practices of measurement and evaluation. Instructional objectives as criteria; construction, selection and use of evaluation instruments. Interpretation of data.
Prerequisite: Program director consent.
Normal Grade Rules
3 units

EDSC 184X. Student Teaching I
Supervised teaching of public middle or high school students. In-class experience ranging from observation to classroom teaching. Emphasis on application of theories examined in foundation courses.
Prerequisite: Program director consent. Repeatable for credit
Credit / No Credit
2-6 units

EDSC 184Y. Student Teaching II
Minimum 80-120 class periods of classroom teaching in grades K-12. Related school activities.
Prerequisite: Joint approval of major advisor, program director and field placement coordinator. Repeatable for credit
Credit / No Credit
2-6 units

EDSC 184Z. Student Teaching III
Minimum 80-120 class periods of classroom teaching in grades K-12. Related school activities.
Prerequisite: Joint approval of major advisor, program director and field placement coordinator. Repeatable for credit
Credit / No Credit
1-6 units

EDSC 246. Learning Communities: Methods and Management
Examine factors that contribute to a healthy, inclusive, and collaborative classroom community. Through critical reflection on their field experiences, teacher credential candidates develop a broad view of classroom management, and develop their own approach to building a learning community. Prerequisite: EDSC 184X.
Normal Grade Rules
3 units

TEACHER EDUCATION

UPPER DIVISION

EDTE 162. Meeting the Needs of Second Language Learners
Second Language acquisition theories and application of teaching in diverse secondary classrooms. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

EDTE 166. Pre-Professional Experience
Observation of learners; service as teacher assistants in public school classrooms; tutoring. May be repeated once. Prerequisite: Upper division standing. Repeatable for credit
Credit / No Credit
1-3 units

EDTE 180. Individual Studies
Supervised study in specific fields of elementary or secondary education not covered by offered courses. Prerequisite: Division head consent. Repeatable for credit
Credit / No Credit
1-3 units

EDTE 190. Health Education for the Classroom Teacher
Current problems of individual, family and community health. Theories, organization, methods and materials for teaching health education. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GRADUATE

EDTE 200. Academic Writing Seminar for Professional Educators
This advanced writing seminar is designed to support COE students in their academic and professional writing. Students will receive support in the writing process and explicit instruction on the conventions of academic and professional writing via class sessions, regular individual conferences, and online dialogue.
Mandatory CR/NC/RP
3 units

EDTE 201. Critical Issues in Education
A cross-disciplinary investigation of fundamental value issues of American education in a democratic society, considered in the context of the problems and prospects of world civilizations.
Normal Grade Rules
3 units

EDTE 208. Educational Sociology
Role of education in modern social, economic and political life. The school as institution. Problems in American life which affect and are affected by public schools.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

EDTE 210. Becoming a Reader at Any Age
Theory and practice of teaching beginning and struggling readers and writers, both native and nonnative English speakers.
Prerequisite: EDEL 108A or EDSC 138A.
Normal Grade Rules
3 units

EDTE 211. Developing Academic Language for Reading Across the Curriculum
Focus on comprehension across subject areas for first and second language learners: background knowledge, fluency, vocabulary, and metacognition.
Prerequisite: EDEL 108A or EDSC 138A.
Normal Grade Rules
3 units

EDTE 212. Leadership, Politics and Literacy Program Evaluation
Review of reading research, public policy and effective literacy programs for curriculum leaders.
Prerequisite: EDTE 216 and EDTE 217.
Notes: Open to MA candidates in Reading only.
Normal Grade Rules
3 units

EDTE 213. Multicultural Literature for Children and Young Adults
Literature for children and young adults that reflects diverse experiences and perspectives. Will address the role of this literature in classrooms.
Normal Grade Rules
3 units

EDTE 214. Learning in a High Tech Environment
Teaching and learning with high technology from student-centered perspectives. Lab activities, field observations and investigations in individual areas of specialization. Includes theory to practice, exploring new uses of technology, logistics, leadership roles. May not repeated in the same semester.
Prerequisite: EDIT 122 (or equivalent).
Repeatable for credit
Normal Grade Rules
3 units

EDSC 182. Assessment and Evaluation
Principles and practices of measurement and evaluation. Instructional objectives as criteria; construction, selection and use of evaluation instruments. Interpretation of data.
Prerequisite: Program director consent.
Normal Grade Rules
3 units

EDSC 184X. Student Teaching I
Supervised teaching of public middle or high school students. In-class experience ranging from observation to classroom teaching. Emphasis on application of theories examined in foundation courses.
Prerequisite: Program director consent. Repeatable for credit
Credit / No Credit
2-6 units

EDSC 184Y. Student Teaching II
Minimum 80-120 class periods of classroom teaching in grades K-12. Related school activities.
Prerequisite: Joint approval of major advisor, program director and field placement coordinator. Repeatable for credit
Credit / No Credit
2-6 units

EDSC 184Z. Student Teaching III
Minimum 80-120 class periods of classroom teaching in grades K-12. Related school activities.
Prerequisite: Joint approval of major advisor, program director and field placement coordinator. Repeatable for credit
Credit / No Credit
1-6 units

EDSC 246. Learning Communities: Methods and Management
Examine factors that contribute to a healthy, inclusive, and collaborative classroom community. Through critical reflection on their field experiences, teacher credential candidates develop a broad view of classroom management, and develop their own approach to building a learning community. Prerequisite: EDSC 184X.
Normal Grade Rules
3 units

TEACHER EDUCATION

UPPER DIVISION

EDTE 162. Meeting the Needs of Second Language Learners
Second Language acquisition theories and application of teaching in diverse secondary classrooms. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

EDTE 166. Pre-Professional Experience
Observation of learners; service as teacher assistants in public school classrooms; tutoring. May be repeated once. Prerequisite: Upper division standing. Repeatable for credit
Credit / No Credit
1-3 units

EDTE 180. Individual Studies
Supervised study in specific fields of elementary or secondary education not covered by offered courses. Prerequisite: Division head consent. Repeatable for credit
Credit / No Credit
1-3 units

EDTE 190. Health Education for the Classroom Teacher
Current problems of individual, family and community health. Theories, organization, methods and materials for teaching health education. Prerequisite: Upper division standing.
Normal Grade Rules
3 units

GRADUATE

EDTE 200. Academic Writing Seminar for Professional Educators
This advanced writing seminar is designed to support COE students in their academic and professional writing. Students will receive support in the writing process and explicit instruction on the conventions of academic and professional writing via class sessions, regular individual conferences, and online dialogue.
Mandatory CR/NC/RP
3 units

EDTE 201. Critical Issues in Education
A cross-disciplinary investigation of fundamental value issues of American education in a democratic society, considered in the context of the problems and prospects of world civilizations.
Normal Grade Rules
3 units

EDTE 208. Educational Sociology
Role of education in modern social, economic and political life. The school as institution. Problems in American life which affect and are affected by public schools.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

EDTE 210. Becoming a Reader at Any Age
Theory and practice of teaching beginning and struggling readers and writers, both native and nonnative English speakers.
Prerequisite: EDEL 108A or EDSC 138A.
Normal Grade Rules
3 units

EDTE 211. Developing Academic Language for Reading Across the Curriculum
Focus on comprehension across subject areas for first and second language learners: background knowledge, fluency, vocabulary, and metacognition.
Prerequisite: EDEL 108A or EDSC 138A.
Normal Grade Rules
3 units

EDTE 212. Leadership, Politics and Literacy Program Evaluation
Review of reading research, public policy and effective literacy programs for curriculum leaders.
Prerequisite: EDTE 216 and EDTE 217.
Notes: Open to MA candidates in Reading only.
Normal Grade Rules
3 units

EDTE 213. Multicultural Literature for Children and Young Adults
Literature for children and young adults that reflects diverse experiences and perspectives. Will address the role of this literature in classrooms.
Normal Grade Rules
3 units

EDTE 214. Learning in a High Tech Environment
Teaching and learning with high technology from student-centered perspectives. Lab activities, field observations and investigations in individual areas of specialization. Includes theory to practice, exploring new uses of technology, logistics, leadership roles. May not repeated in the same semester.
Prerequisite: EDIT 122 (or equivalent).
Repeatable for credit
Normal Grade Rules
3 units
EDTE 216. Ongoing Assessment in Your Classroom
Prevention and correction of reading/writing/language difficulties with emphasis on diagnosis and evaluation.
Prerequisite: EDDEL 108A, EDES 138A or instructor consent.
Normal Grade Rules
3 units

EDTE 217A. Reading Practicum I
For Reading/Language Arts Specialist Credential or Reading Certificate candidates. In a supervised after-school program, candidates work with struggling readers and implement effective ongoing assessment and instructional strategies to meet the need of diverse struggling readers.
Prerequisites: EDTE 210, EDTE 211, EDTE 216, EDTE 292.
Misc/Lab: Lecture 2.5 hours/Activity 1.0 hours
Credit / No Credit
3 units

EDTE 217B. Reading Practicum 2
For Reading/Language Arts Specialist Credential or Reading Certificate candidates. In a supervised summer school program, candidates work with struggling readers and implement effective ongoing assessment and instructional strategies to meet the need of diverse struggling readers.
Prerequisites: EDTE 210, EDTE 211, EDTE 216, EDTE 292.
Misc/Lab: 2.5 hour Seminar/1.0 hour activity
Credit / No Credit
3 units

EDTE 223. The Politics of Literacy
State, national and global decisions about literacy instruction and the impact on the profession.
Prerequisite: Teaching experience or English major.
Normal Grade Rules
3 units

EDTE 224. Seminar in Educational Psychology
Role of psychology in education. Contributions of educational research to current classroom practice and curriculum design. Applications of educational psychology research to current problems in education. Theoretical and practical approaches to understanding learning and teaching.
Prerequisite: EDES 172A and EDEL 102.
Normal Grade Rules
3 units

EDTE 230. Mathematics: Teaching Common Core (K-3)
Course focuses on the mathematical knowledge for teaching K-3 Common Core content standards and mathematical practices within the domains of number, operations, and algebraic thinking. Additional emphasis on pedagogical strategies to foster motivation, engagement, and development of academic language.
Normal Grade Rules
3 units

EDTE 231. Math Seminar: Common Core (grades K-3)
Seminar focuses on implementation of Common Core standards and mathematical practices within teachers’ specific curricular and school context. Emphasis on classroom implementation of high leverage mathematical practices within foundational K-3 content domains of number and operations, measurement, geometry, and data.
Normal Grade Rules
3 units

EDTE 232. Mathematics: Teaching Common Core (4-8)
Course focuses on mathematical knowledge for teaching 4th -8th grade Common Core content standards and mathematical practices within the domains of number, operations, proportional relationships, and algebra. Additional emphasis on strategies to foster motivation, engagement, and development of academic language.
Normal Grade Rules
3 units

EDTE 233. Math Seminar: Common Core (grades 4-8)
Seminar focuses on implementation of Common Core standards and mathematical practices within teachers’ specific curricular and school context. Emphasis on classroom implementation of high leverage mathematical practices within foundational 4-8 content domains of algebraic thinking, measurement, geometry, statistics, and probability.
Normal Grade Rules
3 units

EDTE 242R. Field Experience - Reading/Language Arts Specialist
Conducting reading/language arts assessments; designing, organizing and implementing reading programs; assisting teachers with reading programs.
Credit / No Credit
1-4 units

EDTE 244. Seminar in School Curriculum
Curriculum in the elementary and middle level school. Includes current issues and practices, curriculum planning and interrelation of theory and practice in elementary education curriculum.
Prerequisite: EDTE 208.
Normal Grade Rules
3 units

EDTE 246. Classroom Management and Governance
Study of theory, practice and research related to effective communication in bilingual/cross-cultural settings.
Prerequisite: EDDEL 102, EDES 172A and EDES 173, or instructor consent.
Normal Grade Rules
1-3 units

EDTE 247. Supervisory/Coaching Practices for Teacher Leaders
Development of coaching/supervisory behaviors which encourage the development of reflective practitioners. Includes understanding of principles and methods of observing teachers and children, and how to record, analyze and share data to best meet their needs.
Prerequisite: Two years of teaching experience.
Normal Grade Rules
3 units

EDTE 250. Qualitative Research in Education
The role of qualitative research in education and society. Historical theoretical groundings, ethical considerations, procedures in development and evaluation of research proposals, techniques of research data analysis.
Prerequisite: EDEL 221 or instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
3 units

EDTE 260. Critical Perspectives on Schooling for a Pluralist Democracy
Critical study of theory, practice and research related to effective communication in cross-cultural, multilingual settings.
Prerequisite: EDEL 103.
Normal Grade Rules
3 units

Study of cross-cultural communication for teachers with a focus on theory and practice related to language, culture and narrative in educational settings.
Prerequisite: EDTE 225 or instructor consent.
Normal Grade Rules
3 units

EDTE 262. Classroom Issues in the Language/Literacy Development of L2 Learners
Theories of first and second language acquisition and their application to teaching reading, writing and SDAIE in linguistically diverse classrooms.
Prerequisite: EDDEL 108A, EDES 138A or instructor consent.
Normal Grade Rules
3 units

EDTE 281. Philosophy of Education
Critical philosophical issues as they bear on education in a democratic society.
Normal Grade Rules
3 units
EDTE 290C. Research on Literacy Across the Curriculum for an Equitable Society
Emphasis on research/teacher inquiry with attention to research designs and methods from various disciplinary perspectives for the study of literacy. An historical look at three additional program themes: Reading and Writing Across Cultures and the Curriculum; Second Language Learners; and The politics of Literacy.
Pre/Corequisite: EDTE 290A or EDTE 290B.
Note: This course satisfies graduate-level GWAR in this master’s program.
Repeatable for credit
Normal Grade Rules
GE: GWAR
3 units

EDTE 292. Writing Across Cultures and the Curriculum
Research, theory and practice of writing development of instruction for native and nonnative English speakers. Emphasis on writing in an integrated curriculum.
Prerequisite: EDEL 108A or instructor consent.
Note: This course satisfies graduate-level GWAR in this master’s program.
Normal Grade Rules
GE: GWAR
3 units

EDTE 298. Special Studies in Education
Supervised study in a specific educational field.
Prerequisite: Consent of program director.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

EDTE 299. Master’s Thesis
Supervised thesis in the field of education.
Prerequisite: Admission to candidacy for the master’s degree.
Repeatable for credit
Mandatory CR/NC/RP
1-6 units

UPPER DIVISION

EDTE 1290R. Culminating Experience Supervision
Continued work on thesis or project beyond minimum required units, for cases in which final deliverables are still in progress.
Prerequisite: RP grade in a preceding thesis or project semester.
Note: No Degree Credit.
Mandatory CR/NC/RP
1 unit
Electrical Engineering
Department Courses

ELECTRICAL ENGINEERING

LOWER DIVISION

EE 030. Introduction to Programming Microcontrollers for Electrical Engineering
Introduction to C language program development using an integrated development environment. Program development includes program design, development, debugging, testing and documentation. Electrical engineering application examples dealing with circuits, systems, data converters and signal processing concepts are used throughout the course.
Pre-requisite: ENGR 10
Misc/Lab: Lecture 3 hours/Lab 3 hours
Normal Grade Rules
3 units

EE 097. Introductory Electrical Engineering Laboratory
Basic instruments and experimental techniques in electrical engineering. Oscilloscopes, function generators, frequency counters and multiple-use meters. Measurements of voltage, current, frequency response, transient response and computer simulation of circuits.
Misc/Lab: Lab 3 hours.
Normal Grade Rules
1 unit

EE 098. Introduction to Circuit Analysis
Circuit laws and nomenclature, resistive circuits with DC sources, ideal operational amplifier, controlled sources, natural and complete response of simple circuits, steady-state sinusoidal analysis and power calculations.
Prerequisites: ENGR 10 and Phys 51 with a C or better. Allowed Declared Majors: Any Engineering.
Corequisite: MATH 133A or MATH 123
Normal Grade Rules
3 units

EE 098H. Honors Introduction to Circuit Analysis
A project and design based approach to the introduction of circuit laws and analysis methods such as nodal analysis, superposition, equivalent circuits and phasor analysis for circuits involving RLC and operational amplifiers.
Prerequisite: ENGR 10 and Phys 51 with a B or better
Corequisite: Math 133A or Math 123
Normal Grade Rules
3 units

EE 098W. Introduction to Circuit Analysis Workshop
Workshop designed to help all students excel in EE98. Students work in groups on challenging circuit analysis problems to help them understand EE 98 concepts more deeply and lay the groundwork for success in engineering courses. Corequisite: EE 98 or EE 98H
Credit / No Credit
1 unit

UPPER DIVISION

EE 101. Circuits Concepts and Problem Solving
Development of skill and proficiency in solving electric circuit, calculus, and differential equation problems; techniques for analyzing DC circuits, AC circuits, and transients. Well prepared students should consider credit by examination for this course.
Prerequisite: EE 98 (with a grade of “C” or better).
Misc/Lab: Activity 2 hours.
Repeatable for credit
Credit / No Credit
1 unit

EE 102. Probability and Statistics in Electrical Engineering
Introduction to probability and statistical analysis for undergraduate EE students. Discrete probability theory, theory of single random variables, introduction to statistics and hypothesis testing, and EE applications.
Pre requisite: EE 112 with a grade of “C” or better. Allowed Declared Major: Electrical Engineering.
Normal Grade Rules
3 units

EE 104. Numerical Methods in Electrical Engineering
Prerequisite: EE110 and EE112 with a “C” or better.
Normal Grade Rules
3 units

EE 106. Fundamentals of Mechatronics Engineering
See ME 106.
Normal Grade Rules
3 units

EE 107. Introduction to System Design
Introduction to continuous-time signals, circuits and systems. Impulse response and convolution. Laplace and Fourier transforms. Frequency response, transfer function, poles/zeros, filtering. Application to passive and active circuits, and to basic control, communications, and bio-systems.
Prerequisite: EE 098 and MATH 133A (with grade of “C” or better) and Satisfactory Score on the Circuit Concepts and Problem Solving Placement Exam. Allowed Declared Majors: Engineering, Computer Engineering, Electrical Engineering.
Normal Grade Rules
1 unit

EE 110. Circuits and Systems
Continuous-time signals, circuits and systems. Impulse response and convolution. Laplace and Fourier transforms. Frequency response, transfer function, poles/zeros, filtering. Application to passive and active circuits, and to basic control, communications, and bio-systems.
Prerequisite: EE 098 and MATH 133A (with grade of “C” or better) and Satisfactory Score on the Circuit Concepts and Problem Solving Placement Exam. Allowed Declared Majors: Engineering, Computer Engineering, Electrical Engineering.
Normal Grade Rules
3 units

EE 110L. Continuous and Discrete Time Systems Lab
Matlab, LTspice, and Ipytho n used to solve realistic continuous and discrete time signals, circuits and systems problems. Application to passive and active circuits, to basic control, communications, and bio-systems.
Prerequisite: EE 098 and MATH 133A (with grade of “C” or better) and Satisfactory Score on the Circuit Concepts Placement exam.
Corequisite: EE110
Normal Grade Rules
1 unit

EE 110W. Circuits and Systems Workshop
Workshop designed to help all students excel in EE110. Students work in groups on challenging circuit analysis and systems problems to improve their understanding of concepts in EE110 and lay the groundwork for success in future EE courses. Prerequisite: EE98 and MATH 133A or MATH 123 with a C or better
Corequisite: EE110 and EE110L
Credit / No Credit
1 unit

EE 112. Introduction to Signal Processing
Prerequisite: EE 098 and MATH 133A (with grade of “C” or better) and Satisfactory Score on the Circuit Concepts and Problem Solving Placement Exam. Allowed Declared Major: Electrical Engineering.
Normal Grade Rules
3 units
**Academic Year 2019-2020**

Course Descriptions

**v1**

July 1, 2019

---

**EE 118. Digital Logic Circuit Design**

Fundamentals of digital logic design. Boolean logic, MU/Xes, DEMUXes, decoders, encoders, comparators, arithmetic blocks, flip-flops, counters, registers, RAMs/ROMs, PLDs and FPGAs. Design of a simple computer CPU. Schematic capture and Hardware Description Language (HDL), particularly, Verilog.

Prerequisite: EE98 and EE97 with a C or better. Allowed Declared Major: Electrical Engineering.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Normal Grade Rules 4 units

**EE 120. Microprocessor Based System Design**

Prerequisite: EE 118 with grade of "C" or better. Allowed Declared Major: Electrical Engineering.

Misc/Lab: Lecture 3 hours/lab 3 hours.

Normal Grade Rules 4 units

**EE 122. Electronic Design I**

Design of circuits based on OPAMPS, diodes, MOSFETs and BJTs, as applied to the contemporary issues of biomedical devices and power generation (solar cell modules), and power usage. Electronic CAD tools (LTPSICE) will be used extensively, PCB board design.

Prerequisite: EE 110 with grade of "C" or better, EE 97. Allowed Declared Majors: Electrical Engineering, Computer Engineering.

Misc/Lab: Lecture 4 hours/lab 3 hours.

Normal Grade Rules 4 units

**EE 124. Electronic Design II**

Analysis and design of Analog integrated circuits using Bipolar and CMOS transistors. Topics include current sources, active loads, differential amplifiers, frequency response, frequency compensation, output stages, feedback amplifiers and operational amplifiers.

Prerequisite: EE122 and EE128 with grade C or better. Allowed Declared Major: Electrical Engineering.

Misc/Lab: Lecture 3 hours/lab 3 hour.

Normal Grade Rules 4 units

**EE 125. Analog CMOS Integrated Circuits**

Analysis and design of analog CMOS integrated circuits. Voltage references, noise analysis, amplifiers and comparators, sample-and-hold circuits, switched-capacitor circuits and converters.

Prerequisite: EE 124.

Normal Grade Rules 3 units

**EE 127. Electronics for Biomedical Applications**

Study of the fundamental concepts of electrical circuits relevant to the use and design of biomedical instruments and devices currently used for patient care using several examples.

Prerequisite: EE 98 with C or better

Normal Grade Rules 3 units

**EE 128. Physical Electronics**

Review of semiconductor theory. Methods of device fabrication; p-n junctions; bipolar junction transistors; field-effect transistors (FETs); MOSFETs; and equivalent circuits.

Prerequisite: MATE 153 with a grade of "C" or better. Corerequisite: EE 122. Allowed Declared Major: Electrical Engineering.

Misc/Lab: Lecture 3 hours.

Normal Grade Rules 3 units

**EE 129. Introduction to Integrated Circuits Processing and Design**

See MATE 129.

Normal Grade Rules 3 units

**EE 130. Electric Machines and Drives**

This course introduces the theory of operation and the control of electro-mechanical machines including DC machines, DC brushless machines, and AC synchronous machines and their electric drive systems. Applications include robotics, electric vehicle, and electric power generation.

Prerequisite: EE 130 and EE 112 (with grade of "C" or Better)

Misc/Lab: Lecture 3 hours.

Normal Grade Rules 3 units

**EE 132. Theory of Automatic Controls**

Theory of linear feedback control systems. Transfer functions and block diagrams; root-locus techniques; frequency analysis techniques; compensation; transducers and servo-system elements.

Prerequisite: EE 110 with a grade of "C" or better. EE 112. Allowed Declared Major: Electrical Engineering.

Normal Grade Rules 3 units

**EE 133. Control and Electronics for Renewable Energy Systems**

This course introduces control methodology and electrical systems commonly used in renewable energy systems including wind turbines and solar panels. Topics include control of turbine, generator, peak power tracking for solar panels, and power conversion circuits.

Prerequisites: EE 110 and EE 112 (with grade of "C" or better) or ME 147 (with grade of "C" or better).

Normal Grade Rules 3 units

**EE 135. Semiconductor Power Electronics**

Study of power electronic circuits and applications including switch-mode regulators, AC-DC, DC-DC and DC-AC conversion, uninterruptible power supplies, variable speed drives, active filtering and harmonic cancellation, laboratory demonstrations. Applications include electric vehicle propulsion and spacecraft power systems.

Prerequisite: EE 122 with grade C or better

Normal Grade Rules 3 units

**EE 136. Embedded Control System Design**

Introduction to designing microcontroller-based embedded control systems using C programs to control input/output peripherals including general purpose I/Os, state machines, analog interfaces, pulse width modulation, digital filter implementation, design of control systems for motor, and interrupt concept.

Prerequisite: EE 112, EE 120 both with a C or better.

Normal Grade Rules 3 units

**EE 140. Principles of Electromagnetic Fields**

Prerequisites: EE 98, PHY5 52, MATH 133A or MATH 123 (all with a C or better). Allowed Declared Major: Electrical Engineering.

Normal Grade Rules 3 units

**EE 153. Introduction to Digital Signal Processing**

Digital signal processing fundamentals, discrete system theory, convolution, DFT, and design of IIR and FIR filters. MATLAB based lab exercises are used for verification of DSP principles, signal analysis, and design of filters for audio signals.

Prerequisite: EE 112.

Normal Grade Rules 3 units
**EE 160. Principles of Communication Systems**
Prerequisite: EE 112 with grade of ‘C’ or better.
Misc/Lab: Lecture 2 hours/lab 3 hours.
Normal Grade Rules
3 units

**EE 161. Digital Communication Systems**
Prerequisite: EE 102, EE 112. Allowed Declared Major: Electrical Engineering.
Normal Grade Rules
3 units

**EE 165. Photovoltaic Fabrication/Testing Lab**
See MATE 165.
Normal Grade Rules
1 unit

**EE 166. Design of CMOS Digital Integrated Circuits**
